ADDITIONAL LICENSE RESTRICTIONS

Device Restricted Versions: Customer may install and run the Software on a single server to manage up to the cumulative device count specified in the Right To Use statement located on the Claim Certificate received as part of the software package. When used anywhere in this SEULA, a "device" means any device in the Customer's network environment which has its own IP address. Please refer to this guide for further device definition.

Customers whose requirements exceed the license limit of devices must purchase additional incremental licenses. Device restrictions are enforced by license registration and through serial key installation. Limitations associated with the maximum number of devices that the application can support per server is specified below. The licensed device limit will always override the maximum number of devices supported per server unless the customer has purchased and registered the 5,000 or the 10,000 device license offering.

Installation and Use

The Software components are provided to Customer solely to install, update, supplement, or replace existing functionality of the applicable Network Management Software product. Some license terms, such as device count and proof of preexisting licenses may be electronically enforced. Customer may install and use the following Software components:

Cisco Prime LAN Management Solution (Cisco Prime LMS): May be installed on one (1) server in Customer's network management environment. Installying the Software and applying a single serial license key to two (2) servers are supported in the 5000 and 10,000 device restricted version, but the cumulative total number of devices supports cannot exceed 5000 and 10,000 respectively per serial license key. When two servers are used to host Cisco Prime LMS, each server should have a copy of the original license key installed on it. Customers should not modify the license file.

Legal restriction concerning the distribution of the Cisco Prime LMS applications is described in the Supplemental License Agreement.

Additional Information for 5,000 Device Restricted Version for LMS 4.2

Users of Cisco Prime LMS 4.2 with 5,000 device restricted licensing may require Cisco Prime LMS to be run on separate servers in order to support a large number of devices or to meet certain performance criteria.

One additional copy of Cisco Prime LMS may be installed on a secondary server provided the customer has purchased and registered the 5,000 device restricted version of the Cisco Prime LMS software. When installed on a secondary server, the cumulative total number of devices supported cannot exceed 5,000 per serial license key. Device support beyond 5,000 unique cumulative devices will require additional licenses and copies of Cisco Prime LMS to be purchased.

Additional Information for 10,000 Device Restricted Version for LMS 4.2

Users of Cisco Prime LMS 4.2 with 10,000 device restricted licensing often require Cisco Prime LMS to be run on separate servers in order to support a large number of devices or to meet certain performance criteria.
