Offer Description: Cisco Crosswork Optimization Engine

Your use of Cisco Crosswork Optimization Engine ("COE" or the "Cisco Technology") is governed by these Product Terms (the "Terms") and the Cisco End User License Agreement located at www.cisco.com/go/eula (the "EULA") (or similar terms existing between you and Cisco) (the "Agreement"). If capitalized terms are not defined in this Offer Description, then they have the meaning given to them in the Agreement or order(s).

1. Description

Cisco Crosswork Optimization Engine Software provides real-time network optimization capabilities that allow operators to improve network utility as well as help increase service velocity using real-time traffic engineering and proactive optimization. COE is available as a subscription term license.

2. Supplemental Terms and Conditions

   Required Licenses

   Cisco Crosswork Optimization Engine requires each of the following: (1) RTU license for each copy of the Software that You load onto a Server (either physical or virtual); and (2) RTM license for each Node that is Managed by the Software.

3. Support & Maintenance

   We will provide You with Support and Maintenance for the Cisco Technology based on the tier of services purchased, as described here: https://www.cisco.com/c/dam/en_us/about/doing_business/docs/cisco-software-support-service.pdf

4. Definitions

   "Manage" means to use the Software to manage, monitor, or otherwise exchange information with a Node.

   "Node" means a physical or virtual router, switch, or Server in Your network.

   "RTM" means the right to Manage.

   "RTU" means the right to use a single copy of Cisco Crosswork Optimization Engine on a Server.

   "Server" means a computing device that uses the Software to Manage and exchange data with other devices.
