

Cisco Data Center Assessment and Deployment Service for UCS Director

Cisco® Data Center Assessment and Deployment Service for UCS Director accelerates time to value of converged infrastructure: Cisco Unified Computing System™ (Cisco UCS®) and the VCE Vblock and NetApp FlexPod platforms. Delivered by Cisco Services experts, the deployment service accelerates the adoption of UCS Director's leading management capabilities so that customers save time and OpEx in managing converged infrastructure platforms and accelerates realization of the value of their infrastructure investment.

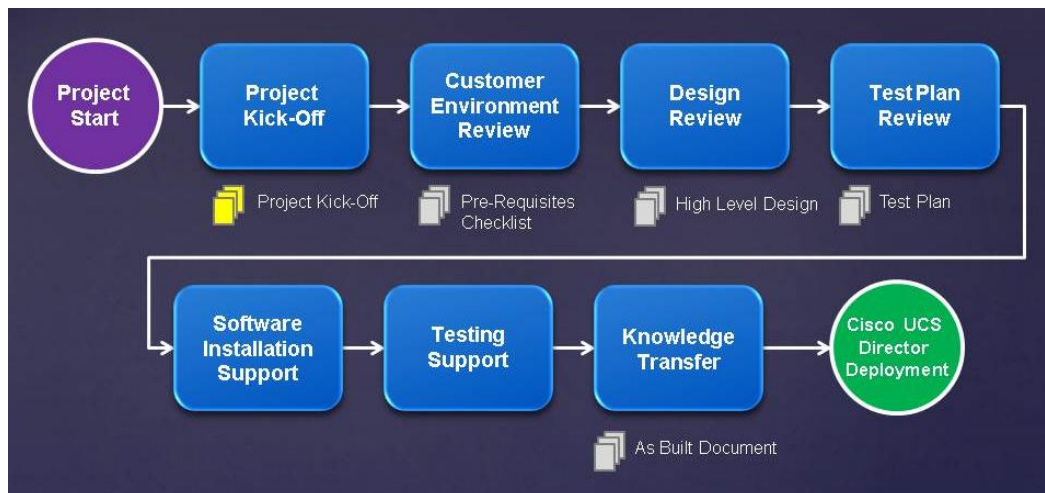

Managing Your Cisco Unified Computing System and Converged Infrastructure Platforms

The Cisco UCS and converged infrastructure platforms—including the Vblock platform from VCE and the FlexPod solution from Cisco, NetApp, and VMware—have been gaining rapid market acceptance. Top of mind for customers of these platforms is how quickly they can reap the benefits of these systems, deliver new IT services from these advanced solutions, and realize the value of their investment. Primary to this is how rapidly customers can operationalize these systems and absorb them into their existing operational processes so that deployment of Cisco UCS Director, the management tool of choice for converged infrastructure systems, becomes a critical path item.

Service Activities and Deliverables

The Cisco Data Center Assessment and Deployment Service for UCS Director is structured to make sure of rapid deployment within the data center lab environment. Further, this service maintains a focus on knowledge transfer throughout the engagement to enable customers to proficiently complete subsequent production deployments, where applicable. Cisco Services has invested substantially in a rapid deployment methodology to make sure of quality deployment using remote consultants, thereby enabling Cisco to deploy the UCS Director solution quickly and cost effectively while enabling customers to achieve their deadlines. Figure 1 provides an overview of the main service activities and deliverables, along with comprehensive document deliverables.

Rapid Accelerated Deployment, Reduced Project Risk, and Cisco Expertise

The Cisco Data Center Assessment and Deployment Services for UCS Director are delivered by Cisco experts who hold a wide array of industry certifications and are subject matter experts in business and technology architecture and data center technologies. They have direct experience in planning, designing, and supporting converged infrastructure, virtualization solutions, device mobility, and cloud architectures across the world. As a result, they are best placed to make sure customers benefit from the vast array of network and converged infrastructure expertise and unique intellectual property to which they have unparalleled access. Cisco Services consultants consequently help customers become experts in managing converged infrastructure solutions with UCS Director. Consequently, they are best placed to deploy the UCS Director solution rapidly and additionally reduce risk to your project time scales.

Why Cisco Services?

Realize the full value of your IT and communications investments more quickly and successfully harness the intelligent network as a powerful business platform with technical and professional services from Cisco together with our partners. Whether you are looking to evolve your network to support business continuity and growth, increase operational efficiency, reduce IT costs, enable a more reliable customer experience, or mitigate risk, we have a service that can help you. Cisco Services uniquely deliver innovative solutions, unmatched expertise, and smart services capabilities using a collaborative partner approach.

Availability
