setmntent(), but not getmntent() or endmntent(), and noted
that having a spec of setmntent() was of little use without
also having a spec of getmntent().)
See also https://lists.linux-foundation.org/pipermail/lsb-discuss/2006-October/003078.html

getnameinfo.3
Tolga Dalman
Remove mention of sa_len field from example code.
That field is a BSDism not present on Linux.
mtk
Various minor changes.

inet.3
mtk / Stephane Chazelas
inet_aton() is *not* in POSIX.1.
Rewrote discussion
of why inet_addr() is disfavored.
SEE ALSO: Add getaddrinfo(3).
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482979.
mtk, after a note by Stephane Chazelas
Describe the various address forms supported by inet_aton().
mtk
Rewrite description of inet_network().
Clarify discussion of inet_lnaof(), inet_netof(), and inet_makeaddr().
Add discussion of Classful Addressing, noting that it is obsolete.
Added an EXAMPLE program.
mtk
Relocate discussion of i386 byte order to NOTES.
Note that inet_aton() returns an address in network byte order.
SEE ALSO: Add byteorder(3) and getnameinfo(3).

inet_ntop.3
mtk
Remove unneeded header files from SYNOPSIS.
SEE ALSO: Add inet(3) and getnameinfo(3).
Make NAME line more precise.
Move errors to an ERRORS section.
Add EXAMPLE section pointing to inet_pton(3).

inet_pton.3
mtk / Stephane Chazelas
Remove

statement that inet_pton() extends inet_ntoa();
that's not really true, since inet_pton() doesn't support
all of the string forms that are supported by inet_ntoa().
SEE ALSO: Add getaddrinfo(3).
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482987.
mtk
Describe IPv6 address formats.
Describe dotted decimal format in more detail.
Add an example program.
mtk
Remove unneeded header files from SYNOPSIS.
Make NAME line more precise.
Make description of return value more precise.
SEE ALSO: Add inet(3).

mkfifo.3
mtk
Note that EEXIST applies, even if the pathname is a
(possibly dangling) symbolic link.

mkstemp.3
mtk
Fix discussion of O_EXCL flag.
These functions may also fail for any of the errors described
in open(2).
Various other rewordings.

readdir.3
mtk
Document DT_LNK (symbolic link) for d_type field.

Reorder DT_ entries alphabetically.

remainder.3
mtk
Recommend against drem(), in favor of remainder().

scanf.3
mtk, after a note from Stephane Chazelas
Add an ERRORS section documenting at least some of the errors
that may occur for scanf().
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254.
mtk, after a note from Stephane Chazelas; review by Stephane Chazelas
Document the GNU 'a' modifier for dynamically allocating strings.
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254.
Document the GNU 'm' modifier for dynamically allocating strings.

strcat.3

Andreas Herrmann
s/strcat/strncat/ (a typo that changed the semantics in
DESCRIPTION).

strerror.3
mtk, after a note from Daniele Giacomini
Modify SYNOPSIS to show prototypes of both versions of strerror_r(),
and make other small clarifications of the description regarding
the two versions.

random.4
George Spelvin (taking time out from his busy Broadway schedule),
with some tweaks by Matt Mackall and mtk
Add a Usage subsection that recommends most users to use
/dev/urandom, and emphasizes parsimonious usage of
/dev/random.

locale.5
Petr Baudis <pasky@suse.cz>
LC_TIME: Describe first_weekday and first_workday.

proc.5
mtk
The various CPU time fields in /proc/stat and /proc/PID/stat
return time in clock ticks (USER_HZ, cputime_to_clock_t(),
sysconf(_SC_CLK_TCK)).
Updated, clarified and expanded the description several
fields in /proc/[number]/stat.
mtk
Clarified and expanded the description of /proc/[number]/fd.
mtk
Updated and clarified the description of /proc/[number]/statm.
mtk
Updated and clarified the description of /proc/sys/fs/dentry-state.
mtk
Many formatting, wording, and grammar fixes.

man-pages.7
mtk
Enhanced description
of VERSIONS section.

mq_overview.7
mtk
Note that Linux does not currently support ACLs for POSIX
message queues.

sem_overview.7

mtk
Note that Linux supports ACLs on POSIX named semaphores
since 2.6.19.

time.7
mtk, with some suggestions from Bart Van Assche and Thomas Gleixner
Added some details about where jiffies come into play.
Added section on high-resolution timers.
Mentioned a few other time-related interfaces at various
points in the page.
See http://thread.gmane.org/gmane.linux.kernel/697378.

unix.7
mtk, after a note by Samuel Thibault
Provide a clear description of the three types of address that
can appear in the sockaddr_un structure: pathname, unnamed,
and abstract.

========== Changes in man-pages-3.02 ==========

Released: 2008-07-02, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that
have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Reuben Thomas <rrt@sc3d.org>
Sam Varshavchik <mrsam@courier-mta.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>
WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

clock_nanosleep.2
mtk
A description of the clock_nanosleep() system call,
which was added in kernel 2.6.

getgrouplist.3
  mtk
    A near complete rewrite, including additional information and
    a new example program.

getutmp.3
  mtk
    Documents getutmp(3) and getutmpx(3).

gnu_get_libc_version.3
  mtk
    Documents gnu_get_libc_version(3) and gnu_get_libc_release(3).

sigwait.3
  mtk
    Documents sigwait(3).

shm_overview.7
  mtk
    An overview of the POSIX shared memory API.

Newly documented interfaces in existing pages
---

updwtmp.3
   mtk
    Document updwtmpx(3).

New links
---

getutmpx.3
  mtk
    Link to getutmp.3.

gnu_get_libc_release.3
  mtk
    Link to gnu_get_libc_version.3

updwtmpx.3
  mtk
    Link to updwtmp.3

utmpxname.3
  mtk

Link to getutent.3.

utmpx.5
  mtk
    Link to utmp.5.

Global changes

Various pages
  mtk
    s/user name/username/

Various pages
  mtk
    s/host name/hostname/

Changes to individual pages
---

fchmodat.2
  Alain Portal
    SEE ALSO: add symlink.7. (3.01 changelog wrongly said this
    had been done.)

io_setup.2
  Alain Portal
    Remove superfluous text from RETURN VALUE.

mmap.2
  mtk
    SEE ALSO: Add mmap(2), shm_overview(7).

shmget.2
shmop.2
  mtk
    SEE ALSO: add shm_overview(7).

sigreturn.2
  mtk
    Added a bit more detail on what sigreturn() actually does.

signalfd.2
sigsuspend.2
  mtk
    SEE ALSO: Add

sigwait(3).

sigwaitinfo.2
  mtk
    Describe behavior when multiple threads are blocked in
    sigwaitinfo()/sigtimedwait().
    SEE ALSO: Add sigwait(3).

dirfd.3
  mtk
    RETURN VALUE: describe return value on success.
    Add an ERRORS section documenting POSIX.1-specified errors.

getaddrinfo.3
  mtk, after a note by Stephane Chazelas
    getaddrinfo() supports specifying IPv6 scope-IDs.

getlogin.3
  mtk
    ERRORS: add ENOTTY.
    SEE ALSO: add utmp(5).

getutent.3
  WANG Cong
    utmpname() does return a value.
  mtk
    Add paragraph to start of DESCRIPTION recommending
    use of POSIX.1 "utmpx" functions.
    CONFORMING TO: mention utmpxname().
    Add an ERRORS section.
    There are no utmpx equivalents of the _r reentrant functions.
    Clarify discussion of return values.
    Add pointer to definition of utmp structure in utmp(5).
    Clarify discussion of utmpx file on other systems (versus
     Linux situation).

getutent.3
  mtk
    SEE ALSO: add getutmp(3)

inet_pton.3
  Stephane Chazelas
    Fix error in description of IPv6 presentation format:
    s/x.x.x.x.x.x.x.x/x:x:x:x:x:x:x:x/.

setbuf.3
  Reuben Thomas / mtk
    Fix confused wording for return value of setvbuf().

Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=488104.
  mtk
    Other minor rewordings.

shm_open.3
  mtk
    SEE ALSO: add shm_overview(7).

random.4
  mtk, after a note by Alain Portal
    Slight rewording to make life easier for non-native English
    speakers.

utmp.5
  mtk
    Add discussion of POSIX.1 utmpx specification.
    Provide a little more detail on fields of utmp structure.
    Added comments to macros for ut_type field.
    Correct the description of the ut_id field.
  mtk
    Consolidate duplicated information about ut_tv and ut_session
    on biarch platforms.
  mtk
    Move some text from
 CONFORMING TO to NOTES.
    Removed some crufty text.
    SEE ALSO: add login(3), logout(3), logwtmp(3).
    UT_LINESIZE is 32 (not 12).
  mtk
    SEE ALSO: add getutmp(3)

man-pages.7
  mtk
    Enhanced the discussion of font conventions.

signal.7
  mtk
    Note that the delivery order of multiple pending standard
    signals is unspecified.
    SEE ALSO: Add sigwait(3).

========== Changes in man-pages-3.03 ==========

Released: 2008-07-08, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@muc.de>
Hidetoshi Seto <seto.hidetoshi@jp.fujitsu.com>
Li Zefan <lizf@cn.fujitsu.com>
Paul Jackson <pj@sgi.com>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

getcpu.2
  Andi Kleen, with some text and edits
 by mtk
    Documents the getcpu(2) system call, introduced in Linux 2.6.19.

sched_getcpu.3
  mtk
    Documents sched_getcpu(3), a wrapper for getcpu(2), provided
    since glibc 2.6.

cpuset.7
  Paul Jackson, with review and editing by mtk, and comments by
  Hidetoshi Seto and Li Zefan
    A description of the cpuset file system, the mechanism introduced
    kernel 2.6.12 for confining processes to designated processors
    and nodes. (Becomes the fourth largest page in man-pages!)

Newly documented interfaces in existing pages
---

readdir.3
  mtk
    Add documentation of readdir_r().

New links
---

updwtmpx.3

Alain Portal
Link to updwtmp.3 (3.02 changelog wrongly said this had been done).

readdir_r.3
mtk
Link to readdir.3.

Global changes
---

get_mempolicy.2
mbind.2
sched_setaffinity.2
set_mempolicy.2
mtk
SEE ALSO: Add getcpu(2).

accept.2
close.2
connect.2
dup.2
epoll_wait.2
fcntl.2
flock.2
futex.2
msgop.2
poll.2
read.2
recv.2
select.2
semop.2
send.2
sigwaitinfo.2
spu_run.2
wait.2
write.2
aio_suspend.3
mq_receive.3
mq_send.3
scanf.3
sem_wait.3
usleep.3
inotify.7
mtk
ERRORS: Added reference to signal(7) in discussion of EINTR.

Various pages

mtk

Wrapped very long source lines.

Changes to individual pages
---

accept.2

mtk

Small wording change.

io_getevents.2

mtk

ERRORS: Add EINTR error.

open.2

mtk

ERRORS: Add EINTR error.

sigaction.2

mtk

Note circumstances in which each SA_* flag is meaningful.

mtk

Describe POSIX specification, and Linux semantics for
SA_NOCLDWAIT when establishing a handler for SIGCHLD.

mtk

Add pointer under SA_RESTART to new text in signal(7)
describing system call restarting.

mtk

Other minor edits.

truncate.2

mtk

ERRORS: Added EINTR error.

A few minor rewordings.

wait.2

mtk

Remove statement that WUNTRACED and WCONTINUED only have effect
if SA_NOCLDSTOP has not been set for SIGCHLD. That's not true.

errno.3

mtk

Add a pointer to signal(7) for further explanation of EINTR.

getgrouplist.3

mtk

SEE ALSO: Add passwd(5).

readdir.3
  mtk
    Remove <sys/types.h> from SYNOPSIS; POSIX.1-2001 does not
    require it.
    Some minor rewordings.

sleep.3
  mtk
    RETURN VALUE: explicitly mention interruption by signal handler.
    SEE ALSO: add signal(7).

usleep.3
  mtk
    POSIX.1-2001 also only documents EINVAL.

group.5
  mtk
    SEE ALSO: Add getgrent(3), getgrnam(3).

passwd.5
  mtk
    SEE ALSO: Add getpwent(3), getpwnam(3).

proc.5
  mtk
    Add pointer to description of /proc/PID/cpuset in cpuset(7).

signal.7
  mtk
    Add a section describing system call restarting, and noting
    which system calls are affected
 by SA_RESTART, and which
    system calls are never restarted.
  mtk
    Describe the aberrant Linux behavior whereby a stop signal
    plus SIGCONT can interrupt some system calls, even if no
    signal handler has been established, and note the system
    calls that behave this way.
  mtk
    Note a few more architectures on which signal numbers are valid.
    SEE ALSO: added a number of pages.
  mtk
    Update async-signal-safe function list for POSIX.1-2004 (which
    adds sockatmark()).

========== Changes in man-pages-3.04 ==========

Sripathi Kodi <sripathik@in.ibm.com>
Vincent Lefevre <vincent@vinc17.org>

Apologies if I missed anyone!

Web site
---

licenses.html
  mtk
    A page describing the preferred licenses for new pages that
    are contributed to man-pages.

New and rewritten pages
---

utimensat.2
  mtk
    New page documenting the utimensat() system call, new in 2.6.22,
    and futimens() library function.

end.3
  mtk

Documents etext, edata, and end symbols.

Newly documented interfaces in existing pages
---

memchr.3
  mtk
    Add description of rawmemchr().

proc.5
  mtk
    Document /proc/config.gz (new in kernel 2.6).
  mtk, based on text from Documentation/vm/sysctl.txt
    Document /proc/sys/vm/oom_kill_allocating_task
     (new in Linux 2.6.24).
    Document /proc/sys/vm/oom_dump_tasks
    (new in Linux 2.6.25).
    Document /proc/sys/vm/panic_on_oom
    (new in Linux 2.6.18).

New links
---

edata.3
etext.3
  mtk
    Links to end.3.

futimens.3
  mtk
    Link to new utimensat.2.

getdate_err.3
  mtk
    Link to getdate.3.

h_errno.3
  mtk
    Link to gethostbyname.3.

optarg.3
opterr.3
optind.3
optopt.3
  mtk
    Links to getopt.3.

rawmemchr.3
  mtk
    Link to memchr.3.

sys_errlist.3
sys_nerr.3
  mtk
    Links to perror.3.

Global changes

Various pages
  mtk
    s/parameter/argument/ when talking about the things given
    to a function call, for consistency with majority usage.

Various pages
  mtk
    s/UNIX/Unix/, when not used as part of a trademark,
    for consistency with majority usage in pages.

Various pages
  mtk, after a note from Alain Portal
    Put SEE ALSO entries
 into alphabetical order.

Various pages
  mtk
    Remove period at end of SEE ALSO list.

Various pages
  mtk, after a note by Alain Portal
    Even when the CONFORMING TO section is just a list of standards,
    they should be terminated by a period.

getpriority.2
MB_LEN_MAX.3
MB_CUR_MAX.3
fwide.3
mblen.3
rtime.3
st.4
proc.5
bootparam.7
man-pages.7

utf-8.7
tcp.5
  mtk / Alain Portal
    Small wording fixes -- express <=, <, >=, > in words when in
    running text.

sched_setparam.2
sched_setscheduler.2
getgrent_r.3
hash.3
  mtk
    Minor rewording w.r.t. use of the term "parameter".

Typographical or grammatical errors have been corrected in several
other places. (Many, many thanks to Alain Portal!)

Changes to individual pages
----

capget.2
  Andrew Morgan
    Update in line with addition of file capabilities and
    64-bit capability sets in kernel 2.6.2[45].

clock_nanosleep.2
  mtk
    Add "Link with -lrt"
 to SYNOPSIS.

getrusage.2
  Sripathi Kodi
    Document RUSAGE_THREAD, new in 2.6.26.
  mtk
    Improve description of RUSAGE_CHILDREN.
    Add pointer to /proc/PID/stat in proc(5).
    Other minor clean-ups.

ioprio_set.2
  Nikanth Karthikesan
    Since Linux 2.6.25, CAP_SYS_ADMIN is longer required to set
    a low priority (IOPRIO_CLASS_IDLE).

mount.2
  mtk
    Since Linux 2.6.26, MS_RDONLY honors bind mounts.

openat.2

mtk
SEE ALSO: add utimensat(3).

prctl.2
Serge Hallyn, with some edits/input from mtk
Document PR_CAPBSET_READ and PR_CAPBSET_DROP.
Erik Bosman
Document PR_GET_TSC and PR_SET_TSC.
mtk, reviewed by Andrea Arcangeli
Document PR_SET_SECCOMP and PR_GET_SECCOMP.
mtk
PR_SET_KEEPCAPS and PR_GET_KEEPCAPS operate on a per-thread
setting, not a per-process setting.
mtk
Clarify fork(2) details for PR_SET_PDEATHSIG.
mtk
Add description of PR_SET_SECUREBITS
and PR_GET_SECUREBITS,
as well as pointer to further info in capabilities(7).
mtk
PR_GET_ENDIAN returns endianness info in location pointed to by
arg2 (not as function result, as was implied by previous text).
mtk
Expand description of PR_SET_NAME and PR_GET_NAME.
mtk
RETURN VALUE: bring up to date for various options.
mtk
Various improvements in ERRORS.
mtk
Note that PR_SET_TIMING setting of PR_TIMING_TIMESTAMP is not
currently implemented.
mtk
Minor changes:
* Clarify wording for PR_GET_UNALIGN, PR_GET_FPEMU, and
PR_GET_FPEXC.
* Some reformatting of kernel version information.
* Reorder PR_GET_ENDIAN and PR_SET_ENDIAN entries.

readlinkat.2
John Brooks / mtk
Fix and reword erroneous RETURN VALUE text.

recv.2
mtk
Noted which flags appeared in Linux 2.2.

sched_setaffinity.2
mtk, after a Fedora downstream patch

Update type used for cpusetsize argument in SYNOPSIS.

select.2
  Andreas Mohr / mtk
    Clarify "zero timeout" case.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=490868.

send.2
  mtk
    Noted which flags appeared in Linux 2.2.

sigaction.2
  mtk
    Document si_overrun and si_tid fields of siginfo structure.
    Add some text for si_trapno field.
    The si_errno field is *generally* unused.
  mtk
    Put descriptions of SA_* constants in alphabetical order.

signal.2
  mtk
    Rewrote and expanded portability discussion.
    NOTES: Show the raw prototype of signal() (without use of
    sighandler_t).

signalfd.2
  mtk
    Modify description of ssi_trapno field.

swapon.2
  mtk
    Fix two version number typos for MAX_SWAPFILES discussion:
    s/2.6.10/2.4.10/

utime.2
  mtk
     SEE ALSO: add utimensat(2), futimens(3).

dl_iterate_phdr.3
  Alain Portal
    SEE ALSO: Add elf(5).

crypt.3

  mtk, after a Fedora downstream patch
    Describe additional encryption algorithms.
    See also: https://bugzilla.redhat.com/show_bug.cgi?id=428280.

errno.3
  mtk
    Small rewrites in DESCRIPTION.

exec.3
  mtk, after a note from Alain Portal
    Small rewording.

exp10.3
  Alain Portal
    SEE ALSO: Add log10(3).

exp2.3
  Alain Portal
    Add C99 to CONFORMING TO.

fgetgrent.3
  Alain Portal
    Add references to group(5).
  mtk
    Minor rewordings.
    SEE ALSO: add fopen(3).

fgetpwent.3
  Alain Portal
    Add reference to passwd(5).
  mtk
    Minor rewordings.
    SEE ALSO: add fopen(3).

frexp.3
  Alain Portal
    Add C99 to CONFORMING TO.

futimes.3
  mtk
     SEE ALSO: remove futimesat(2); add utimensat(2).

getopt.3
  mtk
    Add details on initial value of optind, and note that it can
    be reset (to 1) to restart scanning of an argument vector.
    Add a NOTES section describing the
 glibc-specific behavior
    when optind is reset to 0 (rather than 1).
    See http://groups.google.com/group/comp.unix.programmer/browse_thread/thread/be0d0b7a07a165fb
  mtk

Note glibc extensions under CONFORMING TO.

getspnam.3
mtk
Improve comments on struct spwd.

getpw.3
Alain Portal
RETURN VALUE: note that errno is set on error.
mtk
Add EINVAL error.

insque.3
mtk / Alain Portal
Minor rewordings.

log.3
Alain Portal
Remove unnecessary sentence in ERRORS.

log10.3
mtk
SEE ALSO: Add exp10(3).

offsetof.3
Alain Portal
Small wording improvement.

pow.3
Alain Portal
Remove unnecessary sentence in ERRORS.

printf.3
mtk / Alain Portal
Many small formatting fixes.

proc.5
mtk
Remove redundant summary list of files in description of
/proc/sys/kernel.
Make kernel version for /proc/sys/kernel/panic_on_oops more precise.
Make kernel
version for /proc/sys/kernel/pid_max more precise.
Add Documentation/sysctl/vm.txt to SEE ALSO.
Other minor edits.

profil.3
mtk / Alain Portal

Small wording improvement.

rtime.3
  mtk, after a note by Alain Portal
    Clarify meaning of midnight on 1 Jan 1900/1970.
  mtk
    Remove netdate(1) and rdate(1) from SEE ALSO, since these pages
    don't seem to exist on Linux systems.

scanf.3
  Vincent Lefevre / mtk
    Clarify treatment of initial white space by %% conversion
    specification.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435648.
  mtk
    Many small formatting fixes.

stdin.3
  Alain Portal
    Rename CONSIDERATIONS section to NOTES, and relocate
    to appropriate place on page.

tmpfile.3
  mtk, after a note by Alain Portal
    Prepend "POSIX.1-2001 specifies that: " to the sentence stating
    that tmpfile() may write to stdout. (AFAICS, glibc's tmpfile()
    does
 not do this.)

ttyname.3
  Alain Portal
    Remove unnecessary sentence in ERRORS.

wcsdup.3
  Alain Portal
    Make wording more precise: the memory allocated by wcsdup(3)
    should be freed with free(3).

wordexp.3
  Alain Portal / mtk
    Move example into proper EXAMPLE section.

tty_ioctl.4
  mtk / Petr Gajdos
    The features in the "Get and Set Window Size" subsection
    require the inclusion of <sys/ioctl.h>.

capabilities.7

Serge Hallyn, plus a bit of work by mtk
Document file capabilities, per-process capability bounding set,
changed semantics for CAP_SETPCAP, and other changes in 2.6.2[45].
Add CAP_MAC_ADMIN, CAP_MAC_OVERRIDE, CAP_SETFCAP.
Various smaller fixes.
mtk, plus review by Serge Hallyn and Andrew Morgan
Add text detailing how CAP_SETPCAP (theoretically) permits -- on
pre-2.6.25 kernels, and 2.6.25 and later kernels with file
capabilities disabled -- a thread to change
the capability sets
of another thread.
Add section describing rules for programmatically adjusting
thread capability sets.
Add some words describing purpose of inheritable set.
Note existence of CONFIG_SECURITY_CAPABILITIES config option.
Describe rationale for capability bounding set.
Document securebits flags (new in 2.6.26).
Remove obsolete BUGS section.
SEE ALSO: Add getcap(8), setcap(8), and various libcap pages.
mtk
Add text noting that if we set the effective flag for one
file capability, then we must also set the effective flag for all
other capabilities where the permitted or inheritable bit is set.
mtk
Since Linux 2.6.25, CAP_SYS_ADMIN is no longer required for
ioprio_set() to set IOPRIO_CLASS_IDLE class.
mtk
Reword discussion of CAP_LINUX_IMMUTABLE to be file-system neutral.

man-pages.7
mtk
A list of standards in the CONFORMING TO
list should be
terminated by a period.
The list of pages in a SEE ALSO list should not be
terminated by a period.

tcp.7
mtk
Correct a detail for sysctl_tcp_adv_win_scale.
Formatting fixes.

========== Changes in man-pages-3.05 ==========

Released: 2008-07-23, Konolfingen

Sam Varshavchik <mrsam@courier-mta.com>
Uli Schlacter <psychon@znc.in>

Apologies if I missed anyone!

New and rewritten pages
---

matherr.3
  mtk, with review by Andries Brouwer
    A description of the SVID-specified mechanism for reporting
    math exceptions.
     See http://thread.gmane.org/gmane.linux.man/266.

math_error.7
  mtk, with review and suggested input from Andries Brouwer
    A description of how math functions report errors.
    See http://thread.gmane.org/gmane.linux.man/249.

Global changes

Various pages
  mtk
    s/floating point/floating-point/ when used attributively.

Various pages
  mtk
    For consistency with majority usage:
    s/plus infinity/positive infinity/
    s/minus infinity/negative infinity/

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

brk.2
  mtk
    SEE ALSO: add end(3).

open.2
  Brian M. Carlson / mtk
    Remove ambiguity in description of support for O_EXCL on NFS.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=491791.

prctl.2
  mtk
    Place options in some semblance of alphabetical order.
    (No content or formatting
 changes were made.)

cerf.3
  mtk
    Bump version number: these functions are still missing in
    glibc 2.8.

fenv.3
  mtk
    SEE ALSO: Add math_error(7).

INFINITY.3
  mtk
    SEE ALSO: Add math_error(7).

nan.3
  mtk
    Remove unneeded "Compile with" piece in SYNOPSIS.
    SEE ALSO: Add math_error(7).

rpc.3
  mtk / Franck Jousseaume
    Fix errors introduced into a few prototypes when converting
    function declarations to use modern C prototypes in man-pages-2.75.

ipv6.7
  mtk, after a report from Uli Schlacter
    Document the IPV6_V6ONLY flag.

========== Changes in man-pages-3.06 ==========

Released: 2008-08-05, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andreas Jaeger <aj@novell.com>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Fabian Kreutz <kreutz@dbs.uni-hannover.de>
Gernot Tenchio <g.tenchio@telco-tech.de>

 Varshavchik <mrsam@courier-mta.com>
Tolga Dalman <tdalman@project-psi.org>

Apologies if I missed anyone!

New and rewritten pages
---

erfc.3
  mtk
    Created after removing the erfc() material from erf.3.
    Documents the complementary error function.

y0.3
  mtk
    Created after removing the y*() material from j0.3.
    Documents the Bessel functions of the second kind.
    Included ERRORS section; noted that an exception is not
    raised on underflow, see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6806;
    and errno is not set on overflow, see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6808;
    Included BUGS section noting that errno is incorrectly
    set for pole error; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6807.

scalbln.3
  mtk
    Created after removing the scalbln*() and scalbn*() material
    from scalb.3. Documents
 scalbln() and scalbn() functions.
    Included ERRORS section; noted that errno is not set; see

also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6803.

New and changed links
---

erfcf.3
erfcl.3
  mtk
    Changed these links to point to new erfc.3 page.

scalblnf.3
scalblnl.3
scalbn.3
scalbnf.3
scalbnl.3
  mtk
    Changed these links to point to new scalbln.3 page.

y0f.3
y0l.3
y1.3
y1f.3
y1l.3
yn.3
ynf.3
ynl.3
  mtk
    Changed these links to point to new y0.3 page.

Global changes

Various pages
  mtk
    s/floating point/floating-point/ when used attributively.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

crypt.3
  mtk
    Tweak discuss text describing support for Blowfish.

ctime.3
  mtk / Gernot Tenchio
    Added some words to make clear that the string returned by
    ctime() and asctime()
 is null-terminated.

math_error.7
  Sam Varshavchik
    Reverse order of SYNOPSIS and NAME sections.
  mtk
    NOTES: Summarize the state of glibc support for exceptions
    and errno for error reporting.

Changes to individual pages (math functions)

Almost all of the changes in this release relate to math man pages.
Very many changes were made to the math pages, including:

* Fixed feature test macros (FTMs). Often, the FTM requirements
 for the "float" and "long double" versions of a math function are
 different from the requirements for the "double" version. Each math
 page now shows the correct FTM requirements for all three versions
 of the function(s) it describes. This may have required either
 a change to the existing FTM text (if the requirements for the
 "double" function were already described), or the addition of an FTM
 description to a SYNOPSIS where one was not previously present
 (typically because
 the "double" version of the function does not
 require any FTMs to be defined).
* CONFORMING TO: in many cases, POSIX.1-2001 was not mentioned.
 Where a function is specified in POSIX.1-2001, this is now noted.
 Also, statements about what other standards a function conforms to
 were generally clarified. (The wording about which functions conformed
 to C99 was previously often done as an add on sentence; now it is made
 part of the first sentence of the CONFORMING TO section, along with
 POSIX.1-2001.)
* RETURN VALUE: in many cases, pages lacked descriptions of the return
 value when the function arguments are special values such as +0, -0,
 NaN (not-a-number), +infinity, -infinity, etc. This has been fixed.
 I carried out tests on glibc 2.8 to ensure that all of these
 functions match the RETURN VALUE descriptions (and the POSIX.1-2001
 requirements).
* ERRORS: many pages lacked a clear (or indeed any) description of
 how errno is set on error and what exception

is raised for each error.
This has been fixed. The ERRORS sections are now generally headed up
as per the POSIX.1 way of doing things, describing Pole / Range /
Domain errors, as applicable.
I carried out tests on glibc 2.8 to ensure that all of these
functions match the ERRORS descriptions. Deviations from POSIX.1-2001
requirements have been filed as glibc bug reports, and noted in the
man pages. (The pages now describe the situation for ERRORS as at glibc
2.8; I may eventually try and extend the text with descriptions of
changes in older versions of glibc.)
NOTE: one point that has not been covered in any page is the
circumstances that generate inexact (FE_INEXACT) exceptions.
(The details for these exceptions are not specified in POSIX.1-2001,
and I haven't gone looking for the standards that describe the details.)

acos.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.

   Rewrote ERRORS section.
    Updated CONFORMING TO.

acosh.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    Added RETURN VALUE section.
    Rewrote ERRORS section.
    Updated CONFORMING TO.

asin.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.
    Rewrote ERRORS section.
    Updated CONFORMING TO.

asinh.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    DESCRIPTION: Some rewording.
    RETURN VALUE: Added details for special argument cases.
    Added (null) ERRORS section.
    Updated CONFORMING TO.

atan.3
  mtk
    SYNOPSIS: Added feature test macro requirements.

DESCRIPTION: Some rewording.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
Updated CONFORMING TO.

atan2.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION:
Some rewording.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
Updated CONFORMING TO.

atanh.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6759.

cbrt.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added (null) ERRORS section.
Updated CONFORMING TO.

ceil.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.
NOTES: Added some details.

copysign.3
mtk
Added RETURN
VALUE section.
Updated CONFORMING TO.

cos.3
mtk

SYNOPSIS: Added feature test macro requirements.
Rewrote RETURN VALUE section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780.
Updated CONFORMING TO.

cosh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

erf.3
mtk
Removed the erfc() material (there is now a new erfc page).
Reason: the functions are logically separate; also their
return values differ, and it would have been confusing
to document them on the same page.
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6785.
Updated CONFORMING TO.

exp.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6786.
Updated CONFORMING TO.

exp10.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set for underflow;
see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787.

exp2.3
mtk
Added RETURN VALUE and ERRORS sections.
Updated CONFORMING TO.

expm1.3
mtk
SYNOPSIS: Fixed feature test macro requirements.

Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set for overflow;
see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788.
Updated CONFORMING TO.
Added BUGS section, describing bogus underflow exception for -large,
see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6778;
and describing bogus invalid exception for certain +large,
see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6814.

fabs.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Updated CONFORMING TO.

fdim.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6796.
Updated CONFORMING TO.

fenv.3
mtk
Make style of writing exception names consistent with other
pages and POSIX.1-2001.
Updated CONFORMING TO.

finite.3
mtk
SYNOPSIS: Fixed feature test macro requirements.

floor.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.

fma.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see

also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3
fmin.3
mtk
NAME: Make description clearer
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
CONFORMING TO: Added POSIX.1-2001.
Added RETURN VALUE and ERRORS sections.

fmod.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.

fpclassify.3
mtk
Minor wording changes.
CONFORMING TO: Added POSIX.1-2001.
SEE ALSO: Add signbit(3).

frexp.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added details to RETURN VALUE section.
Added (null) ERRORS section.
CONFORMING TO: Added POSIX.1-2001.

gamma.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added (null) RETURN VALUE section referring to tgamma(3).
Added (null) ERRORS section referring to tgamma(3).
CONFORMING TO: Rewrote.

hypot.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: note that calculation is done without causing
undue overflow or underflow.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6795.

Updated CONFORMING TO.

ilogb.3
mtk
SYNOPSIS: Added feature test macro requirements.
Rewrote RETURN VALUE
section.
Rewrote ERRORS section; noted that errno is not set, and in some
cases an exception is not raised; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6794.
CONFORMING TO: Added POSIX.1-2001.

isgreater.3
mtk
NAME: Make description clearer
Improve the description of isunordered().
Added RETURN VALUE and ERRORS sections.
Formatting fixes.
A few wording improvements.

j0.3
mtk
Removed material for the y*() functions to a separate y0.3 page.
Reason: the return values and errors/exceptions differ, and it
would have been confusing to document them on the same page.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6805.

ldexp.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE and ERRORS sections.
Updated CONFORMING
TO.

lgamma.3
mtk
Note that these functions are deprecated.
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE and ERRORS sections referring to lgamma(3).
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6777.

log.3
mtk
SYNOPSIS: Added feature test macro requirements.

Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

log10.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

log1p.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6792.
Updated CONFORMING
TO.

log2.3
mtk
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

logb.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added a little detail; some rewordings.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6793.
CONFORMING TO: Added POSIX.1-2001.

lrint.3
mtk
DESCRIPTION: some rewording.
RETURN VALUE: Added details for special argument cases.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6798.
CONFORMING TO: Added POSIX.1-2001.

lround.3
mtk
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6797.

CONFORMING TO: Added POSIX.1-2001.

modf.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
CONFORMING TO: Added POSIX.1-2001.

nan.3
mtk
Small wording changes.
CONFORMING TO: Added POSIX.1-2001.

nextafter.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6799.
CONFORMING TO: Added POSIX.1-2001.

pow.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776.

remainder.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.
Added BUGS section noting that remainder(nan(""), 0)
wrongly causes a domain error; see
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6779

remquo.3
mtk
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see

also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3
fmin.3
mtk
NAME: Make description clearer
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
CONFORMING TO: Added POSIX.1-2001.

Added RETURN VALUE and ERRORS sections.

fmod.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.

fpclassify.3
CONFORMING TO: Added POSIX.1-2001.

rint.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
ERRORS: no errors can occur (previous text was misleading).
CONFORMING TO: Added POSIX.1-2001.
NOTES: point out that lrint() may be preferred in some cases.

round.3
mtk
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
ERRORS: no errors can occur (previous text was misleading).
CONFORMING TO: Added POSIX.1-2001.
NOTES: point out that lround() may be preferred in some cases.

scalb.3
mtk
Removed the scalbn() and scalbln() material to a separate
scalbln.3 page. Reason: scalb() is obsolete; also the
exception/error conditions differ somewhat, so that it
would have been confusing to document them on the same page.
SYNOPSIS: Fixed feature test macro requirements.

DESCRIPTION: some rewrites and added details.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6803
and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6804.
CONFORMING TO: Rewrote.

signbit.3
mtk
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
Added RETURN VALUE section.
Added (null) ERRORS section.
CONFORMING TO: Added POSIX.1-2001.

sin.3
mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781.
Updated CONFORMING TO.

sincos.3
mtk
DESCRIPTION: Added details for special argument cases.
Added (null) RETURN VALUE section.
Added ERRORS section.

sinh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

sqrt.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

tan.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.

Added ERRORS section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782.

Updated CONFORMING TO.

tanh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added (null) ERRORS section.
Updated CONFORMING TO.

tgamma.3
mtk
Added RETURN VALUE section.
Rewrote ERRORS section; noted that errno is not set /
incorrectly set in some cases; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6809
and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6810.
CONFORMING TO: Added POSIX.1-2001.
Added NOTES section to hold text explaining origin of tgamma().

trunc.3
mtk
RETURN VALUE: small rewording.
CONFORMING TO: Added POSIX.1-2001.
Added NOTES section explaining that result may be too large
to store in an integer type.

========== Changes in man-pages-3.07 ==========

Released: 2008-08-12, Konolfingen

Contributors

The following people contributed notes, ideas, or
patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Christoph Lameter <cl@linux-foundation.org>
Cliff Wickman <cpw@sgi.com>
Fabian Kreutz <kreutz@dbs.uni-hannover.de>

Filippo Santovito <filippo.santovito@email.it>
Gerrit Renker <gerrit@erg.abdn.ac.uk>
Heikki Orsila <shd@modeemi.cs.tut.fi>
Khalil GHORBAL <khalil.ghorbal@cea.fr>
Lee Schermerhorn <lee.schermerhorn@hp.com>

Samuel Thibault <samuel.thibault@ens-lyon.org>
Sam Varshavchik <mrsam@courier-mta.com>
Soh Kam Yung <sohkamyung@gmail.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>
Pavel Heimlich <tropikhajma@seznam.cz>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages
---

move_pages.2
  Christoph Lameter, various edits and improvements by mtk
    Documentation of the move_pages() system call.
    This page was formerly
 part of the numactl package, but really
    belongs in man-pages (since it describes a kernel interface).

clock_getcpuclockid.3
  mtk
    New page documenting the clock_getcpuclockid() library function,
    available since glibc 2.2.

udplite.7
  Gerrit Renker
    Document the Linux implementation of the UDP-Lite protocol,
    new in Linux 2.6.20.

Newly documented interfaces in existing pages
---

proc.5
  Christoph Lameter, minor edits and improvements by mtk
    Documentation of the /proc/PID/numa_maps file.
    This material was formerly the numa_maps.5 page in the numactl
    package, but really belongs in man-pages (since it describes
    a kernel interface).

Global changes
---

nanosleep.2
inet_ntop.3
inet_pton.3
scanf.3
initrd.4
  mtk
    Fix mis-ordered (.SH) sections.

connect.2
socket.2
rtnetlink.3
arp.7
ddp.7
ip.7
ipv6.7
netlink.7
packet.7
raw.7
rtnetlink.7
socket.7
tcp.7
udp.7
unix.7
x25.7
  mtk
    s/PF_/AF_/ for socket family constants. Reasons: the AF_ and
    PF_ constants have always had the same values; there never has
    been a protocol family that had more than one address family,
    and POSIX.1-2001 only specifies the AF_* constants.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

execve.2
  mtk
    The floating-point environment is reset to the default
    during an execve().

get_mempolicy.2
  Lee Schermerhorn

Misc cleanup of get_mempolicy(2):
+ mention that any mode flags will be saved with mode.
I don't bother to document mode flags here because we
already have a pointer to set_mempolicy(2) for more info
on memory policy. mode flags are discussed there.
+ remove some old, obsolete [IMO] NOTES and 'roff comments.
Lee Schermerhorn
Update the
get_mempolicy(2) man page to add in the description of
the MPOL_F_MEMS_ALLOWED flag, added in 2.6.23.
mtk
Document additional EINVAL error that occurs is MPOL_F_MEMS_ALLOWED
is specified with either MPOL_F_ADDR or MPOL_F_NODE.

getitimer.2
mtk
CONFORMING TO: POSIX.1-2008 marks getitimer() and setitimer()
obsolete.

mbind.2
Lee Schermerhorn
Fix error conditions, now that the kernel silently ignores
nodes outside the task's cpuset, as long as one valid node
remains.

Now that cpuset man page exists, we can refer to it. Remove
stale comment regarding lack thereof.
Lee Schermerhorn
Add brief discussion of mode flags.
Lee Schermerhorn
Attempt to clarify discussion of MPOL_DEFAULT.
mtk
Fix URI reference for libnuma.

mprotect.2
mtk / Maxin John
Remove EFAULT from errors. Under ENOMEM error, note that
EFAULT was the error produced in some cases
for kernels before
2.4.19.

msgctl.2
mtk, after a note from Filippo Santovito
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

set_mempolicy.2
Lee Schermerhorn

Fix up the error return for nodemask containing nodes disallowed by
the process' current cpuset. Disallowed nodes are now silently ignored,
as long as the nodemask contains at least one node that is on-line,
allowed by the process' cpuset and has memory.

Now that we have a cpuset man page, we can refer to cpusets directly
in the man page text.

Lee Schermerhorn
Another attempt to rationalize description of MPOL_DEFAULT.

Since ~2.6.25, the system default memory policy is "local allocation".
MPOL_DEFAULT itself is a request to remove any non-default policy and
"fall back" to the surrounding context. Try to say that without delving
into implementation
details.

Lee Schermerhorn
Add discussion of mempolicy mode flags to set_mempolicy(2).
This adds another reason for EINVAL.

setpgid.2
mtk
CONFORMING TO: POSIX.1-2008 marks setpgrp() obsolete.

semctl.2
mtk, after a note from Filippo Santovito
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

shmctl.2
Filippo Santovito / mtk
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

utime.2
mtk
CONFORMING TO: POSIX.1-2008 marks utime() obsolete.
CONFORMING TO: POSIX.1-2008 removes the POSIX.1-2001 LEGACY
marking of utimes(), so mention of this point has been
removed from the page.

vfork.2
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of vfork().

atan2.3
Fabian Kreutz

SEE ALSO Add carg(3).

bcmp.3
mtk
CONFORMING TO: POSIX.1-2008
removes the specification of bcmp().

bsd_signal.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification ofcw
bsd_signal().

bzero.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of bzero().

cexp2.3
mtk
AVAILABILITY: These functions are still not in glibc
as at version 2.8.

clock_getres.3
mtk
SEE ALSO: Add clock_getcpuclockid(3).

clog2.3
mtk
AVAILABILITY: These functions are still not in glibc
as at version 2.8.

ctime.3
mtk
POSIX.1-2008 marks asctime(), asctime_r(), ctime(), and ctime_r()
as obsolete.

dprintf.3
mtk
CONFORMING TO: These functions are nowadays in POSIX.1-2008.

ecvt.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of
ecvt() and fcvt().

ftime.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of ftime().

ftw.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks ftw() as obsolete.

gcvt.3
   mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of gcvt().

getcwd.3
  Reuben Thomas / mtk
    Clarify description of getcwd() for buf==NULL case;
    CONFORMING TO: According to POSIX.1, the behavior of getcwd()
    is unspecified for the buf==NULL case.
  mtk
    Add an introductory paragraph giving an overview of what these
    functions do.
    Fix error in description of getwd(): it does not truncate the
    pathname; rather, it gives an error if the pathname exceeds
    PATH_MAX bytes.
    Rewrote RETURN VALUE section.
    Add EINVAL ENAMETOOLONG errors for getwd().
    Various other clarifications and wording fixes.
    CONFORMING TO: POSIX.1-2001 does not define any errors for
    getwd().
    CONFORMING TO: POSIX.1-2008 removes the specification of getwd().

gethostbyname.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specifications of
    gethostbyname(), gethostbyaddr(), and
 h_errno.

gets.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of gets().

iconv.3
iconv_close.3
iconv_open.3
  mtk
    VERSIONS: These functions are available in glibc since version 2.1.

index.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specifications of
    index() and rindex().

isalpha.3

mtk
CONFORMING TO: POSIX.1-2008 marks isalpha() as obsolete.

makecontext.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of
makecontext() and swapcontext().

memchr.3
mtk
VERSIONS: memrchr() since glibc 2.2; rawmemchr() since glibc 2.1.

mempcpy.3
mtk
VERSIONS: mempcpy() since glibc 2.1.

mktemp.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of mktemp().

opendir.3
mtk
CONFORMING TO: POSIX.1-2008 specifies fdopendir().

rand.3
mtk
CONFORMING TO: POSIX.1-2008 marks rand_r() as obsolete.

siginterrupt.3
mtk
CONFORMING TO: POSIX.1-2008
marks siginterrupt() as obsolete.

sigset.3
mtk
CONFORMING TO: POSIX.1-2008 marks sighold(), sigignore(),
sigpause(), sigrelse(), and sigset() as obsolete.

strchr.3
mtk
VERSIONS: strchrnul() since glibc 2.1.1.

tempnam.3
mtk
CONFORMING TO: POSIX.1-2008 marks tempnam() as obsolete.

tmpnam.3
mtk

CONFORMING TO: POSIX.1-2008 marks tmpnam() as obsolete.

toascii.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks toascii() as obsolete.

ualarm.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of ualarm().

ulimit.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks ulimit() as obsolete.

usleep.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of usleep().

standards.7
  mtk
    Updated details for POSIX.1-2008, and noted that if
    POSIX.1-2001 is listed in the CONFORMING TO section of a man
    page, then the reader can assume that the interface is also
    specified
 in POSIX.1-2008, unless otherwise noted.

time.7
  mtk
     SEE ALSO: Add clock_getcpuclockid(3).

udp.7
  mtk
    SEE ALSO: add udplite(7).

Changes to individual pages (math functions)

Various changes here following on from the big update to the
math pages in the previous release. Test results going back
glibc 2.3.2 (so far) allowed updates to various pages to note
changes in historical behavior for error reporting by math
functions. Thanks to the following people for providing me
with test results on various distributions and glibc versions:
Alain Portal, Andries Brouwer, Fabian Kreutz, Heikki Orsila,
Khalil GHORBAL, Pavel Heimlich, Reuben Thomas, Samuel Thibault,
Soh Kam Yung, and Stephane Chazelas

cabs.3
cacos.3
cacosh.3
carg.3
casin.3
casinh.3
catan.3
catanh.3
ccos.3
ccosh.3
cexp.3
cimag.3
clog.3
clog10.3
conj.3
cpow.3
cproj.3
creal.3
csin.3
csinh.3
csqrt.3
ctan.3
ctanh.3
exp10.3
exp2.3
fdim.3
fenv.3
fma.3
fmax.3
fmin.3
log2.3
lrint.3
lround.3
nan.3
pow10.3
remquo.3
round.3
scalbln.3
sincos.3
tgamma.3
trunc.3
mtk
Added VERSIONS section noting that these functions first
appeared in glibc in version 2.1.

cosh.3
mtk
BUGS: In glibc 2.3.4 and earlier, an FE_OVERFLOW exception is not

raised when an overflow occurs.

fenv.3
  mtk / Fabian Kreuz
    Provide more detail in the description of rounding modes.
    Add text describing FLT_ROUNDS (formerly in fma.3).
    Add BUGS section pointing out the FLT_ROUNDS does not reflect
    changes by fesetround().

fma.3
  mtk
    Remove text about FLT_ROUNDS, replacing with a cross-reference
    to fenv(3).

fpclassify.3
  mtk
    CONFORMING TO: Note that the standards provide a weaker guarantee
    for the return value of isinf().

log.3
  mtk
    BUGS: In glibc 2.5 and earlier, log(nan("")) produces a bogus
    FE_INVALID exception.

lround.3
  mtk
    Add reference
 to fenv(3) for discussion of current rounding mode.

nextafter.3
  mtk
    BUGS: In glibc 2.5 and earlier these functions do not raise an
    FE_UNDERFLOW exception on underflow.

pow.3
  mtk
    BUGS: described buggy NaN return when x is negative and y is large.
    See also: http://sources.redhat.com/bugzilla/show_bug.cgi?id=3866.
    BUGS: Note the bogus FE_INVALID exception that occurred in glibc
    2.3.2 and earlier on overflow and underflow.

remainder.3
  mtk
    Add reference to fenv(3) for discussion of current rounding mode.

round.3
  mtk
    Add reference to fenv(3) for discussion of current rounding mode.

scalb.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of scalb().

tgamma.3
  mtk
    BUGS: In glibc 2.3.3, tgamma(+-0) produced a domain error
    instead of a pole error.

y0.3
  mtk
    In glibc 2.3.2 and earlier, these functions do not raise an
    FE_INVALID exception for a domain
 error.

math_error.7
  mtk
    Rewrite introductory paragraph.
    Point out that a NaN is commonly returned by functions that report
    a domain error.

========== Changes in man-pages-3.08 ==========

Released: 2008-08-27, Zurich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Gerrit Renker <gerrit@erg.abdn.ac.uk>
Li Zefan <lizf@cn.fujitsu.com>
Mike Bianchi <MBianchi@foveal.com>
Sam Varshavchik <mrsam@courier-mta.com>
Venkatesh Srinivas <me@acm.jhu.edu>
Vijay Kumar <vijaykumar@bravegnu.org>

Apologies if I missed anyone!

New and rewritten pages
---

getnetent_r.3

mtk
Documents getnetent_r(), getnetbyname_r(),
and getnetbyaddr_r(), the reentrant equivalents of
getnetent(), getnetbyname(), and getnetbyaddr().

getprotoent_r.3
mtk
Documents getprotoent_r(), getprotobyname_r(), and
getprotobynumber_r(),
the reentrant equivalents of
getprotoent(), getprotobyname(), and getprotobynumber().

getrpcent_r.3
mtk
Documents getrpcent_r(), getrpcbyname_r(), and
getrpcbynumber_r(), the reentrant equivalents of
getrpcent(), getrpcbyname(), and getrpcbynumber().

getservent_r.3
mtk
Documents getservent_r(), getservbyname_r(), and
getservbyport_r(), the reentrant equivalents of
getservent(), getservbyname(), and getservbyport().

numa.7
mtk
A new page giving overview details for the Linux NUMA interfaces.
Incorporates some material from mbind.2, and the description
of /proc/PID/numa_maps from proc.5.

Newly documented interfaces in existing pages
---

crypt.3
mtk
Add description of crypt_r().

New and changed links
---

crypt.3
mtk
New link to crypt.3.

getnetbyname_r.3
getnetbyaddr_r.3

mtk

New links to new getnetent_r.3.

getprotobyname_r.3
getprotobynumber_r.3
mtk
New links to new getprotoent_r.3.

getrpcbyname_r.3
getrpcbynumber_r.3
mtk
New links to new getrpcent_r.3.

getservbyname_r.3
getservbyport_r.3
mtk
New links to new getservent_r.3.

numa_maps.5
mtk
Link to new numa(7) page, which incorporates the
/proc/PID/numa_maps description.
As part of the numactl() package, the /proc/PID/numa_maps
documentation was in a numa_maps.5 page; this link
ensures that "man 5 numa_maps" still works.
(Eventually, we may want to remove this link.)

Global changes
---

get_mempolicy.2
mbind.2
move_pages.2
set_mempolicy.2
mtk
Add reference to numa(7) for information on library support.
Added a VERSIONS section.
SEE ALSO: Add numa(7).

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
mkdirat.2
mknodat.2
linkat.2

openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
mkfifoat.3
psignal.3
strsignal.3
   mtk
      These interfaces are specified in POSIX.1-2008.

Changes to individual pages
----

eventfd.2
  Vijay Kumar
     When an eventfd overflows, select() indicates the file as both
     readable and writable (not as having an exceptional condition).

fcntl.2
  mtk
     F_DUPFD_CLOEXEC is specified in POSIX.1-2008.

getrlimit.2
  mtk
     NOTES: Add text mentioning the shell 'ulimit' (or 'limit')
     built-in command for setting resource limits.

gettimeofday.2
  mtk
     CONFORMING TO: POSIX.1-2008 marks gettimeofday() as obsolete.

link.2
  mtk
     Note kernel version where Linux stopped following symbolic
     links in 'oldpath'; see also http://lwn.net/Articles/294667.
     POSIX.1-2008 makes it implementation-dependent whether or not
     'oldpath' is dereferenced if it is a symbolic link.
     Add a reference to linkat(2) for an interface that allows
     precise
 control of the treatment of symbolic links.

mbind.2
  mtk
     Remove material on library support and numactl; that material
     is now in numactl.7.

mmap.2
  mtk
    Add kernel version numbers for MAP_32BIT.
    Add some details on MAP_32BIT (see http://lwn.net/Articles/294642).

move_pages.2
  mtk
    Added VERSIONS (from kernel 2.6.18) and CONFORMING TO sections.

open.2
  mtk
    O_CLOEXEC is specified in POSIX.1-2008.

socket.2
  mtk
    s/d/domain/ for name of argument.
    Add reference to socket(2) for further information on
    domain, type, and protocol arguments.

utimensat.2
  mtk
    CONFORMING TO: POSIX.1-2008 specifies utimensat() and futimens().

dirfd.3
  mtk
    CONFORMING TO: Add POSIX.1-2008; other minor changes.

exec.3
  mtk
    Small rewording: "s/returned/failed with/ [an error]".

fmemopen.3
  mtk
    Since glibc 2.7, it is possible to seek past the end of
    a stream created by open_memstream().
  Add a BUGS section
    describing the bug in earlier glibc versions.

gethostbyname.3
  mtk
    Clarify exactly which functions are obsoleted by getnameinfo()
    and getaddrinfo().

getnetent.3
  mtk
    Rephrase description in terms of a database, rather than a file.
    Note that each of the get*() functions opens a connection to
    the database if necessary.

The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
In glibc 2.2, the type of the 'net' argument for getnetbyaddr()
changed from 'long' to 'uint32_t'.
mtk
Note that the gethostbyaddr() 'net' argument is in host byte order.
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getnetent_r.3.

getprotoent.3
mtk
Rephrase description in terms
of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getprotoent_r.3.

getrpcent.3
mtk
s/rpc/RPC/.
Rephrase description in terms of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getrpcent_r.3.

getservent.3
mtk
Rephrase description in terms of a database, rather than a file.
Note that
each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/

mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getservent_r.3.

mkdtemp.3
mtk
CONFORMING TO: this function is specified in POSIX.1-2008.

mq_notify.3
Venkatesh Srinivas
s/sigev_notify_function/sigev_thread_function/
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=494956.

realpath.3
mtk
Relocate text for resolved_path==NULL case to DESCRIPTION.
POSIX.1-2001 leaves the resolved_path==NULL case as
implementation-defined; POSIX.1-2008 specifies the behavior
described in this man page.

sem_init.3
mtk
POSIX.1-2008 rectifies the POSIX.1-2001 omission, specifying
that zero is returned by a successful sem_init() call.

core.5
Mike Bianchi / mtk
Make the page more helpful to non-programmers by referencing
the documentation of the shell's 'ulimit' command in the
discussion of RLIMIT_CORE and RLIMIT_FSIZE.
SEE ALSO: Add bash(1).
mtk
Note that a core dump file can be used in a debugger.

proc.5
mtk
Remove /proc/PID/numa_maps material (it is now in numa(7)).

cpuset.7
mtk
SEE ALSO: Add numa(7).

inotify.7
mtk / Li Zefan
Explain bug that occurred in coalescing identical events in
kernels before 2.6.25.
(See commit 1c17d18e3775485bf1e0ce79575eb637a94494a2

"A potential bug in inotify_user.c" in the 2.6.25 Changelog.)

pthreads.7
  mtk
    Update thread-safe functions list with changes in POSIX.1-2008.
    SEE ALSO: add proc(5).

signal.7
  mtk
    Update list of async-signal-safe functions for POSIX.1-2008.

==========
Changes in man-pages-3.09 ==========

Released: 2008-09-10, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Bernd Eckenfels <be-mail2006@lina.inka.de>

Tolga Dalman <tdalman@project-psi.org>
Török Edwin <edwintorok@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

fopencookie.3
  mtk
      Document fopencookie(3), a library function that allows
      custom implementation of a stdio stream.

networks.5
  Martin (Joey) Schulze, with a few light edits by mtk
      Documents the /etc/networks file.

Global changes

Various pages
  mtk
      s/time zone/timezone/ for consistency across pages and
      with POSIX.1.

kill.2
sigaction.2
sigpending.2
sigprocmask.2
sigsuspend.2
confstr.3
ctermid.3
ctime.3
ferror.3
flockfile.3
fopen.3
getaddrinfo.3
getgrnam.3
getnameinfo.3
getopt.3
getpwnam.3
longjmp.3
popen.3
rand.3
readdir.3
setjmp.3
sigsetops.3
sigwait.3
strtok.3
tzset.3
unlocked_stdio.3
  mtk
      Add/fix feature test macro requirements.

Changes to individual pages
---

fcntl.2
  mtk, after a note by Mike Bianchi
      More clearly and consistently describe whether
      or not the third argument to fcntl() is required,
      and what its type should be.
  mtk
      Move description of negative l_len
  from NOTES, integrating
      it into the discussion of file locking.
      Minor rewrites of the text on file locking.

getrusage.2
  Bernd Eckenfels
      SEE ALSO: Add clock(3), clock_gettime(3).
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475

ioctl_list.2
  mtk
      Remove old sentence about where to send updates for this page.
      Add more detail on mount options that prevent updates to atime.

sched_setscheduler.2
  Carsten Emde
      Update kernel version numbers relating to real-time support.

stat.2
  H. Peter Anvin
      Note that lstat() will generally not trigger automounter
      action, whereas stat() will.

clock.3
  Bernd Eckenfels
      SEE ALSO: Add clock_gettime(3).
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475

clock_getres.3
  Tolga Dalman / mtk
      Add "Link with -lrt" to SYNOPSIS; remove now redundant
      sentence mentioning librt from NOTES.

getdate.3
  mtk
      Rewrite

description of getdate_r() and integrate into main text
(rather than describing in NOTES).
Other parts rewritten for greater clarity.
Make it clearer in the main text that glibc does not implement %Z;
remove discussion of that point from NOTES.
Added an example program.

hsearch.3
mtk
Noted that table size as specified by 'nel' is immutable.
Described differences between hsearch() and hsearch_r().
Added missing pieces to RETURN VALUE.
Added a number of new entries under ERRORS.
NOTES: added some basic advice on sizing the hash table;
noted that when a table is destroyed, the caller is responsible
for freeing the buffers pointed to by 'key' and 'data' fields.
One of the BUGS was fixed in glibc 2.3.
Rewrote and clarified various other pieces.
Rename arguments for reentrant functions, using same name as
glibc headers: s/ret/retval/; s/tab/htab/.
mtk, after
a suggestion by Timothy S. Nelson
Integrate discussion of reentrant functions into main discussion
(rather than as a short paragraph at the end).

iconv.3
Bruno Haible
Describe "shift sequence" input.

ptsname.3
sukadev
Fix return type of ptsname_r() in SYNOPSIS.

readdir.3
H. Peter Anvin
s/stat(2)/lstat(2)/ when discussing d_type (since we
are talking about a case where we might be interested to
whether the file itself is a symbolic link).

sigsetops.3
Chris Head, signed-off-by: Mike Frysinger
Fix typo: s/sigdelset/sigorset/

proc.5
Mats Wichmann / mtk
s/\[number]/[pid]/ in file names for /proc/PID files.
And similar changes for task/[tid] sub-directories.
mtk / Mats Wichmann

In the description if /proc/[pid]/environ, remove reference to
lilo(8)/grub(8) since there seems to be nothing in those pages
that related to this /proc file.
Michael Schurter / mtk
Remove sentence wrongly saying that /proc/meminfo reports
info in bytes;
see http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462969
mtk
Note that /proc/meminfo reports system-wide memory usage
statistics.
Joe Korty
Document new fields in /proc/interrupts that were added in
Linux 2.6.24.

unix.7
Marko Kreen
Since glibc 2.8, _GNU_SOURCE must be defined in order to get
the definition of the ucred structure from <sys/socket.h>.

========== Changes in man-pages-3.10 ==========

Released: 2008-09-23, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

André Goddard Rosa <andre.goddard@gmail.com>
George Spelvin <linux@horizon.com>
Pavel Heimlich <tropikhajma@seznam.cz>
Sam Varshavchik <mrsam@courier-mta.com>
John Reiser <jreiser@bitwagon.com>

Apologies if I missed anyone!

Global changes
---

closedir.3
dirfd.3
readdir.3
rewinddir.3
scandir.3

seekdir.3
telldir.3
    mtk
      Fix 'dir' argument name: should be 'dirp'.
      POSIX.1-2008 and glibc call this argument 'dirp' (consistent
      with the fact that it is a *pointer* to a DIR structure).

Changes to individual pages
----

clone.2
  mtk, after a comment by John Reiser
      Clarify text describing getpid() caching bug for clone() wrapper.
      See also:
      http://sourceware.org/bugzilla/show_bug.cgi?id=6910
      https://bugzilla.redhat.com/show_bug.cgi?id=417521

getpid.2
  mtk, after a comment by John Reiser
      Describe getpid()'s PID caching and its consequences.

timerfd_create.2
  Sam Varshavchik
      s/it_interval/it_value/ when talking about TIMERFD_ABSTIME.

closedir.3
  George Spelvin
      Clarify closedir()'s treatment of underlying file descriptor.

tsearch.3
  André Goddard Rosa
      Fix memory leak in example program.

     Add use of tdestroy to example program.
  mtk
      Add "#define _GNU_SOURCE" to example program.

protocols.5
  mtk, after a note from Pavel Heimlich
      Remove SEE ALSO references to nonexistent Guides to Yellow Pages

services.5
  mtk
      Remove some out-of-date bugs.
  mtk, after a note from Pavel Heimlich
      Remove SEE ALSO references to nonexistent Guides to Yellow Pages
      and Bind/Hesiod docs.

mtk
Remove crufty text about use of comma instead of slash to separate port and protocol.

Apologies if I missed anyone!

New and rewritten pages
---

umount.2
Michael Kerrisk
Create a new page for umount() and umount2() by extracting existing material from mount.2 page.

New and changed links
---

umount2.2
Michael Kerrisk
Change link to point to new umount.2

The umount2() material migrated from mount.2 to umount.2

Changes to individual pages
---

execve.2
  Michael Kerrisk
    _SC_ARG_MAX is no longer necessarily constant
      POSIX.1-2001 says that the values returned by sysconf()
      are constant for the life of the process.
      But the fact that, since Linux
 2.6.23, ARG_MAX is settable
      via RLIMIT_STACK means _SC_ARG_MAX is no longer constant,
      since it can change at each execve().
  Michael Kerrisk
    Linux now imposes a floor on the ARG_MAX limit
      Starting with Linux 2.6.23, the ARG_MAX limit became
      settable via (1/4 of) RLIMIT_STACK. This broke ABI
      compatibility if RLIMIT_STACK was set such that ARG_MAX
      was < 32 pages. Document the fact that since 2.6.25
      Linux imposes a floor on ARG_MAX, so that the old limit
      of 32 pages is guaranteed.

      For some background on the changes to ARG_MAX in
      kernels 2.6.23 and 2.6.25, see:
        http://sourceware.org/bugzilla/show_bug.cgi?id=5786
        http://bugzilla.kernel.org/show_bug.cgi?id=10095
        http://thread.gmane.org/gmane.linux.kernel/646709/focus=648101,
        checked into 2.6.25 as
        commit a64e715fc74b1a7dcc5944f848acc38b2c4d4ee2.

       Also some reordering/rewording of the discussion of ARG_MAX.

fallocate.2
  Michael Kerrisk
    Note lack of glibc wrapper; caller must use syscall(2)
      Glibc doesn't (and quite probably won't) include a
      wrapper for this system call. Therefore, point out that
      potential callers will need to use syscall(2), and rewrite
      the RETURN VALUE text to show things as they would be if
      syscall() is used.

  Michael Kerrisk
    Refer reader to posix_fallocate(3) for portable interface
      Add a para to start of page that points out that this is the
      low-level, Linux-specific API, and point the reader to
      posix_fallocate(3) for the portable API.

getdents.2
readdir.3
  Michael Kerrisk
    d_type is currently only supported on ext[234]
      As at kernel 2.6.27, only ext[234] support d_type.
      On other file systems, d_type is always set to DT_UNKNOWN
 (0).

getdents.2
  Michael Kerrisk
    Add an example program
  Michael Kerrisk
    comment out linux_dirent fields with varying location
      The location of the fields after d_name varies according to
      the size of d_name. We can't properly declare them in C;
      therefore, put those fields inside a comment.
  Michael Kerrisk
    The DT_* constants are defined in <dirent.h>
  Michael Kerrisk
    Remove header files from SYNOPSIS
      None of the header files provides what is needed.
      Calls are made via syscall(2).
  Michael Kerrisk
    The programmer must define the linux_dirent structure
      Point out that this structure is not defined in glibc headers.
  Michael Kerrisk
    s/dirent/linux_dirent/
      The structure isn't currently defined in glibc headers,
      and the kernel name of the structure is 'linux_dirent' (as
      was already used in some, but not all, places in
 this page).

getrlimit.2
  Michael Kerrisk
    Reword/relocate discussion of BSD's historical RLIMIT_OFILE
      The old sentence sat on its own in an odd place, and anyway the
      modern BSDs use the name RLIMIT_NOFILE.
  Michael Kerrisk
    Refer to execve(2) for RLIMIT_STACK's effect on ARG_MAX
      Refer the reader to new text in execve(2) that describes how
      (since Linux 2.6.23) RLIMIT_STACK determines the value of ARG_MAX.

getrusage.2
  Michael Kerrisk
    Rusage measures are preserved across execve(2)

mlock.2

Maxin John
Add EAGAIN error.

move_pages.2
Nicolas François
Make a detail of EPERM error more precise

mount.2
Michael Kerrisk
Add description of per-process namespaces
Describe per-process namespaces, including discussion
of clone() and unshare CLONE_NEWNS, and /proc/PID/mounts.
Michael Kerrisk
List a few other file systems that we may see in /proc/filesystems
Add some modern file systems to that list (xfs, jfs, ext3,
reiserfs).
Michael Kerrisk
Document MS_SILENT (and MS_VERBOSE)

mount.2
umount.2
Michael Kerrisk
Split umount*() out into a separate page
The length of this page means that it's becoming difficult
to parse which info is specific to mount() versus
umount()/umount2(), so split the umount material out into
its own page.

pause.2
Michael Kerrisk
Remove mention of words "library function"
This really is a system call.

readdir.2
Michael Kerrisk
The programmer must declare the old_linux_dirent structure
Glibc does not provide a definition of this structure.
Michael Kerrisk
s/dirent/old_linux_dirent/
Nowadays, this is the name of the structure in the
kernel sources.
Michael Kerrisk
Remove words "which may change"
These words
are slightly bogus: although the interface
is obsolete, for ABI-compatibility reasons, the kernel folk
should never be changing this interface.
Michael Kerrisk

Remove header files from SYNOPSIS
glibc doesn't provide any support for readdir(2),
so remove these header files (which otherwise suggest
that glibc does provide the required pieces).

recv.2
Nicolas François
Move kernel version number to first mention to MSG_ERRQUEUE.

semop.2
Kirill A. Shutemov
Fix typo in example
(The '&' before sop in the semop() call is unneeded.)

send.2
Michael Kerrisk
Make kernel version for MSG_CONFIRM more precise
s/2.3+ only/Since Linux 2.3.15/

sigaction.2
Michael Kerrisk
Refer reader to signal(7) for an overview of signals
Explain semantics of signal disposition during fork() and execve()
Refer to signal(7) for more details on signal mask.

sigaltstack.2
Michael Kerrisk
Explain inheritance of alternate signal stack across fork(2)

sigwaitinfo.2
Michael Kerrisk
Distinguish per-thread and process-wide signals
A sentence clarifying that pending signal set is union of
per-thread and process-wide pending signal sets.

Michael Kerrisk
These interfaces have per-thread semantics
The page was previously fuzzy about whether these interfaces
have process-wide or per-thread semantics. (E.g., now the
page states that the calling *thread* (not process) is suspended
until the signal is delivered.)

sigpending.2
Michael Kerrisk
Explain effect of fork() and execve() for pending signal set
Michael Kerrisk
Explain how thread's pending signal set is defined
The pending set is the union of per-thread pending signals

and process-wide pending signals.

sigprocmask.2
Michael Kerrisk

Explain effects of fork() and execve() for signal mask

splice.2
Michael Kerrisk
Note that SPLICE_F_MOVE is a no-op since kernel 2.6.21

syscall.2
Michael Kerrisk
Add more detail about wrapper functions
Add a few more details about work generally done by wrapper functions. Note that syscall(2) performs the same steps.

tkill.2
Michael Kerrisk
EINVAL error can also occur for invalid TGID
The EINVAL error on an invalid TGID for tgkill() was not documented; this change documents it.

utimensat.2
Michael Kerrisk
POSIX.1-2008 revision will likely affect FTMs for futimens()
Make it clear that the POSIX.1 revision that is likely to affect the feature test macro requirements for futimens() is POSIX.1-2008.
Nicolas François
Make various wordings a little more precise.
The times argument point to *an array of* structures, and the

man-page should say that consistently.

wait4.2
Michael Kerrisk
wait3() is a library function layered on wait4().
On Linux wait3() is a library function implemented on top of wait4(). (Knowing this is useful when using strace(2), for example.)

atan2.3
Nicolas François
Fix error in description of range or return value
In recent changes to the man page, mtk accidentally changed the description of the return value range to -pi/2..pi/2; the correct range is -pi..pi.

cmsg.3
  Nicolas François
    Add parentheses after macro names.

ctime.3
  Michael Kerrisk
    Clarify mktime()'s use of tm_isdst
      Describe use of tm_isdst for input to mktime();
      explain how mktime() modifies this field.
      (This field is left unchanged in case of error.)

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=500178
  Michael Kerrisk
    Clarify wording
 for ctime_r() and asctime_r() to indicate that
    the buffer must be at least 26 *bytes*.
  Michael Kerrisk
    Minor rewording of mktime() description.

floor.3
  Nicolas François
    floor.3: Fix error in description: s/smallest/largest/

hsearch.3
  André Goddard Rosa
    Call hdestroy() after using hash table created by hcreate(),
    for the sake of completeness

mq_getattr.3
  Michael Kerrisk
    mq_getattr() and mq_setattr() are layered on mq_getsetattr(2)
      mq_getattr() and mq_setattr() are library functions layered on
      top of the mq_getsetattr(2) system call.
      (This is useful info for users of strace(1).)

mq_receive.3
  Michael Kerrisk
    mq_send() is a library function layered on mq_timedreceive() syscall
       This info is useful for users of strace(1).

mq_send.3
  Michael Kerrisk
    mq_send() is a library function layered on mq_timedsend() syscall
       This info is useful for
 users of strace(1).

nextafter.3

Nicolas François
Make description more precise: s/next/largest/

readdir.3
Michael Kerrisk
SEE ALSO: add getdents(2)
Because readdir() is implemented on top of getdents(2).

realpath.3
Michael Kerrisk
Clarify that returned pathname is NULL terminated
Also clarify that null-byte is included in PATH_MAX limit.

proc.5
Michael Kerrisk
Rewrite and simplify description of /proc/mounts
Most of the relevant discussion is now under /proc/PID/mounts;
all that needs to be here is a mention of the pre-2.4.19
system-wide namespace situation, and a reference to the
discussion under /proc/PID/mounts.
Michael Kerrisk
Add description of /proc/PID/mounts
Largely cribbed from existing /proc/mounts discussion, which is
about to be rewritten.

mq_overview.7
Michael Kerrisk
Add mq_notify() to list of lib. functions
and syscalls in MQ API

signal.7
Michael Kerrisk
Improve description in NAME section
Add mention of sigaltstack(2).
Describe syscalls that synchronously wait for a signal,
Give overview of syscalls that block until a signal is caught
Add overview of interfaces for sending signals.

Michael Kerrisk
Describe semantics w.r.t. fork() and execve()
Include text describing semantics of fork() and execve() for
signal dispositions, signal mask, and pending signal set.

========== Changes in man-pages-3.12 ==========

Released: 2008-10-29, Bucaramanga

Contributors

Apologies if I missed anyone!

New and rewritten pages
---

pthread_attr_init.3
  Michael Kerrisk
    New page for pthread_attr_init(3) and pthread_attr_destroy(3)

pthread_attr_setdetachstate.3
  Michael Kerrisk
    New page for pthread_attr_setdetachstate(3) and
    pthread_attr_getdetachstate(3)

pthread_attr_setguardsize.3
  Michael Kerrisk
    New page for pthread_attr_setguardsize(3) and
    pthread_attr_getguardsize(3)

pthread_attr_setscope.3
  Michael Kerrisk
    New page for pthread_attr_setscope(3) and pthread_attr_getscope(3)

pthread_attr_setstack.3
  Michael Kerrisk
    New page for pthread_attr_setstack(3) and pthread_attr_getstack(3)

pthread_attr_setstackaddr.3
  Michael Kerrisk
    New page for pthread_attr_setstackaddr(3)
 and
    pthread_attr_getstackaddr(3)

pthread_attr_setstacksize.3
  Michael Kerrisk
    New page for pthread_attr_setstacksize(3) and
    pthread_attr_getstacksize(3)

pthread_create.3
  Michael Kerrisk
    New page describing pthread_create(3)

pthread_detach.3
  Michael Kerrisk
    New page for pthread_detach(3)

pthread_equal.3
  Michael Kerrisk
    New page for pthread_equal(3)

pthread_exit.3
  Michael Kerrisk
    New page describing pthread_exit(3)

pthread_getattr_np.3
  Michael Kerrisk
    New page for pthread_getattr_np(3)

pthread_join.3
  Michael Kerrisk
    New page for pthread_join(3)

pthread_self.3
  Michael Kerrisk
    New page for pthread_self(3)

pthread_tryjoin_np.3
  Michael Kerrisk
    New page for pthread_tryjoin_np(3) and pthread_timedjoin_np(3)

Newly documented interfaces in existing pages
---

dup.2

Michael Kerrisk
Add description
of dup3()
dup3() was added in kernel 2.6.27.

epoll_create.2
Michael Kerrisk
Add description of new epoll_create1()
The new epoll_create1() system call appeared in Linux 2.6.27.

eventfd.2
Michael Kerrisk
Describe eventfd2() and EFD_NONBLOCK and EFD_CLOEXEC
Linux 2.6.27 added eventfd(), which supports a flags argument
that eventfd() did not provide. The flags so far implemented
are EFD_NONBLOCK and EFD_CLOEXEC,

inotify_init.2
Michael Kerrisk
Add description of inotify_init1()
The inotify_init1() system call was added in Linux 2.6.27.

pipe.2
Michael Kerrisk
Add description of new pipe2() syscall
pipe2() was added in 2.6.27. Describe the O_NONBLOCK and
O_CLOEXEC flags.

signalfd.2
Michael Kerrisk
Describe signalfd4() and SFD_NONBLOCK and SFD_CLOEXEC
Linux 2.6.27 added signalfd4(), which supports a flags argument
that signalfd() did not provide. The flags so far implemented
are SFD_NONBLOCK and SFD_CLOEXEC.

New and changed links
---

dup3.2
Michael Kerrisk
New link to dup.2
dup.2 now contains the description of the new dup3() syscall.

epoll_create1.2
Michael Kerrisk
New link to epoll_create.2
epoll_create.2 now includes a description of the new

epoll_create1() system call.

eventfd2.2
Michael Kerrisk
New link to eventfd.2
The eventfd.2 page has some details on the eventfd2() system call,
which was new in Linux 2.6.27.

inotify_init1.2
Michael Kerrisk
New link to inotify_init.2
inotify_init.2 now includes a description of the new
inotify_init1() system call.

pipe2.2
Michael Kerrisk
New link to pipe.2
pipe(2) now contains a description of the new pipe2() syscall.

pthread_attr_destroy.3
Michael
Kerrisk
New link to new pthread_attr_init.3

pthread_attr_getdetachstate.3
Michael Kerrisk
New link to new pthread_attr_setdetachstate.3

pthread_attr_getguardsize.3
Michael Kerrisk
New link to new pthread_attr_setguardsize.3

pthread_attr_getscope.3
Michael Kerrisk
New link to new pthread_attr_setscope.3

pthread_attr_getstack.3
Michael Kerrisk
New link to new pthread_attr_setstack.3

pthread_attr_getstackaddr.3
Michael Kerrisk
New link to new pthread_attr_setstackaddr.3

pthread_attr_getstacksize.3
Michael Kerrisk
New link to new pthread_attr_setstacksize.3

pthread_timedjoin_np.3
  Michael Kerrisk
    New link to new pthread_tryjoin_np.3

signalfd4.2
  Michael Kerrisk
    New link to signalfd.2
      signalfd.2 now includes text describing signalfd4() system call,
      new in Linux 2.6.27.

Global changes
---

eventfd.2, getdents.2, mprotect.2, signalfd.2, timerfd_create.2,
wait.2,
 backtrace.3, clock_getcpuclockid.3, end.3, fmemopen.3,
fopencookie.3, getdate.3, getgrouplist.3, getprotoent_r.3,
getservent_r.3, gnu_get_libc_version.3, inet.3, inet_pton.3,
makecontext.3, matherr.3, offsetof.3, pthread_attr_init.3,
pthread_create.3, pthread_getattr_np.3, sem_wait.3, strtol.3, core.5
  Michael Kerrisk
    Add ".SS Program source" to EXAMPLE
      Add ".SS Program source" to clearly distinguish shell session and
      descriptive text from actual program code.

eventfd.2, execve.2, getdents.2, ioprio_set.2, mprotect.2,
signalfd.2, timerfd_create.2, wait.2, backtrace.3,
clock_getcpuclockid.3, end.3, fmemopen.3, fopencookie.3, frexp.3,
getdate.3, getgrouplist.3, getprotoent_r.3, getservent_r.3,
gnu_get_libc_version.3, inet.3, inet_pton.3, makecontext.3,
malloc.3, matherr.3, offsetof.3, pthread_attr_init.3,
pthread_create.3, pthread_getattr_np.3, sem_wait.3, strftime.3,
strtok.3, strtol.3, core.5, proc.5, cpuset.7, mq_overview.7
  Michael
 Kerrisk
    Format user input in shell sessions in boldface

frexp.3, strftime.3, strtok.3
  Michael Kerrisk
    Relocate shell session above example program
      Move the shell session text that demonstrates the use of
      the example program so that it precedes the actual
      example program. This makes the page consistent with the
      majority of other pages.

Changes to individual pages

---

epoll_create.2
  Michael Kerrisk
    Say more about unused epoll_create() 'size' arg
      Supply a little more explanation about why the 'size' argument
      of epoll_create() is nowadays ignored.

eventfd.2
  Michael Kerrisk
    Remove crufty text relating to flags argument
      Remove sentence saying that glibc adds a flags argument
      to the syscall; that was only relevant for the older
      eventfd() system call.
getdents.2
  Christoph Hellwig
    Fix text relating
 to DT_UNKNOWN and 'd_type' support
      Some file systems provide partial support for 'dt_type',
      returning DT_UNKNOWN for cases they don't support.
      Update the discussion of 'd_type' and DT_UNKNOWN to
      support this.

getpeername.2, getsockname.2
  Michael Kerrisk
    SEE ALSO: add ip(7) and unix(7)

getsockopt.2
  Michael Kerrisk
    EINVAL can also occur if 'optval' is invalid
      In some cases, EINVAL can occur if 'optval' is invalid.
      Note this, and point reader to an example in ip(7).
      In response to:
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092

inotify_init.2
pipe.2
timerfd_create.2
  Michael Kerrisk
    Clarify *_NONBLOCK description
      Make it clear that the NONBLOCK flag sets an attribute in the new
      open file description.

sched_yield.2
  Michael Kerrisk
    Rewrite description in terms of threads
      The text formerly described the

operation of sched_yield() in
terms of processes. It should be in terms of threads.
Michael Kerrisk
Add NOTES text on appropriate use of sched_yield()
Strategic calls to sched_yield() can be used to improve
performance, but unnecessary use should be avoided.

sigaction.2
Michael Kerrisk
Clarify that sa_mask affects the *per-thread* signal mask
The page didn't previously clearly explain the scope of the
signal mask that is affected by sa_mask.

signalfd.2
Michael Kerrisk
Remove crufty text relating to flags argument
Remove sentence saying that glibc adds a flags argument
to the syscall; that was only relevant for the older
signalfd() system call.

sigprocmask.2
Michael Kerrisk
Clarify that sigprocmask() operates on a per-thread mask
The first sentence of the page was vague on the scope of the
attribute changed by sigprocmask().
Reword to make this
clearer and add a sentence in NOTES to explicitly state that
the signal mask is a per-thread attribute.

socket.2
Michael Kerrisk
Document SOCK_NONBLOCK and SOCK_CLOEXEC flags
These flags, specified in the 'type' argument, are supported
since Linux 2.6.27.

socketpair.2
Michael Kerrisk
Refer to socket(2) for SOCK_CLOEXEC and SOCK_NONBLOCK
Refer the reader to socket(2) for a description of the SOCK_CLOEXEC
and SOCK_NONBLOCK flags, which are supported by socketpair() since
Linux 2.6.27.

syscalls.2
Michael Kerrisk
Add new 2.6.27 system calls
Add pipe2(), dup3(), epoll_create1(), inotify_init1(),
eventfd2(), signalfd4().

timerfd_create.2
  Michael Kerrisk
    Document timerfd_create() TFD_CLOEXEC and TFD_NONBLOCK
      TFD_CLOEXEC and TFD_NONBLOCK are supported since LInux 2.6.27.

vfork.2
  Michael Kerrisk
     Clarify meaning of "child releases the parent's memory"
      The man page was not explicit about how the memory used by
      the child is released back to the parent.

ctime.3
  Michael Kerrisk
    ctime_r() and localtime_r() need not set 'timezone' and 'daylight'
      The man page already noted that these functions need not set
      'tzname', but things could be clearer: it tzset() is not called,
      then the other two variables also are not set.

      Also, clarify that ctime() does set 'timezone' and 'daylight'.

dlopen.3
  Michael Kerrisk
    LD_LIBRARY_PATH is inspected once, at program start-up
      Make it clear that LD_LIBRARY_PATH is inspected *once*, at
      program start-up. (Verified from source and by experiment.)

fmemopen.3
  Michael Kerrisk
    Document binary mode (mode 'b')
      Glibc 2.9 adds support to fmemopen() for binary mode opens.
      Binary mode is specified
by inclusion of the letter 'b' in
      the 'mode' argument.

getaddrinfo.3
  Michael Kerrisk
    Clarify error descriptions with some examples
      Clarify the description of some errors by giving examples
      that produce the errors. (Text added for EAI_SERVICE and
      EAI_SOCKTYPE.)

      Also, add an error case for EAI_BADFLAGS.

gethostbyname.3
  Michael Kerrisk
    Rationalize text on POSIX.1-2001 obsolete interfaces
      POSIX.1 marks gethostbyname(), gethostbyaddr(), and 'h_errno'
      as obsolete. The man page explained this, but with some

duplication. Remove the duplication, and otherwise tidy up
discussion of this point.

popen.3
  Michael Kerrisk
    Change one-line description in NAME
      s%process I/O%pipe stream to or from a process%
  Michael Kerrisk
    Document 'e' (close-on-exec) flag
      glibc 2.9 implements the 'e' flag in 'type', which sets the

      close-on-exec flag on the underlying file descriptor.

raise.3
  Michael Kerrisk
    SEE ALSO: add pthread_kill(3)

readdir.3
  Christoph Hellwig
    Fix text relating to DT_UNKNOWN and 'd_type' support
      (This mirrors the previous change to getdents.2)
      Some file systems provide partial support for 'dt_type',
      returning DT_UNKNOWN for cases they don't support.
      Update the discussion of 'd_type' and DT_UNKNOWN to
      support this.

strcpy.3
  Jason Spiro
    Strengthen warning about checking against buffer overruns
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=413940

tty_ioctl.4
  Michael Kerrisk
    Explain capability requirements for TIOCCONS
      Explain capability requirements for TIOCCONS, and describe
      changes in 2.6.10 relating to capabilities.
  Michael Kerrisk
    Explain capability requirements for various ioctls
      For TIOCSLCKTRMIOS, TIOCSCTTY,
 TIOCEXCL, explain the exact
      capability that is required (the text formerly just said "root"
      in each case).

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/threads-max
      Defines the system-wide limit on the number of threads (tasks).

utmp.5
  Pierre Cazenave
    It is just "other" who should not have write perms on utmp
      The page was vague before, saying that utmp should not be
      writable by any user. This isn't true: it can be, and
      typically is, writable by user and group.

epoll.7
  Michael Kerrisk
    Mention epoll_create1() as part of epoll API
      epoll_create1() was added in Linux 2.6.27, and extends the
      functionality of epoll_create().

inotify.7
  Michael Kerrisk
    Mention inotify_init1() in overview of API
      Discuss the new inotify_init1() system call in the overview of
      the inotify API.

ip.7
  Michael Kerrisk
    Detail EINVAL
 error for IP_ADD_MEMBERSHIP socket option
      In response to:
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092

iso_8859-7.7
  Lefteris Dimitroulakis
    Add Drachma, Euro, and Greek Ypogegrammeni
      Also, amend description of characters 0241 and 0242.

man-pages.7
  Michael Kerrisk
    Example shell sessions should have user input boldfaced

pthreads.7
  Michael Kerrisk
    Describe return value from pthreads functions
      Describe the usual success (0) and failure (non-zero) returns,
      and note that POSIX.1-2001 specifies that pthreads functions
      can never fail with the error EINTR.

signal.7
  Michael Kerrisk
    Timeouts make socket interfaces non-restartable
      If setsockopt() is used to set a timeout on a socket(),
      then the various socket interfaces are not automatically
      restarted, even if SA_RESTART is specified when

establishing the signal handler.
Analogous behavior occurs
for the "stop signals" case.

socket.7
Michael Kerrisk
SEE ALSO: add unix(7)

ld.so.8
Michael Kerrisk
Document LD_USE_LOAD_BIAS
Drawing heavily on Jakub Jelinek's description in
http://sources.redhat.com/ml/libc-hacker/2003-11/msg00127.html
(Subject: [PATCH] Support LD_USE_LOAD_BIAS)
--inhibit-rpath is ignored for setuid/setgid ld.so
The --inhibit-rpath option is ignored if ld.so is setuid/setgid
(not if the executable is setuid/setgid).
Michael Kerrisk
Since glibc 2.4, setuid/setgid programs ignore LD_ORIGIN_PATH
Michael Kerrisk
Fix description of LD_PROFILE and LD_PROFILE_OUTPUT
Clarify that LD_PROFILE is pathname or a soname,
and identify name of profiling output file.
Fix description of LD_PROFILE_OUTPUT, which wasn't even close to
the truth. (But why did it remain unfixed for
so many years?)
Michael Kerrisk
Since glibc 2.3.4, setuid/setgid programs ignore LD_DYNAMIC_WEAK
Michael Kerrisk
Since version 2.3.5, setuid/setgid programs ignore LD_SHOW_AUXV
Michael Kerrisk
Reorder lists of LD_* environment variables alphabetically
Michael Kerrisk
Since glibc 2.3.4, setuid/setgid programs ignore LD_DEBUG

========== Changes in man-pages-3.13 ==========

Released: 2008-11-07, Bucaramanga

pthread_getschedparam.3
  Michael Kerrisk
    New link to new pthread_setschedparam.3

Global changes
---

pthread_attr_setaffinity_np.3
pthread_getattr_np.3
pthread_setaffinity_np.3
pthread_tryjoin_np.3
  Michael Kerrisk
    Explain _np suffix
      Add text to CONFORMING TO explaining that the "_np"
      suffix is because these functions are non-portable.

Changes to individual pages
---

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add sched_getcpu(3)

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: Add pthread_setaffinity_np(3)

sched_setaffinity.2
  Michael Kerrisk
    Clarify EINVAL error for cpusetsize < kernel mask size
      For sched_setaffinity(), the

EINVAL error that occurs
        if 'cpusetsize' is smaller than the kernel CPU set size only
        occurs with kernels before 2.6.9.

vfork.2
  Michael Kerrisk
    Child holds parent's memory until execve() or *termination*
      The page was phrased in a few places to describe the child as
      holding the parent's memory until the child does an execve(2)
      or an _exit(2). The latter case should really be the more
      general process termination (i.e., either _exit(2) or abnormal
      termination).

clock_getres.3
  Michael Kerrisk
    CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable
      According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and
      CLOCK_THREAD_CPUTIME_ID clocks should be settable, but
      currently they are not.

pthread_attr_setstacksize.3
  Michael Kerrisk, after a report by Karsten Weiss
    EINVAL occurs on some systems if stacksize != page-size

    On MacOS X at least, pthread_attr_setstacksize(3) can fail
      with EINVAL if 'stacksize' is not a multiple of the system
      page size. Best to mention this so as to aid people writing
      portable programs.

pthread_create.3
  Karsten Weiss
    Fix bug in EXAMPLE program
      The calloc() line should read like this instead:

        tinfo = calloc(num_threads, sizeof(struct thread_info));

pthread_exit.3
  Michael Kerrisk
    BUGS: thread group with a dead leader and stop signals
      Document the bug that can occur when a stop signal
      is sent to a thread group whose leader has terminated.
      http://thread.gmane.org/gmane.linux.kernel/611611
      http://marc.info/?l=linux-kernel&m=122525468300823&w=2

resolver.3
  Michael Kerrisk
    Fix prototype of dn_expand()
      The 4th argument is "char *", not "unsigned char *".

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708

epoll.7
  Michael Kerrisk
    Fix error handling after accept() in example code
      Simply continuing after an error is in most cases wrong,
      and can lead to infinite loops (e.g., for EMFILE).
      So handle an error by terminating.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202

epoll.7
  Michael Kerrisk
    Add error handling for epoll_wait() call in example code

epoll.7
  Michael Kerrisk
    Improve example code
      Fill in some gaps in example code (variable declarations,
      adding listening socket to epoll set).
      Give variables more meaningful names.
      Other minor changes.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202

iso_8859-7.7
  Lefteris Dimitroulakis
    Add characters for Drachma and Greek Ypogegrammeni
      Lines for these two characters were added in the previous patch,
      but the actual characters were not included in
 the 4th column
      of the table. This fixes that.

pthreads.7
  Michael Kerrisk
    Add a section describing thread IDs
      In particular, note that in each pthreads function that takes
      a thread ID argument, that ID by definition refers to a thread
      in the same process as the caller.

========== Changes in man-pages-3.14 ==========

Apologies if I missed anyone!

New and rewritten pages

CPU_SET.3
  Michael Kerrisk
    New page documenting CPU_* macros
      This page contains material moved out of sched_setscheduler(2).
      It overwrites a previously existing link file with the same name.
  Michael Kerrisk
    Add description of macros for dynamically allocated CPU sets
      Add descriptions of CPU_ALLOC(), CPU_ALLOC_SIZE(), CPU_FREE(),
      CPU_SET_S(), CPU_CLR_S(), CPU_ISSET_S(), CPU_ZERO_S(),
      CPU_COUNT_S(), CPU_AND_S(), CPU_OR_S(), CPU_XOR_S(), and
      CPU_EQUAL_S().
  Michael Kerrisk
    Add documentation of CPU_COUNT()
  Michael Kerrisk
    Add description
of CPU_AND(), CPU_OR, CPU_XOR(), and CPU_EQUAL()
      Plus a few other small clean-ups of the text
  Michael Kerrisk
    Various improvements in DESCRIPTION
      After review comments by Bert Wesarg:

* Explain that cpu_set_t is a bitset, but should be considered
opaque.
* A CPU set can be duplicated with memset().
* Size of a CPU set is rounded up to size of long.
* CPU_SETSIZE is in bits, but the setsize argument is in bytes.
Michael Kerrisk
Document CPU_ALLOC()/CPU_ALLOC_SIZE() bug
These macros return twice what they should because of thinko
in glibc 2.8 and earlier. The bug is fixed for glibc 2.9.
http://sourceware.org/bugzilla/show_bug.cgi?id=7029
Michael Kerrisk
NOTES: Discuss use of types in "prototypes" for these macros
The SYNOPSIS shows types for arguments and return values, but
these are really just suggestions:
since the interfaces are
macros, the compiler won't catch all violations of
the "type rules". Warn the reader of this.

pthread_attr_setinheritsched.3
Michael Kerrisk
New page for pthread_attr_setinheritsched(3) and
pthread_attr_getinheritsched(3)

pthread_cancel.3
Michael Kerrisk
New page for pthread_cancel(3)

pthread_cleanup_push.3
Michael Kerrisk
New page for pthread_cleanup_push(3) and pthread_cleanup_pop(3)

pthread_setcancelstate.3
Michael Kerrisk
New page for pthread_setcancelstate(3) and pthread_setcanceltype(3)

pthread_testcancel.3
Michael Kerrisk
New page for pthread_testcancel(3)

Newly documented interfaces in existing pages

    New link to new CPU_SET.3

CPU_CLR.3
CPU_ISSET.3
CPU_ZERO.3
  Michael Kerrisk
    Update links to point to CPU_SET.3
      The documentation of the CPU_* macros migrated to a new
      location: CPU_SET.3.

pthread_attr_getinheritsched.3
  Michael Kerrisk
    New link to new pthread_attr_setinheritsched.3

pthread_cleanup_pop.3
  Michael Kerrisk
    New link to new pthread_cleanup_push.3

pthread_setcanceltype.3
  Michael Kerrisk
    New link to new pthread_setcancelstate.3

Global changes
---

clone.2
mount.2
unshare.2
proc.5
path_resolution.7
   Michael Kerrisk
    Global fix: s/namespace/mount-point namespace/, as appropriate
      In recent times, a number of other namespace flags have been
      added to clone(2). As such, it is no longer clear to use
      the generic term "namespace" to refer to the particular
      namespace controlled by CLONE_NEWNS; instead, use the
      term "mount-point namespace".
  Michael Kerrisk
    Global fix: s/mount-point namespace/mount namespace/
      This is more consistent with the term "mounts namespace"
      used in the 2008 ACM SIGOPS paper, "Virtual servers
      and checkpoint/restart in mainstream Linux".
      (I avoided the "s", because using the plural strikes me

as klunky English, and anyway we don't talk about
the "PIDs namespace" or the "networks namespace", etc..)

connect.2
listen.2
send.2
uname.2
cmsg.3
proc.5
arp.7
ddp.7
icmp.7
ip.7
raw.7
socket.7
tcp.7
udp.7
Michael
Kerrisk
Global fix: eliminate mention of the obsolete sysctl(2) interface
Many pages still mention use of the obsolete sysctl(2) system
call, or used the term "sysctls"; rewrite these mentions to
instead be in terms of /proc interfaces.

fcntl.2
signal.2
mbsnrtowcs.3
mbsrtowcs.3
mbtowc.3
wcrtomb.3
wcsnrtombs.3
wcsrtombs.3
wctomb.3
Michael Kerrisk
Global fix: s/multi-thread/multithread/

getdents.2
pthread_attr_init.3
pthread_create.3
pthread_getattr_np.3
pthread_setaffinity_np.3
pthread_setschedparam.3
pthread_tryjoin_np.3
Michael Kerrisk
Use consistent error-handling function names
Many older pages use a handle_error() macro to do simple
error handling from system and library function calls.
Switch these pages to do similar.

Changes to individual pages
---

time.1
  Michael Kerrisk
    Note that some shells have a 'time' built-in command

  Therefore, to access the functionality described on this page,
      it may be necessary to specify the full pathname.

clone.2
  Michael Kerrisk
    Place list of CLONE_* flags in alphabetical order
      (No content changes.)
fsync.2
  Michael Kerrisk
    Update feature test macro requirements for fsync()
      Since glibc 2.8, the fsync() declaration is also exposed if
      _POSIX_C_SOURCE >= 200112L

sched_setaffinity.2
  Michael Kerrisk
    Add note on system-imposed restrictions on CPUs actually used
      After Loïc Domaigne's suggestion for pthread_setaffinity_np(3), add
      similar text to this page noting that the system silently
      limits the set of CPUs on which the process actually runs to
      the set of CPUs physically present and the limits imposed by
      cpuset(7).

sched_setaffinity.2
  Michael Kerrisk
    Removed discussion of CPU_* macros()
      These macros are now moving
 to a separate page.
  Michael Kerrisk
    Refer reader to pthread_setaffinity_np(3)
      pthread_setaffinity_np() is preferable for setting
      thread CPU affinity if using the POSIX threads API.

sysctl.2
  Michael Kerrisk
    Add prominent warning against using this system call
      This was already stated under NOTES, but make it even more
      prominent by adding a sentence at the start of the DESCRIPTION.

uname.2

Michael Kerrisk
Add C comments describing fields in utsname structure

atan2.3
Stefano Teso
Fix description of range of function value return
The range is not [-pi/2, pi/2], but [-pi, pi].

(mtk: This error was reported by Nicolas François, and
should have been fixed in 3.11, but somewhere along the way,
the fix got lost.)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=506299

bindresvport.3
Michael Kerrisk
Since glibc 2.8, EPFNOSUPPORT
error is now EAFNOSUPPORT
Glibc switched to using a POSIX-specified error code for
this error case.

http://bugs.linuxbase.org/show_bug.cgi?id=2375

clock_getres.3
Michael Kerrisk
CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable
According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and
CLOCK_THREAD_CPUTIME_ID clocks should be settable, but
currently they are not.

getgrnam.3
Michael Kerrisk
Clarify and add more detail in RETURN VALUE description
The page was a bit fuzzy in describing the return values for
various cases. In particular, it needed to be more explicit
in describing what happens for the "not found" case.

This is an analogous change to the change for
getpwnam.3, made after Andreas Henriksson's report.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787
Michael Kerrisk

Rename arguments to getgrnam_r() and getgrgid_r()
s/gbuf/grp/ and s/gbufp/result/, for consistency
with POSIX.1 argument names.
Michael Kerrisk
Clarify RETURN VALUE description
The page was a bit fuzzy in describing the return values for

various cases. In particular, it needed to be more explicit
in describing what happens for the "not found" case.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708

getpwnam.3
  Michael Kerrisk
    Rename arguments to getpwnam_r() and getpwuid_r()
      s/pwbuf/pwd/ and s/pwbufp/result/, for consistency
      with POSIX.1 argument names.
  Michael Kerrisk
    Clarify and add more detail in RETURN VALUE description
      The page was a bit fuzzy in describing the return values for
      various cases. In particular, it needed to be more explicit
      in describing what happens for the "not found" case.

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787
   Michael Kerrisk
    Add an EXAMPLE program for getpwnam_r()

inet_ntop.3
  Michael Kerrisk
    Rename 'cnt' argument to 'size'
      This is consistent with POSIX.1, and also a more sensible name.
  Michael Kerrisk
    Rework text describing 'size' argument
      (After a suggestion by Vegard Nossum.)
      Also made a few other small rewordings to in the initial
      paragraph.

makecontext.3
  Michael Kerrisk
    Add text on use of pointer arguments to makecontext()
      Passing pointer arguments to makecontext() is possible,
      but only on some architectures, and with no guarantees
      of portability.

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504699

pthread_attr_setaffinity_np.3
  Michael Kerrisk
    Various fixes after review by Loïc Domaigne
      Reviewed-by: Loïc Domaigne

pthread_attr_setaffinity_np.3
pthread_setaffinity_np.3
   Michael Kerrisk
    Update to reflect new location of CPU_*() documentation

The CPU_*() macros are now documented in CPU_SET.3;
update to reflect that fact.
Michael Kerrisk
Remove redundant text relating to CPU sets
Information about CPU_SETSIZE can be found in CPU_SET.3, so
remove discussion of it here.

pthread_attr_setschedparam.3
pthread_setschedparam.3
Michael Kerrisk
Remove text saying that only sched_priority is required by POSIX.1
Loïc Domaigne points out that if a system implements
SCHED_SPORADIC (which Linux does not), then other
fields are also specified in sched_param. The simple
solution is just to remove that phrase from the man
page.

pthread_cancel.3
pthread_detach.3
pthread_join.3
pthread_setaffinity_np.3
Michael Kerrisk
Make text of ESRCH error consistent

pthread_setaffinity_np.3
Michael Kerrisk
Add
text to EINVAL error mentioning cpuset(7)
Michael Kerrisk
Various improvements after review by Loïc Domaigne
Various fix-ups after Loïc's review.

Reviewed-by: Loïc Domaigne

pthread_setschedparam.3
Michael Kerrisk
PTHREAD_INHERIT_SCHED is default for inherit scheduler attribute
In EXAMPLE, note that PTHREAD_INHERIT_SCHED is the default for
the inherit scheduler attribute.

syslog.3
Masanari Iida
LOG_KERN messages can't be generated from user processes
Masanari notes that this is an FAQ for logger(1) and that
Solaris and FreeBSD document this point in syslog(3).
The glibc info page also hides this comment in its source:

Internally, there is also LOG_KERN, but LOG_KERN == 0,

which means if you try to use it here, just selects default.

proc.5
  Ivana Varekova
    Fix reference to kernel source file
      Use relative reference
to Documentation/mtrr.txt.

arp.7
  Michael Kerrisk
    Add kernel version numbers for /proc interfaces

cpuset.7
  Michael Kerrisk
    SEE ALSO: add CPU_SET(3)

epoll.7
  Michael Kerrisk
    Note glibc version that added epoll support

icmp.7
  Michael Kerrisk
    Add kernel version numbers to /proc file descriptions

inotify.7
  Vegard Nossum
    Fix description of max_user_watches
      It seems that inotify(7) is wrong here:

      "/proc/sys/fs/inotify/max_user_watches
        This specifies a limit on the number of watches that can be
        associated with each inotify instance."

      On my system, the default value for this variable is 8192. But I
      cannot create more than 8192 watches in total for the same UID
      even when they are on different inotify instances. So I suggest
      to rephrase this as: "This specifies an upper limit on the
      number of watches that can be created
per real user ID."

ip.7
  Michael Kerrisk
    Reorder socket options alphabetically
  Michael Kerrisk
    Added kernel version numbers for IP_* socket options
  Michael Kerrisk
    Relocate kernel version information for IP_PMTUDISC_PROBE
  Michael Kerrisk

Add kernel version numbers for /proc/sys/net/ipv4/ip_* files
Michael Kerrisk
Remove mention of kernel header from description of IP_RECVERR
Looks like glibc has had this definition since about version 2.1.
Michael Kerrisk
Relocate kernel version information for ip_mreqn structure
Michael Kerrisk
Relocate info about Linux-specific sockopts to NOTES
Also add some source comments about non-standard Linux-specific
options that are not yet documented.

netlink.7
Vegard Nossum
Fix incorrect variable names in example code
s/snl/sa/ * 2

pthreads.7
Michael Kerrisk
Add section on cancellation points
This section includes a list of the functions that must and
may be cancellation points.
Michael Kerrisk
Rework, and fix small error in, thread-safe function list
Integrate the changes that occurred in POSIX.1-2008 into the
main list (to be consistent with the list, elsewhere on this
page, of functions that are cancellation points).

Also, fix an error that said that strerror() was added to
the list in POSIX.1-2008. It was strsignal() that was
added. (strerror() was already in the list in POSIX.1-2001.)
Michael Kerrisk
Tweak text on sigpause() cancellation point
In POSIX.1-2008, this function moves from the "must be"
to the "may be" list.
Michael Kerrisk
Add ref to signal(7) for further info on use of real-time signals
signal(7) provides some further details on the use of real-time
signals by the two Linux threading
implementations.
Michael Kerrisk
SEE ALSO: add pthread_attr_init() and pthread_cancel()

tcp.7
Michael Kerrisk
Update description of tcp_rmem defaults for Linux 2.6
Michael Kerrisk
Add kernel version numbers for TCP_* socket options
Note kernel version were each socket option first appeared.

Michael Kerrisk
The tcp_bic* proc files disappeared in Linux 2.6.13
Michael Kerrisk
tcp_vegas_cong_avoid disappeared in Linux 2.6.13
Michael Kerrisk
Add mention of RFC 4138 for 'tcp_frto' /proc file
Michael Kerrisk
Remove mention of /proc in VERSIONS
This information is not indicated for each /proc interface
Michael Kerrisk
Clarify that tcp_mem measures in units of the system page size
Michael Kerrisk
Update tcp_frto description for 2.6.22 changes
Linux 2.6.22 added a mode value 2 ("Enable SACK-enhanced
F-RTO if flow uses SACK").
Michael
Kerrisk
Fix alphabetical order in /proc file list
A few entries were slightly out of order.
Michael Kerrisk
Remove obsolete statement about /proc from VERSIONS
Much of the text has been updated to 2.6.27 or so,
so this statement no longer applies.
Michael Kerrisk
Add kernel version numbers for each /proc interface
Note kernel version where each /proc interface first appeared
Michael Kerrisk
tcp_westwood /proc file disappeared in Linux 2.6.13
Michael Kerrisk
Update description of tcp_wmem defaults for Linux 2.6

capabilities.7
ip.7
Michael Kerrisk
Global fix: s/reserved port/privileged port/
Some pages used one term, some pages the other term;
make some consistency.

connect.2
getpeername.2
getsockname.2
Michael Kerrisk
Use consistent argument names
Most other sockets pages are using the names 'addr'
and 'addrlen'; make these pages do the same.

getpeername.2
getsockname.2
getsockopt.2
recv.2
send.2
shutdown.2

sockatmark.3
socket.7
udplite.7
   Michael Kerrisk
     SYNOPSIS: Rename socket file descriptor argument to 'sockfd'
        Many sockets man pages use the name 'sockfd' already.
        For consistency, changes the others to do so as well.

gnu_dev_major.3
gnu_dev_makedev.3
gnu_dev_minor.3
major.3
minor.3
  Michael Kerrisk
     New links to new makedev(3) page

Changes to individual pages

_exit.2
  Michael Kerrisk
     Since glibc 2.3, the exit() wrapper function invokes exit_group(2)
        This information is useful to users of strace(1).

accept.2
  Michael Kerrisk
     Clarify details when returned address is truncated
        If the returned address is truncated, the 'addrlen' argument
        indicates the actual size of the address, rather than a count
        of the number of bytes in the truncated buffer.

        Also clarify that
 if 'addr' argument is NULL, then 'addrlen'
        should is unused, and should also be NULL.
  Michael Kerrisk
     Reorder ERRORS list
        Some errors were listed under a separate "may" heading.
        There's probably no real need to do this; integrate
        those errors into the main list.

exit_group.2
  Michael Kerrisk
     Note that since glibc 2.3, exit(2) invokes exit_group()

futex.2
  Michael Kerrisk
     Mention that glibc provides no wrapper function for futex()

get_thread_area.2
  Michael Kerrisk
    Note that glibc provides no wrapper for this system call

getdomainname.2
  Michael Kerrisk
    Substantial rewrite
      Expand description of setdomainname() and getdomainname().
      Note that getdomainname() is implemented as a library function
      in glibc.
      Note limits on size of domain name.
      Reorganize ERRORS list.

gethostname.2
  Michael Kerrisk
    Various parts rewritten
       Write a paragraph describing sethostname().

      Clarify differences between glibc's gethostbyname() and
      the kernel gethostbyname() system calls.

gethostname.2
  Michael Kerrisk
    Note that HOST_NAME_MAX is 64 on Linux
      Also note that in pre-1.0 days, the limit on hostnames
      was 8 bytes.

getpeername.2
  Michael Kerrisk
    Note that returned address may be truncated if buffer is too small

getsid.2
  Michael Kerrisk
    Simplified version information and moved to a new VERSIONS section

getsockname.2
  Michael Kerrisk
    Note that returned address is truncated if buffer is too small

mknod.2
  Michael Kerrisk
    Refer reader to makedev(3) to build a device ID

mmap.2
  Michael Kerrisk
    Loosen language around how 'addr' hint is interpreted
      Mel Gorman reported that in Linux 2.6.27, 'addr' is rounded

down to a page boundary.

Before kernel 2.6.26,
if 'addr' was taken as a hint, it was
rounded up to the next page boundary. Since Linux 2.6.24,
it is rounded down. Therefore, loosen the description of
this point to say that the address is rounded to "a nearby
page boundary".

open.2
Michael Kerrisk
EFBIG error is now EOVERFLOW (since Linux 2.6.24)
When a 32-bit app opens a file whose size is too big to be
represented in 31-bits, POSIX.1 specifies the error EOVERFLOW.
Linux used to give EFBIG for this case, but 2.6.24 fixed this.

Also, add some text to describe the error scenario in
more detail.

pread.2
Michael Kerrisk
Note that glibc emulation for these calls uses lseek(2)
(This makes it clearer that the emulated calls are not atomic.)

recv.2
send.2
Michael Kerrisk
Make names of "address" and "address length" args more consistent
Make the names of these arguments
more consistent with other
sockets man pages.

recv.2
Michael Kerrisk
Clarify details when returned address is truncated
If the recvfrom() returned address is truncated, the 'fromlen'
argument indicates the actual size of the address, rather than
a count of the number of bytes in the truncated buffer.

Also clarify that the 'from' argument can be NULL, in which
case 'fromlen' should is unused, and should also be NULL.
Michael Kerrisk
Internet datagram and netlink sockets support MSG_TRUNC for recv(2)
Internet datagram (since Linux 2.4.27/2.6.8),
and netlink (since Linux 2.6.22) sockets support
the MSG_TRUNC flag for recv(2).

select.2

Michael Kerrisk
Rewrote text describing feature test macros requirement for pselect()

select_tut.2
Michael Kerrisk
Fix SHUT_FD* macros in example program
Add "do {} while (0)"

set_thread_area.2
Michael Kerrisk
Note that glibc provides no wrapper for this system call

setfsgid.2
setfsuid.2
Michael Kerrisk
Simplify version information and move to a VERSIONS section

setsid.2
Michael Kerrisk
Rework RETURN VALUE section; add an ERRORS section

setup.2
Michael Kerrisk
Relocate some CONFORMING TO text to VERSIONS and NOTES

stat.2
Michael Kerrisk
Document EOVERFLOW error
Michael Kerrisk
Refer reader to major() and minor() to decompose a device ID

syscalls.2
Michael Kerrisk
Fix version numbers for a few system calls
Some 2.6 system calls were wrongly mentioned as also being
backported into a 2.4.x kernel.

uname.2
Michael Kerrisk
DESCRIPTION: Point reader at NOTES for further info on field lengths

atan.3
Andries E. Brouwer
Fix return value description
The correct range for the return value is [-pi/2,pi/2].
(mtk's fix in
the last change to the return value text was
a botch-up of a (correct) suggestion by Nicolas François.)

atexit.3
  Michael Kerrisk
    atexit() and on_exit(3) register functions on the same list
  Michael Kerrisk
    Terminating registered function using longjmp() is undefined
      According to POSIX.1, using longjmp() to terminate execution of
      a function registered using atexit() produces undefined results.
  Michael Kerrisk
    Calling exit(3) more than once produces undefined results
      If an exit handler itself calls exit(3), the results are
      undefined (see the POSIX.1-2001 specification of exit(3)).
  Michael Kerrisk
    The same exit handler may be registered multiple times
  Michael Kerrisk
    Calling _exit(2) terminates processing of exit handlers
  Michael Kerrisk
    Terminating registered function using longjmp() is undefined
      According to POSIX.1, using longjmp() to terminate
execution of
      a function registered using atexit() produces undefined results.

bindresvport.3
  Mats Wichmann
    SYNOPSIS: s/**/*/ in prototype
  Michael Kerrisk
    Fix errors regarding port used, plus other rewrites
      Glibc's bindresvport() takes no notice of sin->sin_port:
      it always returns an arbitrary reserved port in the
      anonymous range (512-1023). (Reported by Mats Wichmann.)

      Also:
      * Add EADDRINUSE and EACCES errors.
      * Mention use of getsockname(2).
      * Other minor rewrites and reorderings of the text.
      * Explicitly note that glib's bindresvport() ignores
        sin->sin_port.
      * Change license There's now virtually no text remaining from
        the 1.70 version of this page.

      Reviewed-by: Mats Wichmann
      Reviewed-by: Petr Baudis

dlopen.3
  Petr Baudis
    Describe confusing dladdr() behavior
      dladdr()

will act unexpectedly if called from non-pic code on a
compile-time-generated function pointer.

fmemopen.3
Michael Kerrisk
Add VERSIONS section
Petr Baudis
SEE OPEN: Add fopencookie(3)
fopencookie(3) is used to implement fmemopen().

fopen.3
Petr Baudis
SEE ALSO: Add fmemopen(3) and fopencookie(3)

fopencookie.3
Petr Baudis
fopencookie() needs _GNU_SOURCE feature test macro

getaddrinfo.3
Petr Baudis
Document results ordering and /etc/gai.conf
This patch documents the order of the getaddrinfo(3) results
(RFC 3484), how should the application deal with that,
mentions the extremely common cause of having multiple
results per query (both IPv4 and IPv6 addresses available)
and mentions /etc/gai.conf.

(mtk: Minor tweaks, and note glibc version for /etc/gai.conf)

isatty.3
Michael Kerrisk
Complete rewrite of this page,
with rather more detail

memmem.3
Michael Kerrisk
Remove sentence saying that libc 5.0.9 is still widely used
That was a *long* time ago.

on_exit.3
Michael Kerrisk
Document handling of registrations on fork(2) and execve(2)
Treatment in these cases is the same as for atexit(3).
Michael Kerrisk
Arg given to registered function is status from *last* call to exit()
It's a subtle point, but if a registered function itself
calls exit(3), then subsequent functions that were registered
with on_exit(3) will see the exit status given to the more

recent exit(3) call.
  Michael Kerrisk
    Note that same function may be registered multiple times

setlocale.3
locale.7
  Michael Kerrisk
    Clean up the description of LANGUAGE environment variable
      Clean up the $LANGUAGE description, by removing bogus comments
      from setlocale(3) and expanding the mention
in locale(7).

      Maybe you will decide that a more detailed description
      should be left to the gettext(3) documentation, but I
      actually care about the invisible part of the patch more
      since the comments have put me off the track initially
      ($LANGUAGE has nothing to do with setlocale(3) and is
       completely isolated to gettext, as obvious from the
       glibc sources).

proc.5
  Michael Kerrisk
    /proc/stat: s/minor/disk_idx/ in description of /proc/stat
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=225619

capabilities.7
  Drake Wilson
    Various minor fixes as per Debian bug 471029
      The relevant pieces of
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=471029 are:

        - Delete duplicate subentry for KEYCTL_CHOWN/KEYCTL_SETPERM
          operations in the CAP_SYS_ADMIN entry. (It feels like that
          capability entry should be converted
to a list, but I've
          left it in semicolon-delimited form for now.)

        - Remove text about ENFILE from the text about the
          /proc/sys/fs/file-max limit in the CAP_SYS_ADMIN entry, since
          this is already described in the man pages for the relevant
          ofile-creating system calls.

        - Correct or clarify a few other bits of grammar and such;
          see the diff file itself for details.

socket.7
  Michael Kerrisk
    SEE ALSO: add tcp(7) and udp(7)

tcp.7
  Michael Kerrisk
    Relocate out-of-band data discussion
      Move to a new subsection entitled "Sockets API".
  Michael Kerrisk
    Note that MSG_PEEK can be used on out-of-band data

time.7
  Michael Kerrisk
    SEE ALSO: add clock_gettime(3)

unix.7
  Michael Kerrisk
    Unix domain sockets don't support the recv() MSG_TRUNC flag
  Michael Kerrisk
    Retitled subsection "(Un)supported features"
 to "Sockets API"
      This is consistent with the recent change in tcp(7).

  Michael Kerrisk
    Fix VERSIONS information

gethostid.3
  Michael Kerrisk

    Before version 2.2, glibc stored the host ID in /var/adm/hostid
      Also: rewrite some text describing the /etc/hostid file, so that
      this location is referred to just once on the page.
  Michael Kerrisk
    RETURN VALUE: describe return value of sethostid()
  Michael Kerrisk
    Added BUGS section noting that ID can't be guaranteed to be unique
  Michael Kerrisk
    Added ERRORS section describing errors for sethostid()
  Michael Kerrisk
    Update section number to reflect relocation into Section 3

printf.3
  Michael Kerrisk
    Source and destination buffers may not overlap for *s*printf()
      http://sourceware.org/bugzilla/show_bug.cgi?id=7075

      Some existing code relies on techniques like the following to
      append text to a buffer:

```
$ cat s.c
#include <stdio.h>
char buf[80] = "not ";
main()
{
   sprintf(buf,
"%sfail", buf);
puts(buf);
return 0;
}

$ cc s.c
$ ./a.out
not fail
```

However, the standards say the results are undefined if source and destination buffers overlap, and with suitable compiler options, recent changes can cause unexpected results:

```
$ cc -v 2>&1 | grep gcc
gcc version 4.3.1 20080507 (prerelease) [gcc-4_3-branch revision 135036] (SUSE Linux)
$ cc -D_FORTIFY_SOURCE -O2 s.c
$ ./a.out
fail
```

readdir.3

Michael Kerrisk

Rewrite text describing 'dirent' fields standardized in POSIX.1

Michael Kerrisk

Clarify text for return value/errno setting for end-of-stream case

nscd.8

Petr Baudis

Correct NOTES section on reloading configuration files

It behaved this way at least since "Sun Oct 18 15:02:11 1998 +0000", some four months after including the nscd implementation in glibc. But there does seem to be a short window between glibc-2.1 and glibc-2.1.3 when nscd -i was not available, I don't think it's worth muddling the point of the page with that, though.

Changes to individual pages
---

bind.2
Michael Kerrisk
SEE ALSO: Add getifaddrs(3)

epoll_create.2
Michael Kerrisk
Document EMFILE error
This error is encountered when the limit imposed by
/proc/sys/fs/epoll/max_user_instances is encountered.
Michael Kerrisk
Clarify distinction between epoll instance and epoll file descriptor
Reword so that the notion of an epoll instance is made clear,
and made distinct from the notion of an epoll file descriptor.
Some other minor rewordings also.

epoll_ctl.2
Michael Kerrisk
Reordered parts of the text
Michael Kerrisk
Introduce notion of epoll instance
Introduce notion of epoll instance as distinct from
epoll file descriptor. Plus other wording clean-ups.
Michael Kerrisk
Document ENOSPC error (new in Linux 2.6.28)
This error results when the limit imposed by
/proc/sys/fs/epoll/max_user_watches is encountered.

epoll_wait.2
Michael Kerrisk
Introduce
the notion of an epoll instance into text

getdents.2
Michael Kerrisk
Before kernel < 2.6.4, 'd_type' was effectively always DT_UNKNOWN

gethostid.2
  Michael Kerrisk
    Rename file (was misnamed gethostd.2 in previous release)

getsockname.2
  Michael Kerrisk
    SEE ALSO: Add getifaddrs(3)

signalfd.2
  Michael Kerrisk
    Fix description of fork() semantics
      The page text described the semantics of the initial
      implementation of signalfd(). These were changed early on,
      but the man page wasn't updated.

byteorder.3
  Michael Kerrisk
    SEE ALSO: add endian(3)

longjmp.3
  Michael Kerrisk
    Clarify wording re saving/restoring signal mask
  Michael Kerrisk
    siglongjmp() restores signal mask iff 'savesigs' was non-zero
      Note that siglongjmp() restores signal mask if, and only
      if, 'savesigs' argument of sigsetjmp() was non-zero. (Previous
      text omitted the "and
 only if".)

memccpy.3
  Michael Kerrisk
    Fix CONFORMING TO: s/C99/POSIX.1-2001/
  Michael Kerrisk
    If the memory areas overlap, the results are undefined

sethostid.3
  Michael Kerrisk
    Rename file (was misnamed sethostd.3 in previous release)

setjmp.3
  Michael Kerrisk
    Clarify wording re saving/restoring signal mask
  Michael Kerrisk
    Clarify when setjmp() provides BSD vs System V signal mask semantics

strsep.3
  Michael Kerrisk
    BUGS: explicitly list problems afflicting strsep()

Previously, the page said this function suffered the same
problems as strtok(), but in fact strsep() doesn't suffer
from all of the same problems as strtok(), so explicitly
list just the problems of strsep() in the strsep.3 page.

proc.5
  Michael Kerrisk
    Add pointer to epoll(7) for description of epoll /proc files

epoll.7
  Michael Kerrisk
    Various wording changes to improve clarity
 and consistency

pthread_getcpuclockid.3
pthread_tryjoin_np.3
sem_wait.3
time.7
Michael Kerrisk
Global fix: Fix xrefs to clock_*.? pages to reflect move to section 2

clock_nanosleep.2
execve.2
fork.2
nanosleep.2
sigaction.2
timerfd_create.2

pthread_getcpuclockid.3
ualarm.3
usleep.3
pthreads.7
time.7
  Michael Kerrisk
    Global fix: s/(3)/(2)/ in section number xrefs for timer_*() API
      The POSIX timers API is implemented (mostly) within the kernel,
       so these interfaces are system calls. Although there are as yet
      no man pages, when they are added they should be in Section 2,
      not 3. Therefore fix those pages that currently refer to these
      interfaces as being in Section 3.

Changes to individual pages
----

capget.2
  Andi Kleen
    Add some details and relocate a paragraph
      While writing a little program using capset
      I found the capset manpage quite light on crucial
      details and I had to resort to RTFS.

      This patch improves the points I found unclear
      and also moves one misplaced paragraph around.

clock_getres.2
  Michael Kerrisk
    Move page from Section 3 to Section 2

eventfd.2
  Michael Kerrisk
    glibc eventfd() supports the use of eventfd2() since version 2.9

fork.2
  Michael Kerrisk
    SEE ALSO: add daemon(3)

getdents.2
  Michael Kerrisk
    Remove unneeded HAVE_D_TYPE
 from example program
      Since d_type will always just return DT_UNKNOWN before
      kernel 2.6.4, we don't need to use a conditional for
      determining whether we use this flag.

nanosleep.2

Michael Kerrisk
Relocated misplaced BUGS heading

select_tut.2
Michael Kerrisk
Clean up error checking in example program (no semantic changes)
Michael Kerrisk
Many parts tidied and rewritten
Remove some redundant text, clarify various pieces,
tidy example code, etc.
Michael Kerrisk
Bug fixes + rewrites in example program
Sebastien pointed out that the first example program
wrongly thinks it can count signals.
Also, some further rewrites by mtk.

socket.2
Michael Kerrisk
BUGS: Remove discussion SOCK_UUCP
As time goes on, this sentence becomes less a piece of humor,
and more a puzzle.

stat.2
Michael Kerrisk
Note
that open(O_NOATIME) also causes st_atime not to be updated

timerfd_create.2
Michael Kerrisk
Add BUGS noting that timerfd supports fewer clock types than
timer_create()

btowc.3
Michael Kerrisk
SEE ALSO: add wctob(3)

clock_getcpuclockid.3
Michael Kerrisk
SEE ALSO: add pthread_getcpuclockid(3)

cos.3
Michael Kerrisk
SEE ALSO: add sincos(3)

fexecve.3
Timo Sirainen
Note that fexecve() depends on a mounted /proc
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514043

Michael Kerrisk
CONFORMING TO: note addition of fexecve() in POSIX.1-2008
Michael Kerrisk
'fd' must be opened read-only and refer to a file that is executable

fmemopen.3
Michael Kerrisk
CONFORMING TO: note that these functions are in POSIX.1-2008

getifaddrs.3
Lucio Maciel
Fix memory leak in example program
Petr Baudis
Various small fixes

getpwnam.3
Michael Kerrisk

SEE ALSO: add getspnam(3)

getumask.3
Michael Kerrisk
Updated glibc version number in NOTES

ilogb.3
Michael Kerrisk
SEE ALSO: add significand(3)

intro.3
Michael Kerrisk
SEE ALSO: add libc(7)

isalpha.3
Michael Kerrisk
Fix statement that isalpa() is obsolete; should be isascii()
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=512709
Michael Kerrisk
SEE ALSO: add toascii(3)

mq_notify.3
Michael Kerrisk
Add cross reference to pthread_attr_init(3)

pthread_attr_setaffinity_np.3
Michael Kerrisk
SYNOPSIS: Fix declaration of 'attr'

pthread_getcpuclockid.3

Michael Kerrisk
SYNOPSIS: fix type of 'thread'

qsort.3
Michael Kerrisk
EXAMPLE: remove unnecessary "#include <unistd.h>"

random.3
Michael Kerrisk
SEE ALSO: add random_r(3)

remainder.3
Michael Kerrisk
SEE ALSO: add div(3)

scandir.3
Michael Kerrisk
CONFORMING TO: alphasort() and scandir()
are added to POSIX.1-2008
Michael Kerrisk
CONFORMING TO: note that versionsort() was added to glibc in
version 2.1

sem_wait.3
Michael Kerrisk
SEE ALSO: add clock_gettime(2)

significand.3
Michael Kerrisk
Add CONFORMING TO noting that this function is unstandardized

sigwait.3
Michael Kerrisk
Add EXAMPLES section referring to pthread_sigmask(3)

sin.3
Michael Kerrisk
SEE ALSO: add sincos(3)

stpcpy.3
Michael Kerrisk
Add BUGS section noting the possibility of buffer overruns
Michael Kerrisk
Add missing pieces/fix various problems in example program
Michael Kerrisk
CONFORMING TO: stpcpy() is nowadays on the BSDs
Michael Kerrisk
SEE ALSO: add stpcpy.3

wcscasecmp.3
  Michael Kerrisk
    CONFORMING TO: note that this function is added in POSIX.1-2008

wcsdup.3
  Michael Kerrisk
    CONFORMING TO: note that this function was added in POSIX.1-2008

wcsncasecmp.3
   Michael Kerrisk
    CONFORMING TO: note that this function is added in POSIX.1-2008

wctob.3
  Michael Kerrisk
    SEE ALSO: add btowc(3)

proc.5
  Michael Kerrisk
    Remove mention of epoll/max_user_instances
      (Since this interface appeared in 2.6.28, and then
      disappeared in 2.6.29.)

ascii.7
  Michael Kerrisk
    Update SEE ALSO list to include pages added in 3.17
  Michael Kerrisk
    SEE ALSO: add recently added iso_8859-*(7) pages

epoll.7
  Michael Kerrisk
    remove documentation of /proc/sys/fs/epoll/max_user_instances
      This /proc interface appeared in 2.6.28. but will be
      removed in 2.6.29.

      Also, document change in default value of
      /proc/sys/fs/epoll/max_user_watches (was 1/32 of lowmem,
      now 1/25 of lowmem).

koi8-r.7
  Michael Kerrisk
    SEE ALSO: add koi8-u(7); remove crufty text

standards.7
  Michael Kerrisk
    Update to note that latest
 POSIX/SUS was ratified in 2008

time.7
  Michael Kerrisk
    SEE ALSO: add pthread_getcpuclockid(3)

========== Changes in man-pages-3.19 ==========

Released: 2009-02-20, Putaruru

New and changed links
---

timer_gettime.2
  Michael Kerrisk
    New link to new timer_settime.2

Global changes

Various pages
  Kir Kolyshkin
    Trivial punctuation fixes in SEE ALSO
      In SEE ALSO, when a few man pages are referenced, those
      are divided by commas. Every reference is on a separate
      line, and all lines but the last one should end with
      comma. I spotted one place where there is no comma in
      between references, and mocked up an awk script to find
      similar places:

      for f in man*/*; do
        awk '
          /^.SH ["]SEE ALSO["]/ {
            sa=1; print "== " FILENAME " =="; print; next
          }
          /^\.(PP|SH)/ {
            sa=0; no=0; next

      }
          /^\.BR/ {
            if (sa==1) {
              print;
              if (no == 1)
                print "Missing comma in " FILENAME " +" FNR-1; no=0
            }
          }
          /^\.BR .*)$/ {
            if (sa==1)
              no=1;
            next
          }
          /\.\\"/ {next}
          /.*/ {
            if (sa==1) {
              print; next
            }

```
            }
          ' $f;
    done | fgrep 'Missing comma'
```

This patch fixes all the places found by the above script.

Also, there is an extra dot at the end of uri.7 "SEE ALSO"
section. Removed as per man-pages(7) recommendation.

Changes to individual pages
---

getitimer.2
clock_getcpuclockid.3
time.7
  Michael Kerrisk
    SEE ALSO: add timer_create(2)

getitimer.2
  Michael Kerrisk
    Rename arguments for consistency with other timer pages
      Also some other minor wording improvements

splice.2
  Mark Hills
    ERRORS: Add EINVAL case for file opened O_APPEND
      Target file cannot be opened in append (O_APPEND) mode

      In kernels prior to v2.6.27 splice() to a file in
      append mode is broken, and since that version it is
      disallowed. It is possible this behaviour may change
      in the future; see the kernel commit message
      (efc968d450e013049a662d22727cf132618dcb2f) for more
      information.

syscalls.2
  Michael Kerrisk
    Note that getpmsg(2) and putmsg(2) are unimplemented
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514771

timerfd_create.2
  Michael Kerrisk
    ERRORS: add EFAULT

timerfd_create.2
  Michael Kerrisk
    Rename timerfd_settime() 'curr_value'

arg to 'old_value'
        For consistency with related pages.

vm86.2
  Parag Warudkar
    CONFORMING TO: Add 32-bit specific
      Note that this call is only on *32-bit* Intel

mq_open.3
  Michael Kerrisk
    ERRORS: add ENOENT error for name == "/"

mq_open.3
  Michael Kerrisk
    ERRORS: Add EACCES error for name containing > 1 slash

sem_open.3
  Michael Kerrisk
    ERRORS: add EINVAL error where name == "/"

sem_open.3
  Jens Thoms Toerring
    Add case of non-well-formed name to ENOENT

shm_open.3
  Michael Kerrisk
    Clarify rules for construction of shared memory object names

proc.5
  Michael Kerrisk
    Add description of /proc/sys/kernel/sysrq
      Reported by: Goerghe Cosorea <gheorghe.coserea@gmail.com>

proc.5
  Michael Kerrisk
    Put /proc/modules entry in correct alphabetical order

ascii.7
  Kir Kolyshkin
    Fix formatting of tables on second page to use monospaced font

mq_overview.7
   Michael Kerrisk
    Clarify construction rules for message queue object names

sem_overview.7
  Michael Kerrisk
    Clarify construction rules for semaphore object names

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
numa.7
  Michael
 Kerrisk
    Make source layout of 'Link with' text consistent with other pages
      No actual change to formatted output, but this makes the
      page sources more consistent for the purpose of grepping, etc.

mempcpy.3
signbit.3
significand.3
  Michael Kerrisk
    Global fix: acknowledge FSF in copyright
      These pages are heavily based on original material in
      glibc info pages, but the comments in the source of the pages
      did not acknowledge the FSF copyright on the original material.
      Fix that.

accept.2
read.2
recv.2
send.2
write.2

Michael Kerrisk
Fix discussion of EAGAIN/EWOULDBLOCK errors
For a non-blocking socket, POSIX.1-2001/2008 allow either
EAGAIN or EWOULDBLOCK to be returned in cases where a call
would have blocked. Although these constants are defined
with the same value on most Linux architectures (PA-RISC
is the exception), POSIX.1
does not require them to have
the same value. Therefore, a portable application using
the sockets API should test for both errors when checking
this case.

(NB POSIX.1 only mentions EWOULDBLOCK in the context of
the sockets interfaces.)

Change made after a note cross-posted on linux-arch@vger,
http://thread.gmane.org/gmane.linux.debian.ports.hppa/5615
and a suggestion for write(2) from Carlos O'Donell

basename.3
getgrent.3
getgrnam.3
getpwent.3
getpwnam.3

iso_8859-8.7
iso_8859-9.7
koi8-r.7
koi8-u.7
Michael Kerrisk
Add explicit character set encoding to first line of source

Nowadays mandb has
provision to understand a character set
encoding that is explicitly indicated in the first line
of the source. As pointed out by Colin Watson, including
such an explicit indication on pages encoded in anything
other than ISO 8859-1 or UTF-8 is useful for man-pages
that aren't shipped in UTF-8.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519209
and for some other background (responded to by Colin Watson
in the above report):
http://thread.gmane.org/gmane.comp.internationalization.linux/6040
("man page encoding", 5 Jul 2005)

Changes to individual pages
---

fallocate.2
Michael Kerrisk
VERSIONS: glibc support is provided since version 2.10

fcntl.2
Michael Kerrisk
Remove mention of EWOULDBLOCK from discussion of mandatory locking
In the kernel, the error on encountering a mandatory lock is

EAGAIN. Although EAGAIN and EWOULDBLOCK are the same on
most Linux architectures, on some they are not, so don't
mention EWOULDBLOCK as it is misleading. (Mea culpa.)

getcontext.2
Michael Kerrisk
Note that POSIX.1-2008 removes the specification of getcontext()

getitimer.2
Michael Kerrisk
Note that POSIX.1-2008 recommends POSIX timers API instead of this API

gettimeofday.2
Michael Kerrisk
Note that POSIX.1-2008 recommends clock_gettime() instead of this API

ptrace.2
Michael Kerrisk
Note use of 'data' for PTRACE_SYS{CALL,EMU} and PTRACE_*_SINGLESTEP
These operations use the 'data' argument as a signal number,
like PTRACE_CONT.

ptrace.2
  Mike Frysinger
    only reference <sys/user.h>
      The kernel no longer installs linux/user.h, so update
      references to sys/user.h.

recv.2
  Michael Kerrisk
    Add 'iovec' defn to defn of 'msghdr' structure

   The 'msghdr' structure includes a field of type 'iovec',
      so show the definition of that structure in this page.

rename.2
  Michael Kerrisk
    Make ENOENT description consistent with POSIX.1-2008

timerfd_create.2
  Michael Kerrisk
    ERRORS: add EINVAL for invalid 'flags' for timer_settime()

truncate.2
  Michael Kerrisk
    SYNOPSIS: Fix description of feature test macro requirements
      After a report by Arvid Norlander.

bcopy.3
  Michael Kerrisk
    Note that POSIX.1-2008 removes specification of bcopy()

bsd_signal.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sigaction(2) instead of this API

ctime.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends strftime(3) instead of these functions

ecvt.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sprintf(3) instead of these functions

gcvt.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sprintf(3) instead of this function

getcwd.3

Michael Kerrisk
Note that getcwd() should be used instead of the obsolete getwd()

getgrent.3
Michael Kerrisk
Returned buffer may be statically allocated and overwritten by
later calls

gethostbyname.3
Michael Kerrisk
POSIX.1-2008 recommends getaddrinfo(3) and getnameinfo(3) instead

getnetent_r.3
Michael Kerrisk
Fix function name in text: s/getnetbynumber_r/getnetbyaddr_r/
The SYNOPSIS showed the right function name (getnetbyaddr_r),
but the text repeatedly used the wrong name (getnetbynumber_r).
Probably, this was a cut-and-paste error.

getpwent.3
Michael Kerrisk
Returned buffer may be statically allocated and overwritten by
later calls

index.3
Michael Kerrisk
Note that POSIX.1-2008 recommends strchr(3) and strrchr(3) instead

isalpha.3
Michael Kerrisk
Explain why POSIX.1-2008 marks isascii(3) obsolete

lockf.3
Nikanth Karthikesan

Update pointer to documentation in kernel source

makecontext.3
Michael Kerrisk
Note that POSIX.1-2008 recommends the use of POSIX threads instead

mq_notify.3
Michael Kerrisk
Document the POSIX.1-2008 optional EINVAL error
POSIX.1-2008 allows an optional EINVAL error if
notification==NULL and the caller is not currently
registered to receive notifications.

posix_fallocate.3
  Michael Kerrisk
    Clarify that EINVAL also occurs of 'len' *equals* zero
      See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_fallocate.3
  Michael Kerrisk
    Document POSIX.1-2001 and POSIX.1-2008 specifications for EINVAL error
      See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_memalign.3
  Michael Kerrisk
    Document handling of size==0 case for posix_memalign()

pthread_exit.3
  Michael Kerrisk
    Fix error in DESCRIPTION: s/pthread_create/pthread_exit/

realpath.3
  Michael Kerrisk
     Rework resolved_path==NULL discussion w.r.t. POSIX.1-200[18]
      Although the page already mentioned the resolved_path==NULL
      feature, and that this feature was added in POSIX.1-2008, there
      was still some crufty text in BUGS that hadn't been updated to
      reflect the POSIX.1-2008 changes.

      Also, some other minor wording and grammar fixes.

scalb.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends scalbln*(3) instead

seekdir.3
  Michael Kerrisk
    SYNOPSIS: Fix type of 'offset' argument: s/off_t/long/
      And add a NOTES section pointing out that 'off_t'
      was indeed used in glibc 2.1.1 and earlier.
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230

sem_post.3
  Michael Kerrisk
    Document EOVERFLOW error

shm_open.3
  Michael Kerrisk
    Recast discussion on name length to exclude terminating NULL byte
      Probably it's clearer to describe

the length of the IPC object
name as a count that excludes the null terminator.

siginterrupt.3
Michael Kerrisk
Note that POSIX.1-2008 recommends sigaction() instead

sigset.3
Michael Kerrisk
Note APIs that POSIX.1-2008 recommends instead of these obsolete APIs

strftime.3
Michael Kerrisk
Small fix to description of %G
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=516677

strftime.3
Michael Kerrisk
Add details on ISO 8601 week-based dates
ISO 8602 week-based dates are relevant for %G, %g, and %V,
and the existing details on these dates are a little thin.

strftime.3
Michael Kerrisk
Remove mention of year from ISO 8601 standard
The text mentioned the 1988 8601 standard, but there have
already been two revisions of the standard since then, so
simply remove mention of the year.

telldir.3
Michael Kerrisk
SYNOPSIS: Fix return type:
s/off_t/long/
And add a NOTES section pointing out that 'off_t'
was indeed used in glibc 2.1.1 and earlier.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230

timeradd.3
Michael Kerrisk
Note that on some systems, <=, >=, == don't work for timercmp()

timeradd.3
Michael Kerrisk
SYNOPSIS: Fix return types of timerisset() and timercmp()

toascii.3
Michael Kerrisk
Note why POSIX.1-2008 marks this function obsolete

console_ioctl.4
  Alan Curry
    Fix 'argp' type for KDGETLED description
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517485

group.5
  Michael Kerrisk
    Various minor rewordings and improvements

resolv.conf.5
  Michael Kerrisk
    Document 'ip6-bytestring' option

resolv.conf.5
  Michael Kerrisk
    Document 'edns0' option

resolv.conf.5
  Michael Kerrisk
    Document 'ip6-dotint' / 'no-ip6-dotint' option

resolv.conf.5
  Michael Kerrisk
     Note that maximum value of 'ndots' option is capped to 15

resolv.conf.5
  Michael Kerrisk
    Note that maximum value of 'timeout' option is capped to 30

hier.7
  Michael Kerrisk
    Add description of /srv
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=520904

ip.7
  Michael Kerrisk
    Fix type used to declare sin6_port
      The page should use the type specified by POSIX,
      rather than the (equivalent) type used in the kernel

ipv6.7
  Teddy Hogeborn
    Fix types used to declare sin6_family and sin6_port
      The page should use the types specified by POSIX,
      rather than the (equivalent) types used in the kernel.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517074

mq_overview.7
  Michael Kerrisk
    Recast discussion on name length to exclude terminating NULL byte
      Probably it's clearer to describe the length of the IPC object
      name as a count that
 excludes the null terminator.

rtld-audit.7
  Michael Kerrisk
    Note that multiple libraries in LD_AUDIT doesn't work
      This is reportedly fixed in glibc 2.10.
      See http://sourceware.org/bugzilla/show_bug.cgi?id=9733

sem_overview.7
  Michael Kerrisk
    Fix discussion of length of semaphore names
      Because of the "sem." prefix added by glibc to a semaphore
      name, the limit on the length of the name (excluding the
      terminating null byte) is 251 characters.

========== Changes in man-pages-3.21 ==========

Released: 2009-04-15, Los Gatos

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Frank Dana <ferdnyc@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Roman Byshko <rbyshko@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_setconcurrency.3
  Michael
 Kerrisk
    New page documenting pthread_setconcurrency(3) and
    pthread_getconcurrency(3)

pthread_yield.3
  Michael Kerrisk
    New page documenting pthread_yield(3)

New and changed links
---

pthread_getconcurrency.3
  Michael Kerrisk
    New link to new pthread_setconcurrency(3)

Changes to individual pages
---

initrd.4
  Michael Kerrisk
    Various minor wording improvements

initrd.4
  Frank Dana
    Add missing word in description

feature_test_macros.7
  Michael Kerrisk
    Update for glibc 2.10 changes to <features.h>
      From glibc 2.10, <features.h> understands the values 200809
      for _POSIX_C_SOURCE and 700 for _XOPEN_SOURCE, and makes
      corresponding changes to defaults for other feature test macros.
  Michael Kerrisk
    Add an example program
      This example program makes it possible to explore what
      feature test macros are set depending
 on the glibc version
      and the macros that are explicitly set.

ldconfig.8
  Michael Kerrisk
    /etc/ld.so.conf also include libraries found in /lib and /usr/lib

Apologies if I missed anyone!

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Rewrite crufty text about number of args in older version of clone()
        Some bit rot had crept in regarding the discussion of the
        number of arguments in older versions of this syscall.
        Simplify the text to just say that Linux 2.4 and earlier
        didn't have ptid, tls, and ctid arguments.

        See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533868
  Michael Kerrisk
    Fix version number for CLONE_NEWIPC
      It's 2.6.19, not 2.4.19.
  Michael Kerrisk
    Fix errors in argument names in text (ptid, ctd)

execve.2
  Mike Frysinger
    Remove erroneous statement that
 pending signal set is cleared
    on execve(2).

fcntl.2
  Michael Kerrisk
    The kernel source file mandatory.txt is now mandatory-locking.txt
  Michael Kerrisk
    The Documentation/* files are now in Documentation/filesystems

flock.2
  Michael Kerrisk
    Remove unneeded reference to Documentation/mandatory.txt
      Mandatory locks are only implemented by fcntl() locking
  Michael Kerrisk
    The Documentation/* files are now in Documentation/filesystems

fork.2
  Jeff Moyer
    Document fork() behaviour for the Linux native AIO io_context
      It was noted on lkml that the fork behaviour is documented
      for the POSIX AIO calls, but not for the Linux native calls.
      Here is a patch which adds a small blurb that folks will
      hopefully find useful.

      Upon fork(), the child process does not inherit the
      io_context_t data structures returned by io_setup,
      and thus cannot
 submit further asynchronous I/O or
      reap event completions for said contexts.

getdents.2
  Michael Kerrisk
    The d_type field is fully supported on Btrfs

mount.2
  Michael Kerrisk
    Document MS_STRICTATIME, update description of MS_RELATIME
      Starting with Linux 2.6.30, the MS_RELATIME behavior became
      the default, and MS_STRICTATIME is required to obtain the
      traditional semantics.

poll.2
  Michael Kerrisk
    Remove EBADF error from ERRORS

As reported by Motohiro:

"man poll" describe this error code.

>ERRORS
> EBADF An invalid file descriptor was given in one of the sets.

but current kernel implementation ignore invalid file descriptor,
not return EBADF.
...

In the other hand, SUSv3 talk about

> POLLNVAL
> The specified fd value is invalid. This flag is only valid in the
> revents
member; it shall ignored in the events member.

and

> If the value of fd is less than 0, events shall be ignored, and
> ireevents shall be set to 0 in that entry on return from poll().

but, no desribe EBADF.
(see http://www.opengroup.org/onlinepubs/009695399/functions/poll.html)

So, I think the implementation is correct.

Why don't we remove EBADF description?

sigaction.2
  Michael Kerrisk
    Expand description of si_utime and si_stime fields of siginfo_t

stat.2
  Michael Kerrisk
    Improve wording of ENOTDIR error

syscalls.2
  Michael Kerrisk
    Add preadv() and pwritev(), new in kernel 2.6.30

wait.2
  Gokdeniz Karadag
    Document CLD_DUMPED and CLD_TRAPPED si_code values

daemon.3
  Michael Kerrisk

Clarify discussion of 'noclose' and 'nochdir' arguments

ffs.3
Petr Baudis
SEE ALSO: add memchr(3)

fmemopen.3
Petr Baudis
Relocate BUGS
section to correct position
Petr Baudis
NOTES: there is no file descriptor associated with the returned stream
Alexander Lamaison pointed out that this is not obvious
from the documentation, citing an example with passing the
FILE * handle to a function that tries to fstat() its
fileno() in order to determine the buffer size.
Michael Kerrisk
CONFORMING TO: remove note that these functions are GNU extensions
That sentence is now redundant, since these functions
are added in POSIX.1-2008.

lockf.3
Michael Kerrisk
Clarify relationship between fcntl() and lockf() locking

memchr.3
Petr Baudis
SEE ALSO: add ffs(3)

readdir.3
Michael Kerrisk
The d_type field is fully supported on Btrfs

setjmp.3
Mike Frysinger
Fix typo and clarify RETURN description
The word "signal" was duplicated in NOTES, and the RETURN
section refers to
setjmp() and sigsetjmp(), and mentions
longjmp(), but not siglongjmp().

strcmp.3
Petr Baudis
SEE ALSO: add strverscmp(3)

strcpy.3
Mark Hills
SEE ALSO: Add strdup(3)

complex.7
  Michael Kerrisk
    Add missing header file for example program
  Reimar Döffinger
    Fix type used in example code
    man complex (from release 3.18) contains the following code:
      complex z = cexp(I * pi);
    Reading the C99 standard, "complex" is not a valid type,
    and several compilers (Intel ICC, ARM RVCT) will refuse to compile.
    It should be
      double complex z = cexp(I * pi); instead.

environ.7
  Michael Kerrisk
    Note that last element in environ array is NULL
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528628
  Michael Kerrisk
    Wording fixes

mq_overview.7
  Michael Kerrisk
    Note that mkdir and mount commands here need superuser privilege
  Michael Kerrisk

    Fix example showing contents of /dev/mqueue file

standards.7
  Michael Kerrisk
    Remove references to dated books
      Gallmeister and Lewine are rather old books. Probably,
      there are better books to consult nowadays, and anyway,
      this man page isn't intended to be a bibliography.

========== Changes in man-pages-3.23 ==========

Released: 2009-09-30, Munich

de Groot <siward@ziggo.nl>
rui rlex <rui.rlex@gmail.com>

Apologies if I missed anyone!

Changes to individual pages
---

execve.2
pipe.2
tee.2
fmemopen.3
mq_notify.3
qsort.3
Michael Kerrisk
Replace use of assert() by code that checks argc
See http://bugzilla.kernel.org/show_bug.cgi?id=13569

As noted by Andrey:
The purpose of the assert macro, defined in <assert.h>,
is to provide a tool to check for programming mistakes
or program logic errors. However, the assert macro must
never be used to perform checks for run time errors,
since, with the NDEBUG macro defined, expressions within
the assert macro invocations are not evaluated/checked
for, resulting in behavior that was not originally intended.
...
The pages affected in the core package are

execve(2)
pipe(2)
tee(2)

fmemopen(3)
mq_notify(3)
qsort(3)

getrusage.2
  Michael Kerrisk
    ru_inblock and ru_oublock are now implemented
      These fields of the rusage structure are filled in since
      Linux 2.6.22.

mmap.2
  Michael Kerrisk
    Add brief documentation of MAP_HUGETLB
      This flag is new in 2.6.32, and serves a similar
      purpose to the shmget() SHM_HUGETLB flag.

open.2
  Christoph Hellwig
    add some comments on O_SYNC and friends

poll.2
  Michael Kerrisk
    Clarify wording describing of 'nfds' argument.
      reported by: rui rlex <rui.rlex@gmail.com>

semctl.2
  Nicolas François
    Remove some redundant words

setpgid.2
  Michael Kerrisk
    Add an explanation of orphaned process groups

splice.2
tee.2
vmsplice.2
  Mark Hills
    Fix return type
      Since glibc 2.7, the return type for these functions
      is ssize_t (formerly it was long).

stat.2
  Nicolas
 François
    Fix small bug in example program
      Since it is a failure, EXIT_FAILURE looks more appropriate
      than EXIT_SUCCESS.

umount.2
  Michael Kerrisk
    glibc only exposes MNT_DETACH and MNT_EXPIRE since version 2.11
      See http://sourceware.org/bugzilla/show_bug.cgi?id=10092

exit.3
  Michael Kerrisk
    Add a pointer to explanation of orphaned process groups in setpgid(2)

fflush.3
  Michael Kerrisk
    fflush() discards buffered input

ffs.3
  Michael Kerrisk
    Clarify that ffsl() and ffsll() are GNU extensions

getaddrinfo.3
  Michael Kerrisk
    Note nonstandard assumed hints.ai_flags value when hints is NULL
      When hints is NULL, glibc assumes hints.ai_flags is
      AI_V4MAPPED|AI_ADDRCONFIG whereas POSIX says 0.
      According to Ulrich Drepper, glibc's behavior is better.

getmntent.3
  Mike Frysinger
    setmntent() argument is 'filename' not 'fp'
      The description
 of setmntent() formerly used the wrong
      argument name.

posix_fallocate.3
  Nicolas François
    Fix reference to POSIX.1-2008
      The sentence mentions twice POSIX.1-2001.
      I guess the second one should be POSIX.1-2008.
      This should be checked in the standard.

setenv.3
  Michael Kerrisk
    Improve ERRORS section
      Add ENOMEM error; improve EINVAL description. Also, make
      RETURN VALUE section a little more accurate in its mention
      of errno.

strftime.3
  Nicolas François
    Fix error in description: s/Monday/Thursday/

proc.5
  Nicolas François
    Fix page cross reference

max_user_watches is better explained in epoll(7) than inotify(7).

proc.5
  Michael Kerrisk
    dmesg is in section 1, not section 8

capabilities.7
  Michael Kerrisk
    FS UID manipulations affect CAP_LINUX_IMMUTABLE and CAP_MKNOD
      Nowadays, file system UID manipulations also affect
      CAP_LINUX_IMMUTABLE (since 2.6.3) and CAP_MKNOD (since 2.6.29).

capabilities.7
  Michael Kerrisk
    Fix version number for CAP_MKNOD in FS UID manipulations
      A recent patch said "since 2.6.29". It should have
      been "since 2.6.30".

capabilities.7
  Nicolas François
    Reword a bad sentence in description of capability bounding set.

mq_overview.7
  Michael Kerrisk
    Change documented ranges for msg_max and msgsize_max
      Linux 2.6.28 changed the permissible ranges for
      these /proc files.

tcp.7
udp.7
  Nicolas François
    Replace references to syctl interfaces with /proc

rtime.3
sem_wait.3
strftime.3
strptime.3
timeradd.3
rtc.4
core.5
proc.5
icmp.7
time.7
  Michael Witten
    Global fix: Consistently define the Epoch
      All definitions of the Epoch have been refactored to the following:

        1970-01-01 00:00:00 +0000 (UTC)

      That form is more consistent, logical, precise, and internationally
      recognizable than the other variants.

      Also, some wording has been altered as well.

spu_create.2
getopt.3
passwd.5
  Michael Kerrisk
    Global fix: s/non-existing/nonexistent/

faccessat.2
fchmodat.2
fchownat.2

fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
utimensat.2
mkfifoat.3
  Michael Kerrisk
    Update feature test macro requirements
      Starting in glibc 2.10, defining _XOPEN_SOURCE >= 700,
      or _POSIX_C_SOURCE >= 200809 exposes the declarations
of
      these functions.

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk
    Update text on nonsetabble CLOCK_*_CPUTIME_ID clocks
      SUSv3 permits, but does not require CLOCK_THREAD_CPUTIME_ID and
      CLOCK_PROCESS_CPUTIME_ID to be settable.
      See http://bugzilla.kernel.org/show_bug.cgi?id=11972.

execve.2
  Colin Watson
    Fix description of treatment of caught signals
      Caught signals reset to their default on an execve() (not
      to being ignored).

fcntl.2
  Michael Kerrisk
    s/F_OWNER_GID/F_OWNER_PGRP/
      Peter Zijlstra took the name change I suggested.
  Michael Kerrisk
    Document F_[SG]ETOWN_EX; update details on F_SETOWN
      Linux 2.6.32 adds F_SETOWN_EX and F_GETOWN_EX.
      Linux 2.6.12 changed (broke) the former behavior of
      F_SETOWN with respect to threads.

intro.2
intro.3

Michael Kerrisk
Make subsection
heading consistent with other intro.? pages
These pages used "Copyright Terms"; the other intro.? pages
used "Copyright Conditions". Make these pages like the others.

sendfile.2
Michael Kerrisk
Clarify behavior when 'offset' is NULL

seteuid.2
Michael Kerrisk
Note unstandardized behavior for effective ID
POSIX.1 doesn't require that the effective ID can be changed
to the same value it currently has (a no-op). The man page
should note this, since some other implementations
don't permit it.

setgid.2
Michael Kerrisk
Fix EPERM error description
s/effective group ID/real group ID/
This bug lived in man pages for 15 years before Jason
spotted it! I checked back in Linux 1.0, and the behavior
was as the fixed man page describes.

setreuid.2
Michael Kerrisk
Add more detail on POSIX.1 specification for these syscalls

setuid.2
Michael Kerrisk
Remove crufty statement that seteuid() is not in POSIX
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=569812

stime.2
strftime.3
tzset.3
zic.8
Michael Witten
GMT -> UTC (where appropriate)

sync_file_range.2
Christoph Hellwig
Add some big warnings re data integrity
This system call is by design completely unsuitable for any data
integrity operations. Make that very clear in the manpage.

CPU_SET.3
  Vlastimil Babka
    SYNOPSIS: Fix return types for CPU_COUNT_*()
      These functions return 'int' not void'.

confstr.3
  Michael Kerrisk
    Fix feature test macro requirements

daemon.3
  Michael Kerrisk
    Fix description of 'nochdir' argument.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819

gethostbyname.3
  Michael Kerrisk
    Document feature test macro requirements for herror() and hstrerror()
      Since glibc 2.8, one of _BSD_SOURCE,
_SVID_SOURCE,
      or _GNU_SOURCE is required.

getline.3
  Michael Kerrisk
    Update to reflect that these functions were standardized in POSIX.1-2008

getnameinfo.3
  Michael Kerrisk
    Document feature test macros requirements for NI_MAXHOST and NI_MAXSERV
      Since glibc 2.8, one of _BSD_SOURCE, _SVID_SOURCE, or _GNU_SOURCE
      must be defined to obtain these definitions.

getopt.3
  Jonathan Nieder
    Fix feature test macro requirements

memchr.3
  Michael Kerrisk
    Add feature test macro requirements for memrchr()

nextafter.3
  Michael Kerrisk
    Fix notable error in DESCRIPTION.
    "less than y" should be "less than x".

popen.3
  Michael Kerrisk
    Fix feature test macro requirements

pthread_attr_setdetachstate.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
  Denis Barbier
    Argument name is 'attr' not 'thread'
      The function argument was misnamed in the DESCRIPTION
 on these
      three pages.

rtnetlink.3
  Michael Kerrisk
    Various fixes in example code
      Edward reported a problem in the example code, where a variable
      seems to be misnamed. Upon inspection, there seem to be a few
      such instances, and this patch is my best guess at how things
      should look.

sched_getcpu.3
  Michael Kerrisk
    Place correct header file in SYNOPSIS

sleep.3
  Bill O. Gallmeister
    sleep() puts calling *thread* to sleep (not calling *process*)

sleep.3
  Bill O. Gallmeister
    Add nanosleep(2) to SEE ALSO

strftime.3
  Michael Kerrisk
    %z is defined in SUSv3
      So, substitute "GNU" tag in man page by "SU".

strftime.3
  Michael Witten
    Move 822-compliant date format example to EXAMPLES section
      The RFC 822-compliant date format given in the description
      of `%z' is now moved to the `EXAMPLES' section (note: `EXAMPLE'
      has been
 renamed `EXAMPLES').

      Furthermore, that format example is now actually
      RFC 822-compliant (using `%y' instead of `%Y') and has been
      qualified as being correct only when in the context of at least
      an English locale. Also, `%T' is used in place of `%H:%M:%S'.

      For completeness, an RFC 2822-compliant format example has been

similarly added.

strftime.3
  Michael Witten
    Expand introductory text

strftime.3
  Michael Witten
    Clarification of %z specifier

string.3
  Mark Hills
    Add stpcpy() to this list of string functions

strptime.3
  Michael Kerrisk
    Initialize tm structure in example program

undocumented.3
  Michael Kerrisk
    Remove pages now documented
      By now, the following are documented:

        fopencookie(3)
        freeifaddrs(3)
        rawmemchr(3)
        readdir_r(3)
        getutmp(3)
        getutmpx(3)
         utmpxname(3)

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819

group.5
  Michael Kerrisk
    s/passwd/password/
      The page inconsistently used "passwd" and "password"
      to refer to the same field.

capabilities.7
  Michael Kerrisk
    Update securebits discussion to use SECBIT_* flags

feature_test_macros.7
  Michael Kerrisk
    _POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE
      Since glibc 2.10, _POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE

path_resolution.7
  Michael Kerrisk
    Add readlink(2) to SEE ALSO
  Michael Kerrisk
    Fix NAME line
      The poorly constructed part preceding "\-" causes apropos
      not to be able to find the subject.

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=558300

signal.7
  Michael Kerrisk
    Fix discussion of SIGUNUSED
      Clarify that this signal really is synonymous with SIGSYS.
      See http://bugzilla.kernel.org/show_bug.cgi?id=14449

New and rewritten pages
---

migrate_pages.2
  Andi Kleen
    New page documenting migrate_pages(2).
      Andi's text based on the move_pages.2 page;
      additional edits by mtk.
      migrate_pages(2) was new in Linux 2.6.16.

quotactl.2
  Jan Kara
    Major updates

      Update the page to consolidate information from the
      outdated man-pages quotactl.2 page and the quotactl.2
      page in the "quota-tools" package. The page in "quota-tools"
      has now been dropped by Jan Kara, so that there is just one
      canonical quotactl.2 page (in pan-pages).
  Michael Kerrisk
      Various other pieces added to the page by mtk.

Newly documented interfaces in existing pages

---

fcntl.2
  Michael Kerrisk
    Document F_SETPIPE_SZ and F_GETPIPE_SZ
      These commands, new in kernel 2.6.35, set and get the capacity
      of pipes.

madvise.2
  Andi Kleen
    Document MADV_HWPOISON
  Michael Kerrisk
    Added documentation of MADV_MERGEABLE and MADV_UNMERGEABLE
      These flags (used for Kernel Samepage Merging, KSM)
      are new in 2.6.32.
  Andi Kleen
    Document MADV_SOFT_OFFLINE
      This operation was added in
 Linux 2.6.33.

mmap.2
  Michael Kerrisk
    Document MAP_UNINITIALIZED flag
      New in Linux 2.6.33.

prctl.2
  Andi Kleen
    Document the hwpoison prctls in 2.6.32

sched_setscheduler.2
  Michael Kerrisk
    Document SCHED_RESET_ON_FORK
      New in Linux 2.6.32

umount.2
  Michael Kerrisk
    Document UMOUNT_NOFOLLOW
      New in Linux 2.6.34.

mkstemp.3
  Michael Kerrisk
    Document mkstemps() and mkostemps()
      These functions are new in glibc 2.11. They allow the template
      string to include a suffix after the "XXXXXX" string.

proc.5
  Michael Kerrisk
    Document /proc/sys/vm/memory_failure_early_kill

New in 2.6.32. Description based on the text in
Documentation/sysctl/vm.txt.
Michael Kerrisk
Document /proc/sys/vm/memory_failure_recovery
New in Linux 2.6.32. Description based on the text in
Documentation/sysctl/vm.txt.
Michael Kerrisk

Document /proc/sys/fs/pipe-max-size

socket.7
Jan Engelhardt
Document SO_DOMAIN and SO_PROTOCOL
These read-only socket options were new in Linux 2.6.32.

New and changed links
---

fstatvfs.2
Michael Kerrisk
Adjust link to point to Section 3

fstatvfs.3
statvfs.2
Michael Kerrisk
New link to page relocated to Section 3

mkstemps.3
mkostemps.3
Michael Kerrisk
New links to mkstemp.3
mkstemp.3 now describes mkstemps(3) and mkostemps(3).

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
getline.3
Michael Kerrisk
Add 'L' to constants in feature test macro specifications
Be consistent with POSIX, which uses constants such as 200809L.

Global changes
---

open.2

sync_file_range.2
umount.2
  Michael Kerrisk
    Global fix: s/filesystem/file system/

Changes to individual pages
---

fcntl.2
  Michael Kerrisk
    Note
 that glibc 2.11 papers over the kernel F_GETOWN bug
      Since version 2.11, glibc works around the kernel limitation for
      process groups IDs < 4096 by implementing F_GETOWN via F_GETOWN_EX.

futex.2
  Michael Kerrisk
    Various fixes in SEE ALSO

getpriority.2
nice.2
  Francesco Cosoleto
    Move renice from section 8 to section 1

getrusage.2
  Mark Hills
    Add ru_maxrss
      See kernel commit 1f10206.
  Mark Hills
    Description of maintained fields
      These descriptions are taken from NetBSD 5.0's getrusage(2).
  Michael Kerrisk
    Enhanced description of various fields

mlock.2
  Michael Kerrisk
    /proc/PID/status VmLck shows how much memory a process has locked
      After a note from Tom Swigg, it seems sensible mention VmLck here.

mount.2
  Petr Uzel
    Fix incorrect path

move_pages.2
  Andi Kleen
    Clarify includes/libraries

mremap.2
  Michael Kerrisk
    Clarify existence
 of fifth argument.

msgctl.2
semctl.2
shmctl.2
  Francesco Cosoleto
    Move ipcs from section 8 to section 1

open.2
  Michael Kerrisk
    Remove ambiguity in text on NFS and O_EXCL.

poll.2
  Michael Kerrisk
    Fix discussion of ppoll() timeout argument
      1. Rename ppoll)(_ argument to "timeout_ts" to distinguish it
        from the poll() argument in the text.
      2. More accurately describe the poll() call that is equivalent
        to ppoll().

posix_fadvise.2
  Michael Kerrisk
    Add sync_file_range(2) under SEE ALSO

prctl.2
  Michael Kerrisk
    Correct PR_SET_KEEPCAPS description
      The "keep capabilities" flag only affects the treatment of
      permitted capabilities, not effective capabilities.
      Also: other improvements to make the PR_SET_KEEPCAPS text clearer.

select_tut.2
  Michael Kerrisk
    Fix bug in example program

sigaction.2
  Michael Kerrisk
    Add TRAP_BRANCH
 and TRAP_HWBKPT to si_code values for SIGTRAP
  Michael Kerrisk
    Rearrange text describing fields set by sigqueue(2)
  Michael Kerrisk
    Add details for signals sent by POSIX message queue notifications
  Michael Kerrisk
    Improve description of various siginfo_t fields

Michael Kerrisk
Add some details for SIGTRAP and si_trapno
Andi Kleen
Document hwpoison signal extensions

statfs.2
Michael Kerrisk
Bring statfs struct type declarations closer to glibc reality
Fang Wenqi
Add definition EXT4_SUPER_MAGIC = 0xEF53
Michael Kerrisk
Document f_frsize field.

statvfs.2
Michael Kerrisk
Move this page to section 3 (since it's a library call)

swapon.2
Ivana Hutarova Varekova
Note effect of CONFIG_MEMORY_FAILURE on MAX_SWAPFILES
From 2.6.32, MAX_SWAPFILES is decreased by 1 if the kernel is
built with CONFIG_MEMORY_FAILURE.

syscalls.2
Michael Kerrisk

Bring system call list up to date with Linux 2.6.33
Michael Kerrisk
Fix kernel version number for utimes()

cproj.3
Michael Kerrisk
Note fix for C99 conformance in glibc 2.12.

crypt.3
Petr Baudis
Correct note on key portion significance
As Marcel Moreaux notes:

> The Linux manpage for crypt()[1] contains the following
> statement as the last sentence of the NOTES section:
>
> > In the SHA implementation the entire key is significant
> > (instead of only the first 8 bytes in MD5).
>
> It should probably say "DES" where it says "MD5" (and maybe
> "MD5/SHA" where it says "SHA"), because in MD5 password hashing,
> the entire key is significant, not just the first 8 bytes.

This patch fixes the wording.

fmemopen.3
  Michael Kerrisk
    Bug fix in example program

ftw.3
  Michael Kerrisk
    Note that if 'fn' changes
 CWD, the results are undefined
  Michael Kerrisk
    Clarify description of fpath argument
      As reported by Pierre Habouzit, 'fpath' is not relative
      to 'dirpath'. It is either relative to the calling process's
      current working directory (if 'dirpath' was relative), or it
      is absolute (if 'dirpath' was absolute).

getaddrinfo.3
  Christian Franke
    Fix a field name mixup: s/ai_family/ai_flags/

getline.3
  Robert Wohlrab
    Remove unneeded check before free()
      The manpage of getline shows an example with an extra NULL pointer
      check before it calls free. This is unneeded according to free(3):

          If ptr is NULL, no operation is performed.

      This patch removes the "if" check.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572508

log.3
log10.3
log2.3
  Jan Engelhardt
    Add cross-references to other-base logarithmic functions

opendir.3
  Petr Baudis
     Specify feature test macro requirements for fdopendir(3)
      Currently, there is no note on the fact that fdopendir() is
      POSIX.2008-only.

openpty.3
  Eric Blake

Use const as appropriate
Michael Kerrisk
Note glibc version that added "const" to function arguments
Michael Kerrisk
Explicitly note that these functions are not in POSIX

resolver.3
Michael Kerrisk
Fix declaration of dn_comp() in SYNOPSIS
Remove the second 'exp_dn' from the calling signature.

termios.3
Michael Kerrisk
Change NOFLSH text to speak of characters, not signals

core.5
Michael Kerrisk
Update description of coredump_filter
Kernel 2.6.24 added MMF_DUMP_ELF_HEADERS.
Kernel 2.6.28 added MMF_DUMP_HUGETLB_PRIVATE and
MMF_DUMP_HUGETLB_SHARED.

elf.5
Daisuke HATAYAMA
Document PN_XNUM extension
In linux-2.6.34-rc1, an ELF core extension was added; user-land
tools manipulating ELF core dump such as gdb and binutils has
already been modified before; so elf.5 needs to be modified
accordingly.

You can follow information on the ELF extension via the LKML post:
http://lkml.org/lkml/2010/1/3/103
Date Mon, 04 Jan 2010 10:06:07 +0900 (JST)
Subject ... elf coredump: Add extended numbering support

This Linux-specific extension was added in kernel 2.6.34.

Reviewed-by: Petr Baudis <pasky@suse.cz>

Michael Kerrisk
Remove EI_BRAND
As reported by Yuri Kozlov and confirmed by Mike Frysinger,
EI_BRAND is not in GABI
(http://www.sco.com/developers/gabi/latest/ch4.eheader.html)
It looks to be a BSDism
Michael Kerrisk
Remove words under '.note': "described below"
The existing text is broken, because there is

no '"Note Section" format' describe
below. Simplest
solution is to remove the words "described below".

filesystems.5
Jeff Barry
Add discussion of ntfs and ext4

proc.5
Michael Kerrisk
Simplify description of /proc/sys and /proc/sys/fs
In the description of these directories, there's no need
to list all the files and subdirectories that they contain;
that information is provided by the entries that follow.

services.5
Yuri Kozlov
Remove crufty reference to nonexistent BUGS section

capabilities.7
Michael Kerrisk
Document CAP_SYS_RESOURCE and F_SETPIPE_SZ
With CAP_SYS_RESOURCE, a process can increase pipe capacity above
/proc/sys/ps/pipe-max-size.
Michael Kerrisk
Add get_robust_list() info under CAP_SYS_PTRACE
Michael Kerrisk
Add MADV_HWPOISON under CAP_SYS_ADMIN

signal.7
Michael Kerrisk
Make a clearer statement about nonportable aspect of signal(2)
Make
a clearer statement that signal(2) is less portable for
establishing a signal handler.

socket.7
Michael Kerrisk
Use consistent language to describe read-only socket options

udp.7
Michael Kerrisk
Add FIONREAD warning.
Warn that FIONREAD can't distinguish case of a zero-length
datagram from the case where no datagrams are available.

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

eventfd.2
  Michael Kerrisk
    Document EFD_SEMAPHORE
      Document the EFD_SEMAPHORE flag, added in kernel 2.6.30.
      Also restructured some parts of the text to fit with the
      addition of the EFD_SEMAPHORE text.

Global changes
---

getaddrinfo.3
getipnodebyname.3
st.4
  Michael Kerrisk
    s/logical OR/bitwise OR/

Changes to individual pages
---

clock_nanosleep.2
  Michael Kerrisk
    Fix discussion of return value when interrupted
 by a signal

epoll_ctl.2
  Yuri Kozlov
    Small fix to types in data structures

eventfd.2
  Alexander Shishkin
    Clarified close-on-exec behavior

madvise.2
  Michael Kerrisk
    Improve discussion of MADV_SOFT_OFFLINE

mkdir.2
  Michael Kerrisk
    Add EMLINK error to ERRORS

mq_getsetattr.2
mq_close.3
mq_getattr.3
mq_notify.3
mq_send.3
mq_unlink.3
  Lnac Huard
    Fix return type in SYNOPSIS (s/mqd_t/int/)

recv.2
send.2
  Michael Kerrisk
    Remove obsolete reference to glibc version in NOTES

recv.2
send.2
  Nicholas Hunt

Adjust type shown for msg_controllen to glibc reality
This patch fixes the type of msg_controllen in the struct msghdr
definition given in send.2 and recv.2 to match the definition in
glibc and the kernel.

select.2
Michael Kerrisk
Update NOTES on old glibc pselect()
Make it clear that modern glibc uses the kernel pselect()
on systems where
it is available.
See https://bugzilla.kernel.org/show_bug.cgi?id=14411

statfs.2
Guillem Jover
Fix copy & paste error for __SWORD_TYPE definition

sysfs.2
Michael Kerrisk
Clarify that this syscall is obsolete.
And strengthen recommendation to use /proc/filesystems instead.

write.2
Michael Kerrisk
Add EDESTADDRREQ error

a64l.3
Peng Haitao
Fix error in NOTES, s/a64l/l64a/

error.3
Linus Nilsson
Change "perror" to "strerror" in DESCRIPTION of error()

mq_send.3
Michael Kerrisk
Fix EAGAIN description (s/empty/full)

initrd.4
Yuri Kozlov
Fix IP address in explanation of NFS example

tzfile.5
Michael Kerrisk
Add information on version 2 format timezone files
Updated using information from the tzcode 2010l release at
ftp://elsie.nci.nih.gov/pub.
(It's an open question whether or not a version of tzfile.5

should live independently
in man-pages. It was added to the
man-pages set many years ago. For now, I'll follow a
conservative course that causes least pain to downstream,
by continuing to maintain a separate copy in man-pages.)

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=594219

========== Changes in man-pages-3.27 ==========

Released: 2010-09-22, Nuernberg

New and rewritten pages
---

sigevent.7
Petr Baudis, Michael Kerrisk

New page to centralize description of sigevent structure
Several interfaces use this structure. Best to centralize the common details in one place. Content taken from the existing timerfd_create.2 and mq_open.3 pages, with additions by Petr Baudis and Michael Kerrisk.

Newly documented interfaces in existing pages
---

ip.7
Jiri Olsa
Document IP_NODEFRAG
This option is new in Linux 2.6.36

unix.7
Michael Kerrisk
Document SIOCINQ ioctl() operation

Add/fix/update feature test macro requirements in SYNOPSIS
Various changes to:
* Update feature test requirements to note changes in
recent glibc releases
* Correct errors in feature test macro requirements
* Add feature test macro requirements to pages where
the requirements were not previously stated.

  Michael Kerrisk
    SYNOPSIS: Add reference to feature_test_macros(7)
      These pages specify feature test macros in the function
      prototypes. Add a reference to feature_test_macros(7),
      so that readers are pointed to the information that
      feature test macros must be defined before including
      any header file.

  Michael Kerrisk
    Note that feature test macros must be defined before *any* includes

Programmers often make the mistake of including a feature test
macro only after having already included
some header files.
This patch adds some text at opportune places to remind
programmers to do things the right way.

Fix decimal values in encoding tables
Octal and hexadecimal values are right, but there are some
off-by one errors in decimal values. Correct values are
printed by this command:

```
perl -pi -e 'if (s/^([0-7]+)\t([0-9]+)\t([0-9a-fA-F]+)//)
  {printf "%03o\t%d\t%s", hex($3), hex($3), $3;};' man7/*.7
```

Changes to individual
pages
---

capget.2
  Michael Kerrisk
    SYNOPSIS: Remove unneeded "undef _POSIX_SOURCE"

fcntl.2
  Michael Kerrisk
    Add feature test macro requirements for F_GETOWN and F_SETOWN

fcntl.2
  Michael Kerrisk
    Note feature test macro requirements for F_DUPFD_CLOEXEC

getrlimit.2
  Michael Kerrisk
    Document units for RLIMIT_RTTIME limit
      This limit is in microseconds

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=596492

lseek.2
  Michael Kerrisk
    Removed note about return type on ancient systems

mount.2
  Michael Kerrisk
    Definitions of various MS_* constants only appeared in glibc 2.12
      See http://sourceware.org/bugzilla/show_bug.cgi?id=11235

stat.2
  Michael Kerrisk
    Update information on nanosecond timestamp fields
      Update feature test macro requirements for exposing these fields.
      Note that these fields are specified in POSIX.1-2008.

timer_create.2
   Michael Kerrisk
    Factor out generic material that was moved to new sigevent(7) page

aio_fsync.3
  Michael Kerrisk
    Add reference to new sigevent(7) page

atanh.3
  Michael Kerrisk

glibc 2.10 fixed pole error bug
http://sourceware.org/bugzilla/show_bug.cgi?id=6759
was resolved.

cerf.3
Michael Kerrisk
Make it clearer that this function is unimplemented

cos.3
Michael Kerrisk
errno is now correctly set to EDOM on a domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780
was (silently) resolved.

expm1.3
Michael Kerrisk
errno is now correctly set to ERANGE on a range error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788
was (silently) resolved.

fmod.3
Michael Kerrisk
errno is now correctly set to EDOM for the x==inf domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6784

was (silently) resolved.

insque.3
Michael Kerrisk
Noted prev == NULL bug in glibc 2.4 and earlier
As noted by Remi Denis-Courmont, glibc nowadays allows
'prev' to be NULL, as required by POSIX for initializing
a linear list. But in glibc 2.4 and earlier, 'prev' could
not be NULL. Add a BUGS section noting this.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=551201
Michael Kerrisk
Added info on circular lists, and initializing circular lists
Michael Kerrisk
Added example program

lgamma.3
Michael Kerrisk
glibc 2.10 fixed pole error bug
http://sourceware.org/bugzilla/show_bug.cgi?id=6777
was (silently) resolved.

log2.3

Matthew Flaschen
log2() function does not conform to C89
log2(), log2f(), and log2l() do not conform to C89.
They are defined in C99. See http://flash-gordon.me.uk/ansi.c.txt
and
http://www.schweikhardt.net/identifiers.html

mq_notify.3
Michael Kerrisk
Factor out generic material that was moved to new sigevent(7) page

pow.3
Michael Kerrisk
errno is now correctly set to ERANGE on a pole error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776
was (silently) resolved.

pthread_kill_other_threads_np.3
Michael Kerrisk
CONFORMING TO: Note meaning of "_np" suffix

rand.3
Michael Kerrisk
Clarify description of range of returned value
Michael Kerrisk
Add an example program
Michael Kerrisk
Expand description of rand_r()

random.3
W. Trevor King
Update initstate() return value description to match glibc

readdir.3
Michael Kerrisk
Clarify that "positive error numbers" are listed in ERRORS

rexec.3
Michael Kerrisk
SYNOPSIS: Add header file and feature test macro requirements

sigpause.3
Michael Kerrisk
Correct discussion of
when BSD vs SysV version is used in glibc

sin.3
Michael Kerrisk

errno is now correctly set to EDOM on a domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781
was (silently) resolved.

tan.3
Michael Kerrisk
errno is now correctly set to EDOM on a domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782
was (silently) resolved.

wcscasecmp.3
wcsncasecmp.3
wcsnlen.3
Michael Kerrisk
Added VERSIONS section

boot.7
Yuri Kozlov
Update list of major Linux distributions

feature_test_macros.7
Michael Kerrisk
Make text on required placement of macros more prominent
Move the text that notes the requirement that feature test macros
must be defined before including any header files to the top of
the page, and highlight the text further, so that the reader will
not miss this point.

pthreads.7
signal.7
Michael Kerrisk
Add SEE ALSO reference to new sigevent(7) page

tcp.7
Michael Kerrisk
Clarify header file details for SIOCINQ and SIOCOUTQ
Also note synonymous FIONREAD and TIOCOUTQ.

========== Changes in man-pages-3.28 ==========

Released: 2010-10-04, Munich

Contributors

The following people contributed notes, ideas, or patches that have

been incorporated in changes in this release:

Andries E. Brouwer <Andries.Brouwer@cwi.nl>
Denis Barbier <bouzim@gmail.com>
Jan Kara <jack@suse.cz>
Landijk <landijk-user@yahoo.com>
Lennart Poettering <mzjro@0pointer.net>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Petr Baudis <pasky@suse.cz>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

getaddrinfo_a.3
  Petr Baudis
    New page documenting getaddrinfo_a()
      The page also documents gai_suspend(), gai_cancel(),

 and gai_error().

aio.7
  Michael Kerrisk
    New page providing an overview of POSIX asynchronous I/O

Newly documented interfaces in existing pages
---

exec.3
  Michael Kerrisk
    Document execvpe()
      This function was added to glibc in version 2.11.
      Also various other small rewrites in the page.

New and changed links
---

gai_cancel.3
gai_error.3
gai_suspend.3
  Petr Baudis
    New links to new getaddrinfo_a.3 page

error_one_per_line.3
  Michael Kerrisk
      Fix misnamed link file (was error_on_per_line.3)

execvpe.3
  Michael Kerrisk
     New link to exec.3

sigstack.3
  Michael Kerrisk
     New link to sigaltstack.2
        No new programs should use sigstack(3). Point the user to the
        better sigaltstack(2), whose man page briefly mentions sigstack(3).

vlimit.3
  Michael Kerrisk
     New link to getrlimit.2
        No new programs should
 use vlimit(3). Point the user to the
        better setrlimit(2), whose man page briefly mentions vlimit(3).

vtimes.3
  Michael Kerrisk
     New link to getrusage.2
        No new programs should use vtimes(3). Point the user to the
        better getrusage(2), whose man page briefly mentions vtimes(3).

Global changes

Various pages
  Michael Kerrisk
     Switch to American usage: "-wards" ==> "-ward"
        American English uses "afterward" in preference to "afterwards",
        and so on

chdir.2
chmod.2
chown.2
gethostname.2
getsid.2
pread.2
setpgid.2
sigaltstack.2
stat.2
truncate.2

wait.2
dirfd.3
getsubopt.3
mkdtemp.3
mkstemp.3
siginterrupt.3
strdup.3
  Michael Kerrisk
    Simplify feature test macro requirements

Changes to individual pages
---

getrlimit.2
  Michael Kerrisk
    Add mention of the ancient vlimit() function

getrusage.2
  Michael Kerrisk
    Add mention of the ancient vtimes()
 function

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Michael Kerrisk
    SEE ALSO: add aio(7)

sched_setscheduler.2
  Michael Kerrisk
    ERRORS: note that NULL 'param' yields EINVAL

stat.2
  Michael Kerrisk
    Note feature test macro requirements for blkcnt_t and blksize_t

timer_create.2
  Michael Kerrisk
    Standardize on name 'sevp' for sigevent argument

truncate.2
  Michael Kerrisk
    Correct and simplify ftruncate() feature test macro requirements
      The glibc 2.12 feature test macro requirements for ftruncate() are
      buggy; see http://sourceware.org/bugzilla/show_bug.cgi?id=12037.

Corrected the requirements in the SYNOPSIS, and added a BUGS
section describing the problem in glibc 2.12.

aio_cancel.3
Michael Kerrisk
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008;
add VERSIONS section

aio_error.3
Michael Kerrisk
Wording improvements in RETURN VALUE
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_fsync.3
Michael Kerrisk
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_read.3
Michael Kerrisk
Various minor rewordings and additions
Add pointer to sigevent(7) for details of notification of I/O completion
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_return.3
Michael Kerrisk
Improve description in RETURN VALUE
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the
aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_suspend.3
Michael Kerrisk
Various additions and rewordings.
Give some arguments more meaningful names.
More explicitly describe the 'nitems' argument.
Explicitly note that return is immediate if an I/O operation
has already completed.
Note that aio_error(3) should be used to scan the aiocb list
after a successful return.
Add references to other relevant pages.

Various other pieces rewritten.
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_write.3
Michael Kerrisk
Add pointer to sigevent(7) for details of notification of I/O completion
Various minor rewordings and additions
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008;
add VERSIONS section

clearenv.3
Michael Kerrisk
Fix error in feature test macro requirements

dysize.3
Michael Kerrisk
Remove crufty statement about old SCO bug

exec.3
Michael Kerrisk
Add feature test macro requirements for execvpe()
Rewrite description of PATH and mention _CS_PATH
Note execvp() and execlp() behavior for filename containing a slash

getaddrinfo.3
Michael Kerrisk
Add SEE ALSO reference to new getaddrinfo_a.3 page

gethostbyname.3
Michael Kerrisk
Fix formatting of feature test macros

getw.3
Michael Kerrisk
Fix feature test macros

malloc.3
Landijk
Remove editorializing comments on memory overcommitting
See https://bugzilla.kernel.org/show_bug.cgi?id=19332
Michael Kerrisk
Various minor reorganizations and wording fix-ups

mq_notify.3
Michael Kerrisk
Standardize on name 'sevp' for sigevent argument

nl_langinfo.3
  Michael Haardt
    Make it clear that nl_langinfo() interacts with setlocale()
    Add an example program

posix_openpt.3
  Michael Kerrisk
    Fix feature test macro requirements

rand.3
  Michael Kerrisk
    Remove duplicate #include in example program

strtok.3
  Petr Baudis
    Add reference to strtok() example in getaddrinfo(3)

inotify.7
  Michael Kerrisk
    Added section noting limitations and caveats of inotify

sigevent.7
  Michael Kerrisk
    Add SEE ALSO reference to new getaddrinfo_a.3 page
    Add SEE ALSO referring to new aio(7) page

suffixes.7
  Michael Kerrisk
    Change explanation of ".rpm" to "RPM software package"

========== Changes in man-pages-3.29 ==========

Released: 2010-10-19, Detroit

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Balazs Scheidler <bazsi@balabit.hu>

Michael Kerrisk <mtk.manpages@gmail.com>
Sam Varshavchik <mrsam@courier-mta.com>
Simon Paillard <simon.paillard@resel.enst-bretagne.fr>
Stephan Mueller <stephan.mueller@atsec.com>
Thomas Jarosch <thomas.jarosch@intra2net.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

subpage_prot.2
  Michael Kerrisk
    New page documenting the PowerPC-specific subpage_prot(2)

aio_init.3
  Michael Kerrisk
    New page documenting aio_init(3)

Newly documented interfaces in existing pages
---

posix_fadvise.2
  Michael Kerrisk
    Document the architecture-specific arm_fadvise64_64() system call
      This ARM-specific system call fixes the argument ordering
      for that architecture. Since Linux 2.6.14.

sync_file_range.2
   Michael Kerrisk
    Document the architecture-specific sync_file_range2() system call
      As described in commit edd5cd4a9424f22b0fa08bef5e299d41befd5622,
      the sync_file_range() argument order is broken for some
      architectures (PowerPC, ARM, tile). The remedy was a different
      system call using the right argument order on those architectures.

psignal.3
  Guillem Jover
    Document psiginfo()
      psiginfo() was added to glibc in version 2.10.
  Michael Kerrisk
    Add details, VERSIONS, and BUGS for psiginfo()

ip.7
  Balazs Scheidler
    Document IP_RECVORIGDSTADDR
    Document IP_TRANSPARENT
  Michael Kerrisk
    Document IP_FREEBIND
      Text based on input from Lennart Poettering and Balazs Scheidler.
      See https://bugzilla.kernel.org/show_bug.cgi?id=20082

New and changed links
---

arm_fadvise64_64.2
  Michael Kerrisk
    New link to posix_fadvise.2

arm_sync_file_range.2,
 sync_file_range2.2
  Michael Kerrisk
    New links to sync_file_range.2

arrm_fadvise.2
  Michael Kerrisk
    New link to posix_fadvise.2

psiginfo.3
  Guillem Jover
    New link to psignal.3

Global changes

Many pages
  Michael Kerrisk
    global fix: s/Unix/UNIX/
      The man pages were rather inconsistent in the use of "Unix"
      versus "UNIX". Let's go with the trademark usage.

Various pages
  Michael Kerrisk
    Global fix: s/pseudo-terminal/pseudoterminal/

grantpt.3, ptsname.3, unlockpt.3, pts.4
  Michael Kerrisk
    Global fix: s/pty/pseudoterminal/

recv.2, cmsg.3, unix.7
  Michael Kerrisk
    global fix: s/UNIX socket/UNIX domain socket/

fmtmsg.3, gethostbyname.3, termios.3
  Michael Kerrisk
    Global fix: s/Unixware/UnixWare/

Changes to individual pages
---

inotify_rm_watch.2
  Michael Kerrisk
    SYNOPSIS: fix type of 'wd' argument

posix_fadvise.2
   Michael Kerrisk
    Rewrite VERSIONS, noting that the system call is fadvise64()

syscalls.2
  Michael Kerrisk
    Add the PowerPC-specific subpage_prot() system call
    Add sync_file_range2()

truncate.2
  Michael Kerrisk
    Fix feature test macros

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
  Michael Kerrisk
    SEE ALSO: Add lio_listio(3)

gai_cancel.3
gai_error.3
gai_suspend.3
  Michael Kerrisk
    Make these into links
      In the previous release, these files were accidentally made copies
      of getaddrinfo_a.3, instead of being made as link files.

getifaddrs.3

Thomas Jarosch
Prevent possible NULL pointer access in example program

malloc.3
Michael Kerrisk
Emphasize that malloc() and realloc() do not initialize allocated memory

malloc_hook.3
Ivana Varekova
Warn that these functions are deprecated

strcpy.3
Michael Kerrisk
Formatting
fixes in strncpy() example implementation code

ip.7
Michael Kerrisk
Reword NOTES on Linux-specific options

sigevent.7
Michael Kerrisk
SEE ALSO: Add aio_read(3), aio_write(3), and lio_listio(3)

unix.7
Michael Kerrisk
Document the autobind feature
Michael Kerrisk
Fix description of abstract socket names
As reported by Lennart Poettering:
The part about "abstract" sockets is misleading as it suggests
that the sockaddr returned by getsockname() would necessarily
have the size of sizeof(struct sockaddr), which however is not
the case: getsockname() returns exactly the sockaddr size that
was passed in on bind(). In particular, two sockets that are
bound to the same sockaddr but different sizes are completely
independent.
See https://bugzilla.kernel.org/show_bug.cgi?id=19812
Michael Kerrisk

Fix description of "pathname" sockets
As reported by Lennart Poettering:
The part about "pathname" sockets suggests usage of
sizeof(sa_family_t) + strlen(sun_path) + 1
for calculating the sockaddr size. Due to alignment/padding
this is probably not a good idea. Instead, one should use
offsetof(struct sockaddr_un, sun_path) + strlen() + 1
or something like that.

See https://bugzilla.kernel.org/show_bug.cgi?id=19812

========== Changes in man-pages-3.30 ==========

Apologies if I missed anyone!

New and rewritten pages
---

kexec_load.2
  Andi Kleen
    New page documenting kexec_load(2)
  Michael Kerrisk
    Add license
  Michael Kerrisk
    Incorporate fixes from Eric W. Biederman
      Eric noted that a few instances of "virtual" should
      be "physical" and noted:

        There is an expectation that at hand off from sys_kexec that
        virtual and physical addresses will be identity mapped. But
        this isn't the old Alpha booting convention where you have

a virtual address and then you have to parse the page table
to figure out where your kernel was actually loaded.
Michael
Kerrisk
Additions and edits by mtk
Various wording and layout improvements.
Fixed the name of a constant: s/KEXEC_ARCH_I386/KEXEC_ARCH_386/.
Added RETURN VALUE and ERRORS sections.
Added VERSIONS section
Note that CONFIG_KEXEC is needed
Removed details of using syscall; the reader can find them in
syscall(2).
Added some details for KEXEC_PRESERVE_CONTEXT.
Revised the text mentioning the kernel header, since it is
not yet exported, and it's not certain that it will be.

lio_listio.3
Michael Kerrisk
New page documenting lio_listio(3)

Newly documented interfaces in existing pages
---

reboot.2
Andi Kleen
Document LINUX_REBOOT_KEXEC
Some fix-ups by Michael Kerrisk
Michael Kerrisk
Place 'cmd' values in alphabetical order.

unshare.2
Michael Kerrisk
Document
CLONE_NEWIPC
Michael Kerrisk
Document CLONE_NEWNET
Lucian Adrian Grijincu
Improve description of CLONE_NEWNET
CLONE_NEWNET creates a new network namespace from scratch.
You don't have anything from the old network namespace in
the new one. Even the loopback device is new.
Michael Kerrisk
Document CLONE_SYSVSEM
Michael Kerrisk
Document CLONE_NEWUTS
Michael Kerrisk
Relocate discussion of CAP_SYS_ADMIN to CLONE_NEWNS section

And rewrite the EPERM description to be more general in
preparation for the new flags to be documented.

Global changes

Various pages
  Michael Kerrisk
    Add reference to feature_test_macros(7)
      Some pages simply list feature test macro requirements in
      the form:

        #define #GNU_SOURCE
        #include <someheader.h>

      For these pages, add a "See feature_test_macros(7)"
comment
      on the "#define" line.

Various pages
  Michael Kerrisk
    SEE ALSO: Remove redundant reference to feature_test_macros(7)

Various pages
  David Prevot
    Use greater consistency in NAME line
    (Remove definite article at start of descriptive clause.)

Various pages
  Michael Kerrisk
    SEE ALSO: Place entries in correct order

Various pages
  Michael Kerrisk
    ERRORS: Place entries in correct order

Various pages
  Michael Kerrisk
    Add section number to references to functions documented in other pages

Various pages
  Michael Kerrisk
    Remove redundant section number in page references
      Remove section number in function references that are for
      functions documented on this page.

  Michael Kerrisk
     Document ENOENT error

mlock.2
  Michael Kerrisk
     Improve wording describing /proc/PID/status /VmLck field
  Michael Kerrisk
     shmctl() SHM_LOCKed memory is not included in VmLck

reboot.2
  Michael Kerrisk
     Place 'cmd' values in alphabetical order

subpage_prot.2
  Michael Kerrisk
    Change 1-line page description
  Michael Kerrisk
    Improvements after review by Paul Mackerras

timer_settime.3
  Michael Kerrisk
    Remove redundant
 SEE ALSO reference

euidaccess.3
  Michael Kerrisk
    Note the use of faccessat(2) to operate on symbolic links
  Michael Kerrisk
    Note that the use of euidaccess() is racy

fenv.3
  Michael Kerrisk
    Clarify wording relating to glibc version

getgrent.3
getgrent_r.3
getgrnam.3
  Michael Kerrisk
    Refer reader for group(5) for more info on group structure

getopt.3
  Bernhard Walle
    Use constants in getopt_long() example
      The description of getopt_long() mentions the constants
      required_argument, no_argument and optional_argument.
      Use them in the example to make the code easier to understand.

getpw.3
  Michael Kerrisk
    Change comment describing pw_gecos

getpw.3
getpwent.3
getpwent_r.3
  Michael Kerrisk
    Refer reader to passwd(5) for more info on the passwd structure

getpwent.3
getpwnam.3
  Michael Kerrisk
    Note that pw_gecos is not in POSIX

And change the comment describing
this field

getpwent_r.3
Michael Kerrisk
Change comment describing pw_gecos

getpwnam.3
Michael Kerrisk
Some rewording and restructuring

sched_getcpu.3
Michael Kerrisk
Fix feature test macro requirements

strnlen.3
Michael Kerrisk
Fix feature test macro requirements

group.5
Michael Kerrisk
Various minor rewordings

hosts.5
protocols.5
spufs.7
termio.7
David Prevot
Remove definite article from NAME section
Please find inline another tiny patch in order to shrink
the definite article from some other pages (found with
"rgrep -i ' \\\- the' man*").

passwd.5
Michael Kerrisk
Various minor rewordings

proc.5
Michael Kerrisk
Add reference to mlock(2) for further info on /proc/PID/status VmLck

armscii-8.7
David Prevot
Write the character set name as ArmSCII

cp1251.7
David Prevot
Capitalize hexadecimal numbers

ip.7
  David Prevot
    Fix name of socket option: s/IP_TTL/IP_TRANSPARENT/
  David Prevot
    Place socket options in alphabetical order

koi8-r.7
  David Prevot
    Fix special character names
      Comparing to koi8-u.7, I noticed some inconsistencies in special
      character names. After checking with the following Unicode related
      pages, please find inline (and gzipped attached, hopefully not
      messing with encoding), a patch in order to make it right, on an
      Unicode point of view.

      http://www.unicode.org/charts/PDF/U2500.pdf
      http://www.unicode.org/charts/PDF/U25A0.pdf
      http://www.unicode.org/charts/PDF/U0080.pdf
      http://www.unicode.org/charts/PDF/U1D400.pdf
  David Prevot
    Fix SEE ALSO reference and letter names
      The koi8-r(7) (Russian Net Character Set) manual page refers
      to iso-8859-7(7) manual page, which is the Latin/Greek one.
      I guess it should
refer instead to the iso-8859-5(7)
      (Latin/Cyrillic) one. This is addressed at the end of the patch.

      It has also been spotted that letter names are different in
      this manual page and in the Unicode related page [0], the
      first part of the page address this.

          0: http://www.unicode.org/charts/PDF/U0400.pdf

man-pages.7
  Michael Kerrisk
    Update example
      The old example used the chmod(2) man page, but the
      feature test macro requirements on that page had changed.
      Update to use an example from a different page (acct(2),
      whose feature test macro requirements are probably unlikely
      to change in the future).

========== Changes in man-pages-3.31 ==========

Released: 2010-11-12, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

getrlimit.2
  Michael Kerrisk
    Added documentation of prlimit()
      prlimit() is new in kernel 2.6.36.

inotify.7
  Michael Kerrisk
    Document IN_EXCL_UNLINK
      This flag was added in Linux 2.6.36.
      See kernel commit 8c1934c8d70b22ca8333b216aec6c7d09fdbd6a6.

New and changed links
---

prlimit.2
  Michael Kerrisk
    New link to getrlimit.2

Changes to individual pages
---

getrlimit.2
  Michael Kerrisk
    Remove unneeded text in DESCRIPTION

intro.2
  Michael Kerrisk
    Added various pages to SEE ALSO

kexec_load.2
  Michael Kerrisk
    Add kernel
 version where KEXEC_PRESERVE_CONTEXT first appeared
    Added kernel version number where KEXEC_ON_CRASH first appeared
    Fix copyright
      Make copyright in the name of Intel corporation
    VERSIONS: Fix version number
      kexec_load() was first implemented in 2.6.13, though the entry
      in the system call table was reserved starting in 2.6.7.

migrate_pages.2
  Michael Kerrisk
    SEE ALSO: Add reference to Documentation/vm/page_migration

sched_setaffinity.2
  Michael Kerrisk
    Add missing word "real" to "user ID"

syscalls.2
  Michael Kerrisk
    Fix kernel version number for kexec_load
      kexec_load() was first implemented in 2.6.13, though the entry
      in the system call table was reserved starting in 2.6.7.
  Michael Kerrisk
    Add prlimit() to list

intro.3
  Michael Kerrisk
    Added various pages to SEE ALSO

printf.3
  Michael Kerrisk
    Formatting fixes in example code

hostname.7
   Michael Kerrisk
    Small improvement to description of domains
      See: https://bugzilla.novell.com/show_bug.cgi?id=651900

Apologies if I missed anyone!

New and rewritten pages
---

pthread_sigqueue.3
   Michael Kerrisk
      New page documenting pthread_sigqueue()
         pthread_sigqueue() is new in glibc 2.11 (requires a kernel with
         rt_tgsigqueinfo(), added in Linux 2.6.31).

Newly documented interfaces in existing pages
---

readv.2
  Michael Kerrisk
      Add documentation of preadv() and pwritev()
         The preadv() and pwritev() system calls were added in
         Linux 2.6.30.

New and changed links
---

preadv.2
  Michael Kerrisk
    New link to readv.2

pwritev.2
  Michael Kerrisk
    New link to readv.2

Changes to individual pages
---

chdir.2
  Michael Kerrisk
    Remove redundant and incorrect info on FTMs from NOTES

chown.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

clock_nanosleep.2
  Michael Kerrisk
    Clarify that clock_nanosleep() suspends the calling *thread*

epoll_create.2
   Michael Kerrisk
    Note that 'size' argument must be greater than 0
      See https://bugzilla.kernel.org/show_bug.cgi?id=23872
  Michael Kerrisk
    Added VERSIONS section

epoll_ctl.2
  Michael Kerrisk
    Added VERSIONS section

epoll_wait.2
  Michael Kerrisk
    Updated VERSIONS section

fcntl.2
  Michael Kerrisk
    Add notes on fcntl64()

fstatat.2
  Michael Kerrisk
    Add NOTES on fstatat64(), the name of the underlying system call

getdents.2
  Michael Kerrisk
    Added notes on getdents64()

getgid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getgroups.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getpagesize.2
  Michael Kerrisk
    Improve description of getpagesize()
      Improve description of getpagesize() and relocate discussion
      of sysconf(_SC_PAGESIZE).

      In part inspired by
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=537272

getresuid.2
   Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getrlimit.2
  Michael Kerrisk
    Add example program for prlimit()

getuid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

open.2
  Ivana Hutarova Varekova
    O_EXCL can be used without O_CREAT for block devices
      Since Linux 2.6 there is a possibility to use O_EXCL without
      O_CREAT. See patch: http://lkml.org/lkml/2003/8/10/221.

pread.2
  Michael Kerrisk
    Add notes on pread64() and pwrite64()
      See https://bugzilla.kernel.org/show_bug.cgi?id=23072
  Michael Kerrisk
    SEE ALSO: add readv(3)

readv.2
  Michael Kerrisk

Wording fix: readv() and writev() are system calls, not functions

sendfile.2
Michael Kerrisk
Add notes on sendfile64()

setfsgid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls
added in Linux 2.4

setfsuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setgid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setresuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setreuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

sigqueue.2
pthreads.7
signal.7
Michael Kerrisk
SEE ALSO: Add pthread_sigqueue(3)

stat.2
Michael Kerrisk
Fix EOVERFLOW error description
2<<31 should read 1<<31 (which equals 2^31).

statfs.2
Michael Kerrisk
Add notes on statfs64() and fstatfs64()

swapon.2
Hugh Dickins

Document SWAP_FLAG_DISCARD and discarding of swap pages

truncate.2
Michael Kerrisk
Add notes on truncate64() and ftruncate64()

memcpy.3
Michael Kerrisk
Change "should not overlap" to "must not overlap"
glibc 2.12 changed things so that applications that use memcpy() on
overlapping regions will encounter problems. (The standards have
long said that the behaviors is undefined if the memory areas
overlap.)

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=603144
In reference of http://lwn.net/Articles/414467/
and http://article.gmane.org/gmane.comp.lib.glibc.alpha/15278

usleep.3
Petr Uzel
usleep() suspends calling thread, not process

core.5
Michael Kerrisk
Change single quote to double quote in shell session example
The example section has a sample shell session containing:

echo '|$PWD/core_pattern_pipe_test %p UID=%u GID=%g sig=%s'

But $PWD won't be expanded in single quotes. It should be double
quotes around the entire argument or some other form.

pthreads.7
Michael Kerrisk
Added description of async-cancel-safe functions

unix.7
Michael Kerrisk
Reworded the text of various errors
Michael Kerrisk
Added ENOENT error

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

sync.2
  Michael Kerrisk
    Added new syncfs() system call
      syncfs() was added in Linux 2.6.39.

New and changed links
---

syncfs.2
  Michael Kerrisk
    New link for sync(2).

Global changes

Various pages
  Simon Paillard
    Global fix: properly escape minus sign

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Note that CLONE_STOPPED was removed in 2.6.38

execve.2
  Michael Kerrisk [Sebastian Geiger]
    Note that the first argv[] value should contain name of executable

fcntl.2
  Michael Kerrisk [Reuben Thomas]
    Note that F_GETFL also retrieves file access mode

getrlimit.2
  Michael Kerrisk [Ryan Mullen]
    Remove mention of kernel versions in discussion of RLIMIT_CPU
  Michael Kerrisk [Seonghun Lim]
    Fix example program and add _FILE_OFFSET_BITS requirement

mlock.2
  Michael Kerrisk [Brian M.
 Carlson]
    Clarify EINVAL error
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?625747
  Michael Kerrisk [Seonghun Lim]
    Simplify and correct text for EPERM error

mprotect.2
  Seonghun Lim
    Fix off-by-one error in a memory range
  Seonghun Lim
    Fix small bug in example program
      The description of the example program says that it makes the
      third page "read-only". Thus use PROT_READ instead of PROT_NONE.

open.2
  Folkert van Heusden
    Remove text describing O_CLOEXEC as Linux-specific
      O_CLOEXEC is specified in POSIX.1-2008, as noted
      elsewhere in the page.

readlink.2
  Michael Kerrisk [Dan Jacobson]
    SEE ALSO: Add readlink(1)

sendfile.2
  Akira Fujita
    Since 2.6.33, 'out_fd' can refer to any file type
      Linux kernel commit cc56f7de7f00d188c7c4da1e9861581853b9e92f
      meant sendfile(2) can work with any output file.
  Michael Kerrisk
    Shift
 text on falling back to read()/write() to NOTES
  Michael Kerrisk [Tolga Dalman]
    Remove mention of kernel version for 'in_fd' argument
  Tolga Dalman
    Add an explicit reference to splice(2)
      Unlike sendfile(), splice() can transfer data
      between a pair of sockets.

sigaction.2
  Michael Kerrisk [Tolga Dalman]
    Add a little info about ucontext_t

stat.2
  Michael Kerrisk [Jon Grant]
    Small rewording of ENAMETOOLONG error

sync.2
  Michael Kerrisk
    Some rewrites to description of sync()

syscalls.2
  Michael Kerrisk
    Added fanotify_init() and fanotify_mark() to syscall list
  Michael Kerrisk
    Added new 2.6.39 system calls
  Michael Kerrisk
    Updated for Linux 3.0 system calls
  Michael Kerrisk
    Update kernel version at head of syscall list
  Michael Kerrisk
    Update to mention 3.x kernel series

syslog.2
  Michael Kerrisk [Serge E. Hallyn]
    Update for kernel 2.6.37
 changes
      Document /proc/sys/kernel/dmesg_restrict.
      Document CAP_SYSLOG.

time.2
  Michael Kerrisk [Alexander Schuch]
    NOTES: Fix description of "Seconds since the Epoch"

timerfd_create.2
  Michael Kerrisk [Josh Triplett]
    Note behavior when timerfd_settime() old_value is NULL
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?641513
  Tomislav Jonjic
    Fix small error in description of timerfd_settime()

truncate.2
  Seonghun Lim
    Remove redundant EINTR description

unlink.2
  Hendrik Jan Thomassen
    Improve EBUSY description

cacos.3
cacosh.3
catan.3
catanh.3
  Michael Kerrisk [Richard B. Kreckel, Andries Brouwer]

Fix formula describing function
The man pages for cacos(), cacosh(), catan(), catanh()
contain incorrect formulae describing the functions.

cacos.3
Michael Kerrisk
Add example program

cacosh.3
Michael Kerrisk
Add example program

cacosh.3
casinh.3
catan.3
catanh.3
Michael Kerrisk
SEE ALSO: Add reference to inverse function

catan.3
Michael Kerrisk
Add example program

catanh.3
Michael Kerrisk
Add example program

ccos.3
ccosh.3
csin.3
csinh.3
ctan.3
ctanh.3
Michael Kerrisk
SEE ALSO Add reference to "arc" inverse function

cexp.3
Michael Kerrisk
SEE ALSO: add cexp(3)

clog.3
Michael Kerrisk
SEE ALSO: Add reference to clog(2)

crypt.3
Michael Kerrisk [Jan Engelhardt]
Fix header file and feature test macro requirements for crypt_r()

err.3
  Seonghun Lim
    Clean up description of error message source
      In the second paragraph of DESCRIPTION section, one of the
      sources of error messages is incorrect: the four functions obtain
      error message only from errno, and "a code" is just relevant
      with errc() and warnc(), which are not present on Linux.
      see http://www.unix.com/man-page/freebsd/3/ERR/
.

      Then, the third paragraph becomes a duplicate.

fflush.3
  Regid Ichira
    Fix wording error
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?614021

hsearch.3
  Seonghun Lim
    Update ERRORS section
      EINVAL can occur for hdestroy_r().
      EINVAL can't occur for hcreate().
      Other minor fixes.

lockf.3
  Michael Kerrisk [Mikel Ward]
    ERRORS: EBADF can also occur for nonwritable file descriptor
      As noted in the DESCRIPTION, the file descriptor must be writable
      in order to place a lock.

malloc.3
  Seonghun Lim
    Reorder prototypes in SYNOPSIS
      calloc() comes before realloc() in the other sections,
      so should do in SYNOPSIS, too.

mbstowcs.3
  Michael Kerrisk
    SEE ALSO: add reference to wcstombs(3)

memcmp.3
  Michael Kerrisk [Sebastian Unger]
    Clarify that comparison interprets bytes as "unsigned char"

realpath.3
  Michael
 Kerrisk [Seonghun Lim]
    Fix EINVAL error

Since glibc 2.3, resolved_path can be non-NULL (with the
semantics already documented in the page).

scandir(3)
Mike Frysinger
Add ENOENT/ENOTDIR errors

siginterrupt.3
Michael Kerrisk [Luis Javier Merino]
Remove misleading sentence about signal(2) and system call interruption

strlen.3
Michael Kerrisk [Jon Grant]
SEE ALSO: Add strnlen(3)

strnlen.3
Michael Kerrisk [Jon Grant]
CONFORMING TO: Note that strnlen() is in POSIX.1-2008

strtoul.3
Michael Kerrisk [Tolga Dalman]
Fix NOTES section constants

termios.3
Michael Kerrisk
Use "terminal special characters" consistently throughout page
Michael Kerrisk [Paul Evans]
Add documentation of _POSIX_VDISABLE
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=627841
Michael Kerrisk
Add a description of STATUS character
Michael Kerrisk
Added description
of SWTCH character
Michael Kerrisk
Add names of terminal special characters
Michael Kerrisk
List terminal special characters in alphabetical order

wcstombs.3
Michael Kerrisk
SEE ALSO: add mbstowcs(3)

console_codes.4
Petr Pisar
Add ESC [3 J
Linux 3.0 (commit f8df13e0a901fe55631fed66562369b4dba40f8b)
implements \E[3J to allow scrambling content of console

including scroll-back buffer
(http://thread.gmane.org/gmane.linux.kernel/1125792).

proc.5
  Michael Kerrisk [Stan Sieler]
    Add description of 'PPid' field of /proc/PID/status
  Michael Kerrisk [Stan Sieler]
    Add description of 'SigQ' field of /proc/PID/status

capabilities.7
  Michael Kerrisk [Serge E. Hallyn]
    Document CAP_SYSLOG and related changes in Linux 2.6.37
  Michael Kerrisk
    File capabilities are no longer optional
      Starting with Linux 2.6.33, the CONFIG_SECURITY_FILE_CAPABILITIES
       has been removed, and file capabilities are always part of the
      kernel.

complex.7
  Michael Kerrisk
    Updated SEE ALSO list to include all complex math functions

ipv6.7
  Michael Kerrisk [Simon Cross]
    Fix description of address notation: "8 4-digit hexadecimal numbers"

signal.7
  Seonghun Lim
    Remove crufty repeated info about LinuxThreads

unix.7
  Michael Kerrisk
    Add pointer to cmsg(3) for an example of the use of SCM_RIGHTS

========== Changes in man-pages-3.34 ==========

Released: 2011-09-23, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Alan Curry <pacman@kosh.dhis.org>

Benjamin Poirier <benjamin.poirier@gmail.com>
Brian M. Carlson <sandals@crustytoothpaste.net>
David Howells <dhowells@redhat.com>
David Prévot <taffit@debian.org>
Denis
 Barbier <bouzim@gmail.com>
Doug Goldstein <cardoe@cardoe.com>
Eric Blake <eblake@redhat.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Neil Horman <nhorman@tuxdriver.com>
Paul Pluzhnikov <ppluzhnikov@google.com>
Reuben Thomas <rrt@sc3d.org>
Stefan Puiu <stefan.puiu@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Stephen Cameron <scameron@beardog.cce.hp.com>
Sunil Mushran <sunil.mushran@oracle.com>

Apologies if I missed anyone!

New and rewritten pages
----

rt_sigqueueinfo.2
  Michael Kerrisk [Stephan Mueller]
    New page for rt_sigqueueinfo(2) and rt_tgsigqueueinfo(2)
      This replaces the previous '.so' man page link file for
      rt_sigqueueinfo.2, which linked to this sigqueue() man page.

cciss.4
  Stephen M. Cameron
    New man page for cciss driver
      I obtained the information in this man page as a consequence
      of having worked on
 the cciss driver for the past several years,
      and having written considerable portions of it.
  Michael Kerrisk
    Copyedit by mtk

hpsa.4
  Stephen M. Cameron
    New man page for the hpsa driver
      I obtained the information in this man page as a consequence
      of being the main author of the hpsa driver.
  Michael Kerrisk
    Copyedits my mtk

Newly documented interfaces in existing pages
---

fstatat.2
  Michael Kerrisk [David Howells]
    Document AT_NO_AUTOMOUNT
      This flag was added in Linux 2.6.38.

lseek.2
  Michael Kerrisk [Eric Blake, Sunil Mushran]
    Document SEEK_HOLE and SEEK_DATA
      These flags, designed for discovering holes in a file,
      were added in Linux 3.1. Included comments from Eric
      Blake and Sunil Mushran.

madvise.2
  Doug Goldstein
    Add MADV_HUGEPAGE and MADV_NOHUGEPAGE
      Document the MADV_HUGEPAGE
 and MADV_NOHUGEPAGE flags added to
      madvise() in Linux 2.6.38.

New and changed links
---

rt_tgsigqueueinfo.2
  Michael Kerrisk
    New link to new rt_sigqueueinfo.2 page

sigqueue.2
  Michael Kerrisk
    Create link to page that was relocated to section 3

Global changes

Various pages
  Michael Kerrisk
    Change reference to "sigqueue(2)" to "sigqueue(3)"

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    ERRORS: Add EPERM and ESPIPE errors

lseek.2
  Michael Kerrisk [Alan Curry, Reuben Thomas]
    Remove suspect note about 'whence' being incorrect English

prctl.2
  Paul Pluzhnikov
    PR_SET_DUMPABLE makes process non-ptrace-attachable

readlink.2
  Guillem Jover
    Document using st_size to allocate the buffer
  Michael Kerrisk
    Added copyright text + changelog note for Guillem Jover's patch

sched_setscheduler.2
  Michael Kerrisk

    Document 2.6.39 changes to rules governing changes from SCHED_IDLE policy
      Since Linux 2.6.39, unprivileged processes under the
      SCHED_IDLE policy can switch to another nonrealtime
      policy if their nice value falls within the range
      permitted by their RLIMIT_NICE limit.

tkill.2
  Michael Kerrisk
    SEE ALSO: Add rt_sigqueueinfo (2)

btowc.3, wctob.3
  Michael Kerrisk [Brian M. Carlson]
    Add pointers to better, thread-safe alternative functions
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=606899

fwide.3
  Michael Kerrisk
    Add _ISOC95_SOURCE to feature test macro requirements
      Since glibc 2.12, _ISOC95_SOURCE can also be used to expose
      prototype of this function.

index.3
  Michael Kerrisk [Jon Grant]
    Fix text mentioning terminating null

pthread_sigqueue.3
  Michael Kerrisk

Replace explicit mention of rt_tgsigqueueinfo() with SEE ALSO reference

sigqueue.3
Michael Kerrisk
Move this page to section 3
Now that the underlying system call rt_sigqueueinfo(2) is
properly documented, move sigqueue() to Section 3, since
it is really a library function.
Michael Kerrisk
Update text in line with existence of new rt_sigqueueinfo.2 page

wcsnlen.3
Jon Grant
Improve description of 'maxlen' argument
It's worth clarifying 'maxlen' is in wide-char units, not bytes.

wprintf.3
Michael Kerrisk
Add _ISOC95_SOURCE to feature test macro requirements
Since glibc 2.12, _ISOC95_SOURCE can also be used to expose
prototype of these functions.

feature_test_macros.7
Michael Kerrisk
Document _ISOC95_SOURCE
_ISOC95_SOURCE was added in glibc 2.12 as a means
to expose C90 Amendment 1 definitions.

ip.7
Benjamin Poirier [Neil Horman]
Improve description of IP_MTU_DISCOVER

signal.7
Michael Kerrisk
SEE ALSO: Add rt_sigqueueinfo(2)

========== Changes in man-pages-3.35 ==========

Released: 2011-10-04, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
David Prévot <taffit@debian.org>
Denis Barbier <bouzim@gmail.com>
Eric W. Biederman <ebiederm@xmission.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Kevin Lyda <kevin@ie.suberic.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages
---

recvmmsg.2
  Andi Kleen, Michael Kerrisk
    New man page for recvmmsg(2)

setns.2
  Eric W. Biederman
    New manual page for setns(2)
  Michael Kerrisk
    Various improvements

Global changes

Various
 pages
  Michael Kerrisk
    Global fix: remove spaces around em-dash
      Normal English typographical convention is not to have
      spaces around em dashes.

Various pages
  Michael Kerrisk
    Global fix: s/null pointer/NULL pointer/

Various pages
  Michael Kerrisk
    Global fix: use ORing
      Use "ORing", not "OR'ing", nor an italic ".IR OR ing".

Various pages
  Michael Kerrisk
    Global fix: consistent use of "null wide character"
      Bring more consistency to the discussion of
      "[terminating] null wide character"
      by writing (at least in the initial use in a page)
      "[terminating] null wide character (L'\0')".

Various pages
  Michael Kerrisk
    Global fix: consistent use of "null byte"
      Bring more consistency to the discussion of
      "[terminating] null byte"
      by writing (at least in the initial use in a page)
      "[terminating] null
byte ('\0')".

mount.2, prctl.2
  Michael Kerrisk
    s/task/thread/ for consistency with other pages

Changes to individual pages
---

lseek.2
  Guillem Jover
    CONFORMING TO: Note other systems that have SEEK_HOLE+SEEK_DATA

recv.2
  Michael Kerrisk
    Add mention of recvmmsg(2)

recvmmsg.2
  Michael Kerrisk
    SEE ALSO: add sendmmsg(2)

send.2
  Michael Kerrisk
    CONFORMING TO: POSIX.1-2008 adds MSG_NOSIGNAL

sigwaitinfo.2
  Michael Kerrisk
    Note that attempts to wait for SIGKILL and SIGSTOP are silently ignored

stat.2
  Michael Kerrisk
    Note POSIX.1-2001 and POSIX.1-2008 requirements for lstat()

Michael Kerrisk
Regarding automounter action, add a reference to fstatat(2)
Michael Kerrisk
Clean up text describing which POSIX describes S_IF* constants

aio_cancel.3
Michael Kerrisk [Jon Grant]
Clarify meaning of "return status" and "error status"

gets.3
Michael Kerrisk
POSIX.1-2008 marks gets() obsolescent
The page formerly erroneously stated that POSIX.1-2008
removed the specification of this function.

mbsnrtowcs.3
Michael Kerrisk
CONFORMING TO: Add POSIX.1-2008
This function is specified in the POSIX.1-2008 revision.

regex.3
Michael Kerrisk [Reuben Thomas]
Change "terminating null" to "terminating null byte"

stpcpy.3
stpncpy.3
Mike Frysinger
Note that these functions are in POSIX.1-2008
Update the "CONFORMING TO" sections of these functions to
note that they are now part of the POSIX.1-2008 standard.

stpncpy.3
Michael Kerrisk
Change "terminating null" to "terminating null byte"

strcpy.3
Mike Frysinger
SEE ALSO: Add stpncpy(3)

strdup.3
Michael Kerrisk
CONFORMING TO: strndup() is in POSIX.1-2008

wcpcpy.3
wcpncpy.3
wcsnlen.3
wcsnrtombs.3
Michael Kerrisk

CONFORMING TO: Add POSIX.1-2008

These functions are specified in the POSIX.1-2008 revision.

proc.5
Eric W. Biederman
Document /proc/[pid]/ns/
Michael Kerrisk
Some edit's to Eric Biederman's /proc/[pid]/ns/ additions

capabilities.7
Michael Kerrisk
List setns(2) as an operation allowed by CAP_SYS_ADMIN

========== Changes in man-pages-3.36 ==========

Released: 2012-02-27, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Alain Benedetti <alainb06@free.fr>
carado <carado@savhon.org>
Christoph Hellwig <hch@lst.de>
Clemens Ladisch <clemens@ladisch.de>
David Prévot <taffit@debian.org>

Guillem Jover <guillem@hadrons.org>
Jessica McKellar <jesstess@mit.edu>
Josef Bacik <josef@redhat.com>
Junjiro Okajima <jro@mx3.ttcn.ne.jp>
Lucian Adrian Grijincu <lucian.grijincu@gmail.com>
Michael
Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Pat Pannuto <pat.pannuto@gmail.com>
Salvo Tomaselli <tiposchi@tiscali.it>
Simone Piccardi <piccardi@truelite.it>
Slaven Rezic <srezic@iconmobile.com>
starlight <starlight@binnacle.cx>
Stephan Mueller <stephan.mueller@atsec.com>
Vijay Rao <vijay@portuosus.com>

Walter Haidinger <walter.haidinger@gmx.at>
Walter Harms <wharms@bfs.de>
Yang Yang <wdscxsj@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

sendmmsg.2
  Michael Kerrisk [Stephan Mueller]
    New page for sendmmsg(2)
      Some pieces inspired by an initial attempt by Stephan Mueller.

Newly documented interfaces in existing pages
---

fallocate.2
  Lucian Adrian Grijincu
    Document FALLOC_FL_PUNCH_HOLE
      FALLOC_FL_PUNCH_HOLE was added in Linux 2.6.38,
      for punching holes in the allocated space in a file.

Changes
 to individual pages
---

dup.2
  Michael Kerrisk
    SYNOPSIS: Add "#include <fcntl.h>" for O_* constants

fallocate.2
  Michael Kerrisk
    Substantial restructuring of DESCRIPTION
      The addition of a second class of operation ("hole punching")
      to the man page made it clear that some significant restructuring
      is required. So I substantially reworked the page, including the
      preexisting material on the default "file allocation" operation.
  Michael Kerrisk [Josef Bacik]
    Add further details for FALLOC_FL_PUNCH_HOLE
  Michael Kerrisk
    ERRORS: Add EPERM error case for FALLOC_FL_PUNCH_HOLE

fork.2
  Michael Kerrisk

NOTES: Describe clone() call equivalent to fork()

fsync.2
Christoph Hellwig
Various improvements
- explain the situation with disk caches better
- remove the duplicate fdatasync() explanation in the NOTES section
- remove an incorrect note about fsync() generally requiring two writes
- remove an obsolete ext2 example note
- fsync() works on any file descriptor (doesn't need to be writable); correct the EBADF error code explanation
Michael Kerrisk [Guillem Jover]
Note that some systems require a writable file descriptor
An edited version of Guillem Jover's comments:
[While the file descriptor does not need to be writable on Linux]
that's not a safe portable assumption to make on POSIX in general
as that behavior is not specified and as such is
implementation-specific. Some Unix systems do actually fail on
read-only file descriptors, for example [HP-UX and AIX].

mount.2
Michael Kerrisk [Junjiro Okajima]
Removed erroneous statement about MS_RDONLY and bind mounts

open.2
Jessica McKellar
Fix grammar in O_DIRECT description

Some small grammar fixes to the O_DIRECT description.

pipe.2
Michael Kerrisk [Salvo Tomaselli]
SYNOPSIS: Add "#include <fcntl.h>" for O_* constants
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=659750

sched_rr_get_interval.2
Clemens Ladisch
Update notes on modifying quantum
Since Linux 2.6.24, it is no longer possible to
modify the SCHED_RR quantum using setpriority(2).
(Slight edits to Clemens' patch by mtk.)
Michael Kerrisk
Reordered various pieces of text
Michael Kerrisk
Reworded text of ESRCH error

send.2
  Michael Kerrisk
    Add mention of sendmmsg(2)

sync.2
  Michael Kerrisk [Simone Piccardi]
    PROTOTYPE: Fix return type of syncfs()

vfork.2
  Michael Kerrisk [starlight]
    Clarify what is duplicated in the child
      Add some words to make it clear to the reader that vfork(),
      like fork(), creates duplicates of process attributes
       in the child.
  Michael Kerrisk
    Note clone() flags equivalent to vfork()
  Michael Kerrisk [starlight, Mike Frysinger]
    Add some notes on reasons why vfork() still exists
  Michael Kerrisk [starlight]
    Clarify that calling *thread* is suspended during vfork()
  Michael Kerrisk
    CONFORMING TO: Note that POSIX.1-2001 marked vfork() obsolete

gets.3
  Michael Kerrisk
    Document C11 and glibc 2.16 changes affecting gets()

pthread_sigmask.3
  Michael Kerrisk [Pat Pannuto]
    Fix comment that was inconsistent with code in example program

sem_wait.3
  Walter Harms
    EXAMPLE: Remove extraneous line of output from shell session

wcsnrtombs.3
wcsrtombs.3
wcstombs.3
  Michael Kerrisk
    Fix-ups for e9c23bc636426366d659809bc99cd84661e86464

core.5
  Michael Kerrisk [Junjiro Okajima]
    Document %E specifier for core_pattern

passwd.5
  Michael Kerrisk [Walter Haidinger]
    s/asterisk/asterisk

(*)/ to improve clarity
  Michael Kerrisk
    Correct note on passwd field value when shadowing is enabled
      When password shadowing is enabled, the password field
      contains an 'x' (not '*').

proc.5
  Elie De Brauwer
    Fix description of fourth field of /proc/loadavg
      SIgned-off-by: Elie De Brauwer <eliedebrauwer@gmail.com>

resolv.conf.5
  Michael Kerrisk [Slaven Rezic]
    Describe syntax used for comments
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=656994

feature_test_macros.7
  Michael Kerrisk
    Document _ISOC11_SOURCE

inotify.7
  Michael Kerrisk [Yang Yang]
    Note that 'cookie' field is set to zero when unused

man.7
  Michael Kerrisk
    Various fixes for description of NAME section
      As noted by reporter:
      * The code sample given for the NAME section is incomplete because
        the actual content sample is not given.
      * Additionally, the description
 assumes that the item described is
        a command, which need not be the case.
      * The command makewhatis is not present on my system; the
        documented tool to create the whatis database is called mandb.
      * The description on .SH NAME in man(7) should either copy the
        relevant paragraph of lexgrog(1) or refer to it.

========== Changes in man-pages-3.37 ==========

Released: 2012-03-06, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Denys Vlasenko <dvlasenk@redhat.com>
Mark R. Bannister <cambridge@users.sourceforge.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Oleg Nesterov <oleg@redhat.com>
Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages
---

getent.1
  Mark R. Bannister

   New page to document 'getent' binary provided by glibc

Changes to individual pages
---

bdflush.2
  Michael Kerrisk
    Note that bdflush() is deprecated, and does nothing

nfsservctl.2
  Michael Kerrisk
    Note that this system call was removed in Linux 3.1

ptrace.2
  Denys Vlasenko [Oleg Nesterov, Tejun Heo]
    add extended description of various ptrace quirks
      Changes include:

      s/parent/tracer/g, s/child/tracee/g - ptrace interface now
      is sufficiently cleaned up to not treat tracing process
      as parent.

      Deleted several outright false statements:
      - pid 1 can be traced
      - tracer is not shown as parent in ps output
      - PTRACE_ATTACH is not "the same behavior as if tracee had done
        a PTRACE_TRACEME": PTRACE_ATTACH delivers a SIGSTOP.
      - SIGSTOP _can_ be injected.
      - Removed mentions of SunOS and Solaris as irrelevant.

- Added a few more known bugs.

Added a large block of text in DESCRIPTION which doesn't focus
on mechanical description of each flag and operation, but rather
tries to describe a bigger picture. The targeted audience is
a person which is reasonably knowledgeable in Unix but did not
spend years working with ptrace, and thus may be unaware of its
quirks. This text went through several iterations of review by
Oleg Nesterov and Tejun Heo.
This block of text intentionally uses as little markup as possible,
otherwise future modifications to it will be very hard to make.
Michael Kerrisk
Global clean-up of page
* Wording and formatting fixes to existing text and
Denys Vlasenko's new text.
* Various technical amendments and improvements to
Denys Vlasenko's new text.
* Added FIXME for various problems
with the current text.
Michael Kerrisk
Integrated changes after further review from Denys Vlasenko

syscalls.2
Michael Kerrisk
Note that nfsservctl(2) was removed in Linux 3.1
Note that bdflush(2) is deprecated

capabilities.7
Michael Kerrisk
Add CAP_WAKE_ALARM
Michael Kerrisk
Add various operations under CAP_SYS_ADMIN
Add perf_event_open(2) to CAP_SYS_ADMIN
Add VM86_REQUEST_IRQ vm86(2) command to CAP_SYS_ADMIN
Update CAP_NET_ADMIN with notes from include/linux/capability.h
Add nfsservctl(2) to CAP_SYS_ADMIN
Michael Kerrisk
Add ioctl(FIBMAP) under CAP_SYS_RAWIO
Michael Kerrisk
Add virtual terminal ioctl()s under CAP_SYS_TTY_CONFIG
Michael Kerrisk
Update CAP_NET_RAW with notes from include/linux/capability.h
Michael Kerrisk
Add F_SETPIPE_SZ case to CAP_SYS_RESOURCE
Add POSIX messages queues queues_max case to CAP_SYS_RESOURCE
Update
CAP_SYS_RESOURCE with notes from include/linux/capability.h
Michael Kerrisk

SEE ALSO: Add libcap(3)

ld.so.8
Michael Kerrisk
Add --audit command-line option

========== Changes in man-pages-3.38 ==========

Apologies if I missed anyone!

New and rewritten pages
---

get_nprocs_conf.3
Beas Petr
New page documenting get_nprocs_conf(3) and get_nprocs(3)

Michael Kerrisk
Some additions and improvements

malloc_get_state.3
Michael Kerrisk
New page documenting malloc_get_state(3) and malloc_set_state(3)

mallopt.3
Michael Kerrisk
New man page for mallopt(3)

mtrace.3
Michael Kerrisk
Complete rewrite of page, adding much more detail

scandirat.3
Mark R Bannister
New page for scandirat(3) (new in glibc 2.15)

Newly documented interfaces in existing pages
---

posix_memalign.3
Michael Kerrisk
Document aligned_alloc(3)
aligned_alloc() is new in C11.
Michael Kerrisk
Document pvalloc(3)

qsort.3
Mark R Bannister
Add documentation of qsort_r(3)
Ben Bacarisse
Improvements to Mark R Bannister's qsort_r() patch
Michael Kerrisk
Add VERSIONS section for qsort_r()

New and changed links
---

aligned_alloc.3
Michael Kerrisk
New link to posix_memalign.3

get_nprocs.3
Beas Petr

Link to new get_nprocs_conf.3 page

malloc_set_state.3
  Michael Kerrisk
    Link to new malloc_get_state.3 page

pvalloc.3
  Michael Kerrisk
    New link to posix_memalign.3

Global changes

Various pages
  Michael Kerrisk
    Global formatting fix: balance .nf/.fi pairs

Various pages
  Michael Kerrisk
    Global fix: place sections in correct order

Various pages
  Michael Kerrisk [Justin T Pryzby]
    Global fix: Remove duplicated words
      Remove instances of duplicate words found using Justin's
      grep-fu:

```
          for f in man?/*.[1-9]; do

              grep -HE ' ([[:alpha:]]{2,} +)\1' "$f" |
                  grep -Evw '(proc|hugetlbfs|XXX*|root|long) *\1';
          done | grep -E --colo ' ([[:alpha:]]{2,} +)\1'
```

Various pages
  Michael Kerrisk
    Correct order of SEE ALSO entries

Changes to individual pages
---

futimesat.2
  Michael Kerrisk
    PROTOTYPE: Correct header file and feature test macro requirements

keyctl.2
  Bjarni Ingi Gislason

Strip trailing tabs from source line
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=664688

ptrace.2
Denys Vlasenko
Document PTRACE_GETEVENTMSG for PTRACE_EVENT_EXEC
Denys Vlasenko
Various fixes to recent updates of this page

symlinkat.2
Michael Kerrisk [Eric Blake]
PROTOTYPE: Correct header file

syscalls.2
Michael Kerrisk
Remove unimplemented system calls from main syscall list
The unimplemented system calls are in any case noted lower
down
in the page. Also: rearrange the text describing the unimplemented
system calls.
Michael Kerrisk
Note a few system calls that were removed in Linux 2.6
Michael Kerrisk
Add process_vm_readv(2) and process_vm_writev(2)

unlinkat.2
Michael Kerrisk [Eric Blake]
PROTOTYPE: Correct header file
Michael Kerrisk
PROTOTYPE: Add <fcntl.h> for AT_* constants

utimensat.2
Michael Kerrisk
PROTOTYPE: Add <fcntl.h> for AT_* constants

copysign.3
Michael Kerrisk [Tolga Dalman]
DESCRIPTION: Add a couple of examples

malloc.3
Michael Kerrisk
NOTES: Add a short discussion of arenas
Michael Kerrisk
Replace discussion of MALLOC_CHECK_ with pointer to mallopt(3)
Michael Kerrisk
SEE ALSO: Add mtrace(3)
SEE ALSO: add malloc_get_state(3)

posix_memalign.3
  Michael Kerrisk
    Rename memalign() argument
      Rename "boundary" to "alignment" for consistency
       with posix_memalign().
  Michael Kerrisk
    Improve discussion of feature test macros and header files for valloc(3)

rtnetlink.3
  Kirill Brilliantov [Sergei Zhirikov]
    Fix example code, rta_len assignment should use RTA_LENGTH()
      See also http://bugs.debian.org/655088

scandir.3
  Mark R Bannister
    SEE ALSO: Add scandirat(3)

sigqueue.3
  Nix
    Remove rt_sigqueueinfo from TH line
      rt_sigqueueinfo() now has its own manual page, so should not
      be listed in the .TH line of this page.

tzset.3
  Peter Schiffer
    Correct description for Julian 'n' date format
      The Julian 'n' date format counts starting from 0, not 1.
  Michael Kerrisk
    Add some clarifying remarks to discussion of Julian day formats

packet.7
  Michael Kerrisk [Iain Fraser]
    Fix comment on 'sll_hatype' field

tcp.7
  Michael Kerrisk [Artyom Pervukhin]
    Correct RFC for TIME_WAIT assassination
 hazards

========== Changes in man-pages-3.39 ==========

Released: 2012-04-17, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhijith Das <adas@redhat.com>
Alexander Kruppa <akruppa@gmail.com>
Andreas Jaeger <aj@suse.com>
Armin Rigo <arigo@tunes.org>
Cyrill Gorcunov <gorcunov@openvz.org>

Ricardo Catalinas
Jiménez <jimenezrick@gmail.com>
Simone Piccardi <piccardi@truelite.it>
Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
<who@connect.carleton.ca>

Apologies if I missed anyone!

New and rewritten pages
---

malloc_trim.3
  Michael Kerrisk
    New man page for malloc_trim(3)

malloc_usable_size.3
  Michael Kerrisk
    New man page for malloc_usable_size(3)

Newly documented interfaces in existing pages
---

prctl.2
  Cyrill Gorcunov
    Document PR_SET_MM (new in Linux 3.3)
  Michael Kerrisk
    Various edits and improvements to Cyrill's patch

Changes to individual pages
---

epoll_create.2
  Michael Kerrisk
    Rework discussion of 'size' argument
  Michael Kerrisk
    Add .SS for description of epoll_create1()

epoll_wait.2
  Michael Kerrisk [Armin Rigo]
    Another thread can add to epoll instance while epoll_wait is blocked
      See https://bugzilla.kernel.org/show_bug.cgi?id=43072
   Michael Kerrisk
    Clarify that epoll_pwait() blocks calling *thread*
    A few wording improvements

fchmodat.2
  Michael Kerrisk [Mike Frysinger]
    Note difference between glibc wrapper and underlying system call
      The wrapper function has a 'flags' argument (which currently
      serves no purpose), while the underlying system call does not.

fcntl.2
  Abhijith Das
    Explain behaviour of F_GETLEASE during lease break
  Michael Kerrisk [Eric Blake]
    Change type of arg from "long" to "int"
      Various fcntl(2) commands require an integral 'arg'.
      The man page said it must be "long" in all such cases.
      However, for the cases covered by POSIX, there is an
      explicit requirement that these arguments be "int".
      Update the man page to reflect. Probably, all of the
      other "long" cases (not specified in POSIX) should

 be "int", and this patch makes them so. Based on a
      note fromEric Blake, relating to F_DUPFD_CLOEXEC.

gettimeofday.2
  Michael Kerrisk
    Reorganize content

The main change is to move the historical information about
the 'tz_dsttime' to NOTES.
Michael Kerrisk [Felix]
Note that compiler issues warnings if 'tv' is NULL

mmap.2
Michael Kerrisk [Kevin O'Gorman]
Clarify that this system call should not be invoked directly
See https://bugzilla.kernel.org/show_bug.cgi?id=42892
Michael Kerrisk
Clarify NOTES discussion of mmap() versus mmap2()

poll.2
Michael Kerrisk [Michael Welsh Duggan]
Document negative value in 'fd' field
Michael Kerrisk
Document semantics of passing zero in 'events' field

ptrace.2
Denys Vlasenko
Various fixes
For some reason, the PTRACE_TRACEME paragraph talks about some
general aspects of ptraced process behavior. It repeats
the
"tracee stops on every signal" information even though that was
already explained just a few paragraphs before. Then it describes
legacy SIGTRAP on execve().

This patch deletes the first part, and moves the second part up,
into the general ptrace description. It also adds
"If PTRACE_O_TRACEEXEC option is not in effect" to the description
of the legacy SIGTRAP on execve().

The patch also amends the part which says "For requests other
than PTRACE_KILL, the tracee must be stopped." - PTRACE_ATTACH
also doesn't require that.

sigaction.2
Michael Kerrisk [Andreas Jaeger,]
Clarify that the use of SI_SIGIO is for Linux 2.2 only
See also http://sourceware.org/bugzilla/show_bug.cgi?id=6745

sigprocmask.2
Mike Frysinger
ERRORS: add EFAULT

times.2
Michael Kerrisk [Simone Piccardi]

ERRORS: Add EFAULT

div.3
Michael
Kerrisk [Reuben Thomas]
CONFORMING TO: Add C99

fread.3
Regid Ichira
Clarify further that return value is number of items, not bytes
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=665780

getaddrinfo.3
Michael Kerrisk [Jak]
Correct type of ai_addrlen field

malloc.3
Michael Kerrisk
SEE ALSO: add malloc_usable_size(3)
SEE ALSO: Add malloc_trim(3)

mallopt.3
Michael Kerrisk
Fix text describing M_PERTURB and free()
SEE ALSO: Add malloc_trim(3)

memchr.3
Michael Kerrisk [Reuben Thomas]
Remove mention of terminating null in description of rawmemchr()

perror.3
Michael Kerrisk [Jesus Otero]
Note that use of 'sys_errlist' is deprecated

rcmd.3
Michael Kerrisk
glibc eventually added a declaration of iruserok() in version 2.12

sysconf.3
Michael Kerrisk [Ricardo Catalinas Jiménez]
Add mention of _SC_SYMLOOP_MAX

nologin.5
Michael Kerrisk [Tetsuo
Handa]
nologin must not only exist, but *be readable* to be effective

nsswitch.conf.5

Mark R Bannister
Significant rewrites and improvements
This patch applies to nsswitch.conf.5 in man-pages-3.36.

My changes almost completely rewrite large sections of the
man page. They are needed to add clarity, correct grammar,
reduce confusion, and bring up-to-date with the latest glibc.
I have checked the man page against the nss source code in
glibc 2.14.90.

Historical notes are demoted to the footer.

The rewrite makes the man page much clearer to
understand, more authoratitive, and easier to read.
Michael Kerrisk
Light edits to Mark Bannister's changes

capabilities.7
Michael Kerrisk
Add prctl(PR_SET_MM) to CAP_SYS_RESOURCE

epoll.7
Michael Kerrisk
Some minor clarifications at start of DESCRIPTION

netlink.7
Jeff Mahoney
[Petr Gajdos]
Note cases where nonprivileged users can use netlink multicast groups
See also https://bugzilla.novell.com/show_bug.cgi?id=754611

unix.7
Michael Kerrisk [Tetsuo Handa]
Add a detail on autobind feature

ld.so.8
Jonathan Nieder [Reuben Thomas]
Document effect of hwcaps on search path
Wording by Aurelien Jarno from Debian glibc's r4701 (2011-06-04).

Addresses http://bugs.debian.org/622385

========== Changes in man-pages-3.40 ==========

Released: 2012-04-27, Christchurch

Simon Paillard <spaillard@debian.org>
Stefan Puiu <stefan.puiu@gmail.com>
Ulrich Drepper <drepper@gmail.com>
Vadim Mikhailov <vadim.mikhailov@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

process_vm_readv.2
  Mike Frysinger, Christopher Yeoh, Michael Kerrisk
    New page for process_vm_readv(2) and process_vm_writev(2)

mcheck.3
  Michael Kerrisk
    New man page for mcheck(3) and related functions
      Also describes mcheck_check_all(3), mcheck_pedantic(3),
      and mprobe(3)

Newly documented interfaces in existing pages
---

rcmd.3
   Michael Kerrisk
      Document "_af" variants of these functions
         Document rcmd_af(), rresvport_af(), iruserok_af(), ruserok_af().
         Also some restructuring and other clarifications.

rexec.3
   Michael Kerrisk
      Document rexec_af()

New and changed links
----

iruserok_af.3
rcmd_af.3
rresvport_af.3
ruserok_af.3
   Michael Kerrisk
      New links to rcmd.3

rexec_af.3
   Michael Kerrisk
      New link to rexec.3

Changes to individual pages
----

clock_getres.2
   Michael Kerrisk
      Clarify difference between CLOCK_MONOTONIC and CLOCK_MONOTONIC_RAW
         Note interactions of these two clocks with discontinuous
         adjustments to the system time and NTP/adjtime(2).

fallocate.2
   Michael Kerrisk [John Sullivan]
      Fix description of ENOSYS and EOPNOTSUP errors
         As reported in https://bugzilla.redhat.com/show_bug.cgi?id=680214

fchmodat.2
   Michael Kerrisk [Mike Frysinger]
      Improve discussion of difference between wrapper and underlying syscall

gettimeofday.2
   Michael Kerrisk
      gettimeofday() is affected by discontinuous jumps in the system time

Advise reader to use clock_gettime(2), if they need a
monotonically increasing time source.
Michael Kerrisk
SEE ALSO: Add clock_gettime(2)

prctl.2
Michael Kerrisk
Add PR_TASK_PERF_EVENTS_DISABLE and PR_TASK_PERF_EVENTS_ENABLE
Add some basic documentation of these operations, with a pointer to
tools/perf/design.txt for more information.
Michael Kerrisk [Marcel Holtmann]
Amend details of PR_SET_PDEATHSIG

ptrace.2
Michael Kerrisk [Mike Frysinger]
Note SPARC deviation with respect to get/set regs
SPARC reverses the use of 'addr' and 'data' for
PTRACE_GETREGS, PTRACE_GETFPREGS, PTRACE_SETREGS,
and PTRACE_SETFPREGS.

send.2

Stefan Puiu
Document EACCES error case for UDP

sigaction.2
Michael Kerrisk
Remove mention of raise(3) for SI_USER
For a long time now, glibc's raise(3) didn't yield SI_USER
for the signal receiver, so remove mention of raise(3)
here. The user can deduce the details, if needed, by looking
at the recently updated raise(3) page.

aio_cancel.3
Michael Kerrisk [Jon Grant]
Rewrite RETURN VALUE section to be clearer

aio_init.3
Michael Kerrisk [Jon Grant]
Remove extraneous "POSIX" from NAME section

btree.3
dbopen.3
hash.3
mpool.3
recno.3
Michael Kerrisk [Brian M. Carlson]
Note that glibc no longer provides these interfaces

glibc stopped providing these interfaces with v2.2.
Nowadays, the user that finds these pages probably wants
the libdb API, so note this in the page.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=337581

fopen.3
  Michael Kerrisk
    BUGS: Note limitation on number of flag characters parsed in 'mode'
  Michael Kerrisk
    Note that 'c' and 'e' flags are ignored for fdopen()
      Determined from reading libio/iofdopen.c.
  Michael Kerrisk
    Document ",ccs=string" feature of 'mode' for fopen()/freopen()

getgrnam.3
  Michael Kerrisk [Ulrich Drepper]
    Fix discussion of _SC_GETGR_R_SIZE_MAX
      The value is not meant to be a maximum (as was specified in
      SUSv3) but an initial guess at the required size
      (as specified in SUSv4).

getpwnam.3
  Michael Kerrisk [Ulrich Drepper]
    Fix discussion of _SC_GETPW_R_SIZE_MAX
      The value is not meant to be a maximum (as was specified in
      SUSv3) but an initial guess at the required size
      (as specified in SUSv4).

malloc.3
mallopt.3
mtrace.3
  Michael Kerrisk
    SEE ALSO: add mcheck(3)

memchr.3
  Michael Kerrisk
    Clarify description, omitting
 mention of "strings" and "characters"
      The existing text slipped into talking about characters and
      strings, which could mislead readers into thing that, for
      example, searches for the byte '\0' are treated specially.
      Therefore, rewrite in terms of "bytes" and "memory areas".

      At the same time, make a few source file clean-ups.

mkstemp.3
  Michael Kerrisk

Add "mkstemps" and "mkostemps" to NAME line

posix_openpt.3
  Michael Kerrisk [Vadim Mikhailov]
    Add some details on use of the slave pathname
      An explicit pointer to ptsname(3) is useful, as is a note
      of the fact that the slave device pathname exists only as
      long as the master device is held open.

raise.3
  Michael Kerrisk
    Add some notes on underlying system call that is used

rcmd.3
  Michael Kerrisk
    Add some details of the rresvport() 'port' argument

resolver.3
  Petr Baudis
    Note that
 many options are documented in resolv.conf(5)

scandir.3
  Michael Kerrisk [Daniel J Blueman]
    Improve EXAMPLE source code: s/0/NULL/ in scandir() call

strchr.3
  James Hunt
    Explain behavior when searching for '\0'

strerror.3
  Eric Blake [Stefan Puiu]
    Improve strerror_r() description
      POSIX requires that perror() not modify the static storage
      returned by strerror(). POSIX 2008 and C99 both require that
      strerror() never return NULL (a strerror() that always
      returns "" for all inputs is valid for C99, but not for POSIX).

      http://sourceware.org/bugzilla/show_bug.cgi?id=12204
      documents glibc's change to come into compliance with POSIX
      regarding strerror_r() return value. The GNU strerror_r() use
      of 'buf' was confusing - I ended up writing a test program that
      proves that 'buf' is unused for valid 'errnum', but contains
      truncated "unknown
 message" for out-of-range 'errnum'.

      See also http://austingroupbugs.net/view.php?id=382
  Bernhard Walle

Correct description of error return for XSI strerror_r()
Michael Kerrisk [Eric Blake]
Note how to use 'errno' to detect errors when calling strerror()
Michael Kerrisk [Jon Grant]
Add an example of the kind of string returned by strerror()

resolv.conf.5
Petr Baudis
Document "single-request" option

inotify.7
Michael Kerrisk
Note buffer size that guarantees being able to read at least one event
James Hunt
Correct description of size of inotify_event structure

iso_8859-1.7
Eugen Dedu
Add "-" for SOFT HYPHEN
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=156154

netdevice.7
Brian F. G. Bidulock
Document some SIOC configuration ioctls
This patch adds common but missing SIOC configuration ioctls to
the netdevice.7 manual pages that are
not documented anywhere
else. SIOCSIFPFLAGS and SIOCGIFPFLAGS are linux-specific. Flag
values come from Linux 2.6.25 kernel headers for sockios. The
others are standard BSD ioctls that have always been implemented
by Linux and were verified from inspecting netdevice.c kernel
code.

socket.7
Michael Kerrisk [Alexey Toptygin]
Correct description of SO_BROADCAST

tcp.7
lepton
Correct description for TCP_MAXSEG on modern kernel

========== Changes in man-pages-3.41 ==========

Released: 2012-05-11, Christchurch

Apologies if I missed anyone!

New and rewritten pages
---

get_robust_list.2
  Ivana Varekova [Michael Kerrisk]
     New page documenting get_robust_list(2) and set_robust_list(2)

mallinfo.3
  Michael Kerrisk [KOSAKI Motohiro, Paul Pluzhnikov]
     New page for mallinfo(3)

malloc_info.3
  Michael Kerrisk [Jakub Jelinek]
     New page for malloc_info(3)

malloc_stats.3
  Michael Kerrisk [KOSAKI Motohiro]
     New man page for malloc_stats(3)

Newly documented interfaces in existing pages
---

madvise.2
  Jason Baron
     Document MADV_DONTDUMP and MADV_DODUMP

New and changed links
---

set_robust_list.2
  Michael Kerrisk
     New link to new get_robust_list.2 page

LIST_ENTRY.3
LIST_HEAD.3
LIST_INIT.3
LIST_INSERT_AFTER.3
LIST_INSERT_HEAD.3
LIST_REMOVE.3
TAILQ_ENTRY.3
TAILQ_HEAD.3
TAILQ_INIT.3
TAILQ_INSERT_AFTER.3
TAILQ_INSERT_HEAD.3
TAILQ_INSERT_TAIL.3
TAILQ_REMOVE.3
CIRCLEQ_ENTRY.3
CIRCLEQ_HEAD.3

CIRCLEQ_INIT.3
CIRCLEQ_INSERT_AFTER.3
CIRCLEQ_INSERT_BEFORE.3
CIRCLEQ_INSERT_HEAD.3
CIRCLEQ_INSERT_TAIL.3
CIRCLEQ_REMOVE.3
  Michael Kerrisk
    New link to queue.3
      The queue(3) page documents these macros, so it makes sense to
      have links for the names.

DES_FAILED.3
  Michael Kerrisk
    New link to des_crypt.3
      The des_crypt(3) page documents this macro, so it makes sense
      to have a link for the name.

qsort_r.3
  Michael Kerrisk
    New link to qsort.3
      Overlooked to add this link in 3.38, when documentation of
      qsort_r() was added to the qsort.3 page.

Global changes
---

strcat.3
strcmp.3
strcpy.3
strdup.3
strftime.3
strlen.3
strnlen.3
strpbrk.3
strspn.3
strtok.3
strxfrm.3
  Michael Kerrisk [Andries E. Brouwer]
    Clarify that these functions operate on bytes, not (wide) characters
      Change 'character(s)' to 'byte(s)' to make clear that these
      functions operate on bytes, not wide / UTF8 characters.
      (POSIX uses 'byte(s)' similarly, to make this point.)

icmp.7
ipv6.7
packet.7
raw.7
rtnetlink.7
unix.7
x25.7
  Michael Kerrisk
    Remove names of constants from NAME line
      Some of the sockets/network protocol pages included names of
      the corresponding address family constants in the NAME line,
      but this wasn't done consistently across all pages, and probably
      it adds little value in those pages that did do this. So, remove
      these constants from those pages that have
 them in the NAME
      section.

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk [Josh Triplett]
    Expand description of CLOCK_REALTIME
      Make it clear that this clock may be discontinuous, and is
      affected my incremental NTP and clock-adjtime(2) adjustments.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=540872

epoll_wait.2
  Michael Kerrisk
    Clarify that 'timeout' is a *minimum* interval
      Make it clear that 'timeout' is a minimum interval; the actual
      interval will be rounded up to the system clock granularity,
      and may overrun because of kernel scheduling delays.

execve.2
  Michael Kerrisk
    Rewording to deemphasize libc5 details

fork.2
  Mike Frysinger
    ERRORS: add ENOSYS
      Can occur on, for example, non-MMU hardware.

getcpu.2
  Mike Frysinger
    Add RETURN VALUE and ERRORS sections
  Michael Kerrisk
     Refer reader to NOTES for more info about 'tcache'
  Michael Kerrisk
    DESCRIPTION: reword a sentence to be clearer

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Michael Kerrisk
    Rewrite to focus on system call API
      Rewrite to focus on the system call interface, adding
      some notes on the libaio wrapper differences.
      See the following mail:
      2012-05-07 "aio manuals", linux-man@vger
      http://thread.gmane.org/gmane.linux.man/1935/focus=2910

      Other minor rewrites.

mount.2
  Michael Kerrisk
    Comment out an old Linux libc detail

open.2
  Nick Piggin [KOSAKI Motohiro, Jan Kara, Hugh Dickins]
    Describe race of direct I/O and fork()

Rework 04cd7f64, which didn't capture the details correctly.
See the April/May 2012 linux-man@ mail thread "[PATCH]
Describe race of direct read and fork for unaligned buffers"
http://thread.gmane.org/gmane.linux.kernel.mm/77571

poll.2
Michael Kerrisk
Clarify that 'timeout' is a *minimum* interval
Make it clear that 'timeout' is a minimum interval; the actual
interval will be rounded up to the system clock granularity,
and may overrun because of kernel scheduling delays.
Michael Kerrisk
Clarify discussion of wrapper function emulation
Clarify that glibc (as well as old libc) provides emulation
using select(2) on older kernels that don't have a poll()
system call.
Michael Kerrisk
Make the meaning of a zero timeout explicit
Clarify that timeout==0 causes an immediate return, even if
no file descriptors are ready.

pread.2
Michael Kerrisk [Kasper Dupont]
BUGS: Note O_APPEND + pwrite() does the wrong thing
See https://bugzilla.kernel.org/show_bug.cgi?id=43178

recvmmsg.2
Michael Kerrisk
Clarify that 'timeout'
is a *minimum* interval
Make it clear that 'timeout' interval will be rounded up to the
system clock granularity, and may overrun because of kernel
scheduling delays.

select.2
Michael Kerrisk
Clarify that 'timeout' is a *minimum* interval
Make it clear that 'timeout' is a minimum interval; the actual
interval will be rounded up to the system clock granularity,
and may overrun because of kernel scheduling delays.
Michael Kerrisk
Expand description of the self-pipe trick
Michael Kerrisk
Add further details on pselect6() system call that underlies pselect()

semop.2
Michael Kerrisk
Clarify that 'timeout' of semtimedop() is a *minimum* interval

Make it clear that 'timeout' interval will be rounded up to the
system clock granularity, and may overrun because of kernel
scheduling delays.

signal.2
Michael Kerrisk
Note that 'sig_t'
requires _BSD_SOURCE
Also remove some old Linux libc details

sigwaitinfo.2
Michael Kerrisk
Clarify that 'timeout' of sigtimedwait() is a *minimum* interval
Make it clear that 'timeout' is a minimum interval; the actual
interval will be rounded up to the system clock granularity,
and may overrun because of kernel scheduling delays.

stat.2
Bjarni Ingi Gislason
Formatting fixes
From "groff -ww" (or "man --warnings=w ..."):

warning: around line 442: table wider than line width

GNU man uses line length of 78.

Use text blocks. Two spaces between sentences or better: start
each sentence in a new line.

syscalls.2
Bjarni Ingi Gislason
Formatting fixes
From "groff -ww ..." (or "man --warnings=w ..."):

warning: around line 157: table wider than line width

Have to use text blocks. Move some text
to its correct column.
Split text to two columns to avoid hyphenation.

sysinfo.2
Michael Kerrisk
Remove reference to obsolete libc5

syslog.2
Michael Kerrisk
Remove some details about obsolete Linux libc

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
  Michael Kerrisk
    ERRORS: Add/update ENOSYS error

aio_cancel.3
  Michael Kerrisk
    Clarify what happens when a request isn't successfully canceled
  Michael Kerrisk
    Add pointers to aio(7) and sigevent(7)

dbopen.3
  Michael Kerrisk
    SYNOPSIS: Add header file <fcntl.h>
      Upstreamed from Debian, and consistent with FreeBSD
      dbopen(3) man page.

fmemopen.3
  Michael Kerrisk
    Note details of POSIX.1-2008 specification of 'b' in 'mode'
  Michael Kerrisk [Rich Felker]
    BUGS: fmemopen() doesn't correctly set file position in some cases
      If 'mode' is append, but 'size' does not cover
 a null byte
      in 'buf', then fmemopen() incorrectly sets the initial file
      position to -1, rather than the next byte after the end of
      the buffer.

      See http://sourceware.org/bugzilla/show_bug.cgi?id=13151
  Michael Kerrisk
    BUGS: fmemopen() incorrectly handles size==0 case
      If size is zero, fmemopen() fails, This is surprising behavior,
      and not specified in POSIX.1-2008.

      See http://sourceware.org/bugzilla/show_bug.cgi?id=11216

      Reported-by; Alex Shinn <alexshinn@gmail.com>
  Michael Kerrisk
    BUGS: Note silent ABI change for fmemopen() in glibc 2.9
  Michael Kerrisk [Rich Felker]
    BUGS: Append mode does not force writes to append
      Append mode correctly sets the initial offset but does
      not force subsequent writes to append at end of stream.

See http://sourceware.org/bugzilla/show_bug.cgi?id=13152
Michael Kerrisk [Eric Blake]

BUGS: Note inconsistent treatment of 'b' in 'mode'
fopen() permits, for example, both "w+b" and "wb+",
but only the latter is meaningful to fmemopen().

See http://sourceware.org/bugzilla/show_bug.cgi?id=12836

fopencookie.3
Michael Kerrisk [Petr Baudis]
Correct description of return for user-supplied 'write' function
See http://sourceware.org/bugzilla/show_bug.cgi?id=2074

getaddrinfo.3
Jean-Michel Vourgère
Note that AI_ADDRCONFIG is not affected by loopback addresses
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=660479

iconv.3
Michael Kerrisk
Upstream useful NOTE from Debian
Warn the reader that the pointer arguments can't be
interpreted as C style strings. Also, note possible
alignment requirements for the referenced bytes sequences,
Michael Kerrisk
Write a better paragraph introducing iconv() and its arguments

isgreater.3

Michael Kerrisk [Vincent Lefevre]
Clarify that the arguments to these macros must be real-floating
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=609033

lio_listio.3
Michael Kerrisk
Clarify that async notification occurs when *all* I/Os complete

makedev.3
Michael Kerrisk
SYNOPSIS: Correct return types of major() and minor()
See https://bugzilla.redhat.com/show_bug.cgi?id=754188

Reported-by; Zdenek Kabelac <zkabelac@redhat.com>

malloc.3
Michael Kerrisk

SEE ALSO: Add malloc_info(3)

malloc_get_state.3
Michael Kerrisk
Fix wordos in function names in NAME line

mallopt.3
Michael Kerrisk
Fix example program
The example code was a version that was not consistent with
the shell output shown on the page.

Reported-bY: Simon Paillard <spaillard@debian.org>
Michael Kerrisk
Restore accidentally omitted line in shell session
Michael
Kerrisk
SEE ALSO: Add malloc_stats(3)

mmap64.3
Michael Kerrisk
Change target of link to mmap.2 (was mmap2.2)
Upstreamed from Red Hat / Fedora

realpath.3
Michael Kerrisk [Casper Dik]
Remove note about Solaris possibly returning a relative path

syslog.3
Michael Kerrisk [Ralph Corderoy]
Document behavior when 'ident' argument to openlog() is NULL
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/382096
Michael Kerrisk
Update CONFORMING TO for POSIX.1-2008
POSIX.1-2008 doesn't change any details, but make
that more explicit.

undocumented.3
Michael Kerrisk
Remove some functions that have been documented

sd.4
Michael Kerrisk
Remove reference to nonexistent scsi(4) page
Upstreamed from RedHat / Fedora

sk98lin.4
Michael Kerrisk [Stephen Hemminger]

Note that this driver was removed in 2.6.28
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/528020

passwd.5
Michael Kerrisk
Upstream pieces from Red Hat/Fedora
Note mention of empty password field.
Add description of "*NP*" in password field.
Michael Kerrisk
Various minor fixes and improvements

proc.5
Michael Kerrisk
Note that CAP_SYS_ADMIN processes can override file-max
Upstreamed from red Hat / Fedora
Michael Kerrisk
Document /proc/[pid]/cgroup
Upstreamed from Red Hat / Fedora

resolv.conf.5
Michael Kerrisk
Take a Debian improvement into upstream

tzfile.5
Michael Kerrisk
Mention timezone directories in DESCRIPTION
Note that timezone files are usually in /usr/lib/zoneinfo
or /usr/share/zoneinfo.
Michael Kerrisk
Drop SYNOPSIS
The SYNOPSIS doesn't correspond to a user-visible file.
Michael Kerrisk
SEE ALSO: Add pointer to glibc source file timezone/tzfile.h
Michael Kerrisk
SEE ALSO: add tzset(3) and tzselect(8)

ascii.7
Bjarni Ingi Gislason
Indent for "troff" makes table too wide
Fix following from "groff -t -ww ...":

warning: around line 53: table wider than line width

Extra indent for "troff" makes the table look misplaced
(default "ps" output).

cp1251.7
Bjarni Ingi Gislason

table too wide
From "nroff -ww -t ...":

warning: around line 44: table wider than line width

Columns are made narrower (column gutter decreased).

ipv6.7
Stefan Puiu
Add ENODEV error for bind() to link-local IPv6 address

signal.7
Michael Kerrisk [Simone Piccardi]
Clarify that SIGLOST is unused
Michael Kerrisk
Comment out crufty BUGS text on SIGLOST
It must be a very long time since the statement there
about SIGLOST was true. (The text seems to date back to
1996.)
Michael Kerrisk
Update architectures for tables of signal numbers

utf-8.7
Brian M. Carlson
Two clarifications
This patch clarifies that 0xc0 and 0xc1 are not valid in any UTF-8
encoding[0], and it also references RFC 3629 instead of RFC 2279.

[0] In order to have 0xc0, you'd have to have a two-byte encoding
with all the data bits zero in the first byte (and thus only six
bits of data), which would be an ASCII character encoded in the
non-shortest form. Similarly with 0xc1.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=538641

ldconfig.8
nscd.8
Michael Kerrisk
Remove path prefix from NAME line
Command names shown in NAME are normally just the basename,
not the full pathname of the command.

========== Changes in man-pages-3.42 ==========

Released: 2012-08-14, Konolfingen

  <socketpair@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages
  Sami Kerola
    Global fix: use UR macro where applicable
      The syntax .UR http://example.com paired with .UE will create
      links which one can interact, if the pager allows that. One

way to see the effect is ask the man(1) command to use browser
display, e.g.:

man -H man7/uri.7

("\:" is optional groff syntax to permit hyphenless line breaks.)

Changes to individual pages
---

ldd.1
Michael Kerrisk
Add security note on untrusted executables
See also http://www.catonmat.net/blog/ldd-arbitrary-code-execution/
and
http://tldp.org/HOWTO/Program-Library-HOWTO/shared-libraries.html

clone.2
Michael Kerrisk
Rewrite discussion of sys_clone

futex.2

Consolidate error descriptions to ERRORS
Michael Kerrisk
Various wording fix-ups
Michael Kerrisk
Fix description of EINVAL error
The current text seems incorrect. Replace with a more general
description.

getdents.2
select_tut.2
atof.3
atoi.3
pthread_create.3
pthread_sigmask.3
rtime.3
setbuf.3
tsearch.3
netlink.7
Michael Kerrisk [Jan Engelhardt]
Remove unneeded casts

get_robust_list.2
get_thread_area.2
getcpu.2

getdents.2
gettid.2
io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
ioprio_set.2
kexec_load.2
llseek.2
modify_ldt.2
mq_getsetattr.2
pivot_root.2
readdir.2
rt_sigqueueinfo.2
set_thread_area.2
sgetmask.2
spu_create.2
spu_run.2
subpage_prot.2
sysctl.2
tkill.2
  Michael Kerrisk
    Add note to SYNOPSIS that there is no glibc wrapper for system call
      Reduce the chance that the reader
 may be misled into thinking
      that there is a wrapper function for this system call by noting
      explicitly in the SYNOPSIS that there is no glibc wrapper and
      pointing the reader to NOTES for further details.

ioprio_set.2
  Colin McCabe
    Clarify the multithreaded behavior of ioprio_set(2)
  Michael Kerrisk [, Kalle Olavi Niemitalo]
    Document who==0 for IOPRIO_WHO_PROCESS and IOPRIO_WHO_PGRP
      For IOPRIO_WHO_PROCESS, who==0 means operate on the caller.
      For IOPRIO_WHO_PGRP, who==0 means operate on the caller's
      process group.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=652443

migrate_pages.2
  Michael Kerrisk [Christoph Lameter, JoonSoo Kim]
    Fix description of return value

mount.2
  Michael Kerrisk
    For MS_REMOUNT, source is ignored

mprotect.2
  Michael Kerrisk [Rasmus Villemoes]
    'addr' argument is not const
      As reported by Rasmus:

        Both my system's man-pages (3.22) and the latest online
        (3.41) show:

          int mprotect(const void *addr, size_t len, int prot);

        as the prototype for mprotect(2). However, POSIX [1] and the
        actual sys/mman.h (on all the systems I checked) do not have
        the const qualifier on the first argument.

msgctl.2
semctl.2
shmctl.2
svipc.7
  Michael Kerrisk
    Don't mention that ipc_perm is defined in <sys/ipc.h>
      There's no need to mention that the 'ipc_perm' structure
      is defined in <sys/ipc.h>. That's an implementation detail,
      and furthermore <sys/ipc.h> is itself included by the other
      System V IPC header files. The current text might lead the
      reader to conclude that they must include <sys/ipc.h>, which
      is not the case (it is required neither on Linux, nor by the
      standards).

msgctl.2
msgget.2
msgop.2
semctl.2
semget.2
semop.2
shmctl.2
shmget.2
   Michael Kerrisk
    NOTES: <sys/types.h> and <sys/ipc.h> aren't strictly needed
      Add text to NOTES to say that the <sys/types.h> and <sys/ipc.h>
      header files aren't required by Linux or the standards, but may
      be needed for portability to old systems.

ptrace.2
  Denys Vlasenko
    Explain WNOHANG behavior and EINTR bug
      I didn't like the "SIGKILL operates similarly, with exceptions"
      phrase (if it's different, then it's not "similar", right?),

and now I got around to changing it. Now it says simply:
"SIGKILL does not generate signal-delivery-stop and therefore
the tracer can't suppress it."

Replaced "why WNOHANG is not reliable" example with a more
realistic one (the one which actually inspired to add this
information to man page in the first place): we got
ESRCH - process is gone! - but waitpid(WNOHANG)
can still
confusingly return 0 "no processes to wait for".

Replaced "This means that unneeded trailing arguments may
be omitted" part with a much better recommendation
to never do that and to supply zero arguments instead.
(The part about "undocumentedness" of gcc behavior was bogus,
btw - deleted).

Expanded BUGS section with the explanation and an example
of visible strace behavior on the buggy syscalls which
exit with EINTR on ptrace attach. I hope this will lead
to people submitting better bug reports to lkml about
such syscalls.

seteuid.2
Michael Kerrisk
Note glibc version where setegid() implementation changed
In glibc 2.2/2.3, setegid() switched from setregid() to setresgid().

set_tid_address.2
Michael Kerrisk
Rename 'ctid' argument for consistency with clone(2) page
Michael Kerrisk
Some
rewordings and minor clarifications

sigwaitinfo.2
Michael Kerrisk [Daniel Zingaro]
Some wording clarifications
Mainly rewording things like "is delivered" to "becomes pending",
which is more accurate terminology.

syscall.2
Michael Kerrisk
Add some more details to the description of syscall(2)
And add another example of using syscall() to the program example.

syscalls.2
Michael Kerrisk

Add kcmp(2)
Michael Kerrisk
Move discussion of set_zone_reclaim(2) out of main table
This system call was never visible to user space, so it makes
sense to move it out of the main table of system calls into
the notes below the table.

getifaddrs.3
Michael Kerrisk [Adrian Dabrowski]
Note that ifa_addr and ifa_netmask can be NULL

readdir.3
Michael Kerrisk [Jan Engelhardt]
Handle -1 error from pathconf() in example code snippet
Improve the example
demonstrating allocation of a buffer
for readdir_r() to handle -1 error return from pathconf().
Otherwise, naive readers may think that pathconf() return
value can be used without checking.

realpath.3
Shawn Landden
Use past tense with ancient history (libc4, libc5)

regex.3
Michael Kerrisk
Correct SEE ALSO reference to glibc manual "regex" section

rtime.3
Michael Kerrisk [Jan Engelhardt]
Fix broken pointer cast in example code

sem_close.3
sem_destroy.3
sem_getvalue.3
sem_init.3
sem_open.3
sem_post.3
sem_unlink.3
sem_wait.3
sem_overview.7
Michael Kerrisk
Note that "cc -pthread" is required; "-lrt" no longer works
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/874418

sigwait.3
Michael Kerrisk
Reword "is delivered" to "becomes pending"

strcat.3
  Michael Kerrisk
    Add some text to emphasize the dangers of buffer overruns
  Michael Kerrisk
    NOTES:
 Add discussion of strlcat()

strcpy.3
  Michael Kerrisk
    Note that info is lost when strncpy() doesn't null terminate
  Michael Kerrisk
    Add some text to emphasize possibility of buffer runs with strcpy()
  Michael Kerrisk
    NOTES: Add a discussion of strlcpy()
      Inspired by https://lwn.net/Articles/506530/
  Michael Kerrisk
    Fix description of the null-byte padding performed by strncpy()

tsearch.3
  Michael Kerrisk
    NOTES: remove redundant discussion of unorthodox use of term "postorder"
      This point is already covered at greater length in the main
      text of the page (See the piece "More commonly, ...").
  Michael Kerrisk
    Clarify use for first argument to the twalk() 'action' function
      There's a number of details in POSIX that are omitted in
      the current version of this page.
  Michael Kerrisk
    Some wording fixes

core.5
  Michael Kerrisk
    Note effect of madvise(2)
 MADV_DONTDUMP flag

capabilities.7
  Michael Kerrisk
    Document CAP_BLOCK_SUSPEND

glob.7
  Bjarni Ingi Gislason
    Change 8 bit characters to 7 bit representation
      Fixes rendering errors for accented 'a' characters.
  Michael Kerrisk [Aaron Peschel]
    Update bash(1) command used to obtain classical globbing behavior
      The man page formerly noted the bash(1) v1 command to do this.

iso_8859-1.7
  Bjarni Ingi Gislason
    Explanation of SOFT HYPHEN and the code for it
      <groff: iso_8859-2.7>:89: warning: can't find special character `shc'

      This is the only "iso_8859-*.7" file that has this (now)
      undefined character. The code in column four in "iso_8859-1.7" is
      "0x2D" ("HYPHEN, MINUS SIGN" or "HYPHEN-MINUS") instead of "0xAD".
      See Debian bug 156154 (or package "manpages").

      There should be an explanation for this graphic character and the
      code should
 be 0xAD in iso_8859-1.7 (as in all others), even
      though "[gn]roff" does not display a "HYPHEN" in that position of
      the table.

      The line with "SOFT HYPHEN" gets a footnote and a short
      explanation.

mdoc.7
  Bjarni Ingi Gislason
    Fixing a warning and a table
      Fis warning from "groff -ww ..." (or "man --warnings=w ..."):

        <groff: mdoc.7>:294: warning:
        tab character in unquoted macro argument

      In one table the distance between columns is too small in the
      "ps" output. (Bug in the groff "doc.tmac" macro?)

mdoc.samples.7
  Bjarni Ingi Gislason
    Fix warnings from [ng]roff, corrections
      From "man -ww ..." (groff -ww ...):

        <standard input>:541: warning:
        tab character in unquoted macro argument
        [+3 similar warnings]
        <standard input>:813: warning: macro `Pu' not defined
        Usage:
 .Rv -std in sections 2 and 3 only (#1669)
        mdoc warning: A .Bl directive has no matching .El (#1821)

      String "Pu" defined as a row of punctuation characters.
      ".Bl" and ".El" fixed.
      Some arguments, that start with a period or are the name of a
      macro, protected with "\&".
      Variable name for macro ".Rv" corrected.

netdevice.7
  Bjarni Ingi Gislason
    Line in table too long
      Fix warning from "man ..." ("nroff -ww ..."):

        nroff: netdevice.7: warning: around line 98:
        table wider than line width

      Fix: No right adjustment in text blocks in tables.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673873

netlink.7
  Bjarni Ingi Gislason
    Line in table is too long
      Fix warning from "man ..." ("nroff -ww ..."):

        nroff: netlink.7: warning: around line 195:
        table wider than line width

     Horizontal line incorporated into table.
      No right adjustment of text blocks in tables.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673875
  Simon Paillard [Herbert Xu]
    Change description of "*_pid" fields to "Port ID"
      As reported by Herbert Xu, these should not be considered as PIDs.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=383296

rtnetlink.7
  Bjarni Ingi Gislason
    Line in table too long
      Fix warning from "man ..." ("nroff -ww ..."):

        nroff: rtnetlink.7: warning: around line 415:
        table wider than line width

      Column gutter reduced to fit line length.
      Right adjustment in text blocks removed in tables.
      Some header made centered in tables.
      One table put on same page.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674051

socket.7

Martin H
Document SO_MARK socket option

Commit 4a19ec5800fc3bb64e2d87c4d9fdd9e636086fe0 in Jan 2008 added
the new SO_MARK socket option.

This patch is based on text from the commit message.

See https://bugzilla.kernel.org/show_bug.cgi?id=16461.

svipc.7
Michael Kerrisk
SYNOPSIS: Remove include of <sys/types.h> and <sys/ipc.h>
Including <sys/types.h> and <sys/ipc.h> isn't needed on Linux
and isn't really relevant for the explanation on this page.

========== Changes in man-pages-3.43 ==========

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/-/\\-/ when real hyphen is required (e.g., in code)

Various pages
  David Prévot [Michael Kerrisk]
    Global fix: Various consistency
 fixes for SEE ALSO

Various pages
  Michael Kerrisk
    Global fix: use "Linux kernel source" consistently
      Rather than "kernel source".

Various pages
  Michael Kerrisk
    Global fix: disable justification and hyphenation in SEE ALSO
      For a better visual result, disable justification and hyphenation
      in SEE ALSO where page names are long.

syscalls.2
uname.2
boot.7

Michael Kerrisk
Global fix: s/OS/operating system/

Changes to individual pages
---

epoll_wait.2
Michael Kerrisk [Fredrik Arnerup]
Describe timeout limitation in kernels < 2.6.37
As reported by Fredrik (and as far as I can tell the problem
went back to 2.6.0):

The timeout argument has an upper limit. Any values above that
limit are treated the same as -1, i.e. to wait indefinitely.
The limit is given by:

#define EP_MAX_MSTIMEO min(1000ULL * MAX_SCHEDULE_TIMEOUT
/ HZ, \
(LONG_MAX - 999ULL) / HZ)

That is, the limit depends on the size of a long and the timer
frequency. Assuming the long is never smaller than 32 bits
and HZ never larger than 1000, the worst case is 35 minutes.
I think this should be mentioned under "BUGS".

Although this is likely to be fixed in the future
(http://lkml.org/lkml/2010/8/8/144), the problem exists in
at least 2.6.14 - 2.6.35. I don't know if select(2) and poll(2)
are affected.

https://bugzilla.kernel.org/show_bug.cgi?id=20762
Michael Kerrisk
Add pointer to select(2) for discussion of close in another thread

getitimer.2
Michael Kerrisk [Trevor Woerner]
Note Linux's odd handling of the new_value==NULL case
Michael Kerrisk [Trevor Woerner]
Fix types used to declare fields in timeval struct

keyctl.2
David Prévot
Reorder SEE ALSO,
without .br

poll.2
Michael Kerrisk

Add pointer to select(2) for discussion of close in another thread

select.2
Michael Kerrisk [Stephane Fillod]
Note behavior if monitored file descriptor is closed in another thread
Executive summary: a sane application can't rely on any
particular behavior if another thread closes a file descriptor
being monitored by select().

See https://bugzilla.kernel.org/show_bug.cgi?id=40852
Michael Kerrisk
Clarify equivalent pselect() code in terms of threads
s/sigprogmask/pthread_sigmask/

semop.2
Michael Kerrisk
Recast discussion of blocking behavior in terms of threads
semop() blocks the calling thread, not the process.
Michael Kerrisk
SEE ALSO: Add clone(2)
Give reader a clue about CLONE_SYSVSEM.

shutdown.2
Michael Kerrisk [Eric Dumazet]
Document EINVAL error (and associated bug)
Eric
Dumazet noted that EINVAL was not documented. Some further
digging shows that it's also not diagnosed consistently.
See https://bugzilla.kernel.org/show_bug.cgi?id=47111.

sigaction.2
Michael Kerrisk
Tweak SA_RESETHAND description

timer_settime.2
Michael Kerrisk
Small rewording around discussion of pointer arguments

wait4.2
Adrian Bunk
Note that these functions are nonstandard and recommend alternatives
Some edits to Adrian's patch by mtk.
Michael Kerrisk
CONFORMING TO: Note SUS details for wait3()

gnu_get_libc_version.3
Michael Kerrisk
Remove unneeded "#define _GNU_SOURCE" from SYNOPSIS

pthread_kill.3
pthread_sigqueue.3
  Michael Kerrisk
    Remove wording "another"
      Writing "another thread" in these pages implies that these
      functions can't be used to send a signal to the calling thread
      itself, which is of course untrue.

sigvec.3
  Michael
 Kerrisk
    Add "int" arg to sv_handler definition in sigvec structure
  Michael Kerrisk
    Fix small error in discussion of blocking of signals
      The signal that causes the handler to be invoked is blocked,
      but saying "by default" implies that this can be changed via
      the API. It cannot. (One needs sigaction(2) for that.)

syslog.3
  Simon Josefsson
    Remove (apparently bogus) text claiming LOG_AUTH is deprecated
      LOG_AUTH is in POSIX, and widely available. There
      seems to be no basis to the claim it is deprecated.

      Quoting Simon:
        I cannot find any other source that claim LOG_AUTH is
        deprecated in any way. LOG_AUTH is distinct from
        LOG_AUTHPRIV. The GNU C Library manual only documents
        LOG_AUTH. The header files contains both without any
        comment. Common systems like Debian appear to refer to
        both auth and
 authpriv facilities in syslog configurations.
        Popular daemons appear to use both facilities.
        Both facilities are discussed in several RFCs.

      See https://bugzilla.kernel.org/show_bug.cgi?id=46091

ttyname.3
  Michael Kerrisk
    SEE ALSO: Add ctermid(3)

proc.5
  Michael Kerrisk
    Clarify header file related to 'flags' field of /proc/PID/stat
  Michael Kerrisk [Frédéric Brière]
    Update description of 'starttime' field of /proc/PID/stat
      The unit of measurement changed from jiffies to clock ticks in

Linux 2.6.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=675891
Michael Kerrisk
Document /proc/sys/kernel/kptr_restrict
Michael Kerrisk [Kees Cook]
Document /proc/sys/fs/protected_symlinks
Based on text in Documentation/sysctl/fs.txt by Kees Cook
Michael Kerrisk [Kees Cook]
Document /proc/sys/fs/protected_hardlinks
Based
on text in Documentation/sysctl/fs.txt by Kees Cook

capabilities.7
Michael Kerrisk
Document interaction of CAP_SYSLOG and /proc/sys/kernel/kptr_restrict

ip.7
Michael Kerrisk
SEE ALSO: Add ipv6(7)
SEE ALSO: Add icmp(7)

man-pages.7
Michael Kerrisk
Add some advice about disabling hyphenation in SEE ALSO

ld.so.8
Michael Kerrisk
Describe interpretation of slashes in dependency strings
Michael Kerrisk
Repeat note that LD_LIBRARY_PATH is ignored in privileged programs
This point is already noted when discussing search order for
libraries, but it's worth repeating under the specific discussion
of LD_LIBRARY_PATH further down the page.
Michael Kerrisk
Add some details for LD_PRELOAD
Note that LD_PRELOAD list separator can be space or colon

========== Changes in man-pages-3.44 ==========

Released: 2012-11-07, Barcelona

Contributors

The

following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Bert Hubert <bert.hubert@netherlabs.nl>
David Prévot <taffit@debian.org>
James Youngman <jay@gnu.org>
Kees Cook <keescook@chromium.org>
Lars Wirzenius <liw@iki.fi>
Lucas De Marchi <lucas.de.marchi@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Rusty Russell <rusty@rustcorp.com.au>
Simon Paillard <spaillard@debian.org>
Thomas Habets <thomas@habets.se>

Apologies if I missed anyone!

New and rewritten pages
---

delete_module.2
  Michael Kerrisk
    Rewrite to Linux 2.6+ reality
  Michael Kerrisk
    Change license and copyright
      There is now nothing left of the original FSF-copyrighted
      page. So, change the copyright and license.
  Michael Kerrisk [Lucas De Marchi, Rusty Russell]
    Substantial reorganization after comments from Rusty Russell

      Rusty notes that O_NONBLOCK is almost always used in
      practice. Therefore, it would be better to reorganize
      the page to consider that "the default".

init_module.2
  Michael Kerrisk
    Rewrite to Linux 2.6+ reality
  Michael Kerrisk
    Change copyright and license
      Little of the original page now remains. Change
      copyright and license
  Michael Kerrisk [Rusty Russell]
    Changes after review comments from Rusty Russell
  Kees Cook
    Add various pieces describing Linux 2.6+ behavior
      Pieces take from, or inspired by, a patch sent by Kees.

getauxval.3
  Michael Kerrisk
    Document getauxval() function added in glibc 2.16

Global changes

Various pages
  Michael Kerrisk
    Global fix: Use consistent capitalization in NAME section
      The line(s) in the NAME section should only use capitals
      where English usage dictates that. Otherwise, use

    lowercase throughout.

Various pages
  Michael Kerrisk
    Global fix: "userspace" ==> "user space" or "user-space"
      Existing pages variously use "userspace or "user space".
      But, "userspace" is not quite an English word.
      So change "userspace" to "user space" or, when used
      attributively, "user-space".

Changes to individual pages
---

clock_getres.2
clock_nanosleep.2
  Michael Kerrisk
    Linking with -lrt is no longer needed from glibc 2.17 onward

create_module.2
  Michael Kerrisk
    Note that this system call is present only in kernels before 2.6
  Michael Kerrisk
    Note that ENOSYS probably indicates kernel 2.6+

execve.2
  Michael Kerrisk
    Document treatment of PR_SET_PDEATHSIG on execve()
  Michael Kerrisk
    Document treatment of SECBIT_KEEP_CAPS securebits flag on execve()

fork.2
  Michael Kerrisk
    Note treatment of default timer slack value on fork()

getdomainname.2
  Simon Paillard [Lars Wirzenius]
    Point out that these calls relate to NIS, not DNS
      See http://bugs.debian.org/295635

get_kernel_syms.2
  Michael Kerrisk
    Note that this system call is present only in kernels before 2.6

ipc.2
  Michael Kerrisk
    Update note on architectures that don't have ipc()
      Replace mention of ia64 with x86-64 and ARM.

link.2
  Michael Kerrisk
    Add EPERM error triggered by /proc/sys/fs/protected_hardlink

prctl.2
  Michael Kerrisk
    Mention Documentation/prctl/no_new_privs.txt for PR_SET_NO_NEW_PRIVS
  Kees Cook
    update seccomp sections for mode 2 (BPF)
      This adds a short summary of the arguments used
      for "mode 2" (BPF) seccomp.
  Michael Kerrisk
    Small improvements to PR_SET_SECCOMP discussion
      Note type of 'arg3' for SECCOMP_MODE_FILTER.
      Add pointer to Documentation/prctl/seccomp_filter.txt.
  Michael Kerrisk
     Note 'seccomp' semantics with respect to fork(), execve(), and prctl()
  Michael Kerrisk
    Document PR_SET_TIMERSLACK and PR_GET_TIMERSLACK
  Michael Kerrisk
    Reword PR_SET_NAME and PR_GET_NAME in terms of threads
      Plus tfix
  Kees Cook
    document PR_SET_NO_NEW_PRIVS, PR_GET_NO_NEW_PRIVS
      This adds a short description of the no_new_privs bit,
      as described in Documentation/prctl/no_new_privs.txt.

ptrace.2
  Michael Kerrisk
    Clarify that some operations are not present on all architectures
      PTRACE_GETREGS, PTRACE_SETGREFS, PTRACE_GETFPREGS,
      and PTRACE_GETSPREGS are not present on all architectures.
      PTRACE_SYSEMU and PTRACE_SYSEMU_SINGLESTEP are present only

on x86.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=122383

query_module.2
  Michael Kerrisk
    Add a few words clarifying reference to /sys/module
  Michael Kerrisk
    Note that
 this system call is present only in kernels before 2.6
  Michael Kerrisk
    Note that ENOSYS probably indicates kernel 2.6+
  Michael Kerrisk
    SEE ALSO: Add modinfo(8) and lsinfo(8)
  Michael Kerrisk
    Move some information in NOTES to VERSIONS

socketcall.2
  Michael Kerrisk
    Update note on architectures that don't have socketcall()
      Replace mention of ia64 with x86-64 and ARM.

times.2
  Thomas Habets
    Recommend clock_gettime(2) as alternative to times(2)

clock_getcpuclockid.3
  Michael Kerrisk
    Linking with -lrt is no longer needed from glibc 2.17 onward

fts.3
  Simon Paillard [James Youngman]
    Improve description of physical vs. logical tree walking
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=633505

getenv.3
  Michael Kerrisk
    SEE ALSO: add getauxval(3)

proc.5
  Michael Kerrisk
    Document /proc/meminfo
      Info mostly taken from Documentation/filesystems/proc.txt
       and Documentation/vm/hugetlbpage.txt.
  Michael Kerrisk
    Default for /proc/sys/fs/protected_{hardlinks,symlinks} is now 0
      The default setting of 1 in/proc/sys/fs/protected_hardlinks
      and /proc/sys/fs/protected_symlinks caused one too many

breakages for Linus's taste, so commit 561ec64ae67e changed
the default for both files to 0.
Note system call error yielded by /proc/sys/fs/protected_symlinks
Note that violating 'protected_symlinks' restrictions
causes system calls to fail with the error EACCES.
Michael Kerrisk
Since Linux 2.6.27, /proc/sys/kernel/modprobe depends on CONFIG_MODULES

ipv6.7
Bert Hubert
Document IPV6_RECVPKTINFO

man-pages.7
Michael Kerrisk
Note rules for capitalization in NAME section

time.7
Michael Kerrisk
Add a subsection on timer slack

ld.so.8
Michael Kerrisk
SEE ALSO: add getauxval(3)

==========
Changes in man-pages-3.45 ==========

Released: 2012-12-21, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Cyril Hrubis <chrubis@suse.cz>
David Prévot <taffit@debian.org>
Elie De Brauwer <eliedebrauwer@gmail.com>
Eric Dumazet <eric.dumazet@gmail.com>

Jan Glauber <jang@linux.vnet.ibm.com>
Jim Paris <jim@jtan.com>

Jon Grant <jg@jguk.org>
Julien Cristau <jcristau@debian.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Rens van der Heijden <rens.vanderheijden@uni-ulm.de>
Simon Paillard <spaillard@debian.org>
Thierry Vignaud <thierry.vignaud@gmail.com>
Trevor Woerner <twoerner@gmail.com>
YOSHIFUJI Hideaki <yoshfuji@linux-ipv6.org>

Apologies
if I missed anyone!

New and rewritten pages
---

s390_runtime_instr.2
  Jan Glauber
    New page for s390-specific s390_runtime_instr(2)

if_nameindex.3
  YOSHIFUJI Hideaki
    Document if_nameindex(3) and if_freenameindex(3)
  Michael Kerrisk
    Edits, improvements and corrections to Hideaki's page
  Michael Kerrisk
    Add an example program

if_nametoindex.3
  YOSHIFUJI Hideaki
    New page documenting if_nametoindex(3) and if_indextoname(3)

New and changed links
---

if_freenameindex.3
  Michael Kerrisk
    New link to if_nameindex.3

if_indextoname.3
  Michael Kerrisk
    New link to if_nametoindex.3

Global changes
---

sysconf.3
cciss.4
  Michael Kerrisk
    Global fix: s/runtime/run time/

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Since 2.6.30, CLONE_NEWIPC also supports POSIX message queues

delete_module.2
  Michael Kerrisk
     Small rewording of description of effect of O_TRUNC

getrlimit.2
  Michael Kerrisk [Trevor Woerner]
    Document Linux's nonstandard treatment or RLIMIT_CPU soft limit
      Upon encountering the RLIMIT_CPU soft limit when a SIGXCPU handler
      has been installed, Linux invokes the signal handler *and* raises
      the soft limit by one second. This behavior repeats until the
      limit is encountered. No other implementation that I tested
      (Solaris 10, FreeBSD 9.0, OpenBSD 5.0) does this, and it seems
      unlikely to be POSIX-conformant. The (Linux-specific)
      RLIMIT_RTTIME soft limit exhibits similar behavior.
  Michael Kerrisk
    Point reader at discussion of /proc/[pid]/limits in proc(5)

io_getevents.2
  Michael Kerrisk
    io_getevents() may cause segfault when called with invalid ctx_id
      For reference see: http://marc.info/?l=linux-aio&m=130089887002435&w=2

recv.2
  Michael
 Kerrisk [Eric Dumazet]
    UNIX domain sockets support MSG_TRUNC since 3.4

sendmmsg.2
  Elie De Brauwer
    Add example program for sendmmsg()

stat.2
  Simon Paillard
    Clarify description of EOVERFLOW error

The EOVERFLOW error is not only for st_size, but also
inode and block size fields. See glibc source file
sysdeps/unix/sysv/linux/xstatconv.c and kernel source
file fs/stat.c. Also, fix bit/byte confusion
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604928

syscalls.2
Michael Kerrisk
Update various references to "i386" to "x86"
Michael Kerrisk
Add s390_runtime_instr(2)

sysctl.2
Michael Kerrisk
Mention CONFIG_SYSCTL_SYSCALL
Michael Kerrisk
Calls to sysctl() log warnings to the kernel log since 2.6.24

syslog.2
Michael Kerrisk
Substantially reorganize discussion of commands
Make the layout of the discussion of the commands

more readable.
Michael Kerrisk
Add kernel symbolic 'type' names
Michael Kerrisk
Clarify SYSLOG_ACTION_SIZE_UNREAD semantics
SYSLOG_ACTION_SIZE_UNREAD returns the number of bytes
available for reading via SYSLOG_ACTION_READ.
Michael Kerrisk
Clarify where SYSLOG_ACTION_READ_ALL places data it reads
Michael Kerrisk
Clarify semantics of SYSLOG_ACTION_CLEAR
The SYSLOG_ACTION_CLEAR command (5) does not really clear
the ring buffer; rather it affects the semantics of what
is returned by commands 3 (SYSLOG_ACTION_READ_ALL) and
4 (SYSLOG_ACTION_READ_CLEAR).
Michael Kerrisk
Clarify discussion of privileges for commands 3 and 10
Michael Kerrisk
Add mention of CONFIG_LOG_BUF_SHIFT

wait.2
Michael Kerrisk
BUGS: Document odd waitid() behavior when 'infop' is NULL

getifaddrs.3

Michael Kerrisk [Julien Cristau]
Update description
of ifa_data to Linux 2.6+ reality
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778

memcmp.3
Michael Kerrisk [Jon Grant]
Enhance RETURN VALUE text and remove redundant text from DESCRIPTION
Note that sign of result equals sign of difference between
first two bytes that differ (treated as "unsigned char")."

mkstemp.3
Michael Kerrisk [Florian Weimer]
Deemphasize discussion of mode 066 in glibc 2.0.6
Glibc 2.0.6 is now so ld that the discussion of details
of that version can be deemphasized placing just under
NOTES.

See https://bugzilla.kernel.org/show_bug.cgi?id=51811

strcmp.3
Michael Kerrisk [Jon Grant]
Enhance RETURN VALUE text and remove redundant text from DESCRIPTION
Note that sign of result equals sign of difference between
first two bytes that differ (treated as "unsigned char")."

ttyname.3
Michael Kerrisk

Fix confused text in ERRORS
The existing text suggested that the ERRORS applied
only for ttyname_r(). However, 2 of the 3 errors
can occur for ttyname().

undocumented.3
Michael Kerrisk
Remove some now documented functions

proc.5
Michael Kerrisk [Jim Paris]
Correct description of SwapFree in /proc/meminfo
Michael Kerrisk
Note change of /proc/[pid]/limits file permissions in 2.6.36

resolv.conf.5
Simon Paillard
Document IPv6 format for nameserver
See: http://bugs.debian.org/610036

capabilities.7
  Michael Kerrisk [Rens van der Heijden]
    Correct URL for POSIX.1e draft

ipv6.7
  Gao Feng
    Add description of getsockopt() for IPV6_MTU
      In IPv4,IP_MTU is only supported by getsockopt.
      In IPv6, we can use IPV6_MTU to set socket's MTU,
      but the return value of getsockopt() is the path MTU.

rtnetlink.7
  Michael Kerrisk [Julien Cristau]

    Update description of IFLA_STATS to Linux 2.6+ reality
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778

socket.7
  Michael Kerrisk [YOSHIFUJI Hideaki]
    Document 'sockaddr' and 'sockaddr_storage' types
  Andi Kleen
    Explain effect of SO_SNDTIMEO for connect()
      When SO_SNDTIMEO is set before connect(), then connect()
      may return EWOULDBLOCK when the timeout fires.

Zsbán Ambrus <ambrus@math.bme.hu>

Apologies if I missed anyone!

New and rewritten pages
---

kcmp.2
  Cyrill Gorcunov, Michael Kerrisk
    New page for kcmp(2)

Newly documented interfaces in existing pages
---

init_module.2
  Michael Kerrisk [Kees Cook, Rusty Russell, Lucas De Marchi]
    Document finit_module(2)
  Rusty Russell [Lucas De Marchi, Kees Cook]
    Document finit_module() 'flags' argument
      Document MODULE_INIT_IGNORE_MODVERSIONS and
      MODULE_INIT_IGNORE_VERMAGIC. (Some edits by mtk.)

New and changed links
---

finit_module.2
  Michael Kerrisk
    New link to init_module.2

__after_morecore_hook.3
__free_hook.3
__malloc_initialize_hook.3
__memalign_hook.3
__realloc_hook.3
  Michael Kerrisk
    New link to malloc_hook.3

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/tty/terminal/

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Add kernel versions for various CLONE_* constants
  Michael Kerrisk
    CLONE_NEWIPC governs mechanisms that don't have filesystem pathnames
  Michael Kerrisk
    CLONE_NEWIPC doesn't mount the POSIX
 MQ file system
  Michael Kerrisk
    Add an example program (CLONE_NEWUTS)
  Michael Kerrisk
    Some reworking of CLONE_NEWIPC text
      No substantial content changes.
  Michael Kerrisk
    SEE ALSO: add kcmp(2)
    SEE ALSO: add setns(2)

fallocate.2
  Michael Kerrisk
    FALLOC_FL_* flags are defined in glibc only since 2.18

getxattr.2
removexattr.2
setxattr.2
  Michael Kerrisk [Andrew Perepechko,]
    Note that ENOATTR is a synonym for ENODATA
      Various people have pointed out that strace(1) shows ENODATA

for the case where the named attribute does not exist, or
the process has no access to this attribute. ENODATA
and ENOATTR are in fact defined as synonyms. Point this out
in the man page, so that people understand the strace(1) info.

See https://bugzilla.kernel.org/show_bug.cgi?id=51871

getxattr.2
listxattr.2
removexattr.2
setxattr.2
Michael Kerrisk
Put
errors under ERRORS section
The errno values on these pages were listed in a nonstandard
way under the RETURN VALUE section. Put them in ERRORS sections.

init_module.2
Michael Kerrisk [Rusty Russell]
ERRORS: Add errors for module signatures (EBADMSG, ENOKEY)

link.2
mkdir.2
mknod.2
open.2
rename.2
symlink.2
write.2
mkfifo.3
Mark Hills
Document EDQUOT error
The return error EDQUOT is not documented in open(2), write(2),
symlink(2) etc.

Whether inodes or disk blocks are required for each function
is something I based on received wisdom and BSD documentation,
rather than tracing the code to the kernel. For symlink(2)
this certainly depends on the file system type.

listxattr.2
Michael Kerrisk [Theodore Ts'o]
Fix RETURN VALUE description
On success, 0 may be returned, so change wording from
"positive number" to "nonnegative number".

outb.2
Michael Kerrisk
Add SYNOPSIS

prctl.2
  Kees Cook
    Document PR_SET_PTRACER
      Document the Yama LSM's prctl handler that allows processes to
      declare ptrace restriction exception relationships via
      PR_SET_PTRACER.
  Michael Kerrisk
    Make it explicit that PR_SET_PTRACER replaces previous setting
      The attribute is a scalar, not a list.
  Shawn Landden
    Document EINVAL error for PR_SET_PTRACER
  Michael Kerrisk
    Document PR_GET_TID_ADDRESS

ptrace.2
  Michael Kerrisk
    Document PTRACE_O_EXITKILL
  Michael Kerrisk
    Place PTRACE_SETOPTIONS list in alphabetical order

query_module.2
  Michael Kerrisk
    Must be called using syscall(2)
      Yes, the call is way obsolete, but add this info
      for completeness.

recvmmsg.2
  Elie De Brauwer
    Add/correct kernel version info for recvmmsg() and MSG_WAITFORNONE
      This patch isolates the since/version
 related fixes as requested.
      This change introduces the following delta:
       * The page states it was added in 2.6.32 but it is only added
         2.6.33 (ref: http://kernelnewbies.org/Linux_2_6_33)
       * The MSG_WAITFORONE flag was in turn only added in 2.6.34
        (ref: http://kernelnewbies.org/Linux_2_6_34)
  Elie De Brauwer
    Add an example program

setns.2
  Michael Kerrisk
    Add example program

sigaction.2
  Michael Kerrisk [Zsbán Ambrus]
    Note feature test macro requirements for 'siginfo_t'
      See https://bugzilla.kernel.org/show_bug.cgi?id=52931

syscalls.2
  Michael Kerrisk
    Add kern_features(2)
  Michael Kerrisk
    Add utrap_install(2)
      Sparc-specific, present since ancient times
  Michael Kerrisk
    Add finit_module(2)

sysctl.2
  Michael Kerrisk [Garrett Cooper]
    ERRORS: EACCES as a synonym for EPRM
      See https://bugzilla.kernel.org/show_bug.cgi?id=46731
       and http://thread.gmane.org/gmane.linux.ltp/11413/focus=957635
         From: Garrett Cooper <yanegomi <at> gmail.com>
         Subject: Re: [LTP] [PATCH] sysctl03: sysctl returns EACCES after 2.6.33-rc1
         Newsgroups: gmane.linux.kernel, gmane.linux.ltp
         Date: 2010-03-04 18:35:33 GMT

unshare.2
  Michael Kerrisk
    Update NOTES on unimplemented flags
  Michael Kerrisk
    Fix text problems in description of CLONE_FS
  Michael Kerrisk
    SEE ALSO: add kcmp(2)
    SEE ALSO: add setns(2)
  Michael Kerrisk
    Reorder CLONE_NEWUTS entry in list

difftime.3
  Michael Kerrisk [Michal Gorny]
    Remove crufty text about 'time_t' on "other systems"
      Back in 2006, some text came in via Debian patches that seems
      crufty. Remove it.

      See https://bugzilla.kernel.org/show_bug.cgi?id=46731

getaddrinfo.3
getnameinfo.3
  Michael Kerrisk [Peter Budny]
     Fix some confused references to function names
      See https://bugzilla.kernel.org/show_bug.cgi?id=52741

getspnam.3
  Michael Kerrisk [Wolfgang Rohdewald]
    ERRORS: Add EACCES

See https://bugzilla.kernel.org/show_bug.cgi?id=52681

__setfpucw.3
  Michael Kerrisk
    Add proper page cross refs for alternate functions

core.5
proc.5
  Kees Cook
    Clarify suid_dumpable versus core_pattern
      In Linux 3.6, additional requirements were placed on core_pattern
      when suid_dumpable is set to 2. Document this and include commit
      references.
  Justin Lebar
    statm's "shared" field refers to pages backed by files
      I noticed that statm's "shared" field doesn't match the sum of
      all the "shared" entries in smaps [1].

      The kernel docs explain that statm's "shared" field is "number of
      pages that are shared (i.e. backed by a file)" [2]. smaps appears
      to
 call a page shared if it's mapped by at least two processes,
      which explains this discrepancy.

      I'm not a kernel hacker, but it appears to me they do mean "i.e."
      and not "e.g." in the statm description: In
      fs/proc/task_mmu.c::task_statm, I see

        *shared = get_mm_counter(mm, MM_FILEPAGES);

      Here's a patch which updates the man page to match the (hopefully
      correct) kernel docs.

      [1] https://bugzilla.mozilla.org/show_bug.cgi?id=807181
      [2]
http://git.kernel.org/?p=linux/kernel/git/torvalds/linux.git;a=blob;f=Documentation/filesystems/proc.txt;h=a1793d67
0cd01bd374eddf54ffdfc768504291ff;hb=HEAD

proc.5
  Kees Cook
    Put /proc/sys/kernel/hotplug in alphabetical order
  Kees Cook
    Document /proc/sys/kernel/dmesg_restrict
  Kees Cook
    Linux 3.4 changed permissions needed to change kptr_restrict
  Michael Kerrisk [Samuel Thibault, Simon Paillard]
    Add

field numbers for /proc/PID/stat
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Add numbering to /proc/stat "cpu" fields
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Michael Kerrisk
Reorganize text describing /proc/stat "cpu" fields
Michael Kerrisk
Rewording of suid_dumpable text after comments from Kees Cook
Michael Kerrisk [Samuel Thibault, Simon Paillard]
Add field numbers for /proc/[pid]/statm
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Michael Kerrisk
Document /proc/stat "cpu" "nice_guest" field
Info taken from commit ce0e7b28fb75cb003cfc8d0238613aaf1c55e797
Michael Kerrisk [Peter Lekeynstein]
Document /prod/[pid]/oom_score_adj
Text taken directly from Documentation/filesystems/proc.txt,
with some light editing.

See https://bugzilla.kernel.org/show_bug.cgi?id=50421

shells.5
Michael
Kerrisk
Add /etc/bash to list of example shells

ttytype.5
Michael Kerrisk
Add proper xref for termcap and terminfo pages

capabilities.7
Michael Kerrisk
Add kcmp(2) under CAP_SYS_PTRACE

man-pages.7
Michael Kerrisk
Update description of Section 7

========== Changes in man-pages-3.47 ==========

Released: 2013-02-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Lennart Poettering <lennart@poettering.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Radek Pazdera <rpazdera@redhat.com>
Reuben Thomas <rrt@sc3d.org>
Shawn Landden <shawnlandden@gmail.com>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vweaver1@eecs.utk.edu>

Apologies
if I missed anyone!

New and rewritten pages
---

perf_event_open.2
  Vincent Weaver
    New page documenting perf_event_open(2)

pthread_setname_np.3
  Chandan Apsangi, Michael Kerrisk
    New page for pthread_setname_np(3) and pthread_getname_np(3)

sln.8
  Michael Kerrisk [Peter Schiffer]
    New page documenting the 'sln' command provided by glibc
      Inspired by a Red Hat downstream page, but with rather
      more detail.

Newly documented interfaces in existing pages
---

prctl.2
  Michael Kerrisk [Shawn Landden, Lennart Poettering]
    Document PR_SET_CHILD_SUBREAPER and PR_GET_CHILD_SUBREAPER

ip.7
  Radek Pazdera
    Add source-specific multicast sockopts
      This patch adds documentation of several source-specific multicast

socket options that were added to kernel with implementation
of IGMPv3 in 2.5.68.

The
following socket options were added:
IP_ADD_SOURCE_MEMBERSHIP
IP_DROP_SOURCE_MEMBERSHIP
IP_BLOCK_SOURCE
IP_UNBLOCK_SOURCE
IP_MSFILTER

Pages moved across sections
---

getcontext.3
Michael Kerrisk
This page really belongs in Section 3 (moved from Section 2)

getdtablesize.3
Michael Kerrisk
Move from Section 2

New and changed links
---

getcontext.2
Michael Kerrisk
Make link to page moved into Section 3

getdtablesize.2
Michael Kerrisk
Link to renamed getdtablesize.3

setcontext.2
Michael Kerrisk
Modify link to point to Section 3

pthread_getname_np.3
Michael Kerrisk
New link to new pthread_setname_np.3

setcontext.3
Michael Kerrisk
Link to getcontext page renamed into Section 3

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    SEE ALSO: add
 fallocate(1)

flock.2
  Michael Kerrisk
    SEE ALSO: add flock(1)

fork.2
  Michael Kerrisk
    SEE ALSO: add exit(2)

getpriority.2
  Michael Kerrisk
    BUGS: note that nice value is per-thread on Linux

getrlimit.2
  Michael Kerrisk
    SEE ALSO: add prlimit(1)

gettid.2
  Michael Kerrisk
    SEE ALSO: add various system calls that use thread IDs

ioprio_set.2
  Michael Kerrisk
    SEE ALSO: add ionice(1)

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add taskset(1)

sched_setparam.2
  Michael Kerrisk
    Scheduling policy and parameters are per-thread on Linux
      Direct the reader to the discussion in sched_setscheduler(2).

sched_setscheduler.2
  Michael Kerrisk
    Scheduling policy and parameters are per-thread on Linux
  Michael Kerrisk
    SEE ALSO: add chrt(1)

setsid.2

Michael Kerrisk
SEE ALSO: add setsid(1)

shmop.2
Michael Kerrisk [Peter Schiffer]
ERRORS: Add EIDRM

Taken from Red Hat downstream patch

sigaction.2
makecontext.3
Michael Kerrisk
Change getcontext/setcontext page ref to Section 3

signal.2
Michael Kerrisk [Reuben Thomas]
Clarify System V vs BSD semantics for signal()

syscalls.2
Michael Kerrisk
The list on this page is not just syscalls common to all platforms
Michael Kerrisk
Add perfctr(2)
Add ppc_rtas(2)
Michael Kerrisk
Add kernel version number of utrap_install(2)

unimplemented.2
Michael Kerrisk [Peter Schiffer]
Remove mention of kernel version number in DESCRIPTION

inet.3
Michael Kerrisk [Peter Schiffer]
Fix error in EXAMPLE using inet_aton()
See https://bugzilla.redhat.com/show_bug.cgi?id=837090
Patch taken from Red Hat downstream.

posix_fallocate.3
Michael Kerrisk
SEE ALSO: add fallocate(1)

regex.3
Reuben Thomas
Clarify details of matching
The first is that it's far from
clear that the end points of the
complete string match are stored in the zero'th element of the
regmatch_t array; secondly, the phrase "next largest substring

match" is positively misleading, implying some sort of size
ordering, whereas in fact they are ordered according to their
appearance in the regex pattern.

scanf.3
Michael Kerrisk
Clarify meaning of "string conversions" for 'm' modifier
Mike Frysinger
Update %a vs %m documentation
POSIX.1-2008 adopted the 'm' flag for dynamic allocation. Update
page to cover it and relegate the glibc-specific 'a' flag to
NOTES.

strtol.3
Michael Kerrisk [Peter Schiffer]
Replace some bogus text about "thousands separator"
See https://bugzilla.redhat.com/show_bug.cgi?id=652870

sysconf.3
Michael Kerrisk [Peter Schiffer]
Use "_SC_PAGESIZE" consistently on page
s/_SC_PAGE_SIZE/_SC_PAGESIZE/
in one instance.
From Red Hat downstream patch.

nscd.conf.5
Peter Schiffer
Add max-db-size and auto-propagate descriptions, default values, + misc
* added missing valid services (services and netgroup)
* added many default values for options
* reordered options according to the nscd.conf file
(logical order)
* added 2 missing options: max-db-size and auto-propagate

nsswitch.conf.5
Peter Schiffer
Mention initgroups db

proc.5
Michael Kerrisk
Document /proc/profile
Michael Kerrisk [Peter Schiffer]
Update /proc/sys/fs/file-nr to include Linux 2.6 details
Michael Kerrisk
Clarify relationship between file-max and file-nr
The third value in /proc/sys/fs/file-nr is the same as
the value in /proc/sys/fs/file-max.
Michael Kerrisk

Note message written to kernel log when file-max limit is hit
Info
from Documentation/sysctl/fs.txt.
Michael Kerrisk
Mention lscpu(1) under discussion of /proc/cpuinfo

resolv.conf.5
Michael Kerrisk [Peter Schiffer]
Document "single-request-reopen" option
Taken from Red Hat downstream patch

See https://bugzilla.redhat.com/show_bug.cgi?id=717770
See http://thread.gmane.org/gmane.linux.man/3161

utmp.5
Michael Kerrisk
SEE ALSO: add utmpdump(1)

cpuset.7
Simon Paillard
Add missing 'cpuset.' prefix for some flags
See kernel commit e21a05cb408bb9f244f11a0813d4b355dad0822e

svipc.7
Michael Kerrisk
SEE ALSO: add ipcmk(1), ipcrm(1), ipcs(1)

termio.7
Michael Kerrisk
SEE ALSO: add reset(1), setterm(1), stty(1), tty(4)

ld.so.8
Michael Kerrisk [Peter Schiffer]
LD_VERBOSE does not work with ld.so --list and --verify
From Red Hat downstream patch

See https://bugzilla.redhat.com/show_bug.cgi?id=532629
Michael
Kerrisk
SEE ALSO: add sln(8)

zdump.8
Michael Kerrisk [Peter Schiffer]
Bring up to date with zdump --help
Patch taken from Red Hat downstream.

========== Changes in man-pages-3.48 ==========

Released: 2013-03-05, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andrey Vagin <avagin@openvz.org>
Aristeu Rozanski <aris@ruivo.org>
Colin Walters <walters@verbum.org>
Cyril Hrubis <chrubis@suse.cz>
Cyrill Gorcunov <gorcunov@openvz.org>
Daniel P. Berrange <berrange@redhat.com>
David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Denys Vlasenko <vda.linux@googlemail.com>
Flavio Leitner <fbl@redhat.com>
Graham Gower <graham.gower@gmail.com>

Kai Kunschke <kai@kunfoo.org>
Marcela Maslanova <mmaslano@redhat.com>
Marc Lehmann <debian-reportbug@plan9.de>
Marshel
 Abraham <Marshel.Abraham@in.bosch.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nathan Stratton Treadway <kernelbugs@nathanst.com>
Pavel Emelyanov <xemul@parallels.com>
Peter Schiffer <pschiffe@redhat.com>
Simon Heimberg <simohe@besonet.ch>
Simon Paillard <spaillard@debian.org>
Török Edwin <edwintorok@gmail.com>
Ulrich Drepper <drepper@redhat.com>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

getunwind.2
  Marcela Maslanova
    New page documenting getunwind(2)
      Taken from Red Hat downstream man pages set

Michael Kerrisk
Much rewriting
Some text taken from arch/ia64/kernel/unwind.c.

perfmonctl.2
Ivana Varekova
New page documenting IA-64-specific perfmonctl(2)
Taken from Red Hat downstream man pages
Michael Kerrisk
Rework discussion of PFM_CREATE_CONTEXT
Add VERSIONS and CONFORMING TO
Note that there
is no glibc wrapper
Remove PFM_CREATE_EVTSETS, PFM_DELETE_EVTSETS, PFM_GETINFO_EVTSETS
These don't exist, and it appears they never have.
Fix argument types for PFM_WRITE_PMCS, PFM_WRITE_PMDS, PFM_READ_PMDS
The types that were being used don't exist!
Briefly document PFM_GET_FEATURES, PFM_DEBUG, PFM_GET_PMC_RESET_VAL

gai.conf.5
Ulrich Drepper
New page documenting gai.conf
Taken from Red Hat downstream pages

nss.5
Ulrich Drepper
New page describing nss.conf

Newly documented interfaces in existing pages
---

clock_getres.2
Cyril Hrubis
Document CLOCK_REALTIME_COARSE and CLOCK_MONOTONIC_COARSE
Cyril Hrubis
Document CLOCK_BOOTTIME
Michael Kerrisk
Some improvements to CLOCK_BOOTTIME description

ptrace.2
Denys Vlasenko
Document PTRACE_GETREGSET, PTRACE_SETREGSET, PTRACE_SEIZE, and friends
Document PTRACE_GETREGSET,
PTRACE_SETREGSET,
PTRACE_SEIZE, PTRACE_INTERRUPT, and PTRACE_LISTEN.

New and changed links
---

fattach.2
fdetach.2
getmsg.2
isastream.2
putmsg.2
  Michael Kerrisk [Peter Schiffer]
    New link to unimplemented.2
      Taken from Red Hat downstream.

      See https://bugzilla.redhat.com/show_bug.cgi?id=436407

Global changes

Many pages
  Michael Kerrisk
    Global fix: remove unneeded double quotes in .SH headings

Many pages
  Michael Kerrisk
    Global fix: remove unneeded double quotes in .SS headings

Many pages
  Michael Kerrisk
    Global fix: use consistent capitalization in .SS headings
      Capitalization in .SS sections across pages (and sometimes even
      within a single page) is wildly inconsistent. Make it consistent.
      Capitalize first word in heading, but otherwise use lower case,
      except where English usage (e.g., proper nouns) or programming
       language requirements (e.g., identifier names) dictate otherwise.

Many pages
  Michael Kerrisk [Denys Vlasenko]
    Remove double blank lines in output

Various pages
  Michael Kerrisk
    Fix order of SH sections

Changes to individual pages
---

accept.2

Michael Kerrisk
NAME: Add "accept4"

access.2
Colin Walters
Note that access() may also fail for FUSE
Since in some cases (e.g. libguestfs's guestmount) it also has the semantics where files can appear owned by root, but are actually mutable by the user, despite what one might infer from the Unix permissions.

getpeername.2
Michael Kerrisk [Kai Kunschke]
Clarify semantics of getpeername() for datagram sockets
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674034

getuid.2
Michael Kerrisk
Remove duplicate section heading

mmap.2
Cyril Hrubis
Add note
about partial page in BUGS section
This adds a note about Linux behavior with partial page at the end of the object. The problem here is that a page that contains only part of a file (because the file size is not multiple of PAGE_SIZE) stays in page cache even after the mapping is unmapped and the file is closed. So if some process dirties such page, other mappings will see the changes rather than zeroes.
Michael Kerrisk [Török Edwin]
Some 'flags' values require a feature test macro to be defined
Add text to NOTES noting that some MAP_* constants are defined only if a suitable feature test macro is defined.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=542601
Cyril Hrubis
Document EOVERFLOW error

open.2
Michael Kerrisk
Clarify list of file creation flags
POSIX.1-2008 TC1 clarified this, so that O_CLOEXEC, O_DIRECTORY,
and O_NOFOLLOW are also in this list.

prctl.2
Cyrill Gorcunov
Add some details for PR_GET_TID_ADDRESS

read.2
  Michael Kerrisk [Zack Weinberg]
    Clarify interaction of count==0 and error checking
      POSIX deliberately leaves this case open, so the man
      page should be less specific about what happens.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533232
  Michael Kerrisk [Marc Lehmann]
    Remove crufty text about O_NONBLOCK on files
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=700529
  Michael Kerrisk
    Clarify details for seekable files

unimplemented.2
  Michael Kerrisk [Peter Schiffer]
    Add various STREAMS interfaces to NAME
      Taken from Red Hat downstream.

      See https://bugzilla.redhat.com/show_bug.cgi?id=436407

cexp2.3
  Michael Kerrisk
    Still does not exist in glibc 2.17

exit.3
  Michael Kerrisk
    Note that a call to execve()
 clears exit handler registrations

getaddrinfo.3
  Michael Kerrisk
    SEE ALSO: Add gai.conf(5)

malloc_trim.3
  Michael Kerrisk
    Remove duplicate section title

printf.3
  Marshel Abraham [Graham Gower, Graham Gower]
    Fix error handling in example code
      See https://bugzilla.kernel.org/show_bug.cgi?id=23282

pthread_yield.3
  Michael Kerrisk [Aristeu Rozanski]
    Add _GNU_SOURCE feature test macro to SYNOPSIS

resolver.3

resolv.conf.5
  Michael Kerrisk [Nathan Stratton Treadway, Simon Heimberg]
    RES_DEBUG is only available if glibc is compiled with debug support
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=692136
      and https://bugzilla.kernel.org/show_bug.cgi?id=43061

strtol.3
  Michael Kerrisk [Peter Schiffer]
    Remove crufty text from previous fix

core.5
  Michael Kerrisk
    Document CONFIG_COREDUMP

capabilities.7
  Andrey Vagin
    Nonexistent bits are no longer shown as set
 in /proc/PID/status Cap*

inotify.7
  Michael Kerrisk
    A monitoring process can't easily distinguish events triggered by itself

ip.7
  Flavio Leitner [Peter Schiffer]
    Improve explanation about calling listen() or connect()

man-pages.7
  Michael Kerrisk
    Describe rules for capitalization in .SS headings

rtnetlink.7
  Pavel Emelyanov
    Add info about ability to create links with given index
      Since kernel v3.7 the RTM_NEWLINK message now accepts nonzero
      values in ifi_index field. Mention this fact in the respective
      rtnetlink.7 section.

socket.7
  Pavel Emelyanov
    SO_BINDTODEVICE is now readable
      SO_BINDTODEVICE is readable since kernel 3.8.

========== Changes in man-pages-3.49 ==========

Released: 2013-03-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have
 been
incorporated in changes in this release:

Michael Kerrisk <mtk.manpages@gmail.com>

Global changes

The goal of the changes below to consistently format copyright
and license information in the comments in the page source
at the top of each page. This allows for easy scripting to
extract that information. Following these changes the comments
the top of the page source should now consistently have the form:

```
.\" <copyright info, possibly spread over several lines>
.\"
.\" %%%LICENSE_START(<license-type>)
.\" <license text>
.\" %%%LICENSE_END
.\" <other comments>
```

Note that the 'license-type' is merely descriptive. Its purpose is
to simplify scripting for the purpose of gathering statistics on
types of licenses used in man-pages. It is NOT a statement about
the actual licensing of the page; that license is contain INSIDE the
LICENSE_START...LICENSE_END clause.

All pages
  Michael Kerrisk
    Add a LICENSE_START()...LICENSE_END clause
 in source at
    top of each page that encapsulates the license text.
  Michael Kerrisk
    Put copyright info at top of page, followed by blank line and LICENSE

Various pages
  Michael Kerrisk
     Update info in source comments on where to get a copy of the GPL

Various pages
  Michael Kerrisk

Remove "Hey Emacs" comment in page source
Only certain pages have this; there is no consistency, so
remove it from all pages
Michael Kerrisk
Remove "-*- nroff -*-" comment at top of source

========== Changes in man-pages-3.50 ==========

Released: 2013-03-15, Munich

Apologies if I missed anyone!

New and rewritten pages
---

canonicalize_file_name.3
Michael Kerrisk
Rewrite page, adding much more detail

Global changes

Various pages

Michael Kerrisk
Global fix: s/END_LICENSE/LICENSE_END/

Various pages
Michael Kerrisk
Global fix: s/bitmask/bit mask/

Changes to individual pages
---

getent.1
Mark R Bannister
netgroup description incorrectly refers to initgroups

capget.2
Michael Kerrisk
Update URL for libcap

fork.2
Michael Kerrisk
Port access permission bits (ioperm()) are turned off in
the child

futex.2
Michael Kerrisk
'timeout' is a minimum duration that the call will wait, not a maximum

ioperm.2
Michael Kerrisk
Note that iopl() level of 3 is needed to access ports
Michael Kerrisk
'num' is *bits* not bytes!
Michael Kerrisk
Linux 2.6.8 lifted the port limit to 65,536
See http://article.gmane.org/gmane.linux.kernel/202624/
From: Stas Sergeev <stsp <at> aknet.ru>
Subject: [patch][rfc] Larger IO bitmap
Date: 2004-05-07 19:55:03 GMT
Michael Kerrisk
ioperm() operates on the calling *thread* (not process)
Michael Kerrisk
Clarify meaning of 'turn_on' argument
Plus form formatting fixes.
Michael Kerrisk
Clarify that default state of permission bits in child is off
Michael Kerrisk
NOTES: add mention of /proc/ioports

Michael Kerrisk
SEE ALSO: add outb(2)

iopl.2
Michael Kerrisk
CAP_SYS_RAWIO is required
to *raise* the I/O privilege level
Michael Kerrisk
Clarify that the two least significant bits of 'level' are what matter
Michael Kerrisk
SEE ALSO: add outb(2)

syscalls.2
Michael Kerrisk
Add version information for all (other) syscalls
Michael Kerrisk
Add perfmonctl(2)

futimes.3
Michael Kerrisk [Jonathan Nieder]
ERRORS: Add ENOSYS for lutimes()
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=620746

getpass.3
Michael Kerrisk [Erik Saule]
Suggest use of the ECHO flag as an alternative
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=644261

realpath.3
Michael Kerrisk
Document GNU extensions for EACCES and ENOENT errors

stdarg.3
Michael Kerrisk [Friedrich Delgado Friedrichs]
Describe va_copy()
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=575077

termios.3
Michael Kerrisk [Bernhard Kuemel]
Mention that noncanonical mode
does not do input processing
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=643854

random.4
Elie De Brauwer
Document write and document the ioctl interface of /dev/random
The update consists out of two parts:
- a minor thing which just documents what happens if a write to

/dev/(u)random is performed, which is used in the example
script but not explicitly mentioned.
- the other (biggest) part is the documentation of the ioctl()
interface which /dev/(u)random exposes. This ioctl() lives in
drivers/char/random.c and the primitives can be found in
include/linux/random.h

One comment remains, there used to be an RNDGETPOOL ioctl() which
disappeared in v2.6.9. I found two patches on the net:
- http://www.kernel.org/pub/linux/kernel/people/akpm/patches/2.6/2.6.8.1/2.6.8.1-mm4/broken-out/dev-random-remove-rndgetpool-ioctl.patch
- https://lkml.org/lkml/2004/3/25/168

But as far as I can tell the first one got applied but the 2nd
one seems more correct. The result is that even today one can
still find traces of the RNDGETPOOL ioctl() in the header files.
Is this there for historical reasons or because it might break
userspace, even though using it will just give an EINVAL.

bootparam.7
Jose Luis Domingo Lopez
Document 'rootfstype' option
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182014

capabilities.7
Michael Kerrisk
Add various pieces under CAP_SYS_RAWIO
Info obtained by grepping the kernel source.
Michael Kerrisk
Add CAP_SYS_RESOURCE /proc/PID/oom_score_adj case

netlink.7
Andrey Vagin
Add a note about broadcast messages to multiple groups

socket.7
Michael Kerrisk [Florian Weimer]
Define _GNU_SOURCE to obtain the definition of 'struct ucred'
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572210

========== Changes in man-pages-3.51 ==========

Released: 2013-04-17, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andreas Jaeger <aj@suse.de>
Andrew Clayton <andrew@digital-domain.net>
Brian M. Carlson <sandals@crustytoothpaste.net>
Changhee Han <ch0.han@lge.com>
Cyril Hrubis <chrubis@suse.cz>
Damien Grassart <damien@grassart.com>
David Prévot <taffit@debian.org>
Denis Barbier <bouzim@gmail.com>
Jeff Moyer <jmoyer@redhat.com>
Krzysztof Konopko <krzysztof.konopko@gmail.com>
Kyle McMartin <kyle@mcmartin.ca>
Mark H Weaver <mhw@netris.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nicolas Hillegeer <nicolas@hillegeer.com>
Pavel Emelyanov <xemul@parallels.com>
Peter Schiffer <pschiffe@redhat.com>
Radek
 Pazdera <rpazdera@redhat.com>
Ralph Loader <suckfish@ihug.co.nz>
Simon Paillard <spaillard@debian.org>
The Wanderer <wanderer@fastmail.fm>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

sched_rr_get_interval.2
  Michael Kerrisk
    Document /proc/sys/kernel/sched_rr_timeslice_ms

proc.5
  Pavel Emelyanov
    Document /proc/[pid]/map_files directory
      This directory was added in Linux v3.3 and provides info about
      files being mmap-ed in a way very similar to how /proc/[pid]/fd
      works.

      v2: Added examples of how links look like and noted dependency
      on kernel config option CONFIG_CHECKPOINT_RESTORE.

Michael Kerrisk
Document /proc/sys/kernel/shm_rmid_forced

capabilities.7
Michael Kerrisk
Document /proc/sys/kernel/cap_last_cap

Global changes

Various pages
Michael Kerrisk
Global
fix: fix placement of word "only"

Various pages
Simon Paillard
License headers: consistent format

Various pages
Michael Kerrisk
Global fix: s/since kernel/since Linux/

Various System V IPC pages in Section 2
Michael Kerrisk
Add "System V" to .TH line and text
Make it clear that these pages relate to System V IPC,
not POSIX IPC.

Changes to individual pages
---

access.2
Michael Kerrisk [The Wanderer]
Clarify RETURN VALUE for F_OK
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=705293

alarm.2
Michael Kerrisk
Correct the description of behavior when 'seconds' is 0

clone.2
Michael Kerrisk [Peter Schiffer]
Add prototype for syscall to SYNOPSIS
And further clarify the distinction between the system call
and the wrapper function in the introductory text.

Michael Kerrisk
Update feature test macro requirements
The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749
Michael Kerrisk [Mike Frysinger]
Clarify differences between clone2() syscall and wrapper function
Michael Kerrisk [Mike Frysinger]
Note those architectures where the sys_clone argument order differs
Michael Kerrisk [Mike Frysinger]
Add short subsection noting that blackfin, m68k, and sparc are different
Michael Kerrisk
Move clone2() text to subsection in description
The description of ia64 clone2() should follow the discussion
of the raw system call interface.
Michael Kerrisk
Change subhead for ia64 discussion

getcpu.2
Michael Kerrisk
Recommend that 'tcache' should be specified as NULL nowadays

io_cancel.2
Jeff Moyer, Michael Kerrisk [Cyril Hrubis]
Improve description

io_destroy.2
Jeff Moyer
Improve description
The
description was rather vague, citing a "list of I/O contexts"
and stating that it "can" cancel outstanding requests. This
update makes things more concrete so that the reader knows exactly
what's going on.

io_getevents.2
Jeff Moyer
The 'timeout' argument is not updated
I looked back through the kernel code, and the timeout was
never updated in any case. I've submitted a patch upstream
to change the comment above io_getevents.

io_setup.2
Jeff Moyer
Clarify nr_events
nr_events is technically the number of completion events that can
be stored in the completion ring. The wording of the man page:
"capable of receiving at least nr_events" seems dubious to me,

only because I worry that folks might interpret that to mean
'nr_events' total, instead of 'nr_events' concurrently.

Further, I've added information on where to find
the per-user
limit on 'nr_events', /proc/sys/fs/aio-max-nr. Let me know if
you think that is not relevant.

listxattr.2
Michael Kerrisk
Explain use of 'size' argument

lseek.2
Michael Kerrisk [Andreas Jaeger]
_GNU_SOURCE must be defined to get SEEK_DATA and SEEK_HOLE definitions
See http://sourceware.org/bugzilla/show_bug.cgi?id=15312

mmap.2
Michael Kerrisk
Add pointers to relevant /proc files described in proc(5)

posix_fadvise.2
pread.2
readahead.2
sync_file_range.2
truncate.2
Michael Kerrisk
Refer to syscall(2) for ABI semantics on certain 32-bit architectures
Also: in sync_file_range.2 and posix_fadvise.2 remove description
of conventional calling signature as flawed, and in
posix_fadvise.2, de-emphasize focus on ARM, and rather phrase
as a more general discussion of certain architectures.

readdir.2
Michael Kerrisk
readdir(2) doesn't
exist on x86-64

semop.2
Michael Kerrisk
Clarify the discussion of 'semadj'

shmctl.2
Michael Kerrisk
Refer to proc(5) for description of /proc/sys/kernel/shm_rmid_forced

syscall.2
Changhee Han

Add notes that caution users when passing arguments to syscall()
For example, passing 'long long' on ARM-32 requires special
treatment.
Mike Frysinger [Michael Kerrisk]
Document the exact calling convention for architecture system calls
Mike Frysinger [Kyle McMartin]
Add PA-RISC details under calling conventions
Michael Kerrisk [Mike Frysinger]
Refine discussion of ARM and other ABIs

syscalls.2
Michael Kerrisk
Update kernel version number at start of list

umask.2
Michael Kerrisk
SEE ALSO: add acl(5)

unshare.2
Michael Kerrisk
Update feature test macro requirements
The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

fopencookie.3
Michael Kerrisk [Ralph Loader]
Correct definition of cookie_io_functions_t

pthread_setname_np.3
Andrew Clayton
The thread argument is passed in by value

readir.3
seekdir.3
telldir.3
Michael Kerrisk
Eliminate the implication that these functions deal with "offsets"
The directory position dealt with by the readdir() and
friends is not a simple file offset in modern file systems.
Typically, it is some kind of cookie value. Add text and
make other changes to these pages to eliminate the
implication that this is an offset, and warn the reader
that directory positions should be treated strictly as
opaque values.

In the process, rename the 'offset' argument of seekdir(3)
to 'loc', and add some text to readdir(3) to note that

the 'd_off' field is the same value returned by telldir(3)
at the current directory position.

See also https://lwn.net/Articles/544298/

scalb.3
Mark H Weaver
Fix prototypes for scalbf() and scalbl()

sched_getcpu.3
Michael Kerrisk
Update feature test macro requirements
The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

ualarm.3
Michael Kerrisk [Nicolas Hillegeer]
Add note on the behavior when 'usecs' is zero
POSIX.1-2001 does not specify the behavior in this case
and no other system that I checked documented the behavior.
Probably, most or all systems do what Linux does in this
case: cancel any pending alarm, just as alarm(0) does.
Add that info in NOTES.

elf.5
Mike Frysinger
Add byte positions for all EI_xxx fields
When describing e_ident, most of the EI_xxx defines mention the
exact byte number.
This is useful when manually hacking an ELF
with a hex editor. However, the last few fields don't do this,
which means you have to count things up yourself.
Add a single word to each so you don't have to do that.

proc.5
Michael Kerrisk
Refer to sched_rr_get_interval(2) for info on sched_rr_timeslice_ms
Since Linux 3.9, /proc/sys/kernel/sched_rr_timeslice_ms can
be used to change the SCHED_RR quantum.
Michael Kerrisk
SEE ALSO: Add sysctl(8)
Krzysztof Konopko
Simplify the example of printing out environ
The binutils package contains a very handy utility to
print out null-byte delimited strings from a file. This
can replace a rather complex expression with cat(1)
provided as an example for printing out /proc/[pid]/environ.

Michael Kerrisk
Update /proc/PID/maps example
Update to 64-bit example that includes "[heap]", "[stack],
and "[vdso]"
Michael Kerrisk
Formatting fixes for /proc/PID/maps
Mike Frysinger
Document the "pathname" field of /proc/PID/maps
Michael Kerrisk
Add reference to capabilities(7) for /proc/sys/kernel/cap_last_cap
Michael Kerrisk
/proc/PID/maps: add a reference to mmap(2)

ip.7
Radek Pazdera
Document IP_MULTICAST_ALL
This commit adds documentation for the IP_MULTICAST_ALL socket
option.

The option was added to the Linux kernel in 2.6.31:

Author Nivedita Singhvi <niv@us.ibm.com>
Commit f771bef98004d9d141b085d987a77d06669d4f4f

The description is based on a previous one [3] posted by the
original author of the code -- Nivedita, but it is slightly
re-worded.

I tested it myself and it works as described.

References:

[2] http://lxr.free-electrons.com/source/net/ipv4/igmp.c#L2267
[3] http://patchwork.ozlabs.org/patch/28902/

units.7
Brian M. Carlson
units should use an actual µ
The units(7) man page uses an ASCII u in place of the actual Greek
letter mu. Since we're in the twenty-first century, with
UTF-8-compatible terminals and terminal emulators, we should use
the actual letter µ instead of an ASCII approximation.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=704787

========== Changes in man-pages-3.52 ==========

Released: 2013-07-04, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adrian Bunk <bunk@kernel.org>
Andrea Remondini <andrea@undeadlinks.com>
Anthony Foiani <anthony.foiani@gmail.com>
Brian
 Norris <computersforpeace@gmail.com>
Cyril Hrubis <chrubis@suse.cz>

Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    Add

PERF_IOC_FLAG_GROUP documentation
        The perf_event_open() ENABLE/DISABLE/RESET ioctls can take an
        argument, PERF_IOC_FLAG_GROUP. This wasn't documented at all
        until about a year ago (despite the support being there from
        the beginning) so I missed this when initially writing
        the man page.

socket.7
  Pavel Emelyanov, Michael Kerrisk
    Document SO_PEEK_OFF option
        Since Linux 3.4 there appeared an ability to specify the
        offset in bytes from which the data will be MSG_PEEK-ed.
        Describe this socket option in the socket(7) page, where
        all the other socket options are described.

Global changes

Various pages
  Michael Kerrisk
    Convert inline formatting (\fX...\fP) to dot-directive formatting

readdir.2
asprintf.
getline.3
getlogin.3
pthread_setname_np.3
readdir.3
strerror.3
  Michael Kerrisk [Jon Grant]
    Clarify that terminating null byte is
'\0'

Changes to individual pages
---

execve.2
  Peter LaDow
    Add envp to the Linux notes about NULL pointers
        During the review of static analysis results, we discovered a
        functional, but non-portable, use of execve(). For example:

            char *cmd[] = { "/path/to/some/file", NULL };
            execve(cmd[0], cmd, NULL);

        The call succeeds. Yet, the static analysis tool (rightly)

pointed out that envp could be dereferenced. But digging into
glibc and the kernel, it appears that like argv, envp when NULL
is treated as if it were an empty list.

So, to clear things up, I'm submitting this patch to update the
man page to indicate that envp is treated like argv.

fallocate.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

io_setup.2
Cyril Hrubis [Jeff Moyer]
Clarify the nr_events parameter

Currently the io_setup.2 man page describes what the kernel really
does, i.e., that the resulting context may be able to hold more
than the 'nr_event's operations because the memory allocated in
kernel is rounded to be multiple of page size.

It is better not to expose this implementation detail and
simply state that the resulting context is suitable for
'nr_events' operations.

perf_event_open.2
Vince Weaver
Clarify the perf_event_open() wakeup_events/wakeup_watermark fields
Clarify the perf_event_open() wakeup_events/wakeup_watermark
fields a bit, based on info from kernel commit cfeb1d90a1b1.
Vince Weaver
Update to match the Linux 3.10 release
This patch updates the perf_event_open() documentation to include
new interfaces added in the 3.10 kernel.

It also documents a few [To be documented] instances left over
from
the 3.7 kernel.
Vince Weaver
Small correction to description of 'flags' argument

prctl.2
Michael Kerrisk
Note equivalents of PR_SET_NAME
pthread_setname_np() and pthread_getname_np() and
/proc/self/task/TID/comm provide access to the same
attribute.

pread.2

Michael Kerrisk [ ]
pread() and pwrite() are especially useful in multithreaded applications

recv.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

semctl.2
Michael Kerrisk [Simone Piccardi]
'sem_nsems' is 'unsigned long' since Linux 2.4

shmget.2
Michael Kerrisk
Rewrite RETURN VALUE and mention that 'errno' is set on error

sigaction.2
Michael Kerrisk [Brian Norris]
RETURN VALUE: mention that 'errno' is set on error

signal.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

sigpending.2
Michael Kerrisk
RETURN VALUE: mention that 'errno'
is set on error

sigprocmask.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

sigsuspend.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

syscall.2
Mike Frysinger
Document s390/s390x calling convention

a64l.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function l64a() is not thread safe.

abs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe

The functions abs(), labs(), llabs() and imaxabs() are
thread-safe.

aio_error.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function aio_error() is thread safe.

aio_return.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function aio_return() is thread safe.

alloca.3
Adrian Bunk
Correct information on getting non-inlined version with gcc+glibc
- remove the incorrect information
that -fno-builtin would help
- add -std=c11 to the list of strict options
- emphasize more that both the gcc option and not including
alloca.h are needed
- add the #ifdef from the glibc alloca.h to make the situation
clearer

bindresvport.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
Before glibc 2.17, bindresvport() is not thread-safe.
Since glibc 2.17, it is thread-safe, the patch can refer to URL:
http://sourceware.org/git/?p=glibc.git;a=commit;h=f6da27e53695ad1cc0e2a9490358decbbfdff5e5

canonicalize_file_name.3
Michael Kerrisk
Put CONFORMING TO section in right location

catgets.3
Michael Kerrisk [Jon Grant]
Clarify that null byte is '\0'

ceil.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ceil(), ceilf() and ceill() are thread safe.

cimag.3
Peng Haitao
ATTRIBUTES:

Note functions that are thread-safe
The functions cimag(), cimagf() and cimagl() are thread safe.

clock_getcpuclockid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function clock_getcpuclockid() is thread safe.

conj.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions conj(), conjf() and conjl() are thread safe.

crypt.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function crypt() is not thread safe.

ctermid.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function ctermid() is thread safe with exceptions.

dirfd.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

drand48.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions drand48(), erand48(), lrand48(), nrand48(),
mrand48(), jrand48(),
srand48(), seed48() and lcong48() are
not thread safe.

ecvt.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions ecvt() and fcvt() return a string located in a
static buffer which is overwritten by the next call to the
functions, so they are not thread-safe.

encrypt.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions encrypt() and setkey() are not thread safe.

ether_aton.3

Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions ether_aton() and ether_ntoa() are not thread safe.

fcloseall.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function fcloseall() is not thread safe.

ferror.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ferror(), clearerr(), feof() and fileno() are
thread safe.

fgetgrent.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

fgetpwent.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

fgetwc.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

fmtmsg.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
Before glibc 2.16, fmtmsg() is not thread-safe.
Since glibc 2.16, it is thread-safe, the patch can refer to URL:
http://sourceware.org/git/?p=glibc.git;a=commit;h=7724defcf8873116fe4efab256596861eef21a94

fputwc.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getdate.3
Peng Haitao
ATTRIBUTES: Note functions that are and aren't thread-safe

getgrent.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function getgrent() is not thread safe.

getgrnam.3

Peng Haitao
ATTRIBUTES: Note functions that are and aren't
thread-safe

getline.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getlogin.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function getlogin() is not thread safe.
The function cuserid() is thread-safe with exceptions.
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getpass.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe

getpwent.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function getpwent() is not thread safe.

getpwnam.3
Peng Haitao
ATTRIBUTES: Note functions that are and aren't thread-safe

getspnam.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getttyent.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe

getusershell.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The
functions getusershell(), setusershell() and endusershell()
are not thread safe.

getutent.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

hsearch.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

hsearch.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions hsearch(), hcreate() and hdestroy() are not
      thread-safe.

localeconv.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The function localeconv() returns a pointer to a structure which
      might be overwritten by subsequent calls to localeconv() or by
      calls to setlocale(), so it is not thread-safe.
  Peng Haitao
    Add RETURN VALUE section

malloc_info.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

mblen.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The
 function mblen() is not thread safe.

mbrlen.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function mbrlen() is thread safe with exceptions.

mbrtowc.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function mbrtowc() is thread safe with exceptions.

mktemp.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

modf.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions modf(), modff() and modfl() are thread safe.

popen.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

pthread_attr_setinheritsched.3
  Michael Kerrisk
    Note the scheduling attributes affected by this function

pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_attr_setscope.3
  Michael Kerrisk [Manuel Traut, Siddhesh Poyarekar]
    The inherit-scheduler attribute must be set
 to PTHREAD_EXPLICIT_SCHED
      In order for the attributes set by these functions to have
      an effect, the caller must use pthread_attr_setinheritsched(3)
      to set the inherit-scheduler attribute of the attributes object
      to PTHREAD_EXPLICIT_SCHED.

ptsname.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function ptsname() is not thread safe.

putenv.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

putpwent.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

qecvt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions qecvt() and qfcvt() are not thread-safe.

random.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error
  Michael Kerrisk
    Add EINVAL error for setstate()
  Michael Kerrisk
    BUGS: initstate() does not return NULL on error
      http://sourceware.org/bugzilla/show_bug.cgi?id=15380

random_r.3

Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

readdir.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The data returned by readdir() may be overwritten by subsequent
calls to readdir() for the same directory stream, so it is not
thread-safe.

re_comp.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions re_comp() and re_exec() are not thread safe.

rexec.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions rexec() and rexec_af() are not thread safe.

round.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions round(), roundf() and roundl() are thread safe.

scalbln.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions scalbn(), scalbnf(),
scalbnl(), scalbln(),
scalblnf() and scalblnl() are thread safe.

scandir.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

siginterrupt.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

signbit.3
Peng Haitao
ATTRIBUTES: Note macro that is thread-safe
The macro signbit() is thread safe.

sigsetops.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

stdio_ext.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions __fbufsize(), __fpending(), __fpurge() and
      __fsetlocking() are not thread safe.

strdup.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

strerror.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function strerror() is not thread safe.

strftime.3
  Michael Kerrisk
    Clarify details of return value
  Michael
 Kerrisk
    BUGS: 'errno' is not set if the result string would exceed 'max' bytes

strtok.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function strtok() is not thread safe.
  Michael Kerrisk [Georg Sauthoff]
    Add more detail on the operation of strtok()
      Add a number of missing details on the operation of strtok()

tempnam.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

timegm.3
  Jérémie Galarneau
    copy the string returned by getenv()
      The example of a portable version of timegm() uses the string
      returned by getenv() after calling setenv() on the same
      environment variable. The tz string may be invalid as per
      getenv.3:

            "The string pointed to by the return value of getenv()
             may be statically allocated, and can be modified by a
             subsequent call to getenv(), putenv(3),
 setenv(3), or
             unsetenv(3)."

tmpnam.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function tmpnam() is thread safe with exceptions.

trunc.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions trunc(), truncf() and truncl() are thread safe.

ttyname.3
  Michael Kerrisk
    ATTRIBUTES: Note functions that are and aren't thread-safe

ttyslot.3
  Michael Kerrisk
    ATTRIBUTES: Note functions that are not thread-safe

usleep.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

wcsdup.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

core.5
  Michael Kerrisk
    Implicitly adding the PID to a core filename was dropped in 2.6.27

proc.5
  Michael Kerrisk
    Document /proc/[pid]/fd/ anon_inode symlinks
  Mike Frysinger
    Document /proc/[pid]/fd/ symlinks a bit more

      Describe the type:[inode] syntax used in this dir

bootparam.7
  Michael Kerrisk [Dan Jacobson]
    Remove outdated text on LILO and LoadLin
      Strike the discussion of LILO and LoadLin, which
      are long obsolete, and make a brief mention of GRUB.
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604019
  Regid
    Remove mention of the deprecated rdev(8)
      The deprecated rdev(8) command was removed from util-linux in 2010.

See https://git.kernel.org/?p=utils/util-linux/util-linux.git;a=commit;h=a3e40c14651fccf18e7954f081e601389baefe3fO
  Andrea Remondini
    Document the 'resume' boot parameter

inotify.7
  Michael Kerrisk [Jon Grant]
    Clarify that null byte is '\0'

iso_8859-2.7
  Eric S. Raymond
    Remove incorrect reference to nonexistent groff glyph \[shc]
      The reference incorrectly attempted to duplicate an
      actual soft hyphen (hex 0xad) just before it in the
file.

man-pages.7
  Peng Haitao
    Add description of "ATTRIBUTES"
      "ATTRIBUTES" section can mention thread safety,
      cancellation safety, and async-cancel-safety.

socket.7
  Michael Kerrisk
    Note that 'optval' for socket options is an 'int' in most cases

tcp.7
  Michael Kerrisk
    Note that 'optval' for socket options is an 'int' in most cases

udp.7
  Michael Kerrisk
    Note that 'optval' for socket options is an 'int' in most cases

========== Changes in man-pages-3.53 ==========

Released: 2013-07-31, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

David Prévot <taffit@debian.org>
Denys
 Vlasenko <dvlasenk@redhat.com>
Dmitry V. Levin <ldv@altlinux.org>
Felix Schulte <Felix_Schulte@McAfee.com>
Graud <graud@gmx.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Oleg Nesterov <oleg@redhat.com>
Peng Haitao <penght@cn.fujitsu.com>
Peter Schiffer <pschiffe@redhat.com>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vincent.weaver@maine.edu>

Apologies if I missed anyone!

New and rewritten pages
---

restart_syscall.2
  Michael Kerrisk
    New page for restart_syscall(2) system call

Newly documented interfaces in existing pages
---

fchownat.2
  Michael Kerrisk
    Document AT_EMPTY_PATH

fstatat.2
  Michael Kerrisk
    Document AT_EMPTY_PATH

linkat.2
  Michael Kerrisk
    Document AT_EMPTY_PATH

open.2
  Michael Kerrisk [Al Viro]
    Document O_PATH
      See also https://bugzilla.redhat.com/show_bug.cgi?id=885740

Changes to individual pages
---

clock_nanosleep.2
futex.2
nanosleep.2
poll.2
sigaction.2
sigreturn.2
signal.7
  Michael Kerrisk
    SEE ALSO: add restart_syscall(2)

open.2
  Michael Kerrisk [Geoffrey Thomas]
    Remove warning that O_DIRECTORY is only for use with opendir(3)
      O_DIRECTORY can also be used with, for example, O_PATH.

perf_event_open.2
  Vince Weaver
    Improve PERF_SAMPLE_BRANCH_STACK documentation
  Vince Weaver
    Fix indentation of the MMAP layout section
      The indentation of the MMAP layout section wasn't quite right.
      I think this improves things but I admit I'm not an expert at the
      low-level indentation directives.
  Vince Weaver
    Update PERF_IOC_FLAG_GROUP info
      It turns out PERF_IOC_FLAG_GROUP was broken from 75f937f24bd9
      (in Linux 2.6.31, the initial perf_event release) until
      724b6daa1 (Linux 3.4).

      I've done some extensive kernel source code digging plus

    running tests of various kernels and I hope the info
      presented is accurate now.

      (Patch edited somewhat by mtk.)
  Vince Weaver
    Improve sysfs files documentation
      This improves the documentation of the various
      perf_event_open()-related sysfs files.

ptrace.2
  Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
    If SEIZE was used, initial auto-attach stop is EVENT_STOP
      For every PTRACE_O_TRACEfoo option, mention that old-style SIGSTOP

is replaced by PTRACE_EVENT_STOP if PTRACE_SEIZE attach was used.

Mention the same thing again in the description of
PTRACE_EVENT_STOP.
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
Mention that PTRACE_PEEK* libc API and kernel API are different
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
Clarify PTRACE_INTERRUPT, PTRACE_LISTEN, and group-stop behavior

readlink.2
Michael Kerrisk
Document use of empty
'pathname' argument
Michael Kerrisk
Change error check in example program from "< 0" to "== -1"
Chuck Coffing
Fix possible race condition in readlink.2 example
I noticed that the example in the readlink.2 man pages does error
checking for a race condition that would cause the value of the
symbolic link to get larger. However, it doesn't handle the
opposite case, in which the value gets shorter. (The NULL
terminator is always set at the old, longer offset.) This could
cause the program to operate on uninitialized data.

setpgid.2
Michael Kerrisk [Graud]
s/SIGTSTP/SIGTTIN/ when discussing reads from terminal
See https://bugzilla.kernel.org/show_bug.cgi?id=60504

clog2.3
Michael Kerrisk
Note that these functions are still not present in glibc 2.17

dirfd.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function
dirfd() is thread safe.

div.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions div(), ldiv(), lldiv() and imaxdiv() are thread
safe.

fabs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe

The functions fabs(), fabsf() and fabsl() are thread safe.

fdim.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fdim(), fdimf() and fdiml() are thread safe.

fflush.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function fflush() is thread safe.

finite.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions finite(), finitef(), finitel(), isinf(), isinff(),
isinfl(), isnan(), isnanf() and isnanl() are thread safe.

flockfile.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions flockfile(), ftrylockfile() and funlockfile()
are
thread safe.

floor.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions floor(), floorf() and floorl() are thread safe.

resolv.conf.5
Simon Paillard
Explain how to set empty domain
See http://bugs.debian.org/463575

capabilities.7
Michael Kerrisk
Add open_by_handle_at(2) under CAP_DAC_READ_SEARCH

inotify.7
Michael Kerrisk [Felix Schulte]
Clarify description of IN_MOVED_FROM and IN_MOVED_TO

man-pages.7
Michael Kerrisk
DESCRIPTION should note versions for new interface features or behavior

udp.7

Benjamin Poirier
Add missing #include directive
Using the UDP_CORK socket option documented in udp.7 requires
including <netinet/udp.h>.

ld.so.8
Michael Kerrisk
Rework rpath token expansion text
Michael Kerrisk
Describe $PLATFORM rpath token
Michael Kerrisk
Describe $LIB rpath token

Michael Kerrisk
Document LD_BIND_NOT
Michael Kerrisk [Simon Paillard]
Add reference to pthreads(7) in discussion of LD_ASSUME_KERNEL

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

ioctl_list.2
  Zsbán Ambrus
    Document FAT_IOCTL_GET_ATTRIBUTES
      The attached patch adds four ioctls from linux/msdos_fs.h to the
      ioctl_list(2) manpage.

      The ioctl FAT_IOCTL_GET_ATTRIBUTES
reads FAT attributes of a
      file a mounted vfat file system. I tested this on Linux
      2.6.33, an example script can be found at
      http://www.perlmonks.com/?node_id=832623

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/file system/filesystem/
      Notwithstanding 24d01c530c5a3f75217543d02bf6712395e5f90c,
      "filesystem" is the form used by the great majority of man pages
      outside the man-pages project and in a number of other sources,

so let's go with that.

Changes to individual pages
---

access.2
  J. Bruce Fields
    Fix outdated NFS information
      Note that NFS versions since version 3 support an "access" call
      so that the client doesn't have to guess permissions or ID
      mapping on its own.

      (See RFC 1813 sections 1.7 and 3.3.4.)

adjtimex.2
  Michael Kerrisk
    SEE ALSO: Add adjtimex(8)

clock_getres.2
   Michael Kerrisk [Rodrigo Campos]
    Note circumstances in which "SMP" note applies.
  Michael Kerrisk
    Add kernel version for CLOCK_*_CPUTIME_ID
      CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID
      appeared in 2.6.12.
  Michael Kerrisk
    Add VERSIONS section

futex.2
  Michael Kerrisk
    The 'timeout' can be rounded upwards by clock granularity and also overrun

kill.2
  Michael Kerrisk
    Small improvements to text on historical rules for permissions

nfsservctl.2
  Michael Kerrisk
    Note commands that were only in Linux 2.4.x and earlier

open.2
  Robert Harris
    Add mmap(2) to list of calls that fail when given an O_PATH descriptor
  Doug Goldstein
    Add EINVAL to errors list
      EINVAL can be returned by open(2) when the underlying filesystem
      doesn't support O_DIRECT. It is documented in the NOTES section

but this patch adds it to the list
of possible errors.

perf_event_open.2
  Vince Weaver
    PERF_SAMPLE_BRANCH_STACK updates
      This started out as just adding the new perf_event_open features
      from Linux 3.11 (which was the addition of transactional memory
      defines for PERF_SAMPLE_BRANCH_STACK samples) but turned into a
      general cleanup of the PERF_SAMPLE_BRANCH_STACK documentation.

      The main clarification is that at least one of the non-privilege
      values must be set or else perf_event_open() will return an EINVAL
      error.
  Michael Kerrisk
    Reorder text describing fields of 'perf_event_header' structure
      Place the fields with the shorter descriptions first, to make the
      information easier to read.

poll.2
  Michael Kerrisk
    Clarify wording of 'timeout' as a "minimum" interval

sched_setaffinity.2
  Michael Kerrisk [Christos Tsopokis]
    Clarify that these system calls affect a per-thread
attribute

sched_setparam.2
  Michael Kerrisk
    Clarify that this system call applies to threads (not processes)

sched_setscheduler.2
  Michael Kerrisk
    Clarify that this system call applies to threads (not processes)

select.2
  Michael Kerrisk [G.raud]
    Clarify wording of 'timeout' as a "minimum" interval

setfsgid.2
  Michael Kerrisk [Oleg Nesterov]
    Clarify description of return value
      More clearly describe the weirdness in the return value of this
      system call, and note the problems it creates in BUGS
  Michael Kerrisk
    Correct header file in SYNOPSIS
  Michael Kerrisk

Refer to setfsuid(2) for an explanation of why setfsgid() is obsolete
Michael Kerrisk
Wording improvements

setfsuid.2
Michael Kerrisk [Oleg Nesterov]
Clarify description of return value
More clearly describe the weirdness in the return value of this
system call, and note the problems it creates
in BUGS
Michael Kerrisk [Chen Gang]
Clarify historical details and note that setfsuid() is obsolete
Michael Kerrisk
Wording improvements
Michael Kerrisk
Correct header file in SYNOPSIS

sigwaitinfo.2
Michael Kerrisk
Clarify wording of 'timeout' as a "minimum" interval

syscall.2
Johan Erlandsson
Add missing argument in example
Johan Erlandsson
Correct registers for arm/EABI
Registers was off by one.

Reference:
http://www.arm.linux.org.uk/developer/patches/viewpatch.php?id=3105/4

See also:
http://peterdn.com/post/e28098Hello-World!e28099-in-ARM-assembly.aspx
https://wiki.debian.org/ArmEabiPort
http://en.wikipedia.org/wiki/Calling_convention#ARM

wait.2
Michael Kerrisk [Hannes Landeholm]
Add details on the fifth argument provided by raw waitid() system call
See https://bugzilla.kernel.org/show_bug.cgi?id=60744

clock.3
Michael Kerrisk
clock() switched from using times(2) to clock_gettime() in glibc 2.18

drand48_r.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe

The functions drand48_r(), erand48_r(), lrand48_r(),
nrand48_r(), mrand48_r(), jrand48_r(), srand48_r(), seed48_r(),
and lcong48_r() are thread safe.

fma.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fma(), fmaf() and fmal() are thread safe.

fmax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fmax(), fmaxf() and fmaxl() are thread safe.

fmin.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fmin(), fminf() and fminl() are thread safe.

fpclassify.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fpclassify(), isfinite(), isnormal(), isnan(), and
isinf() are thread safe.

frexp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions frexp(), frexpf() and frexpl() are thread safe.

gethostbyname.3
Michael Kerrisk [Jon Grant]
gai_strerror() is the modern replacement for herror() and hstrerror()
Michael Kerrisk
Update feature test macro requirements for herror() and hstrerror()
Michael Kerrisk
Add feature test macro requirements for h_errno

ilogb.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ilogb(), ilogbf() and ilogbl() are thread safe.

ldexp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ldexp(), ldexpf() and ldexpl() are thread safe.

lrint.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions lrint(), lrintf(), lrintl(), llrint(), llrintf(),
      and llrintl() are thread safe.

lround.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions lround(), lroundf(), lroundl(), llround(),
      llroundf() and llroundl() are thread safe.

lseek64.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function lseek64() is thread safe.

mbsinit.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function mbsinit() is thread safe.

nextafter.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions nextafter(), nextafterf(), nextafterl(),
      nexttoward(), nexttowardf() and nexttowardl() are thread safe.

posix_memalign.3
  Michael Kerrisk [Will Newton]
    'errno" is indeterminate after a call to posix_memalign()
  Michael Kerrisk [Will Newton]
    Clarify wording on "return value" when size==0

printf.3
  Christopher Hall
    Correctly describe the meaning of a negative precision
      The printf(3) manpage says that a negative precision is taken to
      be zero, whereas printf(3p) says that a negative precision is
      taken as if the precision were omitted. glibc agrees with the
      latter (POSIX) specification.

      Test code:

        printf("%f\n",42.0);   // "42.000000"
        printf("%.*f\n",0,42.0); // "42"
        printf("%.*f\n",-1,42.0); // "42.000000"

This patch corrects the explanation to match what actually happens.

rewinddir.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function rewinddir() is thread safe.

rint.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions nearbyint(), nearbyintf(), nearbyintl(), rint(),
      rintf() and rintl() are thread safe.

seekdir.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function seekdir() is
 thread safe.

telldir.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function telldir() is thread safe.

wctomb.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function wctomb() is not thread safe.

wavelan.4
  Michael Kerrisk [Elie De Brauwer]
    This driver disappeared in 2.56.35

dir_colors.5
  Michael Kerrisk [Stas]
    Add various synonyms
      See http://bugs.debian.org/553477
  Simon Paillard [Stas]
    Add keywords SUID, SGID, STICKY, STICKY_OTHER_WRITABLE, OTHER_WRITABLE
      See http://bugs.debian.org/553477
      See ls.c and dircolors.c in coreutils

proc.5
  Peter Schiffer
    Document /proc/[pid]/io file
      Attempt to document fields in the /proc/[pid]/io file, based on
      the Documentation/filesystems/proc.txt. The text will probably
      need some grammar corrections.

Michael Kerrisk [Marko Myllynen]
/proc/sys/fs/inode-max
went away in Linux 2.4
Also, the 'preshrink' field in /proc/sys/fs/inode-state became
a dummy value in Linux 2.4.

See https://bugzilla.kernel.org/show_bug.cgi?id=60836
Michael Kerrisk [A. Costa]
Note block size used by /proc/partitions
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=666972
Michael Kerrisk
Add rationale on drop_caches and note that it can hurt performance
See also http://lwn.net/Articles/562211/

bootparam.7
Michael Kerrisk [Eugen Dedu]
Remove "lilo" entries from SEE ALSO
See http://bugs.debian.org/604019

inotify.7
Michael Kerrisk
SEE ALSO: add inotifywait(1) and inotifywatch(1)

ip.7
Simon Paillard
IP_MULTICAST_IF setsockopt recognizes struct mreq (compatibility)
Kernel added compatibility only recently in
3a084ddb4bf299a6e898a9a07c89f3917f0713f7
See: http://bugs.debian.org/607979

standards.7
Michael Kerrisk
Add mention of SUSv4-TC1 (POSIX.1-2013)

========== Changes in man-pages-3.55 ==========

janh <a0vhv@t-online.de>

Apologies if I missed anyone!

Global changes
---

assert.3
assert_perror.3
rexec.3
rpc.3
  Michael Kerrisk [Jon Grant]
    Reword a sentence to use more gender-neutral language

Changes to individual pages
---

execve.2
  Michael Kerrisk
    'arg...' for interpreter scripts starts with argv[1]

fallocate.2
  Christoph Hellwig
    Clarify the zeroing behavior

fallocate() zeroes only space that did not previously contain
data, but leaves existing data untouched.

futex.2
Rodrigo Campos
Fix link to Rusty's futex example library
When I asked to webmaster@kernel.org, Konstantin Ryabitsev
answered that the ".nl." is "an obsolete scheme and really

should be changed to just ftp.kernel.org".

getgroups.2
Michael Kerrisk
Note that NGROUPS_MAX is defined in <limits.h>
Michael Kerrisk
Clarify that sysconf(_SC_NGROUPS_MAX) is a run-time technique
Michael Kerrisk
Document /proc/sys/kernel/ngroups_max

ioctl.2
Michael Kerrisk [KOSAKI Motohiro, David Gibson]
'request' argument is typed as 'unsigned long' in glibc
See https://bugzilla.kernel.org/show_bug.cgi?id=42705

perf_event_open.2
Vince Weaver
Linux 3.12 rdpmc/mmap
It turns out that the perf_event mmap page rdpmc/time setting was
broken, dating back to the introduction of the feature. Due
to a mistake with a bitfield, two different values mapped to
the same feature bit.

A new somewhat backwards compatible interface was introduced
in Linux 3.12. A much longer report on the issue can be found
here:
https://lwn.net/Articles/567894/
Vince Weaver
Linux 3.12 adds PERF_SAMPLE_IDENTIFIER
A new PERF_SAMPLE_IDENTIFIER sample type was added in Linux 3.12.
Vince Weaver
E2BIG documentation
The following documents the E2BIG error return for
perf_event_open().

I actually ran into this error the hard way and it took me
half a day to figure out why my ->size value was changing.
Vince Weaver
Linux 3.12 adds PERF_EVENT_IOC_ID

A new perf_event related ioctl, PERF_EVENT_IOC_ID, was added
in Linux 3.12.

Vince Weaver

PERF_COUNT_SW_DUMMY support

Support for the PERF_COUNT_SW_DUMMY event type was added in
Linux 3.12.

Vince Weaver [Andreas Sandberg]

PERF_EVENT_IOC_PERIOD update

The PERF_EVENT_IOC_PERIOD ioctl was broken until 2.6.36,
and it turns out that the ARM architecture has some
differing behavior too.

pipe.2

Trevor Bramwell

Fix error in example program

poll.2

Michael Kerrisk [Paolo Bonzini]

Clarify meaning of events==0

events==0 does not mean that revents is always returned as
zero. The "output only" events (POLLHUP, POLLERR, POLLNVAL)
can still be returned.

See https://bugzilla.kernel.org/show_bug.cgi?id=61911

readlink.2

Michael Kerrisk [Yuanhang Zheng]

Fix typo in error message in example program

recv.2

Michael Kerrisk

Remove out-of-date statement that UNIX domain does not support MSG_TRUNC

Should have removed that sentence as part of
commit a25601b48b822eb1882ae336574b8d062a17e564

sched_get_priority_max.2

Michael Kerrisk

Add SCHED_IDLE to discussion

send.2

Michael Kerrisk

RETURN VALUE: these calls return number of bytes (not characters) sent

setreuid.2

Michael Kerrisk

Small clarification to description of when saved
set-user-ID is set

sigpending.2
  Michael Kerrisk
    Note treatment of signals that are blocked *and* ignored

stat.2
  Michael Kerrisk
    Note filesystem support for nanosecond timestamps
      Add some detail on which native filesystems do and don't
      support nanosecond timestamps.
  Michael Kerrisk
    Cosmetic reworking of timestamp discussion in NOTES
  Michael Kerrisk [Yang Yang]
    Update discussion of nanosecond timestamps
      The existing text describes the timestamp fields as 'time_t'
      and delegates discussion of nanosecond timestamps under NOTES.
      Nanosecond timestamps have been around for a while now,
      and are in POSIX.1-2008, so reverse the orientation of the
      discussion, putting the nanosecond fields into DESCRIPTION
      and detailing the historical situation under NOTES.

symlink.2
  Michael Kerrisk
    Further fine tuning of argument names
      Follow-up
 to f2ae6dde0c68448bec986d12fe32268a2c98bfd9
      See https://sourceware.org/bugzilla/show_bug.cgi?id=16073
  Michael Kerrisk [Fabrice Bauzac]
    Give arguments of symlink() more meaningful names

adjtime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function adjtime() is thread safe.

alloca.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function alloca() is thread safe.

asinh.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions asinh(), asinhf() and asinhl() are thread safe.

atan.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions atan(), atanf() and atanl() are thread safe.

atof.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function atof() is thread safe with exceptions.

atoi.3
  Peng Haitao
    ATTRIBUTES: Note functions that
 are thread safe with exceptions
      The functions atoi(), atol() and atoll() are thread safe with
      exceptions.

bcmp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bcmp() is thread safe.

bcopy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bcopy() is thread safe.

bsd_signal.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bsd_signal() is thread safe.

bzero.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bzero() is thread safe.

cbrt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cbrt(), cbrtf() and cbrtl() are thread safe.

copysign.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions copysign(), copysignf() and copysignl() are thread
      safe.

cos.3
  Peng Haitao
     ATTRIBUTES: Note functions that are thread-safe
      The functions cos(), cosf() and cosl() are thread safe.

cproj.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cproj(), cprojf() and cprojl() are thread safe.

creal.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions creal(), crealf() and creall() are thread safe.

daemon.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function daemon() is thread safe.

des_crypt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions ecb_crypt(), cbc_crypt() and des_setparity() are
      thread safe.

difftime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function difftime() is thread safe.

dysize.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function dysize()
 is thread safe.

erf.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions erf(), erff() and erfl() are thread safe.

erfc.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions erfc(), erfcf() and erfcl() are thread safe.

euidaccess.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions euidaccess() and eaccess() are thread safe.

expm1.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions expm1(), expm1f() and expm1l() are thread safe.

fexecve.3
  Michael Kerrisk
    POSIX.1-2008 specifies fexecve()
  Michael Kerrisk
    Explain the use and rationale of fexecve()

ftime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function ftime() is thread safe.

ftok.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function
 ftok() is thread safe.

ftw.3
  Michael Kerrisk
    nftw() visits directories with FTW_D if FTW_DEPTH was not specified
  Michael Kerrisk
    Explain probable cause of FTW_NS

futimes.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions futimes() and lutimes() are thread safe.

getaddrinfo.3
  Michael Kerrisk
    Explain one use case for AI_ADDRCONFIG
  Michael Kerrisk
    Highlight difference in ai_flags when hints==NULL
      NOTES already described how glibc differs from POSIX.
      Add a pointer to that text from the point in DESCRIPTION
      where hints==NULL is discussed.

kcmp.3
  Shawn Landden
    Reword slightly awkward section

malloc.3
  Greg Price

Scale back promises of alignment
It's not true that the return value is suitably aligned for "any variable"; for example, it's unsuitable for a variable like
float *x __attribute__ ((__vector_size__ (32)));
which requires 32-byte alignment. Types like this are defined in <avxintrin.h>, and with 16-byte alignment in <emmintrin.h> and <xmmintrin.h>, so the application programmer need not even know that a vector_size attribute has been applied.

On an x86 architecture, a program that loads from or stores to a pointer with this type derived from malloc can crash because GCC generates an aligned load/store, like MOVDQA.

The C99 standard (TC3, as of N1256) does say the return value is suitably aligned for "any type of object". The C11 standard (as of N1570) revises this to any type with "fundamental alignment", which means an alignment "supported by the implementation in all contexts", which I suppose tautologically includes aligning malloc/realloc return values.

The actual behavior of current glibc malloc is to align to the
greater of 2 * sizeof(size_t) and __alignof__ (long double), which may be one bit greater than this commit promises.

mq_receive.3
Michael Kerrisk [janh]
msg_len must be greater than *or equal to* mq_msgsize
See https://bugzilla.kernel.org/show_bug.cgi?id=64571

setenv.3
Michael Kerrisk
Clarify that setenv() returns success in the overwrite==0 case

sigsetops.3
Michael Kerrisk [Robert P. J. Day]
Add 'const' to sigisemptyset(), sigorset(), sigandset() declarations
Michael Kerrisk
Rework text describing sigisemptyset(), sigorset(), and sigandset()

statvfs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions statvfs() and fstatvfs() are thread safe.

stdarg.3
Peng Haitao

ATTRIBUTES: Note macros that are thread-safe
The macros va_start(), va_arg(), va_end() and va_copy() are thread safe.

termios.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tcgetattr(), tcsetattr(), tcsendbreak(), tcdrain(), tcflush(), tcflow(), cfmakeraw(), cfgetispeed(), cfgetospeed(), cfsetispeed(), cfsetospeed() and cfsetspeed() are thread safe.

ungetwc.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function ungetwc() is thread safe.

unlockpt.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function unlockpt() is thread safe.

usleep.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function usleep() is thread safe.

wcpcpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcpcpy() is thread safe.

wcscasecmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcscasecmp() is thread safe with exceptions.

wcscat.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscat() is thread safe.

wcschr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcschr() is thread safe.

wcscmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscmp() is thread safe.

wcscpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscpy() is thread safe.

wcscspn.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscspn() is thread safe.

wcslen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcslen() is thread safe.

wcsncasecmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcsncasecmp() is thread safe with exceptions.

wcsncat.3
Peng Haitao
ATTRIBUTES:
Note function that is thread-safe
The function wcsncat() is thread safe.

wcsncmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsncmp() is thread safe.

wcsncpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsncpy() is thread safe.

wcsnlen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsnlen() is thread safe.

wcspbrk.3
Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function wcspbrk() is thread safe.

wcsrchr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsrchr() is thread safe.

wcsspn.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsspn() is thread safe.

wcsstr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsstr() is
thread safe.

wcstoimax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions wcstoimax() and wcstoumax() are thread safe with exceptions.

wcstok.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcstok() is thread safe.

wcswidth.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcswidth() is thread safe with exceptions.

wctrans.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wctrans() is thread safe with exceptions.

wctype.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wctype() is thread safe with exceptions.

wcwidth.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions

The function wcwidth() is thread safe with exceptions.

wmemchr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemchr() is thread safe.

wmemcmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemcmp() is thread safe.

wmemcpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemcpy() is thread safe.

wmemmove.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemmove() is thread safe.

wmemset.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemset() is thread safe.

tty_ioctl.4
Michael Kerrisk [Liu Jiaming]
Note that 'arg' should be 0 in the usual case when using TIOCSCTTY
Michael Kerrisk
Rework text on root to discuss just in terms of capabilities

proc.5
Michael Kerrisk
Document /proc/sys/kernel/ngroups_max

capabilities.7
Michael Kerrisk
Fix 2 version
numbers under "Effect of user ID changes on capabilities"

feature_test_macros.7
Michael Kerrisk
Add _ISOC11_SOURCE to example program

tcp.7
Michael Kerrisk

Fix (nontrivial) wordo in discussion of MSG_TRUNC
s/MSG_PEEK/MSG_TRUNC/

ld.so.8
Michael Kerrisk [Alfred Agrell]
Fix crufty wording in one sentence

========== Changes in man-pages-3.56 ==========

Released: 2014-01-11, Christchurch

In memory of Doris Church (1939-2013)

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

fgetc.3
gets.3
  David Malcolm
    Split gets(3) to isolate unsafe gets(3) to a page on its own
      Currently man3/gets.3 documents various safe I/O functions, along
      with the toxic "gets" function.

      At the risk of being melodramatic, this strikes me as akin to
      storing rat poison in a food cabinet, in the same style of
      packaging as the food, but with a post-it note on it saying
      "see warnings below".

      I think such "never use this" functions should be quarantined
      into their own manpages, rather than listing them alongside
      sane functions.

      The attached patch does this for "gets", moving the documentation
      of the good functions from man3/gets.3 into man3/fgetc.3,
      updating the SO links in the relevant functions to point at the
      latter.

      It then rewrites man3/gets.3 to spell out that "gets" is toxic
      and should never be
 used (with a link to CWE-242 for good
      measure).
  Michael Kerrisk [Andre Majorel]
    Tweaks to David Malcolm's patch

vdso.7
  Mike Frysinger
    New page documenting the vDSO mapped into each process by the kernel

Newly documented interfaces in existing pages

---

reboot.2
  Elie De Brauwer
    Document LINUX_REBOOT_SW_SUSPEND

New and changed links
---

fgets.3
getc.3
getchar.3
ungetc.3
  Michael Kerrisk
    Adjust links to gets(3) to point to fgetc(3)

Global changes

Various pages
  Michael Kerrisk
    Global fix of "NULL pointer"
      Change "NULL pointer" to "NULL" or null pointer".
      POSIX uses the term "null pointer", not "NULL pointer".

Various pages
  Michael Kerrisk
    Stylistic changes to code example
      For ease of reading, don't embed assignments inside if().

Various pages
  Michael Kerrisk
    Replace uses of
 "i.e.," in main text with "that is" or similar
      Usual man-pages style is to use "i.e." only within
      parenthetical expressions.

Various pages
  Michael Kerrisk
    Replace uses of "e.g." in main text with "for example" or similar
        Usual man-pages style is to use "e.g." only within
        parenthetical expressions.

Various pages
  Michael Kerrisk
    Add "Program source" subheading under EXAMPLE

Various pages
  Michael Kerrisk
    Add "static" to global variables and functions in example program

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk [Nadav Har'El]
    Improve description of CLOCK_PROCESS_CPUTIME_ID
      See https://bugzilla.kernel.org/show_bug.cgi?id=67291

close.2
  Michael Kerrisk [P?draig Brady]
    Note that errors from close() should be used only for diagnosis
      In particular, retrying after EINTR is a bad idea.

      See http://austingroupbugs.net/view.php?id=529

       See http://thread.gmane.org/gmane.comp.lib.glibc.alpha/37702
      Subject: [RFC][BZ #14627] Make linux close errno to EINPROGRESS
            when interrupted in signal.

execve.2
  Michael Kerrisk [Marco Dione]
    Add further cases to EFAULT error
      See https://sourceware.org/bugzilla/show_bug.cgi?id=16402

perf_event_open.2
  Vince Weaver [Sudhanshu Goswami]
    Clarify issues with the disabled bit
      Clarify the perf_event_open behavior with respect to the disabled
      bit and creating event groups.
  Vince Weaver [Sudhanshu Goswami]
    Clarify issues with the exclusive bit
      Warn that using the perf_event_open "exclusive" bit, while
      it might seem like a good idea, might lead to all 0 results
      in some common usage cases.

reboot.2
  Elie De Brauwer
    Mention RB_POWER_OFF
      The manpage did not mention RB_POWER_OFF which
 is the glibc
      symbolic name for LINUX_REBOOT_CMD_POWER_OFF.

$ cd /usr/include
$ cat x86_64-linux-gnu/sys/reboot.h | grep POWER_OFF
define RB_POWER_OFF 0x4321fedc
Elie De Brauwer
Add "Linux" to kernel version numbers
Michael Kerrisk
Add RB_SW_SUSPEND synonym
Michael Kerrisk
Add RB_KEXEC synonym

setpgid.2
Michael Kerrisk [Joseph S. Myers]
BSD getpgrp() and setpgrp() go away in glibc 2.19

socket.2
Michael Kerrisk [Dongsheng Song]
Remove crufty statement that AF_INET does not support SOCK_SEQPACKET
Linux AF_INET supports SOCK_SEQPACKET via SCTP.

syscall.2
Mike Frysinger
Fix ia64 registers
The original list of registers was created by confusing strace
source code--this is for parsing legacy 32-bit code (which is
dead and no one cares). Update the list to reflect native ia64
syscall interface.

syscall.2
syscalls.2
getauxval.3
Mike Frysinger
Add references to new vdso(7) page

utimensat.2
Michael Kerrisk
Small wording improvement for times!=NULL case

dlopen.3
Michael Kerrisk [Mike Frysinger]
Update remarks on cast needed when assigning dlsym() return value
POSIX.1-2013 eases life when casting the dlsym() return value to a
function pointer
Michael Kerrisk [Stephen Kell]
Fix description of dli_sname
See https://sourceware.org/bugzilla/show_bug.cgi?id=16262

getline.3
Michael Kerrisk [Luke Hutchison]

Correct description of how '*n' is used when '*lineptr' == NULL
See https://sourceware.org/bugzilla/show_bug.cgi?id=5468
Michael Kerrisk
Remove SEE ALSO reference to unsafe gets(3)

mcheck.3
Simon Paillard [Raphael Geissert]
typo in compiler flag
See http://bugs.debian.org/732464

mkstemp.3
Michael Kerrisk [Janne Blomqvist]
Better
describe 'flags' that can be specified for mkostemp()

printf.3
Michael Kerrisk [Arif Zaman]
Fix memory leak in snprintf() example
See http://stackoverflow.com/questions/19933479/snprintf-man-page-example-memory-leak

pthread_kill.3
Michael Kerrisk [Mathieu Desnoyers]
POSIX.1-2008 removes ESRCH
POSIX.1-2001 mistakenly documented an ESRCH error, and
POSIX.1-2008 removes this error. Glibc does return
this error in cases where it can determine that a thread ID
is invalid, but equally, the use of an invalid thread ID
can cause a segmentation fault.

puts.3
Michael Kerrisk
SEE ALSO: replace reference to gets(3) with fgets(3)

scanf.3
Michael Kerrisk [Ondej Bílka]
Improve discussion of obsolete 'a' dynamic allocation modifier

setjmp.3
Michael Kerrisk [Joseph S. Myers]
BSD setjmp() semantics go away in glibc 2.19

sigpause.3
Michael Kerrisk [Joseph
S. Myers]
BSD sigpause() goes away in glibc 2.19
Michael Kerrisk
Correct feature text macro requirements
Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function sigpause() is thread safe.

sigqueue.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sigqueue() is thread safe.

sigwait.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sigwait() is thread safe.

sin.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sin(), sinf() and sinl() are thread safe.

sincos.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sincos(), sincosf() and sincosl() are thread safe.

string.3
Moritz 'Morty' Strübe
Add short description of the functions
It is helpful to have a short description about what the different
functions
in string.h do.
Michael Kerrisk
Fixes and enhancements to Moritz Strübe's patch

strptime.3
Michael Kerrisk [Mathieu Malaterre, Simon Paillard]
Add number ranges to comments in 'tm' structure
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729570
Michael Kerrisk
Point to ctime(3) for more details on 'tm' structure
Michael Kerrisk
Some rewording and reorganization

strsep.3
Michael Kerrisk
Clarify description
The use of "symbols" in the existing description is confusing;
it's "bytes". Other fixes as well.

strspn.3

Michael Kerrisk [Mathieu Malaterre]
Improve description in NAME
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=723659

strstr.3
Michael Kerrisk
Clarify RETURN VALUE: s/substring/located substring/

sysv_signal.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sysv_signal() is thread
safe.

tan.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tan(), tanf() and tanl() are thread safe.

tanh.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tanh(), tanhf() and tanhl() are thread safe.

toascii.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function toascii() is thread safe.

toupper.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions toupper() and tolower() are thread safe with
exceptions.

towctrans.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function towctrans() is thread safe.

towlower.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function towlower() is thread safe with exceptions.

towupper.3
Peng Haitao
ATTRIBUTES: Note function that is

thread safe with exceptions
        The function towupper() is thread safe with exceptions.

ualarm.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function ualarm() is thread safe.

wcpncpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcpncpy() is thread safe.

proc.5
  Michael Kerrisk [Sworddragon2]
    Fix formula for CommitLimit under /proc/meminfo
      See https://bugzilla.kernel.org/show_bug.cgi?id=60991

credentials.7
  Michael Kerrisk
    List APIs that operate on process groups
  Michael Kerrisk
    Add details on controlling terminal and foreground/background jobs

feature_test_macros.7
  Michael Kerrisk
    Document _DEFAULT_SOURCE
  Michael Kerrisk [Joseph S. Myers]
    From glibc 2.19, _BSD_SOURCE no longer causes __FAVOR_BSD
      Starting with glibc 2.19, _BSD_SOURCE no longer causes BSD
      definitions to be favored in cases
 where standards conflict.

libc.7
  Mike Frysinger
    SEE ALSO: add various entries

man-pages.7
  Michael Kerrisk [Mike Frysinger]
    Add STYLE GUIDE section
      Incorporate some of the existing material in the page
      into the STYLE GUIDE, and add a lot more material, mainly
      drawn from the "Global changes" sections in the release
      changelogs.
  Michael Kerrisk
    Add historical note on reason for use of American spelling
  Michael Kerrisk [Mike Frysinger]
    Various improvements to style guide

packet.7
  Willem de Bruijn [Daniel Borkmann]
    Document fanout, ring, and auxiliary options
      This patch adds descriptions of the common packet socket options
        PACKET_AUXDATA, PACKET_FANOUT, PACKET_RX_RING, PACKET_STATISTICS,
        PACKET_TX_RING
      and the ring-specific options
        PACKET_LOSS, PACKET_RESERVE, PACKET_TIMESTAMP, PACKET_VERSION
  Michael Kerrisk
     Add kernel version numbers for PACKET_VERSION and PACKET_TIMESTAMP

ld.so.8
  Michael Kerrisk [Matthias Klose]
    Default output file for D_DEBUG is stderr not stdout
      See https://sourceware.org/bugzilla/show_bug.cgi?id=6874

========== Changes in man-pages-3.57 ==========

Released: 2014-01-24, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Andre Majorel <aym-xunil@teaser.fr>
Andrey Vagin <avagin@openvz.org>
Andy Lutomirski <luto@amacapital.net>
Axel Beckert <abe@debian.org>
Bernhard Walle <bernhard@bwalle.de>
Brandon Edens <bedens@fitbit.com>
Eliezer Tamir <eliezer.tamir@linux.intel.com>
Gioele Barabucci <gioele@svario.it>
Ian Abbott <abbotti@mev.co.uk>
Jerry Chu <hkchu@google.com>
Jonas Jonsson <jonas@websystem.se>
Marc Lehmann <debian-reportbug@plan9.de>
Michael
 Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>

Reuben Thomas <rrt@sc3d.org>
Simone Piccardi <piccardi@truelite.it>
Simon Paillard <spaillard@debian.org>
Thomas Posch <man-pages@online.posch.name>
Tilman Schmidt <tilman@imap.cc>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>
 <socketpair@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

msgop.2
  Michael Kerrisk
    Document MSG_COPY

open.2
  Michael Kerrisk, Andy Lutomirski
    Document O_TMPFILE
      O_TMPFILE is new in Linux 3.11

perf_event_open.2
  Vince Weaver [Andi Kleen]
    PERF_SAMPLE_TRANSACTION support in Linux 3.13
      The following patch adds descriptions of the new perf_event_open.2
      PERF_SAMPLE_TRANSACTION sample type as added in Linux 3.13.

      The descriptions
 are based on information provided by Andi Kleen,
      both in the e-mail

        [PATCH 1/6] perf, core: Add generic transaction flags v5

      sent to the linux-kernel list as well as an e-mail

        [PATCH] Document transaction flags in perf_event_open manpage

      sent to the linux-man list.

      The implementation is based heavily on the Intel Haswell
      processor. Documentation can be found at this page:
      http://software.intel.com/en-us/blogs/2013/05/03/intelr-transactional-synchronization-extensions-intelr-tsx-profiling-with-linux-0
      as well as in section 18.11.5.1 of volume 3 of the
      Intel 64 and IA-32 Architecture Software Developer's Manual.

ptrace.2
  Andrey Vagin
    Add description for PTRACE_PEEKSIGINFO
      Retrieve signals without removing them from a queue.
  Andrey Vagin
    Add description for PTRACE_GETSIGMASK and PTRACE_SETSIGMASK
      These two
 commands allow to examine and change mask of blocked
      signals.

socket.7
  Eliezer Tamir
    Add description for SO_BUSY_POLL
      Add description for the SO_BUSY_POLL socket option.

tcp.7
  Michael Kerrisk [Jerry Chu]
    Document TCP_USER_TIMEOUT
      Text slightly adapted from Jerry Chu's (excellent) commit
      message (commit dca43c75e7e545694a9dd6288553f55c53e2a3a3).
  Michael Kerrisk
    Document TCP_CONGESTION

Global changes

Various pages
  Michael Kerrisk
    Reword to avoid use of "etc."

Various pages
  Peng Haitao [Andre Majorel]
    Make wording around thread-safety and setlocale() more precise

getdate.3
strptime.3
locale.5
  Michael Kerrisk
    Replace "weekday" with less ambiguous language
      Notwithstanding POSIX's use of the term "weekday", in everyday
      English, "weekday" is commonly understood to mean a day in the
      set [Monday..Friday] (vs one of the
 "weekend" days).

Changes to individual pages

---

epoll_wait.2
  Michael Kerrisk [Jonas Jonsson]
    Clarify wording of EINTR error
      See https://bugzilla.kernel.org/show_bug.cgi?id=66571

faccessat.2
  Michael Kerrisk
    Note that the system call takes only three arguments

fallocate.2
  Michael Kerrisk
    Note filesystems that support FALLOC_FL_PUNCH_HOLE operation

fcntl.2
  Michael Kerrisk
    BUGS: The O_SYNC and O_DSYNC flags are not modifiable using F_SETFL
  Michael Kerrisk
    Add subsections under BUGS
      There's several bugs listed. It's helpful to mark
      them separately.
  Michael Kerrisk
    POSIX.1 specifies F_SETOWN and F_GETOWN for sockets/SIGURG

getrlimit.2
  Michael Kerrisk [ ]
    Note that rlim_cur can be set lower than current resource consumption

getsockopt.2
  Michael Kerrisk
    SEE ALSO: add ip(7) and udp(7)

keyctl.2
  Michael Kerrisk
     SEE ALSO: mention Documentation/security/keys.txt

linkat.2
  Michael Kerrisk
    Add ENOENT for O_TMPFILE created with O_EXCL
  Michael Kerrisk
    ERRORS: Add EINVAL

lseek.2
  Michael Kerrisk
    Note which filesystems support SEEK_HOLE/SEEK_DATA

msgop.2

Michael Kerrisk
Note that MSG_EXCEPT is Linux-specific

open.2
Michael Kerrisk
Update CONFORMING TO
Add POSIX.1-2008. Add mention of O_TMPFILE.
Update text on various flags that were added in POSIX.1-2008, and
whose definitions can, since glibc 2.12, be obtained by suitably
defining _POSIX_C_SOURCE or _XOPEN_SOURCE
Michael Kerrisk
Add pointer in description to BUGS, for O_ASYNC limitation
Michael Kerrisk
Remove crufty duplicate text on modifying file status flags

ptrace.2
Michael Kerrisk
Add details to descriptions of PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

select.2
Michael Kerrisk [Marc Lehmann]
RETURN VALUE: Fix discussion of treatment of file descriptor sets
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=574370

syscalls.2
Michael Kerrisk
Remove madvise1() from main list
madvise1() is one of the system calls that was never
implemented, and listed toward the bottom of the page.

timer_create.2
Michael Kerrisk
Add pointer to proc(5) for info on /proc/[pid]/timers

unlinkat.2
Michael Kerrisk [Mike Frysinger:]
ERRORS: Add EISDIR
See https://bugzilla.kernel.org/show_bug.cgi?id=29702

ferror.3
Michael Kerrisk
clearerr(), feof(), and ferror() are also POSIX-conformant
Michael Kerrisk [Reuben Thomas]
CONFORMING TO: add fileno()

gets.3
Ian Abbott
SEE ALSO: add fgets(3)

mq_receive.3
mq_send.3
  Michael Kerrisk [Simone Piccardi]
    SYNOPSIS: s/unsigned/unsigned int/

printf.3
  Michael Kerrisk
    Small reorganization of text in EXAMPLE

rand.3
   Michael Kerrisk
    s/unsigned/unsigned int/ in example

stpcpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function stpcpy() is thread safe.

stpncpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function stpncpy() is thread safe.

strcat.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strcat() and strncat() are thread safe.

strchr.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strchr(), strrchr() and strchrnul() are thread safe.

strcmp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strcmp() and strncmp() are thread safe.

strftime.3
  Brandon Edens
    Change "week day" to "day of week"
      See https://bugzilla.kernel.org/show_bug.cgi?id=68861

strstr.3
  Peng Haitao
    ATTRIBUTES: Note function that

is thread safe with exceptions
The function strstr() is thread safe.
The function strcasestr() is thread safe with exceptions.

strtod.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtod(), strtof() and strtold() are thread safe
with exceptions.

strtoimax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtoimax() and strtoumax() are thread safe with
exceptions.

strtol.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtol(), strtoll() and strtoq() are thread safe
with exceptions.

tcgetpgrp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tcgetpgrp() and tcsetpgrp() are thread safe.

tcgetsid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe

The function tcgetsid() is thread safe.

core.5
Bernhard Walle
Mention that %E exists since Linux 3.0
'%E' in the 'core_pattern' has been introduced in kernel commit
57cc083ad9e1bfeeb4a0ee831e7bb008c8865bf0 which was included in
version 3.0. Add that information to the manual page.

filesystems.5
Michael Kerrisk [Axel Beckert]
Add reference to proc(5) for more details on /proc/filesystems
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=735590

locale.5
Michael Kerrisk
SEE ALSO: add locale(7)

proc.5
  Michael Kerrisk
    Document /proc/[pid]/timers
  Michael Kerrisk
    Update discussion of wchan
      Remove crufty reference to /etc/psdatabase in /proc/PID/stat.
      Add /proc/PID/wchan.

      See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/737452

environ.7
  Michael Kerrisk [Gioele Barabucci]
    Correct reference to locale(7) (not locale(5))
       locale(7) is the right place for details of the LC_*
      environment variables.

      See http://bugs.debian.org/638186
  Michael Kerrisk
    Improve references for discussion of locale environment variables
  Michael Kerrisk
    SEE ALSO: add catopen(3)
  Michael Kerrisk
    SEE ALSO: add locale(5)

man-pages.7
  Michael Kerrisk
    Prefer "usable" over "useable"

netdevice.7
  Tilman Schmidt
    Document SIOCGIFCONF case ifc_req==NULL
      Add the missing description of the possibility to call SIOCGIFCONF
      with ifc_req==NULL to determine the needed buffer size, as
      described in
      http://lkml.indiana.edu/hypermail/linux/kernel/0110.1/0506.html
      and verified against source files net/core/dev_ioctl.c and
      net/ipv4/devinet.c in the current kernel git tree.
      This functionality has been present since the beginning of the 2.6
      series. It's about time
 it gets documented.

      While I'm at it, also generally clarify the section on
      SIOCGIFCONF.

standards.7
  Michael Kerrisk
    Enhance description of V7

Michael Kerrisk
Add C11

tcp.7
Michael Kerrisk
Describe format of tcp_*_congestion_control /proc files
Describe format of tcp_allowed_congestion_control and
tcp_available_congestion_control.

========== Changes in man-pages-3.58 ==========

Released: 2014-02-11, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>

<ayjj_8109@qq.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

pipe.2
Michael Kerrisk
Document the pipe2() O_DIRECT flag added in Linux 3.4

packet.7
  Daniel Borkmann
    Document PACKET_QDISC_BYPASS
      New in Linux 3.14.

Global changes

Various pages
  Simon Paillard
    Formatting fix: add space between function and () if BR or IR
      Detected through the regex:
        git grep -P '^\.(BR|IR) [\w]*\([\d]*\)$'

Various pages
  Simon Paillard
    Formatting fix: add space between word and punctuation if BR or IR
      Detected through the regex:
        git grep -P '^\.(BR|IR) [^]*[,\.]$'

       Could probably be extended to match more cases and fix in perl.

Various pages
  Michael Kerrisk
    Use Oxford comma

gettid.2
restart_syscall.2
passwd.5
socket.7
  Michael Kerrisk
    Fix order of SEE ALSO entries

Changes to individual pages
---

epoll_wait.2
  Michael Kerrisk [Network Nut]
    Remove word "minimum" from the description of 'timeout'

epoll_wait.2
poll.2
select.2
  Michael Kerrisk
    Go into more detail on timeout and when call will cease blocking

getxattr.2
listxattr.2
removexattr.2
setxattr.2
  Michael Kerrisk [Fabrice Bauzac]
    Correct header file is <sys/xattr.h> (not <xattr/xattr.h>)
      See https://bugzilla.kernel.org/show_bug.cgi?id=70141

msgctl.2
  Cyril Hrubis
    Add note about ignored arg to IPC_RMID

prctl.2
  Michael Kerrisk [ ]
    PR_SET_PDEATHSIG value is preserved across execve(2)

recv.2
  Michael Kerrisk
    Rework and reorganize the
 text in various parts of the page.
    Isolate details specific to recv() vs recvfrom() vs recvmsg()
      Place details specific to each system call under a
      separate subheading.
    Rework discussion of 'src_addr' and 'addrlen' for recvfrom()
    Add description of 'buf' and 'len' in recvfrom() section
    'addrlen' should be 0 (*not* NULL) when 'src_addr' is NULL
    Improve text describing recvfrom() call that is equivalent to recv()
  Michael Kerrisk []
    Describe the various cases where the return value can be 0

shmctl.2
  Michael Kerrisk
    Note that 'buf' is ignored for IPC_RMID

symlinkat.2
  Michael Kerrisk
    Make argument names consistent with symlink(2) page

isalpha.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions isalnum(), isalpha(), isascii(), isblank(),
      iscntrl(), isdigit(), isgraph(), islower(), isprint(),
      ispunct(), isspace(),
 isupper() and isxdigit() are thread safe.

isatty.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function isatty() is thread safe.

isgreater.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The macros isgreater(), isgreaterequal(), isless(),
islessequal(), islessgreater() and isunordered() are thread safe.

iswalnum.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswalnum() is thread safe with exceptions.

iswalpha.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswalpha() is thread safe with exceptions.

iswblank.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswblank() is thread safe with exceptions.

iswcntrl.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions

The function iswcntrl() is thread safe with exceptions.

lockf.3
Michael Kerrisk [Simone Piccardi]
Fix incorrect argument mentioned under EINVAL error

pthread_kill.3
Michael Kerrisk
Add feature test macro requirements

pthread_sigmask.3
Michael Kerrisk
Add feature test macro requirements

strtoul.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtoul(), strtoull() and strtouq() are thread safe
with exceptions.

nscd.conf.5
  Peter Schiffer
    Add note about default values

proc.5
  Michael Kerrisk
    SEE ALSO: Add some further kernel Documentation/sysctl files

man-pages.7
  Michael Kerrisk
    ATTRIBUTES sections come after VERSIONS
      Peng Haitao has consistently ordered the ATTRIBUTES after
      VERSIONS, so adjust the text in man-pages.7

vdso.7
  Michael Kerrisk
    Add words "virtual dynamic shared object" in DESCRIPTION

Apologies if I missed anyone!

Global changes

Various pages
  Peter Schiffer, Michael Kerrisk [Weizhou Pan]
    Convert pages containing non-ASCII in source code comments to use UTF-8
      Done using a slightly modified version of Peter Schiffer's
      convert_to_utf_8.sh script. The script was modified so as *not*

a "coding:" marker to the groff source. For now, we'll only put
that marker on pages that contain non-ASCII characters in the
rendered text.

See https://bugzilla.kernel.org/show_bug.cgi?id=60807

New and rewritten pages

A note from Christoph Hellwig prompted me to perform a task that has
been queued for a while: merging the text of the man pages for the
*at([23]) ("directory file descriptor") APIs into their corresponding
traditional pages. When the *at([23]) pages were originally written
(mostly in 2006), the APIs were not part of POSIX and (in most cases)
were not available on other systems. So, it made some sense to wall
them off into their own separate pages. Eight years later, with the
APIs now all in POSIX (except scandirat()), it is much more sensible
to document the newer APIs alongside their traditional counterparts,

so that the newer APIs are not "hidden", and the reader can more
easily see the differences between the APIs.

Thus, the text of 14 pairs of pages has been merged, and the "merged
from" pages have been converted to links to the "merged to" pages.
Along
 the way, a few other fixes were made to the pages, as noted
below.

One page that did not undergo such a change was utimensat(2), which
is different enough from utime(2) that it warrants a separate page.
Unlike the other *at() pages, the utimensat(2) page was also already
self-contained, rather than defining itself in terms of differences
from utime(2) as the other *at() pages did.

access.2
  Michael Kerrisk
    Merge text from faccessat(2)
  Michael Kerrisk
    Remove faccessat() race warning
      That point is already covered in existing text in this page.
  Michael Kerrisk
    access() also conforms to POSIX.1-2008

chmod.2
  Michael Kerrisk
    Merge text from fchmodat(2)
  Michael Kerrisk
    Use argument name 'pathname' throughout page
      (Some APIs were using 'path' while others used 'pathname')
  Michael Kerrisk
    CONFORMING TO: chmod() and fchmod() are also in POSIX.1-2008

chown.2
  Michael Kerrisk
    Merge text
 of fchownat(2)
  Michael Kerrisk
    AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE
  Michael Kerrisk
    Use argument name 'pathname' throughout page
      (Some APIs were using 'path' while others used 'pathname')
  Michael Kerrisk
    Remove sentence that fchownat() is present on Solaris
      That point was only really relevant before fchownat() was
      standardized in POSIX.1.2008.
  Michael Kerrisk
    CONFORMING TO: chown(), fchown(), lchown() are in POSIX.1-2008

link.2
  Michael Kerrisk
    Merge text of linkat(2)
  Michael Kerrisk
    CONFORMING TO: link() is in POSIX.1-2008
  Michael Kerrisk
    AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE

mkdir.2
  Michael Kerrisk
    Merge text of mkdirat(2)
  Michael Kerrisk
    CONFORMING TO: mkdir() is in POSIX.1-2008

mknod.2
  Michael Kerrisk
    Merge text of mknodat(2)
  Michael Kerrisk
    CONFORMING TO: mknod(2) is in POSIX.1-2008

open.2
   Michael Kerrisk
    Merge text from openat(2)
  Michael Kerrisk
    Remove sentence that openat() is present on Solaris
      That point was only really relevant before openat() was
      standardized in POSIX.1.2008.

readlink.2
  Michael Kerrisk
    Merge text of readlinkat(2)
  Michael Kerrisk
    CONFORMING TO: readlink() is in POSIX.1-2008.
  Michael Kerrisk
    Use argument name 'pathname' throughout page
      (Some APIs were using 'path' while others used 'pathname')

rename.2
  Michael Kerrisk
    Merge text of renameat(2)
  Michael Kerrisk
    CONFORMING TO: rename(2) is in POSIX.1-2008

stat.2
  Michael Kerrisk
    Merge text from fstatat(2)
  Michael Kerrisk

AT_EMPTY_PATH and AT_NO_AUTOMOUNT are Linux-specific
These flags require _GNU_SOURCE.
Michael Kerrisk
Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others
used 'pathname')
Michael Kerrisk
Remove sentence that fstatat() is present on Solaris
That point was only really relevant before fstatat() was
standardized in POSIX.1.2008.
Michael Kerrisk
CONFORMING TO: stat(), fstat(), lstat() are specified in POSIX.1-2008

symlink.2
Michael Kerrisk
Merge text of symlinkat(2)
Michael Kerrisk
CONFORMING TO: symlink() is in POSIX.1-2008

unlink.2
Michael Kerrisk
Merge text of unlinkat(2)
Michael Kerrisk
Remove sentence that unlinkat() is present on Solaris
That point was only really relevant before unlinkat() was
standardized in POSIX.1.2008.
Michael Kerrisk
CONFORMING TO: unlink() is in POSIX.1-2008

mkfifo.3
Michael Kerrisk
Merge text of mkfifoat(3)
Michael Kerrisk
CONFORMING TO: mkfifo() is in POSIX.1-2008

scandir.3
Michael Kerrisk
Merge text of scandirat(3)
Michael Kerrisk

Update feature test macro requirements
The FTM requirements changed in glibc 2.10.
Michael Kerrisk
Remove libc4/libc5 note under CONFORMING TO
No-one much cares about Linux libc these days.
Michael Kerrisk
Put detail about alphasort under a NOTES heading
This text was under CONFORMING TO, which made no sense.

Michael Kerrisk
Rework CONFORMING TO text

Newly documented interfaces in existing pages
---

prctl.2
Kir Kolyshkin
Document PR_SET_MM options in Linux 3.5
Some of the PR_SET_MM options were merged to vanilla kernel
later, and appeared in Linux 3.5. Those are:

- PR_SET_MM_ARG_START
- PR_SET_MM_ARG_END
- PR_SET_MM_ENV_START
- PR_SET_MM_ENV_END
- PR_SET_MM_AUXV
- PR_SET_MM_EXE_FILE

socket.7
Neil Horman
Document the SO_RXQ_OVFL
socket option
Michael Kerrisk
Add kernel version number for SO_RXQ_OVFL

New and changed links
---

faccessat.2
Michael Kerrisk
Convert to link to access.2

fchmodat.2
Michael Kerrisk
Convert to link to chmod.2

fchownat.2
Michael Kerrisk
Convert to link to chown.2

fstatat.2
Michael Kerrisk
Convert to link to stat.2

linkat.2

Michael Kerrisk
Convert to link to link.2

mkdirat.2
Michael Kerrisk
Convert to link to mkdir.2

mknodat.2
Michael Kerrisk
Convert to link to mknod.2

openat.2
Michael Kerrisk
Convert to link to open.2

readlinkat.2
Michael Kerrisk
Convert to link to symlink.2

renameat.2
Michael Kerrisk
Convert to link rename.2

symlinkat.2
Michael Kerrisk
Convert to link to symlink.2

unlinkat.2
Michael Kerrisk
Convert to link to unlink.2

mkfifoat.3
Michael Kerrisk
Convert to link to mkfifo.3

scandirat.3
Michael Kerrisk
Convert to link to scandir.3

Changes to individual pages
---

alarm.2
Michael Kerrisk
Note semantics of alarm with respect to fork() and execve()

fcntl.2

Michael Kerrisk
Warn that F_GETLK info may already be out of date when the call returns

intro.2
Michael Kerrisk
Describe policy on documenting differences between syscall and glibc API

mmap2.2
Michael Kerrisk
Reword note on glibc mmap() wrapper invocation of mmap2()
Michael Kerrisk
This system call does not exist on x86-64

msgctl.2
Michael Kerrisk
ERRORS: add EPERM for unprivileged attempt to set msg_qbytes > MSGMNB

prctl.2
Michael Kerrisk [Xiawei Chen]
Clarify that PR_GET_TIMERSLACK is returned as the function result
Michael Kerrisk
Clarify that PR_GET_SECCOMP is returned as function result
Michael Kerrisk
Clarify that PR_GET_NO_NEW_PRIVS is returned as function
result

ptrace.2
Michael Kerrisk [Andrew Hunter]
Make it clearer that glibc and syscall APIs differ for PTRACE_PEEK*
Thanks to Denys Vlasenko's additions in 78686915aed6bd12
this page does note that the glibc API for PTRACE_PEEK*
differs from the raw syscall interface. But, as the report
at https://bugzilla.kernel.org/show_bug.cgi?id=70801 shows,
this information could be more obvious. This patch makes its so.

sgetmask.2
Michael Kerrisk
Note that these system calls don't exist on x86-64

swapon.2
Michael Kerrisk
Split EINVAL cases into separate entries under ERRORS
Michael Kerrisk
Add EINVAL error for invalid flags to swapon()

syscalls.2
Michael Kerrisk
SEE ALSO: add intro(2)

umount.2
  Michael Kerrisk
    Split EINVAL cases into separate items
  Michael Kerrisk
    ERRORS: Add EINVAL case that was new in 2.6.34

utime.2
  Michael Kerrisk

   Add note that modern applications probably want utimensat(2) etc.

crypt.3
  Michael Kerrisk [KOSAKI Motohiro]
    ERRORS: Add EINVAL and EPERM errors
      See https://bugzilla.kernel.org/show_bug.cgi?id=69771

getifaddrs.3
  Michael Kerrisk
    Enhance example program
      Print statistics for AF_PACKET interfaces.
      Add missing feature test macro definition.
      Reformat output.

iswctype.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function iswctype() is thread safe.

sem_post.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_post() is thread safe.

sem_unlink.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_unlink() is thread safe.

sem_wait.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sem_wait(), sem_trywait() and sem_timedwait() are
       thread safe.

setbuf.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe

The functions setbuf(), setbuffer(), setlinebuf() and setvbuf()
are thread safe.

strlen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strlen() is thread safe.

strnlen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strnlen() is thread safe.

strpbrk.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strpbrk() is thread safe.

strsep.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strsep() is thread safe.

swab.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function swab() is thread safe.

resolv.conf.5
Carlos O'Donell
DESCRIPTION: mention that the data is trusted
In a recent discussion about DNSSEC it
was brought to my
attention that not all system administrators may understand
that the information in /etc/resolv.conf is fully trusted.
The resolver implementation in glibc treats /etc/resolv.conf
as a fully trusted source of DNS information and passes on
the AD-bit for DNSSEC as trusted.

This patch adds a clarifying sentence to make it absolutely
clear that indeed this source of information is trusted.

ascii.7
Michael Kerrisk [Sulaiman Mustafa]
Fix rendering of single quote (decimal character 39)
Michael Kerrisk
SEE ALSO: add utf-8(7)
Michael Kerrisk [Duncan de Wet]

Remove mention of ISO 8859-1 as being the default encoding on Linux

packet.7
  Neil Horman
    Document PACKET_FANOUT_QM fanout mode
  Michael Kerrisk
    Add kernel version for PACKET_FANOUT_QM
  Daniel Borkmann
    Improve PACKET_QDISC_BYPASS description

socket.7
  Michael Kerrisk
    Add kernel version number for SO_BUSY_POLL

========== Changes in man-pages-3.62 ==========

Released: 2014-03-11, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>
Joseph S. Myers <joseph@codesourcery.com>
Marius Gaubas <marius@livejournalinc.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>
Rick Stanley <rstanley@rsiny.com>
Simon Paillard <spaillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages
---

locale.1
  Michael Kerrisk [review from Mike Frysinger]
    New page describing locale(1)

Newly documented interfaces in existing pages

---

locale.5
  Michael Kerrisk
    Document LC_ADDRESS
  Michael
 Kerrisk
    Document LC_IDENTIFICATION
  Michael Kerrisk
    Document LC_MEASUREMENT
  Michael Kerrisk
    Document LC_NAME
  Michael Kerrisk
    Document LC_PAPER
  Michael Kerrisk
    Document LC_TELEPHONE

Removed Pages
---

sync.8
  Michael Kerrisk [Christoph Hellwig, Pádraig Brady]
    Sometime in the 20th century (before my watch), a sync(8)
    page into man-pages. It documents the sync command from
    "fileutils", which long ago become coreutils, and the
    piece under NOTES note some behavior of sync(2)
    that ceased to be true many years ago. The man-pages
    project generally focuses on only Linux kernel and
    (g)libc interfaces, so this sync(8) page doesn't really
    belong. Furthermore, coreutils has a sync(1) page which
    covers the same command. After discussions on the
    coreutils list, I've decided to retire this page from
    man-pages.

Changes to individual pages
---

clone.2
   Michael Kerrisk
    Note that CLONE_THREAD also in effect requires CLONE_VM

stat.2
  Michael Kerrisk [Marius Gaubas]
    Warn the reader that the 'stat' structure definition is not precise
      Padding fields aren't shown, and the order of fields varies
      somewhat across architectures.

gethostbyname.3
  Michael Kerrisk
    Remove redundant FTM requirements
      _GNU_SOURCE implies _SVID_SOURCE and _BSD_SOURCE, so

        _BSD_SOURCE || _SVID_SOURCE || _GNU_SOURCE

      is the same as

        _BSD_SOURCE || _SVID_SOURCE

getutmp.3
  Michael Kerrisk
    SEE ALSO: add utmpdump(1)

log1p.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions log1p(), log1pf() and log1pl() are thread safe.

logb.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions logb(), logbf() and logbl() are thread safe.

memccpy.3
   Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memccpy() is thread safe.

memchr.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions memchr(), memrchr() and rawmemchr() are thread safe.

mktemp.3
  Michael Kerrisk
    Make warning not to use this function more prominent

qecvt.3
  Michael Kerrisk [Joseph S. Myers]
    Recommend snprintf(3) not sprintf(3)

raise.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function raise() is thread safe.

remove.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function remove() is thread safe.

sem_destroy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_destroy() is thread safe.

sem_getvalue.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_getvalue()
 is thread safe.

sem_init.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_init() is thread safe.

sockatmark.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sockatmark() is thread safe.

strcpy.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strcpy() and strncpy() are thread safe.
  Michael Kerrisk [Rick Stanley]
    Fix a bug, and improve discussion of forcing termination with strncpy()

strspn.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strspn() and strcspn() are thread safe.

tempnam.3
  Michael Kerrisk
    Make warning not to use this function more prominent

tmpnam.3
  Michael Kerrisk
    Recommend use mkstemp(3) or tmpfile(3) instead

locale.5
  Michael Kerrisk

Add intro section that lists all of the LC categories
Michael Kerrisk

'p_cs_precedes' is for *positive* values
Michael Kerrisk
Clarify 'p_sign_posn' and 'n_sign_posn'; simplify 'n_sign_posn'
Add initial sentence for 'p_sign_posn' and 'n_sign_posn'.
Remove repeated list for 'n_sign_posn'.
Michael Kerrisk
Document LC_MESSAGES 'yesstr' and 'nostr'
Michael Kerrisk
Clarify LC_MONETARY 'n_cs_precedes'
Michael Kerrisk
LC_MONETARY: Document 'int_p_sign_posn' and 'int_n_sign_posn'
Michael Kerrisk
Clarify/rework 'p_cs_precedes' and 'n_cs_precedes'
Michael Kerrisk
LC_MONETARY: document 'int_p_sep_by_space' and 'int_n_sep_by_space'
Michael Kerrisk
Remove crufty reference to POSIX.2
Michael Kerrisk
LC_MONETARY: document 'int_p_cs_precedes' and 'int_n_cs_precedes'
Michael Kerrisk
Clarify/simplify 'n_sep_by_space'
Michael Kerrisk
LC_TIME: document 'cal_direction' and 'date_fmt'
Michael Kerrisk
Clarify 'p_sep_by_space'

feature_test_macros.7
Michael Kerrisk
_BSD_SOURCE and _SVID_SOURCE are deprecated in glibc 2.20
Michael Kerrisk
_GNU_SOURCE implicitly defines other macros
Saying that _GNU_SOURCE has the "effects of" other macros is not
quite precise.
Michael Kerrisk
Reword glibc version for _ISOC95_SOURCE
Michael Kerrisk
_ISOC99_SOURCE also exposes C95 definitions
Michael Kerrisk
_ISOC11_SOURCE implies the effects of _ISOC99_SOURCE
Michael Kerrisk
Note version number for _POSIX_C_SOURCE >= 200112L implies C99/C95
_POSIX_C_SOURCE >= 200112L causes C95 definitions to be
exposed only since glibc 2.12 and C99 definitions only
since 2.10.
Michael Kerrisk

_XOPEN_SOURCE may implicitly define _POSIX_SOURCE and _POSIX_C_SOURCE
Michael Kerrisk
Reword glibc version for _ISOC99_SOURCE
Michael Kerrisk
Rework discussion of _ISOC99_SOURCE
Michael
Kerrisk
Improve discussion of _DEFAULT_SOURCE
Michael Kerrisk
_POSIX_C_SOURCE >= 200112L implies C95 and C95 features

========== Changes in man-pages-3.63 ==========

Released: 2014-03-18, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Christoph Hellwig <hch@infradead.org>
Corrado Zoccolo <czoccolo@gmail.com>
Gregory P. Smith <gps@google.com>
Joseph S. Myers <joseph@codesourcery.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>
Phillip Susi <psusi@ubuntu.com>
Robert P. J. Day <rpjday@crashcourse.ca>
Stefan Puiu <stefan.puiu@gmail.com>
Zhu Yanhai <zhu.yanhai@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

duplocale.3
Michael Kerrisk
New page documenting duplocale(3)

newlocale.3
  Michael Kerrisk [Mike Frysinger]
    New page documenting newlocale(3) and freelocale(3)

towlower.3
  Michael Kerrisk
    Largely rewrite description of towlower() to be simpler and clearer

towupper.3
  Michael Kerrisk
    Largely rewrite description of towupper() to be simpler and clearer

uselocale.3
  Michael Kerrisk
    New page documenting uselocale(3)

Newly documented interfaces in existing pages
---

open.2
  Michael Kerrisk
    Document O_DSYNC and rewrite discussion of O_SYNC

isalpha.3
  Michael Kerrisk
    Document the "_l" locale APIs
      The GNU C library v2.3 added some locale APIs, most of which
      were later specified in POSIX.1-2008, namely:

          isalnum_l()
          isalpha_l()
          isblank_l()
          iscntrl_l()
          isdigit_l()

    isgraph_l()
          islower_l()
          isprint_l()
          ispunct_l()
          isspace_l()
          isupper_l()
          isxdigit_l()
          isascii_l()

      Also update and correct various pieces in CONFORMING TO
      (and remove a few crufty old pieces there).

strerror.3
  Michael Kerrisk
    Document strerror_l()

toupper.3
  Michael Kerrisk
    Document toupper_l() and tolower_l()

towlower.3
  Michael Kerrisk
    Document towlower_l()

towupper.3
  Michael Kerrisk
    Document towupper_l()

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/random/uuid

locale.7
  Michael Kerrisk
    Document LC_ADDRESS
    Document LC_IDENTIFICATION
    Document LC_MEASUREMENT
    Document LC_NAME
    Document LC_PAPER
    Document LC_TELEPHONE

New and changed links
---

freelocale.3
  Michael Kerrisk
    New link
 to new newlocale.3 page

isalnum_l.3
isascii_l.3
isblank_l.3
iscntrl_l.3
isdigit_l.3
isgraph_l.3
islower_l.3
isprint_l.3
ispunct_l.3
isspace_l.3

isupper_l.3
isxdigit_l.3
  Michael Kerrisk
    New links to isalpha.3

tolower_l.3
toupper_l.3
  Michael Kerrisk
    New links to toupper.3

towlower_l.3
  Michael Kerrisk
    New link to towlower.3

towupper_l.3
  Michael Kerrisk
    New link to towupper.3

Global changes

Various pages
  Michael Kerrisk
    Global change: "upper case" ==> "uppercase", "lower case" ==> lowercase"

Changes to individual pages
---

mount.2
  Michael Kerrisk
    SEE ALSO: add blkid(1)

msgop.2
  Michael Kerrisk
    Document two MSG_COPY failure modes
      Since Linux 3.14, the kernel now diagnoses two errors
      when using msgrcv() MSG_COPY:
      * MSG_COPY must be specified with IPC_NOWAIT
      * MSG_COPY can't be specified with MSG_EXCEPT

open.2

  Michael Kerrisk
    Organize some material under additional subheadings in NOTES
      There's an amorphous mass of material under NOTES. Structure
      it with some subheadings, and do a little reorganizing.

Michael Kerrisk
Add other system calls and functions that are like openat()
fanotify_mark(2), name_to_handle_at(2), and scandirat(3) have a
directory file descriptor argument for the same reason as openat().
Also: reword the rationale for the *at() functions somewhat.
Michael Kerrisk
Clarify ELOOP error interaction with O_PATH

readahead.2
Phillip Susi [Corrado Zoccolo, Gregory P. Smith, Zhu Yanhai, Michael Kerrisk, Christoph Hellwig]
Don't claim the call blocks until all data has been read
The readahead(2) man page was claiming that the call blocks until
all data has been read into the cache. This is incorrect.

See https://bugzilla.kernel.org/show_bug.cgi?id=54271

stat.2
Michael Kerrisk
SEE ALSO: add ls(1) and stat(1)

fts.3
Christoph Hellwig [Michael Kerrisk]
The fts(3) API does not work with LFS builds
As pointed out during a recent discussion on libc-hacker the
fts(3) APIs can't be used with large file offsets:

https://sourceware.org/bugzilla/show_bug.cgi?id=15838

mbrtowc.3
mbsnrtowcs.3
mbsrtowcs.3
mbtowc.3
Michael Kerrisk
Add entries in SEE ALSO
Mainly inspired by the POSIX pages.

mbsinit.3
Michael Kerrisk
SEE ALSO: add mbrlen(3), mbrtowc(3), and wcrtomb(3)

mbsrtowcs.3
wcsrtombs.3
Michael Kerrisk
SEE ALSO: add mbsinit(3)

mbstowcs.3
Michael Kerrisk [Stefan Puiu]
Add example program

And add some SEE ALSO entries

memcmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memcmp() is thread safe.

memcpy.3
Peng Haitao
ATTRIBUTES: Note
function that is thread-safe
The function memcpy() is thread safe.

memfrob.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memfrob() is thread safe.

memmem.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memmem() is thread safe.

memmove.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memmove() is thread safe.

mempcpy.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mempcpy() and wmempcpy() are thread safe.

memset.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memset() is thread safe.

strerror.3
Michael Kerrisk
CONFORMING TO: strerror() and strerror_r() are in POSIX.1-2008
Michael Kerrisk
Add SS heading for strerror_r()

toupper.3
Michael Kerrisk
Rewrite to more explicitly bring locales into

the discussion
  Michael Kerrisk
    Retitle BUGS section to NOTES
      These are not really bugs, just background info.

wcrtomb.3
wcsnrtombs.3
wcsrtombs.3
wcstombs.3
wctomb.3
  Michael Kerrisk
    SEE ALSO: add various entries
      Mainly inspired by POSIX

core.5
  Mike Frysinger [Michael Kerrisk]
    Document core_pattern %d specifier
    Document %P core_pattern specifier
  Michael Kerrisk
    Rearrange core_pattern specifiers alphabetically

locale.5
  Michael Kerrisk
    SEE ALSO: add newlocale(3) + duplocale(3)

feature_test_macros.7
  Michael Kerrisk [Joseph S. Myers]
    Remove mention of bogus _ISOC95_SOURCE macro
      The _ISOC95_SOURCE macro is defined in <features.h>, but it
      does nothing. So remove discussion of it, and move some of
      the discussion of C95 under the _ISOC99_SOURCE subhead.
  Michael Kerrisk [Carlos O'Donell]
    Add packaging note for _BSD_SOURCE/_SVID_SOURCE/_DEFAULT_SOURCE
       To compile warning-free across glibc < 2.20 and glibc >= 2.20
      code may been to define both _DEFAULT_SOURCE and either
      _BSD_SOURCE or _SVID_SOURCE.
  Michael Kerrisk
    Reword description of C90

locale.7
  Michael Kerrisk
    Add subsection on POSIX.1-2008 (originally GNU) extensions to locale API
  Michael Kerrisk
    Remove reference to LI18NUX2000
      LI18NUX2000 is difficult to even find these days, and in any case
      this page does not document gettext(), so notes about gettext()
      in the CONFORMING TO section here make no sense.
  Michael Kerrisk

SEE ALSO: add mbstowcs(3) and wcstombs(3)
SEE ALSO: add newlocale(3) + duplocale(3)

man-pages.7
Michael Kerrisk
Add preferred term "superblock"
Michael Kerrisk
Add preferred terms "uppercase" and "lowercase"

========== Changes in man-pages-3.64 ==========

Released: 2014-04-06,
Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhay Sachan <sachan.abhay@gmail.com>
Alexey Samsonov <samsonov@google.com>
Andrey Vagin <avagin@openvz.org>
Aneesh Kumar K.V <aneesh.kumar@linux.vnet.ibm.com>

David Prévot <taffit@debian.org>
Eric Dumazet <edumazet@google.com>
Eric W. Biederman <ebiederm@xmission.com>
Jan Kara <jack@suse.cz>
Kir Kolyshkin <kir@openvz.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Peter Hurley <peter@hurleysoftware.com>
Petr Gajdos <pgajdos@suse.cz>
Robert P. J. Day <rpjday@crashcourse.ca>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages

---

open_by_handle_at.2
  Michael Kerrisk [Mike Frysinger, Neil Brown, Aneesh Kumar K.V,
  Christoph Hellwig]
    New page describing name_to_handle_at(2) and open_by_handle_at(2)

inotify.7
  Michael Kerrisk
    Rewrite introductory section
    Reorganize "Limitations and caveats" subsection
  Michael Kerrisk
    Further describe the race when adding a watch to a new subtree
  Michael Kerrisk
    Directory renames may invalidate multiple paths cached by application
  Michael Kerrisk
    Add paragraph on cache consistency checking
  Michael Kerrisk
    Mention cache rebuilding to handle overflow events
  Michael Kerrisk
    Moving an object to another filesystem generates IN_DELETE_SELF
  Michael Kerrisk [Jan Kara]
    Add text on dealing with rename() events
  Michael Kerrisk
    Note rationale and consequences of event coalescing
  Michael Kerrisk [Eric W. Biederman]
    Inotify doesn't work for remote and pseudo filesystems
  Michael Kerrisk
     Add some examples of events generated by various system calls
  Michael Kerrisk
    BUGS: IN_ONESHOT does now cause IN_IGNORED when the watch is dropped
       A silent change as a result of the fanotify work in kernel 2.6.36.
  Michael Kerrisk
    Note that IN_DELETE_SELF will be followed by IN_IGNORED
  Michael Kerrisk
    Note that IN_UNMOUNT will be followed by an IN_IGNORED event
  Michael Kerrisk
    Inotify does not report events for mmap(2) and msync(2)
  Michael Kerrisk
    Add examples of syscalls that trigger IN_ATTRIB
  Michael Kerrisk
    Add some examples of syscalls that trigger IN_MODIFY
  Michael Kerrisk
    execve(2) also generates IN_ACCESS
  Michael Kerrisk
    Add examples of syscalls that trigger IN_CREATE

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver [Michael Kerrisk]
    Document the PERF_FLAG_FD_CLOEXEC flag

      The Linux 3.14 release adds support for the PERF_FLAG_FD_CLOEXEC
      flag.

feature_test_macros.7
  Michael Kerrisk
    Document _LARGEFILE_SOURCE

tcp.7
  Michael Kerrisk [Eric Dumazet]
    Document /proc/sys/net/ipv4/tcp_autocorking
      Text heavily based on Documentation/networking/ip-sysctl.txt

New and changed links
---

name_to_handle_at.2
  Michael Kerrisk
    New link to new open_by_handle_at(2) page

Global changes
---

fmemopen.3
getaddrinfo.3
mq_notify.3
offsetof.3
aio.7
  Michael Kerrisk
    Print size_t/ssize_t values using %z printf() modifier
      There are fewer and fewer systems these days that don't
      support the %z specifier mandated in C99. So replace the
      use of %ld/%lu + (long) cast with %zd/%zu.

Changes to individual pages
---

bdflush.2
fsync.2

sync.2
  Kir Kolyshkin
    SEE ALSO: remove update(8) reference
      Remove
 reference to update(8) man page, since there is no such
      page. This is an ancient BSD leftover I believe.

chown.2
  Michael Kerrisk
    Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

getxattr.2
  Abhay Sachan
    Fix RETURN VALUE description
      A EA can have length zero.

inotify_add_watch.2
  Michael Kerrisk
    ERRORS: add ENAMETOOLONG

inotify_init.2
  Michael Kerrisk
    Add pointer to inotify(7)

link.2
  Michael Kerrisk
    When AT_EMPTY_PATH is specified, 'olddirfd' must not refer to a
    directory

mmap.2
  Andrey Vagin
    The file descriptor for a file mapping must be readable
      There is no difference between MAP_SHARED and MAP_PRIVATE.

open.2
  Michael Kerrisk
    SEE ALSO: add open_by_name_at(2)

perf_event_open.2
  Vince Weaver
    Document PERF_EVENT_IOC_PERIOD behavior change
      Linux 3.14 (in commit bad7192b842c83e580747ca57104dd51fe08c223)
      changes
 the perf_event PERF_EVENT_IOC_PERIOD ioctl() behavior
      on all architectures to update immediately, to match the behavior
      found on ARM.

stat.2

Michael Kerrisk
Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

syscalls.2
Michael Kerrisk
Add sched_getattr() and sched_setattr()
And update kernel version to 3.14

abort.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function abort() is thread safe.

confstr.3
Michael Kerrisk
SEE ALSO: add getconf(1), fpathconf(3), sysconf(3), pathconf(3)

exit.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function exit() is not thread safe.

fenv.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions feclearexcept(), fegetexceptflag(), feraiseexcept(),
fesetexceptflag(), fetestexcept(), fegetround(), fesetround(),
fegetenv(),
feholdexcept(), fesetenv(), feupdateenv(),
feenableexcept(), fedisableexcept() and fegetexcept() are thread
safe.

fpathconf.3
Michael Kerrisk
SEE ALSO: add confstr(3)

fseek.3
Michael Kerrisk [Petr Gajdos]
Document EINVAL error for negative file offset

fseeko.3
Michael Kerrisk
Add feature test macro requirements

fts.3
Michael Kerrisk [Mike Frysinger]
Remove mention of "32-bit systems" in BUGS

fwide.3
wprintf.3
  Michael Kerrisk [Robert P. J. Day]
    Remove mention of bogus _ISOC95_SOURCE feature test macro

getline.3
  Alexey Samsonov
    Caller should free the allocated buffer even if getline() failed
      Relevant discussion in glibc bugzilla:
      https://sourceware.org/bugzilla/show_bug.cgi?id=5666

getloadavg.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function getloadavg() is thread safe.

getpt.3
  Peng Haitao
    ATTRIBUTES:
 Note function that is thread-safe
      The function getpt() is thread safe.

if_nametoindex.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions if_nametoindex() and if_indextoname() are thread safe.

index.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions index() and rindex() are thread safe.

mkfifo.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions mkfifo() and mkfifoat() are thread safe.

netlink.3
  Michael Kerrisk
    SEE ALSO: make the reference for libnetlink the libnetlink(3) man page

random.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions random(), srandom(), initstate() and setstate()
      are thread safe.

random_r.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions random_r(), srandom_r(), initstate_r() and
setstate_r() are thread safe.

sigvec.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sigvec(), sigblock(), sigsetmask() and
siggetmask() are thread safe.

The macro sigmask() is thread safe.

sysconf.3
Michael Kerrisk
SEE ALSO: add confstr(3)

termios.3
Michael Kerrisk [Peter Hurley]
Fix error in discussion of MIN > 0, TIME == 0 noncanonical mode
As reported by Peter Hurley, for the MIN > 0, TIME == 0 case:

read() may unblock when MIN bytes are available but return
up to the 'count' parameter if more input arrives in between
waking and copying into the user buffer.
...
read() may also _not_ return until MIN bytes have been
received, even if 'count' bytes have been received.
Michael Kerrisk
Add a note on interaction of O_NONBLOCK with noncanonical MIN/TIME
POSIX leaves the behavior open.
Michael Kerrisk
Clarify termination conditions for MIN > 0, TIME > 0
Michael Kerrisk
Clarify behavior if data is available before noncanonical read()
Michael Kerrisk
Add descriptive titles to noncanonical read() cases

symlink.7
Michael Kerrisk
Add subsection on opening a symbolic link with O_PATH
Michael Kerrisk
name_to_handle_at(2) and open_by_handle_at(2) optionally follow symlinks
Michael Kerrisk
Mention use of readlink(2) to read contents of a symlink

========== Changes in man-pages-3.65 ==========

Released: 2014-04-20, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

inet_net_pton.3
  Michael Kerrisk
    New page describing inet_net_pton(3) and inet_net_ntop(3)

Newly documented interfaces in existing pages
---

fallocate.2
  Michael Kerrisk, Namjae Jeon [Christoph Hellwig, Dave Chinner]

Document FALLOC_FL_COLLAPSE_RANGE

prctl.2
Michael Kerrisk [Alex Thorlton]
Document PR_SET_THP_DISABLE and PR_GET_THP_DISABLE

proc.5
Michael Kerrisk
Document /proc/[pid]/stack
Michael Kerrisk
Document /proc/[pid]/clear_refs

New and changed links
---

inet_net_ntop.3
Michael Kerrisk
New link to new inet_net_pton.3

Changes to individual pages
---

fcntl.2
Michael Kerrisk
Note the race when O_CLOEXEC is used at same time as fork()+execve()

madvise.2
Michael Kerrisk
SEE ALSO: see prctl(2)
Because of PR_SET_THP_DISABLE.

mlock.2
Michael Kerrisk
Describe treatment of MCL_FUTURE during fork(2) and execve(2)

msync.2
Michael Kerrisk [Richard Hansen, Greg Troxel]
Warn that one of MS_SYNC or MS_ASYNC is required

open.2
Michael Kerrisk
Add more detail on the race that O_CLOEXEC is designed to avoid
Michael Kerrisk [Matthew Dempsky]
Remove
crufty text stating that O_DIRECTORY is Linux-specific
Michael Kerrisk

Note which filesystems support O_TMPFILE

perf_event_open.2
Vince Weaver [Michael Kerrisk]
Clarify EACCES and EPERM errors
Clarify the reasons for EACCES and EPERM errors.
Vince Weaver [Michael Kerrisk]
Make the ERRORS section more comprehensive.
Determined both by code inspection and by writing a large number of test programs.

personality.2
Michael Kerrisk
Available execution domains are listed in <sys/personality.h>
Michael Kerrisk
Fix discussion of return value

prctl.2
Michael Kerrisk
ERRORS: document EINVAL for PR_GET_NO_NEW_PRIVS
ERRORS: document EINVAL for PR_SET_PDEATHSIG
ERRORS: document EINVAL for PR_SET_TIMING
ERRORS: document EINVAL for PR_SET_DUMPABLE
ERRORS: document EINVAL for PR_SET_NO_NEW_PRIVS

shmget.2
Michael Kerrisk
Rewrite description of SHMMNI
default value
Michael Kerrisk
Note default value of SHMMAX
Note default value for SHMALL

byteorder.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions htonl(), htons(), ntohl() and ntohs() are thread safe.

fexecve.3
Michael Kerrisk [Steven Stewart-Gallus]
If 'fd' is a close-on-exec file descriptor for a script, fexecve() fails
See https://bugzilla.kernel.org/show_bug.cgi?id=74481

ffs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ffs(), ffsl() and ffsll() are thread safe.

getauxval.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function getauxval() is thread safe.

getcontext.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions getcontext() and setcontext() are thread safe.

getsubopt.3
  Peng Haitao
    ATTRIBUTES: Note function that
 is thread-safe
      The function getsubopt() is thread safe.

getutmp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions getutmp() and getutmpx() are thread safe.

inet.3
  Michael Kerrisk
    Note success and error return for inet_aton()

inet.3
  Michael Kerrisk [Craig McQueen]
    The form 'a.b' if is suitable for Class A addresses (not class C)
  Michael Kerrisk
    SEE ALSO: add inet_net_pton(3)

makecontext.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions makecontext() and swapcontext() are thread safe.

pthread_attr_setdetachstate.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setdetachstate() and
      pthread_attr_getdetachstate() are thread safe.

pthread_attr_setguardsize.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setguardsize()

and
pthread_attr_getguardsize() are thread safe.

sigsetops.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sigemptyset(), sigfillset(), sigaddset(),
sigdelset(), sigismember(), sigisemptyset(), sigorset() and
sigandset() are thread safe.

proc.5
Petr Gajdos
Improve /proc/[pid]/smaps entries description
Michael Kerrisk
/proc/PID/smaps is present only if CONFIG_PROC_PAGE_MONITOR
Michael Kerrisk
Note kernel version for /proc/sys/kernel/{shmall,shmmax}
Michael Kerrisk
Note kernel version for /proc/sys/kernel/{msgmax,msgmnb}

capabilities.7
Michael Kerrisk
SEE ALSO: add capsh(1)

libc.7
Michael Kerrisk
Add musl libc

Yuri Kozlov <yuray@komyakino.ru>

Apologies
 if I missed anyone!

New and rewritten pages
----

fanotify_init.2
  Heinrich Schuchardt, Michael Kerrisk
    New page documenting fanotify_init(2)

fanotify_mark.2
  Heinrich Schuchardt, Michael Kerrisk
    New page documenting fanotify_mark(2)

sched_setscheduler.2
  Michael Kerrisk
    Page rewritten
      Stripped out the general scheduling material, which
      moved to sched(7), and rewrote much of the remainder.
      Changed copyright and license since pretty much all
      of the content was or is written by mtk.

fanotify.7
  Heinrich Schuchardt, Michael Kerrisk
    New page providing overview of the fanotify API

sched.7
  Michael Kerrisk

New page providing an overview of the scheduling APIs
Most of this content derives from sched_setscheduler(2). In
preparation for adding a sched_setattr(2) page, it makes
sense to isolate out this general content to
a separate
page that is referred to by the other scheduling pages.

Newly documented interfaces in existing pages
---

fallocate.2
Lukas Czerner [Michael Kerrisk]
Document FALLOC_FL_ZERO_RANGE
FALLOC_FL_ZERO_RANGE was added in Linux 3.14,
for zeroing ranges in the allocated space in a file.

rename.2
Miklos Szeredi [Michael Kerrisk]
Document renameat2() system call added in Linux 3.15

shmop.2
Michael Kerrisk
Document SHM_EXEC

Changes to individual pages
---

flock.2
Michael Kerrisk
Employ term "open file description" in DESCRIPTION
And include reference to open(2) for an explanation of the term.

getpriority.2
Michael Kerrisk
SEE ALSO: add sched(7)

getsockopt.2
Carsten Andrich
SEE ALSO: add packet(7)

link.2
Michael Kerrisk [Steven Stewart-Gallus]
Document ENOENT error for linkat()
See https://bugzilla.kernel.org/show_bug.cgi?id=73301

msgget.2

Michael Kerrisk
Reword EEXIST error

msgop.2
Michael Kerrisk
Note capability required to raise MQ size beyond MSGMNB

msync.2
Michael Kerrisk [Heinrich Schuchardt]
s/flushes... back to disk/flushes... back to filesystem/

nice.2
Michael Kerrisk
SEE ALSO: add sched(7)

open.2
Peter Schiffer
Update note on alignment of user buffer and file offset for O_DIRECT
The sentence in open(2) man page in notes for O_DIRECT flag:

"Under Linux 2.6, alignment to 512-byte boundaries suffices."

is not universally correct. The alignment is a property of the
storage, for example, 4k-sector drives with no 512 byte sector
emulation will be unable to perform 512-byte direct I/O.
Michael Kerrisk
Note some of the various synonyms for "open file description"
Michael Kerrisk
Remove repetitious
text on use of fcntl() to change file status flags

open_by_handle_at.2
Michael Kerrisk
Mention FreeBSD analogs

posix_fadvise.2
Michael Kerrisk [Eric Siegerman]
Fix wording error under "Architecture-specific variants"
See https://bugzilla.kernel.org/show_bug.cgi?id=75431

process_vm_readv.2
Michael Kerrisk [Stijn Hinterding]
Add feature test macro requirements
The _GNU_SOURCE FTM must be defined.

read.2
Michael Kerrisk
BUGS: detail nonatomicity bug with respect to file offset updates

This bug was fixed in Linux 3.14, with commit
9c225f2655e36a470c4f58dbbc99244c5fc7f2d4
See also http://thread.gmane.org/gmane.linux.kernel/1649458

sched_get_priority_max.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_rr_get_interval.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_setaffinity.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_setparam.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_yield.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

semget.2
Michael Kerrisk
Consolidate discussion on noninitialization of semaphores
The fact that semget() does not initialize the semaphores
in a new set was covered in two places (in DESCRIPTION
and BUGS). Consolidate these into one place (in NOTES)
and also point out that POSIX.1-2008 says that a future
version of the standard may require an implementation to
initialize the semaphores to 0.
Michael Kerrisk
Clarify SEMMNS versus SEMMSL*SEMMNI
Michael Kerrisk
Rework EINVAL text a little
Michael Kerrisk
Clarify wording for EEXIST error

shmget.2
Manfred Spraul
Clarify SHMALL
The default for SHMALL is a limit of 8 GB, regardless of
PAGE_SIZE. The current documentation does not mention that
and is therefore more difficult to understand than necessary.
Manfred Spraul
Correct math error

2097152 is 2^21, not 2^20.
Michael Kerrisk
Reword EEXIST error
Michael Kerrisk
Clarify one of the EINVAL cases
Michael Kerrisk
Note that SHM_NORESERVE is a Linux extension
Michael Kerrisk [Simon Paillard]
Fix kernel version numbers in discussion of SHMALL
Michael Kerrisk
Rework EINVAL text
Michael Kerrisk
Move and rework discussion of mode bits
Michael Kerrisk
Reword description of O_EXCL

shmop.2
Michael Kerrisk
Move fork(2), execve(2), _exit(2) discussion to NOTES
Michael Kerrisk
Add subheads for shmat() and shmdt()
Michael Kerrisk
Rework discussion of SHM_RDONLY and SHM_REMAP
into list format
Michael Kerrisk
Structure the attach cases as a list

sigaction.2
Alan Curry
Fix bad cross reference (times(2) not time(2))
The system call that reports child CPU usage is times(2),
not time(2).

symlink.2
Michael Kerrisk [Steven Stewart-Gallus]
Document ENOENT error for symlinkat()
See https://bugzilla.kernel.org/show_bug.cgi?id=73301

syscalls.2
Michael Kerrisk
Add renameat2()
And bump kernel version.

write.2
Michael Kerrisk
BUGS: detail nonatomicity bug with respect to file offset updates
This bug was fixed in Linux 3.14, with commit
9c225f2655e36a470c4f58dbbc99244c5fc7f2d4

See also http://thread.gmane.org/gmane.linux.kernel/1649458

pthread_attr_setinheritsched.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setinheritsched() and
      pthread_attr_getinheritsched()
 are thread safe.

pthread_attr_setschedparam.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setschedparam() and
      pthread_attr_getschedparam() are thread safe.

pthread_attr_setschedpolicy.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setschedpolicy() and
      pthread_attr_getschedpolicy() are thread safe.

pthread_attr_setscope.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setscope() and pthread_attr_getscope()
      are thread safe.

pthread_attr_setstack.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setstack() and pthread_attr_getstack()
      are thread safe.

sched_getcpu.3
  Michael Kerrisk
    SEE ALSO: add sched(7)

termios.3
  Michael Kerrisk [Yuri Kozlov]
     Rework intro text for 'c_oflag'
  Michael Kerrisk
    OFDEL is in POSIX.1-2001, so remove "(Not in POSIX)" text

proc.5
  Jan Moskyto Matejka [Randy Dunlap]
    Improve description of /proc/stat 'intr' field
      The sum at the beginning of line "intr" includes also
      unnumbered interrupts.

packet.7
  Carsten Andrich [Neil Horman]
    Improve sockopt documentation for packet sockets
  Carsten Andrich [Willem de Bruijn]
    PACKET_LOSS has inverse meaning
  Stefan Puiu [Daniel Borkmann, Carsten Andrich]
    Status in PACKET_RX_RING is actually a bit mask
  Michael Kerrisk [Carsten Andrich]
    SEE ALSO: add /tools/testing/selftests/net/psock_tpacket.c

========== Changes in man-pages-3.67 ==========

Released: 2014-05-21, Munich

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

sched_setattr.2
  Michael Kerrisk, Peter Zijlstra [Juri Lelli]
    New page describing sched_setattr(2)
 and sched_getattr(2)

system.3
  Michael Kerrisk
    Rewrote large parts of the page and added a number of details

Newly documented interfaces in existing pages
---

sched.7
  Peter Zijlstra, Michael Kerrisk [Juri Lelli]
    Document SCHED_DEADLINE

New and changed links
---

renameat2.2
  Michael Kerrisk
    New link to rename.2

sched_getattr.2
  Michael Kerrisk
    New link to new sched_setattr

Changes to individual pages
---

bind.2
  Michael Kerrisk
    ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

chown.2
  Michael Kerrisk
    NOTES: Add some subheadings

connect.2
  Michael Kerrisk [William Morriss]
    ERRORS: Add EADDRNOTAVAIL for ephemeral port range exhaustion

Verified from testing and the kernel source.
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=745775
Michael Kerrisk
Remove mention
of ip_local_port_range under EAGAIN error

create_module.2
delete_module.2
init_module.2
query_module.2
Michael Kerrisk [Lucas De Marchi]
Clarify glibc header file declaration/ABI wrapper details
create_module(), delete_module(), init_module(), and
query_module() are not declared in header files, but
through an accident of history glibc provides an ABI
for them that it continues to maintain, for
compatibility reasons.

execve.2
Michael Kerrisk [Steven Stewart-Gallus]
Note SIGKILL case when execve() fails beyond the point of no return
Michael Kerrisk
NOTES: Add a subheading and reorder paragraphs

fanotify_init.2
Heinrich Schuchardt [Michael Kerrisk]
Document range of permitted flags for event_f_flags
With a new patch included in the mm tree, event_f_flags is
checked for allowable values.

fcntl.2
Michael Kerrisk
Add "file locking" subheading
under NOTES

fork.2
Michael Kerrisk
ERRORS: SCHED_DEADLINE tasks can fail with EAGAIN
SCHED_DEADLINE tasks can fail with EAGAIN unless the
reset-on-fork flag is set.

futex.2
Michael Kerrisk
Note that there is no glibc wrapper

getpriority.2
Rasmus Villemoes
Fix prototypes for getpriority() and setpriority()

The who argument has type id_t (which happens to be u32 on linux).

get_robust_list.2
  Rasmus Villemoes
    Add <sys/types.h> to synopsis of get_robust_list()
      If one were to implement wrappers for [gs]et_robust_list() using the
      given prototypes, one would also have to include sys/types.h to get
      a definition of size_t.

getrusage.2
  Michael Kerrisk [Bill Allombert]
    _GNU_SOURCE must be defined to obtain RUSAGE_THREAD definition
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=746569

link.2
open.2
  Andy Lutomirski [Michael Kerrisk]
     Update AT_EMPTY_PATH and O_PATH documentation

listen.2
  Michael Kerrisk
    ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

mbind.2
  Rasmus Villemoes
    Fix prototype for mbind(2)
      The nmask argument is const. The return type in numaif.h is long.
      (Well, at least <numaif.h> says nmask is const. The current kernel
      does not define it as a const argument, but sys_mbind() only
      passes it to get_nodes(), which does treat it as const.)

msgop.2
  Davidlohr Bueso [Michael Kerrisk]
    Enhance description of "full queue" criteria

poll.2
  Rasmus Villemoes
    Add <signal.h> to synopsis for ppoll()
      One needs to #include <signal.h> to get the definition of the
      type (sigset_t) of the mask argument to ppoll().

readlink.2
  Rasmus Villemoes
    Fix return type of readlinkat()

recv.2
  Michael Kerrisk
    Clarify details of msg_name and msg_namelen fields

recvmmsg.2

  Michael Kerrisk
    Describe timeout bug
      See https://bugzilla.kernel.org/show_bug.cgi?id=75371
      and http://thread.gmane.org/gmane.linux.man/5677

remap_file_pages.2
  Andy Lutomirski [Christoph Hellwig, Andy Lutomirski]
    remap_file_pages() has no benefit for real files
      Linux commit 3ee6dafc677a68e461a7ddafc94a580ebab80735 caused
      remap_file_pages to be emulated when used on real file.

sched_get_priority_max.2
  Michael Kerrisk
    'policy' can also be SCHED_DEADLINE

sched_setaffinity.2
  Rasmus Villemoes
    Fix prototype for sched_setaffinity()
      The mask argument is const.

sched_setparam.2
  Michael Kerrisk
    ERRORS: mark errors that apply just for sched_setparam()
  Michael Kerrisk
    ERRORS: Add EINVAL for invalid arguments
  Michael Kerrisk
    SEE ALSO: add sched_setattr(2)

sched_setscheduler.2
  Michael Kerrisk
    ERRORS: mark errors that apply just to sched_setscheduler()
   Michael Kerrisk
    ERRORS: add EINVAL case for pid < 0
  Michael Kerrisk
    ERRORS: separate out EINVAL cases

semget.2
  Michael Kerrisk
    NOTES: Add subheadings and reorder paragraphs

semop.2
  Rasmus Villemoes
    Fix prototypes for semop() and semtimedop()
      The nsops arguments have type size_t, not unsigned, and the
      timeout argument of semtimedop() is const.

Michael Kerrisk
NOTES: Add a subheading

send.2
Michael Kerrisk
Add details on various 'msghdr' fields
Michael Kerrisk
ERRORS: Add EAGAIN for ephemeral port range exhaustion
Michael Kerrisk
Add some subheadings under DESCRIPTION

shmget.2
Michael Kerrisk
NOTES: Add a subheading

stat.2
Michael Kerrisk [Aurelien Jarno]
Describe feature test macro requirements for file type test macros
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728240
Michael Kerrisk
Update FTM requirements
for lstat()
Michael Kerrisk
Split discussion of 'st_mode' fields into type and permissions
Michael Kerrisk
Move text on S_I*() macros to follow text on S_I* macros
That ordering is more logical

stime.2
Rasmus Villemoes
Fix prototype for stime()
The argument is const, both according to the actual header files and
according to <http://www.sco.com/developers/devspecs/vol1a.pdf>.

syscall.2
Rasmus Villemoes
Fix prototype for syscall()
The first argument and the return value of syscall() has type long,
not int.

getopt.3
Michael Kerrisk
EXAMPLE: Add subheadings to distinguish the two example programs

malloc.3
Michael Kerrisk
Reword text referring to mallopt(3)
Linux libc is no longer "recent"; drop mention of it.

pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_setaffinity_np.3
pthread_setschedparam.3
pthread_setschedprio.3
pthread_yield.3
pthreads.7
Michael Kerrisk
Change references to "sched_setscheduler(2)" to "sched(7)"
Change consistent with the fact that the scheduling overview
page is now sched(7) not sched_setscheduler(2).

pthread_attr_setstackaddr.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setstackaddr() and
pthread_attr_getstackaddr() are thread safe.

pthread_attr_setstacksize.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setstacksize() and
pthread_attr_getstacksize() are thread safe.

pthread_kill.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_kill() is thread safe.

pthread_kill_other_threads_np.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_kill_other_threads_np()
is thread safe.

pthread_self.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_self() is thread safe.

pthread_setcancelstate.3
Michael Kerrisk
Add paragraph breaks to "Asynchronous cancelability" subsection

pthread_setcancelstate.3
Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions pthread_setcancelstate() and
pthread_setcanceltype() are thread safe.
Michael Kerrisk
NOTES: Add some subheadings

pthread_setschedparam.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_setschedparam() and pthread_getschedparam()
are thread safe.

pthread_setschedprio.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_setschedprio() is thread safe.

pthread_sigmask.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_sigmask() is thread safe.

pthread_sigqueue.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_sigqueue() is thread safe.

pthread_testcancel.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_testcancel() is thread safe.

pthread_yield.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_yield() is thread safe.

remquo.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions remquo(), remquof() and remquol() are thread safe.

rtime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function rtime() is thread safe.

sched_getcpu.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sched_getcpu() is thread safe.

stpcpy.3
Ingo Schwarze
Note some history of
stpcpy()
Quoting Ingo:
I just noticed that the stpcpy(3) manual contains a speculation
that appears to be untrue on closer investigation: That function
did not originate in MS DOS, but in Lattice C on AmigaDOS.

Here is a patch against the git master HEAD to fix that, and add
some more historical information. To provide some background and
allow you to more easily verify the correctness of the patch, i'm
appending my mail to <misc@openbsd.org>, where i'm giving some
more details about the history and pointing to some primary
sources. That mail also contains the (similar, but shorter)
patch i just committed to the OpenBSD manual page.

strcasecmp.3
Michael Kerrisk [Aurelien Jarno, Török Edwin]
Explain why strcasecmp()+strncasecmp() are also declared in <string.h>
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729436

strcpy.3
Michael Kerrisk
NOTES: Add a subheading

fd.4
Michael Kerrisk [Sam Varshavchik]
Fix floppy disk device names
The naming convention shown in the page was ancient.
Now, the page is consistent with Documentation/devices.txt
(where it is noted that "The use of the capital letters
D, H and E for the 3.5" models have been deprecated, since
the drive type is insignificant for these devices"

proc.5
Michael Kerrisk
Document /proc/timer_stats
Michael Kerrisk
(Briefly) document /proc/timer_list
Michael Kerrisk
Add /proc/sys/kernel/{sched_rt_period_us,sched_rt_runtime_us}
Reference sched(7) for an explanation of these two files

capabilities.7
  Michael Kerrisk
    Mention sched_setattr(2) under CAP_SYS_NICE

cpuset.7
  Michael Kerrisk
    SEE ALSO: add sched(7)

credentials.7
  Michael Kerrisk
    Mention sched_getattr() as a place where credentials
 are checked

fanotify.7
  Heinrich Schuchardt [Jan Kara]
    BUGS: error events can be lost when reading from fanotify FD
  Michael Kerrisk [Heinrich Schuchardt]
    Fix description of FAN_EVENT_NEXT()
      FAN_EVENT_NEXT() does not update 'meta'; rather, it returns a
      pointer to the next metadata structure. In addition, generally
      rework the description to be a bit clearer and more detailed.
  Heinrich Schuchardt
    Document FAN_EVENT_METADATA_LEN

ip.7
  Michael Kerrisk
    Note cases where an ephemeral port is used
  Michael Kerrisk
    Remove BUGS text on glibc failing to declare in_pktinfo
  Michael Kerrisk
    Clarify 'ip_local_port_range' and mention the term "ephemeral ports"
  Michael Kerrisk
    Note some more details about assignment of ephemeral ports
  Michael Kerrisk
    BUGS: ephemeral port range exhaustion is diagnosed inconsistently
      Different system calls use different 'errno'
 values to diagnose
      exhaustion of the ephemeral port range.

sched.7
  Michael Kerrisk
    Document sched_rt_period_us and sched_rt_runtime_us /proc files
      And rework and relocate the text on dealing with runaway
      real-time processes.
  Michael Kerrisk
    Mention sched_setattr(2) in list of APIs that can change policies
  Michael Kerrisk
    sched_setattr(2) can also be used to set 'nice' value

Michael Kerrisk
Remove mention of sched_setscheduler() when talking about sched_priority
There are nowadays multiple ways to set sched_priority (and
in fact there always were, since we also had sched_setparam(2)).
Michael Kerrisk
SEE ALSO: Add Documentation/scheduler/sched-design-CFS.txt
Michael Kerrisk
Don't mention sched_setscheduler(2) in discussions of setting policies
In a couple of places, sched_setscheduler(2) is mentioned as the
way of setting policies.
But now there is sched_setattr(2) as
well, rewrite the text in a more generic way.
Michael Kerrisk
Rework summary text describing sched_setattr(2) and sched_getattr(2)
Note that these APIs are a superset of sched_setscheduler(2)
and sched_getscheduler(2).
Michael Kerrisk
Remove crufty text relating to sched_setscheduler()
All of the removed text is in sched_setscheduler(2) and
should have been trimmed from this page.
Michael Kerrisk
SEE ALSO: Mention more files in Documentation/scheduler/ directory

========== Changes in man-pages-3.68 ==========

Released: 2014-05-28, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alastair McKinstry <mckinstry@computer.org>
Carsten Grohmann <carstengrohmann@gmx.de>
Colin
Williams <colinwilliams1968@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Lars Wirzenius <liw@iki.fi>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Richard Braakman <richard.braakman@jollamobile.com>
Simon Paillard <spaillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages
---

localedef.1
  Marko Myllynen, Richard Braakman, Alastair McKinstry, Lars Wirzenius
    New page for localedef(1)
      Add new page based on Debian localedef(1) page.

New and changed links
---

procfs.5
  New link to proc.5
    Since the term "procfs" is widely used, it seems reasonable to have
    a link from that name to proc(5).

Changes to individual pages
---

locale.1
  Marko Myllynen
    Provide a step-by-step example of how to use a custom locale
  Marko Myllynen
    Use
 LC_TELEPHONE instead of LC_MESSAGES in the example
      yesstr/nostr in LC_MESSAGES are planned to be changed at some
      point [1], so it's better to provide an example which won't
      be obsoleted by that change.

      [1] https://sourceware.org/bugzilla/show_bug.cgi?id=16975

adjtimex.2
  Michael Kerrisk
    Add feature test macro requirements

clone.2
  Michael Kerrisk
    ERRORS: add cross-reference to fork(2) for explanation of EAGAIN

fork.2
  Michael Kerrisk
    ERRORS: add pid_max and threads-max to EAGAIN

And rewrite text to be the same as pthread_create(3).

getrlimit.2
Michael Kerrisk
RLIMIT_NPROC is not enforced if CAP_SYS_ADMIN or CAP_SYS_RESOURCE

remap_file_pages.2
Rasmus Villemoes
Fix prototype
The pgoff argument has type size_t, not ssize_t (and in the
kernel it is unsigned long).

set_mempolicy.2
Rasmus Villemoes
Fix prototype for set_mempolicy(2)
The nodemask argument is const. The return type in numaif.h is long.

swapon.2
Rasmus Villemoes
Remove header from synopsis
The <asm/page.h> header is not readily available, and the comment
seems to indicate that it is for getting PAGE_SIZE. But it is
never mentioned why one would need to know that, and it is in any
case better obtained using sysconf(), provided by <unistd.h>.

a64l.3
Rasmus Villemoes
Fix prototype for a64l()
The argument is const, both according to POSIX and the
glibc headers.

adjtime.3
Rasmus Villemoes
Add required header
The prototype for adjtime(3) is declared in <sys/time.h>.

argz_add.3
Rasmus Villemoes
Fix prototypes
Update the prototypes of argz_{delete,extract,next} to agree with
glibc headers and manual.

bstring.3
Rasmus Villemoes
Fix prototypes
The length parameter n
has type size_t in bcmp(), bcopy() and
bzero().

envz_add.3
  Rasmus Villemoes
    Fix prototypes
      The envz_len parameters for envz_entry() and envz_get() are not
      passed by reference.

fpathconf.3
  Rasmus Villemoes
    Fix prototype
      The path argument to pathconf() is const.

fseek.3
  Rasmus Villemoes
    Fix prototype
      The pos argument to fsetpos() is const.

gcvt.3
  Rasmus Villemoes
    Fix prototype
      The ndigit parameter to gcvt() has type int.

getaddrinfo_a.3
  Rasmus Villemoes
    Fix prototype
      The pointer arguments to gai_suspend() are const.

getauxval.3
  Rasmus Villemoes
    Fix permissions
      There doesn't seem to be any reason for getauxval.3 to be
      executable...

getnameinfo.3
  Rasmus Villemoes
    Fix prototype
      The hostlen and servlen parameters have type socklen_t.
      (The types changed in glibc 2.2)
  Michael
 Kerrisk
    Note types of 'hostlen'; and 'servlen' in glibc < 2.2

getrpcent.3
  Rasmus Villemoes
    Fix prototype
      The argument to getrpcbyname() is const.

getrpcport.3

Rasmus Villemoes
Add #include and fix prototype
The prototype for getrpcport() is obtained by #include'ing
<rpc/rpc.h>. Also, update its prototype.

getspnam.3
Rasmus Villemoes
Fix prototype
The struct spwd argument to putspent() is const.

getutent.3
Rasmus Villemoes
Fix prototypes
The arguments to getutid(), getutline(), and pututline()
are const.

inet.3
Rasmus Villemoes
Fix prototype
The parameters to inet_makeaddr have type in_addr_t.

inet_net_pton.3
Rasmus Villemoes
srcfix, cfix
Use a consistent style throughout the man-pages.

key_setsecret.3
Rasmus Villemoes
Fix prototypes
Remove const qualifiers from arguments to key_decryptsession,
key_encryptsession, and key_setsecret.

makecontext.3
Rasmus Villemoes
Fix prototype
The second argument to swapcontext() is const.

makedev.3
Rasmus Villemoes
Fix prototype
gnu_dev_makedev, and hence its trivial macro wrapper makedev, takes
two unsigned int parameters; this is consistent with it being the
inverse of (gnu_dev_)major/minor, which return unsigned int.

malloc_trim.3
Rasmus Villemoes
Fix prototype
As mentioned further down, malloc_trim returns an integer.

mq_getattr.3
  Rasmus Villemoes
    Fix prototype
      The newattr parameter to mq_setattr is const.

newlocale.3
  Marko Myllynen
    List all available category masks
  Michael Kerrisk
    Add LC_ALL_MASK description

nl_langinfo.3
  Marko Myllynen
    Expand the example code a bit
      Better illustrate querying elements from different categories.

perror.3
   Rasmus Villemoes
    Fix declaration
      The elements of the array sys_errlist are also const.

pthread_attr_setaffinity_np.3
pthread_attr_setdetachstate.3
pthread_attr_setguardsize.3
pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_attr_setscope.3
pthread_attr_setstack.3
pthread_attr_setstackaddr.3
pthread_attr_setstacksize.3
  Rasmus Villemoes
    Constify parameters
      Each of the pthread_attr_get* functions extract some piece of
      information from a pthread_attr_t, which is passed by const
      reference. Add the const keyword to the prototypes of these
      functions.

pthread_cleanup_push_defer_np.3
  Michael Kerrisk [Rasmus Villemoes]
    Add feature test macro requirements

pthread_create.3
  Michael Kerrisk [Carsten Grohmann]
    Add pid_max limit to EAGAIN error cases

pthread_equal.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe

The function pthread_equal() is thread safe.

pthread_exit.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_exit() is thread safe.

pthread_getcpuclockid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_getcpuclockid() is thread safe.

pthread_setaffinity_np.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_setaffinity_np() and
pthread_getaffinity_np() are thread safe.

pthread_setconcurrency.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_setconcurrency() and
pthread_getconcurrency() are thread safe.

pthread_setname_np.3
Rasmus Villemoes
Fix prototype
The name parameter of pthread_getname_np is an output parameter and
hence not const.

pthread_setschedparam.3
Rasmus Villemoes
Fix
prototypes
Add return type for pthread_{s,g}etschedparam.

pthread_setschedprio.3
Rasmus Villemoes
Fix prototype
Add return type for pthread_setschedprio.

pthread_sigqueue.3
Rasmus Villemoes
Add missing #include <signal.h>

rcmd.3
  Rasmus Villemoes
    Fix prototypes
      Unlike the BSDs, the second argument of rcmd() and rcmd_af() has
      type unsigned short.
      The first argument of iruserok_af() has type const void*.

re_comp.3
  Rasmus Villemoes
    Fix prototypes
      re_comp and re_exec take const char* arguments.

resolver.3
  Rasmus Villemoes
    Fix prototypes and extern-declaration
      Fix const- and signedness of various char* parameters.

      Also, there is no "struct state", but _res is a struct
      __res_state. (Actually, _res is errno-like in that it is really a
      macro expanding to (*__res_state()).)

rexec.3
  Rasmus Villemoes

 Fix prototypes
      The user, passwd and cmd arguments to rexec and rexec_af are all
      const.

rtime.3
  Rasmus Villemoes
    Replace header
      The header <rpc/des_crypt.h> does not provide rtime();
      <rpc/auth_des.h> does, as is also implied in both the NOTES and
      EXAMPLE sections.

scandir.3
  Rasmus Villemoes
    Fix prototypes
      The alphasort and versionsort functions take arguments of type
      const struct dirent **, not const void *.

setlocale.3
  Michael Kerrisk [Marko Myllynen]
    Simplify locale category listing and add GNU-specific locale categories
      Some information that was here will move to locale(7).
  Marko Myllynen
    Remove now obsolete NOTES section

setnetgrent.3
  Rasmus Villemoes
    Fix prototype
      The buflen argument to getnetgrent_r has type size_t.

sigvec.3
  Rasmus Villemoes
    Fix prototype
      The vec argument to sigvec is const.

tsearch.3
   Rasmus Villemoes
    Fix prototype
      The rootp argument to tfind is "void * const *",
      not "const void **".

core.5
  Michael Kerrisk
    Core dump files are nowadays core.pid by default

locale.5
  Marko Myllynen
    Document mon_grouping and grouping properly
  Michael Kerrisk
    Note default value for 'first_workday'
  Michael Kerrisk [Marko Myllynen]
    Add brief descriptions of collating-element and collating-symbol
  Marko Myllynen
    t_fmt_ampm is needed only for locales that employ AM/PM convention
  Michael Kerrisk [Marko Myllynen]
    Remove crufty reference to /usr/lib/nls/src
      That file is nowhere to be found
  Marko Myllynen
    Clarify LC_TIME/am_pm and LC_NAME keywords usage
      am_pm should be defined only if AM/PM convention is used to signal
      applications they should not try to print them when using them in
      unwanted.

      Same
 for all LC_NAME keywords expect for name_fmt which should be
      always defined.
  Marko Myllynen
    Clarify lang_term / lang_lib
      As noted by Keld Simonsen in the lib-locales@sourceware mailing
      list:

        https://sourceware.org/ml/libc-locales/2014-q2/msg00008.html
        From: Keld Simonsen <keld at rap dot rap dot dk>

To: Marko Myllynen <myllynen at redhat dot com>
Date: Tue, 29 Apr 2014 17:02:09 +0200

lang_term reflects ISO 639-2/T (terminology) codes, while
lang_lib reflects ISO 639-2/B (bibliographic) codes.
lang_term is preferred over lang_lib codes for locale names.
There are 20 specific ISO 639-2/B codes.
Marko Myllynen
Correct the FILES section

proc.5
Michael Kerrisk
'pid_max' is a system-wide limit on number of threads and processes
Since PIDs > /proc/sys/kernel/pid_max are not allocated,
this
file thus also imposes a system-wide limit on the number of
threads and processes.

capabilities.7
Michael Kerrisk
CAP_SYS_ADMIN allows overriding RLIMIT_NPROC
Michael Kerrisk
CAP_SYS_PTRACE allows process_vm_readv(2) and process_vm_writev(2)

charsets.7
Michael Kerrisk [Marko Myllynen]
Remove crufty statement that Romanian may be switching to ISO 8859-16
Michael Kerrisk
Remove ancient paragraph on charsets supported in glibc 2.3.2
That test is rather ancient, and probably of little use.

fanotify.7
Heinrich Schuchardt
Fix to example program: fanotify read() should use aligned buffer

inotify.7
Heinrich Schuchardt
Add example program
This example of the usage of the inotify API shows the
usage of inotify_init1(2) and inotify_add_watch(2) as well
as polling and reading from the inotify file descriptor.
Heinrich Schuchardt
munmap()
does not generate inotify events

locale.7
Marko Myllynen [Michael Kerrisk]
Document the LOCPATH environment variable

Michael Kerrisk
Add further details on various categories

========== Changes in man-pages-3.69 ==========

Released: 2014-06-14, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>
Jan Chaloupka <jchaloup@redhat.com>
Jeff Layton <jlayton@poochiereds.net>
Kirill A. Shutemov <kirill.shutemov@linux.intel.com>
KOSAKI Motohiro <kosaki.motohiro@jp.fujitsu.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Petr Gajdos <pgajdos@suse.cz>
Qian Lei <qianl.fnst@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Vasiliy Kulikov <segoon@openwall.com>
Walter
Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

iconv.1
Marko Myllynen [Michael Kerrisk]
New page for the iconv(1) command

iconvconfig.8
Marko Myllynen
New page for iconvconfig(8)

Newly documented interfaces in existing pages
---

fcntl.2
  Jeff Layton, Michael Kerrisk
    Document open file description locks
      As provided by the fcntl() operations F_OFD_SETLK,
      F_OFD_SETLKW, and F_OFD_GETLK

Changes to individual pages
---

locale.1
  Marko Myllynen
    Add FILES section, add charmap(5) reference
  Marko Myllynen
    Align with recent charmap(5) / repertoiremap(5) changes

execve.2
  Michael Kerrisk [NeilBrown]
    Before kernel 2.6.0, RLIMIT_NPROC had no effect for set*uid()
  Michael Kerrisk [Vasiliy Kulikov]
    RLIMIT_NPROC is checked
 only if preceded by set*uid()
  Michael Kerrisk [Vasiliy Kulikov, NeilBrown, KOSAKI Motohiro]
    Document EAGAIN error
      See also https://bugzilla.kernel.org/show_bug.cgi?id=42704

fcntl.2
  Michael Kerrisk
    Detail the limitations of traditional (process-associated) locks
  Michael Kerrisk [Jeff Layton]
    Describe how to check whether the kernel supports a particular command
  Michael Kerrisk
    ERRORS: add EINVAL for invalid 'cmd'
  Michael Kerrisk
    Add para introducing advisory locks and noting existence of OFD locks
  Michael Kerrisk [Jeff Layton]
    Add notes on F_SETLKW deadlock detection and its limitations
  Michael Kerrisk
    Add an explicit note that mandatory locking is not in POSIX
  Michael Kerrisk
    Rewrite introductory paragraphs on mandatory locking
      Make the structure more logical, and also explicitly mention
      OFD locks.
  Michael Kerrisk [Jeff Layton]

Reword discussion
of mandatory lock bug a little
Jeff Layton confirmed that the bug remains even in modern kernels.
Michael Kerrisk
Explain POSIX background to EACCES/EAGAIN error for F_GETLK
Michael Kerrisk
Add NOTES subhead for record locking and NFS
Michael Kerrisk [NeilBrown]
Note treatment of locks when an NFS client loses contact with the server
Michael Kerrisk [Jeff Layton]
nfsv4leasetime controls the "contact lost" interval for NFSv4

flock.2
Michael Kerrisk
In some modern BSDs, fcntl() and flock() locks do interact
So, reword and extend the discussion of this topic in NOTES.
Michael Kerrisk
Move NOTES text describing implementation of flock()
Michael Kerrisk [NeilBrown]
Add more details on NFS, including Linux 2.6.37 changes
Also: move NOTES text describing interaction of fcntl()
and flock() locks.

fork.2
Michael Kerrisk
Add notes on inheritance
of flock() and OFD locks across fork()

lseek.2
Michael Kerrisk
Add reference to open(2) for discussion of file descriptors and OFDs

open.2
Michael Kerrisk
Rework and extend the discussion of open file descriptions

open_by_handle_at.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

recvmmsg.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

remap_file_pages.2
Michael Kerrisk [Kirill A. Shutemov]
Note that remap_file_pages() is deprecated

sendmmsg.2
  Rasmus Villemoes
    Add reference to feature_test_macros(7)

seteuid.2
  Michael Kerrisk
    seteuid() and setegid() are implemented as library functions
  Michael Kerrisk
    Error checking should always be performed, even when caller is UID 0

setresuid.2
  Michael Kerrisk
    Document EAGAIN error that can occur after kernel alloc_uid() failure
  Michael Kerrisk
    Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer
 occurs
  Michael Kerrisk
    Correct the description of the EAGAIN error
  Michael Kerrisk
    Error checking should always be performed, even when caller is UID 0

setreuid.2
  Michael Kerrisk
    Document EAGAIN error that can occur after kernel alloc_uid() failure
  Michael Kerrisk
    Error checking should always be performed, even when caller is UID 0
  Michael Kerrisk
    Add EAGAIN error for hitting RLIMIT_NPROC limit
  Michael Kerrisk
    Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

setuid.2
  Michael Kerrisk
    Document EAGAIN error that can occur after kernel alloc_uid() failure
  Michael Kerrisk
    Correct the description of the EAGAIN error
  Michael Kerrisk
    Error checking should always be performed, even when caller is UID 0
  Michael Kerrisk
    Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

statfs.2
  Cyril Hrubis
    Update MAGIC constants

  Most of the updates are taken from /usr/include/linux/magic.h,
      some were found by grepping the Linux source code.
  Cyril Hrubis [Michael Kerrisk]

fstatfs(2) was broken on file descriptors from pipe(2)

syscalls.2
Michael Kerrisk
Note that remap_file_pages() is deprecated

basename.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions basename() and dirname() are thread safe.

catgets.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function catgets() is thread safe.

getdate.3
Rasmus Villemoes
Use blank definition of _GNU_SOURCE in example program

getdirentries.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getdirentries() is thread safe.

getdtablesize.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getdtablesize() is thread safe.

iconv.3
Qian Lei
[Peng Haitao]
ATTRIBUTES: Note function that is thread-safe
The function iconv() is thread safe.
Michael Kerrisk
SEE ALSO: add iconvconfig(8)

lockf.3
Qian Lei [Peng Haitao]
ATTRIBUTES: Note function that is thread-safe
The function lockf() is thread safe.

malloc_get_state.3
Rasmus Villemoes
SYNOPSIS: use correct header
The nonstandard functions malloc_set_state() and
malloc_get_state() are provided by <malloc.h> not <stdlib.h>.

malloc_usable_size.3
  Qian Lei
    ATTRIBUTES: Note function that is thread-safe
      The function malloc_usable_size() is thread safe.

matherr.3
  Qian Lei [Peng Haitao]
    ATTRIBUTES: Note function that is thread-safe
      The function matherr() is thread safe.

mkdtemp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function mkdtemp() is thread safe.

mkstemp.3
  Peng Haitao
    ATTRIBUTES:
 Note functions that are thread-safe
      The functions mkstemp(), mkostemp(), mkstemps() and mkostemps()
      are thread safe.

mq_close.3
  Qian Lei
    ATTRIBUTES: Note function that is thread-safe
      The function mq_close() is thread safe.

mq_getattr.3
  Qian Lei
    ATTRIBUTES: Note function that is thread-safe
      The functions mq_getattr() and mq_setattr() are thread safe.

mq_open.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function mq_open() is thread safe.

mq_receive.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions mq_receive() and mq_timedreceive() are thread safe.

mq_send.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions mq_send() and mq_timedsend() are thread safe.

mq_unlink.3
  Qian Lei
    ATTRIBUTES: Note function that is thread-safe
      The function mq_unlink() is thread
 safe.

posix_fallocate.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function posix_fallocate() is thread safe.

posix_openpt.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function posix_openpt() is thread safe.

siginterrupt.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function siginterrupt() is not thread safe.

system.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function system() is thread safe.

charmap.5
  Marko Myllynen
    Update to match current glibc
      charmap(5) was outdated, bring it to closer to reality by fixing
      syntax descriptions to match current glibc code and practices,
      adding missing options, removing obsolete comments and references,
      and removing now incorrect examples.

locale.5
  Marko Myllynen
    Clarify AM/PM settings a bit

     localedef(1) complains if really undefined, should be empty instead.
      Also: add some SEE ALSO references.
  Marko Myllynen
    Document glibc conventions regarding days and week
      Based on existing practice and glibc community wiki page at
      https://sourceware.org/glibc/wiki/Locales

proc.5
  Michael Kerrisk [Jan Chaloupka, Walter Harms]
    Add a brief description of /proc/fs

repertoiremap.5
  Marko Myllynen
    New page for repertoiremap(5)
      Rather obsolete feature but localedef(1) refers to repertoiremaps.

bootparam.7
  Petr Gajdos
    Describe 'rootflags' and 'rootdelay' kernel parameters
      Patch based on text from Documentation/kernel-parameters.txt

charsets.7
  Marko Myllynen
    Update to reflect past developments
      Rewrite the introduction to make Unicode's prominence more obvious.
      Reformulate parts of the text to reflect current Unicode world.
      Minor clarification
 for ASCII/ISO sections, some other minor fixes.
  Marko Myllynen
    List CJK encodings in the order of C, J, K

environ.7
  Michael Kerrisk
    SEE ALSO: add env(1), printenv(1), ld.so(8)

locale.7
  Marko Myllynen
    Add some SEE ALSO references

man-pages.7
  Michael Kerrisk
    Note that .TH 'date' field is nowadays automatically updated by scripts

signal.7
  Michael Kerrisk
    Describe EINTR semantics for recvmmsg(2)
  Michael Kerrisk
    Clarify text describing EINTR semantics for socket interfaces

unicode.7
  Marko Myllynen
    Update to reflect past developments
      The unicode(7) page will look more modern with few small changes:

      - drop old BUGS section, editors cope with UTF-8 ok these days,
        and perhaps the state-of-the-art is better described elsewhere
        anyway than in a man page
      - drop old suggestion about avoiding combined characters

- refer to LANANA
for Linux zone, add registry file reference
- drop a reference to an inactive/dead mailing list
- update some reference URLs

utf-8.7
Marko Myllynen
Drop an old comment about UTF-8 replacing ISO 8859
And add locale(1) under SEE ALSO.

========== Changes in man-pages-3.70 ==========

Released: 2014-07-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Florian Weimer <fweimer@redhat.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nadav Har'El <nyh@math.technion.ac.il>
NeilBrown <neilb@suse.de>
Rich Felker <dalias@libc.org>
Robert P. J. Day <rpjday@crashcourse.ca>
Simon Paillard <spaillard@debian.org>
Tomi
Salminen <tlsalmin@gmail.com>
Walter Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>
<kirillnow@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

sprof.1
Michael Kerrisk [Marko Myllynen]

New page for the glibc sprof(1) command

Newly documented interfaces in existing pages
---

epoll_ctl.2
  NeilBrown
    Document EPOLLWAKEUP

epoll.7
  NeilBrown
    Document EPOLLWAKEUP

Changes to individual pages
---

iconv.1
iconvconfig.8
  Marko Myllynen
    Clarify gconv file terminology a bit

ldd.1
  Michael Kerrisk
    SEE ALSO: add sprof(1)

connect.2
  Michael Kerrisk
    ERRORS: add EPROTOTYPE
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=708394

dup.2
  Michael Kerrisk [Rich Felker]
    Fix erroneous discussion regarding closing 'newfd' before calling dup2()
      And propose a workaround
 if the caller cares about catching
      close() time errors.

      See http://stackoverflow.com/questions/23440216/race-condition-when-using-dup2#comment36888604_23444465
      and http://austingroupbugs.net/view.php?id=411
  Michael Kerrisk
    Rework and enhance discussion of dup2()
      In particular, note that dup2() performs the steps of closing
      and reusing 'newfd' atomically.
  Michael Kerrisk
    Add subhead for dup3()

epoll_ctl.2
  Michael Kerrisk
    BUGS: EPOLLWAKEUP is silently ignored without CAP_BLOCK_SUSPEND
      If the caller does not have CAP_BLOCK_SUSPEND, then EPOLLWAKEUP
      is silently ignored.

fcntl.2
  Michael Kerrisk [Tomi Salminen]
    The return value for F_SETPIPE_SZ is the pipe capacity
  Michael Kerrisk
    ERRORS: Document ENOTDIR error for F_NOTIFY
  Michael Kerrisk
    Use proper page cross-references in F_NOTIFY discussion
  Michael Kerrisk
    Suggest the
 use of real-time signals with F_NOTIFY

getitimer.2
  Michael Kerrisk
    Rewrite a few pieces to clarify some details

inotify_add_watch.2
  Michael Kerrisk
    Clarify that the target of a watch is an i-node
      The target of a watch is an i-node, not a pathname. Clarify
      the text to prevent the reader possibly misunderstanding
      that establishing watches by two different links to the same
      file might create different watch descriptors.

open.2
  Michael Kerrisk []
    O_CLOEXEC is also one the flags not ignored when O_PATH is specified

pipe.2
  Elie De Brauwer
    PIPE_BUF is defined in limits.h
      To make use of PIPE_BUF in an application one should include
      <limits.h>. Adding a reference to this inclusion.

poll.2
  Michael Kerrisk [Nadav Har'El]
    The negate-fd-to-ignore technique does not work for file descriptor 0
      See https://bugzilla.kernel.org/show_bug.cgi?id=79411

set_tid_address.2
   Michael Kerrisk [Rich Felker]
    Use "thread" rather than "process" in DESCRIPTION

Michael Kerrisk
SEE ALSO: add gettid(2)

shmop.2
Michael Kerrisk
Explain SHMLBA in much more detail

splice.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

syscalls.2
Carlos O'Donell
Add prlimit64(2)
While trying to reconcile the new features in glibc with the
documented entries in the linux kernel man pages I noticed that
glibc exports prlimit64 for use by 32-bit applications (as does
the linux kernel), but that prlimit64 was not defined in the
syscalls list or in the prlimit-related page.

This is not the complete fix for this, but I don't have the time
to explain why and when prlimit64 should be used (or how it should
be used safely). Therefore I'm just patching the syscalls.2
list
to show that prlimit64 exists and was added in 2.6.36 (verified
with git by checking out the tags before and after).

syslog.2
Michael Kerrisk
Rework introductory paragraph
Michael Kerrisk [Robert P. J. Day]
Rework text describing loglevels
The kernel header file mentioned in the discussion of the KERN_*
constants has morphed and is no longer exported inside glibc.
And the definitions of the constants themselves changed subtly
with kernel commit 04d2c8c83d0e3ac5f78aeede51babb3236200112.
So, rewrite the description of the constants to be a bit more
abstract.
Michael Kerrisk
Rewrite parts of the page, and import /proc/sys/kernel/printk
* Move /proc/sys/kernel/printk from proc(5) to this page,
and correct various details in the discussion of that file.
* Rewrite and correct various other details on the page.
* Clean out some crufty text.
* Miscellaneous minor fixes.
Michael Kerrisk
Update SYSLOG_ACTION_CONSOLE_OFF + SYSLOG_ACTION_CONSOLE_ON description

Details changed in Linux 2.6.32

tee.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

vmsplice.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

ether_aton.3
Michael Kerrisk
Make description of ether_line() bug a little more informative

mallopt.3
Michael Kerrisk [Florian Weimer]
MALLOC_MMAP_THRESHOLD_ and MALLOC_MMAP_MAX_ *do* work in setgid programs
My testing on this point was bogus, overlooking details of
strace(1)'s behavior with setuid programs.

See https://sourceware.org/bugzilla/show_bug.cgi?id=12155

printf.3
Michael Kerrisk [Rich Felker]
Remove libc4 and libc5 details

Rich Felker noted that "scare text" in the man page warned about
the use of snprintf() on libc, and that some people had cited
this as a reason not to use snprintf(). Linux libc is now
ancient history, so there is no real need to keep that text.
But, while we're at it, we may as well clear out all of the
other ancient libc4 and libc5 pieces in the page. They are
nowadays more clutter than help.
Michael Kerrisk
SUSv3 and later agree with C99 for the snprintf() return value
Determined by inspection of the SUSv3 and SUSv4 specifications.
Michael Kerrisk
Remove some old text about glibc 2.0 changes
We probably don't now need such ancient info.
Michael Kerrisk
Update references to standards for C and S conversion specifiers

profil.3
Michael Kerrisk
SEE ALSO: add sprof(1)

charmap.5
  Marko Myllynen
    Various minor updates and improvements
      - more precise title
      - extend description a bit
      - document previously omitted WIDTH_DEFAULT
  Marko Myllynen
    Remove accidental ISO C compliance reference
      glibc refers in locale/programs/charmap.c to ISO C 99 section
      7.17.(2) and ISO C 99 section 5.2.1.(3) that if a character map
      is not ASCII compatible then the locale using it is not ISO C
      compliant. This does not state anything about the character set
      itself.

proc.5
  Michael Kerrisk
    Replace /proc/sys/kernel/printk discussion with reference to syslog(2)
      It makes more sense to have the /proc/sys/kernel/printk with
      the related material in syslog(2).
  Michael Kerrisk
    Rewrite /proc/sys/kernel/printk description

inotify.7
  Michael Kerrisk
    Clarify which events are generated for watched directories
      Really, with respect to watched directories, events fall into

      three classes (not two, as was shown):

      * Events that can be generated only for the watched directory.
      * Events that can be generated only for objects that are inside
        the watched directory.
      * Events that can be generated both for the watched directory
        and for objects inside the directory.

      So, mark these three classes more clearly in the list of inotify
      events.
  Heinrich Schuchardt [Michael Kerrisk]
    BUGS: Note possible bug triggered by watch descriptor reuse
      Watch descriptor IDs are returned by inotify_add_watch().
      When calling inotify_rm_watch() an IN_IGNORED is placed on the
      inotify queue pointing to the ID of the removed watch.

      inotify_add_watch() should not return a watch descriptor ID for
      which events are still on the queue but should return an
      unused ID.

      Unfortunately, the existing Kernel

code does not provide such a
guarantee.

Actually, in rare cases watch descriptor IDs are returned by
inotify_add_watch() for which events are still on the inotify
queue.

See https://bugzilla.kernel.org/show_bug.cgi?id=77111
Michael Kerrisk
Add further detail to the watch descriptor reuse bug
As well as inotify_rm_watch(), file deletion and unmounting a
filesystem can also cause a watch descriptor to be deleted.
Michael Kerrisk
The watch descriptor reuse bug may be hard to hit in practice
Explain the circumstances in detail, indicating that the
bug may be very unlikely to occur in practice.
Michael Kerrisk
Clarify description of IN_EXCL_UNLINK
Clarify the text a little, in particular making it clearer
that the target of a watch is an i-node (not a pathname).
Michael Kerrisk
Clarify IN_ONESHOT explanation

Make it clearer that the target of monitoring is an i-node,
not a pathname.
Michael Kerrisk
Make comment on 'mask' field more accurate

libc.7
Michael Kerrisk
Clarify man-pages policy on documenting C libraries other than glibc
Michael Kerrisk
Use absolute dates in discussion of libc vs glibc

pipe.7
Elie De Brauwer
Add reference that the pipe capacity can be changed
In fcntl(2) F_SETPIPE_SZ, F_GETPIPE_SZ and
/proc/sys/fs/pipe-max-size are defined, however
pipe(7) still defines the pipe capacity as being
a static entity. Adding a reference to fcntl(2).
Michael Kerrisk [Walter Harms]
Clarify that since 2.6.35, 65535 bytes is the default pipe capacity

ld.so.8
Michael Kerrisk
Clarify that LD_PROFILE can specify just a single shared object
Michael Kerrisk

Clarify that LD_PROFILE output is appended to target file
The LD_PROFILE
output is appended to any existing
contents of the target file.
Michael Kerrisk
SEE ALSO: add sprof(1)

========== Changes in man-pages-3.71 ==========

Released: 2014-08-17, Chicago

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

New and rewritten pages
---

group_member.3

Michael Kerrisk
New page documenting group_member(3)

isfdtype.3
Michael Kerrisk
New page documenting isfdtype(3)

Newly documented interfaces in existing pages
---

perf_event_open.2
Vince Weaver
Document new comm_exec flag
Linux 3.16 (more specifically, commit 82b897782d10fcc4)
added support for differentiating between process renames
caused by exec versus those caused by other methods.
Vince Weaver
Document new mmap2 record type
Linux 3.16 (more specifically, commit a5a5ba72843dd05f9)
enabled the enhanced mmap2 record support.
The interface was added in Linux 3.12 but disabled until
Linux 3.16.
Vince Weaver

Document PERF_SAMPLE_BRANCH_COND
Linux 3.16 (more specifically, commit bac52139f0b7ab31330)
adds support for gathering PERF_SAMPLE_BRANCH_COND
conditional branch values when doing PERF_SAMPLE_BRANCH_STACK
sampling.

proc.5
Michael Kerrisk
Document /proc/PID/comm
Michael Kerrisk
Document /proc/PID/pagemap
Michael Kerrisk
Document /proc/PID/personality
Michael Kerrisk
Document /proc/PID/syscall
Michael Kerrisk
Document /proc/kpagecount
Michael Kerrisk
Document /proc/kpageflags
Michael Kerrisk
Document /proc/sys/vm/overcommit_kbytes

capabilities.7

Michael Kerrisk
Add CAP_AUDIT_READ
CAP_AUDIT_READ is new in Linux 3.16.

Global changes
---

ldd.1
clone.2
execve.2
getpagesize.2
ioperm.2
msgop.2
readv.2

Changes to individual pages
----

access.2
  Michael Kerrisk

Glibc falls back to using access() on kernels that lack faccessat()

bdflush.2
fsync.2
sync.2
proc.5
Adrian Bunk
Change "sync(1)" to "sync(8)"

bind.2
Michael Kerrisk [Ryan Hammonds]
Correct EINVAL
error description
As pointed out by Ryan:

My application is trying to bind an IPv4 UDP socket to an address. I've found that passing an invalid address length to bind() causes bind to return EINVAL. According to the bind(2) manpage, this should only occur when using unix domain sockets (which I am not).

chmod.2
Michael Kerrisk
Glibc falls back to chmod() on kernels that don't support fchmodat()
Michael Kerrisk
Glibc falls back to chown()/lchown() on kernels that lack fchownat()

epoll_wait.2
Michael Kerrisk
NOTES: describe raw epoll_pwait() system call differences

getgroups.2
Michael Kerrisk
SEE ALSO: add group_member(3)

getpriority.2
Michael Kerrisk
Enhance discussion of kernel nice range versus user-space nice range
Michael Kerrisk
Move text describing nice range on other systems

getrlimit.2
Michael Kerrisk

Add cross reference to core(5) in discussion of RLIMIT_CORE
Michael Kerrisk
Describe the "large" resource limit bug on 32-bit platforms
See https://bugzilla.kernel.org/show_bug.cgi?id=5042.

Michael Kerrisk
Glibc's setrlimit() and getrlimit() are implemented using prlimit()

kexec_load.2
Michael Kerrisk
Note limit of 16 for 'nr_segments'
Michael Kerrisk
Clarify the 'flags' bits that contain the architecture
Michael Kerrisk
Add KEXEC_ARCH_68K to list of architectures for 'flags'
Michael Kerrisk
Reword description of 'flags' a little

link.2
Michael Kerrisk
Glibc falls back to link() on kernels that lack linkat()
Unless 'flags' contains AT_SYMLINK_FOLLOW.

mkdir.2
Michael Kerrisk
Glibc falls back to mkdir() on kernels that don't support mkdirat()

perf_event_open.2
Vince Weaver
Clarify PERF_SAMPLE_STACK_USER usage
This clarifies the PERF_SAMPLE_STACK_USER
section.
I found these issue while implementing some code that uses
the option. The important change is fixing the name of the
sample_stack_user parameter, the rest is just some wording
fixes and minor clarifications.
Vince Weaver
Clarify PERF_SAMPLE_DATA_SRC usage
When checking the fields in the PERF_SAMPLE_DATA_SRC type samples
you need to shift the masks before doing the compare.

Although the value you are checking (perf_mem_data_src) is
specified as a bitfield so this might all fall apart if trying
to access the field in a cross-endian way. The Power people
were working on this issue, not sure if they resolved it.

poll.2
Michael Kerrisk
Describe fifth argument (sigsetsize) of raw ppoll() system call

process_vm_readv.2
Michael Kerrisk [Ville Ylenius]
Fix typo in example program

readlink.2
  Michael Kerrisk

    Glibc falls back to readlink() on kernels that lack readlinkat()

recv.2
  Michael Kerrisk
    'addrlen' should be NULL (not 0) if we don't need sender address

rename.2
  Michael Kerrisk
    Glibc falls back to rename() when the kernel doesn't have renameat()

sigwaitinfo.2
  Michael Kerrisk
    The raw sigtimedwait() system call has a fifth argument

symlink.2
  Michael Kerrisk
    Glibc falls back to symlink() on kernels that lack symlinkat()

sysinfo.2
  Michael Kerrisk
    Add VERSIONS section

unlink.2
  Michael Kerrisk
    Glibc falls back to unlink() or rmdir() on kernels that lack unlinkat()

atoi.3
  Michael Kerrisk
    Downgrade discussion of atoq()
      Remove most references to atoq() in this page, since this function
      was present only in Linux libc (not glibc).

cerf.3
cexp2.3
clog2.3
  Michael Kerrisk
    Update version number on "Not yet in glibc" sentence

fgetgrent.3
getgrent.3
getgrent_r.3
getgrnam.3
  Michael Kerrisk [Rob Landley]
    Clarify that 'gr_mem' is a NULL-terminated array of pointers

fseeko.3
  Michael Kerrisk
    Add VERSIONS section

ftw.3
  Michael Kerrisk
    Add VERSIONS section

getauxval.3
  Michael Kerrisk
    Document ENOENT error
      And add an entry to BUGS explaining the ambiguity that was
      present before the addition of this error.

getgrouplist.3
  Michael Kerrisk
    SEE ALSO: add group_member(3)

getline.3
  Rahul Bedarkar
    Close opened file at end of example program

memmem.3
  Michael Kerrisk
    Rewrite text of glibc 2.0 bug

printf.3
  Michael Kerrisk [Jakub Wilk]
    Clarify details of the %n conversion specifier
      See http://bugs.debian.org/756602
  Michael Kerrisk [Jakub Wilk]
    Note use of 'j', 'z', and 't' length modifiers for '%n'
      See http://bugs.debian.org/756602
  Michael Kerrisk
    Update with some SUSv3 details

setbuf.3
  Michael
 Kerrisk
    Remove ancient Linux libc and 4.x BSD details

strstr.3
  Michael Kerrisk
    Remove discussion of Linux libc bugs
      Linux libc is old enough that we needn't care any longer.

strtod.3

Michael Kerrisk
Explain NAN(n-char-sequence)

strtod.3
Michael Kerrisk
SEE ALSO: add nan(3), nanf(3), NANL(3)

updwtmp.3
Michael Kerrisk
Replace AVAILABILITY section with note to link logwtmp() using -lutil
Linux libc details are no longer needed these days.

core.5
Rahul Bedarkar
Close opened file in example program

proc.5
Michael Kerrisk
Fix kernel version numbers for /proc/PID/stat fields

proc.5
Jan Chaloupka
Add missing proc stats fields
Adding missing proc stats fields from
https://www.kernel.org/doc/Documentation/filesystems/proc.txt
Michael Kerrisk [Simon Paillard]
Remove crufty text under 'timer_stats'
Michael Kerrisk
Update /proc/PID/stat
'state' field documentation
Michael Kerrisk
Improve description of /proc/PID/stat fields added in Linux 3.3 and 3.5
Michael Kerrisk
Refer to getauxval(3) in discussion of /proc/PID/auxv
Michael Kerrisk
Rework formatting of /proc/PID/stat list
Make the field numbers more prominent.
Michael Kerrisk
Note that /proc/PID/cmdline is read-only
Michael Kerrisk
Rework discussion of CommitLimit and /proc/sys/vm/overcommit_memory
Michael Kerrisk
Improve discussion of /proc/sys/vm/overcommit_ratio

charsets.7
David Prévot [Marko Myllynen]
Tidy up list
Remove German from main list, to be consistent with earlier

removal of Dutch and French (in commit a8ed5f7430e0d1).

inotify.7
  Michael Kerrisk
    Note that IN_ONLY_DIR can be used to avoid races
  Michael Kerrisk
    Note that insertion of IN_MOVED_FROM+IN_MOVED_TO pair is not atomic
  Michael Kerrisk
     Mention use of timeout when reading IN_MOVED_TO after IN_MOVED_FROM

man-pages.7
  Michael Kerrisk
    Add description of "C library/kernel ABI differences" subsection
  Michael Kerrisk
    Rework text describing sections (stylistic improvements)

vdso.7
  Mike Frysinger
    Add new i386 vdso symbols in Linux 3.15
  Michael Kerrisk
    Note kernel version that exports new i386 symbols (Linux 3.15)

========== Changes in man-pages-3.72 ==========

Released: 2014-09-07, Mountain View

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Christian von Roques <roques@mti.ag>
Holger Hans Peter Freyther <holger@moiji-mobile.com>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Rusty Russell <rusty@rustcorp.com.au>
Sorin
 Dumitru <sdumitru@ixiacom.com>

Apologies if I missed anyone!

New and rewritten pages
---

memusage.1
  Peter Schiffer, Michael Kerrisk [Jan Chaloupka]
    New page for glibc memusage(1) command

memusagestat.1
  Peter Schiffer [Jan Chaloupka, Michael Kerrisk]
    New page for glibc memusagestat(1) command

mtrace.1
  Peter Schiffer [Jan Chaloupka]
    New page describing the glibc mtrace(1) command

Changes to individual pages
---

connect.2
  Michael Haardt
    Note that a new socket should be used if connect() fails

fcntl.2
  Michael Kerrisk
    One must define _GNU_SOURCE to get the F_OFD_* definitions

poll.2, select.2
  Rusty Russell
    Fix erroneous description of "available for write".
      POSIX says: "POLLOUT Normal data may be written without
      blocking.". This "may" is misleading, see the POSIX
      write page:

          Write requests
 to a pipe or FIFO shall be handled in the
          same way as a regular file with the following exceptions:
          ...
          If the O_NONBLOCK flag is clear, a write request may cause
          the thread to block, but on normal completion it shall
          return nbyte.
          ...
          When attempting to write to a file descriptor (other than a
          pipe or FIFO) that supports non-blocking writes and cannot
          accept the data immediately:

          If the O_NONBLOCK flag is clear, write() shall block the
          calling thread until the data can be accepted.

If the O_NONBLOCK flag is set, write() shall not block the
thread. If some data can be written without blocking the
thread, write() shall write what it can and return the
number of bytes written. Otherwise, it shall return -1 and
set errno to [EAGAIN].

The net result is that write() of more than 1 byte on a
socket, pipe or FIFO which is "ready" may block: write()
(unlike read!) will attempt to write the entire buffer and
only return a short write under exceptional circumstances.

Indeed, this is the behaviour we see in Linux:

https://github.com/rustyrussell/ccan/commit/897626152d12d7fd13a8feb36989eb5c8c1f3485
https://plus.google.com/103188246877163594460/posts/BkTGTMHDFgZ

errno.3
Michael Kerrisk
SEE ALSO: add errno(1)

rtnetlink.3
Holger Hans Peter Freyther
Fix parameters for the send() call in the example

inotify.7
Michael Kerrisk
IN_OPEN and IN_CLOSE_NOWRITE can also occur for directories
Michael Kerrisk
IN_CLOSE_WRITE occurs only for files (not monitored directory)
Michael Kerrisk
IN_MODIFY is generated for files only (not monitored directories)
Michael Kerrisk
IN_ACCESS
occurs only for files inside directories
IN_ACCESS does not occur for monitored directory.

packet.7
Sorin Dumitru
Fix include file
It looks like most of the socket options from this man pages
are not defined in <netpacket/packet.h>. They are defined in
<linux/if_packet.h> so we should include that one.

========== Changes in man-pages-3.73 ==========

New and rewritten pages
---

namespaces.7
  Michael Kerrisk [Eric W. Biederman]
    New page providing overview of Linux namespaces

pid_namespaces.7
  Michael Kerrisk [Eric W. Biederman, Vasily Kulikov, Rob Landley,
                    Serge Hallyn]
    New page describing PID namespaces

user_namespaces.7
  Michael Kerrisk [Eric W. Biederman, Andy Lutomirski, Serge Hallyn]
    New page describing user namespaces.

Newly documented interfaces in existing pages
---

clone.2

Eric W. Biederman [Michael Kerrisk]
Document CLONE_NEWUSER for creating a new user namespace

setns.2
Eric W. Biederman, Michael Kerrisk
Document the PID, user, and mount namespace support
Document CLONE_NEWPID,
CLONE_NEWUSER, and CLONE_NEWNS flags.

unshare.2
Michael Kerrisk [Eric W. Biederman]
Document CLONE_NEWPID
Michael Kerrisk [Eric W. Biederman]
Document CLONE_NEWUSER
Michael Kerrisk
Document CLONE_THREAD, CLONE_SIGHAND, and CLONE_VM

Changes to individual pages
---

clone.2
Michael Kerrisk
Move some CLONE_NEWNET text to namespaces.7
Michael Kerrisk
Move some CLONE_NEWUTS text 2 to namespaces.7
Michael Kerrisk
Move some CLONE_NEWIPC text to namespaces.7
Michael Kerrisk
Reword discussion of CLONE_NEWNS, removing text also in namespaces(7)
Michael Kerrisk
Standardize text on CLONE_NEW* flags and CAP_SYS_ADMIN
Michael Kerrisk
EINVAL if (CLONE_NEWUSER|CLONE_NEWPID) && (CLONE_THREAD|CLONE_PARENT)
Michael Kerrisk
Add more detail on the meaning of CLONE_SYSVSEM

flock.2
Michael Kerrisk [J. Bruce Fields]
Don't mention "classical BSD"
in discussion of fcntl()/flock interaction
The noninteraction of flock(2) and fcntl(2) locks does
not seem to be classical BSD semantics (at least, checking
the 4.4BSD sources suggest that the lock types do interact,
although there have been other systems also where fcntl()
and flock() locks do not interact). So, fix the text
discussing "classical BSD" lock semantics.

getunwind.2
  Michael Kerrisk [Yuri Kozlov]
    Fix description of return value
      s/size of unwind table/size of the unwind data/

mount.2
  Eric W. Biederman
    Clarify use of 'mountflags' and 'data' for MS_REMOUNT

reboot.2
  Michael Kerrisk [Justin Cormack, Eric W. Biederman]
    Document effect of reboot() inside PID namespaces

semop.2
  Michael Kerrisk
    Refer to clone(2) for semantics of CLONE_SYSVSEM and semadj lists

seteuid.2
setgid.2
setresuid.2
setreuid.2
setuid.2
  Michael Kerrisk
    EINVAL
 can occur if UID/GID is not valid in caller's user namespace

setns.2
  Michael Kerrisk [Eric W. Biederman]
    Clarify capabilities required for reassociating with a mount namespace
  Michael Kerrisk
    Specify kernel version on each CLONE_NEW* flag
      And remove text on flags from VERSIONS.

unshare.2
  Michael Kerrisk
    Add an example program
  Michael Kerrisk
    Clarify semantics of CLONE_SYSVSEM
  Michael Kerrisk
    CLONE_SYSVSEM does not require CAP_SYS_ADMIN
  Michael Kerrisk
    Note flags implied by CLONE_THREAD and CLONE_VM

clock.3
  Michael Kerrisk [Vincent Lefevre]
    The implementation uses clock_gettime() was to improve *accuracy*
      (The man page text mistakenly used the word "precision".)

drand48.3
  Michael Kerrisk [Lorenzo Beretta]
    Remove crufty text about SVID 3 marking drand48() obsolete
      See http://bugs.debian.org/758293

proc.5
  Michael Kerrisk
    Move /proc/[pid]/mounts
 text to namespaces.7
  Michael Kerrisk
    Move /proc/[pid]/mountstats text to namespaces.7

capabilities.7
  Michael Kerrisk
    Refer reader to user_namespaces(7) for a discussion of capabilities
  Michael Kerrisk
    Document CAP_SETUID and CAP_SETGID for user namespace mappings
  Michael Kerrisk
    setns() needs CAP_SYS_ADMIN in the *target* namespace
  Michael Kerrisk
    Since Linux 3.8, user namespaces no longer require CAP_SYS_ADMIN

mq_overview.7
  Michael Kerrisk
    Refer to namespaces(7) for info on POSIX MQs and IPC namespaces

svipc.7
  Michael Kerrisk
    Refer to namespaces(7) for info on System V IPC and IPC namespaces

========== Changes in man-pages-3.74 ==========

Released: 2014-10-03, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

pldd.1
  Michael Kerrisk
    New page for pldd(1) command added to glibc in version 2.15

cp1252.7
  Marko Myllynen
    New page documenting CP 1252
      CP 1252 is probably one of the most used Windows Code Pages so
      let's add a page for it
 alongside with the already provided
      CP 1251 page.

      Table generated from /usr/share/i18n/charmaps/CP1252.

Newly documented interfaces in existing pages
---

mq_overview.7
  Michael Kerrisk
    Document /proc/sys/fs/mqueue/msgsize_default
  Michael Kerrisk
    Document /proc/sys/fs/mqueue/msg_default

Changes to individual pages
---

ldd.1
  Michael Kerrisk
    SEE ALSO: add pldd(1)

execve.2
  Michael Kerrisk [C. Alex North-Keys]
    Remove unneeded ".sh" extension in interpreter script example
      See https://bugzilla.kernel.org/show_bug.cgi?id=84701

fanotify_init.2
  Heinrich Schuchardt
    BUGS: O_CLOEXEC is ignored
  Michael Kerrisk [Heinrich Schuchardt]
    The 'event_f_flags' failure to check invalid flags was fixed in 3.15

fanotify_mark.2
  Michael Kerrisk
    Note that various bugs were fixed in Linux 3.16

getrlimit.2
  Michael Kerrisk
 [Doug Ledford]
    Since Linux 3.5, the accounting formula for RLIMIT_MSGQUEUE has changed

open.2
  Michael Kerrisk [Shriramana Sharma]
    Fix number and formula in description of EOVERFLOW error

readlink.2
  Michael Kerrisk [Ben Hutchings]
    Fix description of readlinkat() with empty 'pathname'
  Michael Kerrisk
    SEE ALSO: add realpath(3)

sched_setattr.2
sched_setscheduler.2
  Michael Kerrisk
    SEE ALSO: add chrt(1)

shmget.2
  Manfred Spraul [Michael Kerrisk, Davidlohr Bueso]
    Update for increase of SHMALL and SHMMAX
      The default values of SHMALL and SHMMAX have been increased.

syscalls.2
  Michael Kerrisk
    Add 3 new system calls added in Linux 3.17

vmsplice.2
  Cyril Hrubis
    vmsplice() does not fail when nr_segs==0
      This nr_segs==0 case is no-op; the call succeeds and no
      EINVAL error is returned.

dlopen.3
  Michael Kerrisk
    SEE ALSO: add pldd(1)

fseeko.3
  Michael
 Kerrisk [Thomas Mack]
    _FILE_OFFSET_BITS must be defined before including any header file

getgrent.3
  Carlos O'Donell
    Add ENOENT and EAGAIN to error list

mq_getattr.3
  Michael Kerrisk
    Add an example program
      The example program can be used to discover the default
      'mq_maxmsg' and 'mq_msgsize' values used to create a queue with
      a mq_open(3) call in which 'attr' is NULL.

mq_open.3
  Michael Kerrisk
    Two /proc files control the defaults for the attrp==NULL case
      Refer the reader to the discussion in mq_overview(7) for a
      discussion of these files, which exist since Linux 3.5.

realpath.3
  Michael Kerrisk
    SEE ALSO: add realpath(1)

proc.5
  Elie De Brauwer
    Document /proc/buddyinfo
      This patch adds a short description about the contents of
      /proc/buddyinfo and how this file can be used to assist
      in checking for memory fragmentation issues.
   Michael Kerrisk
    Mention pmap(1) in discussion of /proc/PID/smaps

armscii-8.7
  Marko Myllynen

Charset pages unification, minor cleanups

ascii.7
Marko Myllynen
Charset pages unification, minor cleanups
This and [the related *.7] patches will provide unification of charset pages, minor cleanups, and some unifying cosmetic changes. References are adjusted so that all pages include a reference to charsets(7), which contains a description of these sets, stray comments are removed, some obsolete statements (like ISO 8859-1 being the de-facto ASCII replacement) are removed, and some minor reformatting to minimize diff's between the pages are done.

The actual substance, the character tables, remain unchanged.

This series changes the following pages (under man7): ascii, armscii, cp1251, koi8-r, koi8-u, and all of iso_8859-*.

cp1251.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-10.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-11.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-13.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-14.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-15.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-16.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-1.7

Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-2.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-3.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-4.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-5.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-6.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-7.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-8.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-9.7
Marko Myllynen
Charset pages unification, minor cleanups

koi8-r.7
Marko Myllynen
Charset pages unification, minor cleanups
- remove stray comments, streamline description
(charsets(7) and Wikipedia provide more detailed
and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

koi8-u.7
Marko Myllynen
Charset pages unification, minor cleanups
- remove stray comments, streamline description
(charsets(7) and Wikipedia provide more detailed

and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

mq_overview.7
Michael Kerrisk
Update queues_max
details for Linux 3.14
And in general rework the text a little.
Michael Kerrisk
Update discussion of HARD_MSGMAX
The limit has changed in 2.6.33 and then again in 3.5.
Michael Kerrisk [Arto Bendiken]
Update details for 'queues_max' limit
Things changed in Linux 3.5.
See https://bugs.launchpad.net/bugs/1155695
Michael Kerrisk
Update details on defaults and ceiling for 'msgsize_max' limit
Michael Kerrisk
Rework discussion of HARD_MSGMAX
Michael Kerrisk [Davidlohr Bueso]
Various fixes after review from Davidlohr Bueso

sched.7
Michael Kerrisk
SEE ALSO: add taskset(1)

ld.so.8
Michael Kerrisk

========== Changes in man-pages-3.75 ==========

Released: 2014-10-15, Düsseldorf

Contributors

The following
people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Jonny Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Robert Schweikert <rjschwei@suse.com>
Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_rwlockattr_setkind_np.3
  Robert Schweikert [Michael Kerrisk]
    New page documenting pthread_rwlockattr_[sg]etkind_np(3)
      Documents pthread_rwlockattr_setkind_np(3) and
      pthread_rwlockattr_getkind_np(3).

New and changed links
---

pthread_rwlockattr_getkind_np.3
  Robert Schweikert
    New link to pthread_rwlockattr_setkind_np(3)

Changes to individual pages
---

readlink.2
  Michael Kerrisk [Jonny Grant]
    Add free() call to example program

readv.2
  Michael Kerrisk
     The raw preadv() and pwritev() syscalls split 'offset' into 2 arguments

signal.7
  Michael Kerrisk
    pthread_mutex_lock() and pthread_cond_wait() are restartable
      pthread_mutex_lock(, pthread_cond_wait(), and related APIs are
      automatically restarted if interrupted by a signal handler.

unix.7
  Michael Kerrisk [Carlos O'Donell, David Miller, Tetsuo Handa]
    Various additions and rewordings

Notable changes:
* Clarify some details for pathname sockets.
* Add some advice on portably coding with pathname sockets.
* Note the "buggy" behavior for pathname sockets when
  the supplied pathname is 108 bytes (after a report by
  Tetsuo Handa).

========== Changes in man-pages-3.76 ==========

Released: 2014-12-31, Munich

New and rewritten pages
---

adjtimex.2
  Laurent Georget
    Add fields in struct timex description
      This patch updates the man page with the new fields added in
      struct timex since last edition of the man page.
  Laurent Georget [Michael Kerrisk]
    Document ADJ_TAI
  Michael Kerrisk
    Improve description of ADJ_OFFSET_SINGLESHOT
  Michael Kerrisk
    Add brief documentation of ADJ_MICRO and ADJ_NANO
  Michael Kerrisk
    Reformat return value list
      And remove
numeric values, since they're not needed
  Michael Kerrisk
    Other 'modes' bits are ignored on ADJ_OFFSET_*
      Other bits in 'modes' are ignored if modes contains
      ADJ_OFFSET_SINGLESHOT or ADJ_OFFSET_SS_READ.
  Michael Kerrisk
    Add nanosecond details
      Fixes https://bugzilla.kernel.org/show_bug.cgi?id=61171.
  Michael Kerrisk
    Document ADJ_OFFSET_SS_READ
  Michael Kerrisk
    Reformat 'times' flags as list
      And remove numeric values, since they're not needed.
  Michael Kerrisk
    Note effect of ADJ_NANO for ADJ_SETOFFSET

  Michael Kerrisk
    Add comment noting that timex structure contains padding bytes
  Michael Kerrisk
    Add more details to description of 'tai' field
  Michael Kerrisk
    Note meaning of "PLL" abbreviation
  Michael Kerrisk
    Clarify which 'timex' field is used by each 'modes' bit
  Michael Kerrisk
    Document timex 'status' bits
  Michael Kerrisk
     Clarify treatment of other 'modes' bits for ADJ_OFFSET_*
  Michael Kerrisk
    Update RFC number: RFC 5905 obsoletes RFC 1305
  Michael Kerrisk
    Briefly document ADJ_SETOFFSET
  Michael Kerrisk
    Note PPS (pulse per second) fields in timex structure

sigreturn.2
  Michael Kerrisk
    Add (a lot) more detail on the signal trampoline
      And rewrite much of the page.

Newly documented interfaces in existing pages
---

proc.5
  Bernhard Walle
    Document /proc/thread-self
      /proc/thread-self has been introduced in Linux 3.17 with
      commit 0097875bd41528922fb3bb5f348c53f17e00e2fd.
  Sven Hoexter [Michael Kerrisk, Kamezawa Hiroyuki]
    Document "VmSwap" field of /proc/[pid]/status
  Florian Westphal
    Document /proc/net/netfilter/nfnetlink_queue

Changes to individual pages
---

localedef.1
  Marko Myllynen
    Mention default path
 for compiled files

clock_nanosleep.2

Michael Kerrisk
Note that 'clock_id' can also be a CPU clock ID

epoll_ctl.2
Michael Kerrisk
Regular files and directories can't be monitored with epoll_ctl()

ioctl.2
Heinrich Schuchardt
Rename 'd' argument to 'fd' in text
In most other manpages file descriptors are called 'fd'.
This patches renames attribute 'd' to 'fd'.

madvise.2
Michael Kerrisk
VERSIONS: Support for madvise() is now configurable
Support for this system call now depends on the
CONFIG_ADVISE_SYSCALLS configuration option.

open.2
Michael Kerrisk
Enhance rationale discussion for openat() and friends

posix_fadvise.2
Mel Gorman
Document the behavior of partial page discard requests
It is not obvious from the interface that "partial page discard"
requests are ignored. It should be spelled out.
Michael Kerrisk [Weijie Yang]
ERRORS:
Since 2.6.16, the kernel correctly deals with the ESPIPE case
Michael Kerrisk
Support for fadvise64() is now configurable
Support for this system call now depends on the
CONFIG_ADVISE_SYSCALLS configuration option.

prctl.2
Andreas Schwab
Correct description of null-termination in PR_GET_NAME and PR_SET_NAME
The size of the process name has always been at most 16 byte
including the null terminator. This also means that the
name returned by PR_GET_NAME is always null-terminated.
Michael Kerrisk
PR_SET_NAME silently truncates strings that exceed 16 bytes

restart_syscall.2
Michael Kerrisk
Add some text explaining why restart_syscall() exists

sched_setaffinity.2
  Michael Kerrisk
    NOTES: Add paragraph on how to discover set of CPUs available on system
  Michael Kerrisk
    SEE ALSO: add nproc(1) and lscpu(1)

select.2
  Michael Kerrisk
    SEE ALSO: add
restart_syscall(2)

semop.2
  Michael Kerrisk
    Add note that interrupted semtimedop() returns 'timeout' unchanged
  Michael Kerrisk
    Remove information about semtimedop() EAGAIN that is repeated elsewhere
  Michael Kerrisk
    Add subsection head for semtimedop()

setsid.2
  Michael Kerrisk
    Rewrite some pieces and add some details
      Among other changes, add an explanation of why setsid() can't
      be called from a process group leader

sgetmask.2
  Michael Kerrisk
    Since 3.16, support for these system calls is configurable
      Support for these calls is now dependent on the setting of the
      CONFIG_SGETMASK_SYSCALL option.

sigaction.2
  Michael Kerrisk
    Document SA_RESTORER
  Michael Kerrisk
    Add some detail on the sa_restorer field
  Michael Kerrisk
    SEE ALSO: add sigreturn(2)

splice.2
  Michael Kerrisk
    Reformat description of 'fd_in' and 'off_in' to improve readability

syscall.2
   Michael Kerrisk
    SEE ALSO: add errno(3)

syscalls.2
  Michael Kerrisk
    SEE ALSO: add errno(3)
  Michael Kerrisk
    3.19 adds execveat()
  Michael Kerrisk
    Add bpf(2) to list

tee.2
  Michael Kerrisk
    Add shell session demonstrating use of the example program

tkill.2
  Michael Kerrisk [Rich Felker]
    Remove bogus text saying tgid==-1 makes tgkill() equivalent to tkill()

abort.3
  Michael Kerrisk
    Note that SIGABRT is raised as though raise(3) is called
      Also note that abort() is POSIX.1-2008 compliant.

cmsg.3
  David Wragg
    Ensure buf is suitably aligned in sending example
      Inspection of the definition of CMSG_FIRSTHDR (both in glibc and
      the suggested definition in RFC3542) shows that it yields the
      msg_control field. So when sending, the pointer placed in
      msg_control should be suitably aligned as a struct cmsghdr.
      In the sending example,
 buf was declared as a bare char array,
      and so is not necessarily suitably aligned.

      The solution here involves placing buf inside a union, and is
      based on the sockets/scm_rights_send.c sample from The Linux
      Programming Interface "dist" source code collection.

exp10.3
  Michael Kerrisk
    Before glibc 2.19, exp() did not give ERANGE error on underflow
      http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787

ftw.3
  Michael Kerrisk
    FTW_CHDIR has no effect on the 'fpath' argument passed to fn()

getopt.3
  Michael Kerrisk [Jonny Grant]
    Ensure that 'nsecs' is used

ilogb.3
  Michael Kerrisk [Will Newton]
    Since glibc 2.16, ilogb() does correctly diagnose domain errors

memcmp.3
  Michael Haardt
    Document return value for n==0 case
  Michael Haardt
    Warn against use of memcmp() for comparing security-critical data

mq_open.3
  Michael Kerrisk
    Document the O_CLOEXEC
 flag
  Michael Kerrisk
    Place 'flags' constants in alphabetical order

pow.3
  Manuel López-Ibáñez
    Add note on performance characteristics of pow()

pthread_setschedparam.3
  Simon Newton
    Fix logic error in example program
      The example program will crash if -A is used, since 'attr'
      is uninitialized.

        $ ./a.out -A
        *** Error in `./a.out': free(): invalid pointer: 0xb779c3c4 ***
        Aborted (core dumped)

    Small fixes to example program

sigvec.3
  Michael Kerrisk
    Starting with version 2.21, glibc no longer exports sigvec()

sysconf.3
  Josh Triplett
    Document _SC_NGROUPS_MAX
      Already documented in getgroups(2), but not in sysconf(3).

termios.3
  Michael Kerrisk
    SEE ALSO: add tset(1)

tgamma.3

Michael Kerrisk
Since glibc 2.18, errno is correctly set to EDOM when (x == -infinity))

wordexp.3
Carlos O'Donell
Make
it clear that WRDE_NOCMD prevents command substitution
The use of WRDE_NOCMD prevents command substitution. If the flag
WRDE_NOCMD is set then no command substitution shall occur and
the error WRDE_CMDSUB will be returned if such substitution is
requested when processing the words.

The manual page as-is makes it seem like the command substitution
occurs, and an error is returned *after* the substitution.
This patch clarifies that.

locale.5
Marko Myllynen
Describe the formats of values
locale(5) describes what a locale should define but doesn't
spell out how (in what format). The patch attempts to address
this, it also has few trivial additional enhancements.

* Reference to locale(7) for category descriptions.
* Clarify first_workday in NOTES a bit.
* Add upstream BZ reference for two missing LC_ADDRESS fields.
Marko
Myllynen
Fix miscoded character

resolv.conf.5
Jan Chaloupka
Add missing no-tld-query option
Based on commit [1], the no-tld-query option exists for
resolv.conf configuration file. Description of this option
is provided in [2]. This patch just copies this option
into resolv.conf.5 man page. Plus changes 'a' member
into 'an' before 'unqualified name as if it ...'
on the third line of [2]. Based on [3], this option
was added in glibc 2.14 as solving [4] bug.

[1] https://sourceware.org/git/?p=glibc.git;a=commitdiff;h=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8
[2] http://www.daemon-systems.org/man/resolv.conf.5.html man page.
[3]
https://sourceware.org/git/?p=glibc.git;a=blob;f=NEWS;h=952f32af17e7fb49c4c1a305de673a13075bfaf5;hb=f87df
b1f11c01f2ccdc40d81e134cd06b32e28e8
[4] https://sourceware.org/bugzilla/show_bug.cgi?id=12734

credentials.7
  Josh Triplett
    Cross-reference getgroups(2)
      Since credentials.7 discusses supplementary GIDs, it should
      reference getgroups(2).

fanotify.7
  Heinrich Schuchardt
    Allow relative paths in example
      The current example code requires passing an absolute
      path to the mount to be watched.

      By passing AT_FDCWD to fanotify_mark it can use both
      absolute and relative paths.
  Heinrich Schuchardt
    fallocate(2) creates no events
      fallocate(2) should create FAN_MODIFY events but does not.
  Heinrich Schuchardt [Michael Kerrisk]
    fanotify notifies only events generated on the same mount
      Unfortunately, fanotify does not inform listeners for all paths
      under which a touched filesystem object is visible, but only the
      listener using the same path as the process touching the
      filesystem object.
  Heinrich Schuchardt
    Update BUGS
 to note bugs still not fixed in 3.17
      I bumped the Linux version number in the BUGS section to 3.17.

inotify.7
  Heinrich Schuchardt
    fallocate(2) does not trigger inotify events
      Calling fallocate(2) does not result in inotify events.

locale.7
  Marko Myllynen
    Improve LOCPATH description
      LOCPATH is ignored by privileged programs.

      Add locale archive references.

      Add FILES section.

man-pages.7
  Michael Kerrisk [Laurent Georget]
    Clarify that SEE ALSO entries may refer to pages from other projects

signal.7
  Michael Kerrisk

Mention other "slow devices"
Reads from eventfd(2), signalfd(2), timerfd(2), inotify(7),
and fanotify(7) file descriptors are also slow operations
that are restartable.
Michael Kerrisk
Fix SO_RECVTIMEO/ SO_SENDTIMEO confusion in text
Michael Kerrisk
Since Linux 3.8, reads on inotify(7) file descriptors are
restartable
Michael Kerrisk
inotify(7) reads no longer show the odd EINTR error after SIGCONT
Since kernel 3.7, reads from inotify(7) file descriptors no longer
show the (Linux oddity) behavior of failing with EINTR when the
process resumes after a stop signal + SIGCONT.
Michael Kerrisk
SEE ALSO: add sigreturn(2)

unix.7
Michael Kerrisk [Scott Harvey]
Fix buglet in code snippet in BUGS section

ld.so.8
Carlos O'Donell
Add --inhibit-cache option
The dynamic loader has 6 options, only 5 are documented.
This patch documents the sixth option i.e. `--inhibit-cache`.
Jonathan Wakely [Siddhesh Poyarekar]
Correct documentation of $ORIGIN
As noted by Siddhesh:

The ld.so man page says:

$ORIGIN (or equivalently ${ORIGIN})
This expands to the directory containing the
application executable.
Thus, an application located
in somedir/app could be compiled with

This is incorrect since it expands to the directory containing
the DSO and not the application executable. This seems like
deliberate behaviour in dl-object.c, so it needs to be fixed in
the man page.

See http://stackoverflow.com/questions/26280738/what-is-the-equivalent-of-loader-path-for-rpath-specification-on-linux/26281226#26281226

========== Changes in man-pages-3.77 ==========

Released: 2015-01-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexandre Bique <bique.alexandre@gmail.com>
Andre Majorel <aym-xunil@teaser.fr>
Andy Lutomirski <luto@amacapital.net>
Daniel Borkmann <dborkman@redhat.com>
Dave
 Hansen <dave.hansen@intel.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Ignat Loskutov <ignat.loskutov@gmail.com>
Jeff Epler <jepler@unpythonic.net>
Jérôme Pouiller <jezz@sysmic.org>
Kees Cook <keescook@chromium.org>
Laurent Georget <laurent.georget@supelec.fr>
Masanari Iida <standby24x7@gmail.com>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Richard Cochran <richardcochran@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Troy Davis <troy@yort.com>
Vince Weaver <vincent.weaver@maine.edu>
Will Drewry <wad@chromium.org>

Apologies if I missed anyone!

New and rewritten pages
---

seccomp.2
  Kees Cook, Michael Kerrisk, Will Drewry [Andy Lutomirski]
    New page documenting seccomp(2)
      Combines documentation from prctl, in-kernel seccomp_filter.txt
      and dropper.c, along with details specific to the new system

call.

Newly documented interfaces in existing pages
---

netlink.7
  Stephan Mueller [Michael Kerrisk]
    Add NETLINK_CRYPTO

Changes to individual pages
---

adjtimex.2
  Laurent Georget [Richard Cochran, Jeff Epler]
    Clarify the 'ppm scaling' used in struct timex
      This patch makes explicit and clarifies the unit used for
      the fields "freq", "ppsfreq" and "stabil" in struct timex.
  Michael Kerrisk [Masanari Iida]
    Note that TIME_ERROR is the modern synonym for TIME_BAD

perf_event_open.2
  Vince Weaver
    Clarify the PERF_FLAG_FD_* flags
      This change clarifies the behavior of the PERF_FLAG_FD_OUTPUT and
      PERF_FLAG_FD_NO_GROUP flags to perf_event_open(), and removes
      the related FIXME comments.

      While writing tests to validate the behavior of these flags I
      discovered that PERF_FLAG_FD_OUTPUT has been broken
since the
      2.6.35 kernel release.

prctl.2
  Dave Hansen [Michael Kerrisk]
    Add description of Intel MPX calls
      The 3.19 kernel will have support for Intel MPX, including
      a pair of new prctl() calls (PR_MPX_ENABLE_MANAGEMENT and
      PR_MPX_DISABLE_MANAGEMENT) for enabling and disabling the
      kernel's management of the "bounds tables". Add a
      descriptions of the interface.
  Michael Kerrisk
    Add mention of seccomp(2) under PR_SET_SECCOMP
  Michael Kerrisk
    Suggest /proc/PID/status "Seccomp" as alternative to PR_GET_SECCOMP
  Michael Kerrisk
    SIGKILL can also occur PR_GET_SECCOMP in SECCOMP_MODE_FILTER mode

Kees Cook [Andy Lutomirski]
Document SECCOMP_MODE_FILTER vs EFAULT
This notes the distinction made between EINVAL and EFAULT when
attempting to use SECCOMP_MODE_FILTER with PR_SET_SECCOMP.

setns.2
pid_namespaces.7
Mike Frysinger
Elaborate
discussion of the PID namespace descendant limitation
The setns(2) man page already mentions that CLONE_NEWPID may only
be used with descendant namespaces, but this nuance could be
listed in a few more places so it is not missed.

shmget.2
Michael Kerrisk [Akihiro Motoki]
Make wording of SHMALL description a little clearer

sigaction.2
Michael Kerrisk
Add siginfo_t fields for SECCOMP_RET_TRAP

memchr.3
strstr.3
Alexandre Bique
Reference memmem(3) in SEE ALSO section

memcmp.3
Michael Kerrisk [Michael Haardt]
NOTES: add some detail on avoiding memcmp() of cryptographic data
Wording largely based on comments from Michael Haardt.

pthread_tryjoin_np.3
Jérôme Pouiller [Michael Kerrisk]
Document EINVAL error for pthread_timedjoin_np()

mem.4
Elie De Brauwer
/dev/kmem depends on CONFIG_DEVKMEM
Elie De Brauwer
Correct /dev/port group in example

mem.4 mentions that group for /dev/port should be set to 'mem'
However, all other files (/dev/mem and /dev/kmem) use the kmem
group in their examples and on my system /dev/port belongs to
kmem. Hence the 'mem' group was probably a typo:
Elie De Brauwer
Add CONFIG_STRICT_DEVMEM

Since 2.6.26 the CONFIG_NONPROMISC_DEVMEM options limits the
physical addresses which can be accessed through /dev/mem.

random.4
  Heinrich Schuchardt
    Describe handling of O_NONBLOCK
      /dev/random and /dev/urandom treat O_NONBLOCK differently.
      This should be described in the manpage.
  Heinrich Schuchardt
    Mention PRNG used by urandom
      /dev/urandom uses a pseudo-random number generator to replace
      missing entropy.

proc.5
  Michael Kerrisk
    Document "Seccomp" field of /proc/PID/status

epoll.7
  Michael Kerrisk [Ignat Loskutov]
    Use epoll_create1() rather than
 epoll_create() in the code example
      epoll_create1() is more or less the preferred API for new
      applications, since it allows for some flags and avoids the
      misdesigned epoll_create() argument, and so it seems sensible
      to use that in the example, rather than epoll_create().

tcp.7
  Troy Davis
    Clarify tcp_tw_recycle on Internet-facing hosts
      Clarify that tcp_tw_recycle will break communication with many
      general-purpose remote Internet hosts (namely, remote NAT devices)
      even when the Linux device itself is not behind NAT.

========== Changes in man-pages-3.78 ==========

Released: 2015-01-22, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

execveat.2
  David Drysdale, Michael Kerrisk [Rich Felker]
    New page for execveat(2)

memfd_create.2
  Michael Kerrisk, David Herrmann
    New page for memfd_create() system call
      Including notes about file sealing

s390_pci_mmio_write.2
  Alexey Ishchuk
    New page for s390 s390_pci_mmio_write() and s390_pci_mmio_read()
      New manual page for the new PCI MMIO memory access system

      calls, s390_pci_mmio_write() and s390_pci_mmio_read(),
      added for the s390 platform.

Newly documented interfaces in existing pages
---

fcntl.2
  David Herrmann [Michael Kerrisk]
    Document F_ADD_SEALS and F_GET_SEALS commands

proc.5
  Elie De Brauwer

Document /proc/sys/vm/compact_memory
Michael Kerrisk
Document /proc/sys/fs/nr_open

New and changed links
---

s390_pci_mmio_read.2
Michael Kerrisk
New link to new s390_pci_mmio_write(2) page

Changes to individual pages
---

dup.2
Michael Kerrisk
Add reference to RLIMIT_NOFILE for EMFILE error
Michael Kerrisk
Add reference to RLIMIT_NOFILE for EBADF error on 'newfd'.

execve.2
fexecve.3
Michael Kerrisk
SEE ALSO: add execveat(2)

fallocate.2
mmap.2
open.2
truncate.2
write.2
Michael Kerrisk
ERRORS: add EPERM for operation denied by file seal

fcntl.2
Michael Kerrisk
ERRORS: add EBUSY case for F_SETPIPE_SZ
Michael Kerrisk
Add reference to RLIMIT_NOFILE for F_DUPFD EINVAL error on 'arg'.
Michael Kerrisk
ERRORS: add open file description lock error cases

getrlimit.2
Michael Kerrisk
Update text on RLIMIT_NOFILE ceiling to refer to /proc/sys/fs/file-max

mbind.2

Michael Kerrisk [Daniel J Blueman]
Clarify EFAULT text

mmap.2
shmget.2
shm_open.3
Michael Kerrisk
SEE ALSO: add memfd_create(2)

open.2
Michael Kerrisk
Refer to RLIMIT_NOFILE for explanation of EMFILE error
Michael Kerrisk
Add execveat(2) in system call list under "Rationale for openat()"

perf_event_open.2
Vince Weaver
Clarify description of overflow events
Update the perf_event_open manpage to be more consistent when
discussing overflow events. It merges the discussion of
poll-type notifications with those generated by SIGIO
signal handlers.
This addresses the remaining FIXMEs is the document.
Vince Weaver
Remove inaccurate paragraph describing attr.config
Remove an inaccurate paragraph about values in the attr.config
field. This information was never true in any released kernel;
it somehow snuck into the manpage because it is still described
this way in tools/perf/design.txt in the kernel source tree.
Michael Kerrisk
Correct the kernel version number for PERF_COUNT_HW_CACHE_NODE
Michael Kerrisk
Add some kernel version numbers to various fields and constants

ptrace.2
sigaction.2
seccomp.2
Kees Cook
Ptrace and siginfo details
While writing some additional seccomp tests, I realized
PTRACE_EVENT_SECCOMP wasn't documented yet. Fixed this, and added
additional notes related to ptrace events SIGTRAP details.

readv.2
Michael Kerrisk
Update details
on glibc readv()/writev() wrapper behavior
And add a historical detail about Linux 2.0.

select.2
  Michael Kerrisk
    Mention RLIMIT_NOFILE as a possible cause of EINVAL error

syscall.2
  Kees Cook
    Add arm64 and mips
      Add mips and arm64 to tables, along with some further
      details on these architectures,

syscalls.2
  Michael Kerrisk
    Add s390_pci_mmio_read(2) and s390_pci_mmio_write(2)
  Michael Kerrisk
    Note kernel() version that introduced get_kernel_syms()
    Note kernel version that introduced ppc_rtas()
    Note kernel version that introduced create_module()
    Note kernel version that added setup()
  Michael Kerrisk
    Remove some details for sync_file_range2()
      Make the table a bit simpler. The details can anyway be
      found in the system call man page.

utimensat.2
  Michael Kerrisk [Elliot Hughes]
    If both tv_sec fields are UTIME_OMIT, the file need not
 exist
      As noted by Elliot, if both tv_sec fields are UTIME_OMIT,
      utimensat() will return success even if the file does not exist.

errno.3
  Michael Kerrisk
    The RLIMIT_NOFILE resource limit is a common cause of EMFILE

exec.3
  Michael Kerrisk
    SEE ALSO: add execveat(2)

fclose.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument
      Harmonize all the manual pages to use "stream" for FILE*
      instead of randomly using "fp" or "stream." Choosing something
      and being consistent helps users scan the man pages quickly
      and understand what they are looking at.

fexecve.3

Michael Kerrisk
Rewrite the script+close-on-exec problem as a BUG
Also, add one or two details about this scenario.
Michael Kerrisk
The natural idiom when using fexecve() is to use the close-on-exec flag

fmemopen.3
Michael Kerrisk
Consistency fix: use "stream"
as name for "FILE *" argument

fopencookie.3
Michael Kerrisk
Consistency fix: use "stream" as name for "FILE *" argument

getgrent_r.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument

getline.3
Michael Kerrisk
Consistency fix: use "stream" as name for "FILE *" argument

getmntent.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument

getpw.3
Michael Kerrisk [Carlos O'Donell]
Describe return value when 'uid' is not found

getpwent_r.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument

getspnam.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument

malloc_info.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument

posix_fallocate.3
Michael Kerrisk
Note that posix_fallocate() is implemented using fallocate(2)

putgrent.3

Carlos O'Donell
Consistency
fix: use "stream" as name for "FILE *" argument
Harmonize all the manual pages to use "stream" for FILE*
instead of randomly using "fp" or "stream." Choosing something
and being consistent helps users scan the man pages quickly
and understand what they are looking at.

locale.5
Akihiro Motoki
Correct variable name

proc.5
Michael Kerrisk
Remove bogus statement about NR_OPEN being a ceiling for file-max

========== Changes in man-pages-3.79 ==========

Released: 2015-02-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
J William Piggott <elseifthen@gmx.com>
Masanari Iida <standby24x7@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Scot Doyle <lkml14@scotdoyle.com>
Sergey
V. Zubkov <cubbi@cubbi.com>
Stephan Mueller <stephan.mueller@atsec.com>
Vince Weaver <vincent.weaver@maine.edu>
Vivek Goyal <vgoyal@redhat.com>

Apologies if I missed anyone!

New and rewritten pages
---

getrandom.2

Heinrich Schuchardt, Theodore T'so, Michael Kerrisk
New page documenting getrandom(2)
Kernel 3.17 introduces a new system call getrandom(2).

kexec_load.2
Vivek Goyal, Michael Kerrisk
Add documentation of kexec_file_load(2)
Michael Kerrisk, Vivek Goyal
Rewrite and extend documentation of kexec_load().

New and changed links
---

kexec_file_load.2
Michael Kerrisk
New link to kexec_load.2

Changes to individual pages
---

personality.2
Michael Kerrisk
SEE ALSO: add setarch(8)

prctl.2
Michael Kerrisk
Unused arguments of PR_MPX_(EN,DIS}ABLE_MANAGEMENT must be zero

reboot.2
Michael Kerrisk
SEE ALSO:
add kexec_load(2)

socket.2
Stephan Mueller
document AF_ALG
Add a reference to the AF_ALG protocol accessible via socket(2).

fflush.3
Michael Kerrisk [Sergey V. Zubkov]
Clarify that flushing of input streams occurs only for seekable files
See https://bugzilla.kernel.org/show_bug.cgi?id=91931
Michael Kerrisk [Sergey V. Zubkov]
POSIX.1-2008 specifies the behavior when flushing input streams
POSIX.1-2001 did not have a specification for input streams,
but POSIX.1-2008 added one.

getopt.3
  Michael Kerrisk
    SEE ALSO: add getopt(1)

random.3
  Heinrich Schuchardt
    SEE ALSO: add getrandom(2)

termios.3
  Michael Kerrisk
    SEE ALSO: add reset(1), setterm(1), tput(1)

tzset.3
  J William Piggott
    Document behavior when TZ filespec omits the colon
      If the TZ filespec omits the leading colon, glibc will parse
      it for any valid format, i.e., it will
 still work.
  J William Piggott
    Add description for posixrules file
  J William Piggott
    Correct system timezone file path
  J William Piggott
    There are only two TZ formats
      tzset(3) currently states that there are three TZ formats. The
      first two it lists are actually variations of the POSIX-style
      TZ format, of which there are at least five variations.

      This patch corrects this to match the POSIX specification of
      TZ having only two formats.
  J William Piggott
    Filespec omitted incorrect
      Paragraph three of the DESCRIPTION section says
      that when TZ is set, but empty, then UTC is used.

      Later it says if the TZ filespec is omitted then the file
      /usr/share/zoneinfo/localtime is used. This is incorrect,
      it will use UTC in that case as well.
  J William Piggott
    Fix incorrect TZ string representation
      The TZ string
 representation indicates that the start/end
      rules are required; this is incorrect.
  J William Piggott
    Add ENVIRONMENT section + other rearrangements
      FILES section was overly verbose and included
      environment variables. Added ENVIRONMENT section,
      removing ENV VARS from the FILES section.

random.4
  Heinrich Schuchardt
    SEE ALSO: add getrandom(2)

passwd.5
  Michael Kerrisk
    SEE ALSO: add chfn(1), chsh(1)

capabilities.7
  Michael Kerrisk
    SEE ALSO: add setpriv(1)

signal.7
  Michael Kerrisk
    Add getrandom(2) to list of restartable system calls
  Michael Kerrisk
    Add F_OFD_SETLKW to list of restartable operations

New and rewritten pages
---

ioctl_fat.2
  Heinrich Schuchardt [Michael Kerrisk]
    New man page for the ioctl(2) FAT API
      The ioctl(2) system call may be used to retrieve information about
      the FAT file system and to set file attributes.

madvise.2
  Michael Kerrisk
    Summary: this page has been significantly reorganised and rewritten
  Michael Kerrisk
    Recast discussion of 'advice' into two groups of values
      madvise() is one of those system calls that has congealed over
      time, as has the man page. It's helpful to split the discussion
      of 'advice' into those
flags into two groups:

      * Those flags that are (1) widespread across implementations;
        (2) have counterparts in posix_madvise(3); and (3) were present
        in the initial Linux madvise implementation.
      * The rest, which are values that (1) may not have counterparts

in other implementations; (2) have no counterparts in
posix_madvise(3); and (3) were added to Linux in more recent
times.
Michael Kerrisk
Explicitly list the five flags provided by posix_fadvise()
Over time, bit rot has afflicted this page. Since the original
text was written many new Linux-specific flags have been added.
So, now it's better to explicitly list the flags that
correspond to the POSIX analog of madvise().
Jan Chaloupka [Hugh Dickins, Michael Kerrisk]
Starting with Linux 3.5, more file systems support MADV_REMOVE
Michael Kerrisk
Split EINVAL
error into separate cases
Michael Kerrisk
Explain MADV_REMOVE in terms of file hole punching
Michael Kerrisk
MADV_REMOVE can be applied only to shared writable mappings
Michael Kerrisk
MADV_REMOVE cannot be applied to locked or Huge TLB pages
Michael Kerrisk [Vlastimil Babka]
Clarify that MADV_DONTNEED has effect on pages only if it succeeds
Michael Kerrisk [Vlastimil Babka]
Clarifications for MADV_DONTNEED
Michael Kerrisk [Michal Hocko]
Improve MADV_DONTNEED description
Michael Kerrisk
MADV_DONTNEED cannot be applied to Huge TLB or locked pages
Michael Kerrisk [Vlastimil Babka]
Remove mention of "shared pages" as a cause of EINVAL for MADV_DONTNEED
Michael Kerrisk [Vlastimil Babka]
Note Huge TLB as a cause of EINVAL for MADV_DONTNEED
Michael Kerrisk [Minchan Kim]
Add mention of VM_PFNMAP in discussion of MADV_DONTNEED and MADV_REMOVE
Michael Kerrisk

Drop sentence saying that kernel may ignore 'advice'
The sentence creates misunderstandings, and does not really
add information.
Michael Kerrisk
Note that some Linux-specific 'advice' change memory-access semantics
Michael Kerrisk
NOTES: Remove crufty text about "command" versus "advice"
The point made in this fairly ancient text is more or less evident
from the DESCRIPTION, and it's not clear what "standard" is being
referred to.
Michael Kerrisk
Mention POSIX.1-2008 addition of POSIX_MADV_NOREUSE

Michael Kerrisk
Remove "POSIX.1b" from CONFORMING TO
Michael Kerrisk
Move mention of posix_fadvise() from CONFORMING TO to SEE ALSO
Michael Kerrisk
ERRORS: add EPERM error case for MADV_HWPOISON
Michael Kerrisk
Note that madvise() is nonstandard, but widespread

Newly documented interfaces in existing pages
---

proc.5
Michael Kerrisk
(Briefly) document /proc/PID/attr/socketcreate
Michael Kerrisk
(Briefly) document /proc/PID/attr/keycreate
Michael Kerrisk [Stephen Smalley]
Document /proc/PID/attr/{current,exec,fscreate,prev}
Heavily based on Stephen Smalley's text in
https://lwn.net/Articles/28222/
From: Stephen Smalley <sds@epoch.ncsc.mil>
To: LKML and others
Subject: [RFC][PATCH] Process Attribute API for Security Modules
Date: 08 Apr 2003 16:17:52 -0400
Michael Kerrisk
Document /proc/sys/kernel/auto_msgmni

socket.7
David Wilson [Michael Kerrisk]
Document SO_REUSEPORT socket option

New and changed links
---

get_thread_area.2
Andy Lutomirski
Make get_thread_area.2 a link to rewritten set_thread_area.2 page

Changes to individual pages
---

time.1
Michael Kerrisk

Make option argument formatting consistent with other pages

access.2
  Denys Vlasenko
    Explain how access() check treats capabilities
      We have users who are terribly confused why their binaries
      with CAP_DAC_OVERRIDE capability see EACCESS from access() calls,
      but are able to read the file.

      The reason is access() isn't the "can I read/write/execute this
      file?" question, it is the "(assuming that I'm a setuid binary,)
      can *the user who invoked me* read/write/execute this file?"
      question.

      That's why it uses real UIDs as documented, and why it ignores
      capabilities when capability-endorsed binaries are run by non-root
      (this patch adds this information).

      To make users more likely to notice this less-known detail,
      the patch expands the explanation with rationale for this logic
      into a separate paragraph.

arch_prctl.2
set_thread_area.2
get_thread_area.2
   Andy Lutomirski
    Improve TLS documentation
      The documentation for set_thread_area was very vague. This
      improves it, accounts for recent kernel changes, and merges
      it with get_thread_area.2.

      get_thread_area.2 now becomes a link.

      While I'm at it, clarify the related arch_prctl.2 man page.

cacheflush.2
  Ralf Baechle
    Update some portability details and bugs
  Michael Kerrisk
    Refer reader to BUGS in discussion of EINVAL error

capget.2
  Michael Kerrisk
    Document V3 capabilities constants
  Michael Kerrisk
    Rewrite discussion of kernel versions that support file capabilities
      File capabilities ceased to be optional in Linux 2.6.33.

clone.2
  Peng Haitao
    Fix description of CLONE_PARENT_SETTID
      CLONE_PARENT_SETTID only stores child thread ID in parent memory.

clone.2
execve.2
  Kevin Easton
    Document interaction
 of execve(2) with CLONE_FILES
      This patch the fact that a successful execve(2) in a process that
      is sharing a file descriptor table results in unsharing the table.

      I discovered this through testing and verified it by source
      inspection - there is a call to unshare_files() early in
      do_execve_common().

fcntl.2
  Michael Kerrisk [Jeff Layton]
    Clarify cases of conflict between traditional record and OFD locks
      Verified by experiment on Linux 3.15 and 3.19rc4.

fork.2
  Michal Hocko
    EAGAIN is not reported when task allocation fails
      I am not sure why we have:

        "EAGAIN fork() cannot allocate sufficient memory to copy
         the parent's page tables and allocate a task structure
         or the child."

      The text seems to be there from the time when man-pages
      were moved to git so there is no history for it.

      And it doesn't
 reflect reality: the kernel reports both
      dup_task_struct and dup_mm failures as ENOMEM to the
      userspace. This seems to be the case from early 2.x times
      so let's simply remove this part.
  Heinrich Schuchardt
    Child and parent run in separate memory spaces
      fork.2 should clearly point out that child and parent
      process run in separate memory spaces.
  Michael Kerrisk
    NOTES: add "C library/kernel ABI differences" subheading

getpid.2
  Michael Kerrisk

NOTES: add "C library/kernel ABI differences" subheading

getxattr.2
Michael Kerrisk
Various rewordings plus one or two details clarified
Michael Kerrisk
Add pointer to example in listxattr(2)

killpg.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

listxattr.2
Heinrich Schuchardt
Provide example program
Michael Kerrisk
Reword discussion of size==0 case
Michael
Kerrisk
Add note on handling increases in sizes of keys or values
Michael Kerrisk
Remove mention of which filesystems implement ACLs
Such a list will only become outdated (as it already was).

migrate_pages.2
Jan Stancek
Document EFAULT and EINVAL errors
I encountered these errors while writing testcase for migrate_pages
syscall for LTP (Linux test project).

I checked stable kernel tree 3.5 to see which paths return these.
Both can be returned from get_nodes(), which is called from:
SYSCALL_DEFINE4(migrate_pages, pid_t, pid, unsigned long, maxnode,
const unsigned long __user *, old_nodes,
const unsigned long __user *, new_nodes)

The testcase does following:
EFAULT
a) old_nodes/new_nodes is area mmaped with PROT_NONE
b) old_nodes/new_nodes is area not mmapped in process address

space, -1 or area that has been just munmmaped

EINVAL
a) maxnodes overflows kernel limit
b) new_nodes contain node, which has no memory or does not exist
or is not returned for get_mempolicy(MPOL_F_MEMS_ALLOWED).

modify_ldt.2
  Andy Lutomirski
    Overhaul the documentation
      This clarifies the behavior and documents all four functions.
  Andy Lutomirski
    Clarify the lm bit's behavior
      The lm bit should never have existed in the first place. Sigh.

mprotect.2
  Mark Seaborn
    Mention effect of READ_IMPLIES_EXEC personality flag
      I puzzled over mprotect()'s effect on /proc/*/maps for a while
      yesterday -- it was setting "x" without PROT_EXEC being specified.
      Here is a patch to add some explanation.

msgget.2
  Michael Kerrisk
    Add details of MSGMNI default value

msgop.2
  Michael Kerrisk
    Clarify wording of MSGMAX and MSGMNB
 limits

perf_event_open.2
  Vince Weaver
    Clarify PERF_EVENT_IOC_REFRESH behavior
      Currently the PERF_EVENT_IOC_REFRESH ioctl, when applied to a group
      leader, will refresh all children. Also if a refresh value of 0
      is chosen then the refresh becomes infinite (never runs out).
      Back in 2011 PAPI was relying on these behaviors but I was told
      that both were unsupported and subject to being removed at any time.
      (See https://lkml.org/lkml/2011/5/24/337)
      However the behavior has not been changed.

      This patch updates the manpage to still list the behavior as
      unsupported, but removes the inaccurate description of it
      only being a problem with 2.6 kernels.

prctl.2
  Michael Kerrisk [Bill McConnaughey]
    Mention file capabilities in discussion of PR_SET_DUMPABLE
  Michael Kerrisk
    Greatly expand discussion of "dumpable" flag
      In particular,
 detail the interactions with
      /proc/sys/fs/suid_dumpable.
  Michael Kerrisk

Reorder paragraphs describing PR_SET_DUMPABLE
Michael Kerrisk
Mention SUID_DUMP_DISABLE and SUID_DUMP_USER under PR_SET_DUMPABLE
Michael Kerrisk
Executing a file with capabilities also resets the parent death signal

ptrace.2
James Hunt
Explain behaviour should ptrace tracer call execve(2)
This behaviour was verified by reading the kernel source and
confirming the behaviour using a test program.
Denys Vlasenko
Add information on PTRACE_SEIZE versus PTRACE_ATTACH differences
Extend description of PTRACE_SEIZE with the short summary of its
differences from PTRACE_ATTACH.

The following paragraph:

PTRACE_EVENT_STOP
Stop induced by PTRACE_INTERRUPT command, or group-stop, or ini-
tial ptrace-stop when a new child is attached (only if attached
using PTRACE_SEIZE), or PTRACE_EVENT_STOP if PTRACE_SEIZE was used.

has an editing error (the part after last comma makes no sense).
Removing it.

Mention that legacy post-execve SIGTRAP is disabled by PTRACE_SEIZE.

sched_setattr.2
Michael Kerrisk [Christophe Blaess]
SYNOPSIS: remove 'const' from 'attr' sched_getattr() argument

semget.2
Michael Kerrisk
Note default value for SEMMNI and SEMMSL

semop.2
Michael Kerrisk
Note defaults for SEMOPM and warn against increasing > 1000

sendfile.2
Eric Wong
Caution against modifying sent pages

setxattr.2
Michael Kerrisk
ERRORS: add ENOTSUP for invalid namespace prefix
Michael Kerrisk

Remove redundant text under ENOTSUP error
Michael Kerrisk
Note that zero-length attribute values are permitted
Michael Kerrisk
Rework text describing 'flags' argument

stat.2
Michael Kerrisk
NOTES:
add "C library/kernel ABI differences" subheading

statfs.2
Michael Kerrisk [Jan Chaloupka]
Document the 'f_flags' field added in Linux 2.6.36
Michael Kerrisk
Clarify that 'statfs' structure has some padding bytes
The number of padding bytes has changed over time, as some
bytes are used, so describe this aspect of the structure
less explicitly.
Tao Ma
Add OCFS2_SUPER_MAGIC
Michael Kerrisk
Use __fsword_t in statfs structure definition
This more closely matches modern glibc reality.
Michael Kerrisk
Add a note on the __fsword_t type
Michael Kerrisk
Document 'f_spare' more vaguely

wait.2
Michael Kerrisk
Note that waitpid() is a wrapper for wait4()
Michael Kerrisk
Note that wait() is a library function implemented via wait4()

wait4.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

encrypt.3
Rob Somers
Improve code example
I (and some others) found that the original example code
did not seem to work as advertised. The new code (used by
permission of the original author, Jens Thoms Toerring)
was found on comp.os.linux.development.

mktemp.3

Luke Faraone
DESCRIPTION reference to BUGS corrected
mktemp(3)'s DESCRIPTION referenced NOTES, but no such
section exists. Corrected to refer to BUGS.

pthread_attr_setschedparam.3
Tobias Herzke
Describe EINVAL in ERRORS

resolver.3
host.conf.5
Simon Paillard
host.conf 'order' option deprecated, replaced by nsswitch.conf(5)
http://www.sourceware.org/bugzilla/show_bug.cgi?id=2389
http://repo.or.cz/w/glibc.git/commit/b9c65d0902e5890c4f025b574725154032f8120a

Reported at http://bugs.debian.org/270368,
http://bugs.debian.org/396633, and http://bugs.debian.org/344233.

statvfs.3
Michael
Kerrisk
Document missing 'f_flag' bit values
And reorganize information relating to which flags are in
POSIX.1.
Michael Kerrisk [Jan Chaloupka]
statvfs() now populates 'f_flag' from statfs()'s f_flag field
These changes came with glibc 2.13, and the kernel's addition of
a 'f_flags' field in Linux 2.6.36.

syslog.3
Michael Kerrisk [Doug Goldstein]
Remove unneeded <stdarg.h>
vsyslog() does not need this.

tzset.3
J William Piggott
Add offset format
tzset.3 does not illustrate the POSIX offset format.
Specifically, there is no indication in the manual
what the optional components of it are.

random.4
Michael Kerrisk
Note maximum number of bytes returned by read(2) on /dev/random
Michael Kerrisk [Mathieu Malaterre]
Since Linux 3.16, reads from /dev/urandom return at most 32 MB
See https://bugs.debian.org/775328

and
https://bugzilla.kernel.org/show_bug.cgi?id=80981#c9

core.5
Michael Kerrisk [Bill McConnaughey]
Executing a file that has capabilities also prevents core dumps
Michael Kerrisk
Document "%i" and "%I" core_pattern specifiers

intro.5
Michael Kerrisk
Remove words "and protocols"
There are no protocol descriptions in Section 5. Protocols are
in Section 7.

proc.5
Michael Kerrisk
Add reference to prctl(2) in discussion of /proc/sys/fs/suid_dumpable
And note that /proc/sys/fs/suid_dumpable defines the
value assigned to the process "dumpable" flag in certain
circumstances.
Michael Kerrisk
Note that CAP_SYS_ADMIN is required to list /proc/PID/map_files
This might however change in the future; see the Jan 2015 LKML thread:

Re: [RFC][PATCH v2] procfs: Always expose /proc/<pid>/map_files/

and make it readable

resolv.conf.5
Michael Kerrisk
SEE ALSO: add nsswitch.conf(5)

capabilities.7
Michael Kerrisk
Mention SECBIT_KEEP_CAPS as an alternative to prctl() PR_SET_KEEPCAPS
Chris Mayo
NOTES: add last kernel versions for obsolete options
The CONFIG_SECURITY_CAPABILITIES option was removed by
commit 5915eb53861c5776cfec33ca4fcc1fd20d66dd27

The CONFIG_SECURITY_FILE_CAPABILITIES option removed in
Linux 2.6.33 as already mentioned in DESCRIPTION.

pthreads.7
Michael Kerrisk
SEE ALSO: add fork(2)

unix.7
  Jan Chaloupka
    Mention SOCK_STREAM socket for ioctl_type of ioctl()
      from https://bugzilla.redhat.com/show_bug.cgi?id=1110401.

      unix.7 is not clear about socket type of ioctl_type argument of
      ioctl() function. The description of SIOCINQ is applicable only
      for SOCK_STREAM socket. For SOCK_DGRAM, udp(7) man page gives

  correct description of SIOCINQ

ldconfig.8
  Michael Kerrisk
    Place options in alphabetical order
  Michael Kerrisk
    Note glibc version number for '-l' option
  Michael Kerrisk
    Document -c/--format option
  Michael Kerrisk
    Add long form of some options
  Michael Kerrisk [Patrick Horgan]
    ld.so.conf uses only newlines as delimiters
      mtk: confirmed by reading source of parse_conf() in
      elf/ldconfig.c.
  Michael Kerrisk
    Document -V/--version option
  Michael Kerrisk
    Document -i/--ignore-aux-cache option

ld.so.8
  Michael Kerrisk
    Relocate "Hardware capabilities" to be a subsection under notes
      This is more consistent with standard man-pages headings
      and layout.
  Michael Kerrisk
    (Briefly) document LD_TRACE_PRELINKING
  Michael Kerrisk
    Remove duplicate description of LD_BIND_NOT

========== Changes in man-pages-3.81 ==========

Released:
 2015-03-02, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexandre Oliva <aoliva@redhat.com>
Carlos O'Donell <carlos@redhat.com>
Ma Shimiao <mashimiao.fnst@cn.fujitsu.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

attributes.7
  Alexandre Oliva, Michael Kerrisk [Carlos O'Donell]
    New page describing POSIX safety concepts

Global changes

Many pages
  Peng Haitao, Michael Kerrisk
    Reformat existing thread-safety information to use a
    tabular format, rather than plain text.

Changes to individual pages
---

mmap.2
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function mmap() and munmap() are
 thread safe.

a64l.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

acos.3
  Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The function acos(), acosf() and acosl() are thread safe.

acosh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function acosh(), acoshf() and acoshl() are thread safe.

addseverity.3
Ma Shimiao
ATTRIBUTES: Note function is thread-safe
The function addseverity() is thread safe.

aio_cancel.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_cancel() is thread safe.

aio_fsync.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_fsync() is thread safe.

aio_read.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_read() is thread safe.

aio_suspend.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_suspend() is thread safe.

aio_write.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_write() is thread safe.

argz_add.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

asin.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function asin(), asinf() and asinl() are thread safe.

assert.3

Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

assert_perror.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

atan2.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function atan2(), atan2f() and atan2l() are thread safe.

atanh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function atanh(), atanhf() and atanhl() are thread safe.

backtrace.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

btowc.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function btowc() in glibc is thread safe.
Its marking matches glibc marking.

cabs.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function cabs(), cabsf() and cabsl() are thread safe.

cacos.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function cacos(), cacosf() and cacosl() are thread safe.

cacosh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions cacosh(), cacoshf() and cacoshl() in glibc are
thread safe. Its markings match glibc markings.

canonicalize_file_name.3
Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The functions canonicalize_file_name() in glibc is thread safe.
Its marking matches glibc marking.

carg.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function carg(), cargf() and cargl() are thread safe.

casin.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions casin(), casinf() and casinl() are thread safe.
Their markings match glibc markings.

casinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions casinh(), casinhf() and casinhl() in glibc are
thread safe. Its markings match glibc markings.

catan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions catan(), catanf() and catanl() are thread safe.
Their markings match glibc markings.

catanh.3
Ma Shimiao
ATTRIBUTES: Note functions
that are thread-safe
The functions catanh(), catanhf() and catanhl() in glibc are
thread safe. Its markings match glibc markings.

catopen.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions catopen() and catclose() are thread safe.

cfree.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function cfree() in glibc is thread safe.
Its marking matches glibc marking.

clog10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

The functions clog10(), clog10f() and clog10l() in glibc are
thread safe. Its markings match glibc markings.

clog.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function clog(), clogf() and clogl() are thread safe.

closedir.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function closedir() in glibc is thread safe.
Its marking matches glibc marking.

confstr.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function confstr() is thread safe.

cosh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions cosh(), coshf() and coshl() in glibc are thread safe.
Its markings match glibc markings.

cpow.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions cpow(), cpowf() and cpowl() in glibc are thread safe.
Its markings match glibc markings.

crypt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

ctermid.3
Ma Shimiao
Modify thread-safety information
According to the change of source code, ctermid's level has been
changed from MT-Unsafe to MT-Safe. After modifying,
the marking
matches the glibc marking.

drand48.3
Ma Shimiao
Modify thread-safety information

As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

drand48_r.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

ecvt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be same as glibc manual.

ecvt_r.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

encrypt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc
manual.

envz_add.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

exec.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions execl(), execlp(), execle(), execv(), execvp() and
execvpe() are thread safe.

exit.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

exp10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

exp2.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function exp2(), exp2f() and exp2l() are thread safe.

exp.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function exp(), expf() and expl() are thread safe.

fclose.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe

     The function fclose() is thread safe.
      Its marking matches glibc marking.

fcloseall.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

fgetc.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The markings match glibc markings.

fgetwc.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The markings match glibc markings.

fgetws.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The marking matches glibc marking.

fmod.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function fmod(), fmodf() and fmodl() are thread safe.

fnmatch.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function fnmatch() is thread safe with exceptions.

fopen.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

fopencookie.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fread.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fread() and fwrite() are thread safe.

gamma.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions gamma(), gammaf() and gammal() are not thread safe.
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getcontext.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getcwd.3
Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions getcwd(), getwd() and get_current_dir_name() are
thread safe.

getdate.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getenv.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getenv() and secure_getenv() are thread safe.

getfsent.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions setfsent(), getfsent(), endfsent(), getfsspec()
      and getfsfile() are not thread safe.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrent.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its marking matches glibc marking.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrnam.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrouplist.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function getgrouplist() is thread safe with exceptions.

getlogin.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getopt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions getopt(), getopt_long() and getopt_long_only() are
      not thread safe.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpass.3
  Ma Shimiao

Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpwent.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getpwnam.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

gets.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

getw.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getw() and putw() are thread safe.

gnu_get_libc_version.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions gnu_get_libc_version() and gnu_get_libc_release() are thread safe.

hsearch.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

iconv.3
Peng Haitao
Modify thread-safety information

inet.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions inet_aton() and inet_addr() are thread safe with exceptions.
The functions inet_network(), inet_ntoa(), inet_makeaddr(),

inet_lnaof() and inet_netof() are thread safe.
Modify thread-safety information
After researching and talking,
we think inet_network() and
inet_ntoa() should be marked with locale.
After changing, the markings match glbc markings.

inet_pton.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function inet_pton() is thread safe with exceptions.

iswdigit.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswdigit() is thread safe with exceptions.

iswgraph.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswgraph() is thread safe with exceptions.

iswlower.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswlower() is thread safe with exceptions.

iswprint.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswprint() is thread safe with exceptions.

iswpunct.3
Peng
Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswpunct() is thread safe with exceptions.

iswspace.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswspace() is thread safe with exceptions.

iswupper.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswupper() is thread safe with exceptions.

iswxdigit.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function iswxdigit() is thread safe with exceptions.

j0.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function j0(), j1f() jnl() and so on are thread safe.

lio_listio.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its marking matches glibc marking.

log10.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
       The function log10(), log10f() and log10l() are thread safe.

log2.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function log2(), log2f() and log2l() are thread safe.

log.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function log(), logf() and logl() are thread safe.

makecontext.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

makedev.3
  Peng Haitao
    ATTRIBUTES: Note macros that are thread-safe
      The macros makedev(), major() and minor() are thread safe.

malloc.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function malloc(), free(), calloc() and realloc() are
      thread safe.

mblen.3

Ma Shimiao
Modify thread-safety information
As annotation in
glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

mbstowcs.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

mbtowc.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function mbtowc() is not thread safe.
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

mktemp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function mktemp() is thread safe.

mtrace.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions mtrace() and muntrace() are not thread safe.

nan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

nl_langinfo.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function nl_langinfo() is thread safe with exceptions.

opendir.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

pow10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

The function pow10(), pow10f() and pow10l() are thread safe.

pow.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function pow(), powf() and powl() are thread safe.

pthread_setcancelstate.3
Michael Kerrisk
Add async-signal-safety information

ptsname.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

putenv.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-unsafe
The function putenv() is
thread unsafe.

puts.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fputc(), fputs(), putc(), putchar() and puts() are thread safe.

putwchar.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

qecvt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be same as glibc manual.

rand.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The functions rand(), rand_r() and srand() are thread safe.

random_r.3
Ma Shimiao
Modify thread-safety information

As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

readdir.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more
detailed, change the
thread-safety information to be same as glibc manual.

realpath.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

regex.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions regcomp() and regexec() are thread safe with
exceptions.
The functions regerror() and regfree() are thread safe.

remainder.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

scalb.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function scalb(), scalbf() and scalbl() are thread safe.

setenv.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-unsafe
The function setenv() and unsetenv() are thread unsafe.

siginterrupt.3
Ma Shimiao
Modify thread-safety information
As annotation
in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

sigset.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The functions sigset(), sighold(), sigrelse() and sigignore()

are thread safe.

sinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function sinh(), sinhf() and sinhl() are thread safe.

sqrt.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function sqrt(), sqrtf() and sqrtl() are thread safe.

stdarg.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

stdio_ext.3
Ma Shimiao
Modify thread-safety information
Change the thread safety information to be the same as glibc.

strcasecmp.3
Peng Haitao
ATTRIBUTES:
Note functions that are thread safe with exceptions
The functions strcasecmp() and strncasecmp() are thread safe with exceptions.

strerror.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

strfmon.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

strfry.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strfry() is thread safe.

strftime.3
Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function strftime() is thread safe with exceptions.

strptime.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function strptime() is thread safe with exceptions.

strtok.3
Ma Shimiao
Modify thread-safety
information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

strverscmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strverscmp() is thread safe.

strxfrm.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

syslog.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions openlog() and closelog() are thread safe.
The functions syslog() and vsyslog() are thread safe with
exceptions.

tempnam.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function tempnam() is thread safe.

termios.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to
be the same as glibc manual.
Ma Shimiao
Modify thread-safety information
As this is man page for Linux, we don't need thread safety
information for bsd

tgamma.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The functions tgamma(), tgammaf() and tgammal() in glibc are
      thread safe. Its markings match glibc markings.

timegm.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread safe with exceptions
      The functions timelocal() and timegm() are thread safe with
      exceptions.

tmpfile.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its markings match glibc markings.

tmpnam.3
  Peng Haitao
    Modify thread-safety information
      When the argument s is NULL, tmpnam() should be MT-Unsafe.

toupper.3
  Ma Shimiao
    Modify thread-safety information
      After researching and talking, we think toupper() and tolower()
       should not be marked with locale.
      After changing, the markings match glbc markings.

tsearch.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The functions' markings match glibc markings.

ttyname.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be same as glibc manual.

tzset.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function tzset() is thread safe with exceptions.

wcsdup.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

wctomb.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

y0.3
  Ma Shimiao
    ATTRIBUTES: Note functions
 that are thread-safe
      The function y0(), y1f() ynl() and so on are thread safe.

New
and rewritten pages
---

nptl.7
  Michael Kerrisk
    New page with details of the NPTL POSIX threads implementation

Newly documented interfaces in existing pages
---

user_namespaces.7
  Eric W. Biederman [Michael Kerrisk]
    Document /proc/[pid]/setgroups

Changes to individual pages
---

intro.1
  Stéphane Aulery
    Prompt is not % but $
  Stéphane Aulery
    Various improvements
      - Add reference to other common shells dash(1), ksh(1)
      - Add a reference to stdout(3)
      - Separate cp and mv descriptions
      - Add examples of special cases of cd
      - Add su(1) and shutdown(8) references for section Logout
        and poweroff
      - Move Control-D to section Logout and poweroff
      - Fix some little formatting errors
  Stéphane Aulery
    Add cross references cited
  Stéphane Aulery

  Order SEE ALSO section

clone.2
  Josh Triplett
    Document that clone() silently ignores CLONE_PID and CLONE_STOPPED
      Normally, system calls return EINVAL for flags they don't support.
      Explicitly document that clone does *not* produce an error for
      these two obsolete flags.
  Michael Kerrisk
    Small rewording of explanation of clone() wrt threads
      Clone has so many effects that it's an oversimplification to say
      that the *main* use of clone is to create a thread. (In fact,
      the use of clone() to create new processes may well be more
      common, since glibc's fork() is a wrapper that calls clone().)

getgroups.2
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread changes its
 credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.
  Michael Kerrisk
    ERRORS: add EPERM for the case where /proc/PID/setgroups is "deny"

Michael Kerrisk
Note capability associated with EPERM error for setgroups(2)
Michael Kerrisk
Refer reader to user_namespaces(7) for discussion of /proc/PID/setgroups
The discussion of /proc/PID/setgroups has moved from
proc(5) to user_namespaces(7).

getpid.2
Michael Kerrisk
Note that getppid() returns 0 if parent is in different PID namespace

getsockopt.2
Konstantin Shemyak
Note RETURN VALUE details when netfilter is involved

ioctl_list.2
Heinrich Schuchardt
SEE ALSO ioctl_fat.2
Add FAT_IOCTL_GET_VOLUME_ID
SEE ALSO ioctl_fat.2
Heinrich Schuchardt

include/linux/ext2_fs.h
Include linux/ext2_fs.h does not contain any ioctl definitions
anymore.

Request codes EXT2_IOC* have been replaced by FS_IOC* in
linux/fs.h.

Some definitions of FS_IOC_* use long* but the actual code expects
int* (see fs/ext2/ioctl.c).

msgop.2
Bill Pemberton
Remove EAGAIN as msgrcv() errno
The list of errnos for msgrcv() lists both EAGAIN and ENOMSG as
the errno for no message available with the IPC_NOWAIT flag.
ENOMSG is the errno that will be set.
Bill Pemberton
Add an example program

open.2
Michael Kerrisk [Jason Vas Dias]
Mention blocking semantics for FIFO opens
See https://bugzilla.kernel.org/show_bug.cgi?id=95191

seccomp.2
Jann Horn [Kees Cook, Mikael Pettersson, Andy Lutomirski]

Add note about alarm(2) not being sufficient to limit runtime
Jann Horn
Explain blacklisting
problems, expand example
Michael Kerrisk [Kees Cook]
Add mention of libseccomp

setgid.2
Michael Kerrisk
Clarify that setgid() changes all GIDs when caller has CAP_SETGID
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

setresuid.2
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread
changes its credentials, all other threads change
credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

setreuid.2
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.
Michael Kerrisk
SEE ALSO: add credentials(7)

setuid.2
Michael Kerrisk
Clarify that setuid() changes all UIDs when caller has CAP_SETUID
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL

credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

sigaction.2
Michael Kerrisk
Add discussion of rt_sigaction(2)
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc wrapper gives an EINVAL error on attempts to change the disposition of either of the two real-time signals used by NPTL.

sigpending.2
Michael Kerrisk
Add discussion of rt_sigpending(2)

sigprocmask.2
Michael Kerrisk
Add discussion of rt_sigprocmask(2)
Michael Kerrisk
Note treatment of signals used internally by NPTL

The glibc wrapper silently ignores attempts to block the two real-time signals used by NPTL.

sigreturn.2
Michael Kerrisk
Add discussion of rt_sigreturn(2)

sigsuspend.2
Michael Kerrisk
Add discussion of rt_sigsuspend(2)

sigwaitinfo.2
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc wrappers silently ignore attempts to wait for signals used by NPTL.
Michael Kerrisk
Add discussion of rt_sigtimedwait(2)

socket.2
Heinrich Schuchardt
SEE ALSO close(2)

The description mentions close(2). Hence it should also be
referenced in the SEE ALSO section.

syscall.2
Jann Horn
Add x32 ABI

umount.2
Eric W. Biederman
Document the effect of shared subtrees on umount(2)
Eric W. Biederman
Correct the description of MNT_DETACH
I recently realized that I had been reasoning improperly about
what umount(MNT_DETACH)
did based on an insufficient description
in the umount.2 man page, that matched my intuition but not the
implementation.

When there are no submounts, MNT_DETACH is essentially harmless to
applications. Where there are submounts, MNT_DETACH changes what
is visible to applications using the detach directories.
Michael Kerrisk
Move "shared mount + umount" text to a subsection in NOTES

aio_return.3
Stéphane Aulery
Document the return value on error
Reported by Alexander Holler <holler@ahsoftware.de>

clock.3
Stéphane Aulery
CLOCKS_PER_SEC = 1000000 is required by XSI, not POSIX
Debian Bug #728213 reported by Tanaka Akira <akr@fsij.org>

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728213

dlopen.3
Michael Kerrisk
Amend error in description of dlclose() behavior
The current text says that unloading depends on
whether
the reference count falls to zero *and no other libraries
are using symbols in this library*. That latter text has
been there since man-pages-1.29, but it seems rather dubious.
How could the implementation know whether other libraries
are still using symbols in this library? Furthermore, no
other implementation's man page mentions this point.
Seems best to drop this point.

Michael Kerrisk
Add some details for RTLD_DEFAULT
Michael Kerrisk
Add some details on RTLD_NEXT and preloading
Michael Kerrisk
RTLD_NEXT works for symbols generally, not just functions
The common use case is for functions, but RTLD_NEXT
also applies to variable symbols.
Michael Kerrisk
dlclose() recursively closes dependent libraries
Note that dlclose() recursively closes dependent libraries
that were loaded by dlopen()
Michael
Kerrisk
Rename second dlopen() argument from "flag" to "flags"
This is more consistent with other such arguments
Michael Kerrisk
Reformat text on RTLD_DEFAULT and RTLD_NEXT

fmemopen.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fpathconf.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

fputwc.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

fputws.3

  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The markings match glibc markings.

mq_open.3
  Torvald Riegel
    Add EINVAL error case for invalid name
      This behavior is implementation-defined
 by POSIX. If the name
      doesn't start with a '/', glibc returns EINVAL without attempting
      the syscall.

popen.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The marking matches glibc marking.

pthread_kill.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc pthread_kill() function gives an error on attempts
      to send either of the real-time signals used by NPTL.

pthread_sigmask.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc implementation silently ignores attempts to block the two
      real-time signals used by NPTL.

pthread_sigqueue.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc pthread_sigqueue() function gives an error on attempts
      to send either of the real-time signals used by NPTL.

resolver.3
  Stéphane Aulery [Jakub Wilk]
     Document missing options used by _res structure indicate defaults
      Missing options: RES_INSECURE1, RES_INSECURE2, RES_NOALIASES,
      USE_INET6, ROTATE, NOCHECKNAME, RES_KEEPTSIG, BLAST, USEBSTRING,
      NOIP6DOTINT, USE_EDNS0, SNGLKUP, SNGLKUPREOP, RES_USE_DNSSEC,
      NOTLDQUERY, DEFAULT

      Written from the glibc source and resolv.conf.5.

      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=527136
  Stéphane Aulery
    RES_IGNTC is implemented

rint.3
  Matt Turner
    Document that halfway cases are rounded to even
      Per IEEE-754 rounding rules.

      The round(3) page describes the behavior of rint and nearbyint
      in the halfway cases by saying:

        These functions round x to the nearest integer, but round
        halfway cases away from zero [...], instead of to the
        nearest even integer like rint(3)

sigqueue.3
  Michael Kerrisk
    NOTES:

add "C library/kernel ABI differences" subheading
  Michael Kerrisk
    Clarify version info (mention rt_sigqueueinfo())

sigsetops.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc sigfillset() function excludes the two real-time
      signals used by NPTL.

sigwait.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc sigwait() silently ignore attempts to wait for
      signals used by NPTL.

strcoll.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The markings match glibc markings.

strdup.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The marking matches glibc marking.

tzset.3
  J William Piggott
    Add 'std' quoting information

ulimit.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The marking matches glibc marking.

wcstombs.3
  Ma Shimiao

   ATTRIBUTES: Note function that is thread-safe
      The marking matches glibc marking.

wctob.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The marking matches glibc marking.

xdr.3
  Taisuke Yamada

Clarified incompatibility and correct usage of XDR API
See http://bugs.debian.org/628099

console_codes.4
Scot Doyle
Add Console Private CSI sequence 15
An undocumented escape sequence in drivers/tty/vt/vt.c brings the
previously accessed virtual terminal to the foreground.
mtk: Patch misattributed to Taisuke Yamada in Git commit
because of a muck up on my part.
Michael Kerrisk
Add kernel version number for CSI sequence 15

random.4
Michael Kerrisk
Fix permissions shown for the devices
These days, the devices are RW for everyone.

filesystems.5
Michael Kerrisk
Remove dubious claim about comparative performance of ext2
Perhaps it was the best filesystem performance-wise in
the 20th century, when that text was written. That probably
ceased to be true quite a long time ago, though.
Stéphane Aulery
Add cross references for ext filesystems
Stéphane Aulery
Specifies the scope of this list and its limits.

host.conf.5
hosts.5
resolv.conf.5
Stéphane Aulery [Paul E Condon]
Cross references of these pages.
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=298259

host.conf.5
Stéphane Aulery
Rework discussion of nospoof, spoofalert, spoof and RESOLV_SPOOF_CHECK
The keywords and environment variables "nospoof", "spoofalert",
"spoof" and RESOLV_SPOOF_CHECK were added to glibc 2.0.7 but
never implemented

Move descriptions to historical section and reorder it for clarity

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=773443

hosts.5

Stéphane
Aulery [Vincent Lefevre]
Mention 127.0.1.1 for FQDN and IPv6 examples
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=562890

proc.5
Taisuke Yamada
Document /proc/PID/status VmPin field
See https://bugs.launchpad.net/bugs/1071746
Michael Kerrisk
Document (the obsolete) /proc/PID/seccomp
Michael Kerrisk
Replace description of 'uid_map' with a reference to user_namespaces(7)
All of the information in proc(5) was also present in
user_namespaces(7), but the latter was more detailed
and up to date.
Taisuke Yamada
Fix SELinux /proc/pid/attr/current example
Since the /proc/pid/attr API was added to the kernel, there
have been a couple of changes to the SELinux handling of
/proc/pid/attr/current. Fix the SELinux /proc/pid/attr/current
example text to reflect these changes and note which kernel
versions first included
the changes.

securetty.5
Stéphane Aulery [Nicolas FRANCOIS]
Note that the pam_securetty module also uses this file
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528015

This patch is a modified version of the one proposed without
parts specific to Debian.

boot.7
Michael Witten
Copy edit
While a lot of the changes are issues of presentation,
there are also issues of grammar and punctuation.
Michael Witten
Mention `systemd(1)' and its related `bootup(7)'
It's important that the reader receive contemporary information.

credentials.7
Michael Kerrisk
SEE ALSO: add pthreads(7)
Michael Kerrisk
Add reference to nptl(7)

feature_test_macros.7
  Michael Kerrisk
    Update discussion of _FORTIFY_SOURCE
      Since the initial implementation a lot more checks were added.
      Describe all the checks would be too verbose (and would
 soon
      fall out of date as more checks are added). So instead, describe
      the kinds of checks that are done more generally.
      Also a few other minor edits to the text.

hier.7
  Stéphane Aulery
    First patch of a series to achieve compliance with FHS 2.3
  Stéphane Aulery
    SGML and XML directories are separated in FHS 2.3
  Stéphane Aulery
    Add missing directories defined by FHS 2.3
  Stéphane Aulery
    Identify which directories are optional
  Stéphane Aulery
    Document /initrd, /lost+found and /sys
      Ubuntu Bug #70094 reported by Brian Beck
      https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/70094
  Stéphane Aulery
    Explain YP, which is not obvious

ipv6.7
  Stéphane Aulery [David Madore]
    SOL_IPV6 and other SOL_* options socket are not portable
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=472447

man-pages.7
  Michael Kerrisk [Bill Pemberton]

    Add indent(1) command that produces desired formatting for example code
  Stéphane Aulery
    Improve description of sections in accordance with intro pages

packet.7
  Michael Kerrisk
    Rework description of fanout algorithms as list
  Michael Kerrisk
    Remove mention of needing UID 0 to create packet socket
      The existing text makes no sense. The check is based
      purely on a capability check. (Kernel function
      net/packet/af_packet.c::packet_create()
  Michael Kerrisk
    Remove text about ancient glibc not defining SOL_PACKET

This was fixed in glibc 2.1.1, which is a long while ago.
And in any case, there is nothing special about this case;
it's just one of those times when glibc lags.
Michael Kerrisk
Rework description of 'sockaddr_ll' fields as a list
Michael Kerrisk
Various minor edits

pthreads.7
Michael Kerrisk
Add references to nptl(7)

raw.7
Michael Kerrisk
Rephrase "Linux 2.2" language to "Linux 2.2 or later"
The man page was written in the LInux 2.2 timeframe, and
some phrasing was not future-proof.

signal.7
Michael Kerrisk
Note when Linux added realtime signals
Michael Kerrisk
Correct the range of realtime signals
Michael Kerrisk
Summarize 2.2 system call changes that resulted from larger signal sets
Michael Kerrisk
SEE ALSO: add nptl(7)

tcp.7
Peter Adkins
Document removal of TCP_SYNQ_HSIZE
Looking over the man page for 'tcp' I came across a reference to
tuning the 'TCP_SYNQ_HSIZE' parameter when increasing
'tcp_max_syn_backlog' above 1024. However, this static sizing was
removed back in Linux 2.6.20 in favor of dynamic scaling - as
part of commit 72a3effaf633bcae9034b7e176bdbd78d64a71db.

user_namespaces.7
Eric W. Biederman
Update the documentation to
reflect the fixes for negative groups
Files with access permissions such as rwx---rwx give fewer
permissions to their group then they do to everyone else. Which
means dropping groups with setgroups(0, NULL) actually grants a
process privileges.

The unprivileged setting of gid_map turned out not to be safe
after this change. Privileged setting of gid_map can be

interpreted as meaning yes it is ok to drop groups. [Eric additionally noted: Setting of gid_map with privilege has been clarified to mean that dropping groups is ok. This allows existing programs that set gid_map with privilege to work without changes. That is, newgidmap(1) continues to work unchanged.]

To prevent this problem and future problems, user namespaces were changed in such a way as to guarantee a user can not obtain credentials without
privilege that they could not obtain without
the help of user namespaces.

This meant testing the effective user ID and not the filesystem user ID, as setresuid(2) and setregid(2) allow setting any process UID or GID (except the supplementary groups) to the effective ID.

Furthermore, to preserve in some form the useful applications that have been setting gid_map without privilege, the file /proc/[pid]/setgroups was added to allow disabling setgroups(2). With setgroups(2) permanently disabled in a user namespace, it again becomes safe to allow writes to gid_map without privilege.

Michael Kerrisk

Rework some text describing permission rules for updating map files

No (intentional) change to the facts, but this restructuring should make the meaning easier to grasp.

Michael Kerrisk

Update kernel version associated with 5-line limit for
map files

As at Linux 3.18, the limit is still five lines, so mention the more recent kernel version in the text.

Michael Kerrisk [Alban Crequy]

Handle /proc/PID/setgroups in the example program

Michael Kerrisk

Rework text describing restrictions on updating /proc/PID/setgroups

No (intentional) changes to factual description, but the restructured text is hopefully easier to grasp.

Michael Kerrisk

Explain why the /proc/PID/setgroups file was added

ldconfig.8

Michael Kerrisk

Note use of /lib64 and /usr/lib64 on some 64-bit architectures

ld.so.8

Michael Kerrisk

Note the use of /lib64 and /usr/lib64 on some 64-bit architectures

========== Changes in man-pages-3.83 ==========

Released: 2015-04-19, Munich

  Michael Kerrisk
    Document /proc/sys/kernel/randomize_va_space
  Michael Kerrisk
    Document /proc/PID/fdinfo epoll format
  Michael
 Kerrisk
    Describe /proc/PID/fdinfo eventfd format
  Michael Kerrisk
    Document /proc/PID/fdinfo signalfd format

New and changed links
---

newfstatat.2
  Michael Kerrisk
    New link to fstatat64.2

prlimit64.2
  Michael Kerrisk

New link to getrlimit.2

Global changes

Various section 3 math pages
Michael Kerrisk
Note that these functions are also in POSIX.1-2001 and POSIX.1-2008

Changes to individual pages
---

getent.1
Robin H. Johnson
Document options
The options to getent are now documented, after being around for nearly a decade without changes.
Michael Kerrisk
Document help and version options

fallocate.2
Michael Kerrisk
Fix kernel version number for FALLOC_FL_ZERO_RANGE
FALLOC_FL_ZERO_RANGE was added in 3.15, not 3.14.
Michael Kerrisk
Note that SMB3 added FALLOC_FL_ZERO_RANGE support in Linux 3.17

getrlimit.2
Michael Kerrisk
Note that the underlying system call for prlimit() is prlimit64()
Michael Kerrisk
Remove "_FILE_OFFSET_BITS == 64" from prlimit() FTM requirements
"_FILE_OFFSET_BITS == 64" is not needed to get the prlimit() declaration.

ioctl_list.2
Nikos Mavrogiannopoulos
SIOCADDRT accepts in6_rtmsg in INET6 protocol
Heinrich Schuchardt
TFD_IOC_SET_TICKS
timerfd_create.2 mentions TFD_IOC_SET_TICKS. We should add it to ioctl_list.2, too.

llseek.2
Michael Kerrisk

Advise reader to use lseek(2) instead
Michael Kerrisk
llseek() exists on 32-bit platforms to support seeking to large offsets

madvise.2
David Rientjes
Specify MADV_REMOVE returns EINVAL for hugetlbfs
madvise(2) actually returns with error EINVAL for MADV_REMOVE
when used for hugetlb VMAs, not EOPNOTSUPP, and this has been
the case since MADV_REMOVE
was introduced in commit f6b3ec238d12
("madvise(MADV_REMOVE): remove pages from tmpfs shm backing
store"). Specify the exact behavior.
Michael Kerrisk
SEE ALSO: add posix_madvise(2)

poll.2
Michael Kerrisk [Andreas Baak]
SEE ALSO: add epoll(7)

posix_fadvise.2
Michael Kerrisk
Add "C library/kernel ABI differences" subsection

pread.2
Michael Kerrisk
Add "C library/kernel ABI differences" subsection

seccomp.2
Michael Kerrisk [Pierre Chifflier, Kees Cook]
Note that seccomp_data is read-only

stat.2
Michael Kerrisk
Add some details on various "stat" versions
Three versions of "stat" appeared on 32-bit systems,
dealing with structures of different (increasing) sizes.
Explain some of the details, and also note that the
situation is simpler on modern 64-bit architectures.
Michael Kerrisk
Add mention of newfstatat()

The underlying system call for fstatat() is newfstatat()
on some architectures.

symlink.2
Michael Kerrisk [Jonny Grant]
ERRORS: add linkpath=="" case for ENOENT

syscalls.2
  Michael Kerrisk
    Remove prlimit()
      There really is only the prlimit64() system call.
  Michael Kerrisk
    Add some details about the "multiple versions of system calls"
      The multiple-system-call-version phenomenon is particularly a
      feature of older 32-bit platforms. Hint at that fact in the text.

timerfd_create.2
  Cyrill Gorcunov [Michael Kerrisk]
    Document TFD_IOC_SET_TICKS ioctl() operation
  Michael Kerrisk
    Add some details to C library/kernel ABI differences

unshare.2
  Michael Kerrisk [Fabien Pichot]
    Remove mention of "System V" from discussion of CLONE_NEWIPC
      These days, CLONE_NEWIPC also affects POSIX message queues.

asprintf.3
  Zeng Linggang
    ATTRIBUTES: Note functions that
 are thread-safe

carg.3
  Michael Kerrisk
    Add introductory sentence explaining what these functions calculate

ccos.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
  Michael Kerrisk
    Add introductory sentence explaining what these functions calculate

ccosh.3
  Michael Kerrisk
    Add introductory sentence explaining what these functions calculate

cexp.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe

  Michael Kerrisk
    Add introductory sentence explaining what these functions
 calculate

csqrt.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
  Michael Kerrisk
    Simplify description of what these functions calculate

ctan.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
  Michael Kerrisk
    Add introductory sentence explaining what these functions calculate

ctanh.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
  Michael Kerrisk
    Add introductory sentence explaining what these functions calculate

ctime.3
  Zeng Linggang
    ATTRIBUTES: Note functions that aren't thread-safe

exec.3
  Michael Kerrisk
    SYNOPSIS: Clarify calling signature for execl() and execlp()
  Michael Kerrisk [Andreas Baak]
    Correct prototype for execle()
      Make the prototype shown into correct C.

ftw.3
  Michael Kerrisk [Felix Sedlmeier]

ftw() and nftw() differ for the non-stat-able symlink case
The POSIX specification of ftw() says
that an un-stat-able
symlink may yield either FTW_NS or FTW_SL. The specification
of nftw() does not carry this statement.
Michael Kerrisk
CONFORMING TO: add POSIX.1-2008
Michael Kerrisk
Update POSIX version references in NOTES

getcwd.3
Jann Horn [Michael Kerrisk]
Note behavior for unreachable current working directory
Michael Kerrisk
Add ENOMEM error

gethostbyname.3
Michael Kerrisk [Jonny Grant]
Clarify that NO_ADDRESS and NO_DATA are synonyms
Michael Kerrisk
Add some detail for NO_DATA
Text consistent with POSIX and FreeBSD's gethostbyname() man page.
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

getnetent.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

get_nprocs_conf.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

login.3
Zeng Linggang

ATTRIBUTES: Note functions that aren't thread-safe

lseek64.3
Michael Kerrisk
Clarify details with respect to 32-bit and 64-bit systems

malloc.3
Michael Kerrisk
Add ENOMEM error

mbsnrtowcs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

mbsrtowcs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

mq_notify.3
Michael Kerrisk
Add "C library/kernel ABI differences" subsection

mq_open.3
Michael Kerrisk [Fabien Pichot]
NOTES: explain differences from the underlying system call
The check for the slash at the start of a pathname is done in glibc

openpty.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

perror.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

posix_memalign.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

printf.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe
Walter Harms [Michael Kerrisk]
Simplify the example code

qsort.3
Michael Kerrisk [Rob Landley]
alphasort() and versionsort() are not suitable for 'compar'

In glibc 2.10, the prototypes of alphasort() and versionsort()
were changed so that the arguments switched from 'const void *' to
'const struct dirent **', to match the POSIX.1-2008 specification
of alphasort(). As such, compiler warnings will result if
these functions are used as the arguments of qsort().

warning: passing argument 4 of 'qsort' from incompatible
pointer type
expected '__compar_fn_t' but argument is of type
'int (*)(const struct dirent
**, const struct dirent **)'

Therefore, remove the ancient NOTES text suggesting that
alphasort() and versionsort() can be used as suitable
'compar' arguments for qsort().

realpath.3
Michael Kerrisk [Jon Grant]
Add ENOMEM error

scandir.3
Michael Kerrisk
glibc 2.10 changed the argument types for alphasort() and versionsort()
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

scanf.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

setnetgrent.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

significand.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

strcasecmp.3
Michael Kerrisk [Jonny Grant]
Clarify that strcasecmp() does a byte-wise comparison
Michael Kerrisk
CONFORMING TO: add POSIX.1-2008

unlocked_stdio.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

updwtmp.3

Apologies if I missed anyone!

New and rewritten pages
---

get_phys_pages.3
  William Woodruff
    Document get_phys_pages() and get_avphys_pages()

loop.4
  Urs Thuermann, Michael Kerrisk
    New page documenting the loop device

xattr.7

 Andreas Gruenbacher
    Import attr(5) man page from the 'attr' project
      After discussions with Andreas Gruenbacher, it makes sense to
      move this page into man-pages, since it mostly relates to
      kernel details. Since this is an overview page,
      we'll move it to Section 7.

Michael Kerrisk
Rename page
"xattr" is a more meaningful name than "attr" (it resonates
with the names of the system calls), so as long as we are
moving the page to a new section, we'll change the name as well,
and retain an acl(5) link so that old references remain valid.

Newly documented interfaces in existing pages
---

mmap.2
Michael Kerrisk [Andi Kleen]
Document MAP_HUGE_2MB, MAP_HUGE_1GB, and MAP_HUGE_SHIFT

shmget.2
Michael Kerrisk [Andi Kleen]
Document SHM_HUGE_2MB, SHM_HUGE_1GB, and SHM_HUGE_SHIFT

resolver.3
Michael Kerrisk [Jonathan
Nieder]
Add descriptions of some other resolver functions
Add res_ninit(), res_nquery(), res_nsearch(),
and res_nquerydomain(), res_nmkquery(), res_nsend().

tty_ioctl.4
Frédéric Maria [Stephane Fillod, Andreas Heiduk]
Document TIOCMIWAIT and TIOCGICOUNT
Michael Kerrisk
Document TIOCGEXCL
Michael Kerrisk
Document TIOGCPKT
Michael Kerrisk
Document TIOCSPTLCK
Michael Kerrisk
Document TIOCGPTLCK

New and changed links

CMSG_DATA.3
Michael Kerrisk
New link to cmsg(3)

CMSG_LEN.3
Michael Kerrisk

New link to cmsg(3)

dprintf.3
Michael Kerrisk
Convert to a link to printf.3

get_avphys_pages.3
William Woodruff
New link to new get_phys_pages.3 page

res_ninit.3
res_nmkquery.3
res_nquery.3
res_nquerydomain.3
res_nsearch.3
res_nsend.3
Michael Kerrisk
New links to resolver(3) man page

loop-control.4
Michael Kerrisk
New link to loop.4

attr.5
Michael Kerrisk
New link to xattr(7)

Global changes
---

chown.2
execve.2
prctl.2
truncate.2
proc.5
capabilities.7
ld.so.8
Michael Kerrisk
Tighter wording: 'mode bit' rather than 'permission bit'
For sticky, set-UID, and set-GID mode bits (as used in POSIX).

Changes to individual pages
---

add_key.2
keyctl.2

request_key.2
  Michael Kerrisk
    SEE ALSO: add keyrings(7)

add_key.2
request_key.2
  Michael Kerrisk
    SEE ALSO: add keyctl(3)

epoll_ctl.2
  Michael Kerrisk
    After EPOLLHUP, EOF will be seen only after all data has been consumed

epoll_wait.2
  Michael Kerrisk
    Clarify that signal mask treatment in epoll_pwait() is per-thread
      s/sigprocmask()/pthread_sigmask()/

fcntl.2
  Michael Kerrisk [Vegard Nossum]
    Note an F_SETSIG corner case

get_mempolicy.2, set_mempolicy
  Brice Goglin
    Policy is per thread, not
 per process

getxattr.2
listxattr.2
removexattr.2
setxattr.2
capabilities.7
  Michael Kerrisk
    Adjust "attr(5)" references to "xattr(7)"

ioctl.2
  Michael Kerrisk
    SEE ALSO: add console_ioctl(2) and tty_ioctl(2)

listxattr.2
xattr.7
  Michael Kerrisk
    Describe listxattr(2) E2BIG error and document it as a BUG

mkdir.2
  Michael Kerrisk
    Wording fixes + point reader at stat(2) for explanation of file mode
  Michael Kerrisk [Andreas Grünbacher]

Further tweaks to text on S_ISVTX and 'mode' argument

mknod.2
Michael Kerrisk
Rewordings + point reader at stat(2) for details of mode bits

mmap.2
Michael Kerrisk
Remove text that implies that munmap() syncs MAP_SHARED mapping to file
The existing text in this page:

MAP_SHARED Share this mapping. Updates to the mapping
are visible to other processes that map this
file, and are
carried through to the underly
ing file. The file may not actually be
updated until msync(2) or munmap() is called.

implies that munmap() will sync the mapping to the underlying
file. POSIX doesn't require this, and some light reading of the
code and some light testing (fsync() after munmap() of a large
file) also indicates that Linux doesn't do this.

msync.2
Michael Kerrisk
Rework text of DESCRIPTION
Rewrite the text somewhat, for easier comprehension.
No (intentional) changes to factual content

nfsservctl.2
Michael Kerrisk [J. Bruce Fields]
Note that nfsservctl() was replaced by files in nfsd filesystem

open.2
Michael Kerrisk [Andreas Gruenbacher]
open() honors the S_ISVTX, S_ISUID, and S_ISGID bits in 'mode'
Michael Kerrisk
Tighten wording: use 'mode bit' rather than 'permission bit'
Michael
Kerrisk [NeilBrown]
BUGS: O_CREAT | O_DIRECTORY succeeds if pathname does not exist

poll.2
Michael Kerrisk [Ian Pilcher]
Clarify that signal mask treatment in ppoll() is per-thread
s/sigprocmask()/pthread_sigmask()/
Michael Kerrisk [Sam Varshavchik]
After POLLHUP, EOF will be seen only after all data has been consumed

Michael Kerrisk
Make it clearer which bits are ignored in 'events'

prctl.2
Michael Kerrisk [David Wilcox, Filipe Brandenburger]
Note that "parent" for purposes of PR_SET_DEATHSIG is a *thread*
See https://bugzilla.kernel.org/show_bug.cgi?id=43300

sendfile.2
Michael Kerrisk [Jason Newton]
Note that sendfile does not support O_APPEND for 'out_fd'
See https://bugzilla.kernel.org/show_bug.cgi?id=82841
Michael Kerrisk [Gregor Jasny]
RETURN VALUE: note the possibility of "short sends"
See https://bugzilla.kernel.org/show_bug.cgi?id=97491
Michael Kerrisk [Askar Safin]
Clarify text on 'out_fd' and regular files in Linux 2.4
See https://bugzilla.kernel.org/show_bug.cgi?id=86001

shutdown.2
Michael Kerrisk [Stéphane Aulery]
BUGS: UNIX domain sockets now detect invalid 'how' values
Bug fixed in Linux 3.7.
See https://bugzilla.kernel.org/show_bug.cgi?id=47111

sigaction.2
Michael Kerrisk
Refer the reader to fcntl(2) F_SETSIG for further details on si_fd

stat.2
Jann Horn
Add note about stat() being racy
Andreas Gruenbacher
Improve description of some mode constants
Michael Kerrisk [Andreas Grünbacher]
Remove excessive leading zeros on some constants
Michael Kerrisk
Add text on POSIX terms "file mode bits" and "file permission bits"
Recent changes to various pages employ this distinction.
Michael Kerrisk
Tighten wording: use 'mode bit' rather than 'permission bit'
According
to POSIX, the 9 UGO*RWX bits are permissions, and
'mode' is used to refer to collectively to those bits plus sticky,
set-UID, and set_GID bits.

syslog.2
Michael Kerrisk

SEE ALSO: add dmesg(1)

umask.2
open.2
mknod.2
mkdir.2
  Andreas Gruenbacher
    Explain what default ACLs do
      Explain the effect that default ACLs have (instead of the umask)
      in umask.2. Mention that default ACLs can have an affect in
      open.2, mknod.2, and mkdir.2.

unshare.2
  Michael Kerrisk [Florian Weimer]
    Give the reader a hint that unshare() works on processes or threads
      See https://bugzilla.kernel.org/show_bug.cgi?id=59281

atexit.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

bsearch.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

cmsg.3
  Michael Kerrisk [Christopher Head]
    Fix error in SCM_RIGHTS code sample
      Remove erroneous second
 initialization of msg.msg_controllen
      in the example code for SCM_RIGHTS.
      See https://bugzilla.kernel.org/show_bug.cgi?id=15952

CPU_SET.3
  Chris Metcalf
    Clarify language about "available" cpus
      The CPU_SET.3 man page uses the adjective "available" when
      explaining what the argument to CPU_SET() means. This is
      confusing, since "available" isn't well-defined. The kernel
      has a set of adjectives (possible, present, online, and active)
      that qualify cpus, but normally none of these are what the
      cpu_set_t bit index means: it's just "which cpu", using the
      kernel's internal numbering system, even if that cpu isn't
      possible or present.

      This change removes the word "available" and adds a sentence
      warning that cpu sets may not be contiguous due to dynamic
      cpu hotplug, etc.

err.3
  Zeng Linggang
    ATTRIBUTES: Note functions
 that are thread-safe

ftw.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

gethostbyname.3
  Carlos O'Donell
    NSS plugins searched first
  Carlos O'Donell
    "order" is obsolete

gethostid.3
  Zeng Linggang

    ATTRIBUTES: Note functions that aren't thread-safe

on_exit.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

printf.3
  Michael Kerrisk [Egmont Koblinger]
    Merge dprintf() and vdprintf() discussion into this page
  Michael Kerrisk
    SEE ALSO: add puts(3)
  Michael Kerrisk
    Move return value discussion to proper RETURN VALUE section

putpwent.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

qsort.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

regex.3
  Michael Kerrisk [Laurence Gonsalves]
    Fix error in description of 'cflags'
      'cflags' is a bit mask of *zero* (not one) or more flags.

resolver.3
  Stéphane Aulery
    Add info about RES_INSECURE1 and RES_INSECURE2 option in debug mode

scanf.3
  Joern Heissler
    Improve description of %n specifier

setjmp.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

setlocale.3

strsignal.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

sysconf.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

undocumented.3
William Woodruff
Remove documented functions

tty_ioctl.4
Michael Kerrisk [Denis Du]
Fix error in code example

proc.5
Michael Kerrisk [Cameron Norman, Vasiliy Kulikov]
Document /proc mount options
Document the 'hidepid' and 'gid' mount options that were added in
Linux 3.3. See https://bugzilla.kernel.org/show_bug.cgi?id=90641
Based on text by Vasiliy Kulikov in
Documentation/filesystems/proc.txt.
Michael Kerrisk [Kirill A. Shutemov]
Improve
description of /proc/PID/status
Guillem Jover
Document /proc/PID/exe behaviour on unlinked pathnames
Michael Kerrisk [Weijie Yang]
Document /proc/PID/status VmPMD

resolv.conf.5
Stéphane Aulery [Thomas Hood]
Document use-vc option added to glibc 2.14
Fix Ubuntu bug #1110781:
https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/1110781
Stéphane Aulery [Thomas Hood]
Document RES_SNGLKUPREOP
Fix Ubuntu bug #1110781:
https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/1110781

tzfile.5
  Sam Varshavchik
    Add various details on version 2 format

aio.7
  Michael Kerrisk
    Add details and update URL for OLS 2003 paper on AIO

bootparam.7
  Michael Kerrisk [Alain Kalker]
    Update discussion of 'debug' option
      See https://bugzilla.kernel.org/show_bug.cgi?id=97161
  Michael Kerrisk
    Summary of multiple changes: remove cruft from this page.

      Much of the detail on hardware specifics in this page dates
      from the 20th century. (The last major update to this page was in
      man-pages-1.14!) It's hugely out of date now (many of these
      devices disappeared from the kernel years ago.) So, I've taken
      a large scythe to the page to remove anything that looks
      seriously dated. In the process, the page has shrunk to less
      than 50% of its previous size.
  Michael Kerrisk
    Remove "buff=" details
      This seems to have gone away in Linux 2.2.
  Michael Kerrisk
    Remove crufty "Mouse drivers" options
  Michael Kerrisk
    Remove crufty "General non-device-specific boot arguments" options
  Michael Kerrisk
    Remove crufty "Hard disks" options
  Michael Kerrisk
    Remove crufty "mem=" details
  Michael Kerrisk
    Remove crufty details on IBM MCA bus devices
  Michael Kerrisk
    Remove 'swap=" details

  This seems to have gone away in Linux 2.2,
  Michael Kerrisk
    Remove crufty floppy disk driver options
      In the specific case of floppy drives: the drivers still
      exist, but it's been a while since most of saw these devices
      in the wild. So, just refer the reader to the kernel source
      file for details. (The detail in this man page was after all
      originally drawn from that file.)
    Remove crufty "ISDN drivers" options
  Michael Kerrisk

Remove crufty "line printer driver" options
Michael Kerrisk
Remove crufty "Serial port drivers" options
Michael Kerrisk
Remove crufty reference to CONFIG_BUGi386
That option disappeared in Linux 2.4.
Michael Kerrisk
Remove crufty text
"bootsetups array" dates from Linux 2.0.
Michael Kerrisk
Remove crufty "Video hardware" options
Michael Kerrisk
Remove crufty SCSI device driver options

fanotify.7
Michael Kerrisk [Heinrich Schuchardt]
Since Linux 3.19, fallocate(2) generates FAN_MODIFY events

inotify.7
Michael Kerrisk [Heinrich Schuchardt]
Since Linux 3.19, fallocate(2) generates IN_MODIFY events

ip.7
Michael Kerrisk
Explain how IP_ADD_MEMBERSHIP determines its argument type
Michael Kerrisk [Jiri Pirko, Magnus REFTEL]
Clarify details of the IP_MULTICAST_IF socket option
Michael Kerrisk [Advait Dixi]
Remove dubious text that says that SO_PRIORITY sets IP TOS
See https://bugzilla.kernel.org/show_bug.cgi?id=35852
Michael Kerrisk
Relocate misplaced text describing ENOPROTOOPT error

packet.7
Graham Shaw
Add sll_protocol to list of required fields for outbound packets

pthreads.7
Michael Kerrisk [KOSAKI Motohiro]
Using thread IDs whose lifetime has expired gives undefined behavior
See https://bugzilla.kernel.org/show_bug.cgi?id=53061

raw.7
Michael Kerrisk
[Tetsuo Handa]
For incoming datagrams, sin_port is set to zero
Michael Kerrisk
Mention sendto(), recvfrom(), and so on when discussing address format

This gives the reader a little context for the following
discussion of 'sin_port'.
Michael Kerrisk
Remove crufty reference to <netinet/in.h>
Michael Kerrisk
Replace reference to RFC 1700 with pointer to IANA protocol number list

signal.7
Michael Kerrisk [Steinar H. Gunderson]
Clarify that I/O operations on disks are not interrupted by signals
See https://bugzilla.kernel.org/show_bug.cgi?id=97721

unix.7
Michael Kerrisk [Christophe Lohr]
Remove mention of UNIX_PATH_MAX
This kernel constant is not exposed to user space.
Michael Kerrisk
Note the 108 bytes for sun_path is how things are done on Linux
And refer the reader to NOTES for discussion of portability.

xattr.7
Michael Kerrisk

Document EA limits for Btrfs
Michael Kerrisk
Document VFS-imposed limits on EAs
VFS imposes a 255-byte limit on EA names, and a 64kB limit on
EA values.
Michael Kerrisk
The ext[234] block limitation applies to sum of all EAs
It is not a per-EA limit.
Michael Kerrisk
Clarify permissions required to work with 'user' EAs
Michael Kerrisk
ext2 and ext3 no longer need mounting with 'user_xattr' for user EAs
Michael Kerrisk
Add various relevant pages to SEE ALSO
Michael Kerrisk
Add CONFORMING TO section
Michael Kerrisk
Modify headings to man-pages norms
Michael Kerrisk
Btrfs also supports extended attributes
Michael Kerrisk
File capabilities are implemented using *security* attributes
Not *system* attributes
Michael Kerrisk
Describe limit on EA values for JFS, XFS, and Reiserfs

Michael Kerrisk
Explicitly mention some
of the xattr system calls in DESCRIPTION
Naming the system calls helps to orient the reader

nscd.8
Michael Kerrisk
Add mention of 'services' and 'netgroup' databases
This makes the page consistent with nscd.conf(5).

========== Changes in man-pages-4.01 ==========

Released: 2015-07-23, Munich

Contributors

Apologies if I missed anyone!

New and rewritten pages
---

bpf.2
  Alexei Starovoitov, Michael Kerrisk [Daniel Borkmann]
    New page documenting bpf(2)

__ppc_get_timebase.3
  Tulio Magno Quites Machado Filho
    New page documenting __ppc_get_timebase() and __ppc_get_timebase_freq()
      Glibc 2.16 was released with a new function for the Power
      architecture that can read its Time Base Register.
      Glibc 2.17 adds a function to read the frequency at which the Time
      Base Register of Power processors is updated.

queue.3
  Michael Kerrisk [David Leppik, Doug Klima]
    Reimport from latest FreeBSD page
      Long ago,

Doug Klima noted that many macros were not
documented in the queue(3) page. Fix by reimporting from
latest [1] FreeBSD man page.

[1] Revision 263142, Modified Fri Mar 14 03:07:51 2014 UTC

This also fixes https://sourceware.org/bugzilla/show_bug.cgi?id=1506

This time, I'll learn from past mistakes and not convert
from 'mdoc' to 'man' macros.
Michael Kerrisk
Use subsections in DESCRIPTION
Michael Kerrisk
Remove SEE ALSO reference to nonexistent tree(3)
Michael Kerrisk
Use real hyphens in code samples
Michael Kerrisk
Comment out text for functions not in glibc
Michael Kerrisk
Replace HISTORY with CONFORMING TO

Newly documented interfaces in existing pages
---

rename.2
Michael Kerrisk [Miklos Szeredi]
Document RENAME_WHITEOUT
Heavily based on text by Miklos Szeredi.

Global changes

Various pages
  Michael Kerrisk [Andries E. Brouwer]
    Remove "ABI" from "C library/kernel ABI differences" subheadings
      The "ABI" doesn't really convey anything significant in
      the title. These subsections are about describing differences
      between the kernel and (g)libc interfaces.

Changes to individual pages
---

intro.1
  Michael Kerrisk [Andries E. Brouwer]
    Drop intro paragraph on '$?' shell variable
      As Andries notes, this piece of text is rather out of place in
      a page that was intended to provide a tutorial introduction for
      beginners logging in on a Linux system.

locale.1
  Marko Myllynen
    A minor output format clarification
      A minor clarification for the locale output format which was
      brought up at
      https://sourceware.org/bugzilla/show_bug.cgi?id=18516.

      For reference, see
      https://sourceware.org/bugzilla/show_bug.cgi?id=18516
      http://pubs.opengroup.org/onlinepubs/9699919799/utilities/locale.html

     Add CONFORMING TO section

capget.2
  Julian Orth
    Clarify that hdrp->pid==0 is equivalent gettid() not getpid()

chroot.2
  Jann Horn
    chroot() is not intended for security; document attack
      It is unfortunate that this discourages this use of chroot(2)
      without pointing out alternative solutions - for example,
      OpenSSH and vsftpd both still rely on chroot(2) for security.

      Bind mounts should theoretically be usable as a replacement, but
      currently, they have a similar problem (CVE-2015-2925) that hasn't
      been fixed in ~6 months, so I'd rather not add it to the manpage
      as a solution before a fix lands.

clock_getres.2
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

eventfd.2
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

execve.2

Michael Kerrisk
Elaborate on envp/argv
as NULL behavior

_exit.2
Michael Kerrisk
Open stdio frames are not flushed, temporary files are deleted
Many years ago, text was added to the page saying that it is
implementation-dependent whether stdio streams are flushed and
whether temporary are removed. In part, this change appears to
be because POSIX.1-2001 added text related to this point.
However, that seems to have been an error in POSIX, and the
text was subsequently removed for POSIX.1-2008. See
https://collaboration.opengroup.org/austin/interps/documents/9984/AI-085.txt
Austin Group Interpretation reference 1003.1-2001 #085

fallocate.2
Namjae Jeon [Michael Kerrisk]
Document FALLOC_FL_INSERT_RANGE
Michael Kerrisk
Since Linux 4.2, ext4 supports FALLOC_FL_INSERT_RANGE

fcntl.2
Michael Kerrisk
OFD locks are proposed for inclusion in the next POSIX revision

getrlimit.2
Zeng
Linggang
ATTRIBUTES: Note functions that are thread-safe

getrusage.2
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

gettid.2
Michael Kerrisk
Note that for a thread group leader, gettid() == getpid()

iopl.2
Michael Kerrisk
Remove some historical libc5 and glibc 1 details
These details are ancient, and long ago ceased to be relevant.

ioprio_set.2
Michael Kerrisk [Jens Axboe]
Document meaning of ioprio==0

mlock.2
  Michael Kerrisk [Mehdi Aqadjani Memar]
    Document another ENOMEM error case
      ENOMEM can occur if locking/unlocking in the middle of a region
      would increase the number of VMAs beyond the system limit (64k).

mmap.2
  Michal Hocko [Eric B Munson]
    Clarify MAP_POPULATE
      David Rientjes has noticed that MAP_POPULATE wording might promise
      much more than the kernel actually provides and intends to provide.
      The primary usage
 of the flag is to pre-fault the range. There is
      no guarantee that no major faults will happen later on. The pages
      might have been reclaimed by the time the process tries to access
      them.
  Michal Hocko [Eric B Munson]
    Clarify MAP_LOCKED semantics
      MAP_LOCKED had a subtly different semantic from mmap(2)+mlock(2)
      since it has been introduced.
      mlock(2) fails if the memory range cannot get populated to
      guarantee that no future major faults will happen on the range.
      mmap(MAP_LOCKED) on the other hand silently succeeds even if
      the range was populated only partially.

      Fixing this subtle difference in the kernel is rather awkward
      because the memory population happens after mm locks have been
      dropped and so the cleanup before returning failure (munlock)
      could operate on something else than the originally mapped area.

   E.g. speculative userspace page fault handler catching SEGV and
      doing mmap(fault_addr, MAP_FIXED|MAP_LOCKED) might discard portion
      of a racing mmap and lead to lost data. Although it is not clear
      whether such a usage would be valid, mmap page doesn't explicitly
      describe requirements for threaded applications so we cannot
      exclude this possibility.

      This patch makes the semantic of MAP_LOCKED explicit and suggests
      using mmap + mlock as the only way to guarantee no later major
      page faults.
  Michael Kerrisk
    ERRORS: point out that ENOMEM can occur even for munmap()

mprotect.2
  Michael Kerrisk
    Note ENOMEM error that can occur when we reach limit on maximum VMAs

open.2
read.2
write.2
  Michael Kerrisk [Mike Hayward]
    Clarify that O_NONBLOCK is a no-op for regular files and block devices

perf_event_open.2
  Vince Weaver [Joerg Roedel]
    Exclude_host/exclude_guest
 clarification
      This patch relates to the exclude_host and exclude_guest bits added
      by the following commit:

        exclude_host, exclude_guest; Linux 3.2
          commit a240f76165e6255384d4bdb8139895fac7988799
          Author: Joerg Roedel <joerg.roedel@amd.com>
          Date: Wed Oct 5 14:01:16 2011 +0200

              perf, core: Introduce attrs to count in either host or guest mode

      The updated manpage text clarifies that the "exclude_host" and
      "exclude_guest" perf_event_open() attr bits only apply in the
      context of a KVM environment and are currently x86 only.
  Vince Weaver
    Document PERF_SAMPLE_REGS_INTR
      This patch relates to the addition of PERF_SAMPLE_REGS_INTR
      support added in the following commit:

        perf_sample_regs_intr; Linux 3.19
        commit 60e2364e60e86e81bc6377f49779779e6120977f

     Author: Stephane Eranian <eranian@google.com>

              perf: Add ability to sample machine state on interrupt

      The primary difference between PERF_SAMPLE_REGS_INTR and the
      existing PERF_SAMPLE_REGS_USER is that the new support will
      return kernel register values. Also if precise_ip is
      set higher than 0 then the PEBS register state will be returned
      rather than the saved interrupt state.

      This patch incorporates feedback from Stephane Eranian and
      Andi Kleen.

prctl.2
seccomp.2
  Michael Kerrisk
    Clarify that SECCOMP_SET_MODE_STRICT disallows exit_group(2)

These days, glibc implements _exit() as a wrapper around
exit_group(2). (When seccomp was originally introduced, this was
not the case.) Give the reader a clue that, despite what glibc is
doing, what SECCOMP_SET_MODE_STRICT permits is the true _exit(2)
system call,
and not exit_group(2).

pread.2
read.2
readv.2
sendfile.2
write.2
Michael Kerrisk
Clarify that Linux limits transfers to a maximum of 0x7ffff000 bytes
See https://bugs.debian.org/629994 and
https://bugs.debian.org/630029.

pread.2
Michael Kerrisk
Rewrite RETURN VALUE section
(Also drop the text on pwrite() returning zero; that seems bogus.)

ptrace.2
Michael Kerrisk [Vegard Nossum]
PTRACE_O_TRACEEXIT clarification

readv.2
Michael Kerrisk
Remove BUGS heading
The text on mixing I/O syscalls and stdio is a general point
of behavior. It's not a bug as such.

recv.2
send.2
Michael Kerrisk
Explain some subtleties of MSG_DONTWAIT versus O_NONBLOCK

rename.2
Michael Kerrisk
Michael Kerrisk
Note that RENAME_NOREPLACE can't be employed with RENAME_EXCHANGE

sched_setaffinity.2
Michael Kerrisk
Add an example program
Michael Kerrisk [Florian Weimer]
Explain how to deal with 1024-CPU limitation of glibc's cpu_set_t type
Michael Kerrisk

Mention the use of the 'isolcpus' kernel boot option

sched_setattr.2
Julian Orth
Remove a const attribute
The attr argument of sched_setattr was documented as const but the kernel will modify the size field of this struct if it contains an invalid value. See the documentation of the size field for details.

seccomp.2
Michael Kerrisk
SEE ALSO: add bpf(2)

send.2
Michael Kerrisk
Expand on subtleties of MSG_NOSIGNAL versus ignoring SIGPIPE

sigaltstack.2
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

socket.2
Stephan Mueller
Update documentation reference for AF_ALG

truncate.2
Michael Kerrisk
ERRORS: ftruncate() can fail if the file descriptor is not writable

utimensat.2
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

After research, We think utimensat() and futimens() are thread-safe.
But, there are not markings of utimensat() and futimens() in glibc document.

clearenv.3
Zeng Linggang
ATTRIBUTES: Note function that is not thread-safe

  Zeng Linggang
    ATTRIBUTES: Note functions that are/aren't thread-safe

gethostbyname.3
  Michael Kerrisk [Laszlo Ersek]
    Remove mention of IPv6 addresses, which are not supported
      As reported by Laszlo Ersek:

        gethostbyname(3) fails to resolve the IPv6 address "::1",
        but the manual page says: "If name is an IPv4 or IPv6 address,
        no lookup is performed and gethostbyname() simply copies name

into the h_name field [...]".

Debian bug report:
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455762

glibc bug
report:
http://sourceware.org/bugzilla/show_bug.cgi?id=5479

SUSv3 link for gethostbyname(3):
http://www.opengroup.org/onlinepubs/000095399/functions/gethostbyname.html

It seems that the glibc behavior is conformant, and the manual
page is in error.

    ATTRIBUTES: Note functions that are thread-safe

console_codes.4

Scot Doyle [Pavel
Machek, Michael Kerrisk]
Add CSI sequence for cursor blink interval
Add a Console Private CSI sequence to specify the current
console's cursor blink interval. The interval is specified
as a number of milliseconds until the next cursor display
state toggle, from 50 to 65535.

null.4
Michael Kerrisk
Note that reads from /dev/zero are interruptible since Linux 2.6.31

core.5
Michael Kerrisk
Mention 'coredump_filter' boot option

host.conf.5
Michael Kerrisk
Wording fix: s/resolv+/the resolver library/
The term "resolv+" seems to be historical cruft.

hosts.equiv.5
Carlos O'Donell
Fix format, clarify IdM needs, and provide examples.
In some recent work with a Red Hat customer I had the opportunity
to discuss the fine nuances of the ruserok() function and related
API which are used to implement rlogin and rsh.

It came to my
attention after working with QE on some automated
internal testing that there were no good examples in the hosts.equiv
manual page showing how the format was supposed to work for this
file and for ~/.rhosts, worse the "format" line showed that there
should be spaces between arguments when that would clearly lead
to incorrect behaviour. In addition some things that the format
allows you to write are just wrong like "-host -user" which makes
no sense since the host is already rejected, and should be written
as "host -user" instead. I added notes in the example to make it
clear that "-host -user" is invalid.

I fixed three things:

(a) The format line.
- Either +, or [-]hostname, or +@netgrp or -@netgrp.
- Either +, or [-]username, or +@netgrp or -@netgrp.
- You must specify something in the hostname portion so remove

optional brackets.

(b) Clarify language around credentials
- If the host is not trusted you must provide credentials to
the login system and that could be anything really and it
depends on your configuration e.g. PAM or whatever IdM you have.

(c) Provide real-world examples
- Provide several real world examples and some corner case
examples for how you would write something. Hopefully others
can add examples as they see fit.

Michael Kerrisk [Carlos O'Donell, Arjun Shankar]
Improve explanation in EXAMPLE

locale.5
Marko Myllynen
Document map to_inpunct, map to_outpunct
See e.g. fa_IR for reference.
Marko Myllynen
Document class in LC_CTYPE
See e.g. the locale zh_CN and

http://en.cppreference.com/w/cpp/string/wide/towctrans
http://en.cppreference.com/w/cpp/string/wide/wctrans
Marko Myllynen
Add iconv(1) reference
Marko Myllynen
Document character transliteration
See e.g. da_DK for reference.

(Not sure should we actually provide an example here?)
Marko Myllynen
Document era keywords
This patch completes the LC_TIME section - since these era
keywords are so tightly coupled, I'm providing them as a
single patch.

Based on
http://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap07.html
http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf
Marko Myllynen
Document default_missing
Marko Myllynen
Document outdigit and alt_digits
See e.g. fa_IR for reference.
Marko Myllynen
Refer to locale(7) more prominently
It's probably a good idea to refer to locale(7) so that a reader

can check what a category is about before describing them in
detail.
Marko Myllynen
Document charclass and charconv
See e.g. the locales ja_JP and ko_KR and

http://en.cppreference.com/w/cpp/string/wide/towctrans
http://en.cppreference.com/w/cpp/string/wide/wctrans
Marko Myllynen
Copy is not exclusive in LC_CTYPE and LC_COLLATE
See e.g. da_DK for reference.
Marko Myllynen
Remove the FIXME for timezone
The timezone of LC_TIME is not in POSIX, only 6 (out of ~300)
glibc locales define it, the glibc code comment below from
glibc.git/programs/ld-time.c seems to suggest it's not a good
idea, and there's been a proposal in upstream [1] to remove the
existing timezone definitions from glibc locales so I think
it's actually better to leave this one undocumented:

/* XXX We don't perform any tests on the timezone value since this is
simply useless, stupid $&$!@... */

1) https://sourceware.org/ml/libc-alpha/2015-06/msg00098.html

Move the remaining LC_COLLATE FIXMEs together while at it.
Marko Myllynen
Fix country_isbn format
Both plain numbers and Unicode code points are used in
glibc locales but checking the code reveals that country_isbn
is handled like the rest of its category expect for country_num
which was clarified earlier.
Marko Myllynen
Sort according to the standard
Sort the options so that those defined in POSIX are listed first,
then followed by those defined in ISO/IEC TR 14652 in the order
of common convention in many widely used glibc locales.

Actual descriptions are unchanged.

http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap07.html
Marko Myllynen
Refer to strftime(3) where appropriate
The relationship between the locale time format syntax
and strftime()
cannot be considered as obvious.
Marko Myllynen
Document map "totitle"

See e.g. locales/i18n for reference.
Michael Kerrisk [Marko Myllynen]
Remove BUGS section saying man page is not complete
To some degree, this is true of many pages. And anyway, this
page is much better after recent work by Marko.

proc.5
Michael Kerrisk
List /proc/vmstat fields
Michael Kerrisk
Tweak /proc/vmstat text
Michael Kerrisk
Add /proc/crypto entry with a pointer to further information
Michael Kerrisk [Kees Cook]
Document /proc/sys/kernel/sysctl_writes_strict
Based on text in Documentation/sysctl/kernel.txt.
Michael Kerrisk
Move misordered /proc/[pid]/timers entry
Michael Kerrisk
Refer to bpf(2) for explanation of /proc/sys/net/core/bpf_jit_enable

repertoiremap.5
Marko Myllynen
Symbolic names AKA mnemonics
A long time ago in glibc, repertoire
maps were used (but they
were removed already in 2000), those mapping files were named
as mnemonics, so "mnemonic" is a term that would almost
certainly come up if somebody studies glibc side (perhaps even
the related standards like ISO 9945 [which I don't have access
to]) so I thought it's worth to mention to term in the man page
to make sure we're talking about the same thing, otherwise
someone might wonder is that something different or not.

IOW, symbolic names and mnemonics are often used interchangeably,
let's mention the other often used term in the page, too.

capabilities.7
Michael Kerrisk
CAP_SYS_ADMIN allows calling bpf(2)

locale.7
Marko Myllynen
LC_CTYPE determines transliteration rules on glibc systems

packet.7
[Cortland Setlow]
Fix description of binding a packet socket to an interface

pty.7
  NeilBrown [Peter Hurley]
    Clarify asynchronous nature of PTY I/O
      A PTY is not like a pipe - there may be delayed between data
      being written at one end and it being available at the other.

      This became particularly apparent after
          commit f95499c3030f
        ("n_tty: Don't wait for buffer work in read() loop")
      in Linux 3.12

      See also the mail thread at https://lkml.org/lkml/2015/5/1/35
        Date   Mon, 04 May 2015 12:32:04 -0400
        From   Peter Hurley <>
        Subject Re: [PATCH bisected regression] input_available_p()
                sometimes says 'no' when it should say 'yes'

rtld-audit.7
  Ben Woodard
    Use correct printf() specifier for pointer types
      In the example code you used %x rather than %p in the example
      code for an audit library. The problem is that it truncates the
      pointers on 64b platforms. So you get something
like:

      la_symbind64(): symname = strrchr sym->st_value = 0x7f4b8a3f8960
      ndx = 222 flags = 0x0 refcook = 8b53e5c8 defcook = 8b537e30

      rather than:

      la_symbind64(): symname = fclose sym->st_value = 0x7fa452dd49b0
      ndx = 1135 flags = 0x0 refcook = 0x7fa453f395c8 defcook = 0x7fa453f32e30

      This has bitten me a handful of times when playing around with
      audit test libraries to investigate its behavior.

sched.7
  Michael Kerrisk
    Remove ancient, wildly optimistic prediction about future of RT patches
      It seems the patches were not merged by 2.6.30...

socket.7
  Michael Kerrisk
    SEE ALSO: add bpf(2)

vdso.7
  Nathan Lynch [Mike Frysinger]

Update for ARM

The 32-bit ARM architecture in Linux has gained a vDSO as of the
4.1 release. (I was the primary author.)

Document the symbols exported by the ARM VDSO.

Accepted kernel submission:
http://lists.infradead.org/pipermail/linux-arm-kernel/2015-March/332573.html

========== Changes in man-pages-4.02 ==========

Released: 2015-08-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Daniel Borkmann <daniel@iogearbox.net>
David Rientjes <rientjes@google.com>
Dilyan Palauzov <dilyan.palauzov@aegee.org>
Gabriel F. T. Gomes <gftg@linux.vnet.ibm.com>
Gleb Fotengauer-Malinovskiy <glebfm@altlinux.org>
Goswin von Brederlow <goswin-v-b@web.de>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jonathan David Amery <jdamery@ysolde.ucam.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Mike Kravetz <mike.kravetz@oracle.com>
Nicholas Miell <nmiell@gmail.com>
Nikola Forró <nforro@redhat.com>
Sam Varshavchik <mrsam@courier-mta.com>
Yaarit
<yaarit@gmail.com>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

dladdr.3

Michael Kerrisk
New page documenting dladdr() and dladdr1()
Relocate/rewrite dladdr() text formerly contained in dlopen(3).

Add documentation of dladdr1().
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

dlerror.3
Michael Kerrisk
Migrate dlerror(3) to new separate man page
Michael Kerrisk
Note that the returned message may be in a statically allocated buffer
Michael Kerrisk
Note that the returned string does not include a trailing newline
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

dlinfo.3
Michael Kerrisk
New page describing dlinfo(3)
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

dlopen.3
Michael Kerrisk
This page was substantially rewritten and
enhanced. Notably:
* the dladdr(), dlsym, dlvsym(), and dlerror() content were moved
to separate new pages;
* documentation for dlmopen was added;
* and other changes as noted below.
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Move atexit() discussion under "Initialization and Finalization"
Michael Kerrisk
Move discussion of _init() and _fini() to NOTES
Michael Kerrisk
Rework the discussion of initialization and finalization functions
Deemphasize the obsolete _init/_fini and give more prominence
to gcc constructors/destructors.
Michael Kerrisk
dlclose() will unload the object when all references have been released
Michael Kerrisk
EXAMPLE: Remove mention of "-rdynamic"
That option isn't needed for compiling and running this program.
Michael Kerrisk

Remove reference to ld.so info page
The command
"info ld.so" simply shows the man page...
Michael Kerrisk
Add VERSIONS section
Michael Kerrisk
Reorganize conformance information for 'flags'

dlsysm.3
Michael Kerrisk
Move dlsym() and dlvsym() content to new separate page
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

Newly documented interfaces in existing pages
---

dlopen.3
Michael Kerrisk, Carlos O'Donell
Document dlmopen(3)

nl_langinfo.3
Sam Varshavchik, Michael Kerrisk
Add documentation for nl_langinfo_l(3)

__ppc_set_ppr_med.3
Gabriel F. T. Gomes
Document PPC functions providing access to PPR
GNU C Library 2.18 adds functions (__ppc_set_ppr_low(3),
__ppc_set_ppr_med(3), __ppc_set_ppr_med_low(3)) that provide
access to the Program Priority Register (PPR).

__ppc_yield.3
Gabriel F. T. Gomes
Document PPC performance-hint functions

GNU C Library 2.18 adds functions __ppc_yield(3), __ppc_mdoio(3),
and __ppc_mdoom(3) that can be used provide a hint that
performance could be improved if shared resources are released
for use by other processors.

New and changed links
---

dladdr1.3
Michael Kerrisk

New link to (new) dladdr(3) page

dlmopen.3
  Michael Kerrisk
    New link to dlopen.3

dlvsym.3
  Michael Kerrisk
    Adjust link to point to new self-contained dlsym(3) page

nl_langinfo_l.3
  Michael Kerrisk
    New link to nl_langinfo.3

__ppc_mdoio.3
  Gabriel F. T. Gomes
    New link to __ppc_yield.3

__ppc_mdoom.3
  Gabriel F. T. Gomes
    New link to __ppc_yield.3

__ppc_set_ppr_low.3
  Gabriel F. T. Gomes
    New link to __ppc_set_ppr_med.3

__ppc_set_ppr_med_low.3
  Gabriel F. T. Gomes
    New link to __ppc_set_ppr_med.3

Global changes

Very many pages
  Michael Kerrisk
    Update
 CONFORMING TO section to reflect POSIX.1-2001 and POSIX.1-2008
    details. (By now, I believe all pages should be up to date with
    respect to appropriately mentioning POSIX.1-2001 and POSIX.1-2008.)

ldd.1
sprof.1
execve.2
dlopen.3
ld.so.8
  Michael Kerrisk
    Prefer "shared object" over "shared library"

The man pages variously use "shared library" or "shared object".
Try to more consistently use one term ("shared object"), while
also pointing out on a few pages that the terms are synonymous.

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Add mention of POSIX.1-2008 regarding EAGAIN vs EWOULDBLOCK

bpf.2
  Daniel Borkmann
    Various updates/follow-ups to address some fixmes
      A couple of follow-ups to the bpf(2) man-page, besides others:

       * Description of map data types
       * Explanation on eBPF tail calls and program arrays
       *
 Paragraph on tc holding ref of the eBPF program in the kernel
       * Updated ASCII image with tc ingress and egress invocations
       * __sync_fetch_and_add() and example usage mentioned on arrays
       * minor reword on the licensing and other minor fixups

execve.2
  Michael Kerrisk
    Reword text on POSIX and #!

io_getevents.2
  Michael Kerrisk
    Note return value on interruption by a signal handler
  Michael Kerrisk
    Clarify details of return value for timeout-expired case
  Michael Kerrisk
    Clarify and extend discussion of 'timeout' argument

mmap.2
  Michael Kerrisk
    Note that 'length' need not be a page-size multiple for munmap()
  Michael Kerrisk [David Rientjes, David Rientjes, Mike Kravetz]
    Describe mmap()/munmap() argument requirements for huge-page mappings
  Michael Kerrisk
    Move discussion of timestamps to NOTES
      A straight move; no changes to the content.
      This content
 is better placed in NOTES.

seccomp.2
  Michael Kerrisk
    SEE ALSO: mention libseccomp pages
    SEE ALSO: add scmp_sys_resolver(1)

sigaction.2
  Michael Kerrisk
    Correct the list of flags that were added in POSIX.1-2001

socketpair.2
  Michael Kerrisk [Goswin von Brederlow]
    Clarify use of SOCK_* flags in 'type' argument
      See http://bugs.debian.org/794217

atexit.3
  Michael Kerrisk
    SEE ALSO: add dlopen(3)

clock_getcpuclockid.3
  Michael Kerrisk
    Improve wording of EPERM error
      It's imprecise to say that this is an "optional" error
      in POSIX.1.

dl_iterate_phdr.3
  Michael Kerrisk
    Note that 'size' allows callback() to discover structure extensions
  Michael Kerrisk
    SEE ALSO: add dladdr(3)
  Michael Kerrisk
    CONFORMING TO: note that this function appears on some other systems

fseeko.3
  Michael Kerrisk
    Remove crufty NOTES section
      This ancient System
 V detail is unneeded.

getutent.3
  Michael Kerrisk
    Mention POSIX.1-2008 for the "utmpx" functions

iconv_close.3
iconv_open.3
  Michael Kerrisk
    CONFORMING TO: change "UNIX98" to "SUSv2"

malloc.3

Michael Kerrisk
Change "UNIX 98" to "SUSv2"

mktemp.3
Gleb Fotengauer-Malinovskiy
Reference mkdtemp(3) in addition to mkstemp(3)
Mention mkdtemp(3) as another secure alternative to mktemp(3).

See also https://sourceware.org/bugzilla/show_bug.cgi?id=2898.

mq_receive.3
mq_send.3
Michael Kerrisk
Clarify discussion of 'timeout'
In particular, remove the word 'ceiling', which falsely
suggests that the call might return prematurely.

nl_langinfo.3
Michael Kerrisk
Explicitly describe the return value on success
Michael Kerrisk
POSIX specifies that the caller may not modify the returned string
Michael Kerrisk
Enhance RETURN VALUE description
Note
some further cases where returned string may be
invalidated or overwritten.

perror.3
Michael Kerrisk
Reformat CONFORMING to information
Michael Kerrisk
Note that 'sys_errlist' and 'sys_nerr' are not in POSIX.1

posix_openpt.3
Michael Kerrisk
Reword text regarding systems that don't have posix_openpt()

printf.3
Michael Kerrisk
CONFORMING TO: update details for dprintf() and vdprintf()

setlogmask.3
Michael Kerrisk
Remove useless statement in CONFORMING TO
Saying that the description in PSOX.1-2001 is flawed,
without saying what the fla is, is not helpful.
(And no, I don't know what the flaw is.)

shm_open.3
  Michael Kerrisk
    Add POSIX.1-2008 details regarding group ID of new shared memory object

strfmon.3
  Michael Kerrisk
    Fix erroneous CONFORMING to
      strfmon() is in POSIX.1.

fanotify.7
  Heinrich Schuchardt
    Clarify effects of file moves
      If files or directories are moved to other mounts, the inode is
      deleted. Fanotify marks are lost.

mq_overview.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

nptl.7
  Michael Kerrisk [Nicholas Miell]
    Note that i386 and x86-64 binaries can't share mutexes

sched.7
  Nikola Forró
    Fix descriptions of sched_get_priority_max() / sched_get_priority_min()

sem_overview.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

shm_overview.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

sigevent.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

symlink.7
  Michael Kerrisk
    Update with POSIX.1-2008 details for link(2)

ld.so.8
  Michael Kerrisk [Jonathan David Amery]
    Items in LD_LIBRARY_PATH can also be delimited by semicolons
      See http://bugs.debian.org/794559.

========== Changes in man-pages-4.03 ==========

Released: 2015-12-05,
Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Ville Skyttä <ville.skytta@iki.fi>
Vince Weaver <vincent.weaver@maine.edu>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    4.1 adds AUX sample support
  Vince Weaver
    4.1 data_offset and data_size fields
  Vince Weaver
 [Alexander Shishkin]
    Document aux_{head,tail,offset,size} support
  Vince Weaver
    4.0 update rdpmc documentation
  Vince Weaver
    4.1 adds PERF_RECORD_ITRACE_START
  Vince Weaver
    Document 4.1 clockid support
  Vince Weaver [Steven Rostedt, Masami Hiramatsu]
    4.1 PERF_EVENT_IOC_SET_BPF support
  Vince Weaver
    4.1 adds AUX_FLAG_OVERWRITE support
  Vince Weaver
    4.1 PERF_SAMPLE_BRANCH_CALL_STACK
  Vince Weaver
    4.1 adds aux_watermark
  Vince Weaver
    Add possibility of EBUSY error

prctl.2
  Andy Lutomirski [Kees Cook, Serge Hallyn]
    Document operations for ambient capabilities
  Michael Kerrisk
    Rework PR_CAP_AMBIENT text
    Note that arg4 and arg5 must be zero for CAP_AMBIENT
    RETURN VALUE: Add PR_CAP_AMBIENT + PR_CAP_AMBIENT_IS_SET case
    ERRORS: document PR_CAP_AMBIENT error cases

__ppc_set_ppr_med.3
  Gabriel F. T. Gomes
    Document PPC functions providing
 access to PPR
      GNU C Library commit 1747fcda4902a3b46183d93fb16ed9b436b2608b
      extends the priorities that can be set to the Program Priority
      Register (PPR), with the functions: __ppc_set_ppr_very_low(3)
      and __ppc_set_ppr_med_high(3).

capabilities.7
  Andy Lutomirski [Kees Cook, Serge Hallyn]
    Document ambient capabilities
  Michael Kerrisk
    Various additions and reworkings for ambient capability text

New and changed links

__ppc_set_ppr_med_high.3
  Gabriel F. T. Gomes
    New link to __ppc_set_ppr_med.3

__ppc_set_ppr_very_low.3
  Gabriel F. T. Gomes
    New link to __ppc_set_ppr_med.3

Changes to individual pages
---

mremap.2
  Eric B Munson [Michal Hocko]
    Add note about mremap() with locked areas
      When mremap() is used to move or expand a mapping that is locked
      with mlock() or equivalent it will attempt to populate the new
       area. However, like mmap(MAP_LOCKED), mremap() will not fail if
      the area cannot be populated. Also like mmap(MAP_LOCKED) this
      might come as a surprise to users and should be noted.
open.2
  Michael Kerrisk [David Drysdale]
    Remove accidental mention of O_TTY_INIT
      An earlier edit mentioned O_TTY_INIT as a file creation flag.
      That's true, according POSIX, but Linux does not implement
      this flag, so remove mention of it.

pipe.2
  Michael Kerrisk

SEE ALSO: add splice(2)

prctl.2
Michael Kerrisk
Reorder options alphabetically
Employ a pseudo-alphabetical order, ordering options after removal
of any "PR_", "PR_SET_", or "PR_GET" prefix.
Michael Kerrisk
Fix alphabetical misplacements in ERRORS

ptrace.2
Tycho Andersen
Document PTRACE_O_SUSPEND_SECCOMP flag
Michael Kerrisk
Document /proc/sys/kernel/yama/ptrace_scope
Michael Kerrisk
Note that PTRACE_ATTACH cannot be applied to nondumpable processes
Michael Kerrisk
SEE ALSO: add prctl(2)

reboot.2
Casper Ti. Vector
1-argument reboot() is also provided by alternative libc

seccomp.2
Michael Kerrisk
Describe use of 'instruction_pointer' data field
Michael Kerrisk [Kees Cook]
Note why all filters in a set are executed even after SECCOMP_RET_KILL

signalfd.2
Michael Kerrisk
Describe semantics with respect to SCM_RIGHTS

syscalls.2
Michael Kerrisk
Add mlock(2)
Michael Kerrisk
Add userfaultfd()

daemon.3
Michael Kerrisk [Johannes Stüttgen]
Note that daemon() is buggy with respect to controlling tty acquisition

dirfd.3
Jonathan Wakely
Remove outdated NOTES
As stated in the SYNOPSIS, since glibc 2.10 this function is also

declared by the relevant X/Open and POSIX macros.

dlopen.3
  Michael Kerrisk
    Make it more explicit
 that LD_BIND_NOW overrides RTLD_LAZY
  Michael Kerrisk [Florian Weimer]
    Correct the pathname used in EXAMPLE
      Quoting Florian:

        This does not work because libm.so can be a linker script:

            handle = dlopen("libm.so", RTLD_LAZY);

        The proper way to do this is to include <gnu/lib-names.h>
        and use LIBM_SO.

      See https://bugzilla.kernel.org/show_bug.cgi?id=108821
  Michael Kerrisk
    Include a shell session showing build/run in EXAMPLE
  Michael Kerrisk
    Change arguments to main() to "void" in EXAMPLE

fgetgrent.3
  Zeng Linggang
    ATTRIBUTES: Note function that is not thread-safe

fgetpwent.3
  Zeng Linggang
    ATTRIBUTES: Note function that is not thread-safe

getauxval.3
  Michael Kerrisk
    Add some details for AT_SECURE

getspnam.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are/aren't thread-safe

mallinfo.3
  Zeng Linggang
     ATTRIBUTES: Note function that is not thread-safe

mallopt.3
  Carlos O'Donell
    Document M_ARENA_TEST and M_ARENA_MAX

posix_fallocate.3

Michael Kerrisk
Clarify text relating to MT-safety
Carlos O'Donell
Mention glibc emulation caveats

termios.3
Olivier TARTROU
Add missing details on behaviour of PARMRK
For a serial terminal, with a specific configuration, input bytes
with value 0377 are passed to the program as two bytes, 0377 0377.

tty_ioctl.4
Michael Kerrisk [Peter Hurley]
Note that TIOCTTYGSTRUCT went away in Linux 2.5.67

core.5
Ross Zwisler
Add info about DAX coredump filtering flags
Kernel 4.4 added two new core dump filtering flags,
MMF_DUMP_DAX_PRIVATE and MMF_DUMP_DAX_SHARED.

These flags allow us to explicitly filter DAX mappings.
This is desirable because DAX mappings, like hugetlb
mappings, have the potential to
be very large.

nsswitch.conf.5
Nikola Forró
Add list of files being read when "files" service is used
This is not mentioned anywhere. Users can assume that the file
being read is something like /etc/$DATABASE, but that's not
always the case. It's better to explicitly specify which
file is read for each respective database. The list of
files was acquired from glibc source code.

proc.5
Heinrich Schuchardt [Michael Kerrisk]
Add details for threads-max
Add detail information for threads-max.
The checks for minimum and maximum values exist since kernel 4.1.
https://lkml.org/lkml/2015/3/15/96
Heinrich Schuchardt
/proc/sys: Describe whitespace characters
Michael Kerrisk
Document 'CapAmb' in /proc/PID/status
Michael Kerrisk
Add reference to ptrace(2) for /proc/sys/kernel/yama/ptrace_scope

aio.7
  Michael Kerrisk [Meikun Wang]

  Add missing include file, <fcntl.h>, to example program

mq_overview.7
  Michael Kerrisk [Arto Bendiken]
    Document QSIZE bug that appeared in 3.5 and was fixed in 4.2

path_resolution.7
  Michael Kerrisk
    Clarify recursive resolution of symlinks and note limits

pipe.7
  Michael Kerrisk
    SEE ALSO: add splice(2)

rtld-audit.7
  Namhyung Kim
    Fix (typo) error in la_pltenter() description
      s/la_pltenter()/la_pltexit()/

      la_pltenter() is called regardless of the value of
      framesizep but la_pltexit() is called only if la_pltenter()
      returns with non-zero framesizep set. I spent long time to
      figure out why la_pltexit() is not called at all.

signal.7
  Michael Kerrisk [Michael Hocko]
    Note async-signal-safe functions added by POSIX.1-2008 TC1

tcp.7
  Daniel Borkmann [Michael Kerrisk]
    Improve paragraphs on tcp_ecn and add tcp_ecn_fallback bullet
      Improve description
 of tcp_ecn, fix the RFC number and it's
      not a boolean anymore since long time, and add a description
      for tcp_ecn_fallback.

      See also kernel doc under Documentation/networking/ip-sysctl.txt
      on tcp_ecn and tcp_ecn_fallback.

ld.so.8
  Michael Kerrisk
    LD_POINTER_GUARD has been removed in glibc 2.23
  Michael Kerrisk
    Describe secure-execution mode
  Michael Kerrisk [Maria Guseva]

Replace mentions of set-UID/set-GID programs with secure-execution mode
Inspired by a patch from Maria Guseva.
Maria Guseva [Silvan Jegen]
LD_DEBUG is effective in secure-execution mode if /etc/suid-debug exists

========== Changes in man-pages-4.04 ==========

Apologies if I missed anyone!

New and rewritten pages
---

copy_file_range.2
  Anna Schumaker [Darrick J. Wong, Christoph Hellwig, Michael Kerrisk]
    New page documenting copy_file_range()
      copy_file_range() is a new system call for copying ranges of data
      completely in the kernel. This gives filesystems an opportunity to
      implement some kind of "copy acceleration", such as reflinks or
      server-side-copy (in the case of NFS).

personality.2
  Michael Kerrisk
    This page has been greatly expanded, to add descriptions of
    personality domains.

fmemopen.3
  Michael Kerrisk [Adhemerval Zanella]
    Significant reworking of this page:
    * Rework discussion of the (obsolete) binary mode
    * Split open_memstream(3) description into a separate page.
    * Note various fmemopen() bugs that were fixed in glibc 2.22
    * Greatly expand description of 'mode' argument
    * Rework description of 'buf' and 'len' arguments
    * Expand discussion
 of "current position" for fmemopen() stream

ntp_gettime.3
  Michael Kerrisk
    New page describing ntp_gettime(3) and ntp_gettimex(3)

open_memstream.3
  Michael Kerrisk
    New page created by split of fmemopen(3).
    At the same time, add and rework a few details in the text.

posix_spawn.3
  Bill O. Gallmeister, Michael Kerrisk
    New man page documenting posix_spawn(3) and posix_spawnp(3)

readdir.3
  Michael Kerrisk [Florian Weimer]
    Split readdir_r() content into separate page
      As suggested by Florian Weimer:

          It may make sense to move this documentation to a separate
          manual page, specific to readdir_r. This will keep the
          readdir() documentation nice and crisp. Most programmers
          will never have to consult all these details.
  Michael Kerrisk
    Near complete restructuring of the page and add some further details
  Michael Kerrisk [Florian Weimer, Rich Felker,
 Paul Eggert]
    Add a lot more detail on portable use of the 'd_name' field

readdir_r.3
  Michael Kerrisk [Florian Weimer]
    New page created after split of readdir(3).
  Michael Kerrisk [Florian Weimer]
    Explain why readdir_r() is deprecated and readdir() is preferred
  Michael Kerrisk [Florian Weimer]
    Remove misleading code example using pathconf()

lirc.4
  Alec Leamas
    New page documenting lirc device driver

Newly documented interfaces in existing pages
----

adjtimex.2
  Michael Kerrisk
    Document ntp_adjtime(3)

epoll_ctl.2
  Michael Kerrisk [Jason Baron]
    Document EPOLLEXCLUSIVE

madvise.2
  Minchan Kim [Michael Kerrisk]
    Document MADV_FREE
      Document the MADV_FREE flag added to madvise() in Linux 4.5.

proc.5
  Michael Kerrisk
    Document CmaTotal and CmaFree fields of /proc/meminfo

Michael Kerrisk
Document additional /proc/meminfo
fields
Document DirectMap4k, DirectMap4M, DirectMap2M, DirectMap1G
Michael Kerrisk
Document MemAvailable /proc/meminfo field
Michael Kerrisk
Document inotify /proc/PID/fdinfo entries
Michael Kerrisk
Document fanotify /proc/PID/fdinfo entries
Michael Kerrisk
Add some kernel version numbers for /proc/PID/fdinfo entries
Michael Kerrisk [Patrick Donnelly]
/proc/PID/fdinfo displays the setting of the close-on-exec flag
Note also the pre-3.1 bug in the display of this info.

socket.7
Craig Gallek [Michael Kerrisk, Vincent Bernat]
Document some BPF-related socket options
Document the behavior and the first kernel version for each of the
following socket options:

SO_ATTACH_FILTER
SO_ATTACH_BPF
SO_ATTACH_REUSEPORT_CBPF
SO_ATTACH_REUSEPORT_EBPF
SO_DETACH_FILTER
SO_DETACH_BPF

SO_LOCK_FILTER

New and changed links
---

isalpha_l.3
Michael Kerrisk
New link to isalpha.3

longjmp.3
Michael Kerrisk
Replace page with link to setjmp(3), which now incorporates longjmp()

ntp_adjtime.3
Michael Kerrisk
New link to adjtimex(2)

ntp_gettimex.3

Michael Kerrisk
New link to ntp_gettime.3

open_wmemstream.3
Michael Kerrisk
Update link to point to new open_memstream(2) page

posix_spawnp.3
Michael Kerrisk
New link to new posix_spawn.3 page

siglongjmp.3
Michael Kerrisk
Rewire link to point to setjmp(3)

strerror_l.3
Michael Kerrisk
New link to strerror.3
Fix missing link

Global changes

Various pages
Michael Kerrisk
Update FTM requirements (_DEFAULT_SOURCE)
Michael Kerrisk
Update feature test macro requirements
Update to use _DEFAULT_SOURCE, and also changes brought by
glibc
commit 266865c0e7b79d4196e2cc393693463f03c90bd8.

Various pages
Michael Kerrisk
Simplify FTM requirements
Looking at <features.h> (or feature_test_macros(7)), one can
see that when _XOPEN_SOURCE is defined with the value 700
(or greater), then _POSIX_C_SOURCE is defined with the value
200809L (or greater). Therefore, terms in the man pages such as

_XOPEN_SOURCE\ >=\ 700 || _POSIX_C_SOURCE\ >=\ 200809L

can be simplified to:

_POSIX_C_SOURCE\ >=\ 200809L

Various pages

Michael Kerrisk
Simplify FTM requirements
Looking at <features.h> (or feature_test_macros(7)), one can
see that when _XOPEN_SOURCE is defined with the value 600
(or greater), then _POSIX_C_SOURCE is defined with the value
200112L (or greater). Therefore, terms in the man pages such as

_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L

can be simplified to:

_POSIX_C_SOURCE\ >=\ 200112L

Various pages
Michael Kerrisk
Simplify FTM requirements
_XOPEN_SOURCE implies _POSIX_C_SOURCE >=2, so simplify FTM
requirements in various pages.

Various pages
Michael Kerrisk
Remove "or 'cc -std=c99'" from SYNOPSIS
Under the FTM requirements all of these pages document the
requirement for _ISOC99_SOURCE. And feature_test_macros(7) now
documents that "cc -std=c99" produces the same effect as defining
_ISOC99_SOURCE. So, all of these pages don't additionally need
to specify "or 'cc -std=c99'" under the FTM requirements
in the SYNOPSIS. Removing that redundant text also simplifies
the SYNOPSIS a little.

Various pages
Michael Kerrisk
Simplify FTM requirements
Looking at <features.h> (or feature_test_macros(7)), one can
see that when _XOPEN_SOURCE
is defined with the value 600
(or greater), then _POSIX_C_SOURCE is defined with the value
200112L (or greater). Therefore, terms in the man pages such as

_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L

can be simplified to:

_POSIX_C_SOURCE\ >=\ 200112L

Various pages
Michael Kerrisk
Remove references to _XOPEN_SOURCE_EXTENDED in SYNOPSIS

_XOPEN_SOURCE_EXTENDED is obsolete (it existed in SUSv1, but not
subsequent standards). _XOPEN_SOURCE >= 500 produces the same
effects as (_XOPEN_SOURCE && _XOPEN_SOURCE_EXTENDED). Modifying
the SYNOPSIS of various ages that contain:

_XOPEN_SOURCE\ >=\ 500 ||
_XOPEN_SOURCE\ &&\ _XOPEN_SOURCE_EXTENDED

to just:

_XOPEN_SOURCE\ >=\ 500

This has the following benefits:

a) Simplifying the SYNOPSIS by removing ancient

historical information.

b) Preventing users from being misled into using
_XOPEN_SOURCE_EXTENDED in new source code.

Various pages
Michael Kerrisk
Remove mention of the obsolete _POSIX_SOURCE macro from SYNOPSIS
_POSIX_SOURCE was a POSIX.1-1990 creation that was soon made
obsolete by _POSIX_C_SOURCE. Retaining mention of it
in the feature test macro requirements section of the
SYNOPSIS doesn't contain important information, and may
mislead readers into actually trying to use this macro.
A few mentions of it are maintained in a some pages where
defining _POSIX_SOURCE inhibits some behavior.

Various sockets-related pages
Michael Kerrisk [Carlos O'Donell]
Use consistent argument/variable names for socket addresses and lengths
As noted by Carlos, there's quite a bit of inconsistency across
pages. Use 'addr' and 'addrlen' consistently
in variables and
function arguments.

Various pages
Michael Kerrisk
Wording fix: "current file offset" ==> "file offset"
"File offset" is the preferred POSIX terminology.

Various pages
Michael Kerrisk
Word "descriptor" more precisely

Use either "file descriptor" or "message queue descriptor".

Various pages
  Michael Kerrisk
    ERRORS: add reference to signal(7) in description of EINTR

Changes to individual pages
---

locale.1
  Marko Myllynen
    Add "locale -c charmap" as an example
      Addresses https://bugzilla.kernel.org/show_bug.cgi?id=104511.

localedef.1
  Marko Myllynen
    Add hint on purpose of --no-archive
      Indicate why using --no-archive might be a good idea. The issue
      is that if you create a custom locale with localedef(1) and put
      it to the locale archive then during the next glibc upgrade the
      locale archive
 is updated as well and your custom locale is gone.)

accept.2
  Michael Kerrisk
    ERRORS: improve description for EBADF

adjtimex.2
  Michael Kerrisk [John Stultz]
    Various improvements after feedback from John Stultz
  Michael Kerrisk
    Remove FTM requirements
      It seems that adjtimex() never needed _BSD_SOURCE (and my
      earlier commit 5918743bc8b02b was simply a blunder).
  Michael Kerrisk
    Split EINVAL error cases
  Michael Kerrisk
    Note treatment of out-of-range buf.offset
  Michael Kerrisk
    Don't refer reader to adjtime(3)
      Probably, it's not wise to suggest adjtime(3) as the more
      portable API. Rather, ntp_adjtime(3) should be used.
  Michael Kerrisk [Naresh Kamboju]
    Update details of buf.offset EINVAL error
  Michael Kerrisk
    SEE ALSO: add ntp_gettime(3)
  Michael Kerrisk

Improve description of some PPS timex fields
Michael Kerrisk
Add ATTRIBUTES
section
William Preston [Petr Gajdos]
Update a detail in adjtimex return value description
Michael Kerrisk
Note range constraints and clamping for ADJ_FREQUENCY

bdflush.2
Michael Kerrisk
Note that glibc support for this system call went away in version 2.23

bind.2
Michael Kerrisk
Improve description of ENOENT error

bpf.2
Michael Kerrisk
Document close-on-exec semantics
The close-on-exec file descriptor flag is automatically enabled
for FDs returned by bpf().

chmod.2
Michael Kerrisk
Clarify terminology (file mode versus file permission bits)

chown.2
Michael Kerrisk
ERRORS: improve EBADF description

clone.2
unshare.2
Michael Kerrisk
Remove mention of _BSD_SOURCE and _SVID_SOURCE
The right way to expose declarations for these Linux-specific
system calls was always _GNU_SOURCE. Mentioning the historical
use of _BSD_SOURCE
and _SVID_SOURCE just clouds the issue.

connect.2
Michael Kerrisk
ERRORS: improve EBADF description

create_module.2
Michael Kerrisk
Glibc 2.23 removed last vestiges of support for this system call

delete_module.2
  Michael Kerrisk
    Glibc 2.23 removed last vestiges of support for this system call

epoll_ctl.2
  Michael Kerrisk
    Document ELOOP error for circular monitoring loops

eventfd.2
  Michael Kerrisk
    Note that eventfd info is available in /proc/PID/fdinfo

execve.2
  Michael Kerrisk [Krzysztof Adamski]
    Add EPERM error for capabilities check of capability-dumb binaries
  Michael Kerrisk
    Add reference to ld-linux.so(8)
  Michael Kerrisk
    SEE ALSO: add system(3)

fanotify_init.2
  Michael Kerrisk
    Note kernel version that allowed O_CLOEXEC for event_f_flags

fcntl.2
flock.2
  Michael Kerrisk
    SEE ALSO: add lslocks(8)

fcntl.2
  Michael Kerrisk [Jason Vas Dias]
    Rework description
 of F_SETOWN
      As suggested by Jason, make it clearer that I/O signalling
      requires the use of both F_SETOWN and O_ASYNC. While we're at,
      make a few other cleanups to the text.
  Michael Kerrisk
    Remove mention of _BSD_SOURCE to get definition of F_SETOWN/F_GETOWN
      This usage went away in glibc 2.20, and the simplest remedy
      is just to omit mention of it.

futex.2
  Michael Kerrisk
    FUTEX_CLOCK_REALTIME can now be used with FUTEX_WAIT

get_kernel_syms.2
  Michael Kerrisk
    Note that glibc does not support this system call

init_module.2
  Michael Kerrisk
    Glibc 2.23 removed last vestiges of support for this system call

ioctl_list.2
  Heinrich Schuchardt
    Include uapi/linux/wireless.h
      Add the list of wireless IOCTLs.
  Heinrich Schuchardt
    Path to sockios.h
      sockios.h is now in include/uapi
  Heinrich Schuchardt
    Add reference to netdevice.7
       netdevice.7 describes most of the IOCTLs of sockios.h
  Heinrich Schuchardt
    Transfer structure (wireless.h IOCTLs)
      The sole parameter to be passed to the wireless.h IOCTLs is
      of type struct iwreq *.

ioperm.2
  Michael Kerrisk [Alex Henrie]
    ioperm.2: Permissions are inherited across fork(2)
      See https://bugzilla.kernel.org/show_bug.cgi?id=99911

iopl.2
  Michael Kerrisk [Alex Henrie]
    Permissions are not inherited across fork(2) or preserved on execve(2)
      See https://bugzilla.kernel.org/show_bug.cgi?id=99901

lseek.2
  Michael Kerrisk
    FUSE now supports SEEK_HOLE and SEEK_DATA
  Michael Kerrisk
    NFS supports SEEK_HOLE and SEEK_DATA

  Michael Kerrisk
    SEE ALSO: add open(2)

madvise.2
  Michael Kerrisk
    Clarify MADV_HWPOISON wording to say that it applies to a page range

mknod.2
  Michael Kerrisk
    SEE ALSO: add mknod(1)

mount.2

Michael Kerrisk
SEE ALSO: add findmnt(8)

open.2
Michael Kerrisk
NOTES: mention existence of proc/PID/fd and /proc/PID/fdinfo
Mark Post [Petr Gajdos]
O_TMPFILE support is now provided bt Btrfs

pipe.2
Michael Kerrisk [Eric Blake]
Note treatment of 'pipefd' on error

poll.2
Michael Kerrisk [Josh Triplett]
Document spurious EAGAIN error that can occur on other systems
Light reworking of text proposed by Josh Triplett.

readlink.2
Michael Kerrisk
Clarify EINVAL error description

recv.2
Heinrich Schuchardt
Equivalence to read()
Describe the recv(2)-read(2) and the recvfrom(2)-recv(2)
equivalences for zero-valued arguments.
Michael Kerrisk
MSG_WAITALL has no effect for datagram sockets

recv.2
cmsg.3
Nikola Forró
Fix type of cmsg_len member of cmsghdr structure
The type shown for cmsg_len member of cmsghdr structure is socklen_t,
but the actual
type used by glibc and the kernel is size_t.
The information was obtained from glibc source code:
http://bit.ly/21m1RMp
Michael Kerrisk
Note that cmsg_len is typed as socklen_t in POSIX.1

sched_setaffinity.2
Michael Kerrisk [Florian Weimer, Florian Weimer]
Warn that CPU_ALLOC() may allocate a slightly CPU set than requested
Michael Kerrisk [Florian Weimer]
Add reference to CPU_ALLOC(3)

sched_setattr.2
  Michael Kerrisk [Akihiro Suda]
    EPERM depends on affinity mask of target thread, not calling thread

select.2
  Michael Kerrisk [Josh Triplett]
    Document spurious EAGAIN error that can occur on other systems
      Light reworking of text proposed by Josh Triplett.
  Nikos Mavrogiannopoulos
    Mention the 'fd_set' size limitation early and refer to poll(2)
      Change this because of the serious limitation of select()
      imposing a limit on the range of file descriptors that
 can
      be monitored. This is currently mentioned too late in the
      documentation (in the NOTES section). The man page should
      warn early and refer to poll(2) as soon as possible.
  Michael Kerrisk
    Add details on the glibc fixed-size fd_set limitation
      No modern application should use select() on Linux.

select_tut.2
  Michael Kerrisk
    Some readability fixes to example program
  Michael Kerrisk
    Better variable names in example program
  Michael Kerrisk
    Simplify 'if' logic in example program
  Michael Kerrisk
    Use correct type (socklen_t) for addrlen

semctl.2
  Michael Kerrisk [Davidlohr Bueso, Manfred Spraul, Philip Semanchuk]
    NOTES: note when 'sempid' is set on various implementations
      See https://bugzilla.kernel.org/show_bug.cgi?id=112271 and
      http://thread.gmane.org/gmane.linux.kernel/2162754/
        Subject: [PATCH] Don't set sempid in semctl syscall.
         Date: 2016-02-26 12:21:38 GMT

semop.2
  Michael Kerrisk
    Tweak comment describing 'sempid'

sendfile.2
  Askar Safin
    Fix incorrect description in text referring to splice(2)
  Michael Kerrisk
    SEE ALSO: add copy_file_range(2)

setpgid.2
  Michael Kerrisk
    Correct/simplify FTM requirements for BSD setpgrp() and getpgrp()

signalfd.2
  Michael Kerrisk
    Note that signalfd info is available in /proc/PID/fdinfo

sigprocmask.2
  Michael Kerrisk [Mike Frysinger]
    Explicitly refer the reader to sigsetops(3)
      This man page did not make it obvious which functions
      should be used for manipulating signals sets, nor where
      those functions were documented.

socketpair.2
  Michael Kerrisk [Eric Blake]
    Note treatment of 'sv' on error

splice.2
  Askar Safin
    Improve description of 0 return value.
      See https://bugzilla.kernel.org/show_bug.cgi?id=90911

statfs.2

 Michael Kerrisk [Jakub Wilk]
    Use consistent case for hex constants

sync.2
  Christoph Hellwig
    Clarify description and document the Linux data integrity guarantees

syscall.2
  Mike Frysinger
    Add more architectures and improve error documentation
      Move the error register documentation into the main table rather
      than listing them in sentences after the fact.

      Add sparc error return details.

      Add details for alpha/arc/m68k/microblaze/nios2/powerpc/superh/
      tile/xtensa.

syscalls.2
  Michael Kerrisk
    Add copy_file_range(2)

times.2
  Kondo, Naoya
    Fix an incorrect description in NOTES
      The text has an incorrect description in NOTES, it says
      that (2^32/HZ) - 300 is about 429 million. It is correct
      only if HZ=10 which does not look common today. So just
      removing "(i.e., about 429 million)" is good enough.

truncate.2
  Michael Kerrisk

   SEE ALSO: add truncate(1)

uselib.2
  Michael Kerrisk
    Mention CONFIG_USELIB
  Michael Kerrisk
    Note that glibc does not support this (obsolete) system call

wait.2
wait4.2
  Michael Kerrisk
    Rename the "status" argument to "wstatus"
      The fact that exit(3)/_exit(2) has an argument called
      "status" and the same name is used in the arguments to the
      wait*() calls can a little too easily lead the user into
      thinking that the two arguments hold the same information,
      when of course they don't. So, use a different name
      for the argument of the wait*() functions, to reduce
      the chances of such confusion.

backtrace.3
  Michael Kerrisk [Martin Gebert]
    Small fixes to example program

clearenv.3
  Michael Kerrisk [Matt Zimmerman]
    Clarify the use and effect of clearenv()
      See http://bugs.debian.org/679323
  Michael Kerrisk
    Variables can be added to
 the environment after calling clearenv()

clog10.3
  Michael Kerrisk
    Show an alternative equivalence for clog10()
  Michael Kerrisk

Update CONFORMING TO
Fix grammar error and add C11.

dl_iterate_phdr.3
Michael Kerrisk [Paul Pluzhnikov]
Describe 'struct dl_phdr_info' fields added in glibc 2.4
See https://bugzilla.kernel.org/show_bug.cgi?id=103011
Michael Kerrisk [Simon Que]
Note that first object visited by 'callback' is the main program
See https://bugzilla.kernel.org/show_bug.cgi?id=94141

errno.3
Michael Kerrisk
Add some explanation of ENOENT error

exec.3
Michael Kerrisk
SEE ALSO: add system(3)

exp.3
Michael Kerrisk [Joachim Wuttke]
SEE ALSO: add expm1(3)

fopen.3
Michael Kerrisk
SEE ALSO: add open_memstream(3)

fts.3
Michael Kerrisk
BUGS: glibc-2.23 now has LFS support for the fts functions

gamma.3
Michael Kerrisk [Alan Cox]

gamma() was documented in SVID 2

getaddrinfo.3
Michael Kerrisk [Andreas Schwab, Orion Poplawski]
Update FTM requirements for glibc 2.22
Since glibc 2.22 getaddrinfo() etc. are only declared for
POSIX.1-2001 or later.

getcwd.3
Michael Kerrisk
SEE ALSO: add pwd(1)

opendir.3
Michael Kerrisk

Help the reader by explicitly mentioning the use of readdir(3)

perror.3
Michael Kerrisk
Suggest use of strerror(3) in place of deprecated 'sys_errlist'

posix_fallocate.3
Jérémie Galarneau
ERRORS: add EINTR
The glibc implementation of posix_fallocate(), which calls fallocate(), may be interrupted. The fallocate() emulation also makes use of pread()/pwrite(), which may also be interrupted.

posix_memalign.3
Michael Kerrisk [Eric Blake]
Note posix_memalign()'s treatment of 'memptr' on error

pthread_setaffinity_np.3
Michael Kerrisk
SEE ALSO: add
CPU_SET(3)

queue.3
Dr. Tobias Quathamer
Remove double CONFORMING TO section

rcmd.3
Nikola Forró
Add missing condition concerning .rhosts file
The list of conditions determining if iruserok() and ruserok() functions automatically fail is incomplete. According to glibc source code, the functions also fail if the .rhosts file is hard linked anywhere.

setbuf.3
Michael Kerrisk
SEE ALSO: add stdbuf(1)

setjmp.3
Michael Kerrisk
Rewrite and merge longjmp()/siglongjmp() discussion into this page
The discussion of nonlocal gotos is much easier to read if setjmp() and longjmp() are discussed in the same page. While we're at it, rework almost the entire text and add several more details.
Michael Kerrisk
Note the interactions of longjmp() and non-async-signal-safe functions

POSIX.1-2008 TC2 adds explicit text on this point.

See http://austingroupbugs.net/view.php?id=516#c1195
Michael Kerrisk
Explain why nonlocal gotos make code harder to maintain
Michael Kerrisk
Reword warning on longjmp() to function that has already returned
Michael Kerrisk
Remove reference to obsolete _XOPEN_SOURCE_EXTENDED

sleep.3
Michael Kerrisk
SEE ALSO: add sleep(1)

strftime.3
Michael Kerrisk [Jeremy Harris]
Note which 'tm' fields are used to calculate each output string
See https://bugzilla.redhat.com/show_bug.cgi?id=1162218

strlen.3
Michael Kerrisk [Alan Aversa]
CONFORMING TO: add C11

system.3
Michael Kerrisk
SEE ALSO: add execve(2)

termios.3
Dr. Tobias Quathamer
Document line length in canonical mode
See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/tree/drivers/tty/n_tty.c#n1673
See https://bugs.debian.org/797479
Michael Kerrisk
SEE ALSO: add tty(1)

Michael Kerrisk [Peter Hurley]
Further improvements to recent tweaks of canonical mode 4096 char limit

timegm.3
Michael Kerrisk [Stephen Hurd, Mats Wichmann]
Remove sample implementation of timegm()
Stephen and Mats both question the wisdom of showing a portable
non-thread-safe implementation of timegm(), and I find it
hard to disagree. So, remove this code.

See https://bugzilla.kernel.org/show_bug.cgi?id=103701
Michael Kerrisk
Expand DESCRIPTION a little

st4.4
  Dr. Tobias Quathamer
    Remove spurious copyright section

tty_ioctl.4
  Michael Kerrisk
    SEE ALSO: add ldattach(1)

elf.5
  Michael Kerrisk [Gabriel Corona, Mike Frysinger]
    Fix description of STV_PROTECTED
  Michael Kerrisk
    Improve description of STV_DEFAULT
  Michael Kerrisk
    Improve description of STV_HIDDEN
  Chris Pick
    Remove erroneous, duplicate SHN_* section
  Michael Kerrisk
 [Chris Pick]
    Reword discussion of range values a little

gai.conf.5
  Michael Kerrisk
    Add VERSIONS section

group.5
  Michael Kerrisk
    SEE ALSO: add groups(2)
    SEE ALSO: add gpasswd(1)
    SEE ALSO: add sg(1)
    SE ALSO: add gshadow(5)
    SEE ALSO: add chgrp(1)

locale.5
  Marko Myllynen [Mike Frysinger]
    tel + fax are deprecated

nsswitch.conf.5
  Nikola Forró
    Update NSS compatibility mode description

utmp.5
  Michael Kerrisk
    SEE ALSO: add lslogins(1)

aio.7
  Andreas Gruenbacher

Improve example
When aio_sigevent.sigev_notify is set to SIGEV_SIGNAL, signal
handlers called for asynchronous I/O operations will have
si->si_code set to SI_ASYNCIO. Check to make sure that
si->si_value.sival_ptr is defined.

capabilities.7
Michael Kerrisk
Explain safety check for capability-dumb binaries
Michael Kerrisk
SEE ALSO: add sg(1), su(1)
SEE ALSO: add id(1), group(5), passwd(5)

credentials.7
Michael Kerrisk
SEE ALSO: add groups(2)

environ.7
Michael Kerrisk
Describe the Bourne "NAME=value command" syntax
Michael Kerrisk
Add some details describing hos shell's environment is initialized
Michael Kerrisk
Note that child of fork(2) inherits copy of parent's environment
Michael Kerrisk
SEE ALSO: add pam_env(3)

epoll.7
Michael Kerrisk
Mention that epoll info is available via /proc/PID/fdinfo

fanotify.7
Michael Kerrisk
Refer reader to proc(5) for info on /proc/PID/fdinfo fanotify entries

feature_test_macros.7
Michael Kerrisk
Add a summary of some FTM key points
Michael Kerrisk
Give an early hint about some macros being defined by default
Michael Kerrisk
Clarify relation between _XOPEN_SOURCE >=500 and _XOPEN_SOURCE_EXTENDED
Emphasize that defining _XOPEN_SOURCE >=500 produces same

effects as defining _XOPEN_SOURCE_EXTENDED.
Michael Kerrisk
Note that man pages don't mention _XOPEN_SOURCE_EXTENDED

As per previous commit, mention of _XOPEN_SOURCE_EXTENDED
has generally been removed from the man pages.
Michael Kerrisk
Note effects of "cc -std=c99" and "cc -std=c11"
Michael Kerrisk
Clarify some _ISOC99_SOURCE / _DEFAULT_SOURCE details
Michael Kerrisk
Clarify that _XOPEN_SOURCE_EXTENDED is obsolete
Since SUSv2, _XOPEN_SOURCE_EXTENDED is no longer specified
in the standard.

inotify.7
Michael Kerrisk
Refer reader to proc(5) for info on /proc/PID/fdinfo inotify entries

ip.7
Eric Dumazet
Document IP_BIND_ADDRESS_NO_PORT socket option

mq_overview.7
Michael Kerrisk
Note that the close-on-exec flag is automatically set on MQ descriptors

namespaces.7
Michael Kerrisk
SEE ALSO: add lsns(1)
lsns(1) was recently
added in util-linux, probably to appear
in next release (2.28?).

pipe.7
Michael Kerrisk [Jason Vas Dias]
Clarify that I/O signalling requires use of both F_SETOWN and O_ASYNC
Michael Kerrisk
SEE ALSO: add mkfifo(1)

signal.7
Michael Kerrisk
Note the interactions of longjmp() and non-async-signal-safe functions
See http://austingroupbugs.net/view.php?id=516#c1195.

socket.7
Michael Kerrisk
SEE ALSO: add pcap(3)
SEE ALSO: add wireshark(1) and tcpdump(8)

standards.7
Michael Kerrisk

Add POSIX.1-2008 TC2 (POSIX.1-2016)

svipc.7
  Michael Kerrisk
    Tweak description of 'sempid'
  Michael Kerrisk
    SEE ALSO: add lsipc(1)

symlink.7
  Michael Kerrisk [Zefram]
    Some "magic" symlinks have permissions other than 0777
      See https://bugs.debian.org/743525

time.7
  Michael Kerrisk
    SEE ALSO: add timeout(1)
    SEE ALSO: add ntp_adjtime(3) and ntp_gettime(3)

unicode.7
   Dr. Tobias Quathamer
    Document private use areas
      See https://bugs.debian.org/285444

unix.7
  Heinrich Schuchardt
    Add example
      A complete example demonstrating the usage of sockets for local
      interprocess communication is added.
  Michael Kerrisk
    Introduce term "sequenced-packet" for SOCK_SEQPACKET
  Michael Kerrisk
    Some wording improvements

========== Changes in man-pages-4.06 ==========

Released: 2016-05-09, Oslo

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexander Miller <alex.miller@gmx.de>
Alon Bar-Lev <alon.barlev@gmail.com>

Benjamin Poirier <bpoirier@suse.com>
Christoph Hellwig <hch@lst.de>
Colin Ian King <colin.king@canonical.com>

Mike Frysinger <vapier@gentoo.org>
Nikola Forró <nforro@redhat.com>
Rasmus Villemoes <linux@rasmusvillemoes.dk>
Serge E. Hallyn <serge@hallyn.com>
Serge Hallyn <serge.hallyn@ubuntu.com>
Valery Reznic <valery_reznic@yahoo.com>
Zubair Lutfullah Kakakhel <Zubair.Kakakhel@imgtec.com>

Apologies if I missed anyone!

New and rewritten pages
---

cgroups.7
  Serge Hallyn, Michael Kerrisk
    New page documenting cgroups

cgroup_namespaces.7
  Michael Kerrisk [Serge Hallyn]
    New page describing cgroup namespaces

Newly documented interfaces in existing pages
---

clone.2
  Michael Kerrisk
    Document CLONE_NEWCGROUP

readv.2
  Christoph Hellwig
    Document preadv2() and pwritev2()
setns.2
   Michael Kerrisk
    Document CLONE_NEWCGROUP

unshare.2
  Michael Kerrisk
    Document CLONE_NEWCGROUP

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk [Rasmus Villemoes]
    Note that coarse clocks need architecture and VDSO support

clone.2
fork.2
  Nikola Forró
    Document ERESTARTNOINTR error code

clone.2
  Michael Kerrisk [Colin Ian King]
    ERRORS: add EINVAL for improperly aligned 'child_stack' value

execve.2
  Michael Kerrisk [Valery Reznic]
    Since Linux 2.6.28, recursive script interpretation is supported

fcntl.2
  Michael Kerrisk
    Note that mandatory locking is now governed by a configuration option

fsync.2
  Michael Kerrisk [Georg Sauthoff]
    Give some examples of files where sync can fail with EINVAL

getrlimit.2
  Michael Kerrisk
    SEE ALSO: add cgroups(7)

ioctl_fat.2
  Heinrich Schuchardt
    Use %04x to print volume ID
      Leading zeroes
 should be used when display a FAT volume ID.

ioprio_set.2
  Michael Kerrisk
    SEE ALSO: add cgroups(7)

lseek.2
  Michael Kerrisk
    Note that 'off_t' is an integer data type defined by POSIX

memfd_create.2
  Michael Kerrisk
    Note that memfd_create() does not have a glibc wrapper

mount.2
  Michael Kerrisk
    MS_MANDLOCK requires CAP_SYS_ADMIN (since Linux 4.5)

quotactl.2
  Michael Kerrisk
    Document Q_GETNEXTQUOTA and Q_XGETNEXTQUOTA
  Michael Kerrisk
    Rework/reorder ERRORS list
      Make into a single alphabetically ordered list
  Michael Kerrisk
    Note kernel version that removed Q_GETSTATS
  Michael Kerrisk
    Add kernel version for G_GETINFO, Q_SETINFO, and Q_GETFMT

readv.2
  Michael Kerrisk
    Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

semctl.2
  Michael Kerrisk
    From kernel 4.6, Linux now updates 'sempid' on SETALL operations

sigaction.2
  Michael Kerrisk
     Document SEGV_BNDERR
  Michael Kerrisk
    Document SEGV_PKUERR

syscalls.2
  Michael Kerrisk
    Add preadv2() and pwritev2()

write.2
  Michael Kerrisk
    Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

makedev.3
  Mike Frysinger
    Use <sys/sysmacros.h> in SYNOPSIS

Defining these functions via <sys/types.h> causes problems for
some folk. As noted by Zack Wein:

libstdc++ force-enables _GNU_SOURCE, which means people
writing in C++ _can't_ avoid these nonstandard macros by
using a strict conformance mode.

Since glibc has basically always used <sys/sysmacros.h>,
update the docs to have people include that instead.
Michael Kerrisk
NOTES: mention that <sys/types.h> may also define these macros

popen.3
Nikola Forró
RETURN VALUE: describe successful case
Reference:
http://pubs.opengroup.org/onlinepubs/9699919799/functions/popen.html
http://pubs.opengroup.org/onlinepubs/9699919799/functions/pclose.html

strtod.3
Michael Kerrisk [Ed Avis]
Improve a detail in RETURN VALUE

core.5
Michael Kerrisk
Document /proc/sys/kernel/core_pipe_limit

locale.5
Marko Myllynen
Adjust LC_IDENTIFICATION / abbreviation
Tiny tweak to locale.5 based on ISO/IEC TR 14652:

http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf
Marko Myllynen
Update LC_ADDRESS after glibc change
This patch updates locale.5 to match the recent glibc change
in commit a837257199ffab76237385b830cc7b6179fc2f18
Marko Myllynen
Complete LC_COLLATE
Here's the first attempt to (almost) complete the locale.5 manual
page by documenting all (but perhaps one) of the missing
LC_COLLATE keywords.
Mike Frysinger
country_car: Add a better description

nsswitch.conf.5

Marko Myllynen
Document group merging
Document the recently merged glibc group merge support.
Glibc commit ced8f8933673f4efda1d666d26a1a949602035ed
https://sourceware.org/glibc/wiki/Proposals/GroupMerging

proc.5
Michael Kerrisk
Move /proc/PID/cgroup discussion to cgroups(7) page
Michael Kerrisk
Add some background on why /proc/PID/mountinfo was added
Michael Kerrisk
Improve description of /proc/PID/mountinfo 'root' field
Michael Kerrisk
Add pointer to cgroups(7) for documentation of /proc/cgroups
Michael Kerrisk
Add reference to core(5) for info on /proc/sys/kernel/core_pipe_limit

cpuset.7
Michael Kerrisk
SEE ALSO: add cgroups(7)

ip.7
Benjamin Poirier
Fix incorrect sockopt name
"IP_LEAVE_GROUP" does not exist. It was perhaps a confusion with
MCAST_LEAVE_GROUP. Change the text to IP_DROP_MEMBERSHIP which has

the same function as MCAST_LEAVE_GROUP and is documented in the
ip.7 man page.

Reference:
Linux kernel net/ipv4/ip_sockglue.c do_ip_setsockopt()

namespaces.7
Michael Kerrisk
SEE ALSO: add cgroups(7), cgroup_namespaces(7)

vdso.7
Zubair Lutfullah Kakakhel [Mike Frysinger]
Update for MIPS
Document the symbols exported by the MIPS VDSO.
VDSO support was added from kernel 4.4 onwards.

See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/log/arch/mips/vdso
Michael Kerrisk [Rasmus Villemoes]
The __kernel_clock_* interfaces don't support *_COARSE clocks on PowerPC

ld.so.8
  Michael Kerrisk [Alon Bar-Lev]
    Document use of $ORIGIN, $LIB, and $PLATFORM in environment variables
      These strings are meaningful in LD_LIBRARY_PATH and LD_PRELOAD.

========== Changes in man-pages-4.07 ==========

Released: 2016-07-17, Ulm

New and rewritten
 pages
----

ioctl_fideduperange.2
  Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
    New page documenting the FIDEDUPERANGE ioctl
      Document the FIDEDUPERANGE ioctl, formerly known as
      BTRFS_IOC_EXTENT_SAME.

ioctl_ficlonerange.2
  Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
    New page documenting FICLONE and FICLONERANGE ioctls
      Document the FICLONE and FICLONERANGE ioctls, formerly known as
      the BTRFS_IOC_CLONE and BTRFS_IOC_CLONE_RANGE ioctls.

nextup.3
  Michael Kerrisk
    New page documenting nextup(), nextdown(), and related functions

mount_namespaces.7
  Michael Kerrisk [Michael Kerrisk]
    New page describing mount namespaces

Newly documented interfaces in existing pages
---

mount.2
  Michael Kerrisk
    Document flags used to set propagation type
      Document MS_SHARED, MS_PRIVATE, MS_SLAVE, and MS_UNBINDABLE.
   Michael Kerrisk
    Document the MS_REC flag

ptrace.2
  Michael Kerrisk [Kees Cook, Jann Horn, Eric W. Biederman, Stephen Smalley]
    Document ptrace access modes

proc.5
  Michael Kerrisk
    Document /proc/[pid]/timerslack_ns
  Michael Kerrisk
    Document /proc/PID/status 'Ngid' field
  Michael Kerrisk
    Document /proc/PID/status fields: 'NStgid', 'NSpid', 'NSpgid', 'NSsid'
  Michael Kerrisk
    Document /proc/PID/status 'Umask' field

New and changed links
---

preadv2.2
pwritev2.2
  Michael Kerrisk
    New links to readv(2)

nextdown.3
nextdownf.3
nextdownl.3
nextupf.3
nextupl.3
  Michael Kerrisk
    New links to nextup(3)

Changes to individual pages
---

ldd.1

Michael Kerrisk
Add a little more detail on why ldd is unsafe with untrusted executables
Michael Kerrisk
Add more detail on the output of ldd

localedef.1
Marko Myllynen
Drop --old-style
description
The glibc upstream decided to drop localedef(1) --old-style option [1] altogether, I think we can do the same with localedef(1), the option hasn't done anything in over 16 years and I doubt anyone uses it.

add_key.2
Mitch Walker
Empty payloads are not allowed in user-defined keys

chroot.2
Michael Kerrisk
SEE ALSO: add pivot_root(2)

clone.2
Michael Kerrisk
Add reference to mount_namespaces(7) under CLONE_NEWNS description

fork.2
Michael Kerrisk
Add ENOMEM error for PID namespace where "init" has died

futex.2
Michael Kerrisk
Correct an ENOSYS error description
Since Linux 4.5, FUTEX_CLOCK_REALTIME is allowed with FUTEX_WAIT.
Michael Kerrisk [Darren Hart]
Remove crufty text about FUTEX_WAIT_BITSET interpretation of timeout
Since Linux 4.5, FUTEX_WAIT also understands FUTEX_CLOCK_REALTIME.
Michael Kerrisk [Thomas Gleixner]
Explain how to get equivalent of FUTEX_WAIT with an absolute timeout
Michael Kerrisk
Describe FUTEX_BITSET_MATCH_ANY
Describe FUTEX_BITSET_MATCH_ANY and FUTEX_WAIT and FUTEX_WAKE equivalences.
Michael Kerrisk
Note that at least one bit must be set in mask for BITSET operations
At least one bit must be set in the 'val3' mask supplied for the

FUTEX_WAIT_BITSET and FUTEX_WAKE_BITSET operations.
Michael Kerrisk [Thomas Gleixner, Darren Hart]
Fix descriptions of various timeouts
Michael Kerrisk
Clarify clock default and choices for FUTEX_WAIT

getitimer.2
Michael Kerrisk
Substantial rewrites to various parts of the page
Michael Kerrisk [Tom Callaway]
Change license to note that page may be modified
The page as originally written carried text that said the page may be freely distributed but made no statement about modification. In the 20+ years since it was first written, the page has in fact seen repeated, sometimes substantial, modifications, and only a small portion of the original text remains. One could I suppose rewrite the last few pieces that remain from the original, but as the largest contributor to the pages existing text, I'm just going to relicense it to explicitly note that modification is permitted. (I presume the failure by the original author to grant permission to modify was simply an oversight; certainly, the large number of people who have changed the page have taken that to be the case.)

See also https://bugzilla.kernel.org/show_bug.cgi?id=118311

get_mempolicy.2
Michael Kerrisk [Jörn Engel]
Correct rounding to 'maxnodes' (bits, not bytes)
Michael Kerrisk [Jörn Engel]
Fix prototype for get_mempolicy()
In numaif.h, 'addr'
is typed as 'void *'

getpriority.2
Michael Kerrisk
Make discussion of RLIMIT_NICE more prominent
The discussion of RLIMIT_NICE was hidden under the EPERM error, where it was difficult to find. Place some relevant text in DESCRIPTION.
Michael Kerrisk
Note that getpriority()/setpriority deal with same attribute as nice(2)
Michael Kerrisk [Robin Kuzmin]
Clarify equivalence between lower nice value and higher priority

get_robust_list.2
Michael Kerrisk
get_robust_list() is governed by PTRACE_MODE_READ_REALCREDS

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_fideduperange(2) and ioctl_ficlonerange(2)

kcmp.2
  Michael Kerrisk
    kcmp() is governed by PTRACE_MODE_READ_REALCREDS
  Shawn Landden
    Note about SECURITY_YAMA
kill.2
  Michael Kerrisk [John Wiersba]
    Clarify the meaning if sig==0

lookup_dcookie.2
  Michael Kerrisk
    SEE ALSO: add oprofile(1)

mmap.2
   Michael Kerrisk [Rahul Bedarkar]
    EXAMPLE: for completeness, add munmap() and close() calls

mount.2
  Michael Kerrisk
    Restructure discussion of 'mountflags' into functional groups
      The existing text makes no differentiation between different
      "classes" of mount flags. However, certain flags such as
      MS_REMOUNT, MS_BIND, MS_MOVE, etc. determine the general
      type of operation that mount() performs. Furthermore, the
      choice of which class of operation to perform is performed in
      a certain order, and that order is significant if multiple
      flags are specified. Restructure and extend the text to
      reflect these details.
  Michael Kerrisk
    Relocate text on multimounting and mount stacking to NOTES
      The text was somewhat out of place in its previous location;
      NOTES is a better location.
  Michael Kerrisk
    Remove version numbers attached to flags
 that are modifiable on remount
      This information was simply bogus. Mea culpa.
  Michael Kerrisk
    Refer reader to mount_namespaces(7) for details on propagation types
  Michael Kerrisk
    SEE ALSO: s/namespaces(7)/mount_namespaces(7)/
  Omar Sandoval
    MS_BIND still ignores mountflags
      This is clear from the do_mount() function in the kernel as of v4.6.

Michael Kerrisk
Note the default treatment of ATIME flags during MS_REMOUNT
The behavior changed in Linux 3.17.
Michael Kerrisk
Clarify that MS_MOVE ignores remaining bits in 'mountflags'
Michael Kerrisk
Note kernel version that added MS_MOVE
Michael Kerrisk
MS_NOSUID also disables file capabilities
Michael Kerrisk
Relocate/demote/rework text on MS_MGC_VAL
The use of this constant has not been needed for 15 years now.
Michael Kerrisk
Clarify that 'source' and 'target' are pathnames, and can refer
to files
Michael Kerrisk
Update example list of filesystem types
Put more modern examples in; remove many older examples.
Michael Kerrisk
MS_LAZYTIME and MS_RELATIME can be changed on remount
Michael Kerrisk
Explicitly note that MS_DIRSYNC setting cannot be changed on remount
Michael Kerrisk
Move text describing 'data' argument higher up in page
In preparation for other reworking.
Michael Kerrisk
Since Linux 2.6.26, bind mounts can be made read-only

open.2
Eric Biggers
Refer to correct functions in description of O_TMPFILE

pciconfig_read.2
Michael Kerrisk [Tom Callaway]
Change license to note that page may be modified
Niki Rahimi, the author of this page, has agreed that it's okay
to change the license to note that the page can be modified.

See https://bugzilla.kernel.org/show_bug.cgi?id=118311

perf_event_open.2
Michael Kerrisk

If pid > 0, the operation is governed by PTRACE_MODE_READ_REALCREDS
Jann Horn
Document new perf_event_paranoid default
Keno Fischer [Vince Weaver]
Add a note that dyn_size is omitted if size == 0

The perf_output_sample_ustack in kernel/events/core.c only writes
a single 64 bit word if it can't dump the user registers. From the
current version of the man page, I would have expected two 64 bit
words (one for size, one for dyn_size). Change the man page to
make this behavior explicit.

prctl.2
  Michael Kerrisk
    Some wording improvements in timer slack description
  Michael Kerrisk
    Refer reader to discussion of /proc/[pid]/timerslack_ns
      Under discussion of PR_SET_TIMERSLACK, refer the reader to
      the /proc/[pid]/timerslack_ns file, documented in proc(5).

process_vm_readv.2
  Michael Kerrisk
    Rephrase permission rules in terms of a ptrace access mode check

ptrace.2
   Michael Kerrisk [Jann Horn]
    Update Yama ptrace_scope documentation
      Reframe the discussion in terms of PTRACE_MODE_ATTACH checks,
      and make a few other minor tweaks and additions.
  Michael Kerrisk, Jann Horn
    Note that user namespaces can be used to bypass Yama protections
  Michael Kerrisk
    Note that PTRACE_SEIZE is subject to a ptrace access mode check
  Michael Kerrisk
    Rephrase PTRACE_ATTACH permissions in terms of ptrace access mode check

quotactl.2
  Michael Kerrisk [Jacob Willoughby]
    'dqb_curspace' is in bytes, not blocks
      This error appears to have been injected into glibc
      when copying some headers from BSD.

      See https://bugs.debian.org/825548

recv.2
  Michael Kerrisk [Tom Gundersen]
    With pending 0-length datagram read() and recv() with flags == 0 differ

setfsgid.2
setfsuid.2
  Jann Horn [Michael Kerrisk]
    Fix note about errors from
 the syscall wrapper
      See sysdeps/unix/sysv/linux/i386/setfsuid.c in glibc-2.2.1.

(This code is not present in modern glibc anymore.)
Michael Kerrisk
Move glibc wrapper notes to "C library/kernel differences" subsection

sysinfo.2
Michael Kerrisk
Rewrite and update various pieces

umask.2
Michael Kerrisk
NOTES: Mention /proc/PID/status 'Umask' field

umount.2
Michael Kerrisk
SEE ALSO: add mount_namespaces(7)

unshare.2
Michael Kerrisk
Add reference to mount_namespaces(7) under CLONE_NEWNS description

utimensat.2
Michael Kerrisk [Rob Landley]
Note that the glibc wrapper disallows pathname==NULL

wait.2
Michael Kerrisk
Since Linux 4.7, __WALL is implied if child being ptraced
Michael Kerrisk
waitid() now (since Linux 4.7) also supports __WNOTHREAD/__WCLONE/__WALL

assert.3
Nikos Mavrogiannopoulos
Improved description
Removed text referring to text
not being helpful to users. Provide
the error text instead to allow the reader to determine whether it
is helpful. Recommend against using NDEBUG for programs to
exhibit deterministic behavior. Moved description ahead of
recommendations.
Michael Kerrisk
Clarify details of message printed by assert()

fmax.3
fmin.3
Michael Kerrisk
SEE ALSO: add fdim(3)

getauxval.3

Cownie, James H
Correct AT_HWCAP result description

inet_pton.3
Stefan Puiu
Mention byte order

malloc_hook.3
Michael Kerrisk
glibc 2.24 removes __malloc_initialize_hook

memmem.3
Michael Kerrisk [Shawn Landden]
Note that memmem() is present on some other systems

mkdtemp.3
mktemp.3
Michael Kerrisk
SEE ALSO: add mktemp(1)

printf.3
Michael Kerrisk [Shawn Landden]
Note support in other C libraries for %m and %n

strcasecmp.3
Michael Kerrisk [Ori Avtalion]
Make details
of strncasecmp() comparison clearer

strcat.3
Michael Kerrisk
Add a program that shows the performance characteristics of strcat()
In honor of Joel Spolksy's visit to Munich, let's start educating
Schlemiel The Painter.

strtoul.3
Michael Kerrisk
SEE ALSO: add a64l(3)

strxfrm.3
Michael Kerrisk [Florian Weimer]
Remove NOTES section
strxfrm() and strncpy() are not precisely equivalent in the
POSIX locale, so this NOTES section was not really correct.

See https://bugzilla.kernel.org/show_bug.cgi?id=104221

console_codes.4

console_ioctl.4
tty.4
vcs.4
charsets.7
  Marko Myllynen
    Remove console(4) references
      0f9e647 removed the obsolete console(4) page but we still have few
      references to it. The patch below removes them or converts to refs
      to console_ioctl(4) where appropriate.

console_ioctl.4
  Michael Kerrisk [Chris Gassib]
    The argument
 to KDGETMODE is an 'int'

lirc.4
  Alec Leamas
    Update after upstreamed lirc.h, bugfixes.

st.4
  Kai Mäkisara
    Fix description of read() when block is larger than request
  Kai Mäkisara
    Update MTMKPART for kernels >= 4.6
      Update the description of the MTMKPART operation of MTIOCTOP to match
      the changes in kernel version 4.6.

charmap.5
  Marko Myllynen
    Clarify keyword syntax
      Updates charmap(5) to match the syntax all the glibc
      charmap files are using currently.

elf.5
  Michael Kerrisk
    SEE ALSO: add readelf(1)

locale.5
  Marko Myllynen
    Document missing keywords, minor updates
  Marko Myllynen
    Clarify keyword syntax
  Marko Myllynen
    Adjust conformance

proc.5
namespaces.7
  Michael Kerrisk

Move /proc/PID/mounts information to proc(5)
There was partial duplication, and some extra information
in namespaces(7). Move everything
to proc(5).

proc.5
Michael Kerrisk
/proc/PID/fd/* are governed by PTRACE_MODE_READ_FSCREDS
Permission to dereference/readlink /proc/PID/fd/* symlinks is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/timerslack_ns is governed by PTRACE_MODE_ATTACH_FSCREDS
Permission to access /proc/PID/timerslack_ns is governed by
a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
Michael Kerrisk
Document /proc/PID/{maps,mem,pagemap} access mode checks
Permission to access /proc/PID/{maps,pagemap} is governed by a
PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Permission to access /proc/PID/mem is governed by a
PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
Michael Kerrisk
Note /proc/PID/stat fields that are governed by PTRACE_MODE_READ_FSCREDS
Michael Kerrisk
/proc/PID/{cwd,exe,root} are
governed by PTRACE_MODE_READ_FSCREDS
Permission to dereference/readlink /proc/PID/{cwd,exe,root} is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/io is governed by PTRACE_MODE_READ_FSCREDS
Permission to access /proc/PID/io is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/{personality,stack,syscall} are governed by PTRACE_MODE_ATTACH_FSCREDS
Permission to access /proc/PID/{personality,stack,syscall} is
governed by a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/{auxv,environ,wchan} are governed by PTRACE_MODE_READ_FSCREDS
Permission to access /proc/PID/{auxv,environ,wchan} is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
Move shared subtree /proc/PID/mountinfo fields to mount_namespaces(7)
Move information on shared subtree fields in /proc/PID/mountinfo
to mount_namespaces(7).
Michael Kerrisk ["Yuming Ma()"]
Note that /proc/net is now virtualized per network namespace
Michael Kerrisk
Add references to mount_namespaces(7)

repertoiremap.5
  Marko Myllynen
    Clarify keyword syntax

utmp.5
  Michael Kerrisk
    SEE ALSO: add logname(1)

capabilities.7
  Michael Kerrisk [Andy Lutomirski]
    Note on SECURE_NO_CAP_AMBIENT_RAISE for capabilities-only environment
  Michael Kerrisk
    Add a detail on use of securebits

cgroup_namespaces.7
  Michael Kerrisk
    SEE ALSO: add namespaces(7)

cgroups.7
  Michael Kerrisk
    ERRORS: add mount(2) EBUSY error

cp1251.7
cp1252.7
iso_8859-1.7
iso_8859-15.7
iso_8859-5.7
koi8-r.7
koi8-u.7
  Marko Myllynen
    Add some charset references
      Add some references to related charsets here and there.

credentials.7
  Michael Kerrisk

   SEE ALSO: add runuser(1)
    SEE ALSO: add newgrp(1)
    SEE ALSO: add sudo(8)

feature_test_macros.7
  Michael Kerrisk
    Emphasize that applications should not directly include <features.h>

man-pages.7
  Michael Kerrisk
    Clarify which sections man-pages provides man pages for

Michael Kerrisk [Josh Triplett]
Add a few more details on formatting conventions
Add some more details for Section 1 and 8 formatting.
Separate out formatting discussion into commands, functions,
and "general".

namespaces.7
Michael Kerrisk
/proc/PID/ns/* are governed by PTRACE_MODE_READ_FSCREDS
Permission to dereference/readlink /proc/PID/ns/* symlinks is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
Nowadays, file changes in /proc/PID/mounts are notified differently
Exceptional condition for select(), (E)POLLPRI for (e)poll
Michael Kerrisk
Remove /proc/PID/mountstats description
This is a duplicate of information in proc(5).
Michael Kerrisk
Refer to new mount_namespaces(7) for information on mount namespaces

netlink.7
Andrey Vagin
Describe netlink socket options
Michael Kerrisk
Rework version information
(No changes in technical details.)

pid_namespaces.7
Michael Kerrisk
SEE ALSO: add namespaces(7)

unix.7
Michael Kerrisk
Move discussion on pathname socket permissions to DESCRIPTION
Michael Kerrisk
Expand discussion of socket permissions
Michael Kerrisk
Fix statement about permissions needed to connect to a UNIX domain socket
Read permission is not required (verified by experiment).
Michael Kerrisk
Clarify ownership and permissions assigned during socket creation
Michael Kerrisk [Carsten Grohmann]
Update text on socket permissions on other systems
At least
some of the modern BSDs seem to check for write
permission on a socket. (I tested OpenBSD 5.9.) On Solaris 10,
some light testing suggested that write permission is still
not checked on that system.

Michael Kerrisk
Note that umask / permissions have no effect for abstract sockets
W. Trevor King
Fix example code: 'ret' check after accept populates 'data_socket'
Michael Kerrisk
Move some abstract socket details to a separate subsection
Michael Kerrisk
Note that abstract sockets automatically disappear when FDs are closed

user_namespaces.7
Michael Kerrisk [Micha Zegan]
Clarify meaning of privilege in a user namespace
Having privilege in a user NS only allows privileged
operations on resources governed by that user NS. Many
privileged operations relate to resources that have no
association with any namespace type, and only processes

with privilege in the initial user NS can perform those
operations.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk [Micha Zegan]
List the mount operations permitted by CAP_SYS_ADMIN
List the mount operations permitted by CAP_SYS_ADMIN in a
noninitial userns.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk [Micha Zegan]
CAP_SYS_ADMIN allows mounting cgroup filesystems
See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk
Clarify details of CAP_SYS_ADMIN and cgroup v1 mounts
With respect to cgroups version 1, CAP_SYS_ADMIN in the user
namespace allows only *named* hierarchies to be mounted (and
not hierarchies that have a controller).
Michael Kerrisk
Clarify CAP_SYS_ADMIN details for mounting FS_USERNS_MOUNT filesystems
Michael Kerrisk
Correct user namespace
rules for mounting /proc
Michael Kerrisk
Describe a concrete example of capability checking
Add a concrete example of how the kernel checks capabilities in
an associated user namespace when a process attempts a privileged
operation.
Michael Kerrisk
Correct kernel version where XFS added support for user namespaces
Linux 3.12, not 3.11.

Michael Kerrisk
SEE ALSO: add ptrace(2)
SEE ALSO: add cgroup_namespaces(7)

utf-8.7:
Shawn Landden
Include RFC 3629 and clarify endianness which is left ambiguous
The endianness is suggested by the order the bytes are displayed,
but the text is ambiguous.

========== Changes in man-pages-4.08 ==========

Released: 2016-10-08, Munich

Apologies if I missed anyone!

New and rewritten pages
----

quotactl.2
  Eugene Syromyatnikov [Michael Kerrisk]
    Updated information regarding disk quota flags
      Added information regarding DQF_SYS_FILE flag; updated definition
      of V1_DQF_RSQUASH, which has been defined privately and defined
      publicly as DQF_ROOT_SQUASH.
  Eugene Syromyatnikov
    Updated information regarding XFS-specific quotactl subcommands
      Added information regarding
 structure definitions used for
      XFS-specific subcommands, updated flag constants, added
      information regarding ignored syscall arguments, added notes on
      usage of kernel UAPI header.
  Eugene Syromyatnikov
    Additions regarding project quotas
      Added information regarding presence of project quotas.

bswap.3
  Michael Kerrisk
    New page documenting bswap_16(), bswap_32(), and bswap_64()

cgroups.7
  Michael Kerrisk
    Substantial rewrites, additions, and corrections.

Newly documented interfaces in existing pages
---

readv.2
  Michael Kerrisk
    Document the pwritev2() RWF_SYNC and RWF_DSYNC flags

proc.5
  Michael Kerrisk
    Document /proc/PID/seccomp
  Jann Horn
    Document /proc/[pid]/task/[tid]/children
      Document the /proc/[pid]/task/[tid]/children interface from
      CRIU, and more importantly, document why it's usually not

   a good interface.

New and changed links
---

bswap_16.3
bswap_32.3
bswap_64.3
    New link to new bswap.3

Global changes

Various pages
  Michael Kerrisk
    Fix section ordering
      Various pages had sections in an order different from
      that prescribed in man-pages(7).

Various pages
  Michael Kerrisk [Mike Frysinger]
    Consistently use /proc/[pid] (not /proc/PID)

Various pages
  Michael Kerrisk
    Fix order of SEE ALSO entries
      Entries should be ordered first by section, and then alphabetically
      within the section.

Various pages
  Michael Kerrisk
    Order ERRORS alphabetically

Various pages
  Michael Kerrisk
    Remove section number from page self reference
      Fix places where pages refer to the function that they describe
      and include a section number in that reference. Such references
      cause some HTML-rendering tools to create self-references
in the
      page.

A few pages
  Michael Kerrisk
    Eliminate groff "cannot adjust line" warnings

Changes to individual pages
----

pldd.1
  Michael Kerrisk [Carlos O'Donell]
    Note gdb(1) command that can be used as a replacement for pldd
      Taken from Carlos O'Donnell's suggestion in
      https://sourceware.org/bugzilla/show_bug.cgi?id=18035#c2
  Michael Kerrisk
    BUGS: pldd has not worked since glibc 2.19

accept.2
  Michael Kerrisk
    Mention epoll(7) alongside poll()/select()
  Michael Kerrisk
    Demote discussion of DECNet to NOTES
      DECNet ceased to be important long ago...

adjtimex.2
  Nikola Forró
    Fix kernel version references

chroot.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SYS_CHROOT

clone.2
  Keno Fischer [Josh Triplett]
    Adjust syscall prototype and expand CLONE_SETTLS description
  Michael Kerrisk [Josh Triplett,

Josh Triplett]
    Document raw syscall interfaces on various other architectures
  Michael Kerrisk
    Change types for 'ptid' and 'ctid' in syscall prototypes
      These types changed from 'void *' to 'int *' back in Linux 3.8.
  Michael Kerrisk
    EINVAL is generated by glibc wrapper for NULL 'fn' or 'child_stack'
      Clarify that this error is produced by the wrapper function, not
      the underlying system call. In particular, the point is that the
      raw system call can accommodate a NULL pointer for 'child_stack'.
  Michael Kerrisk [Elliott Hughes]
    Make the implications of CLONE_FILES more explicit
      If CLONE_FILES is not set, the duplicated FDs nevertheless share
      file offset and status flags via the open file description.
  Michael Kerrisk
    Mention kcmp() under notes

close.2
  Michael Kerrisk
    Add mention of the close-on-exec flag
  Michael Kerrisk
    Clarify discussion
 noting that close() does not flush buffer cache

epoll_wait.2
  Mike Crowe
    Clarify that the timeout is measured against CLOCK_MONOTONIC

execve.2
  Michael Kerrisk
    Mention use of 'environ' to access environment list
  Michael Kerrisk
    Note that real UID, real GID, and supplementary GIDs are unchanged

fanotify_init.2
  Heinrich Schuchardt
    Update BUGS information

fcntl.2
  Michael Kerrisk
    Note an important detail of F_SETOWN permission rules for signals
      F_SETOWN records the caller's credentials at the time of
      the fcntl() call, and it is these saved credentials that
      are used for subsequent permission checks.
  Michael Kerrisk
    Make the description of the effect of close-on-exec a little clearer
  Michael Kerrisk
    Clarify that F_GETFD and F_GETFL return flags via the function result

fork.2
  Michael Kerrisk
    PID of new process also does not match any existing session ID

fsync.2
  Michael Kerrisk
    SEE ALSO: add pwritev(2)
      Since Linux 4.7, pwritev() has flags related to I/O
      integrity completion.

getdomainname.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SYS_ADMIN

getgroups.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETGID

gethostname.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SYS_ADMIN

getrlimit.2
  Michael Kerrisk
    Note user namespace semantics for CAP_SYS_RESOURCE

getsid.2
  Michael Kerrisk
    Rework description to be somewhat clearer
  Michael Kerrisk
    Correct the definition of "session ID"

getunwind.2
  Michael Kerrisk
    Simplify text referring to vdso(7)
      The detail given here is redundant, since this info is also
      in vdso(7).

kcmp.2
  Michael Kerrisk
    Add an example program

kill.2
  Michael Kerrisk
    Note the user namespace requirement for CAP_KILL

killpg.2

Michael Kerrisk
Refer reader to kill(2) for signal permission rules

mlock.2
Sebastian Andrzej Siewior
Document that fork() after mlock() may be a bad idea in a RT process

mmap.2
Jann Horn
Describe treatment of 'offset' for MAP_ANONYMOUS
Michael Kerrisk [Siward de Groot]
Small improvement to description of MAP_SHARED
See https://sourceware.org/bugzilla/show_bug.cgi?id=6887

msgctl.2
msgget.2
msgop.2
semctl.2
semget.2
semop.2
shmctl.2
shmget.2
shmop.2
Michael Kerrisk
Note the user namespace requirements for CAP_IPC_OWNER

open.2
Michael Kerrisk
Clarify user namespace capability requirements for O_NOATIME
Michael Kerrisk
NOTES: kcmp() can be used to test if two FDs refer to the same OFD
Michael Kerrisk
F2FS support for O_TMPFILE was added in Linux 3.16
Michael Kerrisk
Clarify the rules about how the group ID of a new file is determined

prctl.2
Michael Kerrisk

Refer to proc(5) for effects of dumpability on ownership of /proc/PID/*
Michael Kerrisk
ERRORS: Add EACCES error for PR_SET_SECCOMP-SECCOMP_MODE_FILTER
Michael Kerrisk
Simplify list of cases where "dumpable" attribute is reset
Michael Kerrisk
Note user namespace requirements for PR_CAPBSET_DROP CAP_SETPCAP

readlink.2

Michael Kerrisk [Ursache Vladimir]
Make example program handle links that report a size of zero
Some "magic" symlinks created by the kernel (e.g., those under
/proc and /sys) report 'st_size' as zero. Modify the example
program to handle that possibility.
Michael Kerrisk
Emphasize that truncation of returned buffer generates no error

readv.2
Michael Kerrisk [Christoph Hellwig]
Clarify that RWF_DSYNC and RWF_SYNC apply only to data being written
Michael Kerrisk
Add preadv2() and pwritev2() to NAME line

reboot.2
Michael Kerrisk
Note user
namespace requirements around CAP_SYS_BOOT

rename.2
Michael Kerrisk [Tim Savannah]
Clarify that ERRORS may cause rename to fail (not to be nonatomic)

sched_setaffinity.2
Michael Kerrisk
Note user namespace requirements for CAP_SYS_NICE

seccomp.2
Michael Kerrisk
CAP_SYS_ADMIN is required only in caller's user namespace

select_tut.2
Peter Wu
Fix various issues in example program

seteuid.2
Michael Kerrisk
Note user namespace requirements for CAP_SETUID and CAP_SETGID

setgid.2
Michael Kerrisk
Note user namespace requirements for CAP_SETGID

setpgid.2
Michael Kerrisk
Add a reference to credentials(7)

setpgid.2

setsid.2
  Michael Kerrisk
    Relocate some text on sessions and sessions leaders
      Some text that was in setpgid(2) is better placed in setsid(2).

setresuid.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETUID

setreuid.2
  Michael Kerrisk

   Note user namespace requirements for CAP_SETUID and CAP_SETGID

setsid.2
  Michael Kerrisk
    Refer to credentials(7) for details for details on controlling terminal
      Refer to credentials(7) for details of how a session obtains
      a controlling terminal.

set_thread_area.2
  Michael Kerrisk
    Add get_thread_area() to NAME

setuid.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETUID

sigprocmask.2
  Keno Fischer
    Expand/clarify libc/kernel sigset_t difference

stat.2
  Michael Kerrisk [Ursache Vladimir, Mats Wichmann]
    Improve discussion of 'st_size' for /proc and /sys files
  Michael Kerrisk
    _BSD_SOURCE and _SVID_SOURCE no longer expose nanosecond timestamps

umask.2
  Michael Kerrisk
    Provide a rationale for the existence of /proc/PID/status 'Umask' field

wait.2
  Michael Kerrisk
    Remove erroneous statement that waitpid() is implemented via wait4()
      There is a fallback
 to wait4(), but only if the kernel does
      not provide a waitpid() system call.

bindresvport.3
rcmd.3
ip.7
  Michael Kerrisk
    Note user namespace requirements for CAP_NET_BIND_SERVICE

byteorder.3
  Michael Kerrisk
    SEE ALSO: add bswap(3)

dlopen.3
  Michael Kerrisk
    dlmopen() is still broken in glibc 2.24

endian.3
  Michael Kerrisk
    SEE ALSO: add bswap(3)

ffs.3
  Michael Kerrisk [Stefan Tauner]
    Correct feature test macro requirements

fmemopen.3
  Michael Kerrisk [Rich Felker]
    Remove bogus suggestion to use setbuffer()

getlogin.3
  Michael Kerrisk
    Update feature test macro requirements for cuserid()

getumask.3
  Michael Kerrisk
    Note that getumask() is still unavailable in glibc 2.24
  Michael Kerrisk
    Point to umask(2) for a thread-safe way to discover process's umask

mkstemp.3
  Quentin Rameau
    Fix _POSIX_C_SOURCE value for mkstemp()
      The correct _POSIX_C_SOURCE
 value has always been 200809L,
      not 200112L.

pthread_join.3
  Michael Kerrisk [Mats Wichmann]
    Note that the caller might do clean up after joining with a thread
  Michael Kerrisk []

Clarify use of 'retval' pointer

resolver.3
Ray Bellis
Correct arguments to res_ninit(res_state statep)

strverscmp.3
Michael Kerrisk
Add an example program

wcstombs.3
Michael Kerrisk [Igor Liferenko]
wcsrtombs() does not provide thread-safe interface to same functionality
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360

core.5
Mike Frysinger [Michael Kerrisk]
Add more details for output paths and the crash handler
People sometimes assume that the crash handler runs in the same
context as the crashing process. They would be incorrect :).

proc.5
Mike Frysinger
Clarify the root symlink and mount namespaces
If the target process is in a different
mount namespace, the root
symlink actually shows that view of the filesystem.
Michael Kerrisk [Mike Frysinger]
Expand discussion of /proc/[pid]/root
Add a shell example showing that /proc/[pid]/root is more
than a symlink. Based on an example provided by Mike Frysinger
in an earlier commit message.
Michael Kerrisk
Explain rules determining ownership of /proc/PID/* files
Describe the effect of the "dumpable" attribute on ownership
of /proc/PID files.
Michael Kerrisk
Note effect of 'suid_dumpable' on ownership of /proc/PID files
Michael Kerrisk
Refer to ptrace(2) for info on effect of suid_dumpable on ptraceability
Michael Kerrisk
Add reference to core(5) in discussion of 'suid_dumpable'
Michael Kerrisk
Note that 'suid_dumpable' mode 1 is insecure
Michael Kerrisk
Document /proc/meminfo '+ShmemHugePages' and 'ShmemPmdMapped' fields

Michael Kerrisk
Document /proc/PID/status 'RssAnon', 'RssFile', and 'RssShmem' fields
Michael Kerrisk
Document /proc/PID/status 'HugetlbPages' field
Michael Kerrisk [Zefram]
Clarify that /proc/PID/statm 'shared' field counts *resident* pages
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360
Michael Kerrisk
Add reference to umask(2) in discussion of /proc/PID/status 'Umask'
Michael Kerrisk
Clarify user namespace requirements for /proc/sys/fs/protected_hardlinks
Michael Kerrisk
Note changes to config option governing /proc/[pid]/task/[tid]/children
Michael Kerrisk
Clarify description of /proc/PID/statm 'lib' and 'dt' fields
These fields are always zero since Linux 2.6.
Namhyung Kim [Petr Cermak]
Add description of CLEAR_REFS_MM_HIWATER_RSS
Michael Kerrisk
Update example VM values in /proc/PID/status

capabilities.7
Michael Kerrisk
Add
note about nosuid to file capabilities section
Michael Kerrisk
SEE ALSO: add proc(5)
Michael Kerrisk
SEE ALSO: add setsid(2) and setpgid(2)

glob.7
Michael Kerrisk [Arnaud Gaillard]
Clarify that syntactically incorrect patterns are left unchanged

packet.7
Michael Kerrisk
Clarify user namespace requirements for CAP_NET_RAW

pipe.7
Michael Kerrisk [Patrick McLean]
Document FIONREAD

raw.7
Michael Kerrisk
Clarify user namespace requirements for CAP_NET_RAW
Also remove mention of UID 0 as a method or creating
a raw socket. As far as I can tell from reading the
kernel source (net/ipv4/af_inet.c), this is not true.

socket.7
  Michael Kerrisk
    SIOCSPGRP: refer to fcntl(2) F_SETOWN for correct permission rules
      The permission rules described for SIOCCPGRP are wrong. Rather
      than repeat the rules here, just refer the reader to fcntl(2),
      where
 the rules are described for F_SETOWN.

unix.7
  Michael Kerrisk [Laurent Georget, Ivan Kharpalev]
    Remove mention of recvmsg() from discussion of EPIPE error
      See https://bugzilla.kernel.org/show_bug.cgi?id=137351

ld.so.8
  Michael Kerrisk
    Expand description of LD_DEBUG
      Provide a list of the categories, and note that multiple
      categories can be specified.
  Michael Kerrisk
    Add glibc version for LD_USE_LOAD_BIAS
  Michael Kerrisk
    Clarify text describing whether secure-mode programs preload libraries
  Michael Kerrisk
    Remove discussion of environment variables understood by libc5
      libc5 disappeared long ago, so cease cluttering up this page
      with those ancient details. Thus, remove discussion of the
      following environment variables: LD_AOUT_LIBRARY_PATH,
      LD_AOUT_PRELOAD, LD_KEEPDIR, LD_NOWARN, and LDD_ARGV0.
  Michael Kerrisk
    Remove text with ancient
 libc4 and Linux libc details
  Michael Kerrisk
    Remove mention of "ELF only"
      Drawing a distinction between ELF-only features versus a,out
      ceased to be relevant long ago, so cluttering the page
      with "ELF-only" serves no purpose.

========== Changes in man-pages-4.09 ==========

Released: 2016-12-12, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

pkey_alloc.2
  Dave Hansen [Michael Kerrisk]
    New page documenting pkey_alloc(2) and pkey_free(2)

pthread_getattr_default_np.3
  Michael Kerrisk
    New page documenting pthread_getattr_default_np(3) and pthread_setattr_default_np(3)

strfromd.3
  Wainer dos Santos Moschetta
    New page documenting strfromd(3), strfromf(3), and strfroml(3)
      The ISO/IEC TS 18661-1 specifies the strfrom() class
      of functions that convert a float-point value to string.

fuse.4
  Keno Fischer [Michael Kerrisk]
    New page describing /dev/fuse
      This is my writeup of a basic description of /dev/fuse after
      playing with it for a few hours today. It is of course
 woefully
      incomplete, and since I neither have a use case nor am working
      on this code, I will not be in a position to expand it in the
      near future. However, I'm hoping this could still serve as a
      handy reference for others looking at this interface.

      [mtk: Notwithstanding the incompleteness of this page,
      it's a good base for future extension.]

tmpfs.5
  Michael Kerrisk
    New page documenting the tmpfs filesystem

pkeys.7
  Dave Hansen [Michael Kerrisk]
    New page with overview of Memory Protection Keys

random.7
  Michael Kerrisk [Theodore Ts'o, Nikos Mavrogiannopoulos, Laurent Georget]
    New page providing an overview of interfaces for obtaining randomness
      Contains material extracted from getrandom(2) and random(4),

as well as new material.

sock_diag.7
Pavel Emelyanov, Dmitry V. Levin
New page documenting NETLINK_SOCK_DIAG interface

close.2
getpriority.2
nice.2
timer_create.2
timerfd_create.2
random.4
elf.5
proc.5
sched.7
Various authors
These pages also saw substantial updates, as described under
"Changes to individual pages".

Newly documented interfaces in existing pages
---

mmap.2
Michael Kerrisk
Add (much) more detail on MAP_GROWSDOWN

mprotect.2
Dave Hansen
Document the new pkey_mprotect() system call
Eugene Syromyatnikov
Document PROT_SEM, PROT_SAO, PROT_GROWSUP, and PROT_GROWSDOWN

prctl.2
Eugene Syromyatnikov
Document PR_SET_FP_MODE and PR_GET_FP_MODE

perf_event_open.2
Vince Weaver
PERF_RECORD_SWITCH support
Linux 4.3 introduced two new record types for recording context
switches: PERF_RECORD_SWITCH and PERF_RECORD_SWITCH_CPU_WIDE.
Vince Weaver
Add PERF_SAMPLE_BRANCH_CALL branch sample type
Vince Weaver
PERF_SAMPLE_BRANCH_IND_JUMP branch_sample_type
Linux 4.2 added a new branch_sample_type: PERF_SAMPLE_BRANCH_IND_JUMP
Vince Weaver

Document PERF_RECORD_MISC_PROC_MAP_PARSE_TIMEOUT
Vince Weaver
Document sample_max_stack and /proc/sys/kernel/perf_event_max_stack
Linux 4.8 added a new sample_max_stack parameter, as well as
/proc/sys/kernel/perf_event_max_stack which limits it and a new
EOVERFLOW error return.
Dave Hansen
PERF_RECORD_LOST_SAMPLES record type
Linux 4.2 added a new record type: PERF_RECORD_LOST_SAMPLES
It is generated when hardware samples (currently only Intel PEBS)
are lost.

ptrace.2
Michael Kerrisk
Document PTRACE_SECCOMP_GET_FILTER
Michael Kerrisk
Document PTRACE_GET_THREAD_AREA and PTRACE_SET_THREAD_AREA

namespaces.7
Michael Kerrisk [Eric W. Biederman]
Document the NS_GET_USERNS and NS_GET_PARENT ioctl() operations

sched.7
Michael Kerrisk [Mike Galbraith]
Document the autogroup feature
Includes documenting autogroup nice value
Michael Kerrisk
Autogrouping breaks traditional semantics of nice in many cases
When autogrouping is enabled (the default in many distros)
there are many traditional use cases where the nice value
ceases to have any effect.
Michael Kerrisk
Add a subsection on nice value and group scheduling

New and changed links
---

killpg.2
Michael Kerrisk
New link to relocated killpg(3) page

pkey_free.2
Michael Kerrisk
New link to new pkey_alloc(2) page

pkey_mprotect.2
Michael Kerrisk

New link to mprotect(2)

pthread_setattr_default_np.3
  Michael Kerrisk
    New link to new pthread_getattr_default_np.3

strfromf.3
  Wainer dos Santos Moschetta
    New link to strfromd(3)

strfroml.3
  Wainer dos Santos Moschetta
    New link to strfromd(3)

Global changes

Various
 pages
  Michael Kerrisk
    Remove ancient libc4 and libc5 details
      It's nearly 20 years now since Linux libc went away.
      Remove some ancient details from the pages.

Various pages
  Michael Kerrisk
    Add cross references to new tmpfs(5) page

Various pages
  Michael Kerrisk
    Change section number from 2 to 3 in killpg() references

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Remove editorializing comments about 'socklen_t'
  Michael Kerrisk
    Simplify the discussion of 'socklen_t'
      We don't really need to list the old OSes in this discussion.

adjtimex.2
clock_getres.2
gettimeofday.2
  Michael Kerrisk

SEE ALSO: add hwclock(8)

bind.2
connect.2
getpeername.2
getsockname.2
getsockopt.2
  Michael Kerrisk
    Replace discussion of 'socklen_t' with reference to accept(2)
      The discussion of 'socklen_t' editorializes and is repeated

   across several pages. Replace it with a reference to accept(2),
      where some details about this type are provided.

chmod.2
  Michael Kerrisk
    SEE ALSO: add chmod(1)

chown.2
  Michael Kerrisk
    SEE ALSO: add chgrp(1) and chown(1)

chroot.2
  Michael Kerrisk
    SEE ALSO: add chroot(1)

clone.2
  Michael Kerrisk
    The CLONE_*_SETTID operations store TID before return to user space
      CLONE_PARENT_SETTID and CLONE_CHILD_SETTID store the new
      TID before clone() returns to user space

close.2
  Michael Kerrisk [Daniel Wagner]
    Rework and greatly extend discussion of error handling
      Further clarify that an error return should be used only
      for diagnostic or remedial purposes.
  Michael Kerrisk
    Other UNIX implementations also close the FD, even if reporting an error
      Looking at some historical source code suggests
      that the "close() always closes regardless of error
 return"
      behavior has a long history, predating even POSIX.1-1990.
  Michael Kerrisk
    Note that future POSIX plans to require that the FD is closed on error
      See http://austingroupbugs.net/view.php?id=529#c1200.
  Michael Kerrisk
    Clarify the variation in EINTR behavior per POSIX and other systems

fallocate.2
  Darrick J. Wong
    Document behavior with shared blocks
      Note that FALLOC_FL_UNSHARE may use CoW to unshare blocks to
      guarantee that a disk write won't fail with ENOSPC.

fanotify_mark.2
  Heinrich Schuchardt
    Mention FAN_Q_OVERFLOW
      To receive overflow events it is necessary to set this bit
      in fanotify_mark().

fcntl.2
  Michael Kerrisk
    F_GETPIPE_SZ allocates next power-of-2 multiple of requested size
      Add some detail about current implementation, since this helps
      the user understand the effect of the user pipe limits added in
      Linux
 4.5 (described in pipe(7)).
  Michael Kerrisk
    Add EPERM that occurs for F_SETPIPE_SZ when user pipe limit is reached

fideduperange.2
  Darrick J. Wong [Omar Sandoval]
    Fix the discussion of maximum sizes
      Fix the discussion of the limitations on the dest_count and
      src_length parameters to the fideduperange ioctl() to reflect
      what's actually in the kernel.

fsync.2
  Michael Kerrisk
    SEE ALSO: add fileno(3)
      fileno(3) is useful if one is combining fflush(3)/fclose(3)
      and fsync(2).
  Michael Kerrisk
    SEE ALSO: add fflush(3)

getgroups.2
  Andrew Clayton
    FTM requirements fix for setgroups(2)

gethostname.2
  Michael Kerrisk
    SEE ALSO: add hostname(1)

get_mempolicy.2
  Michael Kerrisk

Note that 'addr' must be NULL when 'flags' is 0

getpriority.2
  Michael Kerrisk
    Warn that autogrouping voids the effect of 'nice' in many cases
      Refer the reader
 to sched(7) for the details.
  Michael Kerrisk
    Expand discussion of getpriority() return value
  Michael Kerrisk
    The nice value supplied to setpriority() is clamped
      Note that the nice value supplied to setpriority() is clamped
      to the permitted range.
  Michael Kerrisk
    Improve description of setpriority() return value

getpriority.2
sched.7
  Michael Kerrisk
    Move nice value details from getpriority(2) to sched(7)
      Centralizing these details in sched(7) is more logical.

getrandom.2
random.4
  Michael Kerrisk
    Consolidate and improve discussion on usage of randomness
      Currently, recommendations on how to consume randomness are
      spread across both getrandom(2) and random(4) and the general
      opinion seems to be that the text in getrandom(2) does a
      somewhat better job. Consolidate the discussion to a single
      page (getrandom(2)) and address some of the
 concerns
      expressed about the existing text in random(4).
      [Some of this text ultimately made its way into the new
      random(7) page.]

getrandom.2
  Michael Kerrisk
    Remove material incorporated into random(7)
  Michael Kerrisk
    Note advantages of fact that getrandom() doesn't use file descriptors
  Michael Kerrisk
    Clarify that getrandom() is not "reading" from /dev/{random,urandom}

getrlimit.2
  Michael Kerrisk
    Refer to sched(7) in discussion of RLIMIT_RTPRIO and RLIMIT_RTTIME
  Michael Kerrisk

Describe the range of the RLIMIT_NICE limit
Michael Kerrisk
Refer to sched(7) in the discussion of RLIMIT_NICE
Michael Kerrisk
SEE ALSO: add credentials(7)

ioctl_ficlonerange.2
ioctl_fideduperange.2
Darrick J. Wong
Clarify the behavior of the FIDEDUPERANGE ioctl

kill.2
Michael Kerrisk
SEE ALSO: add kill(1)

mbind.2
Michael Kerrisk [Christoph Lameter]

Memory policy is a per-thread attribute, not a per-process attribute

mbind.2
set_mempolicy.2
Piotr Kwapulinski [Christoph Lameter, Michael Kerrisk]
Add MPOL_LOCAL NUMA memory policy documentation

mount.2
Michael Kerrisk
SEE ALSO: add mountpoint(1)

mprotect.2
Michael Kerrisk
CONFORMING TO: note that pkey_mprotect() is Linux-specific

nice.2
Michael Kerrisk
Warn that autogrouping voids the effect of 'nice' in many cases
Michael Kerrisk
CONFORMING TO: Remove an ancient SVr4 detail on errno values
Michael Kerrisk
Rework discussion of nice() return value and standards conformance
Make the text a little clearer. In particular, clarify that the
raw system call (still) returns 0 on success.
Michael Kerrisk
Clarify the range of the nice value, and note that it is clamped
Michael Kerrisk
Add mention of RLIMIT_NICE
Michael Kerrisk
Move discussion of handling the

-1 success return to RETURN VALUE
        This detail was rather hidden in NOTES. Also, rework the text
        a little.
  Michael Kerrisk
    Clarify that nice() changes the nice value of the calling *thread*
  Michael Kerrisk
    Add "C library/kernel differences" subsection heading
  Michael Kerrisk
    Add reference to sched(7) for further details on the nice value

open.2
  Michael Kerrisk
    ubifs supports O_TMPFILE starting with Linux 4.9
  Michael Kerrisk
    Document ENOMEM that occurs when opening FIFO because of pipe hard limit

perf_event_open.2
  Vince Weaver
    Add cycles field in LBR records
      Linux 4.3 added a cycles field to the PERF_SAMPLE_BRANCH_STACK
      last branch records.
  Vince Weaver
    Update time_shift sample code
      Linux 4.3 improved the accuracy of the clock/ns conversion routines.
  Michael Kerrisk
    Clarify the use of signals for capturing overflow events

pipe.2
   Michael Kerrisk
    Add ENFILE error for user pipe hard limit reached

prctl.2
  Eugene Syromyatnikov
    Some additional details regarding the PR_GET_UNALIGNED operation
  Eugene Syromyatnikov
    Note the output buffer size for PR_GET_TID_ADDRESS operation on x32/n32
  Michael Kerrisk
    Remove numeric definitions of PR_FP_MODE_FR and PR_FP_MODE_FRE bits

ptrace.2
  Keno Fischer
    Document the behavior of PTRACE_SYSEMU stops
  Keno Fischer
    Expand documentation PTRACE_EVENT_SECCOMP traps
      In Linux 4.8, the order of PTRACE_EVENT_SECCOMP and
      syscall-entry-stops was reversed. Document both behaviors and
      their interaction with the various forms of restart.

quotactl.2
  Eugene Syromyatnikov
    Describe Q_XQUOTASYNC, which is present but no-op in recent kernels

reboot.2
  Wang Long
    Note errors for invalid commands inside a PID namespace

sched_setattr.2
  Michael Kerrisk
    Fix cross reference
 for further info on the nice value
      The information moved from getpriority(2) to sched(7).

sched_setscheduler.2
  Michael Kerrisk [Daniel Berrange]
    Mention SCHED_DEADLINE
      Give the reader a clue that there is another policy
      available that can't be set via sched_setscheduler(2).

seccomp.2
  Jann Horn
    Document changed interaction with ptrace
      Before kernel 4.8, the seccomp check will not be run again
      after the tracer is notified. Fixed in kernel 4.9.
  Michael Kerrisk
    NOTES: mention ptrace(PTRACE_SECCOMP_GET_FILTER) to dump seccomp filters

set_mempolicy.2
  Michael Kerrisk
    Reformat list of modes

setsid.2
  Michael Kerrisk
    Improve wording of text on calling setsid() after fork()+_exit()
  Michael Kerrisk
    SEE ALSO: add sched(7)
      List sched(7), because setsid(2) is part of the machinery
      of autogrouping.

sigaction.2
  Dave Hansen

 Further documentation of SEGV_PKUERR

signalfd.2
  Michael Kerrisk
    Document ssi_addr_lsb field of signalfd_siginfo

symlink.2
  Michael Kerrisk
    SEE ALSO: add namei(1)

sync_file_range.2
  Michael Kerrisk
    Fix description for ESPIPE error
      A file descriptor can't refer to a symbolic link.

syscalls.2
  Michael Kerrisk
    Add pkey_alloc(), pkey_free(), and pkey_mprotect()
      New system calls in Linux 4.9.
  Michael Kerrisk
    Add ppc_swapcontext(2)

timer_create.2
  Michael Kerrisk
    Document CLOCK_BOOTTIME
  Michael Kerrisk
    Document CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

timerfd_create.2
  Michael Kerrisk
    Document CLOCK_BOOTTIME, CLOCK_REALTIME_ALARM, and CLOCK_BOOTTIME_ALARM
  Michael Kerrisk
    Document TFD_TIMER_CANCEL_ON_SET
  Michael Kerrisk
    Rework discussion on relative and absolute timers

unlink.2
  Michael Kerrisk
    SEE ALSO: add unlink(2)

utime.2
utimensat.2
   Michael Kerrisk
    SEE ALSO: add touch(1)

wait.2
  Michael Kerrisk
    On some architectures, waitpid() is a wrapper that calls wait4().

atof.3
  Wainer dos Santos Moschetta
    SEE ALSO: add strfromd(3)

ctime.3
  Michael Kerrisk
    Add ERRORS section
  Michael Kerrisk
    RETURN VALUE: describe return values more explicitly

errno.3
  Michael Kerrisk [Igor Liferenko]
    Add glibc error text for EILSEQ

fclose.3
fflush.3
  Michael Kerrisk
    SEE ALSO: add fileno(2)

getlogin.3
  Michael Kerrisk
    Remove deprecated _REENTRANT from FTM requirements for getlogin_r()
  Michael Kerrisk
    SEE ALSO: add logname(1)

isalpha.3
  Michael Kerrisk
    Note circumstances where 'c' must be cast to 'unsigned char'

killpg.3
  Michael Kerrisk
    Move killpg.2 from section to section 3

mallopt.3
  Michael Kerrisk [Siddhesh Poyarekar]
    Document 0 as default value of M_ARENA_MAX and explain its meaning
  Michael
 Kerrisk
    Improve description of M_ARENA_TEST
  Michael Kerrisk
    Document default value for M_ARENA_TEST
  Michael Kerrisk
    Note default value of M_PERTURB

mbsnrtowcs.3
  Michael Kerrisk [Igor Liferenko]
    Note behavior of mbsnrtowcs() for an incomplete character
      Note the behavior of mbsnrtowcs() when an incomplete character
      is found at end of the input buffer.

mbstowcs.3
wcstombs.3

Michael Kerrisk [Igor Liferenko]
Improve language relating to "initial state"
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=839705

mbstowcs.3
Michael Kerrisk [Igor Liferenko]
Add missing include to example program
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=845172

mq_close.3
Michael Kerrisk
DESCRIPTION: add reference to mq_notify(3)

mq_open.3
Eugene Syromyatnikov
Clarification regarding usage of mq_flags attribute in mq_open()

mq_receive.3
mq_send.3
Eugene Syromyatnikov
Clarification regarding reasons behind EBADF

printf.3
Wainer dos Santos Moschetta
SEE ALSO: add strfromd(3)

pthread_attr_init.3
Michael Kerrisk
SEE ALSO: add pthread_setattr_default_np(3)

pthread_create.3
Michael Kerrisk
SEE ALSO: add pthread_setattr_default_np(3)

ptsname.3
Michael Kerrisk
Note that ptsname_r() is proposed for future inclusion in POSIX.1
Michael Kerrisk
CONFORMING TO:: clarify that only ptsname() is standardized (so far)

remainder.3
Michael Kerrisk
Note fix to remainder(nan(""), 0) handling
The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6779
has been fixed in glibc 2.15.
Michael Kerrisk
Document fixes for EDOM handling for range errors
The bug http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783

was fixed in glibc 2.15.

setjmp.3
  Michael Kerrisk
    _BSD_SOURCE must be *explicitly*
 defined to get BSD setjmp() semantics

strtod.3
  Wainer dos Santos Moschetta
    SEE ALSO: add strfromd(3)

tgamma.3
  Michael Kerrisk
    Document fixes to give ERANGE for underflow range error
      The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6810
      was fixed in glibc 2.19.

timegm.3
  Michael Kerrisk
    Add ERRORS section
  Michael Kerrisk [Vincent Lefevre]
    Add RETURN VALUE section

tmpnam.3
  Michael Kerrisk
    Properly document tmpnam_r(3)

toupper.3
  Michael Kerrisk
    Note circumstances where 'c' must be cast to 'unsigned char'

ttyname.3
  Michael Kerrisk
    SEE ALSO: add tty(1)

console_ioctl.4
  Michael Kerrisk
    Add brief descriptive text for KDGKBMODE modes
  Miroslav Koskar
    Add K_OFF keyboard mode

random.4
  Michael Kerrisk
    Add reference to new random(7) page
  Michael Kerrisk
    Rework formatting of /proc interfaces
      Make the information

easier to parse by formatting the file
descriptions as hanging lists. No significant content changes.
Nikos Mavrogiannopoulos [Laurent Georget]
Provide a more accurate description of /dev/urandom
This documents the "property" of /dev/urandom of being able to
serve numbers prior to pool being initialized, and removes any
suggested usages of /dev/random which are disputable
(i.e., one-time pad). Document the fact /dev/random is only
suitable for applications which can afford indeterminate delays
since very few applications can do so. Smooth the alarming
language about a theoretical attack, and mention that its
security depends on the cryptographic primitives used by the
kernel, as well as the total entropy gathered.
Michael Kerrisk [Laurent Georget, Theodore Ts'o]
Improve discussion of /dev/urandom, blocking reads, and signals
The
text currently states that O_NONBLOCK has no effect for
/dev/urandom, which is true. It also says that reads from
/dev/urandom are nonblocking. This is at the least confusing.
If one attempts large reads (say 10MB) from /dev/urandom
there is an appreciable delay, and interruption by a signal
handler will result in a short read. Amend the text to
reflect this.

elf.5
Mike Frysinger
Add subsection headers at major points
The current pages dumps all the content into one big DESCRIPTION
with no real visual break up between logically independent
sections. Add some subsection headers to make it easier to
read and scan.
Mike Frysinger
Document notes
Document the Elf{32,64}_Nhdr structure, the sections/segments that
contain notes, and how to interpret them. I've been lazy and only
included the GNU extensions here,
especially as others are not
defined in the elf.h header file as shipped by glibc.

filesystems.5
Michael Kerrisk
SEE ALSO: add fuse(4)

proc.5
Dave Hansen
Describe new ProtectionKey 'smaps' field
Michael Kerrisk
Add example ProtectionKey output for 'smaps' file

Michael Kerrisk
Add pointers to sched(7) for autogroup files
sched(7) describes /proc/sys/kernel/sched_autogroup_enabled
and /proc/PID/autogroup.
Michael Kerrisk
Add /proc/sys/fs/pipe-user-pages-{hard,soft} entries
Michael Kerrisk
Improve description of the KernelPageSize and MMUPageSize 'smaps' fields
Michael Kerrisk
Rework 'smaps' ProtectionKey text and add some details
Michael Kerrisk
Mention lslocks(8) in discussion of /proc/locks
Michael Kerrisk
Describe Shmem field of /proc/meminfo
Michael Kerrisk
Rework 'smaps' VmFlags text, and add kernel version and example output

proc.5
pipe.7
Michael Kerrisk
Move /proc/sys/fs/pipe-max-size content from proc(5) to pipe(7)

resolv.conf.5
Carlos O'Donell [Florian Weimer]
Timeout does not map to resolver API calls

utmp.5
Michael Kerrisk
SEE ALSO: add users(1)

capabilities.7
Michael Kerrisk
CAP_SYS_ADMIN governs ptrace(2) PTRACE_SECCOMP_GET_FILTER
Michael Kerrisk
CAP_SYS_ADMIN allows privileged ioctl() operations on /dev/random

cgroups.7
Michael Kerrisk
Add details on 'cpu' CFS bandwidth control

credentials.7
Michael Kerrisk
SEE ALSO: add setpriv(1)
Michael Kerrisk
SEE ALSO: add shadow(5)

feature_test_macros.7
Michael Kerrisk [Zack Weinberg]

Note that _REENTRANT and _THREAD_SAFE are now deprecated
Michael Kerrisk
Note that "cc -pthread" defines _REENTRANT

inotify.7
Michael Kerrisk
Note a subtlety of event generation when monitoring a directory

libc.7
Michael Kerrisk

Add a note on why glibc 2.x uses the soname libc.so.6
Michael Kerrisk
Add a few historical details on Linux libc4 and libc5
Just for historical interest. Details taken from
http://www.linux-m68k.org/faq/glibcinfo.html.

mdoc.7
Michael Kerrisk
Add a cross-reference to groff_mdoc(7)

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add user_namespaces(7)

mount_namespaces.7
user_namespaces.7
Michael Kerrisk
Migrate subsection on mount restrictions to mount_namespaces(7)
This section material in the user_namespaces(7) page was written
before the creation of the mount_namespaces(7) manual page.
Nowadays, this material properly belongs in the newer page.

netlink.7
Dmitry V. Levin
Document NETLINK_INET_DIAG rename to NETLINK_SOCK_DIAG
Dmitry V. Levin
Add references to sock_diag(7)

pid_namespaces.7
Michael Kerrisk
Refer to namespaces(7) for information
about NS_GET_PARENT

pipe.7
Michael Kerrisk, Vegard Nossum [Vegard Nossum]
Document /proc files controlling memory usage by pipes
Document /proc/sys/fs/pipe-max-size and

/proc/sys/fs/pipe-user-pages-{soft,hard}.
Michael Kerrisk
Document pre-Linux 4.9 bugs in pipe limit checking

sched.7
Michael Kerrisk
Add a new introductory paragraph describing the nice value
Michael Kerrisk
Add more precise details on CFS's treatment of the nice value
Michael Kerrisk
Mention RLIMIT_NICE in the discussion of the nice value
Michael Kerrisk
NOTES: mention cgroups CPU controller
Michael Kerrisk
Add introductory sentence mentioning CFS scheduler
Michael Kerrisk
Add nice(2), getpriority(2), and setpriority(2) to API list
Michael Kerrisk
Make it clearer that SCHED_OTHER is always scheduled below real-time
Michael Kerrisk
Give the page a more generic NAME

The page isn't just about APIs.

standards.7
Michael Kerrisk
POSIX.1-2016 (POSIX.1-2008 TC2) has now been released

symlink.7
Michael Kerrisk
SEE ALSO: add namei(1)

uri.7
Jakub Wilk
Use "example.com" as example domain

user_namespaces.7
Michael Kerrisk
Add reference to namespaces(7) for NS_GET_USERNS operation
Michael Kerrisk
Add reference to namespaces(7) for NS_GET_PARENT operation

========== Changes in man-pages-4.10 ==========

Released: 2017-03-13, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adam Martindale <adam.john.martindale@gmail.com>
Alex <psybin@riseup.net>
Anders Thulin <anders@thulin.name>
Andreas Gruenbacher <agruenba@redhat.com>

Apologies if I missed anyone!

New and rewritten pages
---

add_key.2
  Michael Kerrisk [Eugene Syromyatnikov, David Howells]
    Major improvements and additions
      The page has doubled in length.

ioctl_iflags.2
  Michael Kerrisk
    New page describing inode flags and ioctl() operations

ioctl_ns.2
  Michael Kerrisk
    New page created by splitting ioctl(2) operations out of namespaces(7)

keyctl.2
  Michael Kerrisk, Eugene Syromyatnikov [David Howells, Mat Martineau]
    A vast number of additions and improvements
      The
page has gone from somewhat over 100 lines to well over
      1000 lines and now more or less documents the complete interface
      provided by this system call.

getentropy.3
  Michael Kerrisk
    New page documenting getentropy(3)
      getentropy(3) is added to glibc in version 2.25.

keyrings.7
  David Howells
    New page (written by David Howells) adopted from keyutils
      Since this page documents kernel-user-space interfaces,
      it makes sense to have it as part of man-pages, rather
      than the keyutils package.
  Michael Kerrisk [Eugene Syromyatnikov, David Howells]
    Very many additions and improvements
  Michael Kerrisk
    Document /proc/keys
  Michael Kerrisk

Document /proc/sys/kernel/keys/persistent_keyring_expiry
Michael Kerrisk
Document /proc/key-users
Michael Kerrisk
Document /proc/sys/kernel/keys/gc_delay
Michael Kerrisk
Document /proc files that define
key quotas

persistent-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various clean-ups and additions

process-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various additions and improvements

request_key.2
Michael Kerrisk, Eugene Syromyatnikov [David Howells]
Very many additions and improvements
The page is now three times its former length.

session-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since
this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various reworking and additions

signal-safety.7
Michael Kerrisk
New page created by migrating the signal-safety discussion from
signal(7). Along the way some more details got added.
Michael Kerrisk [KASAKI Motohiro]
Note async-signal-safety problems caused by pthread_atfork()

See https://bugzilla.kernel.org/show_bug.cgi?id=25292
Michael Kerrisk [KASAKI Motohiro]
Note glibc deviations from POSIX requirements
See https://bugzilla.kernel.org/show_bug.cgi?id=25292

thread-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various rewordings and additions

user-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various reworking and improvements

user-session-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various rewordings and additions

Newly documented interfaces in existing pages
---

bzero.3
Michael Kerrisk
Document explicit_bzero() (new in glibc 2.25)
Also, reword the description of bzero somewhat.

proc.5
Michael
Kerrisk
Document /proc/sys/vm/user_reserve_kbytes
Michael Kerrisk
Document /proc/sys/vm/admin_reserve_kbytes
Michael Kerrisk

Document /proc/sys/fs/mount-max
Michael Kerrisk
Document /proc/PID/status 'NoNewPrivs' field

New and changed links
---

explicit_bzero.3
Michael Kerrisk
New link to bzero.3

Changes to individual pages
---

chmod.2
Michael Kerrisk
ERRORS: add EPERM error for immutable/append-only file

chown.2
Michael Kerrisk
ERRORS: add EPERM error for immutable/append-only file

chroot.2
Michael Kerrisk
SEE ALSO: add switch_root(8)

clock_getres.2
Michael Kerrisk
Note POSIX.1 requirements re relative time services and CLOCK_REALTIME

clone.2
Michael Kerrisk
clone() does not execute fork handlers

execve.2
Michael Kerrisk
Rework text describing when effective IDs aren't transformed by execve()
Michael
Kerrisk
File capabilities can be ignored for the same reasons as set-UID/set-GID
Michael Kerrisk
The 'no_new_privs' bit inhibits transformations of the effective IDs

fork.2
Michael Kerrisk
cgroup PIDs controller may also be trigger for EAGAIN error

fsync.2
  Michael Kerrisk
    SEE ALSO: add posix_fadvise(2)

getrandom.2
  Michael Kerrisk
    Remove getentropy(3) details and defer to new getentropy(3) page
  Michael Kerrisk
    Starting with glibc 2.25, getrandom() is now declared in <sys/random.h>
  Michael Kerrisk
    glibc support was added in version 2.25

getrlimit.2
  Michael Kerrisk
    Document role of RLIMIT_NOFILE for FD passing over UNIX sockets

getxattr.2
listxattr.2
  Andreas Gruenbacher
    Document E2BIG errors

inotify_add_watch.2
  Michael Kerrisk
    Note "inode" as a synonym for "filesystem object"
      Consistent with clarifications just made in inotify(7).

ioctl.2
  Michael Kerrisk
     SEE ALSO: add ioctl_ns(2), ioctl_iflags(2)

ioctl_fat.2
  Brian Masney
    Correctly reference volume ID instead of volume label

kcmp.2
  Michael Kerrisk
    Mention the clone(2) flags relating to various kcmp() 'type' values
  Michael Kerrisk
    KCMP_FILE: note reasons why FDs may refer to same open file description

link.2
  Michael Kerrisk
    When using linkat() AT_EMPTY_PATH, 'olddirfd' must not be a directory
  Michael Kerrisk
    ERRORS: add EPERM for immutable/append-only files
  Michael Kerrisk
    Note limits where EMLINK is encountered on ext4 and Btrfs

listxattr.2
  Michael Kerrisk
    Eliminate extra E2BIG error text
      Andreas' patch added a second description of E2BIG that
      was (mostly) more detailed than the existing text. Combine
      the two texts.

lseek.2
  Michael Kerrisk
    O_APPEND overrides the effect of lseek() when doing file writes
  Michael Kerrisk
    Remove ancient
 info about whence values and return values on old systems
  Michael Kerrisk
    Remove slightly bogus advice about race conditions
      The page already (by now) contains a reference to open(2)
      for a discussion of open file descriptions. Leave it at that,
      since the reader can then deduce how things work.

madvise.2
  Michael Kerrisk
    Note that madvise() is generally about improving performance

mbind.2
  Krzysztof Kulakowski [Michael Kerrisk]
    Update MPOL_BIND description
      The behavior of MPOL_BIND changed in Linux 2.6.26.

mincore.2
  Michael Kerrisk
    SEE ALSO: add madvise(2), posix_fadvise(2), posix_madvise(3)

mlock.2
  Michael Kerrisk
    Note pre-4.9 bug in RLIMIT_MEMLOCK accounting for overlapping locks
  Michael Kerrisk
    SEE ALSO: add mincore(2)

mmap.2
  Michael Kerrisk
    mincore(2) can be used to discover which pages of a mapping are resident

mount.2
  Michael Kerrisk [Rob
 Landley]
    Refer to mount_namespaces(7) for details of default propagation type

nanosleep.2
  Michael Kerrisk
    Describe "creeping sleep" problem
      nanosleep() has a problem if used in a program that catches
      signals and those signals are delivered at a very high rate.
      Describe the problem, and note that clock_nanosleep(2)
      provides a solution.
  Michael Kerrisk
    BUGS: explicitly note that the Linux 2.4 bug was fixed in Linux 2.6

open.2
  Michael Kerrisk
    Make it clear that O_APPEND implies atomicity
  Michael Kerrisk
    Clarify distinction between file creation flags and file status flags
  Michael Kerrisk
    Note ambiguity of ELOOP error when using O_NOFOLLOW
  Michael Kerrisk
    Restructure O_NOFOLLOW text for easier parsing
  Michael Kerrisk
    Clarify that O_NOFOLLOW is now in POSIX

poll.2
select.2
  Nicolas Biscos
    Add a reference to the sigset discussion in sigprocmask(2)
      A little while back, I added a note to sigprocmask.2 that
      discussed the difference between the libc's and the kernel's
      sigset_t structures. I added that note, because I saw this being
      done wrong in a tool tracing system calls (causing subtle bugs).
      As it turns out, the same bugs existed for ppoll and pselect, for
      the same reason. I'm hoping by adding the reference here, future
      writers of similar tools will find that discussion and not make
      the same mistake.

posix_fadvise.2
  Michael Kerrisk
    Mention /proc/sys/vm/drop_caches
      It may be helpful for the reader of this page to know about
      /proc/sys/vm/drop_caches.
  Michael Kerrisk
    Reorganize some text
      Details for various flags were hidden under NOTES.
      Move them to DESCRIPTION, to make the details more
      obvious.
  Michael Kerrisk
    One can use open(2)

+ mmap(2) + mincore(2) as a 'fincore'
Note that open(2) + mmap(2) + mincore(2) can be used to get a view
of which pages of a file are currently cached.
Michael Kerrisk [Maik Zumstrull]
Note that POSIX_FADV_DONTNEED *may* try to write back dirty pages
Michael Kerrisk
SEE ALSO: mincore(2)

prctl.2
Michael Kerrisk
Clarify that the ambient capability set is per-thread
Keno Fischer
Be more precise in what causes dumpable to reset
Michael Kerrisk
The no_new_privs setting is per-thread (not per-process)
Michael Kerrisk
Mention /proc/PID/status 'NoNewPrivs' field
Michael Kerrisk
Add reference to seccomp(2) in discussion of PR_SET_NO_NEW_PRIVS

ptrace.2
Omar Sandoval
Clarify description of PTRACE_O_EXITKILL

read.2
Michael Kerrisk [Kai NODA]
Rework text in DESCRIPTION that talks about limits for 'count'
See https://bugzilla.kernel.org/show_bug.cgi?id=86061
Michael Kerrisk [Steven Luo]
Remove crufty text about EINTR and partial read
Remove bogus text saying that POSIX permits partial read
to return -1/EINTR on interrupt by a signal handler.
That statement already ceased to be true in SUSv1 (1995)!

See https://bugzilla.kernel.org/show_bug.cgi?id=193111

readv.2
Michael Kerrisk
Remove generic advice about mixing stdio and syscalls on same file
There is nothing specific to readv()/writev() about this advice.

recv.2
Michael Kerrisk [Vincent Bernat]
Remove duplicate paragraph
man-pages-1.34 included changes that duplicated an existing
paragraph. Remove that duplicate.
Michael Kerrisk
SEE ALSO: add ip(7), ipv6(7), tcp(7), udp(7), unix(7)

remap_file_pages.2
  Michael Kerrisk
    remap_file_pages() has been replaced by a slower in-kernel emulation

send.2
  Michael Kerrisk
    SEE ALSO: add ipv6(7),
 socket(7), unix(7)

setxattr.2
  Michael Kerrisk
    ERRORS: add EPERM for immutable/append-only files

signalfd.2
  Michael Kerrisk
    signalfd() doesn't play well with helper programs spawned by libraries
      See https://lwn.net/Articles/415684/.
  Michael Kerrisk
    signalfd can't be used to receive synchronously generated signals
      Signals such as the SIGSEGV that results from an invalid
      memory access can be caught only with a handler.

stat.2
  Michael Kerrisk
    EXAMPLE: extend program to also show ID of the containing device
  Michael Kerrisk
    NOTES: mention fstatat() AT_NO_AUTOMOUNT in discussion of automounting

statfs.2
  Namhyung Kim
    Add more filesystem types
      Add missing magic numbers from /usr/include/linux/magic.h

syscall.2
  Mike Frysinger
    Add endian details with 64-bit splitting
      Architectures that split 64-bit values across register pairs
      usually
 do so according to their C ABI calling convention (which
      means endianness). Add some notes to that effect, and change the
      readahead example to show a little endian example (since that is
      way more common than big endian).

      Also start a new list of syscalls that this issue does not apply
      to.
  Mike Frysinger
    Note parisc handling of aligned register pairs

While parisc would normally have the same behavior as ARM/PowerPC,
they decide to write shim syscall stubs to unpack/realign rather
than expose the padding to userspace.

tkill.2
  Jann Horn
    Document EAGAIN error for real-time signals

truncate.2
  Michael Kerrisk
    Note use of ftruncate() for POSIX shared memory objects

unlink.2
  Michael Kerrisk
    ERRORS: add EPERM error for immutable/read-only files

vfork.2
  Michael Kerrisk
    Explain why the child should not call exit(3)
  Michael Kerrisk
     Another reason to use vfork() is to avoid overcommitting memory
  Michael Kerrisk
    Note some caveats re the use of vfork()
      Inspired by Rich Felker's post at http://ewontfix.com/7/.
      See also https://sourceware.org/bugzilla/show_bug.cgi?id=14749 and
      See also https://sourceware.org/bugzilla/show_bug.cgi?id=14750.
  Michael Kerrisk
    SEE ALSO: add _exit(2)

write.2
  Michael Kerrisk [Kai NODA]
    Alert the reader that there is a limit on 'count'
      See https://bugzilla.kernel.org/show_bug.cgi?id=86061

aio_suspend.3
  Michael Kerrisk
    Note that the glibc implementation is not async-signal-safe
      See https://sourceware.org/bugzilla/show_bug.cgi?id=13172

backtrace.3
  Michael Kerrisk
    SEE ALSO: add addr2line(1) and gdb(1)

bcmp.3
bcopy.3
bzero.3
memccpy.3
memchr.3

memcmp.3
memcpy.3
memfrob.3
memmem.3
memmove.3
memset.3
  Michael Kerrisk
    SEE ALSO: add bstring(3)

exec.3
  Michael
 Kerrisk
    execl() and execle() were not async-signal-safe before glibc 2.24

fopen.3
  Michael Kerrisk [Helmut Eller]
    Describe freopen() behavior for NULL pathname argument
      See https://bugzilla.kernel.org/show_bug.cgi?id=191261
  Michael Kerrisk
    Note the open(2) flags that correspond to the 'mode' argument
  Michael Kerrisk
    Change argument name: 'path' to 'pathname'
      For consistency with open(2).
  Michael Kerrisk
    Add subsection headings for each function

fts.3
  Michael Kerrisk
    Use better argument name for fts_children() and fts_set()
  Michael Kerrisk
    Fix minor error in FTSENT structure definition
  Michael Kerrisk
    Improve explanation of 'fts_errno'
  Michael Kerrisk
    Give a hint that there are further fields in the FTSENT structure
  Michael Kerrisk
    Clarify meaning of zero as 'instr' value for fts_set()

ftw.3
  Michael Kerrisk
    Correctly handle use
 of stat info for FTW_NS in example program
  Michael Kerrisk
    Clarify that stat buffer is undefined for FTW_NS

getline.3
  Michael Kerrisk
    EXAMPLE: better error handling

Michael Kerrisk [Kent Fredic]
EXAMPLE: handle null bytes in input
Jann Horn
Document ENOMEM error case
see the error handling in libio/iogetdelim.c
Michael Kerrisk
EXAMPLE: specify file to be opened as command-line argument
Michael Kerrisk
Use better variable name in example program

getmntent.3
Michael Kerrisk [Anders Thulin]
Prefer '\\' as the escape to get a backslash
See https://bugzilla.kernel.org/show_bug.cgi?id=191611

getopt.3
Michael Kerrisk
Reword discussion of error handling and reporting
The existing description was hard to understand. Break
it into a bullet list that separates out the details
in a manner that is easier to parse.
Michael Kerrisk

Correct details of use of <stdio.h> to get getopt() declaration
Michael Kerrisk [John Wiersba]
Remove some redundant text

mq_open.3
Michael Kerrisk [Adam Martindale]
Include definition of the 'mq_attr' structure in this man page
Make the reader's life a little easier by saving them from
having to refer to mq_getattr(3).

mq_send.3
Michael Kerrisk [Adam Martindale]
Refer to mq_overview(7) for details on range of message priority

__ppc_set_ppr_med.3
Wainer dos Santos Moschetta
Note need for _ARCH_PWR8 macro
The _ARCH_PWR8 macro must be defined to get the
__ppc_set_ppr_very_low() and __ppc_set_ppr_med_high()
definitions.

printf.3
Michael Kerrisk
Document nonstandard 'Z' modifier
Michael Kerrisk

Document 'q' length modifier
Michael Kerrisk [Erik Roland van der Meer]
Fix a small bug in example code
Move the second call to va_end(ap)
to above the if-block that
precedes it, so that the va_list 'ap' will be cleaned up in
all cases.
Michael Kerrisk [Nadav Har'El]
As a nonstandard extension, GNU treats 'll' and 'L' as synonyms
See https://bugzilla.kernel.org/show_bug.cgi?id=190341.
Michael Kerrisk
Add references to setlocale(3) in discussions of locales
Michael Kerrisk
SEE ALSO: remove bogus self reference (dprintf(3))

random.3
Michael Kerrisk
Relocate information of "optimal" value of initstate() 'n' argument
The information was a bit hidden in NOTES.

random_r.3
Michael Kerrisk [Jan Ziak]
'buf.state' must be initialized to NULL before calling initstate_r()
See https://bugzilla.kernel.org/show_bug.cgi?id=192801.
Michael Kerrisk
Add some usage notes for setstate_r()
Michael Kerrisk
Note that 'buf' records a pointer to 'statebuf'
See https://sourceware.org/bugzilla/show_bug.cgi?id=3662.
Michael Kerrisk
Add BUGS section pointing out the weirdness of the initstate_r() API

resolver.3
Michael Kerrisk
RES_AAONLY, RES_PRIMARY, RES_NOCHECKNAME, RES_KEEPTSIG are deprecated
These options were never implemented; since glibc 2.25, they
are deprecated.
Michael Kerrisk
The RES_NOIP6DOTINT is removed in glibc 2.25
Michael Kerrisk
Note that RES_BLAST was unimplemented and is now deprecated
Michael Kerrisk
RES_USE_INET6 is deprecated since glibc 2.25
Michael Kerrisk
RES_USEBSTRING was removed in glibc 2.25

resolver.3
resolv.conf.5

Michael Kerrisk
Note that RES_USEBSTRING defaults to off

scandir.3
Michael Kerrisk [Ian Jackson]
Fix errors in example program
See http://bugs.debian.org/848231.
Michael Kerrisk
Improve logic of the example program

scanf.3
Michael Kerrisk
Document the quote (') modifier
for decimal conversions

sem_post.3
setjmp.3
Michael Kerrisk
SEE ALSO: add signal-safety(7)

sem_wait.3
Michael Kerrisk [Fabjan Sukalia]
Remove statement that SA_RESTART does not cause restarting
This has not been true since Linux 2.6.22. The description
of EINTR maintains a reference to signal(7), which explains
the historical details.

See https://bugzilla.kernel.org/show_bug.cgi?id=192071

sleep.3
Michael Kerrisk [Mike Frysiner]
Note that sleep() is implemented via nanosleep(2)
See https://bugzilla.kernel.org/show_bug.cgi?id=73371.
Michael Kerrisk [Mike Frysinger]
Note that sleep() sleeps for a real-time number of seconds
See https://bugzilla.kernel.org/show_bug.cgi?id=73371.
Michael Kerrisk
Convert BUGS text to "Portability notes" subsection
The existing text is not a bug, as such.
Michael Kerrisk
DESCRIPTION: minor reworking

strerror.3
Heinrich Schuchardt
Indicate reasonable buffer size for strerror_r() and strerror_l()
Add a hint which buffer size is needed for
strerror_r() and strerror_l().

strverscmp.3
  Michael Kerrisk [Vivenzio Pagliari]
    Fix comparison error in example program

system.3
  Michael Kerrisk
    In the glibc implementation, fork handlers are not executed by system()

random.4
  Michael Kerrisk [Jon Jensen]
    Note that entropy_avail will be a number in the range 0..4096

core.5
  Michael Kerrisk
    Clarify that dumping program's initial CWD is root directory
  Michael Kerrisk
    The target of core dump piping can also be a script

filesystems.5
  Michael Kerrisk
    SEE ALSO: add btrfs(5), nfs(5), tmpfs(5)

intro.5
  Michael Kerrisk
    Document the reality that by now Section 5 also covers filesystems
      There are by now, from various filesystem projects, various
      pages in Section
 5 that document different filesystems.
      Change intro(5) to reflect that.

      Documented after following: http://bugs.debian.org/847998

proc.5
  Mike Frysinger [Michael Kerrisk]
    Clarify /proc/pid/environ behavior
      /proc/pid/environ reflects process environment at
      start of program execution; it is set at time of execve(2)
  Michael Kerrisk
    Add reference to slabinfo(5) in discussion of /proc/meminfo 'Slab' field
  Michael Kerrisk
    Add entries for "keys" files that refer reader to keyrings(7)
  Michael Kerrisk
    Remove duplicate /proc/[pid]/seccomp entry
  Michael Kerrisk
    Mention other system calls that create 'anon_inode' file descriptors
      Mention a few other system calls that create file descriptors
      that display an 'anon_inode' symlink in /proc/PID/fd
  Michael Kerrisk

Add some detail on overcommit_memory value 1
Michael Kerrisk
Add reference to vdso(7)
in discussion of /proc/PID/maps

resolv.conf.5
Michael Kerrisk
ip6-bytestring was removed in glibc 2.25
Michael Kerrisk
The ipc-dotint and no-ip6-dotint options were removed in glibc 2.25
Michael Kerrisk
The 'inet6' option is deprecated since glibc 2.25

slabinfo.5
Michael Kerrisk
SEE ALSO: add slabtop(1)

capabilities.7
Michael Kerrisk [Casey Schaufler]
Add subsection with notes to kernel developers
Provide some notes to kernel developers considering how to choose
which capability should govern a new kernel feature.
Michael Kerrisk
Further enhance the recommendation against new uses of CAP_SYS_ADMIN
Michael Kerrisk
Explicitly point from CAP_SYS_ADMIN to "Notes for kernel developers"
Michael Kerrisk
Add another case for CAP_DAC_READ_SEARCH
Michael Kerrisk
Refer to execve(2) for the reasons that file capabilities may be ignored
Michael Kerrisk
Document a new use of CAP_SYS_RESOURCE
Michael Kerrisk
Add some more operations governed by CAP_SYS_ADMIN
Michael Kerrisk
Adjust references to chattr(1) to point to ioctl_iflags(2)

environ.7
Michael Kerrisk
Mention prctl(2) PR_SET_MM_ENV_START and PR_SET_MM_ENV_END operations

inotify.7
Michael Kerrisk
Point out that inotify monitoring is inode based

ip.7
Michael Kerrisk
SEE ALSO: add ip(8)

man.7
uri.7
  Jakub Wilk
    Use "www.kernel.org" in example URLs
      Apparently www.kernelnotes.org is now a spam site.

mount_namespaces.7
  Michael Kerrisk [Rob Landley]
    Rework the discussion of defaults for mount propagation types
      Add rather more detail. In particular, note the cases where the
      default propagation type is MS_PRIVATE vs MS_SHARED.

namespaces.7
  Michael Kerrisk
    EXAMPLE: fix an error in shell session
  Michael Kerrisk
    EXAMPLE: rename the example
 program
      Use a more generic name, since this program may be expanded
      in various ways in the future.
  Michael Kerrisk
    SEE ALSO: add ip-netns(8)
  Michael Kerrisk
    Remove content split out into ioctl_ns(2)

netlink.7
  Michael Kerrisk
    NETLINK_IP6_FW went away in Linux 3.5
  Michael Kerrisk
    NETLINK_W1 went away in Linux 2.6.18
  Michael Kerrisk
    Add NETLINK_SCSITRANSPORT to list
  Michael Kerrisk
    Add NETLINK_RDMA to list
  Michael Kerrisk
    NETLINK_FIREWALL was removed in Linux 3.5
  Michael Kerrisk
    NETLINK_NFLOG was removed in Linux 3.17
  Jakub Wilk
    Update libnl homepage URL
      The original URL is 404.

pid_namespaces.7
user_namespaces.7
  Michael Kerrisk
    Adjust references to namespaces(7) to ioctl_ns(2)

pid_namespaces.7
  Keno Fischer
    CLONE_SIGHAND|CLONE_VM|CLONE_NEWPID is no longer disallowed

pipe.7
  Michael Kerrisk
    Since Linux 4.9,
 pipe-max-size is ceiling for the default pipe capacity
  Michael Kerrisk
    Clarify that default pipe capacity is 16 pages
      The statement that the default pipe capacity is 65536 bytes
      is accurate only on systems where the page size is 4096B.
      See the use of PIPE_DEF_BUFFERS in the kernel source.

random.7
  Michael Kerrisk
    Mention getentropy(3)
  Michael Kerrisk
    SEE ALSO: add getentropy(3)
  Michael Kerrisk
    SEE ALSO: add getauxval(3)
      A small hint to the reader that some random bytes arrive
      in the auxiliary vector.

signal.7
  Michael Kerrisk
    SIGSYS: add reference to seccomp(2)
  Michael Kerrisk
    Change description of SIGSYS to "Bad system call"
      This is the more typical definition.
  Michael Kerrisk
    SIGPIPE: add reference to pipe(7)
  Michael Kerrisk
    SIGXFSZ: add reference to setrlimit(2)
  Michael Kerrisk
    Add a name for SIGEMT
  Michael
 Kerrisk
    SIGXCPU: add reference to setrlimit(2)
  Michael Kerrisk
    Migrated signal-safety discussion to new signal-safety(7) page

unix.7
  Michael Kerrisk [Sergey Polovko]
    Since Linux 3.4, UNIX domain sockets support MSG_TRUNC
      This was correctly noted in recv(2), but the unix(7) page
      was not correspondingly updated for the Linux 3.4 change.
  Michael Kerrisk [Willy Tarreau]

Document ETOOMANYREFS for SCM_RIGHTS send exceeding RLIMIT_NOFILE limit

user_namespaces.7
  Michael Kerrisk
    Change page cross reference: keyctl(2) ==> keyrings(7)

ld.so.8
  Michael Kerrisk
    LD_BIND_NOT has effect only for function symbols
  Michael Kerrisk
    Describe use of LD_DEBUG with LD_BIND_NOT
  Michael Kerrisk
    In secure mode, LD_AUDIT restricts the libraries that it will load
  Michael Kerrisk
    LD_AUDIT understands $ORIGIN, $LIB, and $PLATFORM

========== Changes in man-pages-4.11
 ==========

Released: 2017-05-03, Baden, Switzerland

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_userfaultfd.2
Michael Kerrisk, Mike Rapoport
New page describing ioctl(2) operations for userfaultfd

statx.2
David Howells, Michael Kerrisk [Andreas Dilger]
New page describing statx(2) system call added in Linux 4.11

userfaultfd.2
Mike Rapoport, Michael Kerrisk [Andrea Arcangeli]
New page describing userfaultfd(2) system call.

pthread_atfork.3
Michael Kerrisk
New page describing pthread_atfork(3)

slabinfo.5
Michael Kerrisk
Rewrite to try to bring the content close to current reality
There's still gaps to fill in, but the existing page
was in any case hugely out of date.

inode.7
  Michael Kerrisk
    New page with information about inodes
      David Howells provided a statx(2) page that duplicated much of
      the information from stat(2). Avoid such duplication
      by moving the common information in stat(2) and statx(2)
      to a new page.

Renamed pages
---

ioctl_console.2
  Michael Kerrisk
    Renamed from console_ioctl.4
      Most ioctl() man pages are in section 2, so move this one there
      for consistency.
  Michael Kerrisk
    Note type of 'argp' for a various operations
      For some commands, there was no clear statement about the type
      of the 'argp' argument.

ioctl_tty.2
   Michael Kerrisk
    Renamed from tty_ioctl(4)
      All other ioctl(2) pages are in section 2. Make this
      page consistent.
  Michael Kerrisk
    Packet mode state change events give POLLPRI events for poll(2)

Newly documented interfaces in existing pages
---

ioctl_ns.2
  Michael Kerrisk
    Document the NS_GET_NSTYPE operation added in Linux 4.11
  Michael Kerrisk
    Document the NS_GET_OWNER_UID operation added in Linux 4.11

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/sched_child_runs_first

namespaces.7
  Michael Kerrisk
    Document the /proc/sys/user/* files added in Linux 4.9

socket.7
  Francois Saint-Jacques, Michael Kerrisk
    Document SO_INCOMING_CPU

New and changed links
---

console_ioctl.4
  Michael Kerrisk
    Link for old name of ioctl_console(2) page

tty_ioctl.4
  Michael Kerrisk
    Link for old name of ioctl_tty(2)
 page

Global changes

Various pages
  Michael Kerrisk
    Change page cross-references from tty_ioctl(4) to ioctl_tty(2)
  Michael Kerrisk
    Change page cross-references for console_ioctl(4) to ioctl_console(2)

Changes to individual pages
---

alarm.2
  Michael Kerrisk
    SEE ALSO: add timer_create(2) and timerfd_create(2)

chmod.2
fsync.2
mkdir.2
mknod.2
open.2
truncate.2
umask.2
utime.2
utimensat.2
  Michael Kerrisk
    Add/replace references to inode(7)

clone.2

Michael Kerrisk
CLONE_NEWCGROUP by an unprivileged process also causes an EPERM error

clone.2
unshare.2
Michael Kerrisk
Exceeding one of the limits in /proc/sys/user/* can cause ENOSPC
Michael Kerrisk
CLONE_NEWPID yields ENOSPC if nesting limit of PID namespaces is reached
Michael Kerrisk
Exceeding the maximum nested user namespace limit now gives ENOSPC
Formerly, if the limit of 32 nested
user namespaces was exceeded,
the error EUSERS resulted. Starting with Linux 4.9, the error
is ENOSPC.

epoll_ctl.2
Michael Kerrisk
Defer to poll(2) for an explanation of EPOLLIN
Michael Kerrisk [Nicolas Biscos]
EPOLLERR is also set on write end of a pipe when the read end is closed
Michael Kerrisk [Nicolas Biscos]
Give the reader a clue that the 'events' field can be zero
'events' specified as zero still allows EPOLLHUP and
EPOLLERR to be reported.

_exit.2
Michael Kerrisk
On exit, child processes may be inherited by a "subreaper"
It is no longer necessarily true that orphaned processes
are inherited by PID 1.
Michael Kerrisk
Only the least significant byte of exit status is passed to the parent

fcntl.2
Michael Kerrisk
Mention memfd_create() in the discussion of file seals
Give the reader a clue about what kinds of objects can
be employed with file seals.
Michael Kerrisk
File seals are not generally applicable to tmpfs(5) files
As far as I can see, file seals can be applied only to
memfd_create(2) file descriptors. This was checked by experiment
and by reading mm/shmem.c::shmem_get_inode((), where one finds
the following line that applies to all new shmem files:

info->seals = F_SEAL_SEAL;

Only in the code of the memfd_create() system call is this
setting reversed (in mm/shmem.c::memfd_create):

```
if (flags & MFD_ALLOW_SEALING)
    info->seals &= ~F_SEAL_SEAL;
```

fork.2
  Michael Kerrisk
    SEE ALSO: add pthread_atfork(3)

getdents.2
open.2
stat.2
statx.2
  Michael Kerrisk
    SEE ALSO: add inode(7)

getdtablesize.2
attr.5
  Alexander Miller
    Move .so directive to first line
      Improves compatibility with the man
 and other dumb tools
      that process man page files.

getpid.2
  Michael Kerrisk
    Mention init(1) and "subreapers" in discussion of parent PID

ioctl_list.2
  Cyril Hrubis [Arnd Bergmann]
    BLKRASET/BLKRAGET take unsigned long

ioctl_ns.2
  Michael Kerrisk
    ERRORS: document ENOTTY

kexec_load.2
sched_setaffinity.2
bootparam.7
  Michael Kerrisk
    Documentation/kernel-parameters.txt is now in Documentation/admin-guide/

lseek.2
  Michael Kerrisk
    SEE ALSO: add fallocate(2)
      Both of these pages discuss file holes.

mincore.2
  Michael Kerrisk
    SEE ALSO: add fincore(1)

mmap.2
  Michael Kerrisk
    Remove ancient reference to flags that appear on some other systems
      MAP_AUTOGROW, MAP_AUTORESRV, MAP_COPY, and MAP_LOCAL may have
      appeared on some systems many years ago, but the discussion here
      mentions no details and the systems and flags probably ceased to
      be relevant
 long ago. So, remove this text.
  Michael Kerrisk
    SEE ALSO: add userfaultfd(2)

open.2
  Michael Kerrisk
    Add statx() to list of "at" calls in rationale discussion

poll.2
  Michael Kerrisk
    Expand discussion of POLLPRI
  Michael Kerrisk [Nicolas Biscos]
    POLLERR is also set on write end of a pipe when the read end is closed

posix_fadvise.2
  Michael Kerrisk
    SEE ALSO: add fincore(1)

prctl.2
  Mike Frysinger
    PR_SET_MM: Refine CONFIG_CHECKPOINT_RESTORE requirement
      The Linux 3.10 release dropped the c/r requirement and opened it
      up to all users.
  Mike Frysinger
    PR_SET_MM: Document new PR_SET_MM_MAP{,_SIZE} helpers
  Mike Frysinger
    PR_SET_MM: Document arg4/arg5 zero behavior
      The kernel will immediately reject calls where arg4/arg5 are not
      zero. See kernel/sys.c:prctl_set_mm().
  Michael Kerrisk
    Explain rationale for use of subreaper processes
  Michael
 Kerrisk
    Note semantics of child_subreaper setting on fork() and exec()
  Michael Kerrisk
    Improve description of PR_SET_CHILD_SUBREAPER

rename.2
  Michael Kerrisk [Georg Sauthoff]
    Note that there is no glibc wrapper for renameat2()

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add get_nprocs(3)

select.2
  Michael Kerrisk [Matthew Wilcox, Carlos O'Donell]
    Linux select() is buggy wrt POSIX in its check for EBADF errors
  Michael Kerrisk
    Show correspondence between select() and poll() readiness notifications
  Michael Kerrisk
    Give a hint that sets must be reinitialized if using select() in a loop
  Michael Kerrisk
    Refer to POLLPRI in poll(2) for info on exceptional conditions
  Michael Kerrisk
    Move mislocated text describing the self-pipe text from BUGS to NOTES

sigaction.2
  Michael Kerrisk
    Show the prototype of an SA_SIGINFO signal handler

signalfd.2
  Michael Kerrisk

 SIGKILL and SIGSTOP are silently ignored in 'mask'

sigprocmask.2
  Dmitry V. Levin
    Do not specify an exact value of rt_sigprocmask's 4th argument
      As sizeof(kernel_sigset_t) is not the same for all architectures,
      it would be better not to mention any numbers as its value.
  Michael Kerrisk
    'set' and 'oldset' can both be NULL

sigwaitinfo.2
  Michael Kerrisk
    sigwaitinfo() can't be used to accept synchronous signals

socketcall.2
  Mike Frysinger
    Document call argument

stat.2
  Michael Kerrisk
    Remove information migrated to inode(7) page

Michael Kerrisk
Restructure field descriptions as a hanging list
Michael Kerrisk
Remove "Other systems" subsection
These details about other systems were added in 1999,
and were probably of limited use then, and even less today.
However, they do clutter the page, so remove them.
Michael Kerrisk
DESCRIPTION: add
list entries for 'st_uid' and 'st_gid'
Michael Kerrisk
Add some subsection headings to ease readability
David Howells
ERRORS: correct description of ENOENT
Michael Kerrisk
Give 'struct stat' argument a more meaningful name ('statbuf')
Marcin lusarz
Tweak description of AT_EMPTY_PATH
Currently it says when dirfd is AT_FDCWD it can be something
other than directory, which doesn't make much sense. Just swap
the order of sentences.
Michael Kerrisk
Add slightly expanded description of 'st_ino' field
Michael Kerrisk
DESCRIPTION: add a list entry for 'st_ino'
Michael Kerrisk
DESCRIPTION: add a list entry for 'st_nlinks' field

syscalls.2
Michael Kerrisk
Add membarrier(2)
Michael Kerrisk
Fix kernel version for userfaultfd(2)
Michael Kerrisk
Linux 4.11 added statx()
Michael Kerrisk
Include deprecated getunwind(2) in list

wait.2
Michael Kerrisk
Orphaned children may be adopted by a "subreaper", rather by than PD 1

bzero.3
Michael Kerrisk [Zack Weinberg]
Add correct header file for explicit_bzero()

cfree.3
Michael Kerrisk

cfree() is removed from glibc in version 2.26

exit.3
Michael Kerrisk
Improve discussion of zombie processes

getentropy.3
Nikos Mavrogiannopoulos [Michael Kerrisk, Florian Weimer]
Correct header file
Michael Kerrisk [Frank Theile]
SYNOPSIS: add missing return type for getentropy() declaration

grantpt.3
Michael Kerrisk
Tell a more nuanced story about what grantpt() does or does not do

insque.3
Michael Kerrisk
SEE ALSO: add queue(3)

queue.3
Michael Kerrisk
SEE ALSO: add insque(3)

shm_open.3
Michael Kerrisk
Clarify that POSIX shared memory uses tmpfs(5)

syslog.3
Michael Kerrisk [Ian Abbott, Walter Harms]
Reorganize page text for easier parsing and better
readability
Michael Kerrisk
Various rewordings and improvements
Michael Kerrisk
Note default value for 'facility' when calling openlog()
Michael Kerrisk
SEE ALSO: add journalctl(1)

ttyname.3
Dmitry V. Levin
Document ENODEV error code
Christian Brauner
NOTES: warn about a confusing case that may occur with mount namespaces

wcsdup.3
Jan Heberer
RETURN VALUE: fix error in return value description

Return value for failure was accidentally changed from NULL to
-1 in man-pages commit 572acb41c48b6b8e690d50edff367d8b8b01702a.

elf.5
Michael Kerrisk
SEE ALSO: add elfedit(1), nm(1), size(1), strings(1), and strip(1)

nsswitch.conf.5
Florian Weimer
Mention sudoers
It turns out that sudo drops things into nsswitch.conf, too.

proc.5
Michael Kerrisk
Refer to namespaces(7) for discussion of /proc/sys/user/* files
Michael Kerrisk
Simplify /proc/slabinfo
entry
Don't repeat (out-of-date) info from slabinfo(5); just defer to
that page.

tmpfs.5
Michael Kerrisk
tmpfs supports extended attributes, but not 'user' extended attributes

environ.7
Jakub Wilk
Fix name of function that honors TMPDIR
tempnam() takes the TMPDIR environment variable into account, unlike
tmpnam(), which always creates pathnames within /tmp.

hostname.7
Marko Myllynen
Use lower case for hostname example
Marko Myllynen
Use generic names in examples
Marko Myllynen
Describe accepted characters for hostname

inotify.7
Michael Kerrisk [Nicolas Iooss]
Mounting a filesystem on top of a monitored directory causes no event

man-pages.7
Michael Kerrisk
Note preferred approach for 'duplicate' errors

pid_namespaces.7

Michael Kerrisk
The maximum nesting depth for PID namespaces is 32

user_namespaces.7
Stephan Bergmann
Fixes to example
While toying around with the userns_child_exec example program on the
user_namespaces(7) man page, I noticed two things:

* In the EXAMPLE section, we need to mount the new /proc before
looking at /proc/$$/status, otherwise the latter will print
information about the outer namespace's PID 1 (i.e., the real
init). So the two paragraphs need to be swapped.

* In the program source, make sure to close pipe_fd[0] in the
child before exec'ing.

pthreads.7
Michael Kerrisk
SEE ALSO: add pthread_rwlockattr_setkind_np(3)

pty.7
Michael Kerrisk
Mention a couple of other applications of pseudoterminals

sem_overview.7
Michael Kerrisk
SEE ALSO: add shm_overview(7)

signal.7
Michael Kerrisk
SEE ALSO: add sigreturn(2)

tcp.7
Michael Kerrisk
Note indications for OOB data given by select(2) and poll(2)
Chema Gonzalez
tcp_abc was removed in 3.9

xattr.7
Michael Kerrisk
SEE ALSO: add ioctl_iflags(2)
People sometimes confuse xattrs and inode flags. Provide a link
to the page that describes inode flags to give them a tip.

ld.so.8
Michael Kerrisk
Mention quoting when using "Rpath tokens" in LD_AUDIT and LD_PRELOAD

Michael Kerrisk
Expand description of /etc/ld.so.preload
Michael Kerrisk
Mention ldconfig(8) in discussion of /etc/ld.so.cache

zdump.8
Jakub Wilk
Add OPTIONS section heading

========== Changes in man-pages-4.12 ==========

Released: 2017-07-13, London

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alex Henrie <alexhenrie24@gmail.com>
Andi Kleen <andi-bz@firstfloor.org>
Arjun Shankar <arjun.is@lostca.se>
Brad Bendily <bendily@gmail.com>
Cameron
Wright <wright18@uw.edu>

sulit <sulitsrc@foxmail.com>

<hiroki.ishii@miraclelinux.com>

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_getfsmap.2
  Darrick J. Wong
    Document the GETFSMAP ioctl
      Document the new GETFSMAP ioctl that returns the physical layout of a
      (disk-based) filesystem.

Newly documented interfaces in existing pages
---

namespaces.7
  Kirill Tkhai [Michael Kerrisk]
    Document the /proc/[pid]/ns/pid_for_children file

Changes to individual pages
---

ldd.1
  Michael Kerrisk
    'objdump -p prog | grep NEEDED' doesn't give quite same info as 'ldd'

chmod.2
  Michael Kerrisk
    Put fchmod() feature test macro requirements in a more readable format
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirements changes for fchmod()

chown.2
  Michael Kerrisk
    When file owner or group is changed, file capabilities are cleared
  Michael Kerrisk

Changes to file owner by root also clear set-UID and set-GID bits

clone.2
  Michael Kerrisk
    Update BUGS to reflect fact that PID caching was removed in glibc 2.25

epoll_wait.2
  Michael Kerrisk
    Clarify semantics of returned 'data' field
      The returned 'data' is the 'data' most recently set via
      epoll_ctl().

get_mempolicy.2
  Michael Kerrisk [Nadav Har'El, Andi Kleen]
    SYNOPSIS: fix return type of get_mempolicy()
      See https://bugzilla.kernel.org/show_bug.cgi?id=97051

getpid.2
  Carlos O'Donell, Michael Kerrisk
    Note that PID caching is removed as of glibc 2.25
      Since glibc 2.25 the PID cache is removed.

      Rationale given in the release notes:
      https://sourceware.org/glibc/wiki/Release/2.25#pid_cache_removal

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_getfsmap(2)

ioctl_getfsmap.2
  Michael Kerrisk
    Fix ordering of sections
  Michael Kerrisk

   Add VERSIONS section
  Michael Kerrisk
    ERRORS: order alphabetically

madvise.2
  Michael Kerrisk
    Remove bogus text re POSIX_MADV_NOREUSE
      There is a POSIX_FADV_NOREUSE for posix_fadvise(),
      but no POSIX_MADV_NOREUSE for any API in POSIX.

membarrier.2
  Michael Kerrisk
    Add ENOSYS error for 'nohz_full' CPU setting

mount.2
  NeilBrown
    Revise description of MS_REMOUNT | MS_BIND
      MS_REMOUNT|MS_BIND affects all per-mount-point
      flag. MS_RDONLY is only special because it,
      uniquely, is both a per-mount-point flag *and* a
      per-filesystem flag.

      So the sections of per-mount-point flags and
      MS_REMOUNT can usefully be clarified.

open.2
  Michael Kerrisk
    Note some further advantages of the *at() APIs

pipe.2
  Michael Kerrisk
    SEE ALSO: add tee(2) and vmsplice(2)

readv.2
  Michael Kerrisk
    glibc 2.26 adds library support for preadv2()
 and pwritev2()

sched_setaffinity.2
  Michael Kerrisk
    Mention cpuset cgroups as a cause of EINVAL error

seccomp.2
  Mike Frysinger
    Expand SECCOMP_RET_KILL documentation

sigaction.2
  Michael Kerrisk
    Note feature test macro requirements for 'si_code' constants
  Michael Kerrisk
    Add a subheading for the description of 'si_code'
  Michael Kerrisk
    TRAP_BRANCH and TRAP_HWBKPT are present only on IA64

sigaltstack.2
  Michael Kerrisk
    Note that specifying SS_ONSTACK in ss.ss_flags decreases portability
      In the Illumos source (which presumably mirrors its Solaris
      ancestry), there is this check in the sigaltstack()
      implementation:

              if (ss.ss_flags & ~SS_DISABLE)

return (set_errno(EINVAL));

And in the FreeBSD source we find similar:

if ((ss->ss_flags & ~SS_DISABLE) != 0)

return (EINVAL);

Michael Kerrisk

Note buggy addition of ss.ss_flags==SS_ONSTACK

Note buggy addition of ss.ss_flags==SS_ONSTACK as a synonym for ss_flags==0. No other implementation does this, AFAIK. And it was not needed :-(.

Michael Kerrisk

Specifying 'ss' returns the current settings without changing them

Michael Kerrisk

Give 'oss' argument a more meaningful name: 'old_ss'

Michael Kerrisk

Some minor reworking of the text

Michael Kerrisk

ERRORS: update description of EINVAL error

splice.2
tee.2
vmsplice.2

Michael Kerrisk

SEE ALSO: add pipe(7)

splice.2

Michael Kerrisk

ERRORS: split EINVAL error cases

Michael Kerrisk

ERRORS: add EINVAL for case where both descriptors refer to same pipe

timer_create.2

Michael Kerrisk

Document the CONFIG_POSIX_TIMERS option added in Linux 4.10

wait.2

Michael Kerrisk

Note glibc 2.26 changes to feature test macro requirements for waitid()

acosh.3
asinh.3
atanh.3

Alex Henrie

Remove C89 designation.

See https://bugzilla.kernel.org/show_bug.cgi?id=196319

bsd_signal.3
  Michael Kerrisk
    Note feature test macro requirements changes for glibc 2.26

dl_iterate_phdr.3
  Michael Kerrisk
    dl_iterate_phdr() shows the order in which objects were loaded
      dl_iterate_phdr() tells us not just which objects are
      loaded, but also the order in which they are loaded
      (the "link-map order"). Since the order is relevant for
      understanding symbol resolution, give the reader this clue.
  Michael Kerrisk
    Expand the code example, and show sample output
  Michael Kerrisk
    List values for the 'p_type' field

dlsym.3
  Michael Kerrisk
    _GNU_SOURCE is needed to get RTLD_DEFAULT and RTLD_NEXT definitions

flockfile.3
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirement
 changes

fpathconf.3
  Michael Kerrisk
    Rework RETURN VALUE description to add more detail
  Michael Kerrisk
    Add an errors section
  Michael Kerrisk
    Largely rewrite the description of _PC_CHOWN_RESTRICTED
  Michael Kerrisk
    Rewrite description of _PC_PIPE_BUF
      The existing description was not accurate, and lacked details.

ftw.3
  Michael Kerrisk
    BUGS: document a probable glibc regression in FTW_SLN case
      See https://bugzilla.redhat.com/show_bug.cgi?id=1422736
      and http://austingroupbugs.net/view.php?id=1121.

getaddrinfo.3
  Quentin Rameau
    Fix _POSIX_C_SOURCE value for getaddrinfo()
      The correct _POSIX_C_SOURCE value is 200112L, not 201112L in features.h.

getcontext.3
  Carlos O'Donell
    Exemplar structure should use 'ucontext_t'.

getgrent.3
  Michael Kerrisk
    Note glibc 2.22 changes for feature test macro requirements

grantpt.3
ptsname.3
unlockpt.3
  Ferdinand
 Thiessen [Michael Kerrisk]
    Update feature test macro-requirements for glibc 2.24

if_nametoindex.3
  Douglas Caetano dos Santos
    Add ENODEV error for if_nametoindex()

malloc.3
  Michael Kerrisk
    Document the reallocarray() added in glibc 2.26

nl_langinfo.3
  Michael Kerrisk
    Note feature test macro requirements for nl_langinfo_l()

posix_madvise.3
  Dr. Tobias Quathamer
    Remove paragraph about POSIX_FADV_NOREUSE
      POSIX_FADV_NOREUSE is documented for posix_fadvise, and a
      corresponding POSIX_MADV_NOREUSE flag is not specified by POSIX.
      See https://bugs.debian.org/865699

ptsname.3
  Michael Kerrisk [Arjun Shankar]
    Since glibc 2.26, ptsname_r() no longer gives EINVAL for buf==NULL

rand.3
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirement changes for rand_r()

resolver.3
  Michael Kerrisk
    Add basic notes on 'op' argument of res_nmkquery() and res_mkquery()

sigpause.3

Michael Kerrisk
Note glibc 2.26 changes to feature test macro requirements

sigwait.3
Michael Kerrisk
Note glibc 2.26 feature test macro changes

strtol.3
Heinrich Schuchardt
Mention 0X prefix
The prefix 0x may be capitalized as 0X.

See ISO/IEC 9899:1999.

sysconf.3
Michael Kerrisk [Pavel Tikhomirov]
Rework RETURN VALUE description to add more detail
Make the discussion clearer, and add a few details.
Also, fix the problem report from Pavel Tikhomirov
who noted that the man page falsely said that errno
is not changed on a successful return.

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=195955
Michael Kerrisk
Add ERRORS section

ttyslot.3
Michael Kerrisk
Fix error in feature test macro requirements
Michael Kerrisk
Note feature test macro requirements changes in glibc 2.24
Michael Kerrisk
Clarify
details of use of <stdlib.h> file

unlocked_stdio.3
Michael Kerrisk
Note glibc 2.24 feature test macro requirement changes

elf.5
Michael Kerrisk
SEE ALSO: add dl_iterate_phdr(3)

nsswitch.conf.5
DJ Delorie
Clarify group merge rules
This minor patch clarifies when merging is not done,
and how duplicate entries are merged.

proc.5
  Michael Kerrisk
    Document that 'iowait' field of /proc/stat is unreliable
      Text taken from Chao Fan's kernel commit 9c240d757658a3ae996.

slabinfo.5
  Michael Kerrisk [Jorge Nerin]
    SEE ALSO: add some references to relevant kernel source files

tmpfs.5
  Michael Kerrisk
    SEE ALSO: add memfd_create(2), mmap(2), shm_open(3)

capabilities.7
  Michael Kerrisk
    Clarify the effect on process capabilities when UID 0 does execve(2)
  Michael Kerrisk
    Note effect on capabilities when a process with UID != 0 does execve(2)
  Michael Kerrisk [David
 Lewis]
    Fix reversed descriptions of CAP_MAC_OVERRIDE and CAP_MAC_ADMIN
  Michael Kerrisk
    SEE ALSO: add filecap(8), netcap(8), pscap(8)

cgroup_namespaces.7
  Michael Kerrisk
    Add some further explanation of the example shell session
  Michael Kerrisk
    Fix a bug in shell session example

inode.7
  Michael Kerrisk
    Note glibc 2.24 feature test macro changes for S_IFSOCK and S_ISSOCK()

man.7
  G. Branden Robinson
    Undocument "URL" macro in man(7) in favor .UR+.UE

pid_namespaces.7
  Michael Kerrisk
    Mention /proc/[pid]/ns/pid_for_children

pipe.7
  Michael Kerrisk
    SEE ALSO: add tee(2) and vmsplice(2)

sigevent.7

Michael Kerrisk
Mention signal.h header file

signal.7
Michael Kerrisk [lilydjwg]
Since Linux 3.8, read(2) on an inotify FD is restartable with SA_RESTART
See https://bugzilla.kernel.org/show_bug.cgi?id=195711
Michael Kerrisk
read() from an inotify FD is no
longer interrupted by a stop signal
(Change was in Linux 3.8.)

tcp.7
Michael Kerrisk
Document value '2' for tcp_timestamps
Since Linux 4.10, the value '2' is meaningful for tcp_timestamps
Ruben Kerkhof
Change default value of tcp_frto
The default changed in c96fd3d461fa495400df24be3b3b66f0e0b152f9
(Linux 2.6.24).

ld.so.8
Michael Kerrisk
Greatly expand the explanation of LD_DYNAMIC_WEAK
Carlos O'Donell
Expand DT_RUNPATH details.
ld.so.8: Expand DT_RUNPATH details.

Every 3 years we get asked why DT_RUNPATH doesn't work like DT_RPATH.
The most recent question was here:
https://www.sourceware.org/ml/libc-help/2017-06/msg00013.html

We need to expand the description of DT_RUNPATH to cover this
situation and explain that the DT_RUNPATH entries apply only to the
immediate DT_NEEDED, not that of another, say dlopen'd
child object.
Michael Kerrisk
Since glibc 2.2.5, LD_PROFILE is ignored in secure-execution mode
Michael Kerrisk
Make notes on secure-execute mode more prominent
Place each note on secure-execution mode in a separate
paragraph, to make it more obvious.
Michael Kerrisk
Note that libraries in standard directories are not normally set-UID
In secure mode, LD_PRELOAD loads only libraries from standard
directories that are marked set-UID. Note that it is unusual for
a library to be marked in this way.
Michael Kerrisk

SEE ALSO: add elf(5)
Michael Kerrisk
Note version where secure-execution started ignoring LD_USE_LOAD_BIAS
Michael Kerrisk
Correct glibc version that ignores LD_SHOW_AUXV in secure-execution mode
Ignored since 2.3.4 (not 2.3.5).
Michael Kerrisk
Rewrite LD_DEBUG_OUTPUT description and note that .PID is appended

==========
Changes in man-pages-4.13 ==========

Released: 2017-09-15, Munich

Apologies if I missed anyone!

New and rewritten pages
---

pthread_mutex_consistent.3
Yubin Ruan, Michael Kerrisk
New page documenting pthread_mutex_consistent(3)

pthread_mutexattr_getpshared.3
Michael Kerrisk
New page for pthread_mutexattr_getpshared(3) and pthread_mutexattr_setpshared(3)

pthread_mutexattr_init.3
Michael Kerrisk
New page for pthread_mutexattr_init(3) and pthread_mutexattr_destroy(3)

pthread_mutexattr_setrobust.3
Yubin Ruan, Michael Kerrisk
New page for pthread_mutexattr_setrobust(3) and pthread_mutexattr_getrobust(3)

sysfs.5
Michael Kerrisk [Mark Wielaard]
New page documenting the sysfs filesystem
Just a skeleton page so far, but perhaps it will be filled out
over time.

Newly documented interfaces in existing pages

---

fcntl.2
  Jens Axboe, Michael Kerrisk
    Describe the set/get write hints commands that are added in Linux 4.13
      Document F_GET_RW_HINT, F_SET_RW_HINT, F_GET_FILE_RW_HINT, and
      F_SET_FILE_RW_HINT.

ioctl_tty.2
  Aleksa Sarai, Michael Kerrisk
    Add TIOCGPTPEER documentation

kcmp.2
   Cyrill Gorcunov
    Add KCMP_EPOLL_TFD description

keyctl.2
  Eugene Syromyatnikov
    Document the KEYCTL_RESTRICT_KEYRING operation
  Eugene Syromyatnikov [Stephan Müller]
    Document the ability to provide KDF parameters in KEYCTL_DH_COMPUTE

New and changed links
---

pthread_mutexattr_destroy.3
  Michael Kerrisk
    New link to new pthread_mutexattr_init.3 page

pthread_mutexattr_getrobust.3
pthread_mutexattr_getrobust_np.3
pthread_mutexattr_setrobust_np.3
  Michael Kerrisk
    New links to new pthread_mutexattr_setrobust.3 page

pthread_mutexattr_setpshared.3
  Michael Kerrisk
    New link to new pthread_mutexattr_getpshared.3 page

Global changes

Various pages
  Michael Kerrisk
    Use .EX/.EE for EXAMPLE programs

Various pages
  Michael Kerrisk
    Use consistent markup for code snippets
      Change .nf/.fi to .EX/.EE

Various pages
  Michael Kerrisk
    Use
 consistent markup for code snippets
      The preferred form is

          .PP/.IP
          .in +4n
          .EX
          <code>
          .EE
          .in
          .PP/.IP

Various pages
  Michael Kerrisk
    Formatting fix: replace blank lines with .PP/.IP
      Blank lines shouldn't generally appear in *roff source (other
      than in code examples), since they create large vertical
      spaces between text blocks.

Various pages
  Michael Kerrisk [Bjarni Ingi Gislason]
    Add a non-breaking space between a number and a unit (prefix)
      Based on a patch by Bjarni Ingi Gislason.

Various pages
  Michael Kerrisk [Bjarni Ingi Gislason]
    Use en-dash for ranges
      Based on a patch by Bjarni Ingi Gislason.

A few pages
  Michael Kerrisk
    Fix misordering of sections
  Michael Kerrisk
    Fix order of SEE ALSO entries

Changes to individual pages
----

ldd.1

Michael Kerrisk
Add more detail on ldd security implications, noting glibc 2.27 changes

add_key.2
backtrace.3
syslog.3
Michael Kerrisk
Fix misordered SEE ALSO entries

add_key.2
request_key.2
keyrings.7
Eugene Syromyatnikov
Update Linux documentation pointers

chown.2
Michael Kerrisk
Update kernel version in note on support for grpid/nogrpid mount options
There has been no change since Linux 2.6.25, so update the
kernel version to 4.12.

execve.2
Michael Kerrisk
SEE ALSO: add get_robust_list(2)

getrandom.2
Michael Kerrisk [Fabio Scotoni]
SYNOPSIS: make return type of getrandom() 'ssize_t'
This accords with glibc headers and the Linux kernel source.

getrlimit.2
Thiago Jung Bauermann
Mention unit used by RLIMIT_CORE and RLIMIT_FSIZE
Michael Kerrisk
Note that RLIMIT_AS and RLIMIT_DATA are rounded down to system page size
Michael Kerrisk
Mention unit for RLIMIT_DATA

getrlimit.2
mmap.2
malloc.3
Jonas Grabber
RLIMIT_DATA affects mmap(2) since Linux 4.7

get_robust_list.2
Michael Kerrisk
Detail the operation of robust futex lists
Michael Kerrisk

Since Linux 2.6.28, robust futex lists also have an effect for execve(2)
Michael Kerrisk
Clarify that "thread ID" means "kernel thread ID"
Michael Kerrisk
SEE ALSO: add pthread_mutexattr_setrobust(3)

ioctl_getfsmap.2
Darrick J. Wong
Correct semantics of FMR_OF_LAST flag

ioctl_userfaultfd.2
Mike Rapoport
Document replacement of ENOSPC with ESRCH
Mike Rapoport
Update uffdio_api.features description
There is no requirement that uffdio_api.features must be zero
for newer kernels. This field actually defines what features
space would like to enable.

io_submit.2
Sage Weil
Acknowledge possibility of short return
Note
that the return value may be a value less than 'nr'
if not all iocbs were queued at once.

ipc.2
Michael Kerrisk
SEE ALSO: add svipc(7)

keyctl.2
Eugene Syromyatnikov
mention keyctl_dh_compute(3) and keyctl_dh_compute_alloc (3)
These functions have been added in keyutils 1.5.10
Eugene Syromyatnikov
Mention ENOMEM in ERRORS
Eugene Syromyatnikov
Update kernel documentation path reference

move_pages.2
Otto Ebeling [Michael Kerrisk]
Note permission changes that occurred in Linux 4.13

mprotect.2
Michael Kerrisk [Shrikant Giridhar]
Add warning about the use of printf() in the example code

open.2

NeilBrown
Improve O_PATH documentation
- fstatfs is now permitted.
- ioctl isn't, and is worth listing explicitly
- O_PATH allows an automount point to be opened with
triggering the mount.

prctl.2
seccomp.2
Eugene Syromyatnikov

Update pointer to in-kernel seccomp documentation

prctl.2
ptrace.2
Eugene Syromyatnikov
Update pointer to in-kernel Yama documentation

prctl.2
Eugene Syromyatnikov
Update pointer to in-kernel no_new_privs flag documentation

readlink.2
Michael Kerrisk [Jason Noakes]
Fix an off-by-one error in example code

seccomp.2
Kees Cook
Clarify SECCOMP_RET_KILL kills tasks not processes

select_tut.2
Michael Kerrisk [Sergey Z.]
Clarify an ambiguity with respect to select() and EAGAIN
See https://bugzilla.kernel.org/show_bug.cgi?id=196345

set_tid_address.2
Elliott Hughes
Note that there's no glibc wrapper for set_tid_address()

socket.2
Michael Kerrisk [Yubin Ruan]
socket() uses the lowest available file descriptor

_syscall.2
Michael Kerrisk
Remove redundant comment from EXAMPLE
A discussion of the nroff source of the manual
page isn't very useful...

sysfs.2
  Michael Kerrisk
    Add a pointer to sysfs(5) to help possibly confused readers
  Michael Kerrisk
    Make it clearer near the start of the page that sysfs(2) is obsolete

timer_create.2
  Michael Kerrisk
    Strengthen the warning about use of printf() in the example program
  Michael Kerrisk
    Update cross reference: signal(7) should be signal-safety(7)

umount.2
  NeilBrown
    Revise MNT_FORCE description
      MNT_FORCE does not allow a busy filesystem to be unmounted. Only
      MNT_DETACH allows that. MNT_FORCE only tries to abort pending
      transactions, in the hope that might help umount not to block,

      Also, other filesystems than NFS support MNT_FORCE.

unshare.2
  Eugene Syromyatnikov
    Update pointer to in-kernel unshare documentation

wait.2
  Michael Kerrisk [ ]
    POSIX.1-2008 TC1 clarifies treatment of 'si_pid' for waitid() WNOHANG

cmsg.3
  Sukadev Bhattiprolu
    Add
 a scatter/gather buffer to sample code
  Michael Kerrisk
    Reorganize the text somewhat (no content changes)

crypt.3
  Konstantin Shemyak [Michael Kerrisk]
    Add description of previously undocumented 'rounds' parameter
  Konstantin Shemyak
    Encryption isn't done with SHA-xxx, but with a function based on SHA-xxx
  Konstantin Shemyak
    Clarify that ending of the salt string with '$' is optional

exit.3
  Michael Kerrisk
    Mention the prctl(2) PR_SET_PDEATHSIG operation

Michael Kerrisk
SEE ALSO: add get_robust_list(2)
Michael Kerrisk
Add a heading to delimit discussion of signals sent to other processes

exp2.3
Alex Henrie
Remove C89 designation

log1p.3
Alex Henrie
Document fixes to give EDOM or ERANGE on error

matherr.3
Michael Kerrisk
Note that glibc 2.27 removes the 'matherr' mechanism
Michael Kerrisk
Remove crufty feature test macro requirements

pow10.3
Michael
Kerrisk
Note that pow10() is now obsolete in favor of exp10()
Also, the pow10() functions are no longer supported by glibc,
starting with version 2.27.

sincos.3
Michael Kerrisk
Note that sincos() is intended to be more efficient than sin() + cos()

cciss.4
hpsa.4
Eugene Syromyatnikov [Don Brace, Meelis Roos]
Mention cciss removal in Linux 4.14
During the Linux 4.13 development cycle, the cciss driver has been
removed in favor of the hpsa driver, which has been amended with
some legacy board support.

initrd.4
proc.5
bootparam.7
Eugene Syromyatnikov
Update pointer to in-kernel initrd documentation

initrd.4
Eugene Syromyatnikov
Update pointer to in-kernel root over NFS documentation

intro.4
  Michael Kerrisk
    SEE ALSO: add mknod(1) and mknod(2)

host.conf.5
  Michael Kerrisk
    Add cross-reference to hosts(5)

locale.5
  Marko Myllynen
    Refer
 to existing locales for encoding details
      Since I don't think it would make sense to try to have different
      explanation for each glibc version on the locale(5) man page, I'm
      proposing that we apply the below patch so that we refer to
      existing locale definition files in general and not spell out the
      exact format or any certain locale as a definitive guideline.

nologin.5
  Michael Kerrisk
    Add a sentence explaining why nologin is useful

proc.5
  Eugene Syromyatnikov
    Document removal of htab-reclaim sysctl file
      This PPC-specific sysctl option has been removed in Linux 2.4.9.2,
      according to historic Linux repository commit log.
  Eugene Syromyatnikov
    Add description for cpuN lines in /proc/stat
  Eugene Syromyatnikov
    Add description for softirq line in /proc/stat
  Eugene Syromyatnikov
    Document removal of timer_stats file
  Michael Kerrisk
    Note Linux
 4.9 changes to privileges for /proc/[pid]/timerslack_ns
  Michael Kerrisk
    Show command used to mount /proc
  Michael Kerrisk
    Explicitly note in intro that some /proc files are writable
  Eugene Syromyatnikov
    Update pointer to in-kernel SysRq documentation
  Michael Kerrisk
    SEE ALSO: add sysfs(5)
  Eugene Syromyatnikov
    Update pointer to in-kernel security keys documentation
  Benjamin Peterson
    Fix path to binfmt_misc docs

Eugene Syromyatnikov
Update pointer to in-kernel MTRR documentation
Eugene Syromyatnikov
Update reference to kernel's crypto API documentation

tzfile.5
Paul Eggert
Sync from tzdb upstream
This makes tzfile.5 a copy of the tzdb version, except that the
tzdb version's first line is replaced by man-pages boilerplate.
The new version documents version 3 format, among other things.
Also, it removes the "Summary of the timezone information
file
format" section, which should no longer be needed due to
improvements in the part of the man page.

capabilities.7
Michael Kerrisk
Note semantics for a program that is set-UID-root and has capabilities
Note semantics for a program that is both set-user-ID-root and has
file capabilities.
Michael Kerrisk [Dennis Knorr]
Note that a set-UID-root program may have an empty file capability set

cgroups.7
Michael Kerrisk
SEE ALSO: systemd-cgls(1)

cpuset.7
Eugene Syromyatnikov
Update pointer to in-kernel cpusets documentation

keyrings.7
Eugene Syromyatnikov
Document description restriction for logon keys
"logon" type has additional check that enforces colon-separated
prefix in key descriptions.
Eugene Syromyatnikov
Add pointers to kernel's documentation
Mostly because of asymmetric-keys.txt, which is outside
security/keys
for some reason.

man-pages.7
Michael Kerrisk
Expand the guidance on formatting code snippets

netlink.7

  David Wilder
    Change buffer size in example code about reading netlink message
  Michael Kerrisk [Rick Jones]
    Add a comment on 8192 buffer size in example code

pthreads.7
  Michael Kerrisk
    SEE ALSO: add pthread_mutexattr_destroy(3) and pthread_mutexattr_init(3)

signal.7
  Michael Kerrisk
    Since glibc 2.26, SIGUNUSED is no longer defined

tcp.7
  Vincent Bernat
    tcp_tw_recycle is removed from Linux 4.12
      And it is completely broken.

unicode.7
  Eugene Syromyatnikov
    Update pointer to in-kernel Unicode terminal support documentation

========== Changes in man-pages-4.14 ==========

Released: 2017-11-27, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated
 in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

pthread_spin_init.3
  Michael Kerrisk [Peter Zijlstra, Thomas Gleixner, Zack Weinberg,
      Florian Weimer]
    New page describing pthread_spin_init(3) and pthread_spin_destroy(3)

pthread_spin_lock.3

  Michael Kerrisk [Carlos O'Donell]
    New page describing functions that lock and unlock spin locks
      Add a page describing pthread_spin_lock(3), pthread_spin_unlock(3),
      and pthread_spin_trylock(3).

smartpqi.4
  Don Brace [Michael Kerrisk, G. Branden Robinson]
      Document the smartpqi SCSI driver

veth.4
  Tomáš Pospíšek, Eric Biederman, Michael Kerrisk
    New page documenting veth virtual ethernet devices
      Based on a page from Tomáš Pospíšek, with some clean-ups by mtk.

Removed pages
---

infnan.3:
  Michael Kerrisk
    This function was in libc4 and libc5, but never part

of glibc. It ceased to be relevant nearly 20 years
ago. Time to remove the man page.

Newly documented interfaces in existing pages
---

ioctl_userfaultfd.2
userfaultfd.2
  Prakash Sangappa [Andrea Arcangeli, Mike Rapoport]
    Add description for UFFD_FEATURE_SIGBUS

madvise.2
   Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]
    Document MADV_WIPEONFORK and MADV_KEEPONFORK
  Michael Kerrisk
    Note fork() and execve() semantics for wipe-on-fork setting

membarrier.2
  Mathieu Desnoyers
    Update membarrier manpage for 4.14
      Add documentation for these new membarrier() commands:
          MEMBARRIER_CMD_PRIVATE_EXPEDITED
          MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED

memfd_create.2
  Mike Kravetz
    Add description of MFD_HUGETLB (hugetlbfs) support
      hugetlbfs support for memfd_create() was recently merged by Linus
      and should be in the Linux 4.14 release. To request hugetlbfs
      support a new memfd_create() flag (MFD_HUGETLB) was added.

readv.2
  Christoph Hellwig
    Document RWF_NOWAIT added in Linux 4.14

seccomp.2
  Tyler Hicks
    Document the SECCOMP_GET_ACTION_AVAIL operation added in Linux 4.14
  Tyler Hicks
    Document the SECCOMP_FILTER_FLAG_LOG
 flag added in Linux 4.14
  Tyler Hicks
    Document the SECCOMP_RET_LOG action added In Linux 4.14
  Michael Kerrisk [Kees Cook]
    Add description of SECCOMP_RET_KILL_PROCESS
  Michael Kerrisk
    Add SECCOMP_RET_KILL_THREAD description and rework SECCOMP_RET_KILL text

Michael Kerrisk
Document the seccomp audit logging feature added in Linux 4.14

seccomp.2
proc.5
Tyler Hicks
Document the seccomp /proc interfaces added in Linux 4.14
Document the seccomp /proc interfaces in Linux 4.14:
/proc/sys/kernel/seccomp/actions_avail and
/proc/sys/kernel/seccomp/actions_logged.

sigaltstack.2
Michael Kerrisk [Stas Sergeev]
Document the SS_AUTODISARM flag added in Linux 4.7

proc.5
Michael Kerrisk
Document /proc/locks
Oliver Ebert
Document /proc/kpagecgroup
Oliver Ebert
Add KPF_BALLOON, KPF_ZERO_PAGE, and KPF_IDLE for /proc/kpageflags

pid_namespaces.7
Michael Kerrisk
Document /proc/sys/kernel/ns_last_pid

New and changed links
---

pthread_spin_destroy.3
Michael Kerrisk
New link to new pthread_spin_init.3 page

pthread_spin_trylock.3
pthread_spin_unlock.3
Michael Kerrisk
New links to new pthread_spin_lock.3 page

Global changes

Various pages
Michael Kerrisk
Consistently use "x86-64", not "x86_64"
When referring to the architecture, consistently use "x86-64",

not "x86_64". Hitherto, there was a mixture of usages, with
"x86-64" predominant.

Various pages
  G. Branden Robinson
    Replace incorrect uses of Latin abbreviation "cf.".
      People seem to be using "cf." ("conferre"), which means "compare",
      to mean "see" instead, for which the Latin abbreviation would be
      "q.v." ("quod vide" -> "which see").

      In some cases "cf." might actually be the correct term but it's
       still not clear what specific aspects of a function/system call
      one is supposed to be comparing.

Changes to individual pages
---

capget.2
  Michael Kerrisk
    Clarify discussion of kernels that have no VFS capability support

clock_getres.2
  Michael Kerrisk
    clock_gettime() may be implemented in the vDSO

clone.2
  Michael Kerrisk
    Warn that the clone() wrapper modifies child_stack in the parent
  Michael Kerrisk
    Rework the discussion of the historical CLONE_PID for clarity
  Michael Kerrisk
    Add NOTES heading
  Michael Kerrisk
    Add a reference to new veth(4) page
  Michael Kerrisk
    Eliminate some redundant phrasing in discussion of "fn()"
  Michael Kerrisk
    Combine redundant paragraphs describing child_stack==NULL
  Michael Kerrisk
    Note that child_stack can be NULL when using the raw system call
  Michael Kerrisk
    Remove a redundant paragraph

connect.2
   Michael Kerrisk
    Clarify that ECONNREFUSED is for stream sockets

fcntl.2
  Michael Kerrisk [Jens Axboe]
    Inode read-write hints persist only until the filesystem is unmounted

flock.2
  Michael Kerrisk
    Move NFS details to a headed subsection
  Michael Kerrisk [Petr Uzel]
    Placing an exclusive lock over NFS requires the file is open for writing

fork.2
  Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]
    Document effect of MADV_WIPEONFORK

fork.2
getsid.2
setpgid.2
setsid.2
  Ahmad Fatoum
    Include <sys/types.h> in SYNOPSIS to obtain declaration of pid_t

fsync.2
  Craig Ringer
    ERRORS: add ENOSPC

getcpu.2
  Michael Kerrisk
    getcpu() may have an implementation in the vDSO

getpid.2
  Michael Kerrisk
    Mention that PID == TGID, and note contrast with TID
  Michael Kerrisk
    SEE ALSO: add gettid(2)

getrandom.2
  Michael Kerrisk [Fabio Scotoni]
    ERRORS: add ENOSYS

getrlimit.2
   Michael Kerrisk [Scott Vokes]
    Make it clear RLIMIT_NPROC is a limit on current number of processes
      https://twitter.com/silentbicycle/status/893849097903505409

gettid.2
  Michael Kerrisk
    SEE ALSO: add getpid(2)

gettimeofday.2
  Michael Kerrisk
    Note that gettimeofday() may be implemented in the vDSO

ioctl_userfaultfd.2
  Michael Kerrisk
    Rework version information for feature bits

io_submit.2
  Goldwyn Rodrigues
    Add iocb details to io_submit
      Add more information about the iocb structure. Explains the
      fields of the I/O control block structure which is passed to the
      io_submit() call.
  Michael Kerrisk
    Add cross-reference to io_getevents(2)
  Michael Kerrisk
    Cross reference pwritev(2) in discussion of RWF_SYNC and RWF_DSYNC

membarrier.2
  Mathieu Desnoyers
    Update example to take TSO into account
      The existing example given specifically states that
 it focus on
      x86 (TSO memory model), but gives a read-read vs write-write
      ordering example, even though this scenario does not require
      explicit barriers on TSO.

      So either we change the example architecture to a weakly-ordered
      architecture, or we change the example to a scenario requiring
      barriers on x86.

      Let's stay on x86, but provide a Dekker as example instead.
  Mathieu Desnoyers
      Adapt the MEMBARRIER_CMD_SHARED return value documentation to
      reflect that it now returns -EINVAL when issued on a system
      configured for nohz_full.

memfd_create.2
  Michael Kerrisk
    Note the limit for size of 'name'

mkdir.2
  Michael Kerrisk [Raghavendra D Prabhu]
    ERRORS: document EINVAL error for invalid filename

mmap.2

Michael Kerrisk
Add explicit text noting that 'length' must be greater than 0
Currently, this detail is hidden in ERRORS.
Make it clear in
the main text.
Michael Kerrisk
SEE ALSO: add ftruncate(2)

mremap.2
Mike Kravetz [Florian Weimer, Jann Horn]
Add description of old_size == 0 functionality
Since at least the 2.6 time frame, mremap() would create a new
mapping of the same pages if 'old_size == 0'. It would also leave
the original mapping. This was used to create a 'duplicate
mapping'.

A recent change was made to mremap() so that an attempt to create a
duplicate a private mapping will fail.
Michael Kerrisk [Michal Hocko, Mike Kravetz]
BUGS: describe older behavior for old_size==0 on private mappings
Explain the older behavior, and why it changed. This is a
follow-up to Mike Kravetz's patch documenting the behavior
for old_size==0 with shared mappings.
Michael Kerrisk
Reformat EINVAL errors as a list

open.2
Michael Kerrisk

By contrast with O_RDONLY, no file permissions are required for O_PATH
Note one of the significant advantages of O_PATH: many of the
operations applied to O_PATH file descriptors don't require
read permission, so there's no reason why the open() itself
should require read permission.
Michael Kerrisk
Note use of O_PATH to provide O_EXEC functionality
Michael Kerrisk
Mention O_PATH file descriptor use with fexecve(3)
Michael Kerrisk
ERRORS: document EINVAL error for invalid filename
Michael Kerrisk
Clarify that O_TMPFILE creates a *regular* file
Michael Kerrisk
Make it explicit that O_CREAT creates a regular file
Michael Kerrisk
Since glibc 2.26, the open() wrapper always uses the openat() syscall
Michael Kerrisk
Change pathname used in discussion of rationale for openat()

/path/to/file is a little confusing as a pathname
Michael Kerrisk
Make the purpose of open() a little clearer at the start of the page

open_by_handle_at.2
NeilBrown
Clarifications needed due to NFS reexport
NeilBrown [Lennart Poettering]
Clarify MAX_HANDLE_SZ
As hinted in the kernel source, MAX_HANDLE_SZ is a hint
rather than a promise.

pipe.2
Michael Kerrisk [Marin H.]
Since Linux 4.5, fcntl() can be used to set O_DIRECT for a pipe
See https://bugzilla.kernel.org/show_bug.cgi?id=197917

pivot_root.2
Michael Kerrisk
SEE ALSO: add switch_root(8)

pkey_alloc.2
Breno Leitao
Fix argument order
Currently pkey_alloc() syscall has two arguments, and the very
first argument is still not supported and should be set to zero.
The second argument is the one that should specify the
page access rights.

ptrace.2
Michael Kerrisk
SEE ALSO: add ltrace(1)

reboot.2
Michael Kerrisk [Micha Zegan]
Fix bogus description of reboot() from non-initial PID namespace
The current text was confused (mea culpa). No signal is sent to
the init() process. Rather, depending on the 'cmd' given to
reboot(), the 'group_exit_code' value will set to either SIGHUP or
SIGINT, with the effect that one of those signals is reported to
wait() in the parent process.

See https://bugzilla.kernel.org/show_bug.cgi?id=195899
Michael Kerrisk
SEE ALSO: remove reboot(8) (synonym for halt(8)); add shutdown(8)
Michael Kerrisk
SEE ALSO: add systemctl(1), systemd(1)

recvmmsg.2
sendmmsg.2
  Elliot Hughes
    Type fixes in SYNOPSIS
      [mtk: The raw system calls use "unsigned int", but the glibc
      wrappers have "int" for the 'flags' argument.]

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add numactl(8)

sched_yield.2
  Michael Kerrisk [Peter Zijlstra]
    sched_yield()
 is intended for use with real-time scheduling policies

seccomp.2
  Michael Kerrisk [Adhemerval Zanella, Florian Weimer, Kees Cook]
    Add some Caveats regarding the use of seccomp filters
  Michael Kerrisk
    Document the "default" filter return action
      The kernel defaults to either SECCOMP_RET_KILL_PROCESS
      or SECCOMP_RET_KILL_THREAD for unrecognized filter
      return action values.
  Michael Kerrisk [Kees Cook]
    Change SECCOMP_RET_ACTION to SECCOMP_RET_ACTION_FULL
      In Linux 4.14, the action component of the return value
      switched from being 15 bits to being 16 bits. A new macro,
      SECCOMP_RET_ACTION_FULL, that masks the 16 bits was added,
      to replace the older SECCOMP_RET_ACTION.
  Michael Kerrisk
    Explicitly note that other threads survive SECCOMP_RET_KILL_THREAD
  Michael Kerrisk
    SEE ALSO: add strace(1)

send.2
  Grégory Vander Schueren
    Add EALREADY to ERRORS

setns.2
   Michael Kerrisk
    SEE ALSO: add nsenter(1)

shmop.2
  Yubin Ruan
    Note that return value of shmat() is page-aligned

sigaction.2

Michael Kerrisk
Rework discussion of SA_SIGINFO handler arguments
Expand and rework the text a little, in particular adding
a reference to sigreturn(2) as a source of further
information about the ucontext argument.
Michael Kerrisk
Mention that libc sets the act.sa_restorer field

sigaltstack.2
Michael Kerrisk [Walter Harms]
Reword BUGS text to be a little clearer
Michael Kerrisk
Add explicit error handling to example code
Michael Kerrisk
Add use of sigaction() to example code

sigreturn.2
Michael Kerrisk
Make it a little clearer that a stack frame is created by the kernel
Michael Kerrisk
glibc has a simple wrapper for sigreturn() that returns ENOSYS

splice.2
Michael Kerrisk
Since Linux 2.6.31,'fd_in'
and 'fd_out' may both refer to pipes

stat.2
Michael Kerrisk [Richard Knutsson]
Use lstat() instead of stat()
It's more logical to use lstat() in the example code,
since one can then experiment with symbolic links, and
also the S_IFLNK case can also occur.
NeilBrown
Correct AT_NO_AUTOMOUNT text and general revisions
Expand on the relationship between fstatat() and the other three
functions, and improve the description of AT_NO_AUTOMOUNT.
Specifically, both stat() and lstat() act the same way with
respect to automounts, and that behavior matches fstatat() with
the AT_NO_AUTOMOUNT flag.

statfs.2
Michael Kerrisk
Add some comments noting filesystems that are no longer current
Michael Kerrisk
Add comments describing a few filesystem types

time.2

Michael Kerrisk
Note that time() may be implemented in the vDSO
Michael Kerrisk
[Victor Porton]
Language fix-up: clarify that "tasks" means "work"
See https://bugzilla.kernel.org/show_bug.cgi?id=197183

userfaultfd.2
Mike Rapoport
BUGS: document spurious UFFD_EVENT_FORK

write.2
fsync.2
close.2
NeilBrown [Jeff Layton]
Update description of error codes
Since 4.13, errors from writeback are more reliably reported
to all file descriptors that might be relevant.

Add notes to this effect, and also add detail about ENOSPC and
EDQUOT which can be delayed in a similar many to EIO - for NFS
in particular.

abort.3
Michael Kerrisk
Starting with glibc 2.27, abort() does not attempt to flush streams
Michael Kerrisk
SEE ALSO: add assert(3)

backtrace_symbols_fd(3)
Stefan Puiu [Walter Harms]
backtrace_symbols_fd() can trigger a call to malloc()

daemon.3
Michael Kerrisk
SEE ALSO: add daemon(7), logrotate(8)

errno.3
Michael
Kerrisk
Note use of errno(1) to look up error names and numbers
Michael Kerrisk
Update error list for POSIX.1-2008
POSIX.1-2008 specified a couple of new errors not present in
POSIX.1-2001.
Michael Kerrisk [Walter Harms]
Note the use of perror(3) and strerror(3)
Michael Kerrisk

Recast the advice against manually declaring 'errno'
Recast the advice against manually declaring 'errno' to
a more modern perspective. It's 13 years since the original
text was added, and even then it was describing old behavior.
Cast the description to be about behavior further away in
time, and note more clearly that manual declaration will
cause problems with modern C libraries.
Michael Kerrisk
Add some missing errors
Michael Kerrisk
Error numbers are positive values (rather than nonzero values)
POSIX.1-2008 noted the explicitly
the change (to align with
the C standards) that error numbers are positive, rather
than nonzero.
Michael Kerrisk
Reorganize the text and add some subheadings
Restructure the text and add some subheadings for better
readability. No (intentional) content changes.
Michael Kerrisk [Wesley Aptekar-Cassels]
Note that error numbers vary somewhat across architectures
Added after a patch from Wesley Aptekar-Cassels that proposed
to add error numbers to the text.
Michael Kerrisk
Note the <errno.h> also provides the symbolic error names
Michael Kerrisk [Walter Harms]
Explicitly note that error numbers vary also across UNIX systems

exec.3
Michael Kerrisk
glibc 2.24 dropped CWD from the default path
Document the glibc 2.24 change that dropped CWD from the default
search path employed by execlp(), execvp() and execvpe() when
PATH
is not defined.

fexecve.3
Michael Kerrisk
O_PATH file descriptors are also usable with fexecve()
Cristian Rodríguez
fexecve() is now implemented with execveat(2), where available
Michael Kerrisk
Add some detail on the glibc implementation of fexecve() via execveat(2)

ffs.3
Michael Kerrisk
glibc 2.27 relaxes the FTM requirements for ffsl() and ffsll()

get_nprocs_conf.3
  Michael Kerrisk
    SEE ALSO: add nproc(1)

lround.3
  Michael Kerrisk [David Eckardt]
    Clarify that lround() rounds *halfway cases" away from zero
      See https://bugzilla.kernel.org/show_bug.cgi?id=194601

makedev.3
  Adrian Bunk
    glibc has deprecated exposing the definitions via <sys/types.h>

mallinfo.3
  Jakub Wilk
    Fix the example
      Remove reference to non-standard "tlpi_hdr.h" and replace calls to
      functions that were declared in this header.

malloc.3
  Michael Kerrisk
    SEE ALSO: add valgrind(1)

popen.3
   Michael Kerrisk
    Add a cross reference to Caveats in system(3)
      All of the same risks regarding system() also apply to popen().

pthread_detach.3
  Michael Kerrisk [Rahul Bedarkar]
    Improve sentence describing freeing of resources on process termination
      As reported by Rahul, the existing sentence could be read as
      meaning that resources of joined and terminated detached
      threads are freed only at process termination. Eliminate
      that possible misreading.

pthread_yield.3
  Michael Kerrisk [Peter Zijlstra]
    pthread_yield() is intended for use with real-time scheduling policies

setlocale.3
  Michael Kerrisk [Kištof Želechovski]
    The standards do not specify all of the locale categories

sockatmark.3
  Seonghun Lim
    Fix cruft in code example

stdio.3
  Michael Kerrisk
    Use proper section cross references in function list
  Michael Kerrisk
    Remove crufty
 reference to pc(1)

sysconf.3
  Michael Kerrisk
    Mention get_nprocs_conf(3)
      Mention get_nprocs_conf(3) in discussion of _SC_NPROCESSORS_CONF
      and _SC_NPROCESSORS_ONLN.

system.3
  Michael Kerrisk [Bastien Roucaries]
    Create a "Caveats" subsection to hold warnings about the use of system()
    See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=882222
  Michael Kerrisk [Bastien Roucaries]
    Mention PATH explicitly in discussion of system() and set-UID programs
  Michael Kerrisk [Bastien Roucaries]
    Note that user input for system() should be carefully sanitized
  Michael Kerrisk
    Mention file capabilities in discussion of privileged programs
  Michael Kerrisk
    Correctly note which shell Debian uses as (noninteractive) /bin/sh

core.5
  Michael Kerrisk
    Add some notes on systemd and core dumps
  Michael Kerrisk
    Dumps are not produced if core_pattern is empty and core_uses_pid is 0

  Michael Kerrisk [Per Böhlin]
    RLIMIT_CORE is not enforced when piping core dump to a program
  Michael Kerrisk
    SEE ALSO: add systemd-coredump(8)
  Michael Kerrisk
    SEE ALSO: add coredumpctl(1)

filesystems.5
  Michael Kerrisk [Jonny Grant]
    Replace crufty URL reference for 'smb' with up-to-date URL
  Michael Kerrisk [Jonny Grant]
    Refer to VFAT as an extended FAT (not DOS) filesystem

proc.5
  Michael Kerrisk [Miklos Szered, Ram Pai]
    Correct the description of the parent mount ID for /proc/PID/mountinfo

Oliver Ebert
Add mmap-exclusive bit for /proc/[pid]/pagemap
Marcus Folkesson
Update description of /proc/<pid>/oom_score
Lucas Werkmeister
Clarify permissions in /proc/[pid]/fd/
Michael Kerrisk
Add reference to pid_namespaces(7) for /proc/sys/kernel/ns_last_pid

shells.5
Michael Kerrisk
SEE ALSO: add pam_shells(8)

sysfs.5
Michael Kerrisk
Add a brief explanation
of /sys/kernel
Michael Kerrisk
Add a brief description of /sys/class/net
Michael Kerrisk
Add a brief description of /sys/kernel/mm
Michael Kerrisk
Add brief description of /sys/kernel/debug/tracing
Michael Kerrisk
Add a description of /sys/kernel/mm/hugepages

arp.7
Michael Kerrisk
SEE ALSO: add arpd(8)

capabilities.7
Michael Kerrisk
Add a reference to xattr(7) in the discussion of extended attributes
Michael Kerrisk
SEE ALSO: add captest(8)

epoll.7
Michael Kerrisk
Note existence of kcmp() KCMP_EPOLL_TFD operation

fifo.7
Michael Kerrisk
Refer reader to pipe(7) for details of I/O semantics of FIFOs

hier.7
Michael Kerrisk
SEE ALSO: add file-hierarchy(7)

icmp.7
  Michael Kerrisk
    SEE ALSO: add rdisc(8)

man-pages.7
  Michael Kerrisk
    Note that "x86-64" is generally preferred over "x86_64"
  G. Branden Robinson
    Add a use case for real
 minus character

namespaces.7
  Michael Kerrisk
    Add a reference to new veth(4) page
  Michael Kerrisk
    EXAMPLE: refer also to example in clone(2)

pid_namespaces.7
  Michael Kerrisk
    SEE ALSO: add reboot(2)
      Add because reboot(2) has special semantics for non-initial
      PID namespaces.

pthreads.7
  Michael Kerrisk
    SEE ALSO: add pthread_spin_init(3) and pthread_spin_lock(3)

socket.7
  Michael Kerrisk [Petr Malat, Tobias Klausmann]
    Correct the description of SO_RXQ_OVFL

standards.7
  Michael Kerrisk
    SEE ALSO: add getconf(1), confstr(3), pathconf(3), sysconf(3)

user_namespaces.7
  Christian Brauner [Michael Kerrisk]
    Document new 340 line idmap limit

ld.so.8
  Michael Kerrisk [Yubin Ruan]
    Simplify language around conferring capabilities
      The statement "conferring permitted or effective capabilities"
      to the process is somewhat redundant. Binaries with capabilities
       confer capabilities only to those process capability sets, so it's
      simpler to just say "confers capabilities to the process".

========== Changes in man-pages-4.15 ==========

Released: 2018-02-02, Palo Alto

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Michal Hocko <mhocko@kernel.org>
NeilBrown
 <neilb@suse.com>
Nikola Forró <nforro@redhat.com>
Nikolay Borisov <nborisov@suse.com>
Pradeep Kumar <pradeepsixer@gmail.com>
QingFeng Hao <haoqf@linux.vnet.ibm.com>
Ricardo Biehl Pasquali <pasqualirb@gmail.com>
roblabla <man-pages@roblab.la>
Roman Gushchin <guro@fb.com>
Shawn Landden <slandden@gmail.com>
Stefan Hajnoczi <stefanha@redhat.com>
Stefan Raspl <raspl@linux.vnet.ibm.com>
Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages
---

s390_sthyi.2
  QingFeng Hao [Michael Kerrisk]

New page for s390-specific s390_sthyi(2)

network_namespaces.7
  Michael Kerrisk
    New page describing network namespaces
      Based on content moved from namespaces(7)

vsock.7
  Stefan Hajnoczi [Jorgen Hansen, Michael Kerrisk]
    Document the VSOCK socket address family

Newly documented interfaces in existing pages
---

cgroups.7
  Michael Kerrisk [Tejun Heo]
     Document cgroups v2 "thread mode"
  Michael Kerrisk [Tejun Heo]
    Document cgroup v2 delegation via the 'nsdelegate' mount option
  Michael Kerrisk
    Document the cgroup.max.depth and cgroup.max.descendants files
  Michael Kerrisk
    Document 'release_agent' mount option
  Michael Kerrisk [Roman Gushchin]
    Document /sys/kernel/cgroup/delegate
  Michael Kerrisk [Roman Gushchin]
    Document /sys/kernel/cgroup/features
  Michael Kerrisk [Roman Gushchin]
    Document cgroups v2 cgroup.stat file

Global changes

Various pages
  G. Branden Robinson
    Standardize on "nonzero"
      Also add this term to the style guide in man-pages(7).

Changes to individual pages
---

bpf.2
  Nikolay Borisov
    Sync list of supported map types with 4.14 kernel

copy_file_range.2
  Michael Kerrisk
    Library support was added in glibc 2.27
  Shawn Landden
    glibc provides a
 user-space emulation where the system call is absent
  Florian Weimer
    EFBIG errors are possible, similar to write(2)
  Michael Kerrisk
    ERRORS: add EISDIR
  Michael Kerrisk
    Order ERRORS alphabetically
  Michael Kerrisk
    Add comment to code example explaining use of syscall(2)

fcntl.2
read.2
write.2
  NeilBrown
    Document "Lost locks" as cause for EIO.
      If an advisory lock is lost, then read/write requests on any
      affected file descriptor can return EIO - for NFSv4 at least.

memfd_create.2
  Michael Kerrisk
    glibc support for memfd_create() was added in version 2.27

mlock.2
  Michael Kerrisk
    Make details for MLOCK_ONFAULT a little more explicit
  Michael Kerrisk
    glibc support for mlock2() is added in version 2.27

mmap.2
  John Hubbard [Michael Hocko]
    MAP_FIXED is no longer discouraged
      MAP_FIXED has been widely used for a very long time, yet the man
      page
 still claims that "the use of this option is discouraged".
  John Hubbard
    MAP_FIXED updated documentation
        -- Expand the documentation to discuss the hazards in
          enough detail to allow avoiding them.

        -- Mention the upcoming MAP_FIXED_SAFE flag.

        -- Enhance the alignment requirement slightly.

mount.2
  Keno Fischer [Michael Kerrisk]
    Add EINVAL error condition when MS_BINDing MNT_LOCKED submounts

mprotect.2
pkey_alloc.2
  Michael Kerrisk
    Glibc support for memory protection keys was added in version 2.27

perf_event_open.2
  Michael Kerrisk
    SEE ALSO: add perf(1)

pkey_alloc.2
  Michael Kerrisk
    Clarify description of pkey_alloc() 'flags' argument

prctl.2
  Michael Kerrisk
    Defer to capabilities(7) for discussion of the "keep capabilities" flag

recvmmsg.2
sendmmsg.2
  Nikola Forró
    Point out that error handling is unreliable

seccomp.2
  Michael Kerrisk
     Clarify that SECCOMP_RET_TRAP SIGSYS signal is thread-directed

syscalls.2
  Michael Kerrisk
    Add s390-specific s390_sthyi(2) to syscall list

unshare.2
  Michael Kerrisk
    Clarify that EUSERS occurred only until kernel 4.8

errno.3
  Michael Kerrisk
    'errno -s' can be used to search for errors by string in description
  Michael Kerrisk
    Add Linux error text corresponding to ENOMEM

fgetpwent.3
  Michael Kerrisk
    Add missing ATTRIBUTES preamble

fts.3
  Michael Kerrisk [Pradeep Kumar]
    fts_pathlen = strlen(fts_path) + strlen(fts_name)

fuse.4
  Michael Kerrisk
    Places errors in alphabetical order (no content changes)

veth.4
  Michael Kerrisk
    Add network_namespaces(7)

sysfs.5
  Michael Kerrisk
    Refer to cgroups(7) for information about files in /sys/kernel/cgroup

capabilities.7
  Michael Kerrisk
    Note which capability sets are affected by SECBIT_NO_SETUID_FIXUP
      Note explicitly
 that SECBIT_NO_SETUID_FIXUP is relevant for
      the permitted, effective, and ambient capability sets.
  Michael Kerrisk
    Deemphasize the ancient prctl(2) PR_SET_KEEPCAPS command
      The modern approach is SECBITS_KEEP_CAPS.
  Michael Kerrisk
    Clarify effect of CAP_SETFCAP
      Make it clear that CAP_SETFCAP allows setting arbitrary
      capabilities on a file.
  Michael Kerrisk
    Clarify which capability sets are effected by SECBIT_KEEP_CAPS
      This flag has relevance only for the process permitted and
      effective sets.
  Michael Kerrisk
    Rephrase CAP_SETPCAP description
      * Mention kernel versions.
      * Place current kernel behavior first
  Michael Kerrisk
    SECBIT_KEEP_CAPS is ignored if SECBIT_NO_SETUID_FIXUP is set
  Michael Kerrisk
    Ambient set is also cleared when UIDs are set to nonzero value

cgroups.7
  Michael Kerrisk
    Add a more complete description
 of cgroup v1 named hierarchies
  Michael Kerrisk
    Add a section on unmounting cgroup v1 filesystems

Michael Kerrisk
Add subsection describing cgroups v2 subtree delegation
Michael Kerrisk
Mention ENOENT error that can occur when writing to subtree_control file
Michael Kerrisk
Add list of currently available version 2 controllers
Nikolay Borisov
Add information about RDMA controller
Michael Kerrisk
Rewrite the description of cgroup v2 subtree control
Michael Kerrisk [Tejun Heo]
Note Linux 4.11 changes to cgroup v2 delegation containment rules
Michael Kerrisk
systemd(1) nowadays automatically mounts the cgroup2 filesystem
Michael Kerrisk
Clarify that cgroup.controllers is read-only
Michael Kerrisk
Elaborate a little on problems of splitting threads across cgroups in v1
Michael Kerrisk [Tejun Heo]
Tweak the description of delegation of cgroup.subtree_control

ip.7
Ricardo Biehl Pasquali
INADDR_* values cannot be assigned directly to 's_addr'
Michael Kerrisk
s/INADDR_ANY/INADDR_LOOPBACK/ in discussion of htonl()
INADDR_LOOPBACK is a better example, since it is not
byte-order neutral.

namespaces.7
network_namespaces.7
Michael Kerrisk
Move content from namespaces(7) to network_namespaces(7)

pid_namespaces.7
Michael Kerrisk
SEE ALSO: add mount_namespaces(7)

sched.7
Michael Kerrisk [Andrea Parri]
Correctly describe effect of priority changes for RT threads
The placement of a thread in the run queue for its new
priority depends on the direction of movement in priority.
(This appears to contradict POSIX, except in the case of
pthread_setschedprio().)

user_namespaces.7
Michael Kerrisk

Mention NS_GET_OWNER_UID ioctl() operation

========== Changes in man-pages-4.16 ==========

Released:
2018-04-30, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adam Borowski <kilobyte@angband.pl>
Andy Owen <andrew.owen@dolby.com>
Carlos O'Donell <carlos@redhat.com>
Carsten Grohmann <carstengrohmann@gmx.de>

Song Liu <songliubraving@fb.com>
Tomi Salminen <tsalminen@forcepoint.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

membarrier.2
  Mathieu Desnoyers [Michael Kerrisk]
    Document new membarrier commands introduced in Linux 4.16
      Document the following membarrier commands introduced in
      Linux 4.16:

          MEMBARRIER_CMD_GLOBAL_EXPEDITED
            (the old enum label MEMBARRIER_CMD_SHARED is now an
            alias to preserve header backward compatibility)
          MEMBARRIER_CMD_REGISTER_GLOBAL_EXPEDITED
          MEMBARRIER_CMD_PRIVATE_EXPEDITED_SYNC_CORE
          MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_SYNC_CORE

mmap.2
   Jan Kara [Ross Zwisler, Michael Kerrisk]
     Add description of MAP_SHARED_VALIDATE and MAP_SYNC
  Michal Hocko [John Hubbard, Michael Kerrisk, Jann Horn]
     Document new MAP_FIXED_NOREPLACE flag
       4.17+ kernels offer a new MAP_FIXED_NOREPLACE flag which allows
       the caller to atomically probe for a given address range.

readv.2
io_submit.2
  Jürg Billeter
     Document RWF_APPEND added in Linux 4.16

capabilities.7
  Michael Kerrisk
     Describe file capability versioning
  Michael Kerrisk [Serge E. Hallyn]
     Document namespaced-file capabilities
     [There's still more work to be done on this new text]

Changes to individual pages
---

bpf.2
  Michael Kerrisk
     Update list of architectures that support JITed eBPF
       And note kernel version numbers where support is added.
  Michael Kerrisk
     Kernel 4.15 added CONFIG_BPF_JIT_ALWAYS_ON

This causes the JIT compiler to be always on and
forces bpf_jit_enable to 1.

execve.2
Michael Kerrisk
Note that describing execve as "executing a new process" is misleading
This misdescription is so common that it's worth calling it out
explicitly.
Michael Kerrisk
More explicitly describe effect of execve() in the opening paragraph

fallocate.2
Michael Kerrisk
Since Linux 4.16, Btrfs supports FALLOC_FL_ZERO_RANGE

getrlimit.2
Michael Kerrisk
CAP_SYS_RESOURCE capability is required in *initial user namespace*

io_submit.2
Michael Kerrisk
Add kernel version numbers for various 'aio_rw_flags' flags
Michael Kerrisk
Place 'aio_rw_flags' in alphabetical order

mmap.2
Jann Horn
MAP_FIXED is okay if the address range has been reserved
Clarify that MAP_FIXED is appropriate if the specified address
range has been reserved using an existing mapping,
but shouldn't
be used otherwise.
Michael Kerrisk
Move the text on MAP_FIXED to NOTES
This text has become rather long, making it somewhat
unwieldy in the discussion of the mmap() flags. Therefore,
move it to NOTES, with a pointer in DESCRIPTION referring
the reader to NOTES.
Michael Kerrisk [Heinrich Schuchardt]
Clarify that when addr==NULL, address chosen by kernel is page-aligned
Michael Kerrisk
Add a little historical detail on the obsolete MAP_DENYWRITE

mount.2
Michael Kerrisk
ERRORS: add EBUSY for the case of trying to stack same mount twice
Michael Kerrisk

Remove a couple of obsolete EBUSY errors
As far as I can tell, these EBUSY errors disappeared
with the addition of stackable mounts in Linux 2.4.

msgget.2
semget.2
shmget.2
Michael Kerrisk
The purpose of "flags" == 0 is to obtain ID of an existing IPC object

This was implied in these pages, but the meaning of "flags" == 0
could be more explicit, as indicated by questions such as
https://stackoverflow.com/questions/49833569/flag-value-of-semget-function

open.2
Jann Horn
Document more -ETXTBSY conditions
Jakub Wilk
Add missing argument for snprintf() in example code

perf_event_open.2
Song Liu
Add type kprobe and uprobe
Two new types kprobe and uprobe are being added to
perf_event_open(), which allow creating kprobe or
uprobe with perf_event_open. This patch adds
information about these types.

ptrace.2
Jann Horn
Copy retval info for SECCOMP_GET_FILTER to right section
The "RETURN VALUE" section made a claim that was incorrect for
PTRACE_SECCOMP_GET_FILTER. Explicitly describe the behavior of
PTRACE_SECCOMP_GET_FILTER in the "RETURN VALUE" section (as
usual), but leave the
now duplicate description in the section
describing PTRACE_SECCOMP_GET_FILTER, since the
PTRACE_SECCOMP_GET_FILTER section would otherwise probably become
harder to understand.

readv.2
Michael Kerrisk
Remove redundant sentence

seccomp.2
Michael Kerrisk
Note that execve() may change syscall numbers during life of process
On a multiarch/multi-ABI platform such as modern x86, each

architecture/ABI (x86-64, x32, i386)has its own syscall numbers,
which means a seccomp() filter may see different syscall numbers
over the life of the process if that process uses execve() to
execute programs that has a different architectures/ABIs.
Michael Kerrisk
Note which architectures support seccomp BPF
Michael Kerrisk
In EXAMPLE, clearly note that x32 syscalls are >= X32_SYSCALL_BIT

shutdown.2
Carsten Grohmann
SEE ALSO: add close(2)

syscall.2
Adam
Borowski
Add riscv

wait.2
Michael Kerrisk [Robin Kuzmin]
wait() and waitpid() block the calling thread (not process)

wait4.2
Michael Kerrisk [Martin Mares]
Soften the warning against the use of wait3()/wait4()
These functions are nonstandard, but there is no replacement.

See https://bugzilla.kernel.org/show_bug.cgi?id=199215

crypt.3
encrypt.3
Carlos O'Donell [Michael Kerrisk]
Add notes about _XOPEN_CRYPT
The distribution may choose not to support _XOPEN_CRYPT in the
case that the distribution has transitioned from glibc crypt to
libxcrypt.

fseek.3
Michael Kerrisk [Andy Owen]
ERRORS: EBADF should be ESPIPE
Michael Kerrisk
Improve EPIPE error text

getcwd.3
Carlos O'Donell
Mention that "(unreachable)" is no longer returned for glibc >= 2.27.

makedev.3

Michael Kerrisk
Since glibc 2.28, <sys/types.h> no longer defines these macros

pthread_create.3
Frederic Brault
Note default thread stack size for several architectures

tsearch.3
Jann Horn
Clarify items vs nodes
The manpage claimed that tsearch() returns a pointer to a data item. This is incorrect; tsearch() returns a pointer to the corresponding tree node, which can also be interpreted as a pointer to a pointer to the data item.

Since this API is quite unintuitive, also add a clarifying sentence.
Jann Horn
tdelete() can return dangling pointers
POSIX says that deleting the root node must cause tdelete() to return some unspecified non-NULL pointer. Glibc implements it by returning a dangling pointer to the (freed) root node.
Therefore, explicitly note that tdelete() may return bad pointers that must not be accessed.

elf.5
Michael Kerrisk
SEE ALSO: add patchelf(1)

filesystems.5
Michael Kerrisk
Add an entry for tmpfs(5)

group.5
Michael Kerrisk
SEE ALSO: add vigr(8)

passwd.5
Michael Kerrisk
SEE ALSO: add vipw(8)

sysfs.5
Michael Kerrisk
Add brief note on /sys/fs/smackfs

tmpfs.5
Mike Frysinger
Document current mount options

Some of this content is moved from the mount(8) man page.
Style was based on proc(5) sections.
Michael Kerrisk
Remove reference to mount(8) for discussion of mount options
The mount options are now described in this page.
Michael Kerrisk
SEE ALSO: add Documentation/vm/transhuge.txt
Michael Kerrisk
Reformat 'huge' and 'mpol' mount option values as lists
Michael Kerrisk
Describe 'mpol' mount options
Based on text from Documentation/filesystems/tmpfs.txt.
Michael Kerrisk
Document 'huge' mount options
Based on text from Documentation/vm/transhuge.txt.
Michael Kerrisk
SEE ALSO: add set_mempolicy(2)
Michael Kerrisk
Document mpol=local mount option

capabilities.7
Michael Kerrisk
Remove redundant mention of PTRACE_SECCOMP_GET_FILTER

cgroups.7
Michael Kerrisk
cgroup.events transitions generate POLLERR as well as POLLPRI

mount_namespaces.7
Michael Kerrisk
Note another case where shared "peer groups" are formed

namespaces.7
Michael Kerrisk [Konstantin Khlebnikov]
Mention that device ID should also be checked when comparing NS symlinks
When comparing two namespaces symlinks to see if they refer to
the same namespace, both the inode number and the device ID
should be compared. This point was already made clear in
ioctl_ns(2), but was missing from this page.
Michael Kerrisk
Note an idiosyncrasy of /proc/[pid]/ns/pid_for_children
/proc/[pid]/ns/pid_for_children has a value only after first
child is
created in PID namespace. Verified by experiment.

network_namespaces.7
Michael Kerrisk
Network namespaces isolate the UNIX domain abstract socket namespace

Michael Kerrisk
Add cross reference to unix(7)
For further information on UNIX domain abstract sockets.

posixoptions.7
Carlos O'Donell
Expand XSI Options groups
We define in detail the X/Open System Interfaces i.e. _XOPEN_UNIX
and all of the X/Open System Interfaces (XSI) Options Groups.

The XSI options groups include encryption, realtime, advanced
realtime, realtime threads, advanced realtime threads, tracing,
streams, and legacy interfaces.
Michael Kerrisk
Use a more consistent, less cluttered layout for option lists
Michael Kerrisk
Make function lists more consistent and less cluttered
Use more consistent layout for lists of functions, and
remove punctuation from the lists
to make them less cluttered.

socket.7
Michael Kerrisk [Tomi Salminen]
Fix error in SO_INCOMING_CPU code snippet
The last argument is passed by value, not reference.

time.7
Michael Kerrisk [Enrique Garcia]
Mention clock_gettime()/clock_settime() rather than [gs]ettimeofday()
gettimeofday() is declared obsolete by POSIX. Mention instead
the modern APIs for working with the realtime clock.

See https://bugzilla.kernel.org/show_bug.cgi?id=199049

unix.7
Michael Kerrisk [Rusty Russell]
ERRORS: add EBADF for sending closed file descriptor with SCM_RIGHTS

vdso.7
Michael Kerrisk
VDSO symbols (system calls) are not visible to seccomp(2) filters

xattr.7
Michael Kerrisk
SEE ALSO: add selinux(8)

ld.so.8
Mike Frysinger

Make lack of separator escaping explicit
Make it clear that the delimiters in LD_PRELOAD, LD_LIBRARY_PATH,
and LD_AUDIT cannot be escaped
so people don't try various methods
(such as \:) to workaround it.
Michael Kerrisk
Remove unneeded mention of PATH in discussion of LD_LIBRARY_PATH
This brief sentence doesn't add value to the text.

========== Changes in man-pages-5.00 ==========

Released: 2019-03-06, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

s390_guarded_storage.2
  Eugene Syromyatnikov
    New page documenting s390_guarded_storage(2) s390-specific system call

address_families.7
  Michael Kerrisk [Eugene Syromyatnikov]
    New page that contains details of socket address families
      There is too much detail in socket(2). Move most of it into
      a new page instead.

bpf-helpers.7
  Michael
Kerrisk [Daniel Borkmann, Quentin Monnet]
    Add new man page for eBPF helper functions
      (autogenerated from kernel source files)

Removed Pages
---

mdoc.7
mdoc.samples.7
  Michael Kerrisk [Ingo Schwarze]
    Remove mdoc(7) and mdoc.samples(7)
      groff_mdoc(7) from the groff project provides a better
      equivalent of mdoc.samples(7) and the 'mandoc' project
      provides a better mdoc(7). And nowadays, there are virtually

no pages in "man-pages" that use mdoc markup.

Newly documented interfaces in existing pages
---

fanotify_init.2
fanotify.7
  nixiaoming [Amir Goldstein, Michael Kerrisk]
    Document FAN_REPORT_TID
      fanotify_init.2: add new flag FAN_REPORT_TID
      fanotify.7: update description of member pid in
        struct fanotify_event_metadata
  Amir Goldstein
    Document FAN_MARK_FILESYSTEM
      Monitor fanotify
 events on the entire filesystem.
  Matthew Bobrowski [Amir Goldstein]
    Document FAN_OPEN_EXEC and FAN_OPEN_EXEC_PERM

io_submit.2
  Adam Manzanares
    Document IOCB_FLAG_IOPRIO

msgctl.2
semctl.2
shmctl.2
  Davidlohr Bueso [Joe Lawrence, Michael Kerrisk]
    Document STAT_ANY commands

prctl.2
  Konrad Rzeszutek Wilk [Michael Kerrisk]
    Document PR_SET_SPECULATION_CTRL and PR_GET_SPECULATION_CTRL

sched_setattr.2
  Claudio Scordino [Michael Kerrisk]
    Document SCHED_FLAG_DL_OVERRUN and SCHED_FLAG_RECLAIM

socket.2
  Tobias Klauser
    Document AF_XDP
      Document AF_XDP added in Linux 4.18.

inotify.7
  Henry Wilson
    Document IN_MASK_CREATE

unix.7

Michael Kerrisk
Document SO_PASSSEC
Michael Kerrisk
Document SCM_SECURITY ancillary data

New and changed links
---

reallocarray.3
Michael Kerrisk
New link to malloc(3)

precedence.7
Josh Triplett
Add as a redirect
to operator.7

Global changes

Various pages
Michael Kerrisk [G. Branden Robinson]
Use '\e' rather than '\\' to get a backslash

Various pages
Michael Kerrisk [Bjarni Ingi Gislason, G. Branden Robinson]
Use zerowidth space in appropriate locations

Various pages
Michael Kerrisk
Clarify the distinction between "file descriptor" and "file description"

Various pages
Mike Rapoport
Update paths for in-kernel memory management documentation files

A few pages
Michael Kerrisk
Change references to '2.6.0-test*' series kernels to just '2.6.0'

Changes to individual pages
---

iconv.1
Marko Myllynen

SEE ALSO: add uconv(1)

localedef.1
Howard Johnson
Note that -f and -c, are reversed from what you might expect

time.1
Michael Kerrisk [Johannes Altmanninger]
Document the -q/--quiet option
Jakub Wilk
Update bug reporting address

bpf.2
Tobias
Klauser
Update JIT support list for Linux 4.18
JIT support for x86-32 was during the Linux 4.18 release cycle.
Also correct the entry for MIPS (only MIPS64 is supported).
Oded Elisha
Fix bug in example
Quentin Monnet
SEE ALSO: add bpf-helpers(7)

capget.2
Michael Kerrisk
Remove crufty sentence suggesting use of deprecated functions
Remove crufty sentence suggesting use of deprecated capsetp(3) and
capgetp(3); the manual page for those functions has long (at least
as far back as 2007) noted that they are deprecated.
Michael Kerrisk
Remove first paragraph, which repeats details from capabilities(7)

chroot.2
Michael Kerrisk
Mention /proc/[pid]/root

clock_getres.2
Michael Kerrisk [Jens Thoms Toerring]
CLOCK_MONOTONIC_RAW does not count while the system is suspended
Michael Kerrisk [Jens Thoms Toerring]
On Linux CLOCK_MONOTONIC counts
time that the system has run since boot
Michael Kerrisk [Jens Thoms Toerring]
CLOCK_MONOTONIC does not count while the system is suspended
Michael Kerrisk
ERRORS: add EINVAL error for noncanonical clock_settime() value

clone.2

Michael Kerrisk
Rework discussion of threads and signals
The discussion is phrased in terms of signals sent using kill(2),
but applies equally to a signal sent by the kernel.
Jann Horn
Pending CLONE_NEWPID prevents thread creation
Michael Kerrisk
Clarify the discussion of threads and signals
And explicitly introduce the terms "process-directed" and
"thread-directed" signals.
Eugene Syromyatnikov
Add information about clone and clone2 on IA-64
Michael Kerrisk
ERRORS: EINVAL occurs with CLONE_NEWUSER if !CONFIG_USER_NS

connect.2
Benjamin Peterson
Document error semantics of nonblocking UNIX domain sockets

epoll_ctl.2
Michael Kerrisk
Use the term "interest list" consistently

epoll_wait.2
Michael Kerrisk
Clarify the behavior when epoll_wait()-ing on an empty interest list
Michael Kerrisk
Note that epoll_wait() round robins through the set of ready descriptors

eventfd.2
Michael Kerrisk
Move text noting that eventfd() creates a FD earlier in the page

fcntl.2
Michael Kerrisk
Actual pipe capacity may in practice be less than nominal capacity
The number of bytes that can be written to the pipe may be less
(sometimes substantially less) than the nominal capacity.
Eugene Syromyatnikov
Mention that l_sysid is not used even if present
Michael Kerrisk
Briefly explain the meaning of the 'l_sysid' field in 'struct flock'

futex.2
Benjamin Peterson
Make the example use C11 atomics rather than GCC builtins

getcpu.2

Tobias Klauser [Michael Kerrisk]
getcpu() now has a glibc wrapper;
remove mention of syscall(2)
The glibc wrapper was added in glibc 2.29, release on 1 Feb 2019.

getgid.2
getpid.2
getuid.2
pipe.2
syscall.2
Eugene Syromiatnikov [Michael Kerrisk]
Describe 2nd return value peculiarity
Some architectures (ab)use second return value register for
additional return value in some system calls. Let's describe this.

getgroups.2
Michael Kerrisk
Note that a process can drop all groups with: setgroups(0, NULL)

getrlimit.2
Eugene Syromyatnikov
Note that setrlimit(RLIMIT_CPU) doesn't fail
Michael Kerrisk
Resource limits are process-wide attributes shared by all threads
This was already noted in pthreads(7), but bears repeating here.
Eugene Syromyatnikov
Correct information about large limits on 32-bit architectures

gettid.2
Michael Kerrisk
Glibc provides a wrapper since version 2.30

gettimeofday.2
Michael Kerrisk
ERRORS: add EINVAL
for noncanonical 'tv' argument to settimeofday()

gettimeofday.2
clock_getres.2
Michael Kerrisk [Jens Thoms Toerring]
ERRORS: EINVAL can occur if new real time is less than monotonic clock

getxattr.2
removexattr.2
setxattr.2
Michael Kerrisk [Andreas Gruenbacher, Enrico Scholz]
ERRORS: replace ENOATTR with ENODATA
See also https://bugzilla.kernel.org/show_bug.cgi?id=201995

inotify_add_watch.2
  Paul Millar
    Add IN_ONLYDIR based error
  Henry Wilson
    Note errors that can occur for IN_MASK_CREATE

io_submit.2
  Jeff Moyer
    Fix the description of aio_data
      aio_data is not a kernel-internal field.

madvise.2
  Michal Hocko [Niklas Hambüchen]
    MADV_FREE clarify swapless behavior

memfd_create.2
  Marc-André Lureau
    Update hugetlb file-sealing support
  Lucas De Marchi
    Fix header for memfd_create()
  Joseph C. Sible
    _GNU_SOURCE is required

mmap.2
  Elliott Hughes

  Explicitly state that the fd can be closed
  Jann Horn [Michal Hocko, William Kucharski]
    Fix description of treatment of the hint
      The current manpage reads as if the kernel will always pick a free
      space close to the requested address, but that's not the case.

mount.2
  Michael Kerrisk
    Clearly distinguish per-mount-point vs per-superblock mount flags
  Michael Kerrisk
    MS_SILENT is ignored when changing propagation type
  Michael Kerrisk
    Attempts to change MS_SILENT setting during remount are silently ignored
  Michael Kerrisk [Harry Mallon]
    Document EROFS for read-only filesystems
      See https://bugzilla.kernel.org/show_bug.cgi?id=200649
  Michael Kerrisk
    Clarify that per-superblock flags are shared during remount
  Michael Kerrisk
    Remove crufty sentence about MS_BIND + MS_REMOUNT
  Michael Kerrisk

Mention /proc/PID/mountinfo
Many people are unaware of the /proc/PID/mountinfo
file. Provide
a helpful clue here.
Michael Kerrisk
Mandatory locking also now requires CONFIG_MANDATORY_FILE_LOCKING
Michael Kerrisk [Simone Piccardi]
Add MS_STRICTATIME to list of flags that can be used in remount
Michael Kerrisk
EACCES: note some reasons why a filesystem may be read-only
Michael Kerrisk
SEE ALSO: add ioctl_iflags(2)

msgop.2
Michael Kerrisk
Correct the capability description for msgsnd() EACCESS error

nfsservctl.2
Michael Kerrisk
Add VERSIONS section noting that this system call no longer exists

open.2
Lucas Werkmeister
Document ENXIO for sockets
Michael Kerrisk
Clarify a special use case of O_NONBLOCK for devices
Eugene Syromiatnikov
Mention presence of unused O_RSYNC definition
O_RSYNC is defined in <asm/fcntl.h> on HP PA-RISC, but is not
used anyway.
Eugene Syromiatnikov
Document FASYNC usage
in Linux UAPI headers
Andrew Price
Remove O_DIRECT-related quotation
Remove a section that adds no benefit to the discussion of O_DIRECT.
Michael Kerrisk [Robin Kuzmin]
Clarify that O_NONBLOCK has no effect on poll/epoll/select

perf_event_open.2
Vince Weaver [Wang Nan]
Document the PERF_EVENT_IOC_PAUSE_OUTPUT ioctl
The PERF_EVENT_IOC_PAUSE_OUTPUT ioctl was introduced in Linux 4.7.
Vince Weaver
Fix wording in multiplexing description
Vince Weaver
Clarify exclude_idle
Vince Weaver

Document the PERF_EVENT_IOC_QUERY_BPF ioctl
Vince Weaver
Document the PERF_EVENT_IOC_MODIFY_ATTRIBUTES ioctl
Vince Weaver
Fix prctl behavior description

pivot_root.2
Elvira Khabirova
Explain the initramfs case and point to switch_root(8)
Joseph Sible [Joseph C. Sible]
Document EINVAL if root is rootfs

pkey_alloc.2
Michael Kerrisk [Szabolcs Nagy]
Switch
to glibc prototype in SYNOPSIS

poll.2
Michael Kerrisk
Note that poll() and ppoll() are not affected by O_NONBLOCK

posix_fadvise.2
Eugene Syromyatnikov
Describe the difference between fadvise64/fadvise64_64

prctl.2
Benjamin Peterson
PR_SET_MM_EXE_FILE may now be used as many times as desired
Michael Kerrisk
Add some further historical details on PR_SET_MM_EXE_FILE
Michael Kerrisk [Jann Horn]
Explain the circumstances in which the parent-death signal is sent
Michael Kerrisk
Rework the PR_SET_PDEATHSIG description a little, for easier readability
Michael Kerrisk
Add additional info on PR_SET_PDEATHSIG
The signal is process directed and the siginfo_t->si_pid
filed contains the PID of the terminating parent.
Michael Kerrisk
Note libcap(3) APIs for operating on ambient capability set
(However, the libcap APIs do not yet seem to have
manual pages...)
Michael Kerrisk
Mention libcap APIs for operating on capability bounding set

ptrace.2
Dmitry V. Levin
Do not say that PTRACE_O_TRACESYSGOOD may not work

Jann Horn
BUGS: ptrace() may set errno to zero

readdir.2
Eugene Syromyatnikov
Fix struct old_linux_dirent in accordance with current definition

readv.2
Xiao Yang [Florian Weimer]
Fix wrong errno for an unknown flag

rename.2
Michael Kerrisk
glibc 2.28 adds library support for renameat2()
Tobias Klauser
Add feature test macro for renameat2()
The glibc wrapper for renameat2() was added in glibc 2.28 and
requires _GNU_SOURCE.
Eugene Syromiatnikov
Some additional notes regarding RENAME_WHITEOUT
Lucas Werkmeister [Michael Kerrisk]
Add kernel versions for RENAME_NOREPLACE support
Michael Kerrisk
Rework list of supported filesystems for RENAME_NOREPLACE
Tobias Klauser
renameat2()
now has a glibc wrapper; remove mention of syscall(2)

s390_runtime_instr.2
Eugene Syromyatnikov
Add a note about runtime_instr.h availability

s390_sthyi.2
Eugene Syromyatnikov [Heiko Carstens]
Some minor additions

sched_setattr.2
Michael Kerrisk
Add a bit more detail for SCHED_DEADLINE

sched_setparam.2
Michael Kerrisk
Clarify that scheduling parameters are per-thread (not per-process)

seccomp.2
Michael Kerrisk
(Briefly) document SECCOMP_FILTER_FLAG_SPEC_ALLOW
Michael Kerrisk

SEE ALSO: add bpfc(1)

select.2
Michael Kerrisk
BUGS: the use of value-result arguments is a design bug
Michael Kerrisk [Robin Kuzmin]
Note that select() and pselect() are not affected by O_NONBLOCK

select_tut.2
Michael Kerrisk [Antonio Chirizzi]
Diagnose inet_aton() errors with simple fprintf() (not perror())

setgid.2
Michael Kerrisk
Clarify EPERM capability requirements with respect
to user namespaces

setns.2
Michael Kerrisk
When joining a user namespace, it must be a descendant user namespace
Michael Kerrisk
Note capability requirements for changing PID namespace
Note capability requirements for changing network, IPC, or UTS namespace
Note capability requirements for changing cgroup namespace
Michael Kerrisk
Some text restructuring and reordering

set_thread_area.2
Eugene Syromyatnikov
Mention related prctl() requests in SEE ALSO
Eugene Syromyatnikov
Mention that get_thread_area() is also Linux-specific
Eugene Syromyatnikov
Describe set_thread_area()/get_thread_area() on m68k/MIPS

setuid.2
Michael Kerrisk
Clarify EPERM capability requirements with respect to user namespaces

sigaction.2
Eugene Syromyatnikov [Michael Kerrisk]
Describe obsolete usage of struct sigcontext as signal handler argument

sigsuspend.2
Michael Kerrisk
Clarify that
sigsuspend() suspends the calling *thread*

socket.2
  Michael Kerrisk
    Remove references to external docs
      This information is all in the new address_families(7)
  Michael Kerrisk
    Add cross reference to address_families(7)
  Eugene Syromyatnikov
    Reinstate AF_VSOCK mention
  Michael Kerrisk
    Simplify list of address families
      Remove many of the details that are in address_families(7)
  Nikola Forró
    Remove notes concerning AF_ALG and AF_XDP
      All address families are now documented in address_families.7.
  Michael Kerrisk
    Remove some more obscure protocols from address family list
      The list of address families in this page is still
      overwhelmingly long. So let's shorten it.
      The removed entries are all in address_families(7).
  Michael Kerrisk
    Remove a few obsolete protocols
      Documentation for these remains in address_families(7)

socketpair.2
   Eugene Syromyatnikov
    Note that AF_TIPC also supports socketpair(2)
      Introduced by Linux commit v4.12-rc1~64^3~304^2~1.

stat.2
  Michael Kerrisk [Alessandro Vesely]
    ERRORS: ENOENT can occur where a path component is a dangling symlink
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=909789
  Benjamin Peterson
    SEE ALSO: add statx(2)

statx.2
  Tobias Klauser [Michael Kerrisk]
    statx() now has a glibc wrapper; remove mention of syscall(2)

syscall.2
  Eugene Syromyatnikov [Michael Kerrisk]
    Elaborate x32 ABI specifics
  snyh
    Fix wrong retval register number in alpha architecture
  Helge Deller
    parisc needs care with syscall parameters
  Michael Kerrisk
    Rework table to render within 80 columns

syscalls.2
  Eugene Syromyatnikov
    Change example of a thin syscall wrapper to chdir()
      As truncate(3) should dispatch between truncate/truncate64,
      as noted
later in the page.
  Eugene Syromyatnikov [Michael Kerrisk]
    Update syscall table
      Added: arc_gettls, arc_settls, arc_usr_cmpxchg, arch_prctl,
      atomic_barrier, atomic_cmpxchg_32, bfin_spinlock, breakpoint,
      clone2, cmpxchg, cmpxchg_badaddr, dma_memcpy, execv, get_tls,
      getdomainname, getdtablesize, gethostname, getxgid, getxpid,
      getxuid, metag_get_tls, metag_set_fpu_flags,metag_set_tls,
      metag_set_global_bit, newfstatat, old_adjtimex, oldumount,
      or1k_atomic, pread, pwrite, riscv_flush_icache,
      sched_get_affinity, sched_set_affinity, set_tls, setaltroot,
      sethae, setpgrp, spill, sram_alloc, sram_free, swapcontext,
      switch_endian, sys_debug_setcontext, syscall, sysmips, timerfd,
      usr26, usr32, xtensa.

      Uncommented: memory_ordering

      Renamed: ppc_rtas to rtas (__NR_rtas), ppc_swapcontext to
      swapcontext (__NR_swapcontext).
   Eugene Syromyatnikov
    Note about s390x and old_mmap
  Michael Kerrisk
    Add s390_guarded_storage(2)
  Michael Kerrisk
    Update syscall list for Linux 4.18
  Eugene Syromyatnikov
    Note that not all architectures return errno negated
  Helge Deller
    parisc Linux does not any longer emulate HP-UX
  Michael Kerrisk
    Comment out details of a few system calls that only ever briefly existed

unshare.2
  Michael Kerrisk [Shawn Landden]
    Same EINVAL errors as for clone(2) can also occur with unshare(2)
  Tycho Andersen
    Note EINVAL when unsharing pid ns twice
      The kernel doesn't allow unsharing a pid NS if it has
      previously been unshared.

ustat.2
  Michael Kerrisk

Starting with version 2.28, glibc no longer provides a wrapper function

vmsplice.2
  Andrei Vagin
    Note that vmsplice can splice pages from pipe to memory

wait.2
  Michael Kerrisk
    Add some cross references
 to core(5)

write.2
  Michael Kerrisk [Nadav Har'El]
    RETURN VALUE: clarify details of partial write and
      https://bugzilla.kernel.org/show_bug.cgi?id=197961
  Goldwyn Rodrigues
    Add details on partial direct I/O writes

alloca.3
  Michael Kerrisk [Robin Kuzmin]
    Prevent any misunderstanding about when allocated memory is released

bsd_signal.3
  Xiao Yang
    Fix the wrong version of _POSIX_C_SOURCE

bstring.3
  Michael Kerrisk [Emil Fihlman]
    Correct argument list for memmem() prototype

cmsg.3
  Michael Kerrisk
    Explain zero-initialization requirement for CMSG_NXTHDR()
  Michael Kerrisk
    Remove out of place mention of MSG_CTRUNC
      This detail is covered in recvmsg(2), and now also in unix(7).
  Michael Kerrisk
    Note that CMSG_FIRSTHDR can return NULL
  Michael Kerrisk
    Remove unnecessary 'fdptr' intermediate variable in example code

des_crypt.3
encrypt.3
  Michael Kerrisk

 The functions described in these pages are removed in glibc 2.28

dlsym.3

Michael Kerrisk
Describe a case where a symbol value may be NULL

errno.3
Michael Kerrisk [Robert P. J. Day]
Mention that errno(1) is part of the 'moreutils' package

exec.3
Michael Kerrisk [Eugene Syromyatnikov]
Note that SPARC provides an execv() system call

exit.3
Mike Frysinger
Note wider sysexits.h availability

ferror.3
Elliot Hughes
Warn about closing the result of fileno()

fnmatch.3
Elliott Hughes
Clarify "shell wildcard pattern"

getaddrinfo.3
Michael Kerrisk [Eric Sanchis]
Fix off-by-one error in example client program

getcwd.3
Michael Kerrisk
Rework text on use of getcwd() system call
Make it clear that all of the library functions described on this
page will use the getcwd() system call if it is present.
Michael Kerrisk
Add details on the getcwd() syscall and how it
used by libc functions
Michael Kerrisk
Reorder the text describing "(unreachable)" being returned by getcwd()

getmntent.3
Elliot Hughes
Clarify that endmntent() should be used rather than fclose()

isatty.3
Michael Kerrisk [Jakub Wilk]
Most non-tty files nowadays result in the error ENOTTY
Historically, at least FIFOs and pipes yielded the error EINVAL.

lockf.3

Ian Turner
ERRORS: add EINTR

malloc.3
Michael Kerrisk
Add reference to glibc MallocInternals wiki
Michael Kerrisk
Note that calloc() detects overflow when multiplying its arguments
Michael Kerrisk
Since glibc 2.29, reallocarray() is exposed by defining _DEFAULT_SOURCE
Info gleaned from glibc NEWS file.

pthread_attr_init.3
Michael Kerrisk [Göran Häggsjö, Jakub Wilk]
Use correct printf() specifier for "size_t" in example program

pthread_rwlockattr_setkind_np.3
Carlos O'Donell
Remove bug notes

pthread_setname_np.3
Jakub Wilk
Explain _np suffix
Add text to CONFORMING TO explaining that the "_np"
suffix is because these functions are non-portable.

putenv.3
Michael Kerrisk
Note a glibc extension: putenv("NAME") removes an environment variable

resolver.3
Michael Becker
Add documentation of res_nclose()

strcmp.3
Heinrich Schuchardt
Clarify that strcmp() is not locale aware

strcpy.3
Matthew Kilgore
Fix example code for strncpy, which could pass an incorrect length
Michael Kerrisk [Frank Theile]
Use "destination" consistently (instead of "target" sometimes)

strfry.3
Keith Thompson
Remove incorrect reference to rand(3)

string.3
strlen.3
strnlen.3
  Michael Kerrisk [Jakub Wilk]
    Use 'bytes' not 'characters'
      This is in line with POSIX terminology.

system.3
  Michael Kerrisk [Jonny Grant]
    Use '(char *) NULL' rather than '(char *) 0'
  Michael
 Kerrisk
    Note that system() can fail for the same reasons as fork(2)
  Arkadiusz Drabczyk
    Mention that 'errno' is set on error

termios.3
  Eugene Syromyatnikov
    Note an XTABS alpha issue

trunc.3
  Michael Kerrisk [Eric Benton, G. Branden Robinson]
    Make the description a little clearer
  Michael Kerrisk
    Emphasize that the return value is a floating-point number

xcrypt.3
  Jason A. Donenfeld
    Warn folks not to use these functions

lirc.4
  Sean Young
    Fix broken link
  Sean Young
    Document error returns more explicitly
  Sean Young
    lirc.h include file is in /usr/include/linux/lirc.h
  Sean Young [Alec Leamas, Mauro Carvalho Chehab]
    Remove ioctls and feature bits which were never implemented
  Sean Young
    Unsupported ioctl() operations always return ENOTTY
  Sean Young
    LIRC_MODE_LIRCCODE has been replaced by LIRC_MODE_SCANCODE
  Sean Young
    Document remaining
 ioctl (LIRC_GET_REC_TIMEOUT)
      Now all ioctls are documented.
  Sean Young

Timeout reports are enabled by default
Sean Young
Some devices are send only
Sean Young
Update SEE ALSO
Sean Young
LIRC_CAN_SET_REC_DUTY_CYCLE_RANGE was never supported
No driver ever supported such a thing.
Michael Kerrisk
Clarify the description LIRC_SET_REC_TIMEOUT

tty.4
Michael Witten
Add `vcs(4)' and `pty(7)' to the `SEE ALSO' section

vcs.4
Mattias Engdegård [Michael Witten]
Fix broken example code

core.5
Michael Kerrisk
Add cross reference to vdso(7) where "virtual DSO" is mentioned

filesystems.5
Eugene Syromyatnikov
Mention sysfs(2)

host.conf.5
Nikola Forró
Clarify glibc versions in which spoof options were removed

proc.5
Michael Kerrisk [Philip Dumont]
Document /proc/[tid]
See also https://bugzilla.kernel.org/show_bug.cgi?id=201441
Michael Kerrisk
Add an overview section describing the groups of files under /proc
Keno Fischer [Robert O'Callahan]
Correct description of NStgid
Lucas Werkmeister
Document fdinfo format for timerfd
Stephan Knauss
Mention /proc/uptime includes time spent in suspend
Michael Kerrisk
Reword /proc/PID/fdinfo timerfd field descriptions as a hanging list
Michael Kerrisk
SEE ALSO: add htop(1) and pstree(1)
fs/proc/uptime.c:uptime_proc_show() fetches time using

ktime_get_boottime which includes the time spent in suspend.
Michael Kerrisk
Document /proc/PID/status CoreDumping field
Michael Kerrisk
Mention choom(1) in discussion of /proc/[pid]/oom_score_adj
Michael Kerrisk
Add a few details on /proc/PID/fdinfo timerfd
Michael Kerrisk
Document /proc/meminfo KReclaimable field
Michael Kerrisk
Explain how to determine top-most mount in /proc/PID/mountinfo
Explain how to determine the top-most mount at a particular location by inspecting /proc/PID/mountinfo.
Michael Kerrisk [Jakub Wilk]
Remove bogus suggestion to use cat(1) to read files containing '\0'
Michael Kerrisk
Refer to mount(2) for explanation of mount vs superblock options
Michael Kerrisk
Fix description of /proc/PID/* ownership to account for user namespaces
Elvira Khabirova
Describe ambiguities in /proc/<pid>/maps
Michael Kerrisk [Nick Gregory]
Since Linux 4.5, "stack:" is no longer shown in /proc/PID/maps
Nikola Forró
Document /proc/[pid]/status Speculation_Store_Bypass field
Alan Jenkins
Vmalloc information is no longer calculated (Linux 4.4)
Michael Kerrisk [Alexander E. Patrakov, Jakub Wilk, Michael Kerrisk]
Use 'tr '\000' '\n' to display contents of /proc/PID/environ
Michael Kerrisk
Setting dumpable to 1 reverts ownership of /proc/PID/*
to effective IDs
Michael Kerrisk
Document /proc/meminfo LazyFree field
Michael Kerrisk
Fix kernel source pathname for soft-dirty documentation
Michael Kerrisk
/proc/[pid]/status VmPMD field was removed in Linux 4.15

resolv.conf.5
Nikola Forró
Document no-reload (RES_NPRELOAD) option

tzfile.5
Paul Eggert
Sync from tzdb upstream

capabilities.7

Michael Kerrisk
Fix some imprecisions in discussion of namespaced file capabilities
The file UID does not come into play when creating a v3
security.capability extended attribute.
Michael Kerrisk
Note that v3 security.attributes are transparently created/retrieved
Michael Kerrisk
Improve the discussion of when file capabilities are ignored
The text stated that the execve() capability transitions are not
performed for the same reasons that setuid and setgid mode bits
may be ignored (as
described in execve(2)). But, that's not quite
correct: rather, the file capability sets are treated as empty
for the purpose of the capability transition calculations.
Michael Kerrisk
Rework bounding set as per-thread set in transformation rules
Michael Kerrisk
Substantially rework "Capabilities and execution of programs by root"
Rework for improved clarity, and also to include missing details
on the case where (1) the binary that is being executed has
capabilities attached and (2) the real user ID of the process is
not 0 (root) and (3) the effective user ID of the process is 0
(root).
Marcus Gelderie
Add details about SECBIT_KEEP_CAPS
The description of SECBIT_KEEP_CAPS is misleading about the
effects on the effective capabilities of a process during a
switch to nonzero UIDs. The effective set is cleared based on
the
effective UID switching to a nonzero value, even if
SECBIT_KEEP_CAPS is set. However, with this bit set, the
effective and permitted sets are not cleared if the real and
saved set-user-ID are set to nonzero values.
Marcus Gelderie
Mention header for SECBIT constants
Mention that the named constants (SECBIT_KEEP_CAPS and others)
are available only if the linux/securebits.h user-space header
is included.
Michael Kerrisk
Add text introducing bounding set along with other capability sets
Michael Kerrisk [Allison Randal]
Update URL for location of POSIX.1e draft standard
Michael Kerrisk
CAP_SYS_CHROOT allows use of setns() to change the mount namespace
Michael Kerrisk [Pierre Chifflier]
Ambient capabilities do not trigger secure-execution mode
Michael Kerrisk
Add a subsection on per-user-namespace "set-user-ID-root" programs

Michael Kerrisk
Rework discussion of exec and UID 0, correcting a couple of details
Clarify the "Capabilities and execution of programs by root"
section, and correct a couple of details:
* If a process with rUID == 0 && eUID != 0 does an exec,
the process will nevertheless gain effective capabilities
if the file effective bit is set.
* Set-UID-root programs only confer a full set of capabilities
if the binary does not also have attached capabilities.
Michael Kerrisk
Update URL for libcap tarballs
The previous location does not seem to be getting updated.
(For example, at the time of this commit, libcap-2.26
had been out for two months, but was not present at
http://www.kernel.org/pub/linux/libs/security/linux-privs.
Michael Kerrisk
Clarify which capability sets capset(2) and capget(2) apply to
capset(2) and capget(2) apply
operate only on the permitted,
effective, and inheritable process capability sets.
Michael Kerrisk
Correct the description of SECBIT_KEEP_CAPS
Michael Kerrisk
Add background details on capability transformations during execve(2)
Add background details on ambient and bounding set when
discussing capability transformations during execve(2).
Michael Kerrisk
Document the 'no_file_caps' kernel command-line option

cgroup_namespaces.7
Michael Kerrisk [Troy Engel]
Clarify the example by making an implied detail more explicit.
See https://bugzilla.kernel.org/show_bug.cgi?id=201047

cgroups.7
Michael Kerrisk
Add more detail on v2 'cpu' controller and realtime threads
Explicitly note the scheduling policies that are relevant for the
v2 'cpu' controller.
Michael Kerrisk
Document the use of 'cgroup_no_v1=named' to disable v1 named hierarchies

This feature was added in Linux 5.0.
Michael Kerrisk [Mike Weilgart]
Complete partial sentence re kernel boot options and 'nsdelegate'
https://bugzilla.kernel.org/show_bug.cgi?id=201029
Michael Kerrisk
Reframe the text on delegation to include more details about cgroups v1

Michael Kerrisk [Leah Hanson]
Rework discussion of writing to cgroup.type file
In particular, it is possible to write "threaded" to a
cgroup.type file if the current type is "domain threaded".
Previously, the text had implied that this was not possible.
Michael Kerrisk [Balbir Singh, Marcus Gelderie]
Soften the discussion about delegation in cgroups v1
Balbir pointed out that v1 delegation was not an accidental
feature.

epoll.7
Michael Kerrisk
Introduce the terms "interest list" and "ready list"
Michael Kerrisk
Consistently use the term "interest list" rather than "epoll
set"
Michael Kerrisk
Reformat Q&A list
Michael Kerrisk
Note that edge-triggered notification wakes up only one waiter
Note a useful performance benefit of EPOLLET: ensuring that
only one of multiple waiters (in epoll_wait()) is woken
up when a file descriptor becomes ready.
Michael Kerrisk
Expand the discussion of the implications of file descriptor duplication
In particular, note that it may be difficult for an application
to know about the existence of duplicate file descriptors.

feature_test_macros.7
Michael Kerrisk [Andreas Westfeld]
Add more detail on why FTMs must be defined before including any header

inotify.7
Michael Kerrisk [Paul Millar]
Note ENOTDIR error that can occur for IN_ONLYDIR
Note ENOTDIR error that occurs when requesting a watch on a
nondirectory with IN_ONLYDIR.

ip.7
Bert Hubert
IP_RECVTTL error fixed

I need to get the TTL of UDP datagrams from userspace, so I set
the IP_RECVTTL socket option. And as promised by ip.7, I then get
IP_TTL messages from recvfrom. However, unlike what the manpage
promises, the TTL field gets passed as a 32 bit integer.

man.7

Michael Kerrisk
SEE ALSO: remove mdoc.samples(7)

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add findmnt(8)

namespaces.7
Michael Kerrisk
List factors that may pin a namespace into existence
Various factors may pin a namespace into existence, even when it
has no member processes.
Michael Kerrisk [Tycho Kirchner]
Briefly explain why CAP_SYS_ADMIN is needed to create nonuser namespaces
Michael Kerrisk
Mention ioctl(2) in discussion of namespaces APIs
Michael Kerrisk
SEE ALSO: add pam_namespace(8)

pid_namespaces.7
Michael Kerrisk
Clarify the semantics for the adoption of orphaned
processes
Because of setns() semantics, the parent of a process may reside
in the outer PID namespace. If that parent terminates, then the
child is adopted by the "init" in the outer PID namespace (rather
than the "init" of the PID namespace of the child).
Michael Kerrisk
Note a detail of /proc/PID/ns/pid_for_children behavior
After clone(CLONE_NEWPID), /proc/PID/ns/pid_for_children is empty
until the first child is created. Verified by experiment.
Michael Kerrisk
Note that a process can do unshare(CLONE_NEWPID) only once

sched.7
Michael Kerrisk [Eugene Syromyatnikov]
In the kernel source SCHED_OTHER is actually called SCHED_NORMAL
Michael Kerrisk
SEE ALSO: add ps(1) and top(1)
Michael Kerrisk
SEE ALSO: add chcpu(1), lscpu(1)

signal.7
Michael Kerrisk [Robin Kuzmin]
Clarify that sigsuspend() and pause() suspend the calling *thread*
Helge
Deller
Add signal numbers for parisc

Michael Kerrisk
Unify signal lists into a signal table that embeds standards info
Having the signals listed in three different tables reduces
readability, and would require more table splits if future
standards specify other signals.
Michael Kerrisk
Reorder the architectures in the signal number lists
x86 and ARM are the most common architectures, but currently
are in the second subfield in the signal number lists.
Instead, swap that info with subfield 1, so the most
common architectures are first in the list.
Michael Kerrisk
Place signal numbers in a separate table
The current tables of signal information are unwieldy,
as they try to cram in too much information.
Michael Kerrisk
Insert standards info into tables
Michael Kerrisk
SEE ALSO: add clone(2)

socket.7
Michael Kerrisk
Refer reader to unix(7) for information on SO_PASSSEC
Michael Kerrisk
SEE ALSO: add address_families(7)

socket.7
unix.7
Michael Kerrisk
Move text describing SO_PEERCRED from socket(7) to unix(7)
This is, AFAIK, an option specific to UNIX domain sockets, so
place it in unix(7).

tcp.7
udp.7
Michael Kerrisk
Add a reference to socket(7) noting existence of further socket options

unix.7
Michael Kerrisk
Enhance the description of SCM_RIGHTS
The existing description is rather thin. More can be said.
Michael Kerrisk
There is a limit on the size of the file descriptor array for SCM_RIGHTS
The limit is defined in the kernel as SCM_MAX_FD (253).
Michael Kerrisk
Rework SO_PEERCRED text for greater clarity
Michael Kerrisk [Felipe Gasper]

Clarify SO_PASSCRED behavior
Michael Kerrisk
Explicitly note that SO_PASSCRED provides SCM_CREDENTIALS
messages
Michael Kerrisk
If the buffer to receive SCM_RIGHTS FDs is too small, FDs are closed
Michael Kerrisk
One must send at least one byte of real data with ancillary data
Michael Kerrisk
Ancillary data forms a barrier when receiving on a stream socket
Michael Kerrisk
When sending ancillary data, only one item of each type may be sent
Michael Kerrisk
Improve wording describing socket option argument/return values
Michael Kerrisk
Clarify treatment of incoming ancillary data if 'msg_control' is NULL
Michael Kerrisk
Note behavior if buffer to receive ancillary data is too small
Michael Kerrisk
Fix a minor imprecision in description of SCM_CREDENTIALS
Michael Kerrisk
Refer reader to socket(7) for information about SO_PEEK_OFF

user_namespaces.7
Michael Kerrisk
Rework terminology describing ownership of nonuser namespaces
Prefer the word "owns" rather than
"associated with" when
describing the relationship between user namespaces and non-user
namespaces. The existing text used a mix of the two terms, with
"associated with" being predominant, but to my ear, describing the
relationship as "ownership" is more comprehensible.

vdso.7
Helge Deller
Fix parisc gateway page description

ld.so.8
Michael Kerrisk [Florian Weimer, David Newall]
Document the --preload command-line option added in glibc 2.30
Michael Kerrisk
Note delimiters for 'list' in --audit and --inhibit-rpath
Michael Kerrisk
Place OPTIONS in alphabetical order
Michael Kerrisk
LD_PRELOAD-ed objects are added to link map in left-to-right order

zdump.8

Paul Eggert
Sync from tzdb upstream

zic.8
Paul Eggert
Sync from tzdb upstream

========== Changes in man-pages-5.01 ==========

Released: 2019-05-09, Munich

Contributors

The
following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhinav Upadhyay <er.abhinav.upadhyay@gmail.com>
Andreas Korb <andreas.d.korb@gmail.com>
Anisse Astier <anisse@astier.eu>
Brice Goglin <Brice.Goglin@inria.fr>
Carlos O'Donell <carlos@redhat.com>

Marcus Huewe <suse-tux@gmx.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Michael Witten <mfwitten@gmail.com>
Seth Troisi <sethtroisi@google.com>
Slavomir Kaslev <kaslevs@vmware.com>
Vincent Lefevre <vincent@vinc17.net>
Wladimir
Mutel <muwlgr@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

tsearch.3
  Florian Weimer [Michael Kerrisk]
    Document the twalk_r() function added in glibc 2.30

New and changed links
---

twalk_r.3
  Michael Kerrisk
    New link to twalk(3) page

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Note that 'addrlen' is left unchanged in the event of an error
      See http://austingroupbugs.net/view.php?id=836.

bpf.2
  Michael Kerrisk
    Update kernel version info for JIT compiler

clone.2
  Michael Kerrisk [Jakub Nowak]
    CLONE_CHILD_SETTID has effect before clone() returns *in the child*
      CLONE_CHILD_SETTID may not have had effect by the time clone()
      returns in the parent, which could be relevant if the
      CLONE_VM flag is employed. The relevant kernel code is in
       schedule_tail(), which is called in ret_from_fork()
      in the child.

      See https://bugzilla.kernel.org/show_bug.cgi?id=203105

execve.2
exec.3
  Michael Kerrisk [Dr. Jürgen Sauermann]
    Consistently use the term 'pathname' (not 'path')

execve.2
  Michael Kerrisk
    Note that stack+environ size is also limited to 3/4 of _STK_LIM
      In fs/exec.c::prepare_arg_pages(), we have:

limit = _STK_LIM / 4 * 3;
limit = min(limit, bprm->rlim_stack.rlim_cur / 4);
Michael Kerrisk [Dr. Jürgen Sauermann]
SEE ALSO: refer to exec(3) (rather than execl(3))

pipe.2
Michael Kerrisk
Note that 'pipefd' is left unchanged in the event of an error
See http://austingroupbugs.net/view.php?id=467.

sched_setaffinity.2
Michael Kerrisk [Brice Goglin]
Correct details of return value of sched_getaffinity() syscall

setfsgid.2
Michael Kerrisk
Rewrite for improved
clarity and defer to setfsuid() for details
Rewrite for improved clarity and defer to setfsuid(2) for the
rationale of the fsGID rather than repeating the same details
in this page.

setfsuid.2
Michael Kerrisk
Rewrite for improved clarity and to hint history more explicitly
The current text reads somewhat clumsily. Rewrite it to introduce
the eUID and fsUID in parallel, and more clearly hint at the
historical rationale for the fsUID, which is detailed lower in
the page.

socketpair.2
Michael Kerrisk
Clarify that 'sv' is left unchanged in the event of an error
See also http://austingroupbugs.net/view.php?id=483.

splice.2
Slavomir Kaslev
EAGAIN can occur when called on nonblocking file descriptors

syscalls.2
Michael Kerrisk [Andreas Korb]
Remove crufty text about i386 syscall dispatch table
The removed text long ago ceased to be
accurate. Nowadays, the
dispatch table is autogenerated when building the kernel (via
the kernel makefile, arch/x86/entry/syscalls/Makefile).

tee.2
  Slavomir Kaslev
    EAGAIN can occur when called on nonblocking file descriptors

fopen.3
  Elliot Hughes
    Explain BSD vs glibc "a+" difference
      Where is the initial read position for an "a+" stream?

      POSIX leaves this unspecified. Most BSD man pages are silent, and
      MacOS has the ambiguous "The stream is positioned at the end of
      the file", not differentiating between reads and writes other than
      to say that fseek(3) does not affect writes. glibc's documentation
      explicitly specifies that the initial read position is the
      beginning of the file.

mallinfo.3
  Elliott Hughes
    Further discourage use of mallinfo()
      The BUGS section already explains why you need to be cautious
      about using mallinfo,
 but given the number of bug reports we see
      on Android, it seems not many people are reading that far. Call it
      out up front.

malloc_trim.3
  Carlos O'Donell
    Update trimming information
      Since glibc 2.8, commit 68631c8eb92, the malloc_trim function has
      iterated over all arenas and free'd back to the OS all page runs
      that were free. This allows an application to call malloc_trim to
      consolidate fragmented chunks and free back any pages it can to
      potentially reduce RSS usage.

posix_memalign.3
  Elliot Hughes
    Some functions set errno
      True of bionic, glibc, and musl. (I didn't check elsewhere.)

resolver.3
  Michael Kerrisk [Wladimir Mutel]
    Mention that some functions set 'h_errno'

stdarg.3
  Michael Kerrisk [Vincent Lefevre]
    Remove the NOTES section describing the ancient varargs macros
      stdarg.h is now 30 years old, and gcc long ago (2004)

ceased to
implement <varargs.h>. There seems little value in keeping this
text.

See https://bugzilla.kernel.org/show_bug.cgi?id=202907
Michael Kerrisk [Egmont Koblinger]
Add a note that "..." in function signature means a variadic function
Egmont suggested adding this, because the string "..." appears
at several other points in the page, but just to indicate that
some text is omitted from example code.

strerror.3
Jakub Wilk
Don't discuss buffer size for strerror_l()
Unlike strerror_r(), strerror_l() doesn't take buffer length as an
argument.

strtol.3
strtoul.3
Jakub Wilk
SEE ALSO: add strtoimax(3), strtoumax(3)

sysconf.3
Michael Kerrisk [Hugues Evrard]
Clearly note that _SC_PAGESIZE and _SC_PAGE_SIZE are synonyms

tsearch.3
Florian Weimer
Do not use const arguments in twalk() callback
The const specifier is not
part of the prototype (it only applies
to the implementation), so showing it here confuses the reader.
Michael Kerrisk
SYNOPSIS: add missing definition of 'VISIT' type
Michael Kerrisk
Reformat twalk() and twalk_r() prototypes for easier readability

console_codes.4
Jakub Wilk
Document that \e[1;n] and \e[2;n] support 16 colors
Source: setterm_command() in drivers/tty/vt/vt.c

elf.5
Michael Kerrisk [Keegan Saunders]
A data segment does not have PF_X

proc.5
Michael Witten [Anisse Astier]

Add missing Inode field to /proc/net/unix

hostname.7
Florian Weimer
HOSTALIASES/search path processing is DNS-specific
Other NSS modules do not necessarily honor these settings.

inode.7
Michael Kerrisk
Note that timestamp fields measure time starting at the Epoch
Michael Kerrisk
Timestamp fields are structures that include a nanosecond component
Michael Kerrisk

Add references to execve(2) to describe set-UID/set-GID behaviors

========== Changes in man-pages-5.02 ==========

Released: 2019-08-02, Munich

Tomas Skäre <tomas.skare@gmail.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

fanotify.7
fanotify_init.2
fanotify_mark.2
  Matthew Bobrowski [Amir Goldstein, Jan Kara]
    Document FAN_REPORT_FID and directory modification events

vdso.7
  Tobias Klauser [Palmer Dabbelt]
    Document vDSO for RISCV

Renamed pages
---

sysvipc.7
  svipc(7) is renamed to sysvipc(7).
    The name sysvipc is a bit more natural, and is the name used in
    /proc/sysvipc.

New and
 changed links
---

svipc.7
  Michael Kerrisk
    Add old name of sysvipc(7) page as a link

Global changes

Various pages

Michael Kerrisk
Change reference to svipc(7) to sysvipc(7)

Changes to individual pages
---

pldd.1
G. Branden Robinson [Michael Kerrisk]
Document glibc's unbreakage of tool
After a longstanding breakage, pldd now works again (glibc 2.30).

bpf.2
Michael Kerrisk
Correct kernel version for JIT support on s390

chdir.2
Michael Kerrisk
Add ENOTDIR error for fchdir()

execve.2
Michael Kerrisk [Eugene Syromyatnikov]
Since Linux 5.1, the limit on the #! line is 255 chars (rather than 127)
Shawn Landden [Michael Kerrisk]
Add more detail about Shebangs
Michael Kerrisk
Linux is not alone in ignoring the set-UID and set-GID bits for scripts

mount.2
Michael Kerrisk
ERRORS: Add a couple of EINVAL errors
for MS_MOVE
Michael Kerrisk
SEE ALSO: add chroot(2) and pivot_root(2)

mprotect.2
Mark Wielaard
pkey_mprotect() acts like mprotect() if pkey is set to -1, not 0

mprotect.2
pkey_alloc.2
Mark Wielaard [Florian Weimer]
_GNU_SOURCE is required for the pkey functions.

pivot_root.2
Michael Kerrisk
ERRORS: EINVAL occurs if 'new_root' or its parent has shared propagation
Michael Kerrisk

'new_root' must be a mount point
It appears that 'new_root' may not have needed to be a mount
point on ancient kernels, but already in Linux 2.4.5 this changed.
Michael Kerrisk
'put_old' can't be a mount point with MS_SHARED propagation
Michael Kerrisk
SEE ALSO: add mount(2)

poll.2
Michael Kerrisk [Alan Stern]
Note that poll() equivalent code for ppoll() is not quite equivalent

prctl.2
Yang Xu [Cyrill Gorcunov]
Correct some details for PR_SET_TIMERSLACK

setxattr.2
Finn
O'Leary [Michael Kerrisk]
Add ERANGE to 'ERRORS' section

tkill.2
Michael Kerrisk
glibc 2.30 provides a wrapper for tgkill()

dlopen.3
Michael Kerrisk
Clarify the rules for symbol resolution in a dlopen'ed object
The existing text wrongly implied that symbol look up first
occurred in the object and then in main, and did not mention
whether dependencies of main where used for symbol resolution.
Michael Kerrisk
Clarify when an executable's symbols can be used for symbol resolution
The --export-dynamic linker option is not the only way that main's
global symbols may end up in the dynamic symbol table and thus be
used to satisfy symbol reference in a shared object. A symbol
may also be placed into the dynamic symbol table if ld(1)
notices a dependency in another object during the static link.
Michael Kerrisk
An object opened with RTLD_LOCAL
can be promoted to RTLD_GLOBAL
Michael Kerrisk
Note that symbol use might keep a dlclose'd object in memory
Michael Kerrisk
On dlclose(), destructors are called when reference count falls to 0
Michael Kerrisk
Make it clear that RTLD_NODELETE also affects global variables
Michael Kerrisk

Clarify that constructors are called only when library is first loaded

exec.3
Matthew Kenigsberg
Explain function groupings
I've found the exec man page quite difficult to read when trying
to find the behavior for a specific function. Since the names of
the functions are inline and the order of the descriptions isn't
clear, it's hard to find which paragraphs apply to each function.
I thought it would be much easier to read if the grouping based on
letters is stated.

getutent.3
Michael Kerrisk [Thorsten Glaser]
Fix missing include file in EXAMPLE

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=932382

on_exit.3
Michael Kerrisk [Sami Kerola]
Stack variables may be out of scope when exit handler is invoked

strcat.3
Michael Kerrisk [Eric Sanchis]
Fix off-by-one error in example code

cpuid.4
Michael Kerrisk
SEE ALSO: add cpuid(1)

elf.5
Michael Kerrisk
SEE ALSO: add ld.so(8)

proc.5
Michael Kerrisk
Correct description of /proc/PID/status 'ShdPnd' and 'SigPnd' fields
These fields are signal masks, not counters.
Michael Kerrisk
Clarify that various mask fields in /proc/PID/status are in hexadecimal

capabilities.7
Michael Kerrisk
Add a note about using strace on binaries that have capabilities
Michael Kerrisk
Add pivot_root(2) to CAP_SYS_ADMIN list
Michael Kerrisk
CAP_FOWNER also allows modifying user xattrs on sticky directories

cgroup_namespaces.7
  Michael Kerrisk
    Some wording fixes to improve
 clarity
  Michael Kerrisk
    In the example shell session, give second shell a different prompt

credentials.7
  Michael Kerrisk
    Note that /proc/PID/status shows a process's credentials
  Michael Kerrisk
    SEE ALSO: add tcgetsid(3)

fanotify.7
  Matthew Bobrowski
    Reword FAN_REPORT_FID data structure inclusion semantics
  Michael Kerrisk
    Clarify logic in ESTALE check
  Michael Kerrisk
    Reorder text in EXAMPLE
  Michael Kerrisk
    Reformat program output to fit in 80 columns

mount_namespaces.7
  Michael Kerrisk
    Clarify implications for other NS if mount point is removed in one NS
      If a mount point is deleted or renamed or removed in one mount
      namespace, this will cause an object that is mounted at that
      location in another mount namespace to be unmounted (as verified
      by experiment). This was implied by the existing text, but it is
      better to make this detail
 explicit.
  Michael Kerrisk
    SEE ALSO: add pivot_root(2), pivot_root(8)

namespaces.7
  Michael Kerrisk
    Note initial values of hostname and domainname in a new UTS namespace

sched.7
  Michael Kerrisk
    SEE ALSO: add pthread_getschedparam(3)

signal.7
  Michal Sekletar [Oleg Nesterov, Michael Kerrisk]
    Clarify that siginfo_t isn't changed on coalescing
  Michael Kerrisk

Various fields in /proc/PID/status show signal-related information
Michael Kerrisk
Add subsection on queuing and delivery semantics for standard signals

socket.7
Michael Kerrisk
select()/poll()/epoll honor SO_RCVLOWAT since Linux 2.6.28

unix.7
Michael Kerrisk
Note SCM_RIGHTS interaction with RLIMIT_NOFILE
If the file descriptors received in SCM_RIGHTS would cause
the process to its exceed RLIMIT_NOFILE limit, the excess
FDs are discarded.

user_namespaces.7
Michael Kerrisk
Describe the effect
of file-related capabilities inside user namespaces
Michael Kerrisk
Describe how kernel treats UIDs/GIDs when a process accesses files

vdso.7
Tobias Klauser
Mention removal of Blackfin port in Linux 4.17

ld.so.8
Michael Kerrisk [Matthias Hertel]
Note some further details of secure-execution mode
Note some further details of the treatment of environment
variables in secure execution mode. In particular (as noted by
Matthias Hertel), note that ignored environment variables are also
stripped from the environment. Furthermore, there are some other
variables, not used by the dynamic linker itself, that are also
treated in this way (see the glibc source file
sysdeps/generic/unsecvars.h).

Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

pidfd_open.2
  Michael Kerrisk [Christian Brauner, Florian Weimer,
 Daniel Colascione]
    New page documenting pidfd_open(2)

pidfd_send_signal.2
  Michael Kerrisk [Florian Weimer, Christian Brauner]
    New page documenting pidfd_send_signal(2)

pivot_root.2
  Michael Kerrisk [Eric W. Biederman, Reid Priedhorsky, Philipp Wendler]
    This page has been completely rewritten, adding a lot of missing
    details (including the use of pivot_root(".", ".")) and an example
    program. In addition, the text prevaricating on whether or not
    pivot_root() might change the root and current working directories has
    been eliminated, and replaced with a simple description of the behavior
    of the system call, which has not changed for 19 years, and will not
    change in the future. Many longstanding errors in the old version of
    the page have also been corrected.

ipc_namespaces.7
  Michael Kerrisk
    New page with content migrated from namespaces(7)

uts_namespaces.7
  Michael Kerrisk

  New page with content migrated from namespaces(7)

Newly documented interfaces in existing pages
---

clone.2
  Christian Brauner, Michael Kerrisk
    Document CLONE_PIDFD
      Add an entry for CLONE_PIDFD. This flag is available starting
      with kernel 5.2. If specified, a process file descriptor
      ("pidfd") referring to the child process will be returned in

the ptid argument.

fanotify_mark.2
  Jakub Wilk
    Document FAN_MOVE_SELF

ptrace.2
  Dmitry V. Levin [Michael Kerrisk]
    Document PTRACE_GET_SYSCALL_INFO

regex.3
  Rob Landley
    Document REG_STARTEND

New and changed links
---

res_nclose.3
  Michael Kerrisk
    Add NEW link to resolver.3

Global changes

Various pages
  Michael Kerrisk
    SEE ALSO: correct list order

Various pages
  Michael Kerrisk
    Remove section number from references to function in its own page

Various pages
  Michael Kerrisk
    ERRORS: correct alphabetical order

Changes to individual pages
---

localedef.1
  Marko Myllynen
    Describe recently added options
      Describe few recently added options (present in glibc-2.29).

clone.2
  Michael Kerrisk
    SEE ALSO: add pidfd_open(2)

copy_file_range.2
  Amir Goldstein [Dave Chinner]
    Kernel v5.3 updates

fanotify_mark.2
  Jakub Wilk
    Add kernel version numbers for some FAN_* constants

getdomainname.2
  Michael Kerrisk
    Add mention of UTS namespaces

gethostname.2
  Michael Kerrisk [Jakub Wilk]
    Mention UTS namespaces

io_submit.2
  Matti Moell [Matti Möll]
    Fix kernel version numbers for 'aio_rw_flags' flags

kill.2
  Michael Kerrisk
    SEE ALSO: add pidfd_send_signal(2)

mmap.2
  Nikola Forró
    Fix EINVAL conditions
      Since introduction of MAP_SHARED_VALIDATE, in case flags contain
      both
 MAP_PRIVATE and MAP_SHARED, mmap() doesn't fail with EINVAL,
      it succeeds.

      The reason for that is that MAP_SHARED_VALIDATE is in fact equal
      to MAP_PRIVATE | MAP_SHARED.

mount.2
  Michael Kerrisk [Reid Priedhorsky]
    Describe the concept of "parent mounts"
  Michael Kerrisk
    NOTES: add subsection heading for /proc/[pid]/{mounts,mountinfo}
  Michael Kerrisk
    Rework the text on mount namespaces a little
      Eliminate the term "Per-process namespaces" and add a reference
      to mount_namespaces(7).

move_pages.2
  Yang Xu [Michael Kerrisk]
    Mark E2BIG as deprecated
      E2BIG was removed in 2.6.29, we should mark it as deprecated.

perf_event_open.2
  Michael Kerrisk [Alexey Budankov]
    SEE ALSO: add Documentation/admin-guide/perf-security.rst

prctl.2
  Michael Kerrisk
    Clarify that PR_GET_SPECULATION_CTRL returns value as function result
  Michael Kerrisk
    Clarify
 that PR_MCE_KILL_GET returns value via function result
  Michael Kerrisk
    Clarify that PR_GET_FP_MODE returns value as function result
  Michael Kerrisk
    RETURN VALUE: add some missing entries
      Note success return for PR_GET_SPECULATION_CTRL and PR_GET_FP_MODE.

rt_sigqueueinfo.2
  Michael Kerrisk
    Note that 'si_code' can't be specified as SI_KERNEL
  Michael Kerrisk
    The rules for 'si_code' don't apply when sending a signal to oneself
      The restriction on what values may be specified in 'si_code'
      apply only when sending a signal to a process other than the
      caller itself.
  Michael Kerrisk
    Rename 'uinfo' argument to 'info'
      This is more consistent with the naming in other pages
      that refer to a 'siginfo_t' structure.
  Michael Kerrisk
    SEE ALSO: add pidfd_send_signal(2)

sched_setaffinity.2
  Michael Kerrisk
    RETURN VALUE: sched_getaffinity() syscall differs
 from the wrapper

setns.2
  Mike Frysinger
    Fix CLONE_NEWNS restriction info

sigaction.2
  Michael Kerrisk

SEE ALSO: add pidfd_send_signal(2)

signalfd.2
Andrew Clayton, Michael Kerrisk
Note about interactions with epoll & fork

statx.2
Michael Kerrisk [Simone Piccardi]
Clarify details of a case where an invalid 'mask' value may be rejected

syscall.2
Shawn Anastasio
Add information for powerpc64
Michael Kerrisk [Adam Borowski, Florin Blanaru]
Update name of syscall instruction for riscv

syscalls.2
Michael Kerrisk
Add fsconfig(), fsmount(), fsopen(), fspick(), move_mount(), open_tree()
Michael Kerrisk [(), Michael(), Kerrisk(),]
Add new syscalls in 5.1
Add io_uring_enter(), io_uring_register(), io_uring_setup(), and
pidfd_send_signal().
Michael Kerrisk
Add clone3() and pidfd_open()

uname.2
Michael Kerrisk
Replace reference to namespaces(7)
with reference to uts_namespaces(7)

errno.3
Rasmus Villemoes
Add some comments on EAGAIN/EWOULDBLOCK and EDEADLK/EDEADLOCK

fexecve.3
Michael Kerrisk [Simone Piccardi]
ENOSYS occurs only if the kernel provides no execveat() syscall
Michael Kerrisk [Simone Piccardi]
ERRORS: add ENOENT

getauxval.3
Raphael Moreira Zinsly
Add new cache geometry entries

printf.3
Vincent Lefevre
Add detail on the first digit with the %e format

pthread_setcancelstate.3
pthreads.7
signal-safety.7
  Carlos O'Donell
    Describe issues with cancellation points in signal handlers

strtok.3
  Michael Kerrisk [eponymous alias]
    Correct description of use of 'saveptr' argument in strtok_r()
  Michael Kerrisk [eponymous alias]
    The caller should not modify 'saveptr' between strtok_r() calls
  Michael Kerrisk
    Add portability note for strtok_r() '*saveptr' value
      On some implementations, '*saveptr' must be
 NULL on first call
      to strtok_r().

smartpqi.4
  Murthy Bhat [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
    Add sysfs entries
  Gilbert Wu [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
    Add module param expose ld first
  Dave Carroll [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
    Add module param to hide vsep

core.5
  Paul Wise
    Explain the new situation with argument splitting
      Things changed in Linux v5.3-rc3 commit 315c69261dd3 from
      splitting after template expansion to splitting beforehand.

resolv.conf.5
  Nikola Forró
    Update information about search list
      Since glibc 2.26, the number of domains in the search list is
      no longer limited.

man-pages.7
  Michael Kerrisk
    Relocate and enhance the text on semantic newlines
  Michael Kerrisk [Paul Wise]
    Paragraphs should not be separated by blank lines

mount_namespaces.7
  Michael
 Kerrisk
    Explain how a namespace's mount point list is initialized

Provide a more detailed explanation of the initialization of
the mount point list in a new mount namespace.
Michael Kerrisk [Eric W. Biederman]
Clarify description of "less privileged" mount namespaces
Michael Kerrisk
SEE ALSO: refer to example in pivot_root(2)
Michael Kerrisk [Eric W. Biederman]
It may be desirable to disable propagation after creating a namespace
After creating a new mount namespace, it may be desirable to
disable mount propagation. Give the reader a more explicit
hint about this.

mq_overview.7
sysvipc.7
Michael Kerrisk
Adjust references to namespaces(7) to ipc_namespaces(7)

namespaces.7
Michael Kerrisk
Remove content migrated to new ipc_namespaces(7) page
Michael Kerrisk
Remove content migrated to uts_namespaces(7)
Michael Kerrisk
Include manual
page references in the summary table of namespace types
Make the page more compact by removing the stub subsections that
list the manual pages for the namespace types. And while we're
here, add an explanation of the table columns.

operator.7
Michael Kerrisk [Rick Stanley]
Prefix and postfix ++/-- have different precedences
Harbison and Steele also agree on this.

signal.7
Michael Kerrisk
Enhance the text on process-directed and thread-directed signals
clone(2) has a good description of these concepts; borrow
from it liberally.
Michael Kerrisk
SEE ALSO: add pidfd_send_signal(2)

user_namespaces.7
Michael Kerrisk
Improve explanation of meaning of ownership of nonuser namespaces

========== Changes in man-pages-5.04 ==========

Released: 2019-11-19, Munich

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

clone.2
  Michael Kerrisk [Christian Brauner, Jakub Wilk]
    Document clone3()

wait.2
  Michael Kerrisk
    Add P_PIDFD for waiting on a child referred to by a PID file descriptor

bpf-helpers.7
   Michael Kerrisk
    Refresh against kernel v5.4-rc7

New and changed links

---

clone3.2
  Michael Kerrisk
    New link to clone(2)

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Rename arguments for consistency with clone3()
      Make the names of the clone() arguments the same as the fields
      in the clone3() 'args' struct:

        ctid   ==> child_pid
        ptid   ==> parent_tid
        newtls   ==> tld
        child_stack ==> stack
  Michael Kerrisk
    Consistently order paragraphs for CLONE_NEW* flags
      Sometimes the descriptions of these flags mentioned the
      corresponding section 7 namespace manual page and then the
      required capabilities, and sometimes the order was the was
      the reverse. Make it consistent.
  Michael Kerrisk [Christian Brauner, Jann Horn]
    EXAMPLE: Allocate child's
 stack using mmap(2) rather than malloc(3)
      Christian Brauner suggested mmap(MAP_STACK), rather than
      malloc(), as the canonical way of allocating a stack for the
      child of clone(), and Jann Horn noted some reasons why
      (MAP_STACK exists elsewhere, and mmap() returns a page-aligned
      block of memory, which is useful if we want to set up a guard
      page at the end of the stack).
  Michael Kerrisk [Christian Brauner]
    Tidy up the description of CLONE_DETACHED
      The obsolete CLONE_DETACHED flag has never been properly
      documented, but now the discussion CLONE_PIDFD also requires
      mention of CLONE_DETACHED. So, properly document CLONE_DETACHED,
      and mention its interactions with CLONE_PIDFD.
  Michael Kerrisk [Christian Brauner]
    Give the introductory paragraph a new coat of paint
      Change the text in the introductory paragraph (which was written

    20 years ago) to reflect the fact that clone*() does more things
      nowadays.
  Michael Kerrisk

Remove wording that suggests CLONE_NEW* flags are for containers
These flags are used for implementing many other interesting
things by now.
Michael Kerrisk
Remove various details that are already covered in namespaces pages
Remove details of UTS, IPC, and network namespaces that are
already covered in the corresponding namespaces pages in section 7.

clone.2
proc.5
Michael Kerrisk
Adjust references to namespaces(7)
Adjust references to namespaces(7) to be references to pages
describing specific namespace types.

fallocate.2
Andrew Price
Add gfs2 to the list of punch hole-capable filesystems

ioctl_iflags.2
Michael Kerrisk [Robert Edmonds]
Emphasize that FS_IOC_GETFLAGS and FS_IOC_SETFLAGS argument is 'int *'

ioctl_list.2
Michael Kerrisk

Add reference to ioctl(2) SEE ALSO section
The referenced section lists various pages that document ioctls.

mmap.2
Michael Kerrisk
Note that MAP_STACK exists on some other systems
Michael Kerrisk
Some rewording of the description of MAP_STACK
Reword a little to allow for the fact that there are now
two reasons to consider using this flag.

pidfd_open.2
Michael Kerrisk
Note the waitid() use case for PID file descriptors
Michael Kerrisk
Add a subsection header "Use cases for PID file descriptors"
Michael Kerrisk
Make it a little more explicit the CLONE_PIDFD returns a PID FD

pivot_root.2
Michael Kerrisk
EXAMPLE: allocate stack using mmap() MAP_STACK rather than malloc()

quotactl.2
  Yang Xu [Jan Kara]
    Add some details about Q_QUOTAON

seccomp.2
cgroups.7
  Michael Kerrisk
    Switch to "considerate language"

select.2
  Michael Kerrisk
    POLLIN_SET/POLLOUT_SET/POLLEX_SET
 are now defined in terms of EPOLL*
      Since kernel commit a9a08845e9acbd224e4ee466f5c1275ed50054e8, the
      equivalence between select() and poll()/epoll is defined in terms
      of the EPOLL* constants, rather than the POLL* constants.

wait.2
  Michael Kerrisk
    waitid() can be used to wait on children in same process group as caller
      Since Linux 5.4, idtype == P_PGID && id == 0 can be used to wait
      on children in same process group as caller.
  Michael Kerrisk
    Clarify semantics of waitpid(0, ...)
      As noted in kernel commit 821cc7b0b205c0df64cce59aacc330af251fa8f7,
      threads create an ambiguity: what if the calling process's PGID
      is changed by another thread while waitpid(0, ...) is blocked?
      So, clarify that waitpid(0, ...) means wait for children whose
      PGID matches the caller's PGID at the time of the call to
      waitpid().

getauxval.3
   Michael Kerrisk [Witold Baryluk]
    Clarify that AT_BASE_PLATFORM and AT_EXECFN return pointers to strings
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=942207

resolv.conf.5
  Florian Weimer
    Attempt clarify domain/search interaction
      The domain directive is historic at this point; it should not
      be used.

netdevice.7
  Michael Kerrisk [Silviu Popescu]
    Small wording fix in description of SIOCGIFCONF
      SIOCGIFCONF returns "network layer" addresses (not "transport
      layer").

uts_namespaces.7
  Michael Kerrisk
    Add a little more detail on scope of UTS namespaces

========== Changes in man-pages-5.05 ==========

Released: 2020-02-09, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Yu Jian Wu <yujian.wu1@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

clone.2
  Adrian Reber [Christian Brauner, Michael Kerrisk]
    Add clone3() set_tid information
  Michael Kerrisk
    Document CLONE_CLEAR_SIGHAND

fcntl.2
  Joel Fernandes [Michael Kerrisk]
    Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

memfd_create.2
  Joel Fernandes
    Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

loop.4
   Yang Xu
    Document LOOP_SET_BLOCK_SIZE
  Yang Xu
    Document LOOP_SET_DIRECT_IO

proc.5
  Michael Kerrisk
    Document /proc/sys/vm/unprivileged_userfaultfd

Changes to individual pages
---

capget.2
  Michael Kerrisk [Yang Xu]
    Add missing details in EPERM error for setting inheritable capabilities

clone.2
  Michael Kerrisk
    Note that CLONE_THREAD causes similar behavior to CLONE_PARENT
      The introductory paragraphs note that "the calling process" is
      normally synonymous with the "the parent process", except in the
      case of CLONE_PARENT. The same is also true of CLONE_THREAD.
  Christian Brauner [Michael Kerrisk]
    Mention that CLONE_PARENT is off-limits for inits
  Michael Kerrisk [Colin Ian King]
    Add old EINVAL error for AArch64
  Michael Kerrisk
    ERRORS: add EINVAL for use of CLONE_PARENT by an init process

futex.2
  Ponnuvel Palaniyappan
    Fix
 a bug in the example

listen.2
  Michael Kerrisk [Peter Gajdos]
    The 'somaxconn' default value has increased to 4096

modify_ldt.2
set_thread_area.2
  Andy Lutomirski [Markus T Metzger]
    Fix type of base_addr

move_pages.2
  John Hubbard [Michal Hocko]
    Remove ENOENT from the list of possible return values

open.2
  Adam Borowski
    No need for /proc to make an O_TMPFILE file permanent
      In the example snippet, we already have the fd, thus there's no
      need to refer to the file by name. And, /proc/ might be not
      mounted or not accessible.
  Michael Kerrisk [Joseph C. Sible]
    In O_TMPFILE example, describe alternative linkat() call
      This was already shown in an earlier version of the page,
      but Adam Borowski's patch replaced it with an alternative.
      Probably, it is better to show both possibilities.

perf_event_open.2
  Daniel Colascione
    Mention EINTR for perf_event_open

ptrace.2
  Denys Vlasenko
    PTRACE_EVENT_STOP does not always report SIGTRAP

quotactl.2
  Michael Kerrisk
    Don't show numeric values of Q_XQUOTAON XFS_QUOTA_?DQ_* flags
      The programmer should not need to care about the numeric values,
      and their inclusion is verbosity.
  Yang Xu [Michael Kerrisk]
    Add EINVAL error of Q_XQUOTARM operation

stime.2
  Michael Kerrisk
    Note that stime() is deprecated

syscall.2
  Petr Vorel [Cyril Hrubis]
    Update feature test macro requirements

sysctl.2
  Michael Kerrisk
    This system call was removed in Linux 5.5; adjust the page accordingly

userfaultfd.2
  Yang Xu [Michael Kerrisk]
    Add EPERM error

cmsg.3
  Rich Felker
    Clarify alignment issues and correct method of accessing CMSG_DATA()
      From an email by Rich Felker:

      It came to my attention while reviewing possible breakage with
      move to 64-bit time_t that some applications
 are dereferencing
      data in socket control messages (particularly SCM_TIMESTAMP*)
      in-place as the message type, rather than memcpy'ing it to
      appropriate storage. This necessarily does not work and is not
      supportable if the message contains data with greater alignment
      requirement than the header. In particular, on 32-bit archs,
      cmsghdr has size 12 and alignment 4, but struct timeval and
      timespec may have alignment requirement 8.
  Michael Kerrisk [Rich Felker]

Modify CMSG_DATA() example to use memcpy()
See previous patch to this page for rationale

exit.3
Benjamin Peterson [Mike Frysinger]
Use hex for the status mask

ftime.3
Michael Kerrisk
Note that this function is deprecated

getpt.3
Samuel Thibault
Remove mention of O_NOCTTY
The glibc implementation of getpt has actually never been setting

malloc.3
Vegard Nossum

Clarify realloc() return value
Petr Vorel
Remove duplicate _GNU_SOURCE

console_codes.4
Adam Borowski
Document \e[90m to 97, 100 to 107
Adam Borowski
\e[21m is now underline
Since 65d9982d7e523a1a8e7c9af012da0d166f72fc56 (4.17), it follows
xterm rather than common sense and consistency, being the only
command 1..9 where N+20 doesn't undo what N did. As libvte
0.51.90 got changed the same way, this behaviour will probably
stay.
Adam Borowski
Update \e[38m and \e[48m
Supported since cec5b2a97a11ade56a701e83044d0a2a984c67b4 (3.16).

cgroups.7
Michael Kerrisk
The v2 freezer controller was added in Linux 5.2
Michael Kerrisk
Split discussion of cgroups.events file and v2 release notification
In preparation for adding a description of the "frozen" key.
Michael Kerrisk
Describe the cgroup.events "frozen" key
Michael Kerrisk
Improve the discussion of the advantages of v2 release notification

inotify.7
  Nick Shipp
    Merge late perror() into fprintf() in example code

netlink.7
  Antonin Décimo
    Fix alignment issue in example

packet.7
  kevin sztern [Michael Kerrisk]
    Add missing tpacket_auxdata field (tp_vlan_tpid)

rtnetlink.7
  Antonin Décimo
    ifa_index is an unsigned int

tcp.7
  Michael Kerrisk
    tcp_low_latency is ignored since Linux 4.14

unix.7
  Michael Kerrisk
    The PID sent with SCM_CREDENTIALS must match an existing process

vsock.7
  Mikhail Golubev [Michael Kerrisk]
    Add missing structure element
      The structure 'struct sockaddr_vm' has additional element
      'unsigned char svm_zero[]' since version v3.9-rc1.

ldconfig.8
  DJ Delorie
    Document file filter and symlink pattern expectations

Apologies if I missed anyone!

New and rewritten pages
---

openat2.2

Aleksa Sarai [Michael Kerrisk]
Document new openat2(2) syscall

pidfd_getfd.2
Michael Kerrisk [Christian Brauner]
New manual page documenting the pidfd_getfd() system call

select.2
Michael Kerrisk
Rewrite DESCRIPTION
Improve structure and readability, at the same time incorporating
text and details that were formerly in select_tut(2). Also
move a few details in other parts of the page into DESCRIPTION.
Michael Kerrisk
Consolidate the discussion of pselect into a headed subsection
Michael Kerrisk
Consolidate historical glibc pselect() details under one subhead
Michael Kerrisk
Consolidate info on usleep() emulation in one place
Michael Kerrisk
Place the discussion of the self-pipe technique in a headed subsection
Michael Kerrisk
Note that FD_SET() and FD_CLR() do not return errors
Michael Kerrisk
Remove details of historical #include requirements
The POSIX situation has been the norm for a long time now,
and including ancient details overcomplicates the page.
Michael Kerrisk
Remove some ancient information about pre-POSIX types for 'timeout'

select_tut.2
Michael Kerrisk
Eliminate duplication of info across select_tut.2 and select2
There was a lot of a duplication of info in SYNOPSIS, DESCRIPTION
RETURN VALUE, and SEE ALSO. Move all of the info to one place:
the select(2) page.

sysvipc.7
Michael Kerrisk
Rewrite this page as just a summary of the System V IPC APIs
All of the other details in this page have by now been moved into
the relevant *ctl(2) pages.

time_namespaces.7
Michael Kerrisk [Andrei Vagin, Dmitry Safonov, Thomas Gleixner]
New page documenting time namespaces

Newly documented interfaces in existing pages
---

arch_prctl.2
  Keno Fischer
    Add ARCH_SET_CPUID subcommand

clock_getres.2
  Benjamin Peterson
    Document CLOCK_TAI
  Michael Kerrisk
    Add CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

prctl.2
  Mike Christie [Michal Hocko, Michael Kerrisk, Bart Van
 Assche]
    Document PR_SETIO_FLUSHER/GET_IO_FLUSHER

setns.2
  Michael Kerrisk
    Document CLONE_NEWTIME

statx.2
  Eric Biggers
    Document STATX_ATTR_VERITY

unshare.2
  Michael Kerrisk
    Document CLONE_NEWTIME

socket.7
  Ricardo Biehl Pasquali, Michael Kerrisk
    Add description of SO_SELECT_ERR_QUEUE
  Alejandro Colomar [Michael Kerrisk]
    Document SO_TIMESTAMPNS

Global changes

Various pages
  Michael Kerrisk
    Remove a few mentions of the ancient "Linux libc"

Various pages
  Michael Kerrisk
    Global formatting fix: disfavor nonstandard .TP indents
      In many cases, these don't improve readability, and (when stacked)

they sometimes have the side effect of sometimes forcing text
to be justified within a narrow column range.

Various pages
Michael Kerrisk [Christian Brauner]
Fix clumsy wording around "nonnegative file descriptors"

Changes to individual pages
---

clock_getres.2
Helge Deller [Michael Kerrisk]
Consecutive calls for CLOCK_MONOTONIC may return same value
Consecutive calls to clock_gettime(CLOCK_MONOTONIC) are guaranteed
to return MONOTONIC values, which means that they either return
the *SAME* time value like the last call, or a later (higher) time
value.
Eric Rannaud
Dynamic POSIX clock devices can return other errors
Michael Kerrisk
Improve description of CPU-time clocks
Michael Kerrisk
Add an example program
Michael Kerrisk
CLOCK_REALTIME_COARSE is not settable
Michael Kerrisk
Note that CPU-time clocks are not settable.
Explicitly note that CLOCK_PROCESS_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID are not settable.
Michael Kerrisk
Clarify that CLOCK_TAI is nonsettable
Michael Kerrisk
Clarify that CLOCK_MONOTONIC is system-wide
Michael
Kerrisk
ERRORS: add EINVAL for attempt to set a nonsettable clock
Michael Kerrisk
Move text in BUGS to NOTES
The fact that CLOCK_PROCESS_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID are not settable isn't a bug,
since POSIX does allow the possibility that these clocks
are not settable.
Michael Kerrisk
SEE ALSO: add time_namespaces(7)

clock_nanosleep.2
Michael Kerrisk

clock_nanosleep() can also sleep against CLOCK_TAI
Michael Kerrisk
clock_nanosleep() also supports CLOCK_BOOTTIME
Presumably (and from a quick glance at the source code)
since Linux 2.6.39, when CLOCK_BOOTTIME was introduced.

clock_nanosleep.2
timer_create.2
timerfd_create.2
Michael Kerrisk
Add various missing errors
Mostly verified by testing and reading the code.

There is unfortunately quite a bit of inconsistency across API~s:

clock_gettime clock_settime clock_nanosleep timer_create timerfd_create

CLOCK_BOOTTIME y n (EINVAL) y y y
CLOCK_BOOTTIME_ALARM y n (EINVAL) y [1] y [1] y [1]
CLOCK_MONOTONIC y n (EINVAL) y y y
CLOCK_MONOTONIC_COARSE y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_MONOTONIC_RAW y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_REALTIME y y y y y
CLOCK_REALTIME_ALARM y n (EINVAL) y [1] y [1] y [1]
CLOCK_REALTIME_COARSE y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_TAI y n (EINVAL) y y n (EINVAL)
CLOCK_PROCESS_CPUTIME_ID
y n (EINVAL) y y n (EINVAL)
CLOCK_THREAD_CPUTIME_ID y n (EINVAL) n (EINVAL [2]) y n (EINVAL)
pthread_getcpuclockid() y n (EINVAL) y y n (EINVAL)

[1] The caller must have CAP_WAKE_ALARM, or the error EPERM results.

[2] This error is generated in the glibc wrapper.

connect.2
Michael Kerrisk [Eric Dumazet]
Update the details on AF_UNSPEC
Update the details on AF_UNSPEC and circumstances in which
socket can be reconnected.

dup.2
Michael Kerrisk
SEE ALSO: add pidfd_getfd(2)

epoll_ctl.2
Michael Kerrisk

Various minor additions and clarifications

epoll_wait.2
Michael Kerrisk
A few minor additions and rewrites

execve.2
Michael Kerrisk
Add a subhead for the discussion of effect on process attributes
Michael Kerrisk
Explicitly note
that argv[argc] == NULL in the new program
Michael Kerrisk
ERRORS: ENOENT does not occur for missing shared libraries
See http://sourceware.org/bugzilla/show_bug.cgi?id=12241.

_exit.2
Michael Kerrisk
Clarify that raw _exit() system call terminates only the calling thread

inotify_add_watch.2
Michael Kerrisk
EXAMPLE: add reference to example in inotify(7)

io_submit.2
Julia Suvorova
Add IOCB_CMD_POLL opcode

lseek.2
Michael Kerrisk [Matthew Wilcox]
ERRORS: ENXIO can also occur SEEK_DATA in middle of hole at end of file

madvise.2
Michael Kerrisk [Andrea Arcangeli]
Incorporate some (ancient) comments about MADV_HUGEPAGE
Back in 2011, a mail from Andrea Arcangeli noted some details
that I never got round to incorporating into the manual page.

mmap.2
Michael Kerrisk
Add a subhead for the 'flags' argument
Michael Kerrisk
Move some text hidden at the end of
DESCRIPTION to NOTES

msgctl.2
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)

Michael Kerrisk
Copy information on 'msqid_ds' fields from sysvipc(7)

open.2
Michael Kerrisk
Clarify that O_NOFOLLOW is relevant (only) for basename of 'pathname'
Aleksa Sarai
Add references to new openat2(2) page
Michael Kerrisk
Note EINVAL error for invalid character in basename of 'pathname'

pidfd_open.2
Michael Kerrisk
Mention pidfd_getfd(2)

poll.2
Michael Kerrisk
Add an example program
Michael Kerrisk
Mention epoll(7) in the introductory paragraph
Michael Kerrisk
Improve description of EFAULT error
Michael Kerrisk
Fix description of ENOMEM error

select_tut.2
Michael Kerrisk
Adjust header file includes in example
Employ <sys/select.h>, rather than the historical header files.

semctl.2
Michael Kerrisk
Copy information
on 'semid_ds' fields from sysvipc(7)
Michael Kerrisk
Add a reference to the example in shmop(2)
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)

semget.2
Michael Kerrisk
EXAMPLE: add an example program

semop.2
Michael Kerrisk
Add a reference to the semop(2) example in shmop(2)

shmctl.2

Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)
Michael Kerrisk
Note that execute permission is not needed for shmat() SHM_EXEC
Michael Kerrisk
Copy information on 'shmid_ds' fields from sysvipc(7)
Michael Kerrisk
Some small improvements to the description of the 'shmid_ds' structure

shmget.2
Michael Kerrisk
Add a reference to the example in shmop(2)

shmop.2
Michael Kerrisk
EXAMPLE: add a pair of example programs
Add example programs demonstrating usage of shmget(2), shmat(2),
semget(2), semctl(2),
and semop(2).

sigaction.2
signal.7
Zack Weinberg
Document kernel bugs in delivery of signals from CPU exceptions

stat.2
Michael Kerrisk
Clarify definitions of timestamp fields
In particular, make it clear that atime and mtime relate to the
file *data*.

syscalls.2
Michael Kerrisk
Add new Linux 5.6 system calls
Michael Kerrisk
Note that the 5.x series followed 4.20

timer_create.2
Michael Kerrisk
timer_create(2) also supports CLOCK_TAI
Michael Kerrisk
Mention clock_getres(2) for further details on the various clocks

timerfd_create.2
Michael Kerrisk [Thomas Gleixner]
Note a case where timerfd_settime() can fail with ECANCELED
Michael Kerrisk [devi R.K, Thomas Gleixner]
Negative changes to CLOCK_REALTIME may cause read() to return 0

Michael Kerrisk
Rework text for EINVAL for invalid clock ID
Michael Kerrisk
Refer reader to clock_getres(2) for
further details on the clocks

unshare.2
Michael Kerrisk
Add CLONE_NEWCGROUP and CLONE_NEWTIME to example program

exit.3
Michael Kerrisk [Walter Harms]
Small improvement to the discussion of 'status' argument

ftok.3
Michael Kerrisk
EXAMPLE: add a reference to the example in semget(2)

getifaddrs.3
Michael Kerrisk [Michael Galassi]
EXAMPLE: remove unneeded loop variable

nl_langinfo.3
Eugene Syromyatnikov
Document era-related locale elements
Eugene Syromyatnikov
Add information about AM/PM time format locale elements
Eugene Syromyatnikov
Mention the respective strftime(3) conversion specifications

sem_init.3
Michael Kerrisk
Add references to example code in shm_open(3) and sem_wait(3)

sem_post.3
Michael Kerrisk
Add a reference to code example code in shm_open(3)

shm_open.3
Michael Kerrisk
EXAMPLE: add some example programs

strcmp.3
Michael Kerrisk

Add an example program
Michael Kerrisk [Andrew Micallef, Walter Harms]
Rework text describing return value to be clearer

Michael Kerrisk
Note that the comparison is done using unsigned char
Michael Kerrisk
SEE ALSO: add ascii(7)

strftime.3
Eugene Syromyatnikov [Michael Kerrisk]
Refer to the relevant nl_langinfo(3) items
Eugene Syromyatnikov
Expand %E and %O description
Eugene Syromyatnikov
Consistently document fall-back format string

proc.5
Mike Frysinger
Clarify /proc/[pid]/cmdline mutability

cgroups.7
Michael Kerrisk
Update list of cgroups v2 controllers
Update the list of cgroups v2 controllers (several controllers were missing).
Michael Kerrisk
Add a subsection on cgroup v2 mount options and include 'nsdelegate'
Michael Kerrisk
Document the cgroups v2 'memory_localevents' mount option
Michael Kerrisk
SEE ALSO: add Documentation/admin-guide/cgroup-v2.rst

namespaces.7
Michael Kerrisk
Add time namespaces information
Michael Kerrisk
Eliminate some superfluous info from display of /proc/PID/ns links

path_resolution.7
Aleksa Sarai
Update to mention openat2(2) features

socket.7
Michael Kerrisk
Note SCM message types for SO_TIMESTAMP and SO_TIMESTAMPNS

tcp.7
Michael Kerrisk
SEE ALSO: mention Documentation/networking/ip-sysctl.txt

time.7

Michael Kerrisk
Add small subsection on clocks and time namespaces

unix.7
Heinrich Schuchardt
Correct example

vsock.7
Stefano Garzarella [Jorgen Hansen, Stefan Hajnoczi]
Add VMADDR_CID_LOCAL description

========== Changes in man-pages-5.07 ==========

Released: 2020-06-09, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated
in changes in this release:

Achilles Gaikwad <agaikwad@redhat.com>

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_fslabel.2
  Eric Sandeen
    New page documenting filesystem get/set label ioctl(2) operations

Removed pages
---

ioctl_list.2
  Michael Kerrisk [Heinrich Schuchardt, Eugene Syromyatnikov]
    This page was first added more than 20 years ago. Since
    that time it has seen hardly any update, and is by now
    very much out of date, as reported by Heinrich Schuchardt
    and confirmed by Eugene Syromyatnikov.

    As Heinrich says:

      Man-pages like netdevices.7 or ioctl_fat.2 are what is
      needed to help a user who does not want to read through the
      kernel code.

      If ioctl_list.2 has not been reasonably maintained since
      Linux 1.3.27 and hence is not a reliable source of
      information, shouldn't it be dropped?

    My answer is, yes (but

let's move a little info into ioctl(2)).

Newly documented interfaces in existing pages
---

adjtimex.2
  Arnd Bergmann [Richard Cochran, Michael Kerrisk]
    Document clock_adjtime(2)

clock_getres.2
  Richard Cochran [Michael Kerrisk]
    Explain dynamic clocks

clone.2
  Christian Brauner, Michael Kerrisk
    Document the clone3() CLONE_INTO_CGROUP flag

mremap.2
  Brian Geffon, Michael Kerrisk [Lokesh Gidra]
    Document MREMAP_DONTUNMAP

open.2
  Joseph C. Sible [Michael Kerrisk]
    Document fs.protected_fifos and fs.protected_regular

prctl.2
  Dave Martin
    Add PR_SPEC_INDIRECT_BRANCH for SPECULATION_CTRL prctls
  Dave Martin
    Add PR_SPEC_DISABLE_NOEXEC for SPECULATION_CTRL prctls
  Dave Martin
    Add PR_PAC_RESET_KEYS (arm64)

ptrace.2
  Joseph C. Sible
    Document PTRACE_SET_SYSCALL

proc.5
  Michael Kerrisk
    Document /proc/sys/fs/protected_regular
  Michael
 Kerrisk
    Document /proc/sys/fs/protected_fifos
  Michael Kerrisk
    Document /proc/sys/fs/aio-max-nr and /proc/sys/fs/aio-nr

New and changed links

---

clock_adjtime.2
  Arnd Bergmann
    New link to adjtimex(2)

Global changes

Various pages
  Michael Kerrisk
    Retitle EXAMPLE section heading to EXAMPLES
      EXAMPLES appears to be the wider majority usage across various
      projects' manual pages, and is also what is used in the POSIX
      manual pages.

Various pages
  Michael Kerrisk
    Correct bogus POSIX.1 standards names
      POSIX.1-2003 ==> POSIX.1-2001 TC1
      POSIX.1-2004 ==> POSIX.1-2001 TC2
      POSIX.1-2013 ==> POSIX.1-2008 TC1
      POSIX.1-2016 ==> POSIX.1-2008 TC2

Various pages
  Michael Kerrisk
    Add section number in page cross-reference.

Various pages
  Kir Kolyshkin
    Add missing commas in SEE ALSO

Various pages
  Michael Kerrisk
     Remove AVAILABILITY section heading
      In the few pages where this heading (which is "nonstandard" within
      man-pages) is used, it always immediately follows CONFORMING TO
      and generally contains information related to standards. Remove
      the section heading, thus incorporating AVAILABILITY into
      CONFORMING TO.

Various pages
  Michael Kerrisk
    Remove section number in page self-references

Various pages
  Michael Kerrisk

Put SEE ALSO entries in alphabetical order

Various pages
  Michael Kerrisk
    Place SH sections in standard order
      Fix various pages that deviated from the norm described in
      man-pages(7).

Various "aio" pages
  Michael Kerrisk [Andi Kleen, Jeff Moyer]
    Change uses of aio_context_t to io_context_t

Changes to individual pages
---

bpf.2
  Peter Wu
    Update enum bpf_map_type and enum bpf_prog_type
  Richard Palethorpe
     Change note on unprivileged access
       The kernel now allows calls to bpf() without CAP_SYS_ADMIN
       under some circumstances.

clone.2
  Michael Kerrisk
    Add kernel version numbers for clone_args fields
  Michael Kerrisk
    Combine separate NOTES sections

close.2
  Michael Kerrisk [Lukas Czerner, Peter Schiffer, Thierry Lelegard]
    Note behavior when close() happens in a parallel thread
      If one thread is blocked in an I/O system call on a file descriptor
      that is closed in another thread, then the blocking system call
      does not return immediately, but rather when the I/O operation
      completes. This surprises some people, but is longstanding
      behavior.

connect.2
  Stefan Puiu
    Can return EACCES because of SELinux

execve.2
  Michael Kerrisk [Eric Hopper]
    Changes to the "dumpable" flag may change ownership of /proc/PID files
  Michael Kerrisk
    Improve/correct

discussion of changes to dumpable flag during execve(2)
The details were not quite accurate. Defer to prctl(2)
for the more complete picture.
Nikola Forró
Clarify signal sent to the process on late failure
Michael Kerrisk
SEE ALSO: add capabilities(7)

fanotify_init.2
Amir Goldstein [Matthew Bobrowski]
Move out of place entry FAN_REPORT_FID
It was inserted in the middle of the FAN_CLASS_ multi flags bit
and broke the multi flag documentation.
Michael Kerrisk [Alexander Morozov, Amir Goldstein, Jan Kara]
Remove mention of FAN_Q_OVERFLOW as an input value in 'mask'
See https://bugzilla.kernel.org/show_bug.cgi?id=198569.
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Clarification about FAN_EVENT_ON_CHILD and new events
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Clarification about FAN_MARK_MOUNT and FAN_REPORT_FID

getdents.2
Petr Vorel [Michael
Kerrisk]
Mention glibc support for getdents64()
Support was added in glibc 2.30.
Chris Lamb
Correct linux_dirent definition in example code
It is "unsigned long" earlier up in the file

gettid.2
Michael Kerrisk [Joseph C. Sible]
Document header file and feature test macro requirements for gettid()

ioctl.2
Michael Kerrisk
SEE ALSO: add ioctl_fslabel(2)
Michael Kerrisk
Remove mentions of ioctl_list(2)
Michael Kerrisk
Move subsection on "ioctl structure" from ioctl_list(2) to ioctl(2)

io_setup.2
Michael Kerrisk
Tweak description of /proc/sys/fs/aio-max-nr

mbind.2
Li Xinhai [Michael Kerrisk]

Remove note about MPOL_MF_STRICT been ignored

mmap.2
Michael Kerrisk [Heinrich Schuchardt]
Don't mark MAP_ANON as deprecated

move_pages.2
Yang Shi [Michal Hocko]
Returning positive value is a new error case

mremap.2
Michael Kerrisk
Remove
mention of "Segmentation fault" in EFAULT text
"Segmentation fault" (SIGSEGV) is not exactly the same thing as
EFAULT.
Michael Kerrisk
Reorder some paragraphs in NOTES
Michael Kerrisk
Move a paragraph from DESCRIPTION to NOTES

msgctl.2
Michael Kerrisk
Correct description of 'msg_ctime' field
Verified by inspecting kernel source.

nfsservctl.2
Michael Kerrisk
SEE ALSO: add nfsd(7)

open.2
Michael Kerrisk
Some '*at' APIs have functionality that isn't in conventional APIs
Note that another reason to use the *at() APIs is to access
'flags' functionality that is not available in the corresponding
conventional APIs.
Michael Kerrisk
Add a few more APIs to list in "Rationale for openat()..."
There have been a few more dirfd APIs added in recent times.
Michael Kerrisk
Explain ways in which a 'directory file descriptor' can be
obtained
Michael Kerrisk
Add openat2() to list of APIs that take a 'dirfd' argument

openat2.2
Michael Kerrisk [Aleksa Sarai]
Various changes after feedback from Aleksa Sarai

poll.2
  Michael Kerrisk
    Add license to example program

prctl.2
  Dave Martin
    Sort prctls into alphabetical order
  Dave Martin
    Clarify that prctl can apply to threads
      The current synopsis for prctl(2) misleadingly claims that prctl
      operates on a process. Rather, some (in fact, most) prctls operate
  Dave Martin [Dave Hansen]
    Document removal of Intel MPX prctls
  Dave Martin
    Fix mis-description of thread ID values in procfs
  Dave Martin
    Work around bogus constant "maxsig" in PR_SET_PDEATHSIG
  Michael Kerrisk
    Add reference to proc(5) for /proc/self/task/[tid]/comm
  Dave Martin [Michael Kerrisk]
    Add health warning
  Dave Martin
    Clarify the unsupported hardware case of EINVAL

rename.2
   Michael Kerrisk
    SEE ALSO: add rename(1)

s390_runtime_instr.2
  Heiko Carstens [Eugene Syromyatnikov, Michael Kerrisk]
    Document signum argument behavior change
      Document that the signum argument is ignored in newer kernels, but
      that user space should pass a valid real-time signal number for
      backwards compatibility.

semctl.2
  Michael Kerrisk [Manfred Spraul]
    Correct description of sem_ctime field

semget.2
  Michael Kerrisk
    Add license to example program

shmctl.2
  Michael Kerrisk
    Correct 'shm_ctime' description

shmop.2
  Michael Kerrisk
    Add license to example programs

statfs.2
  Michael Kerrisk [David Adam]
    Add SMB2 constant to filesystem types list

syscall.2
  Dave Martin [Will Deacon]
    arm64: Fix syscall number register size
  Dave Martin [Russell King]
    arm: Use real register names for arm/OABI

sysfs.2
  Michael Kerrisk
    SEE
 ALSO: add proc(5) and sysfs(5)

utimensat.2
  Goldwyn Rodrigues
    Immutable flag returns EPERM
      Linux kernel commit 337684a1746f "fs: return EPERM on immutable
      inode" changed the return value of the utimensat(2) from -EACCES
      to -EPERM in case of an immutable flag.

wait4.2
  Michael Kerrisk
    Update wait3() feature test macro requirements for changes in glibc 2.26

cexp2.3
  Michael Kerrisk
    Still not present in glibc 2.31

cmsg.3
  Michael Kerrisk
    CONFORMING TO: note which CMSG_* APIs are in current and upcoming POSIX

dirfd.3
  Michael Kerrisk
    SEE ALSO: add openat(2)

dlsym.3
  Alexander Monakov
    Extend discussion of NULL symbol values
      Avoid implying that use of IFUNC is the only way to produce a
      symbol with NULL value. Give more scenarios how a symbol may get
      NULL value, but explain that in those scenarios dlsym() will fail

with Glibc's ld.so due
to an implementation inconsistency.

err.3
Michael Kerrisk
EXAMPLES: use EXIT_FAILURE rather than 1 as exit status

expm1.3
Michael Kerrisk
The expm1() bogus underflow floating-point exception has been fixed
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6778
Michael Kerrisk
The bogus invalid floating-point exception bug has been fixed
https://www.sourceware.org/bugzilla/show_bug.cgi?id=6814.

fdim.3
Michael Kerrisk
BUGS: these functions did not set errno on some architectures
https://www.sourceware.org/bugzilla/show_bug.cgi?id=6796

ftw.3
Michael Kerrisk
glibc eventually fixed a regression in FTW_SLN behavior
For details, see:
https://bugzilla.redhat.com/show_bug.cgi?id=1422736
http://austingroupbugs.net/view.php?id=1121
https://bugzilla.redhat.com/show_bug.cgi?id=1422736

getauxval.3
YunQiang Su
MIPS, AT_BASE_PLATFORM passes
ISA level

getdtablesize.3
Michael Kerrisk
Remove redundant statement that getdtablesize() is a library function

malloc.3
Michael Kerrisk
Add 'reallocarray' in NAME
Michael Kerrisk
Add VERSIONS section noting when reallocarray() was added to glibc

newlocale.3
Michael Kerrisk [Piotr Caban]
Fix a valgrind issue in example program
See https://bugzilla.kernel.org/show_bug.cgi?id=202977.

nextafter.3
  Michael Kerrisk
    Since glibc 2.23, these functions do set errno
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6799.

posix_spawn.3
  Olivier Gayot [Adhemerval Zanella]
    Clarify by using name of steps rather than syscalls
  Olivier Gayot [Adhemerval Zanella]
    Document implementation using clone() since glibc 2.24
  Olivier Gayot [Adhemerval Zanella]
    Document POSIX_SPAWN_USEVFORK
      Added a few lines about POSIX_SPAWN_USEVFORK so that it appears

 clearly that since glibc 2.24, the flag has no effect.
  Olivier Gayot [Adhemerval Zanella]
    Document the POSIX_SPAWN_SETSID attribute

pow.3
  Michael Kerrisk
    BUGS: pow() performance problem for some (rare) inputs has been fixed
      See https://sourceware.org/bugzilla/show_bug.cgi?id=13932
  Michael Kerrisk
    Several bugs in glibc's pow() implementation were fixed in glibc 2.16
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=3866.
  Michael Kerrisk
    Add a subheading to mark off historical bugs that are now fixed

printf.3
  Tobias Stoeckmann
    Prevent signed integer overflow in example

ptsname.3
  Bruno Haible
    Fix description of failure behaviour of ptsname_r()

random.3
  John Marshall
    Change "RAND_MAX" tp "2^31-1"

scalb.3
  Michael Kerrisk
    These functions now correctly set errno for the EDOM and ERANGE cases
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803
       and https://www.sourceware.org/bugzilla/show_bug.cgi?id=6804

scalbln.3
  Michael Kerrisk

These functions now correctly set errno for the ERANGE case
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803

scanf.3
Michael Kerrisk [Jürgen Sauermann]
Clarify that 'x' specifier allows a 0x/0X prefix in input string

sem_getvalue.3
Michael Kerrisk [Andrea Galbusera]
Note that glibc's sem_getvalue() doesn't return EINVAL errors
See https://bugzilla.kernel.org/show_bug.cgi?id=204273

setlogmask.3
Michael Kerrisk
Note that LOG_UPTO() is included in the next POSIX release

shm_open.3
Michael Kerrisk
Add license to example programs

sincos.3
Michael Kerrisk
The glibc implementation does now give EDOM for a domain error
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=15467

stdarg.3
Michael Kerrisk
SEE ALSO: add vprintf(3), vscanf(3), vsyslog(3)

strcmp.3
Michael Kerrisk
Add license to example programs

strftime.3
Urs Thuermann
ISO week number can be 52, add example

y0.3
Michael Kerrisk
These functions now correctly diagnose a pole error
https://sourceware.org/bugzilla/show_bug.cgi?id=6807
Michael Kerrisk
errno is now correctly set to ERANGE on underflow
https://www.sourceware.org/bugzilla/show_bug.cgi?id=6808

loop.4
Michael Kerrisk [Vlad]
'lo_flags' is nowadays "r/w"

See https://bugzilla.kernel.org/show_bug.cgi?id=203417

veth.4
  Devin J. Pohly
    Add a more direct example
      iproute2 allows you to specify the netns for either side of a veth
      interface at creation time. Add an example of this to veth(4) so
      it doesn't sound like you have to move the interfaces in a
      separate step.

core.5
  Michael Kerrisk [Jonny Grant]
    Mention 'sysctl -w' as a way of changing core_pattern
 setting
  Michael Kerrisk [Jonny Grant]
    Note that not dumping core of an unreadable binary is a security measure
  Michael Kerrisk [Jonny Grant]
    Explain that core_pattern %e is process/thread 'comm' value
      The 'comm' value is typically the same as the (possibly
      truncated) executable name, but may be something different.

filesystems.5
  Michael Kerrisk
    SEE ALSO: add sysfs(5) and xfs(5)

locale.5
  Michael Kerrisk [Helge Kreutzmann]
    Improve description of 'first_weekday'

proc.5
  Michael Kerrisk
    Note kernel version for /proc/PID/smaps VmFlags "wf" flag
  Michael Kerrisk
    Add "um" and "uw" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk
    Add "mp" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk
    Note kernel version that removed /proc/PID/smaps VmFlags "nl" flag
  Ian Rogers
    Add "wf" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk
    Note kernel version for /proc/PID/smaps
 VmFlags "dd" flag
  Michael Kerrisk
    Add "sf" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk [Kirill A. Shutemov]
    Remove "mp" under VmFlags in /proc/[pid]/smaps
  Michael Kerrisk [Eric Hopper]

Alert the reader that UID/GID changes can reset the "dumpable" attribute
Keno Fischer
Fix an outdated note about map_files
The restriction to CAP_SYS_ADMIN was removed from map_files in 2015.
Michael Kerrisk [Helge Kreutzmann]
Better explanation of some /proc/ide fields
Michael Kerrisk
TASK_COMM_LEN limit includes the terminating '\0'
Clarify this detail in the discussion of /proc/[pid]/comm.
Michael Kerrisk
Add a detail to /proc/[pid]/comm
Note the connection to the "%e" specifier in
/proc/sys/kernel/core_pattern.

securetty.5
Michael Kerrisk [Helge Kreutzmann]
Improve wording of .SH one-line description

tzfile.5
Michael Kerrisk
Sync
to 2020a tzdb release
From https://www.iana.org/time-zones, version 2020a.
Michael Kerrisk
Explain UT abbreviation

ascii.7
Michael Kerrisk [Helge Kreutzmann]
SEE ALSO: fix sort order in entries

bpf-helpers.7
Michael Kerrisk
Resync against kernel 5.7

cgroups.7
Marcus Gelderie
Mention cgroup.sane_behavior file
The cgroup.sane_behavior file returns the hard-coded value "0" and
is kept for legacy purposes. Mention this in the man-page.
Michael Kerrisk
Note the existence of the clone3() CLONE_INTO_CGROUP flag

credentials.7
Michael Kerrisk
Alert reader that UID/GID changes can affect process capabilities
Michael Kerrisk
Changes to process UIDs/GIDs can effect the "dumpable" attribute
Michael Kerrisk

Add a list of the APIs that change a process's credentials

fanotify.7
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Fix fanotify_fid.c example
   Michael Kerrisk
    Wrap some long lines in example program

fanotify.7
fanotify_mark.2
  Amir Goldstein [Matthew Bobrowski]
    Clarify FAN_ONDIR in output mask
      FAN_ONDIR was an input only flag before introducing
      FAN_REPORT_FID. Since the introduction of FAN_REPORT_FID, it can
      also be in output mask.

hier.7
  Thomas Piekarski [Gary Perkins]
    Updating from FHS 2.3 to 3.0
      See https://bugzilla.kernel.org/show_bug.cgi?id=206693

inotify.7
  Michael Kerrisk [Jason Etherton]
    Add missing #include in example program

ip.7
  Michael Kerrisk [Martin Doucha]
    Note a few more valid 'protocol' values
      See https://bugzilla.kernel.org/show_bug.cgi?id=204981
  Michael Kerrisk
    SEE ALSO: add netdevice(7)

man-pages.7
  Michael Kerrisk
    Rename EXAMPLE to EXAMPLES
  Michael Kerrisk
    Describe COPYRIGHT section
      man-pages doesn't use COPYRIGHT sections in manual pages,
but
      various projects do. Make some recommendations about placement
      of the section.
  Michael Kerrisk
    Add REPORTING BUGS section
      man-pages doesn't have a REPORTING BUGS section in manual pages,
      but many other projects do. Make some recommendations about
      placement of that section.
  Michael Kerrisk
    Mention AUTHORS in summary section list

Although man-pages doesn't use AUTHORS sections, many projects do
use an AUTHORS section in their manual pages, so mention it in
man-pages to suggest some guidance on the position at which
to place that section.

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add mount(8), umount(8)

namespaces.7
Michael Kerrisk
Document /proc/sys/user/max_time_namespaces

netlink.7
Michael Kerrisk [Idan Katz]
Update path for NETLINK_CONNECTOR docs in kernel source tree
Michael Kerrisk [Fabien Siron]
Note that NETLINK_SOCK_DIAG is preferred over NETLINK_INET_DIAG

pid_namespaces.7
Michael Kerrisk
Note that /proc/sys/kernel/ns_last_pid is virtualized per PID NS
Michael Kerrisk
Correct capability requirements for write to /proc/sys/kernel/ns_last_pid
CAP_SYS_ADMIN is needed in the user NS that owns the PID NS.

rtnetlink.7
Jan Moskyto Matejka [Michael Kerrisk]
Add missing RTA_* attributes

standards.7
Michael Kerrisk [Geoff Clare]
Add some more standards
Add: SUSv4 2016 edition, POSIX.1-2017, and SUSv4 2018 edition
Michael Kerrisk
Remove mention of bogus "POSIX" names
The terms POSIX.1-{2003,2004,2013,2016} were inventions of
my imagination, as confirmed by consulting Geoff Clare of
The Open Group. Remove these names.

symlink.7
Michael Kerrisk
Describe differences in the treatment of symlinks in the dirname
Describe differences in
the treatment of symlinks in the dirname
part of pathname.

tcp.7

Michael Kerrisk [vrafaeli@msn.com]
Update info on tcp_syn_retries default value
See https://bugzilla.kernel.org/show_bug.cgi?id=202885.

user_namespaces.7
Michael Kerrisk [Léo Stefanesco]
Clarify that "system time" means "calendar time"

xattr.7
Achilles Gaikwad
Add attr(1) as relevant page to SEE ALSO

ldconfig.8
Florian Weimer
Mention new default for --format in glibc 2.32

zdump.8
Michael Kerrisk [Marco Curreli, Paul Eggert]
Update to latest upstream tz release
Look under "Latest version", which is 2020a.

========== Changes in man-pages-5.08 ==========

Released: 2020-08-13, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

prctl.2
  Dave Martin
    Add SVE prctls (arm64)
      Add documentation for the PR_SVE_SET_VL and PR_SVE_GET_VL
      prctls added in Linux 4.15 for arm64.
  Dave Martin [Catalin Marinas]
    Add tagged address ABI control prctls (arm64)
      Add documentation for the PR_SET_TAGGED_ADDR_CTRL and
      PR_GET_TAGGED_ADDR_CTRL prctls added in Linux 5.4 for arm64.

setns.2
  Michael Kerrisk
    Document the use of PID file descriptors with setns()
      Starting with Linux 5.8, setns() can take a PID file descriptor as
      an argument, and move the caller
 into or more of the namespaces of
      the thread referred to by that descriptor.

capabilities.7
  Michael Kerrisk

Document CAP_BPF
Michael Kerrisk
Add CAP_PERFMON

symlink.7
Aleksa Sarai
Document magic links more completely

Global changes

A few pages
Michael Kerrisk
Use \` rather than `
\` produces better rendering in PDF.

Various pages
Michael Kerrisk [Geoff Clare]
Use "\(ti" instead of "~"
A naked tilde ("~") renders poorly in PDF. Instead use "\(ti",
which renders better in a PDF, and produces the same glyph
when rendering on a terminal.

Various pages
Michael Kerrisk [Geoff Clare]
Use "\(ha" rather than "^" in code
This renders better in PDF.

Various pages
Mike Frysinger
Drop "coding: UTF-8" header
This header is used inconsistently -- man pages are UTF-8 encoded
but not setting this marker.
It's only respected by the man-db
package, and seems a bit anachronistic at this point when UTF-8
is the standard default nowadays.

Various pages
Mike Frysinger
Trim leading blank comment line
Very few pages do this, so trim them.

Various pages
Mike Frysinger
Use standard .\" comment style
The \" comment produces blank lines. Use the .\" that the vast
majority of the codebase uses instead.

Various pages
  Mike Frysinger [G. Branden Robinson]
    Various pages: Drop t comment header
      Historically, a comment of the following form at the top of a
      manual page was used to indicate too man(1) that the use of tbl(1)
      was required in order to process tables:

        '\" t

      However, at least as far back as 2001 (according to Branden),
      man-db's man(1) automatically uses tbl(1) as needed, rendering
      this comment unnecessary.
 And indeed many existing pages in
      man-pages that have tables don't have this comment at the top of
      the file. So, drop the comment from those files where it is
      present.

Changes to individual pages
----

ioctl_tty.2
  Michael Kerrisk
    Fix a confusing wording error in description of TIOCSPTLCK

iopl.2
  Thomas Piekarski [victorm007@yahoo.com]
    Updating description of permissions and disabling interrupts
      Update description of permissions for port-mapped I/O set
      per-thread and not per-process. Mention that iopl() can not
      disable interrupts since Linux 5.5 anymore and is in general
      deprecated and only provided for legacy X servers.

      See https://bugzilla.kernel.org/show_bug.cgi?id=205317

keyctl.2
  Oleksandr Kravchuk
    Declare auth_key to fix a compilation error in example code

lseek.2
  Andrew Price
    List gfs2 support for SEEK_HOLE/SEEK_DATA

mount.2
   Michael Kerrisk
    ERRORS: add EINVAL for bind mount of mount namespace inode

open.2
  Michael Kerrisk
    Say a bit more about what happens when 'mode' is wrongly omitted

pidfd_open.2
  Michael Kerrisk
    Add the setns(2) use case for PID file descriptors
  Michael Kerrisk
    Close the pidfd in EXAMPLE
      Close the PID file descriptor in the example program, to hint to
      the reader that like every other kind of file descriptor, a PID FD
      should be closed.

prctl.2
  Michael Kerrisk
    The parent death signal is cleared on some credential changes
      See kernel/cred.c::commit_creds() in the Linux 5.6 source code.

seccomp.2
  Andy Lutomirski
    Improve x32 and nr truncation notes

send.2
recv.2
  Alyssa Ross
    Add msg_iovlen POSIX note
      msg_iovlen is incorrectly typed (according to POSIX) in addition
      to msg_controllen, but unlike msg_controllen, this wasn't
       mentioned for msg_iovlen.

setns.2
  Michael Kerrisk
    EXAMPLE: use O_CLOEXEC when opening namespace file descriptor
  Michael Kerrisk
    It is possible to setns() to the caller's current PID namespace
      The page currently incorrectly says that 'fd' must refer to
      a descendant PID namespace. However, 'fd' can also refer to
      the caller's current PID namespace. Verified by experiment,
      and also comments in kernel/pid_namespace.c (Linux 5.8-rc1).

sync.2
  Jeff Layton
    syncfs() now returns errors if writeback fails
      A patch has been merged for v5.8 that changes how syncfs() reports
      errors. Change the sync() manpage accordingly.

syscalls.2
  Michael Kerrisk

Add faccessat2(), added in Linux 5.8

sysctl.2
Michael Kerrisk
glibc removed support for sysctl() starting in version 2.32

atoi.3
Arkadiusz Drabczyk
Explain disadvantages of atoi()
Michael Kerrisk
Relocate BUGS section
Michael Kerrisk
Add NOTES section explaining 0 return value on error
And note that this is not specified by POSIX.

fread.3
Arkadiusz Drabczyk
Add example
Arkadiusz Drabczyk
Explain that file position is moved after calling fread()/fwrite()
Corresponding manpage on FreeBSD already contains that
information.

getpt.3
posix_openpt.3
pts.4
Michael Kerrisk
Use the term "pseudoterminal multiplexor device" for /dev/ptmx
Let's use some consistent terminology for this device.

posix_memalign.3
Bruno Haible
Clarify how to free the result of posix_memalign

pthread_rwlockattr_setkind_np.3
Carlos O'Donell [Kumar Kartikeya Dwivedi]
Clarify a PTHREAD_RWLOCK_PREFER_WRITER_NP detail

queue.3
Alejandro Colomar
Remove wrong code from example
Alejandro Colomar
Comment out text for functions not in glibc (related: 6559169cac)

pts.4
Michael Kerrisk
Remove NOTES on BSD pseudoterminals
This information is already covered better in pty(7). No need to

mention it again here.

hosts.5
  Thomas Bartelsmeier
    Clarify capability for IPv6 outside of examples
      Resolves https://bugzilla.kernel.org/show_bug.cgi?id=208279

proc.5
  Jakub Wilk
    Use "pwd -P" for printing cwd
      "/bin/pwd" happens to work with the GNU coreutils implementation,
      which has -P as the default, contrary to POSIX requirements.

      Use "pwd -P" instead, which is shorter, easier to type, and should
      work everywhere.
  Arkadiusz Drabczyk
    Inform that comm in /proc/pid/{stat,status} might also be truncated
      pgrep for example searches for a process name in /proc/pid/status

resolv.conf.5
  Michael Kerrisk [Helge Kreutzmann]
    Clarify that ip6-bytestring was removed in 2.25

capabilities.7
  Dan Kenigsberg
    Clarify
 that CAP_SYS_NICE relates to *lowering* the nice value
  Saikiran Madugula
    CAP_SYS_RESOURCE: add two more items for POSIX message queues
      CAP_SYS_RESOURCE also allows overriding /proc/sys/fs/mqueue/msg_max
      and /proc/sys/fs/mqueue/msgsize_max.
  Michael Kerrisk [Dan Kenigsberg]
    Clarify wording around increasing process nice value
  Michael Kerrisk
    SEE ALSO: add getpcaps(8)

cgroups.7
cpuset.7
  Sven Hoexter
    Update kernel cgroup documentation references
      cgroups-v1/v2 documentation got moved to the "admin-guide" subfolder
      and converted from .txt files to .rst

ip.7
  Michael Kerrisk [Stephen Hemminger]
    Remove mention of ipfw(4) which was in long obsolete ipchains project

man-pages.7

Michael Kerrisk
Add some notes on generating optimal glyphs
Getting nice renderings of ^ ` and ~ requires special
steps in the page source.

pty.7
Michael Kerrisk

Explicitly mention CONFIG_LEGACY_PTYS
Explicitly mention CONFIG_LEGACY_PTYS, and note that it is disabled
by default since Linux 2.6.30.
Michael Kerrisk
Relocate a paragraph to NOTES

standards.7
Michael Kerrisk
Add an entry for POSIX.1-1988
Michael Kerrisk [Geoff Clare]
Correct various details in the explanation of XPG/POSIX/SUS

ld.so.8
Florian Weimer [Michael Kerrisk]
List more places in which dynamic string tokens are expanded
This happens for more than just DT_RPATH/DT_RUNPATH.
Arkadiusz Drabczyk
Explain that empty entry in LD_LIBRARY_PATH means cwd

zic.8
Michael Kerrisk
Sync to 2020a tzdb release
From https://www.iana.org/time-zones, version 2020a.

========== Changes in man-pages-5.09 ==========

Released: 2020-11-01, Munich

Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

circleq.3

Alejandro Colomar
New page with 'circleq' content extracted from queue(3)

list.3
Alejandro Colomar
New page with 'list' content extracted from queue(3)

pthread_attr_setsigmask_np.3
Michael Kerrisk
New page for pthread_attr_setsigmask_np() + pthread_attr_getsigmask_np()

Add a page documenting the pthread_attr_setsigmask_np(3) and
pthread_attr_getsigmask_np(3) functions added in glibc 2.32.

slist.3
Alejandro Colomar
New page with 'slist' content extracted from queue(3)

stailq.3
Alejandro Colomar
New page with 'stailq' content extracted from queue(3)

tailq.3
Alejandro Colomar
New page with 'tailq' content extracted from queue(3)

system_data_types.7
Alejandro Colomar, Michael Kerrisk
A new page documenting a wide range of system data types.

kernel_lockdown.7
David Howells, Heinrich Schuchardt [Michael Kerrisk]
New page documenting the Kernel Lockdown feature

queue.7
Alejandro Colomar
Create summary page for 'queue' APIs
The former queue(3) page was rather unwieldy, as it attempted to
describe too many APIs. After splitting that content out into a
number of smaller pages (circleq.3, list.3, slist.3, stailq.3,
and
tailq.3) move the much-reduced queue(3) page, which is now
essentially a summary of those APIs, from Section 3 to Section 7.

Newly documented interfaces in existing pages
---

fanotify_init.2
fanotify.7
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Document FAN_REPORT_DIR_FID

fanotify_init.2
fanotify.7
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Document FAN_REPORT_NAME

statx.2
  Ira Weiny
    Add STATX_ATTR_DAX

strerror.3
  Michael Kerrisk
    Document strerrorname_np() and strerrordesc_np()
      strerrorname_np() and strerrordesc_np() were added in glibc 2.32.

strsignal.3
  Michael Kerrisk
    Document sigabbrev_np() and sigdescr_np().
      sigabbrev_np() and sigdescr_np() were added in glibc 2.32.

loop.4
  Yang Xu
    Document LOOP_CONFIGURE ioctl
  Yang Xu
    Document LO_FLAGS_DIRECT_IO flag

capabilities.7
  Michael Kerrisk
    Document the CAP_CHECKPOINT_RESTORE
 capability added in Linux 5.9

ip.7
  Stephen Smalley [Paul Moore]
    Document IP_PASSSEC for UDP sockets

ip.7
socket.7
  Stephen Smalley
    Document SO_PEERSEC for AF_INET sockets
  Sridhar Samudrala
    Document SO_INCOMING_NAPI_ID

socket.7

unix.7
  Stephen Smalley [Serge Hallyn, Simon McVittie]
    Add initial description for SO_PEERSEC

strerrordesc_np.3
Michael Kerrisk
New link to strerror(3)

strerrorname_np.3
Michael Kerrisk
New link to strerror(3)

sys_siglist.3
Michael Kerrisk
New link to strsignal(3)

Global changes

Various pages
Alejandro Colomar
Use ``sizeof`` consistently through all the examples in the
following way:

- Use the name of the variable instead of its type as argument for
``sizeof``.

Various pages
Alejandro Colomar
Use sizeof() to get buffer size (instead of hardcoding macro name)

Various pages
Michael Kerrisk

Use \(aq instead of ' inside monospace fonts

Use \(aq to get an unslanted single quote inside monospace code blocks. Using a simple ' results in a slanted quote inside PDFs.

Various pages

Michael Kerrisk, Alejandro Colomar

Use C99 style to declare loop counter variables

Rather than:

```
sometype x;

for (x = ....; ...)
```

use

```
for (sometype x = ...; ...)
```

This brings the declaration and use closer together (thus aiding readability) and also clearly indicates the scope of the loop counter variable.

Various pages

Alejandro Colomar

Switch printf() casts to use [u]intmax_t + %ju / %jd

Let's move to the 21st century. Instead of casting system data types to long/long long/etc. in printf() calls, instead cast to intmax_t or uintmax_t, the largest available signed/unsigned integer types.

Various pages

Alejandro Colomar

Omit 'int' keyword for 'short', 'long' and 'long long' types

Various pages

Alejandro Colomar

Remove unneeded casts

Various pages

Alejandro Colomar

In printf(): s/0x%/%#/ except when followed by X instead of x

Use printf()'s '#' flag character to prepend the string "0x".

However, when the number is printed in uppercase, and the prefix is in lowercase, the string "0x" needs to be manually written.

Various pages

Michael Kerrisk
Use C99-style declarations for readability
Rather than writing things such as:

```
struct sometype *x;
...
x = malloc(sizeof(*x));
```

let's use C99 style so that the type info is in the same line as
the allocation:

```
struct sometype *x = malloc(sizeof(*x));
```

Various pages
Alejandro Colomar
Cast to 'unsigned long' rather than 'long' when printing with "%lx"

stdarg.3
Alejandro Colomar
Declare variables with different types in different lines
In particular, don's mix a variable and a pointer declaration
on the same line: TYPE x, *p;

Changes to individual pages
---

memusage.1
Michael Kerrisk
EXAMPLES: remove doubled calculations
The same calculations are repeated in malloc() and printf() calls.
For better readability, do the calculations once.
Michael Kerrisk
Use %zu rather than %zd when printing 'size_t' values

clock_getres.2
Alejandro Colomar
EXAMPLES: use 'const' when appropriate
Alejandro Colomar [Jakub Wilk]
Cast 'time_t' to 'int' for printf() and fix the length modifiers
Michael Kerrisk [Tony May]
Fix type and variable name in dynamic clock code example

clone.2
Michael Kerrisk
CAP_CHECKPOINT_RESTORE can now be used to employ 'set_tid'

epoll_ctl.2

Michael Kerrisk
epoll instances can be nested to a maximum depth of 5
This limit appears to be an off-by-one count against
EP_MAX_NESTS (4).
Michael Kerrisk
Move some version info from CONFORMING TO to VERSIONS

eventfd.2
Alejandro Colomar
Use 'PRIxN' macros when printing
C99 fixed-width integer types

futex.2
Alejandro Colomar
Use appropriate types

getdents.2
Alejandro Colomar
SYNOPSIS: add missing header and feature test macro

intro.2
intro.3
credentials.7
feature_test_macros.7
standards.7
Michael Kerrisk
SEE ALSO: add system_data_types(7)

ioctl_ns.2
stat.2
Alejandro Colomar [Konstantin Bukin]
Fix signedness of printf specifiers

membarrier.2
Alejandro Colomar
Note that glibc does not provide a wrapper

mprotect.2
Alejandro Colomar
Use "%p" rather than casting to 'long' when printing pointer values

mq_getsetattr.2
Alejandro Colomar
Use 'const' when appropriate

msgop.2
Yang Xu
Add restriction on ENOSYS error

open.2
  Michael Kerrisk [henrik@optoscale.no]
    ERRORS: add EBUSY

openat.2
  Alejandro Colomar
    SYNOPSIS: return long
      The Linux kernel uses long as the return type for this syscall.
      As glibc provides
 no wrapper, use the same type the kernel uses.

open_by_handle_at.2
  Alejandro Colomar
    Use "%u" rather than "%d" when printing 'unsigned int' values

perf_event_open.2
  Alexey Budankov
    Update the man page with CAP_PERFMON related information

recv.2
send.2
  Michael Kerrisk
    Add cross references to pages with further info about ancillary data

sched_getattr.2
  Aleksa Sarai
    Update to include changed size semantics

seccomp.2
  Michael Kerrisk [Jann Horn]
    Warn reader that SECCOMP_RET_TRACE can be overridden
      Highlight to the reader that if another filter returns a
      higher-precedence action value, then the ptracer will not
      be notified.
  Michael Kerrisk [Rich Felker]
    Warn against the use of SECCOMP_RET_KILL_THREAD
      Killing a thread with SECCOMP_RET_KILL_THREAD is very likely
      to leave the rest of the process in a broken state.
  Michael Kerrisk [Rich Felker]

   EXAMPLES: use SECCOMP_RET_KILL_PROCESS rather than SECCOMP_RET_KILL
  Alejandro Colomar
    Use ARRAY_SIZE() macro instead of raw sizeof division

setns.2
  Michael Kerrisk
    Correct the version for time namespace support

sigaction.2
  Michael Kerrisk [Alejandro Colomar]
    Use correct POSIX type for siginfo_t.si_value

syscalls.2
  Michael Kerrisk
    Move system calls from discontinued ports out of main syscall list
      Various ports that had their own indigenous system calls have
      been discontinued. Remove those system calls (none of which had
      manual pages!) to a separate part of the page, to avoid
      cluttering the main list of system calls.
  Michael Kerrisk
    Add close_range (Linux 5.9)

timerfd_create.2
  Alejandro Colomar
    Use 'PRIxN' macros when printing C99 fixed-width integer types

userfaultfd.2
  Michael Kerrisk
    Use a better type (uint64_t) for 'len' in EXAMPLES
  Alejandro
 Colomar
    Use 'PRIx64' rather than "%llx" when printing 64-bit fixed-width types

argz_add.3
envz_add.3
  Michael Kerrisk [Jonny Grant]
    Point out that 'error_t' is an integer type

bsearch.3
  Alejandro Colomar
    Fix intermediate type and remove unneeded casts

bswap.3
  Jakub Wilk
    Use strtoull() for parsing 64-bit numbers

dlopen.3
  Michael Kerrisk
    Clarify DT_RUNPATH/DT_RPATH details
      It is the DT_RUNPATH/DT_RPATH of the calling object (not the
      executable) that is relevant for the library search. Verified
      by experiment.

errno.3
  Michael Kerrisk [Alejandro Colomar]

Note that the pthreads APIs do not set errno

fopencookie.3
Alejandro Colomar
printf()'s .* expects an int; cast accordingly
Alejandro Colomar
Fix bugs in example

fread.3
Alejandro Colomar
Move ARRAY_SIZE logic into macro

freeaddrinfo.3
Marko Hrastovec
Fix memory leaks in freeaddrinfo()
examples

getline.3
Alejandro Colomar
Use %zd rather than %zu when printing 'ssize_t' values

lseek64.3
Michael Kerrisk
Since glibc 2.28. the 'llseek' symbol is no longer available

mallinfo.3
Michael Kerrisk
The 'usmblks' field is nowadays always 0

offsetof.3
Alejandro Colomar
Use "%zu" rather than "%zd" when printing 'size_t' values

perror.3
Michael Kerrisk
sys_errlist and sys_nerr are no longer exposed by <stdio.h>
The change came with the release of glibc 2.32.

posix_fallocate.3
Érico Rolim
Add EOPNOTSUPP error code.

psignal.3
strsignal.3
Michael Kerrisk
Consolidate information on 'sys_siglist' in one page (strsignal(3))

pthread_attr_init.3

Michael Kerrisk
SEE ALSO: add pthread_attr_init(3)

pthread_attr_init.3
pthread_create.3
pthread_getattr_np.3
Michael Kerrisk
Use correct type (size_t) for some variables

pthread_getattr_np.3
Alejandro Colomar
Use "%zu" and "%zx" when printing 'size_t' values

pthread_sigmask.3
Michael Kerrisk
SEE ALSO: add pthread_attr_setsigmask_np(3)

qsort.3
Alejandro Colomar
Fix casts
Alejandro Colomar
SYNOPSIS: move code from queue.3 to stailq.3

regex.3
Alejandro Colomar
Add example program
Alejandro Colomar
Remove unnecessary include

strsignal.3
Michael Kerrisk [Hauke Fath]
Note that starting with v2.32, glibc no longer exports 'sys_siglist'
Michael Kerrisk
Further addition on version range for sys_siglist
Michael Kerrisk
Note that 'sys_siglist' is nonstandard

strtod.3
Jonathan Wakely
Fix return value for underflow

strtol.3
Alejandro Colomar
EXAMPLES: simplify errno checking
Alejandro Colomar
EXAMPLES: as the default base, use special value 0
Alejandro Colomar
EXAMPLES: delimit output string using ""

tsearch.3
  Alejandro Colomar
    Simplify
 type usage and remove unneeded casts
  Alejandro Colomar
    Use size_t for malloc() argument

loop.4
  Yang Xu
    Add some details about lo_flags

core.5
  Alejandro Colomar
    Use adequate type

locale.5
  Florian Weimer
    Decimal points, thousands separators must be one character

proc.5
  Michael Kerrisk
    Update capability requirements for accessing /proc/[pid]/map_files
  Jann Horn [Mark Mossberg]
    Document inaccurate RSS due to SPLIT_RSS_COUNTING
  Michael Kerrisk
    Note "open file description" as (better) synonym for "file handle"

resolv.5
  Florian Weimer
    Document the trust-ad option

aio.7
  Alejandro Colomar
    Use perror() directly

bpf-helpers.7
  Michael Kerrisk [Jakub Wilk]
    Resync with current kernel source

capabilities.7
  Michael Kerrisk
    Under CAP_SYS_ADMIN, group "sub-capabilities" together
      CAP_BPF, CAP_PERFMON, and CAP_CHECKPOINT_RESTORE have all been

   added to split out the power of CAP_SYS_ADMIN into weaker pieces.
      Group all of these capabilities together in the list under
      CAP_SYS_ADMIN, to make it clear that there is a pattern to these

capabilities.
Michael Kerrisk
CAP_SYS_ADMIN implies CAP_CHECKPOINT_RESTORE
But the latter, weaker capability is preferred.
Michael Kerrisk
Add kernel doc reference for CAP_PERFMON

fanotify.7
Alejandro Colomar
Pass array to read(2) directly instead of a pointer to it

fanotify.7
fanotify_mark.2
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Generalize documentation of FAN_REPORT_FID

feature_test_macros.7
Jakub Wilk
Update list of macros that inhibit default definitions

man.7
Michael Kerrisk [G. Branden Robinson]
Clarify that alternating typeface macros print arguments without spaces

man-pages.7
Michael Kerrisk
Add some more requests re code examples
Michael Kerrisk
Soften the statement that ideal programs should be short

namespaces.7
Michael Kerrisk
A 'time_for_children' symlink can also pin a namespace

pid_namespaces.7
Michael Kerrisk
Update capability requirements for /proc/sys/kernel/ns_last_pid

pthreads.7
Michael Kerrisk
Explicitly note that pthreads APIs return an errno-style value on error

rtld-audit.7
Florian Weimer [Carlos O'Donell]
Clarify la_version handshake
Returning its argument without further checks is almost always
wrong for la_version.
Alejandro Colomar

Use "%u" rather than "%d" when printing 'unsigned int' values

sigevent.7
  Michael Kerrisk
    Note that 'sigev_notify_thread_id' is Linux-specific

socket.7
  Michael Kerrisk
    SEE ALSO: add ipv6(7)

========== Changes in man-pages-5.10 ==========

Released: 2020-12-21, Munich

Contributors

The following people contributed patches/fixes
 or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed
anyone!

Newly documented interfaces in existing pages
---

access.2
  Michael Kerrisk
    Document faccessat2()
      faccessat2() was added in Linux 5.8 and enables a fix to
      longstanding bugs in the faccessat() wrapper function.

membarrier.2
  Peter Oskolkov [Alejandro Colomar]
    Update for Linux 5.10
      Linux kernel commit 2a36ab717e8fe678d98f81c14a0b124712719840
      (part of 5.10 release) changed sys_membarrier prototype/parameters
      and added two new commands [MEMBARRIER_CMD_PRIVATE_EXPEDITED_RSEQ
      and MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_RSEQ].

mount.2
statfs.2
  Ross Zwisler
    Add NOSYMFOLLOW flags to mount(2) and statfs(2)

New and changed links
---

faccessat2.2
  Michael Kerrisk
    New link to access.2

CIRCLEQ_EMPTY.3
CIRCLEQ_FIRST.3
CIRCLEQ_FOREACH.3
CIRCLEQ_FOREACH_REVERSE.3
CIRCLEQ_HEAD_INITIALIZER.3
CIRCLEQ_LAST.3
CIRCLEQ_LOOP_NEXT.3
CIRCLEQ_LOOP_PREV.3
CIRCLEQ_NEXT.3
CIRCLEQ_PREV.3
  Michael Kerrisk
    Add missing links to circleq.3

pthread_attr_getsigmask_np.3

Michael Kerrisk
New link to pthread_attr_setsigmask_np.3

Global changes

Various pages
Alejandro Colomar
Use Oxford comma

Changes to individual pages
---

access.2
Michael Kerrisk
BUGS: note that faccessat() wrapper function emulation ignores ACLs

bpf.2
Michael Kerrisk
Place EXAMPLES section in correct location

cacheflush.2
Alejandro Colomar
Document Architecture-specific variants
Alejandro Colomar [Heinrich Schuchardt]
Document __builtin___clear_cache() as a more portable alternative

chroot.2
memfd_create.2
tailq.3
Michael Kerrisk [Alejandro Colomar]
Fix unbalanced .nf/.fi

clock_getres.2
Michael Kerrisk
Place ERRORS in alphabetical order

clone.2
sigaltstack.2
Michael Kerrisk
clone(CLONE_VM)
disables the alternate signal stack

getrlimit.2
Michael Kerrisk
State more precisely the range of kernel versions that had RLIMIT_LOCKS

getrusage.2
  Michael Kerrisk
    Note that the 'vtimes' symbol exists only up to glibc 2.32

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Alejandro Colomar
    SYNOPSIS: s/io_context_t/aio_context_t/
      Linux uses aio_context_t for these syscalls,
      and it's the type provided by <linux/aio_abi.h>.
      Use it in the SYNOPSIS.

      libaio uses 'io_context_t', but that difference is already noted
      in NOTES.

io_setup.2
  Alejandro Colomar
    SYNOPSIS: return long

link.2
  Mathias Rav
    ERRORS: add ENOENT when target is deleted
      Linux kernel commit aae8a97d3ec30788790d1720b71d76fd8eb44b73 (part
      of kernel release v2.6.39) added a check to disallow creating a
      hard link to an unlinked file.

llseek.2

 Michael Kerrisk
    Note size of 'loff_t' type
  Michael Kerrisk
    Point the reader to lseek64(3) for info about llseek(3)
  Michael Kerrisk
    Some mild rewriting to ease reading of the info in this page

mmap.2
  Michael Kerrisk
    Clarify SIGBUS text and treatment of partial page at end of a mapping

msgctl.2
  Michael Kerrisk
    Make comments in 'msqid_ds' definition more compact
  Michael Kerrisk
    Place list of field descriptions in same order as structure definition

Michael Kerrisk
Use field name "msg_cbytes" rather than "__msg_cbytes"
Michael Kerrisk
Add description of 'msg_cbytes' field

openat.2
Colin Ian King
Fix include path, should be linux/openat2.h

perf_event_open.2
Namhyung Kim [Alejandro Colomar]
Update man page with recent kernel changes
Alejandro Colomar
Assign calculated value explicitly to 'config'

restart_syscall.2
Alejandro Colomar
SYNOPSIS: Fix restart_syscall()
return type

set_tid_address.2
Alejandro Colomar
SYNOPSIS: Fix set_tid_address() return type

shmctl.2
Michael Kerrisk
Place list of field descriptions in same order as structure definition

sigaction.2
Michael Kerrisk
Clarify description of SA_NODEFER
Clarify description of SA_NODEFER, and note interaction with
act.sa_mask.
Michael Kerrisk
Add a cross-reference to signal(7) for further info on 'ucontext_t'

sigaltstack.2
Michael Kerrisk
Clarify that the alternate signal stack is per-thread
Clarify that the alternate signal stack is per-thread (rather
than process-wide).

spu_create.2
Michael Kerrisk
Add kernel version numbers for SPU_CREATE_AFFINITY_SPU/_MEM
Michael Kerrisk
Relocate paragraph on 'mode' argument
Michael Kerrisk [Alejandro Colomar]

Clarify that spu_create() now has 4 arguments but once had only 3

subpage_prot.2
Alejandro Colomar
SYNOPSIS: Fix return type: s/long/int/

syscalls.2
Michael Kerrisk
Add process_madvise()
Michael Kerrisk
Note that sysctl() was removed in Linux 5.5

timer_getoverrun.2
Michael Kerrisk
timer_getoverrun() now clamps the overrun count to DELAYTIMER_MAX
See https://bugzilla.kernel.org/show_bug.cgi?id=12665.

uselib.2
posix_memalign.3
profil.3
rtime.3
Michael Kerrisk
Remove some text about libc/libc5
With this change, there remain almost no vestiges of information
about the long defunct Linux libc.

errno.3
Michael Kerrisk
Note another possible cause of the EMFILE error

getcontext.3
Michael Kerrisk
Mention SA_SIGINFO flag when talking about 3-argument signal handler
Michael Kerrisk
SEE ALSO: add signal(7)

list.3
Michael Kerrisk
NAME: remove LIST_PREV, which is not documented in this page

lseek64.3
Michael Kerrisk
Remove
section numbers from interface list
Michael Kerrisk
Remove sentence saying lseek64() is an alias for llseek()
Michael Kerrisk
NOTES: describe the origin of lseek64() in LFS

nextafter.3
  Michael Kerrisk
    Remove duplicate "BUGS" section heading

pthread_tryjoin_np.3
  Michael Kerrisk [Mike Crowe]
    Note that pthread_timedjoin_np() uses CLOCK_REALTIME, but there's a bug

rcmd.3
  Michael Kerrisk
    SEE ALSO: remove intro(2)

strnlen.3
  Michael Kerrisk [Heinrich Schuchardt]
    Fix a small inconsistency in the text

elf.5
  Michael Kerrisk
    SEE ALSO: add objcopy(1)

filesystems.5
  Ahelenia Ziemiaska [Alejandro Colomar]
    Fix link to user space tooling for ncpfs
  Ahelenia Ziemiaska [Alejandro Colomar]
    Note ncpfs removal from kernel

attributes.7
  Michael Kerrisk
    SEE ALSO: add signal-safety(7)

fanotify.7
  Amir Goldstein [Jan Kara]
    Fix outdated description

kernel_lockdown.7
   Michael Kerrisk
    Remove unneeded quotes

packet.7
  Baruch Siach [Alejandro Colomar]
    Update references to kernel documentation

pthreads.7
  Michael Kerrisk
    Rephrase function list in terms of POSIX rather than SUS
      The list was using an inconsistent mixture of "POSIX" and "SUS".

signal.7
  Michael Kerrisk [Heinrich Schuchardt, Dave Martin]
    Add some details on the execution of signal handlers
      Add a "big picture" of what happens when a signal handler
      is invoked.
  Michael Kerrisk
    Add pidfd_send_signal() to list of APIs for sending signals
  Michael Kerrisk
    Mention 'ucontext_t' in the discussion of signal handler execution
  Michael Kerrisk
    SEE ALSO: add swapcontext(3)

signal-safety.7
  Michael Kerrisk
    Note async-signal-safety details for errno

standards.7
  Michael Kerrisk
    Add URL for POSIX.1-2008/SUSv4
  Michael Kerrisk
    Add LFS (Large File Summit)
   Michael Kerrisk [Rob Landley]
    Fix some URLs for locations of the standards
  Michael Kerrisk
    Relocate the discussion on POSIX manual pages

tcp.7
  Alejandro Colomar [Philip Rowlands]
    tcp_syncookies: It is now an integer [0, 2]
      Since Linux kernel 3.12, tcp_syncookies can have the value 2,
      which sends out cookies unconditionally.

========== Changes in man-pages-5.11 ==========

Released: 2021-03-21, Munich

Willem de Bruijn <willemb@google.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

close_range.2
  Stephen Kitt, Michael Kerrisk [Christian Brauner]
    New page documenting close_range(2)

process_madvise.2
  Suren Baghdasaryan, Minchan Kim [Michal Hocko, Alejandro Colomar,
  Michael Kerrisk]
    Document process_madvise(2)

fileno.3
  Michael Kerrisk
    Split fileno(3) content out of ferror(3) into new page
      fileno(3) differs from the other functions in various ways.
      For example, it is governed by different standards,
      and can set 'errno'. Conversely, the other functions
      are about examining the status of a stream, while
      fileno(3) simply obtains the underlying file descriptor.

      Furthermore, splitting this function out allows
      for some cleaner upcoming changes in ferror(3).

Newly documented interfaces in existing pages
---

epoll_wait.2
  Willem de Bruijn [Dmitry V. Levin]
    Add documentation of epoll_pwait2()
      Expand the epoll_wait() page with epoll_pwait2(), an epoll_wait()
      variant that takes a struct timespec to enable nanosecond
      resolution timeout.

fanotify_init.2
fanotify.7
  Jan Kara [Steve Grubb]
    Document FAN_AUDIT flag and FAN_ENABLE_AUDIT

madvise.2
  Michael Kerrisk
    Add descriptions of MADV_COLD and MADV_PAGEOUT
      Taken from process_madvise(2).

openat2.2
  Jens Axboe
    Add RESOLVE_CACHED

prctl.2
  Gabriel Krisman Bertazi

Document Syscall User Dispatch

mallinfo.3
  Michael Kerrisk
    Document mallinfo2() and note that mallinfo() is deprecated
      Document the mallinfo2() function
 added in glibc 2.33.
    Update example program to use mallinfo2()

system_data_types.7
  Alejandro Colomar
    Add off64_t to system_data_types(7)

ld.so.8
  Michael Kerrisk
    Document the --argv0 option added in glibc 2.33

New and changed links
---

epoll_pwait2.2
  Dmitry V. Levin
    New link to epoll_wait(2)

mallinfo2.3
  Michael Kerrisk
    New link to mallinfo(3)

off64_t.3
  Alejandro Colomar
    New link to system_data_types(7)

Global changes

Various pages
  Alejandro Colomar
    SYNOPSIS: Use 'restrict' in prototypes
      This change has been completed for *all* relevant pages
      (around 135 pages in total).

Various pages
  Alejandro Colomar [Zack Weinberg]
    Remove unused <sys/types.h>
      The manual pages are already inconsistent in which headers need
      to be included. Right now, not all of the types used by a

function have their required
header included in the SYNOPSIS.

If we were to add the headers required by all of the types used by functions, the SYNOPSIS would grow too much. Not only it would grow too much, but the information there would be less precise.

Having system_data_types(7) document each type with all the information about required includes is much more precise, and the info is centralized so that it's much easier to maintain.

So let's document only the include required for the function prototype, and also the ones required for the macros needed to call the function.

<sys/types.h> only defines types, not functions or constants, so it doesn't belong to man[23] (function) pages at all.

I ignore if some old systems had headers that required you to include <sys/types.h> *before* them (incomplete headers), but if so, those implementations
would be broken, and those headers
should probably provide some kind of warning. I hope this is not the case.

[mtk: Already in 2001, POSIX.1 removed the requirement to include <sys/types.h> for many APIs, so this patch seems well past due.]

A few pages
  Alejandro Colomar
    Add notes about missing glibc wrappers

_exit.2
abort.3
err.3
exit.3
pthread_exit.3
setjmp.3
  Alejandro Colomar
    SYNOPSIS: Use 'noreturn' in prototypes
      Use standard C11 'noreturn' in these manual page for functions that do not return.

Various pages
  Ganimedes Colomar [Alejandro Colomar]
    Normalize SYNOPSIS notes about nonexistent glibc wrappers
      To easily distinguish documentation about glibc wrappers from

documentation about kernel syscalls, let's have a normalized
'Note' in the SYNOPSIS, and a further explanation in the page body
(NOTES in most of them),
as already happened in many (but not all)
of the manual pages for syscalls without a wrapper. Furthermore,
let's normalize the messages, following membarrier.2 (because it's
already quite extended), so that it's easy to use grep to find
those pages.
Normalize NOTES about nonexistent glibc wrappers
This commit normalizes texts under sections other than SYNOPSIS
(most of them in NOTES).

Global changes (formatting fixes and minor edits)

Various pages
Michael Kerrisk
ERRORS: remove redundant statement that 'errno' is set
This is implied in every other manual page. There is no need to
state it explicitly in these pages.

Various pages
Michael Kerrisk
Use periods more consistently inside code comments
In general, complete sentences in free-standing comments
should be terminated by periods.

A
few pages
Michael Kerrisk
Better table formatting
In particular, allow for rendering in widths different from
(especially less than) 80 columns.

Various pages
Michael Kerrisk
Consistency fix-up in FTMs
Generally, place '||' at start of a line, rather than the end of
the previous line.

Rationale: this placement clearly indicates that each piece
is an alternative.

Various pages
Michael Kerrisk [Alejandro Colomar]
Bring more whitespace consistency in SYNOPSIS
The use of vertical white space in the SYNOPSIS sections

is rather inconsistent. Make it more consistent, subject to the
following heuristics:

* Prefer no blank lines between function signatures by default.
* Where many functions are defined in the SYNOPSIS, add blank
  lines where needed to improve readability, possibly by using

blank lines to separate logical groups of functions.

Various pages
  Alejandro Colomar
    Consistently use 'unsigned int'
      Most pages use 'unsigned int' (and the kernel too).
      Make them all do so.

Various pages
  Michael Kerrisk
    Various improvements in wording in RETURN VALUE

Various pages
  Michael Kerrisk
    s/Glibc versions </Glibc </ in Feature Test Macro discussions
      Use a more compact notation that will render less wide
      on the terminal.

Various pages
  Michael Kerrisk
    Standardize wording around setting of 'errno' on error
      In the RETURN VALUE sections, a number of different wordings
      are used in to describe the fact that 'errno' is set on error.
      There's no reason for the difference in wordings, since the same
      thing is being described in each case. Switch to a standard
      wording that is the same as FreeBSD and similar to the wording

used in POSIX.1.

      In this change, "to indicate the cause of the error"
      is changed to "to indicate the error".

Various pages
  Michael Kerrisk
    Add missing .nf/.fi in FTM info

Various pages
  Michael Kerrisk
    Simplify mark-up for Feature Test Macro requirements
      Different source styles are used in different pages to achieve the
      same formatted output, and in some cases the source mark-up is a

rather convoluted combination of .RS/.RE/.TP/.PD macros. Simplify this greatly, and unify all of the pages to use more or less the same source code style. This makes the source code rather easier to read, and may simplify future scripted global changes.

The feature test macro info is currently bracketed by .nf/.fi pairs. This is not strictly necessary (i.e., it makes no difference to the rendered output), but for the moment we keep these
"brackets" in case they may be replaced with something else.

Various pages
Michael Kerrisk
Use real minus signs in pathnames

Various pages
Michael Kerrisk
Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings are used in to describe the fact that 'errno' is set on error. There's no reason for the difference in wordings, since the same thing is being described in each case. Switch to a standard wording that is the same as FreeBSD and similar to the wording used in POSIX.1.

In this change, reword various cases saying that 'errno' is set "appropriately" to "is set to indicate the error".

Various pages
Michael Kerrisk
Improve formatting in ATTRIBUTES
Make the formatting more consistent inside the tables in the ATTRIBUTES sections. Make the source code more uniform; in

particular, eliminate the use of custom tweaks using 'lbwNN'/'lwNN' and .br macros. In addition, ensure that hyphenation and text justification do not occur inside the tables.

Various pages
Michael Kerrisk
Use .nf/.fi in SYNOPSIS
The majority of pages use .nf/.fi in SYNOPSIS, but there are still many that don't and use .br to achieve newlines. Fix many of those. This brings greater consistency to the pages, which eases editing and may ease future scripted edits to the pages.

Various pages
Michael Kerrisk

Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings are used in to describe the fact that 'errno' is set on error. There's no reason for the difference in wordings, since the same thing is being described in each case. Switch to a standard wording that is the
same as FreeBSD and similar to the wording used in POSIX.1.

In this change, miscellaneous descriptions of the setting of 'errno' are reworded to the norm of "is set to indicate the error".

Various pages
Michael Kerrisk
Use "\-" to generate real minus in circumstances where appropriate
Use \- for math formulas, pathnames, manual page cross references, etc.

Various pages
Michael Kerrisk
Inside code blocks (.EX/.EE) use \- to get real minus signs
A real minus can be cut and pasted...

Various pages
Alejandro Colomar
Remove explicit blank lines, replacing them with .PP when appropriate

Various pages
Michael Kerrisk
Use internally consistent continuation indents in SYNOPSIS
In the SYNOPSIS, a long function prototype may need to be continued over to the next line. The continuation line is indented according to the following
rules:

1. If there is a single such prototype that needs to be continued, then align the continuation line so that when the page is rendered on a fixed-width font device (e.g., on an xterm) the continuation line starts just below the start of the argument list in the line above. (Exception: the indentation may be adjusted if necessary to prevent a very long continuation line or a further continuation line where the function prototype is very long.)

   Thus:

   int tcsetattr(int fd, int optional_actions,

const struct termios *termios_p);

2. But, where multiple functions in the SYNOPSIS require
continuation lines, and the function names have different
lengths, then align all continuation lines to start in the
same column. This provides a nicer rendering
in PDF output
(because the SYNOPSIS uses a variable width font where
spaces render narrower than most characters).

Thus:

int getopt(int argc, char * const argv[],
const char *optstring);
int getopt_long(int argc, char * const argv[],
const char *optstring,
const struct option *longopts, int *longindex);

Various pages
Michael Kerrisk
Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings
are used in to describe the fact that 'errno' is set on error.
There's no reason for the difference in wordings, since the same
thing is being described in each case. Switch to a standard
wording that is the same as FreeBSD and similar to the wording
used in POSIX.1.

In
this change, fix some instances stating that 'errno' is set
"appropriately" to instead say "to indicate the error".

Various System V IPC pages
Michael Kerrisk
Improve wording describing RETURN VALUE and setting of 'errno'

Changes to individual pages
---

alloc_hugepages.2
Michael Kerrisk
CONFORMING TO: reword to reflect that these system calls are long gone

cacheflush.2
Alejandro Colomar
Update SYNOPSIS for glibc wrapper
Glibc uses 'void *' instead of 'char *'.

And the prototype is declared in <sys/cachectl.h>.

clone.2
  Valentin Kettner
    Fix types in clone_args
      A file descriptor is an int so it should be stored through an int
      pointer while parent_tid should have the same type as child_tid
      which is pid_t pointer.

close.2
  Michael Kerrisk
    SEE ALSO: add close_range(2)

copy_file_range.2
  Alejandro Colomar
    Document glibc
 wrapper instead of kernel syscall
      Glibc uses 'off64_t' instead of 'loff_t'.

delete_module.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      The Linux kernel uses 'unsigned int' instead of 'int' for the
      'flags' parameter. As glibc provides no wrapper, use the same
      type the kernel uses.

epoll_create.2
  Michael Kerrisk
    CONFORMING TO: mention that epoll_create1() is Linux-specific

epoll_wait.2
  Michael Kerrisk
    CONFORMING TO: mention that epoll_pwait() is Linux-specific

execve.2
  Palmer Dabbelt
    Correct the versions of Linux that don't have ARG_MAX argv/envp size

execveat.2
  Alejandro Colomar
    Fix prototype
      It's been 6 years since execveat(2) was added to the kernel,
      and there's still no glibc wrapper. Let's document the kernel
      syscall prototype.

getcpu.2
  Michael Kerrisk [Alejandro Colomar]
    Rewrite page to describe glibc wrapper

function
Since glibc 2.29, there is a wrapper for getcpu(2).
The wrapper has only 2 arguments, omitting the unused
third system call argument. Rework the manual page
to reflect this.

getgid.2
getuid.2
Michael Kerrisk
Note that these interfaces never modify 'errno'
See https://www.austingroupbugs.net/view.php?id=511
and the POSIX.1-2008 specifications of the interfaces.

gethostname.2
Michael Kerrisk
Update FTM requirements for gethostname()

getpagesize.2
getdtablesize.3
Michael Kerrisk
Update/correct FTM requirements

getrusage.2
Michael Kerrisk
Starting in 2.33, glibc no longer provides vtimes()

ioctl_tty.2
Michael Kerrisk
Reformat argument type information
The current mark-up renders poorly. To resolve this, move
the type information into a separate line.

ipc.2
Alejandro Colomar
Fix prototype parameter types

kcmp.2
Michael Kerrisk
Since Linux 5.12, kcmp() availability is unconditional
kcmp() is no longer dependent on CONFIG_CHECKPOINT_RESTORE.

keyctl.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
The Linux kernel uses 'unsigned long'.
There's no reason to use the typedef '__kernel_ulong_t'.

lookup_dcookie.2

Alejandro Colomar
Use standard types: u64 -> uint64_t

madvise.2
Michael Kerrisk
SEE ALSO: add process_madvise(2)

mlock.2
Alejandro Colomar
mlock2(): Fix prototype parameter types
The documented prototype for mlock2() was a mix of the
glibc wrapper prototype and the kernel syscall prototype.
Let's document the glibc wrapper prototype, which is shown below.
Michael Kerrisk
CONFORMING TO: note more explicitly which APIs are in the standards

mmap2.2
Alejandro Colomar
Fix prototype parameter types
There are many
slightly different prototypes for this syscall,
but none of them is like the documented one.
Of all the different prototypes,
let's document the asm-generic one.

mount.2
Michael Kerrisk
Note that the 'data' argument can be NULL

move_pages.2
Alejandro Colomar
Add notes about missing glibc wrappers

open.2
rename.2
Alyssa Ross
Refer to tmpfs rather than shmem
If I'm understanding correctly, tmpfs is a filesystem built on
shmem, so I think it's more correct (and probably much more
widely understandable) to refer to tmpfs here.

pciconfig_read.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
Use the glibc prototypes instead of the kernel ones.
Exception: use 'int' instead of 'enum'.

pidfd_open.2

Michael Kerrisk
Note the process_madvise(2) use case for PID file descriptors

readlink.2
Michael Kerrisk [Jonny Grant]
Emphasize that the returned buffer is not null-terminated

s390_pci_mmio_write.2
Alejandro Colomar
SYNOPSIS: Add 'const' qualifier
s390_pci_mmio_write() uses 'const void *' instead of 'void *'.

sched_setattr.2
Alejandro Colomar
Add note about missing glibc wrappers

semctl.2
Yang Xu [Alejandro Colomar, Manfred Spraul]
Correct SEM_STAT_ANY description

socketcall.2
Alejandro Colomar
Add note about missing glibc wrapper

splice.2
Alejandro Colomar
Use 'off64_t' instead of 'loff_t'
The kernel syscall uses 'loff_t', but the glibc wrapper uses 'off64_t'.
Let's document the wrapper prototype, as in other pages.

spu_create.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter type
The 'flags' parameter of spu_create() uses 'unsigned int'.

spu_run.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
The 2nd and 3rd parameters of spu_run()
use 'uint32_t *'.

stat.2
Jonathan Wakely [Alejandro Colomar]
Remove <unistd.h> from SYNOPSIS
There seems to be no reason <unistd.h> is shown here, so remove it.
Michael Kerrisk
Move the obsolete _BSD_SOURCE FTM to the end of the FTM info

syscall.2
  Peter H. Froehlich
    Update superh syscall convention

syscalls.2
  Michael Kerrisk
    Add epoll_pwait2()

tkill.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      All but the last parameters of t[g]kill() use 'pid_t',
      both in the kernel and glibc.

vmsplice.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter type
      The 3rd parameter of vmsplice() uses 'size_t' in glibc.

bstring.3
  Michael Kerrisk
    SEE ALSO: add string(3)

circleq.3
list.3
slist.3
stailq.3
tailq.3
  Alejandro Colomar
    Improve readability, especially in SYNOPSIS

circleq.3
  Alejandro Colomar
    Fix CIRCLEQ_LOOP_*() return
 type

crypt.3
  Michael Kerrisk
    Reformat FTM info (in preparation for next patch)
  Michael Kerrisk
    Update crypt() FTM requirements to note glibc 2.28 changes

ecvt.3
gcvt.3
  Michael Kerrisk
    Update FTM requirements

error.3

Michael Kerrisk [Alejandro Colomar, Walter Harms]
Clarify the meaning of 'status==0' for error(3)

ferror.3
Michael Kerrisk
Remove fileno(3) content that was migrated to new fileno(3) page
Michael Kerrisk
Add a RETURN VALUE section
Michael Kerrisk
POSIX.1-2008: these functions won't change 'errno' if 'stream' is valid
See https://www.austingroupbugs.net/view.php?id=401.

fread.3
Alessandro Bono
EXAMPLES: swap size and nmemb params
It works both ways, but this one feels more right. We are reading
four elements sizeof(*buffer) bytes each.

fseeko.3
Michael Kerrisk
Move info about obsolete FTM from SYNOPSIS to NOTES
This
makes the SYNOPSIS more consistent with other pages.

ftime.3
Michael Kerrisk
glibc 2.33 has removed ftime()

ftw.3
Alejandro Colomar
SYNOPSIS: Remove duplicate header

gethostbyname.3
Michael Kerrisk
Move mention of <sys/socket.h> from SYNOPSIS to DESCRIPTION
The functions are all declared in <netdb.h>. <sys/socket.h> is only
needed for the AF_* constants.

gethostid.3
Michael Kerrisk
Update FTM requirements for gethostid()

get_phys_pages.3
Alejandro Colomar [Jakub Wilk]
glibc gets the info from sysinfo(2) since 2.23

grantpt.3
ptsname.3

unlockpt.3
  Michael Kerrisk
    Remove mention of _XOPEN_SOURCE_EXTENDED FTM
      This rather ancient FTM is not mentioned in other pages for
      reasons discussed in feature_test_macros(7). Remove this FTM
      from the three pages where it does appear.

malloc.3
  Alejandro Colomar [Johannes Pfister]
    Document that realloc(p,
 0) is specific to glibc and nonportable

malloc_hook.3
  Alejandro Colomar
    SYNOPSIS: Use 'volatile' in prototypes

malloc_trim.3
  Dmitry Vorobev
    Remove mention of free() call
      'malloc_trim' was and is never called from the 'free' function.

pthread_create.3
  Michael Kerrisk [Paran Lee]
    Fix undeclared variable error in example program
  Michael Kerrisk
    Fix a signedness error in the example code

puts.3
  Michael Kerrisk
    Reorder functions more logically (group related functions together)

qecvt.3
  Michael Kerrisk
    Update feature test macro requirements

setbuf.3
  Michael Kerrisk
    POSIX doesn't require errno to be unchanged after successful setbuf()
      See https://www.austingroupbugs.net/view.php?id=397#c799

setlocale.3
  Michael Kerrisk [Alejandro Colomar, Bruno Haible]
    Restructure a particularly difficult sentence

simpleq.3
stailq.3
queue.7
SIMPLEQ_*.3

Alejandro Colomar

Document SIMPLEQ_*() as an alias to STAILQ_*() macros

strerror.3
Alejandro Colomar
strerrorname_np() and strerrordesc_np() first appeared on glibc 2.32

string.3
Michael Kerrisk
SEE ALSO: add bstring(3)

system.3
Alejandro Colomar [Ciprian Dorin Craciun]
Document bug and workaround when the command name starts with a hyphen

environ.7
Bastien Roucariès
Reorder the text
Move the text describing how to set environment variable before
the list(s) of variables in order to improve readability.
Bastien Roucariès
Document convention of string in environ
Document the name=value system and that nul byte is forbidden.
Bastien Roucariès
Document that HOME, LOGNAME, SHELL, USER are set at login time
and point to the su(1) manual page.
Bastien Roucariès
Add see also ld.so(8) for LD_ variables
Michael Kerrisk [Bastien Roucariès]
Improve the description
of PATH
Add more details of how PATH is used, and mention the legacy
use of an empty prefix.
Bastien Roucariès [Alejandro Colomar, Bastien Roucaries, Vincent Lefevre]
Document valid values of pathnames for SHELL, PAGER and EDITOR/VISUAL
Michael Kerrisk [Bastien Roucariès]
Note the default if PAGER is not defined
Michael Kerrisk
Be a little more precise when discussing 'exec'
Say "execve(2)" instead of "exec(3)", and note that this step
starts a new program (not a new process!).
Michael Kerrisk [Bastien Roucariès]
Relocate and reword the mention of _GNU_SOURCE

man-pages.7
Michael Kerrisk
Document "acknowledgement" as the preferred spelling

Michael Kerrisk
Add some notes on comments in example code
Michael Kerrisk
Add a FORMATTING AND WORDING CONVENTIONS section
In man-pages-5.11, a large number of pages were edited to achieve

greater consistency in the SYNOPSIS, RETURN VALUE and ATTRIBUTES
sections. To avoid future inconsistencies, try to capture some of
the preferred conventions in text in man-pages(7).
Michael Kerrisk
Note some rationale for the use of real minus signs

netdevice.7
Pali Rohár [Alejandro Colomar]
Update documentation for SIOCGIFADDR SIOCSIFADDR SIOCDIFADDR

netlink.7
Pali Rohár [Alejandro Colomar]
Fix minimal Linux version for NETLINK_CAP_ACK
NETLINK_CAP_ACK option was introduced in commit 0a6a3a23ea6e which first
appeared in Linux version 4.3 and not 4.2.
Pali Rohár [Alejandro Colomar]
Remove IPv4 from description
rtnetlink is not only used for IPv4
Philipp Schuster
Clarify details of netlink error responses
Make it clear that netlink error responses (i.e., messages with
type NLMSG_ERROR (0x2)), can be longer than sizeof(struct
nlmsgerr).
In certain circumstances, the payload can be longer.

shm_overview.7
Michael Kerrisk
SEE ALSO: add memfd_create(2)

sock_diag.7
Pali Rohár [Alejandro Colomar]
Fix recvmsg() usage in the example

tcp.7
Enke Chen
Documentation revision for TCP_USER_TIMEOUT

uri.7
Michael Kerrisk
Note that 'logical' quoting is the norm in Europe

========== Changes in man-pages-5.12 ==========

Released: 2021-06-20, Christchurch

Apologies if I missed anyone!

New and rewritten pages
----

seccomp_unotify.2
  Michael Kerrisk [Tycho Andersen, Jann Horn, Kees Cook, Christian Brauner
                Sargun Dhillon]
    New page documenting the seccomp user-space notification mechanism

MAX.3
  Alejandro Colomar
    New page to document MAX() and MIN()

Newly documented interfaces in existing pages
----

seccomp.2
  Tycho Andersen [MichaelKerrisk]
    Document SECCOMP_GET_NOTIF_SIZES
  Tycho Andersen
    Document SECCOMP_FILTER_FLAG_NEW_LISTENER   [Michael Kerrisk]
  Tycho Andersen
    Document SECCOMP_RET_USER_NOTIF [Michael Kerrisk]

set_mempolicy.2
  Huang Ying [Alejandro Colomar, "Huang, Ying"]
    Add mode flag MPOL_F_NUMA_BALANCING

userfaultfd.2
  Peter Xu
 [Alejandro Colomar, Mike Rapoport]
    Add UFFD_FEATURE_THREAD_ID docs
  Peter Xu [Alejandro Colomar, Mike Rapoport]
    Add write-protect mode docs

proc.5
  Michael Kerrisk
    Document /proc/sys/vm/sysctl_hugetlb_shm_group

system_data_types.7
  Alejandro Colomar
    Add 'blksize_t'
  Alejandro Colomar
    Add 'blkcnt_t'
  Alejandro Colomar
    Add 'mode_t'
  Alejandro Colomar
    Add 'struct sockaddr'
  Alejandro Colomar
    Add 'cc_t'
  Alejandro Colomar
    Add 'socklen_t'

New and changed links
---

blkcnt_t.3
  Alejandro Colomar
    New link to system_data_types(7)

blksize_t.3
  Alejandro Colomar
    New link to system_data_types(7)

cc_t.3
  Alejandro Colomar
    New link to system_data_types(7)

MIN.3
  Michael Kerrisk
    New link to MIN.3

mode_t.3
  Alejandro Colomar
    New link to system_data_types(7)

sockaddr.3
  Alejandro Colomar
    New link to system_data_types(7)

socklen_t.3
   Alejandro Colomar
    New link to system_data_types(7)

Global changes

Many pages
  Alejandro Colomar
    SYNOPSIS: Use syscall(SYS_...); for system calls without a wrapper

Many pages
  Alejandro Colomar
    SYNOPSIS: Document why each header is required

Many pages
  Alejandro Colomar
    SYNOPSIS: Remove unused includes

Various pages
  Alejandro Colomar
    Add note about the use of syscall(2)

Various pages
  Alejandro Colomar
    SYNOPSIS: Miscellaneous fixes to includes

A few pages
  Alejandro Colomar
    SYNOPSIS: Add missing 'const'

Changes to individual pages
---

dup.2
  Michael Kerrisk
    Rewrite the description of dup() somewhat
      As can be seen by any number of StackOverflow questions, people
      persistently misunderstand what dup() does, and the existing manual
      page text, which talks of "copying" a file descriptor doesn't help.
       Rewrite the text a little to try to prevent some of these
      misunderstandings, in particular noting at the start that dup()
      allocates a new file descriptor.
  Michael Kerrisk
    Clarify what silent closing means
  Alejandro Colomar
    SYNOPSIS: Use consistent comments through pages

epoll_wait.2
  Alejandro Colomar
    Move misplaced subsection to NOTES from BUGS

execveat.2
  Michael Kerrisk
    Library support has been added in glibc 2.34

_exit.2
  Michael Kerrisk
    Add a little more detail on the raw _exit() system cal

exit_group.2
  Alejandro Colomar
    Use 'noreturn' in prototypes

flock.2
  Aurelien Aptel [Alejandro Colomar]
    Add CIFS details
      CIFS flock() locks behave differently than the standard.
      Give an overview of those differences.

ioperm.2
  Alejandro Colomar
    Remove obvious comment

memfd_create.2
mmap.2
shmget.2
  Michael Kerrisk [Yang Xu]

 Document the EPERM error for huge page allocations
      This error can occur if the caller is does not have CAP_IPC_LOCK
      and is not a member of the sysctl_hugetlb_shm_group.

mmap.2
  Bruce Merry
    Clarify that MAP_POPULATE is best-effort

mount.2
  Topi Miettinen
    Document SELinux use of MS_NOSUID mount flag

open.2
  Alejandro Colomar [Walter Harms]
    Fix bug in linkat(2) call example
      AT_EMPTY_PATH works with empty strings (""), but not with NULL
      (or at least it's not obvious).
  Michael Kerrisk
    Make it clearer that an FD is an index into the process's FD table
      Sometimes people are confused, thinking a file descriptor is just a
      number....

perfmonctl.2
  Michael Kerrisk
    This system call was removed in Linux 5.10

pipe.2
  Alejandro Colomar
    SYNOPSIS: Fix incorrect prototype
  Michael Kerrisk
    Rearrange SYNOPSIS so that minority version pipe() is at end

ptrace.2
   Dmitry V. Levin [Alejandro Colomar, Mathieu Desnoyers]
    Mention PTRACE_GET_SYSCALL_INFO in RETURN VALUE section

seccomp.2
  Michael Kerrisk
    Reorder list of SECCOMP_SET_MODE_FILTER flags alphabetically
      (No content changes.)
  Michael Kerrisk
    SEE ALSO: add seccomp_unotify(2)

select.2
  Michael Kerrisk
    Strengthen the warning regarding the low value of FD_SETSIZE
      All modern code should avoid select(2) in favor of poll(2)
      or epoll(7).
  Michael Kerrisk
    Relocate sentence about the fd_set value-result arguments to BUGS

syscalls.2
  Michael Kerrisk
    perfmonctl(2) was removed in Linux 5.10

bswap.3
  Alejandro Colomar
    bswap_*() are implemented using functions
      Even though it's true that they are macros,
      it's transparent to the user.

      The user will see their results casted to unsigned types
      after the conversion due to the underlying
 functions,
      so it's better to document these as the underlying functions,
      specifying the types.

cmsg.3
unix.7

Michael Kerrisk
Refer to seccomp_unotify(2) for an example of SCM_RIGHTS usage

cpow.3
Alejandro Colomar
Use 'complex' after the type consistently

ctime.3
Michael Kerrisk [Katsuhiro Numata]
Restore documentation of 'tm_gmtoff' field

errno.3
Alejandro Colomar [Florian Weimer, Mark Kettenis]
Fix ENODATA text
ENODATA is an XSI STREAMS extension (not base POSIX).

exec.3
Josh Triplett [Alejandro Colomar]
Clarify that execvpe() uses PATH from the caller, not envp
Josh Triplett [Alejandro Colomar]
Fix description of 'e' variants
The envp argument specifies the environment of the new process
image, not "the environment of the caller".

fflush.3
Alejandro Colomar
SEE ALSO: Add fpurge(3)

getline.3
[Ahelenia Ziemiaska, Alejandro
Colomar]
!*lineptr is sufficient
No implementation or spec requires *n to be 0 to allocate
a new buffer.

getopt.3
James O. D. Hunt [Alejandro Colomar]
Clarify behaviour

printf.3
Utkarsh Singh [Alejandro Colomar]
Add overall structure of format string

pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
Alejandro Colomar
SYNOPSIS: Use 'restrict' in prototypes

pthread_mutexattr_setrobust.3
  Michael Kerrisk
    Note that the *_np() APIs are deprecated since glibc 2.34
  Alejandro Colomar
    SYNOPSIS: Remove incorrect 'const'

pthread_mutex_consistent.3
  Michael Kerrisk
    Note that pthread_mutexattr_setrobust() is now deprecated

pthread_yield.3
  Michael Kerrisk
    Note that this function is deprecated since glibc 2.34

rpc.3
  Alejandro Colomar
    SYNOPSIS: Fix prototypes (misc.)

scanf.3
  Alyssa Ross [Alejandro Colomar]
    Clarify that %n supports type modifiers

xdr.3
   Alejandro Colomar
    SYNOPSIS: Fix prototype types
      Use the same types glibc uses, and add a missing 'const'.

capabilities.7
  Michael Kerrisk
    CAP_IPC_LOCK also governs memory allocation using huge pages

environ.7
  Josh Triplett [Alejandro Colomar]
    Remove obsolete admonishment of the GZIP environment variable

kernel_lockdown.7
  dann frazier [Alejandro Colomar]
    Remove description of lifting via SysRq (not upstream)
      The patch that implemented lockdown lifting via SysRq ended up
      getting dropped[*] before the feature was merged upstream. Having
      the feature documented but unsupported has caused some confusion
      for our users.

mount_namespaces.7
namespaces.7
  Michael Kerrisk
    Relocate reference to pam_namespace(8) from namespaces.7 to
    mount_namespaces.7.

signal.7
  Michael Kerrisk
    Add reference to seccomp_unotify(2)
      The seccomp user-space notification
 feature can cause changes in
      the semantics of SA_RESTART with respect to system calls that
      would never normally be restarted. Point the reader to the page
      that provide further details.

vsock.7
  Alyssa Ross
    ioctls are on /dev/vsock, not sockets

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this

License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided

that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which
contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies
of the Program's
source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty;

and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole
or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered
independent and separate works in
themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program

with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is

void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed

through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS

TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

  Gnomovision version 69, Copyright (C) year name of author
  Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
  This is free software, and you are welcome to redistribute it
  under certain conditions; type `show c' for details.

The hypothetical commands `show w' and
 `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

 Yoyodyne, Inc., hereby disclaims all copyright interest in the program
 `Gnomovision' (which makes passes at compilers) written by James Hacker.

 <signature of Ty Coon>, 1 April 1989
 Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

lxml is copyright Infrae and distributed under the BSD license (see
doc/licenses/BSD.txt), with the following exceptions:

Some code, such a selftest.py, selftest2.py and
src/lxml/_elementpath.py are derived from ElementTree and
cElementTree. See doc/licenses/elementtree.txt for the license text.

lxml.cssselect and lxml.html are copyright Ian Bicking and distributed
under the BSD license (see doc/licenses/BSD.txt).

test.py, the test-runner script, is GPL and copyright Shuttleworth
Foundation. See doc/licenses/GPL.txt. It is believed the unchanged
inclusion of test.py to run the unit test suite falls under the
"aggregation" clause of the GPL and thus does not affect the license
of the rest of the package.

The isoschematron implementation uses several XSL and RelaxNG resources:
* The (XML syntax) RelaxNG schema for schematron, copyright International
  Organization for Standardization (see
  src/lxml/isoschematron/resources/rng/iso-schematron.rng for the license
  text)
* The skeleton
 iso-schematron-xlt1 pure-xslt schematron implementation
  xsl stylesheets, copyright Rick Jelliffe and Academia Sinica Computing
  Center, Taiwan (see the xsl files here for the license text:
  src/lxml/isoschematron/resources/xsl/iso-schematron-xslt1/)
* The xsd/rng schema schematron extraction xsl transformations are unlicensed
  and copyright the respective authors as noted (see
  src/lxml/isoschematron/resources/xsl/RNG2Schtrn.xsl and
  src/lxml/isoschematron/resources/xsl/XSD2Schtrn.xsl)

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership

of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the
editorial
revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct,

indirect, special,
incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Metadata-Version: 1.2
Name: grpcio-tools
Version: 1.45.0
Summary: Protobuf code generator for gRPC
Home-page: https://grpc.io

Author: The gRPC Authors
Author-email: grpc-io@googlegroups.com
License: Apache License 2.0
Description: gRPC Python Tools
    ==========

    Package for gRPC Python tools.

    Supported Python Versions

    Python >= 3.6

    Installation

    The gRPC Python tools package is available for Linux, Mac OS X, and Windows.

    Installing From PyPI
    ~~~~~~~~~~~~~~~~~~~~

    If you are installing locally...

    ::

      $ pip install grpcio-tools

    Else system wide (on Ubuntu)...

    ::

      $ sudo pip install grpcio-tools

    If you're on Windows make sure that you installed
 the :code:`pip.exe` component
    when you installed Python (if not go back and install it!) then invoke:

    ::

      $ pip.exe install grpcio-tools

    Windows users may need to invoke :code:`pip.exe` from a command line ran as
    administrator.

    n.b. On Windows and on Mac OS X one *must* have a recent release of :code:`pip`
    to retrieve the proper wheel from PyPI. Be sure to upgrade to the latest
    version!

    You might also need to install Cython to handle installation via the source
    ~~~~~~~~~~~~~~~~~~~~

distribution if gRPC Python's system coverage with wheels does not happen to
include your system.

Installing From Source
~~~~~~~~~~~~~~~~~~~~~~

Building from source requires that you have the Python headers (usually a
package named :code:`python-dev`) and Cython installed. It further requires a
GCC-like compiler to go smoothly; you can
probably get it to work without
GCC-like stuff, but you may end up having a bad time.

::

```
$ export REPO_ROOT=grpc  # REPO_ROOT can be any directory of your choice
$ git clone -b RELEASE_TAG_HERE https://github.com/grpc/grpc $REPO_ROOT
$ cd $REPO_ROOT
$ git submodule update --init

$ cd tools/distrib/python/grpcio_tools
$ python ../make_grpcio_tools.py

# For the next command do `sudo pip install` if you get permission-denied errors
$ GRPC_PYTHON_BUILD_WITH_CYTHON=1 pip install .
```

You cannot currently install Python from source on Windows. Things might work
out for you in MSYS2 (follow the Linux instructions), but it isn't officially
supported at the moment.

Troubleshooting
~~~~~~~~~~~~~~~

Help, I ...

* **... see a** :code:`pkg_resources.VersionConflict` **when I try
to install
grpc**

This is likely because :code:`pip` doesn't own the offending dependency,
which in turn is likely because your operating system's package manager owns
it. You'll need to force the installation of the dependency:

:code:`pip install --ignore-installed $OFFENDING_DEPENDENCY`

For example, if you get an error like the following:

::

Traceback (most recent call last):
File "<string>", line 17, in <module>
...
File "/usr/lib/python2.7/dist-packages/pkg_resources.py", line 509, in find
raise VersionConflict(dist, req)
pkg_resources.VersionConflict: (six 1.8.0 (/usr/lib/python2.7/dist-packages), Requirement.parse('six>=1.10'))

You can fix it by doing:

::

sudo pip install --ignore-installed six

* **... see compiler errors
on some platforms when either installing from source or from the source distribution**

If you see

::

/tmp/pip-build-U8pSsr/cython/Cython/Plex/Scanners.c:4:20: fatal error: Python.h: No such file or directory
#include "Python.h"
^
compilation terminated.

You can fix it by installing `python-dev` package. i.e

::

sudo apt-get install python-dev

If you see something similar to:

::

third_party/protobuf/src/google/protobuf/stubs/mathlimits.h:173:31: note: in expansion of macro 'SIGNED_INT_MAX'
static const Type kPosMax = SIGNED_INT_MAX(Type); \\
^

And your toolchain is GCC (at the time of this writing, up through at least
GCC 6.0), this is probably a bug where GCC chokes on constant expressions
when the :code:`-fwrapv` flag is specified. You should consider setting your
environment with :code:`CFLAGS=-fno-wrapv` or using clang (:code:`CC=clang`).

Usage

Given protobuf include directories :code:`$INCLUDE`, an output directory
:code:`$OUTPUT`, and proto files :code:`$PROTO_FILES`, invoke as:

::

```
 $ python -m grpc_tools.protoc -I$INCLUDE --python_out=$OUTPUT --grpc_python_out=$OUTPUT
$PROTO_FILES
```

To use as a build step in distutils-based projects, you may use the provided
command class in your :code:`setup.py`:

::

```
 setuptools.setup(
   # ...
   cmdclass={
    'build_proto_modules': grpc_tools.command.BuildPackageProtos,
   }
   # ...
 )
```

Invocation of the command will walk the project tree and transpile every
:code:`.proto`
file into a :code:`_pb2.py` file in the same directory.

Note that this particular approach requires :code:`grpcio-tools` to be
installed on the machine before the setup script is invoked (i.e. no
combination of :code:`setup_requires` or :code:`install_requires` will provide
access to :code:`grpc_tools.command.BuildPackageProtos` if it isn't already
installed). One way to work around this can be found in our
:code:`grpcio-health-checking`
`package <https://pypi.python.org/pypi/grpcio-health-checking>`_:

::

```
 class BuildPackageProtos(setuptools.Command):
   """Command to generate project *_pb2.py modules from proto files."""
   # ...
   def run(self):
     from grpc_tools import command
     command.build_package_protos(self.distribution.package_dir[''])
```

Now including :code:`grpcio-tools` in :code:`setup_requires` will provide the
command on-setup as desired.

For more information on command classes, consult :code:`distutils` and
:code:`setuptools` documentation.

1.262.1 Available under license :

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for

them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1)
assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your

rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code;
keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the

Corresponding Source fixed on a durable physical medium
customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product
(including a physical distribution medium), accompanied by a
written offer, valid for at least three years
and valid for as
long as you offer spare parts or customer support for that product
model, to give anyone who possesses the object code either (1) a
copy of the Corresponding Source for all the software in the
product that is covered by this License, on a durable physical
medium customarily used for software interchange, for a price no
more than your reasonable cost of physically performing this
conveying of source, or (2) access to copy the
Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the
written offer to provide the Corresponding Source. This
alternative is allowed only occasionally and noncommercially, and
only if you received the object code with such an offer, in accord
with subsection 6b.

d) Convey the object code by offering access from a designated
place (gratis or for a charge), and offer equivalent access to the
Corresponding Source in
the same way through the same place at no
further charge. You need not require recipients to copy the
Corresponding Source along with the object code. If the place to
copy the object code is a network server, the Corresponding Source
may be on a different server (operated by you or a third party)
that supports equivalent copying facilities, provided you maintain
clear directions next to the object code saying where to find the
Corresponding Source. Regardless of what server hosts the
Corresponding Source, you remain obligated to ensure that it is
available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided
you inform other peers where the object code and Corresponding
Source of the work are being offered to the general public at no
charge under subsection 6d.

A separable portion of the object code, whose source code is excluded
from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any
tangible personal property which is normally used for personal, family,

or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you

received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor

version. For
purposes of this definition, "control" includes the right to grant
patent sublicenses in a manner consistent with the requirements of
this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free
patent license under the contributor's essential patent claims, to
make, use, sell, offer for sale, import and otherwise run, modify and
propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express
agreement or commitment, however denominated, not to enforce a patent
(such as an express permission to practice a patent or covenant not to
sue for patent infringement). To "grant" such a patent license to a
party means to make such an agreement or commitment not to enforce a
patent against the party.

If you convey a covered work, knowingly relying on a patent license,
and the Corresponding Source of the work is not available for anyone
to copy, free of charge and under the terms of this
License, through a
publicly available network server or other readily accessible means,
then you must either (1) cause the Corresponding Source to be so
available, or (2) arrange to deprive yourself of the benefit of the
patent license for this particular work, or (3) arrange, in a manner
consistent with the requirements of this License, to extend the patent
license to downstream recipients. "Knowingly relying" means you have
actual knowledge that, but for the patent license, your conveying the
covered work in a country, or your recipient's use of the covered work
in a country, would infringe one or more identifiable patents in that
country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or
arrangement, you convey, or propagate by procuring conveyance of, a
covered work, and grant a patent license to some of the parties
receiving the covered work authorizing them to use, propagate, modify
or convey a specific copy of the covered
work, then the patent license
you grant is automatically extended to all recipients of the covered
work and works based on it.

A patent license is "discriminatory" if it does not include within
the scope of its coverage, prohibits the exercise of, or is
conditioned on the non-exercise of one or more of the rights that are
specifically granted under this License. You may not convey a covered
work if you are a party to an arrangement with a third party that is
in the business of distributing software, under which you make payment
to the third party based on the extent of your activity of conveying

the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you

have the
option of following the terms and conditions either of that numbered
version or of any later version published by the Free Software
Foundation. If the Program does not specify a version number of the
GNU General Public License, you may choose any version ever published
by the Free Software Foundation.

If the Program specifies that a proxy can decide which future
versions of the GNU General Public License can be used, that proxy's
public statement of acceptance of a version permanently authorizes you
to choose that version for the Program.

Later license versions may give you additional or different
permissions. However, no additional obligations are imposed on any
author or copyright holder as a result of your choosing to follow a
later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY
APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT
HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS"
WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided
above cannot be given local legal effect according to their terms,
reviewing courts shall apply local law that most closely approximates
an absolute waiver of all civil liability in connection with the

Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,

if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want
to do, use the GNU Lesser General
Public License instead of this License. But first, please read
<https://www.gnu.org/licenses/why-not-lgpl.html>.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
them if you wish), that you receive source code or can get it if you
want it, that you can change the software or use pieces of it in new
free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you
these rights or asking you to surrender the rights. Therefore, you have
certain responsibilities if you distribute copies of the software, or if
you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must pass on to the recipients the same
freedoms that you received. You must make sure that they, too, receive

or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees"

and
"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is
not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The
"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that

Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of

your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section

7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical

medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option

remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating

where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For
purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting

any implied license or other defenses to infringement that may
otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of this License, they do not
excuse you from the conditions of this License. If you cannot convey a
covered work so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you may
not convey it at all. For example, if you agree to terms that obligate you
to collect a royalty for further conveying from those to whom you convey
the Program, the only way you could satisfy both those terms and this
License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have
permission to link or combine any covered work with a work licensed
under version 3 of the GNU Affero General Public License into a single
combined work, and to convey the resulting work. The terms of this
License will continue to apply to the part which is the covered work,
but the special requirements of the GNU Affero General Public License,
section 13, concerning interaction through a network will apply to the
combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of
the GNU General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing version number. If the
Program specifies that a certain numbered version of the GNU General
Public License "or any later version" applies to it, you
have the
option of following the terms and conditions either of that numbered
version or of any later version published by the Free Software
Foundation. If the Program does not specify a version number of the
GNU General Public License, you may choose any version ever published
by the Free Software Foundation.

If the Program specifies that a proxy can decide which future
versions of the GNU General Public License can be used, that proxy's
public statement of acceptance of a version permanently authorizes you
to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest

to attach them to the start of each source file to most effectively
state the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where
the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation, either version 3 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

@c The GNU Free Documentation License.

@enumerate 0
@item
PREAMBLE

The purpose of this License is to make a manual, textbook, or other
functional and useful document @dfn{free} in the sense of freedom: to
assure everyone the effective freedom to copy and redistribute it,
with or without modifying it, either commercially or noncommercially.
Secondarily, this License preserves for the author and publisher a way
to get credit for their work, while not being considered responsible
for modifications made by others.

This License is a kind of ``copyleft'', which means that derivative
works of the document
 must themselves be free in the same sense. It
complements the GNU General Public License, which is a copyleft
license designed for free software.

We have designed this License in order to use it for manuals for free
software, because free software needs free documentation: a free
program should come with manuals providing the same freedoms that the
software does. But this License is not limited to software manuals;
it can be used for any textual work, regardless of subject matter or
whether it is published as a printed book. We recommend this License
principally for works whose purpose is instruction or reference.

@item
APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that
contains a notice placed by the copyright holder saying it can be
distributed under the terms of this License. Such a notice grants a
world-wide, royalty-free license, unlimited in duration, to use that
work under the conditions stated herein. The ``Document'', below,

refers
to any such manual or work. Any member of the public is a
licensee, and is addressed as ``you''. You accept the license if you
copy, modify or distribute the work in a way requiring permission
under copyright law.

A ``Modified Version'' of the Document means any work containing the
Document or a portion of it, either copied verbatim, or with
modifications and/or translated into another language.

A ``Secondary Section'' is a named appendix or a front-matter section
of the Document that deals exclusively with the relationship of the
publishers or authors of the Document to the Document's overall
subject (or to related matters) and contains nothing that could fall
directly within that overall subject. (Thus, if the Document is in
part a textbook of mathematics, a Secondary Section may not explain
any mathematics.) The relationship could be a matter of historical
connection with the subject or with related matters, or of legal,
commercial, philosophical, ethical or political
position regarding
them.

The ``Invariant Sections'' are certain Secondary Sections whose titles
are designated, as being those of Invariant Sections, in the notice
that says that the Document is released under this License. If a
section does not fit the above definition of Secondary then it is not
allowed to be designated as Invariant. The Document may contain zero
Invariant Sections. If the Document does not identify any Invariant
Sections then there are none.

The ``Cover Texts'' are certain short passages of text that are listed,
as Front-Cover Texts or Back-Cover Texts, in the notice that says that
the Document is released under this License. A Front-Cover Text may
be at most 5 words, and a Back-Cover Text may be at most 25 words.

A ``Transparent'' copy of the Document means a machine-readable copy,
represented in a format whose specification is available to the
general public, that is suitable for revising the document
straightforwardly with generic text editors or (for
images composed of
pixels) generic paint programs or (for drawings) some widely available
drawing editor, and that is suitable for input to text formatters or
for automatic translation to a variety of formats suitable for input
to text formatters. A copy made in an otherwise Transparent file
format whose markup, or absence of markup, has been arranged to thwart
or discourage subsequent modification by readers is not Transparent.
An image format is not Transparent if used for any substantial amount
of text. A copy that is not ``Transparent'' is called ``Opaque''.

Examples of suitable formats for Transparent copies include plain
ASCII without markup, Texinfo input format, La@TeX{} input
format, SGML or XML using a publicly available
DTD, and standard-conforming simple HTML,
PostScript or PDF designed for human modification. Examples
of transparent image formats include PNG, XCF and
JPG@. Opaque formats include proprietary formats that can be
read and edited only by proprietary word
 processors, SGML or
XML for which the DTD and/or processing tools are
not generally available, and the machine-generated HTML,
PostScript or PDF produced by some word processors for
output purposes only.

The ``Title Page'' means, for a printed book, the title page itself,
plus such following pages as are needed to hold, legibly, the material
this License requires to appear in the title page. For works in
formats which do not have any title page as such, ``Title Page'' means
the text near the most prominent appearance of the work's title,
preceding the beginning of the body of the text.

The ``publisher'' means any person or entity that distributes copies
of the Document to the public.

A section ``Entitled XYZ'' means a named subunit of the Document whose
title either is precisely XYZ or contains XYZ in parentheses following
text that translates XYZ in another language. (Here XYZ stands for a
specific section name mentioned below, such as ``Acknowledgements'',
``Dedications'', ``Endorsements'',
 or ``History''.)  To ``Preserve the Title''
of such a section when you modify the Document means that it remains a
section ``Entitled XYZ'' according to this definition.

The Document may include Warranty Disclaimers next to the notice which
states that this License applies to the Document. These Warranty
Disclaimers are considered to be included by reference in this
License, but only as regards disclaiming warranties: any other
implication that these Warranty Disclaimers may have is void and has
no effect on the meaning of this License.

@item
VERBATIM COPYING

You may copy and distribute the Document in any medium, either
commercially or noncommercially, provided that this License, the
copyright notices, and the license notice saying this License applies
to the Document are reproduced in all copies, and that you add no other

conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

@item
COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give

them a chance to provide you with an updated version of the Document.

@item
MODIFICATIONS

You may copy and distribute a Modified Version of the Document under
the conditions of sections 2 and 3 above, provided that you release
the Modified Version under precisely this License, with the Modified
Version filling the role of the Document, thus licensing distribution
and modification of the Modified Version to whoever possesses a copy
of it. In addition, you must do these things in the Modified Version:

@enumerate A
@item
Use in the Title Page (and on the covers, if any) a title distinct
from that of the Document, and from those of previous versions
(which should, if there were any, be listed in the History section
of the Document). You may use the same
 title as a previous version
if the original publisher of that version gives permission.

@item
List on the Title Page, as authors, one or more persons or entities
responsible for authorship of the modifications in the Modified
Version, together with at least five of the principal authors of the
Document (all of its principal authors, if it has fewer than five),
unless they release you from this requirement.

@item
State on the Title page the name of the publisher of the
Modified Version, as the publisher.

@item
Preserve all the copyright notices of the Document.

@item
Add an appropriate copyright notice for your modifications
adjacent to the other copyright notices.

@item
Include, immediately after the copyright notices, a license notice
giving the public permission to use the Modified Version under the
terms of this License, in the form shown in the Addendum below.

@item
Preserve in that license notice the full lists of Invariant Sections
and required Cover Texts given in the

Document's license notice.

@item
Include an unaltered copy of this License.

@item
Preserve the section Entitled ``History'', Preserve its Title, and add
to it an item stating at least the title, year, new authors, and
publisher of the Modified Version as given on the Title Page. If
there is no section Entitled ``History'' in the Document, create one
stating the title, year, authors, and publisher of the Document as
given on its Title Page, then add an item describing the Modified
Version as stated in the previous sentence.

@item
Preserve the network location, if any, given in the Document for
public access to a Transparent copy of the Document, and likewise
the network locations given in the Document for previous versions
it was based on. These may be placed in the ``History'' section.
You may omit a network location for a work that was published at
least four years before the Document itself, or if the original
publisher of the version it refers to gives permission.

@item
For any
section Entitled ``Acknowledgements'' or ``Dedications'', Preserve
the Title of the section, and preserve in the section all the
substance and tone of each of the contributor acknowledgements and/or
dedications given therein.

@item
Preserve all the Invariant Sections of the Document,
unaltered in their text and in their titles. Section numbers
or the equivalent are not considered part of the section titles.

@item
Delete any section Entitled ``Endorsements''. Such a section
may not be included in the Modified Version.

@item
Do not retitle any existing section to be Entitled ``Endorsements'' or
to conflict in title with any Invariant Section.

@item
Preserve any Warranty Disclaimers.
@end enumerate

If the Modified Version includes new front-matter sections or

appendices that qualify as Secondary Sections and contain no material
copied from the Document, you may at your option designate some or all
of these sections as invariant. To do this, add their titles to the
list of Invariant
 Sections in the Modified Version's license notice.
These titles must be distinct from any other section titles.

You may add a section Entitled ``Endorsements", provided it contains
nothing but endorsements of your Modified Version by various
parties---for example, statements of peer review or that the text has
been approved by an organization as the authoritative definition of a
standard.

You may add a passage of up to five words as a Front-Cover Text, and a
passage of up to 25 words as a Back-Cover Text, to the end of the list
of Cover Texts in the Modified Version. Only one passage of
Front-Cover Text and one of Back-Cover Text may be added by (or
through arrangements made by) any one entity. If the Document already
includes a cover text for the same cover, previously added by you or
by arrangement made by the same entity you are acting on behalf of,
you may not add another; but you may replace the old one, on explicit
permission from the previous publisher that added the old
 one.

The author(s) and publisher(s) of the Document do not by this License
give permission to use their names for publicity for or to assert or
imply endorsement of any Modified Version.

@item
COMBINING DOCUMENTS

You may combine the Document with other documents released under this
License, under the terms defined in section 4 above for modified
versions, provided that you include in the combination all of the
Invariant Sections of all of the original documents, unmodified, and
list them all as Invariant Sections of your combined work in its
license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and
multiple identical Invariant Sections may be replaced with a single
copy. If there are multiple Invariant Sections with the same name but
different contents, make the title of each such section unique by
adding at the end of it, in parentheses, the name of the original
author or publisher of that section if
 known, or else a unique number.
Make the same adjustment to the section titles in the list of
Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled ``History''
in the various original documents, forming one section Entitled
``History''; likewise combine any sections Entitled ``Acknowledgements'',
and any sections Entitled ``Dedications''. You must delete all
sections Entitled ``Endorsements.''

@item
COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents
released under this License, and replace the individual copies of this
License in the various documents with a single copy that is included in
the collection, provided that you follow the rules of this License for
verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute
it individually under this License, provided you insert a copy of this
License
 into the extracted document, and follow this License in all
other respects regarding verbatim copying of that document.

@item
AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate
and independent documents or works, in or on a volume of a storage or
distribution medium, is called an ``aggregate'' if the copyright
resulting from the compilation is not used to limit the legal rights
of the compilation's users beyond what the individual works permit.
When the Document is included in an aggregate, this License does not
apply to the other works in the aggregate which are not themselves
derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these
copies of the Document, then if the Document is less than one half of
the entire aggregate, the Document's Cover Texts may be placed on
covers that bracket the Document within the aggregate, or the
electronic equivalent of covers if the Document is in electronic
 form.
Otherwise they must appear on printed covers that bracket the whole
aggregate.

@item
TRANSLATION

Translation is considered a kind of modification, so you may
distribute translations of the Document under the terms of section 4.
Replacing Invariant Sections with translations requires special

permission from their copyright holders, but you may include
translations of some or all Invariant Sections in addition to the
original versions of these Invariant Sections. You may include a
translation of this License, and all the license notices in the
Document, and any Warranty Disclaimers, provided that you also include
the original English version of this License and the original versions
of those notices and disclaimers. In case of a disagreement between
the translation and the original version of this License or a notice
or disclaimer, the original version will prevail.

If a section in the Document is Entitled ``Acknowledgements",
``Dedications", or ``History", the requirement
 (section 4) to Preserve
its Title (section 1) will typically require changing the actual
title.

@item
TERMINATION

You may not copy, modify, sublicense, or distribute the Document
except as expressly provided under this License. Any attempt
otherwise to copy, modify, sublicense, or distribute it is void, and
will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license
from a particular copyright holder is reinstated (a) provisionally,
unless and until the copyright holder explicitly and finally
terminates your license, and (b) permanently, if the copyright holder
fails to notify you of the violation by some reasonable means prior to
60 days after the cessation.

Moreover, your license from a particular copyright holder is
reinstated permanently if the copyright holder notifies you of the
violation by some reasonable means, this is the first time you have
received notice of violation of this License (for
 any work) from that
copyright holder, and you cure the violation prior to 30 days after
your receipt of the notice.

Termination of your rights under this section does not terminate the
licenses of parties who have received copies or rights from you under
this License. If your rights have been terminated and not permanently
reinstated, receipt of a copy of some or all of the same material does
not give you any rights to use it.

@item
FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions
of the GNU Free Documentation License from time to time. Such new
versions will be similar in spirit to the present version, but may
differ in detail to address new problems or concerns. See
@uref{http://www.gnu.org/copyleft/}.

Each version of the License is given a distinguishing version number.
If the Document specifies that a particular numbered version of this
License ``or any later version'' applies to it, you have the option of
following the terms and
 conditions either of that specified version or
of any later version that has been published (not as a draft) by the
Free Software Foundation. If the Document does not specify a version
number of this License, you may choose any version ever published (not
as a draft) by the Free Software Foundation. If the Document
specifies that a proxy can decide which future versions of this
License can be used, that proxy's public statement of acceptance of a
version permanently authorizes you to choose that version for the
Document.

@item
RELICENSING

``Massive Multiauthor Collaboration Site'' (or ``MMC Site'') means any
World Wide Web server that publishes copyrightable works and also
provides prominent facilities for anybody to edit those works. A
public wiki that anybody can edit is an example of such a server. A
``Massive Multiauthor Collaboration'' (or ``MMC'') contained in the
site means any set of copyrightable works thus published on the MMC
site.

``CC-BY-SA'' means the Creative Commons
 Attribution-Share Alike 3.0
license published by Creative Commons Corporation, a not-for-profit
corporation with a principal place of business in San Francisco,
California, as well as future copyleft versions of that license
published by that same organization.

``Incorporate'' means to publish or republish a Document, in whole or
in part, as part of another Document.

An MMC is ``eligible for relicensing'' if it is licensed under this
License, and if all works that were first published under this License
somewhere other than this MMC, and subsequently incorporated in whole
or in part into the MMC, (1) had no cover texts or invariant sections,
and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site

under CC-BY-SA on the same site at any time before August 1, 2009,
provided the MMC is eligible for relicensing.

@end enumerate

@page
@heading ADDENDUM: How to use this License for your documents

To use this License
 in a document you have written, include a copy of
the License in the document and put the following copyright and
license notices just after the title page:

@smallexample
@group
 Copyright (C) @var{year} @var{your name}.
 Permission is granted to copy, distribute and/or modify this document
 under the terms of the GNU Free Documentation License, Version 1.3
 or any later version published by the Free Software Foundation;
 with no Invariant Sections, no Front-Cover Texts, and no Back-Cover
 Texts. A copy of the license is included in the section entitled ``GNU
 Free Documentation License".
@end group
@end smallexample

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts,
replace the ``with@dots{}Texts."@: line with this:

@smallexample
@group
   with the Invariant Sections being @var{list their titles}, with
   the Front-Cover Texts being @var{list}, and with the Back-Cover Texts
   being @var{list}.
@end group
@end smallexample

If you have Invariant
 Sections without Cover Texts, or some other
combination of the three, merge those two alternatives to suit the
situation.

If your document contains nontrivial examples of program code, we
recommend releasing these examples in parallel under your choice of
free software license, such as the GNU General Public License,
to permit their use in free software.

@c Local Variables:

Medusa, the asynchronous communications framework upon which
supervisor's server and client code is based, was created by Sam
Rushing:

Medusa was once distributed under a 'free for non-commercial use'
license, but in May of 2000 Sam Rushing changed the license to be
identical to the standard Python license at the time. The standard
Python license has always applied to the core components of Medusa,
this
change just frees up the rest of the system, including the http
server, ftp server, utilities, etc. Medusa is therefore under the
following license:

==========
Permission to use, copy, modify, and distribute this software and
its documentation for any purpose and without fee is hereby granted,
provided that the above copyright notice appear in all copies and
that both that copyright notice and this permission notice appear in
supporting documentation, and that the name of Sam Rushing not be
used in advertising or publicity pertaining to distribution of the
software without specific, written prior permission.

SAM RUSHING DISCLAIMS ALL WARRANTIES WITH REGARD TO THIS SOFTWARE,
INCLUDING ALL IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS, IN
NO EVENT SHALL SAM RUSHING BE LIABLE FOR ANY SPECIAL, INDIRECT OR
CONSEQUENTIAL DAMAGES OR ANY DAMAGES WHATSOEVER RESULTING FROM LOSS
OF USE, DATA OR PROFITS, WHETHER IN AN ACTION OF CONTRACT,
 NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF OR IN CONNECTION
WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

   "License" shall mean the terms and conditions for use, reproduction,
   and distribution as defined by Sections 1 through 9 of this document.

   "Licensor" shall mean the copyright owner or entity authorized by
   the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its

distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

1.265.1 Available under license :

GNU LIBRARY GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is
numbered 2 because it goes with version 2 of the ordinary GPL.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some

specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain

designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary
General Public License
treats it as such.

Because of this blurred distinction, using the ordinary General Public License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification
follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

GNU LIBRARY GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below,
refers to any such software library or work
which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if
its contents constitute a work based
on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you
also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices
stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no
charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a
table of data to be supplied by an application program that uses
the facility, other than as an argument passed when the facility
is invoked, then you must make a good faith effort to ensure that,
in the event an application does not supply such function or
table, the facility still operates, and performs whatever part of
its purpose remains meaningful.

(For example, a function in a library to compute square roots has
a purpose that is entirely well-defined independent of the
application. Therefore, Subsection 2d requires
that any
application-supplied function or table used by this function must
be optional: if the application does not supply it, the square
root function must still compute square roots.)

These requirements apply to the modified work as a whole. If
identifiable sections of that work are not derived from the Library,
and can be reasonably considered independent and separate works in
themselves, then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based
on the Library, the distribution of the whole must be on the terms of
this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote
it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution
of derivative or
collective works based on the Library.

In addition, mere aggregation of another work not based on the Library
with the Library (or with a work based on the Library) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public
License instead of this License to a given copy of the Library. To do
this, you must alter all the notices that refer to this License, so
that they refer to the ordinary GNU General Public License, version 2,

instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small

inline
functions (ten lines or less in length), then the use of the object
file is unrestricted, regardless of whether it is legally a derivative
work. (Executables containing this object code plus portions of the
Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may
distribute the object code for the work under the terms of Section 6.
Any executables containing that work also fall under Section 6,
whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also compile or
link a "work that uses the Library" with the Library to produce a
work containing portions of the Library, and distribute that work
under terms of your choice, provided that the terms permit
modification of the work for the customer's own use and reverse
engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the
Library is used in it and that the Library
and its use are covered by
this License. You must supply a copy of this License. If the work
during execution displays copyright notices, you must include the
copyright notice for the Library among them, as well as a reference
directing the user to the copy of this License. Also, you must do one
of these things:

a) Accompany the work with the complete corresponding
machine-readable source code for the Library including whatever
changes were used in the work (which must be distributed under
Sections 1 and 2 above); and, if the work is an executable linked
with the Library, with the complete machine-readable "work that
uses the Library", as object code and/or source code, so that the
user can modify the Library and then relink to produce a modified
executable containing the modified Library. (It is understood
that the user who changes the contents of definitions files in the
Library will not necessarily be able to recompile the application
to use the modified definitions.)

b) Accompany the work with a written offer, valid for at
least three years, to give the same user the materials
specified in Subsection 6a, above, for a charge no more
than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy
from a designated place, offer equivalent access to copy the above
specified materials from the same place.

d) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by

modifying or distributing the Library (or any work based on the Library), you indicate your acceptance
of this License to do so, and
all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other
pertinent obligations, then as a consequence you
may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through
that system in reliance on consistent application of that
system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in

certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but
may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software
generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE

LIBRARY
(INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public License for more details.

You should have received a copy of the GNU Library General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the

library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
675 Mass Ave, Cambridge, MA 02139, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work
which contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not

covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those

sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component

itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy
the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6.
Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free
redistribution of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through
any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number
of this License which applies to it and "any
later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals

of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE
LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE
PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,
REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING
OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED
TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY
YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER
PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who
decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge

for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library,
whether gratis
or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software
patents pose a constant threat to the existence of
any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary

General Public License therefore permits
such linking only if the
entire combination fits its criteria of freedom. The Lesser General
Public License permits more lax criteria for linking other code with
the library.

We call this license the "Lesser" General Public License because it
does Less to protect the user's freedom than the ordinary General
Public License. It also provides other free software developers Less
of an advantage over competing non-free programs. These disadvantages
are the reason we use the ordinary General Public License for many
libraries. However, the Lesser license provides advantages in certain
special circumstances.

For example, on rare occasions, there may be a special need to
encourage the widest possible use of a certain library, so that it becomes
a de-facto standard. To achieve this, non-free programs must be
allowed to use the library. A more frequent case is that a free
library does the same job as widely used non-free libraries. In this
case, there is little to gain by limiting
the free library to free
software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free
programs enables a greater number of people to use a large body of
free software. For example, permission to use the GNU C Library in
non-free programs enables many more people to use the whole GNU
operating system, as well as its variant, the GNU/Linux operating
system.

Although the Lesser General Public License is Less protective of the
users' freedom, it does ensure that the user of a program that is
linked with the Library has the freedom and the wherewithal to run
that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and
modification follow. Pay close attention to the difference between a
"work based on the library" and a "work that uses the library". The
former contains code derived from the library, whereas the latter must
be combined with the library in order
to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other
program which contains a notice placed by the copyright holder or
other authorized party saying it may be distributed under the terms of

this Lesser General Public License (also called "this License").
Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the
terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be
reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary

GNU General Public
License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding
machine-readable source code, which
must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that
uses the
library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The

threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the
object code for the work under the terms of Section 6.
Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany
the work with the complete corresponding
machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate

properly with a modified version of the library, if
the user installs one, as long as the modified version is
interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at
least three years, to give the same user the materials
specified in Subsection 6a, above, for a charge no more
than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy
from a designated place, offer equivalent access to copy the above
specified materials from the same place.

e) Verify that the user has already received a copy of these
materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the
Library" must include any data and utility programs needed for
reproducing the executable from it. However, as a special exception,
the materials to be distributed need not include anything that is
normally
distributed (in either source or binary form) with the major
components (compiler, kernel, and so on) of the operating system on
which the executable runs, unless that component itself accompanies
the executable.

It may happen that this requirement contradicts the license
restrictions of other proprietary libraries that do not normally
accompany the operating system. Such a contradiction means you cannot
use both them and the Library together in an executable that you
distribute.

7. You may place library facilities that are a work based on the
Library side-by-side in a single library together with other library
facilities not covered by this License, and distribute such a combined
library, provided that the separate distribution of the work based on
the Library and of the other library facilities is otherwise
permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work
based on the Library, uncombined with any
other library
facilities. This must be distributed under the terms of the
Sections above.

b) Give prominent notice with the combined library of the fact
that part of it is a work based on the Library, and explaining
where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if
you do not accept this License. Therefore, by
modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse
you from the conditions of this License. If you cannot
distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the

integrity of the free software distribution system
which is
implemented by public license practices. Many people have made
generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Library under this License may add
an explicit geographical distribution limitation excluding those countries,
so that distribution is permitted only in or among countries not thus
excluded. In such case, this License incorporates the limitation as if
written in the body of this License.

13. The Free Software Foundation may publish
revised and/or new
versions of the Lesser General Public License from time to time.
Such new versions will be similar in spirit to the present version,
but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library
specifies a version number of this License which applies to it and
"any later version", you have the option of following the terms and
conditions either of that version or of any later version published by
the Free Software Foundation. If the Library does not specify a
license version number, you may choose any version ever published by
the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free
programs whose distribution conditions are incompatible with these,
write to the author to ask for permission. For software which is
copyrighted by the Free Software Foundation, write to the Free
Software Foundation; we sometimes make exceptions for this. Our
decision
will be guided by the two goals of preserving the free status
of all derivatives of our free software and of promoting the sharing
and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO
WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE,
BE LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey
the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public
License along with this library; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301
USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the library, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

License: SMAIL-GPL
SMAIL GENERAL PUBLIC LICENSE
(Clarified 11 Feb 1988)
.
Everyone is permitted to copy and distribute verbatim copies
of this license, but changing it is not allowed. You can also
use this wording to make the terms for other programs.
.
The license agreements of most software companies keep you at the
mercy of those companies. By
contrast, our general public license is
intended to give everyone the right to share SMAIL. To make sure that
you get the rights we want you to have, we need to make restrictions
that forbid anyone to deny you these rights or to ask you to surrender
the rights. Hence this license agreement.
.
Specifically, we want to make sure that you have the right to give
away copies of SMAIL, that you receive source code or else can get it
if you want it, that you can change SMAIL or use pieces of it in new
free programs, and that you know you can do these things.
.
To make sure that everyone has such rights, we have to forbid you to
deprive anyone else of these rights. For example, if you distribute
copies of SMAIL, you must give the recipients all the rights that you
have. You must make sure that they, too, receive or can get the
source code. And you must tell them their rights.
.
Also, for our own protection, we must make certain that everyone
finds out that there is
no warranty for SMAIL. If SMAIL is modified by
someone else and passed on, we want its recipients to know that what
they have is not what we distributed, so that any problems introduced
by others will not reflect on our reputation.
.
Therefore we (Landon Curt Noll and Ronald S. Karr) make the following
terms which say what you must do to be allowed to distribute or change
SMAIL.
.
.
COPYING POLICIES

.

1. You may copy and distribute verbatim copies of SMAIL source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy a valid copyright notice "Copyright (C) 1988 Landon Curt Noll & Ronald S. Karr" (or with whatever year is appropriate); keep intact the notices on all files that refer to this License Agreement and to the absence of any warranty; and give any other recipients of the SMAIL program a copy of this License Agreement along with the program. You may charge a distribution fee for the physical act of transferring a copy.

.

2. You may modify your copy or copies of SMAIL or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

.

a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

.

b) cause the whole of any work that you distribute or publish, that in whole or in part contains or is a derivative of SMAIL or any part thereof, to be licensed at no charge to all third parties on terms identical to those contained in this License Agreement (except that you may choose to grant more extensive warranty protection to some or all third parties, at your option).

.

c) You may charge a distribution fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

.

Mere aggregation of another unrelated program with this program (or its derivative) on a volume of a storage or distribution medium does not bring the other program under the scope of these terms.

.

3. You may copy and distribute SMAIL (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

.

a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

.

b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal shipping charge) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

.

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed
only for non-commercial distribution and only if you received the program in object code or executable form alone.)

.

For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs.

.

4. You may not copy, sublicense, distribute or transfer SMAIL except as expressly provided under this License Agreement. Any attempt otherwise to copy, sublicense, distribute or transfer SMAIL is void and your rights to use the program under this License agreement shall be automatically terminated. However, parties who have received computer software programs from you with this License Agreement will not have their licenses terminated so long as such parties remain in full compliance.

.

5. If you wish to incorporate parts of SMAIL into other free programs whose distribution
conditions are different, write to Landon Curt Noll & Ronald S. Karr via the Free Software Foundation at 51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA. We have not yet worked out a simple rule that can be stated here, but we will often permit this. We will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software.

.

Your comments and suggestions about our licensing policies and our software are welcome! This contract was based on the contract made by the Free Software Foundation. Please contact the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA, or call (617) 542-5942 for details on copylefted material in general.

.

NO WARRANTY

.

BECAUSE SMAIL IS LICENSED FREE OF CHARGE, WE PROVIDE ABSOLUTELY NO WARRANTY, TO THE EXTENT PERMITTED BY APPLICABLE STATE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING, LANDON
CURT NOLL & RONALD S. KARR AND/OR OTHER PARTIES PROVIDE SMAIL "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF SMAIL IS WITH YOU. SHOULD SMAIL PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW WILL LANDON CURT NOLL & RONALD S. KARR AND/OR ANY OTHER PARTY WHO MAY MODIFY AND REDISTRIBUTE SMAIL AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY LOST PROFITS, LOST MONIES, OR OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS) SMAIL, EVEN IF YOU HAVE BEEN ADVISED OF THE POSSIBILITY
OF SUCH DAMAGES, OR FOR ANY CLAIM BY
ANY OTHER PARTY.

A. HISTORY OF THE SOFTWARE
==========

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see http://www.cnri.reston.va.us) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see http://www.zope.com). In 2001, the Python Software Foundation (PSF, see http://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member
of
the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)

0.9.0 thru 1.2		1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.2	2.1.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes
2.1.3				
2.1.2		2002	PSF	yes
2.2.1	2.2	2002	PSF	yes
2.2.2	2.2.1	2002	PSF	yes
2.2.3	2.2.2	2003	PSF	yes
2.3	2.2.2	2002-2003	PSF	yes
2.3.1	2.3	2002-2003	PSF	yes
2.3.2	2.3.1	2002-2003	PSF	yes
2.3.3	2.3.2	2002-2003	PSF	yes
2.3.4	2.3.3	2004	PSF	yes
2.3.5	2.3.4	2005	PSF	yes
2.4	2.3	2004	PSF	yes
2.4.1	2.4	2005	PSF	yes
2.4.2	2.4.1	2005	PSF	yes
2.4.3	2.4.2	2006	PSF	yes
2.4.4	2.4.3	2006	PSF	yes
2.5	2.4	2006	PSF	yes
2.5.1	2.5	2007	PSF	yes
2.5.2	2.5.1	2008	PSF	yes
2.5.3	2.5.2	2008	PSF	yes
2.6	2.5	2008	PSF	yes
2.6.1	2.6	2008	PSF	yes
2.6.2	2.6.1	2009	PSF	yes
2.6.3	2.6.2	2009	PSF	yes
2.6.4	2.6.3	2009	PSF	yes
2.6.5	2.6.4	2010	PSF	yes
3.0	2.6	2008	PSF	yes
3.0.1	3.0	2009	PSF	yes
3.1	3.0.1	2009	PSF	yes
3.1.1	3.1	2009	PSF	yes
3.1.2	3.1	2010	PSF	yes
3.2	3.1	2010	PSF	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a

modified version without making your changes open source. The
GPL-compatible licenses make it possible to combine Python with
other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible,
because its license has a choice of law clause. According to
CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1
is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's
direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON
==========

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2
---

1. This LICENSE AGREEMENT is between the Python Software Foundation
("PSF"), and the Individual or Organization ("Licensee") accessing and
otherwise using this software ("Python") in source or binary form and
its associated
documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby
grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce,
analyze, test, perform and/or display publicly, prepare derivative works,
distribute, and otherwise use Python alone or in any derivative version,
provided, however, that PSF's License Agreement and PSF's notice of copyright,
i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010
Python Software Foundation; All Rights Reserved" are retained in Python alone or
in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on
or incorporates Python or any part thereof, and wants to make
the derivative work available to others as provided herein, then
Licensee hereby agrees to include in any such work a brief summary of
the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS"
basis. PSF MAKES NO REPRESENTATIONS
OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON
FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS
A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON,
OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any
relationship of agency, partnership, or joint venture between PSF and
Licensee. This License Agreement does not grant permission to use PSF
trademarks or trade name in a trademark sense to endorse or promote
products or services of Licensee, or any third party.

8. By copying, installing or otherwise
using Python, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an
office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the
Individual or Organization ("Licensee") accessing and otherwise using
this software in source or binary form and its associated
documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License
Agreement, BeOpen hereby grants Licensee a non-exclusive,
royalty-free, world-wide license to reproduce, analyze, test, perform
and/or display publicly, prepare derivative works, distribute, and
otherwise use the Software alone or in any derivative version,
provided, however, that the BeOpen Python License is retained in the
Software, alone or in any derivative version prepared by Licensee.

3.
BeOpen is making the Software available to Licensee on an "AS IS"
basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE

SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of
agency, partnership, or joint venture
between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at http://www.pythonlabs.com/logos.html may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1
---

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions
of this License Agreement, CNRI
hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This

Agreement may also be obtained from a proxy server on the Internet using the following
URL: http://hdl.handle.net/1895.22/1013".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6.
This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission
to use CNRI trademarks or
trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

Metadata-Version: 1.0
Name: setuptools
Version: 0.6c9
Summary: Download, build, install, upgrade, and uninstall Python packages -- easily!
Home-page: http://pypi.org/pypi/setuptools
Author: Phillip J. Eby
Author-email: distutils-sig@python.org
License: PSF or ZPL
Description: ================================

    Installing and Using Setuptools
    ================================

    .. contents:: **Table of Contents**

    Installation Instructions

    Windows
    =======

    Install setuptools using the provided ``.exe`` installer. If you've previously
    installed older versions of setuptools, please delete all ``setuptools*.egg``
    and ``setuptools.pth`` files from your system's ``site-packages`` directory
    (and any other ``sys.path`` directories) FIRST.

    If you are upgrading a previous version of setuptools that was installed using
    an ``.exe`` installer,
 please be sure to also *uninstall that older version*
    via your system's "Add/Remove Programs" feature, BEFORE installing the newer
    version.

Once installation is complete, you will find an ``easy_install.exe`` program in your Python ``Scripts`` subdirectory. Be sure to add this directory to your ``PATH`` environment variable, if you haven't already done so.

RPM-Based Systems
==========

Install setuptools using the provided source RPM. The included ``.spec`` file assumes you are installing using the default ``python`` executable, and is not specific to a particular Python version. The ``easy_install`` executable will be installed to a system ``bin`` directory such as ``/usr/bin``.

If you wish to install to a location other than the default Python installation's default ``site-packages`` directory (and ``$prefix/bin`` for scripts), please use the ``.egg``-based
installation approach described in the
following section.

Cygwin, Mac OS X, Linux, Other
==========

1. Download the appropriate egg for your version of Python (e.g. ``setuptools-0.6c9-py2.4.egg``). Do NOT rename it.

2. Run it as if it were a shell script, e.g. ``sh setuptools-0.6c9-py2.4.egg``. Setuptools will install itself using the matching version of Python (e.g. ``python2.4``), and will place the ``easy_install`` executable in the default location for installing Python scripts (as determined by the standard distutils configuration files, or by the Python installation).

If you want to install setuptools to somewhere other than ``site-packages`` or your default distutils installation locations for libraries and scripts, you may include EasyInstall command-line options such as ``--prefix``, ``--install-dir``, and so on, following the ``.egg`` filename
on the same
command line. For example::

sh setuptools-0.6c9-py2.4.egg --prefix=~

You can use ``--help`` to get a full options list, but we recommend consulting the `EasyInstall manual`_ for detailed instructions, especially `the section on custom installation locations`_.

.. _EasyInstall manual: http://peak.telecommunity.com/DevCenter/EasyInstall
.. _the section on custom installation locations: http://peak.telecommunity.com/DevCenter/EasyInstall#custom-

installation-locations

Cygwin Note

If you are trying to install setuptools for the **Windows** version of Python
(as opposed to the Cygwin version that lives in ``/usr/bin``), you must make
sure that an appropriate executable (``python2.3``, ``python2.4``, or
``python2.5``) is on your **Cygwin** ``PATH`` when invoking the egg. For
example, doing the following at a Cygwin bash prompt will install setuptools
 for the **Windows** Python found at ``C:\\Python24``::

ln -s /cygdrive/c/Python24/python.exe python2.4
PATH=.:$PATH sh setuptools-0.6c9-py2.4.egg
rm python2.4

Downloads
=========

All setuptools downloads can be found at `the project's home page in the Python
Package Index`_. Scroll to the very bottom of the page to find the links.

.. _the project's home page in the Python Package Index: http://pypi.org/pypi/setuptools

In addition to the PyPI downloads, the development version of ``setuptools``
is available from the `Python SVN sandbox`_, and in-development versions of the
`0.6 branch`_ are available as well.

.. _0.6 branch: http://svn.python.org/projects/sandbox/branches/setuptools-0.6/#egg=setuptools-dev06

.. _Python SVN sandbox: http://svn.python.org/projects/sandbox/trunk/setuptools/#egg=setuptools-dev

---
Using
Setuptools and EasyInstall

Here are some of the available manuals, tutorials, and other resources for
learning about Setuptools, Python Eggs, and EasyInstall:

* `The EasyInstall user's guide and reference manual`_
* `The setuptools Developer's Guide`_
* `The pkg_resources API reference`_
* `Package Compatibility Notes`_ (user-maintained)
* `The Internal Structure of Python Eggs`_

Questions, comments, and bug reports should be directed to the `distutils-sig
mailing list`_. If you have written (or know of) any tutorials, documentation,
plug-ins, or other resources for setuptools users, please let us know about
them there, so this reference list can be updated. If you have working,
tested patches to correct problems or add features, you may submit them to
the `setuptools bug tracker`_.

.. _setuptools bug tracker: http://bugs.python.org/setuptools/
.. _Package Compatibility Notes: http://peak.telecommunity.com/DevCenter/PackageNotes
.. _The Internal Structure of Python Eggs: http://peak.telecommunity.com/DevCenter/EggFormats
.. _The setuptools Developer's Guide: http://peak.telecommunity.com/DevCenter/setuptools
.. _The pkg_resources API reference: http://peak.telecommunity.com/DevCenter/PkgResources
.. _The EasyInstall user's guide and reference manual: http://peak.telecommunity.com/DevCenter/EasyInstall
.. _distutils-sig mailing list: http://mail.python.org/pipermail/distutils-sig/

Credits
---

* The original design for the ``.egg`` format and the ``pkg_resources`` API was
co-created by Phillip Eby and Bob Ippolito. Bob also implemented the first
version of ``pkg_resources``, and supplied the OS X operating system version
compatibility algorithm.

* Ian Bicking implemented many early "creature
comfort" features of
easy_install, including support for downloading via Sourceforge and
Subversion repositories. Ian's comments on the Web-SIG about WSGI
application deployment also inspired the concept of "entry points" in eggs,
and he has given talks at PyCon and elsewhere to inform and educate the
community about eggs and setuptools.

* Jim Fulton contributed time and effort to build automated tests of various
aspects of ``easy_install``, and supplied the doctests for the command-line
``.exe`` wrappers on Windows.

* Phillip J. Eby is the principal author and maintainer of setuptools, and
first proposed the idea of an importable binary distribution format for
Python application plug-ins.

* Significant parts of the implementation of setuptools were funded by the Open
Source Applications Foundation, to provide a plug-in infrastructure for the
Chandler PIM application.
In addition, many OSAF staffers (such as Mike
"Code Bear" Taylor) contributed their time and stress as guinea pigs for the
use of eggs and setuptools, even before eggs were "cool". (Thanks, guys!)

Advice for new contributors
==========

New contributor and not sure what to do? Want to help but just don't know how
to get started? This is the section for you.

.. admonition:: Get up and running!

  If you are new to contributing to Django, the :doc:`/intro/contributing`
  tutorial will give you an introduction to the tools and the workflow.

This page contains more general advice on ways you can contribute to Django,
and how to approach that.

If you are looking for a reference on the details of making code contributions,
see the :doc:`/internals/contributing/writing-code/index` documentation.

First steps
==========

Start with these steps to discover Django's development process.

* **Triage tickets**

  If an `unreviewed ticket`_ reports a bug, try and reproduce it. If you
  can reproduce it and it seems valid, make a note that you confirmed the bug
  and accept the ticket. Make sure the ticket is filed under the correct
  component
  area. Consider writing a patch that adds a test for the bug's
  behavior, even if you don't fix the bug itself. See more at
  :ref:`how-can-i-help-with-triaging`

* **Look for tickets that are accepted and review patches to build familiarity
  with the codebase and the process**

  Mark the appropriate flags if a patch needs docs or tests. Look through the
  changes a patch makes, and keep an eye out for syntax that is incompatible
  with older but still supported versions of Python. :doc:`Run the tests
  </internals/contributing/writing-code/unit-tests>` and make sure they pass.
  Where possible and relevant, try them out on a database other than SQLite.
  Leave comments and feedback!

* **Keep old patches up to date**

  Oftentimes the codebase will change between a patch being submitted and the
  time it gets reviewed. Make sure it still applies cleanly and functions as
  expected. Updating a patch is both useful and important! See more on
  :doc:`writing-code/submitting-patches`.

*
  Write some documentation

  Django's documentation is great but it can always be improved. Did you find
  a typo? Do you think that something should be clarified? Go ahead and
  suggest a documentation patch! See also the guide on
  :doc:`writing-documentation`.

  .. note::

     The `reports page`_ contains links to many useful Trac queries, including
     several that are useful for triaging tickets and reviewing patches as
     suggested above.

     .. _reports page: https://code.djangoproject.com/wiki/Reports

* **Sign the Contributor License Agreement**

  The code that you write belongs to you or your employer. If your
  contribution is more than one or two lines of code, you need to sign the

`CLA`_. See the `Contributor License Agreement FAQ`_ for a more thorough
explanation.

.. _CLA: https://www.djangoproject.com/foundation/cla/
.. _Contributor License Agreement FAQ: https://www.djangoproject.com/foundation/cla/faq/
.. _unreviewed ticket: https://code.djangoproject.com/query?status=!closed&stage=Unreviewed

Guidelines
==========

As
a newcomer on a large project, it's easy to experience frustration. Here's
some advice to make your work on Django more useful and rewarding.

* **Pick a subject area that you care about, that you are familiar with, or
that you want to learn about**

You don't already have to be an expert on the area you want to work on; you
become an expert through your ongoing contributions to the code.

* **Analyze tickets' context and history**

Trac isn't an absolute; the context is just as important as the words.
When reading Trac, you need to take into account who says things, and when
they were said. Support for an idea two years ago doesn't necessarily mean
that the idea will still have support. You also need to pay attention to who
hasn't spoken -- for example, if an experienced contributor hasn't been
recently involved in a discussion, then a ticket may not have the support
required to get into
Django.

* **Start small**

It's easier to get feedback on a little issue than on a big one. See the
`easy pickings`_.

* **If you're going to engage in a big task, make sure that your idea has
support first**

This means getting someone else to confirm that a bug is real before you fix
the issue, and ensuring that there's consensus on a proposed feature before
you go implementing it.

* **Be bold! Leave feedback!**

Sometimes it can be scary to put your opinion out to the world and say "this
ticket is correct" or "this patch needs work", but it's the only way the

project moves forward. The contributions of the broad Django community ultimately have a much greater impact than that of any one person. We can't do it without **you**!

* **Err on the side of caution when marking things Ready For Check-in**

If you're really not certain if a ticket is ready, don't mark it as such. Leave a comment instead, letting others know your thoughts. If you're mostly certain,
but not completely certain, you might also try asking on IRC to see if someone else can confirm your suspicions.

* **Wait for feedback, and respond to feedback that you receive**

Focus on one or two tickets, see them through from start to finish, and repeat. The shotgun approach of taking on lots of tickets and letting some fall by the wayside ends up doing more harm than good.

* **Be rigorous**

When we say ":pep:`8`, and must have docs and tests", we mean it. If a patch doesn't have docs and tests, there had better be a good reason. Arguments like "I couldn't find any existing tests of this feature" don't carry much weight--while it may be true, that means you have the extra-important job of writing the very first tests for that feature, not that you get a pass from writing tests altogether.

* **Be patient**

It's not always easy for your ticket or your patch to be reviewed quickly. This isn't personal. There are a lot of tickets and pull requests to
get
through.

Keeping your patch up to date is important. Review the ticket on Trac to ensure that the *Needs tests*, *Needs documentation*, and *Patch needs improvement* flags are unchecked once you've addressed all review comments.

Remember that Django has an 8 month release cycle, so there's plenty of time for your patch to be reviewed.

Finally, a well-timed reminder can help. See :ref:`contributing code FAQ <new-contributors-faq>` for ideas here.

.. _easy pickings: https://code.djangoproject.com/query?status=!closed&easy=1
BSD-3-Clause
Django is licensed under the three-clause BSD license; see the file LICENSE for details.

Django includes code from the Python standard library, which is licensed under the Python license, a permissive open source license. The copyright and license is included below for compliance with Python's terms.

Copyright (c) 2001-present Python Software Foundation; All Rights Reserved

A. HISTORY OF THE SOFTWARE
==========

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see http://www.cnri.reston.va.us) in Reston, Virginia where he released several versions of the software.

In May
2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations, which became Zope Corporation. In 2001, the Python Software Foundation (PSF, see https://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation was a sponsoring member of the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)
0.9.0 thru 1.2		1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes

2.1.2	2.1.1	2002	PSF	yes
2.1.3	2.1.2	2002	PSF	yes
2.2 and above	2.1.1	2001-now	PSF	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under
the GPL. All Python licenses, unlike the GPL, let you distribute
a modified version without making your changes open source. The
GPL-compatible licenses make it possible to combine Python with
other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible,
because its license has a choice of law clause. According to
CNRI, however, Stallman's lawyer
has told CNRI's lawyer that 1.6.1
is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's
direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON
==========

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2
---

1. This LICENSE AGREEMENT is between the Python Software Foundation
("PSF"), and the Individual or Organization ("Licensee") accessing and
otherwise using this software ("Python") in source or binary form and
its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby
grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce,
analyze, test, perform and/or display publicly, prepare derivative works,
distribute, and otherwise use Python alone or in any derivative version,
provided, however, that PSF's License Agreement
and PSF's notice of copyright,
i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010,
2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020 Python Software Foundation;
All Rights Reserved" are retained in Python alone or in any derivative version
prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on
or incorporates Python or any part thereof, and wants to make
the derivative work available to others as provided herein, then
Licensee hereby agrees to include in any such work a brief summary of

the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS"
basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY
OTHER USERS OF PYTHON
FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS
A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON,
OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any
relationship of agency, partnership, or joint venture between PSF and
Licensee. This License Agreement does not grant permission to use PSF
trademarks or trade name in a trademark sense to endorse or promote
products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"),
having an
office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the
Individual or Organization ("Licensee") accessing and otherwise using
this software in source or binary form and its associated
documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License
Agreement, BeOpen hereby grants Licensee a non-exclusive,
royalty-free, world-wide license to reproduce, analyze, test, perform
and/or display publicly, prepare derivative works, distribute, and
otherwise use the Software alone or in any derivative version,
provided, however, that the BeOpen Python License is retained in the
Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS"
basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE
 OR THAT THE USE OF THE SOFTWARE WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE
SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS
AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY
DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all
respects by the law of the State of California, excluding conflict of
law provisions. Nothing in this License Agreement shall be deemed to
create any relationship of agency, partnership, or joint venture
between BeOpen and Licensee. This License Agreement does not grant
permission to use BeOpen trademarks or trade names in a trademark
sense to endorse or promote products or services of Licensee, or any
third party. As an exception, the "BeOpen Python" logos available
 at
http://www.pythonlabs.com/logos.html may be used according to the
permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1
---

1. This LICENSE AGREEMENT is between the Corporation for National
Research Initiatives, having an office at 1895 Preston White Drive,
Reston, VA 20191 ("CNRI"), and the Individual or Organization
("Licensee") accessing and otherwise using Python 1.6.1 software in
source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI
hereby grants Licensee a nonexclusive, royalty-free, world-wide
license to reproduce, analyze, test, perform and/or display publicly,
prepare derivative works, distribute, and otherwise use Python 1.6.1
alone or in any derivative version, provided, however, that CNRI's

License
Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: http://hdl.handle.net/1895.22/1013".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of

agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions
of this License Agreement.

ACCEPT

Font Awesome Free License

Font Awesome Free is free, open source, and GPL friendly. You can use it for
commercial projects, open source projects, or really almost whatever you want.
Full Font Awesome Free license: https://fontawesome.com/license.

Icons: CC BY 4.0 License (https://creativecommons.org/licenses/by/4.0/)
In the Font Awesome Free download, the CC BY 4.0 license applies to all icons
packaged as SVG and JS file types.

Fonts: SIL OFL 1.1 License (https://scripts.sil.org/OFL)
In the Font Awesome Free download, the SIL OLF license applies to all icons packaged as web and desktop font files.

Code: MIT License (https://opensource.org/licenses/MIT)
In the Font Awesome Free download, the MIT license applies to all non-font and non-icon files.

Attribution
Attribution is required by MIT, SIL OLF, and CC BY licenses. Downloaded Font Awesome Free files already contain embedded comments with sufficient attribution, so you shouldn't need to do anything
additional when using these
files normally.

We've kept attribution comments terse, so we ask that you do not actively work to remove them from files, especially code. They're a great way for folks to learn about Font Awesome.

Brand Icons
All brand icons are trademarks of their respective owners. The use of these trademarks does not indicate endorsement of the trademark holder by Font Awesome, nor vice versa. **Please do not use brand logos for any purpose except to represent the company, product, or service to which they refer.**
django.dispatch was originally forked from PyDispatcher.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent

to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute
copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works

that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS,

WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

 The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which
gives you legal permission to copy,
distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law:

that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work
are not derived from the Program,
and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution
and only if you
received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to

control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source
code, even though third parties are not
compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing
or modifying
the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For

example, if a patent
license would not permit royalty-free redistribution of the Program by
all those who receive copies directly or indirectly through you, then
the only way you could satisfy both it and this License would be to
refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under
any particular circumstance, the balance of the section is intended to
apply and the section as a whole is intended to apply in other
circumstances.

It is not the purpose of this section to induce you to infringe any
patents or other property right claims or to contest validity of any
such claims; this section has the sole purpose of protecting the
integrity of the free software distribution system, which is
implemented by public license practices. Many people have made
generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to
decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing
version number. If the Program
specifies a version number of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU
General Public License as published by
the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along
with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this
is what you want to do, use the GNU Lesser General
Public License instead of this License.

USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH
DAMAGE.
MediaTek Inc. grants permission to use and redistribute aforementioned firmware
files for the use with devices containing MediaTek chipsets, but not as part of
the Linux kernel or in any other form which would require these files themselves
to be covered by the terms of the GNU General Public License or the GNU Lesser
General Public License.

These firmware files are distributed in the hope that they will be useful, but
are provided WITHOUT ANY WARRANTY, INCLUDING BUT NOT LIMITED TO IMPLIED WARRANTY
OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
The README file from the original package from Micronas appears below. Only
the part about the firmware redistribution in section 0 is relevant, all
other sections are completely obsolete.

WIS GO7007SB Public Linux Driver

*** Please see the file RELEASE-NOTES for important last-minute updates ***

0. OVERVIEW AND LICENSING/DISCLAIMER

This driver kit contains Linux drivers for the WIS GO7007SB multi-format video encoder. Only kernel version 2.6.x is supported. The video stream is available through the Video4Linux2 API and the audio stream is available through the ALSA API (or the OSS emulation layer of the ALSA system).

The files in kernel/ and hotplug/ are licensed under the GNU General Public License Version 2 from the Free Software Foundation. A copy of the license is included in the file COPYING.

The example applications in apps/ and C header files in include/ are licensed under a permissive license included in the source files which allows copying, modification and redistribution for any purpose without attribution.

The firmware files included in the firmware/ directory may be freely redistributed only in conjunction with this document; but modification, tampering and reverse engineering are prohibited.

MICRONAS USA, INC., MAKES NO WARRANTIES TO ANY PERSON OR ENTITY WITH RESPECT TO THE SOFTWARE OR ANY DERIVATIVES THEREOF OR ANY SERVICES OR LICENSES AND DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION WARRANTIES OF MERCHANTABILITY, SUPPORT, AND FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.

1. SYSTEM REQUIREMENTS

This driver requires Linux kernel 2.6. Kernel 2.4 is not supported. Using kernel 2.6.10 or later is recommended, as earlier kernels are known to have unstable USB 2.0 support.

A fully built kernel source tree must be available. Typically this will be linked from "/lib/modules/<KERNEL VERSION>/build" for convenience. If this link does not exist, an extra parameter will need to be passed to the `make` command.

All vendor-built kernels should already be configured properly. However, for custom-built kernels, the following options need to be enabled in the kernel as built-in or modules:

CONFIG_HOTPLUG - Support for hot-pluggable devices
CONFIG_MODULES - Enable loadable module support
CONFIG_KMOD - Automatic kernel module loading
CONFIG_FW_LOADER - Hotplug firmware loading support
CONFIG_I2C - I2C support

CONFIG_VIDEO_DEV - Video For Linux
CONFIG_SOUND - Sound card support
CONFIG_SND - Advanced Linux Sound Architecture
CONFIG_USB - Support for Host-side USB
CONFIG_USB_DEVICEFS - USB device filesystem
CONFIG_USB_EHCI_HCD - EHCI
HCD (USB 2.0) support

Additionally, to use the example application, the following options need to
be enabled in the ALSA section:

CONFIG_SND_MIXER_OSS - OSS Mixer API
CONFIG_SND_PCM_OSS - OSS PCM (digital audio) API

The hotplug scripts, along with the fxload utility, must also be installed.
These scripts can be obtained from <http://linux-hotplug.sourceforge.net/>.
Hotplugging is used for loading firmware into the Cypruss EZ-USB chip using
fxload and for loading firmware into the driver using the firmware agent.

2. COMPILING AND INSTALLING THE DRIVER

Most users should be able to compile the driver by simply running:

```
$ make
```

in the top-level directory of the driver kit. First the kernel modules
will be built, followed by the example applications.

If the build system is unable to locate the kernel source tree for the
currently-running kernel, or if the module should be built for a kernel
other than the currently-running kernel, an additional
parameter will need
to be passed to make to specify the appropriate kernel source directory:

```
$ make KERNELSRC=/usr/src/linux-2.6.10-custom3
```

Once the compile completes, the driver and firmware files should be
installed by running:

```
$ make install
```

The kernel modules will be placed in "/lib/modules/<KERNEL VERSION>/extra"
and the firmware files will be placed in the appropriate hotplug firmware
directory, usually /lib/firmware. In addition, USB maps and scripts will
be placed in /etc/hotplug/usb to enable fxload to initialize the EZ-USB
control chip when the device is connected.

3. PAL/SECAM TUNER CONFIGURATION (TV402U-EU only)

The PAL model of the Plextor ConvertX TV402U may require additional configuration to correctly select the appropriate TV frequency band and audio subchannel.

Users with a device other than the Plextor ConvertX TV402U-EU should skip this section.

The wide variety of PAL TV systems used in Europe requires that additional information about
the local TV standards be passed to the driver in order
to properly tune TV channels. The two necessary parameters are (a) the PAL TV band, and (b) the audio subchannel format in use.

In many cases, the appropriate TV band selection is passed to the driver from applications. However, in some cases, the application only specifies that the driver should use PAL but not the specific information about the appropriate TV band. To work around this issue, the correct TV band may be specified in the "force_band" parameter to the wis-sony-tuner module:

TV band	force_band
PAL B/G	B
PAL I	I
PAL D/K	D
SECAM L	L

If the "force_band" parameter is specified, the driver will ignore any TV band specified by applications and will always use the band provided in the module parameter.

The other parameter that can be specified is the audio subchannel format. There are
several stereo audio carrier systems in use, including NICAM and
three varieties of A2. To receive audio broadcast on one of these stereo carriers, the "force_mpx_mode" parameter must be specified to the wis-sony-tuner module.

TV band	Audio subcarrier	force_mpx_mode
PAL B/G	Mono (default)	1
PAL B/G	A2	2
PAL B/G	NICAM	3
PAL I	Mono (default)	4

PAL I	NICAM	5
PAL D/K	Mono (default)	6
PAL D/K	A2 (1)	7
PAL D/K	A2 (2)	8
PAL D/K	A2 (3)	9
PAL D/K	NICAM	10
SECAM L	Mono (default)	11
SECAM L	NICAM	12

If the "force_mpx_mode" parameter is not specified, the correct mono-only mode will be chosen based on the TV band. However, the tuner will not receive stereo audio or bilingual broadcasts correctly.

To pass the "force_band" or "force_mpx_mode" parameters to the wis-sony-tuner module, the following line must be added to the modprobe configuration file, which varies from one Linux distribution to another.

```
options wis-sony-tuner force_band=B force_mpx_mode=2
```

The above example would force the tuner to the PAL B/G TV band and receive stereo audio broadcasts on the A2 carrier.

To verify that the configuration has been placed in the correct location, execute:

```
$ modprobe -c | grep wis-sony-tuner
```

If the configuration line appears, then modprobe will pass the parameters correctly the next time the wis-sony-tuner module is loaded into the kernel.

4. TESTING THE DRIVER

Because few Linux applications are able to correctly capture from Video4Linux2 devices with
only compressed formats supported, the new driver
should be tested with the "gorecord" application in the apps/ directory.

First connect a video source to the device, such as a DVD player or VCR. This will be captured to a file for testing the driver. If an input source is unavailable, a test file can still be captured, but the video will be black and the audio will be silent.

This application will auto-detect the V4L2 and ALSA/OSS device names of the hardware and will record video and audio to an AVI file for a specified

number of seconds. For example:

```
$ apps/gorecord -duration 60 capture.avi
```

If this application does not successfully record an AVI file, the error messages produced by gorecord and recorded in the system log (usually in /var/log/messages) should provide information to help resolve the problem.

Supplying no parameters to gorecord will cause it to probe the available devices and exit. Use the -help flag for usage information.

5. USING THE DRIVER

The
V4L2 device implemented by the driver provides a standard compressed format API, within the following criteria:

* Applications that only support the original Video4Linux1 API will not be able to communicate with this driver at all.

* No raw video modes are supported, so applications like xawtv that expect only uncompressed video will not function.

* Supported compression formats are: Motion-JPEG, MPEG1, MPEG2 and MPEG4.

* MPEG video formats are delivered as Video Elementary Streams only. Program Stream (PS), Transport Stream (TS) and Packetized Elementary Stream (PES) formats are not supported.

* Video parameters such as format and input port may not be changed while the encoder is active.

* The audio capture device only functions when the video encoder is actively capturing video. Attempts to read from the audio device when the encoder is inactive will result in an I/O error.

* The native format of the audio device is 48Khz 2-channel
16-bit
little-endian PCM, delivered through the ALSA system. No audio compression is implemented in the hardware. ALSA may convert to other uncompressed formats on the fly.

The include/ directory contains a C header file describing non-standard features of the GO7007SB encoder, which are described below:

GO7007IOC_S_COMP_PARAMS, GO7007IOC_G_COMP_PARAMS

These ioctls are used to negotiate general compression parameters.

To query the current parameters, call the GO7007IOC_G_COMP_PARAMS ioctl with a pointer to a struct go7007_comp_params. If the driver is not set to MPEG format, the EINVAL error code will be returned.

To change the current parameters, initialize all fields of a struct go7007_comp_params and call the GO7007_IOC_S_COMP_PARAMS ioctl with a pointer to this structure. The driver will return the current parameters with any necessary changes to conform to the limitations of the hardware or current compression mode. Any
or all fields can be set
to zero to request a reasonable default value. If the driver is not set to MPEG format, the EINVAL error code will be returned. When I/O is in progress, the EBUSY error code will be returned.

Fields in struct go7007_comp_params:

__u32 gop_size — The maximum number of frames in each Group Of Pictures; i.e. the maximum number of frames minus one between each key frame.

__u32 max_b_frames — The maximum number of sequential bidirectionally-predicted frames. (B-frames are not yet supported.)

enum go7007_aspect_ratio aspect_ratio — The aspect ratio to be encoded in the meta-data of the compressed format.

Choices are:

GO7007_ASPECT_RATIO_1_1
GO7007_ASPECT_RATIO_4_3_NTSC
GO7007_ASPECT_RATIO_4_3_PAL
GO7007_ASPECT_RATIO_16_9_NTSC
GO7007_ASPECT_RATIO_16_9_PAL

__u32 flags — Bit-wise OR of control flags (below)

Flags in struct go7007_comp_params:

GO7007_COMP_CLOSED_GOP — Only produce self-contained GOPs, used to produce streams appropriate for random seeking.

GO7007_COMP_OMIT_SEQ_HEADER Omit the stream sequence header.

GO7007IOC_S_MPEG_PARAMS, GO7007IOC_G_MPEG_PARAMS

These ioctls are used to negotiate MPEG-specific stream parameters when the pixelformat has been set to V4L2_PIX_FMT_MPEG.

To query the current parameters, call the GO7007IOC_G_MPEG_PARAMS ioctl with a pointer to a struct go7007_mpeg_params. If the driver is not set to MPEG format, the EINVAL error code will be returned.

To change the current parameters, initialize all fields of a struct go7007_mpeg_params and call the GO7007_IOC_S_MPEG_PARAMS ioctl with a pointer to this structure. The driver will return the current parameters with any necessary changes to conform to the limitations of the hardware or selected MPEG mode. Any or all fields can be set to zero to request a reasonable default value. If the driver is not set to MPEG format, the EINVAL error code will be returned. When I/O is in progress, the EBUSY error code will be returned.

Fields in struct go7007_mpeg_params:

enum go7007_mpeg_video_standard
mpeg_video_standard The MPEG video standard in which to compress the video.

Choices are:
GO7007_MPEG_VIDEO_MPEG1

GO7007_MPEG_VIDEO_MPEG2
GO7007_MPEG_VIDEO_MPEG4

__u32 flags Bit-wise OR of control flags (below)

__u32 pali The profile and level indication to be stored in the sequence header. This is only used as an indicator to the decoder, and does not affect the MPEG features used in the video stream. Not valid for MPEG1.

Choices for MPEG2 are:
GO7007_MPEG2_PROFILE_MAIN_MAIN

Choices for MPEG4 are:
GO7007_MPEG4_PROFILE_S_L0
GO7007_MPEG4_PROFILE_S_L1

GO7007_MPEG4_PROFILE_S_L2
GO7007_MPEG4_PROFILE_S_L3
GO7007_MPEG4_PROFILE_ARTS_L1
GO7007_MPEG4_PROFILE_ARTS_L2
GO7007_MPEG4_PROFILE_ARTS_L3
GO7007_MPEG4_PROFILE_ARTS_L4
GO7007_MPEG4_PROFILE_AS_L0
GO7007_MPEG4_PROFILE_AS_L1
GO7007_MPEG4_PROFILE_AS_L2
GO7007_MPEG4_PROFILE_AS_L3
GO7007_MPEG4_PROFILE_AS_L4
GO7007_MPEG4_PROFILE_AS_L5

Flags in struct go7007_mpeg_params:

GO7007_MPEG_FORCE_DVD_MODE Force all compression parameters and bitrate control settings to comply

with DVD MPEG2 stream requirements.
This overrides most compression and
bitrate settings!

GO7007_MPEG_OMIT_GOP_HEADER Omit the GOP header.

GO7007_MPEG_REPEAT_SEQHEADER Repeat the MPEG sequence header at the start of each GOP.

GO7007IOC_S_BITRATE, GO7007IOC_G_BITRATE

These ioctls are used to set and query the target bitrate value for the compressed video stream. The bitrate may be selected by storing the target bits per second in an int and calling GO7007IOC_S_BITRATE with a pointer to the int. The bitrate may be queried by calling GO7007IOC_G_BITRATE with a pointer to an int where the current bitrate will be stored.

Note that this is the primary means of controlling the video quality for all compression modes, including V4L2_PIX_FMT_MJPEG. The VIDIOC_S_JPEGCOMP ioctl is not supported.

Installing the WIS PCI Voyager Driver

The WIS PCI Voyager driver requires several patches to the Linux 2.6.11.x kernel source tree before compiling the driver. These patches update the in-kernel SAA7134 driver to the newest development version and patch bugs in the TDA8290/TDA8275 tuner driver.

The following patches must be downloaded from Gerd Knorr's website and applied in the order listed:

http://dl.bytesex.org/patches/2.6.11-2/i2c-tuner
http://dl.bytesex.org/patches/2.6.11-2/i2c-tuner2
http://dl.bytesex.org/patches/2.6.11-2/v4l2-api-mpeg
http://dl.bytesex.org/patches/2.6.11-2/saa7134-update

The following patches are included with this SDK and can be applied in any order:

patches/2.6.11/saa7134-voyager.diff
patches/2.6.11/tda8275-newaddr.diff
patches/2.6.11/tda8290-ntsc.diff

Check to make sure the CONFIG_VIDEO_SAA7134 option
is enabled in the kernel
configuration, and build and install the kernel.

After rebooting into the new kernel, the GO7007 driver can be compiled and installed:

```
$ make SAA7134_BUILD=y
$ make install
$ modprobe saa7134-go7007
```

There will be two V4L video devices associated with the PCI Voyager. The first device (most likely /dev/video0) provides access to the raw video capture mode of the SAA7133 device and is used to configure the source video parameters and tune the TV tuner. This device can be used with xawtv or other V4L(2) video software as a standard uncompressed device.

The second device (most likely /dev/video1) provides access to the compression functions of the GO7007. It can be tested using the gorecord application in the apps/ directory of this SDK:

```
$ apps/gorecord -vdevice /dev/video1 -noaudio test.avi
```

Currently the frame resolution is fixed at 720x480 (NTSC) or 720x576 (PAL), and the video standard must be specified to both the raw and the compressed

video devices
(xawtv and gorecord, for example).

RELEASE NOTES FOR WIS GO7007SB LINUX DRIVER

Last updated: 5 November 2005

- Release 0.9.7 includes new support for using udev to run fxload. The
  install script should automatically detect whether the old hotplug
  scripts or the new udev rules should be used. To force the use of
  hotplug, run "make install USE_UDEV=n". To force the use of udev, run
  "make install USE_UDEV=y".

- Motion detection is supported but undocumented. Try the `modet` app
  for a demonstration of how to use the facility.

- Using USB2.0 devices such as the TV402U with USB1.1 HCDs or hubs can
  cause buffer overruns and frame drops, even at low framerates, due to
  inconsistency in the bitrate control mechanism.

- On devices with an SAA7115, including the Plextor ConvertX, video height
  values of 96,
 128, 160, 192, 256, 320, and 384 do not work in NTSC mode.
  All valid heights up to 512 work correctly in PAL mode.

- The WIS Star Trek and PCI Voyager boards have no support yet for audio
  or the TV tuner.
    GNU GENERAL PUBLIC LICENSE
      Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

    Preamble

 The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to

your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed

under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this

License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the
source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each
time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not

excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free

Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along
with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w'
and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the

library. If this is what you want to do, use the GNU Lesser General
Public License instead of this License.

REDISTRIBUTION: Permission is hereby granted, free of any license fees,
to any person obtaining a copy of this microcode (the "Software"), to
install, reproduce, copy and distribute copies, in binary form only, of
the Software and to permit persons to whom the Software is provided to
do the same, provided that the following conditions are met:

No reverse engineering, decompilation, or disassembly of this Software
is permitted.

Redistributions must reproduce the above copyright notice, this
permission notice, and the following disclaimers and notices in the
Software documentation and/or other materials provided with the
Software.

DISCLAIMER: THE USE OF THE SOFTWARE IS AT YOUR SOLE RISK. THE SOFTWARE
IS PROVIDED "AS IS" AND WITHOUT WARRANTY OF ANY KIND AND COPYRIGHT
HOLDER AND ITS LICENSORS EXPRESSLY DISCLAIM ALL WARRANTIES, EXPRESS AND
IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY,
 FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.
COPYRIGHT HOLDER AND ITS LICENSORS DO NOT WARRANT THAT THE SOFTWARE WILL
MEET YOUR REQUIREMENTS, OR THAT THE OPERATION OF THE SOFTWARE WILL BE
UNINTERRUPTED OR ERROR-FREE. THE ENTIRE RISK ASSOCIATED WITH THE USE OF
THE SOFTWARE IS ASSUMED BY YOU. FURTHERMORE, COPYRIGHT HOLDER AND ITS
LICENSORS DO NOT WARRANT OR MAKE ANY REPRESENTATIONS REGARDING THE USE
OR THE RESULTS OF THE USE OF THE SOFTWARE IN TERMS OF ITS CORRECTNESS,
ACCURACY, RELIABILITY, CURRENTNESS, OR OTHERWISE.

DISCLAIMER: UNDER NO CIRCUMSTANCES INCLUDING NEGLIGENCE, SHALL COPYRIGHT
HOLDER AND ITS LICENSORS OR ITS DIRECTORS, OFFICERS, EMPLOYEES OR AGENTS
("AUTHORIZED REPRESENTATIVES") BE LIABLE FOR ANY INCIDENTAL, INDIRECT,
SPECIAL OR CONSEQUENTIAL DAMAGES (INCLUDING DAMAGES FOR LOSS OF BUSINESS
PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, AND THE
LIKE) ARISING OUT OF THE USE, MISUSE OR INABILITY TO USE THE SOFTWARE,
BREACH OR DEFAULT, INCLUDING
 THOSE ARISING FROM INFRINGEMENT OR ALLEGED
INFRINGEMENT OF ANY PATENT, TRADEMARK, COPYRIGHT OR OTHER INTELLECTUAL
PROPERTY RIGHT EVEN IF COPYRIGHT HOLDER AND ITS AUTHORIZED
REPRESENTATIVES HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN
NO EVENT SHALL COPYRIGHT HOLDER OR ITS AUTHORIZED REPRESENTATIVES TOTAL
LIABILITY FOR ALL DAMAGES, LOSSES, AND CAUSES OF ACTION (WHETHER IN
CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE) EXCEED THE AMOUNT OF
US$10.

Notice: The Software is subject to United States export laws and regulations. You agree to comply with all domestic and international export laws and regulations that apply to the Software, including but not limited to the Export Administration Regulations administered by the U.S. Department of Commerce and International Traffic in Arm Regulations administered by the U.S. Department of State. These laws include restrictions on destinations, end users and end use.

This Notice.txt file contains certain notices of software components included
with the software that Qualcomm Atheros, Inc. ("Qualcomm Atheros") is required
to provide you. Except where prohibited by the open source license, the content

of this notices file is only provided to satisfy Qualcomm Atheros's attribution
and notice requirement; your use of these software components together with the
Qualcomm Atheros software (Qualcomm Atheros software hereinafter referred to
as "Software") is subject to the terms of your agreement from Qualcomm Atheros.
Compliance with all copyright laws and software license agreements included in
the notice section of this file are the responsibility of the user. Except as
may be granted by separate express written agreement, this file provides no
license to any patents, trademarks, copyrights, or other intellectual property
of Qualcomm Incorporated or any of its subsidiaries.

Qualcomm is a trademark of Qualcomm Incorporated, registered in the United States
and
other countries. All Qualcomm Incorporated trademarks are used with permission.
Other products and brand names may be trademarks or registered trademarks of their
respective owners.

/ ***
*
* Fowler/Noll/Vo- hash
*
* The basis of this hash algorithm was taken from an idea sent
* as reviewer comments to the IEEE POSIX P1003.2 committee by:
*
*   Phong Vo (http://www.research.att.com/info/kpv/)
*   Glenn Fowler (http://www.research.att.com/~gsf/)

```
*
* In a subsequent ballot round:
*
*      Landon Curt Noll (http://www.isthe.com/chongo/)
*
* improved on their algorithm.  Some people tried this hash
* and found that it worked rather well.  In an EMail message
* to Landon, they named it the ``Fowler/Noll/Vo'' or FNV hash.
*
* FNV hashes are designed to be fast while maintaining a low
* collision rate. The FNV speed allows one to quickly hash
 lots
* of data while maintaining a reasonable collision rate.  See:
*
*      http://www.isthe.com/chongo/tech/comp/fnv/index.html
*
* for more details as well as other forms of the FNV hash.
*
*
* Please do not copyright this code.  This code is in the public domain.

This Notice.txt file contains certain notices of software components
included with the software that Qualcomm Atheros, Inc. ("Qualcomm
Atheros") is required to provide you. Except where prohibited by the
open source license, the content of this notices file is only provided
to satisfy Qualcomm Atheros's attribution and notice requirement; your
use of these software components together with the Qualcomm Atheros
software (Qualcomm Atheros software hereinafter referred to as
"Software") is subject to the terms of your agreement from Qualcomm
Atheros. Compliance with all copyright laws and software license
agreements included in the notice section of this file are the
responsibility of the user. Except as may be granted by separate
express written agreement, this file provides no license to any
patents, trademarks, copyrights, or other intellectual property of
Qualcomm Incorporated or any of its subsidiaries.

Qualcomm is a trademark of Qualcomm Incorporated, registered in the
United States
 and other countries. All Qualcomm Incorporated
trademarks are used with permission. Other products and brand names
may be trademarks or registered trademarks of their respective owners.

File: ieee_crc32.c

/*
* COPYRIGHT (C) 1986 Gary S. Brown. You may use this program, or
* code or tables extracted from it, as desired without
 restriction.
*
* First, the polynomial itself and its table of feedback terms. The
* polynomial is
* X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
* Note that we take it "backwards" and put the highest-order term in
* the lowest-order bit. The X^32 term is "implied"; the LSB is the
* X^31 term, etc. The X^0 term (usually shown as "+1") results in
* the MSB being 1
*
* Note that the usual hardware shift register implementation, which
* is what we're using (we're merely optimizing it by doing eight-bit
* chunks at a time) shifts bits into the lowest-order term. In our
* implementation, that means shifting towards the right. Why do we
* do it this way? Because the calculated CRC must be transmitted in
* order from highest-order term to lowest-order term. UARTs transmit
* characters in order from LSB to MSB. By storing the CRC this way

```
*  we hand it to the UART in the order low-byte to high-byte; the UART
*  sends each low-bit
 to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes
*
*      The table can be generated at runtime if desired; code to do so
*      is shown later.  It might not be obvious, but the feedback
*      terms simply represent the results of eight shift/xor opera
*      tions for all combinations of data and CRC register values
*
*      The values must be right-shifted by eight bits by the "updcrc
*      logic; the shift must be unsigned (bring in zeroes).  On some
*      hardware you could probably optimize the shift in assembler by
*      using byte-swap instructions
*      polynomial $edb88320
*
*
* CRC32 code derived from work by Gary S. Brown.
*/
```

File: md5.c

```
//
//
 $Id: //depot/sw/branches/qca_main_wifi2.0/perf_pwr_offload/drivers/target/src/misc/crypto/md5.c#1 $
//
// This code implements the MD5 message-digest algorithm.
// The algorithm is due to Ron Rivest.  This code was
// written by Colin Plumb in 1993, no copyright is claimed.
// This code is in the public domain; do with it what you wish.
//
// Equivalent code is available from RSA Data Security, Inc.
// This code has been tested against that, and is equivalent,
// except that you don't need to include two pages of legalese
// with every copy.
//
// To compute the message digest of a chunk of bytes, declare an
// MD5Context structure, pass it to MD5Init, call MD5Update as
// needed on buffers full of bytes, and then call MD5Final, which
// will fill a supplied 16-byte array with the digest.
//
```

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR
USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the
copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other
entities that control, are controlled by, or are under common control
with that entity. For the purposes of this definition, "control" means
(i) the power, direct or indirect, to cause the direction or
management of such entity, whether by contract or otherwise, or (ii)
ownership of fifty percent (50%) or more of the outstanding shares, or
(iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising
permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source,
and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but not

limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work
of authorship, including the
original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently
incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where

such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If
You institute patent
litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and

2. You must cause any modified files to carry prominent notices stating that You changed the files; and

3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding
those notices
that do not pertain to any part of the Derivative Works; and

4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work,
provided that such
additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications

and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on

Your own behalf and on Your sole responsibility, not on behalf of any
other Contributor, and only if You agree to indemnify, defend, and
hold each Contributor
harmless for any liability incurred by, or
claims asserted against, such Contributor by reason of your accepting
any such warranty or additional liability.

*
* This file defines the cryptographic
 functions that need to be implemented
* for wpa_supplicant and hostapd. When TLS is not used, internal

* implementation of MD5, SHA1, and AES is used and no external libraries are
* required. When TLS is enabled (e.g., by enabling EAP-TLS or EAP-PEAP), the
* crypto library used by the TLS implementation is expected to be used for
* non-TLS needs, too, in order to save space by not implementing these
* functions twice.
*
* Wrapper code for using each crypto library is in its own file (crypto*.c)
* and one of these files is build and linked in to provide the functions
* defined here.

SOFTWARE LICENSE AGREEMENT

The accompanying software in binary code form (Software), is licensed to you, or, if you are accepting on behalf of an entity, the entity and its affiliates exercising rights hereunder (Licensee) subject to the terms of this software license agreement (Agreement), unless Licensee and Broadcom Corporation (Broadcom) execute a separate written software license agreement governing use of the Software. ANY USE, REPRODUCTION, OR DISTRIBUTION OF THE SOFTWARE CONSTITUTES LICENSEES ACCEPTANCE OF THIS AGREEMENT.

1. License. Subject to the terms and conditions of this Agreement, Broadcom hereby grants to Licensee a limited, non-exclusive, non-transferable, royalty-free license: (i) to use and integrate the Software with any other software; and (ii) to reproduce and distribute the Software complete, unmodified, and as provided by Broadcom, solely for use with Broadcom proprietary integrated circuit product(s) sold by Broadcom with which the Software was designed to be
used, or their successors.

2. Restrictions. Licensee shall distribute Software with a copy of this Agreement. Licensee shall not remove, efface or obscure any copyright or trademark notices from the Software. Reproductions of the Broadcom copyright notice shall be included with each copy of the Software, except where such Software is embedded in a manner not readily accessible to the end user. Licensee shall not: (i) use, license, sell or otherwise distribute the Software except as provided in this Agreement; (ii) attempt to modify in any way, reverse engineer, decompile or disassemble any portion of the Software; or (iii) use the Software or other material in violation of any applicable law or regulation, including but not limited to any regulatory agency. This Agreement shall automatically terminate upon Licensees failure to comply with any of the terms of this Agreement. In such event, Licensee will destroy all copies of the Software and its component parts.

3. Ownership. The Software
is licensed and not sold. Title to and
ownership of the Software, including all intellectual property rights thereto, and any portion thereof remain with Broadcom or its licensors. Licensee hereby covenants that it will not assert any claim that the Software created by or for Broadcom infringe any intellectual property right owned or controlled by Licensee.

4. Disclaimer. THE SOFTWARE IS OFFERED AS IS, AND BROADCOM PROVIDES AND GRANTS AND LICENSEE RECEIVES NO SUPPORT AND NO WARRANTIES OF ANY KIND, EXPRESS

OR IMPLIED, BY STATUTE, COMMUNICATION OR CONDUCT WITH LICENSEE, OR OTHERWISE. BROADCOM SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A SPECIFIC PURPOSE, OR NONINFRINGEMENT CONCERNING THE SOFTWARE OR ANY UPGRADES TO OR DOCUMENTATION FOR THE SOFTWARE. WITHOUT LIMITATION OF THE ABOVE, BROADCOM GRANTS NO WARRANTY THAT THE SOFTWARE IS ERROR-FREE OR WILL OPERATE WITHOUT INTERRUPTION, AND GRANTS NO WARRANTY REGARDING ITS USE OR THE RESULTS THEREFROM
INCLUDING, WITHOUT LIMITATION, ITS CORRECTNESS, ACCURACY, OR RELIABILITY. TO THE MAXIMUM EXTENT PERMITTED BY LAW, IN NO EVENT SHALL BROADCOM OR ANY OF ITS LICENSORS HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED AND ON ANY THEORY
OF LIABILITY, WHETHER FOR BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, ARISING OUT OF THIS AGREEMENT OR USE, REPRODUCTION, OR DISTRIBUTION OF THE SOFTWARE, INCLUDING BUT NOT LIMITED TO LOSS OF DATA AND LOSS OF PROFITS, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THESE LIMITATIONS SHALL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY LIMITED REMEDY.

5. Export Laws. LICENSEE UNDERSTANDS AND AGREES THAT THE SOFTWARE IS SUBJECT TO UNITED STATES AND OTHER APPLICABLE EXPORT-RELATED LAWS AND REGULATIONS AND THAT LICENSEE MAY NOT EXPORT, RE-EXPORT OR TRANSFER THE SOFTWARE OR ANY DIRECT PRODUCT OF THE SOFTWARE EXCEPT AS PERMITTED UNDER THOSE LAWS.
WITHOUT LIMITING THE FOREGOING, EXPORT, RE-EXPORT, OR TRANSFER OF THE SOFTWARE TO CUBA, IRAN, NORTH KOREA, SUDAN, AND SYRIA IS PROHIBITED.
This is a concatenation of LICENCE.txt and NOTICE.txt from the
open-ath9k-htc-firmware repository describing licensing terms for the
firmware image and its sources.

The source code repository is publicly available at
https://github.com/qca/open-ath9k-htc-firmware .

LICENCE.txt

Files with a Qualcomm Atheros / Atheros licence fall under the following
licence. Please see NOTICES.TXT for information about other files in this
repository.

NOTICE.TXT

This NOTICE.TXT file contains certain notices of software components included
with the software that QUALCOMM ATHEROS Incorporated ('Qualcomm Atheros') is
required to provide you. Notwithstanding anything in the notices in this file,
your use of these software components together with the Qualcomm Atheros
software (Qualcomm Atheros software hereinafter referred to as 'Software') is
subject to the terms of your license from Qualcomm Atheros. Compliance with
all copyright laws and software license agreements included in the notice
section of this file are the responsibility of the user. Except as may be
granted by separate express written agreement, this file provides no license
to any Qualcomm Atheros patents, trademarks, copyrights, or other intellectual
property.

* SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.
*/
Copyright (C) 2015-2019 Advanced Micro Devices, Inc., All rights reserved.

Permission is hereby granted by Advanced Micro Devices, Inc. ("AMD"),
free of any license fees, to any person obtaining a copy of this
microcode in binary form (the "Software") ("You"), to install,
reproduce, copy and distribute copies of the Software and to permit
persons to whom the Software is provided to do the same, subject to
the following terms and conditions. Your use of any portion of the
Software shall constitute Your acceptance of the following terms and
conditions. If You do not agree to the following terms and conditions,
do not use, retain or redistribute any portion of the Software.

If You redistribute this Software, You must reproduce the above
copyright notice and this license with the Software.
Without specific, prior, written permission from AMD, You may not
reference AMD or AMD products in the promotion of any product derived
from or incorporating this Software in any manner that implies that
AMD
 endorses or has certified such product derived from or
incorporating this Software.

You may not reverse engineer, decompile, or disassemble this Software
or any portion thereof.

THE SOFTWARE IS PROVIDED "AS IS" WITHOUT ANY EXPRESS OR IMPLIED
WARRANTY OF ANY KIND, INCLUDING BUT NOT LIMITED TO WARRANTIES OF
MERCHANTABILITY, NONINFRINGEMENT, TITLE, FITNESS FOR ANY PARTICULAR
PURPOSE, OR WARRANTIES ARISING FROM CONDUCT, COURSE OF DEALING, OR
USAGE OF TRADE. IN NO EVENT SHALL AMD OR ITS LICENSORS BE LIABLE FOR
ANY DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR
LOSS OF PROFITS, BUSINESS INTERRUPTION, OR LOSS OF DATA OR
INFORMATION) ARISING OUT OF AMD'S NEGLIGENCE, GROSS NEGLIGENCE, THE
USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF AMD HAS BEEN ADVISED
OF THE POSSIBILITY OF SUCH DAMAGES. BECAUSE SOME JURISDICTIONS
PROHIBIT THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR
INCIDENTAL DAMAGES OR THE EXCLUSION OF IMPLIED WARRANTIES, THE ABOVE
LIMITATION MAY
 NOT APPLY TO YOU.

Without limiting the foregoing, the Software may implement third party
technologies for which You must obtain licenses from parties other
than AMD. You agree that AMD has not obtained or conveyed to You, and
that You shall be responsible for obtaining the rights to use and/or
distribute the applicable underlying intellectual property rights
related to the third party technologies. These third party
technologies are not licensed hereunder.

If You use the Software (in whole or in part), You shall adhere to all applicable U.S., European, and other export laws, including but not limited to the U.S. Export Administration Regulations ("EAR"), (15 C.F.R. Sections 730 through 774), and E.U. Council Regulation (EC) No 1334/2000 of 22 June 2000. Further, pursuant to Section 740.6 of the EAR, You hereby certify that, except pursuant to a license granted by the United States Department of Commerce Bureau of Industry and Security or as otherwise permitted pursuant to a License Exception
under the U.S. Export Administration Regulations ("EAR"), You will not (1) export, re-export or release to a national of a country in Country Groups D:1, E:1 or E:2 any restricted technology, software, or source code You receive hereunder, or (2) export to Country Groups D:1, E:1 or E:2 the direct product of such technology or software, if such foreign produced direct product is subject to national security controls as identified on the Commerce Control List (currently found in Supplement 1 to Part 774 of EAR). For the most current Country Group listings, or for additional information about the EAR or Your obligations under those regulations, please refer to the U.S. Bureau of Industry and Securitys website at ttp://www.bis.doc.gov/.
The following XC4000 firmware file "dvb-fe-xc4000-1.4.1.fw" was created based on version 1.4 of "xc4000_firmwares.h".

Firmware provided as part of an XC4000 Linux developers kit by Brian Mathews <bmathews@xceive.com> to Devin Heitmueller <dheitmueller@kernellabs.org> on July 1, 2009.

The code was released by Xceive under the following license:

// Copyright (c) 2009, Xceive Corporation <info@xceive.com>
//
// Permission to use, copy, modify, and/or distribute this software, only
// for use with Xceive ICs, for any purpose with or without fee is hereby
// granted, provided that the above copyright notice and this permission
// notice appear in all source code copies.
//
// THE SOFTWARE IS PROVIDED "AS IS" AND THE AUTHOR DISCLAIMS ALL WARRANTIES
// WITH REGARD TO THIS SOFTWARE INCLUDING ALL IMPLIED WARRANTIES OF
// MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR
// ANY SPECIAL, DIRECT, INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES
// WHATSOEVER RESULTING FROM
LOSS OF USE, DATA OR PROFITS, WHETHER IN AN
// ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF
// OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

License For Customer Use of NVIDIA Software

IMPORTANT NOTICE -- READ CAREFULLY: This License For Customer Use of NVIDIA Software ("LICENSE") is the agreement which governs use of the software of NVIDIA Corporation and its subsidiaries ("NVIDIA") downloadable herefrom, including computer software and associated printed materials ("SOFTWARE"). By downloading, installing, copying, or otherwise using the SOFTWARE, you agree to be bound by the terms of this LICENSE. If you do not agree to the terms of this LICENSE, do not download the SOFTWARE.

RECITALS

Use of NVIDIA's products requires three elements: the SOFTWARE, the hardware, and a personal computer. The SOFTWARE is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE may be protected by various patents, and is not sold, and instead is only licensed for use, strictly in accordance with this document. The hardware is protected by various patents,
and is sold, but this agreement does not cover that sale, since it may not necessarily be sold as a package with the SOFTWARE. This agreement sets forth the terms and conditions of the SOFTWARE LICENSE only.

1. DEFINITIONS

1.1 Customer. Customer means the entity or individual that downloads or otherwise obtains the SOFTWARE.

2. GRANT OF LICENSE

2.1 Rights and Limitations of Grant. NVIDIA hereby grants Customer the following non-exclusive, non-transferable right to use the SOFTWARE, with the following limitations:

2.1.1 Rights. Customer may install and use multiple copies of the

SOFTWARE on a shared computer or concurrently on different computers, and make multiple back-up copies of the SOFTWARE, solely for Customer's use within Customer's Enterprise. "Enterprise" shall mean individual use by Customer or any legal entity (such as a corporation or university) and the subsidiaries it owns by more than fifty percent (50%).

2.1.2 Open Source Exception. Notwithstanding the foregoing terms of Section 2.1.1, SOFTWARE may be copied and redistributed solely for use on operating systems distributed under the terms of an OSI-approved open source license as listed by the Open Source Initiative at http://opensource.org, provided that the binary files thereof are not modified, and Customer provides a copy of this license with the SOFTWARE.

2.1.3 Limitations.

No Reverse Engineering. Customer may not reverse engineer, decompile, or disassemble the SOFTWARE, nor attempt in any other manner to obtain the source code.

Usage. SOFTWARE is licensed only for use with microprocessor(s) which have been (i) designed by NVIDIA and (ii) either (a) sold by or (b) licensed by NVIDIA. Customer shall not use SOFTWARE in conjunction with, nor cause SOFTWARE to be executed by, any other microprocessor.

No Translation. Customer shall not translate SOFTWARE, nor cause or permit SOFTWARE to be translated, from the architecture or language in which it is originally provided by NVIDIA, into any other architecture or language.

No Rental. Customer may not rent or lease the SOFTWARE to someone else.

3. TERMINATION

This LICENSE will automatically terminate if Customer fails to comply with any of the terms and conditions hereof. In such event, Customer must destroy all copies of the SOFTWARE and all of its component parts.

Defensive Suspension. If Customer commences or participates in any legal proceeding against NVIDIA, then NVIDIA may, in its sole discretion, suspend or terminate all license grants and any other rights provided under this LICENSE during the pendency of such legal proceedings.

4. COPYRIGHT

All title and copyrights in and to the SOFTWARE (including but

not limited to all images, photographs, animations, video, audio, music, text, and other information incorporated into the SOFTWARE), the accompanying printed materials, and any copies of the SOFTWARE, are owned by NVIDIA, or its suppliers. The SOFTWARE is protected by copyright laws and international treaty provisions. Accordingly, Customer is required to treat the SOFTWARE like any other copyrighted material, except as otherwise allowed pursuant to this LICENSE and that it may make one copy of the SOFTWARE solely for backup or archive purposes.

5. APPLICABLE LAW

This agreement shall be deemed to have been made in, and shall be construed pursuant to, the laws of the State of California.

6. DISCLAIMER OF WARRANTIES AND LIMITATION ON LIABILITY

6.1 No Warranties. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE SOFTWARE IS PROVIDED "AS IS" AND NVIDIA AND ITS SUPPLIERS DISCLAIM ALL WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

6.2 No Liability for Consequential Damages. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL NVIDIA OR ITS SUPPLIERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR ANY OTHER PECUNIARY LOSS) ARISING OUT OF THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF NVIDIA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. MISCELLANEOUS

The United Nations Convention on Contracts for the International Sale of Goods is specifically disclaimed. If any provision of this LICENSE is inconsistent with, or cannot be fully enforced under, the law, such provision will be construed as limited to the extent necessary to be consistent with and fully enforceable under the law. This agreement is the final, complete and exclusive agreement between the parties relating to the subject matter hereof, and supersedes all prior or contemporaneous understandings and agreements relating to such subject matter, whether oral or written. Customer agrees that it will not ship, transfer or export the SOFTWARE into any country, or use the SOFTWARE in any

manner, prohibited by the
United States Bureau of Export Administration or any export laws,
restrictions or regulations. This LICENSE may only be modified in
writing signed by an authorized officer of NVIDIA.

LICENSE ISSUES
==========

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

/*
* This code implements the MD5 message-digest algorithm.
* The algorithm is due to Ron Rivest. This code was
* written by Colin Plumb in 1993, no copyright is claimed.
* This code is in the public domain; do with it what you wish.
*
* Equivalent code is available from RSA Data Security, Inc.
* This code has been tested against that, and is equivalent,
* except that you don't need to include two pages of legalese
* with every copy.
*
* To compute the message digest of a chunk of bytes, declare an
* MD5Context structure, pass it to MD5Init, call MD5Update
as
* needed on buffers full of bytes, and then call MD5Final, which
* will fill a supplied 16-byte array with the digest.
*/

*/

/*-
 * COPYRIGHT (C) 1986 Gary S. Brown. You may use this program, or
* code or tables extracted from it, as desired without restriction.
*
* First, the polynomial itself and its table of feedback terms. The
* polynomial is
* X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
* Note that we take it "backwards" and put the highest-order term in
* the lowest-order bit. The X^32 term is "implied"; the LSB is the
* X^31 term, etc. The X^0 term (usually shown as "+1") results in
* the MSB being 1
*
* Note that the usual hardware shift register implementation, which
* is what we're using (we're merely optimizing it by doing eight-bit
* chunks at a time) shifts bits into the lowest-order term. In our
* implementation, that means shifting towards the right. Why do we
* do it this way? Because the calculated CRC must be transmitted in
* order from highest-order
 term to lowest-order term. UARTs transmit
* characters in order from LSB to MSB. By storing the CRC this way
* we hand it to the UART in the order low-byte to high-byte; the UART

```
*  sends each low-bit to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes
*
*      The table can be generated at runtime if desired; code to do so
*      is shown later.  It might not be obvious, but the feedback
*      terms simply represent the results of eight shift/xor opera
*      tions for all combinations of data and CRC register values
*
*      The values must be right-shifted by eight bits by the "updcrc
*      logic; the shift must be unsigned (bring in zeroes).  On some
*      hardware you could probably optimize the shift in assembler by
*      using byte-swap instructions
*      polynomial
 $edb88320
*
```

```
/*
  The AES algorithm Rijndael implemented for block and key sizes of 128,
  192 and 256 bits (16, 24 and 32 bytes) by Brian Gladman.

  I retain copyright in this code but I encourage its free use provided
  that I don't carry any responsibility for the results. I am especially
  happy to see it used in free and open source software. If you do use
  it I would appreciate an acknowledgement of its origin in the code or
  the product that results and I would also appreciate knowing a liitle
  about the use to which it is being put. I am grateful to Frank Yellin
  for some ideas that are used in this implementation.

  Dr B. R. Gladman <brg@gladman.uk.net> 1st June 2001.

The following XC500 firmware file "dvb-fe-xc5000-1.6.114.fw" was
created based on "xc5000_firmwares_32000Khz.h".

Firmware provided as part of an XC5000 Linux developers kit by Brian
Mathews <bmathews@xceive.com> to Devin Heitmueller <dheitmueller@linuxtv.org>
on July 1, 2009.

The code was released by Xceive under the following license:

// Copyright (c) 2009, Xceive Corporation <info@xceive.com>
//
// Permission to use, copy, modify, and/or distribute this software, only
// for use with Xceive ICs, for any purpose with or without fee is hereby
// granted, provided that the above copyright notice and this permission
// notice appear in all source code copies.
//
// THE SOFTWARE IS PROVIDED "AS IS" AND THE AUTHOR DISCLAIMS ALL WARRANTIES
// WITH REGARD TO THIS SOFTWARE INCLUDING ALL IMPLIED WARRANTIES OF
// MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR
// ANY SPECIAL, DIRECT, INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES
// WHATSOEVER RESULTING FROM LOSS OF
 USE, DATA OR PROFITS, WHETHER IN AN
// ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF
// OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Amlogic Co., Inc. grants permission to use and redistribute
aforementioned firmware files for the use with devices containing
Amlogic chipsets, but not as part of the Linux kernel or in any other
form which would require these files themselves to be covered by the
terms of the GNU General Public License or the GNU Lesser General
Public License.

These firmware files are distributed in the hope that they will be
useful, but are provided WITHOUT ANY WARRANTY, INCLUDING BUT NOT
LIMITED TO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A
PARTICULAR PURPOSE.

*
* This file defines the cryptographic functions that need to be implemented
* for wpa_supplicant and hostapd. When TLS is not used,
 internal
* implementation of MD5, SHA1, and AES is used and no external libraries are
* required. When TLS is enabled (e.g., by enabling EAP-TLS or EAP-PEAP), the
* crypto library used by the TLS implementation is expected to be used for
* non-TLS needs, too, in order to save space by not implementing these
* functions twice.
*
* Wrapper code for using each crypto library is in its own file (crypto*.c)
* and one of these files is build and linked in to provide the functions
* defined here.
*/

==========

File: ieee_crc32.c

/*
* COPYRIGHT (C)
 1986 Gary S. Brown. You may use this program, or
* code or tables extracted from it, as desired without restriction.
*
* First, the polynomial itself and its table of feedback terms. The
* polynomial is
* X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
* Note that we take it "backwards" and put the highest-order term in
* the lowest-order bit. The X^32 term is "implied"; the LSB is the
* X^31 term, etc. The X^0 term (usually shown as "+1") results in
* the MSB being 1
*
* Note that the usual hardware shift register
 implementation, which
* is what we're using (we're merely optimizing it by doing eight-bit
* chunks at a time) shifts bits into the lowest-order term. In our
* implementation, that means shifting towards the right. Why do we
* do it this way? Because the calculated CRC must be transmitted in

```
*  order from highest-order term to lowest-order term.  UARTs transmit
*  characters in order from LSB to MSB.  By storing the CRC this way
*  we hand it to the UART in the order low-byte to high-byte; the UART
*  sends each low-bit to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes

*
*     The table can be generated at runtime if desired; code to do so
*     is shown later.  It might not be obvious, but the feedback
*     terms simply represent the results of eight shift/xor opera
*     tions for all combinations of data and CRC register values
*
*     The values must be right-shifted by eight bits by the "updcrc
*     logic; the shift must be unsigned (bring in zeroes).  On some
*     hardware you could probably optimize the shift in assembler by
*     using byte-swap instructions
*     polynomial $edb88320
*
*

* CRC32 code derived from work by Gary S. Brown.

TERMS AND CONDITIONS FOR USE, REPRODUCTION,
AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source,
and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the

purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and

2. You must cause any modified files to carry prominent notices stating that You changed the files; and

3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

   You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names,
 trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed
to in writing, Licensor provides the Work (and each Contributor
provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR
CONDITIONS OF ANY KIND, either express or implied, including, without
limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT,
MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely
responsible for determining the appropriateness of using or
redistributing the Work and assume any risks associated with Your
exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise, unless
required by applicable law (such as deliberate and grossly negligent
acts)
 or agreed to in writing, shall any Contributor be liable to You
for damages, including any direct, indirect, special, incidental, or
consequential damages of any character arising as a result of this
License or out of the use or inability to use the Work (including but
not limited to damages for loss of goodwill, work stoppage, computer
failure or malfunction, or any and all other commercial damages or
losses), even if such Contributor has been advised of the possibility
of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer, and
charge a fee for, acceptance of support, warranty, indemnity, or other
liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only on
Your own behalf and on Your sole responsibility, not on behalf of any
other Contributor, and only if You agree to indemnify, defend, and
hold each Contributor harmless for
 any liability incurred by, or
claims asserted against, such Contributor by reason of your accepting
any such warranty or additional liability.

END OF TERMS AND CONDITIONS

*/

//
// This code implements the MD5 message-digest algorithm.
// The algorithm is due to Ron Rivest.  This code was
// written by Colin Plumb in 1993, no copyright is claimed.
// This code is in the public domain; do with it what you wish.
//
// Equivalent code is available from RSA Data Security, Inc.
// This code has been tested against that, and is equivalent,
// except that you don't need to include two pages of legalese
// with every copy.
//
// To compute the message digest of a chunk of bytes, declare an
// MD5Context structure, pass it to MD5Init, call MD5Update as
// needed on buffers full of bytes, and then call MD5Final, which
```

```
// will fill a supplied 16-byte array with
 the digest.
//
// This code implements the MD5 message-digest algorithm.
