Introduction

Cisco Unified Attendant Console Advanced is a Windows-based operator attendant console application for use exclusively with Cisco Unified Communications Manager. Cisco Unified Attendant Console Advanced emulates the functions of a manual telephone switchboard, and so enables attendant console operators to quickly accept incoming calls and efficiently dispatch them to recipients within an organization.

For more information, see the documents referred to in Related Documentation.

Features

Cisco Unified Attendant Console Advanced has the following basic features:

- Call queuing engine, with 100 Console queues supported
- The maximum number of system devices (including CT Gateway devices, Service devices, and Park devices) supported by a Cisco Unified Attendant Console Advanced Server is 1000. This total does not include Queue DDIs, which are CTI Route Points. The system devices can be distributed among up to 100 Queue Device Groups.
- Up to 50 concurrent operator client logins
- Busy Lamp Field (BLF)
- Blind and consultative transfers
- High availability (optional add-on)
- Directory size supported:
  - 500 speed dials per user
  - 125,000 full directory contacts
- Supported directory sources:
  - Active Directory 2012 R2 or Active Directory 2016
  - iPlanet Netscape 5.0
  - iPlanet Netscape 5.1
- View more information in Parked Calls pane
- Set calls to automatically connect to the Console without needing to answer them
- Turn off Busy Lamp Field Presence notifications
- Display statistics for each queue
- Display calls with an icon colored to match the queue they arrived from
- Operators can enter Unavailable mode when idle for longer than a defined period
- Click a special directory tab to create a Personal Directory Group
- Rearrange directory tabs by dragging
- Console configuration preferences saved in the server for use next session
- Option to enter the fields in an AND search in any order

Upgrading

Use the following table to determine whether your current Cisco Unified Attendant Console Advanced version and Edition can be upgraded to version 12.0.3.10.

<table>
<thead>
<tr>
<th>Your Cisco Unified Attendant Console Advanced version</th>
<th>Edition</th>
<th>Can be directly upgraded to version 12.0.3.10</th>
</tr>
</thead>
<tbody>
<tr>
<td>Pre-8.6.2</td>
<td>N/A</td>
<td>No</td>
</tr>
<tr>
<td>8.6.2</td>
<td>Business, Enterprise</td>
<td>Yes</td>
</tr>
<tr>
<td>9.0.1</td>
<td>Business, Enterprise, Premium</td>
<td>Yes</td>
</tr>
<tr>
<td>9.1.1</td>
<td>Business, Enterprise, Premium</td>
<td>Yes</td>
</tr>
<tr>
<td>10.0.1</td>
<td>All Editions</td>
<td>Yes</td>
</tr>
<tr>
<td>10.5.1</td>
<td>All Editions</td>
<td>Yes</td>
</tr>
<tr>
<td>10.5.2</td>
<td>All Editions</td>
<td>Yes</td>
</tr>
<tr>
<td>11.0.1</td>
<td>All Editions</td>
<td>Yes</td>
</tr>
<tr>
<td>11.0.2</td>
<td>All Editions</td>
<td>Yes</td>
</tr>
</tbody>
</table>

**Note**
If you upgrade from any older version to Cisco Unified Attendant Console Advanced 12, you will have to enter all existing administrator account and operator profile passphrases in CAPS.

Core Languages

The attendant console Client, Help and User Guide are available in English only.
System Requirements

Server - System Requirements

Cisco Unified Attendant Console Advanced server is supported in either of the following:

- Physical server
- VMware environment compliant with Cisco’s Specification-Based Hardware Support program.

Physical Server Requirements

Minimum hardware requirements are the following:

- 2.2 GHz Pentium 4 processor
- 4 GB RAM
- 80 GB of available hard disk space
- Network card, connected to the network using TCP/IP

Note

NIC teaming is not supported.

VMware Server Requirements

Supported VMware vSphere ESXi version(s)

- ESXi 5.5, 6.0 U1, 6.5 (vMotion included)

Note

Support is not extended to HyperV or any other virtualization solutions.

Minimum VMware Guest Machine Requirements

- 1x vCPU unrestricted
- 4 GB RAM
- 80 GB of available hard disk space

Note

Cloned (copied) virtual machines are not supported

An OVA template, built with minimum requirements, is available for download from: https://cisco.com/go/ac.

Cisco UC Virtualization Compliance

- Cisco’s UC Virtualization Supported Hardware
• Cisco’s UC Virtualization Software Requirements

Server - Software Requirements

Server Operating Systems

The following versions are supported:
  - Windows Server 2012 R2 (64-bit)
  - Windows Server 2016 (64-bit)

Requirements

• Windows server regional settings must be set to English.
• High Availability installations require that the date and time zone of the publisher and subscriber servers match.
• Cisco Unified Attendant Console Advanced server must be installed and operated exclusively on a supported platform.
• Server cannot be configured as a domain controller.

SQL Server Support

The following versions are supported:

Note

SQL Server Express is installed by the Cisco Unified Attendant Server installer if an existing installation of SQL Server is not detected.

Requirements

• High Availability Installations require SQL Server Standard or Enterprise.
• Off-box SQL installations are not supported.
• Named instances are not supported.
• Cisco Unified Attendant Console Advanced requires exclusive use of SQL Server.
• SQL login used at installation and in production requires sysadmin role association.

Miscellaneous Software Requirements

• Internet Information Service (IIS) 8.0 or later, with the Static Content role service added.
• Java build jre-8u102-windows-x64.exe
• .NET Framework 4.6*
System Requirements

- Microsoft Visual C++ 2015 Redistributables 32-bit*
- Microsoft Visual C++ 2015 Redistributables 64-bit*

* Cisco Unified Attendant Server installs these requirements if no existing installation is detected.

Client - System Requirements

Client hardware requirements are the following:
- 2.0 GHz Pentium 4 processor
- 4 GB RAM
- 1 GB of available hard disk space
- Network card, connected to the network using TCP/IP
- SVGA (1024x768) display card
- 17-inch or larger monitor highly recommended
- SoundBlaster-compatible sound card and speakers highly recommended
- Keyboard with 10-key number pad

Client - Software Requirements

Client operating systems:
- Microsoft Windows 10 (Desktop Mode)
- Microsoft Windows 8.1 Update 1, v. 6.3.9600 or later
- Microsoft Windows 7 SP1

Additional Server and Client Requirements and Considerations

Antivirus Software

Chosen anti-virus product must support excluding files and folders used by Cisco Unified Attendant Console Advanced. See the Administration and Installation Guide for details.

Network Requirements

For Cisco Unified Attendant Console Advanced to run across a network:
- The network must support TCP/IP.
- Cisco Unified Attendant Console Advanced Administration web application must run under an Administrator profile (Local Administrator is acceptable).
- On Microsoft Windows networks that use DHCP, you must allocate Cisco Unified Attendant Console Advanced server with a static IP address.
• Cisco Unified Attendant Console Advanced supports IPsec (should you need to encrypt network traffic) and Secure TSP. See the Cisco TAPI documentation for configuration instructions.

Latency

• Maximum latency of 150m/s Round Trip Time (RTT) between any console client and the server.
• Maximum latency of 80m/s Round Trip Time (RTT) between the server and Cisco Unified Communications Manager.

Host name resolution

• Console clients must be able to resolve application server host names.
• High availability installations require host name resolution between the publisher and subscriber application servers.

Citrix Support

Cisco Unified Attendant Console Advanced Server cannot be installed in a Citrix environment.
Cisco Unified Attendant Console Advanced Operator Client can be installed in a Citrix environment:
• XenApp 7.15 (Fundamentals, Advanced, Enterprise, Platinum)
• XenDesktop 7.15 (VDI, Enterprise, Platinum)
Citrix environments support the following modes:
• Windows Apps delivery
• Windows Desktops delivery
• Windows Hosted Shared (Server) Desktops delivery
The following platforms are not supported:
• Cisco VXI Solution
• VMWare Horizon

Note

Update KB4034661 needs to be applied prior to launching seamless applications from a Server VDA running Windows Server 2016. For more information, see https://support.citrix.com/article/CTX225819.

Data Backup

You should provide backup facilities to ensure application and data integrity in the event of unforeseen circumstances. If possible, choose a solution that offers one-step disaster recovery, such as the ability to restore the complete contents of a hard drive from a bootable floppy disk and the backup media.

Server Redundancy

We strongly recommended that you configure your Cisco Unified Attendant Console Advanced server as a redundant system with the following redundancy features:
• Multiple hot-swap power supplies
Cisco Software Compatibility

- Hot-swap Hard Drive arrays
- UPS / power conditioners
- RAID

Directory Contact Jabber Presence

Cisco Unified Attendant Console Advanced can retrieve Jabber presence status for directory contacts. Support is extended to WebEx Messenger and Cisco IM and Presence Server. The integration requires a dedicated Cisco Unified Communications Manager End User account.

Note

The Cisco Unified Attendant Presence plug-in does not support Single Sign On (SSO) authentication.

Operator Phone Requirements

For more information about operator phone requirements and supported handsets, refer to Supported Handsets in the Design Guide. In addition to a detailed list of supported handsets (console user devices and contact directory - busy lamp field devices) you will see supportability statements for Jabber soft phones, shared lines, and extension mobility.

Cisco Software Compatibility

Cisco Unified Attendant Console Advanced is compatible with:

- Cisco IM and Presence Server versions 10.5(1) to 12.0(1)

See Cisco TAPI and Cisco Unified Communications Manager Support for Cisco Unified Communications Manager support.

Cisco TAPI and Cisco Unified Communications Manager Support

Cisco TAPI support under Windows 2012 R2 and Windows 2016 is shown below:

<table>
<thead>
<tr>
<th>CUCM Version</th>
<th>Windows 2012 R2 (64-bit)</th>
<th>Windows 2016 (64-bit)</th>
</tr>
</thead>
<tbody>
<tr>
<td>10.5(x)</td>
<td>Y</td>
<td>N</td>
</tr>
<tr>
<td>11.0(1)</td>
<td>Y</td>
<td>N</td>
</tr>
<tr>
<td>11.5 (1.13032-4) or later</td>
<td>Y</td>
<td>Y</td>
</tr>
<tr>
<td>12.0(1)</td>
<td>Y</td>
<td>Y</td>
</tr>
</tbody>
</table>
New and Changed Information

Cisco Unified Attendant Console Advanced version 12.0.3.10 is a UC System release that includes new features.

New Software Features in Version 12.0.3.10

Cisco Unified Attendant Console Advanced version 12.0.3.10 includes the following new features:

- Defect resolution
- Reporting Data Retention Policy
- Presence Enhancements
- New Presence Driver - extending support to WebEx Messenger & Cisco IM&P
- Console user presence preferences are set at a global level
- Cisco IM&P, WebEx Messenger, and Skype for Business support for multi-domain and federated deployments.
- Bulk import, export, and update via CSV for Arabic contacts support.
- Support for 125k directory contacts
- Single Sign On for console users
- Syslog Server - Audit and Alerts
- User credential policies
- Console and Web Admin - custom login messages
- Session Idle Timeout - Web Admin and Console sessions
- BLF Enhancements - Catering to environments where directory contacts have multiple devices.
- BLF Toggle for internal contacts
- Support for Spanish JAWS scripts
- Support for JAWS 17 and 18

Installation Notes

Caveats

This section lists the following:

- Resolved Caveats - Release 12.0.1
- Resolved Caveats - Release 12.0.2.10
- Resolved Caveats - Release 12.0.3.10
- Open Caveats - Release 12.0.3.10

Resolved Caveats - Release 12.0.1

Cisco Unified Attendant Console Advanced version 12.0.1 has the following resolved caveats:

<table>
<thead>
<tr>
<th>Bug ID</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CSCvg14593</td>
<td>CUAC Advance does not generate a report when sa account password has &quot; in them.</td>
