service description: advanced services – fixed price

identity services engine design and proof of concept service (ASF-CORE-ISE-POC)

this document describes the fixed price identity services engine (ISE) Design and Proof of Concept (POC) Service.

related documents: This document should be read in conjunction with the following documents also posted at www.cisco.com/go/servicedescriptions/: (1) Glossary of Terms; (2) List of Services Not Covered. All capitalized terms in this description have the meaning ascribed to them in the Glossary of Terms.

Direct sale from cisco. If you have purchased these Services directly from cisco for your own internal use, this document is incorporated into your Master Services Agreement, Advanced Services Agreement, or other services agreement covering the purchase of Advanced Services-based services with Cisco ("Master Agreement") If no such Master Agreement exists, then this Service Description will be governed by the terms and conditions set forth in the Terms & Conditions Agreement posted at http://www.cisco.com/web/about/doing_business/legal/terms_conditions.html. If you have purchased these Services directly from cisco for resale purposes, this document is incorporated into your System Integrator Agreement or other services agreement covering the resale of Advanced Services ("Master Resale Agreement"). If the Master Resale Agreement does not contain the terms for the Purchase and Resale of Cisco Advanced Services or equivalent terms and conditions, then this Service Description will be governed by the terms and conditions of the Master Resale Agreement and those terms and conditions set forth in the SOW Resale Terms & Conditions Agreement posted at: http://www.cisco.com/web/about/doing_business/legal/terms_conditions.html. For purposes of the SOW Resale Terms and Conditions this Service Description shall be deemed as a Statement of Work ("SOW"). In the event of a conflict between this Service Description and the Master Agreement or equivalent services exhibit or agreement, this Service Description shall govern.

Sale via cisco authorized reseller. If you have purchased these Services through a cisco Authorized Reseller, this document is for description purposes only; is not a contract between you and cisco. The contract, if any, governing the provision of this Service will be the one between you and your Cisco Authorized Reseller. Your Cisco Authorized Reseller should provide this document to you, or you can obtain a copy of this and other Cisco service descriptions at www.cisco.com/go/servicedescriptions/.

ise design and POC service

service summary

The identity services engine design and proof of concept service provides ISE high-level and low-level design development to meet the Customer requirements and design goals. The ISE Design and Proof of Concept service includes technology readiness assessment, high-level design development, low-level design development, lab proof-of-concept testing and remote design support ("Services").

Services support a design with up to 20,000 endpoints on the ISE.

Services provide a lab proof of concept that includes:

- Setting up one (1) Cisco switch, one (1) Cisco Wireless controller, and Cisco AP and one (1) VPN gateway for one (1) VPN group;
- Defining up to five (5) device profiles;
- Defining up to five (5) posture policies;
- Defining and conducting up to twenty (20) test cases.

Services do not include the following: integration with web services via ISE representational state transfer (REST) or application programming interface (API).

Services do not support production users or devices.

location of services

Services are delivered both remotely or on-site to Customer as agreed upon. Where Customer desires on-site delivery, travel will be limited to no more than three (3) visits of up to two (2) days on-site per visit at a single Customer location during Normal Business Hours excluding Cisco holidays, locally recognized country holidays, vacations and training days. Where on-site travel is agreed upon, travel must be arranged at least two (2) weeks in advance.

technology readiness assessment

Cisco responsibilities

- Conduct a requirements workshop to review with Customer the following:
  - design goals
  - business, technical and operational requirements
Cisco Responsibilities

- Create a low level design for the ISE which includes the following:
  - recommendations on how the Cisco ISE will be implemented to meet requirements
  - recommendations on user and device policies to meet requirements
  - recommendations and guidelines for device configuration
- Document the low level design in the High Level Design Document, and provide it to Customer.
- Review with Customer the Low Level Design Document.

Customer Responsibilities

- Review and approve the Low Level Design Document.

Proof of Concept Lab Testing

Cisco Responsibilities

- Configure lab at Customer location to include:
  - setting up one (1) Cisco switch, one (1) Cisco Wireless controller and Cisco AP and one (1) VPN gateway for one (1) VPN group
  - defining up to five (5) device profiles
  - defining up to five (5) posture policies
- Develop a test plan for the lab environment to include no more than twenty (20) design-specific and Customer-specific test cases.
- Execute the test plan
- Develop a Network Ready For Use (NRFU) to include:
  - test plan
  - test results
  - network implementation plan
- Document the NRFU in the NRFU Document.

Customer Responsibilities

- Assist Cisco in configuring the lab by:
  - scheduling lab space
  - setting up lab equipment
- Provide Cisco ISE test cases, if applicable.

Remote Design Support

Cisco Responsibilities

- Provide up to twelve (12) hours remote design support within three (3) weeks after the Low Level Design Document has been provided to Customer.

Customer Responsibilities

- Schedule design support sessions within three (3) weeks after Low Level Design Document has been provided by Cisco.
- Participate in scheduled design support session(s).
General Customer Responsibilities

- All information (such as but not limited to: designs, topologies, requirements) provided by Customer is assumed to be up-to-date and valid for the Customer’s current environment. Cisco Services are based upon information provided to Cisco by Customer at the time of the Services.
- Customer acknowledges that the completion of Services is dependent upon Customer meeting its responsibilities as indicated herein.
- Identify Customer’s personnel and define their roles in the participation of the Services. Such personnel may include but is not limited to: architecture design and planning engineers, and network engineers.
- Ensure Customer’s personnel are available to participate during the course of the Services to provide information and to participate in scheduled information gathering sessions, interviews, meetings and conference calls.
- Support services provided by Cisco comprise technical advice, assistance and guidance only.

- Customer expressly understands and agrees that the Services shall take place and complete within ninety (90) calendar days from issuing a Purchase Order to Cisco for the Services herein.

Invoicing and Completion

Invoicing

Services will be invoiced upon completion of the Services.

Completion of Services

Cisco will provide written notification upon completion of the Services to Customer. The Customer shall within five (5) Business Days of receipt of such notification provide written acknowledgement of Cisco’s completion of the Services. Customer’s failure to acknowledge completion of the Services or to provide reasons for rejection of the Services within the five (5) Business Day period signifies Customer’s acceptance of completion of the Services in accordance with this Service Description.
