

Job Description: Software Engineer I

Work on all the networking technology from the physical layer to the application layer. Depending on the role, programming experience using C, C++, Java, script languages (TCL and UNIX shell), and Web (HTML, XML) is required. Support programming network features, device driver development, and new architecture of network equipment systems ranging from switches and routers to Web services and voice-enabled network applications. Experience in programming, and depending on the role, an understanding of networking fundamentals and protocols.

Requirements: BS in CS or EE GPA of 3.0 or higher preferred.

Candidates must have graduated in the last 12 months

Candidates must already have a work authorization that would permit them to work for Cisco -- i.e., U.S. citizens, U.S. nationals, permanent residents, temporary residents (that is, individuals who have gone through the legalization program) refugees and asylees.

Position Locations: San Jose, CA; Research Triangle Park, NC; Boxborough, MA; Richardson, TX.

For further consideration please submit your resume at <http://www.cisco.com/go/universityjobs> requisition number (TBD)
