Product Description for

Cisco Evolved Programmable Network Manager

This Product Description is for Cisco Evolved Programmable Network Manager ("EPNM" or the "Product"). Capitalized terms, unless defined in this document, have the meaning in the EULA or General Terms found here: https://www.cisco.com/c/en/us/about/legal/cloud-and-software/end_user_license_agreement.html, or similar terms existing between You and Cisco (the "Agreement"). For clarity, Product Descriptions like this have historically been named either Offer Descriptions or Supplemental End User License Agreements. References to those documents in the Agreement should be interpreted as a reference to this Product Description.

1. Summary

EPNM is an on-premises converged element and network management solution, providing device management, network service provisioning and network assurance across core, edge, aggregation, and access networks.

2. Support and Other Services

We will provide You with support for the Product based on the tier of services purchased. Sample function packs that may be shipped with the Product are not supported except as set forth in the Documentation.

3. Special Terms

3.1 You have purchased the software image that contains the Product. The software image may contain additional programs, features and functionality outside of Your license scope. You are only entitled to use the programs, features and functionality for which You have purchased a license as identified in the applicable Documentation. If you wish to use out of scope items, You will need to purchase additional licenses.

3.2 You have the option to purchase a license to a lab version of the Product. The lab version of the Product is strictly limited to non-production use only.
