+linux (4.15.0-166.174) bionic; urgency=medium
+* bionic/linux: 4.15.0-166.174 -proposed tracker (LP: #1953667)
+  * Ubuntu version macros overflow with high ABI numbers (LP: #1953522)
+    - SAUCE: Revert "stable: clamp SUBLEVEL in 4.14"
+  * test_bpf.sh test in net of ubuntu_kernel_selftests failed on B-4.15 and
+    variants (LP: #1953287)
+    - SAUCE: Revert "bpf: add also cbpf long jump test cases with heavy expansion"
+  * test_bpf.sh test in net of ubuntu_kernel_selftests failed on B-4.15 and
+    variants (LP: #1953287) // CVE-2018-25020
+ bpf: fix truncated jump targets on heavy expansions
+
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com>  Wed, 08 Dec 2021 18:15:03 +0100
+
+linux (4.15.0-165.173) bionic; urgency=medium
+
+ * bionic/linux: 4.15.0-165.173 -proposed tracker (LP: #1952780)
+
+ * Support builtin revoked certificates (LP: #1932029)
+ - certs: Add EFI_CERT_X509_GUID support for dbx entries
+ - certs: Move load_system_certificate_list to a common function
+ - integrity: Move import of MokListRT certs to a separate routine
+ - integrity: Load certs from the EFI MOK config table
+ - certs: Add ability to preload revocation certs
+ - certs: add 'x509_revocation_list' to .gitignore
+ - SAUCE: Dump stack when X.509 certificates cannot be loaded
+ - [Packaging] build canonical-revoked-certs.pem from branch/arch certs
+ - [Packaging] Revoke 2012 UEFI signing certificate as built-in
+ - [Config] Configure CONFIG_SYSTEM_REVOCATION_KEYS with revoked keys
+
+ * Support importing mokx keys into revocation list from the mok table
+ (LP: #1928679)
+ - efi: Support for MOK variable config table
+ - efi: mokvar-table: fix some issues in new code
+ - efi: mokvar: add missing include of asm/early_ioremap.h
+ - efi/mokvar: Reserve the table only if it is in boot services data
+ - SAUCE: integrity: Load mokx certs from the EFI MOK config table
+ - SAUCE: integrity: add informational messages when revoking certs
+
+ * CVE-2021-4002
+ - arm64: tlb: Provide forward declaration of tlb_flush() before including
+ - tlb.h
+ - mm: mmu_notifier fix for tlb_end_vma
+ - hugetlbfs: flush TLBs correctly after huge_pmd_unshare
+
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com>  Tue, 30 Nov 2021 17:58:59 +0100
+
+linux (4.15.0-164.172) bionic; urgency=medium
+
+ * bionic/linux: 4.15.0-164.172 -proposed tracker (LP: #1952348)
+
+ * Packaging resync (LP: #1786013)
+ - [Packaging] resync update-dkms-versions helper
+ - debian/dkms-versions -- update from kernel-versions (main/2021.11.29)
+
+ * Bionic update: upstream stable patchset 2021-11-23 (LP: #1951997)
+ - btrfs: always wait on ordered extents at fsync time
+ - ARM: dts: at91: sama5d2_som1_ek: disable ISC node by default
- xtensa: xtfpga: use CONFIG_USE_OF instead of CONFIG_OF
- xtensa: xtfpga: Try software restart before simulating CPU reset
- NFSD: Keep existing listeners on portlist error
- netfilter: ipvs: make global sysctl readonly in non-init netns
- NIOS2: irqflags: rename a redefined register name
- can: rcar_can: fix suspend/resume
- can: peak_usb: pcan_usb_fd_decode_status(): fix back to ERROR_ACTIVE state
- nf: nci: fix the UAF of rf_conn_info object
- netfilter: Kconfig: use 'default y' instead of 'm' for bool config option
- btrfs: deal with errors when checking if a dir entry exists during log replay
- net: stmmac: add support for dwmac 3.40a
- ARM: dts: spear3xx: Fix gmac node
- isdn: mISDN: Fix sleeping function called from invalid context
- platform/x86: intel_scu_ipc: Update timeout value in comment
- ALSA: hda: avoid write to STATESTES if controller is in reset
- tracing: Have all levels of checks prevent recursion
- ARM: 9122/1: select HAVE_FUTEX_CMPXCHG
- dma-debug: fix sg checks in debug_dma_map_sg()
- ASoC: wm8960: Fix clock configuration on slave mode
- lan78xx: select CRC32
- net: hns3: add limit ets dwrr bandwidth cannot be 0
- net: hns3: disable sriov before unload hclge layer
- ALSA: hda/realtek: Add quirk for Clevo PC50HS
- mm, slub: fix mismatch between reconstructed freelist depth and cnt
- gcc-plugins/structleak: add makefile var for disabling structleak

 * creat09 from ubuntu_ltp_syscalls and cve-2018-13405 from ubuntu_ltp/cve
   failed with XFS (LP: #1950239)
- xfs: ensure that the inode uid/gid match values match the icdinode ones
- xfs: merge the projid fields in struct xfs_icdinode
- xfs: remove the icdinode di_uid/di_gid members
- xfs: fix up non-directory creation in SGID directories

 * ubuntu_ltp / finit_module02 fails on v4.15 and other kernels (LP: #1950644)
- vfs: check fd has read access in kernel_read_file_from_fd()

 * reuseport_bpf_numa in net from ubuntu_kernel_selftests fails on ppc64le
   (LP: #1867570)
- selftests/net: Fix reuseport_bpf_numa by skipping unavailable nodes
- Bionic update: upstream stable patchset 2021-11-12 (LP: #1950816)
- net: mdio: introduce a shutdown method to mdio device drivers
- xen-netback: correct success/error reporting for the SKB-with-fraglist case
- sparc64: fix pci_iounmap() when CONFIG_PCI is not set
- ext2: fix sleeping in atomic bugs on error
- scsi: sd: Free scsi_disk device via put_device()
- usb: testusb: Fix for showing the connection speed
- usb: dwc2: check return value after calling platform_get_resource()
- scsi: ses: Retry failed Send/Receive Diagnostic commands
- libata: Add ATA_HORKAGE_NO_NCQ_ON_ATI for Samsung 860 and 870 SSD.
- libtimerqueue: Rely on rbtree semantics for next timer
- selftests: be sure to make khdr before other targets
- Partially revert "usb: Kconfig: using select for USB_COMMON dependency"
- USB: cdc-acm: fix racy tty buffer accesses
- USB: cdc-acm: fix break reporting
- ovl: fix missing negative dentry check in ovl_rename()
- nfsd4: Handle the NFSv4 READDR 'dircount' hint being zero
- xen/balloon: fix cancelled balloon action
- ARM: dts: omap3430-sdp: Fix NAND device node
- ARM: dts: qcom: apq8064: use compatible which contains chipid
- bpf: add also chpf long jump test cases with heavy expansion
- bpf, mips: Validate conditional branch offsets
- xtensa: call irqchip_init only when CONFIG_USE_OF is selected
- bpf: Fix integer overflow in prealloc_elems_and_freelist()
- phy: mdio: fix memory leak
- net_sched: fix NULL deref in fifo_set_limit()
- powerpc/fsl/dts: Fix phy-connection-type for fm1mac3
- ptp_pch: Load module automatically if ID matches
- ARM: imx6: disable the GIC CPU interface before calling stby-poweroff
- sequence
- net: bridge: use nla_total_size_64bit() in br_get_linkxstats_size()
- netlink: annotate data races around nlk->bound
- drm/nouveau/debugfs: fix file release memory leak
- rtnetlink: fix if_nlmsg_stats_size() under estimation
- i40e: fix endless loop under rtln
- i2c: acpi: fix resource leak in reconfiguration device addition
- net: phy: bcm7xxx: Fixed indirect MMD operations
- net: apple: Fix logical maximum and usage maximum of Magic Keyboard JIS
- netfilter: ip6_tables: zero-initialize fragment offset
- mac80211: Drop frames from invalid MAC address in ad-hoc mode
- m68k: Handle arrivals of multiple signals correctly
- net: sun: SUNVNET_COMMON should depend on INET
- scsi: ses: Fix unsigned comparison with less than zero
- scsi: virtio_scsi: Fix spelling mistake "Unsupport" -> "Unsupported"
- perf/x86: Reset destroy callback on event init failure
- sched: Always inline is_percpu_thread()
- bpf, arm: Fix register clobbering in div/mod implementation
+ - i40e: Fix freeing of uninitialized misc IRQ vector
+ - mac80211: check return value of rhashtable_init
+ - stable: clamp SUBLEVEL in 4.14
+ - ALSA: seq: Fix a potential UAF by wrong private_free call order
+ - s390: fix strchr() implementation
+ - btrfs: deal with errors when replaying dir entry during log replay
+ - btrfs: deal with errors when adding inode reference during log replay
+ - btrfs: check for error when looking up inode during dir entry replay
+ - xhci: Fix command ring pointer corruption while aborting a command
+ - xhci: Enable trust tx length quirk for Fresco FL11 USB controller
+ - cb710: avoid NULL pointer subtraction
+ - efi/cper: use stack buffer for error record decoding
+ - efi: Change down_interruptible() in virt_efi_reset_system() to
+   down_trylock()
+ - usb: musb: dsps: Fix the probe error path
+ - Input: xpad - add support for another USB ID of Nacon GC-100
+ - USB: serial: qcsserial: add EM9191 QDL support
+ - USB: serial: option: add Quectel EC200S-CN module support
+ - USB: serial: option: add Telit LE910Cx composition 0x1204
+ - USB: serial: option: add prod. id for Quectel EG91
+ - virtio: write back F_VERSION_1 before validate
+ - nvme: Fix shift-out-of-bound (UBSAN) with byte size cells
+ - x86/Kconfig: Do not enable AMD_MEM_ENCRYPT_ACTIVE_BY_DEFAULT automatically
+ - iio: adc: aspeed: set driver data when adc probe.
+ - iio: adc128s052: Fix the error handling path of `adc128_probe()'
+ - iio: light: opt3001: Fixed timeout error when 0 lux
+ - iio: ssp_sensors: add more range checking in ssp_parse_dataframe()
+ - iio: ssp_sensors: fix error code in ssp_print_mcu_debug()
+ - scpt: account stream padding length for reconf chunk
+ - net: arc: select CRC32
+ - net: korina: select CRC32
+ - net: encx24j600: check error in devm_regmap_init_encx24j600
+ - ethernet: s2io: fix setting mac address during resume
+ - nfc: fix error handling of nfc_proto_register()
+ - NFC: digital: fix possible memory leak in digital tg_listen_mdaa()
+ - NFC: digital: fix possible memory leak in digital_request_sdd_req()
+ - pata_legacy: fix a couple uninitialized variable bugs
+ - drm/msm: Fix null pointer dereference on pointer edp
+ - drm/msm/dsi: fix off by one in dsi_bus_pll_enable error handling
+ - acpi/arm64: fix next_platform_timer() section mismatch error
+ - qed: Fix missing error code in qed_slowpath_start()
+ - r8152: select CRC32 and CRYPTO_HASH/CRYPTO_SHA256
  + -- Kelsey Skunberg <kelsey.skunberg@canonical.com> Fri, 26 Nov 2021 17:31:19 -0700
  +linux (4.15.0-163.171) bionic; urgency=medium
  + * bionic/linux: 4.15.0-163.171 -proposed tracker (LP: #1949874)
+ * Packaging resync (LP: #1786013)
+ - [Packaging] update Ubuntu.md
+ - debian/dkms-versions -- update from kernel-versions (main/2021.11.08)
+
+ * Unable to build net/reuseport_bpf and other tests in ubuntu_kernel_selftests
+ on Bionic with make command (LP: #1949889)
+ - selftests: Fix loss of test output in run_kselftests.sh
+ - selftests: Makefile set KSFT_TAP_LEVEL to prevent nested TAP headers
+ - selftests: fix headers_install circular dependency
+ - selftests: fix bpf build/test workflow regression when KBUILD_OUTPUT is set
+ - selftests: vm: Fix test build failure when built by itself
+
+ * KVM emulation failure when booting into VM crash kernel with multiple CPUs
+ (LP: #1948862)
+ - KVM: x86: Properly reset MMU context at vCPU RESET/INIT
+
+ * aufs: kernel bug with apparmor and fuseblk (LP: #1948470)
+ - SAUCE: aufs: bugfix, stop omitting path->mnt
+
+ * ebpf: bpf_redirect fails with ip6 gre interfaces (LP: #1947164)
+ - net: handle ARPHRD_IP6GRE in dev_is_mac_header_xmit()
+
+ * require CAP_NET_ADMIN to attach N_HCI ldisc (LP: #1949516)
+ - Bluetooth: hci_ldisc: require CAP_NET_ADMIN to attach N_HCI ldisc
+
+ * ACL updates on OCFS2 are not revalidated (LP: #1947161)
+ - ocfs2: fix remounting needed after setfacl command
+
+ * ppc64 BPF JIT mod by 1 will not return 0 (LP: #1948351)
+ - powerpc/bpf: Fix BPF_MOD when imm == 1
+
+ * Drop "UBUNTU: SAUCE: cachefiles: Page leaking in cachefiles_read_backing_file while vmscan is active" (LP: #1947709)
+ - Revert "UBUNTU: SAUCE: cachefiles: Page leaking in cachefiles_read_backing_file while vmscan is active"
+ - cachefiles: Fix page leak in cachefiles_read_backing_file while vmscan is active
+
+ * Some test in ubuntu_bpf test_verifier failed on i386 Bionic kernel
+ (LP: #1788578)
+ - bpf: fix context access in tracing progs on 32 bit archs
+
+ * test_bpf.sh from ubuntu_kernel_selftests.net from linux ADT test failure
+ with linux/4.15.0-149.153 i386 (Segmentation fault) (LP: #1934414)
+ - selftests/bpf: make test_verifier run most programs
+ - bpf: add couple of test cases for div/mod by zero
+ - bpf: add further test cases around div/mod and others
- Bionic update: upstream stable patchset 2021-11-02 (LP: #1949512)
  - usb: gadget: r8a66597: fix a loop in set_feature()
  - usb: musb: usb6010: uninitialized data in tusb_fifo_write_unaligned()
  - cifs: fix incorrect check for null pointer in header_assemble
  - xen/x86: fix PV trap handling on secondary processors
  - usb-storage: Add quirk for ScanLogic SL11R-IDE older than 2.6c
  - USB: serial: cp210x: add ID for GW Instek GDM-834x Digital Multimeter
  - staging: greaybus: uart: fix tty use after free
  - Re-enable UAS for LaCie Rugged USB3-FW with fk quirk
  - USB: serial: mos7840: remove duplicated 0xac24 device ID
  - USB: serial: option: add Telit LN920 compositions
  - USB: serial: option: remove duplicate USB device ID
  - USB: serial: option: add device id for Foxconn T99W265
  - mcb: fix error handling in mcb_alloc_bus()
  - serial: mvebu-uart: fix driver's tx_empty callback
  - net: hso: fix muxed tty registration
  - bnxt_en: Fix TX timeout when TX ring size is set to the smallest
  - net/mlx4_en: Don't allow aRFS for encapsulated packets
  - scsi: iscsi: Adjust iface sysfs attr detection
  - thermal/core: Potential buffer overflow in thermal_build_list_of_policies()
  - irqchip/gic-v3-its: Fix potential VPE leak on error
  - md: fix a lock order reversal in md_alloc
  - blktrace: Fix uaf in blk_trace access after removing by sysfs
  - net: macb: fix use after free on rmmod
  - net: stmmac: allow CSR clock of 300MHz
  - m68k: Double cast io functions to unsigned long
  - xen/balloon: use a kernel thread instead a workqueue
  - compiler.h: Introduce absolute_pointer macro
  - net: i825xx: Use absolute_pointer for memcpy from fixed memory location
  - sparc: avoid stringop-overread errors
  - qnx4: avoid stringop-overread errors
  - parisc: Use absolute_pointer() to define PAGE0
  - arm64: Mark __stack_chk_guard as __ro_after_init
  - alpha: Declare virt_to_phys and virt_to_bus parameter as pointer to volatile
  - net: 6pack: Fix tx timeout and slot time
  - spi: Fix tegra20 build with CONFIG_PM=n
  - arm64: dts: marvell: armada-37xx: Extend PCIe MEM space
  - PCI: aardvark: Fix checking for PIO Non-posted Request
  - PCI: aardvark: Fix checking for PIO status
  - xen/balloon: fix balloon kthread freezing
  - qnx4: work around gcc false positive warning bug
  - tty: Fix out-of-bound vmalloc access in imageblit
  - cpufreq: schedutil: Use kobject release() method to free sugov_tunables
  - cpufreq: schedutil: Destroy mutex before kobject_put() frees the memory
  - mac80211: fix use-after-free in CCMP/GCMP RX
  - ipvs: check that ip_vs_conn_tab_bits is between 8 and 20
  - mac80211: Fix ieee80211_amsdu_aggregate frag_tail bug
+ - mac80211: limit injected vht mcs/nss in ieee80211ParseTxRadiotap
+ - scpt: break out if skb_header_pointer returns NULL in scptRcvOotb
+ - hwmon: (tmp421) fix rounding for negative values
+ - e100: fix length calculation in e100GetRegsLen
+ - e100: fix buffer overrun in e100GetRegs
+ - scsi: csiostor: Add module sofdep on cxgb4
+ - af_unix: fix races in sk_peer_pid and sk_peer_cred accesses
+ - ipack: ipoctal: fix stack information leak
+ - ipack: ipoctal: fix tty registration race
+ - ipack: ipoctal: fix tty-registration error handling
+ - ipack: ipoctal: fix missing allocation-failure check
+ - ipack: ipoctal: fix module reference leak
+ - ext4: fix potential infinite loop in ext4_dx readdir()
+ - net: udp: annotate data race around udp_skb(sk)->corkflag
+ - EDAC/synopsys: Fix wrong value type assignment for edac_mode
+ - ARM: 9077/1: PLT: Move struct plt_entries definition to header
+ - ARM: 9078/1: Add warn suppress parameter to arm_gen_branch_link()
+ - ARM: 9079/1: ftrace: Add MODULE_PLTS support
+ - ARM: 9098/1: ftrace: MODULE_PLT: Fix build problem without DYNAMIC_FTRACE
+ - arm64: Extend workaround for erratum 1024718 to all versions of Cortex-A55
+ - hso: fix bailout in error case of probe
+ - usb: hso: fix error handling code of hso_create_net_device
+ - usb: hso: remove the bailout parameter
+ - crypto: ccp - fix resource leaks in ccp_run_aes_gcm_cmd()
+ - HID: betop: fix slab-out-of-bounds Write in betop_probe
+ - netfilter: ipset: Fix oversized kvmalloc() calls
+ - HID: usbhid: free raw_report buffers in usbhid_stop
+ - cred: allow get_cred() and put_cred() to be given NULL.
+ - gpi0: uniphier: Fix void functions to remove return value
+ - tty: synclink_gt, drop unneeded forward declarations
+ - tty: synclink_gt: rename a conflicting function name
+ - drm/amd/display: Pass PCI deviceid into DC
+ - hwmon: (tmp421) Replace S_<PERMS> with octal values
+ - hwmon: (tmp421) report /PVLD condition as fault
+ + * ACL updates on OCFS2 are not revalidated (LP: #1947161) // Bionic update:
+ upstream stable patchset 2021-11-02 (LP: #1949512)
+ - ocfs2: drop acl cache for directories too
+ + -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Fri, 05 Nov 2021 12:22:08 +0100
+ + linux (4.15.0-162.170) bionic; urgency=medium
+ + * bionic/linux: 4.15.0-162.170 -proposed tracker (LP: #1947293)
+ + * Add final-checks to check certificates (LP: #1947174)
+ + - [Packaging] Add system trusted and revocation keys final check
+ +
+ * CVE-2020-36385
+ - RDMA/cma: Add missing locking to rdma_accept()
+ - RDMA/ucma: Fix the locking of ctx->file
+ - RDMA/ucma: Rework ucma_migrate_id() to avoid races with destroy
+
+ + * CVE-2021-28950
+ - fuse: fix live lock in fuse_iget()
+
+ + * CVE-2020-36322
+ - fuse: fix bad inode
+
+ + * Bionic update: upstream stable patchset 2021-10-13 (LP: #1947011)
+ - rcu: Fix missed wakeup of exp_wq waiters
+ - apparmor: remove duplicate macro list_entry_is_head()
+ - cryptp: talitos - fix max key size for sha384 and sha512
+ - scpt: validate chunk size in __rcv_asconf_lookup
+ - scpt: add param size validation for SCTP_PARAM_SET_PRIMARY
+ - dmaengine: acpi: Avoid comparison GSI with Linux vIRQ
+ - thermal/drivers/exynos: Fix an error code in exynos_tmu_probe()
+ - 9p/trans_virtio: Remove sysfs file on probe failure
+ - prctl: allow to setup brk for et_fct executables
+ - profiling: fix shift-out-of-bounds bugs
+ - pwm: lpc32xx: Don't modify HW state in .probe() after the PWM chip was
+ registered
+ - Kconfig.debug: drop selecting non-existing HARDLOCKUP_DETECTOR_ARCH
+ - parisc: Move pci_dev_is_behind_card_dino to where it is used
+ - dmaengine: iot: depends on !UML
+ - dmaengine: xilinx_dma: Set DMA mask for coherent APIs
+ - ceph: lockdep annotations for try_nonblocking_invalidate
+ - nilfs2: fix memory leak in nilfs_sysfs_create_device_group
+ - nilfs2: fix NULL pointer in nilfs_###name##_#attr_release
+ - nilfs2: fix memory leak in nilfs_sysfs_create_##name##_group
+ - nilfs2: fix memory leak in nilfs_sysfs_delete_##name##_group
+ - nilfs2: fix memory leak in nilfs_sysfs_create_snapshot_group
+ - nilfs2: fix memory leak in nilfs_sysfs_delete_snapshot_group
+ - pwm: rockchip: Don't modify HW state in .remove() callback
+ - blk-throttle: fix UAF by deleting timer in blk_throtl_exit()
+ - drm/nouvea/nvkm: Replace -ENOSYS with -ENODEV
+ - nilfs2: use refcount_dec_and_lock() to fix potential UAF
+ - drivers: base: cacheinfo: Get rid of DEFINE_SMP_CALL_CACHE_FUNCTION()
+
+ + * Invalid backport to v4.15: missing pgtable_l5_enabled (LP: #1946464)
+ - SAUCE: Revert "x86/mm: Don't free P4D table when it is folded at runtime"
+
+ + * CVE-2021-38199
+ - NFSv4: Initialise connection to the server in nfs4_alloc_client()
+
+ + * CVE-2019-19449
* f2fs: fix wrong total_sections check and fsmeta check
* f2fs: fix to do sanity check on segment/section count
* vrf: fix refcnt leak with vxlan slaves (LP: #1945180)
* ipv4: Fix device used for dst_alloc with local routes
* Check for changes relevant for security certifications (LP: #1945989)
  * [Packaging] Add a new fips-checks script
  * [Packaging] Add fips-checks as part of finalchecks
* CVE-2021-3759
  * memcg: enable accounting of ipc resources
* Bionic update: upstream stable patchset 2021-09-27 (LP: #1945224)
  * ARC: Fix CONFIG_STACKDEPOT
  * can: usb: esd_usb2: esd_usb2_rx_event(): fix the interchange of the CAN RX
    and TX error counters
  * Revert "USB: serial: ch341: fix character loss at high transfer rates"
  * USB: serial: option: add new VID/PID to support Fibocom FG150
  * usb: dwc3: gadget: Fix dwc3_calc_trbs_left()
  * usb: dwc3: gadget: Stop EP0 transfers during pullup disable
  * IB/hfi1: Fix possible null-pointer dereference in _extend_sdma_tx_descs()
  * e1000e: Fix the max snoop/no-snoop latency for 10M
  * ip_gre: add validation for csum_start
  * xgene-v2: Fix a resource leak in the error handling path of 'xge_probe()'
  * net: marvell: fix MVNETA_TX_IN_PRGRS bit number
  * usb: gadget: u_audio: fix race condition on endpoint stop
  * opp: remove WARN when no valid OPPs remain
  * virtio: Improve vq->broken access to avoid any compiler optimization
  * vrings: Use wiov->used to check for read/write desc order
  * drm: Copy drm_wait_vblank to user before returning
  * drm/nouveadisp: power down unused DP links during init
  * net/rds: dma_map_sg is entitled to merge entries
  * vt_kdsetmode: extend console locking
  * fbmem: add margin check to fb_check_caps()
  * KVM: x86/mmufix: Treat NX as used (not reserved) for all !TDP shadow MMUs
  * Revert "floppy: reintroduce O_NDELAY fix"
  * net: qrtr: fix another OOB Read in qrtr_endpoint_post
  * net: hns3: fix get wrong pfc_en when query PFC configuration
  * xtensa: fix kconfig unmet dependency warning for HAVE_FUTEX_CMPXCHG
  * qed: Fix the VF msix vectors flow
  * net: macb: Add a NULL check on desc_ptp
  * qede: Fix memset corruption
  * perf/x86/intel/pt: Fix mask of num_address_ranges
  * perf/x86/amd/poll: Work around erratum #1197
  * cryptoloop: add a deprecation warning
  * ARM: 8918/2: only build return_address() if needed
  * ALSA: pcm: fix divide error in snd_pcm_lib_ioctl
- clk: fix build warning for orphan_list
- media: stkwebcam: fix memory leak in stk_camera_probe
- igmp: Add ip_mc_list lock in ip_check_mc_rcu
- USB: serial: mos7720: improve OOM-handling in read_mos_reg()
- /2fs: fix potential overflow
- ath10k: fix recent bandwidth conversion bug
- ipv4/icmp: 13ndev: Perform icmp error route lookup on source device routing
- table (v2)
- crypto: talitos - reduce max key size for SEC1
- powerpc/module64: Fix comment in R_PPC64_ENTRY handling
- powerpc/boot: Delete unneeded .globl _zimage_start
- net: ll_temac: Remove left-over debug message
- mm/page_alloc: speed up the iteration of max_order
- Revert "btrfs: compression: don't try to compress if we don't have enough pages"
- usb: host: xhci-rcar: Don't reload firmware after the completion
- x86/reboot: Limit Dell Optiplex 990 quirk to early BIOS versions
- PCI: Call Max Payload Size-related fixup quirks early
- regmap: fix the offset of register error log
- crypto: mxs-dcp - Check for DMA mapping errors
- power: supply: apx288_fuel_gauge: Report register-address on readb / writeb errors
- crypto: omap-sham - clear dma flags only after omap_sham_update_dma_stop()
- udf: Check LVID earlier
- isofs: joliet: Fix iocharset=utf8 mount option
- nvme-rdma: don't update queue count when failing to set io queues
- power: supply: max17042_battery: fix typo in MAX17042_TOFF
- s390/cio: add dev_busid sysfs entry for each subchannel
- libata: fix ata_host_start()
- crypto: qat - do not ignore errors from enable_vf2pf_comms()
- crypto: qat - handle both source of interrupt in VF ISR
- crypto: qat - fix reuse of completion variable
- crypto: qat - fix naming for init/shutdown VF to PF notifications
- crypto: qat - do not export adf iov_putmsg()
- udf_get_extendedattr() had no boundary checks.
- m68k: emu: Fix invalid free in nfeth_cleanup()
- spi: spi-fsl-dspi: Fix issue with uninitialized dma_slave_config
- spi: spi-pic32: Fix issue with uninitialized dma_slave_config
- clocksources/drivers/sh_cmt: Fix wrong setting if don't request IRQ for clock channel
- crypto: qat - use proper type for vf_mask
- certs: Trigger creation of RSA module signing key if it's not an RSA key
- soc: rockchip: ROCKCHIP_GRF should not default to y, unconditionally
- media: dvb-usb: fix uninit-value in dvb_usb_adapter_dvb_init
- media: dvb-usb: fix uninit-value in vp702x_read_mac_addr
- media: go7007: remove redundant initialization
- Bluetooth: sco: prevent information leak in sco_conn_defer_accept()
- tcp: seq_file: Avoid skipping sk during tcp seek last pos
+ - net: cipso: fix warnings in netlbl_cipsov4_add_std
+ - i2c: highlander: add IRQ check
+ - PCI: PM: Avoid forcing PCI_D0 for wakeup reasons inconsistently
+ - PCI: PM: Enable PME if it can be signaled from D3cold
+ - soc: qcom: smm: Fix missed interrupts if state changes while masked
+ - Bluetooth: increase BTNAMSIZ to 21 chars to fix potential buffer overflow
+ - arm64: dts: exynos: correct GIC CPU interfaces address range on Exynos7
+ - Bluetooth: fix repeated calls to sco_sock_kill
+ - drm/msm/dsi: Fix some reference counted resource leaks
+ - usb: gadget: udc: at91: add IRQ check
+ - usb:phy: fsl-usb: add IRQ check
+ - usb:phy: twl6030: add IRQ checks
+ - Bluetooth: Move shutdown callback before flushing tx and rx queue
+ - usb: host: ohci-tmio: add IRQ check
+ - usb:phy: tahvo: add IRQ check
+ - mac80211: Fix insufficient headroom issue for AMSDU
+ - usb: gadget: mv_u3d: request_irq() after initializing UDC
+ - Bluetooth: add timeout sanity check to hci_inquiry
+ - i2c: iop3xx: fix deferred sanity check in hci_inquiry
+ - i2c: s3c2410: fix IRQ check
+ - mmc: dw_mmc: Fix issue with uninitialized dma_slave_config
+ - mmc: moxart: Fix issue with uninitialized dma_slave_config
+ - CIFS: Fix a potentially linear read overflow
+ - i2c: mt65xx: fix IRQ check
+ - usb: ehci-orion: Handle errors of clk_prepare_enable() in probe
+ - usb: bdc: Fix an error handling path in 'bdc_probe()' when no suitable DMA
+ - config is available
+ - tty:serial: fsl_lpuart: fix the wrong mapbase value
+ - ath6kl: wmi: fix an error code in ath6kl_wmi_sync_point()
+ - bcma: Fix memory leak for internally-handled cores
+ - ipv4: make exception cache less predictable
+ - net: sched: Fix qdisc_rate_table refcount leak when get tcf_block failed
+ - net: qualcomm: fix QCA7000 checksum handling
+ - netns: protect netns ID lookups with RCU
+ - tty: Fix data race between tiocsti() and flush_to_ldisc()
+ - x86/resctrl: Fix a maybe-uninitialized build warning treated as error
+ - KVM: x86: Update vCPU's hv_clock before back to guest when tsc_offset is
+ - adjusted
+ - IMA: remove -Wmissing-prototypes warning
+ - backlight: pwm_bl: Improve bootloader/kernel device handover
+ - clk: kirkwood: Fix a clocking boot regression
+ - fbmem: don't allow too huge resolutions
+ - rtc: tps65910: Correct driver module alias
+ - blk-zoned: allow zone management send operations without CAP_SYS_ADMIN
+ - blk-zoned: allow BLKREPORTZONE without CAP_SYS_ADMIN
+ - PCI/MSI: Skip masking MSI-X on Xen PV
+ - powerpc/perf/hv-gpci: Fix counter value parsing
+ - xen: fix setting of max_pfn in shared_info
+ - include/linux/list.h: add a macro to test if entry is pointing to the head
+ - 9p/xen: Fix end of loop tests for list_for_each_entry
+ - soc: aspeed: lpc-ctrl: Fix boundary check for mmap
+ - crypto: public_key: fix overflow during implicit conversion
+ - block: bfq: fix bfq_set_next_ioprio_data()
+ - power: supply: max17042: handle fails of reading status register
+ - dm crypt: Avoid percpu_counter spinlock contention in crypt_page_alloc()
+ - VMCI: fix NULL pointer dereference when unmapping queue pair
+ - media: uvc: don't do DMA on stack
+ - media: re-loopback: return number of emitters rather than error
+ - libata: add ATA_HORKAGE_NO_NCQ_TRIM for Samsung 860 and 870 SSDs
+ - ARM: 9105/1: atags_to_fdt: don't warn about stack size
+ - PCI: Restrict ASMMedia ASM1062 SATA Max Payload Size Supported
+ - PCI: Return ~0 data on pciconfig_read() CAP_SYS_ADMIN failure
+ - PCI: xilinx-nwl: Enable the clock through CCF
+ - PCI: aardvark: Increase polling delay to 1.5s while waiting for PIO response
+ - PCI: aardvark: Fix masking and unmasking legacy INTx interrupts
+ - HID: input: do not report stylus battery state as "full"
+ - RDMA/iwcm: Release resources if iw_cm module initialization fails
+ - docs: Fix infiniband uverbs minor number
+ - pinctrl: samsung: Fix pinctrl bank pin count
+ - vfio: Use config not menuconfig for VFIO_NOIOMMU
+ - openrisc: don't printk() unconditionally
+ - pinctrl: single: Fix error return code in pcs_parse_bits_in_pinctrl_entry()
+ - scsi: qedi: Fix error codes in qedi_alloc_global_queues()
+ - MIPS: Malta: fix alignment of the devicetree buffer
+ - media: dib8000: rewrite the init prbs logic
+ - crypto: mxs-dep - Use sg_mapping_iter to copy data
+ - PCI: Use pci_update_current_state() in pci_enable_device_flags()
+ - iio: dac: ad5624r: Fix incorrect handling of an optional regulator.
+ - ARM: dts: qcom: apq8064: correct clock names
+ - video: fbdev: kyro: fix a DoS bug by restricting user input
+ - netlink: Deal with ESRCH error in nlmsg_notify()
+ - Smack: Fix wrong semantics in smk_access_entry()
+ - usb: host: fotg210: fix the endpoint's transactional opportunities
  + calculation
+ - usb: host: fotg210: fix the actual_length of an iso packet
+ - usb: gadget: uEther: fix a potential null pointer dereference
+ - usb: gadget: composite: Allow bMaxPower=0 if self-powered
+ - staging: board: Fix uninitialized spinlock when attaching genpd
+ - tty: serial: jsm: hold port lock when reporting modem line changes
+ - bpf/tests: Fix copy-and-paste error in double word test
+ - bpf/tests: Do not PASS tests without actually testing the result
+ - video: fbdev: asiliantfb: Error out if 'pixclock' equals zero
+ - video: fbdev: kyro: Error out if 'pixclock' equals zero
+ - video: fbdev: riva: Error out if 'pixclock' equals zero
+ - ipv4: ip_output.c: Fix out-of-bounds warning in ip_copy_addrs()
+ - flow_dissector: Fix out-of-bounds warnings
+ - s390/jump_label: print real address in a case of a jump label bug
+ - serial: 8250: Define RX trigger levels for OxSemi 950 devices
+ - xtensa: ISS: don't panic in rs_init
+ - hvsi: don't panic on tty_register_driver failure
+ - serial: 8250_pci: make setup_port() parameters explicitly unsigned
+ - staging: ks7010: Fix the initialization of the 'sleep_status' structure
+ - ata: sata_dwc_460ex: No need to call phy_exit() before phy_init()
+ - Bluetooth: skip invalid hci_sync_conn_complete_evt
+ - ASoC: Intel: bytcr_rt5640: Move "Platform Clock" routes to the maps for the
  matching in-/output
+ - media: v412-dv-timings.c: fix wrong condition in two for-loops
+ - arm64: dts: qcom: sdm660: use reg value for memory node
+ - net: ethernet: stmmac: Do not use unreachable() in ipq806x_gmac_probe()
+ - Bluetooth: avoid circular locks in sco_sock_connect
+ - gpus: drm: amd: amdgpu: amdgpu_i2c: fix possible uninitialized-variable
  access in amdgpu_i2c_router_select_ddc_port()
+ - ARM: tegra: tamonten: Fix UART pad setting
+ - rpc: fix gss_svc_init cleanup on failure
+ - staging: rts5208: Fix get_ms_information() heap buffer size
+ - gfs2: Don't call dlm after protocol is unmounted
+ - mmc: sdhci-of-arasan: Check return value of non-void funtions
+ - mmc: rtsx_pci: Fix long reads when clock is prescaled
+ - selftests/bpf: Enlarge select() timeout for test_maps
+ - cifs: fix wrong release in sess_alloc_buffert() failed path
+ - Revert "USB: xcui: fix U1/U2 handling for hardware with XHCI_INTEL_HOST
  quirk set"
+ - usb: musb: musb_dsps: request_irq() after initializing musb
+ - usbf: give back URBS for unsent unlink requests during cleanup
+ - usbf:vHCI_hcd USB port can get stuck in the disabled state
+ - ASoC: rockchip: i2s: Fix regmap_ops hang
+ - ASoC: rockchip: i2s: Fixup config for DAIFMT_DSP_A/B
+ - parport: remove non-zero check on count
+ - ath9k: fix OOB read ar9300_eeprom_restore_internal
+ - ath9k: fix sleeping in atomic context
+ - net: fix NULL pointer reference in cipso_v4_doi_free
+ - net: w5100: check return value after calling platform_get_resource()
+ - parisc: fix crash with signals and alloca
+ - scsi: BusLogic: Fix missing pr_cont() use
+ - scsi: qla2xxx: Sync queue idx with queue_pair_map idx
+ - cpufreq: powernv: Fix init_chip_info initialization in numa=off
+ - mm/hugetlb: initialize hugetlb_usage in mm_init
+ - memcg: enable accounting for pids in nested pid namespaces
+ - platform/chrome: cros_ec_proto: Send command again when timeout occurs
+ - xen: reset legacy rtc flag for PV domU
+ - bnx2x: Fix enabling network interfaces without VFs
+ - PM: base: power: don't try to use non-existing RTC for storing data
+ - x86/mm: Fix kern_addr_valid() to cope with existing but not present entries
+ net-caif: avoid user-triggerable WARN_ON(1)
+ ptp: dp83640: don’t define PAGE0
+ net/l2tp: Fix reference count leak in l2tp_udp_recv_core
+ r6040: Restore MDIO clock frequency after MAC reset
+ tipc: increase timeout in tipc_sk_enqueue()
+ events: Reuse value read using READ_ONCE instead of re-reading it
+ net/af_unix: fix a data-race in unix_dgram_poll
+ tc: fix tp->undo_retrans accounting in tcp_sacktag_one()
+ mm/memory_hotplug: use "unsigned long" for PFN in zone_for_pfn_range()
+ dt/bindings: mtd: gpmc: Fix the ECC bytes vs. OOB bytes equation
+ mfd: Don’t use irq_create_mapping() to resolve a mapping
+ PCI: Add ACS quirks for Cavium multi-function devices
+ net: usb: cdc_mbim: avoid altsetting toggling for Telit LN920
+ ethtool: Fix an error code in cxgb2.c
+ PCI: Sync __pci_register_driver() stub for CONFIG_PCI=n
+ mtd: rawnand: cafe: Fix a resource leak in the error handling path of
  ’cafe_nand_probe()
+ ARC: export clear_user_page() for modules
+ net: dsa: b53: Fix calculating number of switch ports
+ netfilter: socket: icmp6: fix use-after-scope
+ qlcnic: Remove redundant unlock in qlenic_pinit_from_rom
+ net: renesas: sh_eth: Fix freeing wrong tx descriptor
+ SUNRPC/nfs: Fix return value for nfs4_callback_compound()
+ usb: mtu3: use @mult for HS isoc or intr
+ usb: mtu3: fix the wrong HS mult value
+ lib/mpi: use kcalloc in mpi_resize
+ media: venus: venc: Fix potential null pointer dereference on pointer fmt
+ platform/x86: dell-smbios-wmi: Add missing kfree in error-exit from
  run_smbios_call
+ f2fs: fix to unmap pages from userspace process in punch_hole()
+ userfaultfd: prevent concurrent API initialization
+ arm64/sve: Use correct size when reinitialising SVE state
+ perf machine: Initialize srcline string member in add_location struct
+ net/mlx5: Fix potential sleeping in atomic context
+ net: hns3: pad the short tunnel frame before sending to hardware
+ mfd: axp20x: Update AXP288 volatile ranges
+ KVM: arm64: Handle PSCI resets before userspace touches vCPU state
+ ip_gre: validate csum_start only on pull
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com>  Mon, 18 Oct 2021 12:35:58 +0200

+linux (4.15.0-160.168) bionic; urgency=medium

+ * bionic/linux: 4.15.0-160.168 -proposed tracker (LP: #1944933)

+ * Packaging resync (LP: #1786013)
  - debian/dkms-versions -- update from kernel-versions (main/2021.09.27)

+ * ext4 journal recovery fails w/data=journal + mmap (LP: #1847340)
  - jbd2: introduce/export functions
    - jbd2_journal_submit|finish_inode_data_buffers()
  - jbd2, ext4, ocfs2: introduce/use journal callbacks
  - j_submit|finish_inode_data_buffers()
  - ext4: data=journal: fixes for ext4_page_mknwrite()
  - ext4: data=journal: write-protect pages on j_submit_inode_data_buffers()
  - ext4: fix mmap write protection for data=journal mode

+ * CVE-2021-40490
  - ext4: fix race writing to an inline_data file while its xattrs are changing

+ * Bionic update: upstream stable patchset 2021-09-22 (LP: #1944600)
  - iio: humidity: hdc100x: Add margin to the conversion time
  - iio: adc: Fix incorrect exit of for-loop
  - ASoC: intel: atom: Fix reference to PCM buffer address
  - i2c: dev: zero out array used for i2c reads from userspace

+ * ACPI: NFIT: Fix support for virtual SPA ranges
+ * ASoC: cs42l42: Correct definition of ADC Volume control
+ * ASoC: cs42l42: Don't allow SND_SOC_DAI_FMT_LEFT_J
+ * ASoC: cs42l42: Fix inversion of ADC Notch Switch control
+ * ASoC: cs42l42: Remove duplicate control for WNF filter frequency
+ * net: dsa: mt7530: add the missing RxUnicast MIB counter
  - ppp: Fix generating ifname when empty IFLA_IFNAME is specified
  - psample: Add a fwd declaration for skbuff

+ * net: Fix memory leak in iee802154_raw_deliver
+ * net: bridge: fix memleak in br_add_if()
+ * tcp_bbr: fix u32 wrap bug in round logic if bbr_init() called after 2B packets

+ * xen/events: Fix race in set_evtehn_to_irq
+ * vsocv/virtio: avoid potential deadlock when vsocv device remove

+ * powerpc/kprobes: Fix kprobe Oops happens in booke
+ * x86/tools: Fix objdump version check again
+ * x86/resctrl: Fix default monitoring groups reporting
  - PCI/MSI: Enable and mask MSI-X early
  - PCI/MSI: Do not set invalid bits in MSI mask
  - PCI/MSI: Correct misleading comments
+ - PCI/MSI: Use msi_mask_irq() in pci_msi_shutdown()
+ - PCI/MSI: Protect msi_desc::masked for multi-MSI
+ - PCI/MSI: Mask all unused MSI-X entries
+ - PCI/MSI: Enforce that MSI-X table entry is masked for update
+ - PCI/MSI: Enforce MSI[X] entry updates to be visible
+ - vmlinux.lds.h: Handle clang's module.{c,d}tor sections
+ - mac80211: drop data frames without key on encrypted links
+ - x86/fpu: Make init_fparate correct with optimized XSAVE
+ - ath: Use safer key clearing with key cache entries
+ - ath9k: Clear key cache explicitly on disabling hardware
+ - ath: Export ath_hw_keysetmac()
+ - ath: Modify ath_key_delete() to not need full key entry
+ - ath9k: Postpone key cache entry deletion for TXQ frames reference it
+ - dmaengine: usb-dmac: Fix PM reference leak in usb_dmac_probe()
+ - ARM: dts: am43x-epos-evm: Reduce i2c0 bus speed for tsp65218
+ - dmaengine: of-dma: router_xlate to return -EPROBE_DEFER if controller is not
+   yet available

+ * Packaging resync (LP: #1786013)
+ - debian/dkms-versions -- update from kernel-versions (main/2021.09.06)
+ * dell300x: rsi wifi and bluetooth crash after suspend and resume
+  (LP: #1940488)
+ - Revert "rsi: Use resume_noirq for SDIO"
+ * LRMe5: switch primary version handling to kernel-versions data set
+  (LP: #1928921)
+ - [Packaging] switch to kernel-versions
+ * kvm_unit_tests: emulator test fails on 4.4 / 4.15 kernel, timeout
+  (LP: #1932966)
+ - kvm: Add emulation for movups/movupd
+ * memory leaking when removing a profile (LP: #1939915)
+ - security/apparmor/label.c: Clean code by removing redundant instructions
+ - apparmor: Fix memory leak of profile proxy
+ * ubuntu_kernel_selftests: memory-hotplug: avoid spamming logs with
dump_page() (LP: #1941829)
+ - selftests: memory-hotplug: avoid spamming logs with dump_page(), ratio limit
   hot-remove error test
+ * Bionic update: upstream stable patchset 2021-08-27 (LP: #1941916)
+ - btrfs: mark compressed range uptodate only if all bio succeed
+ - regulator: rt5033: Fix n_voltages settings for BUCK and LDO
+ - r8152: Fix potential PM refcount imbalance
+ -qed: fix possible unpaired spin_(un)lock_bh in _qed_mcp_cmd_and_union()
+ - net: Fix zero-copy head len calculation.
+ - Revert "Bluetooth: Shutdown controller after workqueues are flushed or
   cancelled"
+ - KVM: do not allow mapping valid but non-reference-counted pages
+ - Revert "watchdog: iTCO_wdt: Account for rebooting on second timeout"
+ - spi: mediatek: Fix fifo transfer
+ - padata: validate cpumask without removed CPU during offline
+ - Revert "ACPICA: Fix memory leak caused by _CID repair function"
+ - ALSA: seq: Fix racy deletion of subscriber
+ - clk: stm32f4: fix post divisor setup for I2S/SAI PLLs
+ - omap5-board-common: remove not physically existing vdds_lv8_main fixed-regulator
+ - scsi: sr: Return correct event when media event code is 3
+ - media: videobuf2-core: dequeue if start_streaming fails
- net: natsemi: Fix missing pci_disable_device() in probe and remove
- npf: update ethtool reporting of pauseframe control
- mips: Fix non-POSIX regexp
- bnx2x: fix an error code in bnx2x_nic_load()
- net: pegasus: fix uninit-value in get_interrupt_interval
- net: fec: fix use-after-free in fec_driv_remove
- net: vxge: fix use-after-free in vxge_device_unregister
- Bluetooth: defer cleanup of resources in hci_unregister_dev()
- USB: usbtc: Fix RCU stall warning
- USB: serial: option: add Telit FD980 composition 0x1056
- USB: serial: ch341: fix character loss at high transfer rates
- usb: gadget: f_hid: added GET_IDLE and SET_IDLE handlers
- usb: gadget: f_hid: fixed NULL pointer dereference
- usb: gadget: f_hid: idle uses the highest byte for duration
- usb: otg-fsm: Fix hrtimer list corruption
- scripts/tracing: fix the bug that can't parse raw_trace_func
- staging: rtl8723bs: Fix a resource leak in sd_int_dpc
- media: rtl28xxu: fix zero-length control request
- pipe: increase minimum default pipe size to 2 pages
- ext4: fix potential htree corruption when growing large_dir directories
- serial: 8250: Mask out floating 16/32-bit bus bits
- MIPS: Malta: Do not byte-swap accesses to the CBUS UART
- pcmcia: i82092: fix a null pointer dereference bug
- spi: meson-spicc: fix memory leak in meson_spicc_remove
- perf/x86/amd: Don't touch the AMD64_EVENTSEL_HOSTONLY bit inside the guest
- qmi_wwan: add network device usage statistics for qmimux devices
- libata: fix ata_pio_sector for CONFIG_HIGHMEM
- reiserfs: add check for root_inode in reiserfs_fill_super
- alpha: Send stop IPI to send to online CPUs
- net/qla3xxx: fix schedule while atomic in ql_wait_for_drivr_lock and
  ql_adapter_reset
- USB:ehci:fix Kunpeng920 ehci hardware problem
- ppp: Fix generating ppp unit id when ifname is not specified
- ovl: prevent private clone if bind mount is not allowed
- net: xilinx_emaclite: Do not print real IOMEM pointer
- KVM: x86: accept userspace interrupt only if no event is injected
- KVM: x86/mmuid: Fix per-cpu counter corruption on 32-bit builds

* Bionic update: upstream stable patchset 2021-08-17 (LP: #1940315)
- selftest: fix build error in tools/testing/selftests/vm/userfaultfd.c
- KVM: x86: determine if an exception has an error code only when injecting
  it.
- net: split out functions related to registering inflight socket files
- [Config] updateconfigs for UNIX_SCM
- af_unix: fix garbage collect vs MSG_PEEK
- net/802/mrp: fix memleak in mrp_request_join()
+ net/802/garp: fix memleak in garp_request_join()
+ net: annotate data race around sk_ll_usec
+ sctp: move 198 addresses from unusable to private scope
+ hfs: add missing clean-up in hfs_fill_super
+ hfs: fix high memory mapping in hfs_bnode_read
+ hfs: add lock nesting notation to hfs_find_init
+ ARM: dts: versatile: Fix up interrupt controller node names
+ virtio_net: Do not pull payload in skb->head
+ gro: ensure frag0 meets IP header alignment
+ x86/kvm: fix vcpu-id indexed array sizes
+ ocfs2: fix zero out valid data
+ ocfs2: issue zeroout to EOF blocks
+ can: raw: raw_setsockopt(): fix raw_rcv panic for sock UAF
+ can: mcba_usb_start(): add missing urb->transfer_dma initialization
+ can: usb_8dev: fix memory leak
+ can: ems_usb: fix memory leak
+ can: esd_usb2: fix memory leak
+ NIU: fix incorrect error return, missed in previous revert
+ nfcsim: fix use after free during module unload
+ x86/asm: Ensure asm/proto.h can be included stand-alone
+ cfg80211: Fix possible memory leak in function cfg80211_bss_update
+ netfilter: conntrack: adjust stop timestamp to real expiry value
+ netfilter: nft_nat: allow to specify layer 4 protocol NAT only
+ tipc: fix sleeping in tipc accept routine
+ mlx4: Fix missing error code in mlx4_load_one()
+ net: llc: fix skb_over_panic
+ net/mlx5: Fix flow table chaining
+ sctp: fix return value check in __scpt_rcv_asconf_lookup
+ tulip: windbond-840: Fix missing pci_disable_device() in probe and remove
+ sis900: Fix missing pci_disable_device() in probe and remove
+ can: hi3110: fix a signedness bug in hi3110_cmd()
+ i40e: Fix log TC creation failure when max num of queues is exceeded
+ i40e: Add additional info to PHY type error

* Bionic update: upstream stable patchset 2021-08-13 (LP: #1939913)
* ARM: dts: gemini: add device_type on pci
* ARM: dts: rockchip: fix pinctrl sleep nodename for rk3036-kylin and rk3288
* arm64: dts: rockchip: fix pinctrl sleep nodename for rk3399.dtsi
* ARM: dts: rockchip: Fix the timer clocks order
* ARM: dts: rockchip: Fix power-controller node names for rk3288
* arm64: dts: rockchip: Fix power-controller node names for rk3328
* reset: ti-syscon: fix to_ti_syscon_reset_data macro
* ARM: brcmstb: dts: fix NAND nodes names
* ARM: Cygnus: dts: fix NAND nodes names
* ARM: NSP: dts: fix NAND nodes names
* ARM: dts: BCM63xx: Fix NAND nodes names
* ARM: dts: imx6: phyFLEX: Fix UART hardware flow control
* ARM: imx: pm-imx5: Fix references to imx5_cpu_suspend_info
+ ARM: dts: stm32: fix RCC node name on stm32f429 MCU
+ arm64: dts: juno: Update SCPI nodes as per the YAML schema
+ arm64: dts: ls208xa: remove bus-num from dspi node
+ thermal/core: Correct function name thermal_zone_device_unregister()
+ kbuild: mkcompile_h: consider timestamp if KBUILD_BUILD_TIMESTAMP is set
+ rtc: max77686: Do not enforce (incorrect) interrupt trigger type
+ scsi: aic7xxx: Fix unintentional sign extension issue on left shift of u8
+ scsi: libfc: Fix array index out of bound exception
+ sched/fair: Fix CFS bandwidth hrtimer expiry type
+ net: ipv6: fix return value of ip6_skb_dst_mtu
+ netfilter: ctnetlink: suspicious RCU usage in ctnetlink_dump_helpinfo
+ net: bridge: sync fdb to new unicast-filtering ports
+ net: bcmgenet: Ensure all TX/RX queues DMAs are disabled
+ net: maxa: fix UAV in maxart_mac_probe
+ net: qcom/emac: fix UAV in emac_remove
+ net: ti: fix UAV in tlan_remove_one
+ net: send SYNACK packet with accepted fmark
+ net: validate lwtstate->data before returning from skb_tunnel_info()
+ dma-buf/sync_file: Don't leak fences on merge failure
+ tcp: annotate data races around tp->mtu_info
+ ipv6: tcp: drop silly ICMPv6 packet too big messages
+ igb: Fix use-after-free error during reset
+ ixgbe: Fix an error handling path in 'ixgbe_probe()'
+ igb: Fix an error handling path in 'igb_probe()'
+ fm10k: Fix an error handling path in 'fm10k_probe()'
+ e1000e: Fix an error handling path in 'e1000e_probe()'
+ iavf: Fix an error handling path in 'iavf_probe()'
+ igb: Check if num of q_vectors is smaller than max before array access
+ perf probe: Fix dso->nsinfo refcounting
+ perf Izma: Close Izma stream on exit
+ perf test bpf: Free obj_buf
+ perf probe-file: Delete namelist in del_events() on the error path
+ spi: mediatek: fix fifo rx mode
+ liquidio: Fix unintentional sign extension issue on left shift of u16
+ s390/bpf: Perform r1 range checking before accessing jit->seen_reg[r1]
+ net: fix unint-value in caif_seqpkt_sendmsg
+ net: decrenet: Fix sleeping inside in af_decrenet
+ netrom: Decrease sock refcount when sock timers expire
+ scsi: iscsi: Fix iface sysfs attr detection
+ scsi: target: Fix protect handling in WRITE SAME(32)
+ spi: cadence: Correct initialisation of runtime PM again
+ Revert "USB: quirks: ignore remote wake-up on Fibocom L850-GL LTE modem"
+ proc: Avoid mixing integer types in mem_rwlock()
+ s390/ftrace: fix ftrace_update_ftrace_func implementation
+ ALSA: sb: Fix potential ABBA deadlock in CSP driver
+ xhci: Fix lost USB 2 remote wake
+ KVM: PPC: Book3S: Fix H_RTAS rets buffer overflow
+ usb: hub: Disable USB 3 device initiated lpm if exit latency is too high
+ * fails to launch linux L2 guests on AMD (LP: #1940134) // CVE-2021-3653

  +  - ALSA: usb-audio: fix rate on Ozone Z90 USB headset
  +  - media: dvb-usb: fix wrong definition
  +  - Input: usbtouchscreen - fix control-request directions
  +  - net: can: ems_usb: fix use-after-free in ems_usb_disconnect()
  +  - usb: gadget: eem: fix echo command packet response issue
  +  - USB: cdc-acm: blacklist Heimann USB Appset device
  +  - ntfs: fix validity check for file name attribute
  +  - iov_iter_fault_in_readable() should do nothing in xarray case
  +  - Input: joydev - prevent use of not validated data in JSIOCSBTNMAP ioctl
  +  - ARM: dts: at91: sama5d4: fix pinctrl muxing
  +  - btrfs: send: fix invalid path for unlink operations after parent
  +  - orphanization
  +  - btrfs: clear defrag status of a root if starting transaction fails
  +  - ext4: cleanup in-core orphan list if ext4_truncate() failed to get a
  +    transaction handle
  +  - ext4: fix kernel infoleak via ext4_extent_header
+ - ext4: correct the cache_nr in tracepoint ext4_es_shrink_exit
+ - ext4: remove check for zero nr_to_scan in ext4_es_scan()
+ - ext4: fix avefree in find_group_orlov
+ - ext4: use ext4_grp_locked_error in mb_find_extent
+ - can: gw: synchronize rcu operations before removing gw job entry
+ - can: peak_pciefd: pucan_handle_status(): fix a potential starvation issue in
  + TX path
+ - SUNRPC: Fix the batch tasks count wraparound.
+ - SUNRPC: Should wake up the privileged task firstly.
+ - s390/cio: dont call css_wait_for_slow_path() inside a lock
+ - rtc: stm32: Fix unbalanced clk_disable_unprepare() on probe error path
+ - iio: ltr501: mark register holding upper 8 bits of ALS_DATA{0,1} and PS_DATA
  + as volatile, too
+ - iio: ltr501: ltr559: fix initialization of LTR501_ALS_CONTR
+ - iio: ltr501: ltr501_read_ps(): add missing endianness conversion
+ - serial: sh-sci: Stop dmaengine transfer in sci_stop_tx()
+ - serial_cs: Add Option International GSM-Ready 56K/ISDN modem
+ - serial_cs: remove wrong GLOBETROTTER.cis entry
+ - ath9k: Fix kernel NULL pointer dereference during ath_reset_internal()
+ - ssb: sdio: Don't overwrite const buffer if block_write fails
+ - rsi: Assign beacon rate settings to the correct rate_info descriptor field
+ - seq_buf: Make trace_seq_putmem_hex() support data longer than 8
+ - fuse: check connected before queuing on fpq->io
+ - spi: Make of_register_spi_device also set the fwnode
+ - spi: spi-loopback-test: Fix 'tx_buf' might be 'rx_buf'
+ - spi: spi-topcliff-pch: Fix potential double free in
  + pch_spi_process_messages()
+ - spi: omap-100k: Fix the length judgment problem
+ - crypto: nx - add missing MODULE_DEVICE_TABLE
+ - media: cpi2: fix memory leak in cpi2_usb_probe
+ - media: cobalt: fix race condition in setting HDP
+ - media: pvrusb2: fix warning in pvr2_i2c_core_done
+ - crypto: qat - check return code of qat_hal_rd_rel_reg()
+ - crypto: qat - remove unused macro in FW loader
+ - media: em28xx: Fix possible memory leak of em28xx struct
+ - media: v4l2-core: Avoid the dangling pointer in v4l2_fh_release
+ - media: bt8xx: Fix a missing check bug in bt878_probe
+ - media: st-hva: Fix potential NULL pointer dereferences
+ - media: dvd_usb: memory leak in cinergyt2_fe_attach
+ - mmc: via-sdmmc: add a check against NULL pointer dereference
+ - crypto: shash - avoid comparing pointers to exported functions under CFI
+ - media: dvb_net: avoid speculation from net slot
+ - media: siano: fix device register error path
+ - btrfs: fix error handling in __btrfs_update_delayed_inode
+ - btrfs: abort transaction if we fail to update the delayed inode
+ - btrfs: disable build on platforms having page size 256K
+ - regulator: da9052: Ensure enough delay time for .set_voltage_time_sel
+ - HID: do not use down_interruptible() when unbinding devices
+ ACPI: processor idle: Fix up C-state latency if not ordered
+ hv_utils: Fix passing zero to 'PTR_ERR' warning
+  lib: vsprintf: Fix handling of number field widths in vsscanf
+ ACPI: EC: Make more Asus laptops use ECDT _GPE
+ block_dump: remove block_dump feature in mark_inode_dirty()
+ fs: dlm: cancel work sync othercon
+ random32: Fix implicit truncation warning in prandom_seed_state()
+ fs: dlm: fix memory leak when fenced
+ ACPI: sysfs: Fix a buffer overrun problem with description_show()
+ ocfs2: fix snprintf() checking
+ net: pch_gbe: Propagate error from devm_gpio_request_one()
+ drmm/rockchip: cdn-dp-core: add missing clk_disable_unprepare() on error in cdn_dp_grf_write()
+ ehea: fix error return code in ehea_restart_qps()
+ RDMA/rxe: Fix failure during driver load
+ drm: qxl: ensure surf.data is uninitialized
+ wireless: car9170: fix LEDs build errors & warnings
+ brcmsmac: mac80211_if: Fix a resource leak in an error handling path
+ ath10k: Fix an error code in ath10k_add_interface()
+ netlabel: Fix memory leak in netbl_mgnt_add_common
+ netfilter: nft_exthdr: check for IPv6 packet before further processing

+ mmc: vub3000: fix control-request direction
+ scsi: core: Retry I/O for Notify (Enable Spinup) Required error
+ drm/mxsfb: Don't select DRM_KMS_FB_HELPER
+ drm/zte: Don't select DRM_KMS_FB_HELPER
+ drm/amd/apdgpu/sriov disable all ip hw status by default
+ atm: iphase: fix possible use-after-free in ia_module_exit()
+ mLSDN: fix possible use-after-free in HFC_cleanup()
+ atm: nicstar: Fix possible use-after-free in nicstar_cleanup()
+ net: Treat __napi_schedule_irqoff() as __napi_schedule() on PREEMPT_RT
+ reiserfs: add check for invalid 1st journal block
+ drm/virtio: Fix double free on probe failure
+ udf: Fix NULL pointer dereference in udf_symlink function
+ e100: handle eeprom as little endian
+ clk: renesas: r8a77995: Add ZA2 clock
+ clk: tegra: Ensure that PLLU configuration is applied properly
+ ipv6: use prandom_u32() for ID generation
+ RDMA/cxgb4: Fix missing error code in create_qp()
+ dm space maps: don't reset space map allocation cursor when committing
+ virtio_net: Remove BUG() to avoid machine dead
+ net: bcmgenet: check return value after calling platform_get_resource()
+ net: micrel: check return value after calling platform_get_resource()
+ fjes: check return value after calling platform_get_resource()
+ selinux: use __GFP_NOWARN with GFP_NOWAIT in the AVC
+ xfrm: Fix error reporting in xfrm_state_construct.
- wkcore/wl12xx: Fix wl12xx get_mac error if device is in ELP
- w1l251: Fix possible buffer overflow in w1l251_cmd_scan
- cw1200: add missing MODULE_DEVICE_TABLE
- atm: nicstar: use \textit{dma_free_coherent} instead of \textit{kfree}
- atm: nicstar: register the interrupt handler in the right place
- vsoc: notify server to shutdown when client has pending signal
- RDMA/rxe: Don't overwrite errno from ib_umem_get()
- iwififi: mvm: don't change band on bound PHY contexts
- sfc: avoid double pci_remove of VFs
- sfc: error code if SRIOV cannot be disabled
- wireless: wext-spy: Fix out-of-bounds warning
- RDMA/cma: Fix rdma_resolve_route() memory leak
- Bluetooth: Fix the HCI to MGMT status conversion table
- Bluetooth: Shutdown controller after workqueues are flushed or cancelled
- Bluetooth: btusb: fix bt fiwmare downloading failure issue for qca btso.
- scpt: validate from \_addr \_param return
- scpt: add size validation when walking chunks
- fscrypt: don't ignore minor_hash when hash is 0
- bdi: Do not use freezable workqueue
- fuse: reject internal erro
- powerpe/barrier: Avoid collision with clang's \texttt{\_lwsync} macro
- usb: gadget: f fs: Fix setting of device and driver data cross-references
- drm/radeon: Add the missed drm_gem_object_put() in
  \texttt{radeon_user_framebuffer\_create()}
- pinctrl/amd: Add device HID for new AMD GPIO controller
- mmc: sdhci: Fix warning message when accessing RPMB in HS400 mode
- mmc: core: clear flags before allowing to retune
- mmc: core: Allow UHS-I voltage switch for SDSC cards if supported
- ata: ahci_sunxi: Disable DIPM
- fcpu/hotplug: Cure the cpusets trainwreck
- ASoC: tegra: Set driver_name=tegra for all machine drivers
- qemu-fw-\cfg: Make \texttt{fw\_cfg\_rev\_attr} a proper \texttt{kobj\_attribute}
- ipmi/watchdog: Stop watchdog timer when the current action is \texttt{\_none}
- power: supply: ab8500: Fix an old bug
- seq_buf: Fix overflow in seq_buf\_putmem\_hex()
- tracing: Simplify \& fix saved\_tgids logic
- ipack/carriers/tpci200: Fix a double free in tpci200\_pci\_probe
- dm btrees remove: assign new_root only when removal succeeds
- media: dtv5100: fix control-request directions
- media: zr364xx: fix memory leak in zr364xx\_start_readpipe
- media: gspca/sq905: fix control-request direction
- media: gspca/sunplus: fix zero-length control requests
- jfs: fix GPF in DiFree
- smackifs: restrict bytes count in smk_set_cipso()
- KVM: x86: Use guest MAXPHYADDR from CPUID.0x8000_0008 iff TDP is enabled
- KVM: X86: Disable hardware breakpoints unconditionally before kvm_x86->run()
- scsi: core: Fix bad pointer dereference when ehandler kthread is invalid
- tracing: Do not reference char * as a string in histograms
+ - PCI: aardvark: Don't rely on jiffies while holding spinlock
+ - PCI: aardvark: Fix kernel panic during PIO transfer

+ - ARM: dts: exynos: fix PWM LED max brightness on Odroid HC1
+ - ARM: dts: am437x: align ti,pindir-d0-out-d1-in property with dt-shema
+ * Bionic update: upstream stable patchset 2021-07-20 (LP: #1936960)
+ - include/linux/mmdebug.h: make VM_WARN* non-rvals
+ - mm: add VM_WARN_ON_ONCE_PAGE() macro
+ - mm/rmap: remove unneeded semicolon in page_not_mapped()
+ - mm/rmap: use page_not_mapped in try_to_unmap()
+ - mm/thp: try_to_unmap() use TTU_SYNC for safe splitting
+ - mm/thp: fix vma_address() if virtual address below file offset
+ - mm/thp: fix page_address_in_vma() on file THP tails
+ - mm: thp: replace DEBUG_VM BUG with VM_WARN when unmap fails for split
+ - mm: page_vma_mapped_walk(): use page for pvmw->page
+ - mm: page_vma_mapped_walk(): settle PageHuge on entry
+ - mm: page_vma_mapped_walk(): use pmde for *pvmw->pmd
+ - mm: page_vma_mapped_walk(): prettify PVMW_MIGRATION block
+ - mm: page_vma_mapped_walk(): crossing page table boundary
+ - mm: page_vma_mapped_walk(): add a level of indentation
+ - mm: page_vma_mapped_walk(): use goto instead of while (1)
+ - mm: page_vma_mapped_walk(): get vma_address_end() earlier
+ - mm/thp: fix page_vma_mapped_walk() if THP mapped by ptes
+ - mm/thp: another PVMW_SYNC fix in page_vma_mapped_walk()
+ - mm, futex: fix shared futex pgoff on shmem huge page
+ - scsi: sr: Return appropriate error code when disk is ejected
+ - drm/nouveau: fix dma_address check for CPU/GPU sync
+ - kfifo: DECLARE_KIFO_PTR(fifo, u64) does not work on arm 32 bit
+ - kthread_worker: split code for canceling the delayed work timer
+ - kthread: prevent deadlock when kthread_mod_delayed_work() races with
  kthread_cancel_delayed_work_sync()
+ - xen/events: reset active flag for lateeoi events later
+ - ARM: dts: imx6qdl-sabresd: Remove incorrect power supply assignment
+ - ARM: OMAP: replace setup_irq() by request_irq()
+ - clocksource/drivers/timer-ti-dm: Add clockevent and clocksource support
+ - clocksource/drivers/timer-ti-dm: Prepare to handle dra7 timer wrap issue
+ * Bionic update: upstream stable patchset 2021-07-14 (LP: #1936231)
+ - Revert "UBUNTU: SAUCE: Revert "proc: Check /proc/$pid/attr/ writes against
  file opener"
+ - proc: Track /proc/$pid/attr/ opener mm_struct
+ - net/ncf/rawsock.c: fix a permission check bug
+ - ASoC: sti-sas: add missing MODULE_DEVICE_TABLE
+ - isdn: mISDN: netjet: Fix crash in nj_probe:
+ - bonding: init notify_work earlier to avoid uninitialized use
+ - netlink: disable IRQs for netlink_lock_table()
+ - net: mdiobus: get rid of a BUG_ON()
+ - cgroup: disable controllers at parse time
+ - wq: handle VM suspension in stall detection
+ - net/qla3xxx: fix schedule while atomic in ql_sem_spinlock
+ - scsi: vmw_pvscsi: Set correct residual data length
+ - scsi: target: qla2xxx: Wait for stop_phase1 at WWN removal
+ - net: macb: ensure the device is available before accessing GEMGX1 control
  registers
+ - net: apptalk: cops: Fix data race in cops_probe1
+ - MIPS: Fix kernel hang under FUNCTION_GRAPH_TRACER and PREEMPT_TRACER
+ - bnx2x: Fix missing error code in bnx2x_iiov_init_one()
+ - powerpc/fsl: set fsl,i2c-erratum-a004447 flag for P2041 i2c controllers
+ - powerpc/fsl: set fsl,i2c-erratum-a004447 flag for P1010 i2c controllers
+ - i2c: mpc: Make use of i2c_recover_bus()
+ - i2c: mpc: implement erratum A-004447 workaround
+ - drm: Fix use-after-free read in drm_getunique()
+ - drm: Lock pointer access in drm_master_release()
+ - kvm: avoid speculation-based attacks from out-of-range memslot accesses
+ - staging: rtl8723bs: Fix uninitialized variables
+ - btrfs: return value from btrfs_mark_extent_written() in case of error
+ - cgroup1: don't allow 'n' in renaming
+ - USB: f_ncm: ncm_bitrate (speed) is unsigned
+ - usb: dwc3: ep0: fix NULL pointer exception
+ - usb: typec: ucsi: Clear PPM capability data in ucsi_init() error path
+ - usb: gadget: f_fs: Ensure io_completion_wq is idle during unbind
+ - USB: serial: omninet: add device id for Zyxel Omni 56K Plus
+ - USB: serial: quatech2: fix control-request directions
+ - ush: gadget: eem: fix wrong eem header operation
+ - usb: fix various gadgets null ptr deref on 10gbps cabling.
+ - usb: fix various gadget panics on 10gbps cabling
+ - regulator: core: resolve supply for boot-on/always-on regulators
+ - regulator: max77620: Use device_set_of_node_from_dev()
+ - perf: Fix data race between pin_count increment/decrement
+ - NFS: Fix a potential NULL dereference in nfs_get_client()
+ - perf session: Correct buffer copying when peeking events
+ - kvm: fix previous commit for 32-bit builds
- NFS: Fix use-after-free in nfs4_init_client()
- NFSv4: nfs4_proc_set_acl needs to restore NFS_CAP_UIDGID_NOMAP on error.
- scsi: core: Fix error handling of scsi_host_alloc()
- scsi: core: Put .shost_dev in failure path if host state changes to RUNNING
- scsi: core: Only put parent device if host state differs from HOST_CREATED
- ftrace: Do not blindly read the ip address in ftrace_bug()
- tracing: Correct the length check which causes memory corruption
- proc: only require mm_struct for writing
- scsi: bnx2fc: Return failure if io_req is already in ABTS processing
- ARM: dts: imx6qdl-sabresd: Assign corresponding power supply for LDOs
- usb: f_ncm: only first packet of aggregate needs to start timer
- usb: pd: Set PD_T_SINK_WAIT_CAP to 310ms
- RDMA/mlx4: Do not map the core_clock page to user space unless enabled
- vmlinux.lds.h: Avoid orphan section with !SMP
- sched/fair: Make sure to update tg contrib for blocked load
- net: ieee802154: fix null deref in parse dev addr
- HID: hid-sensor-hub: Return error for hid_set_field() failure
- HID: Add BUS_VIRTUAL to hid_connect logging
- HID: usbhid: fix info leak in hid_submit_ctrl
- ARM: OMAP2+: Fix build warning when mmc_omap is not built
- HID: gt683r: add missing MODULE_DEVICE_TABLE
- gfs2: Fix use-after-free in gfs2_glock_shrink_scan
- scsi: target: core: Fix warning on realtime kernels
- ethernet: myri10ge: Fix missing error code in myri10ge_probe()
- nvme-loop: reset queue count to 1 in nvme_loop_destroy_io_queues()
- nvme-loop: clear NVME_LOOP_Q_LIVE when nvme_loop_configure_admin_queue() fails
- nvme-loop: check for NVME_LOOP_Q_LIVE in nvme_loop_destroy_admin_queue()
- net: ipconfig: Don't override command-line hostnames or domains
- rtnetlink: Fix missing error code in rtnl_bridge_notify()
- net/x25: Return the correct errno code
- net: Return the correct errno code
- fib: Return the correct errno code
- dmaengine: ALTERA_MSGDMA depends on HAS_IOMEM
- dmaengine: QCOM_HIDMA_MGMT depends on HAS_IOMEM
- dmaengine: stedma40: add missing iounmap() on error in d40_probe()
- mm/memory-failure: make sure wait for page writeback in memory_failure
- batman-adv: Avoid WARN_ON timing related checks
- net: ipv4: fix memory leak in netlbl_cipsov4_add_std
- net: rds: fix memory leak in rds_recvmsg
- udp: fix race between close() and udp_abort()
- rtnetlink: Fix regression in bridge VLAN configuration
- netfilter: synproxy: Fix out of bounds when parsing TCP options
- alx: Fix an error handling path in 'alx_probe()'
- net: stmmac: dwmac1000: Fix extended MAC address registers definition
- qlcnic: Fix an error handling path in 'qlcnic_probe()'
- netxen_nic: Fix an error handling path in 'netxen_nic_probe()'
- net: cdc_ncm: switch to eth%d interface naming
+ - net: usb: fix possible use-after-free in smsc75xx_bind
+ - net: ipv4: fix memory leak in ip_mc_add1_src
+ - net/af_unix: fix a data-race in unix_dgram_sendmsg / unix_release_sock
+ - be2net: Fix an error handling path in 'be_probe()'
+ - net: hamradio: fix memory leak in mkiss_close
+ - net: cdc_eem: fix tx fixup skb leak
+ - icmp: don't send out ICMP messages with a source address of 0.0.0.0
+ - net: ethernet: fix potential use-after-free in ec_bhf_remove
+ - radeon: use memcpy_to/fromio for UVD fw upload
+ - hwmon: (scpi-hwmon) shows the negative temperature properly
+ - can: bcm: fix infoleak in struct bcm_msg_head
+ - can: mcb_a: fix memory leak in mcb_a
+ - usb: core: hub: Disable autosuspend for Cypress CY7C65632
+ - tracing: Do not stop recording cmdlines when tracing is off
+ - tracing: Do not stop recording comms if the trace file is being read
+ - tracing: Do no increment trace_clock_global() by one
+ - PCI: Mark TI C667X to avoid bus reset
+ - PCI: Mark some NVIDIA GPUs to avoid bus reset
+ - PCI: Add ACS quirk for Broadcom BCM57414 NIC
+ - PCI: Work around Huawei Intelligent NIC VF FLR erratum
+ - ARCh: save ABI registers across signal handling
+ - dmaengine: pl330: fix wrong usage of spinlock flags in dma_cyclc
+ - net: bridge: fix vlan tunnel dst null pointer dereference
+ - net: bridge: fix vlan tunnel dst refcnt when egressing
+ - mm/slub.c: include swab.h
+ - net: fec_ptp: add clock rate zero check
+ - can: bcm/raw/isotp: use per module netdevice notifier
+ - inet: use bigger hash table for IP ID generation
+ - ush: dwc3: core: fix kernel panic when do reboot
+ - x86/fpu: Reset state for all signal restore failures
+ - drm/nouveau: wait for moving fence after pinning v2
+ - drm/radeon: wait for moving fence after pinning
+ - ARM: 9081/1: fix gcc-10 thumb2-kernel regression
+ - Makefile: Move -Wno-unused-but-set-variable out of GCC only block
+ - MIPS: generic: Update node names to avoid unit addresses
+ - Revert "PCI: PM: Do not read power state in pci_enable_device_flags()"
+ - mac80211: remove warning in ieee80211_get_sband()
+ - cfg80211: call cfg80211_leave_ocb when switching away from OCB
+ - mac80211: drop multicast fragments
+ - ping: Check return value of function 'ping_queue_rcv_skb'
+ - inet: annotate date races around sk->sk_txhash
+ - net: caif: fix memory leak in ldisc_open
+ - net/packet: annotate accesses to po->bind
+ - net/packet: annotate accesses to po->ifindex

+ + - SAUCE: Revert "proc: Check /proc/Spid/attr/ writes against file opener"
+ + -- Kelsey Skunberg <kelsey.skunberg@canonical.com>  Sat, 03 Jul 2021 06:59:05 -0600
+ +linux (4.15.0-149.153) bionic; urgency=medium
+ + * bionic/linux: 4.15.0-149.153 -proposed tracker (LP: #1933434)
+
* selftests: bpf: test_verifier fixes (LP: #1933385)
+ bpf: Update selftests to reflect new error states
+ bpf, selftests: Adjust few selftest result_unpriv outcomes
+ * CVE-2021-33200
+ bpf: Fix mask direction swap upon off reg sign change
+ -- Stefan Bader <stefan.bader@canonical.com>  Thu, 24 Jun 2021 11:14:19 +0200
+ linux (4.15.0-148.152) bionic; urgency=medium
+ * bionic/linux: 4.15.0-148.152 -proposed tracker (LP: #1932515)
+ * Packaging resync (LP: #1786013)
+ update dkms package versions
+ * Upstream v5.9 introduced 'module' patches that removed exported symbols
+ (LP: #1932065)
+ SAUCE: Revert "modules: inherit TAINT_PROPRIETARY_MODULE"
+ SAUCE: Revert "modules: return licensing information from find_symbol"
+ SAUCE: Revert "modules: rename the licence field in struct symsearch to license"
+ SAUCE: Revert "modules: unexport __module_address"
+ SAUCE: Revert "modules: unexport __module_text_address"
+ SAUCE: Revert "modules: mark each_symbol_section static"
+ SAUCE: Revert "modules: mark find_symbol static"
+ SAUCE: Revert "modules: mark ref_module static"
+ * Disable hv-kvp-daemon.service on certain instance types (LP: #1932081)
+ [Packaging]: Add kernel command line condition to hv-kvp-daemon service
+ Bionic update: upstream stable patchset 2021-06-11 (LP: #1931740)
+ openrisc: Fix a memory leak
+ RDMA/rxe: Clear all QP fields if creation failed
+ scsi: qla2xxx: Fix error return code in qla82xx_write_flash_dword()
+ ptrace: make ptrace() fail if the tracee changed its pid unexpectedly
+ cifs: fix memory leak in smb2_copychunk_range
+ ALSA: line6: Fix racy initialization of LINE6 MIDI
+ ALSA: usb-audio: Validate MS endpoint descriptors
+ ALSA: bebob/oxfw: fix Kconfig entry for Mackie d.2 Pro
+ Revert "ALSA: sb8: add a check for request_region"
+ Revert "rapidio: fix a NULL pointer dereference when create_workqueue() fails"
+ rapidio: handle create_workqueue() failure
+ xen-pci: reconfigure also from backend watch handler
+ dm snapshot: fix crash with transient storage and zero chunk size
+ Revert "video: hgaflb: fix potential NULL pointer dereference"
+ Revert "net: stmicro: fix a missing check of clk_prepare"

+ - Revert "ecryptfs: replace BUG_ON with error handling code"
+ - Revert "gdrom: fix a memory leak bug"
+ - cdrom: gdrom: deallocate struct gdrom_unit fields in remove_gdrom
+ - cdrom: gdrom: initialize global variable at init time
+ - Revert "media: rcar_drif: fix a memory disclosure"
+ - Revert "rtlwifi: fix a potential NULL pointer dereference"
+ - Revert "qlcnic: Avoid potential NULL pointer dereference"
+ - Revert "niu: fix missing checks of niu_pci_eeprom_read"
+ - ethernet: sun: niu: fix missing checks of niu_pci_eeprom_read()
+ - net: stmicro: handle clk_prepare() failure during init
+ - net: rtlwifi: properly check for alloc_workqueue() failure
+ - leds: lp5523: check return value of lp5xx_read and jump to cleanup code
+ - qlcnic: Add null check after calling netdev_alloc_skb
+ - video: hgafb: fix potential NULL pointer dereference
+ - vgacon: Record video mode changes with VT_RESIZEX
+ - vt: Fix character height handling with VT_RESIZEX
+ - tty: vt: always invoke vc->vc_sw->con_resize callback
+ - video: hgafb: correctly handle card detect failure during probe
+ - Bluetooth: SMP: Fail if remote and local public keys are identical
+ - firmware: arm_scpi: Prevent the ternary sign expansion bug
+ - platform/x86: dell-smbios-wmi: Fix oops on rmmod dell_smbios
+ - locking/mutex: clear MUTEX_FLAGS if wait_list is empty due to signal
+ - ALSA: hda/realtek: Add some CLOVE SSIDs of ALC293
+ - Revert "serial: mvebu-uart: Fix to avoid a potential NULL pointer
dereference"
+ - mm, vmstat: drop zone->lock in /proc/pagetypeinfo
+ - usb: dwc3: gadget: Enable suspend events
+ - NFC: nci: fix memory leak in nci_allocate_device
+ - NFSv4: Fix a NULL pointer dereference in pnfs_mark_matching_lsegs_return()
+ - iommu/mt-d: Fix sysfs leak in alloc_iommu()
+ - perf intel-pt: Fix sample instruction bytes
+ - perf intel-pt: Fix transaction abort handling
+ - proc: Check /proc/$pid/attr/ writes against file opener
+ - net: hso: fix control-request directions
+ - mac80211: assure all fragments are encrypted
+ - mac80211: prevent mixed key and fragment cache attacks
+ - mac80211: properly handle A-MSDUs that start with an RFC 1042 header
+ - cfg80211: mitigate A-MSDU aggregation attacks
+ - mac80211: drop A-MSDUs on old ciphers
+ - mac80211: add fragment cache to sta_info
+ - mac80211: check defrag PN against current frame
+ - mac80211: prevent attacks on TKIP/WEP as well
+ - mac80211: do not accept/forward invalid EAPOL frames
+ - ath10k: Validate first subframe of A-MSDU before processing the list
+ - dm snapshot: properly fix a crash when an origin has no snapshots
+ - kgdb: fix gcc-11 warnings harder
+ - misc/uss720: fix memory leak in uss720_probe
+ - thunderbolt: dma_port: Fix NVM read buffer bounds and offset issue
+ - mei: request autosuspend after sending rx flow control
+ - staging: iio: ad7746: avoid overwrite of num_channels
+ - iio: adc: ad7793: Add missing error code in ad7793_setup()
+ - USB: trancевibrator: fix control-request direction
+ - serial: sh-sci: Fix off-by-one error in FIFO threshold register setting
+ - serial: rp2: use 'request_firmware' instead of 'request_firmware_nowait'
+ - USB: serial: ti_usb_3410_5052: add startech.com device id
+ - USB: serial: option: add Telit LE910-S1 compositions 0x7010, 0x7011
+ - USB: serial: pl2303: add device id for ADLINK ND-6530 GC
+ - usb: gadget: udc: renesas_usb3: Add a race in usbd_start_pipen()
+ - net: usb: fix memory leak in smsc75xx_bind
+ - Bluetooth: cmtp: fix file refcount when cmtp_attach_device fails
+ - NFS: fix an incorrect limit in filesystem_decode_layout()
+ - NFS: Don't corrupt the value of pg_bytes_written in nfs_do_recoalesce()
+ - NFSv4: Fix v4.0/v4.1 SEEK_DATA return -ENOTSUPP when set NFS_V4_2 config
+ - drm/meson: Fix a double free issue in tipc_sk_mcast_rcv
+ - skb_linearize the head skb when reassembling msgs
+ - i2c: s3c2410: fix possible NULL pointer deref on read message after write
+ - i2c: i801: Don't generate an interrupt on bus reset
+ - perf jevents: Fix getting maximum number of fds
+ - platform/x86: hp_accel: Avoid invoking _INI to speed up resume
+ - serial: max310x: unregister uart driver in case of failure and abort
+ - net/mlx4: Fix EEPROM dump support
+ - Revert "net/tipc: Fix a double free in tipc_sk_mcast_rcv"
+ - perf: event_group: Add checks after calling ioremap
+ - isdn: mISDNinfineon: check/cleanup ioremap failure correctly in setup_io
+ - dmaengine: qcom_hidma: comment platform_driver_register call
+ - libertas: register sysfs groups properly
+ - media: dbv: Add check on sp8870_readreg return
+ - media: gspca: properly check for errors in po1030_probe()
+ - scsi: BusLogic: Fix 64-bit system enumeration error for Buslogic
+ - openrisc: Define memory barrier mb
+ - btrfs: do not BUG_ON in link_to_fixup_dir
+ - platform/x86: hp-wireless: add AMD's hardware id to the supported list
+ - platform/x86: intel_punit_ipc: Append MODULE_DEVICE_TABLE for ACPI
+ - SMB3: incorrect file id in requests compounded with open
+ - drm/amdgpu: Fix a use-after-free
+ - net: netcp: Fix an error message
+ - net: mdio: thunder: Fix a double free issue in the .remove function
+ - net: mdio: octeon: Fix some double free issues
+ - net: bnx2: Fix error return code in bnx2_init_board()
+ - mld: fix panic in mld_newpack()
+  staging: emxx_udc: fix loop in _nbu2ss_nuke()
+  - ASoC: cs35133: fix an error code in probe()
+  - bpf: Set mac_len in bpf_skb_change_head
+  - ixgbe: fix large MTU request from VF
+  - scsi: libbsas: Use _safe() loop in sas_resume_port()
+  - ipv6: record frag_max_size in atomic fragments in input path
+  - sch_dsmark: fix a NULL deref in qdisc_reset()
+  - MIPS: alchemy: xxs1500: add gpio-au1000.h header file
+  - MIPS: ralink: export rt_sysc_membase for rt2880_wdt.c
+  - hugetlbfs: hugetlb_fault_mutex_hash() cleanup
+  - drivers/net/ethernet: clean up unused assignments
+  - usb: core: reduce power-on-good delay time of root hub
+  - USB: usbfs: Don't WARN about excessively large memory allocations
+  - bpf: extend is_branch_taken to registers
+  - bpf: Move off_reg into sanitize_ptr_alu
+  - bpf: Ensure off_reg has no mixed signed bounds for all types
+  - bpf: Rework ptr_limit into alu_limit and add common error path
+  - bpf: Improve verifier error messages for users
+  - bpf: Refactor and streamline bounds check into helper
+  - bpf: Move sanitize_val_alu out of op switch
+  - bpf: Tighten speculative pointer arithmetic mask
+  - bpf: Fix leakage of uninitialized bpf stack under speculation
+  - bpf: Wrap aux data inside bpfsanitize_info container
+  - bpf: No need to simulate speculative domain for immediates
+  - net: dsa: fix a crash if ->get_sset_count() fails
+  - drm/amd/amdgp: fix refcount leak
+  - net: dsa: fix error code getting shifted with 4 in dsa_slave_get_sset_count
+  - openvswitch: meter: fix race when getting now_ms.
+  - net: lns3: check the return of skb_checksum_help()
+  - Bionic update: upstream stable patchset 2021-06-11 (LP: #1931740) //
+  - CVE-2020-24587 for such cases.
+  - mac80211: extend protection against mixed key and fragment cache attacks
+  * [82A1, Realtek ALC287, Speaker, Internal] Underruns, dropouts or crackling sound (LP: #1925057) // Bionic update: upstream stable patchset 2021-06-11
+  (LP: #1931740)
+  - ALSA: hda/realtek: reset eapd coeff to default value for alc287
+  +  * test_map in ubuntu_bpf failed with "Allowed update sockmap '0:3' not in ESTABLISHED" (LP: #1839912)
+  - SAUCE: Revert "bpf: test_maps, only support ESTABLISHED socks"
+  +  * Bionic update: upstream stable patchset 2021-06-01 (LP: #1930472)
+  - MIPS: Introduce isa-rev.h to define MIPS_ISA_REV
+  - MIPS: cpu-features.h: Replace __mips_isa_rev with MIPS_ISA_REV
+  - s390/disassembler: increase ebpf disasm buffer size
+  - ACPI: custom_method: fix potential use-after-free issue
- ACPI: custom_method: fix a possible memory leak
- arm64: dts: mt8173: fix property typo of 'phys' in dsi node
- cryptfs: fix kernel panic with null dev_name
- spi: spi-ti-qspi: Free DMA resources
- mmc: block: Update ext_csd.cache_ctrl if it was written
- mmc: core: Do a power cycle when the CMD11 fails
- mmc: core: Set read only for SD cards with permanent write protect bit
- cifs: Return correct error code from smb2_get_enc_key
- btrfs: fix metadata extent leak after failure to create subvolume
- intel_th: pci: Add Rocket Lake CPU support
- fbdev: zero-fill colormap in fb colormap.c
- staging: wimax/i2400m: fix byte-order issue
- crypto: api - check for ERR pointers in crypto_destroy_tfm()
- usb: gadget: uvc: add bInterval checking for HS mode
- usb: gadget: f_uac1: validate input parameters
- usb: dwc3: gadget: Ignore EP queue requests during bus reset
- usb: xhci: Fix port minor revision
- PCI: PM: Do not read power state in pci_enable_device_flags()
- x86/build: Propagate $(CLANG_FLAGS) to $(REALMODE_FLAGS)
- tee: oppee: do not check memref size on return from Secure World
- perf/arm_pmu_platform: Fix error handling
- spi: dln2: Fix reference leak to master
- spi: omap-100k: Fix reference leak to master
- intel_th: Consistency and off-by-one fix
- phy: phy-tw14030-usb: Fix possible use-after-free in tw14030_usb_remove()
- btrfs: convert logic BUG_ON()'s in replace_path to ASSERT()'s
- scsi: lpfc: Fix incorrect dbde assignment when building target abts wqe
- scsi: lpfc: Fix pt2pt connection does not recover after LOGO
- scsi: target: pcsi: Fix warning in pcsi_complete_cmd()
- media: tee-cir: check for receive overflow
- power: supply: bq27xxx: fix power_avg for newer ICs
- extcon: arizona: Fix some issues when HPDET IRQ fires after the jack has been unplugged
- media: media/saa7164: fix saa7164_encoder_register() memory leak bugs
- media: gspca/sq905.c: fix uninitialized variable
- power: supply: Use IRQF_ONESHOT
- drm/amdpu : Fix asic reset regression issue introduce by 8f211f8eac7c4f
- scsi: qla2xxx: Always check the return value of qla24xx_get_isp_stats()
- scsi: qla2xxx: Fix use after free in bsg
- scsi: dhp_dh_alua: Remove check for ASC 24h in alua_rtpg()
- media: em28xx: fix memory leak
- media: vivid: update EDID
- clk: socfpga: arria10: Fix memory leak of socfpga_clk on error return
- power: supply: generic-adc-battery: fix possible use-after-free in
  gab_remove()
- power: supply: s3c_adc_battery: fix possible use-after-free in
  s3c_adc_bat_remove()
- media: adv7604: fix possible use-after-free in adv76xx_remove()
+ media: i2c: adv7511-v4l2: fix possible use-after-free in adv7511_remove()
+ media: i2c: adv7842: fix possible use-after-free in adv7842_remove()
+ media: dvb-usb: fix memory leak in dvb_usb_adapter_init
+ media: gscp/stv06xx: fix memory leak
+ drm/msm/mdp5: Configure PP_SYNC_HEIGHT to double the vtotal
+ drm/amdgpu: fix NULL pointer dereference
+ scsi: lpfc: Fix crash when a REG_RPI mailbox fails triggering a LOGO response
+ scsi: lpfc: Remove unsupported mbox PORT_CAPABILITIES logic
+ libfsc: Fix a format specifier
+ ALSA: emu8000: Fix a use after free in snd_emu8000_create_mixer
+ ALSA: hda/conexant: Re-order CX5066 quirk table entries
+ ALSA: sb: Fix two use after free in snd.sb_qsound_build
+ btrfs: fix race when picking most recent mod log operation for an old root
+ arm64/vdso: Discard .note.gnu.property sections in vDSO
+ openvswitch: fix stack OOB read while fragmenting IPv4 packets
+ ACPI: GTDT: Don't corrupt interrupt mappings on watchdog probe failure
+ NFSv4: Don't discard segments marked for return in _pnfs_return_layout()
+ jffs2: Fix kasan slab-out-of-bounds problem
+ powerpe/eeh: Fix EEH handling for hugepages in ioremap space
+ powerpc: fix EDEADLOCK redefinition error in uapi/asm/errno.h
+ intel_th: pci: Add Alder Lake-M support
+ md/raid1: properly indicate failure when ending a failed write request
+ security: commoncap: fix -Wstringop-overread warning
+ Fix misc new gcc warnings
+ jffs2: check the validity of dstlen in jffs2_zlib_compress()
+ Revert 337f13046ff0 ("futex: Allow FUTEX_CLOCK_REALTIME with FUTEX_WAIT op")
+ posix-timers: Preserve return value in clock_adjtime32()
+ ftrace: Handle commands when closing set_ftrace_filter file
+ ext4: fix check to prevent false positive report of incorrect used inodes
+ ext4: fix error code in ext4_commit_super
+ media: dvbdev: Fix memory leak in dvb_media_device_free()
+ usb: gadget: dummy_hcd: fix gpf in gadget_setup
+ usb: gadget: Fix double free of device descriptor pointers
+ usb: gadget/function/f_fs string table fix for multiple languages
+ usb: dwc3: gadget: Fix START_TRANSFER link state check
+ tracing: Map all PIDs to command lines
+ dm persistent data: packed struct should have an aligned() attribute too
+ dm space map common: fix division bug in sm_ll_find_free_block()
+ dm rq: fix double free of blk_mq_tag_set in dev remove after table load
  fails
+ modules: mark ref_module static
+ modules: mark find_symbol static
+ modules: unexport __module_text_address
+ modules: unexport __module_address
+ modules: rename the licence field in struct symsearch to license
+ modules: return licensing information from find_symbol
+ - modules: inherit TAINT_PROPRIETARY_MODULE
+ - Bluetooth: verify AMP hci_chan before amp_destroy
+ - hsr: use netdev_err() instead of WARN_ONCE()
+ - bluetooth: eliminate the potential race condition when removing the HCI controller
+ - net/nfc: fix use-after-free llcp_sock_bind/connect
+ - MIPS: pci-rt2880: fix slot 0 configuration
+ - FDDI: defxx: Bail out gracefully with unassigned PCI resource for CSR
+ - misc: lis3lv02d: Fix false-positive WARN on various HP models
+ - misc: vmw_vmci: explicitly initialize vmci_notify_bm_set_msg struct
+ - misc: vmw_vmci: explicitly initialize vmci_datagram payload
+ - tracing: Restructure trace_clock_global() to never block
+ - md-cluster: fix use-after-free issue when removing rdev
+ - md: split mddev_find
+ - md: factor out a mddev_find_locked helper from mddev_find
+ - md: md_open returns -EBUSY when entering racing area
+ - ipw2x00: potential buffer overflow in libipw_wx_set_encodext()
+ - cfg80211: scan: drop entry from hidden_list on overflow

- binfmt_misc: fix possible deadlock in bm_register_write
- hwmon: (lm90) Fix max6658 sporadic wrong temperature reading
+ - KVM: arm64: Fix exclusive limit for IPA size
+ - xen/events: reset affinity of 2-level event when tearing it down
+ - xen/events: don't unmask an event channel when an eoi is pending
+ - xen/events: avoid handling the same event on two cpus at the same time
+ - tcp: add sanity tests to TCP_QUEUE_SEQ
+ - net: qrtr: fix error return code of qrtr_sendmsg()
+ - net: stmmac: fix watchdog timeout during suspend/resume stress test
+ - i2c: rcar: optimize cacheline to minimize HW race condition
+ - powerpc/pci: Add ppc_md.discover_phbs()
+ - PCI: Fix pci_register_io_range() memory leak
+ - i40e: Fix memory leak in i40e_probe
+ - ALSA: usb: Add Plantronics C320-M USB ctrl msg delay quirk
+ - ALSA: usb-audio: Apply the control quirk to Plantronics headsets
+ - mmc: cqhci: Fix random crash when remove mmc module/card
+ - usbip: fix vudc.usbip_sockfd_store races leading to gpf
+ - net: b53: Support setting learning on port
+ - ext4: check journal inode extents more carefully
+ - perf tools: Use %define api.pure full instead of %pure-parser
+ - tools build feature: Check if get_current_dir_name() is available
+ - tools build feature: Check if eventfd() is available
+ - tools build: Check if gettid() is available before providing helper
+ - tools build feature: Check if pthread_barrier_t is available
+ - btrfs: fix race when cloning extent buffer during rewind of an old root
+ - nvnet: don't check iqsqs,ioqses for discovery controllers
+ - NFSD: Repair misuse of sv_lock in 5.10.16-rt30.
+ - svcrdma: disable timeouts on rdma backchannel
+ - sunrpc: Fix refcount leak for rpc auth modules
+ - net/qrtr: fix __netdev_alloc_skb call
+ - scsi: lpfc: Fix some error codes in debugfs
+ - nvme-rdma: fix possible hang when failing to set io queues
+ - usb-storage: Add quirk to defeat Kindle's automatic unload
+ - USB: replace hardcode maximum usb string length by definition
+ - usb: gadget: configfs: Fix KASAN use-after-free
+ - iio:adc:sm32-adc: Add HAS_IOMEM dependency
+ - iio: adc://qcom-spml-vadc: add default scale to LR_MUX2_BAT_ID channel
+ - iio: adis16400: Fix an error code in adis16400_initial_setup()
+ - iio: gyro: mpu3050: Fix error handling in mpu3050_trigger_handler
+ - iio: hid-sensor-humidity: Fix alignment issue of timestamp channel
+ - iio: hid-sensor-prox: Fix scale not correct issue
+ - iio: hid-sensor-temperature: Fix issues of timestamp channel
+ - PCI: rpadlpar: Fix potential drc_name corruption in store functions
+ - perf/x86/intel: Fix a crash caused by zero PEBS status
+ - x86/ioapic: Ignore IRQ2 again
+ - kernel, fs: Introduce and use set_restart_fn() and arch_set_restart_data()
+ - x86: Move TS_COMPAT back to asm/thread_info.h
+ - x86: Introduce TS_COMPAT_RESTART to fix get_nr_restart_syscall()
+ - ext4: Fix old entry again if failed to rename whiteout
+ - ext4: do not try to set xattr into ea_inode if value is empty
+ - ext4: fix potential error in ext4_do_update_inode
+ - genirq: Disable interrupts for force threaded handlers
+ - btrfs: fix slab cache flags for free space tree bitmap
+ - powerpc: Force inlining of cpu_has_feature() to avoid build failure
+ - usbip: Fix incorrect double assignment to udc->ud.tcp_rx
+ - x86/apic/of: Fix CPU devicetree-node lookups

+
+ linux (4.15.0-143.147) bionic; urgency=medium
+
+ * bionic/linux: 4.15.0-143.147 -proposed tracker (LP: #1923811)
+
+ * CVE-2021-29650
+ - netfilter: x_tables: Use correct memory barriers.
+
+ * LRMv4: switch to signing nvidia modules via the Ubuntu Modules signing key
+ (LP: #1918134)
+ - [Packaging] dkms-build[,-nvidia-N] sync back from LRMv4
+
+ * Security-Fix Xen XSA 371 for Kernel 5.4.0-71 (LP: #1921902) //
+ CVE-2021-28688
+ - xen-blkbk: don't leak persistent grants from xen_blkbk_map()
+
+ * CVE-2021-20292
+ - drm/ttm/nouveau: don't call tt destroy callback on alloc failure.
+
+ * CVE-2021-29264
+ - gianfar: fix jumbo packets+napi+rx overrun crash
+
+ * CVE-2021-29265
+ - usbip: fix stub_dev usbip_sockfd_store() races leading to gpf
+
+ * Bcache bypass writeback on caching device with fragmentation (LP: #1900438)
+ - bcache: consider the fragmentation when update the writeback rate
+
+ * Bionic update: upstream stable patchset 2021-03-31 (LP: #1922124)
+ - net: usb: qmi_wwan: support ZTE P685M modem
+ - scripts: use pkg-config to locate libcrypto
+ - scripts: set proper OpenSSL include dir also for sign-file
+ - hugetlb: fix update_and_free_page contig page struct assumption
+ - drm/virtio: use kvmalloc for large allocations
+ - virtio/s390: implement virtio-ccw revision 2 correctly
+ - arm64 module: set plt* section addresses to 0x0
+ - arm64: Avoid redundant type conversions in xchg() and cmpxchg()
+ - arm64: cmpxchg: Use "K" instead of "L" for il/sc immediate constraint
+ - arm64: Use correct il/sc atomic constraints
+ - JFS: more checks for invalid superblock
+ - media: mceusb: sanity check for prescaler value
+ - xfs: Fix assert failure in xfs_setattr_size()
+ - smackfs: restrict bytes count in smackfs write functions
+ - net: fix up truesize of cloned skb in skb_prepare_for_shift()
+ - mm/hugelbk.c: fix unnecessary address expansion of pmd sharing
+ - net: bridge: use switchdev for port flags set through sysfs too
+ - dt-bindings: net: btusb: DT fix s/interrupt-name/interrupt-names/
+ - staging: fwserial: Fix error handling in fwserial_create
+ - x86/reboot: Add Zotac ZBOX CI327 nano PCI reboot quirk
+ - vt/consolemap: do font sum unsigned
+ - wcore: Fix command execute failure 19 for wl12xx
+ - pktgen: fix misuse of BUG_ON() in pktgen_thread_worker()
+ - ath10k: fix wmi mgmt tx queue full due to race condition
+ - x86/build: Treat R_386_PLT32 relocation as R_386_PC32
+ - Bluetooth: Fix null pointer dereference in amp_read_loc_assoc_final_data
+ - staging: most: sound: add sanity check for function argument
+ - media: uvcvideo: Allow entities with no pads
+ - /fs: handle unallocated section and zone on pinned/age
+ - parisc: Bump 64-bit IRQ stack size to 64 KB
+ - Xen/gnttab: handle p2m update errors on a per-slot basis
+ - xen-netback: respect gnttab_map_refs()'s return value
+ - zmalloc: account the number of compacted pages correctly
+ - swap: fix swapfile read/write offset
+ - media: v4l: ioctl: Fix memory leak in video_usercopy
+ - PCI: Add a REBAR size quirk for Sapphire RX 5600 XT Pulse
+ - drm/amd/display: Guard against NULL pointer deref when get_i2c_info fails
+ - /fs: fix to set/clear I_LINKABLE under i_lock
+ - btrfs: fix error handling in commit_fs_roots
+ - ALSA: hda/realtek: Add quirk for Clevo NH55RZQ
+ - ALSA: hda/realtek: Apply dual codec quirks for MSI Godlike X570 board
+ - btrfs: raid56: simplify tracking of Q stripe presence
+ - btrfs: fix raid6 qstripe kmap
+ - usbip: tools: fix build error for multiple definition
+ - ALSA: ctxfi: cthw20k2: fix mask on conf to allow 4 bits
+ - rsxx: Return -EFAULT if copy_to_user() fails
+ - dm table: fix iterate_devices based device capability checks
+ - dm table: fix DAX iterate_devices based device capability checks
+ - dm table: fix zoned iterate_devices based device capability checks
+ - iommu/amd: Fix sleeping in atomic in increase_address_space()
+ - mwifiex: pcie: skip cancel_work_sync() on reset failure path
+ - platform/x86: acer-wmi: Cleanup ACER_CAP_FOO defines
+ - platform/x86: acer-wmi: Cleanup accelerometer device handling
+ - platform/x86: acer-wmi: Add new force_caps module parameter
+ - platform/x86: acer-wmi: Add ACER_CAP_SET_FUNCTION_MODE capability flag
+ - platform/x86: acer-wmi: Add support for SW_TABLET_MODE on Switch devices
+ - platform/x86: acer-wmi: Add ACER_CAP_KBD_DOCK quirk for the Aspire Switch
+ 10E SW3-016
+ - PCI: Add function 1 DMA alias quirk for Marvell 9215 SATA controller
+ - misc: eeprom_93xx46: Add quirk to support Microchip 93LC46B eeprom
+ - drm/ msm/a5xx: Remove overwriting A5XX_PCIE_DBG_ECO_CNTL register
+ - Revert "zram: close udev startup race condition as default groups"
+ - HID: mf: add support for 0079:1846 Mayflash/Dragonrise USB Gamecube Adapter
+ + * Bionic update: upstream stable patchset 2021-03-16 (LP: #1919380)
+ + - fb: Graph: Initialize tracing_graph_pause at task creation
+ + - tracing: Do not count ftrace events in top level enable output
+ + - tracing: Check length before giving out the filter buffer
+ + - arm/xen: Don't probe xenbus as part of an early initcall
+ + - MIPS: BMIPS: Fix section mismatch warning
+ + - arm64: dts: rockchip: Fix PCIe DT properties on rk3399
+ + - platform/x86: hp-wmi: Disable tablet-mode reporting by default
+ + - ovl: perform vfs_getxattr() with mounter creds
+ + - cap: fix conversions on getxattr
+ + - ovl: skip getxattr of security labels
+ + - ARM: dts: lpc32xx: Revert set default clock rate of HCLK PLL
+ + - ARM: ensure the signal page contains defined contents
+ + - bpf: Check for integer overflow when using roundup_pow_of_two()
+ + - netfilter: xt_recent: Fix attempt to update deleted entry
+ + - xen/netback: avoid race in xenvif_rx_ring_slots_available()
+ + - netfilter: conntrack: skip identical origin tuple in same zone only
+ + - usb: dwc3: ulpi: fix checkpatch warning
+ + - usb: dwc3: ulpi: Replace CPU-based busyloop with Protocol-based one
+ + - net/vmw_vsock: improve locking in vsock_connect_timeout()
+ + - net: watchdog: hold device global xmit lock during tx disable
+ + - vsock/virtio: update credit only if socket is not closed
+ + - vsock: fix locking in vsock_shutdown()
+ + - i2c: stm32f7: fix configuration of the digital filter
+ + - h8300: fix PREEMPTION build, TI_PRE_COUNT undefined
+ + - x86/build: Disable CET instrumentation in the kernel for 32-bit too
+ + - trace: Use -mcount-record for dynamic ftrace
+ + - tracing: Fix SKIP_STACK_VALIDATION=1 build due to bad merge with -mrecord-mcount
+ + - tracing: Avoid calling cc-option -mrecord-mcount for every Makefile
+ + - Xen/x86: don't bail early from clear_foreign_p2m_mapping()
+ + - Xen/x86: also check kernel mapping in set_foreign_p2m_mapping()
+ + - Xen/gntdev: correct dev_bus_addr handling in gntdev_map_grant_pages()
+ + - Xen/gntdev: correct error checking in gntdev_map_grant_pages()
+ + - xen/arm: don't ignore return errors from set_phys_to_machine
+ + - xen-blkback: don't "handle" error by BUG()
+ + - xen-netback: don't "handle" error by BUG()
+ + - xen-iscsi: don't "handle" error by BUG()
+ + - xen-blkback: fix error handling in xen_blkback_map()
+ + - scsi: qla2xxx: Fix crash during driver load on big endian machines
+ + - kvm: check tlbs_dirty directly
+ + - drm/amd/display: Free atomic state after drm_atomic_commit
+ + - riscv: virt_addr_valid must check the address belongs to linear mapping
ARM: kexec: fix oops after TLB are invalidated
- net: hns3: add a check for queue_id in hclge_reset_vf_queue()
- firmware_loader: align .builtin_fw to 8
- net/rds: restrict iovecs length for RDS_CMSG_RDMA_ARGS
- ovl: expand warning in ovl_d_real()
- net: qrtr: Fix port ID for control messages
- HID: make arrays usage and value to be the same
- usb: quirks: add quirk to start video capture on ELMO L-12F document camera
- ntfs: check for valid standard information attribute
- arm64: tegra: Add power-domain for Tegra210 HDA
- NET: usb: qmi_wwan: Adding support for Cinterion MV31
- cifs: Set CIFS_MOUNT_USE_PREFIX_PATH flag on setting cifs_sb->prepath.
- scripts/recordmcount.pl: support big endian for ARCH sh
- vmlinux.lds.h: add DWARF v5 sections
- kdb: Make memory allocations more robust
- MIPS: vmlinux.lds.S: add missing PAGE_ALIGNED_DATA() section
- random: fix the RNDRESEEDCRNG ioctl
- Bluetooth: btqcomsmd: Fix a resource leak in error handling paths in the probe function
- Bluetooth: Fix initializing response id after clearing struct
- ARM: dts: exynos: correct PMIC interrupt trigger level on Monk
- ARM: dts: exynos: correct PMIC interrupt trigger level on Rinato
- ARM: dts: exynos: correct PMIC interrupt trigger level on Spring
- ARM: dts: exynos: correct PMIC interrupt trigger level on Arndale Octa
- arm64: dts: exynos: correct PMIC interrupt trigger level on TM2
- arm64: dts: exynos: correct PMIC interrupt trigger level on Espresso
- cpufreq: brcmstb-avs-cpufreq: Fix resource leaks in ->remove()
- usb: gadget: u_audio: Free requests only after callback
- Bluetooth: drop HCI device reference before return
- Bluetooth: Put HCI device if inquiry procedure interrupts
- ARM: dts: Configure missing thermal interrupt for 4430
- usb: dwc2: Do not update data length if it is 0 on inbound transfers
- usb: dwc2: Abort transaction after errors with unknown reason
- usb: dwc2: Make "trimming xfer length" a debug message
- staging: rtl8723bs: wifi_regd.c: Fix incorrect number of regulatory rules
- arm64: dts: msm8916: Fix reserved and rfsa nodes unit address
- ARM: s3c: fix fiq for clang IAS
- bpf_lru_list: Read double-checked variable once without lock
- ath9k: fix data bus crash when setting nf_override via debugfs
- bnxt_en: reverse order of TX disable and carrier off
- xen/netback: fix spurious event detection for common event case
- mac80211: fix potential overflow when multiplying to u32 integers
- b43: N-PHY: Fix the update of coef for the PHY revision >= 3case
- ibmvnic: skip send_request_unmap for timeout reset
- net: amd-xgbe: Reset the PHY rx data path when mailbox command timeout
- net: amd-xgbe: Reset link when the link never comes back
- net: mvneta: Remove per-cpu queue mapping for Armada 3700
+ - fbdev: aty: SPARC64 requires FB_ATY_CT
+ - drm/gma500: Fix error return code in psb_driver_load()
+ - gma500: clean up error handling in init
+ - crypto: sun4i-ss - fix kmap usage
+ - MIPS: c-r4k: Fix section mismatch for loongson2_sc_init
+ - MIPS: lantiq: Explicitly compare LTQ_EBU_PCC_Istat against 0
+ - media: i2c: ov5670: Fix PIXEL_RATE minimum value
+ - media: vsp1: Fix an error handling path in the probe function
+ - media: media/pci: Fix memleak in empress_init
+ - media: tm6000: Fix memleak in tm6000_start_stream
+ - ASoC: cs42l56: fix up error handling in probe
+ - crypto: bcm - Rename struct device_private to bcm_device_private
+ - media: lmedm04: Fix misuse of comma
+ - media: qm1d1c0042: fix error return code in qm1d1c0042_init()
+ - media: cx25821: Fix a bug when reallocating some dma memory
+ - media: pxa_camera: declare variable when DEBUG is defined
+ - media: uvcvideo: Accept invalid bFormatIndex and bFrameIndex values
+ - ata: ahci_brcm: Add back regulators management
+ - Drivers: hv: vmbus: Avoid use-after-free in vmbus_onoffer_rescind()
+ - btrfs: clarify error returns values in __load_free_space_cache
+ - hwrng: timeriomem - Fix cooldown period calculation
+ - crypto: ecdh_helper - Ensure 'len >= secret.len' in decode_key()
+ - ima: Free IMA measurement buffer on error
+ - ima: Free IMA measurement buffer after kexec syscall
+ - fs/jfs: fix potential integer overflow on shift of a int
+ - jffs2: fix use after free in jffs2_sum_write_data()
+ - capabilities: Don't allow writing ambiguous v3 file capabilities
+ - clk: meson: clk-pll: fix initializing the old rate (fallback) for a PLL
+ - quota: Fix memory leak when handling corrupted quota file
+ - spi: cadence-quadspi: Abort read if dummy cycles required are too many
+ - HID: core: detect and skip invalid inputs to snto32()
+ - dmaengine: fsldma: Fix a resource leak in the remove function
+ - dmaengine: fsldma: Fix a resource leak in an error handling path of the
  probe function
+ - dmaengine: hsu: disable spurious interrupt
+ - mfd: bd9571mww: Use devm_mfd_add_devices()
+ - fdt: Properly handle "no-map" field in the memory region
+ - of/fdt: Make sure no-map does not remove already reserved regions
+ - power: reset: at91-sama5d2_shdwc: fix wkupdbe mask
+ - rtc: s5m: select REGMAP_I2C
+ - clocksourceldrivers/mxs_timer: Add missing semicolon when DEBUG is defined
+ - regulator: axp20x: Fix reference cout leak
+ - certs: Fix blacklist flag type confusion
+ - spi: atmel: Put allocated master before return
+ - isofs: release buffer head before return
+ - auxdisplay: ht16k33: Fix refresh rate handling
+ - IB/umad: Return EIO in case of when device disassociated
+ - powerpc/47x: Disable 256k page size
+ mmc: usdhi6rol0: Fix a resource leak in the error handling path of the probe
+ ARM: 9046/1: decompressor: Do not clear SCTL.R.nTLSMD for ARMv7+ cores
+ amba: Fix resource leak for drivers without .remove
+ tracepoint: Do not fail unregistration of a probe due to memory failure
+ perf tools: Fix DSO filtering when not finding a map for a sampled address
+ RDMA/rxe: Fix coding error in rxe_recv.c
+ spi: stm32: properly handle 0 byte transfer
+ mm/mcci: Prevent use after free in mm831x_auxadc_read_irq()
+ powerpc/pseries/dlpar: handle ibm, configure-connector delay status
+ powerpc/8xx: Fix software emulation interrupt
+ spi: pxa2xx: Fix the controller numbering for Wildcat Point
+ perf intel-pt: Fix missing CYC processing in PSB
+ perf test: Fix unaligned access in sample parsing test
+ Input: elo - fix an error code in elo_connect()
+ sparc64: only select COMPAT_BINFMT_ELF if BINFMT_ELF is set
+ misc: eeprom_93xx46: Fix module alias to enable module autoprobe
+ misc: eeprom_93xx46: Add module alias to avoid breaking support for non device tree users
+ pwm: rockchip: rockchip_pwm_probe(): Remove superfluous clk_unprepare()
+ VMC1: Use set_page_dirty_lock() when unregistering guest memory
+ PCI: Align checking of syscall user config accessors
+ drm/msm/dsi: Correct io_start for MSM8994 (20nm PHY)
+ ext4: fix potential htree index checksum corruption
+ i40e: Fix flow for IPv6 next header (extension header)
+ i40e: Fix overwriting flow control settings during driver loading
+ net/mlx4_core: Add missed mlx4_free_cmd_mailbox()
+ ocfs2: fix a use after free on error
+ mm/memory.c: fix potential pte_unmap_unlock pte error
+ mm/hugetlb: fix potential double free in hugetlb_register_node() error path
+ arm64: Add missing ISB after invalidating TLB in __primary_switch
+ i2c: brcmstm: Fix brcmstd_send_i2c_cmd condition
+ mm/rmap: fix potential pte_unmap on an not mapped pte
+ scsi: bnx2fc: Fix Kconfig warning & CNIC build errors
+ blk-settings: align max_sectors on "logical_block_size" boundary
+ ACPI: property: Fix fwnode string properties matching
+ ACPI: configfs: add missing check after configfs_register_default_group()
+ HID: wacom: Ignore attempts to overwrite the touch_max value from HID
+ Input: raydium_ts_i2c - do not send zero length
+ Input: xpad - add support for PowerA Enhanced Wired Controller for Xbox
+ Series X|S
+ Input: joydev - prevent potential read overflow in ioctl
+ Input: i8042 - add ASUS Zenbook Flip to noseltest list
+ USB: serial: option: update interface mapping for ZTE P685M
+ usb: musb: Fix runtime PM race in musb_queue_resume_work
+ USB: serial: mos7840: fix error code in mos7840_write()
+ USB: serial: mos7720: fix error code in mos7720_write()
+ usb: dwc3: gadget: Fix setting of DEPCFG.Interval_m1
+ usb: dwc3: gadget: Fix dep->interval for fullspeed interrupt
+ - ALSA: hda/realtek: modify EAPD in the ALC886
+ - tpm_tis: Fix check_locality for correct locality acquisition
+ - KEYs: trusted: Fix migratable=1 failing
+ - btrfs: abort the transaction if we fail to inc ref in btrfs_copy_root
+ - btrfs: fix reloc root leak with 0 ref reloc roots on recovery
+ - btrfs: fix extent buffer leak on failure to copy root
+ - crypto: sun4i-ss - checking sg length is not sufficient
+ - crypto: sun4i-ss - handle BigEndian for cipher
+ - seccomp: Add missing return in non-void function
+ - drivers/misc/vmw_vmci: restrict too big queue size in qp_host_alloc_queue
+ - staging: rtl81188eu: Add Edimax EW-7811UN V2 to device table
+ - x86/reboot: Force all cpus to exit VMX root if VMX is supported
+ - floppy: reintroduce O_NDELAY fix
+ - x86: uprobe: Return EOPNOTSUPP for AARCH32 instruction probing
+ - watchdog: mei_wdt: request stop on unregister
+ - mtd: spi-nor: hisi-sfc: Put child node ap on error path
+ - fs/affs: release old buffer head on error path
+ - hugetlb: fix_copy_huge_page_from_user contig page struct assumption
+ - mm: hugetlb: fix a race between freeing and dissolving the page
+ - libnvdimm/dimn: Avoid race between probe and available_slots_show()
+ - module: Ignore _GLOBAL_OFFSET_TABLE_ when warning for undefined symbols
+ - mmc: sdhci-esdhc-imx: fix kernel panic when remove module
+ - gpio: pcf857x: Fix missing first interrupt
+ - printk: fix deadlock when kernel panic
+ - ISFs: fix out-of-repair __setattr_copy()
+ - sparc32: fix a user-triggerable oops in clear_user()
+ - gfs2: Don't skip dlm unlock if glock has an lvb
+ - dm era: Recover committed writesp after crash
+ - dm era: Verify the data block size hasn't changed
+ - dm era: Fix bitset memory leaks
+ - dm era: Use correct value size in equality function of writesp tree
+ - dm era: Reinitialize bitset cache before digesting a new writesp
dm era: only resizing metadata in preressume
+ - icmp: introduce helper for nat'd source address in network device context
+ - icmp: allow icmpv6_nso_send to work with CONFIG_IPV6=n
+ - gtp: use icmp_nso_send helper
+ - sunet: use icmp_nso_send helper
+ - ipv6: icmp6: avoid indirect call for icmpv6_send()
+ - ipv6: silence compilation warning for non-IPv6 builds
+ - net: icmp: pass zeroed opts from icmp{,v6}_ndo_to_send before sending
+ - dm era: Update in-core bitset after committing the metadata
+ - USB: quirks: sort quirk entries
+ - jump_label/lockdep: Assert we hold the hotplug lock for _cpuslocked()
+ - operations
+ - ARM: dts: exynos: correct PMIC interrupt trigger level on Artik 5
+ - ARM: dts: exynos: correct PMIC interrupt trigger level on Odroid XU3 family
+ - arm64: dts: allwinner: A64: properly connect USB PHY to port 0
+ - arm64: dts: allwinner: Drop non-removable from SoPine/LTS SD card
- arm64: dts: allwinner: A64: Limit MMC2 bus frequency to 150 MHz
- memory: ti-aemif: Drop child node when jumping out loop
- ihmvnnc: add memory barrier to protect long term buffer
- net: amd-xgbe: Fix NETDEV WATCHDOG transmit queue timeout warning
- drm/amdgpud: Fix macro name _AMDGPU_TRACE_H_ in preprocessor if condition
- drm/amd/display: Fix 10/12 bpc setup in DCE output hit depth reduction.
- crypto: talitos - Work around SEC6 ERRATA (AES-CTR mode data size error)
- pifs: fix to avoid inconsistent quota data
- regulator: s5m8767: Drop regulators OF node reference
- mmc: renesas_sdhi_internal_dmac: Fix DMA buffer alignment from 8 to 128-bytes
- RDMA/rxe: Correct skb on loopback path
- i40e: Add zero-initialization of AQ command structures
- i40e: Fix add TC filter for IPv6
- r8169: fix jumbo packet handling on RTL8168e
- USB: serial: ftdi_sio: fix FTX sub-integer prescaler
- crypto: arm64/sha - add missing module aliases
- misc: rtsx: init of rts522a add OCP power off when no card is present
- seq_file: document how per-entry resources are managed.
- x86: fix seq_file iteration for pat/memtype.c

+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com>  Wed, 14 Apr 2021 15:15:21 +0200
+ linux (4.15.0-142.146) bionic; urgency=medium
+ * overlayfs calls vfs_setxattr without cap_convert_nscap
+ - vfs: move cap_convert_nscap() call into vfs_setxattr()
+ * CVE-2021-29154
+ - SAUCE: bpf, x86: Validate computation of branch displacements for x86-64
+ -- Marcelo Henrique Cerri <marcelo.cerri@canonical.com>  Mon, 12 Apr 2021 18:46:50 -0300
+ linux (4.15.0-141.145) bionic; urgency=medium
+ * bionic/linux: 4.15.0-141.145 -proposed tracker (LP: #1919536)
+ * binary assembly failures with CONFIG_MODVERSIONS present (LP: #1919315)
+ - [Packaging] quiet (nomially) benign errors in BUILD script
+ * selftests: bpf verifier fails after sanitize_ptr_alu fixes (LP: #1920995)
+ - bpf: Simplify alu_limit masking for pointer arithmetic
+ - bpf: Add sanity check for upper ptr_limit
+ - bpf, selftests: Fix up some test_verifier cases for unprivileged
+ * Packaging resync (LP: #1786013)
+ - update dkms package versions
* CVE-2018-13095
  * xfs: More robust inode extent count validation
* i40e PF reset due to incorrect MDD event (LP: #1772675)
  * i40e: change behavior on PF in response to MDD event
* Bionic update: upstream stable patchset 2021-03-09 (LP: #1918330)
  * ACPI: sysfs: Prefer "compatible" modalias
  * ARM: dts: imx6qdl-gw52xx: fix duplicate regulator naming
  * wext: fix NULL-ptr-dereference with cfg80211's lack of commit()
  * net: usb: qmi_wwan: added support for Thales Cinterion PLSx3 modem family
  * drivers: soc: atmel: Avoid calling at91_soc_init on non AT91 SoCs
  * drivers: soc: atmel: add null entry at the end of at91_soc_allowed_list[]
  * KVM: x86/pmu: Fix HW_REF_CPU_CYCLES event pseudo-encoding in intel_arch_events[]
  * KVM: x86: get smi pending status correctly
  * xen: Fix XenStore initialisation for XS_LOCAL
  * leds: trigger: fix potential deadlock with libata
  * mt7601u: fix kernel crash unplugging the device
  * mt7601u: fix rx buffer refcounting
  * xen-blkfront: allow discard-* nodes to be optional
  * ARM: imx: build suspend-imx6.S with arm instruction set
  * netfilter: nft_dynset: add timeout extension to template
  * xfrm: Fix oops in xfrm_replay_advance_bmp
  * RDMA/cxgb4: Fix the reported max_recv_sge value
  * iwlwifi: pcie: use jiffies for memory read spin time limit
  * iwlwifi: pcie: reschedule in long-running memory reads
  * mac80211: pause TX while changing interface type
  * can: dev: prevent potential information leak in can_fill_info()
  * x86/entry/64/compat: Preserve r8-r11 in int $0x80
  * x86/entry/64/compat: Fix "x86/entry/64/compat: Preserve r8-r11 in int $0x80"
  * iommu/vt-d: Gracefully handle DMAR units with no supported address widths
  * iommu/vt-d: Don't dereference iommu_device if IOMMU_API is not built
  * NFC: fix resource leak when target index is invalid
  * NFC: fix possible resource leak
  * team: protect features update by RCU to avoid deadlock
  * tcp: fix TLP timer not set when CA_STATE changes from DISORDER to OPEN
  * kernel: kexec: remove the lock operation of system_transition_mutex
  * PM: hibernate: flush swap writer after marking
  * pNFS/NFSv4: Fix a layout segment leak in nfsfs_layout_process()
  * net/mlx5: Fix memory leak on flow table creation error flow
  * rxrpc: Fix memory leak in rxrpc_lookup_local
  * net: dsa: bcm_sf2: put device node before return
  * ibmvnic: Ensure that CRQ entry read are correctly ordered
  * ACPI: thermal: Do not call acpi_thermal_check() directly
  * net_sched: gen_estimator: support large ewma log
  * phy: pcap-usb: Fix warning for missing regulator_disable
  * x86: __always_inline__(rd,wr)msr()
+ - scsi: scsi_transport_srp: Don't block target in failfast state
+ - scsi: libfc: Avoid invoking response handler twice if ep is already completed
+ - mac80211: fix fast-rx encryption check
+ - scsi: ibmvfc: Set default timeout to avoid crash during migration
+ - objtool: Don't fail on missing symbol table
+ - kthread: Extract KTHREAD_IS_PER_CPU
+ - workqueue: Restrict affinity change to rescuer
+ - USB: serial: cp210x: add pid/vid for WSDA-200-USB
+ - USB: serial: cp210x: add new VID/PID for supporting Teraoka AD2000
+ - USB: serial: option: Adding support for Cinterion MV31
+ - arm64: dts: ds1s1046a: fix dcfg address range
+ - net: lapb: Copy the skb before sending a packet
+ - elfcore: fix building with clang
+ - USB: gadget: legacy: fix an error code in eth_bind()
+ - USB: usblp: don't call usb_set_interface if there's a single alt
+ - usb: dwc2: Fix endpoint direction check in ep_from_windex
+ - ovl: fix dentry leak in ovl_get_redirect
+ - mac80211: fix station rate table updates on assoc
+ - kretprobe: Avoid re-registration of the same kretprobe earlier
+ - xhci: fix bounce buffer usage for non-sg list case
+ - cifs: report error instead of invalid when revalidating a dentry fails
+ - smb3: Fix out-of-bounds bug in SMB2_negotiate()
+ - mmc: core: Limit retries when analyse of SDIO tuples fails
+ - nvme-pci: avoid the deepest sleep state on Kingston A2000 SSDs
+ - ARM: footbridge: fix dc21285 PCI configuration accessors
+ - mm: hugetlbfs: fix cannot migrate the falloccated HugeTLB page
+ - mm: hugetlb: fix a race between isolating and freeing page
+ - mm: hugetlb: remove VM_BUG_ON_PAGE from page_huge_active
+ - mm: thp: fix MADV_REMOVE deadlock on shmem THP
+ - x86/build: Disable CET instrumentation in the kernel
+ - x86/apic: Add extra serialization for non-serializing MSRs
+ - Input: xpad - sync supported devices with fork on GitHub
+ - jommu/vt-d: Do not use flush-queue when caching-mode is on
+ - net: dsa: mv88e6xxxx: override existent unicast portvec in port_fdb_add
+ - net: mcppp2: TCAM entry enable should be written after SRAM data
+ - memblock: do not start bottom-up allocations with kernel_end
+ - usb: renesas_usbhs: Clear pipe running flag in usbhs_pkt_pop()
+ - genirq/msi: Activate Multi-MSI early when MSI_FLAG_ACTIVATE_EARLY is set
+ - KVM: SVM: Treat SVM as unsupported when running as an SEV guest
+ - md: Set prev_flush_start and flush_bio in an atomic way
+ - net: ip_tunnel: fix mtu calculation
+ - block: fix NULL pointer dereference in register_disk
+ - remoteproc: qcom_q6v5_mss: Validate modem blob firmware size before load
+ - remoteproc: qcom_q6v5_mss: Validate MBA firmware size before load
+ - af_key: relax availability checks for skb size calculation
+ - pNFS/NFSv4: Try to return invalid layout in pnfs_layout_process()
+ - iwlwifi: mvm: take mutex for calling iwl_mvm_get_sync_time()
+ - iwlwifi: pcie: add a NULL check in iwl_pcie_txq_unmap
+ - iwlwifi: mvm: guard against device removal in reprobe
+ - SUNRPC: Move simple_get_bytes and simple_get_netobj into private header
+ - SUNRPC: Handle 0 length opaque XDR object data properly
+ - lib/string: Add strscpy_pad() function
+ - includetrace/events/writeback.h: fix -Wstringop-truncation warnings
+ - memcg: fix a crash in wb_workfn when a device disappears
+ - blk-mq: don't hold q->sysfs_lock in blk_mq_map_swqueue
+ - squashfs: add more sanity checks in id lookup
+ - squashfs: add more sanity checks in inode lookup
+ - squashfs: add more sanity checks in xattr id lookup
+
+ * SRU: Add FUA support for XFS (LP: #1917918)
+ - block: add blk_queue_fua() helper function
+ - xfs: move generic_write_sync calls inwards
+ - iomap: iomap_dio_rw() handles all sync writes
+ - iomap: Use FUA for pure data O_DS SYNC DIO writes
+
+ * CVE-2021-3348
+ - nbd: freeze the queue while we're adding connections
+
+ * Bionic kernel 4.15.0-136 causes dosemu2 (with kvm mode) freezes due to lack
+ - blk-mq: Add FUA support
+ - KVM: x86: handle !lapic_in_kernel case in kvm_cpu_*_extint
+
+ * switch LRM to be signed using the Ubuntu Drivers signing key (LP: #1917034)
+ - [Packaging] sync dkms-build to updated API
+
+ * Bionic update: upstream stable patchset 2021-02-26 (LP: #1917093)
+ - i2c: bpmp-tegra: Ignore unknown I2C_M flags
+ - ALSA: seq: oss: Fix missing error check in snd_seq_oss_synth_make_info()
+ - ALSA: hda/via: Add minimum mute flag
+ - ACPI: scan: Make acpi_bus_get_device() clear return pointer on error
+ - mmc: sdhci-xenon: fix 1.8v regulator stabilization
+ - dm: avoid filesystem lookup in dm_get_dev_t()
+ - drm/atomic: put state on error path
+ - ASoC: Intel: haswell: Add missing pm_ops
+ - scsi: ufs: Correct the LUN used in eh_device_reset_handler() callback
+ - xen: Fix event channel callback via INTX/GSI
+ - drm/nouveau/bios: fix issue shadowing expansion ROMs
+ - drm/nouveau/privring: ack interrupts the same way as RM
+ - drm/nouveau/i2c/gm200: increase width of aux semaphore owner fields
+ - i2c: octeon: check correct size of maximum RECV_LEN packet
+ - can: dev: can_restart: fix use after free bug
+ - can: vxcan: vxcan_xmit: fix use after free bug
+ - iio: ad5504: Fix setting power-down state
+ - irqchip/mips-cpu: Set IPI domain parent chip
+ - intel_th: pci: Add Alder Lake-P support
+ - stm class: Fix module init return on allocation failure
+ - ehci: fix EHCI host controller initialization sequence
+ - USB: ehci: fix an interrupt calltrace error
+ - usb: udc: core: Use lock when write to soft_connect
+ - usb: bdc: Make bdc pci driver depend on BROKEN
+ - [Config] updateconfigs for USB_BDC_PCI
+ - xhci: make sure TRB is fully written before giving it to the controller
+ - xhci: tegra: Delay for disabling LFPS detector
+ - compiler.h: Raise minimum version of GCC to 5.1 for arm64
+ - netfilter: rpfilter: mask ecn bits before fib lookup
+ - sh: dna: fix kconfig dependency for G2_DMA
+ - sh_eth: Fix power down vs. is_opened flag ordering
+ - skbuff: back tiny skb's with kmalloc() in __netdev_alloc_skb() too
+ - udp: mask TOS bits in udp_v4_early_demux()
+ - ipv6: create multicast route with RTPROT_KERNEL
+ - net_sched: avoid shift-out-of-bounds in tcindex_set_parms()
+ - net: dsa: b53: fix an off by one in checking "vlan->vid"
+ - gpio: mvebu: fix pwm_get_state period calculation
+ - Revert "mm/slab: fix a memory leak in sysfs_slab_add()"
+ - futex: Ensure the correct return value from futex_lock_pi()
+ - futex: Replace pointless printk in fixup_owner()
+ - futex: Provide and use pi_state_update_owner()
+ - rtmutex: Remove unused argument from rt_mutex_proxy_unlock()
+ - futex: Use pi_state_update_owner() in put_pi_state()
+ - futex: Simplify fixup_pi_state_owner()
+ - futex: Handle faults correctly for PI futexes
+ - tracing: Fix race in trace_open and buffer resize call
+ - fs: move I_DIRTY_INODE to fs.h
+ - writeback: Drop I_DIRTY_TIME_EXPIRE
+ - fs: fix laziest expiration handling in __writeback_single_inode()
+ - mmc: core: don't initialize block size from ext_csd if not present
+ - scsi: qed: Correct max length of CHAP secret
+ - riscv: Fix kernel time_init()
+ - HID: Ignore battery for Elan touchscreen on ASUS UX550
+ - clk: tegra30: Add hda clock default rates to clock driver
+ - drm/nouveau/mmu: fix vram heap sizing
+ - scsi: megaraid_sas: Fix MEGASAS_IOC_FIRMWARE regression
+ - can: peak_usb: fix use after free bugs
+ - serial: mvebu-uart: fix tx lost characters at power off
+ - driver core: Extend device_is_dependent()
+ - net_sched: reject silly cell_log in qdisc_get_rtab()
+ - tools: Factor HOSTCC, HOSTLD, HOSTAR definitions

+ * Enforce CONFIG_DRM_BOCHS=m (LP: #1916290)
+ * Please trust Canonical Livepatch Service kmod signing key (LP: #1898716)
+ * [Config] enable CONFIG_MODVERSIONS=y
+ - [Packaging] build canonical-certs.pem from branch/arch certs
+ - [Config] add Canonical Livepatch Service key to SYSTEM_TRUSTED_KEYS
+ - [Config] add ubuntu-drivers key to SYSTEM_TRUSTED_KEYS

+ - r8152: Add Lenovo Powered USB-C Travel Hub
+ - ext4: fix bug for rename with RENAME_WHITEOUT
+ - ARC: build: remove non-existing bootpImage from KBUILD_IMAGE
+ - ARC: build: add uImage.lzma to the top-level target
+ - ARC: build: add boot_targets to PHONY
+ - btrfs: fix transaction leak and crash after RO remount caused by qgroup rescan
+ - ethernet: ucc_geth: fix definition and size of ucc_geth_tx_global_pram
+ - arch/arc: add copy_user_page() to <asm/page.h> to fix build error on ARC
+ - misdn: dsp: select CONFIG_BITREVERSE
+ - net: ethernet: fs_enet: Add missing MODULE_LICENSE
+ - ACPI: scan: add stub acpi_create_platform_device() for !CONFIG_ACPI
+ - ARM: picocell: fix missing interrupt-parent properties
+ - dump_common_audit_data(): fix racy accesses to ->d_name
+ - ASoC: Intel: fix error code cnl_set_dsp_D0()
+ - NFS4: Fix use-after-free in trace_event_raw_event_nfs4_set_lock
+ - pNFS: Mark layout for return if return-on-close was not sent
+ - NFS: nfs_igrab_and_active must first reference the superblock
+ - ext4: fix superblock checksum failure when setting password salt
+ - RDMA/usnic: Fix memleak in find_free_vf_and_create_qp_grp
+ - mm, slub: consider rest of partial list if acquire_slab() fails
+ - net: sunrpc: interpret the return value of kstrtou32 correctly
+ - dm: eliminate potential source of excessive kernel log noise
+ - ALSA: firewire-tascam: Fix integer overflow in midi_port_work()
+ - ALSA: firewall: Fix integer overflow in transmit_midi_msg()
+ - netfilter: conntrack: fix reading nf_contrack_buckets
+ - usb: ohci: Make distrust_firmware param default to false
+ - nfsd4: readdirplus shouldn't return parent of export
+ - netxen_nic: fix MSI/MSI-x interrupts
+ - rndis_host: set proper input size for OID_GEN_PHYSICAL_MEDIUM request
+ - esp: avoid unneeded kmap_atomic call
+ - net: dcb: Validate netlink message in DCB handler
+ - net: dcb: Accept RTM_GETDCB messages carrying set-like DCB commands
+ - net: stmmac: Fixed mtu changed by cache aligned
+ - net: sit: unregister_netdevice on newlink's error path
+ - net: avoid 32 x truesize under-estimation for tiny skbs
+ - rxrph: Fix handling of an unsupported token type in rxrpc_read()
+ - tipc: fix NULL deref in tipc_link_xmit()
+ - spi: cadence: cache reference clock rate during probe
+ - x86/hyperv: check cpu mask after interrupt has been disabled
+ - mtd: rawnand: fs1_ifc: check result of SRAM initialization fixup
+ - kbuild: enforce -Werror=return-type
+ - crypto: x86/crc32c - fix building with clang ias
+ - rxrpc: Call state should be read with READ_ONCE() under some circumstances
+ * [ssbs-0118] backport SSBS bug (arm64: cpufeature: Detect SSBS and advertise
to userspace) (LP: #1911376)
+ - SAUCE: Move SSBS snippet from arm64_elf_hwcaps to arm64_features
+ * Bionic update: upstream stable patchset 2021-01-25 (LP: #1913214)
+ - x86/entry/64: Add instruction suffix
+ - md/raid10: initialize r10_bio->read_slot before use.
+ - ALSA: usb-audio: simplify set_sync_ep_implicit_fb_quirk
+ - ALSA: usb-audio: fix sync-ep altsetting sanity check
+ - mm: memcontrol: eliminate raw access to stat and event counters
+ - mm: memcontrol: implement lruvec stat functions on top of each other
+ - mm: memcontrol: fix excessive complexity in memory.stat reporting
+ - vfio/pci: Move dummy_resources_list init in vfio_pci_probe()
+ - powerpc/bitops: Fix possible undefined behaviour with fls() and fls64()
+ - uapi: move constants from <linux/kernel.h> to <linux/const.h>
+ - of: fix linker-section match-table corruption
+ - reiserfs: add check for an invalid ih_entry_count
+ misc: vmw_vmci: fix kernel info-leak by initializing dbells in
+ vmci_ctxt_get_chkpt_doorbells()
+ - media: gp8psk: initialize stats at power control logic
+ - ALSA: seq: Use bool for snd_seq_queue internal flags
+ - rtc: sun6i: Fix memleak in sun6i rtc_clk_init
+ - module: set MODULE_STATE_GOING state when a module fails to load
+ - quota: Don't overflow quota file offsets
+ - powerpc: sysdev: add missing iounmap() on error in mpic_msgr_probe()
+ - module: delay kobject uevent until after module init call
+ - ALSA: pcm: Clear the full allocated memory at hw_params
+ - dm verity: skip verity work if I/O error when system is shutting down
+ - kdev_t: always inline major/minor helper functions
+ - iio:imu:bm160: Fix alignment and data leak issues
+ - mwifex: Fix possible buffer overflows in mwifex_cmd_802_11_ad_hoc_start
+ - ext4: don't remount read-only with errors=continue on reboot
+ - KVM: SVM: relax conditions for allowing MSR_IA32_SPEC_CTRL accesses
+ - KVM: x86: reinstate vendor-agnostic check on SPEC_CTRL cpuid bits
+ - xen/gntdev.c: Mark pages as dirty
+ - ALSA: rawmidi: Access runtime->avail always in spinlock
+ - fcntl: Fix potential deadlock in send_sig{io, urg}()
+ - dmaengine: at_hdmac: Substitute kzalloc with kmalloc
+ - dmaengine: at_hdmac: add missing put_device() call in at_dma_xlate()
+ - dmaengine: at_hdmac: add missing kfree() call in at_dma_xlate()
+ - kbuild: don't hardcode depmod path
+ - workqueue: Kick a worker based on the actual activation of delayed works
+ - scsi: ufs-pci: Ensure UFS device is in PowerDown mode for suspend-to-disk
+ - poweroff()
+ - scsi: ide: Do not set the RQF_PREEMPT flag for sense requests
+ - lib/genalloc: fix the overflow when size is too big
+ - depmod: handle the case of /sbin/depmod without /sbin in PATH
+ - ethernet: ucc_geth: fix use-after-free in ucc_geth_remove()
+ - ethernet: ucc_geth: set dev->max_mtu to 1518
+ - atm: idt77252: call pci_disable_device() on error path
+ - qede: fix offload for IPIP tunnel packets
+ - virtio_net: Fix recursive call to cpus_read_lock()
+ - net/ncsi: Use real net-device for response handler
+ - net: ethernet: Fix memleak in ethoc_probe
+ - net-sysfs: take the rtnl lock when storing xps_cpus
+ - net: ethernet: t: cpts: fix ethtool output when no ptp_clock registered
+ - ipv4: Ignore ECN bits for fib lookups in fib_compute_spec_dst()
+ - net: hns: fix return value check in __lb_other_process()
+ - net: hd1c_ppp: Fix issues when mod_timer is called while timer is running
+ - CDC-NCM: remove "connected" log message
+ - net: usb: qmi_wwan: add Quectel EM160R-GL
+ - vhsci_net: fix ubuf refcount incorrectly when sendmsg fails
+ - net: sched: prevent invalid Scell_log shift count
+ - net-sysfs: take the rtnl lock when accessing xps_cpus_map and num_tc
- net: mvpp2: Fix GoP port 3 Networking Complex Control configurations
- net: systemport: set dev->max_mtu to UMAC_MAX_MTU_SIZE
- video: hyperv_fb: Fix the mmap() regression for v5.4.y and older
- crypto: ecdh - avoid buffer overflow in ecdh_set_secret()
- usb: gadget: enable super speed plus
- USB: cdc-acm: blacklist another IR Droid device
- usb: dwc3: ulpi: Use VStsDone to detect PHY regs access completion
- usb: chipidea: ci_hdrc_imx: add missing put_device() call in
  usbmisc_get_init_data()
- USB: xhci: fix U1/U2 handling for hardware with XHCI_INTEL_HOST quirk set
- usb: usbip: vhci_hcd: protect shift size
- usb: uas: Add PNY USB Portable SSD to unusual_uas
- USB: serial: iuu_phoenix: fix DMA from stack
- USB: serial: option: add LongSung M5710 module support
- USB: serial: option: add Quectel EM160R-GL
- USB: yurex: fix control-URB timeout handling
- USB: usbip: fix DMA to stack
- ALSA: usb-audio: Fix UBSAN warnings for MIDI jacks
- usb: gadget: select CONFIG_CRC32
- usb: gadget: f_uac2: reset wMaxPacketSize
- usb: gadget: function: printer: Fix a memory leak for interface descriptor
- USB: gadget: legacy: fix return error code in acm_ms_bind()
- usb: gadget: Fix spinlock lockup on usb_function_deactivate
- usb: gadget: configfs: Preserve function ordering after bind failure
- usb: gadget: configfs: Fix use-after-free issue with udc_name
- USB: serial: keysan_pda: remove unused variable
- x86/mm: Fix leak of pmd ptlock
- ALSA: hda/conexant: add a new hda codec CX11970
- ALSA: hda/realtek - Fix speaker volume control on Lenovo C940
- Revert "device property: Keep secondary firmware node secondary by type"
- netfilter: ipset: fix shift-out-of-bounds in htable_bits()
- netfilter: xt_RATEEST: reject non-null terminated string from userspace
- x86/mtrr: Correct the range check before performing MTRR type lookups
- KVM: x86: fix shift out of bounds reported by UBSAN
- i40e: Fix Error I40E_AQ_RC_EINVAL when removing VFs
- tun: fix return value when the number of iovs exceeds MAX_SKB_FRAGS
- USB: cdc-wdm: Fix use after free in service_outstanding_interrupt().
- USB: Gadget Ethernet: Re-enable Jumbo frames.
- usb: gadget: u_ether: Fix MTU size mismatch with RX packet size
+ -- Stefan Bader <stefan.bader@canonical.com>  Fri, 19 Feb 2021 11:28:35 +0100
+ linux (4.15.0-136.140) bionic; urgency=medium
+ * bionic/linux: 4.15.0-136.140 -proposed tracker (LP: #1913117)
+ * Packaging resync (LP: #1786013)
+ - update dkms package versions
- update dkms package versions
+
+ * Introduce the new NVIDIA 460-server series and update the 460 series
+ (LP: #1913200)
+ - [Config] dkms-versions -- drop NVIDIA 435 455 and 440-server
+ - [Config] dkms-versions -- add the 460-server nvidia driver
+
+ * switch to an autogenerated nvidia series based core via dkms-versions
+ (LP: #1912803)
+ - [Packaging] nvidia -- use dkms-versions to define versions built
+ - [Packaging] update-version-dkms -- maintain flags fields
+ - [Config] dkms-versions -- add transitional/skip information for nvidia
+ packages
+
+ * DMI entry syntax fix for Pegatron / ByteSpeed C15B (LP: #1910639)
+ - Input: i8042 - unbreak Pegatron C15B
+
+ * CVE-2020-29372
+ - mm: check that mm is still valid in madvise()
+
+ * update ENA driver, incl. new ethtool stats (LP: #1910291)
+ - net: ena: change num_queues to num_io_queues for clarity and consistency
+ - net: ena: ethtool: get_channels: use combined only
+ - net: ena: ethtool: support set_channels callback
+ - net: ena: ethtool: remove redundant non-zero check on rc
+ - net/amazon: Ensure that driver version is aligned to the linux kernel
+ - net: ena: ethtool: clean up minor indentation issue
+ - net: ena: remove code that does nothing
+ - net: ena: add unmask interrupts statistics to ethtool
+ - net: ena: cosmetic: change ena_com_stats_admin stats to u64
+ - net: ena: cosmetic: remove unnecessary code
+ - net: ena: ethtool: convert stat_offset to 64 bit resolution
+ - net: ena: ethtool: Add new device statistics
+ - net: ena: Change license into format to SPDX in all files
+ - net: ena: Change RSS related macros and variables names
+
+ * CVE-2020-29374
+ - gup: document and work around "COW can break either way" issue
+
+ * Bionic update: upstream stable patchset 2021-01-12 (LP: #1911331)
+ - spi: bcm2835aux: Fix use-after-free on unbind
+ - spi: bcm2835aux: Restore err assignment in bcm2835aux_spi_probe
+ - iwlwifi: pcie: limit memory read spin time
+ - arm64: dts: rockchip: Assign a fixed index to mmc devices on rk3399 boards.
+ - iwlwifi: mvm: fix kernel panic in case of assert during CSA
+ - ARC: stack unwinding: don't assume non-current task is sleeping
+ - scsi: ufs: Make sure clk scaling happens only when HBA is runtime ACTIVE
+ - soc: fsl: dpio: Get the cpumask through cpumask_of(cpu)
+ - platform/x86: acer-wmi: add automatic keyboard background light toggle key
+ as KEY_LIGHTS_TOGGLE
+ - Input: cm109 - do not stomp on control URB
+ - Input: i8042 - add Acer laptops to the i8042 reset list
+ - kbuild: avoid static_assert for genksyms
+ - scsi: be2iscsi: Revert "Fix a theoretical leak in beiscsi_create_eqs()"
+ - x86/mm/mem_encrypt: Fix definition of PMD_FLAGS_DEC_WP
+ - PCI: qcom: Add missing reset for ipq806x
+ - net: stmmac: free tx skb buffer in stmmac_resume()
+ - tcp: fix cwnd-limited bug for TSO deferral where we send nothing
+ - net/mlx4_en: Avoid scheduling restart task if it is already running
+ - net/mlx4_en: Handle TX error CQE
+ - net: stmmac: delete the eee_ctrl_timer after napi disabled
+ - net: stmmac: dwnm-meson8b: fix mask definition of the m250_sel mux
+ - net: bridge: vlan: fix error return code in __vlan_add()
+ - mac80211: mesh: fix mesh_pathbl_init() error path
+ - USB: dummy-hcd: Fix uninitialized array use in init()
+ - USB: add RESET_RESUME quirk for Snapscan 1212
+ - ALSA: usb-audio: Fix potential out-of-bounds shift
+ - ALSA: usb-audio: Fix control 'access overflow' errors from chmap
+ - xhci: Give USB2 ports time to enter U3 in bus suspend
+ - USB: UAS: introduce a quirk to set no_write_same
+ - USB: sisusbvga: Make console support depend on BROKEN
+ - [Config] updateconfigs for USB_SISUSBVGA_CON
+ - ALSA: pcm: oss: Fix potential out-of-bounds shift
+ - serial: 8250_omap: Avoid FIFO corruption caused by MDR1 access
+ - drm: fix drm_dp_mst_port refcount leaks in drm_dp_mst_allocate_vcp
+ - pinctrl: merrifield: Set default bias in case no particular value given
+ - pinctrl: baytrail: Avoid clearing debounce value when turning it off
+ - ARM: dts: sun8i: v3s: fix GIC node memory range
+ - gpio: mvebu: fix potential user-after-free on probe
+ - scsi: bnx2i: Requires MMU
+ - can: softing: softing_netdev_open(): fix error handling
+ - RDMA/cm: Fix an attempt to use non-valid pointer when cleaning timewait
+ - kernel/cpu: add arch override for clear_tasks_nm_cpumask() mm handling
+ - drm/tegra: sor: Disable clocks on error in tegra_sor_init()
+ - vxlan: Add needed_headroom for lower device
+ - vxlan: Copy needed_tailroom from lowerdev
+ - scsi: mpt3sas: Increase IOCInit request timeout to 30s
+ - dm table: Remove BUG_ON(in_interrupt())
+ - soc/tegra: fuse: Fix index bug in get_process_id
+ - USB: serial: option: add interface-number sanity check to flag handling
+ - USB: gadget: f_acm: add support for SuperSpeed Plus
+ - USB: gadget: f_mid: setup SuperSpeed Plus descriptors
+ - ush: gadget: f_fs: Re-use SS descriptors for SuperSpeedPlus
+ - USB: gadget: f_rndis: fix bitrate for SuperSpeed and above
+ - USB: chipidea: ci_hdrc_imx: Pass DISABLE_DEVICE_STREAMING flag to imx6ul
+ - ARM: dts: exynos: fix roles of USB 3.0 ports on Odroid XU
+ ARM: dts: exynos: fix USB 3.0 VBUS control and over-current pins on Exynos5410
+ ARM: dts: exynos: fix USB 3.0 pins supply being turned off on Odroid XU
+ HID: i2c-hid: add Vero K147 to descriptor override
+ serial_core: Check for port state when tty is in error state
+ quota: Sanity-check quota file headers on load
+ media: msi2500: assign SPI bus number dynamically
+ crypto: af_alg - avoid undefined behavior accessing salg_name
+ md: fix a warning caused by a race between concurrent md_ioctl(js)
+ Bluetooth: Fix slab-out-of-bounds read in hci_le_direct_adv_report_evt()
+ drm/gma500: fix double free of gma_connector
+ soc: renesas: mobile-sysc: Fix some leaks in rmobile_init_pm_domains()
+ soc: mediatek: Check if power domains can be powered on at boot time
+ RDMA/bnxr_re: Set queue pair state when being queried
+ selinux: fix error initialization in inode_doinit_with_dentry()
+ RDMA/rxe: Compute PSN windows correctly
+ x86/mm/ident_map: Check for errors from ident_pud_init()
+ ARM: p2v: fix handling of LPAE translation in BE mode
+ sched/deadline: Fix sched_dl_global_validate()
+ sched: Reenable interrupts in do_sched_yield()
+ crypto: talitos - Fix return type of current_desc_hdr()
+ spi: img-spfi: fix reference leak in img_spfi_resume
+ ASoC: pcm: DRAIN support reactivation
+ selinux: fix inode_doinit_with_dentry() LABEL_INVALID error handling
+ arm64: dts: exynos: Correct psci compatible used on Exynos7
+ Bluetooth: Fix null pointer dereference in hci_event_packet()
+ spi: spi-tspi: fix reference leak in ti_tspi_setup
+ spi: tegra20-slink: fix reference leak in slink ops of tegra20
+ spi: tegra20-sflash: fix reference leak in tegra_sflash_resume
+ spi: tegra114: fix reference leak in tegra spi ops
+ mwifiex: fix mwifiex_shutdown_sw() causing sw reset failure
+ ASoC: wm8998: Fix PM disable depth imbalance on error
+ ASoC: arizona: Fix a wrong free in wm8997_probe
+ RDMA/mthca: Work around -Wenum-conversion warning
+ MIPS: BCM47XX: fix kconfig dependency bug for BCM47XX_BCMA
+ staging: greybus: codecs: Fix reference counter leak in error handling
+ media: mtk-vcodec: add missing put_device() call in mtk_vcodec_release_dec_pm()
+ scsi: core: Fix VPD LUN ID designator priorities
+ media: solo6x10: fix missing snd_card_free in error handling case
+ drm/omap: dmm_tiler: fix return error code in omap_dmm_probe()
+ Input: ads7846 - fix race that causes missing releases
+ Input: ads7846 - fix integer overflow on Rt calculation
+ Input: ads7846 - fix unaligned access on 7845
+ powerpc/feature: Fix CPU_FTRS_ALWAYS by removing CPU_FTRS_GENERIC_32
+ crypto: omap-aes - Fix PM disable depth imbalance in omap_aes_probe
+ soc: ti: knav_qmss: fix reference leak in knav_queue_probe
+ soc: ti: Fix reference imbalance in knav_dma_probe
+ - drivers: soc: ti: knav_qmss_queue: Fix error return code in knav_queue_probe
+ - Input: omap4-keypad - fix runtime PM error handling
+ - RDMA/cxgb4: Validate the number of CQEs
+ - memstick: fix a double-free bug in memstick_check
+ - ARM: dts: at91: sama5d4_xplained: add pincontrol for USB Host
+ - ARM: dts: at91: sama5d3_xplained: add pincontrol for USB Host
+ - orinoco: Move context allocation after processing the skb
+ - cw1200: fix missing destroy_workqueue() on error in cw1200_init_common
+ - media: siano: fix memory leak of debugfs members in smsdvb_hotplug
+ - samples: bpf: Fix lwt_len_hist reusing previous BPF map
+ - mips: cdmm: fix use-after-free in mips_cdmm_bus_discover
+ - media: max2175: fix max2175_set_cmos_mode() error code
+ - HSI: omap_ssi: Don't jump to free ID in ssi_add_controller()
+ - ARM: dts: Remove non-existent i2c1 from 98dx3236
+ - power: supply: bq24190_charger: fix reference leak
+ - genirq/irqdomain: Don't try to free an interrupt that has no mapping
+ - PCI: iopro: Fix out-of-bound array accesses
+ - ARM: dts: at91: at91sam9r1: fix ADC triggers
+ - ath10k: Fix an error handling path
+ - ath10k: Release some resources in an error handling path
+ - NFSv4.2: condition READDIR’s mask for security label based on LSM state
+ - SUNRPC: xprt_load_transport() needs to support the netid "rdma6"
+ - lockd: don’t use interval-based rebinding over TCP
+ - NFS: switch nfsiod to be an UNBOUND workqueue.
+ - vfio-pci: Use io_remap_pfn_range() for PCI IO memory
+ - media: saa7146: fix array overflow in videoc_s_audio()
+ - clocksource/drivers/cadence_ttc: Fix memory leak in ttc_setup_clockevent()
+ - ARM: dts: at91: sama5d2: map securam as device
+ - pinctrl: falcon: add missing put_device() call in pinctrl_falcon_probe()
+ - arm64: dts: rockchip: Fix UART pull-ups on rk3328
+ - memstick: r592: Fix error return in r592_probe()
+ - net/mlx5: Properly convey driver version to firmware
+ - ASoC: jz4740-i2s: add missed checks for clk_get()
+ - dm ioct1: fix error return code in target_message
+ - clocksource/drivers/arm_arch_timer: Correct fault programming
+ - CNTKCTL_EL1.EVENT
+ - cpufreq: highbank: Add missing MODULE_DEVICE_TABLE
+ - cpufreq: mediatek: Add missing MODULE_DEVICE_TABLE
+ - cpufreq: st: Add missing MODULE_DEVICE_TABLE
+ - cpufreq: loongson1: Add missing MODULE_ALIAS
+ - cpufreq: scpi: Add missing MODULE_ALIAS
+ - scsi: qedi: Fix missing destroy_workqueue() on error in __qedi_probe
+ - scsi: pm80xx: Fix error return in pm8001_pci_probe()
+ - seq_buf: Avoid type mismatch for seq_buf_init
+ - scsi: fnic: Fix error return code in fnic_probe()
+ - powerpc/pseries/hibernation: drop pseries_suspend_begin() from suspend ops
+ - powerpc/pseries/hibernation: remove redundant cacheinfo update
+ - usb: ehci-omap: Fix PM disable depth unbalance in ehci_hcd_omap_probe
+ - usb: oxu210hp-hcd: Fix memory leak in oxu_create
+ - speakup: fix uninitialized flush_lock
+ - nfsd: Fix message level for normal termination
+ - nfs_common: need lock during Iterate through the list
+ - x86/kprobes: Restore BTF if the single-stepping is cancelled
+ - clk: tegra: Fix duplicated SE clock entry
+ - extcon: max77693: Fix modalias string
+ - ASoC: wm_adsp: remove "ctl" from list on error in wm_adsp_create_control()
+ - irqchip/alpine-msi: Fix freeing of interrupts on allocation error path
+ - watchdog: sirfsoc: Add missing dependency on HAS_IOMEM
+ - um: chan_xterm: Fix fd leak
+ - nfc: s3fwrn5: Release the nfc firmware
+ - powerpc/ps3: use dma_mapping_error()
+ - checkpatch: fix unescaped left brace
+ - net: bcmgenet: Fix a resource leak in an error handling path in the probe
+  function
+ - net: allwinner: Fix some resources leak in the error handling path of the
  probe and in the remove function
+ - net: korina: fix return value
+ - watchdog: qcom: Avoid context switch in restart handler
+ - watchdog: coh901327: add COMMON_CLK dependency
+ - clk: ti: Fix memleak in ti_fapll_synth_setup
+ - pwm: zx: Add missing cleanup in error path
+ - pwm: lp3943: Dynamically allocate PWM chip base
+ - perf record: Fix memory leak when using ' --user-reg = ? ' to list registers
+ - qlcnic: Fix error code in probe
+ - clk: s2mps11: Fix a resource leak in error handling paths in the probe
  function
+ - clk: sunxi-ng: Make sure divider tables have sentinel
+ - cfg80211: initialize rekey_data
+ - fix namespaced fscaps when ' CONFIG_SECURITY
+ - Input: cros_ec_keyb - send 'scancodes' in addition to key events
+ - Input: goodix - add upside-down quirk for Teclast X98 Pro tablet
+ - media: gspca: Fix memory leak in probe
+ - media: sunxi-cir: ensure IR is handled when it is continuous
+ - media: netup_unidvb: Don't leak SPI master in probe error path
+ - Input: cyapa_gen6 - fix out-of-bounds stack access
+ - PM: ACPI: PCI: Drop acpi_pm_set_bridge_wakeup()
+ - Revert "ACPI / resources: Use AE_CTRL_TERMINATE to terminate resources
  walks"
+ - ACPI: PNP: compare the string length in the matching_id()
+ - ALSA: hda/realtek - Enable headset mic of ASUS Q524UQK with ALC255
+ - ALSA: pcm: oss: Fix a few more UBSAN fixes
+ - ALSA: usb-audio: Disable sample read check if firmware doesn't give back
+ - s390/smp: perform initial CPU reset also for SMT siblings
+ - s390/dasd: prevent inconsistent LCU device data
+ - s390/dasd: fix list corruption of pavgp group list
+ - s390/dasd: fix list corruption of lcu list
+ staging: comedi: mf6x4: Fix AI end-of-conversion detection
+ powerpc/perf: Exclude kernel samples while counting events in user space.
+ crypto: ecdh - avoid unaligned accesses in ecdh_set_secret()
+ EDAC/amd64: Fix PCI component registration
+ USB: serial: mos7720: fix parallel-port state restore
+ USB: serial: keysan_pda: fix dropped unthrottle interrupts
+ USB: serial: keysan_pda: fix write deadlock
+ USB: serial: keysan_pda: fix stalled writes
+ USB: serial: keysan_pda: fix write-wakeup use-after-free
+ USB: serial: keysan_pda: fix tx-unthrottle use-after-free
+ USB: serial: keysan_pda: fix write unthrottling
+ ext4: fix a memory leak of ext4_free_data
+ ext4: fix deadlock with fs freezing and EA inodes
+ KVM: arm64: Introduce handling of AArch32 TTBCR2 traps
+ ARM: dts: at91: sama5d2: fix CAN message ram offset and size
+ powerpc/rtas: Fix typo of ibm.open-errinjct in RTAS filter
+ powerpc/xmon: Change printk() to pr_cont()
+ powerpc/powervm/memtrace: Don't leak kernel memory to user space
+ ima: Don't modify file descriptor mode on the fly
+ ceph: fix race in concurrent __ceph_remove_cap invocations
+ jffs2: Fix GC exit abnormally
+ jfs: Fix array index bounds check in dbAdjTree
+ drm/dp_aux_dev: check aux_dev before use in drm_dp_aux_dev_get_by_minor()
+ spi: spi-sdh: Fix use-after-free on unbind
+ spi: davinci: Fix use-after-free on unbind
+ spi: pic32: Don't leak DMA channels in probe error path
+ spi: rb4xx: Don't leak SPI master in probe error path
+ spi: sc18is602: Don't leak SPI master in probe error path
+ spi: st-ssc4: Fix unbalanced pm_runtime_disable() in probe error path

- bnxt_en: fix error return code in bnxt_init_board()
- video: hyperv_fb: Fix the cache type when mapping the VRAM
- bnxt_en: Release PCI regions when DMA mask setup fails during probe.
- IB/mthca: fix return value of error branch in mthca_init_cq()
- nfc: s3fwrn5: use signed integer for parsing GPIO numbers
- net: ena: set initial DMA width to avoid intel iommu issue
- ibmvnic: fix NULL pointer dereference in reset_sub_cq_queues
- ibmvnic: fix NULL pointer dereference in ibmvic_reset_cq
- efivarfs: revert "fix memory leak in efivarfs_create()"
- can: gs_usb: fix endianess problem with candleLight firmware
- platform/x86: toshiba_acpi: Fix the wrong variable assignment
- can: m_can: fix nominal bitiming tseg2 min for version >= 3.1
- perf probe: Fix to die_entrypc() returns error correctly
- USB: core: Change %pK for __user pointers to %px
- usb: gadget: f_midi: Fix memleak in f_midi_alloc
- usb: gadget: Fix memleak in gadgetfs_fill_super
- x86/speculation: Fix prctl() when spectre_v2_user={seccomp,prctl},ibpb
- x86/resctrl: Remove superfluous kernfs_get() calls to prevent refcount leak
- x86/resctrl: Add necessary kernfs_put() calls to prevent refcount leak
- USB: core: Fix regression in Hercules audio card
- btrfs: don't access possibly stale fs_info data for printing duplicate device
- KVM: x86: Fix split-irqchip vs interrupt injection window request
- HID: add support for Sega Saturn
- cxgb4: fix the panic caused by non smac rewrite
- s390/qeth: fix tear down of async TX buffers
- platform/x86: thinkpad_acpi: Send tablet mode switch at wakeup time
- USB: quirks: Add USB_QUIRK_DISCONNECT_SUSPEND quirk for Lenovo A630Z TIO
- built-in usb-audio card
- net/af_iucv: set correct sk_protocol for child sockets
- rose: Fix Null pointer dereference in rose_send_frame()
- sock: set sk_err to ee_errno on dequeue from errq
- tcp: Set INET_ECN_xmit configuration in tcp_reinit_congestion_control
- tun: honor IIOC_NOWAIT flag
- usbneth: ipheth: fix connectivity with iOS 14
- bonding: wait for sysfs kobject destruction before freeing struct slave
- netfilter: bridge: reset skb->pkt_type after NF_INET_POST_ROUTING traversal
- ipv4: Fix tos mask in inet_rtm_getroute()
- ibmvnic: Fix TX completion error handling
- net/x25: prevent a couple of overflows
- cxgb3: fix error return code in t3_sge_alloc_qset()
- net: pasemi: fix error return code in pasemi_mac_open()
- net/mlx5: Fix wrong address reclaim when command interface is down
- dt-bindings: net: correct interrupt flags in examples
- ALSA: usb-audio: US16x08: fix value count for level meters
- Input: xpad - support Ardwiino Controllers
- RDMA/i40iw: Address an mmap handler exploit in i40iw
- ipv6: addrlabel: fix possible memory leak in ip6addrLbl_net_init
- ibmvnic: fix call_netdevice_notifiers in do_reset
- i40e: Fix removing driver while bare-metal VFs pass traffic
- geneve: pull IP header before ECN decapsulation
- pinctrl: baytrail: Replace WARN with dev_info_once when setting direct-irq
- pin to output
- pinctrl: baytrail: Fix pin being driven low for a while on gpiod_get(....
- VTIO_OUT_HIGH)
- vlan: consolidate VLAN parsing code and limit max parsing depth
- usb: gadget: f_fs: Use local copy of descriptors for userspace copy
- USB: serial: klsusb105: fix memleak on open
- USB: serial: ch341: add new Product ID for CH341A
- USB: serial: ch341: sort device-id entries
- USB: serial: option: add Fibocom NL668 variants
- USB: serial: option: add support for Thales Cinterion EXS82
- USB: serial: option: fix Quectel BG96 matching
- tty: Fix ->pgrp locking in tiocspgrp()
- tty: Fix ->session locking
- ALSA: hda/realtek - Add new codec supported for ALC897
- ALSA: hda/generic: Add option to enforce preferred_dacs pairs
- iftrace: Fix updating FTRACE_FL_TRAMP
- cifs: fix potential use-after-free in cifs_echo_request()
- mm/swapfile: do not sleep with a spin lock held
- i2c: imx: Fix reset of I2SR_IAL flag
- i2c: imx: Check for I2SR_IAL after every byte
- speakup: Reject setting the speakup line discipline outside of speakup
+ - iommu/amd: Set DTE[IntTabLen] to represent 512 IRTEs
+ - spi: Introduce device-managed SPI controller allocation
+ - spi: bcm-qspi: Fix use-after-free on unbind
+ - spi: bcm2835: Fix use-after-free on unbind
+ - spi: bcm2835: Release the DMA channel if probe fails after dma_init
+ - tracing: Fix userstacktrace option for instances
+ - gfs2: check for empty rgrp tree in gfs2_ri_update
+ - i2c: qup: Fix error return code in qup_i2c_bam_schedule_desc()
+ - Input: i8042 - fix error return code in i8042_setup_aux()
+ - x86/uprobes: Do not use prefixes.nbytes when looping over prefixes.bytes
+ - ALSA: hda/realtek: Add mute LED quirk to yet another HP x360 model
+ - x86/insn-eval: Use new for_each_insn_prefix() macro to loop over prefixes
+ bytes
+ - Revert "geneve: pull IP header before ECN decapsulation"

+ + * s390: dbginfo.sh triggers kernel panic, reading from
+ + /sys/kernel/mm/page_idle/bitmap (LP: #1904884)
+ + - mm/page_idle.c: skip offline pages
+
+ + * Bionic update: upstream stable patchset 2020-11-23 (LP: #1905333)
+ + - drm/i915: Break up error capture compression loops with cond_resched()
+ + - tipc: fix use-after-free in tipc_bcast_get_mode
+ + - gianfar: Replace skb_realloc_headroom with skb_cow_head for PTP
+ + - gianfar: Account for Tx PTP timestamp in the skb headroom
+ + - net: usb: qmi_wwan: add Telit LE910Cx 0x1230 composition
+ + - scpt: Fix COMM_LOST/CANT_STR_ASSOC err reporting on big-endian platforms
+ + - sfp: Fix error handing in sfp_probe()
+ + - Blktrace: bail out early if block debugfs is not configured
+ + - i40e: Fix of memory leak and integer truncation in i40e_virtnl.c
+ + - Fonts: Replace discarded const qualifier
+ + - ALSA: usb-audio: Add implicit feedback quirk for Qu-16
+ + - lib/crc32test: remove extra local_irq_disable/enable
+ + - kthread_worker: prevent queuing delayed work from timer_fn when it is being
canceled
+ - mm: always have io_remap_pfn_range() set pgprot_decrypted()
+ - gfs2: Wake up when sd_glock_disposal becomes zero
+ - ftrace: Fix recursion check for NMI test
+ - ftrace: Handle tracing when switching between context
+ - tracing: Fix out of bounds write in get_trace_buf
+ - ftrace: Handle transient "ownerless" rmutex state correctly
+ - ARM: dts: sun4i-a10: fix cpu_alert temperature
+ - x86/kexec: Use up-to-dated screen_info copy to fill boot params
+ - of: Fix reserved-memory overlap detection
+ - blk-cgroup: Fix memleak on error path
+ - blk-cgroup: Pre-allocate tree node on blkg_conf_prep
+ - scsi: core: Don't start concurrent async scan on same host
+ - vsoc: use ns_capable_noaudit() on socket create
+ - dm/kv4: drv: Add error handing for bind
+ - ACPI: NFIT: Fix comparison to 'ENXIO'
+ - vt: Disable KD_FONT_OP_COPY
+ - fork: fix copy_process(CLONE_PARENT) race with the exiting ->real_parent
+ - serial: 8250_mtk: Fix uart_get_baud_rate warning
+ - serial: txx9: add missing platform_driver_unregister() on error in
+ serial_txx9_init
+ - USB: serial: cyberjack: fix write-URB completion race
+ - USB: serial: option: add Quectel EC200T module support
+ - USB: serial: option: add LE910Cx compositions 0x1203, 0x1230, 0x1231
+ - USB: serial: option: add Telit FN980 composition 0x1055
+ - USB: Add NO_LPM quirk for Kingston flash drive
+ - usb: mtu3: fix panic in mtu3_gadget_stop()
+ - ARC: stack unwinding: avoid indefinite looping
+ - Revert "ARC: entry: fix potential EFA clobber when TIF_SYSCALL_TRACE"
+ - PM: runtime: Resume the device earlier in __device_release_driver()
+ - btrfs: extent_io: add proper error handling to lock_extent_buffer_for_iot()
+ - Btrfs: fix unwritten extent buffers and hangs on future writeback attempts
+ - Btrfs: tree-checker: fix the error message for transid error
+ - mm: mempolicy: fix potential pte_unmap_unlock pte error
+ - tools: perf: Fix build error in v4.19.y
+ - net: dsa: read mac address from DT for slave device
+ - arm64: dts: marvell: espressobin: Add ethernet switch aliases
+ + * Bionic update: upstream stable patchset 2020-11-23 (LP: #1905333) //
+ + CVE-2019-19770 which shows this issue is not a core debugfs issue, but
+ + blktrace: fix debugfs use after free
+ + * Bionic update: upstream stable patchset 2020-11-18 (LP: #1904791)
+ + scripts/setlocalversion: make git describe output more reliable
+ + arm64: link with -z norelo regardless of CONFIG_RELOCATABLE
+ + gtp: fix an use-before-init in gtp_newlink()
+ + ravb: Fix bit fields checking in ravb_hwtstamp_get()
+ + tipc: fix memory leak caused by tipc_buf_append()
+ + arch/x86/amd/ibs: Fix re-arming IBS Fetch
+ - x86/xen: disable Firmware First mode for correctable memory errors
+ - p54: avoid accessing the data mapped to streaming DMA
+ - mtd: lpddr: Fix bad logic in print_drs_error
+ - ata: sata_rcar: Fix DMA boundary mask
+ - fuse: fix page dereference after free
+ - fs: futex: fix page dereference after free
+ - mtx: avoid accessing the data mapped to streaming DMA
+ - powerpc/powerpc: Fix spurious DBG() warning
+ - arch: select ARCH_WANT_IRQS_OFF_ACTIVATE_MM
+ - sparc64: remove mm_cpumask clearing to fix kthread_use_mm race
+ - f2fs: add trace exit in exception path
+ - f2fs: fix to check segment boundary during SIT page readahead
+ - ufi: change sigio_spinlock to a mutex
+ - ARM: 8997/2: hw_breakpoint: Handle inexact watchpoint addresses
+ - xfs: fix realtime bitmap/summary file truncation when growing rt volume
+ - video: fbdev: pvr2fb: initialize variables
+ - ath10k: start recovery process when payload length exceeds max htc length
+ - for sdi
+ - ath10k: fix VHT NSS calculation when STBC is enabled
+ - drm/bridge/megachips: Add checking if ge_b850v3_lvds_init() is working correctly
+ - media: videodev2.h: RGB BT2020 and HSV are always full range
+ - media: platform: Improve queue set up flow for bug fixing
+ - usb: typec: tcpm: During PR_SWAP, source caps should be sent only after tSwapSourceStart
+ - media: tw5864: check status of tw5864_frameinterval_get
+ - mmc: via-sdmmc: Fix data race bug
+ - drm/bridge/synopsys: dsi: add support for non-continuous HS clock
+ - printk: reduce LOG_BUF_SHIFT range for H8300
+ - kgd: Make "kgdbcon" work properly with "kgdb_earlycon"
+ - cpufreq: sti-cpufreq: add stih418 support
+ - USB: adutux: fix debugging
+ - uio: free uio id after uio file node is freed
+ - arm64/mm: return cpu_all_mask when node is NUMA_NO_NODE
+ - ACPI: Add out of bounds and numa_off protections to pxm_to_node()
+ - drivers/net/wan/hdlc_fr: Correctly handle special skb->protocol values
+ - bnxr: not wan/hdlc_fr: Do not rely on caller to provide non NULL mc_io
+ - power: supply: test_power: add missing newlines when printing parameters by sysfs
+ - md/bitmap: md_bitmap_get_counter returns wrong blocks
+ - bnxr: Log unknown link speed appropriately.
+ - clk: ti: clockdomain: fix static checker warning
+ - net: 9p: initialize sun_server.sun_path to have addr's value only when addr is valid
+ - drivers: watchdog: rdc321x_wdt: Fix race condition bugs
+ - ext4: Detect already used quota file early
+ - gfs2: add validation checks for size of superblock
+ - arm64: dts: renesas: ulcb: add full-pwr-cycle-in-suspend into eMMC nodes
+ - memory: emif: Remove bogus debugfs error handling
+ - ARM: dts: s5pv210: remove DMA controller bus node name to fix dtschema
+  warnings
+ - ARM: dts: s5pv210: move PMU node out of clock controller
+ - ARM: dts: s5pv210: remove dedicated 'audio-subsystem' node
+ - nbd: make the config put is called before the notifying the waiter
+ - sgl_alloc_order: fix memory leak
+ - nvme-rdma: fix crash when connect rejected
+ - md/raid5: fix oops during stripe resizing
+ - perf/x86/amd/ibs: Don't include randomized bits in get_ibst_op_count()
+ - perf/x86/amd/ibs: Fix raw sample data accumulation
+ - leds: bcm6328, bcm6358: use devres LED registering function
+ - fs: Don't invalidate page buffers in block_write_full_page()
+ - NFS: fix nfs_path in case of a rename retry
+ - ACPI / extlog: Check for RDMSR failure
+ - ACPI: debug: don't allow debugging when ACPI is disabled
+ - acpi-cpufreq: Honor _PSD table setting on new AMD CPUs
+ - w1: mxc_w1: Fix timeout resolution problem leading to bus error
+ - scsi: mptfusion: Fix null pointer dereferences in mptscsih_remove()
+ - btrfs: reschedule if necessary when logging directory items
+ - btrfs: send, recompute reference path after orphanization of a directory
+ - btrfs: use kvzalloc() to allocate clone_roots in btrfs_ioctl_send()
+ - btrfs: cleanup cow block on error
+ - btrfs: fix use-after-free on readahead extent after failure to create it
+ - usb: dwc3: ep0: Fix ZLP for OUT ep0 requests
+ - usb: dwc3: core: add phy cleanup for probe error handling
+ - usb: dwc3: core: don't trigger runtime pm when remove driver
+ - usb: cdc-acm: fix cooldown mechanism
+ - usb: host: fsl-mp-frac: check return of dma_set_mask()
+ - drm/v915: Force VT'd workarounds when running as a guest OS
+ - vt: keyboard, simplify vt_kdgkbsent
+ - vt: keyboard, extend func_buf_lock to readers
+ - dmaengine: dma-jz4780: Fix race in jz4780_dma_tx_status
+ - iio:adc:ti-adc0832 Fix alignment issue with timestamp
+ - iio:adc:ti-adc12138 Fix alignment issue with timestamp
+ - s390/stp: add locking to sysfs functions
+ - [Config] update config for PPC_RTAS_FILTER
+ - powerpc/rtas: Restrict RTAS requests from userspace
+ - powerpc: Warn about use of smt_snooze_delay
+ - powerpc/powern/elog: Fix race while processing OPAL error log event.
+ - NFSv4.2: support EXCHGID4_FLAG_SUPP_FENCE_OPS 4.2 EXCHANGE_ID flag
+ - NFSD: Add missing NFSv2 .pc_func methods
+ - ubifs: dent: Fix some potential memory leaks while iterating entries
+ - perf python scripting: Fix printable strings in python3 scripts
+ - ubi: check kthread_should_stop() after the setting of task state
+ - ia64: fix build error with !COREDUMP
+ - drm/amdgp: don't map BO in reserved region
+ - ceph: promote to unsigned long long before shifting
+ - libceph: clear con->out_msg on Policy::stateful_server faults
+ - 9P: Cast toloff_t before multiplying
+ - ring-buffer: Return 0 on success from ring_buffer_resize()
+ - vringh: fix __vringh_iov() when riow and wiow are different
+ - ext4: fix leaking sysfs kobject after failed mount
+ - ext4: fix error handling code in add_new_gdb
+ - ext4: fix invalid inode checksum
+ - drm/ttm: fix evicton valuable range check.
+ - rtc: rx8010: don't modify the global rtc ops
+ - tty: make FONTX ioctl use the tty pointer they were actually passed
+ - arm64: berlin: Select DW_APB_TIMER_OF
+ - [Config] update annotations for DW_APB_TIMER_OF
+ - cachefiles: Handle readpage error correctly
+ - hil/parisc: Disable HIL driver when it gets stuck
+ - arm: dts: mt7623: add missing pause for switchport
+ - ARM: samsung: fix PM debug build with DEBUG_LL but !MMU
+ - ARM: s3c24xx: fix missing system reset
+ - device property: Keep secondary firmware node secondary by type
+ - device property: Don't clear secondary pointer for shared primary firmware node
+ - KVM: arm64: Fix AArch32 handling of DBGD{CCINT,SCRext} and DBGVCR
+ - staging: comedi: cb_pcidas: Allow 2-channel commands for AO subdevice
+ - staging: octeon: repair "fixed-link" support
+ - staging: octeon: Drop on uncorrectable alignment or FCS error
+ - objtool: Support Clang non-section symbols in ORC generation
+ - arm64: Run ARCH_WORKAROUND_1 enabling code on all CPUs
+ - x86/PCI: Fix intel_mid_pci.c build error when ACPI is not enabled
+ - cxgb4: set up filter action after rewrites
+ - cxl: Rework error message for incompatible slots
+ - serial: pl011: Fix lockdep splat when handling magic-sysrq interrupt
+ - fscrypt: only set dentry_operations on ciphertext dentries
+ - xen/events: don't use chip_data for legacy IRQs
+ - xen/events: avoid removing an event channel while handling it
+ - xen/events: add a proper barrier to 2-level uevent unmasking
+ - xen/events: fix race in evtchn_fifo_unmask()
+ - xen/events: add a new "late EOI" evtchn framework
+ - xen/blkback: use lateeoi irq binding
+ - xen/netback: use lateeoi irq binding
+ - xen/scsiback: use lateeoi irq binding
+ - xen/pvcallsback: use lateeoi irq binding
+ - xen/pccallback: use lateeoi irq binding
+ - xen/events: switch user event channels to lateeoi model
+ - xen/events: use a common cpu hotplug hook for event channels
+ - xen/events: defer eoi in case of excessive number of events
+ - xen/events: block rogue events for some time
+ - RDMA/qedr: Fix memory leak in iWARP CM
+ - [Config] update config for ARCH_WANT_IRQS_OFF_ACTIVATE_MM
+ - mm: fix exec activate_mm vs TLB shootdown and lazy tlb switching race
+ - f2fs: fix uninit-value in f2fs_lookup
+ - power: supply: bq27xxx: report "not charging" on all types
+ - media: imx274: fix frame interval handling
+ - arm64: topology: Stop using MPIR for topology information
+ - ia64: kprobes: Use generic kretprobe trampoline handler
+ - media: uvcvideo: Fix dereference of out-of-bound list iterator
+ - riscv: Define AT_VECTOR_SIZE_ARCH for ARCH_DLINFO
+ - usb: xhci: omit duplicate actions when suspending a runtime suspended host.
+ - drm/amd/display: HDMI remote sink need mode validation for Linux
+ - btrfs: fix replace of seed device
+ - rpmmsg: glink: Use complete_all for open states
+ - cifs: handle -EINTR in cifs_setattr
+ - ACPI: button: fix handling lid state changes when input device closed
+ - scsi: qla2xxx: Fix crash on session cleanup with unload
+ - btrfs: improve device scanning messages
+ - usb: xhci: Workaround for S3 issue on AMD SNPS 3.0 xHC
+ - usb: typec: tcpm: reset hard_reset_count for any disconnect
+ - powerpc: Fix undetected data corruption with P9N DD2.1 VSX CI load emulation
+ - drm/amd/display: Don't invoke gdb_breakpoint() unconditionally

+ * [HP 635] Radeon 6310 brightness control does not work (LP: #1894667) //
Bionic update: upstream stable patchset 2020-11-18 (LP: #1904791)
+ - ACPI: video: use ACPI backlight for HP 635 Notebook
+
+ * Bionic update: upstream stable patchset 2020-11-17 (LP: #1904613)
+ - RDMA/cma: Remove dead code for kernel rdmacm multicast
+ - RDMA/hns: Fix missing sq_sig_type when querying QP
+ - rpmmsg: smd: Fix a kobj leak in in qcom_smd_parse_edge()
+ - pwm: img: Fix null pointer access in probe
+ - watchdog: Fix memleak in watchdog_cdev_register
+ - watchdog: Use put_device on error
+ - SUNRPC: fix copying of multiple pages in gss_read_proxy_verf()
+ - netfilter: conntrack: connection timeout after re-register
+ - netfilter: nf_fwd_netdev: clear timestamp in forwarding path
+ - ARM: dts: imx6sl: fix rng node
+ - ARM: dts: sun8i: r40: bananapi-m2-ultra: Fix dcdc1 regulator
+ - memory: omap-gpmc: Fix build error without CONFIG_OF
+ - arm64: dts: qcom: pm8916: Remove invalid reg size from wcd_codec
+ - ip_gre: set dev->hard_header_len and dev->needed_headroom properly
+ - usb: dwc3: simple: add support for Hikey 970
+
+ * Bionic: btrfs: kernel BUG at /build/linux-
+ eTBZpZ/linux-4.15.0/fs/btrfs/ctree.c:3233! (LP: #1902254)
+ btrfs: tree-checker: fix incorrect printk format
+ Bionic update: upstream stable patchset 2020-11-10 (LP: #1903768)
+ Bluetooth: fix kernel oops in store_pending_adv_report
+ Bluetooth: Consolidate encryption handling in hci_encrypt_cfm
+ Bluetooth: Fix update of connection state in `hci_encrypt_cfm`
+ Bluetooth: Disconnect if E0 is used for Level 4
+ media: usbtv: Fix reftcounting mixup
+ USB: serial: option: add Cellient MPL200 card
+ USB: serial: option: Add Telit FT980-KS composition
+ staging: comedi: check validity of wMaxPacketSize of usb endpoints found
+ USB: serial: pl2303: add device-id for HP GC device
+ USB: serial: ftdi_sio: add support for FreeCalypso JTAG+UART adapters
+ reiserfs: Initialize inode keys properly
+ reiserfs: Fix oops during mount
+ drivers/net/ethernet/marvell/mvmdio.c: Fix non OF case
+ crypto: bcm - Verify GCM/CCM key length in setkey
+ crypto: qat - check cipher length for aead AES-CBC-HMAC-SHA

+ - media: venus: core: Fix runtime PM imbalance in venus_probe
+ - ntfs: add check for mft record size in superblock
+ - mac80211: handle lack of sband->bitrates in rates
+ - PM: hibernate: remove the bogus call to get_gendisk() in software_resume()
+ - scsi: mvumi: Fix error return in mvumi_io_attach()
+ - scsi: target: core: Add CONTROL field for trace events
+ - mic: vop: copy data to kernel space then write to io memory
+ - misc: vop: add round_up(x,4) for vring_size to avoid kernel panic
+ - usb: gadget: function: printer: fix use-after-free in __lock_acquire
+ - udf: Limit sparing table size
+ - udf: Avoid accessing uninitialized data on failed inode read
+ - USB: cdc-acm: handle broken union descriptors
+ - can: flexcan: flexcan_chip_stop(): add error handling and propagate error value
+ - ath9k: hif_usb: fix race condition between usb_get_urb() and
+ usb_kill_anchored_urbs()
+ - misc: rtsx: Fix memory leak in rtsx_pci_probe
+ - reiserfs: only call unlock_new_inode() if I_NEW
+ - xfs: make sure the rt allocator doesn't run off the end
+ - usb: ohci: Default to per-port over-current protection
+ - Bluetooth: Only mark socket zapped after unlocking
+ - scsi: ibmvfc: Fix error return in ibmvfc_probe()
+ - brcmsmac: fix memory leak in wlc_phy_attach_lchnphy
+ - rtl8xxxu: prevent potential memory leak
+ - Fix use after free in get_capset_info callback.
+ - scsi: qedi: Protect active command list to avoid list corruption
+ - scsi: qedi: Fix list_del corruption while removing active I/O
+ - tty: ipwireless: fix error handling
+ - ipvs: Fix uninit-value in do_ip_vs_set_ctl()
+ - reiserfs: Fix memory leak in reiserfs_parse_options()
+ - mwifiex: don't call del_timer_sync() on uninitialized timer
+ - brcm80211: fix possible memleak in brcmf_proto_msgbuf_attach
+ - usb: core: Solve race condition in anchor cleanup functions
+ - scsi: ufs: ufs-qcom: Fix race conditions caused by ufs_qcom_testbus_config()
+ - ath10k: check idx validity in __ath10k htt_rx_ring_fill_n()
+ - net: korina: cast KSEG0 address to pointer in kfree
+ - tty: serial: fsl_lpuart: fix lpuart32_poll_get_char
+ - usb: cdc-acm: add quirk to blacklist ETAS ES58X devices
+ - USB: cdc-wdm: Make wdm_flush() interruptible and add wdm_fsync().
+ - eeprom: at25: set minimum read/write access stride to 1
+ - powerpc/powerpc/omap: Use IRQ_HANDLED instead of numbers in interrupt handler
+ - net: fix pos incrementment in ipv6_route_seq_next
+ - ALSA: hda/realtek: Enable audio jacks of ASUS D700SA with ALC887
+ - x86/nmi: Fix nmi_handler() duration miscalculation
+ - x86/events/amd/iommu: Fix sizeof mismatch
+ - media: uvcvideo: Silence shift-out-of-bounds warning
+ - hwmon: (pmbus/max34440) Fix status register reads for MAX344{51,60,61}
+ - media: tc358743: cleanup tc358743_cec_isr
+ - pinctrl: bcm: fix kconfig dependency warning when !GPIOLIB
+ - spi: spi-s3c64xx: swap s3c64xx_spi_set_cs() and s3c64xx_enable_datapath()
+ - staging: rtl8192u: Do not use GFP_KERNEL in atomic context
+ - net: stmmac: use netif_tx_start|stop_all_queues() function
+ - scsi: target: tcmu: Fix warning: 'page' may be used uninitialized
+ - ipvs: clear skb->tstamp in forwarding path
+ - netfilter: nf_log: missing vlan offload tag and proto
+ - RDMA/ucma: Fix locking for ctx->events_reported
+ - RDMA/ucma: Add missing locking around rdma_leave_multicast()
+ - RDMA/qedr: Fix inline size returned for iWARP

* bionic/linux: 4.15.0-126.129 -proposed tracker (LP: #1905305)

* CVE-2020-4788
  - SAUCE: powerpc/64s: Define MASKABLE_RELON_EXCEPTION_PSERIES_OOL
  - SAUCE: powerpc/64s: move some exception handlers out of line
  - powerpc/64s: flush L1D on kernel entry
  - SAUCE: powerpc: Add a framework for user access tracking
  - powerpc: Implement user_access_begin and friends
  - powerpc: Fix __clear_user() with KUAP enabled
  - powerpc/uaccess: Evaluate macro arguments once, before user access is allowed
  - powerpc/64s: flush L1D after user accesses

-- Thadeu Lima de Souza Cascardo <cascardo@canonical.com>  Mon, 23 Nov 2020 15:01:09 -0300

* bionic/linux: 4.15.0-125.128 -proposed tracker (LP: #1903137)

* Update kernel packaging to support forward porting kernels (LP: #1902957)
  - [Debian] Update for leader included in BACKPORT_SUFFIX

* Avoid double newline when running insertchanges (LP: #1903293)
  - [Packaging] insertchanges: avoid double newline

* EFI: Fails when BootCurrent entry does not exist (LP: #1899993)
  - efi: Replace invalid slashes with exclamation marks in dentries.

* CVE-2020-14351
  - perf/core: Fix race in the perf_mmap_close() function
* raid10: Block discard is very slow, causing severe delays for mkfs and fstrim operations (LP: #1896578)
* md: add md_submit_discard_bio() for submitting discard bio
* md/raid10: extend r10bio devs to raid disks
* md/raid10: pull codes that wait for blocked dev into one function
* md/raid10: improve raid10 discard request
* md/raid10: improve discard request for far layout

* raid10: Block discard is very slow, causing severe delays for mkfs and fstrim operations (LP: #1896578)
* md: add md_submit_discard_bio() for submitting discard bio
* md/raid10: extend r10bio devs to raid disks
* md/raid10: pull codes that wait for blocked dev into one function
* md/raid10: improve raid10 discard request
* md/raid10: improve discard request for far layout

* raid10: Block discard is very slow, causing severe delays for mkfs and fstrim operations (LP: #1896578)
* md: add md_submit_discard_bio() for submitting discard bio
* md/raid10: extend r10bio devs to raid disks
* md/raid10: pull codes that wait for blocked dev into one function
* md/raid10: improve raid10 discard request
* md/raid10: improve discard request for far layout

* Bionic: btrfs: kernel BUG at /build/linux-eTBZpZ/linux-4.15.0/fs/btrfs/ctree.c:3233! (LP: #1902254)
* btrfs: use offset_in_page instead of open-coding it
* btrfs: use BUG() instead of BUG_ON(1)
* btrfs: drop unnecessary offset_in_page in extent buffer helpers
* btrfs: extent_io: do extra check for extent buffer read write functions
* btrfs: extent-tree: kill BUG_ON() in __btrfs_free_extent()
* btrfs: extent-tree: kill the BUG_ON() in insert_inline_extent_backref()
* btrfs: ctree: check key order before merging tree blocks

* Bionic update: upstream stable patchset 2020-11-04 (LP: #1902943)
* USB: gadget: f_ncm: Fix NDP16 datagram validation
* gpio: tc35894: fix up tc35894 interrupt configuration
* vsock/virtio: use RCU to avoid use-after-free on the_virtio_vsck
* vsock/virtio: stop workers during the .remove()
* vsock/virtio: add transport parameter to the
* virtio_transport_reset_no_sock()
* net: virtio_vsck: Enhance connection semantics
* Input: i8042 - add nopnp quirk for Acer Aspire 5 A515
* ftrace: Move RCU is watching check after recursion check
* drm/amdgpu: restore proper ref count in amdgpu_display_crtc_set_config
* drivers/net/wan/hdlc_fr: Add needed_headroom for PVC devices
* drm/sun4i: mixer: Extend regmap max_register
* net: dec: de2104x: Increase receive ring size for Tulip
* rndis_host: increase sleep time in the query-response loop
* nvme-core: get/put ctrl and transport module in nvme_dev_open/release()
* drivers/net/wan/lapbether: Make skb->protocol consistent with the header
* drivers/net/wan/hdlec: Set skb->protocol before transmitting
* mac80211: do not allow bigger VHT MPDUs than the hardware supports
* spi: fsl-espi: Only process interrupts for expected events
* nvme-fc: fail new connections to a deleted host or remote port
* pinctrl: mvebu: Fix i2c sda definition for 98DX3236
* nvs: Fix security label length not being reset
* clk: samsung: exynos4: mark 'chipid' clock as CLK_IGNORE_UNUSED
* iommu/exynos: add missing put_device() call in exynos_iommu_of_xlate()
* i2c: cpm: Fix i2c_ram structure
* Input: trackpoint - enable Synaptics trackpoints
* random32: Restore __latent_entropy attribute on net_rand_state
* epoll: do not insert into poll queues until all sanity checks are done
+ - epoll: replace ->visited/visited_list with generation count
+ - epoll: EPOLL_CTL_ADD: close the race in decision to take fast path
+ - ep_create_wakeup_source(): dentry name can change under you...
+ - netfilter: cnetlink: add a range check for l3/l4 protonum
+ - drm/syncobj: Fix drm_syncobj_handle_to_fd refcount leak
+ - fdbuf, newport_con: Move FONT_EXTRA_WORDS macros into linux/font.h
+ - Fonts: Support FONT_EXTRA_WORDS macros for built-in fonts
+ - Revert "ravb: Fixed to be able to unload modules"
+ - fbcon: Fix global-out-of-bounds read in fbcon_get_font()
+ - net: wireless: nl80211: fix out-of-bounds access in nl80211_del_key()
+ - usernodehelper: reset umask to default before executing user process
+ - platform/x86: thinkpad_acpi: initialize tp_nvrnam_state variable
+ - platform/x86: thinkpad_acpi: re-initialize ACPI buffer size when reuse
+ - driver core: Fix probe_count imbalance in really_probe()
+ - perf top: Fix stdio interface input handling with glibc 2.28+
+ - mtd: rawnand: sunxi: Fix the probe error path
+ - macsec: avoid use-after-free in macsec_handle_frame()
+ - mm/khugepaged: fix filemap page_to_pgoff(page) != offset
+ - cifs: Fix incomplete memory allocation on setxattr path
+ - i2c: meson: fix clock setting overwrite
+ - scpt: fix scpt_auth_init_hmacs() error path
+ - team: set dev->needed_headroom in team_setup_by_port()
+ - net: team: fix memory leak in __team_options_register
+ - openswinn: handle DNAT tuple collision
+ - drm/amdgpu: prevent double kfree ttm->sg
+ - xfrm: clone XFRMA_REPLAY_ESN_VAL in xfrm_do_migrate
+ - xfrm: clone XFRMA_SEC_CTX in xfrm_do_migrate
+ - xfrm: clone whole lifetime_cur structure in xfrm_do_migrate
+ - net: stmmac: removed enabling eee in EEE set callback
+ - platform/x86: fix kconfig dependency warning for FUJITSU_LAPTOP
+ - xfrm: Use correct address family in xfrm_state_find
+ - bonding: set dev->needed_headroom in bond_setup_by_slave()
+ - mdiio: fix mdiio-thunder.c dependency & build error
+ - net: usb: ax88179_178a: fix missing stop entry in driver_info
+ - rxrpc: Fix rrxad token xdr encoding
+ - rxrpc: Downgrade the BUG() for unsupported token type in rxrpc_read()
+ - rxrpc: Fix some missing _bh annotations on locking conn->state_lock
+ - rxrpc: Fix server keyring leak
+ - perf: Fix task_function_call() error handling
+ - mmc: core: don't set limits.discard_granularity as 0
+ - mm: khugepaged: recalculate min_free_kbytes after memory hotplug as expected
+ - by khugepaged
+ - net: usb: rtl8150: set random MAC address when set_ethernet_addr() fails
+ - drm/nouveau/mem: guard against NULL pointer access in mem_del
+ - i2c: i801: Exclude device from suspend direct complete optimization
+ - nvme-core: put ctrl ref when module ref get fail
+ - i2c: meson: fixup rate calculation with filter delay
+ - xfrm: clone XFRMA_SET_MARK in xfrm_do_migrate
+ - net/mlx5e: Fix VLAN cleanup flow
+ - net/mlx5e: Fix VLAN create flow
+
+ * kci_test_encap_fou() in rtnetlink.sh from kselftests/net failed with "FAIL:
+ can't add fou port 7777, skipping test" (LP: #1891421)
+ - selftests: rtnetlink: load fou module for kci_test_encap_fou() test
+
+ * Bionic update: upstream stable patchset 2020-10-23 (LP: #1901257)
++ - af_key: pfkey_dump needs parameter validation
+ - KVM: fix memory leak in kvm_io_bus_unregister_dev()
+ - kprobes: fix kill kprobe which has been marked as gone
+ - mm/thp: fix __split_huge_pmd_locked() for migration PMD
+ - cxgb4: Fix offset when clearing filter byte counters
+ - geneve: add transport ports in route lookup for geneve
+ - hdle_ppp: add range checks in ppp_cp_parse_cr()
+ - ip: fix tos reflection in ack and reset packets
+ - net: ipv6: fix kconfig dependency warning for IPV6_SEG6_HMAC
+ - nfp: use correct define to return NONE fec
+ - tipc: Fix memory leak in tipc_group_create_member()
+ - tipc: use skb_unshare() instead in tipc_buf_append()
+ - bnxt_en: Protect bnxt_set_eee() and bnxt_set_pauseparam() with mutex.
+ - net: phy: Avoid NPD upon phy_detach() when driver is unbound
+ - net: qrtr: check skb_put_padto() return value
+ - net: add __must_check to skb_put_padto()
+ - ipv4: Update exception handling for multipath routes via same device
+ - MAINTAINERS: add CLANG/LLVM BUILD SUPPORT info
+ - Documentation/llvm: add documentation on building w/ Clang/LLVM
+ - Documentation/llvm: fix the name of llvm-size
+ - net: wan: wanxl: use allow to pass CROSS_COMPILE_M68k for rebuilding
  firmware
+ - net: wan: wanxl: use $(M68KCC) instead of $(M68KAS) for rebuilding firmware
+ - kbuild: replace AS=clang with LLVM_IAS=1
+ - tcp_bbr: refactor bbr_target_cwnd() for general inflight provisioning
+ - tcp_bbr: adapt cwnd based on ack aggregation estimation
+ - serial: 8250: Avoid error message on reprobe
+ - RDMA/ucma: ucma_context reference leak in error path
+ - mm: fix double page fault on arm64 if PTE_AF is cleared
+ - scsi: aacraid: fix illegal IO beyond last LBA
+ - m68k: q40: Fix info-leak in rtc_ioctl
+ - gma/gma500: fix a memory disclosure bug due to uninitialized bytes
+ - ASoC: kirkwood: fix IRQ error handling
+ - media: smiapp: Fix error handling at NVM reading
+ - arch/x86/lib/usercopy_64.c: fix __copy_user_flushcache() cache writeback
+ - x86/ioapic: Unbreak check_timer()
+ - ALSA: usb-audio: Add delay quirk for H570c USB headsets
+ - ALSA: hda/realktek - Couldn't detect Mic if booting with headset plugged
+ - PM / devfreq: tegra30: Fix integer overflow on CPU's freq max out
+ - scsi: fnic: fix use after free
+ - clk/ti/adpll: allocate room for terminating null
+ - mtd: cfi_cmdset_0002: don't free cfi->cfiq in error path of
  + cfi_amndstd_setup()
+ - mfd: mfd-core: Protect against NULL call-back function pointer
+ - tracing: Adding NULL checks for trace_array descriptor pointer
+ - bcache: fix a lost wake-up problem caused by mca_cannibalize_lock
+ - RDMA/is40iw: Fix potential use after free
+ - xfs: fix attr leaf header freemap.size underflow
+ - RDMA/iw_cgxb4: Fix an error handling path in 'c4iw_connect()' 
+ - mnc: core: Fix size overflow for mmc partitions
+ - gfs2: clean up oopen glock mess in gfs2_create_inode
+ - debugfs: Fix !DEBUG_FS debugfs_create_automount
+ - CIFS: Properly process SMB3 lease breaks
+ - kernel/sys.c: avoid copying possible padding bytes in copy_to_user
+ - neigh_stat_seq_next() should increase position index
+ - rt_cpu_seq_next should increase position index
+ - seqlock: Require WRITE_ONCE surrounding raw_seqcount_barrier
+ - media: ti-vpe: cal: Restrict DMA to avoid memory corruption
+ - ACPI: EC: Reference count query handlers under lock
+ - dmaengine: zynqmp_dma: fix burst length configuration
+ - powerpc/eeh: Only dump stack once if an MMIO loop is detected
+ - tracing: Set kernel_stack's caller size properly
+ - ar5523: Add USB ID of SMCWUSBT-G2 wireless adapter
+ - selftests/ftrace: fix glob selftest
+ - tools/power/x86/intel_pstate_tracer: changes for python 3 compatibility
+ - Bluetooth: Fix refcount use-after-free issue
+ - mm: pagewalk: fix termination condition in walk_pte_range()
+ - Bluetooth: prefetch channel before killing sock
+ - ALSA: hda: Clear RIRB status before reading WP
+ - skbuff: fix a data race in skb_queue_len()
+ - audit: CONFIG_CHANGE don't log internal bookkeeping as an event
+ - selinux: sel_avc_get_stat_idx should increase position index
+ - scsi: lpfc: Fix RQ buffer leakage when no IOCbs available
+ - scsi: lpfc: Fix coverity errors in fmdi attribute handling
+ - drm/omap: fix possible object reference leak
+ - perf test: Fix test trace+probe_vfs_getname.sh on s390
+ - RDMA/rxe: Fix configuration of atomic queue pair attributes
+ - KVM: x86: fix incorrect comparison in trace event
+ - media: staging/imx: Missing assignment in
  + imx_media_capture_device_register()
+ - x86/pkeys: Add check for pkey "overflow"
+ - bpf: Remove recursion prevention from rcu free callback
+ - dmaengine: tegra-apb: Prevent race conditions on channel's freeing
+ - media: go7007: Fix URB type for interrupt handling
+ - Bluetooth: guard against controllers sending zero'd events
+ - timekeeping: Prevent 32bit truncation in scale64_check_overflow()
+ - ext4: fix a data race at inode->i_disksize
+ - mm: avoid data corruption on CoW fault into PFN-mapped VMA
+ - drm/amdgpu: increase atombios cmd timeout
+ - ath10k: use kzalloc to read for ath10k_sdio_hif_diag_read
+ - scsi: aacraid: Disabling TM path and only processing IOP reset
+ - Bluetooth: L2CAP: handle l2cap config request during open state
+ - media: tda10071: fix unsigned sign extension overflow
+ - xfs: don't ever return a stale pointer from __xfs_dir3_free_read
+ - tpm: ibmvtpm: Wait for buffer to be set before proceeding
+ - rtc: ds1374: fix possible race condition
+ - tracing: Use address-of operator on section symbols
+ - serial: 8250_port: Don't service RX FIFO if throttled
+ - serial: 8250_omap: Fix sleeping function called from invalid context during probe
+ - serial: 8250: 8250_omap: Terminate DMA before pushing data on RX timeout
+ - perf cpumap: Fix snprintf overflow check
+ - cpufreq: powernv: Fix frame-size-overflow in powernv_cpufreq_work_fn
+ - tools: gpio-hammer: Avoid potential overflow in main
+ - RDMA/rxe: Set sys_image_guid to be aligned with HW IB devices
+ - SUNRPC: Fix a potential buffer overflow in 'svc_print_xprts()'
+ - svcrdma: Fix leak of transport addresses
+ - ubifs: Fix out-of-bounds memory access caused by abnormal value of node_len
+ - ALSA: usb-audio: Fix case when USB MIDI interface has more than one extra
  endpoint descriptor
+ - NFS: Fix races nfs_page_group_destroy() vs
  nfs_destroy_unlinked_subrequests()
+ - mm/kmemleak.c: use address-of operator on section symbols
+ - mm/filemap.c: clear page error before actual read
+ - mm/vmscan.c: fix data races using kswapd_classzone_idx
+ - mm/mmap.c: initialize align_offset explicitly for vm_unmapped_area
+ - scsi: qedi: Fix termination timeouts in session logout
+ - serial: uartps: Wait for tx_empty in console setup
+ - KVM: Remove CREATE_IRQCHIP/SET_PIT2 race
+ - bdev: Reduce time holding bd_mutex in sync in blkdev_close()
+ - drivers: char: tlclk.c: Avoid data race between init and interrupt handler
+ - staging:r8188eu: avoid skb_clone for amsdu to msdu conversion
+ - arm64: vcc: Fix error return code in vcc_probe()
+ - cpufreq: Relax checks for AArch32 support at EL[0-2]
+ - dt-bindings: sound: wm8994: Correct required supplies based on actual
  implementation
+ - atm: fix a memory leak of vcc->user_back
+ - power: supply: max17040: Correct voltage reading
+ - phy: samsung: s5pv210-usb2: Add delay after reset
+ - Bluetooth: Handle Inquiry Cancel error after Inquiry Complete
+ - USB: EHCI: ehci-mv: fix error handling in mv_ehci_probe()
+ - tty: serial: samsung: Correct clock selection logic
+ - ALSA: hda: Fix potential race in unsol event handler
+ - powerpc/traps: Make unrecoverable NMIs die instead of panic
+ - fuse: don't check refcount after stealing page
+ - USB: EHCI: ehci-mv: fix less than zero comparison of an unsigned int
+ - arm64/cpufeature: Drop TraceFilt feature exposure from ID_DFR0 register
+ - e1000: Do not perform reset in reset_task if we are already down
+ - drm/nouveaud/debugfs: fix runtime pm imbalance on error
+ - printk: handle blank console arguments passed in.
+ - usb: dwc3: Increase timeout for CmdAct cleared by device controller
+ - btrfs: don't force read-only after error in drop snapshot
+ - vfio/pci: fix memory leaks of eventfd ctx
+ - perf util: Fix memory leak of prefix_if_not_in
+ - perf kcore_copy: Fix module map when there are no modules loaded
+ - mtd: rawnand: omap_elm: Fix runtime PM imbalance on error
+ - ceph: fix potential race in ceph_check_caps
+ - mm/swap_state: fix a data race in swapin_nr_pages
+ - rapidio: avoid data race between file operation callbacks and
  mport_cdev_add().
+ - mtd: parser: cmdline: Support MTD names containing one or more colons
+ - x86/speculation/nuds: Mark mds_user_clear_cpu_buffers() __always_inline
+ - vfio/pci: Clear error and request eventfd ctx after releasing
+ - cifs: Fix double add page to memcg when cifs_readpages
+ - scsi: libfc: Handling of extra kref
+ - scsi: libfc: Skip additional kref updating work event
+ - selftests/x86/syscall_nt: Clear weird flags after each test
+ - vfio/pci: fix racy on error and request eventfd ctx
+ - btrfs: qgroup: fix data leak caused by race between writeback and truncate
+ - s390/init: add missing __init annotations
+ - i2c: core: Call i2c_acpi_install_space_handler() before
  i2c_acpi_register_devices()
+ - objtool: Fix noreturn detection for ignored functions
+ - ieee802154: fix one possible memleak in ca8210_dev_com_init
+ - ieee802154/adf7242: check status of adf7242_read_reg
+ - clocksource/drivers/h8300_timer8: Fix wrong return value in
  h8300_8timer_init()
+ - batman-adv: bla: fix type misuse for backbone_gw hash indexing
+ - atm: eni: fix the missed pci_disable_device() for eni_init_one()
+ - batman-adv: mcast/TT: fix wrongly dropped or rerouted packets
+ - mac802154: tx: fix use-after-free
+ - drm/vc4/vc4_hDMI: fill ASoC card owner
+ - net: qed: RDMA personality shouldn't fail VF load
+ - batman-adv: Add missing include for in_interrupt()
+ - batman-adv: mcast: fix duplicate mcast packets in BLA backbone from mesh
+ - ALSA: asihpi: fix iounmap in error handler
+ - MIPS: Add the missing ‘CPU_1074K’ into __get_cpu_type()
+ - s390/dasd: Fix zero write for FBA devices
+ - kprobes: Fix to check probe enabled before disarm_kprobe_ftrace()
+ - mm, THP, swap: fix allocating cluster for swapfile by mistake
+ - lib/string.c: implement stpcpy
+ - ata: define AC_ERR_OK
+ - ata: make qc_prep return ata_completion_errors
- ata: sata_mv, avoid trigerrable BUG_ON
- media: mc-device.c: fix memleak in media_device_register_entity
- tpm_crb: fix fTPM on AMD Zen+ CPUs
- RDMA/qedr: Fix potential use after free
- fix dget_parent() fastpath race
- scsi: pm80xx: Cleanup command when a reset times out
- ASoC: max98090: remove msleep in PLL unlocked workaround
- ipv6_route_seq_next should increase position index
- scsi: ufs: Fix a race condition in the tracing code
- s390/cpum_sf: Use kzalloc and minor changes
- ceph: ensure we have a new cap before continuing in fill_inode
- mm/swapfile.c: swap_next should increase position index
- dmaengine: stm32-mdma: use vchan_term_vdesc() in terminate_all
- dmaengine: stm32-dma: use vchan_term_vdesc() in terminate_all
- drm/amd/display: dal_ddc_i2c_payloads_create can fail causing panic
- firmware: arm_sdei: Use cpus_read_lock() to avoid races with cpuhp
- random: fix data races at timer_rand_state
- bus: hisi_lpc: Fixup IO ports addresses to avoid use-after-free in host removal
- perf jevents: Fix leak of mapfile memory
- xfs: mark dir corrupt when lookup-by-hash fails
- rtc: sa1100: fix possible race condition
- nfsd: Don't add locks to closed or closing open stateidis
- KVM: PPC: Book3S HV: Treat TM-related invalid form instructions on P9 like the valid ones
- thermal: rcar_thermal: Handle probe error gracefully
- nvme: Fix controller creation races with teardown flow
- scsi: hpsa: correct race condition in offload enabled
- PCI: Use ioremap(), not phys_to_virt() for platform ROM
- KVM: arm64: vgic-its: Fix memory leak on the error path of vgic_add_lpi()
- net: openvswitch: use u64 for meter bucket
- scsi: aacraid: Fix error handling paths in aac_probe_one()
- scsi: cxlflash: Fix error return code in cxlflash_probe()
- drm/nouveau: fix runtime pm imbalance on error
- perf evsel: Fix 2 memory leaks
- perf stat: Fix duration_time value for higher intervals
- perf metricgroup: Free metric_events on error
- ASoC: img-i2s-out: Fix runtime PM imbalance on error
- wlcore: fix runtime pm imbalance in wl1271_tx_work
- nvme: fix possible deadlock when I/O is blocked
- net: openvswitch: use div_u64() for 64-by-32 divisions
- nvme: explicitly update mpath disk capacity on revalidation
- ASoC: wm8994: Skip setting of the WM8994_MICBIAS register for WM1811
- drm/amdkfd: fix a memory leak issue
- batman-adv: mcast: fix duplicate mcast packets from BLA backbone to mesh
- KVM: x86: Reset MMU context if guest toggles CR4.SMAP or CR4.PKE
- KVM: SVM: Add a dedicated INVD intercept routine
- s390/zcrypt: Fix ZCRYPT_PERDEV_REQCNT ioctl
+ kprobes: Fix compiler warning for !CONFIG_KPROBES_ON_FTRACE
+ KVM: arm64: Assume write fault on S1PTW permission fault on instruction fetch
+ * bcache: Issues with large IO wait in bch_mca_scan() when shrinker is enabled
  (LP: #1898786)
+ - bcache: remove member accessed from struct btree
+ - bcache: reap c->btree_cache_freeable from the tail in bch_mca_scan()
+ - bcache: reap from tail of c->btree_cache in bch_mca_scan()
+ * -tools-common packages descriptions have typo "PGKVER" (LP: #1898903)
+ - [Packaging] Fix typo in -tools template s/PGKVER/PKGVER/
+ * [hns3-0901]add hns3_gro_complete for HW GRO process (LP: #1893711)
+ - net: hns3: add rx multicast packets statistic
+ - net: hns3: minor refactor for hns3_rx_checksum
+ - net: hns3: add hns3_gro_complete for HW GRO process
+ * mwifnex stops working after kernel upgrade (LP: #1897299)
+ - mwifnex: Increase AES key storage size to 256 bits
+ * Bionic update: upstream stable patchset 2020-09-30 (LP: #1897977)
+ - ARM: dts: socfpga: fix register entry for timer3 on Arria10
+ - RDMA/rxe: Fix memleak in rxe_mem_init_user
+ - RDMA/rxe: Drop pointless checks in rxe_init_ports
+ - scsi: libasas: Set data_dir as DMA_NONE if libata marks qc as NODATA
+ - RDMA/core: Fix reported speed and width
+ - mmc: sdhci-msm: Add retries when all tuning phases are found valid
+ - ARM: dts: BCM5301X: Fixed QSPI compatible string
+ - arm64: dts: ns2: Fixed QSPI compatible string
+ - ARC: HSDK: wireup perf irq
+ - dmaengine: acpi: Put the CSRT table after using it
+ - drivers/net/wan/lapbether: Added needed_tailroom
+ - NFC: st95hf: Fix memleak in st95hf_in_send_cmd
+ - firestream: Fix memleak in fs_open
+ - ALSA: hda: Fix 2 channel swapping for Tegra
+ - drivers/net/wan/lapbether: Set network_header before transmitting
+ - xfs: initialize the shortform attr header padding entry
+ - irqchip/eznps: Fix build error for !ARC700 builds
+ - drivers/net/wan/hdlc_cisco: Add hard_header_len
+ - ARC: [plat-hsdk]: switch ethernet phy-mode to rgmii-id
+ - cpufreq: intel_pstate: Refuse to turn off with HWP enabled
+ - ALSA: hda: fix a runtime pm issue in SOF when integrated GPU is disabled
+ - gcov: Disable gcov build with GCC 10
+ - iio: adc: mcp3422: fix locking scope
+ - iio: adc: mcp3422: fix locking on error path
+ - iio: adc: ti-ads1015: fix conversion when CONFIG_PM is not set
+ - iio:adc:ti-adc084s021 Fix alignment and data leak issues.
+ - iio:adc:ina2xx Fix timestamp alignment issue.
+ - iio:adc:max1118 Fix alignment of timestamp and data leak issues
+ - iio:adc:ti-adc081c Fix alignment and data leak issues
+ - iio:magnetometer:ak8975 Fix alignment and data leak issues.
+ - iio:light:max44000 Fix timestamp alignment and prevent data leak.
+ - iio:accel:mma8452: Fix timestamp alignment and prevent data leak.
+ - staging: wlan-ng: fix out of bounds read in prism2sta_probe_usb()
+ - btrfs: require only sector size alignment for parent eb bytenr
+ - btrfs: fix lockdep splat in add_missing_dev
+ - btrfs: fix wrong address when faulting in pages in the search ioctl
+ - regulator: push allocation in set_consumer_device_supply() out of lock
+ - scsi: target: iscsi: Fix data digest calculation
+ - scsi: target: iscsi: Fix hang in iscsit_access_np() when getting
+   tpg->np_login_sem
+ - rbd: require global CAP_SYS_ADMIN for mapping and unmapping
+ - RDMA/rxe: Fix the parent sysfs read when the interface has 15 chars
+ - fbcon: remove soft scrollback code
+ - fbcon: remove now unused 'softback_lines' cursor() argument
+ - vgacon: remove software scrollback support
+ - [Config] updateconfigs for VGACON_SOFT_SCROLLBACK
+ - KVM: VMX: Don't freeze guest when event delivery causes an APIC-access exit
+ - ARM: dts: vfxxx: Add syscon compatible with OCOTP
+ - video: fbdev: fix OOB read in vga_8planes_imageblit()
+ - staging: greybus: audio: fix uninitialized value issue
+ - usb: core: fix slab-out-of-bounds Read in read_descriptors
+ - USB: serial: ftdi_sio: add IDs for Xsens Mti USB converter
+ - USB: serial: option: support dynamic Quectel USB compositions
+ - USB: serial: option: add support for SIM7070/SIM7080/SIM7090 modules
+ - usb: Fix out of sync data toggle if a configured device is reconfigured
+ - usb: typec: ucsi: acpi: Check the _DEP dependencies
+ - gcov: add support for GCC 10.1
+ - gfs2: initialize transaction tr ailX_lists earlier
+ - net: handle the return value of pskb_carve_frag_list() correctly
+ - hv_netvsc: Remove "unlikely" from netvsc_select_queue
+ - NFSv4.1 handle ERR_DELAY error reclaiming locking state on delegation recall
+ - scsi: pm8001: Fix memleak in pm8001_exec_internal_task_abort
+ - scsi: libfc: Fix for double free()
+ - scsi: lpfc: Fix FLOGI/PLOGI receive race condition in pt2pt discovery
+ - spi: spi-loopback-test: Fix out-of-bounds read
+ - SUNRPC: stop printk reading past end of string
+ - rapidio: Replace 'select' DMAENGINES 'with depends on'
+ - nvme-fc: cancel async events before freeing event struct
+ - i2fs: fix indefinite loop scanning for free nid
+ - i2c: algo: pca: Reapply i2c bus settings after reset
+ - spi: Fix memory leak on split transfers
+ - KVM: MIPS: Change the definition of kvm type
+ - clk: rockchip: Fix initialization of mux_pll_src_4plls_p
+ - Drivers: hv: vmbus: Add timeout to vmbus_wait_for_unload
+ - MIPS: SNI: Fix MIPS_L1_CACHE_SHIFT
+ - perf test: Free formats for perf pmu parse test
+ - fbcon: Fix user font detection test at fbcon_resize()
+ - MIPS: SNI: Fix spurious interrupts
+ - drm/mediatek: Add exception handling in mtk_drm_probe() if component init
+ - fail
+ - drm/mediatek: Add missing put_device() call in mtk_hdmie_dt_parse_pdata()
+ - USB: quirks: Add USB_QUIRK_IGNORE_REMOTE_WAKEUP quirk for BYD zhaoxin
+ - notebook
+ - USB: UAS: fix disconnect by unplugging a hub
+ - usblp: fix race between disconnect() and read()
+ - i2c: i801: Fix resume bug
+ - percpu: fix first chunk size calculation for populated bitmap
+ - Input: trackpoint - add new trackpoint variant IDs
+ - Input: i8042 - add Entroware Proteus EL07R4 to nomux and reset list
+ - serial: 8250_pci: Add Realtek 816a and 816b
+ - ehci-hcd: Move include to keep CRC stable
+ - powerpe/dma: Fix dma_map_ops::get_required_mask
+ - x86/defconfig: Enable CONFIG_USB_XHCI_HCD=y
+ - RDMA/bnxt_re: Do not report transparent vlan from QP1
+ - ARM: dts: bcm: HR2: Fixed QSPI compatible string
+ - ARM: dts: NSP: Fixed QSPI compatible string
+ - netfilter: conntrack: allow sctp heartbeat after connection re-use
+ - cpufreq: intel_pstate: Fix intel_pstate_get_hwp_max() for turbo disabled
+ - iommu/amd: Do not use IOMMUv2 functionality when SME is active
+ - drm/tve200: Stabilize enable/disable
+ - drm/msm: Disable preemption on all 5xx targets
+ - phy: qcom-qmp: Use correct values for ipq8074 PCIe Gen2 PHY init
+ - dsa: Allow forwarding of redirected IGMP traffic
+ - RDMA/bnxt_re: Restrict the max_gids to 256
+ - regulator: pwm: Fix machine constraints application
+ - openrisc: Fix cache API compile issue when not inlining
+ - f2fs: Return EOF on unaligned end of file DIO read
+ - ASoC: qcom: Set card->owner to avoid warnings
+ - perf test: Fix the "signal" test inline assembly
+ - x86/boot/compressed: Disable relocation relaxation
+
+ * Bionic update: upstream stable patchset 2020-09-23 (LP: #1896817)
+ - HID: core: Correctly handle ReportSize being zero
+ - HID: core: Sanitize event code and type when mapping input
+ - perf record/stat: Explicitly call out event modifiers in the documentation
+ - drm/msm: add shutdown support for display platform_driver
+ - hwmon: (applesmc) check status earlier.
+ - nvmet: Disable keep-alive timer when kato is cleared to 0h
+ - ceph: don't allow setlease on cephfs
+ - cpuidle: Fixup IRQ state
+ - s390: don't trace preemption in percpu macros
+ - xen/xenbus: Fix granting of vmalloc'd memory
+ - dmaengine: of-dma: Fix of_dma_router_xlate's of_dma_xlate handling
+ - batman-adv: Avoid uninitialized chaddr when handling DHCP
+ - batman-adv: Fix own OGM check in aggregated OGMs
+ - batman-adv: bla: use netif_rx_ni when not in interrupt context
+ - dmaengine: at_hdmac: check return value of of_find_device_by_node() in
+ at_dma_xlate()
+ - MIPS: mm: BMIPS5000 has inclusive physical caches
+ - MIPS: BMIPS: Also call bmips_cpu_setup() for secondary cores
+ - netfilter: nf_tables: add NFTA_SET_USERDATA if not null
+ - netfilter: nf_tables: incorrect enum nft_list_attributes definition
+ - netfilter: nf_tables: fix destination register zeroing
+ - net: hns: Fix memleak in hns_nic_dev_probe
+ - net: systemport: Fix memleak in bcm_sysport_probe
+ - ravb: Fixed to be able to unload modules
+ - net: arc_emac: Fix memleak in arc_mdio_probe
+ - dmaengine: pl330: Fix burst length if burst size is smaller than bus width
+ - bnxt_en: Check for zero dir entries in NVRAM.
+ - bnxt_en: Fix PCI AER error recovery flow
+ - nvmet-fc: Fix a missed _irqsave version of spin_lock in
+ 'nvmet_fc_fod_op_done()'
+ - perf tools: Correct SNOOPX field offset
+ - net: ethernet: mlx4: Fix memory allocation in mlx4_buddy_init()
+ - fix regression in "epoll: Keep a reference on files added to the check list"
+ - tg3: Fix soft lockup when tg3_reset_task() fails.
+ - iommu/vt-d: Serialize IOMMU GCMD register modifications
+ - thermal: ti-soc-thermal: Fix bogus thermal shutdowns for omap4430
+ - include/linux/log2.h: add missing () around n in roundup_pow_of_two()
+ - btrfs: drop path before adding new uuid tree entry
+ - btrfs: Remove redundant extent_buffer_get in get_old_root
+ - btrfs: Remove extraneous extent_buffer_get from tree_mod_log_rewind
+ - btrfs: set the lockdep class for log tree extent buffers
+ - uaccess: Add non-pagefault user-space read functions
+ - uaccess: Add non-pagefault user-space write function
+ - btrfs: fix potential deadlock in the search ioctl
+ - net: usb: qmi_wwan: add Telit 0x1050 composition
+ - usb: qmi_wwan: add D-Link DWM-222 A2 device ID
+ - ALSA: ca0106: fix error code handling
+ - ALSA: pcm: oss: Remove superfluous WARN_ON() for mulaw sanity check
+ - ALSA: hda/hdmi: always check pin power status in i915 pin fixup
+ - ALSA: firewire-digi00x: exclude Avid Adrenaline from detection
+ - affs: fix basic permission bits to actually work
+ - block: allow for_each_bvec to support zero len bvec
+ - block: Move SECTOR_SIZE and SECTOR_SHIFT definitions into <linux/blkdev.h>
+ - libata: implement ATA_HORKAGE_MAX_TRIM_128M and apply to Sandisks
+ - dm cache metadata: Avoid returning cmd->bm wild pointer on error
+ - dm thin metadata: Avoid returning cmd->bm wild pointer on error
+ - mm: slub: fix conversion of freelist_corrupted()
+ - KVM: arm64: Add kvm_extable for vaxorcism code
+ - KVM: arm64: Defer guest entry when an asynchronous exception is pending
+ - KVM: arm64: Survive synchronous exceptions caused by AT instructions
+ - KVM: arm64: Set HCR_EL2.PTW to prevent AT taking synchronous exception
+ - checkpatch: fix the usage of capture group ( ... )
+ - mm/hugel: fix a race between hugelb system handlers
+ - cfg80211: regulatory: reject invalid hints
+ - net: usb: Fix uninit-was-stored issue in asix_read_phy_addr()
+ - ALSA; firewire-tascam: exclude Tascam FE-8 from detection
+ - block: ensure bdi->io_pages is always initialized
+ - vfio/pci: Fix SR-IOV VF handling with MMIO blocking
+ - bnx3: don't enable NAPI until rings are ready
+ - netlabel: fix problems with mapping removal
+ - net: usb: dm9601: Add USB ID of Keenetic Plus DSL
+ - scpt: not disable bh in the whole scpt_get_port_local()
+ - tipc: fix shutdown() of connectionless socket
+ - net: disable netpoll on fresh napis
+ - scsi: target: tcmu: Fix size in calls to tcmu_flush_dcache_range
+ - scsi: target: tcmu: Optimize use of flush_dcache_page
+ - selftests/bpf: Fix massive output from test_maps
+ - netfilter: nfnetlink: nfnetlink_unicast() reports EAGAIN instead of ENOBUFS
+ - perf jevents: Fix suspicious code in fixregex()
+ - ext2: don't update mtime on COW faults
+ - xfs: don't update mtime on COW faults

- dell latitude 5491 touchscreen doesn't work (LP: #1889446) // Bionic update:
- upstream stable patchset 2020-09-16 (LP: #1895873)
- USB: quirks: Add no-lpm quirk for another Raydium touchscreen

* Bionic update: upstream stable patchset 2020-09-11 (LP: #1895328)
- drm/vgem: Replace opencoded version of drm_gem_dumb_map_offset()
- perf probe: Fix memory leakage when the probe point is not found
- khugepaged: khugepaged_test_exit() check mmget_still_valid()
- khugepaged: adjust VM_BUG_ON_MM() in __khugepaged_enter()
- powerpc/mm: Only read faulting instruction when necessary in do_page_fault()
- btrfs: export helpers for subvolume name/id resolution
- btrfs: don't show full path of bind mounts in subvol=
- btrfs: Move free_pages_out label in inline extent handling branch in compress_file_range
- btrfs: inode: fix NULL pointer dereference if inode doesn't need compression
- btrfs: sysfs: use NOFS for device creation
- romfs: fix uninitialized memory leak in romfs_dev_read()
- kernel/relay.c: fix memleak on destroy relay channel
- mm: include CMA pages in lowmem_reserve at boot
- mm, page_alloc: fix core hung in free_pcpages_bulk()
- ext4: fix checking of directory entry validity for inline directories
+ - jbd2: add the missing unlock_buffer() in the error path of
+   jbd2_write_superblock()
+ - [Config] update configs for CONFIG_SPI_DYNAMIC
+ - spi: Prevent adding devices below an unregistering controller
+ - scsi: ufs: Add DELAY_BEFORE_LPM quirk for Micron devices
+ - media: budget-core: Improve exception handling in budget_register()
+ - rtc: goldfish: Enable interrupt in set_alarm() when necessary
+ - media: vps: clean up resources in init
+ - Input: psmouse: add a newline when writing 'proto' by sysfs
+ - m68knommul: fix overwriting of bits in ColdFire V3 cache control
+ - xfs: fix inode quota reservation checks
+ - jffs2: fix UAF problem
+ - cpufreq: intel_pstate: Fix cpuinfo_max_freq when MSR_TURBO_RATIO_LIMIT is 0
+ - scsi: libfc: Free skb in fc_disc_gpn_id_resp() for valid cases
+ - virtio_ring: Avoid loop when vq is broken in virtqueue_poll
+ - xfs: Fix UBSAN null-ptr-deref in xfs_sysfs_init
+ - alpha: fix annotation of io[read,write]{16,32}be()
+ - ext4: fix potential negative array index in do_split()
+ - i40e: Set RX_ONLY mode for unicast promiscuous on VLAN
+ - i40e: Fix crash during removing i40e driver
+ - net: fec: correct the error path for regulator disable in probe
+ - bonding: show saner speed for broadcast mode
+ - bonding: fix a potential double_unregister
+ - ASoC: msm8916-wcd-analog: fix register Interrupt offset
+ - ASoC: intel: Fix memleak in sst_media_open
+ - vfio/type1: Add proper error unwind for vfio_iommu_replay()
+ - bonding: fix active-backup failover for current ARP slave
+ - hv_netvsc: Fix the queue_mapping in netvsc_vf_xmit()
+ - net: dsa: b53: check for timeout
+ - powerpc/pseries: Do not initiate shutdown when system is running on UPS
+ - epoll: Keep a reference on files added to the check list
+ - do_epoll_ctl(): clean the failure exits up a bit
+ - mm/hugetlb: fix calculation of adjust_range_if_pmd_sharing_possible
+ - xen: don't reschedule in preemption off sections
+ - clk: Evict unregistered clks from parent caches
+ - KVM: arm/arm64: Don't reschedule in unmap_stage2_range()
+ - scsi: zfcp: Fix use-after-free in request timeout handlers
+ - ext4: don't allow overlapping system zones
+ - s390/runtime_instrumentation: fix storage key handling
+ - s390/ptrace: fix storage key handling
+ - kvm: x86: Toggling CR4.SMAP does not load PDPTEs in PAE mode
+ - kvm: x86: Toggling CR4.PKE does not load PDPTEs in PAE mode
+ - Fix build error when CONFIG_ACPI is not set/enabled
+ - net: ena: Prevent reset after device destruction
+ * Bionic update: upstream stable patchset 2020-09-02 (LP: #1893986)
+ - net/mlx5e: Don't support phy switch id if not in switchdev mode
+ - tracepoint: Mark __tracepoint_string's __used

Open Source Used In 5GaaS Edge AC-4 17588
- HID: input: Fix devices that return multiple bytes in battery report
- x86/mce/inject: Fix a wrong assignment of i_mce.status
- sched: correct SD_flags returned by tl->sd_flags()
- arm64: dts: rockchip: fix rk3399-puma vcc5v0-host gpio
- arm64: dts: rockchip: fix rk3399-puma gmac reset gpio
- EDAC: Fix reference count leaks
- arm64: dts: qcom: msm8916: Replace invalid bias-pull-none property
- arm64: dts: exynos: Fix silent hang after boot on Espresso
- m68k: mac: Don't send IOP message until channel is idle
- m68k: mac: Fix IOP status/control register writes
- platform/x86: intel-hid: Fix return value check in check_acpi_dev()
- platform/x86: intel-vbtn: Fix return value check in check_acpi_dev()
- ARM: at91: pm: add missing put_device() call in at91_pm_sram_init()
- spi: lantiq: fix: Rx overflow error in full duplex mode
- ARM: socfpga: PM: add missing put_device() call in
  socfpga_setup_ocram_self_refresh()
- dma: fix leak & null ref in panel_connector_get_modes
- Bluetooth: add a mutex lock to avoid UAF in do_enable_set
- fs/btrfs: Add cond_resched() for try_release_extent_mapping() stalls
- drm/radeon: Fix reference count leaks caused by pm_runtime_get_sync
- video: fbdev: neofb: fix memory leak in neo_scan_monitor()
- md-cluster: fix wild pointer of unlock_all_bitmaps()
- arm64: dts: hisilicon: hikey: fixes to comply with adv7533 DT binding
- drm/nouveaup: fix multiple instances of reference count leaks
- drm/debugfs: fix plain echo to connector "force" attribute
- irqchip/irq-mtk-sysirq: Replace spinlock with raw_spinlock
- mm/mmap.c: Add cond_resched() for exit_mmap() CPU stalls
- brcmfmac: To fix Bss Info flag definition Bug
- brcmfmac: set state of hanger slot to FREE when flushing PSQ
- iwlegacy: Check the return value of pcie_capability_read_*()
- gpu: host1x: debug: Fix multiple channels emitting messages simultaneously
- usb: gadget: net2280: fix memory leak on probe error handling paths
- bdc: Fix bug causing crash after multiple disconnects
- usb: bdc: Halt controller on suspend
- dyndbg: fix a BUG_ON in ddebug_describe_flags
- bcache: fix super block seq numbers comparison in register_cache_set()
- ACPICA: Do not increment operation_region reference counts for field units
- agp/intel: Fix a memory leak on module initialisation failure
