DESCRIPTION
"Cisco Systems ASR 5xxx series of multimedia core platforms (ASR 5000, ASR 5500)

Designed exclusively for mobile and fixed mobile converged applications, Cisco's ASR 5xxx series products provide a high-performance, highly intelligent platform ideally suited for development in mobile operator networks to fulfill key multimedia core networking functions. The platform features 2G/3G/4G and WiFi multi-service access independent capabilities coupled with a carrier class high-availability design. Harnessing subscriber awareness with an abundant supply of distributed processing resources, the ASR 5xxx series offers a variety of high touch Inline Services to enable service providers to monetize the value of the network while enriching the overall subscriber experience."

REVISION      "201906200000Z"
DESCRIPTION
" Added objects starCFGSyncAbortReason, they would be used in newly added notification
starCFGSyncForUPlaneRedundancyAbort"

REVISION  "201903280000Z"
DESCRIPTION
" Added objects starMMEManagerInst and starMMEManagerStatus, they would be used in newly added
notification starMMEManagerBusy and starMMEManagerNormal"

REVISION  "201903250000Z"
DESCRIPTION
" Added starServiceLossDetected trap in startrapgroup"

REVISION  "201902150000Z"
DESCRIPTION
" Added starIPAddressType and changes to SRP Trap MIBs to include this address"

REVISION  "201902140000Z"
DESCRIPTION
"starDisabledEventIDs and starLogLevelChanged modified for syntax correction"

REVISION  "201809020000Z"
DESCRIPTION
" Added Traps 1399 to 1400 for UIDH URL Host Database
starUidhURLHostDatabaseUpgradeFailureStatus,
starUidhURLHostDatabaseUpgradeSuccessStatus,
"
REVISION  "201809010000Z"
DESCRIPTION
" Added Traps 1401 to 1402 for critical events for Smart Licensing
starSmartLicenseFeatureOOC,
starSmartLicenseFeatureOOCClear,
"
REVISION  "201806270000Z"
DESCRIPTION
" Added trap no 1398 for IFTask Boot Config Application on card<card-num>-cpu<cpu-num>.
"
REVISION  "201805290000Z"
DESCRIPTION
"Added trap no 1394,1395,1396,1397 for Chassis Throughput."

REVISION  "201804190000Z"
DESCRIPTION
"Added trap no 1392 for Sx Peer Node Associated."

REVISION  "201804160000Z"
DESCRIPTION
"Added trap no 1388, 1389, 1390, 1391 for Control plane monitor packet loss on DI platform
starThreshControlPlaneMonitor5MinsLoss,
starThreshClearControlPlaneMonitor5MinsLoss,
starThreshControlPlaneMonitor60MinsLoss,
starThreshClearControlPlaneMonitor60MinsLoss"

REVISION  "201804040000Z"
DESCRIPTION
"Added trap no 1384, 1385, 1386, 1387 for Data plane monitor packet loss on DI platform
starThreshDataPlaneMonitor5MinsLoss,
starThreshClearDataPlaneMonitor5MinsLoss,
starThreshDataPlaneMonitor60MinsLoss,
starThreshClearDataPlaneMonitor60MinsLoss"
STARENT-MIB DEFINITIONS ::= BEGIN

""

REVISION  "201803260000Z"
DESCRIPTION  "Added Trap datatype starSxFailureCause 192"

REVISION  "201803250000Z"
DESCRIPTION  "Added trap no 1382, 1383 for Sx Path failure.
Added Trap datatype starSxInterfaceType 187
Added Trap datatype starSxSelfAddr 188
Added Trap datatype starSxPeerAddr 189
Added Trap datatype starSxPeerNewRecTimeStamp 190
Added Trap datatype starSxPeerOldRecTimeStamp 191"

REVISION  "201712120000Z"
DESCRIPTION  "Added trap no 1378 ,1379, 1380.1381 for ADC license ,
Added Trap datatype starP2PPluginVersion 185
Added Trap datatype starADCLicenseExpiryDate 186"

REVISION  "201709200000Z"
DESCRIPTION  "Added trap no 1376, which informs about change in nic bonding of a port
It is informational trap
Added Trap datatype starMacaddress 184"

REVISION  "201709130000Z"
DESCRIPTION  "Added IKEv2 error traps for Control packet flooding.
"

REVISION  "201709120000Z"
DESCRIPTION  "Added IFTask Health Failure traps.
starIFTaskHealthFailure
"

REVISION  "201708160000Z"
DESCRIPTION  "Added IPSEC UDP error traps for Peer based Source-IP.
"

REVISION  "201707220000Z"
DESCRIPTION  "Added IPSEC UDP error traps for System level.
"

REVISION  "201707210000Z"
DESCRIPTION  "Added trap 1363 and 1364 for total-volume and total-volume clear
Added objects starRuleBaseName, starRuleDefName starGroupOfRuledef"

REVISION  "201705110000Z"
DESCRIPTION  "Added trap no 1362, which informs about change in Logging Level of a facility
(which is inferior to default Logging Level i.e., error) by an user
LogLevelChanged"

REVISION  "201704260000Z"
DESCRIPTION  "Added trap no 1361, which informs about Logging Event IDs been disabled by an user
DisabledEventIDs"
STARENT-MIB DEFINITIONS ::= BEGIN

REVISION  "2017041500000Z"
DESCRIPTION  
" Added Traps 1349 to 1356 for critical events for Smart Licensing
  starSmartLicenseServiceOOC,
  starSmartLicenseServiceOOCClear,
  starSmartLicenseEvalMode,
  starSmartLicenseEvalModeClear,
  starSmartLicenseEvalModeExpire,
  starSmartLicenseEvalModeExpireClear,
  starSmartLicenseCSSMConntectionFail,
  starSmartLicenseCSSMConnectionFailClear

" Hat heartbeat loss on the card w.r.t peer cards for DI platform
  starThreshHatHb5MinsLoss,
  starThreshClearHatHb5MinsLoss,
  starThreshHatHb60MinsLoss,
  starThreshClearHatHb60MinsLoss
"

REVISION  "2017031500000Z"
DESCRIPTION  
" Added additional argument starSlotSerialNumber to applicable threshold port traps"

REVISION  "2017022700000Z"
DESCRIPTION  
" Maximum Concurrent CLI Sessions enforcement on StarOS
  starGlobalCLISessionsLimit,
  starUserCLISessionsLimit
"

REVISION  "2017021500000Z"
DESCRIPTION  
" Hat heartbeat loss on the card w.r.t peer cards for DI platform
  starThreshHatHb5MinsLoss,
  starThreshClearHatHb5MinsLoss,
  starThreshHatHb60MinsLoss,
  starThreshClearHatHb60MinsLoss
"

REVISION  "2016122200000Z"
DESCRIPTION  
" Added trap nos. 1534, 1535 and 1536 with the following variables
  starDiameterVpnName,
  starDiameterRlfContext,
  starDiameterPeerName,
  starDiameterEndpointName,
  starDiameterRlfECode
  starDiameterRlfTps,
  starDiameterRlfDelayTolerance,
  starDiameterRlfQueuePercent,
  starDiameterDiamproxyInstance
"

REVISION  "2016122000000Z"
DESCRIPTION  
" DOS Attack & Decryption Fail Traps added."

REVISION  "2016091600000Z"
DESCRIPTION  
" Log Source (LS) log volume threshold is added."

REVISION  "2016082300000Z"
DESCRIPTION  
" Added Management Card switchover due to HD Raid unrecoverable failure trap"

REVISION  "2016072700000Z"
STARENT-MIB DEFINITIONS ::= BEGIN

DESCRIPTION
" Added additional argument starSlotSerialNumber to all related traps"
REVISION     "201607040000Z"

DESCRIPTION
" Mark the unsupported traps to obsolete"
REVISION     "201606230000Z"

DESCRIPTION
" Corrected the names of the traps in StarOS and Starent.my file"
REVISION     "201606220000Z"

DESCRIPTION
" Added SI and DI keywords in Traps"
REVISION     "201605120000Z"

DESCRIPTION
" Added DDF Reload Trap"
REVISION     "201604180000Z"

DESCRIPTION
" Removed starThreshDiscRsn, and added correct object to starThreshSNXDisconnectReason and starThreshClearSNXDisconnectReason"
REVISION     "201604130000Z"

DESCRIPTION
" Streamlined all the numbers from 21.x to 17.x"
REVISION     "201604120000Z"

DESCRIPTION
" Corrected Traps and MIB oid numbers "
REVISION     "201604110000Z"

DESCRIPTION
" Corrected few trap numbers and errors in mib file"
REVISION     "201509140000Z"

DESCRIPTION
" Added trap no. 1312 with the following variables
  starStatFileSizeLimit,
  starStatFileSizeMeasured

Added trap no. 1313 with the following variables
  starStatFileSizeLimit,
  starStatFileSizeMeasured"
REVISION     "201509110000Z"

DESCRIPTION
" Removed trap number 1191(starSEAGWServiceStart) and 1192(starSEAGWServiceStop) definition added"
REVISION     "201411100000Z"

DESCRIPTION
" Removed trap number 1533 and 1534 and replaced with 1290 and 1291 supporting code"
REVISION     "201410300000Z"

DESCRIPTION
" Added trap number 1288 and 1289 supporting code"
REVISION     "201410080000Z"

DESCRIPTION
" Added trap no. 1282 with the following variables
  starGTPCRLFSessMgrInst,
  starGTPCRLFVPNName,
  starGTPCRLFVPNId,
  starGTPCRLFContextName,
  starGTPCRLFCurrAppTPS

Added trap no. 1283 with the following variables
  starGTPCRLFSessMgrInst,
  starGTPCRLFVPNName,
  starGTPCRLFVPNId,

8
StarGTPCRLFContextName, StarGTPCRLFCurrentAppDelayTol

Added trap no. 1284 with the following variables
StarGTPCRLFSessionManagerInstance, StarGTPCRLFVPNName, StarGTPCRLFVPNId, StarGTPCRLFContextName,

Added trap no. 1285 with the following variables
StarGTPCRLFSessionManagerInstance, StarGTPCRLFVPNName, StarGTPCRLFVPNId, StarGTPCRLFContextName,

" REVISION "201408040000Z"
DESCRIPTION
" Added starNpudriverECCError trap supporting code"
REVISION "201407230000Z"
DESCRIPTION
" Removing the extra 1533 and 1534 traps"
REVISION "201407160000Z"
DESCRIPTION
" Added starNpudriverECCError trap(reserving the trap id) at 1281"
REVISION "201406110000Z"
DESCRIPTION
" Added Severity in starChassisCrashListFull Traps"
REVISION "201405080000Z"
DESCRIPTION
" Added starBFDSessionUp, starBFDSessionDown and starSRPSwitchoverOccured Traps"
REVISION "201404250000Z"
DESCRIPTION
" Added MME Related threshold traps from 440 to 445"
REVISION "201312210000Z"
DESCRIPTION
" Removing SGSN substring from trap number 1219 and 1220"
REVISION "201312200000Z"
DESCRIPTION
" Extended starChassisType to support KVM QvPC-SI chassis"
REVISION "201312060000Z"
DESCRIPTION
" Corrected IPv6 from IPv4 to trap number 1200"
REVISION "201312050000Z"
DESCRIPTION
" Fixed following issues
  1. Revision not in reverse chronological order
  2. not-accessible starent Index objects are modified to MAX-ACCESS accessible-for-notify for those sent in trap"
REVISION "201311220000Z"
DESCRIPTION
" Added two MIBs (starMRMEServiceStart, starMRMEServiceStop) for MRME service
starMRMEServiceStart- starentTraps 1264
starMRMEServiceStop- starentTraps 1265
Added two MIBs (starThresholdPerServiceSAMOGSessions, starThresholdClearPerServiceSAMOGSessions) for per service samog-service
starThresholdPerServiceSAMOGSessions- starentTraps 519
starThresholdClearPerServiceSAMOGSessions - starentTraps 520"
REVISION "201310040000Z"
DESCRIPTION
" Changed following notification names
starThresholdAAAAccountArchiveQueue-1, starThresholdClearAAAAccountArchiveQueue-1,
starThresholdAAAAccountArchiveQueue-2, starThresholdClearAAAAccountArchiveQueue-2,
starThresholdAAAAccountArchiveQueue-3, starThresholdClearAAAAccountArchiveQueue-3

 to
SNMP MIB Reference, StarOS™ Release 21.15

STARENT-MIB DEFINITIONS ::= BEGIN

starThreshAAAAAcctArchiveQueue1,
starThreshClearAAAAAcctArchiveQueue1,
starThreshAAAAAcctArchiveQueue2,
starThreshClearAAAAAcctArchiveQueue2,
starThreshAAAAAcctArchiveQueue3,
starThreshClearAAAAAcctArchiveQueue3.

Added , in starLIRcvryErrType object.

Changed StarUDPPortNum object to starUDPPortNum object in
following notifications:
  starECSreaddressServerDown,
  starECSreaddressServerUp.

Added definition for starMMEInitialDisallowReason object.

Added new number for QVPC-SI platform in starChassisType object.

REVISION  "201309270000Z"
DESCRIPTION  " Added missing object starFractE1TribTimeslots to starSDHFractE1LMIUp
  notification , changed MAX-ACCESS to accessible-for-notify from
  not-accessible for the following objects
  starFractE1TribSlot,
  starFractE1TribPort,
  starFractE1TribPath,
  starFractE1TribTug2,
  starFractE1TribTug12
  and moved starFractE1TribBundNum object to obsolete state."

REVISION  "201309250000Z"
DESCRIPTION  "Change starSlotPort to storSlotNum in ApsChannelMismatch trap 1150"

REVISION  "201307230000Z"
DESCRIPTION  "Replaced underscore sign with hyphen from starServiceType enum "

REVISION  "201307150000Z"
DESCRIPTION  "Modified SEVERITY from ERROR to MAJOR for following traps:
  starPortDown,
  starSRPConnDown,
  starLAGGroupDown.

  Changed starPortSlot, starPortNum, starContextName and starSRPIpAddress
  objects access to accessible-for-notify."

REVISION  "201307100000Z"
DESCRIPTION  "Changed the name of trap starThreshNAPTPortChunks to starThreshNATPortChunks and
  starThreshClearNAPTPortChunks to starThreshClearNATPortChunks"

REVISION  "201306260000Z"
DESCRIPTION  "Changed the APS related traps according to the implementation present in trap_api.c
  following traps are modified:
  starApsCommandSuccess,
  starApsCommandFailure,
  starApsSwitchSuccess,
  starApsSwitchFailure,
  starApsModeMismatch,
  starApsChannelMismatch,
  starApsByteMismatch,
  starApsFeProtLineFailure,
  starApsLossOfRedundancy,
  starApsLossOfRedundancyClear."

REVISION  "201306110000Z"
DESCRIPTION  "Changed object type from starContextName to starCLIContext for the
following traps:

starLocalUserAdded,
starLocalUserRemoved,
starOsShellAccessed,
starTestModeEntered,
starLicenseFeaturesModified,
starHiddenAccessEnabled,
starHiddenAccessDisabled.

"201306040000Z"
DESCRIPTION
"Added the missing objects and modified the summary field for starTechSuppPasswdChanged trap"

"201305240000Z"
DESCRIPTION
"Corrected starChassisCrashListFull description section"

"201305220000Z"
DESCRIPTION
"changed starEGTPInterfaceType Enum in trap number 1112"

"201305070000Z"
DESCRIPTION
"changed starEGTPInterfaceType Enum
changed STATE and SEVERITY fields for All APS, related notifications."

"201304250000Z"
DESCRIPTION
"Deprecated following traps
starCardSPCSwitchoverStart,
starCardSPCSwitchoverComplete,
starCardSPCSwitchoverFailed
starCardPACMigrateStart,
starCardPACMigrateComplete,
starCardPACMigrateFailed,

Added following traps for above trap as respective replacement
starCardSwitchoverStart,
starCardSwitchoverComplete,
starCardSwitchoverFailed,
starCardMigrateStart,
starCardMigrateComplete,
starCardMigrateFailed"

"201304250000Z"
DESCRIPTION
"Added two MIBs (starSAMOGServiceStart, starSAMOGServiceStop) for SAMOG service.
starSAMOGServiceStart- starentTraps 1251
starSAMOGServiceStop- starentTraps 1252"

"201304180000Z"
DESCRIPTION
"Changed SUMMARY clause for starLongDurTimerExpiry notification.

Changed MAX-ACCESS to accessible-for-notify for following objects:
starSubMSID,
starSubName,
starSubTimerDuration,
starSubLongDurTimeoutAction,
starSubSetupTime,
starSubHomeAddr,
starSubHomeAddrv6."

"201304160000Z"
DESCRIPTION
"changed STATE and SEVERITY fields for starSDHPathHopUp,
starSDH1EItribUp and starSDHFractE1LMIDown notifications."

"201304090000Z"
DESCRIPTION
"Added trap no. 1251 with the following variables
starPMIPvPnName,
STAR-ENT-MIB DEFINITIONS ::= BEGIN

starPMIPServName,
starPMIPSelfAddrType,
starPMIPSelfAddr,
starPMIPPeerAddrType,
starPMIPPeerAddr,
starPMIPPeerOldRstCnt,
starPMIPPeerNewRstCnt,
starPMIPPeerSessCnt,
starPMIPFailureReason

Added trap no. 1252 with the following variables
starPMIPVpnName,
starPMIPServName,
starPMIPServName,
starPMIPServName,
starPMIPServName,
starPMIPPeerAddr"  

REVISION  "201304050000Z"
DESCRIPTION
" Added the following flags in APS related traps"

REVISION  "201304040000Z"
DESCRIPTION
"changed SEVERITY level from INFORMATIONAL to WARNING for
starSGSNRMMemWarn notification."

REVISION  "201303260000Z"
DESCRIPTION
"Added trap no. 1177, with the following variables
starSlotNum,
starCardType,
starPortSlot"

REVISION  "201303180000Z"
DESCRIPTION
"Modified starPCFUnreachable description section
Updated correct object name starEISServerVPNName in
starEISServerAlive
starEISServerDead traps.
Added starPCFReachable trap support"

REVISION  "201303110000Z"
DESCRIPTION
"Changed starFanNum range in SYNTAX and MAX-ACCESS.
Added starFanLocation ASR5500 fan location details.
Changed SUMMARY clause for following traps
starFanFailed,
starFanRemoved,
starFanInserted,"  

REVISION  "201303060000Z"
DESCRIPTION
"Changed SYNTAX clause from Integer32 to Gauge32 for
following objects:
starCPUUser,
starCPUSystem,
starCPUIdle,
starCPUUO,
starCPUURQ,
starCPUTMemUsed,
starCPUMemCached

Changed SYNTAX clause from Integer32 to Gauge32 and also
changed range for following objects:
starCPUload1Min,
starCPUload5Min,
starCPUload15Min,
starCPUloadProcesses."
REVISION "201302280000Z"
DESCRIPTION
"Added context name to the OBJECTS and updated ARGUMENTS field for the following traps:
starLocalUserAdded,
starLocalUserRemoved,
starOsShellAccessed,
starTestModeEntered,
starLicenseFeaturesModified,
starHiddenAccessEnabled,
starHiddenAccessDisabled"

REVISION "201302260000Z"
DESCRIPTION
"Changed starThreshMeasuredPct SYNTAX from Integer32 to Gauge32.
Changed starPortNum object range.
Changed SUMMARY clause in starM3UAPCUnavailable and starM3UAPCAvailable traps.
Changed objects from starThreshInt and starThreshMeasuredInt to starThreshPct and starThreshMeasuredPct and also changed SUMMARY and ARGUMENTS clauses in following traps:
starThreshIPPoolAvail,
starThreshClearIPPoolAvail,
starThreshIPPoolHold,
starThreshClearIPPoolHold,
starThreshIPPoolUsed,
starThreshClearIPPoolUsed,
starThreshIPPoolRelease,

-- single subscriber info
-- This is used to perform a lookup on information on a single subscriber. This is done in a
-- two-step process
--
-- 1. Use a SET pdu to provide the keys to lookup. Set one or more of the fields
--     starSessSub1Context, starSessSub1NAI, starSessSub1MSID, starSessSub1IpAddr
--
--     The SET pdu returns once the query is complete. This query can takes some time
--     especially on large systems, so do not use small retry timers.
--
-- 2. Use a GET pdu to retrieve the data.
--
-- Note that in some cases, multiple subscribers might match the given search criteria.
-- The starSessSub1LastResult field identifies if zero, one or multiple matches were found.
STARENTS-MIB DEFINITIONS ::= BEGIN

-- If multiple matches are found, data is returned for one of them.

STATUS current
DESCRIPTION
"The Authentication, Authorization and Accounting (AAA) server is now reachable. This can be the result of a system startup, the configuration of a new server, or a previously unreachable server becoming reachable.

Note that since Accounting servers are not responding to 'hello'-type messages, it is not always possible to accurately determine when an accounting server is reachable. A server may be declared 'reachable' when the ST16 is ready to start using the server, but before any acknowledgement is actually received from the server. Once accounting information actually is sent to the server a starAAAAccServerUnreachable will be generated if the server does not properly respond.

Action to be Taken: No Action Required.

---#SUMMARY "[System] AAA Authentication Server %d (%s) is reachable"

starGGSNServiceStart NOTIFICATION-TYPE
OBJECTS { starServiceVpnName, starServiceServName }
STATUS current
DESCRIPTION "A GGSN Service has started"
**starGGSNServiceStop NOTIFICATION-TYPE**

**OBJECTS**: `starServiceVpnName, starServiceServName`

**STATUS**: current

**DESCRIPTION**: A GGSN Service has stopped

Probable Cause: This is typically caused by operator invention. In unusual cases it can be caused by the loss of resources (PACs/PSCs) to support the running configuration.

Action to be Taken: If the GGSN service shutdown was not planned, examine the admin logs for an indication of the failure. Verify that all configured PACs/PSCs are present and running in the system. Check the crash logs for an indication of a software failure.

Clear Condition: Verify that the GGSN service is operational.

Condition Clear Alarm: A starGGSNServiceStart notification will be generated when the service is restarted

**starLicenseExceeded NOTIFICATION-TYPE**

**OBJECTS**: `starLicensedSessions, starCurrentSessions, starServiceType`

**STATUS**: current

**DESCRIPTION**: The licenses session limit has been exceeded; note that a small number of sessions are permitted beyond the licensed limit.

Probable Cause: The usage of the system has exceeded the capacity of the license installed; The license installed does not match the identification of the system; No license is installed

Action to be Taken: Verify that the proper license is installed on the system; verify that the SPCs present in the system match those identified in the software license. If required, install an additional higher-capacity license.

Clear Condition: This condition is cleared when usage goes under the licensed limit.

Condition Clear Alarm: This condition is cleared by a starLicenseUnderLimit notification.

**starSubscriberLimit NOTIFICATION-TYPE**

**OBJECTS**: `starServiceVpnName, starServiceServName, starServiceSubLimit, starServiceSubCurrent, starServiceType`

**STATUS**: current

**DESCRIPTION**: The specified service has reached its configured limit for number of subscribers
Action to be Taken: Verify that the configured subscriber limit is correct. Configure additional services, or configure the existing service to permit a larger number of subscribers.

starOverloadSystem NOTIFICATION-TYPE
OBJECTS { starCongestionResourceType }
STATUS current
DESCRIPTION
"A system-wide congestion overload condition has occurred.
Probable Cause: This is the result of an operator-configured congestion overload value reached. This notification indicated a chassis-wide overload condition, typically overall system usage reaching some fraction of capacity.

Once this limit is reached, the configured behavior is taken. This will cause certain older and/or dormant calls to be dropped in favor of newer calls.

Note that this is similar to, but different than, the starCongestion notification. Typically the 'overload' condition will be configured to trigger at an earlier point.

Actions to be Taken: Verify that the congestion overload thresholds are correct; if the congested state is seem repeatedly, or for sustained periods of time, additional system capacity may need to be brought online.

This system is cleared when the use of the specific resource falls below the configured limit.

Condition Clear Alarm: A starOverloadSystemClear notification is sent when the system overload condition is clear"

DESCRIPTION
"An interactive CLI session has enter 'configuration' mode for the specified context. This CLI user can thus potentially start issuing configuration commands which will impact the overall system configuration.

Note that this notification is not enabled by default; it is only generated
if the system is specifically configured to enable it."

```SNMP
STARENT-
MIB DEFINITIONS ::= BEGIN

starDHCPV6ServiceStop NOTIFICATION-TYPE

OBJECTS { starServiceVpnName, starServiceServName }

DESCRIPTION
"A DHCPV6 Service has stopped.
Clear Condition: Verify that the DHCPV6 service is operational.
Condition Clear Alarm: A starDHCPV6ServiceStart notification will be generated when the service is restarted"

starSGSNServiceStart NOTIFICATION-TYPE

OBJECTS { starServiceVpnName, starServiceServName }

DESCRIPTION
"A SGSN Service has started
Action to be Taken: No action required"

starSGSNServiceStop NOTIFICATION-TYPE

OBJECTS { starServiceVpnName, starServiceServName }

DESCRIPTION
"A SGSN Service has stopped.
Probable Cause: This is typically caused by operator invention. In unusual cases it can be caused by the loss of resources (PACs/PSCs) to support the running configuration.
Action to be Taken: If the SGSN service shutdown was not planned, examine the admin logs for an indication of the failure. Verify that all configured PACs/PSCs are present and running in the system. Check the crash logs for an indication of a software failure.
Clear Condition: Verify that the SGSN service is operational.
Condition Clear Alarm: A starSGSNServiceStart notification will be generated when the service is restarted"

starM3UAPCUnavailable NOTIFICATION-TYPE

OBJECTS {
    starSS7rdId,
    starSS7Pc,
    starSS7M3UAPsId,
    starSS7CauseString
}

DESCRIPTION
"M3UA Route to the Point code becomes unavailable.

Possible reason:
1. Received destination unavailable (DUNA) message or
2. SCTP association is down or
3. Remote peer server is down

Condition Clear Alarm: A starM3UAPCAvailable notification will be generated when
the remote peer identified by the point code becomes reachable"

starCscfSessResourceCongestion NOTIFICATION-TYPE
OBJECTS { starSmgrId, starCongestionPolicy, starCscfSessCongestionResourceType }
STATUS current
DESCRIPTION
"A congestion condition has occurred at Session Manager for Cscf Service.
Probable Cause: This is the result of an operator-configured congestion
threshold being reached for Cscf Service at Session Manager. This can be due to high
usage of the resource being monitored which indicates that the
IMG is reaching its peak capacity, or could be caused by the
incorrect configuration of the congestion thresholds.
Actions to be Taken: Verify that the congestion thresholds are correct;
if the congested state is seen repeatedly, or for sustained periods of
time, additional system capacity may need to be brought online.
This system is cleared when the use of the specific resource falls below
the configured limit.
Condition Clear Alarm: A starCscfSessResourceCongestionClear notification is sent when there
are no congestion conditions for cscf service in that Session Manager Instance"

starEnhancedCongestion NOTIFICATION-TYPE
OBJECTS { starServiceType, starCongestionPolicy, starCongestionResourceType, starCongestionType, starCongestionActionProfileName }
STATUS current
DESCRIPTION
"A congestion condition has occurred.

Probable Cause: This is the result of an operator-configured congestion threshold being reached. This can be due to high usage of the resource being monitored which indicates that the IMG is reaching its peak capacity, or could be caused by the incorrect configuration of the congestion thresholds."
Actions to be Taken: Verify that the congestion thresholds are correct; if the congested state is seen repeatedly, or for sustained periods of time, additional system capacity may need to be brought online.

This system is cleared when the use of the specific resource falls below the configured limit.

Condition Clear Alarm: A starCongestionClear notification is sent when there are no congestion conditions for a service type

---SUMMARY "[System] Congestion seen for %s service; resource %s, policy %s applied, %s threshold exceeded, action profile %s"

DESCRIPTION
"A data processing card (PAC/PSC/DPC) Migration operation has failed. The first varbind identifies from which data processing card migration has started. The second varbind identifies to which data processing card migration has failed to migrate.

Probable Cause: The data processing card being migrated to was removed or reset before the migration completed; the migration operation was terminated by an operator; or a software or hardware failure on another data processing card involved in the migration operation.

The data processing card in question will be reset; a starCardUp notification will be generated when the card is operational again. This is not applicable to QVPC-SI."

OBJECTS { starSBCServiceVpnName, starSBCServiceServName, starPeerId, starPeerIpAddr, starPeerPortNum }
STATUS current
DESCRIPTION
"A CBC Association is down."
Problem Cause: SCTP connection between MME and CBC has been brought down - could be for any of the following reasons:

i) network connectivity between MME and CBC is broken.
ii) CBC has gracefully terminated the SCTP association with MME.
iii) MME has gracefully terminated the SCTP association with CBC, typically due to operation intervention that would have effected sbc-service.

Action to be taken - In case the SCTP association between MME and CBC is abnormally closed, check for network connectivity between MME and CBC.

Condition Clear Alarm: In case the association termination was abnormal, A starPeerAssocUp notification will be generated when the CBC association is up

IETF and Cisco MIBs

This section is for Administrators working with integrating the Starent MIB and the Cisco MIB so Cisco management applications can manage the ASR 5x00 chassis. It provides some new configuration options; there is also a list of supported Cisco MIBs.
New CLI Options

The following are new CLI options:

sysOld Options

The default Old string is 1.3.6.1.4.1.8164.

The new-style Cisco Old string is 1.3.6.1.4.1.9.

Using the following CLI, ASR 5000 users can choose which string they prefer:

[local]asr5000(config)# system sysoid-style new|default

**Important**: ASR 5500 users do not have this option as the Cisco OId String is the default.

**Important**: This command can be combined with sysdesc as follows: system sysdesc=sysoid-style new|default. However, this combination affects BOTH sysDesc AND sysOld equally: that is, they can both be old-style or they can both be new-style. The System CLI offers an option to configure sysDesc independently, but SysOld is not a user-configurable parameter.

sysDesc Options

For ASR 5000 users, the default system description is:

```
Linux asr5000 2.6.18-staros-v2-private-deb #1 SMP (date/time) i686
```

The Cisco default system description is:

```
Cisco StarOS Software, ASR5000 Intelligent Mobile Gateway, Version 12.2. Copyright (c) 2011 by Cisco Systems, Inc.
```

Users can opt for either description using the following CLI command: [local]asr5000(config)# system sysdesc-style new|default

**Important**: This CLI will not be available to ASR 5500 users; it will default to the Cisco description only.

**Important**: This command can be combined with sysOld as follows: system sysdesc=sysoid-style new|default. However, this combination affects BOTH sysDesc AND sysOld equally: that is, they can both be old-style or they can both be new-style. The System CLI offers an option to configure sysDesc independently, but SysOld is not a user-configurable parameter.

Serial Number Configuration

ASR 5000 users can configure the chassis serial number with the following CLI:

[local]asr5000(config)# system chassis.serial-number <string>

**Important**: This CLI is not available for ASR 5500 users as the chassis serial number is hard-coded.
Standards-Based MIBs

The following are standards-based, read-only, and available from the Cisco MIB ftp site.

IF-MIB and ENTITY-MIB are disabled by default.

Configuration

MIBs can be configured using the following CLI:

[local]asr5000(config)# snmp mib <mib-name, auto complete> | no snmp mib <mib-name, auto complete>

Entity MIB

The Entity MIB is implemented as described in RFC4133. The following are not supported for this release:

- entPhysicalAlias
- entPhysicalAssetID
- entPhysicalMfgDate
- entPhysicalUris
- entLogicalTable
- entLPMappingTable
- entPhysicalContainsTable

IF MIB

The IF MIB is implemented per RFC1213, RFC1573, and RFC2863. The following are not supported for this release:

- ifStackTable
- ifStackLastChange
- ifRevAddressTable
- ifTestTable
Cisco MIBs

The following is a list of supported Cisco MIBs for this release. These are available from the Cisco ftp site.

Configuration

MIBs can be configured using the following CLI:

[local]asr5000(config)# snmp mib <mib-name, auto complete> | no snmp mib <mib-name, auto complete>

Cisco MIBs

The following MIBs are supported in this release. They can be enabled/disabled as required.

- CISCO-ENHANCED-IPSEC-FLOW-MIB
- CISCO-ENTITY-DISPLAY-MIB
- CISCO-ENTITY-EXT-MIB
- CISCO-ENTITY-FRU-CONTROL-MIB
- CISCO-ENTITY-REDUNDANCY-MIB
- CISCO-ENTITY-SENSOR-MIB
- CISCO-ENTITY-STATE-MIB
- CISCO-FLASH-MIB
- CISCO-HOST-RESOURCE-MIB

Important: CISCO-HOST-RESOURCE-MIB is per the appropriate RFC, but limited to hrSystem and hrStorage tables.

- CISCO-IF-EXTENSION-MIB
- CISCO-IP-LOCAL-POOL-MIB
- CISCO-IPSEC-FLOW-MONITOR-MIB
- CISCO-MOBILE-WIRELESS-SERVICE-MIB
- CISCO-PROCESS_MIB
