elements that are contained by both this array and the specified collection. The returned set preserves the element iteration order of the original array. To get a set containing all elements that are contained at least in one of these collections use [union].

```kotlin
public infix fun BooleanArray.intersect(other: Iterable<Boolean>): Set<Boolean> {
    val set = this.toMutableSet()
    set.retainAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public infix fun CharArray.intersect(other: Iterable<Char>): Set<Char> {
    val set = this.toMutableSet()
    set.retainAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public <T> Array<T>.subtract(other: Iterable<T>): Set<T> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun <T> Array<out T>.toMutableSet(): MutableSet<T> {
    return toCollection(LinkedHashSet<T>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun ByteArray.toMutableSet(): MutableSet<Byte> {
    return toCollection(LinkedHashSet<Byte>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun ShortArray.toMutableSet(): MutableSet<Short> {
    return toCollection(LinkedHashSet<Short>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun IntArray.toMutableSet(): MutableSet<Int> {
    return toCollection(LinkedHashSet<Int>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun LongArray.toMutableSet(): MutableSet<Long> {
    return toCollection(LinkedHashSet<Long>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun FloatArray.toMutableSet(): MutableSet<Float> {
    return toCollection(LinkedHashSet<Float>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun DoubleArray.toMutableSet(): MutableSet<Double> {
    return toCollection(LinkedHashSet<Double>(mapCapacity(size)))
}
```

returns a new [MutableSet] containing all distinct elements from the given array.

```kotlin
public fun BooleanArray.subtract(other: Iterable<Boolean>): Set<Boolean> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun CharArray.subtract(other: Iterable<Char>): Set<Char> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun <T> Array<out T>.subtract(other: Iterable<T>): Set<T> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun ByteArray.subtract(other: Iterable<Byte>): Set<Byte> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun ShortArray.subtract(other: Iterable<Short>): Set<Short> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun IntArray.subtract(other: Iterable<Int>): Set<Int> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun LongArray.subtract(other: Iterable<Long>): Set<Long> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun FloatArray.subtract(other: Iterable<Float>): Set<Float> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun DoubleArray.subtract(other: Iterable<Double>): Set<Double> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun BooleanArray.subtract(other: Iterable<Boolean>): Set<Boolean> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

```kotlin
public fun CharArray.subtract(other: Iterable<Char>): Set<Char> {
    val set = this.toMutableSet()
    set.removeAll(other)
    return set
}
```

returns a set containing all elements that are contained by both this array and the specified collection.

current accumulator value and an element, and calculates the next accumulator value.

```kotlin
public inline fun <R> DoubleArray.fold(initial: R, operation: (acc: R, Double) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> FloatArray.foldIndexed(initial: R, @param {operation} function that takes the index of an element, current accumulator value and element, and calculates the next accumulator value.

```kotlin
public inline fun <R> IntArray.foldIndexed(initial: R, operation: (index: Int, acc: R, Int) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> ShortArray.foldIndexed(initial: R, operation: (index: Int, acc: R, Short) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> BooleanArray.fold(initial: R, operation: (acc: R, Boolean) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> CharArray.fold(initial: R, operation: (acc: R, Char) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(acc, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> ByteArray.foldIndexed(initial: R, operation: (index: Int, acc: R, Byte) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> TArray.foldIndexed(initial: R, operation: (index: Int, acc: R, T) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> CharArray.fold(initial: R, operation: (acc: R, Char) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(acc, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> BooleanArray.fold(initial: R, operation: (acc: R, Boolean) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> bytearray.foldIndexed(initial: R, operation: (index: Int, acc: R, Byte) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> IntArray.foldIndexed(initial: R, operation: (index: Int, acc: R, Int) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> ShortArray.foldIndexed(initial: R, operation: (index: Int, acc: R, Short) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> BooleanArray.fold(initial: R, operation: (acc: R, Boolean) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> CharArray.fold(initial: R, operation: (acc: R, Char) -> R): R {
    var accumulator = initial
    for (element in this) accumulator = operation(acc, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin
public inline fun <R> ByteArray.foldIndexed(initial: R, operation: (index: Int, acc: R, Byte) -> R): R {
    var index = 0
    var accumulator = initial
    for (element in this) accumulator = operation(index++, accumulator, element)
    return accumulator
}
```

Accumulates value starting with [initial] value and applying [operation] from left to right.

```kotlin

*/
than or equal to `this` value.

```kotlin
public infix fun Long.downTo(to: Short): LongProgression {
    return LongProgression.fromClosedRange(this, to.toLong(), -1L)
}
```

This function returns a progression from the value less than or equal to `this` value. If the [to] value is greater than `this` value, the returned progression is empty.

```kotlin
public infix fun Byte.downTo(to: Short): IntProgression {
    return IntProgression.fromClosedRange(this.toInt(), to.toInt(), -1)
}
```

This function returns a progression from the value less than or equal to `this` value. If the [to] value is greater than `this` value, the returned progression is empty.

```kotlin
public infix fun IntProgression.reversed(): IntProgression {
    return IntProgression.fromClosedRange(last, first, -step)
}
```

This function returns a progression that goes over the same range in the opposite direction with the same step.

```kotlin
public fun IntProgression.step(step: Int): IntProgression {
    checkStepIsPositive(step > 0, step)
    return IntProgression.fromClosedRange(first, last, if (this.step > 0) step else -step)
}
```

This function returns a progression that goes over the same range with the given step. If the step is positive, the returned progression goes over the same range with the given step.

```kotlin
internal fun Int.toByteExactOrNull(): Byte? {
    return if (this in Byte.MIN_VALUE.toInt()..Byte.MAX_VALUE.toInt()) this.toByte() else null
}
```

This function checks if the value is within the range of Byte and returns Byte if true, or null otherwise.

```kotlin
internal fun Long.toByteExactOrNull(): Byte? {
    return if (this in Byte.MIN_VALUE.toLong()..Byte.MAX_VALUE.toLong()) this.toByte() else null
}
```

This function checks if the value is within the range of Byte and returns Byte if true, or null otherwise.

```kotlin
internal fun Short.toByteExactOrNull(): Byte? {
    return if (this in Byte.MIN_VALUE.toShort()..Byte.MAX_VALUE.toShort()) this.toByte() else null
}
```

This function checks if the value is within the range of Byte and returns Byte if true, or null otherwise.

```kotlin
internal fun Double.toByteExactOrNull(): Byte? {
    return if (this in Byte.MIN_VALUE.toDouble()..Byte.MAX_VALUE.toDouble()) this.toInt().toByte() else null
}
```

This function checks if the value is within the range of Byte and returns Byte if true, or null otherwise.

```kotlin
internal fun Float.toByteExactOrNull(): Byte? {
    return if (this in Byte.MIN_VALUE.toFloat()..Byte.MAX_VALUE.toFloat()) this.toInt().toByte() else null
}
```

This function checks if the value is within the range of Byte and returns Byte if true, or null otherwise.

```kotlin
internal fun Long.toIntExactOrNull(): Int? {
    return if (this in Int.MIN_VALUE.toLong()..Int.MAX_VALUE.toLong()) this.toInt() else null
}
```

This function checks if the value is within the range of Int and returns Int if true, or null otherwise.

```kotlin
internal fun Double.toLongExactOrNull(): Long? {
    return if (this in Long.MIN_VALUE.toDouble()..Long.MAX_VALUE.toDouble()) this.toLong() else null
}
```

This function checks if the value is within the range of Long and returns Long if true, or null otherwise.

```kotlin
internal fun Float.toShortExactOrNull(): Short? {
    return if (this in Short.MIN_VALUE.toFloat()..Short.MAX_VALUE.toFloat()) this.toShort() else null
}
```

This function checks if the value is within the range of Short and returns Short if true, or null otherwise.

```kotlin
internal fun Double.toShortExactOrNull(): Short? {
    return if (this in Short.MIN_VALUE.toDouble()..Short.MAX_VALUE.toDouble()) this.toShort() else null
}
```

This function checks if the value is within the range of Short and returns Short if true, or null otherwise.
a range from this value up to but excluding the specified [to] value.

If the [to] value is less than or equal to `this` value, then the returned range is empty.

 */
@kotlin.internal.InlineOnly
public inline operator fun toByte(): Byte = data.toByte()
The resulting `UByte` value is represented by the least significant 8 bits of this `UInt` value.

If this value is less than or equals to `[UShort.MAX_VALUE]`, the resulting `UShort` value represents the same numerical value as this `UInt`.

The resulting `UShort` value is represented by the least significant 16 bits of this `UInt` value.

The least significant 32 bits of the resulting `ULong` value are the same as the bits of this `UInt` value, whereas the most significant 32 bits are filled with zeros.

The resulting value is the closest `Float` to this `UInt` value.

In case when this `UInt` value is exactly between two `Float`s, the one with zero at least significant bit of mantissa is selected.

The least significant 8 bits of the resulting `UInt` value are the same as the bits of this `Byte` value, whereas the most significant 24 bits are filled with the sign bit of this value.

The resulting `UInt` value represents the same numerical value as this `Byte` value, whereas the most significant 24 bits are filled with the sign bit of this value.

The least significant 16 bits of the resulting `UInt` value are the same as the bits of this `Short` value, whereas the most significant 16 bits are filled with the sign bit of this value.

The resulting `UInt` value represents the same numerical value as this `Int` value.

The least significant 32 bits of this `Long` value are filled with the sign bit of this value.

The fractional part, if any, is rounded down towards zero.

If this `Double` value is negative or `NaN`, `UInt.MAX_VALUE` if it's bigger than `UInt.MAX_VALUE`.

public fun <K, V> emptyMap(vararg pairs: Pair<K, V>): Map<K, V> = emptyMap(mapPairs(pairs))
The returned map is serializable (JVM). The returned map preserves the entry iteration order. The returned map can be used to iterate over the map entries in the order they were added. If multiple pairs have the same key, the resulting map will contain the value from the last of those pairs. Entries of the map are iterated in the order they were specified.

```
fun buildMapCapAtCapacity(capacity: Int, builderAction: BuilderAction): Map
```

This function builds a new read-only map by populating a `MutableMap` using the given `builderAction` and returning a read-only map with the same key-value pairs. It is used to ensure that the function produces an unspecified behavior.

```
fun buildMapCapAtCapacity(capacity: Int, builderAction: BuilderAction): Map
```

This function returns a new mutable map with the specified contents, given as a list of pairs where the first component is the key and the second is the value. Entries of the map are iterated in the order they were specified.

```
mut Map = LinkedHashMap(pairs.size).apply { putAll(pairs) }
```

This function returns a new mutable map with the specified contents, given as a list of pairs where the first component is the key and the second is the value. Entries of the map are iterated in the order they were specified.

```
fun buildMap(builderAction: BuilderAction): Map
```

This function builds a new read-only map by populating a `MutableMap` using the given `builderAction` and returning a read-only map with the same key-value pairs. It is used to ensure that the function produces an unspecified behavior.

```
fun buildMap(builderAction: BuilderAction): Map
```

This function returns a new mutable map with the specified contents, given as a list of pairs where the first component is the key and the second is the value. Entries of the map are iterated in the order they were specified.

```
fun buildMap(builderAction: BuilderAction): Map
```

This function builds a new read-only map by populating a `MutableMap` using the given `builderAction` and returning a read-only map with the same key-value pairs. It is used to ensure that the function produces an unspecified behavior.

```
fun buildMap(builderAction: BuilderAction): Map
```

This function returns a new mutable map with the specified contents, given as a list of pairs where the first component is the key and the second is the value. Entries of the map are iterated in the order they were specified.

package
kotlin.comparisons

/**
 * Compares two values using the specified functions [selectors] to calculate the result
The functions are called sequentially, receive the given values \([a]\) and \([b]\) and return \([\text{Comparable}]\) objects. As soon as the \([\text{Comparable}]\) instances returned by a function for \([a]\) and \([b]\) values do not compare as equal, the result of that comparison is returned.

```kotlin
@sample
samples.comparisons.Comparisons.compareValuesByWithSelectors<Comparable<*>*> fun <T> compareValuesBy(a: T, b: T, vararg selectors: (T) -> Comparable<*>?): Int {
    require(selectors.size > 0)
    return compareValuesByImpl(a, b, selectors)
}

private fun <T> compareValuesByImpl(a: T, b: T, selectors: Array<out (T) -> Comparable<*>?>): Int {
    for (fn in selectors) {
        val v1 = fn(a)
        val v2 = fn(b)
        val diff = compareValues(v1, v2)
        if (diff != 0) return diff
    }
    return 0
}
```

The function is applied to the given values \([a]\) and \([b]\) and return \([\text{Comparable}]\) objects.

```kotlin
@sample
samples.comparisons.Comparisons.compareValuesByWithSingleSelector

fun <T> compareValuesBy(a: T, b: T, selector: (T) -> Comparable<*>?): Int {
    return compareValues(selector(a), selector(b))
}
```

```kotlin
@sample
samples.comparisons.Comparisons.compareValuesByWithComparator

fun <T, K> compareValuesBy(a: T, b: T, comparator: Comparator<in K>, selector: (T) -> K): Int {
    return comparator.compare(selector(a), selector(b))
}
```

```kotlin
fun <T> compareValuesWith(a: T, b: T, comparator: Comparator<T>): Int = comparator.compare(a, b)
```

```

```kotlin
@sample samples.collections.Collections.Elements.getOrInsert
```
Iterable<T>.lastIndexOf(element: T): Int

- Returns last index of [element], or `-1` if the list does not contain element.
- If `null` if the collection is empty.
- If no such element was found.

public fun <@kotlin.internal.OnlyInputTypes T> List<T>.lastIndexOf(element: T): Int

- Returns the last element matching the given [predicate], or `-1` if the list does not contain element.
- If no such element was found.

Iterable<T>.lastOrNull(): T

- Returns the last element, or `null` if the list is empty.
- Returns a random element from this collection.

Iterable<T>.lastOrNull(predicate: (T) -> Boolean): T

- Returns the last element matching the given [predicate], or throws an exception if there is no matching element.
- Returns a random element from this collection.

Iterable<T>.random(): T

- Returns a random element from this collection.

Iterable<T>.randomOrNull(): T?

- Returns a random element from this collection, or `null` if the list is empty.
- Returns a random element from this collection, or throws an exception if the list is empty or has more than one element.

Iterable<T>.single(): T

- Returns the single element, or throws an exception if the list is empty or has more than one element.
- Returns a random element from this collection.

Iterable<T>.singleOrNull(): T?

- Returns the single element, or `null` if the list is empty or has more than one element.
- Returns a random element from this collection.

Iterable<T>.singleOrNull(predicate: (T) -> Boolean): T?

- Returns the single element matching the given [predicate], or throws an exception if there is no matching element.
- Returns a random element from this collection.

Iterable<T>.singleOrNull(random: Random): T?

- Returns the single element matching the given [predicate], or throws an exception if there is no matching element.
- Returns a random element from this collection.

Since Kotlin with experimental type inference, this code uses lambda expressions and functional interfaces to perform operations on collections. Functions like `sumOf()`, `requireNoNulls()`, `chunked()`, and `minus()` are used to manipulate lists and sets, ensuring that null values are handled correctly.

In the `sumOf()` function, a lambda expression is used to convert each element to a `ULong` before summing them up. The `requireNoNulls()` function filters out null elements from a collection, ensuring that the resulting collection only contains non-null elements. The `chunked()` function splits a collection into lists of a specified size, which can be useful for parallel processing or data partitioning.

The `minus()` operator removes elements from a collection based on a provided collection, list, iterator, or sequence. This is particularly useful for filtering out specific elements from collections, which is a common operation required in data processing and analysis.

These functions and operators are part of Kotlin's standard library, providing a powerful set of tools for working with collections in a functional style.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Sequences.Transformations.zip

```kotlin
public infix fun <T, R> Sequence<T>.zip(other: Sequence<R>): Sequence<Pair<T, R>> {
    return MergingSequence(this, other) { t1, t2 -> t1 to t2 }
}
```

Returns a sequence of values built from the elements of this sequence and the other sequence with the same index.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Sequences.Transformations.zipWithTransform

```kotlin
public fun <T, R, V> Sequence<T>.zip(other: Sequence<R>, transform: (a: T, b: R) -> V): Sequence<V> {
    return MergingSequence(this, other, transform)
}
```

Returns a sequence containing the results of applying the given transform function to each pair of two adjacent elements in this sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.zipWithNextToFindDeltas

```kotlin
@SinceKotlin("1.2")
public fun <T, R> Sequence<T>.zipWithNext(transform: (a: T, b: T) -> R): Sequence<R> {
    return sequence result@{
        val iterator = iterator()
        if (!iterator.hasNext()) return@result
        var current = iterator.next()
        while (iterator.hasNext()) {
            val next = iterator.next()
            yield(transform(current, next))
            current = next
        }
    }
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.joinToString

```kotlin
public fun <T> Sequence<T>.joinToString(separator: CharSequence = ", ", prefix: CharSequence = "", postfix: CharSequence = ", ", limit: Int = -1, truncated: CharSequence = "...", transform: ((T) -> CharSequence)? = null): String {
    return joinTo(StringBuilder(), separator, prefix, postfix, limit, truncated, transform).toString()
}
```

Returns a sequence containing the results of applying the given transform function to each pair of two adjacent elements in this sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.joinTo

```kotlin
    buffer.append(prefix)
    var count = 0
    for (element in this) {
        if (++count > 1) buffer.append(separator)
        if (limit < 0 || count <= limit) {
            buffer.appendElement(element, transform)
            if (limit >= 0 && count > limit) buffer.append(truncated)
        } else break
    }
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.joinTo

```kotlin
public fun <T> Sequence<T>.asIterable(): Iterable<T> {
    return Iterable { this.iterator() }
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.asSequence

```kotlin
@kotlin.internal.InlineOnly
public inline fun <T> Sequence<T>.asSequence(): Sequence<T> {
    return this
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfByte

```kotlin
@kotlin.jvm.JvmName("averageOfByte")
public fun Sequence<Byte>.average(): Double {
    var sum: Double = 0.0
    var count = 0
    for (element in this) {
        sum += element
        checkCountOverflow(count++)
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfShort

```kotlin
@kotlin.jvm.JvmName("averageOfShort")
public fun Sequence<Short>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfLong

```kotlin
@kotlin.jvm.JvmName("averageOfLong")
public fun Sequence<Long>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfInt

```kotlin
@kotlin.jvm.JvmName("averageOfInt")
public fun Sequence<Int>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfLong

```kotlin
@kotlin.jvm.JvmName("averageOfLong")
public fun Sequence<Long>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfDouble

```kotlin
@kotlin.jvm.JvmName("averageOfDouble")
public fun Sequence<Double>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfFloat

```kotlin
@kotlin.jvm.JvmName("averageOfFloat")
public fun Sequence<Float>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfChar

```kotlin
@kotlin.jvm.JvmName("averageOfChar")
public fun Sequence<Character>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfByte

```kotlin
@kotlin.jvm.JvmName("averageOfByte")
public fun Sequence<Byte>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfShort

```kotlin
@kotlin.jvm.JvmName("averageOfShort")
public fun Sequence<Short>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfLong

```kotlin
@kotlin.jvm.JvmName("averageOfLong")
public fun Sequence<Long>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfInt

```kotlin
@kotlin.jvm.JvmName("averageOfInt")
public fun Sequence<Int>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfLong

```kotlin
@kotlin.jvm.JvmName("averageOfLong")
public fun Sequence<Long>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfDouble

```kotlin
@kotlin.jvm.JvmName("averageOfDouble")
public fun Sequence<Double>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfFloat

```kotlin
@kotlin.jvm.JvmName("averageOfFloat")
public fun Sequence<Float>.average(): Double {
    var sum = Double(0.0)
    for (element in this) {
        sum += element
    }
    return if (count == 0) Double.NaN else sum / count
}
```

Returns an average value of elements in the sequence.

The operation is _intermediate_ and _stateless_.

@sample samples.collections.Collections.Transformations.averageOfChar

```kotlin
@kotlin.jvm.JvmName("averageOfChar")
public fun Sequence<Character>.average(): Double {

}
[selector] function is 'NaN', the returned result is 'NaN'.

```kotlin
public inline fun CharSequence.minOfOrNull(selector: (Char) -> Float): Float? {
    if (isEmpty()) return null
    var minValue = selector(this[0])
    for (i in 1..lastIndex) {
        val v = selector(this[i])
        minValue = minOf(minValue, v)
        return minValue
    }
    return minValue
}
```

Returns the smallest value among all values produced by [selector] function
applied to each character in the char sequence or 'null' if there are no characters.

```kotlin
public inline fun <R : Comparable<R>> CharSequence.minOfOrNull(selector: (Char) -> R): R? {
    if (isEmpty()) return null
    var minValue = selector(this[0])
    for (i in 1..lastIndex) {
        val v = selector(this[i])
        if (minValue > v) {
            minValue = v
        }
    }
    return minValue
}
```

Returns the smallest value according to the provided [comparator] applied to each character in the char sequence or 'null' if there are no characters.

```kotlin
public inline fun <R> CharSequence.minOfWith(comparator: Comparator<in R>, selector: (Char) -> R): R {
    if (isEmpty()) throw NoSuchElementException()
    var minValue = selector(this[0])
    for (i in 1..lastIndex) {
        val v = selector(this[i])
        if (comparator.compare(minValue, v) > 0) {
            minValue = v
        }
    }
    return minValue
}
```

Returns the smallest character according to the provided [comparator] among all values produced by [selector] function applied to each character in the char sequence or 'null' if there are no characters.

```kotlin
public fun CharSequence.minOrNull(): Char? {
    if (isEmpty()) return null
    var min = this[0]
    for (i in 1..lastIndex) {
        val e = this[i]
        if (min > e) min = e
    }
    return min
}
```

Returns 'true' if the char sequence has no characters or 'false' if there are characters.

```kotlin
public fun(CharSequence.minWithOrNull(comparator: Comparator<in Char>): Char? {
    if (isEmpty()) return null
    var min = this[0]
    for (i in 1..lastIndex) {
        val e = this[i]
        if (comparator.compare(min, e) > 0) min = e
    }
    return min
}
```

Returns 'true' if no characters match the given [predicate].

```kotlin
public inline fun CharSequence.onEachIndexed(action: (index: Int, Char) -> Unit): S {
    return apply { forEachIndexed(action) }
}
```

Executes the given [action] on each character, providing sequential index with the character.

```kotlin
public fun(CharSequence.onEach(action: (Char) -> Unit): S {
    return apply { for (element in this) action(element) }
}
```

Executes the given [action] on each character in the sequence.

The `minOfOrNull` function is defined as follows:

```kotlin
public inline fun CharSequence.minOfOrNull(selector: (Char) -> Float): Float? {
    if (isEmpty()) return null
    var minValue = selector(this[0])
    for (i in 1..lastIndex) {
        val v = selector(this[i])
        minValue = minOf(minValue, v)
        return minValue
    }
    return minValue
}
```

It returns the smallest value among all values produced by the `selector` function applied to each character in the char sequence or `null` if there are no characters.

The `minOfOrNull` function is parameterized with a `selector` function that takes a `Char` and returns a `Float`. It iterates over each character in the sequence, applying the `selector` function to each character, and keeps track of the smallest value as it iterates. If the sequence is empty, it returns `null`.

The `minOfOrNull` function is defined for sequences of type `CharSequence`, which is a supertype of `CharSequence`. This means it can be applied to any sequence of `CharSequence` type.

The `minOfOrDefault` function is an extension function on `CharSequence` and returns the smallest value among all values produced by the `selector` function applied to each character in the char sequence or the default value if there are no characters.

The `minOfWith` function is defined as follows:

```kotlin
public inline fun <R> CharSequence.minOfWith(comparator: Comparator<in R>, selector: (Char) -> R): R {
    if (isEmpty()) throw NoSuchElementException()
    var minValue = selector(this[0])
    for (i in 1..lastIndex) {
        val v = selector(this[i])
        if (comparator.compare(minValue, v) > 0) {
            minValue = v
        }
    }
    return minValue
}
```

It returns the smallest value according to the provided [comparator] among all values produced by the `selector` function applied to each character in the char sequence or `null` if there are no characters.

The `minOfWith` function is parameterized with a `selector` function that takes a `Char` and returns a `R` that is comparable. It iterates over each character in the sequence, applying the `selector` function to each character, and keeps track of the smallest value as it iterates. If the sequence is empty, it throws a `NoSuchElementException`.

The `minOrNull` function is defined as follows:

```kotlin
public fun CharSequence.minOrNull(): Char? {
    if (isEmpty()) return null
    var min = this[0]
    for (i in 1..lastIndex) {
        val e = this[i]
        if (min > e) min = e
    }
    return min
}
```

It returns the first character having the smallest value according to the provided [comparator] or `null` if there are no characters.

The `minOrNull` function is defined as follows:

```kotlin
public inline fun CharSequence.minOrNull(comparator: Comparator<in Char>): Char? {
    if (isEmpty()) return null
    var min = this[0]
    for (i in 1..lastIndex) {
        val e = this[i]
        if (comparator.compare(min, e) > 0) min = e
    }
    return min
}
```

It returns the first character having the smallest value according to the provided [comparator] or `null` if there are no characters.

The `none` function is defined as follows:

```kotlin
public fun CharSequence.none(): Boolean {
    return isEmpty()
}
```

It returns `true` if the char sequence has no characters or `false` if there are characters.

The `none` function is defined as follows:

```kotlin
public inline fun CharSequence.none(predicate: (Char) -> Boolean): Boolean {
    for (element in this) if (predicate(element)) return false
    return true
}
```

It returns `true` if no characters match the given [predicate].

The `onEach` function is defined as follows:

```kotlin
public inline fun <S : CharSequence> S.onEach(action: (Char) -> Unit): S {
    return apply { for (element in this) action(element) }
}
```

It performs the given [action] on each character.

The `onEachIndexed` function is defined as follows:

```kotlin
public inline fun <S : CharSequence> S.onEachIndexed(action: (index: Int, Char) -> Unit): S {
    return apply { forEachIndexed(action) }
}
```

It performs the given [action] on each character, providing sequential index with the character.

The `none` function is defined as follows:

```kotlin
public fun CharSequence.none(): Boolean {
    return isEmpty()
}
```

It returns `true` if the char sequence has no characters or `false` if there are characters.

The `onEach` function is defined as follows:

```kotlin
public inline fun <S : CharSequence> S.onEach(action: (Char) -> Unit): S {
    return apply { for (element in this) action(element) }
}
```

It performs the given [action] on each character.

The `onEachIndexed` function is defined as follows:

```kotlin
public inline fun <S : CharSequence> S.onEachIndexed(action: (index: Int, Char) -> Unit): S {
    return apply { forEachIndexed(action) }
}
```

It performs the given [action] on each character, providing sequential index with the character.

The `none` function is defined as follows:

```kotlin
public fun CharSequence.none(): Boolean {
    return isEmpty()
}
```

It returns `true` if the char sequence has no characters or `false` if there are characters.

The `onEach` function is defined as follows:

```kotlin
public inline fun <S : CharSequence> S.onEach(action: (Char) -> Unit): S {
    return apply { for (element in this) action(element) }
}
```

It performs the given [action] on each character.

The `onEachIndexed` function is defined as follows:

```kotlin
public inline fun <S : CharSequence> S.onEachIndexed(action: (index: Int, Char) -> Unit): S {
    return apply { forEachIndexed(action) }
}
```

It performs the given [action] on each character, providing sequential index with the character.
Throws an exception if this char sequence is empty. If the char sequence can be empty in an expected way, please use [reduceOrNull] instead. It returns `null` when its receiver is empty.

}
char sequence to a list of strings around occurrences of the specified [delimiter].

@param delimiters One or more strings to be used as delimiters.
@param ignoreCase `true` to ignore character case when matching a delimiter. By default `false`.

The maximum number of substrings to return. Zero by default means no limit is set.

To avoid ambiguous results when strings in [delimiters] have characters in common, this method proceeds from the beginning to the end of this string, and matches at each position the first element in [delimiters] that is equal to a delimiter in this instance at that position.

```kotlin
public fun CharSequence.split(vararg delimiters: String, ignoreCase: Boolean = false, limit: Int = 0): List<String> {
    if (delimiters.size == 1) {
        val delimiter = delimiters[0] as String
        if (!delimiter.isEmpty()) {
            return split(delimiter, ignoreCase, limit)
        }
    }

    return rangesDelimitedBy(delimiters, ignoreCase = ignoreCase, limit = limit).asIterable().map { substring(it) }
}
```

/**
 * Gives a declaration (a function, a property or a class) specific name in JavaScript.
 * This may be useful in the following cases:
 *   * There are two functions for which the compiler gives same name in JavaScript, you can mark one with @JsName(...) to prevent the compiler from reporting error.
 *   * You are writing a JavaScript library in Kotlin. The compiler produces mangled names for functions with parameters, which is unnatural for usual JavaScript developer. You can put @JsName(...) on functions you want to be available from JavaScript.
 *   * For some reason you want to rename declaration, e.g. there's common term in JavaScript library in Kotlin. The compiler produces mangled names for functions with parameters, which is unnatural for usual JavaScript developer. You can put @JsName(...) on functions you want to be available from JavaScript.
 *   * For some reason you want to rename declaration, e.g. there's common term in JavaScript library in Kotlin. The compiler produces mangled names for functions with parameters, which is unnatural for usual JavaScript developer.

```
Example:

```kotlin
@JsModule("jquery")
external abstract class JQuery() {
  // some declarations here
}

@JsModule("jquery")
external fun JQuery(element: Element): JQuery
```

package kotlin

import kotlin.annotation.AnnotationTarget.*
lists that differ only in the return type of a functional parameter, this annotation enables overload selection by the type of the value returned from the lambda function passed to this functional parameter. Example:

```kotlin
fun create(intProducer: () -> Int): Int

fun create(doubleProducer: () -> Double): Double
```

The annotation being applied to one of overloads allows to resolve this ambiguity by analyzing what value is returned from the lambda function. This annotation is also used to discriminate the annotated overloads in case if overload selection still cannot choose one of them even taking in account the result of lambda parameter analysis. In that case a warning is reported.

```kotlin
@OverloadResolutionByLambdaReturnType
fun create(intProducer: () -> Int): Int
```

The annotation being applied to one of overloads allows to resolve this ambiguity by analyzing what value is returned from the lambda function. This annotation is also used to discriminate the annotated overloads in case if overload selection still cannot choose one of them even taking in account the result of lambda parameter analysis. In that case a warning is reported.

```kotlin
@OverloadResolutionByLambdaReturnType
fun create(doubleProducer: () -> Double): Double
```

The annotation being applied to one of overloads allows to resolve this ambiguity by analyzing what value is returned from the lambda function. This annotation is also used to discriminate the annotated overloads in case if overload selection still cannot choose one of them even taking in account the result of lambda parameter analysis. In that case a warning is reported.

        }
    }

}
Prepends the specified [element] to this deque.

```kotlin
*\n    public fun addFirst(element: E) {
        ensureCapacity(size + 1)\n        head = decremented(head)\n        elementData[head] = element\n        size += 1\n    }
```

Removes the first element from this deque and returns that removed element, or throws [NoSuchElementException] if this deque is empty.

```kotlin
*\n    public fun removeFirst(): E {
        if (is_empty()) throw
        // NoSuchElementException("ArrayDeque is empty.")\n        val element = internalGet(head)\n        elementData[head] = null\n        head = incremented(head)\n        size -= 1\n        return element\n    }
```

Removes the last element from this deque and returns that removed element, or throws [NoSuchElementException] if this deque is empty.

```kotlin
*\n    public fun removeLast(): E {
        if (is_empty()) throw
        // NoSuchElementException("ArrayDeque is empty.")\n        val internalLastIndex = internalLastIndex\n        val element = internalGet(internalLastIndex)\n        elementData[internalLastIndex] = null\n        size -= 1\n        return element\n    }
```

Removes the first element from this deque and returns that removed element, or returns `null` if this deque is empty.

```kotlin
*\n    public fun removeFirstOrNull(): E? = if (is_empty()) null else removeFirst()\n```

Removes the last element from this deque and returns that removed element, or throws [NoSuchElementException] if this deque is empty.

```kotlin
*\n    public fun removeLastOrNull(): E? = if (is_empty()) null else removeLast()\n```

Elements in circular array lay in 2 ways:

1. 'head' is less than 'tail': `[#, #, e1, e2, e3, #]` // 2. 'head' is greater than 'tail': `[e3, #, #, #, e1, e2]` // where head is the index of the first element in the circular array, and tail is the index following the last element. // At this point the insertion index is not equal to head or tail. // Also the circular array can store at least one more element. // Depending on where the given element must be inserted the preceding or the succeeding elements will be shifted to make room for the element to be inserted. // In case the preceding elements are shifted: * if the insertion index is greater than the head (regardless of circular array form) // -> shift the preceding elements // * otherwise, the circular array has (2) form and the insertion index is less than tail // -> shift all elements in the back of the array // -> shift preceding elements in the front of the array // In case the succeeding elements are shifted: * if the insertion index is less than the tail (regardless of circular array form) // -> shift the succeeding elements // * otherwise, the circular array has (2) form and the insertion index is greater than head // -> shift all elements in the front of the array // -> shift succeeding elements in the back of the array // if (index < (size + 1) shr 1) { // closer to the first element // shift preceding elements\n        val decrementedInternalIndex = decremented(internalIndex)\n        val decrementedHead = decremented(head)\n        if (decrementedInternalIndex >= head) {\n            elementData[decrementedHead] = elementData[head]\n            // head can be zero\n            elementData.copyInto(elementData, head, head + 1,\n                decrementedInternalIndex + 1)\n        } else { // head > tail\n            elementData.copyInto(elementData, head - 1, head, elementData.size)\n        }\n        // head can't be zero\n        elementData[elementData.size - 1] = elementData[0]\n        elementData.copyInto(elementData, 0, 1, decrementedInternalIndex + 1)\n    }\n```

resumed by invoking [Continuation.resumeWith] at some moment in the\nfuture when the result becomes
available to resume the computation.\n\nOtherwise, the return value of the [block] must have a type assignable
to [T] and represents the result of this suspend function.\n\nIt means that the execution was not suspended and the
[Continuation] provided to the [block] shall not be invoked.\nAs the result type of the [block] is declared as
`Any?` and cannot be correctly type-checked,\nits proper return type remains on the conscience of the suspend
function's author.\n\nInvocation of [Continuation.resumeWith] resumes coroutine directly in the invoker's
thread without going through the\n[Continuation] provided to the [block] shall not be invoked.\n\n[Continuation.intercepted] can be used to acquire the intercepted continuation.\nThe reason is that it is not
recommended to call either [Continuation.resume] nor [Continuation.resumeWithException] functions
synchronously in the same stackframe where suspension function is run. Use [suspendCoroutine] as a safer way
to obtain current continuation instance.

Trims leading whitespace characters followed by [marginPrefix] from every line of a source string and removes the first and the last lines if they are blank (notice difference blank vs empty).

- `trimMargin` doesn't affect a line if it doesn't contain [marginPrefix] except the first and the last blank lines.
- `trimIndent` Doesn't preserve the original line endings.

- Pipe character

- Sample usage

- Kotlin text

- Is Whitespace

- Replace indent by margin

- Replace indent

- Prepend indent

- Indent width

- Get indent function

- reindent

- Typography

- Copyright 2010-2018 JetBrains s.r.o. and Kotlin Programming Language contributors.

Lazy instance.

- public val value: T

- Returns `true` if a value for this Lazy instance has been already initialized, and `false` otherwise.
- Once this function has returned `true` it stays `true` for the rest of lifetime of this Lazy instance.
- public fun isInitialized(): Boolean

- Creates a new instance of the [Lazy] that is already initialized with the specified [value].
- An extension to delegate a read-only property of type [T] to an instance of [Lazy].
- A Lazy instance does not allow to use instances of Lazy for property delegation; only `val` property.
- String by lazy { initializer }
- lazy<caret>{value: T} = LazyImpl(value)
- * An extension to delegate a read-only property of type [T] to an instance of [Lazy].
- This extension allows to use instances of Lazy for property delegation; only `val` property.
- A Lazy instance synchronizes initialization among multiple threads.
- enum class LazyThreadSafetyMode {
- SYNCHRONIZED, PUBLICATION, NONE
- * No locks are used to synchronize an access to the [Lazy] instance value; if the instance is accessed from multiple threads, its behavior is undefined.
- This mode should not be used unless the [Lazy] instance is guaranteed never to be initialized from more than one thread.
- UNINITIALIZED_VALUE
- internal to be called from lazy in JS
- UnsafeLazyImpl<out T>(initializer: () -> T) = Lazy<caret>T

- * Counts the number of set bits in the binary representation of this [Int] number.
- *
- * Counts the number of consecutive most significant bits that are zero in the binary representation of this [Int] number.
- *
- * Counts the number of consecutive least significant bits that are zero in the binary representation of this [Int] number.
- *
- * Returns a number having a single bit set in the position of the most significant set bit of this [Int] number, or zero, if this number is zero.
- *
- * Returns a number having a single bit set in the position of the least significant set bit of this [Int] number, or zero, if this number is zero.
- *
- * Rotates the binary representation of this [Int] number left by the specified [bitCount] number of bits.
- * The most significant bits pushed out from the left side reenter the number as the least significant bits on the right side.
Int.rotateLeft(bitCount: Int): Int

```kotlin
Int.rotateLeft(bitCount: Int): Int
```

The least significant bits pushed out from the right side reenter the number as the most significant bits on the left side.

```
*Int.rotateLeft(bitCount: Int): Int
Int.rotateLeft(bitCount: Int): Int
```

Rotating the number right by a negative bit count is the same as rotating it left by the negated bit count:

```
number.rotateRight(-n) == number.rotateLeft(n)
```

Rotating by a multiple of `Int.SIZE_BITS` (32) returns the same number, or more generally:

```
number.rotateRight(n % 32) == number.rotateLeft(n % 32)
```

Long.rotateLeft(bitCount: Int): Long

```kotlin
Long.rotateLeft(bitCount: Int): Long
```

The most significant bits pushed out from the left side reenter the number as the least significant bits on the right side.

```
*Long.rotateLeft(bitCount: Int): Long
Long.rotateLeft(bitCount: Int): Long
```

Rotating the number left by a negative bit count is the same as rotating it right by the negated bit count:

```
number.rotateLeft(-n) == number.rotateRight(n)
```

Rotating by a multiple of `Long.SIZE_BITS` (64) returns the same number, or more generally:

```
number.rotateLeft(n % 64) == number.rotateRight(n % 64)
```

Byte.countOneBits(): Int

```kotlin
Byte.countOneBits(): Int
```

The number having a single bit set in the position of the most significant set bit of this `Long` number.

```
*Long.countOneBits(): Int
Long.countOneBits(): Int
```

Returns a number having a single bit set in the position of the least significant set bit of this `Long` number.

```
*Long.countLeadingZeroBits(): Int
Long.countLeadingZeroBits(): Int
```

Returns a number having a single bit set in the position of the least significant set bit of this `Long` number.

```
*Long.countTrailingZeroBits(): Int
Long.countTrailingZeroBits(): Int
```

Returns a number having a single bit set in the position of the most significant set bit of this `Byte` number.

```
*Byte.countOneBits(): Int
Byte.countOneBits(): Int
```

The number having a single bit set in the position of the most significant set bit of this `Byte` number.

```
*Byte.countLeadingZeroBits(): Int
Byte.countLeadingZeroBits(): Int
```

The number having a single bit set in the position of the least significant set bit of this `Byte` number.

```
*Byte.countTrailingZeroBits(): Int
Byte.countTrailingZeroBits(): Int
```

The number having a single bit set in the position of the most significant set bit of this `Byte` number.

```
*Byte.takeHighestOneBit(): Byte
Byte.takeHighestOneBit(): Byte
```

The number having a single bit set in the position of the least significant set bit of this `Byte` number.

```
*Byte.takeLowestOneBit(): Byte
Byte.takeLowestOneBit(): Byte
```

The number having a single bit set in the position of the most significant set bit of this `Byte` number.

```
*Byte.takeTrailingZeroBits(): Int
Byte.takeTrailingZeroBits(): Int
```

The number having a single bit set in the position of the least significant set bit of this `Byte` number.

```
*Byte.takeLeadingZeroBits(): Int
Byte.takeLeadingZeroBits(): Int
```

The number having a single bit set in the position of the most significant set bit of this `Byte` number.

```
*Byte.takeTrailingZeroBits(): Int
Byte.takeTrailingZeroBits(): Int
```
number is zero.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Library General Public License instead.) You can apply it to
your programs, too.
When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author’s protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors’ reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone’s free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another
language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

   a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

   b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

   c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in
themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.
If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other
circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE
PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,
REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING
OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED
TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY
YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER
PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
convey the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year>  <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA  02110-1301 USA
Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work.
"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.
"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

-----------------------------------------------------------------------------------------------

This project includes code from Daniel Lemire's JavaFastPFOR project in this binary artifact. The "Lemire" bit packing classes produced by parquet-generator are derived from the JavaFastPFOR project.

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
b) in the case of each subsequent Contributor:
   i) changes to the Program, and
   ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and
object code form. This patent license shall apply to the combination of
the Contribution and the Program if, at the time the Contribution is
added by the Contributor, such addition of the Contribution causes such
combination to be covered by the Licensed Patents. The patent license
shall not apply to any other combinations which include the Contribution.
No hardware per se is licensed hereunder.
c) Recipient understands that although each Contributor grants the licenses
to its Contributions set forth herein, no assurances are provided by any
Contributor that the Program does not infringe the patent or other
intellectual property rights of any other entity. Each Contributor
disclaims any liability to Recipient for claims brought by any other
entity based on infringement of intellectual property rights or
otherwise. As a condition to exercising the rights and licenses granted
hereunder, each Recipient hereby assumes sole responsibility to secure
any other intellectual property rights needed, if any. For example, if a
third party patent license is required to allow Recipient to distribute
the Program, it is Recipient's responsibility to acquire that license
before distributing the Program.
d) Each Contributor represents that to its knowledge it has sufficient
copyright rights in its Contribution, if any, to grant the copyright
license set forth in this Agreement.

3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under
its own license agreement, provided that:

a) it complies with the terms and conditions of this Agreement; and
b) its license agreement:
   i) effectively disclaims on behalf of all Contributors all warranties
      and conditions, express and implied, including warranties or
      conditions of title and non-infringement, and implied warranties or
      conditions of merchantability and fitness for a particular purpose;
   ii) effectively excludes on behalf of all Contributors all liability for
       damages, including direct, indirect, special, incidental and
       consequential damages, such as lost profits;
   iii) states that any provisions which differ from this Agreement are
       offered by that Contributor alone and not by any other party; and
   iv) states that source code for the Program is available from such
       Contributor, and informs licensees how to obtain it in a reasonable
       manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

a) it must be made available under this Agreement; and
b) a copy of this Agreement must be included with each copy of the Program.
   Contributors may not remove or alter any copyright notices contained
   within the Program.
Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must:

a) promptly notify the Commercial Contributor in writing of such claim, and
b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the
risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the
Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.
5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS
APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# Eclipse Public License - v 2.0
1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial content
   Distributed under this Agreement, and

b) in the case of each subsequent Contributor:
   i) changes to the Program, and
   ii) additions to the Program;
   where such changes and/or additions to the Program originate from
   and are Distributed by that particular Contributor. A Contribution
   "originates" from a Contributor if it was added to the Program by
   such Contributor itself or anyone acting on such Contributor's behalf.
   Contributions do not include changes or additions to the Program that
   are not Modified Works.

"Contributor" means any person or entity that Distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which
are necessarily infringed by the use or sale of its Contribution alone
or when combined with the Program.

"Program" means the Contributions Distributed in accordance with this
Agreement.

"Recipient" means anyone who receives the Program under this Agreement
or any Secondary License (as applicable), including Contributors.

"Derivative Works" shall mean any work, whether in Source Code or other
form, that is based on (or derived from) the Program and for which the
editorial revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship.

"Modified Works" shall mean any work in Source Code or other form that
results from an addition to, deletion from, or modification of the
contents of the Program, including, for purposes of clarity any new file
in Source Code form that contains any contents of the Program. Modified
Works shall not include works that contain only declarations,
interfaces, types, classes, structures, or files of the Program solely
