+ * bionic/linux: 4.15.0-166.174 -proposed tracker (LP: #1953667)
+
+ * Ubuntu version macros overflow with high ABI numbers (LP: #1953522)
++ - SAUCE: Revert "stable: clamp SUBLEVEL in 4.14"
+
+ * test_bpf.sh test in net of ubuntu_kernel_selftests failed on B-4.15 and
++ variants (LP: #1953287)
++ - SAUCE: Revert "bpf: add also cbpf long jump test cases with heavy expansion"
+
+ * test_bpf.sh test in net of ubuntu_kernel_selftests failed on B-4.15 and
++ variants (LP: #1953287) // CVE-2018-25020
++ - bpf: fix truncated jump targets on heavy expansions
+
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Wed, 08 Dec 2021 18:15:03 +0100
+ linux (4.15.0-165.173) bionic; urgency=medium
+ * bionic/linux: 4.15.0-165.173 -proposed tracker (LP: #1952780)
+ * Support builtin revoked certificates (LP: #1932029)
  + - certs: Add EFI_CERT_X509_GUID support for dbx entries
  + - certs: Move load_system_certificate_list to a common function
  + - integrity: Move import of MokListRT certs to a separate routine
  + - integrity: Load certs from the EFI MOK config table
  + - certs: Add ability to preload revocation certs
  + - certs: add 'x509_revocation_list' to gitignore
  + - SAUCE: Dump stack when X.509 certificates cannot be loaded
  + - [Packaging] build canonical-revoked-certs.pem from branch/arch certs
  + - [Packaging] Revoke 2012 UEFI signing certificate as built-in
  + - [Config] Configure CONFIG_SYSTEM_REVOCATION_KEYS with revoked keys
+ * Support importing mokx keys into revocation list from the mok table
  + (LP: #1928679)
  + - efi: Support for MOK variable config table
  + - efi: mokvar-table: fix some issues in new code
  + - efi: mokvar: add missing include of asm/early_ioremap.h
  + - efi/mokvar: Reserve the table only if it is in boot services data
  + - SAUCE: integrity: Load mokx certs from the EFI MOK config table
  + - SAUCE: integrity: add informational messages when revoking certs
+ * CVE-2021-4002
  + - arm64: tlb: Provide forward declaration of tlb_flush() before including
  + tlb.h
  + - mm: mmu_notifier fix for tlb_end_vma
  + - hugetlbfs: flush TLBs correctly after huge_pmd_unshare
+ -- Kleber Sacilotto de Souza <kleber.souza@canonical.com> Tue, 30 Nov 2021 17:58:59 +0100
+ linux (4.15.0-164.172) bionic; urgency=medium
+ * bionic/linux: 4.15.0-164.172 -proposed tracker (LP: #1952348)
+ * Packaging resync (LP: #1786013)
  + - [Packaging] resync update-dkms-versions helper
  + - debian/dkms-versions -- update from kernel-versions (main/2021.11.29)
+ * Bionic update: upstream stable patchset 2021-11-23 (LP: #1951997)
  + - btrfs: always wait on ordered extents at fsync time
  + - ARM: dts: at91: sama5d2_som1_ek: disable ISC node by default
  + - xtensa: xtfpga: use CONFIG_USE_OF instead of CONFIG_OF
  + - xtensa: xtfpga: Try software restart before simulating CPU reset
  + - NFSD: Keep existing listeners on portlist error
+ - netfilter: ipvs: make global sysctl readonly in non-init netns
+ - NIOS2: irqflags: rename a redefined register name
+ - can: rcar_can: fix suspend/resume
+ - can: peak_usb: pcan_usb_fd_decode_status(): fix back to ERROR_ACTIVE state
+ - notification
+ - can: peak_pci: peak_pci_remove(): fix UAF
+ - ofcs2: fix data corruption after conversion from inline format
+ - ofcs2: mount fails with buffer overflow in strlen
+ - elfcore: correct reference to CONFIG_UML
+ - ALSA: usb-audio: Provide quirk for Sennheiser GSP670 Headset
+ - ASoC: DAPM: Fix missing kctl change notifications
+ - nfc: nci: fix the UAF of rf_conn_info object
+ - isdn: cpai: check ctr->cnr to avoid array index out of bound
+ - netfilter: Kconfig: use 'default y' instead of 'm' for bool config option
+ - btrfs: deal with errors when checking if a dir entry exists during log replay
+ - stmmac: add support for dwmac 3.40a
+ - ARM: dts: spear3xx: Fix gmac node
+ - isdn: mlISDN: Fix sleeping function called from invalid context
+ - platform/x86: intel_scu_ipc: Update timeout value in comment
+ - ALSA: hda: avoid write to STATETESTS if controller is in reset
+ - tracing: Have all levels of checks prevent recursion
+ - ARM: 9122/1: select HAVE_FUTEX_CMPXCHG
+ - dma-debug: fix sg checks in debug_dma_map_sg()
+ - ASoC: wm8960: Fix clock configuration on slave mode
+ - lan78xx: select CRC32
+ - hns3: add limit ets dwrr bandwidth cannot be 0
+ - hns3: disable srivoc before unload hclge layer
+ - ALSA: hda/realtek: Add quirk for Clevo PC50HS
+ - mm, slub: fix mismatch between reconstructed freelist depth and cnt
+ - gcc-plugins/structleak: add makefile var for disabling structleak
+ * creat09 from ubuntu_ltp_syscalls and cve-2018-13405 from ubuntu_ltp/cve failed with XFS (LP: #1950239)
+ - xfs: ensure that the inode uid/gid match values match the icdinode ones
+ - xfs: merge the projid fields in struct xfs_icdinode
+ - xfs: remove the icdinode di_uid/di_gid members
+ - xfs: fix up non-directory creation in SGID directories
+ * ubuntu_ltp / finit_module02 fails on v4.15 and other kernels (LP: #1950644)
+ - vfs: check fd has read access in kernel_read_file_from_fd()
+ * reuseport_bpf_numa in net from ubuntu_kernel_selftests fails on ppc64le (LP: #1867570)
+ - selftests/net: Fix reuseport_bpf_numa by skipping unavailable nodes
+ * Bionic update: upstream stable patchset 2021-11-12 (LP: #1950816)
+ - net: mdio: introduce a shutdown method to mdio device drivers
+ - xen-netback: correct success/error reporting for the SKB-with-fraglist case
+ - sparc64: fix pci_iounmap() when CONFIG_PCI is not set
+ - ext2: fix sleeping in atomic bugs on error
+ - scsi: sd: Free scsi_disk device via put_device()
+ - usb: testusb: Fix for showing the connection speed
+ - usb: dwc2: check return value after calling platform_get_resource()
+ - scsi: ses: Retry failed Send/Receive Diagnostic commands
+ - libata: Add ATA_HORKAGE_NO_NCQ_ON_ATI for Samsung 860 and 870 SSD.
+ - lib/timerqueue: Rely on rbtree semantics for next timer
+ - selftests: be sure to make khdr before other targets
+ - Partially revert "usb: Kconfig: using select for USB_COMMON dependency"
+ - USB: cdc-acm: fix racy tty buffer accesses
+ - USB: cdc-acm: fix break reporting
+ - ovl: fix missing negative dentry check in ovl_rename()
+ - nfsd4: Handle the NFSv4 READDIR 'dircount' hint being zero
+ - xen/balloon: fix cancelled balloon action
+ - ARM: dts: omap3430-sdp: Fix NAND device node
+ - ARM: dts: qcom: apq8064: use compatible which contains chipid
+ - bpf: add also cbpf long jump test cases with heavy expansion
+ - bpf, mips: Validate conditional branch offsets
+ - xtensa: call irqchip_init only when CONFIG_USE_OF is selected
+ - bpf: Fix integer overflow in prealloc_elems_and_freelist()
+ - phy: mdio: fix memory leak
+ - net_sched: use nla_total_size_64bit() in br_get_linkxstats_size()
+ - netlink: annotate data races around nlk->bound
+ - drm/nouveau/debugfs: fix file release memory leak
+ - rtnetlink: fix if_nlmsg_stats_size() under estimation
+ - i40e: fix endless loop under rtnl
+ - scsi: ses: Fix unsigned comparison with less than zero
+ - scsi: virtio_scsi: Fix spelling mistake "Unsupport" -> "Unsupported"
+ - perf/x86: Reset destroy callback on event init failure
+ - sched: Always inline is_percpu_thread()
+ - bpf, arm: Fix register clobbering in div/mod implementation
+ - i40e: Fix freeing of uninitialized misc IRQ vector
+ - mac80211: check return value of rhashtable_init
+ - stable: clamp SUBLEVEL in 4.14
+ - ALSA: seq: Fix a potential UAF by wrong private_free call order
+ - s390: fix strchr() implementation
+ - btrfs: deal with errors when replaying dir entry during log replay
+ - btrfs: deal with errors when adding inode reference during log replay
+ - btrfs: check for error when looking up inode during dir entry replay
+ - xhci: Fix command ring pointer corruption while aborting a command
+ - xhci: Enable trust tx length quirk for Fresco FL11 USB controller
+ - cb710: avoid NULL pointer subtraction
+ - efi/cper: use stack buffer for error record decoding
+ - efi: Change down_interruptible() in virt_efi_reset_system() to
down_trylock()
+ - usb: musb: dsps: Fix the probe error path
+ - Input: xpad - add support for another USB ID of Nacon GC-100
+ - USB: serial: qcserial: add EM9191 QDL support
+ - USB: serial: option: add Quectel EC200S-CN module support
+ - USB: serial: option: add Telit LE910Cx composition 0x1204
+ - USB: serial: option: add prod. id for Quectel EG91
+ - virtio: write back F_VERSION_1 before validate
+ - nvmem: Fix shift-out-of-bound (UBSAN) with byte size cells
+ - x86/Kconfig: Do not enable AMD_MEM_ENCRYPT_ACTIVE_BY_DEFAULT automatically
+ - iio: adc: aspeed: set driver data when adc probe.
+ - iio: adc128s052: Fix the error handling path of 'adc128_probe()' 
+ - iio: light: opt3001: Fixed timeout error when 0 lux 
+ - iio: ssp_sensors: add more range checking in ssp_parse_dataframe()
+ - iio: ssp_sensors: fix error code in ssp_print_mcu_debug()
+ - scrp: account stream padding length for reconf chunk
+ - net: arc: select CRC32
+ - net: korina: select CRC32
+ - net: enncx24j600: check error in devm_regmap_init_enncx24j600
+ - ethernet: s2io: fix setting mac address during resume 
+ - nfc: fix error handling of nfc_proto_register()
+ - NFC: digital: fix possible memory leak in digital_tg_listen_mdaa()
+ - NFC: digital: fix possible memory leak in digital_in_send_sdd_req()
+ - pata_legacy: fix a couple uninitialized variable bugs
+ - drm/msm: Fix null pointer dereference on pointer edp
+ - drm/msm/dsi: fix off by one in dsi_bus_clk_enable error handling
+ - acpi/arm64: fix next_platform_timer() section mismatch error
+ - qed: Fix missing error code in qed_slowpath_start()
+ - r8152: select CRC32 and CRYPTO/CRYPTO_HASH/CRYPTO_SHA256

+  linux (4.15.0-163.171) bionic; urgency=medium
+  
+  * bionic/linux: 4.15.0-163.171 -proposed tracker (LP: #1949874)
+  
+  * Packaging resync (LP: #1786013)
+  
+  [Packaging] update Ubuntu.md
+ - debian/dkms-versions -- update from kernel-versions (main/2021.11.08)
+ * Unable to build net/reuseport_bpf and other tests in ubuntu_kernel_selftests
+ on Bionic with make command (LP: #1949889)
+ - selftests: Fix loss of test output in run_kselftests.sh
+ - selftests: Makefile set KSFT_TAP_LEVEL to prevent nested TAP headers
+ - selftests: fix headers_install circular dependency
+ - selftests: fix bpf build/test workflow regression when KBUILD_OUTPUT is set
+ - selftests: vm: Fix test build failure when built by itself

+ * KVM emulation failure when booting into VM crash kernel with multiple CPUs
+ (LP: #1948862)
+ - KVM: x86: Properly reset MMU context at vCPU RESET/INIT
+
+ * aufs: kernel bug with apparmor and fuseblk (LP: #1948470)
+ - SAUCE: aufs: bugfix, stop omitting path->mnt
+
+ * ebpf: bpf_redirect fails with ip6 gre interfaces (LP: #1947164)
+ - net: handle ARPHRD_IP6GRE in dev_is_mac_header_xmit()
+
+ * require CAP_NET_ADMIN to attach N_HCI ldisc (LP: #1949516)
+ - Bluetooth: hci_ldisc: require CAP_NET_ADMIN to attach N_HCI ldisc
+
+ * ACL updates on OCFS2 are not revalidated (LP: #1947161)
+ - ocfs2: fix remounting needed after setfacl command
+
+ * ppc64 BPF JIT mod by 1 will not return 0 (LP: #1948351)
+ - powerpc/bpf: Fix BPF_MOD when imm == 1
+
+ * Drop "UBUNTU: SAUCE: cachefiles: Page leaking in cachefiles_read_backing_file while vmscan is active" (LP: #1947709)
+ - Revert "UBUNTU: SAUCE: cachefiles: Page leaking in cachefiles_read_backing_file while vmscan is active"
+ - cachefiles: Fix page leak in cachefiles_read_backing_file while vmscan is active
+
+ * Some test in ubuntu_bpf test_verifier failed on i386 Bionic kernel
+ (LP: #1788578)
+ - bpf: fix context access in tracing progs on 32 bit archs
+
+ * test_bpf.sh from ubuntu_kernel_selftests.net from linux ADT test failure
+ with linux/4.15.0-149.153 i386 (Segmentation fault) (LP: #1934414)
+ - selftests/bpf: make test_verifier run most programs
+ - bpf: add couple of test cases for div/mod by zero
+ - bpf: add further test cases around div/mod and others
+
+ * Bionic update: upstream stable patchset 2021-11-02 (LP: #1949512)
+ - usb: gadget: r8a66597: fix a loop in set_feature()}
Open Source Used In 5GaaS Edge AC-4  12178

- usb: musb: tusb6010: uninitialized data in tusb_fifo_write_unaligned()
- cifs: fix incorrect check for null pointer in header_assemble
- xen/x86: fix PV trap handling on secondary processors
- usb-storage: Add quirk for ScanLogic SL11R-IDE older than 2.6c
- USB: serial: cp210x: add ID for GW Instek GDM-834x Digital Multimeter
- staging: greybus: uart: fix tty use after free
- Re-enable UAS for LaCie Rugged USB3-FW with fk quirk
- USB: serial: mos7840: remove duplicated 0xac24 device ID
- USB: serial: option: add Telit LN920 compositions
- USB: serial: option: remove duplicate USB device ID
- USB: serial: option: add device id for Foxconn T99W265
- mcb: fix error handling in mcb_alloc_bus()
- serial: mvbu-uart: fix driver's tx_empty callback
- net: hso: fix muxed tty registration
- net/mlx4_en: Fix TX timeout when TX ring size is set to the smallest
- net/mlx4_en: Don't allow aRFS for encapsulated packets
- scsi: scsi: Adjust iface sysfs attr detection
- thermal/core: Potential buffer overflow in thermal_build_list_of_policies()
- irqchip/gic-v3-its: Fix potential VPE leak on error
- md: fix a lock order reversal in md_alloc
- blktrace: Fix uaf in blk_trace access after removing by sysfs
- net: macb: fix use after free on rmmod
- net: stmmac: allow CSR clock of 300MHz
- m68k: Double cast io functions to unsigned long
- xen/balloon: use a kernel thread instead a workqueue
- compiler.h: Introduce absolute_pointer macro
- net: i825xx: Use absolute_pointer for memcpy from fixed memory location
- sparc: avoid stringop-overread errors
- qx4: avoid stringop-overread errors
- parisc: Use absolute_pointer() to define PAGE0
- arm64: Mark __stack_chk_guard as __ro_after_init
- alpha: Declare virt_to_phys and virt_to_bus parameter as pointer to volatile
- net: 6pack: Fix tx timeout and slot time
- spi: Fix tegra20 build with CONFIG_PM=n
- arm64: dts: marvell: armada-37xx: Extend PCIe MEM space
- PCI: aardvark: Fix checking for PIO Non-posted Request
- PCI: aardvark: Fix checking for PIO status
- xen/balloon: fix balloon kthread freezing
- qx4: work around gcc false positive warning bug
- tty: Fix out-of-bound vmalloc access in imageblit
- cpufreq: schedutil: Use kobject release() method to free sugov_tunables
- cpufreq: schedutil: Destroy mutex before kobject_put() frees the memory
- mac80211: fix use-after-free in CCMP/GCMP RX
- ipvs: check that ip_vs_conn_tab_bits is between 8 and 20
- mac80211: Fix iee80211_amsdu_aggregate frag_tail bug
- mac80211: limit injected vht mcs/bs in iee80211_parse_tx_radiotap
- scpt: break out if skb_header_pointer returns NULL in scpt_rcv_oobt
- hwmon: (tmp421) fix rounding for negative values
+ - e100: fix length calculation in e100_get_regs_len
+ - e100: fix buffer overrun in e100_get_regs
+ - scsi: csiostor: Add module sofdep on cxgb4
+ - af_unix: fix races in sk_peer_pid and sk_peer_cred accesses
+ - ipack: ipoctl: fix stack information leak
+ - ipack: ipoctl: fix tty registration race
+ - ipack: ipoctl: fix tty-registration error handling
+ - ipack: ipoctl: fix missing allocation-failure check
+ - ipack: ipoctl: fix module reference leak
+ - ext4: fix potential infinite loop in ext4_dx_readdir()
+ - net: udp: annotate data race around udp_sk(sk)->corkflag
+ - EDAC/synopsys: Fix wrong value type assignment for edac_mode
+ - ARM: 9077/1: PLT: Move struct plt_entries definition to header
+ - ARM: 9078/1: Add warn suppress parameter to arm_gen_branch_link()
+ - ARM: 9079/1: ftrace: Add MODULE_PLTS support
+ - ARM: 9098/1: ftrace: MODULE_PLT: Fix build problem without DYNAMIC_FTRACE
+ - arm64: Extend workaround for erratum 1024718 to all versions of Cortex-A55
+ - hso: fix bailout in error case of probe
+ - usb: hso: fix error handling code of hso_create_net_device
+ - usb: hso: remove the bailout parameter
+ - crypto: ccp - fix resource leaks in ccp_run_aes_gcm_cmd()
+ - HID: betop: fix slab-out-of-bounds Write in betop_probe
+ - netfilter: ipset: Fix oversized kvmalloc() calls
+ - HID: usbhid: free raw_report buffers in usbhid_stop
+ - cred: allow get_cred() and put_cred() to be given NULL.
+ - gpio: uniphier: Fix void functions to remove return value
+ - tty: synclink_gt, drop unneeded forward declarations
+ - tty: synclink_gt: rename a conflicting function name
+ - drm/amd/display: Pass PCI deviceid into DC
+ - hwmon: (tmp421) Replace S_ <PERMS> with octal values
+ - hwmon: (tmp421) report /PVLD condition as fault

+ * ACL updates on OCFS2 are not revalidated (LP: #1947161) // Bionic update:
+ upstream stable patchset 2021-11-02 (LP: #1949512)
+ - ocfs2: drop acl cache for directories too
+

+ * Add final-checks to check certificates (LP: #1947174)
+ - [Packaging] Add system trusted and revocation keys final check
+
+ * CVE-2020-36385
+ - RDMA/cma: Add missing locking to rdma_accept()
+ - RDMA/ucma: Fix the locking of ctx->file
+ - RDMA/ucma: Rework ucma_migrate_id() to avoid races with destroy
+ + * CVE-2021-28950
+ + - fuse: fix live lock in fuse_iget()
+ + + * CVE-2020-36322
+ + - fuse: fix bad inode
+ + + Bionic update: upstream stable patchset 2021-10-13 (LP: #1947011)
+ + - rcu: Fix missed wakeup of exp_wq waiters
+ + - apparmor: remove duplicate macro list_entry_is_head()
+ + - cryptp: talitos - fix max key size for sha384 and sha512
+ + - scctp: validate chunk size in __rcv_asconf_lookup
+ + - scctp: add param size validation for SCTP_PARAM_SET_PRIMARY
+ + - dmaengine: acpi: Avoid comparison GSI with Linux vIRQ
+ + - thermal/drivers/exynos: Fix an error code in exynos_tmu_probe()
+ + - 9p/trans_virtio: Remove sysfs file on probe failure
+ + - prctl: allow to setup brk for et_dyn executables
+ + - profiling: fix shift-out-of-bounds bugs
+ + - pwm: lpc32xx: Don't modify HW state in .probe() after the PWM chip was
+ + registered
+ + - Kconfig.debug: drop selecting non-existing HARDLOCKUP_DETECTOR_ARCH
+ + - parisc: Move pci_dev_is_behind_card_dino to where it is used
+ + - dmaengine: ioat: depends on !UML
+ + - dmaengine: xilinx_dma: Set DMA mask for coherent APIs
+ + - ceph: lockdep annotations for try_nonblocking_invalidate
+ + - nilfs2: fix memory leak in nilfs_sysfs_create_device_group
+ + - nilfs2: fix NULL pointer in nilfs_##name##_attr_release
+ + - nilfs2: fix memory leak in nilfs_sysfs_create_##name##_group
+ + - nilfs2: fix memory leak in nilfs_sysfs_delete_##name##_group
+ + - nilfs2: fix memory leak in nilfs_sysfs_create_snapshot_group
+ + - nilfs2: fix memory leak in nilfs_sysfs_delete_snapshot_group
+ + - pwm: rockchip: Don't modify HW state in .remove() callback
+ + - blk-throttle: fix UAF by deleteing timer in blk_throtl_exit()
+ + - drm/nouveau/nvk: Replace -ENOSYS with -ENODEV
+ + - nilfs2: use refcount_dec_and_lock() to fix potential UAF
+ + - drivers: base: cacheinfo: Get rid of DEFINE_SMP_CALL_CACHE_FUNCTION()
+ + * Invalid backport to v4.15: missing pgtable_l5_enabled (LP: #1946464)
+ + - SAUCE: Revert "x86/mm: Don't free P4D table when it is folded at runtime"
+ + + * CVE-2021-38199
+ + - NFSv4: Initialise connection to the server in nfs4_alloc_client()
+ + + * CVE-2019-19449
+ + - f2fs: fix wrong total_sections check and fsmeta check
+ + - f2fs: fix to do sanity check on segment/section count
* vrf: fix refcnt leak with vxlan slaves (LP: #1945180)
- ipv4: Fix device used for dst_alloc with local routes

* Check for changes relevant for security certifications (LP: #1945989)
  - [Packaging] Add a new fips-checks script
  - [Packaging] Add fips-checks as part of finalchecks

* CVE-2021-3759
  - memcg: enable accounting of ipc resources

* Bionic update: upstream stable patchset 2021-09-27 (LP: #1945224)
  - ARC: Fix CONFIG_STAGDEPOT
  - can: usb: esd_usb2: esd_usb2_rx_event(): fix the interchange of the CAN RX and TX error counters
  - Revert "USB: serial: ch341: fix character loss at high transfer rates"
  - USB: serial: option: add new VID/PID to support Fibocom FG150
  - usb: dwc3: gadget: Fix dwc3_calc_trbs_left()
  - usb: dwc3: gadget: Stop EP0 transfers during pullup disable
  - IB/hfi1: Fix possible null-pointer dereference in _extend_sdma_tx_descs()
  - e1000e: Fix the max snoop/no-snoop latency for 10M
  - ip_gre: add validation for csym_start
  - xgene-v2: Fix a resource leak in the error handling path of `xge_probe()`
  - net: marvell: fix MVNETA_TX_IN_PRGRS bit number
  - usb: gadget: u_audio: fix race condition on endpoint stop
  - opp: remove WARN when no valid OPPs remain
  - virtio: Improve vq->broken access to avoid any compiler optimization
  - vringh: Use wiov->used to check for read/write desc order
  - drm: Copy drm_wait_vblank to user before returning
  - drm/nouveaudisp: power down unused DP links during init
  - net/rds: dma_map_sg is entitled to merge entries
  - vt_kdsetmode: extend console locking
  - fbmem: add margin check to fb_check_caps()
  - KVM: x86/mmu: Treat NX as used (not reserved) for all !TDP shadow MMUs
  - Revert "floppy: reintroduce O_NDELAY fix"
  - net: qrtr: fix another OOB Read in qrtr_endpoint_post
  - net: hns3: fix get wrong pfc_en when query PFC configuration
  - xtensa: fix kconfig unmnet dependency warning for HAVE_FUTEX_CMPXCHG
  - qed: Fix the VF msix vectors flow
  - net: macb: Add a NULL check on desc_ptp
  - qede: Fix memset corruption
  - perf/x86/intel/p: Fix mask of num_address_ranges
  - perf/x86/amd/ibs: Work around erratum #1197
  - cryptolooop: add a deprecation warning
  - ARM: 8918/2: only build return_address() if needed
  - ALSA: pcm: fix divide error in snd_pcm_lib_ioctl
  - clk: fix build warning for orphan_list
  - media: stkwebcam: fix memory leak in stk_camera Probe
  - igmp: Add ip_mc_list lock in ip_check_mc_reu
+ - USB: serial: mos7720: improve OOM-handling in read_mos_reg()
+ - f2fs: fix potential overflow
+ - ath10k: fix recent bandwidth conversion bug
+ - ipv4/icmp: 13mdev: Perform icmp error route lookup on source device routing
+ - table (v2)
+ - crypto: talitos - reduce max key size for SEC1
+ - powerpc/module64: Fix comment in R_PPC64_ENTRY handling
+ - powerpc/boot: Delete unneeded .globl _zimage_start
+ - net: ll_temac: Remove left-over debug message
+ - mm/page_alloc: speed up the iteration of max_order
+ - Revert "btrfs: compression: don’t try to compress if we don't have enough pages"
+ - usb: host: xhci-rca: Don't reload firmware after the completion
+ - x86/reboot: Limit Dell Optiplex 990 quirk to early BIOS versions
+ - PCI: Call Max Payload Size-related fixup quirks early
+ - regmap: fix the offset of register error log
+ - crypto: mxs-dcp - Check for DMA mapping errors
+ - power: supply: axp288_fuel_gauge: Report register-address on readdb / writetb
+ - errors
+ - crypto: omap-sham - clear dma flags only after omap_sham_update_dma_stop()
+ - udf: Check LVID earlier
+ - isofs: joliet: Fix iocharset=utf8 mount option
+ - nvme-rdma: don't update queue count when failing to set io queues
+ - power: supply: max17042_battery: fix typo in MAX17042_TOFF
+ - s390/cio: add dev_busid sysfs entry for each subchannel
+ - libata: fix ata_host_start()
+ - crypto: qat - do not ignore errors from enable_vf2pf_comms()
+ - crypto: qat - handle both source of interrupt in VF ISR
+ - crypto: qat - fix reuse of completion variable
+ - crypto: qat - fix naming for init/shutdown VF to PF notifications
+ - crypto: qat - do not export adf_iov_putmsg()
+ - udf_get_extendedattr() had no boundary checks.
+ - m68k: emu: Fix invalid free in nfeth_cleanup()
+ - spi: spi-fsl-dspi: Fix issue with uninitialized dma_slave_config
+ - spi: spi-pc32: Fix issue with uninitialized dma_slave_config
+ - clocksource/drivers/sh_cmt: Fix wrong setting if don't request IRQ for clock
+ - source channel
+ - crypto: qat - use proper type for vf_mask
+ - certs: Trigger creation of RSA module signing key if it's not an RSA key
+ - soc:rockchip: ROCKCHIP_GRF should not default to y, unconditionally
+ - media: dvb-usb: fix uninit-value in dvb_usb_adapter_dvb_init
+ - media: dvb-usb: fix uninit-value in vp702x_read_mac_addr
+ - media: go7007: remove redundant initialization
+ - Bluetooth: sco: prevent information leak in sco_conn_defer_accept()
+ - tcp: seq_file: Avoid skipping sk during tcp_seek_last_pos
+ - net: cipso: fix warnings in netbl_cipsov4_add_std
+ - i2c: highlander: add IRQ check
- PCI: PM: Avoid forcing PCI_D0 for wakeup reasons inconsistently
- PCI: PM: Enable PME if it can be signaled from D3cold
- soc: qcom: smsm: Fix missed interrupts if state changes while masked
- Bluetooth: increase BTNAMSIZ to 21 chars to fix potential buffer overflow
- arm64: dts: exynos: correct GIC CPU interfaces address range on Exynos7
- Bluetooth: fix repeated calls to sco_sock_kill
- drm/msm/dsi: Fix some reference counted resource leaks
- usb: gadget: udc: at91: add IRQ check
- usb: phy: fsl-usb: add IRQ check
- usb: phy: twl6030: add IRQ checks
- Bluetooth: Move shutdown callback before flushing tx and rx queue
- usb: host: ohci-tmio: add IRQ check
- usb: phy: tahvo: add IRQ check
- mac80211: Fix insufficient headroom issue for AMSDU
- usb: gadget: mv_u3d: request_irq() after initializing UDC
- Bluetooth: add timeout sanity check to hci_inquiry
- i2c: iop3xx: fix deferred sanity
- i2c: s3c2410: fix IRQ check
- mmc: dw_mmcc: Fix issue with uninitialized dma_slave_config
- mmc: moxart: Fix issue with uninitialized dma_slave_config
- CIFS: Fix a potentially linear read overflow
- i2c: mt65xx: fix IRQ check
- usb: ehci-orion: Handle errors of clk_prepare_enable() in probe
- usb: bdc: Fix an error handling path in 'bdc_probe()' when no suitable DMA
  config is available
- tty: serial: fsl_lpuart: fix the wrong mapbase value
- ath6kl: wmi: fix an error code in ath6kl_wmi_sync_point()
- bcma: Fix memory leak for internally-handled cores
- ipv4: make exception cache less predictable
- net: sched: Fix qdisc_rate_table refcount leak when get tcf_block failed
- net: qualcomm: fix QCA7000 checksum handling
- netns: protect netns ID lookups with RCU
- tty: Fix data race between tiocsti() and flush_to_ldisc()
- x86/resctrl: Fix a maybe-uninitialized build warning treated as error
- KVM: x86: Update vCPU's hv_clock before back to guest when tsc_offset is
  adjusted
- IMA: remove -Wmissing-prototypes warning
- backlight: pwm_bl: Improve bootloader/kernel device handover
- clk: kirkwood: Fix a clocking boot regression
- fbmem: don't allow too huge resolutions
- rtc: tps65910: Correct driver module alias
- blk-zoned: allow zone management send operations without CAP_SYS_ADMIN
- blk-zoned: allow BLKREPORTZONE without CAP_SYS_ADMIN
- PCI/MSI: Skip masking MSI-X on Xen PV
- powerpc/perf/hv-gpci: Fix counter value parsing
- xen: fix setting of max_pfn in shared_info
- include/linux/list.h: add a macro to test if entry is pointing to the head
- 9p/xen: Fix end of loop tests for list_for_each_entry
+ soc: aspeed: lpc-ctrl: Fix boundary check for mmap
+ crypto: public_key: fix overflow during implicit conversion
+ block: bfq: fix bfq_set_next_ioprio_data()
+ power: supply: max17042: handle fails of reading status register
+ dm crypt: Avoid percpu_counter spinlock contention in crypt_page_alloc()
+ VMCI: fix NULL pointer dereference when unmapping queue pair
+ media: uvc: don't do DMA on stack
+ media: rc-loopback: return number of emitters rather than error
+ libata: add ATA_HORKAGE_NO_NCQ_TRIM for Samsung 860 and 870 SSDs
+ ARM: 9105/1: atags_to_fdt: don't warn about stack size
+ PCI: Restrict ASMedia ASM1062 SATA Max Payload Size Supported
+ PCI: Return ~0 data on pciconfig_read() CAP_SYS_ADMIN failure
+ PCI: xilinx-nwl: Enable the clock through CCF
+ PCI: aardvark: Increase polling delay to 1.5s while waiting for PIO response
+ PCI: aardvark: Fix masking and unmasking legacy INTx interrupts
+ HID: input: do not report stylus battery state as "full"
+ RDMA/iwcm: Release resources if iw_cm module initialization fails
+ docs: Fix infiniband uverbs minor number
+ pinctrl: samsung: Fix pinctrl bank pin count
+ vfio: Use config not menuconfig for VFIO_NOIOMMU
+ openrisc: don't printk() unconditionally
+ pinctrl: single: Fix error return code in pcs_parse_bits_in_pinctrl_entry()
+ scsi: qedi: Fix error codes in qedi_alloc_global_queues()
+ MIPS: Malta: fix alignment of the devicetree buffer
+ media: dib8000: rewrite the init prbs logic
+ crypto: mxs-dcp - Use sg_mapping_iter to copy data
+ PCI: Use pci_update_current_state() in pci_enable_device_flags()
+ iio: dac: ad5624r: Fix incorrect handling of an optional regulator.
+ ARM: dts: qcom: apq8064: correct clock names
+ video: fbdev: kyro: fix a DoS bug by restricting user input
+ netlink: Deal with ESRCH error in nlmsg_notify()
+ Smack: Fix wrong semantics in smk_access_entry()
+ usb: host: fotg210: fix the endpoint's transactional opportunities calculation
+ usb: host: fotg210: fix the actual_length of an iso packet
+ usb: gadget: u_ether: fix a potential null pointer dereference
+ usb: gadget: composite: Allow bMaxPower=0 if self-powered
+ staging: board: Fix uninitialized spinlock when attaching genpd
+ tty: serial: jsm: hold port lock when reporting modem line changes
+ bpf/tests: Fix copy-and-paste error in double word test
+ bpf/tests: Do not PASS tests without actually testing the result
+ video: fbdev: asiliantfb: Error out if 'pixclock' equals zero
+ video: fbdev: kyro: Error out if 'pixclock' equals zero
+ video: fbdev: riva: Error out if 'pixclock' equals zero
+ ipv4: ip_output.c: Fix out-of-bounds warning in ip_copy_addrs()
+ flow_dissector: Fix out-of-bounds warnings
+ s390/jump_label: print real address in a case of a jump label bug
+ serial: 8250: Define RX trigger levels for OxSemi 950 devices

Open Source Used In 5GaaS Edge AC-4 12184
+ xtensa: ISS: don't panic in rs_init
+ hvsi: don't panic on tty_register_driver failure
+ serial: 8250_pci: make setup_port() parameters explicitly unsigned
+ staging: ks7010: Fix the initialization of the 'sleep_status' structure
+ ata: sata_dwc_460ex: No need to call phy_exit() before phy_init()
+ Bluetooth: skip invalid hci_sync_conn_complete_evt
+ ASoC: Intel:byter_rt5640: Move "Platform Clock" routes to the maps for the
+ matching in-/output
+ media: v4l2-dv-timesings.c: fix wrong condition in two for-loops
+ arm64: ds: qcom: sdmc660: use reg value for memory node
