Cisco Modeling Labs (CML) Supplemental End User License Agreement

This Supplemental End User License Agreement ("SEULA") contains additional terms and conditions for the Software product(s) set forth herein and licensed under the End User License Agreement ("EULA") between you and Cisco Systems, Inc., or its Affiliates (collectively, the “Agreement”). Please note that there may be terms in this SEULA that do not apply to you. Only those terms related to the specific Software product(s) you purchased apply to you. Except as otherwise set forth in this SEULA, capitalized terms will have the meanings as in the EULA. To the extent that there is a conflict between the EULA and this SEULA, this SEULA will take precedence.

By downloading, installing, or using the Software you agree to comply with the terms of this SEULA.

DEFINITIONS:

“Cisco Virtualization Reference Platform” means a commercially available Cisco IOS image that runs on virtual machines created by the Software, including Cisco IOSv images bundled within the software and other commercially available IOS products, such as, but not limited to, Cisco CSR-1000v and IOS XRv. The compatible Cisco IOS image and products and their versions are those specified in the latest product Documentation.

“Node” means a virtual network device being simulated using a Cisco Virtualization Reference Platform(s) running on a virtual machine orchestrated by the Software.

ADDITIONAL GENERAL LICENSE RIGHTS AND RESTRICTIONS:

- Software components including but not limited to the Cisco Virtualization Reference Platforms are for use only within the CML environment. They may not be used independently or be exported for use in any other way.

- You may not permit any Authorized Third Parties to exercise Your Usage Rights.

ADDITIONAL RIGHTS AND RESTRICTIONS:

CML-Personal and CML Personal Plus:

- Permitted for non-commercial use (including evaluation use by a commercial entity employee) by a single named individual User on a single server/workstation.
• Cisco does not provide any support for CML-Personal and CML-Personal Plus, including Technical Assistance Center (TAC) support. Both versions of CML are community supported.

CML-Education:
• Permitted for use by nonprofit entities for the instruction of the purchasing entity’s students enrolled in a course that uses CML. Not for use managing or supporting a production network.
• Your Entitlement is based on (1) the number of named Users using the Software simultaneously and (2) the number of Servers on which the Software is installed. Nodes are unlimited.
• You may purchase Basic level support as described here:

CML-Enterprise:
• Permitted for use by You and Your Affiliates.
• Each Server you purchase includes a base number of Nodes, and You can also purchase additional Nodes. Your Entitlement is based on the total number of Nodes, included and purchased; the number of Users is unlimited.
• The Nodes included with each Server are not portable to other Servers, but additional purchased Nodes are portable among Servers by deregistering from the initial Server and manually adding to another Server.
• You may purchase Basic level support as described here:
