

Offer Description

Cisco Service Provider Routing Consumption Model Software Products

This Offer Description is part of the [General Terms](#) or similar terms existing between You and Cisco (e.g., the End User License Agreement) (the “**Agreement**”). Capitalized terms, unless defined in this document, have the meaning in the Agreement. Any references to the Supplemental End User License Agreement or SEULA mean Offer Description.

1. Summary

This Offer Description applies to the Foundation Software and the Advanced Software Features and any Cisco Offers that reference this Offer Description (collectively, the “**Cisco Offer**”).

2. Support and Other Services

Your purchase of the Cisco Offer does not include support, but You can purchase support separately.

3. Data Handling

The [Disclosure Documents](#) for Cisco Service Provider Routing Consumption Model Software Products provide information about data handling practices, security controls, and other features specific to this Cisco Offer.

4. Special Terms

4.1 Foundation Software and Advanced Software Features. In order to use a port and the associated transport protocol on an SP Routing Consumption Model Hardware product, You are required to purchase from an Approved Source the applicable licenses for the Foundation Software. In order to use an Advanced Software Feature on an SP Routing Consumption Model Hardware product, You are required to purchase from an Approved Source the applicable licenses for the Advanced Software Feature in addition to the foregoing licenses for the Foundation Software. Your use of the Software is subject to any other limitations indicated in Your Order (for example, per system, per port, per client, etc.).

4.2 Smart Licensing. You must register and report license usage for the Cisco Offer via Cisco Smart Licensing to use this Cisco Offer. For a more detailed overview on Cisco Smart Licensing, go to <http://cisco.com/go/licensingguide>.

4.3 Software License Portability. Subject to and conditioned upon Your compliance with the Agreement including, without limitation, Section 4.3 (License Portability Limitations) below, Cisco grants to You the right, during the term of the license, to transfer the Cisco Offer and the associated license entitlement from one SP Routing Consumption Model Hardware product to another of the same SP Routing Consumption Model Hardware product or its designated successor SP Routing Consumption Model Hardware product (if any, as determined by Cisco) within the same product family. This transferability is conditioned on the following: (a) You have purchased and continuously maintained Cisco approved software maintenance on the Cisco Offer and (b) You purchased the SP Routing Consumption Model Hardware products from an Approved Source and are owned by You.

4.4 License Portability Limitations. You understand and agree that:

- (A) Each license for the Cisco Offer is a single license and therefore license entitlements for a single Cisco Offer may not be unbundled and divided among more than one device.
- (B) Each license entitlement may only be used on, or for, a single device and therefore once a license entitlement is transferred to a different device, the Cisco Offer must be deactivated on the original device.
- (C) Not all features or functionality are supported across different products, including, without limitation, successor products.
- (D) Although there is no fee associated with transferring a license entitlement for the Cisco Offer from one SP Routing Consumption Model Hardware product to another of the same SP Routing Consumption Model Hardware product (for example, from one A9K-8X100GE-CM to another A9K-8X100GE-CM), there may be an upgrade fee required when transferring a license entitlement for the Cisco Offer to a successor SP Routing Consumption Model Hardware product.

4.5 Definitions

Term	Meaning
Advanced Software Feature	An optional software feature (as designated by Cisco) for SP Routing Consumption Model Hardware that provides additional functionality (for example, S-A9K-HQOS-RTU-10 (ASR 9000 H-QoS 10Gbps Right to Use License)).
Foundation Software	Mandatory software (as designated by Cisco) for SP Routing Consumption Model Hardware that provides, on a per port basis, certain transport protocol support and port activation (for example, SA9K-IPB-10G (ASR 9000 Basic 10Gbps IP/MPLS Foundation License)).
SP Routing Consumption Model Hardware	Certain Cisco service provider routing consumption model hardware products designated by Cisco (for example, A9K-8X100GE-CM (ASR 9000 8-port 100GE Consumption Model Line Card)). Such hardware products enable a form of “consumption model” by supporting Smart Licensing and the right to use certain port capacity and additional features based on the purchase of licenses for Foundation Software and Advanced Software Features, as applicable.
