+linux (4.15.0-166.174) bionic; urgency=medium
+
+ * bionic/linux: 4.15.0-166.174 -proposed tracker (LP: #1953667)
+
+ * Ubuntu version macros overflow with high ABI numbers (LP: #1953522)
+ * - SAUCE: Revert "stable: clamp SUBLEVEL in 4.14"
+
+ * test_bpf.sh test in net of ubuntu_kernel_selftests failed on B-4.15 and
+ * variants (LP: #1953287)
+ * - SAUCE: Revert "bpf: add also cbpf long jump test cases with heavy expansion"
+
+ * test_bpf.sh test in net of ubuntu_kernel_selftests failed on B-4.15 and
+ * variants (LP: #1953287) // CVE-2018-25020
+ * - bpf: fix truncated jump targets on heavy expansions
+
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Wed, 08 Dec 2021 18:15:03 +0100
+ * bionic/linux: 4.15.0-165.173 -proposed tracker (LP: #1952780)

+ * Support builtin revoked certificates (LP: #1932029)
  + - certs: Add EFI_CERT_X509_GUID support for dbx entries
  + - certs: Move load_system_certificate_list to a common function
  + - integrity: Move import of MokListRT certs to a separate routine
  + - integrity: Load certs from the EFI MOK config table
  + - certs: Add ability to preload revocation certs
  + - certs: add 'x509_revocation_list' to gitignore
  + - SAUCE: Dump stack when X.509 certificates cannot be loaded
  + - [Packaging] build canonical-revoked-certs.pem from branch/arch certs
  + - [Packaging] Revoke 2012 UEFI signing certificate as built-in
  + - [Config] Configure CONFIG_SYSTEM_REVOCATION_KEYS with revoked keys

+ * Support importing mokx keys into revocation list from the mok table
  + (LP: #1928679)
  + - efi: Support for MOK variable config table
  + - efi: mokvar-table: fix some issues in new code
  + - efi: mokvar: add missing include of asm/early_ioremap.h
  + - efi/mokvar: Reserve the table only if it is in boot services data
  + - SAUCE: integrity: Load mokx certs from the EFI MOK config table
  + - SAUCE: integrity: add informational messages when revoking certs

+ * CVE-2021-4002
  + - arm64: tlb: Provide forward declaration of tlb_flush() before including
  + tlb.h
  + - mm: mmu_notifier fix for tlb_end_vma
  + - hugetlbfs: flush TLBs correctly after huge_pmd_unshare

+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Tue, 30 Nov 2021 17:58:59 +0100

+ * bionic/linux: 4.15.0-164.172 -proposed tracker (LP: #1952348)

+ * Packaging resync (LP: #1786013)
  + - [Packaging] resync update-dkms-versions helper
  + - debian/dkms-versions -- update from kernel-versions (main/2021.11.29)

+ * Bionic update: upstream stable patchset 2021-11-23 (LP: #1951997)
  + - btrfs: always wait on ordered extents at fsync time
  + - ARM: dts: at91: sama5d2_som1_ek: disable ISC node by default
  + - xtensa: xtfpga: use CONFIG_USE_OF instead of CONFIG_OF
  + - xtensa: xtfpga: Try software restart before simulating CPU reset
  + - NFSD: Keep existing listeners on portlist error
- netfilter: ipvs: make global sysctl readonly in non-init nets
- NIOS2: irqflags: rename a redefined register name
- can: rcar_can: fix suspend/resume
- can: peak_usb:pcan_usb_fd_decode_status(): fix back to ERROR_ACTIVE state
- nfc: nci: fix the UAF of rf_conn_info object
- isdn: cpai: check ctr->cnr to avoid array index out of bound
- netfilter: Kconfig: use 'default y' instead of 'm' for bool config option
- btrfs: deal with errors when checking if a dir entry exists during log replay
- net: stmmac: add support for dwmac 3.40a
- ARM: dts: spear3xx: Fix gmac node
- isdn: mISDN: Fix sleeping function called from invalid context
- platform/x86: intel_scu_ipe: Update timeout value in comment
- ALSA: hda: avoid write to STATETESTS if controller is in reset
- tracing: Have all levels of checks prevent recursion
- ARM: 9122/1: select HAVE_FUTEX_CMPXCHG
- dma-debug: fix sg checks in debug_dma_map_sg()
- ASoC: wm8960: Fix clock configuration on slave mode
- lan78xx: select CRC32
- net: hns3: add limit ets dwrr bandwidth cannot be 0
- net: hns3: disable sriov before unload hclge layer
- ALSA: hda/realtek: Add quirk for Clevo PC50HS
- mm, slub: fix mismatch between reconstructed freelist depth and cnt
- gcc-plugins/structleak: add makefile var for disabling structleak

* creat09 from ubuntu_ltp_syscalls and cve-2018-13405 from ubuntu_ltp/cve failed with XFS (LP: #1950239)
- xfs: ensure that the inode uid/gid match values match the icidinode ones
- xfs: merge the projid fields in struct xfs_icidinode
- xfs: remove the icidinode di_uid/di_gid members
- xfs: fix up non-directory creation in SGID directories

* ubuntu_ltp / finit_module02 fails on v4.15 and other kernels (LP: #1950644)
- vfs: check fd has read access in kernel_read_file_from_fd()

* reuseport_bpf_numa in net from ubuntu_kernel_selftests fails on ppc64le
  (LP: #1867570)
- selftests/net: Fix reuseport_bpf_numa by skipping unavailable nodes

* Bionic update: upstream stable patchset 2021-11-12 (LP: #1950816)
- net: mdio: introduce a shutdown method to mdio device drivers
+ - xen-netback: correct success/error reporting for the SKB-with-fraglist case
+ - sparc64: fix pci_iounmap() when CONFIG_PCI is not set
+ - ext2: fix sleeping in atomic bugs on error
+ - scsi: sd: Free scsi_disk device via put_device()
+ - usb: testusb: Fix for showing the connection speed
+ - usb: dwc2: check return value after calling platform_get_resource()
+ - scsi: ses: Retry failed Send/Receive Diagnostic commands
+ - libata: Add ATA_HORKAGE_NO_NCQ_ON_ATI for Samsung 860 and 870 SSD.
+ - lib/timerqueue: Rely on rbtree semantics for next timer
+ - selftests: be sure to make khdr before other targets
+ - Partially revert "usb: Kconfig: using select for USB_COMMON dependency"
+ - USB: cdc-acm: fix racy tty buffer accesses
+ - USB: cdc-acm: fix break reporting
+ - ovl: fix missing negative dentry check in ovl_rename()
+ - nfsd4: Handle the NFSv4 READDIR 'dircount' hint being zero
+ - xen/balloon: fix cancelled balloon action
+ - ARM: dts: omap3430-sdp: Fix NAND device node
+ - ARM: dts: qcom: apq8064: use compatible which contains chipid
+ - bpf: add also cbpf long jump test cases with heavy expansion
+ - bpf, mips: Validate conditional branch offsets
+ - xtensa: call irqchip_init only when CONFIG_USE_OF is selected
+ - bpf: Fix integer overflow in prealloc elems_and_freelist()
+ - phy: mdio: fix memory leak
+ - net_sched: use nla_total_size_64bit() in br_get_linkxstats_size()
+ - netlink: annotate data races around nlk->bound
+ - drm/nouveau/debugfs: fix file release memory leak
+ - rtnetlink: fix if_nlmsg_stats_size() under estimation
+ - i40e: fix endless loop under rtln
+ - i2c: acpi: fix resource leak in reconfiguration device addition
+ - net: phy: bcm7xxx: Fixed indirect MMD operations
+ - HID: apple: Fix logical maximum and usage maximum of Magic Keyboard JIS
+ - netfilter: ip6_tables: zero-initialize fragment offset
+ - mac80211: Drop frames from invalid MAC address in ad-hoc mode
+ - m68k: Handle arrivals of multiple signals correctly
+ - net: sun: SUNVNET_COMMON should depend on INET
+ - scsi: ses: Fix unsigned comparison with less than zero
+ - scsi: virtio_scsi: Fix spelling mistake "Unsupport" -> "Unsupported"
+ - perf/x86: Reset destroy callback on event init failure
+ - sched: Always inline is_percpu_thread()
+ - bpf, arm: Fix register clobbering in div/mod implementation
+ - i40e: Fix freeing of uninitialized misc IRQ vector
+ - mac80211: check return value of rhashtable_init
+ - stable: clamp SUBLEVEL in 4.14
+ - ALSA: seq: Fix a potential UAF by wrong private_free call order
+ - s390: fix strchr() implementation
+ - btrfs: deal with errors when replaying dir entry during log replay
+ - btrfs: deal with errors when adding inode reference during log replay
+ - btrfs: check for error when looking up inode during dir entry replay
+ - xhci: Fix command ring pointer corruption while aborting a command
+ - xhci: Enable trust tx length quirk for Fresco FL11 USB controller
+ - cb710: avoid NULL pointer subtraction
+ - efi/cper: use stack buffer for error record decoding
+ - efi: Change down_interruptible() in virt_efi_reset_system() to
down_trylock()
+ - usb: musb: dsps: Fix the probe error path
+ - Input: xpad - add support for another USB ID of Nacon GC-100
+ - USB: serial: qcserial: add EM9191 QDL support
+ - USB: serial: option: add Quectel EC200S-CN module support
+ - USB: serial: option: add Telit LE910Cx composition 0x1204
+ - USB: serial: option: add prod. id for Quectel EG91
+ - virtio: write back F_VERSION_1 before validate
+ - nvme: Fix shift-out-of-bound (UBSAN) with byte size cells
+ - x86/Kconfig: Do not enable AMD_MEM_ENCRYPT_ACTIVE_BY_DEFAULT automatically
+ - iio: adc: aspeed: set driver data when adc probe.
+ - iio: adc128s052: Fix the error handling path of `adc128_probe()`
+ - iio: light: opt3001: Fixed timeout error when 0 lux
+ - iio: ssp_sensors: add more range checking in ssp_parse_dataframe()
+ - iio: ssp_sensors: fix error code in ssp_print_mcu_debug()
+ - scrn: account stream padding length for reconf chunk
+ - net: arc: select CRC32
+ - net: korina: select CRC32
+ - net: enx24j600: check error in devm_regmap_init_enx24j600
+ - ethernet: s2io: fix setting mac address during resume
+ - nfc: fix error handling of nfc_proto_register()
+ - NFC: digital: fix possible memory leak in digital_tg_listen_mdaa()
+ - NFC: digital: fix possible memory leak in digital_in_send_sdd_req()
+ - pata_legacy: fix a couple uninitialized variable bugs
+ - drm/msm: Fix null pointer dereference on pointer edp
+ - drm/msm/dsi: fix off by one in dsi_bus_clk_enable error handling
+ - acpi/arm64: fix next_platform_timer() section mismatch error
+ - qed: Fix missing error code in qed_slowpath_start()
+ - r8152: select CRC32 and CRYPTO/CRYPTO_HASH/CRYPTO_SHA256

+ -- Kelsey Skunberg <kelsey.skunberg@canonical.com> Fri, 26 Nov 2021 17:31:19 -0700
+ linux (4.15.0-163.171) bionic; urgency=medium
+ *
+ * bionic/linux: 4.15.0-163.171 -proposed tracker (LP: #1949874)
+ *
+ * Packaging resync (LP: #1786013)
+ * [Packaging] update Ubuntu.md
- debian/dkms-versions -- update from kernel-versions (main/2021.11.08)
+ * Unable to build net/reuseport_bpf and other tests in ubuntu_kernel_selftests
+ on Bionic with make command (LP: #1949889)
+ - selftests: Fix loss of test output in run_kselftests.sh
+ - selftests: Makefile set KSFT_TAP_LEVEL to prevent nested TAP headers
+ - selftests: fix headers_install circular dependency
+ - selftests: fix bpf build/test workflow regression when KBUILD_OUTPUT is set
+ - selftests: vm: Fix test build failure when built by itself
+ 
+ * KVM emulation failure when booting into VM crash kernel with multiple CPUs
+ (LP: #1948862)
+ - KVM: x86: Properly reset MMU context at vCPU RESET/INIT
+ + * aufs: kernel bug with apparmor and fuseblk (LP: #1948470)
+ + - SAUCE: aufs: bugfix, stop omitting path->mnt
+ + * ebpf: bpf_redirect fails with ip6 gre interfaces (LP: #1947164)
+ + - net: handle ARPHRD_IP6GRE in dev_is_mac_header_xmit()
+ + * require CAP_NET_ADMIN to attach N_HCI ldisc (LP: #1949516)
+ + - Bluetooth: hci_ldisc: require CAP_NET_ADMIN to attach N_HCI ldisc
+ + * ACL updates on OCFS2 are not revalidated (LP: #1947161)
+ + - ocfs2: fix remounting needed after setfacl command
+ + * ppc64 BPF JIT mod by 1 will not return 0 (LP: #1948351)
+ + - powerpc/bpf: Fix BPF_MOD when imm == 1
+ + * Drop "UBUNTU: SAUCE: cachefiles: Page leaking in cachefiles_readBackingFile while vmscan is active" (LP: #1947709)
+ + - Revert "UBUNTU: SAUCE: cachefiles: Page leaking in cachefiles_readBackingFile while vmscan is active"
+ + - cachefiles: Fix page leak in cachefiles_readBackingFile while vmscan is active
+ + * Some test in ubuntu_bpf test_verifier failed on i386 Bionic kernel
+ (LP: #1788578)
+ + - bpf: fix context access in tracing progs on 32 bit archs
+ + * test_bpf.sh from ubuntu_kernel_selftests.net from linux ADT test failure
+ with linux/4.15.0-149.153 i386 (Segmentation fault) (LP: #1934414)
+ + - selftests/bpf: make test_verifier run most programs
+ + - bpf: add couple of test cases for div/mod by zero
+ + - bpf: add further test cases around div/mod and others
+ + * Bionic update: upstream stable patchset 2021-11-02 (LP: #1949512)
+ + - usb: gadget: r8a66597: fix a loop in set_feature()
- usb: musb: tusb6010: uninitialized data in tusb_fifo_write_unaligned()
- cifs: fix incorrect check for null pointer in header_assemble
- xen/x86: fix PV trap handling on secondary processors
- usb-storage: Add quirk for ScanLogic SL11R-IDE older than 2.6c
- USB: serial: cp210x: add ID for GW Instek GDM-834x Digital Multimeter
- staging: greybus: uart: fix tty use after free
- Re-enable UAS for LaCie Rugged USB3-FW with fk quirk
- USB: serial: mos7840: remove duplicated 0xac24 device ID
- USB: serial: option: add Telit LN920 compositions
- USB: serial: option: remove duplicate USB device ID
- USB: serial: option: add device id for Foxconn T99W265
- mcb: fix error handling in mcb_alloc_bus()
- serial: mvebu-uart: fix driver's tx_empty callback
- net: lso: fix muxed tty registration
- bnxnt_en: Fix TX timeout when TX ring size is set to the smallest
- net/mlx4_en: Don't allow aRFS for encapsulated packets
- scsi: iscsi: Adjust iface sysfs attr detection
- thermal/core: Potential buffer overflow in thermal_build_list_of_policies()
- irqchip/gic-v3-its: Fix potential VPE leak on error
- md: fix a lock order reversal in md_alloc
- blktrace: Fix uaf in blk_trace access after removing by sysfs
- net: macb: fix use after free on rmmod
- net: stmmac: allow CSR clock of 300MHz
- m68k: Double cast io functions to unsigned long
- xen/balloon: use a kernel thread instead a workqueue
- compiler.h: Introduce absolute_pointer macro
- net: i825xx: Use absolute_pointer for memcpy from fixed memory location
- parisc: avoid stringop-overread errors
- qnx4: avoid stringop-overread errors
- arm64: Use absolute_pointer() to define PAGE0
- arm64: Mark __stack_chk_guard as __ro_after_init
- alpha: Declare virt_to_phys and virt_to_bus parameter as pointer to volatile
- net: 6pack: Fix tx timeout and slot time
- spi: Fix tegra20 build with CONFIG_PM=n
- arm64: dts: marvell: armada-37xx: Extend PCIe MEM space
- PCI: aardvark: Fix checking for PIO Non-posted Request
- PCI: aardvark: Fix checking for PIO status
- xen/balloon: fix balloon kthread freezing
- qnx4: work around gcc false positive warning bug
- tty: Fix out-of-bound vmalloc access in imageblit
- cpufreq: schedutil: Use kobject release() method to free sugov_tunables
- cpufreq: schedutil: Destroy mutex before kobject_put() frees the memory
- mac80211: fix use-after-free in CCMP/GCMP RX
- ipvs: check that ip_vs_conn_tab_bits is between 8 and 20
- mac80211: Fix iee80211_amsdu_aggregate frag_tail bug
- mac80211: limit injected vht mcs/sss in iee80211_parse_tx_radiotap
- scctp: break out if skb_header_pointer returns NULL in scctp_rcv_oobt
- hwmon: (tmp421) fix rounding for negative values
+ - e100: fix length calculation in e100_get_regs_len
+ - e100: fix buffer overrun in e100_get_regs
+ - scsi: csiostor: Add module sofdep on cxgb4
+ - af_unix: fix races in sk_peer_pid and sk_peer_cred accesses
+ - ipack: ipoctl: fix stack information leak
+ - ipack: ipoctl: fix tty registration race
+ - ipack: ipoctl: fix tty-registration error handling
+ - ipack: ipoctl: fix missing allocation-failure check
+ - ipack: ipoctl: fix module reference leak
+ - ext4: fix potential infinite loop in ext4_dx_readdir()
+ - net: udp: annotate data race around udp_sk(sk)->corkflag
+ - EDAC/synopsys: Fix wrong value type assignment for edac_mode
+ - ARM: 9077/1: PLT: Move struct plt_entries definition to header
+ - ARM: 9078/1: Add warn suppress parameter to arm_gen_branch_link()
+ - ARM: 9079/1: ftrace: Add MODULE_PLTS support
+ - ARM: 9098/1: ftrace: MODULE_PLT: Fix build problem without DYNAMIC_FTRACE
+ - arm64: Extend workaround for erratum 1024718 to all versions of Cortex-A55
+ - hso: fix bailout in error case of probe
+ - usb: hso: fix error handling code of hso_create_net_device
+ - usb: hso: remove the bailout parameter
+ - crypto: ccp - fix resource leaks in ccp_run_aes_gcm_cmd()
+ - HID: betop: fix slab-out-of-bounds Write in betop_probe
+ - netfilter: ipset: Fix oversized kvmalloc() calls
+ - HID: usbhid: free raw_report buffers in usbhid_stop
+ - cred: allow get_cred() and put_cred() to be given NULL.
+ - gpio: uniphier: Fix void functions to remove return value
+ - tty: synclink_gt, drop unneeded forward declarations
+ - tty: synclink_gt: rename a conflicting function name
+ - drm/amd/display: Pass PCI deviceid into DC
+ - hwmon: (tmp421) Replace S_<PERMS> with octal values
+ - hwmon: (tmp421) report /PVLD condition as fault
+ + * ACL updates on OCFS2 are not revalidated (LP: #1947161) // Bionic update:
+ + upstream stable patchset 2021-11-02 (LP: #1949512)
+ + - ocfs2: drop acl cache for directories too
+ + -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Fri, 05 Nov 2021 12:22:08 +0100
+ + linux (4.15.0-162.170) bionic; urgency=medium
+ + * bionic/linux: 4.15.0-162.170 -proposed tracker (LP: #1947293)
+ + * Add final-checks to check certificates (LP: #1947174)
+ + - [Packaging] Add system trusted and revocation keys final check
+ + * CVE-2020-36385
+ + - RDMA/cma: Add missing locking to rdma_accept()
+ - RDMA/ucma: Fix the locking of ctx->file
+ - RDMA/ucma: Rework ucma_migrate_id() to avoid races with destroy
+ + * CVE-2021-28950
+ + - fuse: fix live lock in fuse_iget()
+ +
+ + * CVE-2020-36322
+ + - fuse: fix bad inode
+ +
+ + * Bionic update: upstream stable patchset 2021-10-13 (LP: #1947011)
+ + - rcu: Fix missed wakeup of exp_wq waiters
+ + - apparmor: remove duplicate macro list_entry_is_head()
+ + - crypto: talitos - fix max key size for sha384 and sha512
+ + - scvp: validate chunk size in __rcv_asconf_lookup
+ + - scvp: add param size validation for SCTP_PARAM_SET_PRIMARY
+ + - dmaengine: acpi: Avoid comparison GSI with Linux vIRQ
+ + - thermal/drivers/exynos: Fix an error code in exynos_tmux_probe()
+ + - 9p/trans_virtio: Remove sysfs file on probe failure
+ + - prctl: allow to setup brk for et_dyn executables
+ + - profiling: fix shift-out-of-bounds bugs
+ + - pwm: lpc32xx: Don't modify HW state in .probe() after the PWM chip was
+ + registered
+ + - Kconfig.debug: drop selecting non-existing HARDLOCKUP_DETECTOR_ARCH
+ + - parisc: Move pci_dev_is_behind_card_dino to where it is used
+ + - dmaengine: ioat: depends on !UML
+ + - dmaengine: xilinx_dma: Set DMA mask for coherent APIs
+ + - ceph: lockdep annotations for try_nonblocking_invalidate
+ + - nilfs2: fix memory leak in nilfs_sysfs_create_device_group
+ + - nilfs2: fix NULL pointer in nilfs_##name##_attr_release
+ + - nilfs2: fix memory leak in nilfs_sysfs_create_##name##_group
+ + - nilfs2: fix memory leak in nilfs_sysfs_delete_##name##_group
+ + - nilfs2: fix memory leak in nilfs_sysfs_create_snapshot_group
+ + - nilfs2: fix memory leak in nilfs_sysfs_delete_snapshot_group
+ + - pwm: rockchip: Don't modify HW state in .remove() callback
+ + - blk-throttle: fix UAF by deleteing timer in blk_throtl_exit()
+ + - drm/nouveau/nvkm: Replace -ENOSYS with -ENODEV
+ + - nilfs2: use refcount_dec_and_lock() to fix potential UAF
+ + - drivers: base: cacheinfo: Get rid of DEFINE_SMP_CALL_CACHE_FUNCTION()
+ +
+ + * Invalid backport to v4.15: missing pgtable_l5_enabled (LP: #1946464)
+ + - SAUCE: Revert "x86/mm: Don't free P4D table when it is folded at runtime"
+ +
+ + * CVE-2021-38199
+ + - NFSv4: Initialise connection to the server in nfs4_alloc_client()
+ +
+ + * CVE-2019-19449
+ + - f2fs: fix wrong total_sections check and fsmeta check
+ + - f2fs: fix to do sanity check on segment/section count
+ +
* vrf: fix refcnt leak with vxlan slaves (LP: #1945180)
+ - ipv4: Fix device used for dst_alloc with local routes
+ * Check for changes relevant for security certifications (LP: #1945989)
+ - [Packaging] Add a new fips-checks script
+ - [Packaging] Add fips-checks as part of finalchecks
+ * CVE-2021-3759
+ - memcg: enable accounting of ipc resources
+ * Bionic update: upstream stable patchset 2021-09-27 (LP: #1945224)
+ - ARC: Fix CONFIG_STACKDEPOT
+ - can: usb: esd_usb2: esd_usb2_rx_event(): fix the interchange of the CAN RX
+ and TX error counters
+ - Revert "USB: serial: ch341: fix character loss at high transfer rates"
+ - USB: serial: option: add new VID/PID to support Fibocom FG150
+ - usb: dwc3: gadget: Fix dwc3_calc_trbs_left()
+ - usb: dwc3: gadget: Stop EP0 transfers during pullup disable
+ - IB/hfi1: Fix possible null-pointer dereference in _extend_sdma_tx_descs()
+ - c1000e: Fix the max snoop/no-snoop latency for 10M
+ - ip_gre: add validation for csum_start
+ - xgene-v2: Fix a resource leak in the error handling path of `xge_probe()
+ - net: marvell: fix MVNETA_TX_IN_PRGRS bit number
+ - usb: gadget: u_audio: fix race condition on endpoint stop
+ - opp: remove WARN when no valid OPPs remain
+ - virtio: Improve vq->broken access to avoid any compiler optimization
+ - vrng: Use wiiov->used to check for read/write desc order
+ - drm: Copy drm_wait_vblank to user before returning
+ - drm/nouveau/disp: power down unused DP links during init
+ - net/rd: dma_map_sg is entitled to merge entries
+ - vt_kdsetmode: extend console locking
+ - fbmem: add margin check to fb_check_caps()
+ - KVM: x86/mmu: Treat NX as used (not reserved) for all !TDP shadow MMUs
+ - Revert "floppy: reintroduce O_NDELAY fix"
+ - net: qrtr: fix another OOB Read in qrtr_endpoint_post
+ - net: hns3: fix get wrong pfc_en when query PFC configuration
+ - xtensa: fix kconfig unmet dependency warning for HAVE_FUTEX_CMPXCHG
+ - qed: Fix the VF msix vectors flow
+ - net: macb: Add a NULL check on desc_ptp
+ - qedc: Fix memset corruption
+ - perf/x86/intel/pt: Fix mask of num_address_ranges
+ - perf/x86/amd/ibs: Work around erratum #1197
+ - cryptoloop: add a deprecation warning
+ - ARM: 8918/2: only build return_address() if needed
+ - ALSA: pcm: fix divide error in snd_pcm_lib_ioctl
+ - clk: fix build warning for orphan_list
+ - media: stkwebcam: fix memory leak in stk_camera_probe
+ - igmp: Add ip_mc_list lock in ip_check_mc_reu
+ - USB: serial: mos7720: improve OOM-handling in read_mos_reg()
+ - f2fs: fix potential overflow
+ - ath10k: fix recent bandwidth conversion bug
+ - ipv4/icmp: 13ndev: Perform icmp error route lookup on source device routing
+ table (v2)
+ - crypto: talitos - reduce max key size for SECl
+ - powerpc/module64: Fix comment in R_PPC64_ENTRY handling
+ - powerpc/boot: Delete unneeded .globl _zimage_start
+ - net: ll_temac: Remove left-over debug message
+ - mm/page_alloc: speed up the iteration of max_order
+ - Revert "btrfs: compression: don't try to compress if we don't have enough
+ pages"
+ - usb: host: xhci-rcar: Don't reload firmware after the completion
+ - x86/reboot: Limit Dell Optiplex 990 quirk to early BIOS versions
+ - PCI: Call Max Payload Size-related fixup quirks early
+ - regmap: fix the offset of register error log
+ - crypto: mxs-dcp - Check for DMA mapping errors
+ - power: supply: axp288_fuel_gauge: Report register-address on readb / writeb
+ errors
+ - crypto: omap-sham - clear dma flags only after omap_sham_update_dma_stop()
+ - udf: Check LVID earlier
+ - isofs: joliet: Fix iocharset=utf8 mount option
+ - nvme-rdma: don't update queue count when failing to set io queues
+ - power: supply: max17042_battery: fix typo in MAX17042_TOFF
+ - s390/cio: add dev_busid sysfs entry for each subchannel
+ - libata: fix ata_host_start()
+ - crypto: qat - do not ignore errors from enable_vf2pf_comms()
+ - crypto: qat - handle both source of interrupt in VF ISR
+ - crypto: qat - fix reuse of completion variable
+ - crypto: qat - fix naming for init/shutdown VF to PF notifications
+ - crypto: qat - do not export adf_iow_putmsg()
+ - udf_get_extendedattr() had no boundary checks.
+ - m68k: emu: Fix invalid free in nfeth_cleanup()
+ - spi: spi-fsl-dspi: Fix issue with uninitialized dma_slave_config
+ - spi: spi-pic32: Fix issue with uninitialized dma_slave_config
+ - clocksource/drivers/sh_cmt: Fix wrong setting if don't request IRQ for clock
+ source channel
+ - crypto: qat - use proper type for vf_mask
+ - certs: Trigger creation of RSA module signing key if it's not an RSA key
+ - soc: rockchip: ROCKCHIP_GRF should not default to y, unconditionally
+ - media: dvb-usb: fix uninit-value in dvb_usb_adapter_dvb_init
+ - media: dvb-usb: fix uninit-value in vp702x_read_mac_addr
+ - media: go7007: remove redundant initialization
+ - Bluetooth: sco: prevent information leak in sco_conn_defer_accept()
+ - tcp: seq_file: Avoid skipping sk during tcp_seek_last_pos
+ - net: cipso: fix warnings in netbl_cipsov4_add_std
+ - i2c: highlander: add IRQ check
+ - PCI/PM: Avoid forcing PCI_D0 for wakeup reasons inconsistently
+ - PCI/PM: Enable PME if it can be signaled from D3cold
+ - soc: qcom: smm: Fix missed interrupts if state changes while masked
+ - Bluetooth: increase BTNAMSIZ to 21 chars to fix potential buffer overflow
+ - arm64: dts: exynos: correct GIC CPU interfaces address range on Exynos7
+ - Bluetooth: fix repeated calls to sco_sock_kill
+ - drm/msm/dsi: Fix some reference counted resource leaks
+ - usb: gadget: udc: at91: add IRQ check
+ - usb: phy: fsl-usb: add IRQ check
+ - usbl: phy: twl6030: add IRQ checks
+ - Bluetooth: Move shutdown callback before flushing tx and rx queue
+ - usb: host: ohci-tmio: add IRQ check
+ - usb: phy: tahvo: add IRQ check
+ - mac80211: Fix insufficient headroom issue for AMSDU
+ - usb: gadget: mv_u3d: request_irq() after initializing UDC
+ - Bluetooth: add timeout sanity check to hci_inquiry
+ - i2c: iop3xx: fix deferred sanity check
+ - i2c: s3c2410: fix IRQ check
+ - mmc: dw_mmc: Fix issue with uninitialized dma_slave_config
+ - mmc: moxart: Fix issue with uninitialized dma_slave_config
+ - CIFS: Fix a potentially linear read overflow
+ - i2c: mt65xx: fix IRQ check
+ - usb: ehci-orion: Handle errors of clk_prepare_enable() in probe
+ - usb: bdc: Fix an error handling path in 'bdc_probe()' when no suitable DMA
  config is available
+ - tty: serial: fsl_lpuart: fix the wrong mapbase value
+ - ath6kl: wmi: fix an error code in ath6kl_wmi_sync_point()
+ - bcma: Fix memory leak for internally-handled cores
+ - ipv4: make exception cache less predictable
+ - net: sched: Fix qdisc_rate_table refcount leak when get tcf_block failed
+ - net: qcalcmm: fix QCA7000 checksum handling
+ - net: protect netns ID lookups with RCU
+ - tty: Fix data race between tiocsti() and flush_to_ldisc()
+ - x86/resctrl: Fix a maybe-uninitialized build warning treated as error
+ - KVM: x86: Update vCPU's hv_clock before back to guest when tsc_offset is
  adjusted
+ - IMA: remove -Wmissing-prototypes warning
+ - backlight: pwm_bl: Improve bootloader/kernel device handover
+ - clk: kirkwood: Fix a clocking boot regression
+ - fbmem: don't allow too huge resolutions
+ - rtc: tps65910: Correct driver module alias

+ - Bluetooth: avoid circular locks in scc_sock_connect
+ - gpu: drm: amd: amdgpu: amdgpu_i2c: fix possible uninitialized-variable
+ access in amdgpu_i2c_router_select_ddc_port()
+ - ARM: tegra: tamonten: Fix UART pad setting
+ - rpc: fix gss_sve_init cleanup on failure
+ - staging: rts5208: Fix get_ms_information() heap buffer size
+ - gfs2: Don't call dlm after protocol is unmounted
+ - mmc: sdhci-of-arasan: Check return value of non-void funtions
+ - mmc: rtx_pci: Fix long reads when clock is prescaled
+ - selftests/bpf: Enlarge select() timeout for test_maps
+ - cifs: fix wrong release in sess_alloc_buffer() failed path
+ - Revert "USB: xhci: fix U1/U2 handling for hardware with XHCI_INTEL_HOST
+ quirk set"
+ - usb: mush: mush_dsp: request_irq() after initializing musb
+ - usbip: give back URBs for unsent unlink requests during cleanup
+ - usbip:vhci_hcd USB port can get stuck in the disabled state
+ - ASoC: rockchip: i2s: Fix regmap_ops hang
+ - ASoC: rockchip: i2s: Fixup config for DAIFMT_DSP_A/B
+ - parport: remove non-zero check on count
+ - ath9k: fix OOB read ar9300_eeprom_restore_internal
+ - ath9k: fix sleeping in atomic context
+ - net: fix NULL pointer reference in cipso_v4_doi_free
+ - net: w5100: check return value after calling platform_get_resource()
+ - parisc: fix crash with signals and alloca
+ - scsi: BusLogic: Fix missing pr_cont() use
+ - scsi: qla2xxx: Sync queue idx with queue_pair_map idx
+ - cpufreq: powernv: Fix init_chip_info initialization in numa=off
+ - mm/hugetlb: initialize hugetlb_usage in mm_init
+ - memcg: enable accounting for pids in nested pid namespaces
+ - platform/chrome: cros_ec_proto: Send command again when timeout occurs
+ - xen: reset legacy rtc flag for PV domU
+ - bnx2x: Fix enabling network interfaces without VFs
+ - PM: base: power: don't try to use non-existing RTC for storing data
+ - x86/mm: Fix kern_addr_valid() to cope with existing but not present entries
+ - net-caif: avoid user-triggerable WARN_ON(1)
+ - ptp: dp83640: don't define PAGE0
+ - net/l2tp: Fix reference count leak in l2tp_udp_recv_core
+ - r6040: Restore MDIO clock frequency after MAC reset
+ - tipc: increase timeout in tipc_sk_enqueue()
+ - events: Reuse value read using READ_ONCE instead of re-reading it
+ - net/af_unix: fix a data-race in unix_dgram_poll
+ - tcp: fix tp->undo_retrans accounting in tcp_sacktag_one()
+ - mm/memory_hotplug: use "unsigned long" for PFN in zone_for_pfn_range()
+ - dt-bindings: mtd: gpmc: Fix the ECC bytes vs. OOB bytes equation
+ - mfd: Don't use irq_create_mapping() to resolve a mapping
+ - PCI: Add ACS quirks for Cavium multi-function devices
+ - net: usb: cdc_mbim: avoid altsetting toggling for Telit LN920
+ - ethtool: Fix an error code in cxgb2.c
+ - PCI: Sync __pci_register_driver() stub for CONFIG_PCI=n
+ - mtd: rawnd: cafe: Fix a resource leak in the error handling path of 'cafe_nand_probe()'
+ - ARC: export clear_user_page() for modules
+ - net: dsa: b53: Fix calculating number of switch ports
+ - netfilter: socket: icmp6: fix use-after-scope
+ - qlcnic: Remove redundant unlock in qlcenic_pinit_from_rom
+ - net: renesas: sh_eth: Fix freeing wrong tx descriptor
+ - SUNRPC/nfs: Fix return value for nfs4_callback_compound()
+ - usb: mtu3: use @mult for HS isoc or intr
+ - usb: mtu3: fix the wrong HS mult value
+ - lib/mpi: use kcalloc in mpi_resize
+ - media: venus: venc: Fix potential null pointer dereference on pointer fmt
+ - platform/x86: dell-smbios-wmi: Add missing kfree in error-exit from run_smbios_call
+ - f2fs: fix to unmap pages from userspace process in punch_hole()
+ - userfaultfd: prevent concurrent API initialization
+ - arm64/sve: Use correct size when reinitialising SVE state
+ - perf machine: Initialize srcline string member in add_location struct
+ - net/mlx5: Fix potential sleeping in atomic context
+ - net: hns3: pad the short tunnel frame before sending to hardware
+ - mfd: exp20x: Update AXP288 volatile ranges
+ - KVM: arm64: Handle PSCI resets before userspace touches vCPU state
+ - ip_gre: validate csum_start only on pull

+
+\ *\ CVE-2021-40490
+\ - ext4: fix race writing to an inline_data file while its xattrs are changing
+
+\ *\ Bionic update: upstream stable patchset 2021-09-22 (LP: #1944600)
+\ - iio: humidity: hdc100x: Add margin to the conversion time
+\ - iio: adc: Fix incorrect exit of for-loop
+\ - ASoC: intel: atom: Fix reference to PCM buffer address
+\ - i2c: dev: zero out array used for i2c reads from userspace
+\ - ACPI: NFIT: Fix support for virtual SPA ranges
+\ - ASoC: cs42l42: Correct definition of ADC Volume control
+\ - ASoC: cs42l42: Don't allow SND_SOC_DAIFMT_LEFT_J
+\ - ASoC: cs42l42: Fix inversion of ADC Notch Switch control
+\ - ASoC: cs42l42: Remove duplicate control for WNF filter frequency
+\ - net: dsa: mt7530: add the missing RxUnicast MIB counter
+\ - ppp: Fix generating ifname when empty IFLA_IFNAME is specified
+\ - psample: Add a fwd declaration for skbuff
+\ - net: Fix memory leak in ieee802154_raw_deliver
+\ - net: bridge: fix memleak in br_add_if()
+\ - tcp_bbr: fix u32 wrap bug in round logic if bbr_init() called after 2B
+\  packets
+\ - xen/events: Fix race in set_evtchn_to_irq
+\ - vsocx/virtio: avoid potential deadlock when vsocx device remove
+\ - powerpc/kprobes: Fix kprobe Oops happens in booke
+\ - x86/tools: Fix objdump version check again
+\ - x86/resctrl: Fix default monitoring groups reporting
+\ - PCI/MSI: Enable and mask MSI-X early
+\ - PCI/MSI: Do not set invalid bits in MSI mask
+\ - PCI/MSI: Correct misleading comments
+\ - PCI/MSI: Use msi_mask_irq() in pci_msi_shutdown()
+\ - PCI/MSI: Protect msi_desc::masked for multi-MSI
+\ - PCI/MSI: Mask all unused MSI-X entries
+ - PCI/MSI: Enforce that MSI-X table entry is masked for update
+ - PCI/MSI: Enforce MSI[X] entry updates to be visible
+ - vmlinux.lds.h: Handle clang’s module.{c,d}tor sections
+ - mac80211: drop data frames without key on encrypted links
+ - x86/fpu: Make init_fpstate correct with optimized XSAVE
+ - ath: Use safer key clearing with key cache entries
+ - ath9k: Clear key cache explicitly on disabling hardware
+ - ath: Export ath_hw_keysetmac()
+ - ath: Modify ath_key_delete() to not need full key entry
+ - ath9k: Postpone key cache entry deletion for TXQ frames reference it
+ - dmaengine: usb-dmac: Fix PM reference leak in usb_dmac_probe()
+ - ARM: dts: am43x-epos-evm: Reduce i2c0 bus speed for tps65218
+ - dmaengine: of-dma: router_xlate to return -EPROBE_DEFER if controller is not yet available
+ - scsi: megaraid_mm: Fix end of loop tests for list_for_each_entry()
+ - scsi: scsi_dh_rdac: Avoid crash during rdac_bus_attach()
+ - scsi: core: Avoid printing an error if target_alloc() returns -ENXIO
+ - ARM: dts: nomadik: Fix up interrupt controller node names
+ - net: usb: lan78xx: don’t modify phy_device state concurrently
+ - Bluetooth: hidp: use correct wait queue when removing ctrl_wait
+ - dccp: add do-while-0 stubs for dccp_pr_debug macros
+ - vhost: Fix the calculation in vhost_overflow()
+ - bnx: don’t lock the tx queue from napi poll
+ - ptp_pch: Restore dependency on PCI
+ - net: qlcnic: add missed unlock in qlcnic_83xx_flash_read32
+ - net: mdd-mux: Don’t ignore memory allocation errors
+ - net: mdd-mux: Handle -EPROBE_DEFER correctly
+ - mmc: dw_mmc: Fix hang on data CRC error
+ - ALSA: hda - fix the ‘Capture Switch’ value change notifications
+ - ipack: tpci200: fix many double free issues in tpci200_pci_probe
+ - btrfs: prevent rename2 from exchanging a subvol with a directory from different parents
+ - ASoC: intel: atom: Fix breakage for PCM buffer address setup
+ - locks: print a warning when mount fails due to lack of "mand" support
+ - fs: warn about impending deprecation of mandatory locks
+ - netfilter: nft_exthdr: fix endianness of tcp option cast
+ - KVM: X86: MMU: Use the correct inherited permissions to get shadow page
+ - ASoC: cs42i42: Fix LRCLK frame start edge
+ - net: igmp: fix data-race in igmp_ifc_timer_expire()
+ - net: dsa: lan9303: fix broken backpressure in .port_fdb_dump
+ - genirq: Provide IRQCHIP_AFFINITY_PRE_STARTUP
+ - x86/msi: Force affinity setup before startup
+ - x86/ioapic: Force affinity setup before startup
+ - genirq/msi: Ensure deactivation on teardown

+linux (4.15.0-159.167) bionic; urgency=medium
+
+ * Packaging resync (LP: #1786013)
+ - debian/dkms-versions -- update from kernel-versions (main/2021.09.06)
+
+ * dell300x: rsi wifi and bluetooth crash after suspend and resume
+ (LP: #1940488)
+ - Revert "rsi: Use resume_noirq for SDIO"
+
+ * LRMv5: switch primary version handling to kernel-versions data set
+ (LP: #1928921)
+ - [Packaging] switch to kernel-versions
+
+ * kvm_unit_tests: emulator test fails on 4.4 / 4.15 kernel, timeout
+ (LP: #1932966)
+ - kvm: Add emulation for movups/movupd
+
+ * memory leaking when removing a profile (LP: #1939915)
+ - security/apparmor/label.c: Clean code by removing redundant instructions
+ - apparmor: Fix memory leak of profile proxy
+
+ * ubuntu_kernel_selftests: memory-hotplug: avoid spaming logs with
+ dump_page() (LP: #1941829)
+ - selftests: memory-hotplug: avoid spaming logs with dump_page(), ratio limit
+ - hot-remove error test
+
+ * Bionic update: upstream stable patchset 2021-08-27 (LP: #1941916)
+ - btrfs: mark compressed range uptodate only if all bio succeed
+ - regulator: rt5033: Fix n_voltages settings for BUCK and LDO
+ - r8152: Fix potential PM refcount imbalance
+ - qed: fix possible unpaired spin_{un}lock_bh in _qed_mcp_cmd_and_union()
+ - net: Fix zero-copy head len calculation.
+ - Revert "Bluetooth: Shutdown controller after workqueues are flushed or
+ cancelled"
+ - KVM: do not allow mapping valid but non-reference-counted pages
+ - Revert "watchdog: TCO_wdt: Account for rebooting on second timeout"
+ - spi: mediatek: Fix fifo transfer
+ - padata: validate cpumask without removed CPU during offline
+ - Revert "ACPICA: Fix memory leak caused by _CID repair function"
+ - ALSA: seq: Fix racy deletion of subscriber
+ - clk: stm32f4: fix post divisor setup for I2S/SAI PLLs
+ - omap5-board-common: remove not physically existing vdds_lv8_main fixed-
+ regulator
+ - scsi: sr: Return correct event when media event code is 3
+ - media: videobuf2-core: dequeue if start_streaming fails
+ - net: natsemi: Fix missing pci_disable_device() in probe and remove
+ - nfp: update ethtool reporting of pauseframe control
+ - mips: Fix non-POSIX regexp
+ - bnx2x: fix an error code in bnx2x_nic_load()
+ - net: pegasus: fix uninit-value in get_interrupt_interval
+ - net: fec: fix use-after-free in fec_drv_remove
+ - net: vxge: fix use-after-free in vxge_device_unregister
+ - Bluetooth: defer cleanup of resources in hci_unregister_dev()
+ - USB: usbtc: Fix RCU stall warning
+ - USB: serial: option: add Telit FD980 composition 0x1056
+ - USB: serial: ch341: fix character loss at high transfer rates
+ - usb: gadget: f_hid: added GET_IDE and SET_IDE handlers
+ - usb: gadget: f_hid: fixed NULL pointer dereference
+ - usb: gadget: f_hid: idle uses the highest byte for duration
+ - usb: otc-tsm: Fix hrtimer list corruption
+ - scripts/tracing: fix the bug that can’t parse raw_trace_func
+ - staging: rtl8723bs: Fix a resource leak in sd_int_dpc
+ - media: rtl28xxu: fix zero-length control request
+ - pipe: increase minimum default pipe size to 2 pages
+ - ext4: fix potential htree corruption when growing large_dir directories
+ - serial: 8250: Mask out floating 16/32-bit bus bits
+ - MIPS: Malta: Do not byte-swap accesses to the CBUS UART
+ - pcni: i82092: fix a null pointer dereference bug
+ - spi: meson-spicc: fix memory leak in meson_spicc_remove
+ - perf/x86/amd: Don’t touch the AMD64_EVENTSEL_HOSTONLY bit inside the guest
+ - qmi_wwan: add network device usage statistics for qmimux devices
+ - libata: fix ata_pio_sector for CONFIG_HIGHMEM
+ - reiserfs: add check for root_inode in reiserfs_fill_super
+ - reiserfs: check directory items on read from disk
+ - alpha: Send stop IPI to send to online CPUs
+ - net/qla3xxx: fix schedule while atomic in ql_wait_for_drvr_lock and
- ql_adapter_reset
+ - USB:ehci:fix Kunpeng920 ehci hardware problem
+ - ppp: Fix generating ppp unit id when iface is not specified
+ - ovfl: prevent private clone if bind mount is not allowed
+ - net: xilinx_emaclite: Do not print real IOMEM pointer
+ - KVM: x86: accept userspace interrupt only if no event is injected
+ - KVM: x86/mmu: Fix per-cpu counter corruption on 32-bit builds
+ * Bionic update: upstream stable patchset 2021-08-17 (LP: #1940315)
+ - selftest: fix build error in tools/testing/selftests/vm/userfaultfd.c
+ - KVM: x86: determine if an exception has an error code only when injecting
+ it.
+ - net: split out functions related to registering inflight socket files
+ - [Config] updateconfigs for UNIX_SCM
+ - af_unix: fix garbage collect vs MSG_PEEK
+ - net/802/mrp: fix memleak in mrp_request_join()
+ - net/802/garp: fix memleak in garp_request_join()
+ - net: annotate data race around sk_ll_usec
+ - sctp: move 198 addresses from unusable to private scope
+    - hfs: add missing clean-up in hfs_fill_super
+    - hfs: fix high memory mapping in hfs_bnode_read
+    - hfs: add lock nesting notation to hfs_find_init
+    - ARM: dts: versatile: Fix up interrupt controller node names
+    - virtio_net: Do not pull payload in skb->head
+    - gro: ensure frag0 meets IP header alignment
+    - x86/kvm: fix vcpu-id indexed array sizes
+    - ocfs2: fix zero out valid data
+    - ocfs2: issue zeroout to EOF blocks
+    - can: raw: raw_setsockopt(): fix raw_rcv panic for sock UAF
+    - can: mcb_a_usb_start(): add missing urb->transfer_dma initialization
+    - can: usb_8dev: fix memory leak
+    - can: ems_usb: fix memory leak
+    - can: esd_usb2: fix memory leak
+    - NIU: fix incorrect error return, missed in previous revert
+    - nfc: nfcsim: fix use after free during module unload
+    - x86/asm: Ensure asm/proto.h can be included stand-alone
+    - cfg80211: Fix possible memory leak in function cfg80211_bss_update
+    - netfilter: conntrack: adjust stop timestamp to real expiry value
+    - netfilter: nft_nat: allow to specify layer 4 protocol NAT only
+    - tipc: fix sleeping in tipc accept routine
+    - mlx4: Fix missing error code in mlx4_load_one()
+    - net: llc: fix skb_over_panic
+    - net/mlx5: Fix flow table chaining
+    - scctp: fix return value check in __scctp_rcv_asconf_lookup
+    - tulip: windbond-840: Fix missing pci_disable_device() in probe and remove
+    - sis900: Fix missing pci_disable_device() in probe and remove
+    - can: hi311x: fix a signedness bug in hi3110_cmd()
+    - i40e: Fix log TC creation failure when max num of queues is exceeded
+    - i40e: Add additional info to PHY type error
+
+  * Bionic update: upstream stable patchset 2021-08-13 (LP: #1939913)
+    - ARM: dts: gemini: add device_type on pci
+    - ARM: dts: rockchip: fix pinctrl sleep nodename for rk3036-kylin and rk3288
+    - arm64: dts: rockchip: fix pinctrl sleep nodename for rk3399.dtsi
+    - ARM: dts: rockchip: Fix the timer clocks order
+    - ARM: dts: rockchip: Fix power-controller node names for rk3288
+    - arm64: dts: rockchip: Fix power-controller node names for rk3328

+ - staging: rtl8723bs: fix macro value for 2.4Ghz only device
+ - intel_th: Wait until port is in reset before programming it
+ - i2c: core: Disable client irq on reboot/shutdown
+ - lib/decompress_unlz4.c: correctly handle zero-padding around initrds.
+ - pwm: spear: Don't modify HW state in .remove callback
+ - power: supply: ab8500: Avoid NULL pointers
+ - power: supply: max17042: Do not enforce (incorrect) interrupt trigger type
+ - power: reset: gpio-poweroff: add missing MODULE_DEVICE_TABLE
+ - ARM: 9087/1: kprobes: test-thumb: fix for LLVM_IAS=1
+ - watchdog: Fix possible use-after-free in wdt_startup()
+ - watchdog: sc520_wdt: Fix possible use-after-free in wdt_turnoff()
+ - watchdog: Fix possible use-after-free by calling del_timer_sync()
+ - watchdog: iTCO_wdt: Account for rebooting on second timeout
+ - x86/fpu: Return proper error codes from user access functions
+ - orangefs: fix orangefs df output.
+ - ceph: remove bogus checks and WARN_ONs from ceph_set_page_dirty
+ - NFS: nfs_find_open_context() may only select open files
+ - power: supply: charger-manager: add missing MODULE_DEVICE_TABLE
+ - power: supply: ab8500: add missing MODULE_DEVICE_TABLE
+ - pwm: tegra: Don't modify HW state in .remove callback
+ ACPI: AMBA: Fix resource name in /proc/iomem
+ ACPI: video: Add quirk for the Dell Vostro 3350
+ virtio-blk: Fix memory leak among suspend/resume procedure
+ virtio_net: Fix error handling in virtnet_restore()
+ virtio_console: Assure used length from device is limited
+ i2fs: add MODULE_SOFTDEP to ensure crc32 is included in the initramfs
+ PCI/sysfs: Fix dsm_label_utf16s_to_utf8s() buffer overrun
+ power: supply: rt5033_battery: Fix device tree enumeration
+ um: fix error return code in slip_open()
+ um: fix error return code in winch_tramp()
+ watchdog: aspeed: fix hardware timeout calculation
+ nfs: fix acl memory leak of posix_acl_create()
+ ubifs: Set/Clear I_LINKABLE under i_lock for whiteout inode
+ x86/fpu: Limit xstate copy size in xstatergs_set()
+ ALSA: isa: Fix error return code in snd_cmi8330_probe()
+ NFSv4/pNFS: Don't call _nfs4_pnfs_v3_ds_connect multiple times
+ hexagon: use common DISCARDS macro
+ reset: a10sr: add missing of_match_table reference
+ ARM: dts: exynos: fix PWM LED max brightness on Odroid XU/XU3
+ ARM: dts: exynos: fix PWM LED max brightness on Odroid XU4
+ memory: atmel-ebi: add missing of_node_put for loop iteration
+ rtc: fix snprintf() checking in is_rtc_hctosys()
+ ARM: dts: r8a7779, marzen: Fix DU clock names
+ ARM: dts: BCM5301X: Fixup SPI binding
+ reset: bail if try_module_get() fails
+ memory: fsl_ifc: fix leak of IO mapping on probe failure
+ memory: fsl_ifc: fix leak of private memory on probe failure
+ ARM: dts: am335x: align ti,pindir-d0-out-d1-in property with dt-shema
+ scsi: be2iscsi: Fix an error handling path in beiscsi_dev_probe()
+ mips: always link byteswap helpers into decompressor
+ mips: disable branch profiling in boot/decompress.o
+ MIPS: vds0: Invalid GIC access through VDSO
+ net: bridge: multicast: fix PIM hello router port marking race
+ ALSA: usb-audio: Fix OOB access at proc output
+ iio: light: tcs3472: do not free unallocated IRQ
+ rsi: fix AP mode with WPA failure due to encrypted EAPOL
+ evm: Execute evm_inode_init_security() only when an HMAC key is loaded
+ evm: fix writing <securityfs>/evm overfow
+ wcn36xx: Move hal_buf allocation to devm_kmalloc in probe
+ ssb: Fix error return code in ssb_bus_scan()
+ brcmfbmac: fix setting of station info chains bitmask
+ ipv6: exthdr: do not blindly use init_net
+ i40e: Fix autoneg disabling for non-10GBaseT links
+ ipv6: fix out-of-bound access in ip6_parse_tlv()
+ iio: light: tcs3472: Fix buffer alignment in
+ iio_push_to_buffers_with_timestamp()
+ ASoC: rsnd: tidyup loop on rsnd_adg_clk_query()
+ visorbus: fix error return code in visorchipset_init()
+ - serial: 8250: Actually allow UPF_MAGIC_MULTIPLIER baud rates
+ - powerpc: Offline CPU in stop_this_cpu()
+ - serial: mvebu-uart: correctly calculate minimal possible baudrate
+ - arm64: dtb: marvell: armada-37xx: Fix reg for standard variant of UART
+ - vfio/pci: Handle concurrent vma faults
+ - clocksource/arm_arch_timer: Improve Allwinner A64 timer workaround
+ - PCI: Leave Apple Thunderbolt controllers on for s2idle or standby
+ - media: subdev: disallow ioctl for saa6588/davinci
+ - ARM: dtb: exynos: fix PWM LED max brightness on Odroid HC1
+ - ARM: dtb: am437x: align ti,pindir-d0-out-d1-in property with dt-shema
+ * Bionic update: upstream stable patchset 2021-07-20 (LP: #1936960)
+ - include/linux/mmdebug.h: make VM_WARN* non-rvals
+ - mm: add VM_WARN_ON_ONCE_PAGE() macro
+ - mm/rmap: remove unneeded semicolon in page_not_mapped()
+ - mm/rmap: use page_not_mapped in try_to_unmap()
+ - mm/thp: try_to_unmap() use TTU_SYNC for safe splitting
+ - mm/thp: fix vma_address() if virtual address below file offset
+ - mm/thp: fix page_address_in_vma() on file THP tails
+ - mm: thp: replace DEBUG_VM BUG with VM_WARN when unmap fails for split
+ - mm: page_vma_mapped_walk(): use page for pvmw->page
+ - mm: page_vma_mapped_walk(): settle PageHuge on entry
+ - mm: page_vma_mapped_walk(): use pmde for *pvmw->pmd
+ - mm: page_vma_mapped_walk(): prettify PVMW_MIGRATION block
+ - mm: page_vma_mapped_walk(): crossing page table boundary
+ - mm: page_vma_mapped_walk(): add a level of indentation
+ - mm: page_vma_mapped_walk(): use goto instead of while (1)
+ - mm: page_vma_mapped_walk(): get vma_address_end() earlier
+ - mm/thp: fix page_vma_mapped_walk() if THP mapped by ptes
+ - mm/thp: another PVMW_SYNC fix in page_vma_mapped_walk()
+ - mm, futex: fix shared futex pgoff on shm huge page
+ - scsi: sr: Return appropriate error code when disk is ejected
+ - drm/newveau: fix dma_address check for CPU/GPU sync
+ - kfifo: DECLARE_KIFO_PTR(fifo, u64) does not work on arm 32 bit
+ - kthread_worker: split code for canceling the delayed work timer
+ - kthread: prevent deadlock when kthread_mod_delayed_work() races with
  kthread_cancel_delayed_work_sync()
+ - xen/events: reset active flag for lateeoi events later
+ - ARM: dtb: imx6qdl-sabresd: Remove incorrect power supply assignment
+ - ARM: OMAP: replace setup_irq() by request_irq()
+ - clocksource/drivers/timer-ti-dm: Add clockevent and clocksource support
+ - clocksource/drivers/timer-ti-dm: Prepare to handle dra7 timer wrap issue
+ * Bionic update: upstream stable patchset 2021-07-14 (LP: #1936231)
- Revert "UBUNTU: SAUCE: Revert "proc: Check /proc/$pid/attr/ writes against file opener"
- proc: Track /proc/$pid/attr/ opener mm_struct
- net/ncf/rawsock.c: fix a permission check bug
- ASoC: sti-sas: add missing MODULE_DEVICE_TABLE
- isdn: mlISDN: netjet: Fix crash in nj_probe:
- bonding: init notify_work earlier to avoid uninitialized use
- netlink: disable IRQs for netlink_lock_table()
- net: mtdbus: get rid of a BUG_ON()
- cgroup: disable controllers at parse time
- wq: handle VM suspension in stall detection
- net/qla3xxx: fix schedule while atomic in ql_sem_spinlock
- scsi: vmw_pvscsi: Set correct residual data length
- scsi: target: qla2xxx: Wait for stop_phase1 at WWN removal
- net: mach: ensure the device is available before accessing GEMGXL control registers
- net: appletalk: cops: Fix data race in cops_probe1
- MIPS: Fix kernel hang under FUNCTION_GRAPH_TRACER and PREEMPT_TRACER
- bnx2x: Fix missing error code in bnx2x_xiov_init_one()
- powerpe/fsl: set fsl,i2c-erratum-a004447 flag for P2041 i2c controllers
- powerpe/fsl: set fsl,i2c-erratum-a004447 flag for P1010 i2c controllers
- i2c: mpc: Make use of i2c_recover_bus()
- i2c: mpc: implement erratum A-004447 workaround
- drm: Fix use-after-free read in drm_getunique()
- drm: Lock pointer access in drm_master_release()
- kvm: avoid speculation-based attacks from out-of-range memslot accesses
- staging: rtl8723bs: Fix uninitialized variables
- btrfs: return value from btrfs_mark_extent_written() in case of error
- cgroup1: don't allow 'u' in renaming
- USB: f_ncm: ncm_bitrate (speed) is unsigned
- usb: dwc3: ep0: fix NULL pointer exception
- usb: typec: ucsi: Clear PPM capability data in ucsi_init() error path
- usb: gadget: f_fs: Ensure io_completion_wq is idle during unbind
- USB: serial: omninet: add device id for Zyxel Omni 56K Plus
- USB: serial: quatech2: fix control-request directions
- usb: gadget: eem: fix wrong eem header operation
- usb: fix various gadgets null ptr deref on 10gbps cabling.
- usb: fix various gadget panics on 10gbps cabling
- regulator: core: resolve supply for boot-on/always-on regulators
- regulator: max77620: Use device_set_of_node_from_dev()
- perf: Fix data race between pin_count increment/decrement
- NFS: Fix a potential NULL dereference in nfs_get_client()
- perf session: Correct buffer copying when peeking events
- kvm: fix previous commit for 32-bit builds
- NFS: Fix use-after-free in nfs4_init_client()
- NFSv4: nfs4_proc_set_acl needs to restore NFS_CAP_UIDGID_NOMAP on error.
- scsi: core: Fix error handling of scsi_host_alloc()
+ - scsi: core: Put .shost_dev in failure path if host state changes to RUNNING
+ - scsi: core: Only put parent device if host state differs from SHOST_CREATED
+ - ftrace: Do not blindly read the ip address in ftrace_bug()
+ - tracing: Correct the length check which causes memory corruption
+ - proc: only require mm_struct for writing
+ - scsi: bnx2fc: Return failure if io_req is already in ABTS processing
+ - ARM: dts: imx6qdl-sabresd: Assign corresponding power supply for LDOs
+ - usb: f_ncm: only first packet of aggregate needs to start timer
+ - usb: pd: Set PD_T_SINK_WAIT_CAP to 310ms
+ - RDMA/mlx4: Do not map the core_clock page to user space unless enabled
+ - vmlinux.lds.h: Avoid orphan section with !SMP
+ - sched/fair: Make sure to update tg contrib for blocked load
+ - net: ieee802154: fix null deref in parse dev addr
+ - HID: hid-sensor-hub: Return error for hid_set_field() failure
+ - HID: Add BUS_VIRTUAL to hid_connect logging
+ - HID: usbhid: fix info leak in hid_submit_ctrl
+ - ARM: OMAP2+: Fix build warning when mmc_omap is not built
+ - HID: gt683r: add missing MODULE_DEVICE_TABLE
+ - gfs2: Fix use-after-free in gfs2_glock_shrink_scan
+ - scsi: target: core: Fix warning on realtime kernels
+ - ethernet: myri10ge: Fix missing error code in myri10ge_probe()
+ - nvme-loop: reset queue count to 1 in nvme_loop_destroy_io_queues()
+ - nvme-loop: clear NVME_LOOP_Q_LIVE when nvme_loop_configure_admin_queue() fails
+ - nvme-loop: check for NVME_LOOP_Q_LIVE in nvme_loop_destroy_admin_queue()
+ - net: ipconfig: Don't override command-line hostnames or domains
+ - rtnetlink: Fix missing error code in rtnl_bridge_notify()
+ - net/x25: Return the correct errno code
+ - net: Return the correct errno code
+ - fib: Return the correct errno code
+ - dmaengine: ALTERA_MSGDMA depends on HAS_IOMEM
+ - dmaengine: QCOM_HIDMA_MGMT depends on HAS_IOMEM
+ - dmaengine: stedma40: add missing iounmap() on error in d40_probe()
+ - mm/memory-failure: make sure wait for page writeback in memory_failure
+ - batman-adv: Avoid WARN_ON timing related checks
+ - net: ipv4: fix memory leak in netlbl_cipsov4_add_std
+ - net: rds: fix memory leak in rds_recvmsg
+ - udp: fix race between close() and udp_abort()
+ - rtnetlink: Fix regression in bridge VLAN configuration
+ - netfilter: synproxy: Fix out of bounds when parsing TCP options
+ - alx: Fix an error handling path in 'alx_probe()'
+ - net: stmmac: dmac1000: Fix extended MAC address registers definition
+ - qlcnic: Fix an error handling path in 'qlcnic_probe()'
+ - netxen_nic: Fix an error handling path in 'netxen_nic_probe()'
+ - net: cdc_ncm: switch to eth%d interface naming
+ - net: usb: fix possible use-after-free in smsc75xx_bind
+ - net: ipv4: fix memory leak in ip_mc_add1_src
+ - net/af_unix: fix a data-race in unix_dgram_sendmsg / unix_release_sock
- be2net: Fix an error handling path in 'be_probe()'
- net: hamradio: fix memory leak in mkiss_close
- net: cdc_eem: fix tx fixup skb leak
- icmp: don't send out ICMP messages with a source address of 0.0.0.0
- net: ethernet: fix potential use-after-free in ec_bhf_remove
- radeon: use memcpymo_to/fromio for UVD fw upload
- hwmon: (scpi-hwmon) shows the negative temperature properly
- can: bcm: fix infoleak in struct bcm_msg_head
- can: mcba_usb: fix memory leak in mcba_usb
- usb: core: hub: Disable autosuspend for Cypress CY7C65632
- tracing: Do not stop recording cmdlines when tracing is off
- tracing: Do not stop recording comms if the trace file is being read
- tracing: Do no increment trace_clock_global() by one
- PCI: Mark TI C667X to avoid bus reset
- PCI: Mark some NVIDIA GPUs to avoid bus reset
- PCI: Add ACS quirk for Broadcom BCM57414 NIC
- PCI: Work around Huawei Intelligent NIC VF FLR erratum
- ARCv2: save ABI registers across signal handling
- dmaengine: pl330: fix wrong usage of spinlock flags in dma_cycle
- net: bridge: fix vlan tunnel dst null pointer dereference
- net: bridge: fix vlan tunnel dst refcnt when egressing
- mm/slub.c: include swab.h
- net: fec_ptp: add clock rate zero check
- can: bcm/raw/isotp: use per module netdevice notifier
- inet: use bigger hash table for IP ID generation
- usb: dwc3: core: fix kernel panic when do reboot
- x86/fpu: Reset state for all signal restore failures
- drm/nouveau: wait for moving fence after pinning v2
- drm/radeon: wait for moving fence after pinning
- ARM: 9081/1: fix gcc-10 thumb2-kernel regression
- Makefile: Move -Wno-unused-but-set-variable out of GCC only block
- MIPS: generic: Update node names to avoid unit addresses
- Revert "PCI: PM: Do not read power state in pci_enable_device_flags()"
- mac80211: remove warning in ieee80211_get_sband()
- cfg80211: call cfg80211_leave_ocb when switching away from OCB
- mac80211: drop multicast fragments
- ping: Check return value of function 'ping_queue_rcv_skb'
- inet: annotate date races around sk->sk_txhash
- net: caif: fix memory leak in ldisc_open
- net/packet: annotate accesses to po->bind
- net/packet: annotate accesses to po->ifindex
- r8152: Avoid memcpym() over-reading of ETH_SS_STATS
- sh_eth: Avoid memcpym() over-reading of ETH_SS_STATS
- r8169: Avoid memcpym() over-reading of ETH_SS_STATS
- net: qed: Fix memcpym() overflow of qed_dcbx_params()
- net: li_temac: Avoid ndo_start_xmit returning NETDEV_TX_BUSY
- pinctrl: stm32: fix the reported number of GPIO lines per bank
- nilfs2: fix memory leak in nilfs_sysfs_delete_device_group
+ - i2c: robotfuzz-osif: fix control-request directions
+ - scsi: scsi_devinfo: Add blacklist entry for HPE OPEN-V
+ - net/mlx5e: Remove dependency in IPsec initialization flows
+ - net: add documentation to socket.c
+ - net: make get_net_ns return error if NET_NS is disabled
+ - net: qrtr: fix OOB Read in qrtr_endpoint_post
+ - ptp: ptp_clock: Publish scaled_ppm_to_ppb
+ - ptp: improve max_adj check against unreasonable values
+ - net: fec_ptp: fix issue caused by refactor the fec_devtype
+ - ASoC: rt5659: Fix the lost powers for the HDA header
+ - cfg80211: make certificate generation more robust
+ - mm/slub: clarify verification reporting
+ - net: ethtool: clear heap allocations for ethtool function
+ - PCI: Add AMD RS690 quirk to enable 64-bit DMA

  - ALSA: line6: Fix racy initialization of LINE6 MIDI
  - ALSA: usb-audio: Validate MS endpoint descriptors
  - ALSA: bebob/oxfw: fix Kconfig entry for Mackie d.2 Pro
  - Revert "ALSA: sb8: add a check for request_region"
  - Revert "rapidio: fix a NULL pointer dereference when create_workqueue() fails"
  - rapidio: handle create_workqueue() failure
  - xen-pciback: reconfigure also from backend watch handler
  - dm snapshot: fix crash with transient storage and zero chunk size
  - Revert "video: hgafb: fix potential NULL pointer dereference"
  - Revert "net: stmicro: fix a missing check of clk_prepare"
  - Revert "leds: lp5523: fix a missing check of return value of lp55xx_read"
  - Revert "hvmem: (lm80) fix a missing check of bus read in lm80 probe"
  - Revert "video: imsttfb: fix potential NULL pointer dereferences"
+ - Revert "ecryptfs: replace BUG_ON with error handling code"
+ - Revert "gdrom: fix a memory leak bug"
+ - cdrom: gdrom: deallocate struct gdrom_unit fields in remove_gdrom
+ - cdrom: gdrom: initialize global variable at init time
+ - Revert "media: rcar_drif: fix a memory disclosure"
+ - Revert "rtlwifi: fix a potential NULL pointer dereference"
+ - Revert "qlcnic: Avoid potential NULL pointer dereference"
+ - Revert "niu: fix missing checks of niu_pci_eeprom_read"
+ - ethernet: sun: niu: fix missing checks of niu_pci_eeprom_read()
+ - net: stmicro: handle clk_prepare() failure during init
+ - net: rtlwifi: properly check for alloc_workqueue() failure
+ - leds: lp5523: check return value of lp5xx_read and jump to cleanup code
+ - qlcnic: Add null check after calling netdev_alloc_skb
+ - video: hgafb: fix potential NULL pointer dereference
+ - vgacm: Record video mode changes with VT_RESIZEX
+ - vt: Fix character height handling with VT_RESIZEX
+ - tty: vt: always invoke vc->vc_sw->con_resize callback
+ - video: hgafb: correctly handle card detect failure during probe
+ - Bluetooth: SMP: Fail if remote and local public keys are identical
+ - firmware: arm_scpi: Prevent the ternary sign expansion bug
+ - platform/x86: dell-smbios-wmi: Fix oops on rmmod dell_smbios
+ - locking/mutex: clear MUTEX_FLAGS if wait_list is empty due to signal
+ - ALSA: hda/realtek: Add some CLOVE SSIDs of ALC293
+ - Revert "serial: mvebu-uart: Fix to avoid a potential NULL pointer dereference"
+ - mm, vmstat: drop zone->lock in /proc/pagetypeinfo
+ - usb: dwc3: gadget: Enable suspend events
+ - NFC: nci: fix memory leak in nci_allocate_device
+ - NFSv4: Fix a NULL pointer dereference in pnfs_mark_matching_lsegs_return()
+ - iommu/vt-d: Fix sysfs leak in alloc_iommu()
+ - perf intel-pt: Fix sample instruction bytes
+ - perf intel-pt: Fix transaction abort handling
+ - proc: Check /proc/Spid/attr/ writes against file opener
+ - net: hso: fix control-request directions
+ - mac80211: assure all fragments are encrypted
+ - mac80211: prevent mixed key and fragment cache attacks
+ - mac80211: properly handle A-MSDUs that start with an RFC 1042 header
+ - cfg80211: mitigate A-MSDU aggregation attacks
+ - mac80211: drop A-MSDUs on old ciphers
+ - mac80211: add fragment cache to sta_info
+ - mac80211: check defrag PN against current frame
+ - mac80211: prevent attacks on TKIP/WEP as well
+ - mac80211: do not accept/forward invalid EAPOL frames
+ - ath10k: Validate first subframe of A-MSDU before processing the list
+ - dm snapshot: properly fix a crash when an origin has no snapshots
+ - kgdb: fix gcc-11 warnings harder
+ - misc/uss720: fix memory leak in uss720_probe
+ - thunderbolt: dma_port: Fix NVM read buffer bounds and offset issue
+ - mei: request autosuspend after sending rx flow control
+ - staging: iio: cdc: ad7746: avoid overwrite of num_channels
+ - iio: adc: ad7793: Add missing error code in ad7793_setup()
+ - USB: trancevibrator: fix control-request direction
+ - serial: sh-sci: Fix off-by-one error in FIFO threshold register setting
+ - serial: rp2: use 'request_firmware' instead of 'request_firmware_nowait'
+ - USB: iio: adc: ad7793: Add missing error code in ad7793_setup()
+ - USB: serial: ti_usb_3410_5052: add startech.com device id
+ - USB: serial: option: add Telit LE910-S1 compositions 0x7010, 0x7011
+ - USB: serial: pl2303: add device id for ADLINK ND-6530 GC
+ - usb: gadget: udc: renesas_usb3: Fix a race in usb3_start_pipen()
+ - net: usb: fix memory leak in smsc75xx_bind
+ - Bluetooth: cmtp: fix file refcount when cmtp_attach_device fails
+ - NFS: fix an incorrect limit in filelayout_decode_layout()
+ - NFS: Don't corrupt the value of pg_bytes_written in nfs_do_recoalesce()
+ - NFSv4: Fix v4.0/v4.1 SEEK_DATA return -ENOTSUPP when set NFS_V4_2 config
+ - drm/meson: fix shutdown crash when component not probed
+ - net/mlx4: Fix EEPROM dump support
+ - Revert "net:tipc: Fix a double free in tipc_sk_mcast_rcv"
+ - tipc: skb_linearize the head skb when reassembling msgs
+ - i2c: s3c2410: fix possible NULL pointer deref on read message after write
+ - i2c: i801: Don't generate an interrupt on bus reset
+ - perf jevents: Fix getting maximum number of fds
+ - platform/x86: hp_accel: Avoid invoking _INI to speed up resume
+ - serial: max310x: unregister uart driver in case of failure and abort
+ - net: fujitsu: fix potential null-ptr-deref
+ - net: caif: remove BUG_ON(dev == NULL) in caif_xmit
+ - char: hpet: add checks after calling ioremap
+ - isdn: mISDNinfineon: check/cleanup ioremap failure correctly in setup_io
+ - dmaengine: qcom_hidma: comment platform_driver_register call
+ - libertas: register sysfs groups properly
+ - media: dvb: Add check on sp8870_readreg return
+ - media: gspca: properly check for errors in po1030_probe()
+ - scsi: BusLogic: Fix 64-bit system enumeration error for Buslogic
+ - openrisc: Define memory barrier mb
+ - btrfs: do not BUG_ON in link_to_fixup_dir
+ - platform/x86: hp-wireless: add AMD's hardware id to the supported list
+ - platform/x86: intel_punit_ipc: Append MODULE_DEVICE_TABLE for ACPI
+ - SMB3: incorrect file id in requests compounded with open
+ - drm/amdgp: Fix a use-after-free
+ - net: netcp: Fix an error message
+ - net: mdio: thunder: Fix a double free issue in .remove function
+ - net: mdio: octeon: Fix some double free issues
+ - net: bnx2: Fix error return code in bnx2_init_board()
+ - mld: fix panic in mld_newpack()
+ - staging: emxx_uvc: fix loop in _nbu2ss_nuke()
+ - ASoC: cs35133: fix an error code in probe()
+ - bpf: Set mac_len in bpf_skb_change_head
+ - ixgbe: fix large MTU request from VF
+ - scsi: libelas: Use_safe() loop in sas_resume_port()
+ - ipv6: record frag_max_size in atomic fragments in input path
+ - sch_dsmark: fix a NULL deref in qdisc_reset()
+ - MIPS: alchemy: xxss1500: add gpio-au1000.h header file
+ - MIPS: ralink: export rt_sysc_membase for rt2880_wdt.c
+ - hugetlbfs: hugetlb_fault_mutex_hash() cleanup
+ - drivers/net/ethernet: clean up unused assignments
+ - usb: core: reduce power-on-good delay time of root hub
+ - USB: usbfs: Don't WARN about excessively large memory allocations
+ - bpf: extend is_branch_taken to registers
+ - bpf: Move off_reg into sanitize_ptr_alu
+ - bpf: Ensure off_reg has no mixed signed bounds for all types
+ - bpf: Rework ptr_limit into alu_limit and add common error path
+ - bpf: Improve verifier error messages for users
+ - bpf: Refactor and streamline bounds check into helper
+ - bpf: Move sanitize_val_alu out of op switch
+ - bpf: Tighten speculative pointer arithmetic mask
+ - bpf: Fix leakage of uninitialized bpf stack under speculation
+ - bpf: Wrap aux data inside bpf-sanitize_info container
+ - bpf: No need to simulate speculative domain for immediates
+ - net: dsa: fix a crash if ->get_sset_count() fails
+ - drm/amd/amdgpus: fix refcount leak
+ - net: dsa: fix error code getting shifted with 4 in dsa_slave_get_sset_count
+ - openvswitch: meter: fix race when getting now_ms.
+ - net: hns3: check the return of skb_checksum_help()
+ - Bionic update: upstream stable patchset 2021-06-11 (LP: #1931740) // CVE-2020-24587 for such cases.
+ - mac80211: extend protection against mixed key and fragment cache attacks
+ * [82A1, Realtek ALC287, Speaker, Internal] Underruns, dropouts or crackling
  sound (LP: #1925057) // Bionic update: upstream stable patchset 2021-06-11
+ (LP: #1931740)
+ - ALSA: hda/realtek: reset eapd coeff to default value for alc287
+ * test_map in ubuntu_bpf failed with "Allowed update sockmap '0:3' not in
  ESTABLISHED" (LP: #1839912)
+ - SAUCE: Revert "bpf: test_maps, only support ESTABLISHED socks"
+ * Bionic update: upstream stable patchset 2021-06-01 (LP: #1930472)
+ - MIPS: Introduce isa-rev.h to define MIPS_ISA_REV
+ - MIPS: cpu-features.h: Replace __mips_isa_rev with MIPS_ISA_REV
+ - s390/disassembler: increase ebpf disasm buffer size
+ - ACPI: custom_method: fix potential use-after-free issue
+ - ACPI: custom_method: fix a possible memory leak
+ - arm64: dts: mt8173: fix property typo of 'phys' in dsi node
+ - ecryptfs: fix kernel panic with null dev_name
+ - spi: spi-ti-qspi: Free DMA resources
+ - mmc: block: Update ext_csd.cache_ctrl if it was written
+ - mmc: core: Do a power cycle when the CMD11 fails
+ - mmc: core: Set read only for SD cards with permanent write protect bit
+ - cifs: Return correct error code from smb2_get_enc_key
+ - btrfs: fix metadata extent leak after failure to create subvolume
+ - intel_th: pci: Add Rocket Lake CPU support
+ - fbdev: zero-fill colormap in fbcmap.c
+ - staging: wimax/12400m: fix byte-order issue
+ - crypto: api - check for ERR pointers in crypto_destroy_tfm()
+ - usb: gadget: uvc: add bInterval checking for HS mode
+ - usb: gadget: f_uac1: validate input parameters
+ - usb: dwc3: gadget: Ignore EP queue requests during bus reset
+ - usb: xhci: Fix port minor revision
+ - PCI: PM: Do not read power state in pci_enable_device_flags()
+ - x86/build: Propagate $(CLANG_FLAGS) to $(REALMODE_FLAGS)

+ - regulator: axp20x: Fix reference coup leak
+ - certs: Fix blacklist flag type confusion
+ - spi: atmel: Put allocated master before return
+ - iso:fs: release buffer head before return
+ - auxdisplay: ht16k33: Fix refresh rate handling
+ - IB/umad: Return EIO in case of when device disassociated
+ - powerpc/47x: Disable 256k page size
+ - mmc: uol8i6fro0: Fix a resource leak in the error handling path of the probe
+ - ARM: 9046/1: decompressor: Do not clear SCTLR.nTLSMD for ARMv7+ cores
+ - amba: Fix resource leak for drivers without .remove
+ - tracepoint: Do not fail unregistering a probe due to memory failure
+ - perf tools: Fix DSO filtering when not finding a map for a sampled address
+ - RDMA/rxe: Fix coding error in rxe_recv.c
+ - spi: stm32: properly handle 0 byte transfer
+ - mfd: wm831x-auxadc: Prevent use after free in wm831x_auxadc_read_irq()
+ - powerpc/pseries/dlpar: handle ibm, configure-connector delay status
+ - powerpc/8xx: Fix software emulation interrupt
+ - spi: pxa2xx: Fix the controller numbering for Wildcat Point
+ - perf intel-pt: Fix missing CYC processing in PSB
+ - perf test: Fix unaligned access in sample parsing test
+ - Input: elo - fix an error code in elo_connect()
+ - sparc64: only select COMPAT_BINFMT_ELF if BINFMT_ELF is set
+ - misc: eeprom_93xx46: Fix module alias to enable module autoprobe
+ - misc: eeprom_93xx46: Add module alias to avoid breaking support for non
device tree users
+ - pwm: rockchip: rockchip_pwm_probe(): Remove superfluous clk_unprepare()
+ - VMCI: Use set_page_dirty_lock() when unregistering guest memory
+ - PCI: Align checking of syscall user config accessors
+ - drm/msm/dsi: Correct io_start for MSM8994 (20nm PHY)
+ - ext4: fix potential htree index checksum corruption
+ - i40e: Fix flow for IPv6 next header (extension header)
+ - i40e: Fix overwriting flow control settings during driver loading
+ - net/mlx4_core: Add missed mlx4_free_cmd_mailbox()
+ - ofcs2: fix a use after free on error
+ - mm/memory.c: fix potential pte_unmap_unlock pte error
+ - mm/hugetlb: fix potential double free in hugetlb_register_node() error path
+ - arm64: Add missing ISB after invalidating TLB in __primary_switch
+ - i2c: brcmstd: Fix brcmstd_send_i2c_cmd condition
+ - mm/rmap: fix potential pte_unmap on an not mapped pte
+ - scsi: bnx2fc: Fix Kconfig warning & CNIC build errors
+ - blk-settings: align max_sectors on "logical_block_size" boundary
+ - ACPI: property: Fix fwnode string properties matching
+ - ACPI: configfs: add missing check after configfs_register_default_group()
+ - HID: wacom: Ignore attempts to overwrite the touch_max value from HID
+ - Input: raydium_ts_i2c - do not send zero length
+ - Input: xpad - add support for PowerA Enhanced Wired Controller for Xbox
+ - Series X|S
+ - Input: joydev - prevent potential read overflow in ioctl
+ - Input: i8042 - add ASUS Zenbook Flip to noselftest list
+ - USB: serial: option: update interface mapping for ZTE P685M
+ - usb: musb: Fix runtime PM race in musb_queue_resume_work
+ - USB: serial: mos7840: fix error code in mos7840_write()
+ - USB: serial: mos7720: fix error code in mos7720_write()
+ - usb: dwc3: gadget: Fix setting of DEPCFG.bInterval_m1
+ - usb: dwc3: gadget: Fix dep->interval for fullspeed interrupt
+ - ALSA: hda/realtek: modify EAPD in the ALC886
+ - tpm_tis: Fix check_locality for correct locality acquisition
+ - KEYS: trusted: Fix migratable=1 failing
+ - btrfs: abort the transaction if we fail to inc ref in btrfs_copy_root
+ - btrfs: fix reloc root leak with 0 ref reloc roots on recovery
+ - btrfs: fix extent buffer leak on failure to copy root
+ - crypto: sun4i-ss - checking sg length is not sufficient
+ - crypto: sun4i-ss - handle BigEndian for cipher
+ - seccomp: Add missing return in non-void function
+ - drivers/misc/vmw_vmci: restrict too big queue size in qp_host_alloc_queue
+ - staging: rtl8118eu: Add Edimax EW-7811UN V2 to device table
+ - x86/reboot: Force all cpus to exit VMX root if VMX is supported
+ - floppy: reintroduce O_NDELAY fix
+ - arm64: uprobe: Return EOPNOTSUPP for AARCH32 instruction probing
+ - watchdog: mei_wdt: request stop on unregister
+ - mtd: spi-nor: hisi-sfc: Put child node np on error path
+ - fs/affs: release old buffer head on error path
+ - hugetlb: fix copy_huge_page_from_user contig page struct assumption
+ - mm: hugetlb: fix a race between freeing and dissolving the page
+ - libnvdimm/dimm: Avoid race between probe and available_slots_show()
+ - module: Ignore _GLOBAL_OFFSET_TABLE_ when warning for undefined symbols
+ - mmc: sdhci-esdhc-imx: fix kernel panic when remove module
+ - gpio: pcf857x: Fix missing first interrupt
+ - printk: fix deadlock when kernel panic
+ - fs/2fs: fix out-of-repair __setattr_copy()
+ - sparc32: fix a user-triggerable oops in clear_user()
+ - gfs2: Don't skip dlm unlock if glock has an lvb
+ - dm era: Recover committed writeset after crash
+ - dm era: Verify the data block size hasn't changed
+ - dm era: Fix bitset memory leaks
+ - dm era: Use correct value size in equality function of writeset tree
+ - dm era: Reinitialize bitset cache before digesting a new writeset
+ - dm era: only resize metadata in preresume
+ - icmp: introduce helper for nat'd source address in network device context
+ - icmp: allow icmpv6_nod_send to work with CONFIG_IPV6=n
+ - gtp: use icmp_nod_send helper
+ - sunvnet: use icmp_nod_send helper
+ - ipv6: icmp6: avoid indirect call for icmpv6_send()
+ - ipv6: silence compilation warning for non-IPV6 builds
+ - net: icmp: pass zeroed opts from icmp{,v6}_nod_send before sending
+ - dm era: Update in-core bitset after committing the metadata
+ - USB: quirks: sort quirk entries
+ - jump_label/lockdep: Assert we hold the hotplug lock for _cpuslocked()
+ - operations
+ - ARM: dts: exynos: correct PMIC interrupt trigger level on Artik 5
+ - ARM: dts: exynos: correct PMIC interrupt trigger level on Odroid XU3 family
+ - arm64: dts: allwinner: A64: properly connect USB PHY to port 0
+ - arm64: dts: allwinner: Drop non-removable from SoPine/LTS SD card
+ - arm64: dts: allwinner: A64: Limit MMC2 bus frequency to 150 MHz
+ - memory: ti-aemif: Drop child node when jumping out loop
+ - ibmvnic: add memory barrier to protect long term buffer
+ - net: amd-xgbe: Fix NETDEV WATCHDOG transmit queue timeout warning
+ - drm/amdgpu: Fix macro name_AMDGPU_TRACE_H_in preprocessor if condition
+ - drm/amd/display: Fix 10/12 bpc setup in DCE output bit depth reduction.
+ - crypto: talitos - Work around SEC6 ERRATA (AES-CTR mode data size error)
+ - i2fs: fix to avoid inconsistent quota data
+ - regulator: s5m8767: Drop regulators OF node reference
+ - mmc: renesas_sdhi_internal_dmac: Fix DMA buffer alignment from 8 to 128-bytes
+ - RDMA/rxe: Correct skb on loopback path
+ - i40e: Add zero-initialization of AQ command structures
+ - i40e: Fix add TC filter for IPv6
+ - r8169: fix jumbo packet handling on RTL8168e
+ - USB: serial: ftdi_sio: fix FTX sub-integer prescaler
+ - crypto: arm64/sha - add missing module aliases
+ - misc: rttx: init of rts522a add OCP power off when no card is present
+ - seq_file: document how per-entry resources are managed.
+ - x86: fix seq_file iteration for pat/memtype.c
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Wed, 14 Apr 2021 15:15:21 +0200
+ +linux (4.15.0-142.146) bionic; urgency=medium
+ + * overlayfs calls vfs_setxattr without cap_convert_nscap
+ + - vfs: move cap_convert_nscap() call into vfs_setxattr()
+ + * CVE-2021-29154
+ + - SAUCE: bpf, x86: Validate computation of branch displacements for x86-64
+ + -- Marcelo Henrique Cerri <marcelo.cerri@canonical.com> Mon, 12 Apr 2021 18:46:50 -0300
+ +linux (4.15.0-141.145) bionic; urgency=medium
+ + * bionic/linux: 4.15.0-141.145 -proposed tracker (LP: #1919536)
+ + * binary assembly failures with CONFIG_MODVERSIONS present (LP: #1919315)
+ + - [Packaging] quiet (nomially) benign errors in BUILD script
+ + * selftests: bpf verifier fails after sanitize_ptr_alu fixes (LP: #1920995)
+ + - bpf: Simplify alu_limit masking for pointer arithmetic
+ + - bpf: Add sanity check for upper ptr_limit
+ + - bpf, selftests: Fix up some test_verifier cases for unprivileged
+ + * Packaging resync (LP: #1786013)
+ + - update dkms package versions
+ + * CVE-2018-13095
+ + - xfs: More robust inode extent count validation
+ --
* i40e PF reset due to incorrect MDD event (LP: #1772675)
- i40e: change behavior on PF in response to MDD event

* Bionic update: upstream stable patchset 2021-03-09 (LP: #1918330)
- ACPI: sysfs: Prefer "compatible" modalias
- ARM: dts: imx6qdl-gw52xx: fix duplicate regulator naming
- wext: fix NULL.ptr-derereference with cfg80211’s lack of commit()
- net: usb: qmi_wwan: added support for Thales Cinterion PLSx3 modem family
- drivers: soc: atmel: Avoid calling at91_soc_init on non AT91 SoCs
- drivers: soc: atmel: add null entry at the end of at91_soc_allowed_list[]
- KVM: x86/pmu: Fix HW_REF_CPU_CYCLES event pseudo-encoding in intel_arch_events[]
- KVM: x86: get smi pending status correctly
- xen: Fix XenStore initialisation for XS_LOCAL
- leds: trigger: fix potential deadlock with libata
- mt7601u: fix kernel crash unplugging the device
- mt7601u: fix rx buffer recounting
- xen-blkfront: allow discard-* nodes to be optional
- netfilter: nft_dynset: add timeout extension to template
- xfrm: Fix oops in xfrm_replay_advance bmp
- RDMA/cxgb4: Fix the reported max_recv_sge value
- iwlwifi: pcie: use jiffies for memory read spin time limit
- iwlwifi: pcie: reschedule in long-running memory reads
- mac80211: pause TX while changing interface type
- can: dev: prevent potential information leak in can_fill_info()
- x86/entry/64/compat: Preserve r8-r11 in int $0x80
- x86/entry/64/compat: Fix “x86/entry/64/compat: Preserve r8-r11 in int $0x80”
- iommu/vt-d: Gracefully handle DMAR units with no supported address widths
- iommu/vt-d: Don't dereference iommu_device if IOMMU_API is not built
- NFC: fix resource leak when target index is invalid
- NFC: fix possible resource leak
- team: protect features update by RCU to avoid deadlock
- tcp: fix TLP timer not set when CA_STATE changes from DISORDER to OPEN
- kernel: kexec: remove the lock operation of system_transition_mutex
- PM: hibernate: flush swap writer after marking
- pNFS/NFSv4: Fix a layout segment leak in pnfs_layout_process()
- net/mlx5: Fix memory leak on flow table creation error flow
- rxrpc: Fix memory leak in rxrpc_lookup_local
- net: dsa: bcm_sf2: put device node before return
- ibmvnic: Ensure that CRQ entry read are correctly ordered
- ACPI: thermal: Do not call acpi_thermal_check() directly
- net_sched: gen_estimator: support large ewma log
- phy: cpcap-usb: Fix warning for missing regulator_disable
- x86: __always_inline __[rd,wr]msr()
- scsi: scsi_transport_srp: Don't block target in failfast state
- scsi: libfc: Avoid invoking response handler twice if ep is already completed
- mac80211: fix fast-rx encryption check
- scsi: ibmvfc: Set default timeout to avoid crash during migration
- objtool: Don't fail on missing symbol table
- kthread: Extract KTHREAD_IS_PER_CPU
- workqueue: Restrict affinity change to rescuer
- USB: serial: cp210x: add pid/vid for WSDA-200-USB
- USB: serial: cp210x: add new VID/PID for supporting Teraoka AD2000
- USB: serial: option: Adding support for Cinterion MV31
- arm64: dts: Is1046a: fix dcfg address range
- net: lapb: Copy the skb before sending a packet
- elfcore: fix building with clang
- USB: gadget: legacy: fix an error code in eth_bind()
- USB: usblp: don't call usb_set_interface if there's a single alt
- usb: dwc2: Fix endpoint direction check in ep_from_windex
- ovf: fix dentity leak in ovl_get_redirect
- mac80211: fix station rate table updates on assoc
- kretprobe: Avoid re-registration of the same kretprobe earlier
- xhci: fix bounce buffer usage for non-sg list case
- cifs: report error instead of invalid when revalidating a dentry fails
- smb3: Fix out-of-bounds bug in SMB2_negotiate()
- mmcore: Limit retries when analyse of SDIO tuples fails
- nvme-pci: avoid the deepest sleep state on Kingston A2000 SSDs
- ARM: footbridge: fix dc21285 PCI configuration accessors
- mm: hugelibs: fix cannot migrate the fallocated HugeTLB page
- mm: hugelibs: fix a race between isolating and freeing page
- mm: hugelibs: remove VM_BUG_ON_PAGE from page_huge_active
- mm: thp: fix MADV_REMOVE deadlock on shmem THP
- x86/build: Disable CET instrumentation in the kernel
- x86/apic: Add extra serialization for non-serializing MSRs
- Input: xpad - sync supported devices with fork on GitHub
- iommu/vt-d: Do not use flush-queue when caching-mode is on
- net: dsa: mv88e6xxx: override existent unicast portvec in port_fdb_add
- net: mvpd2: TCAM entry enable should be written after SRAM data
- memblock: do not start bottom-up allocations with kernel_end
- usb: renesas_usbhs: Clear pipe running flag in usbhs_pkt_pop()
- genirq/msi: Activate Multi-MSI early when MSI_FLAG_ACTIVATE_EARLY is set
- KVM: SVM: Treat SVM as unsupported when running as an SEV guest
- md: Set prev_flush_start and flush_bio in an atomic way
- net: ip_tunnel: fix mtu calculation
- block: fix NULL pointer dereference in register_disk
- remoteproc: qcom_q6v5_mss: Validate modem blob firmware size before load
- remoteproc: qcom_q6v5_mss: Validate MBA firmware size before load
- af_key: relax availability checks for skb size calculation
- pNFS/NFSv4: Try to return invalid layout in pnfs_layout_process()
- iwlwifi: mvm: take mutex for calling iwl_mvm_get_sync_time()
- iwlwifi: pcie: add a NULL check in iwl_pcie_txq_unmap
- iwlwifi: mvm: guard against device removal in reprobe
- SUNRPC: Move simple_get_bytes and simple_get_netobj into private header
• SUNRPC: Handle 0 length opaque XDR object data properly
• include/trace/events/writeback.h: fix -Wstringop-truncation warnings
• memcg: fix a crash in wb_workfn when a device disappears
• blk-mq: don't hold q->sysfs_lock in blk_mq_map_swqueue
• squashfs: add more sanity checks in id lookup
• squashfs: add more sanity checks in inode lookup
• squashfs: add more sanity checks in xattr id lookup
• * SRU: Add FUA support for XFS (LP: #1917918)
  • block: add blk_queue_fua() helper function
  • xfs: move generic_write_sync calls inwards
  • iomap: iomap_dio_rw() handles all sync writes
  • iomap: Use FUA for pure data O_DSYNC DIO writes
• * CVE-2021-3348
  • nbd: freeze the queue while we're adding connections
• * Bionic kernel 4.15.0-136 causes dosemu2 (with kvm mode) freezes due to lack
  • of KVM patch (LP: #1917138)
  • KVM: x86: handle !lapic_in_kernel case in kvm_cpu_*_extint
• * switch LRM to be signed using the Ubuntu Drivers signing key (LP: #1917034)
  • [Packaging] sync dkms-build to updated API
• * Bionic update: upstream stable patchset 2021-02-26 (LP: #1917093)
  • i2c: btmpl-tegra: Ignore unknown I2C_M flags
  • ALSA: seq: oss: Fix missing error check in snd_seq_oss_synth_make_info()
  • ALSA: hda/via: Add minimum mute flag
  • ACPI: scan: Make acpi_bus_get_device() clear return pointer on error
  • mmc: sdhci-xenon: fix 1.8v regulator stabilization
  • dm: avoid filesystem lookup in dm_get_dev_t()
  • drm/atomic: put state on error path
  • ASoC: Intel: haswell: Add missing pm_ops
  • scsi: ufs: Correct the LUN used in eh_device_reset_handler() callback
  • xen: Fix event channel callback via INTX/GSI
  • drm/nouveau/bios: fix issue shadowing expansion ROMs
  • drm/nouveau/privring: ack interrupts the same way as RM
  • drm/nouveau/i2c/gm200: increase width of aux semaphore owner fields
  • i2c: octeon: check correct size of maximum RECV_LEN packet
  • can: dev: can_restart: fix use after free bug
  • can: vxcan: vxcan_xmit: fix use after free bug
  • iio: ad5504: Fix setting power-down state
  • irqchip/mips-cpu: Set IPI domain parent chip
  • intel_th: pci: Add Alder Lake-P support
  • stm class: Fix module init return on allocation failure
  • ehci: fix EHCI host controller initialization sequence
  • USB: ehci: fix an interrupt calltrace error
+ - usb: udc: core: Use lock when write to soft_connect
+ - usb: bdc: Make bdc pci driver depend on BROKEN
+ - [Config] updateconfigs for USB_BDC_PCI
+ - xhci: make sure TRB is fully written before giving it to the controller
+ - xhci: tegra: Delay for disabling LFPS detector
+ - compiler.h: Raise minimum version of GCC to 5.1 for arm64
+ - netfilter: rpfilter: mask ecn bits before fib lookup
+ - sh: dma: fix kconfig dependency for G2_DMA
+ - sh_eth: Fix power down vs. is_opened flag ordering
+ - skbuff: back tiny skbs with kmalloc() in __netdev_alloc_skb() too
+ - udp: mask TOS bits in udp_v4_early_demux()
+ - ipv6: create multicast route with RTPROT_KERNEL
+ - net_sched: avoid shift-out-of-bounds in tcindex_set_parms()
+ - net: dsa: b53: fix an off by one in checking "vlan->vid"
+ - gpio: mvebu: fix pwm .get_state period calculation
+ - Revert "mm/slub: fix a memory leak in sysfs_slab_add()"
+ - futex: Ensure the correct return value from futex_lock_pi()
+ - futex: Replace pointless printk in fixup_owner()
+ - futex: Provide and use pi_state_update_owner()
+ - rtmutex: Remove unused argument from rt_mutex_proxy_unlock()
+ - futex: Use pi_state_update_owner() in put_pi_state()
+ - futex: Simplify fixup_pi_state_owner()
+ - futex: Handle faults correctly for PI futexes
+ - tracing: Fix race in trace_open and buffer resize call
+ - fs: move I_DIRTY_INODE to fs.h
+ - writeback: Drop I_DIRTY_TIME_EXPIRE
+ - fs: fix lazytime expiration handling in __writeback_single_inode()
+ - mmc: core: don't initialize block size from ext_csd if not present
+ - scsi: qedi: Correct max length of CHAP secret
+ - riscv: Fix kernel time_init()
+ - HID: Ignore battery for Elan touchscreen on ASUS UX550
+ - clk: tegra30: Add hda clock default rates to clock driver
+ - drm/nouveau/mmu: fix vram heap sizing
+ - scsi: megaraid_sas: Fix MEGASAS_IOC_FIRMWARE regression
+ - can: peak_usb: fix use after free bugs
+ - serial: mvebu-uart: fix tx lost characters at power off
+ - driver core: Extend device_is_dependent()
+ - net_sched: reject silly cell_log in qdisc_get_rtab()
+ - tools: Factor HOSTCC, HOSTLD, HOSTAR definitions

* Enforce CONFIG_DRM_BOCHS=m (LP: #1916290)
* Please trust Canonical Livepatch Service kmod signing key (LP: #1898716)
* [Config] enable CONFIG_MODVERSIONS=y
* [Packaging] build canonical-certs.pem from branch/branch certs
* [Config] add Canonical Livepatch Service key to SYSTEM_TRUSTED_KEYS
* [Config] add ubuntu-drivers key to SYSTEM_TRUSTED_KEYS

- dm: eliminate potential source of excessive kernel log noise
- ALSA: firewire-tascam: Fix integer overflow in midi_port_work()
- ALSA: fireface: Fix integer overflow in transmit_midi_msg()
- netfilter: conntrack: fix reading nf_conntrack_buckets
- usb: ohci: Make distrust_firmware param default to false
- nfsd4: readdirplus shouldn't return parent of export
- net/eni: fix MSI/MSI-x interrupts
- rndis_host: set proper input size for OID_GEN_PHYSICAL_MEDIUM request
- esp: avoid unneeded kmap_atomic call
- net: dcb: Validate netlink message in DCB handler
- net: dcb: Accept RTM_GETDCB messages carrying set-like DCB commands
- net: stmmac: Fixed mtu changed by cache aligned
- net: sit: unregister_netdevice on newlink's error path
- net: avoid 32 x truesize under-estimation for tiny skbs
- rxrpc: Fix handling of an unsupported token type in rxrpc_read()
- tipc: fix NULL deref in tipc_link_xmit()
- spi: cadence: cache reference clock rate during probe
- x86/hyperv: check cpu mask after interrupt has been disabled
- md: rawraid: fix result of SRAM initialization fixup
- kbuild: enforce -Werror=return-type
- crypt: x86/crc32c: fix building with clang ias
- rxrpc: Call state should be read with READ_ONCE() under some circumstances

* [ssbs-0118] backport SSBS bug (arm64: cpufeature: Detect SSBS and advertise
to userspace) (LP: #1911376)

* SAUCE: Move SSBS snippet from arm64_elf_hwcaps to arm64_features

* Bionic update: upstream stable patchset 2021-01-25 (LP: #1913214)
  + x86/entry/64: Add instruction suffix
  + md/raid10: initialize r10_bio->read_slot before use.
  + ALSA: usb-audio: simplify set_sync_ep implicit fb quirk
  + ALSA: usb-audio: fix sync-ep altsetting sanity check
  + mm: memcontrol: eliminate raw access to stat and event counters
  + mm: memcontrol: implement lruvec stat functions on top of each other
  + mm: memcontrol: fix excessive complexity in memory.stat reporting
  + vfio/pci: Move dummy_resources_list init in vfio_pci_probe()
  + powerpc/bitops: Fix possible undefined behaviour with fls() and fsl64()
  + uapi: move constants from <linux/kernel.h> to <linux/const.h>
  + of: fix linker-section match-table corruption
  + reiserfs: add check for an invalid ih_entry_count
  + misc: vmv_vmci: fix kernel info-leak by initializing dbells in
    vmci_ctx_get_chkpt_doorbells()
  + media: gp8psk: initialize stats at power control logic
+ - ALSA: seq: Use bool for snd_seq_queue internal flags
+ - rtc: sun6i: Fix memleak in sun6i_rtc_clk_init
+ - module: set MODULE_STATE_GOING state when a module fails to load
+ - quota: Don't overflow quota file offsets
+ - powerpc: sysdev: add missing iounmap() on error in mpic_msrgr_probe()
+ - module: delay kobject uevent until after module init call
+ - ALSA: pcm: Clear the full allocated memory at hw_params
+ - dm verity: skip verity work if I/O error when system is shutting down
+ - kdev_t: always inline major/minor helper functions
+ - iio:imu: bmi160: Fix alignment and data leak issues
+ - mwifiex: Fix possible buffer overflows in mwifiex_cmd_802_11_ad_hoc_start
+ - ext4: don't remount read-only with errors=continue on reboot
+ - KVM: SVM: relax conditions for allowing MSR_IA32_SPEC_CTRL accesses
+ - KVM: x86: reinstate vendor-agnostic check on SPEC_CTRL cpuid bits
+ - xen/gntdev.c: Mark pages as dirty
+ - ALSA: rawmidi: Access runtime->avail always in spinlock
+ - fcntl: Fix potential deadlock in send_sig{io, urg}()
+ - dmaengine: at_hmac: Substitute kzalloc with kmalloc
+ - dm:dmengine: at_hmac: add missing put_device() call in at_dma_xlate()
+ - dm:dmengine: at_hmac: add missing kfree() call in at_dma_xlate()
+ - kbuild: don't hardcode depmod path
+ - workqueue: Kick a worker based on the actual activation of delayed works
+ - scsi: ufs-pci: Ensure UFS device is in PowerDown mode for suspend-to-disk
+ - >poweroff()
+ - scsi: ide: Do not set the RQF_PREEMPT flag for sense requests
+ - lib/genalloc: fix the overflow when size is too big
+ - depmod: handle the case of /sbin/depmod without /sbin in PATH
+ - ethernet: ucc_geth: fix use-after-free in ucc_geth_remove()
+ - ethernet: ucc_geth: set dev->max_mtu to 1518
+ - atm: idt77252: call pci_disable_device() on error path
+ - qede: fix offload for IPIP tunnel packets
+ - virtio_net: Fix recursive call to cpus_read_lock()
+ - net/ncsi: Use real net-device for response handler
+ - net: ethernet: Fix memleak in ethoc Probe
+ - net/sysfs: take the rtl8 lock when storing xps_cpus
+ - net: ethernet: ti: cpts: fix ethtool output when no ptp_clock registered
+ - ipv4: Ignore ECN bits for fib lookups in fib_compute_spec_dst()
+ - net: hns: fix return value check in __lb_other_process()
+ - net: hdic_ppp: Fix issues when mod_timer is called while timer is running
+ - CDC-NCM: remove "connected" log message
+ - net: usb: qmi_wwan: add Quectel EM160R-GL
+ - vhost_net: fix ubuf refcount incorrectly when sendmsg fails
+ - net: sched: prevent invalid Scell_log shift count
+ - net/sysfs: take the rtl8 lock when accessing xps_cpus_map and num_tc
+ - net: mvpp2: Fix GoP port 3 Networking Complex Control configurations
+ - net: systemport: set dev->max_mtu to UMAC_MAX_MTU_SIZE
+ - video: hyperv_fb: Fix the mmap() regression for v5.4.y and older
- crypto: ecdh - avoid buffer overflow in ecdh_set_secret()
- usb: gadget: enable super speed plus
- USB: cdc-acm: blacklist another IR Droid device
- usb: dwc3: ulpi: Use VStsDone to detect PHY regs access completion
- usb: chipidea: ci_hdrc_imx: add missing put_device() call in
- usbmisc_get_init_data()
- USB: xhci: fix U1/U2 handling for hardware with XHCI_INTEL_HOST quirk set
- usb: usbip: vhci_hcd: protect shift size
- usb: usas: Add PNY USB Portable SSD to unusual_uas
- USB: serial: iuu_phoenix: fix DMA from stack
- USB: serial: option: add LongSung M5710 module support
- USB: serial: option: add Quectel EM160R-GL
- USB: yurex: fix control-URB timeout handling
- USB: usbip: fix DMA to stack
- ALSA: usb-audio: Fix UBSAN warnings for MIDI jacks
- usb: gadget: select CONFIG_CRC32
- usb: gadget: f_uac2: reset wMaxPacketSize
- usb: gadget: function: printer: Fix a memory leak for interface descriptor
- USB: gadget: legacy: fix return error code in acm_ms_bind()
- usb: gadget: Fix spinlock lockup on usb_function_deactivate
- usb: gadget: configfs: Preserve function ordering after bind failure
- usb: gadget: configfs: Fix use-after-free issue with udc_name
- USB: serial: keyspan_pda: remove unused variable
- x86/mm: Fix leak of pmd ptlock
- ALSA: hda/conexant: add a new hda codec CX11970
- ALSA: hda/realtek - Fix speaker volume control on Lenovo C940
- Revert "device property: Keep secondary firmware node secondary by type"
- netfilter: ipset: fix shift-out-of-bounds in htable_bits()
- netfilter: xt_RATEEST: reject non-null terminated string from userspace
- x86/mtrr: Correct the range check before performing MTRR type lookups
- KVM: x86: fix shift out of bounds reported by UBSAN
- i40e: Fix Error I40E_AQ_RC_EINVAL when removing VFs
- tun: fix return value when the number of iovs exceeds MAX_SKB_FRAGS
- USB: cdc-wdm: Fix use after free in service_outstanding_interrupt().
- USB: Gadget Ethernet: Re-enable Jumbo frames.
- usb: gadget: u_ether: Fix MTU size mismatch with RX packet size

+
+ * Bionic update: upstream stable patchset 2020-12-04 (LP: #1906875)
+ - regulator: defer probe when trying to get voltage from unresolved supply
+ - ring-buffer: Fix recursion protection transitions between interrupt context
+ - time: Prevent undefined behaviour in timespec64_to_ns()
+ - nbd: don't update block size after device is started
+ - btrfs: sysfs: init devices outside of the chunk_mutex
+ - btrfs: reschedule when cloning lots of extents
+ - genirq: Let GENERIC_IRQ_IPI select IRQ_DOMAIN_HIERARCHY
+ - hv_balloon: disable warning when floor reached
+ - net: xfrm: fix a race condition during allocating spi
+ - perf tools: Add missing swap for ino_generation
+ - ALSA: hda: prevent undefined shift in snd_hdac_ext_bus_get_link()
+ - can: rx-offload: don't call kfree_skb() from IRQ context
+ - can: dev: can_get_echo_skb(): prevent call to kfree_skb() in hard IRQ context
+ - can: dev: can_get_echo_skb(): fix real payload length return value for RTR frames
+ - can: create_echo_skb(): fix echo skb generation: always use skb_clone()
+ - can: peak_usb: add range checking in decode operations
+ - can: peak_usb: peak_usb_get_ts_time(): fix timestamp wrapping
+ - can: peak_canfd: pcan_handle_can_rx(): fix echo management when loopback is on
+ - xfs: flush new eof page on truncate to avoid post-eof corruption
+ - Btrfs: fix missing error return if writeback for extent buffer never started
+ - ath9k_htc: Use appropriate rx datalen type
+ - usb: gadget: goku_udc: fix potential crashes in probe
+ - gfs2: Free rd_bits later in gfs2_clear_rgrpd to fix use-after-free
+ - gfs2: Add missing truncate_inode_pages_final for sd_aspace
+ - gfs2: check for live vs. read-only file system in gfs2_fitrim
+ - scsi: hpsa: Fix memory leak in hpsa_init_one()
+ - drm/amdgp: perform srbm soft reset always on SDMA resume
+ - mac80211: fix use of skb payload instead of header
+ - cfg80211: regulatory: Fix inconsistent format argument
+ - scsi: scsi_dh_alua: Avoid crash during alua_bus_detach()
+ - iommu/amd: Increase interrupt remapping table limit to 512 entries
+ - pinctrl: intel: Set default bias in case no particular value given
+ - ARM: 9019/1: kprobes: Avoid fortify_panic() when copying optprobe template
+ - pinctrl: aspeed: Fix GPI only function problem.
+ - nbd: fix a block_device refcount leak in nbd_release
+ - xfs: fix flags argument to rmap lookup when converting shared file rmaps
+ - xfs: fix rmap key and record comparison functions
+ - xfs: fix a missing unlock on error in xfs_fs_map_blocks
+ - of/address: Fix of_node memory leak in of_dma_is_coherent
+ - cosa: Add missing kfree in error path of cosa_write
+ - perf: Fix get_recursion_context()
+ - ext4: correctly report "not supported" for {usr,grp}jquota when !CONFIG_QUOTA
+ - ext4: unlock xattr_sem properly in ext4_inline_data_truncate()
+ - thunderbolt: Add the missed ida_simple_remove() in ring_request_msix()
+ - uio: Fix use-after-free in uio_unregister_device()
+ - usb: cdc-acm: Add DISABLE_ECHO for Renesas USB Download mode
+ - mei: protect mei_cl_mtu from null dereference
+ - futex: Don't enable IRQs unconditionally in put_pi_state()
+ - ocsf2: initialize ip_next_orphan
+ - selinux: Fix error return code in sel_ib_pkey_sid_slow()
+ - don't dump the threads that had been already exiting when zapped.
+ - drm/gma500: Fix out-of-bounds access to struct drm_device.vblank[]
+ - pinctrl: amd: use higher precision for 512 RtcClk
+ - pinctrl: amd: fix incorrect way to disable debounce filter
+ - swiotlb: fix "x86: Don't panic if can not alloc buffer for swiotlb"
+ - IPv6: Set SIT tunnel hard_header_len to zero
+ - net/af_iucv: fix null pointer dereference on shutdown
+ - net/x25: Fix null-ptr-derif in x25_connect
+ - vrf: Fix fast path output packet handling with async Netfilter rules
+ - r8169: fix potential skb double free in an error path
+ - net: Update window_clamp if SOCK_RCVBUF is set
+ - random32: make prandom_u32() output unpredictable
+ - x86/speculation: Allow IBPB to be conditionally enabled on CPUs with always-
  on STIBP
+ - perf/core: Fix bad use of igrab()
+ - perf/core: Fix crash when using HW tracing kernel filters
+ - perf/core: Fix a memory leak in perf_event_parse_addr_filter()
+ - Revert "kernel/reboot.c: convert simple_strtoul to kstrtoint"
+ - reboot: fix overflow parsing reboot cpu number
+ - Convert trailing spaces and periods in path components
+ - xfs: fix scrub flagging rtinherint even if there is no rt device
+ - drm/amd/pm: perform SMC reset on suspend/hibernation
+ - drm/amd/pm: do not use ixFEATURE_STATUS for checking smc running
+ - s390/smp: move rcu_cpu_starting() earlier
+ - tpm_tis: Disable interrupts on ThinkPad T490s
+ - tick/common: Touch watchdog in tick_unfreeze() on all CPUs
+ - mfd: sprd: Add wakeup capability for PMIC IRQ
+ - btrfs: ref-verify: fix memory leak in btrfs_ref_tree_mod
+ - thunderbolt: Fix memory leak if ida_simple_get() fails in
  enumerate_services()
+ - btrfs: fix potential overflow in cluster_pages_for_defrag on 32bit arch
+ - mmc: renesas_sdhi_core: Add missing tmio_mmc_host_free() at remove

+  - drm/i915: Break up error capture compression loops with cond_resched()
+  - tipc: fix use-after-free in tipc_bcast_get_mode
+  - gianfar: Replace skb_realloc_headroom with skb_cow_head for PTP
+  - gianfar: Account for Tx PTP timestamp in the skb headroom
+  - net: usb: qmi_wwan: add Telit LE910Cx 0x1230 composition
+  - scf: Fix COMM_LOST/CANT_STR_ASSOC err reporting on big-endian platforms
+  - sfp: Fix error handing in sfp_probe()
+  - blktrace: bail out early if block debugfs is not configured
+  - i40e: Fix of memory leak and integer truncation in i40e_virtchnl.c
+  - Fonts: Replace discarded const qualifier
+  - ALSA: usb-audio: Add implicit feedback quirk for Qu-16
+  - lib/crc32test: remove extra local_irq_disable/enable
+  - kthread_worker: prevent queuing delayed work from timer_fn when it is being
+    canceled
+  - mm: always have io_remap_pfn_range() set pgprot_decrypted()
+  - gfs2: Wake up when sd_glock_disposal becomes zero
+  - ftrace: Fix recursion check for NMI test
+ - ftrace: Handle tracing when switching between context
+ - tracing: Fix out of bounds write in get_trace_buf
+ - futex: Handle transient "ownerless" rtmutex state correctly
+ - ARM: dts: sun4i-a10: fix cpu_alert temperature
+ - x86/kexec: Use up-to-dated screen_info copy to fill boot params
+ - of: Fix reserved-memory overlap detection
+ - blk-cgroup: Fix memleak on error path
+ - blk-cgroup: Pre-allocate tree node on blkg_conf_prep
+ - scsi: core: Don't start concurrent async scan on same host
+ - vsoc: use ns_capable_noaudit() on socket create
+ - drm/vc4: drv: Add error handling for bind
+ - ACPI: NFIT: Fix comparison to '-ENXIO'
+ - vt: Disable KD_FONT_OP_COPY
+ - fork: fix copy_process(CLONE_PARENT) race with the exiting ->real_parent
+ - serial: 8250_mtk: Fix uart_get_baud_rate warning
+ - serial: txx9: add missing platform_driver_unregister() on error in
  serial_txx9_init
+ - USB: serial: cyberjack: fix write-URB completion race
+ - USB: serial: option: add Quectel EC200T module support
+ - USB: serial: option: add LE910Cx compositions 0x1203, 0x1230, 0x1231
+ - USB: serial: option: add Telit FN980 composition 0x1055
+ - USB: Add NO_LPM quirk for Kingston flash drive
+ - usb: mtu3: fix panic in mtu3_gadget_stop()
+ - ARC: stack unwinding: avoid indefinite looping
+ - Revert "ARC: entry: fix potential EFA clobber when TIF_SYSCALL_TRACE"
+ - PM: runtime: Resume the device earlier in __device_release_driver()
+ - btrfs: extent_io: add proper error handling to lock_extent_buffer_for_iot()
+ - Btrfs: fix unwritten extent buffers and hangs on future writeback attempts
+ - btrfs: tree-checker: fix the error message for transid error
+ - mm: mempolicy: fix potential pte_unmap_unlock pte error
+ - tools: perf: Fix build error in v4.19.y
+ - net: dsa: read mac address from DT for slave device
+ - arm64: dts: marvell: espressobin: Add ethernet switch aliases
+
+ * Bionic update: upstream stable patchset 2020-11-23 (LP: #1905333) //
+ CVE-2019-19770 which shows this issue is not a core debugfs issue, but
+ - blktrace: fix debugfs use after free
+
+ * Bionic update: upstream stable patchset 2020-11-18 (LP: #1904791)
+ - scripts/setlocalversion: make git describe output more reliable
+ - arm64: link with -z norelo Therefore of CONFIG_RELOCATABLE
+ - gtp: fix an use-before-init in gtp_newlink()
+ - ravb: Fix bit fields checking in ravb_hwtimestamp_get()
+ - tipc: fix memory leak caused by tipc_buf_append()
+ - arch/x86/amd/ibs: Fix re-arming IBS Fetch
+ - x86/xen: disable Firmware First mode for correctable memory errors
+ - fuse: fix page dereference after free
+ - p54: avoid accessing the data mapped to streaming DMA
- mtd: lpddr: Fix bad logic in print_drs_error
- ata: sata_rcar: Fix DMA boundary mask
- fscrypt: return -EXDEV for incompatible rename or link into encrypted dir
- x86/unwind/orc: Fix inactive tasks with stack pointer in %sp on GCC 10
- compiled kernels
- mlxsw: core: Fix use-after-free in mlxsw_emad_trans_finish()
- futex: Fix incorrect should_fail_futex() handling
- powerpc/powerpc: Fix spurious DBG() warning
- powerpc: select ARCH_WANT_IRQS_OFF_ACTIVATE_MM
- sparc64: remove mm_cpumask clear to fix kthread_use_mm race
- fs: add trace exit in exception path
- fs: fix to check segment boundary during SIT page readahead
- um: change sigio_spinlock to a mutex
- ARM: 8997/2: hw_breakpoint: Handle inexact watchpoint addresses
- xls: fix realtime bitmap/summary file truncation when growing rt volume
- video: fbdev: pvr2fb: initialize variables
- ath10k: start recovery process when payload length exceeds max htc length
- for sdio
- ath10k: fix VHT NSS calculation when STBC is enabled
- drm/bridge/megachips: Add checking if ge_b850v3_lvds_init() is working correctly
- media: videodev2.h: RGB BT2020 and HSV are always full range
- media: platform: Improve queue set up flow for bug fixing
- usb: typec: tcpm: During PR_SWAP, source caps should be sent only after tSwapSourceStart
- media: tw5864: check status of tw5864_frameinterval_get
- mmc: via-sdmmc: Fix data race bug
- drm/bridge/synopsys: dsi: add support for non-continuous HS clock
- printk: reduce LOG_BUF_SHIFT range for H8300
- kgdb: Make "kgdbcon" work properly with "kgdb_earlycon"
- cpufreq: sti-cpufreq: add stib418 support
- USB: autux: fix debugging
- uio: free uio id after uio file node is freed
- arm64/mm: return cpu_all_mask when node is NUMA_NO_NODE
- ACPI: Add out of bounds and numa_off protections to pxml_to_node()
- drivers/net/wan/hdlc_fr: Correctly handle special skb->protocol values
- bus/ssl_mc: Do not rely on caller to provide non NULL mc_io
- power: supply: test_power: add missing newlines when printing parameters by sysfs
- mdbitmap: md_bitmap_get_counter returns wrong blocks
- bnxt_en: Log unknown link speed appropriately.
- clk: t: clockdomain: fix static checker warning
- net: 9p: initialize sun_server.sun_path to have addr's value only when addr is valid
- drivers: watchdog: rdc321x_wdt: Fix race condition bugs
- ext4: Detect already used quota file early
- gfs2: add validation checks for size of superblock
- arm64: dts: renesas: ulcb: add full-pwr-cycle-in-suspend into eMMC nodes
+ - memory: emif: Remove bogus debugfs error handling
+ - ARM: dts: s5pv210: remove DMA controller bus node name to fix dtschema
+ - ARM: dts: s5pv210: move PMU node out of clock controller
+ - ARM: dts: s5pv210: remove dedicated 'audio-subsystem' node
+ - nbd: make the config put is called before the notifying the waiter
+ - sgl_alloc_order: fix memory leak
+ - nvme-rdma: fix crash when connect rejected
+ - md/raid5: fix oops during stripe resizing
+ - perf/x86/amd/ibs: Don't include randomized bits in get_ibs_op_count()
+ - perf/x86/amd/ibs: Fix raw sample data accumulation
+ - leds: bcm6328, bcm6358: use devres LED registering function
+ - fs: Don't invalidate page buffers in block_write_full_page()
+ - NFS: fix nfs_path in case of a rename retry
+ - ACPI / extlog: Check for RDMSR failure
+ - ACPI: debug: don't allow debugging when ACPI is disabled
+ - acpi-cpufreq: Honor _PSD table setting on new AMD CPUs
+ - w1: mxc_w1: Fix timeout resolution problem leading to bus error
+ - scsi: mptfusion: Fix null pointer dereferences in mptscsih_remove()
+ - btrfs: reschedule if necessary when logging directory items
+ - btrfs: send, recompute reference path after orphanization of a directory
+ - btrfs: use kvzalloc() to allocate clone_roots in btrfs_ioctl_send()
+ - btrfs: cleanup cow block on error
+ - btrfs: fix use-after-free on readahead extent after failure to create it
+ - usb: dwc3: ep0: Fix ZLP for OUT ep0 requests
+ - usb: dwc3: core: add phy cleanup for probe error handling
+ - usb: dwc3: core: don't trigger runtime pm when remove driver
+ - usb: cdc-acm: fix cooldown mechanism
+ - usb: host: fsl-mph-dr-of: check return of dma_set_mask()
+ - drm/i915: Force VT'd workarounds when running as a guest OS
+ - vt: keyboard, simplify vt_kdgkbsent
+ - vt: keyboard, extend func_buf_lock to readers
+ - dmaengine: dma-jz4780: Fix race in jz4780_dma_tx_status
+ - iio:adc:ti-adc: Fix alignment issue with timestamp
+ - iio:adc:ti-adc12138: Fix alignment issue with timestamp
+ - s390/stp: add locking to sysfs functions
+ - [Config] update config for PPC_RTAS_FILTER
+ - powerpc/rtas: Restrict RTAS requests from userspace
+ - powerpc: Warn about use of smt_snooze_delay
+ - powerpc/powerm/elog: Fix race while processing OPAL error log event.
+ - NFSv4.2: support EXCHGID4_FLAG_SUPP_FENCE_OPS 4.2 EXCHANGE_ID flag
+ - NFSD: Add missing NFSv2 .pc_func methods
+ - ubifs: dent: Fix some potential memory leaks while iterating entries
+ - perf python scripting: Fix printable strings in python3 scripts
+ - ubi: check kthread_should_stop() after the setting of task state
+ - ia64: fix build error with !COREDUMP
- drm/amdgpu: don't map BO in reserved region
- ceph: promote to unsigned long long before shifting
- libceph: clear con->out_msg on Policy::stateful_server faults
- 9P: Cast to loff_t before multiplying
- ring-buffer: Return 0 on success from ring_buffer_resize()
- vringh: fix __vringh_iov() when riouv and wiouv are different
- ext4: fix leaking sysfs kobject after failed mount
- ext4: fix error handling code in add_new_gdb
- ext4: fix invalid inode checksum
- drm/ttm: fix eviction valuable range check.
- rtc: rx8010: don't modify the global rtc ops
- tty: make FONTIX ioctl use the tty pointer they were actually passed
- arm64: berlin: Select DW_APB_TIMER_OF
- [Config] update annotations for DW_APB_TIMER
- cachefiles: Handle readpage error correctly
- hil/parisc: Disable HIL driver when it gets stuck
- arm: dts: mt7623: add missing pause for switchport
- ARM: samsung: fix PM debug build with DEBUG_LL but !MMU
- ARM: s3c24xx: fix missing system reset
- device property: Keep secondary firmware node secondary by type
- device property: Don't clear secondary pointer for shared primary firmware node
- KVM: arm64: Fix AArch32 handling of DBGD[CCINT,SCRext] and DBGVC
- staging: comedi: cb_pcidas: Allow 2-channel commands for AO subdevice
- staging: octeon: repair “fixed-link” support
- staging: octeon: Drop on uncorrectable alignment or FCS error
- objtool: Support Clang non-section symbols in ORC generation
- arm64: Run ARCH_WORKAROUND_1 enabling code on all CPUs
- x86/PCI: Fix intel_mid_pci.c build error when ACPI is not enabled
- cxgb4: set up filter action after rewrites
- cxl: Rework error message for incompatible slots
- serial: plo11: Fix lockdep splat when handling magic-sysrq interrupt
- fscrypt: only set dentry_operations on ciphertext dentries
- xen/events: don't use chip_data for legacy IRGs
- xen/events: avoid removing an event channel while handling it
- xen/events: add a proper barrier to 2-level uevent unmasking
- xen/events: fix race in evchn_fifo_unmask()
- xen/events: add a new "late EOI" evchn framework
- xen/blkbck: use lateeoi irq binding
- xen/netback: use lateeoi irq binding
- xen/scsiback: use lateeoi irq binding
- xen/pvcallback: use lateeoi irq binding
- xen/pciback: use lateeoi irq binding
- xen/events: switch user event channels to lateeoi model
- xen/events: use a common cpu hotplug hook for event channels
- xen/events: defer eoi in case of excessive number of events
- xen/events: block rogue events for some time
- RDMA/qedr: Fix memory leak in iWARP CM
+ - [Config] update config for ARCH_WANT_IRQS_OFF_ACTIVATE_MM
+ - mm: fix exec activate_mm vs TLB shootdown and lazy tlb switching race
+ - f2fs: fix uninit-value in f2fs_lookup
+ - power: supply: bq27xxx: report "not charging" on all types
+ - media: imx274: fix frame interval handling
+ - arm64: topology: Stop using MPIDR for topology information
+ - ia64: kprobes: Use generic kretprobe trampoline handler
+ - media: uvcvideo: Fix dereference of out-of-bound list iterator
+ - riscv: Define AT_VECTOR_SIZE_ARCH for ARCH_DLINFO
+ - usb: xhci: Use complete_all for open states
+ - cifs: handle -EINTR in cifs_setattr
+ - ACPI: button: fix handling lid state changes when input device closed
+ - scsi: qla2xxx: Fix crash on session cleanup with unload
+ - btrfs: improve device scanning messages
+ - usb: xhci: Workaround for S3 issue on AMD SNPS 3.0 xHC
+ - usb: typec: tcpm: reset hard_reset_count for any disconnect
+ - powerpc: Fix undetected data corruption with P9N DD2.1 VSX CI load emulation
+ - drm/amd/display: Don't invoke kgdb_breakpoint() unconditionally
+ - [HP 635] Radeon 6310 brightness control does not work (LP: #1894667 //
+ - Bionic update: upstream stable patchset 2020-11-18 (LP: #1904791)
+ - ACPI: video: use ACPI backlight for HP 635 Notebook
+ - Bionic update: upstream stable patchset 2020-11-17 (LP: #1904613)
+ - RDMA/cma: Remove dead code for kernel rdmacm multicast
+ - RDMA/hns: Fix missing sq_sig_type when querying QP
+ - rpmsec: smd: Fix a kobj leak in in qcom_smd_parse_edge()
+ - pwm: img: Fix null pointer access in probe
+ - watchdog: Fix memleak in watchdog_cdev_register
+ - watchdog: Use put_device on error
+ - SUNRPC: fix copying of multiple pages in gss_read_proxy_verf()
+ - netfilter: conntrack: connection timeout after re-register
+ - netfilter: nf_fwd_netdev: clear timestamp in forwarding path
+ - ARM: dts: imx6sl: fix rng node
+ - ARM: dts: sun8i: r40: bananapi-m2-ultra: Fix dcdc1 regulator
+ - memory: omap-gpmc: Fix build error without CONFIG_OF
+ - arm64: dts: qcom: pm8916: Remove invalid reg size from wcd_codec
+ - ip_gre: set dev->hard_header_len and dev->needed_headroom properly
+ - usb: dwc3: simple: add support for Hikey 970
+ - [Bionic] btrfs: kernel BUG at /build/linux-
+ - eTBZpZ/linux-4.15.0/fs/btrfs/ctree.c:3233! (LP: #1902254)
+ - btrfs: tree-checker: fix incorrect printk format
+ - [Bionic] update: upstream stable patchset 2020-11-10 (LP: #1903768)
+ Bluetooth: fix kernel oops in store_pending_adv_report
+ Bluetooth: Consolidate encryption handling in hci_encrypt_cfm
+ Bluetooth: Fix update of connection state in `hci_encrypt_cfm`
+ Bluetooth: Disconnect if E0 is used for Level 4
+ media: usbtv: Fix refcounting mixup
+ USB: serial: option: add Cellent MPL200 card
+ USB: serial: option: Add Telit FT980-KS composition
+ staging: comedii: check validity of wMaxPacketSize of usb endpoints found
+ USB: serial: pl2303: add device-id for HP GC device
+ USB: serial: ftdi_sio: add support for FreeCalypso JTAG+UART adapters
+ reiserfs: Initialize inode keys properly
+ reiserfs: Fix oops during mount
+ drivers/net/ethernet/marvell/mvmdio.c: Fix non OF case
+ crypto: bcm - Verify GCM/CCM key length in setkey
+ crypto: qat - check cipher length for aead AES-CBC-HMAC-SHA
+ ARM: 8858/1: vdso: use $(LD) instead of $(CC) to link VDSO
+ ARM: 8939/1: kbuild: use correct nm executable
+ ARM: 8867/1: vdso: pass --be8 to linker if necessary
+ ibmveth: Switch order of ibmveth_helper calls.
+ ibmveth: Identify ingress large send packets.
+ ipv4: Restore flowi4_oif update before call to xfrm_lookup_route
+ mlx4: handle non-napi callers to napi_poll
+ net: usb: qmi_wwan: add Cellent MPL200 card
+ tipc: fix the skb_unshare() in tipc_buf_append()
+ net/ipv4: always honour route mtu during forwarding
+ r8169: fix data corruption issue on RTL8402
+ binder: fix UAF when releasing todo list
+ ALSA: bebob: potential info leak in hwdep_read()
+ net: hdlc: In hdlc_rcv, check to make sure dev is an HDLC device
+ net: hdlc_raw_eth: Clear the IFF_TX_SKB_SHARING flag after calling ether_setup
+ nf: Ensure presence of NFC_ATTR_FIRMWARE_NAME attribute in
  nf_genl_fw_download()
+ tcp: fix to update snd_w11 in bulk receiver fast path
+ icmp: randomize the global rate limiter
+ cifs: remove bogus debug code
+ cifs: Return the error from crypt_message when enc/dec key not found.
+ KVM: x86/mm: Commit zap of remaining invalid pages when recovering lpages
+ KVM: SVM: Initialize prev_ga_tag before use
+ ima: Don't ignore errors from crypto_shash_update()
+ crypto: algif_aead - Do not set MAY_BACKLOG on the async path
+ EDAC/i5100: Fix error handling order in i5100_init_one()
+ x86/fpu: Allow multiple bits in clearcpuid= parameter
+ drivers/perf: xgene_pmu: Fix uninitialized resource struct
+ crypto: algif_skicipher - EBUSY on aio should be an error
+ crypto: mediatek - Fix wrong return value in mtk_desc_ring_alloc()
+ crypto: ixp4xx - Fix the size used in 'dma_free_coherent()' call
+ media: tuner-simple: fix regression in simple_set_radio_freq
- media: Revert "media: exynos4-is: Add missed check for
  pinctrl_lookup_state()"
- media: m5mols: Check function pointer in m5mols_sensor_power
- media: uvcvideo: Set media controller entity functions

- crypto: omap-sham - fix digest register handling with export/import
- crypto: mediatek - fix leaks in mtk_desc_ring_alloc
- media: mx2_emmaprp: Fix memleak in emmaprp_probe
- media: tc358743: initialize variable
- media: s5p-mfc: Fix a reference count leak
- media: ti-vpe: Fix a missing check and reference count leak
- regulator: resolve supply after creating regulator
- ath10k: provide survey info as accumulated data
- Bluetooth: hci_uart: Cancel init work before unregistering
- ath6kl: prevent potential array overflow in ath6kl_add_new_sta()
- ath9k: Fix potential out of bounds in ath9k_htc_txcompletion_cb()
- wcn36xx: Fix reported 802.11n rx highest rate wcn3660/wcn3680
- ASoC: qcom: lpass-platform: fix memory leak
- ASoC: qcom: lpass-cpu: fix concurrency issue
- brcmfmac: check ndev pointer
- mwifiex: Do not use GFP_KERNEL in atomic context
- drm/gma500: fix error check
- scsi: qla4xxx: Fix an error handling path in 'qla4xxx_get_host_stats()'  
- scsi: csiostor: Fix wrong return value in csiio_hw_prep_fw()
- backlight: sky81452-backlight: Fix refcount imbalance on error
- VMCI: check return value of get_user_pages_fast() for errors
- tty: serial: earlycon dependency
- pty: do tty_flip_buffer_push without port->lock in pty_write
- pwm: lpss: Fix off by one error in base_unit math in pwm_lpss_prepare()
- pwm: lpss: Add range limit check for the base_unit register value
- drivers/virt/fsl_hypervisor: Fix error handling path
- video: fbdev: vga16fb: fix setting of pixclock because a pass-by-value error
- video: fbdev: sis: fix null ptr dereference
- HID: roccat: add bounds checking in kone_sysfs_write_settings()
- pinctrl: mcp23s08: Fix mcp23x17_regmap initialiser
- pinctrl: mcp23s08: Fix mcp23x17 precious range
- ath6kl: wmi: prevent a shift wrapping bug in ath6kl_wmi_delete_pstream_cmd()
- misc: mic: scif: Fix error handling path
- ALSA: seq: oss: Avoid mutex lock for a long-time ioctl
- usb: dwc2: Fix parameter type in function pointer prototype
- quota: clear padding in v2r1_mem2diskdqbt()
- HID: hid-input: fix stylus battery reporting
- qtnfmac: fix resource leaks on unsupported iftype error return path
- net: enic: Cure the enic api locking trainwreck
- mfd: sm501: Fix leaks in probe()
- iwlfwifi: nvm: split a print to avoid a WARNING in ROC
+ - usb: gadget: u Ether: enable qmult on SuperSpeed Plus as well
+ - n80211: fix non-split wiphy information
+ - usb: dwc2: Fix INTR OUT transfers in DDMA mode.
+ - scsi: be2iscsi: Fix a theoretical leak in beiscsi_create_eqs()
+ - mwifiex: fix double free
+ - net: korina: fix kfree of rx/tx descriptor array
+ - mm/memcg: fix device private memcg accounting
+ - mm, oom_adj: don't loop through tasks in __set_oom_adj when not necessary
+ - IB/mlx4: Fix starvation in paravirt mux/demux
+ - IOM: Adjust delayed work when a dup is observed
+ - powerpc/pseries: Fix missing of_node_put() in rng_init()
+ - powerpc/icmp: Fix missing of_node_put() in success path
+ - mtd: lpddr: fix excessive stack usage with clang
+ - mtd: mtdoops: Don't write panic data twice
+ - ARM: 9007/1: l2c: fix prefetch bits init in L2X0_AUX_CTRL using DT values
+ - arch: plat-hsdk: fix kconfig dependency warning when !RESET_CONTROLLER
+ - xfs: limit entries returned when counting fsmap records
+ - RDMA/qedr: Fix use of uninitialized field
+ - powerpc/tau: Use appropriate temperature sample interval
+ - powerpc/tau: Remove duplicated set_thresholds() call
+ - powerpc/tau: Disable TAU between measurements
+ - perf intel-pt: Fix "context_switch event has no tid" error
+ - perf intel: Set the unsupported wr opcode
+ - kdb: Fix pager search for multi-line strings
+ - USB: Include header file with SIZE_MAX declaration
+ - powerpc/perf: Exclude pmc5/6 from the irrelevant PMU group constraints
+ - powerpc/perf/hv-gpci: Fix starting index value
+ - cpufreq: powernv: Fix frame-size-overflow in powernv_cpufreq_reboot_notifier
+ - IB/rdavd: Fix sizeof mismatch
+ - f2fs: wait for sysfs kobject removal before freeing f2fs_sb_info
+ - lib/crc32.c: Fix trivial typo in preprocessor condition
+ - ramfs: fix nommu mmap with gaps in the page cache
+ - rapidio: fix error handling path
+ - rapidio: fix the missed put_device() for rio_mport_add_riodev
+ - mailbox: avoid timer start from callback
+ - i2c: rea: Auto select RESET_CONTROLLER
+ - PCI: iproc: Set affinity mask on MSI interrupts
+ - clk: at91: clk-main: update key before writing AT91_CKGR_MOR
+ - clk: bcm2835: add missing release if devm_clk_hw_register fails
+ - extd: limit entries returned when counting fsmap records
+ - vfio/pci: Clear token on bypass registration failure
+ - vfio iommu type1: Fix memory leak in vfio_iommu_type1_pin_pages
+ - Input: imx6ul_tsc - clean up some errors in imx6ul_tsc_resume()
+ - Input: stmfts - fix a & vs && typo
+ - Input: ep93xx_keypad - fix handling of platform_get_irq() error
+ - Input: omap4-keypad - fix handling of platform_get_irq() error
+ - Input: twl4030_keypad - fix handling of platform_get_irq() error
+ - Input: sun4i-ps2 - fix handling of platform_get_irq() error

Open Source Used In 5GaaS Edge AC-4 12870

- USB: cdc-wdm: Make wdm_flush() interruptible and add wdm_fsync().
- eeprom: at25: set minimum read/write access stride to 1
- powerpc/powernv/opal-dump: Use IRQ_HANDLED instead of numbers in interrupt handler
- net: fix pos incrementment in ipv6_route_seq_next
- ALSA: hda/realtek: Enable audio jacks of ASUS D700SA with ALC887
- x86/nmi: Fix nmi_handle() duration miscalculation
- x86/events/amd/iommu: Fix sizeof mismatch
- media: uvcvideo: Silence shift-out-of-bounds warning
- hwmon: (pmbus/max34440) Fix status register reads for MAX344[51,60,61]
- media: tc358743: cleanup tc358743_cce_isr
- pinctrl: bcm: fix kconfig dependency warning when !GPIOLIB
- spi: spi-s3c64xx: swap s3c64xx_spi_set_cs() and s3c64xx_enable_datapath()
- staging: rtl8192u: Do not use GFP_KERNEL in atomic context
- net: stmmac: use netif_tx_start[stop_all_queues()] function
- scsi: target: tcmu: Fix warning: 'page' may be used uninitialized
- ipvs: clear skb->tstamp in forwarding path
- netfilter: nf_log: missing vlan offload tag and proto
- RDMA/acma: Fix locking for ctx->events_reported
- RDMA/acma: Add missing locking around rdma_leave_multicast()
- RDMA/qedr: Fix inline size returned for iWARP

+
+ * bionic/linux: 4.15.0-125.128 -proposed tracker (LP: #1903137)
+
+ * Update kernel packaging to support forward porting kernels (LP: #1902957)
+  - [Debian] Update for leader included in BACKPORT_SUFFIX
+
+ * Avoid double newline when running insertchanges (LP: #1903293)
+  - [Packaging] insertchanges: avoid double newline
+
+ * EFI: Fails when BootCurrent entry does not exist (LP: #1899993)
+  - efi vaporfs: Replace invalid slashes with exclamation marks in dentries.
+
+ * CVE-2020-14351
+  - perf/core: Fix race in the perf_mmap_close() function
+
+ * raid10: Block discard is very slow, causing severe delays for mkfs and fstrim operations (LP: #1896578)
- md: add md_submit_discard_bio() for submitting discard bio
- md/raid10: extend r10bio devs to raid disks
- md/raid10: pull codes that wait for blocked dev into one function
- md/raid10: improve raid10 discard request
- md/raid10: improve discard request for far layout

* Bionic: btrfs: kernel BUG at /build/linux-
  eTBZpZ/linux-4.15.0/fs/btrfs/ctree.c:3233! (LP: #1902254)
- btrfs: use offset_in_page instead of open-coding it
- btrfs: use BUG() instead of BUG_ON(1)
- btrfs: drop unnecessary offset_in_page in extent buffer helpers
- btrfs: extent_io: do extra check for extent buffer read write functions
- btrfs: extent-tree: kill BUG_ON() in __btrfs_free_extent()
- btrfs: extent-tree: kill the BUG_ON() in insert_inline_extent_backref()
- btrfs: ctree: check key order before merging tree blocks

* Bionic update: upstream stable patchset 2020-11-04 (LP: #1902943)
- USB: gadget: f_ncm: Fix NDP16 datagram validation
- gpio: tc35894: fix up tc35894 interrupt configuration
- vsock/virtio: use RCU to avoid use-after-free on the_virtio_vsock
- vsock/virtio: stop workers during the_remove()
- vsock/virtio: add transport parameter to the
  virtio_transport_reset_no_sock()
- net: virtio_vsock: Enhance connection semantics
- Input: i8042 - add nopnp quirk for Acer Aspire 5 A515
- ftrace: Move RCU is watching check after recursion check
- drm/amdgpu: restore proper ref count in amdgpu_display_crtc_set_config
- drivers/net/wanhdlc: Add needed_headroom for PVC devices
- drm/sun4i: mixer: Extend regmap max_register
- net: dec: de2104x: Increase receive ring size for Tulip
- rndis_host: increase sleep time in the query-response loop
- nvme-core: get/put ctrl and transport module in nvme_dev_open/release()
- drivers/net/wan/lapbether: Make skb->protocol consistent with the header
- drivers/net/wan/hdlc: Set skb->protocol before transmitting
- mac80211: do not allow bigger VHT MPDUs than the hardware supports
- spi: fsl-espi: Only process interrupts for expected events
- nvme-fc: fail new connections to a deleted host or remote port
- pinctrl: mvebu: Fix i2c sda definition for 98DX3236
- nfs: Fix security label length not being reset
- clk: samsung: exynos4: mark 'chipid' clock as CLK_IGNORE_UNUSED
- iommu/exynos: add missing put_device() call in exynos_iommu_of_xlate()
- i2c: cpu: Fix i2c_ram structure
- Input: trackpoint - enable Synaptics trackpoints
- random32: Restore __latent_entropy attribute on net_rand_state
- epoll: do not insert into poll queues until all sanity checks are done
- epoll: replace ->visited/visited_list with generation count
- epoll: EPOLL_CTL_ADD: close the race in decision to take fast path
- ep_create_wakeup_source(): dentry name can change under you...
+ - netfilter: ctnetlink: add a range check for 13/4 protonum
+ - drm/syncobj: Fix drm_syncobj_handle_to_id refcount leak
+ - fbdev, newport_con: Move FONT_EXTRA_WORDS macros into linux/font.h
+ - Fonts: Support FONT_EXTRA_WORDS macros for built-in fonts
+ - Revert "ravb: Fixed to be able to unload modules"
+ - fbcon: Fix global-out-of-bounds read in fbcon_get_font()
+ - net: wireless: nl80211: fix out-of-bounds access in nl80211_del_key()
+ - usermodehelper: reset umask to default before executing user process
+ - platform/x86: thinkpad_acpi: initialize tp_nvram_state variable
+ - platform/x86: thinkpad_acpi: re-initialize ACPI buffer size when reuse
+ - driver core: Fix probe_count imbalance in really_probe()
+ - perf top: Fix stdio interface input handling with glibc 2.28+
+ - mtd: rawnand: sunxi: Fix the probe error path
+ - macsec: avoid use-after-free in macsec_handle_frame()
+ - mm/khugepaged: fix filemap page_to_pgoff(page) != offset
+ - cifs: Fix incomplete memory allocation on setxattr path
+ - i2c: meson: fix clock setting overwrite
+ - scpt: fix scpt_auth_init_hmacs() error path
+ - team: set dev->needed_headroom in team_setup_by_port()
+ - net: team: fix memory leak in __team_options_register
+ - openswitch: handle DNAT tuple collision
+ - drm/amdgpu: prevent double kfree ttm->sg
+ - xfrm: clone XFRMA_REPLAY_ESN_VAL in xfrm_do_migrate
+ - xfrm: clone XFRMA_SEC_CTX in xfrm_do_migrate
+ - xfrm: clone whole lifetime_cur structure in xfrm_do_migrate
+ - net: stmnic: removed enabling eee in EEE set callback
+ - platform/x86: fix kconfig dependency warning for FUJITSU_LAPTOP
+ - xfrm: Use correct address family in xfrm_state_find
+ - bonding: set dev->needed_headroom in bond_setup_by_slave()
+ - mdio: fix mdio-thunder.c dependency & build error
+ - net: usb: ax88179_178a: fix missing stop entry in driver_info
+ - rxrpc: Fix rxkad token xdr encoding
+ - rxrpc: Downgrade the BUG() for unsupported token type in rxrpc_read()
+ - rxrpc: Fix some missing _bh annotations on locking conn->state_lock
+ - rxrpc: Fix server keyring leaking
+ - perf: Fix task_function_call() error handling
+ - mmc: core: don't set limitsdiscard granularity as 0
+ - mmc: khugepaged: recalculate min_free_kbytes after memory hotplug as expected
+ - by khugepaged
+ - net: usb: rtl8150: set random MAC address when set_ethernet_addr() fails
+ - drm/nouveau/mem: guard against NULL pointer access in mem_del
+ - i2c: i801: Exclude device from suspend direct complete optimization
+ - nvme-core: put ctrl ref when module ref get fail
+ - i2c: meson: fixup rate calculation with filter delay
+ - xfrm: clone XFRMA_SET_MARK in xfrm_do_migrate
+ - net/mlx5e: Fix VLAN cleanup flow
+ - net/mlx5e: Fix VLAN create flow
+ -
+ kci_test_encap_fou() in rtnetlink.sh from kselftests/net failed with "FAIL:
+ can't add fou port 7777, skipping test" (LP: #1891421)
+ - selftests: rtnetlink: load fou module for kci_test_encap_fou() test
+
+ Bionic update: upstream stable patchset 2020-10-23 (LP: #1901257)
+ - af_key: pfkey_dump needs parameter validation
+ - KVM: fix memory leak in kvm_io_bus_unregister_dev()
+ - kprobes: fix kill kprobe which has been marked as gone
+ - mm/thp: fix __split_huge_pmd_locked() for migration PMD
+ - cxgb4: Fix offset when clearing filter byte counters
+ - geneve: add transport ports in route lookup for geneve
+ - hdle_ppp: add range checks in ppp_cp_parse_cr()
+ - ip: fix tos reflection in ack and reset packets
+ - net: ipv6: fix kconfig dependency warning for IPV6_SEG6_HMAC
+ - npf: use correct define to return NONE fec
+ - tipc: Fix memory leak in tipc_group_create_member()
+ - tipc: fix shutdown() of connection oriented socket
+ - tipc: use skb_unshare() instead in tipc_buf_append()
+ - bnxt_en: Protect bnxt_set_eee() and bnxt_set_pauseparam() with mutex.
+ - net: phy: Avoid NPD upon phy_detach() when driver is unbound
+ - net: qrtr: check skb_put_padto() return value
+ - net: add __must_check to skb_put_padto()
+ - ipv4: Update exception handling for multipath routes via same device
+ - MAINTAINERS: add CLANG/LLVM BUILD SUPPORT info
+ - Documentation/llvm: add documentation on building w/ Clang/LLVM
+ - Documentation/llvm: fix the name of llvm-size
+ - net: wan: wanxl: use allow to pass CROSS_COMPILE_M68k for rebuilding firmware
+ - net: wan: wanxl: use $(M68KCC) instead of $(M68KAS) for rebuilding firmware
+ - kbuild: replace AS=clang with LLVM_IAS=1
+ - tcp_bbr: refactor bbr_target_cwnd() for general inflight provisioning
+ - tcp_bbr: adapt cwnd based on ack aggregation estimation
+ - serial: 8250: Avoid error message on reprobe
+ - RDMA/ucma: ucma_context reference leak in error path
+ - mm: fix double page fault on arm64 if PTE_AF is cleared
+ - scsi: aacraid: fix illegal IO beyond last LBA
+ - m68k: q40: Fix info-leak in rtc_ioctl
+ - gma/gma500: fix a memory disclosure bug due to uninitialized bytes
+ - ASoC: kirkwood: fix IRQ error handling
+ - media: smiap: Fix error handling at NVM reading
+ - arch/x86/lib/usercopy_64.c: fix __copy_user_flushcache() cache writeback
+ - x86/ioapic: Unbreak check_timer()
+ - ALSA: usb-audio: Add delay quirk for H570e USB headsets
+ - ALSA: hda/realtek - Couldn't detect Mic if booting with headset plugged
+ - PM / devfreq: tegra30: Fix integer overflow on CPU's freq max out
+ - scsi: fnic: fix use after free
+ - clk/ti/adpll: allocate room for terminating null
+ - mtd: cfi_cmdset_0002: don't free cfi->cfiq in error path of
+ cfi_amdstd_setup()
+ - mfd: mfd-core: Protect against NULL call-back function pointer
+ - tracing: Adding NULL checks for trace_array descriptor pointer
+ - bcache: fix a lost wake-up problem caused by mca_cannibalize_lock
+ - RDMA/i40iw: Fix potential use after free
+ - xfs: fix attr leaf header freemap.size underflow
+ - RDMA/iw_cgxb4: Fix an error handling path in 'c4iw_connect()'
+ - mmc: core: Fix size overflow for mmc partitions
+ - gfs2: clean up iopen glock mess in gfs2_create_inode
+ - debugfs: Fix !DEBUG_FS debugfs_create_automount
+ - CIFS: Properly process SMB3 lease breaks
+ - kernel/sys.c: avoid copying possible padding bytes in copy_to_user
+ - neigh_stat_seq_next() should increase position index
+ - rt_cpu_seq_next should increase position index
+ - seqlock: Require WRITE_ONCE surrounding raw_seqcount_barrier
+ - media: ti-ype: cal: Restrict DMA to avoid memory corruption
+ - ACPI: EC: Reference count query handlers under lock
+ - dmaengine: zynqmp_dma: fix burst length configuration
+ - powerpc/eeh: Only dump stack once if an MMIO loop is detected
+ - tracing: Set kernel_stack's caller size properly
+ - ar5523: Add USB ID of SMCWUSBT-G2 wireless adapter
+ - selftests/ftrace: fix glob selftest
+ - tools/power/x86/intel_pstate_tracer: changes for python 3 compatibility
+ - Bluetooth: Fix refcount use-after-free issue
+ - mm: pagewalk: fix termination condition in walk_pte_range()
+ - Bluetooth: prefetch channel before killing socket
+ - ALSA: hda: Clear RIRB status before reading WP
+ - skbbuff: fix a data race in skb_queue_len()
+ - audit: CONFIG_CHANGE don't log internal bookkeeping as an event
+ - selinux: sel_avc_get_stat_idx should increase position index
+ - scsi: lpfc: Fix RQ buffer leakage when no IOCBs available
+ - scsi: lpfc: Fix coverity errors in fmdi attribute handling
+ - drm/omap: fix possible object reference leak
+ - perf test: Fix test trace+probe vfs_getname.sh on s390
+ - RDMA/rxe: Fix configuration of atomic queue pair attributes
+ - KVM: x86: fix incorrect comparison in trace event
+ - media: staging/imx: Missing assignment in
+ - imx_media_capture_device_register()
+ - x86/pkeys: Add check for pkey "overflow"
+ - bpf: Remove recursion prevention from rcu free callback
+ - dmaengine: tegra-apb: Prevent race conditions on channel's freeing
+ - media: go7007: Fix URB type for interrupt handling
+ - Bluetooth: guard against controllers sending zero'd events
+ - timekeeping: Prevent 32bit truncation in scale64_check_overflow()
+ - ext4: fix a data race at inode->i_disksize
+ - mm: avoid data corruption on CoW fault into PFN-mapped VMA
+ - drm/amdgpu: increase atombios cmd timeout
+ - ath10k: use kzalloc to read for ath10k_sdio_hif_diag_read
+ - scsi: aacraid: Disabling TM path and only processing IOP reset
+ - Bluetooth: L2CAP: handle l2cap config request during open state
+ - media: tda10071: fix unsigned sign extension overflow
+ - xfs: don't ever return a stale pointer from __xfs_dir3_free_read
+ - tpm: ibmvtpm: Wait for buffer to be set before proceeding
+ - rtc: ds1374: fix possible race condition
+ - tracing: Use address-of operator on section symbols
+ - serial: 8250_port: Don't service RX FIFO if throttled
+ - serial: 8250_omap: Fix sleeping function called from invalid context during probe
+ - serial: 8250: 8250_omap: Terminate DMA before pushing data on RX timeout
+ - perf cpumap: Fix snprintf overflow check
+ - cpufreq: powernv: Fix frame-size-overflow in powernv_cpufreq_work_fn
+ - tools: gpio-hammer: Avoid potential overflow in main
+ - RDMA/rxe: Set sys_image_guid to be aligned with HW IB devices
+ - SUNRPC: Fix a potential buffer overflow in 'svc_print_xprts()'
+ - svcrdma: Fix leak of transport addresses
+ - ubifs: Fix out-of-bounds memory access caused by abnormal value of node_len
+ - ALSA: usb-audio: Fix case when USB MIDI interface has more than one extra endpoint descriptor
+ - NFS: Fix races nfs_page_group_destroy() vs
+ - nfs_destroy_unlinked_subrequests()
+ - mm/kmemleak.c: use address-of operator on section symbols
+ - mm/filemap.c: clear page error before actual read
+ - mm/vmscan.c: fix data races using kswapd_classzone_idx
+ - mm/mmap.c: initialize align_offset explicitly for vm_unmapped_area
+ - scsi: qedi: Fix termination timeouts in session logout
+ - serial: uartps: Wait for tx_empty in console setup
+ - KVM: Remove CREATE_IRQCHIP/SET_PIT2 race
+ - bdev: Reduce time holding bd_mutex in sync in blkdev_close()
+ - drivers: char: tlclk.c: Avoid data race between init and interrupt handler
+ - staging:r8188eu: avoid skb_clone for amsdu to msdu conversion
+ - sparc64: vcc: Fix error return code in vcc_probe()
+ - arm64: cpufeature: Relax checks for AArch32 support at EL[0-2]
+ - dt-bindings: sound: wm8994: Correct required supplies based on actual implementation
+ - atm: fix a memory leak of vcc->user_back
+ - power: supply: max17040: Correct voltage reading
+ - phy: samsung: s5pv210-usb2: Add delay after reset
+ - Bluetooth: Handle Inquiry Cancel error after Inquiry Complete
+ - USB: EHCI: ehci-mv: fix error handling in mv_ehci_probe()
+ - tty: serial: samsung: Correct clock selection logic
+ - ALSA: hda: Fix potential race in unsol event handler
+ - powerpc/traps: Make unrecoverable NMIs die instead of panic
+ - fuse: don't check refcount after stealing page
+ - USB: EHCI: ehci-mv: fix less than zero comparison of an unsigned int
+ - arm64/cpufeature: Drop TraceFilt feature exposure from ID_DFR0 register
+ - c1000: Do not perform reset in reset_task if we are already down
+ - drm/nouveau/debugfs: fix runtime pm imbalance on error
+ - printk: handle blank console arguments passed in.
+ - usb: dwc3: Increase timeout for CmdAct cleared by device controller
+ - btrfs: don't force read-only after error in drop snapshot
+ - vfio/pci: fix memory leaks of eventfd ctx
+ - perf util: Fix memory leak of prefix_if_not_in
+ - perf kcore_copy: Fix module map when there are no modules loaded
+ - mtd: rawnand: omap_elm: Fix runtime PM imbalance on error
+ - ceph: fix potential race in ceph_check_caps
+ - mm/swap_state: fix a data race in swapin_nr_pages
+ - mport_cdev_add()
+ - mtd: parser: cmdline: Support MTD names containing one or more colons
+ - x86/speculation/mds: Mark mds_user_clear_cpu_buffers() __always_inline
+ - vfio/pci: Clear error and request eventfd ctx after releasing
+ - cifs: Fix double add page to memcg when cifs_readpages
+ - scsi: libfc: Handling of extra kref
+ - scsi: libfc: Skip additional kref updating work event
+ - selftests/x86/syscall_nt: Clear weird flags after each test
+ - vfio/pci: fix racy on error and request eventfd ctx
+ - btrfs: ggroup: fix data leak caused by race between writeback and truncate
+ - s390/init: add missing __init annotations
+ - i2c: core: Call i2c_acpi_install_space_handler() before
  i2c_acpi_register_devices()
+ - objtool: Fix noreturn detection for ignored functions
+ - ieee802154: fix one possible memleak in ca8210_dev_com_init
+ - ieee802154/adf7242: check status of adf7242_read_reg
+ - clocksource/drivers/h8300_timer8: Fix wrong return value in
  h8300_8timer_init()
+ - batman-adv: bla: fix type misuse for backbone_gw hash indexing
+ - atm: eni: fix the missed pci_disable_device() for eni_init_one()
+ - batman-adv: mcast/TT: fix wrongly dropped or rerouted packets
+ - mac802154: tx: fix use-after-free
+ - drm/vc4/vc4_hdmi: fill ASoC card owner
+ - net: qed: RDMA personality shouldn't fail VF load
+ - batman-adv: Add missing include for in_interrupt()
+ - batman-adv: mcast: fix duplicate mcast packets in BLA backbone from mesh
+ - ALSA: asihpi: fix iounmap in error handler
+ - MIPS: Add the missing ’CPU_1074K’ into __get_cpu_type()
+ - s390/dasd: Fix zero write for FBA devices
+ - kprobes: Fix to check probe enabled before disarm_kprobe_ftrace()
+ - mm, THP, swap: fix allocating cluster for swapfile by mistake
+ - lib/string.c: implement stpcpy
+ - ata: define AC_ERR_OK
+ - ata: make qc_prep return ata_completion_errors
+ - ata: sata_mv, avoid trigerrable BUG_ON
+ - media: mc-device.c: fix memleak in media_device_register_entity
+ - tpm_cr: fix fTPM on AMD Zen+ CPUs
+ - RDMA/qedr: Fix potential use after free
+ - fix dget_parent() fastpath race
+ - scsi: pm80xx: Cleanup command when a reset times out
+ - ASoC: max98090: remove msleep in PLL unlocked workaround
+ - ipv6_route_seq_next should increase position index
+ - scsi: ufs: Fix a race condition in the tracing code
+ - s390/cpum_sf: Use kzalloc and minor changes
+ - ceph: ensure we have a new cap before continuing in fill_inode
+ - mm/swapfile.c: swap_next should increase position index
+ - dmaengine: stm32-mdma: use vchan_terminate_vdesc() in .terminate_all
+ - dmaengine: stm32-dma: use vchan_terminate_vdesc() in .terminate_all
+ - drm/amd/display: dal_dcc_i2c_payloads_create can fail causing panic
+ - firmware: arm_sdei: Use cpus_read_lock() to avoid races with cpuhp
+ - random: fix data races at timer_rand_state
+ - bus: hisi_lpc: Fixup IO ports addresses to avoid use-after-free in host removal
+ - perf jevents: Fix leak of mapfile memory
+ - xfs: mark dir corrupt when lookup-by-hash fails
+ - rtc: sa1100: fix possible race condition
+ - nfsd: Don't add locks to closed or closing open stateids
+ - KVM: PPC: Book3S HV: Treat TM-related invalid form instructions on P9 like the valid ones
+ - thermal: rcar_thermal: Handle probe error gracefully
+ - nvme: Fix controller creation races with teardown flow
+ - scsi: hpsa: correct race condition in offload enabled
+ - PCI: Use ioremap(), not phys_to_virt() for platform ROM
+ - KVM: arm64: vgic-its: Fix memory leak on the error path of vgic_add_lpi()
+ - net: openvswitch: use u64 for meter bucket
+ - scsi: aacraid: Fix error handling paths in aac_probe_one()
+ - scsi: cxlflash: Fix return code in cxlflash_probe()
+ - drm/nouveau: fix runtime pm imbalance on error
+ - perf evsel: Fix 2 memory leaks
+ - perf stat: Fix duration_time value for higher intervals
+ - perf metricgroup: Free metric_events on error
+ - ASoC: img-i2s-out: Fix runtime PM imbalance on error
+ - wlc: fix runtime pm imbalance in w11271_rx_work
+ - nvme: fix possible deadlock when I/O is blocked
+ - net: openvswitch: use div_u64() for 64-by-32 divisions
+ - nvme: explicitly update mpath disk capacity on revalidation
+ - ASoC: wm8994: Skip setting of the WM8994_MICBIAS register for WM1811
+ - drm/amdkfd: fix a memory leak issue
+ - batman-adv: mcast: fix duplicate mcast packets from BLA backbone to mesh
+ - KVM: x86: Reset MMU context if guest toggles CR4.SMAP or CR4.PKE
+ - KVM: SVM: Add a dedicated INVD intercept routine
+ - s390/crypt: Fix ZCRYPT_PERDEV_REQCNT ioctl
+ - kprobes: Fix compiler warning for !CONFIG_KPROBES_ON_FTRACE
+ - KVM: arm64: Assume write fault on S1PTW permission fault on instruction fetch
bcache: Issues with large IO wait in bch_mca_scan() when shrinker is enabled
(LP: #1898786)
- bcache: remove member accessed from struct btree
- bcache: reap c->btree_cache_freeable from the tail in bch_mca_scan()
- bcache: reap from tail of c->btree_cache in bch_mca_scan()

*-tools-common packages descriptions have typo "PGKVER" (LP: #1898903)
- [Packaging] Fix typo in -tools template s/PGKVER/PKGVER/

*hns3-0901]add hns3_gro_complete for HW GRO process (LP: #1893711)
- net: hns3: add rx multicast packets statistic
- net: hns3: minor refactor for hns3_rx_checksum
- net: hns3: add hns3_gro_complete for HW GRO process

* mwifiex stops working after kernel upgrade (LP: #1897299)
- mwifiex: Increase AES key storage size to 256 bits

*Bionic update: upstream stable patchset 2020-09-30 (LP: #1897977)
- ARM: dts: socfpga: fix register entry for timer3 on Arria10
- RDMA/rxe: Fix memleak in rxe_mem_init_user
- RDMA/rxe: Drop pointless checks in rxe_init_ports
- scsi: libas: Set data_dir as DMA_NONE if libata marks qc as NODATA
- RDMA/core: Fix reported speed and width
- mmc: sdhci-msm: Add retries when all tuning phases are found valid
- ARM: dts: BCM5301X: Fixed QSPI compatible string
- arm64: dts: ns2: Fixed QSPI compatible string
- ARC: HSDK: wireup perf irq
- dmaengine: acpi: Put the CSRT table after using it
- drivers/net/wan/lapbether: Added needed_tailroom
- NFC: st95hf: Fix memleak in st95hf_in_send_cmd
- firestream: Fix memleak in fs_open
- ALSA: hda: Fix 2 channel swapping for Tegra
- drivers/net/wan/lapbether: Set network_header before transmitting
- xfs: initialize the shortform attr header padding entry
- irqchip/eznps: Fix build error for !ARC700 builds
- drivers/net/wan/hdlc_cisco: Add hard_header_len
- ARC: [plat-hsdk]: Switch ethernet phy-mode to rgmii-id
- cpufreq: intel_pstate: Refuse to turn off with HWP enabled
- ALSA: hda: fix a runtime pm issue in SOF when integrated GPU is disabled
- gcov: Disable gcov build with GCC 10
- iio: adc: mcp3422: fix locking scope
- iio: adc: mcp3422: fix locking on error path
- iio: adc: ti-ads1015: fix conversion when CONFIG_PM is not set
- iio:ad:ti-adc084s021 Fix alignment and data leak issues.
- iio:adc:ina2xx Fix timestamp alignment issue.
- iio:adc:max1118: Fix alignment of timestamp and data leak issues
- iio:adc:adc081c: Fix alignment and data leak issues.
- iio:accel:mma8452: Fix timestamp alignment and prevent data leak.
- staging:wlan-ng: Fix out of bounds read in prism2sta_probe_usb()
- btrfs: require only sector size alignment for parent eb bytelnr
- btrfs: fix lockdep splat in add_missing_dev
- btrfs: fix wrong address when faulting in pages in the search ioctl
- regulator: push allocation in set_consumer_device_supply() out of lock
- scsi: target: iscsi: Fix data digest calculation
- scsi: target: iscsi: Fix hang in iscsit_access_np() when getting
- tpg->np_login_sem
- rbd: require global CAP_SYS_ADMIN for mapping and unmapping
- RDMA/rxe: Fix the parent sysfs read when the interface has 15 chars
- fbcon: remove soft scrollback code
- fbcon: remove now unused 'softback_lines' cursor() argument
- vgacon: remove software scrollback support
- [Config] updateconfigs for VGACON_SOFT_SCROLLBACK
- KVM: VMX: Don't freeze guest when event delivery causes an APIC-access exit
- ARM: dts: vfxxx: Add syscon compatible with OCOTP
- video: fbdev: fix OOB read in vga_8planes_imageblit()
- staging: greybus: audio: fix uninitialized value issue
- usb: core: fix slab-out-of-bounds Read in readDescriptors
- USB: serial: ftdi_sio: add IDs for Xsens Mti USB converter
- USB: serial: option: support dynamic Quectel USB compositions
- USB: serial: option: add support for SIM7070/SIM7080/SIM7090 modules
- usb: Fix out of sync data toggle if a configured device is reconfigured
- usb: typec: ucsi: acpi: Check the _DEP dependencies
- gcov: add support for GCC 10.1
- gfs2: initialize transaction tr_ailX_lists earlier
- net: handle the return value of skb_carve_frag_list() correctly
- hv_netvsc: Remove "unlikely" from netvsc_select_queue
- NFSv4.1 handle ERR_DELAY error reclaiming locking state on delegation recall
- scsi: pm8001: Fix memleak in pm8001_exec_internal_task_abort
- scsi: libfc: Fix for double free()
- scsi: lpfc: Fix FLOGI/PLOGI receive race condition in pt2pt discovery
- spi: spi-loopback-test: Fix out-of-bounds read
- SUNRPC: stop printk reading past end of string
- rapidio: Replace 'select' DMAENGINES 'with depends on'
- nvme-fc: cancel async events before freeing event struct
- i2fs: fix indefinite loop scanning for free nid
- i2c: algo: pca: Reapply i2c bus settings after reset
- spi: Fix memory leak on splitted transfers
- KVM: MIPS: Change the definition of kvm type
+ - clk: rockchip: Fix initialization of mux_pll_src_4plls_p
+ - Drivers: hv: vmbus: Add timeout to vmbus_wait_for_unload
+ - MIPS: SNI: Fix MIPS_L1_CACHE_SHIFT
+ - perf test: Free formats for perf pmu parse test
+ - fbcon: Fix user font detection test at fbcon_resize().
+ - MIPS: SNI: Fix spurious interrupts
+ - drm/mediatek: Add exception handing in mtk_drm_probe() if component init
+ - USB: quirks: Add USB_QUIRK_IGNORE_REMOTE_WAKEUP quirk for BYD zhaoxin
+ - noteook
+ - USB: UAS: fix disconnect by unplugging a hub
+ - usblp: fix race between disconnect() and read()  
+ - i2c: i801: Fix resume bug
+ - percpu: fix first chunk size calculation for populated bitmap
+ - Input: trackpoint - add new trackpoint variant IDs
+ - Input: i8042 - add Entroware Proteus EL07R4 to nomux and reset lists
+ - serial: 8250_pci: Add Realtek 816a and 816b
+ - ehci-hcd: Move include to keep CRC stable
+ - powerpe/dma: Fix dma_map_ops::get_required_mask
+ - x86/defconfig: Enable CONFIG_USB_XHCI_HCD=y
+ - RDMA/bnxt_re: Do not report transparent vlan from QP1
+ - ARM: dts: bcm: HR2: Fixed QSPI compatible string
+ - ARM: dts: NSP: Fixed QSPI compatible string
+ - netfilter: conntrack: allow sctp hearbeat after connection re-use
+ - cpufreq: intel_pstate: Fix intel_pstate_get_hwp_max() for turbo disabled
+ - iommu/amd: Do not use IOMMUv2 functionality when SME is active
+ - drm/tve200: Stabilize enable/disable
+ - drm/msm: Disable preemption on all 5xx targets
+ - phy: qcom-qmp: Use correct values for ipq8074 PCIe Gen2 PHY init
+ - dsa: Allow forwarding of redirected IGMP traffic
+ - RDMA/bnxt_re: Restrict the max_gids to 256
+ - regulator: pwm: Fix machine constraints application
+ - openrisc: Fix cache API compile issue when not inlining
+ - i2fs: Return EOF on unaligned end of file DIO read
+ - ASoC: qcom: Set card->owner to avoid warnings
+ - perf test: Fix the "signal" test inline assembly
+ - x86/boot/compressed: Disable relocation relaxation
+ *
+ * Bionic update: upstream stable patchset 2020-09-23 (LP: #1896817)
+ - HID: core: Correctly handle ReportSize being zero
+ - HID: core: Sanitize event code and type when mapping input
+ - perf record/stat: Explicitly call out event modifiers in the documentation
+ - drm/msm: add shutdown support for display platform_driver
+ - hwmon: (applesmc) check status earlier.
+ - nvnet: Disable keep-alive timer when kato is cleared to 0h
+ - ceph: don't allow setlease on cephfs
+ - cpuidle: Fixup IRQ state
- s390: don't trace preemption in percpu macros
- xen/xenbus: Fix granting of vmalloc'd memory
- dmaengine: of-dma: Fix of_dma_router_xlate's of_dma_xlate handling
- batman-adv: Avoid uninitialized chaddr when handling DHCP
- batman-adv: Fix own OGM check in aggregated OGMs
- batman-adv: bla: use netif_rx_ni when not in interrupt context
- dmaengine: at_hdmac: check return value of of_find_device_by_node() in
  at_dma_xlate()
- MIPS: mm: BMIPS5000 has inclusive physical caches
- MIPS: BMIPS: Also call bmips_cpu_setup() for secondary cores
- netfilter: nf_tables: add NFTA_SET_USERDATA if not null
- netfilter: nf_tables: incorrect enum nft_list_attributes definition
- netfilter: nf_tables: fix destination register zeroing
- net: hns: Fix memleak in hns_nic_dev_probe
- net: systemport: Fix memleak in bcm_sysport_probe
- ravb: Fixed to be able to unload modules
- net: arc_emac: Fix memleak in arc_mdio_probe
- dmaengine: pl330: Fix burst length if burst size is smaller than bus width
- bnxt_en: Fix for zero dir entries in NVRAM.
- bnxt_en: Fix PCI AER error recovery flow
- nvmet-fc: Fix a missed _irqsave version of spin_lock in
  'nvmet_fh_fod_op_done()'
- perf tools: Correct SNOOPX field offset
- net: ethernet: mlx4: Fix memory allocation in mlx4_buddy_init()
- fix regression in "epoll: Keep a reference on files added to the
  check list"
- tg3: Fix soft lockup when tg3_reset_task() fails.
- iommu/vt-d: Serialize IOMMU GCMD register modifications
- thermal: ti-soc-thermal: Fix bogus thermal shutdowns for omap4430
- include/linux/log2.h: add missing () around n in roundup_pow_of_two()
- btrfs: drop path before adding new uuid tree entry
- btrfs: Remove redundant extent_buffer_get in get_old_root
- btrfs: Remove extraneous extent_buffer_get from tree_mod_log_rewind
- btrfs: set the lockdep class for log tree extent buffers
- uaccess: Add non-pagefault user-space read functions
- uaccess: Add non-pagefault user-space write function
- btrfs: fix potential deadlock in the search ioctl
- net: usb: qmi_wwan: add Telit 0x1050 composition
- usb: qmi_wwan: add D-Link DWM-222 A2 device ID
- ALSA: ca0106: fix error code handling
- ALSA: pcm: oss: Remove superfluous WARN_ON() for mulaw sanity check
- ALSA: hda/hdmi: always check pin power status in i915 pin fixup
- ALSA: firewire-digi00x: exclude Avid Adrenaline from detection
- affs: fix basic permission bits to actually work
- block: allow for_each_bvec to support zero len bvec
- block: Move SECTOR_SIZE and SECTOR_SHIFT definitions into <linux/blkdev.h>
- libata: implement ATA_HORKAGE_MAX_TRIM_128M and apply to Sandisks
- dm cache metadata: Avoid returning cmd->bm wild pointer on error
- dm thin metadata: Avoid returning cmd->bm wild pointer on error
+ - mm: slub: fix conversion of freelist_corrupted()
+ - KVM: arm64: Add kvm_extable for vaxorcism code
+ - KVM: arm64: Defer guest entry when an asynchronous exception is pending
+ - KVM: arm64: Survive synchronous exceptions caused by AT instructions
+ - KVM: arm64: Set HCR_EL2.PTW to prevent AT taking synchronous exception
+ - checkpatch: fix the usage of capture group (...)
+ - mm/hugetlb: fix a race between hugetlb sysctl handlers
+ - cfg80211: regulatory: reject invalid hints
+ - net: usb: Fix uninit-was-stored issue in asix_read_phy_addr()
+ - ALSA; firewire-tascam: exclude Tascam FE-8 from detection
+ - block: ensure bdi->io_pages is always initialized
+ - vfio/pci: Fix SR-IOV VF handling with MMIO blocking
+ - bnxt: don't enable NAPI until rings are ready
+ - netlabel: fix problems with mapping removal
+ - net: usb: dm9601: Add USB ID of Keenetic Plus DSL
+ - sctp: not disable bh in the whole scp_get_port_local()
+ - tipc: fix shutdown() of connectionless socket
+ - net: disable netpoll on fresh napis
+ - scsi: target: tcmu: Fix size in calls to tcmu_flush_dcache_range
+ - scsi: target: tcmu: Optimize use of flush_dcache_page
+ - selftests/bpf: Fix massive output from test_maps
+ - netfilter: nfnetlink: nfnetlink_unicast() reports EAGAIN instead of ENOBUSFS
+ - perf jevents: Fix suspicious code in fixregex()
+ - ext2: don't update mtime on COW faults
+ - xfs: don't update mtime on COW faults

+ * KVM: arm64: Fix symbol dependency in __hyp_call_panic_nvhe
+ * powerpc/spufs: add CONFIG_COREDUMP dependency
+ * USB: sisusbvga: Fix a potential UB casued by left shifting a negative value
+ * efi: provide empty efi_enter_virtual_mode implementation
+ * Revert "ath10k: fix DMA related firmware crashes on multiple devices"
+ * media: gpio-ir-tx: improve precision of transmitted signal due to scheduling
+ - nvme-fc: Fix wrong return value in __nvme_fc_init_request()
+ - null_blk: fix passing of REQ_FUA flag in null_handle_rq
+ - i2c: rcar: in slave mode, clear NACK earlier
+ - usb: gadget: f_tcm: Fix some resource leaks in some error paths
+ - jbd2: make sure jh have b_transaction set in refile/unfile_buffer
+ - ext4: don't BUG on inconsistent journal feature
+ - jbd2: abort journal if free a async write error metadata buffer
+ - fs: prevent BUG_ON in submit_bh_wbc()
+ - spi: stm32: fix stm32_spi_prepare_mbr in case of odd clk_rate
+ - s390/cio: add cond_resched() in the slow_eval_known_fn() loop
+ - scsi: ufs: Fix possible infinite loop in ufshcd_hold
+ - scsi: ufs: Improve interrupt handling for shared interrupts
+ - scsi: ufs: Clean up completed request without interrupt notification
+ - net: gianfar: Add of_node_put() before goto statement
+ - powerpc/perf: Fix soft lockups due to missed interrupt accounting
+ - HID: i2c-hid: Always sleep 60ms after I2C_HID_PWR_ON commands
+ - btrfs: fix space cache memory leak after transaction abort
+ - fc:on: prevent user font height or width change from causing potential out-of-bounds access
+ - USB: lvtest: return proper error code in probe
+ - vt: defer kfree() of vc_screenbuf in vc_do_resize()
+ - vt_ioctl: change VT_RESIZE ioctl to check for error return from vc_resize()
+ - serial: samsung: Removes the IRQ not found warning
+ - serial: pl011: Fix oops on -EPROBE_DEFER
+ - serial: pl011: Don't leak amba_ports entry on driver register error
+ - serial: 8250_exar: Fix number of ports for Commtech PCIe cards
+ - serial: 8250: change lock order in serial8250_do_startup()
+ - writeback: Protect inode->i_io_list with inode->i_lock
+ - writeback: Avoid skipping inode writeback
+ - writeback: Fix sync livelock due to b_dirty_time processing
+ - XEN uses irqdesc::irq_data_common::handler_data to store a per interrupt XEN
+ data pointer which contains XEN specific information.
+ - xhci: Do warm-reset when both CAS and XDEV_RESUME are set
+ - PM: sleep: core: Fix the handling of pending runtime resume requests
+ - device property: Fix the secondary firmware node handling in
+ set_primary_fwnode()
+ - drm/amdgpu: Fix buffer overflow in INFO ioctl
+ - USB: yurex: Fix bad gfp argument
+ - usb: uas: Add quirk for PNY Pro Elite
+ - USB: Ignore UAS for JMicron JMS567 ATA/ATAPI Bridge
+ - usb: host: ohci-exynos: Fix error handling in exynos_ohci_probe()
+ - overflow.h: Add allocation size calculation helpers
+ - USB: gadget: u_f: add overflow checks to VLA macros
+ - USB: gadget: f_ncm: add bounds checks to ncm_unwrap_ntb()
+ - USB: gadget: u_f: Unbreak offset calculation in VLAs
+ - USB: cdc-acm: rework notification_buffer resizing
+ - usb: storage: Add unusual_uas entry for Sony PSZ drives
+ - btrfs: check the right error variable in btrfs_del_dir_entries_in_log
+ - tpm: Unify the mismatching TPM space buffer sizes
+ - HID: hiddev: Fix slab-out-of-bounds write in hiddev_ioctl_usage()
+ - ALSA: usb-audio: Update documentation comment for MS2109 quirk
+ - net: ena: Make missed_tx stat incremental
+ - ASoC: img: Fix a reference count leak in img_i2s_in_set_fmt
+ - AS0C: img-parallel-out: Fix a reference count leak
+ - xfs: Don't allow logging of XFS_ISTALEASE inodes
+ - HID: quirks: add NOGET quirk for Logitech GROUP
+ - drm/msm/adreno: fix updating ring fence
+ - ext4: handle read only external journal device
+ - ext4: handle option set by mount flags correctly
+ - ext4: handle error of ext4_setup_system_zone() on remount
+ - scsi: qla2xxx: Check if FW supports MQ before enabling
+ - scsi: qla2xxx: Fix null pointer access during disconnect from subsystem
+ - macvlan: validate setting of multiple remote source MAC addresses
+ - block: loop: set discard granularity and alignment for block device backed loop
+ - blk-mq: order adding requests to hctx->dispatch and checking SCHED_RESTART
+ - btrfs: reset compression level for lzo on remount
+ - usb: host: xhci: fix ep context print mismatch in debugfs
+ - genirq/matrix: Deal with the silliness of for_each_cpu() on UP
+ - drm/amd/pm: correct Vega10 swctf limit setting
+ - USB: quirks: Ignore duplicate endpoint on Sound Devices MixPre-D

+ * DELL LATITUDE 5491 touchscreen doesn't work (LP: #1889446) // Bionic update:
  + upstream stable patchset 2020-09-16 (LP: #1895873)
  + USB: quirks: Add no-lpm quirk for another Raydium touchscreen

+ * Bionic update: upstream stable patchset 2020-09-11 (LP: #1895328)
+ - drm/vgem: Replace opencoded version of drm_gem_dumb_map_offset()
+ - perf probe: Fix memory leakage when the probe point is not found
+ - khugepaged: khugepaged_test_exit() check mmget_still_valid()
+ - khugepaged: adjust VM BUG_ON_MM() in __khugepaged_enter()
+ - powerpc/mm: Only read faulting instruction when necessary in do_page_fault()
+ - btrfs: export helpers for subvolume name/id resolution
+ - btrfs: don't show full path of bind mounts in subvol=
+ - btrfs: Move free_pages_out label in inline extent handling branch in
  compress_file_range
+ - btrfs: inode: fix NULL pointer dereference if inode doesn't need compression
+ - btrfs: sysfs: use NOFS for device creation
+ - romfs: fix uninitialized memory leak in romfs_dev_read()
+ - kernel/relay.c: fix memleak on destroy relay channel
+ - mm: include CMA pages in lowmem_reserve at boot
+ - mm, page_alloc: fix core hung in free_pcppages_bulk()
+ - ext4: fix checking of directory entry validity for inline directories
+ - jbd2: add the missing unlock_buffer() in the error path of
  jbd2_write_superblock()
+ - [Config] updateconfigs for CONFIG_SPI_DYNAMIC
- spi: Prevent adding devices below an unregistering controller
- scsi: ufs: Add DELAY_BEFORE_LPM quirk for Micron devices
- media: budget-core: Improve exception handling in budget_register()
- rtc: goldfish: Enable interrupt in set_alarm() when necessary
- media: vps: clean up resources in init
- Input: psmouse - add a newline when printing 'proto' by sysfs
- m68knommu: fix overwriting of bits in ColdFire V3 cache control
- xfs: fix inode quota reservation checks
- jiffies: fix UAF problem
- cpufreq: intel_pstate: Fix cpufreq_max_freq when MSR_TURBO_RATIO_LIMIT is 0
- scsi: libfc: Free skb in fc_disc_gpn_id_res() for valid cases
- virtio_ring: Avoid loop when vq is broken in virtqueue_poll
- xfs: Fix UBSAN null-ptr-deref in xfs_sysfs_init
- alpha: fix annotation of io{read,write}{16,32}be()
- ext4: fix potential negative array index in do_split()
- i40e: Set RX_ONLY mode for unicast promiscuous on VLAN
- i40e: Fix crash during removing i40e driver
- net: fec: correct the error path for regulator disable in probe
- bonding: show saner speed for broadcast mode
- bonding: fix a potential double-unregister
- ASoC: msm8916-wcd-analog: fix register Interrupt offset
- ASoC: intel: Fix memleak in sst_media_open
- vfio/type1: Add proper error unwind for vfio_iommu_replay()
- bonding: fix active-backup failover for current ARP slave
- hv_netvsc: Fix the queue_mapping in netvsc_vf_xmit()
- net: dsa: b53: check for timeout
- powerpc/pseries: Do not initiate shutdown when system is running on UPS
- epoll: Keep a reference on files added to the check list
- do_epoll_ctl(): clean the failure exits up a bit
- mm/hugetlb: fix calculation of adjust_range_if_pmd_sharing_possible
- xen: don't reschedule in preemption off sections
- clk: Evict unregistered clks from parent caches
- KVM: arm/arm64: Don't reschedule in unmap_stage2_range()
- scsi: zfcp: Fix use-after-free in request timeout handlers
- ext4: don't allow overlapping system zones
- s390/runtime_instrumentation: fix storage key handling
- sched: correct SD_flags returned by tl->sd_flags()
+ - arm64: dts: rockchip: fix rk3399-puma vcc5v0-host gpio
+ - arm64: dts: rockchip: fix rk3399-puma gmac reset gpio
+ - EDAC: Fix reference count leaks
+ - arm64: dts: qcom: msm8916: Replace invalid bias-pull-none property
+ - arm64: dts: exynos: Fix silent hang after boot on Espresso
+ - m68k: mac: Don't send IOP message until channel is idle
+ - m68k: mac: Fix IOP status/control register writes
+ - platform/x86: intel-hid: Fix return value check in check_acpi_dev()
+ - platform/x86: intel-vbt: Fix return value check in check_acpi_dev()

+ - powerpc: Fix circular dependency between percpu.h and mmu.h
+ - net: ethernet: stmmac: Disable hardware multicast filter
+ - net: stmmac: dwmac1000: provide multicast filter fallback
+ - net/compat: Add missing sock updates for SCM_RIGHTS
+ - md/raid5: Fix Force reconstruct-write io stuck in degraded raid5
+ - bcache: allocate meta data pages as compound pages
+ - mac80211: fix misplaced while instead of if
+ - MIPS: CPU#0 is not hotpluggable
+ - ext2: fix missing percpu_counter_inc
+ - cifs2: change slot number type s16 to u16
+ - ftrace: Setup correct FTRACE_FL_REGS flags for module
+ - kprobes: Fix NULL pointer dereference at kprobe_ftrace_handler
- tracing/hwlat: Honor the tracing_cpumask
- tracing: Use trace_sched_process_free() instead of exit() for pid tracing
- watchdog: f71808e_wdt: indicate WDIOF_CARDRESET support in watchdog_info.options
- watchdog: f71808e_wdt: remove use of wrong watchdog_info option
- watchdog: f71808e_wdt: clear watchdog timeout occurred flag
- pseries: Fix 64 bit logical memory block panic
- perf intel-pt: Fix FUP packet state
- drm/ixm: imx-ldb: Disable both channels for split mode in enc->disable()
- mfld: arizona: Ensure 32k clock is put on driver unbind and error
- RDMA/ipoib: Return void from ipoib_ib_dev_stop()
- USB: serial: ftdi_sio: clean up receive processing
- gpu: ipu-v3: image-convert: Combine rotate/no-rotate irq handlers
- dm rq: don't call blk_mq_queue_stopped() in dm_stop_queue()
- iommu/omap: Check for failure of a call to omap_iommu_dump_ctx
- iommu/vt-d: Enforce PASID devTLB field mask
- i2c: rcar: slave: only send STOP event when we have been addressed
- clk: clk-atlas6: fix return value check in atlas6_clk_init()
- pwm: bcm-iproc: handle clk_get_rate() return
- tools build feature: Use CC and CXX from parent
- i2c: rcar: avoid race when unregistering slave
- Input: sentelic - fix error return when fsp_reg_write fails
- drm/vmwgfx: Use correct vmw_legacy_display_unit pointer
- drm/vmwgfx: Fix two list_for_each loop exit tests
- net: qcom/emac: add missed clk_disable_unprepare in error path of emac_clks_phase1_init
- nfs: Fix getxattr kernel panic and memory overflow
- fs/ufs: avoid potential u32 multiplication overflow
- test_kmod: avoid potential double free in trigger_config_run_type()
- mfld: dln2: Run event handler loop under spinlock
- ALSA: echoaudio: Fix potential Oops in snd_echo_resume()
- perf bench mem: Always memset source before memcp
- tools build feature: Quote CC and CXX for their arguments
- sh: landisk: Add missing initialization of sh_io_port_base
- khugepaged: retract_page_tables() remember to test exit
- genirq/affinity: Make affinity setting if activated opt-in
- ARM: dts: gose: Fix ports node name for adv7180
- ARM: dts: gose: Fix ports node name for adv7612
- drm/amdGPU: avoid dereferencing a NULL pointer
- usb: mtu3: clear dual mode of u3port when disable device
- drm/radeon: disable AGP by default
- bcmfmac: keep SDIO watchdog running when console_interval is non-zero
- ath10k: Acquire tx_lock in tx error paths
- xfs: don't eat an EIO/ENOSPC writeback error when scrubbing data fork
- RDMA/rxe: Skip ggid check in loopback mode
- RDMA/rxe: Prevent access to wr->next ptr after wr is posted to send queue
- usb: core: fix quirks_param_set() writing to a const pointer
+  - powerpc/boot: Fix CONFIG_PPC_MPC52XX references
+  - include/asm-generic/vmlinux.lds.h: align ro_after_init
+  - PCI: Mark AMD Navi10 GPU rev 0x00 ATS as broken
+  - PCI: Add device even if driver attach failed
+  - PCI: qcom: Define some PARF params needed for ipq8064 SoC
+  - PCI: qcom: Add support for tx term offset for rev 2.1.0
+  - PCI: Probe bridge window attributes once at enumeration-time
+  - btrfs: ref-verify: fix memory leak in add_block_entry
+  - btrfs: don't traverse into the seed devices in show_devname
+  - btrfs: fix messages after changing compression level by remount
+  - btrfs: fix return value mixup in btrfs_getExtent
+  - powerpc: Allow 4224 bytes of stack expansion for the signal frame
+  - driver core: Avoid binding drivers to dead devices
+  - RDMA/ipoib: Fix ABBA deadlock with ipoib_reap_ah()
+  - media: rockchip: rga: Introduce color fmt macros and refactor CSC mode logic
+  - media: rockchip: rga: Only set output CSC mode for RGB input
+  - mmc: renesas_sdhi_internal_dmac: clean up the code for dma complete
+  - openrisc: Fix oops caused when dumping stack
+  - scsi: lpfc: nvmet: Avoid hang / use-after-free again when destroying
targetport
+  - watchdog: initialize device before misc_register
+  - fs/minix: set s_maxbytes correctly
+  - fs/minix: fix block limit check for V1 filesystems
+  - fs/minix: remove expected error message in block_to_path()
+  - arm64: dts: marvell: esspresobin: add ethernet alias
+  - drm/amdgp: Fix bug where DPM is not enabled after hibernate and resume
+  + * [UBUNTU 20.04] kernel: s390/cpum Cf, perf: changeDFLT_CCERROR counter name
+  + (LP: #1891454)
+  + - s390/cpum Cf: Add new extended counters for IBM z15
+  + * CVE-2018-10322
+  + - xfs: move inode fork verifiers to xfs_dinode_verify
+  + - xfs: enhance dinode verifier
+  + -- Stefan Bader <stefan.bader@canonical.com> Fri, 18 Sep 2020 10:48:34 +0200

+ configuration
+ - drm: sun4i: hdmi: Fix inverted HPD result
+ - net: smc91x: Fix possible memory leak in smc_drv_probe()
+ - bonding: check error value of register_netdevice() immediately
+ - mlxsw: destroy workqueue when trap_register in mlxsw_emad_init
+ - ipvs: fix the connection sync failed in some cases
+ - i2c: reac: always clear ICSAR to avoid side effects
+ - bonding: check return value of register_netdevice() in bond_newlink()
+ - serial: exar: Fix GPIO configuration for Sealevel cards based on XR17V35X
+ - scripts/decode_stacktrace: strip basepath from all paths
+ - HID: i2c-hid: add Mediacom FlexBook edge13 to descriptor override
+ - HID: apple: Disable Fn-key key-re-mapping on clone keyboards
+ - dmaengine: tegra210-adma: Fix runtime PM imbalance on error
+ - Input: add 'SW_MACHINE_COVER'
+ - spi: mediatek: use correct SPI_CFG2_REG MACRO
+ - regmap: dev_get_regmap_match(): fix string comparison
+ - hwmon: (aspeed-pwm-tacho) Avoid possible buffer overflow
+ - dmaengine: ioat setting ioat timeout as module parameter
+ - Input: synaptics - enable InterTouch for ThinkPad X1E 1st gen
+ - usb: gadget: udc: gr_udc: fix memleak on error handling path in gr_ep_init()
+ - arm64: Use test_tsk_thread_flag() for checking TIF_SINGLESTEP
+ - x86: math-emu: Fix up 'cmp' insn for clang ias
+ - binder: Don't use mmput() from shrinker function.
+ - usb: xhci-mtk: fix the failure of bandwidth allocation
+ - usb: xhci: Fix ASM2142/ASM3142 DMA addressing
+ - Revert "cifs: Fix the target file was deleted when rename failed."
+ - staging: wlan-ng: properly check endpoint types
+ - staging: comedi: addi_apci_1032: check INSN_CONFIG_DIGITAL_TRIG shift
+ staging: comedi: ni_6527: fix INSN_CONFIG_DIGITAL_TRIG support
+ staging: comedi: addi_apci_1500: check INSN_CONFIG_DIGITAL_TRIG shift
+ staging: comedi: addi_apci_1564: check INSN_CONFIG_DIGITAL_TRIG shift
+ serial: 8250: fix null-ptr-deref in serial8250_start_tx()
+ serial: 8250_mtk: Fix high-speed baud rates clamping
+ fbdev: Detect integer underflow at "struct fbcon_ops"->clear_margins.
+ vt: Reject zero-sized screen buffer size.
+ Makefile: Fix GCC_TOOLCHAIN_DIR prefix for Clang cross compilation
+ mm/memcg: fix refcount error while moving and swapping
+ io-mapping: indicate mapping failure
+ parisc: Add atomic64_set_release() define to avoid CPU soft lockups
+ ath9k: Fix regression with Atheros 9271
+ fuse: fix weird page warning
+ qed: suppress "don't support RoCE & iWARP" flooding on HW init
+ scripts/gdb: fix lx-symbols 'gdb.error' while loading modules
+ HID: alps: support devices with report id 2
+ RISC-V: Upgrade smp_mb__after_spinlock() to iorw,iowr
+ x86, vmlinux.lds: Page-align end of ..page_aligned sections
+ ASoC: rt5670: Add new gpio1_is_ext_spk_en quirk and enable it on the Lenovo Miix 2 10

+ * Bionic update: upstream stable patchset 2020-07-24 (LP: #1888907)
+ KVM: s390: reduce number of IO pins to 1
+ spi: spi-fsl-dspi: Fix lockup if device is removed during SPI transfer
+ spi: spi-fsl-dspi: use IRQF_SHARED mode to request IRQ
+ spi: spi-fsl-dspi: Fix external abort on interrupt in resume or exit paths
+ ARM: dts: omap4-droid4: Fix spi configuration and increase rate
+ gpu: host1x: Detach driver on unregister
+ spi: spidev: fix a race between spidev_release and spidev_remove
+ spi: spidev: fix a potential use-after-free in spidev_release()
+ ixgbe: protect ring accesses with READ- and WRITE_ONCE
+ s390/kasan: fix early pgm check handler execution
+ cifs: update ctime and mtime during truncate
+ ARM: imx6: add missing put_device() call in imx6q_suspend_init()
+ scsi: mptscsih: Fix read sense data size
+ nvme-rdma: assign completion vector correctly
+ x86/entry: Increase entry_stack size to a full page
+ net: cxgb4: fix return error value in t4_prep_fw
+ smsc95xx: check return value of smsc95xx_reset
+ smsc95xx: avoid memory leak in smsc95xx_bind
+ ALSA: compress: fix partial_drain completion state
+ arm64: kgdb: Fix single-step exception handling oops
+ nbd: Fix memory leak in nbd_add_socket
+ bnxr_en: fix NULL dereference in case SR-IOV configuration fails
+ net: mach: mark device wake capable when "magic-packet" property present
+ mlxsw: spectrum_router: Remove inappropriate usage of WARN_ON()
+ ALSA: opl3: fix infoleak in opl3
+ - ALSA: hda - let hs_mic be picked ahead of hp_mic
+ - ALSA: usb-audio: add quirk for MacroSilicon MS2109
+ - KVM: arm64: Fix definition of PAGE_HYPDEVICE
+ - KVM: arm64: Stop clobbering x0 for HVC_SOFT_RESTART
+ - KVM: x86: bit 8 of non-leaf PDPEs is not reserved
+ - KVM: x86: Inject #GP if guest attempts to toggle CR4.LA57 in 64-bit mode

+ ALSA: hda/realtek - change to suitable link model for ASUS platform
+ ALSA: hda/realtek - Enable Speaker for ASUS UX533 and UX534
+ timer: Prevent base->clk from moving backward
+ riscv: use 16KB kernel stack on 64-bit
+ intel_th: Fix a NULL dereference when hub driver is not loaded
+ genirq/affinity: Handle affinity setting on inactive interrupts correctly
+ NFSv4.1: Interrupted connections cause high bandwidth RPC ping-pong between
  client and server (LP: #1887607)
+ NFSv4.1: Avoid false retries when RPC calls are interrupted
+ NFSv4.2: Handle bad/dead sessions correctly in nfs41_sequence_process()
+ NFS: Fix interrupted slots by sending a solo SEQUENCE operation
+ tap: use after free (LP: #1889735)
+ tap: fix use-after-free
+ Bionic update: upstream stable patchset 2020-07-17 (LP: #1887990)
+ btrfs: fix a block group ref counter leak after failure to remove block
  group
+ btrfs: cow_file_range() num_bytes and disk_num_bytes are same
+ btrfs: fix data block group relocation failure due to concurrent scrub
+ mm: fix swap cache node allocation mask
+ EDAC/amd64: Read back the scrub rate PCI register on F15h
+ usbn e: smsc95xx: Fix use-after-free after removal
+ mm/slub.c: fix corrupted freechain in deactivate_slab()
+ mm/slub: fix stack overruns with SLUB_STATS
+ usb: usbtest: fix missing kfree(dev->buf) in usbtest_disconnect
- kgdb: Avoid suspicious RCU usage warning
- cxgb4: use unaligned conversion for fetching timestamp
- cxgb4: parse TC-U32 key values and masks natively
- hwmon: (max6697) Make sure the OVERT mask is set correctly
- hwmon: (acpi_power_meter) Fix potential memory leak in acpi_power_meter_add()
- drm: sun4i: Remove extra HPD polling
- virtio-blk: free vblk-vqs in error path of virtblk_probe()
- i2c: algo-pca: Add 0x78 as SCL stuck low status for PCA9665
- nfsd: Apply umask on fs without ACL support
- Revert "ALSA: usb-audio: Improve frames size computation"
- SMB3: Honor 'seal' flag for multiuser mounts
- SMB3: Honor persistent/resilient handle flags for multiuser mounts
- cifs: Fix the target file was deleted when rename failed.
- MIPS: Add missing EHB in mtc0 -> mfc0 sequence for DSPen
- irqchip/gic: Atomically update affinity
- dm zoned: assign max_io_len correctly
- [Config] updateconfs for EFI_CUSTOM_SSDT_OVERLAYS
- efi: Make it possible to disable efivar_ssdt entirely
- s390/debug: avoid kernel warning on too large number of pages
- cxgb4: use correct type for all-mask IP address comparison
- SMB3: Honor lease disabling for multiuser mounts

* Enable Quectel EG95 LTE modem [2c7c:0195] (LP: #1886744)
- net: usb: qmi_wwan: add support for Quectel EG95 LTE modem
- USB: serial: option: add Quectel EG95 LTE modem

* kernel oops xr-usb-serial (LP: #1885271)
- SAUCE: Revert "xr-usb-serial: fix kbuild"
- SAUCE: Revert "xr-usb-serial: Changes to support updates in struct gpio_chip"
- SAUCE: Revert "xr-usb-serial: re-initialise baudrate after resume from S3/S4"
- SAUCE: Revert "xr-usb-serial: Update driver for Exar USB serial ports"

* [hns3-0115] add 8 BD limit for tx flow (LP: #1859756)
- net: hns3: add 8 BD limit for tx flow
- net: hns3: avoid mul + div op in critical data path
- net: hns3: remove some ops in struct hns3_nic_ops
- net: hns3: fix for not calculating tx bd num correctly
- net: hns3: unify maybe_stop_tx for TSO and non-TSO case
- net: hns3: add check for max TX BD num for tso and non-tso case
- net: hns3: fix for TX queue not restarted problem
- net: hns3: fix a use after free problem in hns3_nic_maybe_stop_tx()

* Regression in kernel 4.15.0-91 causes kernel panic with Bcache
  (LP: #1867916)
- bcache: check and adjust logical block size for backing devices
+ * use-after-free in af_alg_accept() due to bh_lock_sock() (LP: #1884766)
+ - crypto: af_alg - fix use-after-free in af_alg_accept() due to bh_lock_sock()
+ + * Bionic update: upstream stable patchset 2020-07-15 (LP: #1887715)
+ + - net: be more gentle about silly gso requests coming from user
+ + - block/bio-integrity: don't free 'buf' if bio_integrity_add_page() failed
+ + - net: sched: export __netdev_watchdog_up()
+ + - fix a braino in "sparc32: fix register window handling in
+ + genregs32_[gs]et()"
+ + - apparmor: don't try to replace stale label in ptraceme check
+ + - ibmnveth: Fix max MTU limit
+ + - mld: fix memory leak in ipv6_mc_destroy_dev()
+ + - net: bridge: enforce alignment for ethernet address
+ + - net: fix memleak in register_netdevice()
+ + - net: usb: ax88179_178a: fix packet alignment padding
+ + - rocker: fix incorrect error handling in dma_rings_init
+ + - rxrpc: Fix notification call on completion of discarded calls
+ + - scpt: Don't advertise IPv4 addresses if ipv6only is set on the socket
+ + - tcp: grow window for OOO packets only for SACK flows
+ + - tg3: driver sleeps indefinitely when EEH errors exceed eeh_max_freezes
+ + - ip_tunnel: fix use-after-free in ip_tunnel_lookup()
+ + - tcp_cubic: fix spurious HYSTART_DELAY exit upon drop in min RTT
+ + - ip6_gre: fix use-after-free in ip6gre_tunnel_lookup()
+ + - net: Fix the arp error in some cases
+ + - net: Do not clear the sock TX queue in sk_set_socket()
+ + - net: core: reduce recursion limit value
+ - USB: ohci-sm501: Add missed iounmap() in remove
+ - usb: dwc2: Postponed gadget registration to the udc class driver
+ - usb: add USB QUIRK_DELAY_INIT for Logitech C922
+ - USB: ehci: reopen solution for Synopsys HC bug
+ - usb: host: xhci-mtk: avoid runtime suspend when removing hcd
+ - usb: host: ehci-exynos: Fix error check in exynos_ehci_probe()
+ - ALSA: usb-audio: add quirk for Denon DCD-1500RE
+ - xhci: Fix incorrect EP_STATE_MASK
+ - xhci: Fix enumeration issue when setting max packet size for FS devices.
+ - cdc-acm: Add DISABLE_ECHO quirk for Microchip/SMSC chip
+ - loop: replace kill_bdev with invalidate_bdev
+ - ALSA: usb-audio: Clean up mixer element list traverse
+ - ALSA: usb-audio: Fix OOB access of mixer element list
+ - xhci: Poll for U0 after disabling USB2 LPM
+ - cifs/smb3: Fix data inconsistent when punch hole
+ - cifs/smb3: Fix data inconsistent when zero file range
+ - efi/esrt: Fix reference count leak in esre_create_sysfs_entry.
+ - ARM: dts: NSP: Correct FA2 mailbox node
+ - rxrpc: Fix handling of rwind from an ACK packet
+ - RDMA/cma: Protect bind_list and listen_list while finding matching cm id
+ - ASoC: rockchip: Fix a reference count leak.
+ RDMA/mad: Fix possible memory leak in ib_mad_post_receive_mads()
+ net: qed: fix left elements count calculation
+ net: qed: fix NVMe login fails over VFs
+ net: qed: fix excessive QM ILT lines consumption
+ ARM: imx5: add missing put_device() call in imx_suspend_alloc_ocram()
+ usb: gadget: udc: Potential Oops in error handling code
+ netfilter: ipset: fix unaligned atomic access
+ net: bcmgenet: use hardware padding of runt frames
+ sched/core: Fix PI boosting between RT and DEADLINE tasks
+ ata/libata: FIX usage of page address by page_address in
  ata_scsi_mode_select_xlat function
+ net: alx: fix race condition in alx_remove
+ s390/ptrace: fix setting syscall number
+ kbuild: improve cc-option to clean up all temporary files
+ blktrace: break out of blktrace setup on concurrent calls
+ ALSA: hda: Add NVIDIA codec IDs 9a & 9d through a0 to patch table
+ ACPI/sysfs: Fix pm_profile_attr type
+ KVM/X86: Fix MSR range of APIC registers in X2APIC mode
+ KVM/nVMX: Plumb L2 GPA through to PML emulation
+ btrfs: fix failure of RWF_NOWAIT write into prealloc extent beyond eof
+ mm/slab: use memzero_explicit() in kzfree()
+ ocfs2: load global_inode_alloc
+ ocfs2: fix value of OCFS2_INVALID_SLOT
+ ocfs2: fix panic on nfs server over ocfs2
+ arm64: perf: Report the PC value in REGS_ABI_32 mode
+ tracing: Fix event trigger to accept redundant spaces
+ drm/radeon: fix fb_div check in ni_init_smc_spll_table()
+ Staging: rtl8723bs: prevent buffer overflow in update_sta_support_rate()
+ sunrpc: fixed rollback in rpc_gssd_dummy_populate()
+ SUNRPC: Properly set the @subbuf parameter of xdr_buf_subsegment()
+ pNFS/flexfiles: Fix list corruption if the mirror count changes
+ NFSv4 fix CLOSE not waiting for direct IO completion
+ xfs: add agf freeblocks verify in xfs_agf_verify
+ net: bcmgenet: remove HFB_CTRL access
+ EDAC/amd64: Add Family 17h Model 30h PCI IDs
+ i2c: tegra: Cleanup kerneldoc comments
+ i2c: tegra: Add missing kerneldoc for some fields
+ phy: Check harder for errors in get_phy_id()
+ ALSA: usb-audio: add quirk for Samsung USBC Headset (AKG)
+ scsi: zfc: Fix panic on ERP timeout for previously dismissed ERP action
+ xhci: Return if xHCI doesn't support LPM
+ IB/mad: Fix use after free when destroying MAD agent
+ regmap: Fix memory leak from regmap_register_patch
+ RDMA/qedr: Fix KASAN: use-after-free in ucma_event_handler+0x532
+ cxgb4: move handling L2T ARP failures to caller
+ sched/deadline: Initialize ->dl_boosted
+ s390/vdso: fix vDSO clock_getres()
+ arm64: sve: Fix build failure when ARM64_SVE=y and SYSCTL=n
+ - ALSA: hda/realtek - Add quirk for MSI GE63 laptop
+ - Bionic update: upstream stable patchset 2020-07-07 (LP: #1886710)
+ - s390: fix syscall_get_error for compat processes
+ - drm/i915: Whitelist context-local timestamp in the gen9 cmdparser
+ - power: supply: bq24257_charger: Replace depends on REGMAP_I2C with select
+ - clk: sunxi: Fix incorrect usage of round_down()
+ - 12c: pixi4: Detect secondary SMBus controller on AMD AM4 chipsets
+ - iio: pressure: bmp280: Tolerate IRQ before registering

+  +  - usb: gadget: legacy: fix redundant initialization warnings
+  +  - net: freescale: select CONFIG_FIXED_PHY where needed
+  +  - cifs: Fix null pointer check in cifs_read
+  +  - samples: bpf: Fix build error
+  +  - Input: usbtouchscreen - add support for BonXeon TP
+ - Input: evdev - call input_flush_device() on release(), not flush()
+ - Input: xpad - add custom init packet for Xbox One S controllers
+ - Input: dlink-dir85-touchkeys - fix a typo in driver name
+ - Input: i8042 - add ThinkPad S230u to i8042 reset list
+ - Input: synaptics-rmi4 - really fix attn_data use-after-free
+ - Input: synaptics-rmi4 - fix error return code in rmi_driver_probe()
+ - ARM: 8843/1: use unified assembler in headers
+ - ARM: uaccess: consolidate uaccess asm to asm/uaccess-asm.h
+ - ARM: uaccess: integrate uaccess_save and uaccess_restore
+ - ARM: uaccess: fix DACR mismatch with nested exceptions
+ - gpio: exar: Fix bad handling for ida_simple_get error path
+ - IB/qib: Call kobject_put() when kobject_init_and_add() fails
+ - ARM: dts: imx6q-bx50v3: Add internal switch
+ - ARM: dts/imx6q-bx50v3: Set display interface clock parents
+ - ARM: dts: bcm2835-rpi-zero-w: Fix led polarity
+ - mmc: block: Fix use-after-free issue for rpm
+ - RDMA/pvrdma: Fix missing pci disable in pvrdma_pci_probe()
+ - ALSA: hwdep: fix a left shifting 1 by 31 UB bug
+ - ALSA: usb-audio: mixer: volume quirk for ESS Technology Asus USB DAC
+ - exec: Always set cap_ambient in cap_bprm_setcreds
+ - ALSA: hda/realtek - Add new codec supported for ALC287
+ - libceph: ignore pool overlay and cache logic on redirects
+ - mm: remove VM_BUG_ON(PageSlab()) from page_mapcount()
+ - fs/binfmt_elf.c: allocate initialized memory in fill_thread_core_info()
+ - include/asm-generic/topology.h: guard cpumask_of_node() macro argument
+ - iommu: Fix reference count leak in iommu_group_alloc.
+ - parisc: Fix kernel panic in mem_init()
+ - mac80211: mesh: fix discovery timer re-arming issue / crash
+ - x86/dma: Fix max PFN arithmetic overflow on 32 bit systems
+ - copy_xstate_to_kernel(): don't leave parts of destination uninitialized
+ - xfrm: allow to accept packets with ipv6 NEXTHDR_HOP in xfrm_input
+ - xfrm: call xfrm_output_gso when inner_protocol is set in xfrm_output
+ - xfrm: fix a warning in xfrm_policy_insert_list
+ - xfrm: fix a NULL-ptr deref in xfrm_local_error
+ - xfrm: fix error in comment
+ - vti4: eliminated some duplicate code.
+ - ip_vti: receive ipip packet by calling ip_tunnel_rcv
+ - netfilter: nft_reject_bridge: enable reject with bridge vlan
+ - netfilter: ipset: Fix subcounter update skip
+ - netfilter: nftnetlink_ethelper: unbreak userspace helper support
+ - netfilter: nf_conntrack_pptp: prevent buffer overflows in debug code
+ - esp6: get the right proto for transport mode in esp6_gso_encap
+ - qlcnic: fix missing release in qlcnic_83xx_interrupt_test.
+ - netfilter: nf_conntrack_pptp: fix compilation warning with W=1 build
+ - mm/vmalloc.c: don't dereference possible NULL pointer in __vunmap()
+ - KVM: VMX: check for existence of secondary exec controls before accessing
+ - dpaa_eth: fix usage as DSA master, try 3
- net: dsa: mt7530: fix roaming from DSA user ports
- net: inet_csk: Fix so_reuseport bind-address cache in tb->fast
- scpt: Don't add the shutdown timer if it's already been added
- arm64: dts: rockchip: fix status for &gmac2phy in rk3328-evb.dts
- ARM: dts: rockchip: swap clock-names of gpu nodes
- IB/i40iw: Remove bogus call to netdev_master_upper_dev_get()
- riscev: stacktrace: Fix undefined reference to 'walk_stackframe'
- ARM: 8970/1: decompressor: increase tag size
- ARM: dts: bcm: HR2: Fix PPI interrupt types
- ALSA: hda/realtek - Add a model for Thinkpad T570 without DAC workaround
- ALSA: usb-audio: Quirks for Gigabyte TRX40 Aorus Master onboard audio
- IB/ipoib: Fix double free of skb in case of multicast traffic in CM mode
- bnxt_en: Fix accumulation of bp->net_stats_prev.

* apparmor reference leak causes refcount_t overflow with af_alg_accept()
  (LP: #1883962)
  - apparmor: check/put label on apparmor_sk_clone_security()

* Freezing on boot since kernel 4.15.0-72-generic release (LP: #1856387)
  - x86/timer: Don't skip PIT setup when APIC is disabled or in legacy mode

* smbboot: don't call topology_sane() when Sub-NUMA-Clustering is enabled
  (LP: #1882478)
  - x86, sched: Allow topologies where NUMA nodes share an LLC

* bionic/linux: 4.15.0-111.112 -proposed tracker (LP: #1886999)

* Bionic update: upstream stable patchset 2020-05-07 (LP: #1877461)
  - SAUCE: mlxsw: Add misssmerged ERR_PTR hunk

* linux 4.15.0-109-generic network DoS regression vs -108 (LP: #1886668)
  - SAUCE: Revert "netprio_cgroup: Fix unlimited memory leak of v2 cgroups"

-- Khalid Elmously <khalid.elmously@canonical.com>  Thu, 09 Jul 2020 16:03:14 -0400

* Packaging resync (LP: #1786013)
  - [Packaging] update helper scripts
  - update dkms package versions

* Build and ship a signed wireguard.ko (LP: #1861284)
  - [Packaging] wireguard -- add support for building signed .ko

* CVE-2019-16089
  - SAUCE: nbd_genl_status: null check for nla_nest_start

* CVE-2019-19642
  - kernel/relay.c: handle alloc_percpu returning NULL in relay_open

* CVE-2019-12380
  - efi/x86/Add missing error handling to old_memmap 1:1 mapping code

* CVE-2019-19039 // CVE-2019-19377
  - btrfs: sink flush_fn to extent_write_cache_pages
  - btrfs: extent_io: Move the BUG_ON() in flush_write_bio() one level up
  - btrfs: Don't submit any btree write bio if the fs has errors

* CVE-2019-19036
  - btrfs: volumes: Use more straightforward way to calculate map length
- btrfs: tree-checker: Try to detect missing INODE_ITEM
- Btrfs: tree-checker: detect file extent items with overlapping ranges
- Btrfs: make tree checker detect checksum items with overlapping ranges
- btrfs: harden against duplicate fsid on scanned devices
- Btrfs: fix missing data checksums after replaying a log tree
- btrfs: reloc: fix reloc root leak and NULL pointer dereference
- btrfs: Validate child tree block's level and first key
- btrfs: Detect unbalanced tree with empty leaf before crashing btree operations

+ * CVE-2019-19318
  - btrfs: tree-checker: Replace root parameter with fs_info
  - btrfs: tree-checker: Check level for leaves and nodes
  - btrfs: tree-checker: get fs_info from eb in generic_err
  - btrfs: tree-checker: get fs_info from eb in file_extent_err
  - btrfs: tree-checker: get fs_info from eb in check_csum_item
  - btrfs: tree-checker: get fs_info from eb in dir_item_err
  - btrfs: tree-checker: get fs_info from eb in check_dir_item
  - btrfs: tree-checker: get fs_info from eb in block_group_err
  - btrfs: tree-checker: get fs_info from eb in check_block_group_item
  - btrfs: tree-checker: get fs_info from eb in check_extent_data_item
  - btrfs: tree-checker: get fs_info from eb in check_leaf_item
  - btrfs: tree-checker: get fs_info from eb in check_leaf
  - btrfs: tree-checker: get fs_info from eb in chunk_err
  - btrfs: tree-checker: get fs_info from eb in dev_item_err
  - btrfs: tree-checker: get fs_info from eb in check_inode_item
  - btrfs: tree-checker: Add ROOT_ITEM check
  - btrfs: tree-checker: Add EXTENT_ITEM and METADATA_ITEM check
  - btrfs: tree-checker: Add simple keyed refs check
  - btrfs: tree-checker: Add EXTENT_DATA_REF check
  - btrfs: tree-checker: Fix wrong check on max devid
  - Btrfs: fix selftests failure due to uninitialized i_mode in test inodes

+ * CVE-2019-19813 // CVE-2019-19816
  - btrfs: Refactor parameter of BTRFS_MAX_DEVS() from root to fs_info
  - btrfs: Move btrfs_check_chunk_valid() to tree-check.[ch] and export it
  - btrfs: tree-checker: Make chunk item checker messages more readable
  - btrfs: tree-checker: Make btrfs_check_chunk_valid() return EUCLEAN instead of EIO
  - btrfs: tree-checker: Check chunk item at tree block read time
  - btrfs: tree-checker: Verify dev item
  - btrfs: tree-checker: Enhance chunk checker to validate chunk profile
  - btrfs: tree-checker: Verify inode item
  - btrfs: inode: Verify inode mode to avoid NULL pointer dereference

+ * CVE-2020-0543
  - UBUNTU/SAUCE: x86/speculation/srbds: do not try to turn mitigation off when
not supported

* Build Nvidia drivers in conjunction with kernel (LP: #1764792)
  - [Packaging] disable nvidia dkms builds for mainline

* Bionic update: upstream stable patchset 2020-06-02 (LP: #1881801)
  - i2c: dev: Fix the race between the release of i2c_dev and cdev
  - ima: Set file->f_mode instead of file->f_flags in ima_calc_file_hash()
  - evm: Check also if *tfm is an error pointer in init_desc()
  - ima: Fix return value of ima_write_policy()
  - fix multiplication overflow in copy_fdtable()
  - iommu/amd: Fix over-read of ACPI UID from IVRS table
  - i2c: mux: demux-pinctrl: Fix an error handling path in 'i2c_demux_pinctrl_probe()'
  - uib: Fix seq_file usage in detailed_erase_block_info debugfs file
  - gcc-common.h: Update for GCC 10
  - HID: multitouch: add eGalaxTouch P80H84 support
  - scsi: qla2xxx: Fix hang when issuing nvme disconnect-all in NPIV
  - configsfs: fix config_item refcnt leak in configsfs_rmdir()
  - vhost/vsock: fix packet delivery order to monitoring devices
  - component: Silence bind error on -EPROBE_DEFER
  - scsi: ibmvscsi: Fix WARN_ON during event pool release
  - x86/apic: Move TSC deadline timer debug printk
  - gtp: set NLM_F_MULTI flag in gtp_genl_dump_pdp()
  - ceph: fix double unlock in handle_cap_export()
  - USB: core: Fix misleading driver bug report
  - platform/x86: asus-nb-wmi: Do not load on Asus T100TA and T200TA
  - ARM: futex: Address build warning
  - padata: Replace delayed timer with immediate workqueue in padata_reorder
  - padata: initialize pd->cpu with effective cpumask
  - padata: purge get_cpu and reorder_via_wq from padata_do_serial
  - arm64: fix the flush_icache_range arguments in machine_kexec
  - ALSA: iec1712: Initialize STDSP24 properly when using the model=staudio option
  - ALSA: pcm: fix incorrect hw_base increase
  - apparmor: Fix aa_label refcnt leak in policy_update
  - dmaengine: tegra210-adma: Fix an error handling path in 'tegra_adma_probe()'
  - powerpc: restore alphabetic order in Kconfig
  - powerpc: Remove STRICT_KERNEL_RWX incompatibility with RELOCATABLE
  - powerpc/64s: Disable STRICT_KERNEL_RWX
  - x86/uaaccess, usb: Fix UBSAN vs. SMAP
  - usb: build usb.c more conservatively
  - libnvdimm/btt: Remove unnecessary code in btt_freelist_init
  - libnvdimm/btt: Fix LBA masking during 'free list' population
  - media: fdp1: Fix R-Car M3-N naming in debug message
  - cxgb4: free mac_hlist properly
  - cxgb4/cxgb4vf: Fix mac_hlist initialization and free
  - Revert "gfs2: Don't demote a glock until its revokes are written"
- staging: iio: ad2s1210: Fix SPI reading
- staging: greybus: Fix uninitialized scalar variable
- iio: sca3000: Remove an erroneous 'get_device()' from code
- iio: dac: vf610: Fix an error handling path in 'vf610_dac_probe()'
- mei: release me_cl object reference
- rapidio: fix an error in get_user_pages_fast() error handling
- x86/unwind/orc: Fix unwind_get_return_address_ptr() for inactive tasks
- iio: adc: stm32-adv: Use dma_request_chan() instead of dma_request_slave_channel()
- iio: adc: stm32-adv: fix device used to request dma
- riscv: set max_pfn to the PFN of the last page
- ubifs: remove broken lazytime support
- HID: alps: Add AU1657 device ID
- HID: alps: ALPS_1657 is too specific; use U1_UNICORN_LEGACY instead
- aquantia: Fix the media type of AQC100 ethernet controller in the driver
- HID: i2c-hid: reset Synaptics SYNA2393 on resume
- HID: quirks: Add HID QUIRK_NO_INIT_REPORTS quirk for Dell K12A keyboard-dock
- stmmac: fix pointer check after utilization in stmmac_interrupt
- ALSA: hda/realtek - Fix silent output on Gigabyte X570 Aorus Xtreme
- ALSA: hda/realtek - Add more fixup entries for Clevo machines
- drm/etnaviv: fix perfmon domain interation
- nft: Add Hyper-V NVDIMM DSM command set to white list
- thunderbolt: Drop duplicated get_switch_at_route()
- net: bcmgenet: code movement
- net: bcmgenet: abort suspend on error
- misc: rtsx: Add short delay after exit from ASPM

* Bionic update: upstream stable patchset 2020-05-21 (LP: #1880014)
- USB: serial: qcserial: Add DW5816e support
- dp83640: reverse arguments to list_add_tail
- fq_codel: fix TCA_FQ_CODEL_DROP_BATCH_SIZE sanity checks
- net: masec: preserve ingress frame ordering
- net/mlx4_core: Fix use of ENOSPC around mlx4_counter_alloc()
- net: usb: qmi_wwan: add support for DW5816e
- sch_choke: avoid potential panic in choke_reset()
- sch_sfq: validate silly quantum values
- bnxt_en: Fix VLAN acceleration handling in bnxt_fix_features().
- net/mlx5: Fix forced completion access non initialized command entry
- net/mlx5: Fix command entry leak in Internal Error State
- bnxt_en: Improve AER slot reset.
- bnxt_en: Fix VF anti-spoof filter setup.
- net: stricter validation of untrusted gso packets
- ipv6: fix cleanup ordering for ip6_mr failure
- HID: wacom: Read HID DG_CONTACTMAX directly for non-generic devices
- HID: usbhid: Fix race between usbhid_close() and usbhid_stop()
- USB: uas: add quirk for LaCie 2Big Quadra
- USB: serial: garmin_gps: add sanity checking for data length
+ - tracing: Add a vmalloc_sync_mappings() for safe measure
+ - KVM: arm: vgic: Fix limit condition when writing to GICD_I[CS]ACTIVER
+ - mm/page_alloc: fix watchdog soft lockups during set_zone_contiguous()
+ - coredump: fix crash when umh is disabled
+ - batman-adv: fix batadv_nc_random_weight_tq
+ - batman-adv: Fix refcnt leak in batadv_show_throughput_override
+ - batman-adv: Fix refcnt leak in batadv_store_throughput_override
+ - batman-adv: Fix refcnt leak in batadv_v_ogm_process
+ - x86/entry/64: Fix unwind hints in kernel exit path
+ - x86/entry/64: Fix unwind hints in rewind_stack_do_exit()
+ - x86/unwind/orc: Don't skip the first frame for inactive tasks
+ - x86/unwind/orc: Prevent unwinding before ORC initialization
+ - x86/unwind/orc: Fix error path for bad ORC entry type
+ - netfilter: nat: never update the UDP checksum when it's 0
+ - objtool: Fix stack offset tracking for indirect CFAs
+ - scripts/decodecode: fix trapping instruction formatting
+ - net: stmmac: Use mutex instead of spinlock
+ - shmem: fix possible deadlocks on shmlock_user_lock
+ - net/sonic: Fix a resource leak in an error handling path in
  'jazz_sonic_probe()'
+ - net: moxa: Fix a potential double 'free_irq()'
+ - drop_monitor: work around gcc-10 stringop-overflow warning
+ - virtio-blk: handle block_device_operations callbacks after hot unplug
+ - scsi: sg: add sg_remove_request in sg_write
+ - dmaengine: pch_dma.c: Avoid data race between probe and irq handler
+ - dmaengine: mmp_tdma: Reset channel error on release
+ - cpufreq: intel_pstate: Only mention the BIOS disabling turbo mode once
+ - ALSA: hda/hdmi: fix race in monitor detection during probe
+ - drm/qxl: lost qxl_bo_kunmap_atomic_page in qxl_image_init_helper()
+ - ipc/util.c: sysvipc_find_ipc() incorrectly updates position index
+ - x86/entry/64: Fix unwind hints in register clearing code
+ - ipmi: Fix NULL pointer dereference in ssif_probe
+ - pinctrl: baytrail: Enable pin configuration setting for GPIO chip
+ - pinctrl: cherryview: Add missing spinlock usage in chv_gpio_irq_handler
+ - i40iw: Fix error handling in i40iw_manage_arp_cache()
+ - netfilter: conntrack: avoid gcc-10 zero-length-bounds warning
+ - IB/mlx4: Test return value of calls to ib_get_cached_pkey
+ - hwmon: (da9052) Synchronize access with mfd
+ - pnp: Use list_for_each_entry() instead of open coding
+ - gcc-10 warnings: fix low-hanging fruit
+ - kbuild: compute false-positive -Wmaybe-uninitialized cases in Kconfig
+ - Stop the ad-hoc games with -Wno-maybe-initialized
+ - gcc-10: disable 'zero-length-bounds' warning for now
+ - gcc-10: disable 'array-bounds' warning for now
+ - gcc-10: disable 'stringop-overflow' warning for now
+ - gcc-10: disable 'restrict' warning for now
+ - gcc-10: avoid shadowing standard library 'free()' in crypto
+ - x86/asm: Add instruction suffixes to bitops
+ - net: phy: micrel: Use strlcpy() for ethtool::get_strings
+ - net: fix a potential recursive NETDEV_FEAT_CHANGE
+ - net: phy: fix aneg restart in phy_ethtool_set_eee
+ - Revert "ipv6: add mtu lock check in __ip6_rt_update_pmtu"
+ - hinic: fix a bug of ndo_stop
+ - net: dsa: loop: Add module soft dependency
+ - net: ipv4: really enforce backoff for redirects
+ - netprio_cgroup: Fix unlimited memory leak of v2 cgroups
+ - net: tcp: fix rx timestamp behavior for tcp_recvmmsg
+ - ALSA: hda/realtek - Limit int mic boost for Thinkpad T530
+ - ALSA: rawmidi: Initialize allocated buffers
+ - ALSA: rawmidi: Fix racy buffer resize under concurrent accesses
+ - ARM: dts: dra7: Fix bus_dma_limit for PCIe
+ - ARM: dts: imx27-phytec-phycard-s-rdk: Fix the I2C1 pinctrl entries
+ - x86: Fix early boot crash on gcc-10, third try
+ - ALSA: usb-audio: Add control message quirk delay for Kingston HyperX headset
+ - usb: core: hub: limit HUB_QUIRK_DISABLE_AUTOSUSPEND to USB5534B
+ - usb: host: xhci-plat: keep runtime active when removing host
+ - usb: xhci: Fix NULL pointer dereference when enqueuing trbs from urb sg list
+ - x86/unwind/orc: Fix error handling in __unwind_start()
+ - exec: Move would_dump into flush_old_exec
+ - clk: rockchip: fix incorrect configuration of rk3228 aclk_gpu* clocks
+ - usb: gadget: net2272: Fix a memory leak in an error handling path in
+ - 'net2272_plat_probe()' 
+ - usb: gadget: audio: Fix a missing error return value in audio_bind()
+ - usb: gadget: legacy: fix error return code in gncm_bind()
+ - usb: gadget: legacy: fix error return code in cdc_bind()
+ - arm64: dts: rockchip: Replace RK805 PMIC node name with "pmic" on rk3328
+ - boards
+ - arm64: dts: rockchip: Rename dwc3 device nodes on rk3399 to make dtc happy
+ - ARM: dts: r8a73a4: Add missing CMT1 interrupts
+ - ARM: dts: r8a7740: Add missing extal2 to CPG node
+ - KVM: x86: Fix off-by-one error in kvm_vcpu_ioctl_x86_setup_mce
+ - Makefile: disallow data races on gcc-10 as well
+ - sctp: Fix bundling of SHUTDOWN with COOKIE-ACK
+ - arm64: hugetlb: avoid potential NULL dereference
+ - net: dsa: Do not make user port errors fatal
+ - pppoe: only process PADT targeted at local interfaces
+ - riscv: fix vds0 build with lld
+ - netfilter: nft_set_rbtree: Introduce and use nft_rbtree_interval_start()
+ - cifs: fix leaked reference on requeued write
+ - clk: Unlink clock if failed to prepare or enable
+ * upgrading to 4.15.0-99-generic breaks the sound and the trackpad
+ (LP: #1875916) // Bionic update: upstream stable patchset 2020-05-21
+ (LP: #1880014)
+ - Revert "ALSA: hda/realtek: Fix pop noise on ALC225"
+ * Pop sound from build-in speaker during cold boot and resume from S3
+ (LP: #1866357)  // Bionic update: upstream stable patchset 2020-05-21
+ (LP: #1880014)
+ - ALSA: hda/realtek - Fix S3 pop noise on Dell Wyse
+
+ * Bionic update: upstream stable patchset 2020-05-19 (LP: #1879536)
+ - vhost: vsock: kick send_pkt worker once device is started
+ - powerpc/pci/of: Parse unassigned resources
+ - ASoC: topology: Check return value of pcm_new_ver
+ - selftests/ipc: Fix test failure seen after initial test run
+ - ASoC: sgtl5000: Fix VAG power-on handling
+ - ASoC: rsnd: Fix HDMI channel mapping for multi-SSI mode
+ - ASoC: codecs: hda/realtek - Fix incorrect use of list_for_each_entry
+ - wimax/i2400mn: Fix potential urb refcnt leak
+ - net: stmmac: fix enabling socfpga's ptph_ref_clock
+ - net: stmmac: Fix sub-second increment
+ - cifs: protect updating server->dstaddr with a spinlock
+ - s390/tptrace: fix potential crashes when switching tracers
+ - scripts/config: allow colons in option strings for sed
+ - lib/mpi: Fix building for powerpc with clang
+ - net: bcmgenet: suppress warnings on failed Rx SKB allocations
+ - net: systemport: suppress warnings on failed Rx SKB allocations
+ - scpt: Fix SHUTDOWN CTSN Ack in the peer restart case
+ - ALSA: hda: Match both PCI ID and SSID for driver blacklist
+ - mac80211: add ieee80211_is_any_nullfunc()
+ - cgroup, netclassid: remove double cond_resched
+ - ASoC: rsnd: Fix parent SSI start/stop in multi-SSI mode
+ - drm/amdgp: Correctly initialize thermal controller for GPUs with Powerplay
+ table v0 (e.g Hawaii)
+ - ASoC: rsnd: Don't treat master SSI in multi SSI setup as parent
+ - ASoC: rsnd: Fix "status check failed" spam for multi-SSI
+ - drm/amdgp: Fix oops when pp_funcs is unset in ACPI event
+ - hexagon: clean up ioremap
+ - hexagon: define ioremap_uc
+ - drm/atomic: Take the atomic toys away from X
+
+ * Performing function level reset of AMD onboard USB and audio devices causes
+ system lockup (LP: #1865988)
+ - SAUCE: PCI: Avoid FLR for AMD Matisse HD Audio & USB 3.0
+ - SAUCE: PCI: Avoid FLR for AMD Starship USB 3.0

+ + - ceph: quota: cache inode pointer in ceph_snap_real
+ + * [UBUNTU 18.04] zpcictl --reset - contribution for kernel (LP: #1870320)
+ + - s390/pci: Recover handle in clp_set_pci_fn()
+ + - s390/pci: Fix possible deadlock in recover_store()
+ + * Bionic update: upstream stable patchset 2020-05-12 (LP: #1878256)
+ + - drm/edid: Fix off-by-one in DispID DTD pixel clock
+ + - drm/qxl: qxl_release leak in qxl_draw_dirty_fb()
+ + - drm/qxl: qxl_release leak in qxl_hw_surface Alloc()
+ + - drm/qxl: qxl_release use after free
+ + - btrfs: fix block group leak when removing fails
+ + - btrfs: fix partial loss of prealloc extent past i_size after fsync
+ + - mmc: sdhci-xenon: fix annoying 1.8V regulator warning
+ + - mmc: sdhci-pci: Fix eMMC driver strength for BYT-based controllers
+ + - ALSA: hda/realtek - Two front mics on a Lenovo ThinkCenter
+ + - ALSA: hda/hdmi: fix without unlocked before return
+ + - ALSA: pcm: oss: Place the plugin buffer overflow checks correctly
+ + - PM: ACPI: Output correct message on target power state
+ + - PM: hibernate: Freeze kernel threads in software_resume()
+ + - dm verity fec: fix hash block number in verity_fec_decode
+ + - RDMA/mlx5: Set GRH fields in query QP on RoCE
+ + - RDMA/mlx4: Initialize ib_spec on the stack
+ + - vfio: avoid possible overflow in vfio_iommu_type1_pin_pages
+ + - vfio/type1: Fix VA->PA translation for PFNMAP VMAs in vaddr_get_pfn()
+ + - iommu/qcom: Fix local_base status check
- scsi: target/block: fix WRITE SAME zeroing
- jommu/amd: Fix legacy interrupt remapping for x2APIC-enabled system
- ALSA: opti9xx: shut up gcc-10 range warning
- nfs: Fix potential posix_acl refcnt leak in nfs3_set_acl
- dmaengine: dmaest: Fix iteration non-stop logic
- selinux: properly handle multiple messages in selinux_netlink_send()
- ASoC: tas571x: disable regulators on failed probe
- ASoC: wm8960: Fix wrong clock after suspend & resume
- rxrpc: Fix DATA Tx to disable nofrag for UDP on AF_INET6 socket
- xfs: acquire superblock freeze protection on eofblocks scans
- cpufreq: Avoid warning when CONFIG_DEBUG_PER_CPU_MAPS is enabled
- net: fec: set GPR bit on suspend by DT configuration.
- ALSA: hda: Keep the controller initialization even if no codecs found
- ALSA: hda: Explicitly permit using autosuspend if runtime PM is supported
- ALSA: hda: call runtime_allow() for all hda controllers
- scsi: qla2xxx: check UNLOADING before posting async work
- RDMA/core: Fix race between destroy and release FD object
- btrfs: transaction: Avoid deadlock due to bad initialization timing of
- fs_info::journal_info
- mmc: sdhci-msm: Enable host capabilities pertains to R1b response
- mmc: meson-px-sdio: Set MMC_CAP_WAIT_WHILE_BUSY
- mmc: meson-px-sdio: remove the broken ->card_busy() op

* Bionic update: upstream stable patchset 2020-05-07 (LP: #1877461)
* ext4: fix extent_status fragmentation for plain files
* net: ipv4: avoid unused variable warning for sysctl
* crypto: mxs-dcp - make symbols 'shal_null_hash' and 'sha256_null_hash'
* static
* vti4: removed duplicate log message.
* watchdog: reset last_hw_keepalive time at start
* scsi: lpfc: Fix kasan slab-out-of-bounds error in lpfc_unreg_login
* ceph: return ceph_mdsc_do_request() errors from __get_parent()
* ceph: don't skip updating wanted caps when cap is stale
* pwm: rcar: Fix late Runtime PM enablement
* scsi: iscsi: Report unbind session event when the target has been removed
* ASoC: Intel: atom: Take the drv->lock mutex before calling
* sst_send_slot_map()
* kernel/gcov/fs.c: gcov_seq_next() should increase position index
* selftests: kmod: fix handling test numbers above 9
* ipc/util.c: sysvipc_find_ipc() should increase position index
* s390/cio: avoid duplicated 'ADD' uevents
* pwm: renesas-tpu: Fix late Runtime PM enablement
* pwm: bcm2835: Dynamically allocate base
* perf/core: Disable page faults when getting phys address
* PCI/ASPM: Allow re-enabling Clock PM
* mm, slub: restore the original intention of prefetch_freepointer()
* cxgb4: fix large delays in PTP synchronization
* ipv6: fix restrict IPV6_ADDRFORM operation
+ - macsec: avoid to set wrong mtu
+ - macvlan: fix null dereference in macvlan_device_event()
+ - net: bcmgenet: correct per TX/RX ring statistics
+ - net: netrom: Fix potential nr_neigh refcnt leak in nr_add_node
+ - net/x25: Fix x25_neigh refcnt leak when receiving frame
+ - tcp: cache line align MAX_TCP_HEADER
+ - team: fix hang in team_mode_get()
+ - net: dsa: b53: Fix ARL register definitions
+ - xfrm: Always set XFRM_TRANSFORMED in xfrm{4,6}_output_finish
+ - vrf: Check skb for XFRM_TRANSFORMED flag
+ - KEYS: Avoid false positive ENOMEM error on key read
+ - ALSA: hda: Remove ASUS ROG Zenith from the blacklist
+ - iio: adc: stm32-adc: fix sleep in atomic context
+ - iio: xilinx-xadc: Fix ADC-B powerdown
+ - iio: xilinx-xadc: Fix clearing interrupt when enabling trigger
+ - iio: xilinx-xadc: Fix sequencer configuration for aux channels in
  simultaneous mode
+ - fs/namespace.c: fix mountpoint reference counter race
+ - USB: sisusbvga: Change port variable from signed to unsigned
+ - USB: Add USB_QUIRK_DELAY_CTRL_MSG and USB_QUIRK_DELAY_INIT for Corsair K70
  RGB RAPIDFIRE
+ - USB: early: Handle AMD's spec-compliant identifiers, too
+ - USB: core: Fix free-while-in-use bug in the USB S-Glibrary
+ - USB: hub: Fix handling of connect changes during sleep
+ - overflow.h: Add arithmetic shift helper
+ - vmalloc: fix remap_vmalloc_range() bounds checks
+ - mm/hugetlb: fix a addressing exception caused by huge_pte_offset
+ - mm/ksm: fix NULL pointer dereference when KSM zero page is enabled
+ - tools/vm: fix cross-compile build
+ - ALSA: usx2y: Fix potential NULL dereference
+ - ALSA: hda/realtek - Add new codec supported for ALC245
+ - ALSA: usb-audio: Fix usb audio refcnt leak when getting spdif
+ - ALSA: usb-audio: Filter out unsupported sample rates on Focusrite devices
+ - tpm/tpm_tis: Free IRQ if probing fails
+ - tpm: ibmvtpm: retry on H_CLOSED in tpm_ibmvtpm_send()
+ - KVM: Check validity of resolved slot when searching memslots
+ - KVM: VMX: Enable machine check support for 32bit targets
+ - tty: hvc: fix buffer overflow during hvc_alloc().
+ - tty: rocket, avoid OOB access
+ - usb-storage: Add unusual_devs entry for JMicron JMS566
+ - audit: check the length of userspace generated audit records
+ - ASoC: dapm: fixup dapm kcontrol widget
+ - iwlwifi: pcie: actually release queue memory in TVQM
+ - ARM: imx: provide v7_cpu_resume() only on ARM_CPU_SUSPEND=y
+ - powerpc/setup_64: Set cache-line-size based on cache-block-size
+ - staging: comedi: dt2815: fix writing hi byte of analog output
+ - staging: comedi: Fix comedi_device refcnt leak in comedi_open
+ - vt: don't hardcode the mem allocation upper bound
+ staging: vt6656: Don't set RCR_MULTICAST or RCR_BROADCAST by default.
+ staging: vt6656: Fix calling conditions of vnt_set_bss_mode
+ staging: vt6656: Fix drivers TBTT timing counter.
+ staging: vt6656: Fix pairwise key entry save.
+ staging: vt6656: Power save stop wake_up_count wrap around.
+ cdc-acm: close race between suspend() and acm_softint
+ cdc-acm: introduce a cool down
+ UAS: no use logging any details in case of ENODEV
+ UAS: fix deadlock in error handling and PM flushing work
+ usb: f_fs: Clear OS Extended descriptor counts to zero in ffs_data_reset()
+ serial: sh-sci: Make sure status register SCxSR is read in correct sequence
+ xfs: Fix deadlock between AGI and AGF with RENAME_WHITEOUT
+ remoteproc: Fix wrong rvring index computation
+ mtd: cfi: fix deadloop in cfi_cmdset_0002.c do_write_buffer
+ binder: take read mode of mmap_sem in binder_alloc_free_page()
+ usb: dwc3: gadget: Do link recovery for SS and SSP
+ usb: gadget: udc: bdc: Remove unnecessary NULL checks in bdc_req_complete
+ iio:ad7797: Use correct attribute._group
+ nfsd: memory corruption in nfsd4_lock()
+ i2c: altera: use proper variable to hold errno
+ net/cxb4: Check the return from t4_query_params properly
+ ARM: dts: bcm283x: Disable dsi0 node
+ perf/core: fix parent pid/tid in task exit events
+ mm: shmem: disable interrupt when acquiring info->lock in userfaultfd_copy
+ path
+ bpf, x86: Fix encoding for lower 8-bit registers in BPF_STX BPF_B
+ x86: hyperv: report value of misc_features
+ xfs: fix partially uninitialized structure in xfs_relink_remap_extent
+ scsi: target: fix PR IN / READ FULL STATUS for FC
+ objtool: Fix CONFIG_UBSAN_TRAP unreachable warnings
+ objtool: Support Clang non-section symbols in ORC dump
+ xen/xenbus: ensure xenbus_map_ring_valloc() returns proper grant status
+ arm64: Delete the space separator in __emit_inst
+ ext4: use matching invalidatepage in ext4_writepage
+ ext4: increase wait time needed before reuse of deleted inode numbers
+ ext4: convert BUG_ON's to WARN_ON's in mballoc.c
+ hwmon: (jc42) Fix name to have no illegal characters
+ qed: Fix use after free in qed_chain_free
+ ext4: check for non-zero journal inum in ext4_calculate_overhead
+ propagate_one(): mnt_set_mountpoint() needs mount_lock
+ kconfig: qconf: Fix a few alignment issues
+ loop: Better discard support for block devices
+ drm/amd/display: Not doing optimize bandwidth if flip pending.
+ virtio_blk: improve virtqueue error to BLK_STS
+ scsi: smartpqi: fix call trace in device discovery
+ net: ipv6: add net argument to ip6_dst_lookup_flow
+ net: ipv6_stub: use ip6_dst_lookup_flow instead of ip6_dst_lookup
+ f2fs: fix to avoid memory leakage in f2fs_listxattr
- KVM: VMX: Zero out *all* general purpose registers after VM-Exit
- KVM: Introduce a new guest mapping API
- kvm: fix compilation on aarch64
- kvm: fix compilation on s390
- kvm: fix compile on s390 part 2
- KVM: Properly check if "page" is valid in kvm_vcpu_unmap
- x86/kvm: Introduce kvm_(un)map_gfn()
- x86/kvm: Cache gfn to pfn translation
- vrf: Fix IPv6 with qdisc and xfrm
- net: dsa: b53: Lookup VID in ARL searches when VLAN is enabled
- net: dsa: b53: Rework ARL bin logic
- net: dsa: b53: b53_arl_rw_op() needs to select IVL or SVL
- mlxsw: Fix some IS_ERR() vs NULL bugs
- iio: core: remove extra semi-colon from devm_iio_device_register() macro
- iio: st_sensors: rely on odr mask to know if odr can be set
- iio: xilinx-xadc: Make sure not exceed maximum samplerate
- iwlwifi: mvm: beacon statistics shouldn't go backwards
- xhci: prevent bus suspend if a roothub port detected a over-current
- condition
- * Bionic update: upstream stable patchset 2020-04-27 (LP: #1875506)
- KVM: VMX: fix crash cleanup when KVM wasn't used
- amd-xgbe: Use __napi_schedule() in BH context
- hsr: check protocol version in hsr_newlink()
- net: ipv4: devinet: Fix crash when add/del multicast IP with autojoin
- net: ipv6: do not consider routes via gateways for anycast address check
- net: qrtr: send msgs from local of same id as broadcast
- net: revert default NAPI poll timeout to 2 jiffies
- stmmac: dwmac-sunxi: Provide TX and RX fifo sizes
- scsi: ufs: Fix ufshcd_hold() caused scheduling while atomic
- jbd2: improve comments about freeing data buffers whose page mapping is NULL
- pwm: pca9685: Fix PWM/GPIO inter-operation
- ext4: fix incorrect group count in ext4_fill_super error message
- ext4: fix incorrect inodes per group in error message
- ASoC: Intel: mrfld: fix incorrect check on p->sink
- ASoC: Intel: mrfld: return error codes when an error occurs
- ALSA: usb-audio: Don't override ignore_ctl_error value from the map
- tracing: Fix the race between registering 'snapshot' event trigger and
  triggering 'snapshot' operation
- btrfs: check commit root generation in should_ignore_root
- mac80211_hwsim: Use kstrndup() in place of kasprintf()
- ext4: do not zeroout extents beyond i_disksize
- dm flakey: check for null arg_name in parse_features()
- kvm: x86: Host feature SSBD doesn't imply guest feature SPEC_CTRL_SSBD
- x86/microcode/AMD: Increase microcode PATCH_MAX_SIZE
- x86/intel_rdt: Add two new resources for L2 Code and Data Prioritization
  (CDP)
- x86/intel_rdt: Enable L2 CDP in MSR IA32_L2_QOS_CFG
+ - x86/resctrl: Preserve CDP enable over CPU hotplug
+ - x86/resctrl: Fix invalid attempt at removing the default resource group
+ - mm/vmalloc.c: move 'area->pages' after if statement
+ - objtool: Fix switch table detection in .text.unlikely
+ - scsi: sg: add sg_remove_request in sg_common_write
+ - ext4: use non-movable memory for superblock readahead
+ - arm, bpf: Fix bugs with ALU64 {RSH, ARSH} BPF_K shift by 0
+ - netfilter: nf_tables: report EOPNOTSUPP on unsupported flags/object type
+ - irqchip/migen: Free msi_desc on device teardown
+ - hci: Add NULL release card at firmware loading error
+ - lib/raid6: use vdupq_n_u8 to avoid endianness warnings
+ - video: fbdev: sis: Remove unnecessary parentheses and commented code
+ - drm: NULL pointer dereference [null-pointer-deref] (CWE 476) problem
+ - clk: Fix debugfs_create_"(*) usage
+ - Revert "gpio: set up initial state from .get_direction()"
+ - wil6210: increase firmware ready timeout
+ - wil6210: fix temperature debugfs
+ - scsi: ufs: make sure all interrupts are processed
+ - scsi: ufs: ufs-qcom: remove broken hci version quirk
+ - wil6210: rate limit wil_rx_refill error
+ - rmsg: glink: use put_device() if device_register fail
+ - rtc: pm8xxx: Fix issue in RTC write path
+ - rmsg: glink: Fix missing mutex_init() in qcom_glink_alloc_channel()
+ - rmsg: glink: smem: Ensure ordering during tx
+ - wil6210: fix PCIe bus mastering in case of interface down
+ - wil6210: add block size checks during FW load
+ - wil6210: fix length check in __wmi_send
+ - wil6210: abort properly in cfg suspend
+ - rbd: avoid a deadlock on header_rwsem when flushing notifies
+ - rbd: call rbd_dev_unprobe() after unwatching and flushing notifies
+ - of: unittest: kmemleak in of_unittest_platform Populate()
+ - clk: at91: usb: continue if clk_hw_round_rate() return zero
+ - power: supply: bq27xxx_battery: Silence deferred-probe error
+ - clk: tegra: Fix Tegra PMC clock out parents
+ - soc: imx: gpc: fix power up sequencing
+ - rtc: 88pm860x: fix possible race condition
+ - NFSv4/pnfs: Return valid stateids in nfs_layout_find_inode_by_stateid()
+ - NFS: direct.c: Fix memory leak of dreq when nfs_get_lock_context fails
+ - s390/cpuid: fix wrong output when CPU0 is offline
+ - power/e: Fix declaration made after definition
+ - ext4: do not commit super on read-only bdev
+ - include/linux/swapops.h: correct guards for non_swap_entry()
+ - percpu_counter: fix a data race at vm_committed_as
+ - compiler.h: fix error in BUILD_BUG_ON() reporting
+ - KVM: s390: vsie: Fix possible race when shadowing region 3 tables
+ - x86: ACPI: fix CPU hotplug deadlock
+ - drm/amdkfd: kfree the wrong pointer
+ - NFS: Fix memory leaks in nfs_pageio_stop_mirroring()
+ - iommu/vt-d: Fix mm reference leak
+ - ext2: fix empty body warnings when -Wextra is used
+ - ext2: fix debug reference to ext2_xattr_cache
+ - libnvdimm: Out of bounds read in __nd_ioctl()
+ - iommu/amd: Fix the configuration of GCR3 table root pointer
+ - net: dsa: bcm_sf2: Fix overflow checks
+ - fbdev: potential information leak in do_fb_ioctl()
+ - tty: evh_bytechan: Fix out of bounds accesses
+ - locktorture: Print ratio of acquisitions, not failures
+ - mtd: lpddr: Fix a double free in probe()
+ - mtd: phram: fix a double free issue in error path
+ - KEYS: Use individual pages in big_key for crypto buffers
+ - KEYS: Don't write out to userspace while holding key semaphore
+ - keys: Fix proc_keys_next to increase position index
+ - wil6210: ignore HALP ICR if already handled
+ - wil6210: remove reset file from debugfs
+ - ARM: dts: imx6: Use gpc for FEC interrupt controller to fix wake on LAN.
+ - of: unittest: kmemleak on changeset destroy
+ - of: overlay: kmemleak in dup_and_fixup_symbol_prop()
+ - s390/cpum.sf: Fix wrong page count in error message
+ - fs2fs: fix NULL pointer dereference in fs2fs_write_begin()
+ * psock_tpacket from the net test in ubuntu_kernel_selftests failed on KVM
   kernels (LP: #1812176)
+ - selftests/net: skip pssock_tpacket test if KALLSYMS was not enabled
+ * Bionic ubuntu ethtool doesn't check ring parameters boundaries
   (LP: #1874444)
+ - ethtool: Ensure new ring parameters are within bounds during SRINGPARAM
+ * Improve TSC refinement (and calibration) reliability (LP: #1877858)
  + - x86/tsc: Make calibration refinement more robust
  + - x86/tsc: Use CPUID.0x16 to calculate missing crystal frequency
+ * Do not treat unresolved test case in ftrace from ubuntu_kernel_selftests as
   failure (LP: #1877958)
+ - ftrace/selftest: make unresolved cases cause failure if --fail-unresolved
  + set
+ * Add support for Ambiq micro AM1805 RTC chip (LP: #1876667)
+ - SAUCE: rtc: add am-1805 RTC driver
+ * 'Elan touchpad' not detected on 'Lenovo ThinkBook 15 IIL' (LP: #1861610)
+ - SAUCE: Input: elan_i2c - add more hardware ID for Lenovo laptop
+ * Kdump broken since 4.15.0-65 on secureboot - purgatory cannot load
  (LP: #1869672)
+ - SAUCE: x86/purgatory: Fix Makefile to prevent undefined symbols
linux (4.15.0-101.102) bionic; urgency=medium

* bionic/linux: 4.15.0-101.102 -proposed tracker (LP: #1877262)

* 4.15.0-100.101 breaks userspace builds due to a bug in the headers
  /usr/include/linux/swab.h of linux-libc-dev (LP: #1877123)
  - include/uapi/linux/swab.h: fix userspace breakage, use __BITS_PER_LONG for swap

* bionic snapdragon 4.15 snap failed Certification testing (LP: #1877657)
  - Revert "drm/msm: Use the correct dma_sync calls in msm_gem"
  - Revert "drm/msm: stop abusing dma_map/unmap for cache"

-- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Fri, 15 May 2020 14:47:09 +0200

linux (4.15.0-100.101) bionic; urgency=medium

* bionic/linux: 4.15.0-100.101 -proposed tracker (LP: #1875878)

* built-using constraints preventing uploads (LP: #1875601)
  - temporarily drop Built-Using data

* Add debian/rules targets to compile/run kernel selftests (LP: #1874286)
  - [Packaging] add support to compile/run selftests

* getitimer returns it_value=0 erroneously (LP: #1349028)
  - [Config] CONTEXT_TRACKING_FORCE policy should be unset

* QEMU/KVM display is garbled when booting from kernel EFI stub due to missing bochs-drm module (LP: #1872863)
  - [Config] Enable CONFIG_DRM_BOCHS as module for all archs

* Backport MPLS patches from 5.3 to 4.15 (LP: #1851446)
  - net/mlx5e: Report netdevice MPLS features
  - net: vlan: Inherit MPLS features from parent device
  - net: bonding: Inherit MPLS features from slave devices
  - net/mlx5e: Move to HW checksumming advertising

* LIO hanging in iscsit_free_session and iscsit_stop_session (LP: #1871688)
  - scsi: target: remove boilerplate code
  - scsi: target: fix hang when multiple threads try to destroy the same iscsi session
  - scsi: target: iscsi: calling iscsit_stop_session() inside
  - iscsit_close_session() has no effect

-- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Mon, 11 May 2020 11:08:26 +0200
+ * Add hw timestamps to received skbs in peak_canfd (LP: #1874124)
+ - can: peak_canfd: provide hw timestamps in rx skbs
+ 
+ + * Bionic update: upstream stable patchset 2020-04-23 (LP: #1874502)
+ - ARM: dts: sun8i-a83t-tbs-a711: HM5065 doesn't like such a high voltage
+ - bus: sunxi-rsb: Return correct data when mixing 16-bit and 8-bit reads
+ - net: vxge: fix wrong __VA_ARGS__ usage
+ - hinic: fix a bug of waiting for IO stopped
+ - hinic: fix wrong para of wait_for_completion_timeout
+ - cxgb4/ptp: pass the sign of offset delta in FW CMD
+ - qlenic: Fix bad kalloc null test
+ - i2c: st: fix missing struct parameter description
+ - firmware: arm_sdei: fix double-lock on hibernate with shared events
+ - null_blk: Fix the null_add_dev() error path
+ - null_blk: Handle null_add_dev() failures properly
+ - null_blk: fix spurious IO errors after failed past-wp access
+ - xhci: bail out early if driver can't access host in resume
+ - x86: Don't let pgprot_modify() change the page encryption bit
+ - block: keep bdi->io_pages in sync with max_sectors_kb for stacked devices
+ - irqchip/versatile-fpga: Handle chained IRQs properly
+ - sched: Avoid scale real weight down to zero
+ - selftests/x86/ptrace_syscall_32: Fix no-vDSO segfault
+ - PCI/switchtec: Fix init_completion race condition with poll_wait()
+ - libata: Remove extra scsi_host_put() in ata_scsi_add_hosts()
+ - gfs2: Don't demote a glock until its revokes are written
+ - x86/boot: Use unsigned comparison for addresses
+ - efi/x86: Ignore the memory attributes table on i386
+ - genirq/irqdomain: Check pointer in irq_domain_alloc_irqs_hierarchy()
+ - block: Fix use-after-free issue accessing struct io_cq
+ - usb: dwc3: core: add support for disabling SS instances in park mode
+ - irqchip/gic-v4: Provide irq_retrigger to avoid circular locking dependency
+ - md: check arrays is suspended in mddev_detach before call quiesce operations
+ - locking/lockdep: Avoid recursion in lockdep_count_() for backward deps()
+ - block, bfq: fix use-after-free in bfq_idle_slice_timer_body
+ - btrfs: qgroup: ensure qgroup_rescan_running is only set when the worker is
+ - at least queued
+ - btrfs: remove a BUG_ON() from merge_reloc_roots()
+ - btrfs: track reloc roots based on their commit root bytenr
+ - uapi: rename ext2_swab() to swab() and share globally in swab.h
+ - slub: improve bit diffusion for freelist ptr obfuscation
+ - ASoC: fix regwmask
+ - ASoC: dapm: connect virtual mux with default value
+ - ASoC: dpcm: allow start or stop during pause for backend
+ - ASoC: topology: use name_prefix for new kcontrol
+ - usb: gadget: f_fs: Fix use after free issue as part of queue failure
+ - usb: gadget: composite: Inform controller driver of self-powered
+ - ALSA: usb-audio: Add mixer workaround for TRX40 and co
+ - ALSA: hda: Add driver blacklist
+ - ALSA: hda: Fix potential access overflow in beep helper
+ - ALSA: ice1724: Fix invalid access for enumerated ctl items
+ - ALSA: pcm: oss: Fix regression by buffer overflow fix
+ - ALSA: hda/realtek: Set principled PC Beep configuration for ALC256
+ - ALSA: hda/realtek: Remove now-unnecessary XPS 13 headphone noise fixups
+ - ALSA: hda/realtek: Add quirk for MSI GL63
+ - media: ti-vpe: cal: fix disable_irqs to only the intended target
+ - acpi/x86: ignore unspecified bit positions in the ACPI global lock field
+ - thermal: devfreq_cooling: inline all stubs for CONFIG_DEVFREQ_THERMAL=n
+ - nvme-fc: Revert "add module to ops template to allow module references"
+ - nvme: Treat discovery subsystems as unique subsystems
+ - PCI/ASPM: Clear the correct bits when enabling L1 substates
+ - PCI: Add boot interrupt quirk mechanism for Xeon chipsets
+ - PCI: endpoint: Fix for concurrent memory allocation in OB address region
+ - irqchip/versatile-fpga: Apply clear-mask earlier
+ - pstore: pstore_ftrace_seq_next should increase position index
+ - MIPS/tlbex: Fix LDDIR usage in setup_pw() for Loongson-3
+ - MIPS: OCTEON: irq: Fix potential NULL pointer dereference
+ - ath9k: Handle txpower changes even when TPC is disabled
+ - signal: Extend exec_id to 64bits
+ - x86/entry/32: Add missing ASM_CLAC to general_protection entry
+ - KVM: nVMX: Properly handle userspace interrupt window request
+ - KVM: s390: vsie: Fix region 1 ASCE sanity shadow address checks
+ - KVM: s390: vsie: Fix delivery of addressing exceptions
+ - KVM: x86: Allocate new rmap and large page tracking when moving memslot
+ - KVM: VMX: Always VMCLEAR in-use VMCSes during crash with kexec support
+ - CIFS: Fix bug which the return value by asynchronous read is error
+ - Btrfs: fix crash during unmount due to race with delayed inode workers
+ - btrfs: set update the uuid generation as soon as possible
+ - btrfs: drop block from cache on error in relocation
+ - btrfs: fix missing semaphore unlock in btrfs_sync_file
+ - crypto: mxs-dep - fix scatterlist linearization for hash
+ - powerpc/pseries: Drop pointless static qualifier in vpa_debugfs_init()
+ - x86/speculation: Remove redundant arch_smt_update() invocation
+ - tools: gpio: Fix out-of-tree build regression
+ - mm: Use fixed constant in page_frag_alloc instead of size + 1
+ - dm verity fec: fix memory leak in verity_fec_dtr
+ - scsi: zfcp: fix missing erp_lock in port recovery trigger for point-to-point
+ - arm64: armv8_deprecated: Fix undef_hook mask for thumb setend
+ - selftests: vm: drop dependencies on page flags from mlock2 tests
+ - rtc: omap: Use define directive for PIN_CONFIG_ACTIVE_HIGH
+ - drm/etnaviv: rework perfmon query infrastructure
+ - NFS: Fix a page leak in nfs_destroy_unlinked_subrequests()
+ - ext4: fix a data race at inode->i_blocks
+ - fs/filesystems.c: downgrade user-reachable WARN_ONCE() to pr_warn_once()
+ - ocfs2: no need try to truncate file beyond i_size
+ - perf tools: Support Python 3.8+ in Makefile

- ipv6: restrict IPV6_ADDRFORM operation
- net/smci: check for valid ib_client_data
- efi: Add a sanity check to efivar_store_raw()
- batman-adv: Fix internal interface indices types
- batman-adv: Update data pointers after skb_cow()
- batman-adv: Avoid race in TT TVLV allocator helper
- batman-adv: Fix TT sync flags for intermediate TT responses
- batman-adv: Prevent TT request storms by not sending inconsistent TT TLVLs
- batman-adv: Avoid free/alloc race when handling OGM2 buffer
- batman-adv: Don't schedule OGM for disabled interface
- perf/amd/uncore: Replace manual sampling check with CAP_NO_INTERRUPT flag
- ACPI: watchdog: Allow disabling WDAT at boot
- HID: apple: Add support for recent firmware on Magic Keyboards
- cfg80211: check reg_rule for NULL in handle_channel_custom()
- scsi: libfc: free response frame from GPN_ID
- net: usb: qmi_wwan: restore mtu min/max values after raw_ip switch
- net: ks8851-ml: Fix IRQ handling and locking
- mac80211: rx: avoid RCU list traversal under mutex
- signal: avoid double atomic counter increments for user accounting
- slip: not call free_netdev before rtnl_unlock in slip_open
- hinic: fix a bug of setting hw_ioctxt
- net: rmnet: fix NULL pointer dereference in rmnet_newlink()
- jbd2: fix data races at struct journal_node
- ARM: 8957/1: VDSO: Match ARMv8 timer in cntvct_functional()
- ARM: 8958/1: rename missed uaccess .fixup section
- mm: slab: add missing TID bump in kmem_cache_alloc_bulk()
- ipv4: ensure rcu_read_lock() in cipso_v4_error()
- nfc: add missing attribute validation for deactivate target
- netfilter: nf_conntrack: ct_cpu_seq_next should increase position index
- netfilter: synproxy: synproxy_cpu_seq_next should increase position index
- netfilter: xt_recent: recent_seq_next should increase position index
- macintosh: windfarm: fix MODINFO regression
- i2c: gpio: suppress error on probe defer
- net/smci: cancel event worker during device removal
- hinic: fix a irq defer bug
- net: rmnet: fix suspicious RCU usage
- net: rmnet: remove rcu_read_lock in rmnet_force_unassociate_device()
- net: rmnet: fix packet forwarding in rmnet bridge mode
- sfc: fix timestamp reconstruction at 16-bit rollover points
- driver core: Fix adding device links to probing suppliers
- net: qrtr: fix len of skb_put_padto in qrtr_node_enqueue
- * This laptop contains a touchpad which is not recognized. (LP: #1858299) //
+ Bionic update: upstream stable patchset 2020-03-30 (LP: #1869732)
+ - HID: i2c-hid: add Trekstor Surfbook E11B to descriptor override
+ * Bionic update: upstream stable patchset 2020-03-23 (LP: #1868623)
+ - iwlsifi: pcie: fix rb_allocator workqueue allocation
+ - ext4: fix potential race between online resizing and write operations
+ - ext4: fix potential race between s_flex_groups online resizing and access
+ - ext4: fix potential race between s_group_info online resizing and access
+ - ipmi: ssif: Handle a possible NULL pointer reference
+ - drm/msm: Set dma maximum segment size for mdss
+ - dax: pass NOWAIT flag to iomap_apply
+ - mac80211: consider more elements in parsing CRC
+ - cfg80211: check wiphy driver existence for drvinfo report
+ - qmi_wwan: re-add DW5821e pre-production variant
+ - qmi_wwan: unconditionally reject 2 ep interfaces
+ - net: ena: fix potential crash when rxfh key is NULL
+ - net: ena: fix uses of round_jiffies()
+ - net: ena: add missing ethtool TX timestamping indication
+ - net: ena: fix incorrect default RSS key
+ - net: ena: rss: fix failure to get indirection table
+ - net: ena: rss: store hash function as values and not bits
+ - net: ena: fix incorrectly saving queue numbers when setting RSS indirection table
+ - net: ena: ethtool: use correct value for crc32 hash
+ - net: ena: ena-com.c: prevent NULL pointer dereference
+ - cifs: Fix mode output in debugging statements
+ - cfg80211: add missing policy for NL80211_ATTR_STATUS_CODE
+ - sysrq: Restore original console_loglevel when sysrq disabled
+ - sysrq: Remove duplicated sysrq message
+ - net: fib_rules: Correctly set table field when table number exceeds 8 bits
+ - net: phy: restore mdio regs in the iproc mdio driver
+ - nfc: pn544: Fix occasional HW initialization failure
+ - scpt: move the format error check out of __scpt_sf_do_9_1_abort
+ - ipv6: Fix nlmmsg_flags when splitting a multipath route
+ - ipv6: Fix route replacement with dev-only route
+ - qede: Fix race between rdma destroy workqueue and link change event
+ - net: sched: correct flower port blocking
+ - ext4: potential crash on allocation error in ext4_alloc_flex_bg_array()
+ - audit: fix error handling in audit_data_to_entry()
+ - ACPI: Introduce ACPI_ACCESS_BYTE_WIDTH() macro
+ - ACPI: watchdog: Fix gas->access_width usage
+ - KVM: VMX: check descriptor table exits on instruction emulation
+ - HID: ite: Only bind to keyboard USB interface on Acer SW5-012 keyboard dock
+ - HID: core: fix off-by-one memset in hid_report_raw_event()
+ - HID: core: increase HID report buffer size to 8KiB
+ - tracing: Disable trace_printk() on post poned tests
+ - Revert "PM / devfreq: Modify the device name as devfreq(X) for sysfs"
+ - HID: hiddev: Fix race in in hiddev_disconnect()
- MIPS: VPE: Fix a double free and a memory leak in 'release_vpe()'
- i2c: altera: Fix potential integer overflow
- i2c: jz4780: silence log flood on txabrt
- drm/915/gvt: Separate display reset from ALL_ENGINES reset
- usb: charger: assign specific number for enum value
- cryptfs: Fix up bad backport of fe2e082f5da5b4a0a92ae32978f81507efe37ec66
- net: netlink: cap max groups which will be considered in netlink_bind()
- net: atlantic: fix potential error handling
- net: ena: make ena rxth support ETH_RSS_HASH_NO_CHANGE
- namei: only return -ECHILD from follow_dotdot_rcu()
- mwifiex: drop most magic numbers from mwifiex_process_tdl_action_frame()
- KVM: SVM: Override default MMIO mask if memory encryption is enabled
- KVM: Check for a bad hva before dropping into the ghc slow path
- drivers: net: xgene: Fix the order of the arguments of
  'alloc_etherdev_mqs()'
- kprobes: Set unoptimized flag after unoptimizing code
- perf hists browser: Restore ESC as "Zoom out" of DSO/thread/etc
- mm/huge_memory.c: use head to check huge zero page
- mm, thp: fix defrag setting if newline is not used
- audit: always check the netlink payload length in audit_receive_msg()
- vhost: Check docket sk_family instead of call getname
- EDAC/amd64: Set grain per DIMM
- net: dsa: bcm_sf2: Forcibly configure IMP port for 1Gb/sec
- RDMA/core: Fix pkey and port assignment in get_new_pps
- RDMA/core: Fix use of logical OR in get_new_pps
- kprobes: Fix optimize_kprobe()/unoptimize_kprobe() cancellation logic
- serial: ar933x_uart: set UART_CS_{RX,TX}_READY_ORIDE
- selftests: fix too long argument
- usb: gadget: composite: Support more than 500mA MaxPower
- usb: gadget: ffs: ffs_aio_cancel(): Save/restore IRQ flags
- usb: gadget: serial: fix Tx stall after buffer overflow
- drm/msm/mdp5: rate limit pp done timeout warnings
- drm: msm: Fix return type of dsi_mgr_connector_mode_valid for kCFI
- drm/msm/dsi: save pll state before dsi host is powered off
- net: ks8851-ml: Remove 8-bit bus accessors
- net: ks8851-ml: Fix 16-bit data access
- net: ks8851-ml: Fix 16-bit IO operation
- watchdog: da9062: do not ping the hw during stop()
- s390/cio: cio_ignore_proc_seq_next should increase position index
- x86/boot/compressed: Don't declare __force_order in kaslr_64.c
- nvme: Fix uninitialized-variable warning
- x86/xen: Distribute switch variables for initialization
- net: thunderx: workaround BGX TX Underflow issue
- cifs: don't leak -EAGAIN for stat() during reconnect
- usb: storage: Add quirk for Samsung Fit flash
- usb: quirks: add NO_LPM quirk for Logitech Screen Share
- usb: core: hub: fix unhandled return by employing a void function
- usb: core: hub: do error out if usb_autopm_get_interface() fails
Open Source Used In 5GaaS Edge AC-4

- usb: core: port: do error out if usb_autopm_get_interface() fails
- vgacon: Fix a UAF in vgacon_invert_region
- mm, numa: fix bad pmd by atomically check for pmd_transhuge when marking page tables prot_numa
- fat: fix uninit-memory access for partial initialized inode
- arm: dts: dra76x: Fix mmc3 max-frequency
- tty:serial:mvebu-uart: fix a wrong return
- serial: 8250_exar: add support for ACCES cards
- vt: selection, close sel_buffer race
- vt: selection, push console lock down
- vt: selection, push sel_lock up
- x86/pkeys: Manually set X86_FEATURE_OSPKE to preserve existing changes
- dmaengine: tegra-apb: Fix use-after-free
- dmaengine: tegra-apb: Prevent race conditions of tasklet vs free list
- dm cache: fix a crash due to incorrect work item cancelling
- ARM: dts: ls1021a: Restore MDIO compatible to gianfar
- ASoC: topology: Fix memleak in soc_tplg_link_elems_load()
- ASoC: intel: skl: Fix pin debug prints
- ASoC: intel: skl: Fix possible buffer overflow in debug outputs
- ASoC: pcm: Fix possible buffer overflow in dpcm state sysfs output
- ASoC: pcm512x: Fix unbalanced regulator enable call in probe error path
- ASoC: dapm: Correct DAPM handling of active widgets during shutdown
- RDMA/iwcm: Fix iwcm work deallocation
- RMDA/cm: Fix missing ib_cm_destroy_id() in ib_cm_insert_listen()
- IB/hfi1, qib: Ensure RCU is locked when accessing list
- ARM: imx: build v7_cpu_resume() unconditionally
- hwmon: (adt7462) Fix an error return in ADT7462_REG_VOLT()
- dmaengine: coh901318: Fix a double lock bug in dma_tc_handle()
- powerpc: fix hardware PMU exception bug on PowerVM compatibility mode systems
- dm integrity: fix a deadlock due to offloading to an incorrect workqueue
- xhci: handle port status events for removed USB3 hcd
- ASoC: topology: Fix memleak in soc_tplg_manifest_load()
- ALSA: hda/realtek - Apply quirk for MSI GP63, too
- ALSA: hda/realtek - Apply quirk for yet another MSI laptop
- USB: core: add endpoint-blacklist quirk
- USB: quirks: blacklist duplicate ep on Sound Devices USBPre2
- powerpc/tm: Fix clearing MSR[TS] in current when reclaiming on signal delivery
- jbd2: fix ocf2 corrupt when clearing block group bits
- x86/cpu/amd: Enable the fixed Instructions Retired counter IRPERF
- genirq/irqdomain: Make sure all irq domain flags are distinct
- btrfs: reset fs_root to NULL on error in open_ctree
- usb: dwc2: Fix in ISOC request length checking
- rxrpc: Fix call RCU cleanup using non-bh-safe locks
- s390/ckrypt: fix card and queue total counter wrap
- ARM: dts: sti: fixup sound frame-inversion for stihxxx-b2120.dtsi
- macintosh: therm_windtunnel: fix regression when instantiating devices
+  - HID: alps: Fix an error handling path in 'alps_input_configured()'
+  - hv_netvsc: Fix unwanted wakeup in netvsc_attach()
+  - s390/qeth: vnicc Fix EOPNOTSUPP precedence
+  - net: atlantic: fix use after free kasan warn
+  - sched/fair: Optimize update_blocked_averages()
+  - sched/fair: Fix O(nr_cgroups) in the load balancing path
+  - KVM: x86: Remove spurious kvm_mmu_unload() from vcpu destruction path
+  - KVM: x86: Remove spurious clearing of async #PF MSR
+  - thermal: brcmstb_thermal: Do not use DT coefficients
+  - scsi: megaraid_sas: silence a warning
+  - net: dsa: b53: Ensure the default VID is untagged
+  - s390: make 'install' not depend on vmlinux
+  - s390/qdio: fill SL with absolute addresses
+  - ALSA: hda/realtek - Fix silent output on Gigabyte X570 Aorus Master
+  - efi/x86: Align GUIDs to their size in the mixed mode runtime wrapper
+  - efi/x86: Handle by-ref arguments covering multiple pages in mixed mode
+  - scsi: pm80xx: Fixed kernel panic during error recovery for SATA drive

+  * Bionic update: upstream stable patchset 2020-03-17 (LP: #1867837)
+  +  - iommu/qcom: Fix bogus detach logic
+  +  - ALSA: hda: Use scnprintf() for printing texts for sysfs/procfs
+  +  - ASoC: sun8i-codec: Fix setting DAI data format
+  +  - ecryptfs: fix a memory leak bug in parse_tag_1_packet()
+  +  - ecryptfs: fix a memory leak bug in ecryptfs_init_messaging()
+  +  - arm64: nofpsimd: Handle TIF_FOREIGN_FPSTATE flag cleanly
+  +  - ARM: 8723/2: always assume the "unified" syntax for assembly code
+  +  - serial: imx: ensure that RX irqs are off if RX is off
+  +  - serial: imx: Only handle irqs that are actually enabled
+  +  - KVM: nVMX: Use correct root level for nested EPT shadow page tables
+  +  - drm/gma500: Fixup fbdev stolen size usage evaluation
+  +  - cpu/hotplug, stop_machine: Fix stop_machine vs hotplug order
+  +  - brcmfmac: Fix use after free in brcmf_sdio_readframes()
+  +  - leds: pca963x: Fix open-drain initialization
+  +  - ext4: fix ext4_dax_read/write inode locking sequence for IOCB_NOWAIT
+  +  - ALSA: ctl: allow TLV read operation for callback type of element in locked case
+  +  - gianfar: Fix TX timestamping with a stacked DSA driver
+  +  - pinctrl: sh-pfc: sh7264: Fix CAN function GPIOs
+  +  - pxa168fb: Fix the function used to release some memory in an error handling path
+  +  - media: i2c: mt9v032: fix enum mbus codes and frame sizes
+  +  - powerpc/powerpc/iiov: Ensure the pdn for VFs always contains a valid PE number
+  +  - gpio: gpio-gpio: fix possible sleep-in-atomic-context bugs in gregpio_irq_map/unmap()
+  +  - media: sti: bdisp: fix a possible sleep-in-atomic-context bug in bdisp_device_run()
+  +  - pinctrl: baytrail: Do not clear IRQ flags on direct-irq enabled pins
- efi/x86: Map the entire EFI vendor string before copying it
- MIPS: Loongson: Fix potential NULL dereference in loongson3_platform_init()
- - sparc: Add .exit.data section.
- - uio: fix a sleep-in-atomic-context bug in uio_dmem_genirq_irqcontrol()
- - usb: gadget: udc: fix possible sleep-in-atomic-context bugs in gr_probe()
- - usb: dwc2: Fix IN FIFO allocation
- - clocksource/drivers/bcm2835_timer: Fix memory leak of timer
- - kselftest: Minimise dependency of get_size on C library interfaces
- - jbd2: clear JBD2_ABORT flag before journal_reset to update log tail info
  when load journal
- - x86/sysfb: Fix check for bad VRAM size
- - tracing: Fix tracing_stat return values in error handling paths
- - tracing: Fix very unlikely race of registering two stat tracers
- - ext4, jbd2: ensure panic when aborting with zero errno
- - nbd: add a flush_workqueue in nbd_start_device
- - KVM: s390: ENOTSUPP -> EOPNOTSUPP fixups
- - kconfig: fix broken dependency in randconfig-generated .config
- - clk: qcom: rcg2: Don't crash if our parent can't be found; return an error
- - drm/amdgp: remove 4 set but not used variable in
  amdgp_atombios_get_connector_info_from_object_table
- - regulator: rk808: Lower log level on optional GPIOs being not available
- - net/wan/fsl_ucc_hdlc: reject muram offsets above 64K
- - PCI/IOV: Fix memory leak in pci_iov_add_virtfn()
- - NFC: port100: Convert cpu_to_le16(le16_to_cpu(E1) + E2) to use
  le16_add_cpu().
- - arm64: dts: qcom: msm8996: Disable USB2 PHY suspend by core
- - ARM: dts: imx6: rdu2: Disable WP for USDHC2 and USDHC3
- - media: v4l2-device.h: Explicitly compare grp{id,mask} to zero in v4l2_device
  macros
- - reiserfs: Fix spurious unlock in reiserfs_fill_super() error handling
- - fore200e: Fix incorrect checks of NULL pointer dereference
- - ALSA: uxs2y: Adjust indentation in snd_usX2Y_hwdep_dsp_status
- - b43legacy: Fix -Wcast-function-type
- - ipw2x00: Fix -Wcast-function-type
- - iwlegacy: Fix -Wcast-function-type
- - rtlwifi: rtl_pci: Fix -Wcast-function-type
- - orinoco: avoid assertion in case of NULL pointer
- - ACPI: Disassembler: create buffer fields in ACPI_PARSE_LOAD_PASS1
- - scsi: ufs: Complete pending requests in host reset and restore path
- - scsi: aic7xxx: Adjust indentation in aic_find_syncrate
- - drm/mediatek: handle events when enabling/disabling crtc
- - ARM: dts: r8a7779: Add device node for ARM global timer
- - dmaengine: Store module owner in dma_device struct
- - x86/vdso: Provide missing include file
- - PM / devfreq: rk3399_dmc: Add COMPIL TEST and HAVE_ARM_SMCCC dependency
- - pinctrl: sh-pfc: sh7269: Fix CAN function GPIOs
- - RDMA/rxe: Fix error type of mmap_offset
- - clk: sunxi-ng: add mux and pll notifiers for A64 CPU clock
+ - ALSA: sh: Fix unused variable warnings
+ - ALSA: sh: Fix compile warning wrt const
+ - tools lib api fs: Fix gcc9 stringop-truncation compilation error
+ - drm: remove the newline for CRC source name.
+ - usbip: Fix unsafe unaligned pointer usage
+ - udf: Fix free space reporting for metadata and virtual partitions
+ - IB/hfi1: Add software counter for cxt0 seq drop
+ - soc/tegra: fuse: Correct straps' address for older Tegra124 device trees
+ - ofi/x86: Don't panic or BUG() on non-critical error conditions
+ - rcu: Use WRITE_ONCE() for assignments to ->pprev for hlist_nulls
+ - Input: edt-f15x06 - work around first register access error
+ - wan: ipx4xx_hss: fix compile-testing on 64-bit
+ - ASoC: atmel: fix build error with CONFIG_SND_ATMEL_SOC_DMA=m
+ - tty: synclinkmp: Adjust indentation in several functions
+ - tty: synclink_gt: Adjust indentation in several functions
+ - driver core: platform: Prevent resource overflow causing infinite loops
+ - driver core: Print device when resources present in really_probe()
+ - vme: bridges: reduce stack usage
+ - drm/nouveau/secboot/gm20b: initialize pointer in gm20b_secboot_new()
+ - drm/nouveau/gr/gk20a,gm200-: add terminators to method lists read from fw
+ - drm/nouveau: Fix copy-paste error in nouveau_fence_wait_uevent_handler
+ - drm/vmwgfx: prevent memory leak in vmw_cmdbuf_res_add
+ - usb: musb: omap2430: Get rid of musb .set_vbus for omap2430 glue
+ - jommu/arm-smmu-v3: Use WRITE_ONCE() when changing validity of an STE
+ - f2fs: free sysfs kobject
+ - scsi: iscsi: Don't destroy session if there are outstanding connections
+ - arm64: fix alternatives with LLVM's integrated assembler
+ - watchdog/softlockup: Enforce that timestamp is valid on boot
+ - f2fs: fix memleak of kobject
+ - x86/mm: Fix NX bit clearing issue in kernel_map_pages_in_pgd
+ - pwm: omap-dmtimer: Remove PWM chip in .remove before making it unfunctional
+ - cmd64x: potential buffer overflow in cmd64x_program_timings()
+ - ide: serverworks: potential overflow in svwks_set_pio_mode()
+ - pwm: Remove set but not set variable 'pwm'
+ - btrfs: fix possible NULL-pointer dereference in integrity checks
+ - btrfs: safely advance counter when looking up bio csups
+ - btrfs: device stats, log when stats are zeroed
+ - remoteproc: Initialize rproc_class before use
+ - irqchip/mbigen: Set driver .suppress_bind_attr to avoid remove problems
+ - ALSA: hda/hdmi - add retry logic to parse_intel_hdmi()
+ - x86/decoder: Add TEST opcode to Group3-2
+ - s390/ftrace: generate traced function stack frame
+ - driver core: platform: fix u32 greater or equal to zero comparison
+ - ALSA: hda - Add docking station support for Lenovo Thinkpad T420s
+ - powerpc/sriov: Remove VF eeh_dev state when disabling SR-IOV
+ - jbd2: switch to use jbd2_journal_abort() when failed to submit the commit
+ - record
+ - jbd2: make sure ESHUTDOWN to be recorded in the journal superblock
+ - ARM: 8951/1: Fix Kexec compilation issue.
+ - hostap: Adjust indentation in prism2_hostapd_add_sta
+ - iwlegacy: ensure loop counter addr does not wrap and cause an infinite loop
+ - cifs: fix NULL dereference in match_prepath
+ - ceph: check availability of mds cluster on mount after wait timeout
+ - irqchip/gic-v3: Only provision redistributors that are enabled in ACPI
+ - drm/nouveau/disp/nv50: prevent oops when no channel method map provided
+ - ftrace: fpid_next() should increase position index
+ - trigger_next should increase position index
+ - irqchip/gic-v3: Insert 10ms sleep in dce5_crtc_load_lut
+ - ocfs2: fix a NULL pointer dereference when call
+ - ocfs2_update_inode_fsync_trans()
+ - lib/scatterlist.c: adjust indentation in __sg_alloc_table
+ - reiserfs: prevent NULL pointer dereference in reiserfs_insert_item()
+ - bcache: explicitly type cast in bset_bkey_last()
+ - irqchip/gic-v3: Reference to its_invall_cmd descriptor when building
+ - INVALL
+ - iwlwifi: mvm: Fix thermal zone registration
+ - microblaze: Prevent the overflow of the start
+ - brd: check and limit max_part par
+ - help_next should increase position index
+ - virtio_balloon: prevent pfarray array overflow
+ - mlxsw: spectrum_dpipe: Add missing error path
+ - selinux: ensure we cleanup the internal AVC counters on error in
+ - avc_update()
+ - enic: prevent waking up stopped tx queues over watchdog reset
+ - net: dsa: tag_qca: Make sure there is headroom for tag
+ - net/sched: matchall: add missing validation of TCA_MATCHALL_FLAGS
+ - net/sched: flower: add missing validation of TCA_FLOWER_FLAGS
+ - net/smc: fix leak of kernel memory to user space
+ - thunderbolt: Prevent crash if non-active NVMem file is read
+ - USB: misc: iowarrior: add support for 2 OEMed devices
+ - USB: misc: ioapic: add support for the 28 and 28L devices
+ - USB: misc: ioapic: add support for the 100 device
+ - floppy: check FDC index for errors before assigning it
+ - vt: selection, handle pending signals in paste_selection
+ - staging: android: ashmem: Disallow ashmem memory from being remapped
+ - staging: vt6656: fix sign of rx_dbm to bb_pre_ed_rssi.
+ - xhci: Force Maximum Packet size for Full-speed bulk devices to valid range.
+ - xhci: fix runtime pm enabling for quirky Intel hosts
+ - usb: host: xhci: update event ring dequeuee pointer on purpose
+ - usb: uas: fix a plug & unplug racing
+ - USB: Fix novation SourceControl XL after suspend
+ - USB: hub: Don't record a connect-change event during reset-resume
+ - USB: hub: Fix the broken detection of USB3 device in SMSC hub
+ - staging: rtl8188eu: Fix potential security hole
+ - staging: rtl8188eu: Fix potential overuse of kernel memory
+ - staging: rtl8723bs: Fix potential security hole
+ - staging: rtl8723bs: Fix potential overuse of kernel memory
+ - x86/mce/amd: Publish the bank pointer only after setup has succeeded
+ - x86/mce/amd: Fix kobject lifetime
+ - tty/serial: atmel: manage shutdown in case of RS485 or ISO7816 mode
+ - tty: serial: imx: setup the correct sg entry for tx dma
+ - serdev: ttyport: restore client ops on deregistration
+ - MAINTAINERS: Update drm/i915 bug filing URL
+ - mm/vmscan.c: don't round up scan size for online memory cgroup
+ - drm/amdgpu/soc15: fix xclk for raven
+ - KVM: x86: don't notify userspace IOAPIC on edge-triggered interrupt EOI
+ - xhci: apply XHCI_PME_STUCK_QUIRK to Intel Comet Lake platforms
+ - vt: vt_ioctl: fix race in VT_RESIZEX
+ - serial: 8250: Check UPF_IRQ_SHARED in advance
+ - lib/stackdepot.c: fix global out-of-bounds in stack_slabs
+ - ext4: fix a data race in EXT4_I(inode)->i_disksize
+ - ext4: add cond_resched() to __ext4_find_entry()
+ - ext4: rename s_journal_flag_rwsem to s_writepages_rwsem
+ - ext4: fix race between writepages and enabling EXT4_EXTENTS_FL
+ - KVM: nVMX: handle nested posted interrupts when apicv is disabled for L1
+ - KVM: apic: avoid calculating pending eoi from an uninitialized val
+ - btrfs: fix bytes_may_use underflow in prealloc error condition
+ - btrfs: do not check delayed items are empty for single transaction cleanup
+ - Btrfs: fix btrfs_wait_ordered_range() so that it waits for all ordered extents
+ - scsi: Revert "RDMA/isert: Fix a recently introduced regression related to logout"
+ - scsi: Revert "target: iscsi: Wait for all commands to finish before freeing a session"
+ - usb: gadget: composite: Fix bMaxPower for SuperSpeedPlus
+ - staging: rtl8723bs: fix copy of overlapping memory
+ - staging: greybus: use after free in gb_audio_manager_remove_all()
+ - ecryptfs: replace BUG_ON with error handling code
+ - iommu/vt-d: Fix compile warning from intel-svm.h
+ - genirq/proc: Reject invalid affinity masks (again)
+ - ALSA: rawmidi: Avoid bit fields for state flags
+ - ALSA: seq: Avoid concurrent access to queue flags
+ - ALSA: seq: Fix concurrent access to queue current tick/time
+ - netfilter: xt_hashlimit: limit the max size of hashtable
+ - ata: ahci: Add shutdown to freeze hardware resources of ahci
+ - xen: Enable interrupts when calling _cond_resched()
+ - s390/mm: Explicitly compare PAGE_DEFAULT_KEY against zero in storage_key_init_range
+ - arm: dts: allwinner: H3: Add PMU node
+ - ARM: dts: imx6: rdu2: Limit USBH1 to Full Speed
+ - PCI: iproc: Apply quirk_paxe_bridge() for module as well as built-in
+ - media: cx23885: Add support for AVerMedia CE310B
+ - staging: rtl8188: avoid excessive stack usage
+ - x86/nmi: Remove irq_work from the long duration NMI handler
+ visorbus: fix uninitialized variable access
+ - drm/nouvea/drm/tnm: Remove set but not used variable ‘mem’
+ - t2fs: set I_LINKABLE early to avoid wrong access by vfs
+ - s390: adjust -mpacked-stack support check for clang 10
+ - drm/nouvea/mmnu: fix comttag memory leak
+
+ * Multiple Kexec in AWS Nitro instances fail (LP: #1869948)
+ - net: ena: Add PCI shutdown handler to allow safe kexec
+
+ * Support SMO8840 as LIS2DH12 (LP: #1869694)
+ - iio: st_sensors: remap SMO8840 to LIS2DH12
+
+ * CVE-2019-19768
+ - blktrace: Protect q->blk_trace with RCU
+ - blktrace: fix dereference after null check
+
+ * No audio output from Dell WD19 HDMI/DP after resumed from S3 or s2idle
+ (LP: #1869642)
+ - PM / runtime: Rework pm_runtime_force_suspend/resume()
+
+ * reuseport_bpf_numa in net from ubuntu_kernel_selftests failed on i386
+ (LP: #1812638)
+ - selftests: net: reuseport_bpf_numa: don't fail if no numa support
+
+ * Sys oopsed with sysfs test in ubuntu_stress_smoke_test on X-hwe ARM64
+ (LP: #1866772)
+ - SAUCE: ACPI: sysfs: copy ACPI data using io memory copying
+
+ * update-version-dkms doesn't add a BugLink (LP: #1867790)
+ - [Packaging] Add BugLink to update-version-dkms commit
+
+ * Packaging resync (LP: #1786013)
+ - update dkms package versions

+ 
+ * Bionic update: upstream stable patchset 2020-03-12 (LP: #1867194)
+ 
+ - RDMA/core: Fix locking in ib_uverbs_event_read
+ 
+ - gpio: zynq: Report gpio direction at boot
+ 
+ - arm64: ptrace: nolpsimd: Fail FP/SIMD regset operations
+ 
+ - KVM: arm: Fix DFSR setting for non-LPAE aarch32 guests
+ 
+ - KVM: arm: Make inject_abt32() inject an external abort instead
+ 
+ - mtd: onenand_base: Adjust indentation in onenand_read_ops_nolock
+ 
+ - mtd: sharpslpart: Fix unsigned comparison to zero
+ 
+ -- Input: synaptics - switch T470s to RM14 by default
+ 
+ -- Input: synaptics - enable SMBus on ThinkPad L470
+ 
+ -- Input: synaptics - remove the LEN0049 dmi id from topbuttonpad list
+ 
+ - ALSA: hda/realtek - Fix silent output on MSI-GL73
+ 
+ - ALSA: usb-audio: Apply sample rate quirk for Audioengine D1
- arm64: cpufeature: Set the FP/SIMD compat HWCAP bits properly
- ALSA: usb-audio: sound: usb: usb true/false for bool return type
- ext4: don't assume that mmp_nodename/bdevname have NUL
- ext4: fix support for inode sizes > 1024 bytes
- ext4: fix checksum errors with indexed dirs
- ext4: add cond_resched() to ext4_protect_reserved_inode
- ext4: improve explanation of a mount failure caused by a misconfigured
  kernel
- Btrfs: fix race between using extent maps and merging them
- btrfs: ref-verify: fix memory leaks
- btrfs: print message when tree-log replay starts
- btrfs: log message when rw remount is attempted with unclean tree-log
- arm64: ssbs: Fix context-switch when SSBS is present on all CPUs
- perf/x86/amd: Add missing L2 misses event spec to AMD Family 17h's event map
- IB/hfi1: Close window for pq and request coliding
- IB/rdmavt: Reset all QPs when the device is shut down
- RDMA/rxe: Fix soft lockup problem due to using tasklets in softirq
- RDMA/core: Fix protection fault in get_pkey_idx_qp_list
- s390/time: Fix clk type in get_tod_clock
- perf/x86/intel: Fix inaccurate period in context switch for auto-reload
- hwmon: (pmbus/ltc2978) Fix PMBus polling of MFR_COMMON definitions.
- jbd2: move the clearing of b_modified flag to the journal_unmap_buffer()
- jbd2: do not clear the BH_Mapped flag when forgetting a metadata buffer
- KVM: x86/mmu: Fix struct guest_walker arrays for 5-level paging

* Bionic update: upstream stable patchset 2020-03-09 (LP: #1866678)
- kernel/module: Fix memleak in module_add_modinfo_attrs()
- media: iguanair: fix endpoint sanity check
- x86/cpu: Update cached HLE state on write to TSX_CTRL_CPUID_CLEAR
- iwlwifi: mvm: fix NVM check for 3168 devices
- sparc32: fix struct ipc64_perm type definition
- cls_rsvp: fix rsvp_policy
- gtp: use __GFP_NOWARN to avoid memalloc warning
- 12tp: Allow duplicate session creation with UDP
- net: hsr: fix possible NULL deref in hsr_handle_frame()
- net_sched: fix an OOB access in cls_tcindex
- bnxtn_en: Fix TC queue mapping.
- tcp: clear tp->total_retrans in tcp_disconnect()
- tcp: clear tp->delivered in tcp_disconnect()
- tcp: clear tp->data_segs{in|out} in tcp_disconnect()
- tcp: clear tp->segs_{in|out} in tcp_disconnect()
- rxrpc: Fix insufficient receive notification generation
- rxrpc: Fix NULL pointer deref due to call->conn being cleared on disconnect
- media: uvcvideo: Avoid cyclic entity chains due to malformed USB descriptors
- mfd: dl1n2: More sanity checking for endpoints
- tracing: Fix sched switch start/stop refcount racy updates
- brcmfmac: Fix memory leak in brcmf_usbdev_qinit
- usb: gadget: legacy: set max_speed to super-speed
+ - usb: gadget: f_ncm: Use atomic_t to track in-flight request
+ - usb: gadget: f_eem: Use atomic_t to track in-flight request
+ - ALSA: dummy: Fix PCM format loop in proc output
+ - media/v4l2-core: set pages dirty upon releasing DMA buffers
+ - media: v4l2-rect.h: fix v4l2_rect_map_inside() top/left adjustments
+ - lib/test_kasan.c: fix memory leak in kmalloc_oob_krealloc_more()
+ - irqdomain: Fix a memory leak in irq_domain_push_irq()
+ - platform/x86: intel_scu_ipc: Fix interrupt support
+ - KVM: arm64: Only sign-extend MMIO up to register width
+ - MIPS: fix indentation of the 'RELOCS' message
+ - s390/mm: fix dynamic pagetable upgrade for hugetlbfs
+ - powerpc/xmon: don't access ASDR in VMs
+ - powerpc/pseries: Advance pfns if section is not present in lmb_is_removable()
+ - mmc: spi: Toggle SPI polarity, do not hardcode it
+ - ACPI: video: Do not export a non working backlight interface on MSI MS-7721 boards
+ - alarntimer: Unregister wakeup source when module get fails
+ - ubifs: Reject unsupported ioctl flags explicitly
+ - ubifs: Fix FS_IOC_SETFLAGS unexpectedly clearing encrypt flag
+ - ubifs: Fix deadlock in concurrent bulk-read and writepage
+ - PCI: keystone: Fix link training retries initiation
+ - mmc: sdhci-of-at91: fix memleak on clk_get failure
+ - ubifs: don't trigger assertion on invalid no-key filename
+ - hv_balloon: Balloon up according to request page number
+ - crypto: api - Check spawn->alg under lock in crypto_drop_spawn
+ - scsi: qla2xxx: Fix mtcp dump collection failure
+ - power: supply: ltc2941-battery-gauge: fix use-after-free
+ - f2fs: choose hardlimit when softlimit is larger than hardlimit in
+ - f2fs_statfs_project()
+ - f2fs: fix miscounted block limit in f2fs_statfs_project()
+ - f2fs: code cleanup for f2fs_statfs_project()
+ - PM: core: Fix handling of devices deleted during system-wide resume
+ - [Config] updateconfig for CONFIG_OF_DMA_DEFAULT_COHERENT
+ - of: Add OF_DMA_DEFAULT_COHERENT & select it on powerpc
+ - dm zoned: support zone sizes smaller than 128MiB
+ - dm space map common: fix to ensure new block isn't already in use
+ - dm crypt: fix benbi IV constructor crash if used in authenticated mode
+ - tracing: Annotate ftrace_graph_hash pointer with __rcu
+ - tracing: Annotate ftrace_graph_notrace_hash pointer with __rcu
+ - ftrace: Add comment to why rcu_dereference_sched() is open coded
+ - ftrace: Protect ftrace_graph_hash with ftrace_sync
+ - samples/bpf: Don't try to remove user's homedir on clean
+ - crypto: cep - set max RSA modulus size for v3 platform devices as well
+ - crypto: pcrypt - Do not clear MAY_SLEEP flag in original request
+ - crypto: atmel-aes - Fix counter overflow in CTR mode
+ - crypto: api - Fix race condition in crypto_spawn_alg
+ - crypto: picoxcell - adjust the position of tasklet_init and fix missed
+ - tasklet_kill
+ - scsi: qla2xxx: Fix unbound NVME response length
+ - NFS: Fix memory leaks and corruption in readdir
+ - btrfs: set trans->drity in btrfs_commit_transaction
+ - ARM: tegra: Enable PLLP bypass during Tegra124 LP1
+ - iwlfwifi: don't throw error when trying to remove IGTK
+ - mwifiex: fix unbalanced locking in mwifiex_process_country_ie()
+ - sunrpc: expiry_time should be seconds not timeval
+ - tools/kvm_stat: Fix kvm_exit filter name
+ - xen/balloon: Support xen-based toolstack take two
+ - KVM: x86: Refactor picdev_write() to prevent Spectre-v1/L1TF attacks
+ - KVM: x86: Refactor prefix decoding to prevent Spectre-v1/L1TF attacks
+ - KVM: x86: Protect DR-based index computations from Spectre-v1/L1TF attacks
+ - KVM: x86: Protect kvm_lapic_reg_write() from Spectre-v1/L1TF attacks
+ - KVM: x86: Protect kvm Hv_Msr_[get/set]_crash_data() from Spectre-v1/L1TF
  + attacks
+ - KVM: x86: Protect ioapic_write_indirect() from Spectre-v1/L1TF attacks
+ - KVM: x86: Protect MSR-based index computations in pmu.h from Spectre-v1/L1TF
  + attacks
+ - KVM: x86: Protect ioapic_read_indirect() from Spectre-v1/L1TF attacks
+ - KVM: x86: Protect MSR-based index computations from Spectre-v1/L1TF attacks
  in x86.c
+ - KVM: x86: Protect x86_decode_insn from Spectre-v1/L1TF attacks
+ - KVM: x86: Protect MSR-based index computations in fixed_msr_to_seg_unit()
  from Spectre-v1/L1TF attacks
+ - KVM: PPC: Book3S HV: Uninit vCPU if vcore creation fails
+ - KVM: PPC: Book3S PR: Free shared page if mmu initialization fails
+ - KVM: x86: Free wbinvd_dirty_mask if vCPU creation fails
+ - clk: tegra: Mark fuse clock as critical
+ - scsi: qla2xxx: Fix the endianness of the qla82xx_get_fw_size() return type
+ - scsi: csiostor: Adjust indentation in csio_device_reset
+ - scsi: qla4xxx: Adjust indentation in qla4xxx_mem_free
+ - scsi: ufs: Recheck bkops level if bkops is disabled
+ - phy: qualcomm: Adjust indentation in read_poll_timeout
+ - ext2: Adjust indentation in ext2_fill_super
+ - powerpc/44x: Adjust indentation in ibm4xx_denali_fixup_memszie
+ - NFC: pn544: Adjust indentation in pn544_hci_check_presence
+ - ppp: Adjust indentation into ppp_async_input
+ - net: smc911x: Adjust indentation in smc911x_phy_configure
+ - net: tulip: Adjust indentation in {dmfe, uli526x}.init_module
+ - IB/mlx5: Fix outstanding_pi index for GSI qps
+ - IB/core: Fix ODP get user pages flow
+ - nfsd: fix delay timer on 32-bit architectures
+ - nfsd: fix jiffies/time_t mixup in LRU list
+ - ubi: fastmap: Fix inverted logic in seen selfcheck
+ - ubi: Fix an error pointer dereference in error handling code
+ - mfd: da9062: Fix watchdog compatible string
+ - mfd: m51618: Mark ADC control register volatile
+ - net: bcm_sf2: Only 7278 supports 2Gb/sec IMP port
+ - net_sched: fix a resource leak in tcindex_set_parms()
+ - net: systemport: Avoid RBUF stuck in Wake-on-LAN mode
+ - net: macb: Remove unnecessary alignment check for TSO
+ - net: macb: Limit maximum GEM TX length in TSO
+ - bonding/alb: properly access headers in bond_alb_xmit()
+ - ext4: fix deadlock allocating crypto bounce page from mempool
+ - btrfs: Get rid of the confusing btrfs_file_extent_inline_len
+ - Btrfs: Use bool argument in free_root_pointers()
+ - btrfs: free block groups after free'ing fs trees
+ - Btrfs: remove trivial locking wrappers of tree mod log
+ - Btrfs: fix race between adding and putting tree mod seq elements and nodes
+ - drm: atmel-hlcdc: enable clock before configuring timing engine
+ - KVM: x86: Protect pmu_intel.c from Spectre-v1/L1TF attacks
+ - btrfs: flush write bio if we loop in extent_write_cache_pages
+ - KVM: x86: Fix potential put_fpu() w/o load_fpu() on MPX platform
+ - KVM: x86/mmu: Apply max PA check for MMIO sptes to 32-bit KVM
+ - KVM: nVMX: vmread should not set rflags to specify success in case of #PF
+ - KVM: Use vcpu-specific gva->hva translation when querying host page size
+ - KVM: Play nice with read-only memslots when querying host page size
+ - KVM: s390: do not clobber registers during guest reset/store status
+ - cifs: fail i/o on soft mounts if sessionsetup errors out
+ - clocksource: Prevent double add_timer_on() for watchdog_timer
+ - perf/core: Fix mlock accounting in perf_mmap()
+ - rxrpc: Fix service call disconnection
+ - ASoC: pcm: update FE/BE trigger order based on the command
+ - hv_sock: Remove the accept port restriction
+ - RDMA/netlink: Do not always generate an ACK for some netlink operations
+ - scsi: ufs: Fix ufshcd_probe_hba() return value in case ufshcd_scsi_add_wlus() fails
+ - PCI/switchtec: Fix vep_vector_number ioread width
+ - PCI: Don't disable bridge BARs when assigning bus resources
+ - nfs: NFS_SWAP should depend on SWAP
+ - NFS/pnfs: Fix pnfs_generic_prepare_to_resend_writes()
+ - NFSv4: try lease recovery on NFS4ERR_EXPIRED
+ - serial: uartps: Add a timeout to the tx empty wait
+ - rtc: hym8563: Return -EINVAL if the time is known to be invalid
+ - rtc: cmos: Stop using shared IRQ
+ - ARC: [plat-axs10x]: Add missing multicast filter number to GMAC node
+ - platform/x86: intel_mid_powerbtn: Take a copy of ddata
+ - ARM: dts: at91: sama5d3: fix maximum peripheral clock rates
+ - ARM: dts: at91: sama5d3: define clock rate range for tcb1
+ - tools/power/acpi: fix compilation error
+ - powerpc/series/vio: Fix iommu_table use-after-free refcount warning
+ - powerpc/series: Allow not having ibm, hypersas-functions::hcalt-multi-tec
+ - DDW
+ - KVM: arm/arm64: vgie-its: Fix restoration of unmapped collections
+ ARM: 8949/1: mm: mark free_memmap as __init
+ arm64: cpufeature: Fix the type of no FP/SIMD capability
+ KVM: arm/arm64: Fix young bit from mmu notifier
+ crypto: aropec6 - return correct error code for failed setkey()
+ crypto: atmel-sha - fix error handling when setting hmac key
+ media: i2c: adv748x: Fix unsafe macros
+ pinctrl: sh-pfc: r8a7778: Fix duplicate SDSELF_B and SD1_CLK_B
+ scsi: megaraid_sas: Do not initiate OCR if controller is not in ready state
+ serial: uartps: Move the spinlock after the read of the tx empty
+ mwifiex: Fix possible buffer overflows in mwifiex_ret_wmm_get_status()
+ mwifiex: Fix possible buffer overflows in mwifiex_cmd_append_vsie_tlv()
+ libertas: don't exit from lbs_ibss_join_existing() with RCU read lock held
+ libertas: make lbs_ibss_join_existing() return error code on rates overflow
+ udf: Allow writing to 'Rewritable' partitions
+ printk: fix exclusive_console replaying
+ usb: typec: tcpci: mask event interrupts when remove driver
+ ALSA: hda: Add Clevo W65_67SB the power_save blacklist
+ KVM: arm/arm64: Correct AArch32 SPSR on exception entry
+ crypto: geode-aes - convert to skcipher API and make thread-safe
+ mfd: axp20x: Mark AXP20X_VBUS_IPSOUT_MGMT as volatile
+ scripts/find-unused-docs: Fix massive false positives
+ padata: Remove broken queue flushing
+ jbd2_seq_info_next should increase position index
+ watchdog: fix UAF in reboot notifier handling in watchdog core code
+ bcache: add readahead cache policy options via sysfs interface
+ eventfd: track eventfd_signal() recursion depth
+ x86/kvm: Be careful not to clear KVM_VCPU_FLUSH_TLB bit
+ dm: fix potential for q->make_request_fn NULL pointer
+ r8152 init may take up to 40 seconds at initialization with Dell WD19/WD19DC
+ during hotplug (LP: #1864284)
+ UBUNTU SAUCE: r8152: check disconnect status after long sleep
+ * The voice recording function cannot work while connecting a headset on a Dell machine (LP: #1866581)
+ SAUCE: ALSA: hda/realtek - Add Headset Mic supported
+ * xfs fill_fs test in fallocate06 from ubuntu_ltp_syscalls failed

+ - seq_tab_next() should increase position index
+ - l2t_seq_next should increase position index
+ - net: Fix skb->csum update in inet_proto_csum_replace16().
+ - btrfs: do not zero f_bavail if we have available space
+ - perf report: Fix no libunwind compiled warning break s390 issue
+ - iio: st_gyro: Correct data for LSM9DS0 gyro
+ - net_sched: fix ops->bind_class() implementations
+ - HID: Add quirk for Xin-Mo Dual Controller
+ - HID: Add quirk for incorrect input length on Lenovo Y720
+ - phy: qcom-gmp: Increase PHY ready timeout
+ - platform/x86: dell-laptop: disable kbd backlight on Inspiron 10xx
+ - sched/fair: Add tmp_alone_branch assertion
+ - sched/fair: Fix insertion in rq->leaf_cfs_rq_list
+ - random: try to actively add entropy rather than passively wait for it
+ - block: cleanup __blkdev_issue_discard()
+ - block: fix 32 bit overflow in __blkdev_issue_discard()
+ - media: vp7045: do not read uninitialized values if usb transfer fails
+ - tomoyo: Use atomic_t for statistics counter
+ - tools lib traceevent: Fix memory leakage in filter_event
+ - parisc: Use proper printk format for resource_size_t
+ - riscv: delete temporary files
+ - ARM: dts: am43x-epos-evm: set data pin directions for spi0 and spi1
+ * Bionic update: upstream stable patchset 2020-02-21 (LP: #1864261)
+ - firestream: fix memory leaks
+ - gtp: make sure only SOCK_DGRAM UDP sockets are accepted
+ - ipv6: sr: remove SKB_GSO_IPXIP6 on End.D* actions
+ - net: cxgb3_main: Add CAP_NET_ADMIN check to CHELSIO_GET_MEM
+ - net, ip6_tunnel: fix namespaces move
+ - net, ip_tunnel: fix namespaces move
+ - net_sched: fix datalen for ematch
+ - net/sysfs: Fix reference count leak in rxnetdev_queue_add_kobject
+ - net/sysfs: fix netdev_queue_add_kobject() breakage
+ - net/sysfs: Call dev_hold always in netdev_queue_add_kobject
+ - net/sysfs: Call dev_hold always in rx_queue_add_kobject
+ - net/sysfs: Fix reference count leak
+ - net: usb: lan78xx: Add .ndo_features_check
+ - tcp_bbr: improve arithmetic division in bbr_update_bw()
+ - net: rtntnelink: validate IFLA_MTU attribute in rtnl_create_link()
+ - hwmon: (adt7475) Make volt2reg return same reg as reg2volt input
+ - hwmon: (core) Do not use device managed functions for memory allocations
+ - Input: keystpan-remote - fix control-message timeouts
+ - Revert "Input: synaptics-rmi4 - don't increment rmiaddr for SMBus transfers"
+ - ARM: 8950/1: ftrace/recordmcount: filter relocation types
+ - mmc: tegra: fix SDR50 tuning override
+ - mmc: sdhci: fix minimum clock rate for v3 controller
+ - Documentation: Document arm64 kpti control
+ - Input: pm8xxx-vib - fix handling of separate enable register
+ - Input: sur40 - fix interface sanity checks
+ - Input: gto - fix endpoint sanity check
+ - Input: aiptek - fix endpoint sanity check
+ - Input: pegasus_notetaker - fix endpoint sanity check
+ - Input: sun4i-tis - add a check for devm_thermal_zone_of_sensor_register
+ - hwmon: (nct7802) Fix voltage limits to wrong registers
+ - scsi: RDMA/isert: Fix a recently introduced regression related to logout
+ - tracing: xen: Ordered comparison of function pointers
+ - do_last(): fetch directory ->i_mode and ->i_uid before it's too late
+ - sd: Fix REQ_OP_ZONE_REPORT completion handling
+ - coresight: etb10: Do not call smp_processor_id from preemptible
+ - coresight: tmc-etf: Do not call smp_processor_id from preemptible
+ - libertas: Fix two buffer overflows at parsing bss descriptor
+ - media: v4l2-ioctl.c: zero reserved fields for S/TRY_FMT
+ - scsi: iscsi: Avoid potential deadlock in iscsi_if_rx func
+ - md: Avoid namespace collision with bitmap API
+ - bitmap: Add bitmap_alloc(), bitmap_zalloc() and bitmap_free()
+ - netfilter: ipset: use bitmap infrastructure completely
+ - net/x25: fix nonblocking connect
+ - net: bcmgenet: Use netif_rx_napi_add() for TX NAPI
+ - Revert "udp: do rmem bulk free even if the rx sk queue is empty"
+ - tcp: do not leave dangling pointers in tp->highest_sack
+ - tun: add mutex_unlock() call and napi_skb clearing in tun_get_user()
+ - PCI: Mark AMD Navi14 GPU rev 0xc5 ATS as broken
+ - net/sonic: Add mutual exclusion for accessing shared state
+ - net/sonic: Clear interrupt flags immediately
+ - net/sonic: Use MMIO accessors
+ - net/sonic: Fix interface error stats collection
+ - net/sonic: Fix receive buffer handling
+ - net/sonic: Avoid needless receive descriptor EOL flag updates
+ - net/sonic: Improve receive descriptor status flag check
+ - net/sonic: Fix receive buffer replenishment
+ - net/sonic: Quiesce SONIC before re-initializing descriptor memory
+ - net/sonic: Fix command register usage
+ - net/sonic: Fix CAM initialization
+ - net/sonic: Prevent tx watchdog timeout
+ - crypto: geode-aes - switch to scikipher for cbc(aes) fallback
+ - mm, sparse: drop pgdat_resize_lock in sparse_add/remove_one_section()
+ - drivers/base/memory.c: remove an unnecessary check on NR_MEM SECTIONS
+ - drivers/base/memory.c: clean up relics in function parameters
+ - mm, memory_hotplug: update a comment in unregister_memory()
+ - drivers/base/memory: pass a block_id to init_memory_block()
+ 
+ - Miscellaneous Ubuntu changes
+ - update dkms package versions

Open Source Used in 5GaaS Edge AC-4 12965
+linux (4.15.0-89.89) bionic; urgency=medium
+  * bionic/linux: 4.15.0-89.89 -proposed tracker (LP: #1863350)
+  * [SRU][BI/OEM-B] Fix multitouch support on some devices (LP: #1862567)
+    - HID: core: move the dynamic quirks handling in core
+    - HID: quirks: move the list of special devices into a quirk
+    - HID: core: move the list of ignored devices in hid-quirks.c
+    - HID: core: remove the absolute need of hid_have_special_driver[]
+  * [linux] Patch to prevent possible data corruption (LP: #1848739)
+    - blk-mq: silence false positive warnings in hctx_unlock()
+  * Add bpftool to linux-tools-common (LP: #1774815)
+    - tools/bpftool: fix bpftool build with bintutils >= 2.9
+    - bpftool: make libbfd optional
+    - [Debian] Remove binutils-dev build dependency
+    - [Debian] package bpftool in linux-tools-common
+  * Root can lift kernel lockdown via USB/IP (LP: #1861238)
+    - Revert "UBUNTU: SAUCE: (efi-lockdown) Add a SysRq option to lift kernel
down"
+  * [Bionic] i915 incomplete fix for CVE-2019-14615 (LP: #1862840) //
+    - CVE-2020-8832
+    - drm/i915: Use same test for eviction and submitting kernel context
+    - drm/i915: Define an engine class enum for the uABI
+    - drm/i915: Force the switch to the i915->kernel_context
+    - drm/i915: Move GT powersaving init to i915_gem_init()
+    - drm/i915: Move intel_init_clock_gating() to i915_gem_init()
+    - drm/i915: Inline intel_modeset_gem_init()
+    - drm/i915: Mark the context state as dirty/written
+    - drm/i915: Record the default hw state after reset upon load
+  * Bionic update: upstream stable patchset 2020-02-12 (LP: #1863019)
+    - xfs: Sanity check flags of Q_XQUOTARM call
+    - mfd: intel-lpss: Add default I2C device properties for Gemini Lake
+    - powerpc/achrandom: fix arch_get_random_seed_int()
+    - tipc: fix wrong timeout input for tipc_wait_for_cond()
+    - mt7601u: fix bbp version check in mt7601u_wait_bbp_ready
+    - crypto: sun4i-ss - fix big endian issues
+    - drm/sti: do not remove the drm_bridge that was never added
+    - drm/virtio: fix bounds check in virtio_gpu_cmd_get_capset()
+    - ALSA: hda: fix unused variable warning
+    - apparmor: don't try to replace stale label in ptrace access check
+    - PCI: iproc: Remove PAXC slot check to allow VF support
+    - drm/hisilicon: hibmc: Don't overwrite fb helper surface depth
+    - IB/rxe: replace kvfree with vfree
+  - IB/hfi1: Add mtu check for operational data VLs
+  - ALSA: usb-audio: update quirk for B&W PX to remove microphone
+  - staging: comedi: ni_mio_common: protect register write overflow
+  - pwn: 1pps: Release runtime-pm reference from the driver's remove callback
+  - drm/sun4i: hdmi: Fix double flag assignation
+  - mlxsw: reg: QEEC: Add minimum shaper fields
+  - NTB: ntbl_hw_idt: replace IS_ERR_OR_NULL with regular NULL checks
+  - pcrypt: use format specifier in kobject_add
+  - exports: fix 'passing zero to ERR_PTR()' warning
+  - drm/dp_mst: Skip validating ports during destruction, just ref
+  - net: phy: Fix not to call phy_resume() if PHY is not attached
+  - IB/rxe: Fix incorrect cache cleanup in error flow
+  - staging: bcm2835-camera: Abort probe if there is no camera
+  - switchtec: Remove immediate status check after submitting MRPC command
+  - pinctrl: sh-pfc: r8a7740: Add missing REF125CK pin to gether_gmii group
+  - pinctrl: sh-pfc: r8a7740: Add missing LCD0 marks to lcd0_data24_1 group
+  - pinctrl: sh-pfc: r8a7791: Remove bogus ctrl marks from qspi_data4_b group
+  - pinctrl: sh-pfc: r8a7791: Remove bogus marks from vin1_b_data18 group
+  - pinctrl: sh-pfc: sh73a0: Add missing TO pin to tpu4_to3 group
+  - pinctrl: sh-pfc: r8a7794: Remove bogus IPSR9 field
+  - pinctrl: sh-pfc: sh7734: Add missing IPSR11 field
+  - pinctrl: sh-pfc: r8a77995: Remove bogus SEL_PWM[0-3]_3 configurations
+  - pinctrl: sh-pfc: sh7269: Add missing PCIOR0 field
+  - pinctrl: sh-pfc: sh7734: Remove bogus IPSR10 value
+  - vxlan: changelink: Fix handling of default remotes
+  - Input: nomadik-ske-keypad - fix a loop timeout test
+  - clk: highbank: fix refcount leak in hb_clk_init()
+  - clk: qoriq: fix refcount leak in clockgen_init()
+  - clk: socfpga: fix refcount leak
+  - clk: samsung: exynos4: fix refcount leak in exynos4_get_xom()n
+  - clk: imx6q: fix refcount leak in imx6q_clocks_init()n
+  - clk: imx6sx: fix refcount leak in imx6sx_clocks_init()
+  - clk: imx7d: fix refcount leak in imx7d_clocks_init()
+  - clk: vf610: fix refcount leak in vf610_clocks_init()
+  - clk: armada-370: fix refcount leak in a370_clk_init()
+  - clk: kirkwood: fix refcount leak in kirkwood_clk_init()
+  - clk: armada-xp: fix refcount leak in axp_clk_init()
+  - clk: mv98dx3236: fix refcount leak in mv98dx3236_clk_init()
+  - clk: dove: fix refcount leak in dove_clk_init()
+  - MIPS: BCM63XX: drop unused and broken DSP platform device
+  - IB/usnic: Fix out of bounds index check in query pkey
+  - RDMA/ocrdma: Fix out of bounds index check in query pkey
+  - RDMA/qedr: Fix out of bounds index check in query pkey
+  - drm/shmob: Fix return value check in shmob_drn_probe
+  - arm64: dts: qpt016-sbc: Increase load on 111 for SDCARD
+  - spi: cadence: Correct initialisation of runtime PM
+  - RDMA/iw_cxgb4: Fix the unchecked ep dereference
+  - drm/etnaviv: NULL vs IS_ERR() but in etnaviv_core_dump()
+ - media: s5p-jpeg: Correct step and max values for
+ V4L2_CID_JPEG_RESTART_INTERVAL
+ - kbuild: mark prepare0 as PHONY to fix external module build
+ - crypto: bcm - Fix some set-but-not-used warning
+ - crypto: tgr192 - fix unaligned memory access
+ - ASoC: imx-sgtl5000: put of nodes if finding codec fails
+ - IB/iser: Pass the correct number of entries for dma mapped SGL
+ - rtc: cmos: ignore bogus century byte
+ - spi/topcliff_pch: Fix potential NULL dereference on allocation error
+ - clk: sunxi-ng: sun8i-a23: Enable PLL-MIPI LDOs when ungating it
+ - iwlwifi: mvm: avoid possible access out of array.
+ - net/mlx5: Take lock with IRQs disabled to avoid deadlock
+ - iwlwifi: mvm: fix A-MPDU reference assignment
+ - tty: ipwireless: Fix potential NULL pointer dereference
+ - driver: uio: fix possible memory leak in __uio_register_device
+ - driver: uio: fix possible use-after-free in __uio_register_device
+ - crypto: crypto4xx - Fix wrong ppc4xx_trng_probe()/ppc4xx_trng_remove() arguments
+ - driver core: Do not resume suppliers under device_links_write_lock()
+ - ARM: dts: lpc32xx: add required clocks property to keypad device node
+ - ARM: dts: lpc32xx: reparent keypad controller to SIC1
+ - ARM: dts: lpc32xx: fix ARM PrimeCell LCD controller variant
+ - ARM: dts: lpc32xx: fix ARM PrimeCell LCD controller clocks property
+ - ARM: dts: lpc32xx: phy3250: fix SD card regulator voltage
+ - iwlwifi: mvm: fix RSS config command
+ - staging: most: cdev: add missing check for cdev_add failure
+ - rtc: ds1672: fix unintended sign extension
+ - thermal: mediatek: fix register index error
+ - net: phy: fixed_phy: Fix fixed_phy not checking GPIO
+ - rtc: ds1307: rx8130: Fix alarm handling
+ - rtc: 88pm860x: fix unintended sign extension
+ - rtc: 88pm80x: fix unintended sign extension
+ - rtc: pm8xxx: fix unintended sign extension
+ - fbdev: chipsfb: remove set but not used variable 'size'
+ - iw_cxgb4: use tos when importing the endpoint
+ - iw_cxgb4: use tos when finding ipv6 routes
+ - drm/etnaviv: potential NULL dereference
+ - pinctrl: sh-pfc: emev2: Add missing pimmux functions
+ - pinctrl: sh-pfc: r8a7791: Fix scifb2_data_c pin group
+ - pinctrl: sh-pfc: r8a7792: Fix vin1_data18_b pin group
+ - pinctrl: sh-pfc: sh73a0: Fix fsic_spdif pin groups
+ - PCI: endpoint: functions: Use memcpy_fromio()/memcpy_toio()
+ - usb: phy: twi6030-usb: fix possible use-after-free on remove
+ - block: don't use bio->bi_vcnt to figure out segment number
+ - keys: Timestamp new keys
+ - vfio_pci: Enable memory accesses before calling pci_map_rom
+ - hwmon: (pmbus/tps53679) Fix driver info initialization in probe routine
+ - KVM: PPC: Release all hardware TCE tables attached to a group
+ - staging: r8822be: check kzalloc return or bail
+ - dmaengine: mv_xor: Use correct device for DMA API
+ - cdc-wdm: pass return value of recover_from_urb_loss
+ - regulator: pv88060: Fix array out-of-bounds access
+ - regulator: pv88080: Fix array out-of-bounds access
+ - regulator: pv88090: Fix array out-of-bounds access
+ - net: dsa: qca8k: Enable delay for RGMII_ID mode
+ - drm/nouveau/bios/ramcfg: fix missing parentheses when calculating RON
+ - drm/nouveau/pmu: don't print reply values if exec is false
+ - ASoC: qcom: Fix of-node refcount unbalance in apq8016_sbc_parse_of()
+ - fs/nfs: Fix nfs_parse_devname to not modify it's argument
+ - staging: rtlwifi: Use proper enum for return in hmac_parse_psd_data_88xx
+ - powerpc/64s: Fix logic when handling unknown CPU features
+ - NFS: Fix a soft lockup in the delegation recovery code
+ - clocksource/drivers/sun5i: Fail gracefully when clock rate is unavailable
+ - clocksource/drivers/exynos_mct: Fix error path in timer resources
+ - initialization
+ - platform/x86: wmi: fix potential null dereference
+ - NFS/pnfs: Bulk destroy of layouts needs to be safe w.r.t. umount
+ - mmc: sdhci-brcmstb: handle mmc_of_parse() errors during probe
+ - ARM: 8847/1: pm: fix HYP/SVC mode mismatch when MCPM is used
+ - ARM: 8848/1: virt: Align GIC version check with arm64 counterpart
+ - regulator: wm831x-dcdc: Fix list of wm831x_dcdc_ilim from mA to uA
+ - netfilter: nft_set_hash: fix lookups with fixed size hash on big endian
+ - NFSv4/flexfiles: Fix invalid deref in FF_LAYOUT_DEVID_NODE()
+ - net: aquantia: fixed instack structure overflow
+ - powerpc/mm: Check secondary hash page table
+ - nios2: ksymx: Add missing symbol exports
+ - x86/mm: Remove unused variable 'cpu'
+ - scsi: megaraid_sas: reduce module load time
+ - drivers/rapidio/rio_cm.c: fix potential oops in riocm_ch_listen()
+ - xen, cpu_hotplug: Prevent an out of bounds access
+ - net: sh_eth: fix a missing check of of_get_phy_mode
+ - regulator: lp87565: Fix missing register for LP87565_BUCK_0
+ - media: ivtv: update *pos correctly in ivtv_read_pos()
+ - media: cx18: update *pos correctly in cx18_read_pos()
+ - media: w1128x: Fix an error code in fm_download_firmware()
+ - media: cx23885: check allocation return
+ - regulator: tps65086: Fix tps65086_idoa1_ranges for selector 0xB
+ - jfs: fix bogus variable self-initialization
+ - tipc: tipc clang warning
+ - m68k: mac: Fix VIA timer counter accesses
+ - arm64: dts: allwinner: a64: Add missing PIO clocks
+ - ARM: OMAP2+: Fix potentially uninitialized return value for _setup_reset()
+ - media: davinci-isif: avoid uninitialized variable use
+ - media: tw5864: Fix possible NULL pointer dereference in tw5864_handle_frame
+ - spi: tegra114: clear packed bit for unpacked mode
+ - spi: tegra114: fix for unpacked mode transfers
+ - spi: tegra114: terminate dma and reset on transfer timeout
+ - spi: tegra114: flush fifos
+ - spi: tegra114: configure dma burst size to fifo trig level
+ - soc/fsl/qe: Fix an error code in qe_pin_request()
+ - spi: bcm2835aux: fix driver to not allow 65535 (=1) cs-gpios
+ - ehea: Fix a copy-paste err in ehea_init_port_res
+ - scsi: qla2xxx: Unregister chrdev if module initialization fails
+ - scsi: target/core: Fix a race condition in the LUN lookup code
+ - ARM: pxa: ssp: Fix "WARNING: invalid free of devm_allocated data"
+ - net: hns3: fix for vport->bw_limit overflow problem
+ - hwmon: (w83627hf) Use request_mixed_region for Super-IO accesses
+ - platform/x86: alienware-wmi: fix kfree on potentially uninitialized pointer
+ - tipc: set sysctl_tipc_rmem and named_timeout right range
+ - selftests/lpc: Fix msgque compiler warnings
+ - powerpc: vdo: Make vds032 installation conditional in vdso_install
+ - ARM: dts: ls1021: Fix SGMII PCS link remaining down after PHY disconnect
+ - media: ov2659: fix unbalanced mutex_lock/unlock
+ - lowpan: Off by one handling ->nexthdr
+ - dmaengine: axi-dmac: Don't check the number of frames for alignment
+ - ALSA: usb-audio: Handle the error from snd_usb.mixer_apply_create_quirk()
+ - NFS: Don't interrupt file writeout due to fatal errors
+ - irqchip/gic-v3-its: fix some definitions of inner cacheability attributes
+ - scsi: qla2xxx: Fix a format specifier
+ - scsi: qla2xxx: Avoid that qlt_send_resp_ctio() corrupts memory
+ - packet: in recvmmsg msg_name return at least sizeof sockaddr_ll
+ - ASoC: fix valid stream condition
+ - usb: gadget: fsl: fix link error against usb-gadget module
+ - dwc2: gadget: Fix completed transfer size calculation in DDMA
+ - IB/mlx5: Add missing XRC options to QP optional params mask
+ - jommu/vt-d: Make kernel parameter igfx_off work with vOMMU
+ - dmaengine: tegra210-adma: restore channel status
+ - mmc: core: fix possible use after free of host
+ - lightnvm: pblk: fix lock order in pblk_rb_tear_down_check
+ - afs: Fix the afs.cell and afs.volume xattr handlers
+ - vfio/mdev: Avoid release parent reference during error path
+ - vfio/mdev: Fix aborting mdev child device removal if one fails
+ - I2tp: Fix possible NULL pointer dereference
+ - media: omap_vout: potential buffer overflow in videoic_dqbuf()
+ - media: davinci/vpbe: array underflow in vpbe_enum_outputs()
+ - platform/x86: alienware-wmi: printing the wrong error code
+ - crypto: caam - fix caam_dump_sg that iterates through scatterlist
+ - netfilter: ebtables: CONFIG_COMPAT: reject trailing data after last rule
+ - pwm: meson: Consider 128 a valid pre-divider
+ - pwm: meson: Don't disable PWM when setting duty repeatedly
+ - ARM: rispc: fix lack of keyboard interrupts after irq conversion
+ - kdb: do a sanity check on the cpu in kdb_per_cpu()
+ - backlight: lm3630a: Return 0 on success in update_status functions
+ - thermal: cpu Cooling: Actually trace CPU load in thermal_power_cpu_get_power
+ EDAC/mc: Fix edac_mc_find() in case no device is found
+ ARM: dts: sun8i-h3: Fix wifi in Beelink X2 DT
+ dmaengine: tegra210-adma: Fix crash during probe
+ arm64: dts: meson: libretech-cc: set eMMC as removable
+ RDMA/qedr: Fix incorrect device rate.
+ spi: spi-fsl-spi: call spi_finalize_current_message() at the end
+ cryptp: ccp - fix AES CFB error exposed by new test vectors
+ cryptp: ccp - Fix 3DES complaint from ccp-crypto module
+ serial: stm32: fix rx error handling
+ serial: stm32: fix transmit_chars when tx is stopped
+ serial: stm32: Add support of TC bit status check
+ serial: stm32: fix wakeup source initialization
+ misc: sgi-xp: Properly initialize buf in xpc_get_rsvd_page_pa
+ iommu: Use right function to get group for device
+ signal/cifs: Fix cifs_put_tcp_session to call send_sig instead of force_sig
+ inet: frags: call inet_frags_fini() after unregister_pernet_subsys()
+ netvsc: unshare skb in VF rx handler
+ cpufreq: brcmstb-avs-cpufreq: Fix initial command check
+ cpufreq: brcmstb-avs-cpufreq: Fix types for voltage/frequency
+ media: vivid: fix incorrect assignment operation when setting video mode
+ mips: fix warning with multi-label encap
+ iommu/vt-d: Duplicate iommu_resv_region objects per device list
+ qed: iWARP - Use READ_ONCE and smp_store_release to access ep->state
+ powerpc/cacheinfo: add cacheinfo_teardown, cacheinfo_rebuild
+ powerpc/pseries/mobility: rebuild cacheinfo hierarchy post-migration
+ drm/msm/mdp5: Fix mdp5_cfg_init error return
+ net: netem: fix backlog accounting for corrupted GSO frames
+ net/af_iucv: always register net_device notifier
+ ASoC: ti: davinci-mcasp: Fix slot mask settings when using multiple AXRs
+ rtc: pcf8563: Fix interrupt trigger method
+ rtc: pcf8563: Clear event flags and disable interrupts before requesting irq
+ drm/msm/a3xx: remove TPL1 regs from snapshot
+ perf/ioct: Add check for the sample_period value
+ dmaengine: hsu: Revert "set HSU_CH_MTSR to memory width"
+ clk: qcom: Fix -Wunused-const-variable
+ nvme: imx-ocotp: Ensure WAIT bits are preserved when setting timing
+ bnxt_en: Fix ethtool selftest crash under error conditions.
+ iommu/amd: Make iommu_disable safer
+ mfd: intel-lpss: Release IDA resources
+ rxrpc: Fix uninitialized error code in rxrpc_send_data_packet()
+ devres: allow const resource arguments
+ net: pasemi: fix an use-after-free in pasemi_mac_phy_init()
+ ssci: libfcs: fix null pointer dereference on a null lport
+ clk: sunxi-ng: v3s: add the missing PLL_DDR1
+ PM: sleep: Fix possible overflow in pm_system_cancel_wakeup()
