When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or
limiting liability differently from the
terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions;
the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the

Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the

patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM

IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful,

but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates
the terms and conditions of version 3 of the GNU General Public
License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of

this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying

Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version

of the GNU Lesser General Public License "or any later version"
applies to it, you have the option of following
 the terms and
conditions either of that published version or of any later version
published by the Free Software Foundation. If the Library as you
received it does not specify a version number of the GNU Lesser
General Public License, you may choose any version of the GNU Lesser
General Public License ever published by the Free Software Foundation.

 If the Library as you received it specifies that a proxy can decide
whether future versions of the GNU Lesser General Public License shall
apply, that proxy's public statement of acceptance of any version is
permanent authorization for you to choose that version for the
Library.
==========
compiler_rt License
==========

The compiler_rt library is dual licensed under both the University of Illinois
"BSD-Like" license and the MIT license. As a user of this code you may choose
to use it under either license. As a contributor, you agree to allow your code
to be used under both.

Full text of the relevant licenses is included below.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,

and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable

by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only

on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

https://www.apache.org/licenses/LICENSE-2.0

Unless required by applicable law or agreed to in writing, software
distributed under the License is distributed on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.
See the License for the specific language governing permissions and
limitations under the License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some

specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who
decide to use it. You
can use it too, but we suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of
it in new free programs; and that you are informed that you can do
these things.

To protect your rights, we need to make restrictions that forbid
distributors to deny you these rights or to ask you to surrender these
rights. These restrictions translate to certain responsibilities for
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library,
whether gratis
or for a fee, you must give the recipients all the rights that we gave
you. You must make sure that they, too, receive or can get the source
code. If you link other code with the library, you must provide
complete object files to the recipients, so that they can relink them
with the library after making changes to the library and recompiling
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the
library, and (2) we offer you this license, which gives you legal
permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that
there is no warranty for the free library. Also, if the library is
modified by someone else and passed on, the recipients should know
that what they have is not the original version, so that the original
author's reputation will not be affected by problems that might be
introduced by others.

Finally, software
patents pose a constant threat to the existence of
any free program. We wish to make sure that a company cannot
effectively restrict the users of a free program by obtaining a
restrictive license from a patent holder. Therefore, we insist that
any patent license obtained for a version of the library must be
consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits
such linking only if the
entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting
the free library to free
software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The

former contains code derived from the library, whereas the latter must be combined with the library in order
to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into
another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium,
provided that
you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to

exercise the right to control the distribution of derivative or
collective works based on the Library.

In addition, mere aggregation of another work not based on the Library
with the Library (or with a work based on the Library) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may opt to apply the terms of the ordinary
GNU General Public
License instead of this License to a given copy of the Library. To do
this, you must alter all the notices that refer to this License, so
that they refer to the ordinary GNU General Public License, version 2,
instead of to this License. (If a newer version than version 2 of the
ordinary GNU General Public License has appeared, then you can specify
that version instead if you wish.) Do not make any other change in
these notices.

Once this change is made in a given copy, it is irreversible for
that copy, so the ordinary GNU General Public License applies to all
subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of
the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or
derivative of it, under Section 2) in object code or executable form
under the terms of Sections 1 and 2 above provided that you accompany
it with the complete corresponding
machine-readable source code, which
must be distributed under the terms of Sections 1 and 2 above on a
medium customarily used for software interchange.

If distribution of object code is made by offering access to copy
from a designated place, then offering equivalent access to copy the
source code from the same place satisfies the requirement to
distribute the source code, even though third parties are not
compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the
Library, but is designed to work with the Library by being compiled or
linked with it, is called a "work that uses the Library". Such a
work, in isolation, is not a derivative work of the Library, and
therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library
creates an executable that is a derivative of the Library (because it
contains portions of the Library), rather than a "work that

uses the
library". The executable is therefore covered by this License.
Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the
object code for the work under the terms of Section 6.
Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany
the work with the complete corresponding
machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood

that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate
properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally
distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to

refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system
which is
implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish
revised and/or new
versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our

decision
will be guided by the two goals of preserving the free status
of all derivatives of our free software and of promoting the sharing
and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE,
BE LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey
the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or
modify it under the terms of the GNU Lesser General Public
License as published by the Free Software Foundation; either
version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public
License along with this library; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301
USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the library, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not price.

Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which
gives you legal permission to copy,
distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law:

that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work
are not derived from the Program,
and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution
and only if you
received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to

control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source
code, even though third parties are not
compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing
or modifying
the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For

example, if a patent
license would not permit royalty-free redistribution of the Program by
all those who receive copies directly or indirectly through you, then
the only way you could satisfy both it and this License would be to
refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under
any particular circumstance, the balance of the section is intended to
apply and the section as a whole is intended to apply in other
circumstances.

It is not the purpose of this section to induce you to infringe any
patents or other property right claims or to contest validity of any
such claims; this section has the sole purpose of protecting the
integrity of the free software distribution system, which is
implemented by public license practices. Many people have made
generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to
decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing
version number. If the Program
specifies a version number of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU
General Public License as published by
the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along
with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this
is what you want to do, use the GNU Lesser General
Public License instead of this License.

Redistribution and use in source and binary forms, with or without
modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice,
   this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright
   notice, this list of conditions and the following disclaimer in the
   documentation and/or other materials provided with the distribution.

The following license applies to many of the fonts in this folder.

This Font Software is licensed under the SIL Open Font License, Version 1.1.

This license is copied below, and is also available with a FAQ at: http://scripts.sil.org/OFL

SIL OPEN FONT LICENSE Version 1.1 - 26 February 2007

PREAMBLE
The goals of the Open Font License (OFL) are to stimulate worldwide development of collaborative font projects, to support the font creation efforts of academic and linguistic communities, and to provide a free and open framework in which fonts may be shared and improved in partnership with others.

The OFL allows the licensed fonts to be used, studied, modified and redistributed freely as long as they are not sold by themselves. The fonts, including any derivative works, can be bundled, embedded, redistributed and/or sold with any software provided that any reserved names
are not used by derivative works. The fonts and derivatives, however, cannot be released under any other type of license. The requirement for fonts to remain under this license does not apply to any document created using the fonts or their derivatives.

DEFINITIONS
"Font Software" refers to the set of files released by the Copyright Holder(s) under this license and clearly marked as such. This may include source files, build scripts and documentation.

"Reserved Font Name" refers to any names specified as such after the copyright statement(s).

"Original Version" refers to the collection of Font Software components as distributed by the Copyright Holder(s).

"Modified Version" refers to any derivative made by adding to, deleting, or substituting -- in part or in whole -- any of the components of the Original Version, by changing formats or by porting the Font Software to a new environment.

"Author" refers to any designer, engineer, programmer, technical writer or other person who

contributed to the Font Software.

PERMISSION & CONDITIONS
Permission is hereby granted, free of charge, to any person obtaining a copy of the Font Software, to use, study, copy, merge, embed, modify, redistribute, and sell modified and unmodified copies of the Font Software, subject to the following conditions:

1) Neither the Font Software nor any of its individual components, in Original or Modified Versions, may be sold by itself.

2) Original or Modified Versions of the Font Software may be bundled, redistributed and/or sold with any software, provided that each copy contains the above copyright notice and this license. These can be included either as stand-alone text files, human-readable headers or in the appropriate machine-readable metadata fields within text or binary files as long as those fields can be easily viewed by the user.

3) No Modified Version of the Font Software may use the Reserved Font Name(s) unless explicit written permission is granted by the corresponding
Copyright Holder. This restriction only applies to the primary font name as presented to the users.

4) The name(s) of the Copyright Holder(s) or the Author(s) of the Font Software shall not be used to promote, endorse or advertise any Modified Version, except to acknowledge the contribution(s) of the Copyright Holder(s) and the Author(s) or with their explicit written permission.

5) The Font Software, modified or unmodified, in part or in whole, must be distributed entirely under this license, and must not be distributed under any other license. The requirement for fonts to remain under this license does not apply to any document created using the Font Software.

TERMINATION
This license becomes null and void if any of the above conditions are not met.

DISCLAIMER
THE FONT SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO ANY WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT OF COPYRIGHT, PATENT,
TRADEMARK, OR OTHER RIGHT. IN NO EVENT SHALL THE COPYRIGHT HOLDER BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, INCLUDING ANY GENERAL, SPECIAL, INDIRECT, INCIDENTAL, OR CONSEQUENTIAL

DAMAGES, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF THE USE OR INABILITY TO USE THE FONT SOFTWARE OR FROM OTHER DEALINGS IN THE FONT SOFTWARE.

1.193 python3-certifi 2021.10.8

1.193.1 Available under license :

This package contains a modified version of ca-bundle.crt:

ca-bundle.crt -- Bundle of CA Root Certificates

Certificate data from Mozilla as of: Thu Nov 3 19:04:19 2011#
This is a bundle of X.509 certificates of public Certificate Authorities
(CA). These were automatically extracted from Mozilla's root certificates
file (certdata.txt). This file can be found in the mozilla source tree:
http://mxr.mozilla.org/mozilla/source/security/nss/lib/ckfw/builtins/certdata.txt?raw=1#
It contains the certificates in PEM format and therefore
can be directly used with curl / libcurl / php_curl, or with
an Apache+mod_ssl webserver for SSL client authentication.
Just configure this file as the SSLCACertificateFile.#

1.194 python3-cryptography 36.0.2

1.194.1 Available under license :

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and
the Individual or Organization ("Licensee") accessing and otherwise using Python
2.7.12 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby
grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce,
analyze, test, perform and/or display publicly, prepare derivative works,
distribute, and otherwise use Python 2.7.12 alone or in any derivative
version, provided, however, that PSF's License Agreement and PSF's notice of
copyright, i.e., "Copyright 2001-2016 Python Software Foundation; All Rights
Reserved" are retained in Python 2.7.12 alone or in any derivative version
prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or
incorporates Python 2.7.12 or any part thereof, and wants to make the
derivative work available to others
as provided herein, then Licensee hereby
agrees to include in any such work a brief summary of the changes made to Python
2.7.12.

4. PSF is making Python 2.7.12 available to Licensee on an "AS IS" basis.
PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF
EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR
WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE
USE OF PYTHON 2.7.12 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.7.12
FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF
MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.7.12, OR ANY DERIVATIVE
THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of
its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship
of agency, partnership, or joint venture between PSF and Licensee. This License
Agreement does not grant permission to use PSF trademarks or trade name in a
trademark sense to endorse or promote products or services of Licensee, or any

third party.

8. By copying, installing or otherwise using Python 2.7.12, Licensee agrees
to be bound by the terms and conditions of this License Agreement.

This software is made available under the terms of *either* of the licenses
found in LICENSE.APACHE or LICENSE.BSD. Contributions to cryptography are made
under the terms of *both* these licenses.

The code used in the OS random engine is derived from CPython, and is licensed
under the terms of the PSF License Agreement.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the
editorial
revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to

communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and

attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or

implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

1.195.1 Available under license :

Terms of Perl itself

a) the GNU General Public License as published by the Free
Software Foundation; either version 1, or (at your option) any
later version, or
b) the "Artistic License"

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and
to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it

in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in

themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective
works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms
of Sections 1 and 2 above on a medium
customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the

operating system on which the executable runs,
unless that component
itself accompanies the executable.

If distribution of executable or object code is made by offering
access to copy from a designated place, then offering equivalent
access to copy the source code from the same place counts as
distribution of the source code, even though third parties are not
compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program
except as expressly provided under this License. Any attempt
otherwise to copy, modify, sublicense or distribute the Program is
void, and will automatically terminate your rights under this License.
However, parties who have received copies, or rights, from you under
this License will not have their licenses terminated so long as such
parties remain in full compliance.

5. You are not required to accept this License, since you have not
signed it. However, nothing else grants you permission to modify or
distribute the Program or its derivative works.
These actions are
prohibited by law if you do not accept this License. Therefore, by
modifying or distributing the Program (or any work based on the
Program), you indicate your acceptance of this License to do so, and
all its terms and conditions for copying, distributing or modifying
the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the
Program), the recipient automatically receives a license from the
original licensor to copy, distribute or modify the Program subject to
these terms and conditions. You may not impose any further
restrictions on the recipients' exercise of the rights granted herein.
You are not responsible for enforcing compliance by third parties to
this License.

7. If, as a consequence of a court judgment or allegation of patent
infringement or for any other reason (not limited to patent issues),
conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of
this License, they do not
excuse you from the conditions of this License. If you cannot
distribute so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you
may not distribute the Program at all. For example, if a patent
license would not permit royalty-free redistribution of the Program by
all those who receive copies directly or indirectly through you, then
the only way you could satisfy both it and this License would be to

refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free
software distribution system, which is
implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software
Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes

make exceptions for this.
Our decision will be guided by the two goals
of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED
ABOVE, BE LIABLE TO YOU FOR DAMAGES,
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

The Artistic License

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

- "Package"
refers to the collection of files distributed by the Copyright
Holder, and derivatives of that collection of files created through textual

modification.

- "Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder.
- "Copyright Holder" is whoever is named in the copyright or copyrights for the package.
- "You" is you, if you're thinking about copying or distributing this Package.
- "Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)
- "Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item

may redistribute it under the same conditions they
received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as ftp.uu.net, or

by allowing the
Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

b) accompany the distribution with the machine-readable source of the Package with your modifications.

c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executables non-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this Package.

7. C or perl subroutines supplied by you and linked into this Package shall not be considered part of this Package.

8. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

9. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTIBILITY AND FITNESS FOR A PARTICULAR PURPOSE.

@subheading Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software---to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software---typically
libraries---of the Free
Software Foundation and other authors who decide to use it. You can use
it too, but we suggest you first think carefully about whether this
license or the ordinary General Public License is the better strategy to
use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of it
in new free programs; and that you are informed that you can do these
things.

To protect your rights, we need to make restrictions that forbid
distributors to deny you these rights or to ask you to surrender these
rights. These restrictions translate to certain responsibilities for

you if you distribute copies of the library
or if you modify it.

For example, if you distribute copies of the library, whether gratis
or for a fee, you must give the recipients all the rights that we gave
you. You must make sure that they, too, receive or can get the source
code. If you link other code with the library, you must provide
complete object files to the recipients, so that they can relink them
with the library after making changes to the library and recompiling
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the
library, and (2) we offer you this license, which gives you legal
permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that
there is no warranty for the free library. Also, if the library is
modified by someone else and passed on, the recipients should know
that what they have is not the original version, so that the original
author's reputation
will not be affected by problems that might be
introduced by others.

Finally, software patents pose a constant threat to the existence of
any free program. We wish to make sure that a company cannot
effectively restrict the users of a free program by obtaining a
restrictive license from a patent holder. Therefore, we insist that
any patent license obtained for a version of the library must be
consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the
ordinary GNU General Public License. This license, the GNU Lesser
General Public License, applies to certain designated libraries, and
is quite different from the ordinary General Public License. We use
this license for certain libraries in order to permit linking those
libraries into non-free programs.

When a program is linked with a library, whether statically or using
a shared library, the combination of the two is legally speaking a
combined work, a derivative
of the original library. The ordinary
General Public License therefore permits such linking only if the
entire combination fits its criteria of freedom. The Lesser General
Public License permits more lax criteria for linking other code with
the library.

We call this license the @dfn{Lesser} General Public License because it
does @emph{Less} to protect the user's freedom than the ordinary General

Public License. It also provides other free software developers Less
of an advantage over competing non-free programs. These disadvantages
are the reason we use the ordinary General Public License for many
libraries. However, the Lesser license provides advantages in certain
special circumstances.

For example, on rare occasions, there may be a special need to
encourage the widest possible use of a certain library, so that it becomes
a de-facto standard. To achieve this, non-free programs must be
allowed to use the library. A more frequent case is that a free
library does the
same job as widely used non-free libraries. In this
case, there is little to gain by limiting the free library to free
software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free
programs enables a greater number of people to use a large body of
free software. For example, permission to use the GNU C Library in
non-free programs enables many more people to use the whole GNU
operating system, as well as its variant, the GNU/Linux operating
system.

Although the Lesser General Public License is Less protective of the
users' freedom, it does ensure that the user of a program that is
linked with the Library has the freedom and the wherewithal to run
that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and
modification follow. Pay close attention to the difference between a
``work based on the library'' and a ``work that uses the library''. The
former
contains code derived from the library, whereas the latter must
be combined with the library in order to run.

@subheading TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

@enumerate 0
@item
This License Agreement applies to any software library or other program
which contains a notice placed by the copyright holder or other
authorized party saying it may be distributed under the terms of this
Lesser General Public License (also called ``this License''). Each
licensee is addressed as ``you''.

A ``library'' means a collection of software functions and/or data
prepared so as to be conveniently linked with application programs
(which use some of those functions and data) to form executables.

The ``Library", below, refers to any such software library or work which has been distributed under these terms. A ``work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it,
either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term ``modification".)

``Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

@item
You may copy and distribute
verbatim copies of the Library's
complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

@item
You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

@enumerate a
@item
The modified work must itself be a software library.

@item

You must cause the files modified to carry prominent notices
stating that you changed the files and the date of any change.

@item
You must
 cause the whole of the work to be licensed at no
charge to all third parties under the terms of this License.

@item
If a facility in the modified Library refers to a function or a
table of data to be supplied by an application program that uses
the facility, other than as an argument passed when the facility
is invoked, then you must make a good faith effort to ensure that,
in the event an application does not supply such function or
table, the facility still operates, and performs whatever part of
its purpose remains meaningful.

(For example, a function in a library to compute square roots has
a purpose that is entirely well-defined independent of the
application. Therefore, Subsection 2d requires that any
application-supplied function or table used by this function must
be optional: if the application does not supply it, the square
root function must still compute square roots.)
@end enumerate

These requirements apply to the modified work as a whole. If
identifiable sections
 of that work are not derived from the Library,
and can be reasonably considered independent and separate works in
themselves, then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based
on the Library, the distribution of the whole must be on the terms of
this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote
it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution of derivative or
collective works based on the Library.

In addition, mere aggregation of another work not based on the Library
with the Library (or with a work based on the Library) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this
 License.

@item
You may opt to apply the terms of the ordinary GNU General Public
License instead of this License to a given copy of the Library. To do
this, you must alter all the notices that refer to this License, so
that they refer to the ordinary GNU General Public License, version 2,
instead of to this License. (If a newer version than version 2 of the
ordinary GNU General Public License has appeared, then you can specify
that version instead if you wish.) Do not make any other change in
these notices.

Once this change is made in a given copy, it is irreversible for
that copy, so the ordinary GNU General Public License applies to all
subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of
the Library into a program that is not a library.

@item
You may copy and distribute the Library (or a portion or
derivative of it, under Section 2) in object code or executable form
under the terms of Sections 1 and
2 above provided that you accompany
it with the complete corresponding machine-readable source code, which
must be distributed under the terms of Sections 1 and 2 above on a
medium customarily used for software interchange.

If distribution of object code is made by offering access to copy
from a designated place, then offering equivalent access to copy the
source code from the same place satisfies the requirement to
distribute the source code, even though third parties are not
compelled to copy the source along with the object code.

@item
A program that contains no derivative of any portion of the
Library, but is designed to work with the Library by being compiled or
linked with it, is called a ``work that uses the Library''. Such a
work, in isolation, is not a derivative work of the Library, and
therefore falls outside the scope of this License.

However, linking a ``work that uses the Library'' with the Library
creates an executable that is a derivative of the Library (because
it
contains portions of the Library), rather than a ``work that uses the
library''. The executable is therefore covered by this License.
Section 6 states terms for distribution of such executables.

When a ``work that uses the Library'' uses material from a header file
that is part of the Library, the object code for the work may be a

derivative work of the Library even though the source code is not.
Whether this is true is especially significant if the work can be
linked without the Library, or if the work is itself a library. The
threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data
structure layouts and accessors, and small macros and small inline
functions (ten lines or less in length), then the use of the object
file is unrestricted, regardless of whether it is legally a derivative
work. (Executables containing this object code plus portions of the
Library will still fall under Section 6.)

Otherwise,
if the work is a derivative of the Library, you may
distribute the object code for the work under the terms of Section 6.
Any executables containing that work also fall under Section 6,
whether or not they are linked directly with the Library itself.

@item
As an exception to the Sections above, you may also combine or
link a ``work that uses the Library'' with the Library to produce a
work containing portions of the Library, and distribute that work
under terms of your choice, provided that the terms permit
modification of the work for the customer's own use and reverse
engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the
Library is used in it and that the Library and its use are covered by
this License. You must supply a copy of this License. If the work
during execution displays copyright notices, you must include the
copyright notice for the Library among them, as well as a reference
directing the user to the copy of
this License. Also, you must do one
of these things:

@enumerate a
@item
Accompany the work with the complete corresponding
machine-readable source code for the Library including whatever
changes were used in the work (which must be distributed under
Sections 1 and 2 above); and, if the work is an executable linked
with the Library, with the complete machine-readable ``work that
uses the Library'', as object code and/or source code, so that the
user can modify the Library and then relink to produce a modified
executable containing the modified Library. (It is understood
that the user who changes the contents of definitions files in the
Library will not necessarily be able to recompile the application
to use the modified definitions.)

@item
Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable,
and (2) will operate
properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

@item
Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

@item
If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

@item
Verify that the user has already received a copy of these materials or that you have already sent this user a copy.
@end enumerate

For an executable, the required form of the ``work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that
is
normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

@item
You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on

the Library and of the other library facilities is otherwise
permitted, and provided that you do these two things:

@enumerate a
@item
Accompany the combined library with a copy of the same work
based on the Library,
 uncombined with any other library
facilities. This must be distributed under the terms of the
Sections above.

@item
Give prominent notice with the combined library of the fact
that part of it is a work based on the Library, and explaining
where to find the accompanying uncombined form of the same work.
@end enumerate

@item
You may not copy, modify, sublicense, link with, or distribute
the Library except as expressly provided under this License. Any
attempt otherwise to copy, modify, sublicense, link with, or
distribute the Library is void, and will automatically terminate your
rights under this License. However, parties who have received copies,
or rights, from you under this License will not have their licenses
terminated so long as such parties remain in full compliance.

@item
You are not required to accept this License, since you have not
signed it. However, nothing else grants you permission to modify or
distribute the Library or its derivative works. These actions are
prohibited
 by law if you do not accept this License. Therefore, by
modifying or distributing the Library (or any work based on the
Library), you indicate your acceptance of this License to do so, and
all its terms and conditions for copying, distributing or modifying
the Library or works based on it.

@item
Each time you redistribute the Library (or any work based on the
Library), the recipient automatically receives a license from the
original licensor to copy, distribute, link with or modify the Library
subject to these terms and conditions. You may not impose any further
restrictions on the recipients' exercise of the rights granted herein.
You are not responsible for enforcing compliance by third parties with
this License.

@item
If, as a consequence of a court judgment or allegation of patent

infringement or for any other reason (not limited to patent issues),
conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of this License,
 they do not
excuse you from the conditions of this License. If you cannot
distribute so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you
may not distribute the Library at all. For example, if a patent
license would not permit royalty-free redistribution of the Library by
all those who receive copies directly or indirectly through you, then
the only way you could satisfy both it and this License would be to
refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any
particular circumstance, the balance of the section is intended to apply,
and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any
patents or other property right claims or to contest validity of any
such claims; this section has the sole purpose of protecting the
integrity of the free software
 distribution system which is
implemented by public license practices. Many people have made
generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

@item
If the distribution and/or use of the Library is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Library under this License may add
an explicit geographical distribution limitation excluding those countries,
so that distribution is permitted only in or among countries not thus
excluded. In such case, this License incorporates the limitation as if
written in the body of this License.

@item
The Free Software Foundation
 may publish revised and/or new
versions of the Lesser General Public License from time to time.
Such new versions will be similar in spirit to the present version,
but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and ``any later version'', you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

@item
If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

@center @b{NO WARRANTY}

@item
BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY ``AS IS'' WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

@item
IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.
@end enumerate

@subheading END OF TERMS AND CONDITIONS

@page
@subheading How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source
file to most effectively
convey the exclusion of warranty; and each file should have at least the ``copyright'' line and a pointer to where the full notice is found.

@smallexample
@var{one line to give the library's name and an idea of what it does.}
Copyright (C) @var{year} @var{name of author}

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301, USA.
@end
smallexample

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a ``copyright disclaimer'' for the library, if necessary. Here is a sample; alter the names:

@smallexample
Yoyodyne, Inc., hereby disclaims all copyright interest in the library `Frob' (a library for tweaking knobs) written by James Random Hacker.

@var{signature of Ty Coon}, 1 April 1990
Ty Coon, President of Vice

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price.
Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it

if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in

themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component

itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals

of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE,
THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR
THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU
General Public License as published by
the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along
with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this
is what you want to do, use the GNU Lesser General
Public License instead of this License.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies

of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that

there is no warranty for the free library. Also, if the library is
modified by someone else and passed on, the recipients should know
that what they have is not the original version, so that the original
author's reputation will not be affected by problems that might be
introduced by others.

Finally, software
patents pose a constant threat to the existence of
any free program. We wish to make sure that a company cannot
effectively restrict the users of a free program by obtaining a
restrictive license from a patent holder. Therefore, we insist that
any patent license obtained for a version of the library must be
consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the
ordinary GNU General Public License. This license, the GNU Lesser
General Public License, applies to certain designated libraries, and
is quite different from the ordinary General Public License. We use
this license for certain libraries in order to permit linking those
libraries into non-free programs.

When a program is linked with a library, whether statically or using
a shared library, the combination of the two is legally speaking a
combined work, a derivative of the original library. The ordinary
General Public License therefore permits
such linking only if the
entire combination fits its criteria of freedom. The Lesser General
Public License permits more lax criteria for linking other code with
the library.

We call this license the "Lesser" General Public License because it
does Less to protect the user's freedom than the ordinary General
Public License. It also provides other free software developers Less
of an advantage over competing non-free programs. These disadvantages
are the reason we use the ordinary General Public License for many
libraries. However, the Lesser license provides advantages in certain
special circumstances.

For example, on rare occasions, there may be a special need to
encourage the widest possible use of a certain library, so that it becomes
a de-facto standard. To achieve this, non-free programs must be
allowed to use the library. A more frequent case is that a free
library does the same job as widely used non-free libraries. In this
case, there is little to gain by limiting
the free library to free
software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free

programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order
to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into
another language. (Hereinafter, translation is
included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of

running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be
reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary
GNU General Public
License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding
machine-readable source code, which
must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy

from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work

during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with

this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse
you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system
which is
implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish
revised and/or new
versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision
will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. 16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE,
BE LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest

possible use to the public, we recommend making it free software that
everyone can redistribute and change. You can do so by permitting
redistribution under these terms (or, alternatively, under the terms of the
ordinary General Public License).

 To apply these terms, attach the following notices to the library. It is
safest to attach them to the start of each source file to most effectively
convey
 the exclusion of warranty; and each file should have at least the
"copyright" line and a pointer to where the full notice is found.

  <one line to give the library's name and a brief idea of what it does.>
  Copyright (C) <year> <name of author>

  This library is free software; you can redistribute it and/or
  modify it under the terms of the GNU Lesser General Public
  License as published by the Free Software Foundation; either
  version 2.1 of the License, or (at your option) any later version.

  This library is distributed in the hope that it will be useful,
  but WITHOUT ANY WARRANTY; without even the implied warranty of
  MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
  Lesser General Public License for more details.

  You should have received a copy of the GNU Lesser General Public
  License along with this library; if not, write to the Free Software
  Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301
 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the library, if
necessary. Here is a sample; alter the names:

 Yoyodyne, Inc., hereby disclaims all copyright interest in the
 library `Frob' (a library for tweaking knobs) written by James Random Hacker.

 <signature of Ty Coon>, 1 April 1990
 Ty Coon, President of Vice

That's all there is to it!
UNICODE, INC. LICENSE AGREEMENT - DATA FILES AND SOFTWARE

  Unicode Data Files include all data files under the directories
http://www.unicode.org/Public/, http://www.unicode.org/reports/, and
http://www.unicode.org/cldr/data/. Unicode Data Files do not include PDF
online code charts under the directory http://www.unicode.org/Public/.

Software includes any source code published in the Unicode Standard or under

This software is not subject to any license of the American Telephone
and Telegraph Company or of the Regents of the University of California.

Permission is granted to anyone to use this software for any purpose on
any computer system, and to alter it and redistribute it, subject
to the following restrictions:

1. The author is not responsible for the consequences of use of this
  software, no matter how awful, even if they arise from flaws in it.

2. The origin of this software must not be misrepresented, either by
  explicit claim or by omission. Since few users ever read sources,
  credits must appear in the documentation.

3. Altered versions must be plainly marked as such, and must not be
  misrepresented as being the original software. Since few users
  ever read sources, credits must appear in the documentation.

4. This notice may not be removed or altered.

The file posix/PCRE.tests
is copyright University of Cambridge:

Copyright (c) 1997-2003 University of Cambridge

Permission is granted to anyone to use this software for any purpose on any computer system, and to redistribute it freely, subject to the following restrictions:

1. This software is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE.

2. The origin of this software must not be misrepresented, either by explicit claim or by omission. In practice, this means that if you use PCRE in software that you distribute to others, commercially or otherwise, you must put a sentence like this

Regular expression support is provided by the PCRE library package, which is open source software, written by Philip Hazel, and copyright by the University of Cambridge, England.

somewhere reasonably visible in your documentation and in any relevant files or online
help data or similar. A reference to the ftp site for the source, that is, to

ftp://ftp.csx.cam.ac.uk/pub/software/programming/pcre/

should also be given in the documentation. However, this condition is not intended to apply to whole chains of software. If package A includes PCRE, it must acknowledge it, but if package B is software that includes package A, the condition is not imposed on package B (unless it uses PCRE independently).

3. Altered versions must be plainly marked as such, and must not be misrepresented as being the original software.

4. If PCRE is embedded in any software that is released under the GNU General Purpose Licence (GPL), or Lesser General Purpose Licence (LGPL), then the terms of that licence shall supersede any condition above with which it is incompatible.

1.197 libdbi-perl 1.643

1.197.1 Available under license :

DBI is Copyright (c) 1994-2015 by Tim Bunce and others.
See LICENSE included with this distribution. All rights reserved.

This is free software; you can redistribute it and/or modify it under the
same terms as the Perl5 (v5.0.0 ~ v5.20.0) programming language system
itself: under the terms of either:

a) the "Artistic License 1.0" as published by The Perl Foundation
http://www.perlfoundation.org/artistic_license_1_0

b) the GNU General Public License as published by the Free Software Foundation;
either version 1 http://www.gnu.org/licenses/gpl-1.0.html
or (at your option) any later version

PLEASE NOTE: It is the current maintainers intention to keep the dual
licensing intact. Until this notice is removed, releases will continue to
be available under both the standard GPL and the less restrictive Artistic
licenses.

Verbatim copies of both licenses are included below:

--- The Artistic License 1.0 ---

The "Artistic License"

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

"Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.

"Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder as specified below.

"Copyright Holder" is whoever is named in the copyright or copyrights for the package.

"You" is you, if you're thinking about copying or distributing this Package.

"Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)

"Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as uunet.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

b) accompany the distribution with the machine-readable source of the Package with your modifications.

c) give non-standard executables non-standard names, and clearly document the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other

(possibly
commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own. You may embed this Package's interpreter within an executable of yours (by linking); this shall be construed as a mere form of aggregation, provided that the complete Standard Version of the interpreter is so embedded.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whoever generated them, and may be sold commercially, and may be aggregated with this Package. If such scripts or library files are aggregated with this Package via the so-called "undump" or "unexec" methods of producing a binary executable image, then distribution of such an image shall neither be construed as a distribution of this Package nor shall it fall under the restrictions of Paragraphs 3 and 4, provided that
you do
not represent such an executable image as a Standard Version of this Package.

7. C subroutines (or comparably compiled subroutines in other languages) supplied by you and linked into this Package in order to emulate subroutines and variables of the language defined by this Package shall not be considered part of this Package, but are the equivalent of input as in Paragraph 6, provided these subroutines do not change the language in any way that would cause it to fail the regression tests for the language.

8. Aggregation of this Package with a commercial distribution is always permitted provided that the use of this Package is embedded; that is, when no overt attempt is made to make this Package's interfaces visible to the end user of the commercial distribution. Such use shall not be construed as a distribution of this Package.

9. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

10.
THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTIBILITY AND FITNESS FOR A PARTICULAR PURPOSE.

--- end of The Artistic License 1.0 ---

--- The GNU General Public License, Version 1, February 1989 ---

GNU GENERAL PUBLIC LICENSE
Version 1, February 1989

Copyright (C) 1989 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The license agreements of most software companies try to keep users at the mercy of those companies. By contrast, our General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. The General Public License applies to the Free Software Foundation's software and to any other program whose authors commit to using it. You can use it for your programs, too.

When we speak of free software, we are referring to freedom, not price. Specifically, the General Public License is designed to make sure that you have the freedom to give away or sell copies of free software, that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of a such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so

that any problems introduced by others will not reflect on the original authors' reputations.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any work containing the Program or a portion of it, either verbatim or with modifications. Each licensee is addressed as "you".

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this General Public License and to the absence of any warranty; and give any other recipients of the Program a copy of this General Public License along with the Program. You may charge a fee for the physical act of transferring a copy.

2. You may modify your copy or copies of the Program or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

b) cause the whole of any work that you distribute or publish, that in whole or in part contains the Program or any part thereof, either with or without modifications, to be licensed at no charge to all third parties under the terms of this General Public License (except that you may choose to grant warranty protection to some or all third parties, at your option).

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the simplest and most usual way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these

conditions, and telling the user how to view a copy of this General
Public License.

d) You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

Mere aggregation of another independent work with the Program (or its derivative) on a volume of a storage or distribution medium does not bring the other work under the scope of these terms.

3. You may copy and distribute the Program (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal charge for the cost of distribution) a complete machine-readable copy of the corresponding
source code, to be distributed under the terms of
Paragraphs 1 and 2 above; or,

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

Source code for a work means the preferred form of the work for making modifications to it. For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs, or for standard header files or definitions files that accompany that operating system.

4. You may not copy, modify, sublicense, distribute or transfer the Program except as expressly provided under this General Public License. Any attempt otherwise to copy, modify, sublicense,
distribute or transfer
the Program is void, and will automatically terminate your rights to use the Program under this License. However, parties who have received copies, or rights to use copies, from you under this General Public License will not have their licenses terminated so long as such parties

remain in full compliance.

5. By copying, distributing or modifying the Program (or any work based on the Program) you indicate your acceptance of this license to do so, and all its terms and conditions.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

7. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of the license which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the license, you may choose any version ever published by the Free Software Foundation.

8. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting
the sharing and reuse of software generally.

NO WARRANTY

9. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

10. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING

WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to humanity, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 1, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) 19xx name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (a program to direct compilers to make passes at assemblers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

That's all there is to it!

--- end of The GNU General Public License, Version 1, February 1989 ---

1.198.1 Available under license :

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the

GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of

software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If

the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered
by this License only if the output, given its
content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately

publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any
non-permissive terms added in accord with section 7 apply to the code;
keep intact all notices of the absence of any warranty; and give all
recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey,
and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to
produce it from the Program, in the form of source code under the
terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified
it, and giving a relevant date.

b) The work must carry prominent notices stating that it is
released under this License and any conditions added under section
7. This requirement modifies the requirement in section
4 to
"keep intact all notices".

c) You must license the entire work, as a whole, under this
License to anyone who comes into possession of a copy. This
License will therefore apply, along with any applicable section 7
additional terms, to the whole of the work, and all its parts,
regardless of how they are packaged. This License gives no
permission to license the work in any other way, but it does not
invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display
Appropriate Legal Notices; however, if the Program has interactive
interfaces that do not display Appropriate Legal Notices, your
work need not make them do so.

A compilation of a covered work with other separate and independent
works, which are not by their nature extensions of the covered work,
and which are not combined with it such as to form a larger program,
in or on a volume of a storage or distribution
medium, is called an
"aggregate" if the compilation and its resulting copyright are not
used to limit the access or legal rights of the compilation's users
beyond what the individual works permit. Inclusion of a covered work
in an aggregate does not cause this License to apply to the other
parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no

charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright

holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered

work, then the patent license
you grant is automatically extended to all recipients of the covered
work and works based on it.

A patent license is "discriminatory" if it does not include within
the scope of its coverage, prohibits the exercise of, or is
conditioned on the non-exercise of one or more of the rights that are
specifically granted under this License. You may not convey a covered
work if you are a party to an arrangement with a third party that is
in the business of distributing software, under which you make payment
to the third party based on the extent of your activity of conveying
the work, and under which the third party grants, to any of the
parties who would receive the covered work from you, a discriminatory
patent license (a) in connection with copies of the covered work
conveyed by you (or copies made from those copies), or (b) primarily
for and in connection with specific products or compilations that
contain the covered work, unless you entered into that arrangement,
or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting
any implied license or other defenses to infringement that may
otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of this License, they do not
excuse you from the conditions of this License. If you cannot convey a
covered work so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you may
not convey it at all. For example, if you agree to terms that obligate you
to collect a royalty for further conveying from those to whom you convey
the Program, the only way you could satisfy both those terms and this
License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have
permission to link or combine any covered work with a work licensed
under version 3 of the GNU Affero General Public License into a single
combined work, and to convey the resulting work. The terms of this
License will continue to apply to the part which is the covered work,
but the special requirements of the GNU Affero General Public License,
section 13, concerning interaction through a network will apply to the
combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF

SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
them if you wish), that you receive source code or can get it if you
want it, that you can change the software or use pieces of it in new
free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you
these rights or asking you to surrender the rights. Therefore, you have
certain responsibilities if you distribute copies of the software, or if
you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must pass on to the recipients the same
freedoms that you received. You must make sure that they, too, receive
or can get the source code. And you must show them these terms so they
know their rights.

Developers that use the GNU GPL protect your rights with two steps:
(1)
assert copyright on the software, and (2) offer you this License
giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees"
and
"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based

on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable

work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally
available free
programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered
by this License only if the output, given its
content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no

permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord

with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in
the same way through the same place at no
further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization
keys, or other information required to install
and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in
ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the
entire Program shall
be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or
limiting liability differently from the
terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or
author attributions in that material or in the Appropriate Legal
Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or
requiring that modified versions of such material be marked in
reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or
authors of the material; or

e) Declining to grant rights under trademark law for use of some
trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that
material by anyone who conveys the material (or modified versions of
it) with contractual assumptions of liability to the recipient, for
any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further
restrictions" within the meaning of section 10. If the Program as you
received it, or any part of it, contains a notice stating that it is
governed by this License along with a term that is a further
restriction, you may remove that term. If a license document contains
a further restriction but permits relicensing or conveying under this
License, you may add to a covered work material governed by the terms
of that license document, provided that the further restriction does
not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you
must place, in the relevant source files, a statement of the
additional terms that apply to those files, or a notice indicating
where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the
form of a separately written license, or stated as exceptions;
the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an

organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For
purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone

to copy, free of charge and under the terms of this
License, through a
publicly available network server or other readily accessible means,
then you must either (1) cause the Corresponding Source to be so
available, or (2) arrange to deprive yourself of the benefit of the
patent license for this particular work, or (3) arrange, in a manner
consistent with the requirements of this License, to extend the patent
license to downstream recipients. "Knowingly relying" means you have
actual knowledge that, but for the patent license, your conveying the
covered work in a country, or your recipient's use of the covered work
in a country, would infringe one or more identifiable patents in that
country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or
arrangement, you convey, or propagate by procuring conveyance of, a
covered work, and grant a patent license to some of the parties
receiving the covered work authorizing them to use, propagate, modify
or convey a specific copy of the covered
work, then the patent license
you grant is automatically extended to all recipients of the covered
work and works based on it.

A patent license is "discriminatory" if it does not include within
the scope of its coverage, prohibits the exercise of, or is
conditioned on the non-exercise of one or more of the rights that are
specifically granted under this License. You may not convey a covered
work if you are a party to an arrangement with a third party that is
in the business of distributing software, under which you make payment
to the third party based on the extent of your activity of conveying
the work, and under which the third party grants, to any of the
parties who would receive the covered work from you, a discriminatory
patent license (a) in connection with copies of the covered work
conveyed by you (or copies made from those copies), or (b) primarily
for and in connection with specific products or compilations that
contain the covered work, unless you entered into that arrangement,
or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting
any implied license or other defenses to infringement that may
otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of this License, they do not
excuse you from the conditions of this License. If you cannot convey a
covered work so as to satisfy simultaneously your obligations under this

License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT

HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS"
WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided
above cannot be given local legal effect according to their terms,
reviewing courts shall apply local law that most closely approximates
an absolute waiver of all civil liability in connection with the
Program, unless a warranty or assumption of liability accompanies a
copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
state the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where
the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify

it under the terms of the GNU General Public License as published by
the Free Software Foundation, either version 3 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.
Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which
gives you legal permission to copy,
distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of

Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or

distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to

be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,

INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR
THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU
General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute

it
  under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

 Yoyodyne, Inc., hereby disclaims all copyright interest in the program
 `Gnomovision' (which makes passes at compilers) written by James Hacker.

 <signature of Ty Coon>, 1 April 1989
 Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this
 is what you want to do, use the GNU Lesser General
Public License instead of this License.
     GNU GENERAL PUBLIC LICENSE
       Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
   59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

      Preamble

 The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

 When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed
 to make sure that you
have the freedom to distribute copies of free software (and charge for

this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that
you have. You must make sure that they, too, receive or can get the
source code. And you must show them these terms so they know their
rights.

We protect your rights with two steps: (1) copyright the software, and
(2) offer you this license which gives you legal permission to copy,
distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain
that everyone understands that there is no warranty for this free
software. If the software is modified by someone else and passed on, we
want its recipients to know that what they have is not the original, so
that any problems introduced by others will not reflect on the original
authors' reputations.

Finally, any free program is threatened constantly by software
patents. We wish to avoid the danger that redistributors of a free
program will individually obtain patent licenses, in effect making the
program proprietary. To prevent this, we have made it clear that any
patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and
modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which
contains
a notice placed by the copyright holder saying it may be distributed
under the terms of this General Public License. The "Program", below,
refers to any such program or work, and a "work based on the Program"
means either the Program or any derivative work under copyright law:
that is to say, a work containing the Program or a portion of it,
either verbatim or with modifications and/or translated into another
language. (Hereinafter, translation is included without limitation in

the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies
of the Program's
source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole
or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program,

and can be reasonably considered
independent and separate works in
themselves, then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based
on the Program, the distribution of the whole must be on the terms of
this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution of derivative or
collective works based on the Program.

In addition, mere aggregation of another work not based on the Program
with the Program (or with a work based on the Program) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may copy and distribute the Program (or a work based
on it,
under Section 2) in object code or executable form under the terms of
Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable
source code, which must be distributed under the terms of Sections
1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three
years, to give any third party, for a charge no more than your
cost of physically performing source distribution, a complete
machine-readable copy of the corresponding source code, to be
distributed under the terms of Sections 1 and 2 above on a medium
customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer
to distribute corresponding source code. (This alternative is
allowed only for noncommercial distribution and only if you
received the program in object code or
executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for
making modifications to it. For an executable work, complete source
code means all the source code for all modules it contains, plus any
associated interface definition files, plus the scripts used to
control compilation and installation of the executable. However, as a
special exception, the source code distributed need not include

anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the
source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each
time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution

of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through
any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

Each version is given a distinguishing version number. If the Program specifies a version number
of this License which applies to it and "any
later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free

programs whose distribution conditions are different, write to the author
to ask for permission. For software which is copyrighted by the Free
Software Foundation, write to the Free Software Foundation; we sometimes
make exceptions for this. Our decision will be guided by the two goals
of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING
OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED
TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY
YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER
PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
convey the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify

it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and
`show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

1.201 python3-cython 0.29.28

1.201.1 Available under license :

The original Pyrex code as of 2006-04 is licensed under the following
license: "Copyright stuff: Pyrex is free of restrictions. You may use,
redistribute, modify and distribute modified versions."

Cython, which derives from Pyrex, is licensed under the Apache 2.0
Software License. More precisely, all modifications and new code
made to go from Pyrex to Cython are so licensed.

See LICENSE.txt for more details.

The output of a Cython compilation is NOT considered a derivative
work of Cython. Specifically, though the compilation process may
embed snippets of varying lengths into the final output, these
snippets, as embedded in the output, do not encumber the resulting
output with any license restrictions.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License,
each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and

do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all

other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

GNU LESSER GENERAL PUBLIC LICENSE

Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library,

whether gratis
or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software
patents pose a constant threat to the existence of
any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits
such linking only if the
entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many

libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a

portion of it, either verbatim or with modifications and/or translated straightforwardly into
another language. (Hereinafter, translation is
included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium,
provided that
you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the
terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses

the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be
reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary
GNU General Public
License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the

object code for the work under the terms of Section 6.
Any executables containing that work also fall under Section 6,
whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or
link a "work that uses the Library" with the Library to produce a
work containing portions of the Library, and distribute that work
under terms of your choice, provided that the terms permit
modification of the work for the customer's own use and reverse
engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the
Library is used in it and that the Library and its use are covered by
this License. You must supply a copy of this License. If the work
during execution displays copyright notices, you must include the
copyright notice for the Library among them, as well as a reference
directing the user to the copy of this License. Also, you must do one
of these things:

a) Accompany
the work with the complete corresponding
machine-readable source code for the Library including whatever
changes were used in the work (which must be distributed under
Sections 1 and 2 above); and, if the work is an executable linked
with the Library, with the complete machine-readable "work that
uses the Library", as object code and/or source code, so that the
user can modify the Library and then relink to produce a modified
executable containing the modified Library. (It is understood
that the user who changes the contents of definitions files in the
Library will not necessarily be able to recompile the application
to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the
Library. A suitable mechanism is one that (1) uses at run time a
copy of the library already present on the user's computer system,
rather than copying library functions into the executable, and (2)
will operate
properly with a modified version of the library, if
the user installs one, as long as the modified version is
interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at
least three years, to give the same user the materials
specified in Subsection 6a, above, for a charge no more
than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy
from a designated place, offer equivalent access to copy the above

specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally
distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any
other library
facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or

distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Library under this License may add
an explicit geographical distribution limitation excluding those countries,
so that distribution is permitted only in or among countries not thus
excluded. In such case, this License incorporates the limitation as if
written in the body of this License.

13. The Free Software Foundation may publish
revised and/or new
versions of the Lesser General Public License from time to time.
Such new versions will be similar in spirit to the present version,
but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library
specifies a version number of this License which applies to it and
"any later version", you have the option of following the terms and
conditions either of that version or of any later version published by
the Free Software Foundation. If the Library does not specify a
license version number, you may choose any version ever published by
the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free
programs whose distribution conditions are incompatible with these,
write to the author to ask for permission. For software which is
copyrighted by the Free Software Foundation, write to the Free
Software Foundation; we sometimes make exceptions for this. Our
decision
will be guided by the two goals of preserving the free status
of all derivatives of our free software and of promoting the sharing
and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO
WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR
OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY
KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE
IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE
LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME
THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN
WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY
AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE,

BE LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey
the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price.
Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that
you have. You must make sure that they, too, receive or can get the
source code. And you must show them these terms so they know their
rights.

We protect your rights with two steps: (1) copyright the software, and

(2) offer you this license which
gives you legal permission to copy,
distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain
that everyone understands that there is no warranty for this free
software. If the software is modified by someone else and passed on, we
want its recipients to know that what they have is not the original, so
that any problems introduced by others will not reflect on the original
authors' reputations.

Finally, any free program is threatened constantly by software
patents. We wish to avoid the danger that redistributors of a free
program will individually obtain patent licenses, in effect making the
program proprietary. To prevent this, we have made it clear that any
patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and
modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains
a notice placed by the copyright holder saying it may be distributed
under the terms of this General Public License. The "Program", below,
refers to any such program or work, and a "work based on the Program"
means either the Program or any derivative work under copyright law:
that is to say, a work containing the Program or a portion of it,
either verbatim or with modifications and/or translated into another
language. (Hereinafter, translation is included without limitation in
the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not
covered by this License; they are outside its scope. The act of
running the Program is not restricted, and the output from the Program
is covered only if its contents constitute a work based on the
Program (independent of having been made by running the Program).
Whether that is true depends on what the
Program does.

1. You may copy and distribute verbatim copies of the Program's
source code as you receive it, in any medium, provided that you
conspicuously and appropriately publish on each copy an appropriate
copyright notice and disclaimer of warranty; keep intact all the
notices that refer to this License and to the absence of any warranty;
and give any other recipients of the Program a copy of this License
along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under

the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such

parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to

decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing
version number. If the Program
specifies a version number of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free
programs whose distribution conditions are different, write to the author
to ask for permission. For software which is copyrighted by the Free
Software Foundation, write to the Free Software Foundation; we sometimes
make exceptions for this. Our decision will be guided by the two goals
of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE,
THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE
PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,

REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR
THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU
General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this
is what you want to do, use the GNU Lesser General
Public License instead of this License.
Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the above copyright notice, this list of conditions and the following disclaimer.

2. Redistributions in binary form must reproduce the above copyright notice, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT HOLDER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS;
OR BUSINESS INTERRUPTION) HOWEVER
CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE

OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
This file will record any exceptions in DPDK Project with respect to DPDK
IP License policy as defined in DPDK Charter available at:

https://www.dpdk.org/charter/

Note that following licenses are not exceptions:-
- BSD-3-Clause
- BSD-3-Clause OR GPL-2.0
- BSD-3-Clause OR LGPL-2.1
- GPL-2.0 (*Only for kernel code*)

This program is free software; you can redistribute it and/or
modify it under the terms of the GNU General Public License as
published by the Free Software Foundation; either version 3 of the
License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but
is provided AS IS, WITHOUT ANY WARRANTY; without even the implied
warranty of MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, and
NON-INFRINGEMENT. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 59 Temple Place - Suite 330, Boston,
MA 02111-1307, USA.

In addition, as a special exception, the copyright holders give
permission to link the code of portions of this program with the
OpenSSL library
 under certain conditions as described in each
individual source file, and distribute linked combinations including
the two.

You must obey the GNU General Public License in all respects for all
of the code used other than OpenSSL. If you modify file(s) with this
exception, you may extend this exception to your version of the
file(s), but you are not obligated to do so. If you do not wish to do
so, delete this exception statement from your version. If you delete
this exception statement from all source files in the program, then
also delete it here.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
 freedom, not
price. Our General Public Licenses are designed to make sure that you

have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1)
assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source

form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered

by this License only if the output, given its
content, constitutes a covered work. This License acknowledges your
rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not
convey, without conditions so long as your license otherwise remains
in force. You may convey covered works to others for the sole purpose
of having them make modifications exclusively for you, or provide you
with facilities for running those works, provided that you comply with
the terms of this License in conveying all material for which you do
not control copyright. Those thus making or running the covered works
for you must do so exclusively on your behalf, under your direction
and control, on terms that prohibit them from making any copies of
your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under
the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological
measure under any applicable law fulfilling obligations under article
11 of the WIPO copyright treaty adopted on 20 December 1996, or
similar laws prohibiting or restricting circumvention of such
measures.

When you convey a covered work, you waive any legal power to forbid
circumvention of technological measures to the extent such circumvention
is effected by exercising rights under this License with respect to
the covered work, and you disclaim any intention to limit operation or
modification of the work as a means of enforcing, against the work's
users, your or third parties' legal rights to forbid circumvention of
technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you
receive it, in any medium, provided that you conspicuously and
appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any
non-permissive terms added in accord with section 7 apply to the code;
keep intact all notices of the absence of any warranty; and give all
recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey,

and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization
keys, or other information required to install
and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in
ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted

by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered

work if you are a party to an arrangement with a third party that is
in the business of distributing software, under which you make payment
to the third party based on the extent of your activity of conveying
the work, and under which the third party grants, to any of the
parties who would receive the covered work from you, a discriminatory
patent license (a) in connection with copies of the covered work
conveyed by you (or copies made from those copies), or (b) primarily
for and in connection with specific products or compilations that
contain the covered work, unless you entered into that arrangement,
or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting
any implied license or other defenses to infringement that may
otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of this License, they do not
excuse you from the conditions of this License. If you cannot convey a
covered work so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you may
not convey it at all. For example, if you agree to terms that obligate you
to collect a royalty for further conveying from those to whom you convey
the Program, the only way you could satisfy both those terms and this
License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have
permission to link or combine any covered work with a work licensed
under version 3 of the GNU Affero General Public License into a single
combined work, and to convey the resulting work. The terms of this
License will continue to apply to the part which is the covered work,
but the special requirements of the GNU Affero General Public License,
section 13, concerning interaction through a network will apply to the
combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of
the GNU General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing version number. If the
Program specifies that a certain numbered version of the GNU General

Public License "or any later version" applies to it, you have the
option of following the terms and conditions either of that numbered
version or of any later version published by the Free Software
Foundation. If the Program does not specify a version number of the
GNU General Public License, you may choose any version ever published
by the Free Software Foundation.

If the Program specifies that a proxy can decide which future
versions of the GNU General Public License can be used, that proxy's
public statement of acceptance of a version permanently authorizes you
to choose that version for the Program.

Later license versions may give you additional or different
permissions. However, no additional obligations are imposed on any
author or copyright holder as a result of your choosing to follow a
later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY
APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT
HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided
above cannot be given local legal effect according to their terms,
reviewing courts shall apply local law that most closely approximates

an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

1.205 automake 1.16.5

1.205.1 Available under license :

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which
contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies
of the Program's
source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the

notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole
or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered
independent and separate works in
themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it,
under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or
executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the
source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt

otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made

generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to decide if he or she is willing
to distribute software through
any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing version number. If the Program
specifies a version number
of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free
programs whose distribution conditions are different, write to the author
to ask for permission. For software which is copyrighted by the Free
Software Foundation, write to the Free Software Foundation; we sometimes
make exceptions for this. Our decision will be guided by the two goals
of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF

MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

  Gnomovision version 69, Copyright (C) year name of author
  Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
  This is free software, and you are welcome to redistribute it
  under certain conditions; type `show c' for details.

The hypothetical commands `show w'
 and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

 Yoyodyne, Inc., hereby disclaims all copyright interest in the program
 `Gnomovision' (which makes passes at compilers) written by James Hacker.

 <signature of Ty Coon>, 1 April 1989
 Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Lesser General
Public License instead of this License.
                GNU GENERAL PUBLIC LICENSE
                 Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

                      Preamble

 The GNU General Public License is a free, copyleft license for
software and other kinds of works.

 The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to

any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to

avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a

menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is
covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any

non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided,

in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of

it) with contractual assumptions of liability to the recipient, for
any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further
restrictions" within the meaning of section 10. If the Program as you
received it, or any part of it, contains a notice stating that it is
governed by this License along with a term that is a further
restriction, you may remove that term. If a license document contains
a further restriction but permits relicensing or conveying under this
License, you may add to a covered work material governed by the terms
of that license document, provided that the further restriction does
not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you
must place, in the relevant source files, a statement of the
additional terms that apply to those files, or a notice indicating
where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the
form of a separately written license, or stated as exceptions;
the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly
provided under this License. Any attempt otherwise to propagate or
modify it is void, and will automatically terminate your rights under
this License (including any patent licenses granted under the third
paragraph of section 11).

However, if you cease all violation of this License, then your
license from a particular copyright holder is reinstated (a)
provisionally, unless and until the copyright holder explicitly and
finally terminates your license, and (b) permanently, if the copyright
holder fails to notify you of the violation by some reasonable means
prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is
reinstated permanently if the copyright holder notifies you of the
violation by some reasonable means, this is the first time you have
received notice of violation of this License (for any work) from that
copyright
holder, and you cure the violation prior to 30 days after
your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will

be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.

Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

 You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<https://www.gnu.org/licenses/>.

 The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want
 to do, use the GNU Lesser General
Public License instead of this License. But first, please read
<https://www.gnu.org/licenses/why-not-lgpl.html>.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not

price.
Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that
you have. You must make sure that they, too, receive or can get the
source code. And you must show them these terms so they know their
rights.

We protect your rights with two steps: (1) copyright the software, and
(2) offer you this license which
gives you legal permission to copy,
distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain
that everyone understands that there is no warranty for this free
software. If the software is modified by someone else and passed on, we
want its recipients to know that what they have is not the original, so
that any problems introduced by others will not reflect on the original
authors' reputations.

Finally, any free program is threatened constantly by software
patents. We wish to avoid the danger that redistributors of a free
program will individually obtain patent licenses, in effect making the
program proprietary. To prevent this, we have made it clear that any
patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and
modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains
a notice placed by the copyright holder saying it may be distributed
under the terms of this General Public License. The "Program", below,
refers to any such program or work, and a "work based on the Program"
means either the Program or any derivative work under copyright law:
that is to say, a work containing the Program or a portion of it,

either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a

special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source
code, even though third parties are not
compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing
or modifying
the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For

example, if a patent
license would not permit royalty-free redistribution of the Program by
all those who receive copies directly or indirectly through you, then
the only way you could satisfy both it and this License would be to
refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under
any particular circumstance, the balance of the section is intended to
apply and the section as a whole is intended to apply in other
circumstances.

It is not the purpose of this section to induce you to infringe any
patents or other property right claims or to contest validity of any
such claims; this section has the sole purpose of protecting the
integrity of the free software distribution system, which is
implemented by public license practices. Many people have made
generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to
decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing
version number. If the Program
specifies a version number of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU
General Public License as published by
the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along
with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute
it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this
is what you want to do, use the GNU Lesser General
Public License instead of this License.

of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Library General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that
you have. You must make sure that they, too, receive or can get the
source code. And you must show them these terms so they know their
rights.

We protect your rights with two steps: (1) copyright the software, and
(2) offer you this license which gives you legal permission to copy,
distribute

and/or modify the software.

Also, for each author's protection and ours, we want to make certain
that everyone understands that there is no warranty for this free
software. If the software is modified by someone else and passed on, we
want its recipients to know that what they have is not the original, so
that any problems introduced by others will not reflect on the original
authors' reputations.

Finally, any free program is threatened constantly by software
patents. We wish to avoid the danger that redistributors of a free
program will individually obtain patent licenses, in effect making the
program proprietary. To prevent this, we have made it clear that any
patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and
modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work
which contains
a notice placed by the copyright holder saying it may be distributed
under the terms of this General Public License. The "Program", below,
refers to any such program or work, and a "work based on the Program"
means either the Program or any derivative work under copyright law:
that is to say, a work containing the Program or a portion of it,
either verbatim or with modifications and/or translated into another
language. (Hereinafter, translation is included without limitation in
the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not
covered by this License; they are outside its scope. The act of
running the Program is not restricted, and the output from the Program
is covered only if its contents constitute a work based on the
Program (independent of having been made by running the Program).
Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim
copies of the Program's
source code as you receive it, in any medium, provided that you
conspicuously and appropriately publish on each copy an appropriate
copyright notice and disclaimer of warranty; keep intact all the
notices that refer to this License and to the absence of any warranty;
and give any other recipients of the Program a copy of this License
along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in

whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably
considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such

parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6.
Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free
redistribution of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through

any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing version number. If the Program
specifies a version
number of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free
programs whose distribution conditions are different, write to the author
to ask for permission. For software which is copyrighted by the Free
Software Foundation, write to the Free Software Foundation; we sometimes
make exceptions for this. Our decision will be guided by the two goals
of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE
LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE
PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,
REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

```
/* nicstar.c  v0.22  Jawaid Bazyar (bazyar@hypermall.com)
* nicstar.c, M. Welsh (matt.welsh@cl.cam.ac.uk)
*
* Hacked October, 1997 by Jawaid Bazyar, Interlink Advertising Services Inc.
*  http://www.hypermall.com/
* 10/1/97 - commented out CFG_PHYIE bit - we don't care when the PHY
* interrupts us (except possibly for removal/insertion of the cable?)
* 10/4/97 - began heavy inline documentation of the code. Corrected typos
* and spelling mistakes.
* 10/5/97 - added code to handle PHY interrupts, disable PHY on
* loss of link, and correctly re-enable PHY when link is
* re-established. (put back CFG_PHYIE)
*
*   Modified to work with the IDT7721 nicstar -- AAL5 (tested) only.
*
* R. D. Rechenmacher <ron@fnal.gov>, Aug. 6, 1997
*
* Linux driver for the IDT77201 NICStAR PCI ATM controller.
* PHY component is expected to be 155 Mbps S/UNI-Lite or IDT 77155;
* see init_nicstar() for PHY initialization to change this. This driver
* expects the Linux ATM stack to support scatter-gather
 lists
* (skb->atm.iovcnt != 0) for Rx skb's passed to vcc->push.
*
* Implementing minimal-copy of received data:
*   IDT always receives data into a small buffer, then large buffers
*     as needed. This means that data must always be copied to create
*     the linear buffer needed by most non-ATM protocol stacks (e.g. IP)
*     Fix is simple: make large buffers large enough to hold entire
*     SDU, and leave <small_buffer_data> bytes empty at the start. Then
*     copy small buffer contents to head of large buffer.
*   Trick is to avoid fragmenting Linux, due to need for a lot of large
*     buffers. This is done by 2 things:
```

```
*       1) skb->destructor / skb->atm.recycle_buffer
*            combined, allow nicstar_free_rx_skb to be called to
*            recycle large data buffers
*       2) skb_clone of received buffers
*   See nicstar_free_rx_skb and linearize_buffer for implementation
*    details.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Library General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.

These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work
which contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the

Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of

this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution of derivative or
collective works based on the Program.

In addition, mere aggregation of another work not based on the Program
with the Program (or with a work based on the Program) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may copy and distribute the Program (or a work
based on it,
under Section 2) in object code or executable form under the terms of
Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable
source code, which must be distributed under the terms of Sections
1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three
years, to give any third party, for a charge no more than your
cost of physically performing source distribution, a complete
machine-readable copy of the corresponding source code, to be
distributed under the terms of Sections 1 and 2 above on a medium
customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer
to distribute corresponding source code. (This alternative is
allowed only for noncommercial distribution and only if you
received the program in object code
or executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for
making modifications to it. For an executable work, complete source
code means all the source code for all modules it contains, plus any
associated interface definition files, plus the scripts used to
control compilation and installation of the executable. However, as a
special exception, the source code distributed need not include
anything that is normally distributed (in either source or binary
form) with the major components (compiler, kernel, and so on) of the
operating system on which the executable runs, unless that component
itself accompanies the executable.

If distribution of executable or object code is made by offering

access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy
the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6.
Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free
redistribution of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to

apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through
any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version
number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of

MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands
`show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

This program, "bzip2", the associated library "libbzip2", and all
documentation, are copyright (C) 1996-2010 Julian R Seward. All
rights reserved.

Redistribution and use in source and binary forms, with or without
modification, are permitted provided that the following conditions

are met:

1. Redistributions of source code must retain the above copyright
notice, this list of conditions and the following disclaimer.

2. The origin of this software must not be misrepresented; you must
not claim that you wrote the original software. If you use this
software in a product, an acknowledgment in the product
documentation would be appreciated but is not required.

3. Altered source versions must be plainly marked as such, and must
not be misrepresented as being the original software.

4. The name of the author may not be used to endorse or promote
products derived from this software without specific
prior written
permission.

THIS SOFTWARE IS PROVIDED BY THE AUTHOR ``AS IS'' AND ANY EXPRESS
OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED
WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE
ARE DISCLAIMED. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR ANY
DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL
DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE
GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS
INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY,
WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING
NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS
SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest you first think carefully about whether this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software
patents pose a constant threat to the existence of
any free program. We wish to make sure that a company cannot
effectively restrict the users of a free program by obtaining a
restrictive license from a patent holder. Therefore, we insist that
any patent license obtained for a version of the library must be
consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the
ordinary GNU General Public License. This license, the GNU Lesser
General Public License, applies to certain designated libraries, and
is quite different from the ordinary General Public License. We use
this license for certain libraries in order to permit linking those
libraries into non-free programs.

When a program is linked with a library, whether statically or using
a shared library, the combination of the two is legally speaking a
combined work, a derivative of the original library. The ordinary
General Public License therefore permits
such linking only if the
entire combination fits its criteria of freedom. The Lesser General
Public License permits more lax criteria for linking other code with
the library.

We call this license the "Lesser" General Public License because it
does Less to protect the user's freedom than the ordinary General
Public License. It also provides other free software developers Less
of an advantage over competing non-free programs. These disadvantages
are the reason we use the ordinary General Public License for many
libraries. However, the Lesser license provides advantages in certain
special circumstances.

For example, on rare occasions, there may be a special need to
encourage the widest possible use of a certain library, so that it
becomes a de-facto standard. To achieve this, non-free programs must
be allowed to use the library. A more frequent case is that a free
library does the same job as widely used non-free libraries. In this
case, there is little to gain by limiting the
free library to free
software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free
programs enables a greater number of people to use a large body of
free software. For example, permission to use the GNU C Library in
non-free programs enables many more people to use the whole GNU
operating system, as well as its variant, the GNU/Linux operating
system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you

distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the

Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the

work with the complete corresponding
machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly
with a modified version of the library, if
the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally
distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not

excuse
you from the conditions of this License. If you cannot
distribute so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you
may not distribute the Library at all. For example, if a patent
license would not permit royalty-free redistribution of the Library by
all those who receive copies directly or indirectly through you, then
the only way you could satisfy both it and this License would be to
refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under
any particular circumstance, the balance of the section is intended to
apply, and the section as a whole is intended to apply in other
circumstances.

It is not the purpose of this section to induce you to infringe any
patents or other property right claims or to contest validity of any
such claims; this section has the sole purpose of protecting the
integrity of the free software distribution system
which is
implemented by public license practices. Many people have made
generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that
system; it is up to the author/donor to decide if he or she is willing
to distribute software through any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Library under this License
may add an explicit geographical distribution limitation excluding those
countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

13. The Free Software Foundation may publish
revised and/or new
versions of the Lesser General Public License from time to time.
Such new versions will be similar in spirit to the present version,
but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library
specifies a version number of this License which applies to it and
"any later version", you have the option of following the terms and
conditions either of that version or of any later version published by

the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will
be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library.
It is safest to attach them to the start of each source file to most
effectively
convey the exclusion of warranty; and each file should
have at least the "copyright" line and a pointer to where the full
notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or
modify it under the terms of the GNU Lesser General Public
License as published by the Free Software Foundation; either
version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public
License along with this library; if not, write to the Free Software
Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301
USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or
your school, if any, to sign a "copyright disclaimer" for the library,
if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James
Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the
power, direct or indirect, to cause the
direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached
to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally

submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition,
"submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
copyright license to reproduce, prepare Derivative
Works of,
publicly display, publicly perform, sublicense, and distribute the
Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work
includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional
attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License
does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including
negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct, indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such
obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

---- LLVM Exceptions to the Apache 2.0 License ----

As an exception, if, as a result of your compiling your source code, portions
of this Software are embedded into an Object form of such source code, you
may redistribute such embedded portions in such Object form without complying
with the conditions of Sections 4(a), 4(b) and 4(d) of the License.

In addition, if you combine or link compiled
forms of this Software with
software that is licensed under the GPLv2 ("Combined Software") and if a
court of competent jurisdiction determines that the patent provision (Section
3), the indemnity provision (Section 9) or other Section of the License
conflicts with the conditions of the GPLv2, you may retroactively and
prospectively choose to deem waived or otherwise exclude such Section(s) of
the License, but only in their entirety and only with respect to the Combined
Software.

==
Software from third parties included in the LLVM Project:
==
The LLVM Project contains third party software which is under different license
terms. All such code will be identified clearly using at least one of two
mechanisms:
1) It will be in a separate directory tree with its own `LICENSE.txt` or
`LICENSE` file at the top containing the specific
license and restrictions
which apply to that software, or
2) It will contain specific license and restriction terms at the top of every
file.

==
Legacy LLVM License (https://llvm.org/docs/DeveloperPolicy.html#legacy):

==========

The software contained in this directory tree is dual licensed under both the University of Illinois "BSD-Like" license and the MIT license. As a user of this code you may choose to use it under either license. As a contributor, you agree to allow your code to be used under both.

Full text of the relevant licenses is included below.

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who decide to use it. You
can use it too, but we

suggest you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of
it in new free programs; and that you are informed that you can do
these things.

To protect your rights, we need to make restrictions that forbid
distributors to deny you these rights or to ask you to surrender these
rights. These restrictions translate to certain responsibilities for
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis
or for a fee, you must give the
recipients all the rights that we gave
you. You must make sure that they, too, receive or can get the source
code. If you link other code with the library, you must provide
complete object files to the recipients, so that they can relink them
with the library after making changes to the library and recompiling
it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the
library, and (2) we offer you this license, which gives you legal
permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that
there is no warranty for the free library. Also, if the library is
modified by someone else and passed on, the recipients should know
that what they have is not the original version, so that the original
author's reputation will not be affected by problems that might be
introduced by others.

Finally, software patents pose a constant threat to the existence
of
any free program. We wish to make sure that a company cannot
effectively restrict the users of a free program by obtaining a
restrictive license from a patent holder. Therefore, we insist that
any patent license obtained for a version of the library must be
consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the
ordinary GNU General Public License. This license, the GNU Lesser
General Public License, applies to certain designated libraries, and

is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination
fits its criteria of freedom. The Lesser General
Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we
use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without
limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish
on each copy an
appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library

with the Library (or with a work based on the Library) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public
License instead of this License
to a given copy of the Library. To do
this, you must alter all the notices that refer to this License, so
that they refer to the ordinary GNU General Public License, version 2,
instead of to this License. (If a newer version than version 2 of the
ordinary GNU General Public License has appeared, then you can specify
that version instead if you wish.) Do not make any other change in
these notices.

Once this change is made in a given copy, it is irreversible for
that copy, so the ordinary GNU General Public License applies to all
subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of
the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or
derivative of it, under Section 2) in object code or executable form
under the terms of Sections 1 and 2 above provided that you accompany
it with the complete corresponding machine-readable source code, which
must be
distributed under the terms of Sections 1 and 2 above on a
medium customarily used for software interchange.

If distribution of object code is made by offering access to copy
from a designated place, then offering equivalent access to copy the
source code from the same place satisfies the requirement to
distribute the source code, even though third parties are not
compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the
Library, but is designed to work with the Library by being compiled or
linked with it, is called a "work that uses the Library". Such a
work, in isolation, is not a derivative work of the Library, and
therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library
creates an executable that is a derivative of the Library (because it
contains portions of the Library), rather than a "work that uses the
library". The executable is therefore covered
by this License.
Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any
executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable
source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the
user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major
components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed

under the terms of the
Sections above.

b) Give prominent notice with the combined library of the fact
that part of it is a work based on the Library, and explaining
where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying
or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute
so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any

particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing

and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL
DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line
and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or
modify it under the terms of the GNU Lesser General Public
License as published by the Free Software Foundation; either

version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public
License along with this library; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You
should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the library, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!
Boost Software License - Version 1.0 - August 17th, 2003

Permission is hereby granted, free of charge, to any person or organization
obtaining a copy of the software and accompanying documentation covered by
this license (the "Software") to use, reproduce, display, distribute,
execute, and transmit the Software, and to prepare derivative works of the
Software, and to permit third-parties to whom the Software is furnished to
do so, all subject to the following:

The copyright notices in the Software and this entire statement, including
the above license grant, this restriction and the following disclaimer,
must be included in all copies of the Software, in whole or in part, and
all derivative works of the Software, unless such copies or derivative
works are solely in the form of machine-executable object code generated by
a source language processor.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS
FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. IN NO EVENT
SHALL THE COPYRIGHT HOLDERS OR ANYONE DISTRIBUTING THE SOFTWARE BE LIABLE
FOR ANY DAMAGES OR OTHER LIABILITY, WHETHER IN CONTRACT, TORT OR OTHERWISE,
ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER

DEALINGS IN THE SOFTWARE.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
copyright license to reproduce, prepare Derivative Works of,
publicly display, publicly perform, sublicense, and distribute the
Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of
this License,
each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute
copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You

meet the following conditions:

(a) You must give any other recipients of the Work or
Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate

comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

you may not use this file except in compliance with the License.
You may obtain a copy of the License at

http://www.apache.org/licenses/LICENSE-2.0

Unless required by applicable law or agreed to in writing, software
distributed under the License is distributed on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.
See the License for the specific language governing permissions and
limitations under the License.

GCC RUNTIME LIBRARY EXCEPTION

Version 3.1, 31 March 2009

Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this
license document, but changing it is not allowed.

This GCC Runtime Library Exception ("Exception") is an additional
permission under section 7 of the GNU General Public License, version
3 ("GPLv3"). It applies to a given file (the "Runtime Library") that
bears a notice placed by the copyright holder of the file stating that
the file is governed by GPLv3 along with this Exception.

When you use GCC to compile a program, GCC may combine portions of
certain GCC header files and runtime libraries with the compiled
program. The purpose of this Exception is to allow compilation of
non-GPL (including proprietary) programs to use, in this way, the
header files and runtime libraries covered by this Exception.

0. Definitions.

A file is an "Independent Module" if it either requires the Runtime
Library
for execution after a Compilation Process, or makes use of an
interface provided by the Runtime Library, but is not otherwise based
on the Runtime Library.

"GCC" means a version of the GNU Compiler Collection, with or without

modifications, governed by version 3 (or a specified later version) of
the GNU General Public License (GPL) with the option of using any
subsequent versions published by the FSF.

"GPL-compatible Software" is software whose conditions of propagation,
modification and use would permit combination with GCC in accord with
the license of GCC.

"Target Code" refers to output from any compiler for a real or virtual
target processor architecture, in executable form or suitable for
input to an assembler, loader, linker and/or execution
phase. Notwithstanding that, Target Code does not include data in any
format that is used as a compiler intermediate representation, or used
for producing a compiler intermediate representation.

The "Compilation Process" transforms code
 entirely represented in
non-intermediate languages designed for human-written code, and/or in
Java Virtual Machine byte code, into Target Code. Thus, for example,
use of source code generators and preprocessors need not be considered
part of the Compilation Process, since the Compilation Process can be
understood as starting with the output of the generators or
preprocessors.

A Compilation Process is "Eligible" if it is done using GCC, alone or
with other GPL-compatible software, or if it is done without using any
work based on GCC. For example, using non-GPL-compatible Software to
optimize any GCC intermediate representations would not qualify as an
Eligible Compilation Process.

1. Grant of Additional Permission.

You have permission to propagate a work of Target Code formed by
combining the Runtime Library with Independent Modules, even if such
propagation would otherwise violate the terms of GPLv3, provided that
all Target Code was generated by Eligible Compilation Processes. You
may
 then convey such a combination under terms of your choice,
consistent with the licensing of the Independent Modules.

2. No Weakening of GCC Copyleft.

The availability of this Exception does not imply any general
presumption that third-party software is unaffected by the copyleft
requirements of the license of GCC.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

 The GNU General Public License is a free, copyleft license for
software and other kinds of works.

 The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

 When we speak of free software, we are referring to

freedom, not
price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1)
assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a

covered work is covered
by this License only if the output, given its
content, constitutes a covered work. This License acknowledges your
rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not
convey, without conditions so long as your license otherwise remains
in force. You may convey covered works to others for the sole purpose
of having them make modifications exclusively for you, or provide you
with facilities for running those works, provided that you comply with
the terms of this License in conveying all material for which you do
not control copyright. Those thus making or running the covered works
for you must do so exclusively on your behalf, under your direction
and control, on terms that prohibit them from making any copies of
your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under
the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological
measure under any applicable law fulfilling obligations under article
11 of the WIPO copyright treaty adopted on 20 December 1996, or
similar laws prohibiting or restricting circumvention of such
measures.

When you convey a covered work, you waive any legal power to forbid
circumvention of technological measures to the extent such circumvention
is effected by exercising rights under this License with respect to
the covered work, and you disclaim any intention to limit operation or
modification of the work as a means of enforcing, against the work's
users, your or third parties' legal rights to forbid circumvention of
technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you
receive it, in any medium, provided that you conspicuously and
appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any
non-permissive terms added in accord with section 7 apply to the code;
keep intact all notices of the absence of any warranty; and give all
recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization
keys, or other information required to install
and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in
ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently

reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims

owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is

conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided

above cannot be given local legal effect according to their terms,
reviewing courts shall apply local law that most closely approximates
an absolute waiver of all civil liability in connection with the
Program, unless a warranty or assumption of liability accompanies a
copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
state the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where
the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation, either version 3 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate

parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

 You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

 The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
 do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.
    GNU LESSER GENERAL PUBLIC LICENSE
                Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

 This version of the GNU Lesser General Public License incorporates
the terms and conditions of version 3 of the GNU General Public
License, supplemented by the additional permissions listed below.

 0. Additional Definitions.

 As used herein, "this License" refers to version 3 of the GNU Lesser
General Public License, and the "GNU GPL" refers to version 3 of the GNU
General Public License.

 "The Library" refers to a covered work governed by this License,
other than an Application or a Combined Work as defined below.

 An "Application" is any work that makes use of an interface provided
by the Library, but which is not otherwise based on the Library.
Defining a subclass of a class defined by the Library is
 deemed a mode
of using an interface provided by the Library.

 A "Combined Work" is a work produced by combining or linking an
Application with the Library. The particular version of the Library
with which the Combined Work was made is also called the "Linked
Version".

 The "Minimal Corresponding Source" for a Combined Work means the

Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying
Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data
structure
layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation

Information in the manner specified by section 6 of the GNU GPL
for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the
Library side by side in a single library together with other library
facilities that are not Applications and are not covered by this
License, and convey such a combined library under
terms of your
choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based
on the Library, uncombined with any other library facilities,
conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it
is a work based on the Library, and explaining where to find the
accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions
of the GNU Lesser General Public License from time to time. Such new
versions will be similar in spirit to the present version, but may
differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the
Library as you received it specifies that a certain numbered version
of the GNU Lesser General Public License "or any later version"
applies to it, you have the option of following
the terms and
conditions either of that published version or of any later version
published by the Free Software Foundation. If the Library as you
received it does not specify a version number of the GNU Lesser
General Public License, you may choose any version of the GNU Lesser
General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide
whether future versions of the GNU Lesser General Public License shall
apply, that proxy's public statement of acceptance of any version is
permanent authorization for you to choose that version for the
Library.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your

freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to

address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number
of this License which applies to it and "any
later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest

possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
convey the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and
`show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program

`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

1.214 compiler 14.0.6

1.214.1 Available under license :

MIT

1.215 ccache 4.6

1.215.1 Available under license :

= Ccache copyright and license

== Overall license

The license for ccache as a whole is as follows:

This program is free software; you can redistribute it and/or modify it under
the terms of the GNU General Public License as published by the Free Software
Foundation; either version 3 of the License, or (at your option) any later
version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY
WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A
PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with
this program; if not, write to the Free Software Foundation, Inc., 51 Franklin
Street, Fifth Floor, Boston, MA 02110-1301 USA

The full license text can be found in GPL-3.0.txt and at
https://www.gnu.org/licenses/gpl-3.0.html.

== Copyright and authors

Ccache is a collective work with contributions from many people, listed in
AUTHORS.adoc
 and at https://ccache.dev/credits.html. Subsequent additions by
contributing authors are implicitly licensed to the public under the same terms
(GNU GPL version 3 or later), but the contributing authors retain copyrights on
their portions of the work.

The copyright for ccache as a whole is as follows:

Copyright (C) 2002-2007 Andrew Tridgell
Copyright (C) 2009-2022 Joel Rosdahl and other contributors

== Files derived from other sources

The ccache distribution contain some files from other sources and some have
been modified for use in ccache. These files all carry attribution notices, and
may qualify as ``separate and independent works in themselves'' for purposes of
the GPL: that is, if separated from the ccache sources, they may be usable
under less restrictive terms.

Creative Commons Legal Code

CC0 1.0 Universal

CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE LEGAL
SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer exclusive Copyright and Related Rights (defined below) upon the creator and subsequent owner(s) (each and all, an "owner") of an original work of authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for the purpose of contributing to a commons of creative, cultural and scientific works ("Commons") that the public can reliably and without fear of later claims of infringement build upon, modify, incorporate in other works,
reuse and redistribute as freely as possible in any form whatsoever and for any purposes, including without limitation commercial purposes. These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and
related or neighboring rights ("Copyright and
Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
ii. moral rights retained by the original author(s) and/or performer(s);
iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
vii. other similar, equivalent or corresponding rights throughout the world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending that such Waiver shall not be subject to revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv)

for any purpose whatsoever, including without
limitation commercial, advertising or promotional purposes (the
"License"). The License shall be deemed effective as of the date CC0 was
applied by Affirmer to the Work. Should any part of the License for any
reason be judged legally invalid or ineffective under applicable law, such
partial invalidity or ineffectiveness shall not invalidate the remainder
of the License, and in such case Affirmer hereby affirms that he or she
will not (i) exercise any of his or her remaining Copyright and Related
Rights in the Work or (ii) assert any associated claims and causes of
action with respect to the Work, in either case contrary to Affirmer's
express Statement of Purpose.

4. Limitations and Disclaimers.

a. No trademark or patent rights held by Affirmer are waived, abandoned,
surrendered, licensed or otherwise affected by this document.
b. Affirmer offers the Work as-is and makes no representations or
warranties of any kind concerning the
Work, express, implied,
statutory or otherwise, including without limitation warranties of
title, merchantability, fitness for a particular purpose, non
infringement, or the absence of latent or other defects, accuracy, or
the present or absence of errors, whether or not discoverable, all to
the greatest extent permissible under applicable law.
c. Affirmer disclaims responsibility for clearing rights of other persons
that may apply to the Work or any use thereof, including without
limitation any person's Copyright and Related Rights in the Work.
Further, Affirmer disclaims responsibility for obtaining any necessary
consents, permissions or other rights required for any use of the
Work.
d. Affirmer understands and acknowledges that Creative Commons is not a
party to this document and has no duty or obligation with respect to
this CC0 or use of the Work.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by

the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the
editorial
revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but

excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute
copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the

appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation
("PSF"), and the Individual or Organization ("Licensee") accessing and
otherwise using this software ("Python") in source or binary form and
its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby
grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce,
analyze, test, perform and/or display publicly, prepare derivative works,
distribute, and otherwise use Python alone or in any derivative version,
provided, however, that PSF's License Agreement and PSF's notice of copyright,
i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010,
2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021 Python Software Foundation;
All
Rights Reserved" are retained in Python alone or in any derivative version
prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on
or incorporates Python or any part thereof, and wants to make

the derivative work available to others as provided herein, then
Licensee hereby agrees to include in any such work a brief summary of
the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS"
basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON
FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS
A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON,
OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY
 THEREOF.

6. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any
relationship of agency, partnership, or joint venture between PSF and
Licensee. This License Agreement does not grant permission to use PSF
trademarks or trade name in a trademark sense to endorse or promote
products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

GNU LESSER GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates
the terms and conditions of version 3 of the GNU General Public
License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser
General Public License, and the "GNU GPL" refers to version 3 of the GNU
General Public License.

"The Library" refers to a covered work governed by this License,
other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided
by the Library, but which is not otherwise based on the Library.
Defining a subclass of a class defined by
the Library is deemed a mode
of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an

Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the

Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as

changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees"
and
"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without

permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally

available free
programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is
covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or

similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated

place (gratis or for a charge), and offer equivalent access to the Corresponding Source
in the same way through the same place at no
further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization
keys, or other information required to install
and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the

User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed
in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the
entire Program shall
be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty

or limiting liability differently from the
terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or
author attributions in that material or in the Appropriate Legal
Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or
requiring that modified versions of such material be marked in
reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or
authors of the material; or

e) Declining to grant rights under trademark law for use of some
trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that
material by anyone who conveys the material (or modified versions of
it) with contractual assumptions of liability to the recipient, for
any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further
restrictions" within the meaning of section 10. If the Program as you
received it, or any part of it, contains a notice stating that it is
governed by this License along with a term that is a further
restriction, you may remove that term. If a license document contains
a further restriction but permits relicensing or conveying under this
License, you may add to a covered work material governed by the terms
of that license document, provided that the further restriction does
not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you
must place, in the relevant source files, a statement of the
additional terms that apply to those files, or a notice indicating
where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the
form of a separately written license, or stated as exceptions;
the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly
provided under this License. Any attempt otherwise to propagate or

modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever

licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For
purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this
License, through a
publicly available network server or other readily accessible means,

then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey

the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS

IS" WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided
above cannot be given local legal effect according to their terms,
reviewing courts shall apply local law that most closely approximates
an absolute waiver of all civil liability in connection with the
Program, unless a warranty or assumption of liability accompanies a
copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
state the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where
the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation, either version 3 of the License, or

(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want
to do, use the GNU Lesser General
Public License instead of this License. But first, please read
<https://www.gnu.org/philosophy/why-not-lgpl.html>.

1.216.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts as the successor of the GNU Library Public License, version 2, hence the version number 2.1.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some specially designated software packages--typically libraries--of the Free Software Foundation and other authors who decide to use it. You can use it too, but we suggest
you first think carefully about whether
this license or the ordinary General Public License is the better strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish); that you receive source code or can get it if you want it; that you can change the software and use pieces of it in new free programs; and that you are informed that you can do these things.

To protect your rights, we need to make restrictions that forbid distributors to deny you these rights or to ask you to surrender these rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients
all the rights that we gave
you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is

modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of

free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without
limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based

on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a table of data to be supplied by an application program that uses the facility, other than as an argument passed when the facility is invoked, then you must make a good faith effort to ensure that, in the event an application does not supply such function or table, the facility still operates, and performs whatever part of its purpose remains meaningful.

(For example, a function in a library to compute square roots has a purpose that is entirely well-defined independent of the application. Therefore, Subsection 2d requires that any application-supplied function or table used by this function must be optional: if the application does not supply it, the square root function must still compute square roots.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Library,

and can be reasonably considered independent and separate works in themselves,
then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Library, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Library.

In addition, mere aggregation of another work not based on the Library with the Library (or with a work based on the Library) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public License instead of this License to
a given copy of the Library. To do this, you must alter all the notices that refer to this License, so that they refer to the ordinary GNU General Public License, version 2, instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed
under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to

distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License.
Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables
containing that work also fall under Section 6,
whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference

directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user installs one, as long as the modified version is interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license

restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Library (or any work based on the Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute
so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people
have made
generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public
License from time to time.
Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library

specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of
all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL
DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting

redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line
and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or
modify it under the terms of the GNU Lesser General Public
License as published by the Free Software Foundation; either
version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public
License along with this library; if not, write to the Free Software
Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should
also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the library, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Library General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid

anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work
which contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program

is covered only if its contents constitute a work based on the
Program (independent of having been made by running the Program).
Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim
copies of the Program's
source code as you receive it, in any medium, provided that you
conspicuously and appropriately publish on each copy an appropriate
copyright notice and disclaimer of warranty; keep intact all the
notices that refer to this License and to the absence of any warranty;
and give any other recipients of the Program a copy of this License
along with the Program.

You may charge a fee for the physical act of transferring a copy, and
you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion
of it, thus forming a work based on the Program, and copy and
distribute such modifications or work under the terms of Section 1
above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices
stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in

whole or in part contains or is derived from the Program or any
part thereof, to be licensed as a whole at no charge to all third
parties under the terms of this License.

c) If the modified program normally reads commands interactively
when run, you must cause it, when started running for such
interactive use in the most ordinary way, to print or display an
announcement including an appropriate copyright notice and a
notice that there is no warranty (or else, saying that you provide
a warranty) and that users may redistribute the program under
these conditions, and telling the user how to view a copy of this
License. (Exception: if the Program itself is interactive but
does not normally print such an announcement, your work based on
the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If
identifiable sections of that work are not derived from the Program,
and can be reasonably
considered independent and separate works in
themselves, then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based

on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy
the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6.
Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free
redistribution of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under

any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through
any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version
number of this License which applies to it and "any
later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful,

but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands
`show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.
This is the full-colour version of the currently unofficial Linux logo
("currently unofficial" just means that there has been no paperwork and
that I have not really announced it yet). It was created by Larry Ewing,
and is freely usable as long as you acknowledge Larry as the original
artist.

Note that there are black-and-white versions of this available that
scale down to smaller sizes and are better for letterheads or whatever

you want to use it for: for the full range of logos take a look at
Larry's web-page:

```
/* nicstar.c  v0.22  Jawaid Bazyar (bazyar@hypermall.com)
* nicstar.c, M. Welsh (matt.welsh@cl.cam.ac.uk)
*
* Hacked October, 1997 by Jawaid Bazyar, Interlink Advertising Services Inc.
*  http://www.hypermall.com/
* 10/1/97 - commented out CFG_PHYIE bit - we don't care when the PHY
* interrupts us (except possibly for removal/insertion of the cable?)
* 10/4/97 - began heavy inline documentation of the code. Corrected typos
* and spelling mistakes.
* 10/5/97 - added code to handle PHY interrupts, disable PHY on
* loss of link, and correctly re-enable PHY when link is
* re-established. (put back CFG_PHYIE)
*
*   Modified to work with the IDT7721 nicstar -- AAL5 (tested) only.
*
* R. D. Rechenmacher <ron@fnal.gov>, Aug. 6, 1997
*
* Linux driver for the IDT77201 NICStAR PCI ATM controller.
* PHY component is expected to be 155 Mbps S/UNI-Lite or IDT 77155;
* see init_nicstar() for PHY initialization to change this. This driver
```

* expects the Linux ATM stack to support scatter-gather
 lists
* (skb->atm.iovcnt != 0) for Rx skb's passed to vcc->push.
*
* Implementing minimal-copy of received data:
*   IDT always receives data into a small buffer, then large buffers
*   as needed. This means that data must always be copied to create
*   the linear buffer needed by most non-ATM protocol stacks (e.g. IP)
*   Fix is simple: make large buffers large enough to hold entire
*   SDU, and leave <small_buffer_data> bytes empty at the start. Then
*   copy small buffer contents to head of large buffer.
*   Trick is to avoid fragmenting Linux, due to need for a lot of large
*   buffers. This is done by 2 things:
*   1) skb->destructor / skb->atm.recycle_buffer
*   combined, allow nicstar_free_rx_skb to be called to
*   recycle large data buffers
*   2) skb_clone of received buffers
*   See nicstar_free_rx_skb and linearize_buffer for implementation
*   details.

1.219.1 Available under license :

==========

The LLVM Project is under the Apache License v2.0 with LLVM Exceptions:

==========

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the
power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached
to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the

editorial revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition,
"submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
copyright license to reproduce, prepare Derivative
Works of,
publicly display, publicly perform, sublicense, and distribute the
Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work
includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional
attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

http://www.apache.org/licenses/LICENSE-2.0

Unless required by applicable law or agreed to in writing, software
distributed under the License is distributed on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.
See the License for the specific language governing permissions and
limitations under the License.

---- LLVM Exceptions to the Apache 2.0 License ----

As an exception, if, as a result of your compiling your source code, portions
of this Software are embedded into an Object form of such source code, you
may redistribute such embedded portions in such Object form without complying
with the conditions of Sections 4(a), 4(b) and 4(d) of the License.

In addition, if you combine or link compiled
forms of this Software with
software that is licensed under the GPLv2 ("Combined Software") and if a
court of competent jurisdiction determines that the patent provision (Section
3), the indemnity provision (Section 9) or other Section of the License
conflicts with the conditions of the GPLv2, you may retroactively and
prospectively choose to deem waived or otherwise exclude such Section(s) of
the License, but only in their entirety and only with respect to the Combined
Software.

==
Software from third parties included in the LLVM Project:
==
The LLVM Project contains third party software which is under different license
terms. All such code will be identified clearly using at least one of two
mechanisms:

1) It will be in a separate directory tree with its own `LICENSE.txt` or
  `LICENSE` file at the top containing the specific
 license and restrictions
  which apply to that software, or
2) It will contain specific license and restriction terms at the top of every
  file.

==
Legacy LLVM License (https://llvm.org/docs/DeveloperPolicy.html#legacy):
==

The libc++ library is dual licensed under both the University of Illinois
"BSD-Like" license and the MIT license. As a user of this code you may choose
to use it under either license. As a contributor, you agree to allow your code
to be used under both.

Full text of the relevant licenses is included below.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions

to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute
copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the

content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

Building EFI Applications Using the GNU Toolchain

David Mosberger <davidm@hpl.hp.com>

Last update: 04/09/2007

* Introduction

This document has two parts: the first part describes how to develop
EFI applications for IA-64,x86 and x86_64 using the GNU toolchain and the EFI
development environment contained in this directory. The second part
describes some of the more subtle aspects of how this development
environment works.

* Part 1: Developing EFI Applications

** Prerequisites:

To develop x86 and x86_64 EFI applications, the following tools are needed:

- gcc-3.0 or newer (gcc 2.7.2 is NOT sufficient!)
  As of gnu-efi-3.0b, the Redhat 8.0 toolchain is known to work,
  but the Redhat 9.0 toolchain

is not currently supported.

- A version of "objcopy" that supports EFI applications. To check if your version includes EFI support, issue the command:

objcopy --help

Verify that the line "supported targets" contains the string "efi-app-ia32" and "efi-app-x86_64" and that the "-j" option accepts wildcards. The binutils release binutils-2.24 supports Intel64 EFI and accepts wildcard section names.

- For debugging purposes, it's useful to have a version of "objdump" that supports EFI applications as well. This allows inspect and disassemble EFI binaries.

To develop IA-64 EFI applications, the following tools are needed:

- A version of gcc newer than July 30th 1999 (older versions had problems with generating position independent code). As of gnu-efi-3.0b, gcc-3.1 is known to work well.

- A version of "objcopy" that supports EFI applications. To check if your version includes EFI support, issue the command:

objcopy --help

Verify that
the line "supported targets" contains the string "efi-app-ia64" and that the "-j" option accepts wildcards.

- For debugging purposes, it's useful to have a version of "objdump" that supports EFI applications as well. This allows inspect and disassemble EFI binaries.

** Directory Structure

This EFI development environment contains the following subdirectories:

inc: This directory contains the EFI-related include files. The files are taken from Intel's EFI source distribution, except that various fixes were applied to make it compile with the GNU toolchain.

lib: This directory contains the source code for Intel's EFI library.
 Again, the files are taken from Intel's EFI source
 distribution, with changes to make them compile with the GNU
 toolchain.

gnuefi: This directory contains the glue necessary to convert ELF64
 binaries to EFI binaries. Various runtime code bits, such as
 a self-relocator are included as well. This code has been
 contributed by the
 Hewlett-Packard Company and is distributed
 under the GNU GPL.

apps: This directory contains a few simple EFI test apps.

** Setup

It is necessary to edit the Makefile in the directory containing this
README file before EFI applications can be built. Specifically, you
should verify that macros CC, AS, LD, AR, RANLIB, and OBJCOPY point to
the appropriate compiler, assembler, linker, ar, and ranlib binaries,
respectively.

If you're working in a cross-development environment, be sure to set
macro ARCH to the desired target architecture ("ia32" for x86, "x86_64" for
x86_64 and "ia64" for IA-64). For convenience, this can also be done from
the make command line (e.g., "make ARCH=ia64").

** Building

To build the sample EFI applications provided in subdirectory "apps",
simply invoke "make" in the toplevel directory (the directory
containing this README file). This should build lib/libefi.a and
gnuefi/libgnuefi.a first and then all the EFI applications such as a
apps/t6.efi.

** Running

Just
 copy the EFI application (e.g., apps/t6.efi) to the EFI
filesystem, boot EFI, and then select "Invoke EFI application" to run
the application you want to test. Alternatively, you can invoke the
Intel-provided "nshell" application and then invoke your test binary
via the command line interface that "nshell" provides.

** Writing Your Own EFI Application

Suppose you have your own EFI application in a file called
"apps/myefiapp.c". To get this application built by the GNU EFI build
environment, simply add "myefiapp.efi" to macro TARGETS in
apps/Makefile. Once this is done, invoke "make" in the top level
directory. This should result in EFI application apps/myefiapp.efi,
ready for execution.

The GNU EFI build environment allows to write EFI applications as
described in Intel's EFI documentation, except for two differences:

- The EFI application's entry point is always called "efi_main". The
  declaration of this routine is:

    EFI_STATUS efi_main (EFI_HANDLE image,
  EFI_SYSTEM_TABLE *systab);

- UNICODE string literals must be written as W2U(L"Sample String")
  instead of just L"Sample String". The W2U() macro is defined in
  <efilib.h>. This header file also declares the function W2UCpy()
  which allows to convert a wide string into a UNICODE string and
  store the result in a programmer-supplied buffer.

- Calls to EFI services should be made via uefi_call_wrapper(). This
  ensures appropriate parameter passing for the architecture.

* Part 2: Inner Workings

WARNING: This part contains all the gory detail of how the GNU EFI
toolchain works. Normal users do not have to worry about such
details. Reading this part incurs a definite risk of inducing severe
headaches or other maladies.

The basic idea behind the GNU EFI build environment is to use the GNU
toolchain to build a normal ELF binary that, at the end, is converted
to an EFI binary. EFI binaries are really just PE32+ binaries. PE
stands for "Portable Executable" and is the object
 file format
Microsoft is using on its Windows platforms. PE is basically the COFF
object file format with an MS-DOS2.0 compatible header slapped on in
front of it. The "32" in PE32+ stands for 32 bits, meaning that PE32
is a 32-bit object file format. The plus in "PE32+" indicates that
this format has been hacked to allow loading a 4GB binary anywhere in
a 64-bit address space (unlike ELF64, however, this is not a full
64-bit object file format because the entire binary cannot span more
than 4GB of address space). EFI binaries are plain PE32+ binaries
except that the "subsystem id" differs from normal Windows binaries.

There are two flavors of EFI binaries: "applications" and "drivers"
and each has there own subsystem id and are identical otherwise. At
present, the GNU EFI build environment supports the building of EFI
applications only, though it would be trivial to generate drivers, as
the only difference is the subsystem id. For more details on PE32+,
see the spec at

http://msdn.microsoft.com/library/specs/msdn_pecoff.htm.

In
theory, converting a suitable ELF64 binary to PE32+ is easy and
could be accomplished with the "objcopy" utility by specifying option
--target=efi-app-ia32 (x86) or --target=efi-app-ia64 (IA-64). But
life never is that easy, so here some complicating factors:

(1) COFF sections are very different from ELF sections.

ELF binaries distinguish between program headers and sections.
The program headers describe the memory segments that need to
be loaded/initialized, whereas the sections describe what
constitutes those segments. In COFF (and therefore PE32+) no
such distinction is made. Thus, COFF sections need to be page
aligned and have a size that is a multiple of the page size
(4KB for EFI), whereas ELF allows sections at arbitrary
addresses and with arbitrary sizes.

(2) EFI binaries should be relocatable.

Since EFI binaries are executed in physical mode, EFI cannot
guarantee that a given binary can be loaded at
its preferred
address. EFI does _try_ to load a binary at it's preferred
address, but if it can't do so, it will load it at another
address and then relocate the binary using the contents of the
.reloc section.

(3) On IA-64, the EFI entry point needs to point to a function
descriptor, not to the code address of the entry point.

(4) The EFI specification assumes that wide characters use UNICODE
encoding.

ANSI C does not specify the size or encoding that a wide
character uses. These choices are "implementation defined".
On most UNIX systems, the GNU toolchain uses a wchar_t that is
4 bytes in size. The encoding used for such characters is
(mostly) UCS4.

In the following sections, we address how the GNU EFI build
environment addresses each of these issues.

** (1) Accommodating COFF Sections

In order to satisfy the COFF constraint of page-sized and page-aligned
sections, the GNU EFI build environment uses the special linker script
in gnuefi/elf_$(ARCH)_efi.lds
 where $(ARCH) is the target architecture
("ia32" for x86, "x86_64" for x86_64 and "ia64" for IA-64).
This script is set up to create only eight COFF section, each page aligned
and page sized.These eight sections are used to group together the much
greater number of sections that are typically present in ELF object files.
Specifically:

.hash (and/or .gnu.hash)
 Collects the ELF .hash info (this section _must_ be the first
 section in order to build a shared object file; the section is
 not actually loaded or used at runtime).

 GNU binutils provides a mechanism to generate different hash info
 via --hash-style=<sysv|gnu|both> option. In this case output
 shared object will contain .hash section, .gnu.hash section or
 both. In order to generate correct output linker script preserves
 both types of hash sections.

.text
 Collects all sections containing executable code.

.data
 Collects read-only and read-write data, literal string data,
 global offset tables, the uninitialized data
 segment (bss) and
 various other sections containing data.

 The reason read-only data is placed here instead of the in
 .text is to make it possible to disassemble the .text section
 without getting garbage due to read-only data. Besides, since
 EFI binaries execute in physical mode, differences in page
 protection do not matter.

 The reason the uninitialized data is placed in this section is
 that the EFI loader appears to be unable to handle sections
 that are allocated but not loaded from the binary.

.dynamic, .dynsym, .rela, .rel, .reloc
 These sections contains the dynamic information necessary to

self-relocate the binary (see below).

A couple of more points worth noting about the linker script:

o On IA-64, the global pointer symbol (__gp) needs to be placed such
that the _entire_ EFI binary can be addressed using the signed
22-bit offset that the "addl" instruction affords. Specifically,
this means that __gp should be placed at ImageBase + 0x200000.
Strictly
speaking, only a couple of symbols need to be addressable
in this fashion, so with some care it should be possible to build
binaries much larger than 4MB. To get a list of symbols that need
to be addressable in this fashion, grep the assembly files in
directory gnuefi for the string "@gprel".

o The link address (ImageBase) of the binary is (arbitrarily) set to
zero. This could be set to something larger to increase the chance
of EFI being able to load the binary without requiring relocation.
However, a start address of 0 makes debugging a wee bit easier
(great for those of us who can add, but not subtract... ;-).

o The relocation related sections (.dynamic, .rel, .rela, .reloc)
cannot be placed inside .data because some tools in the GNU
toolchain rely on the existence of these sections.

o Some sections in the ELF binary intentionally get dropped when
building the EFI binary. Particularly noteworthy are the dynamic
relocation sections for
the .plabel and .reloc sections. It would
be _wrong_ to include these sections in the EFI binary because it
would result in .reloc and .plabel being relocated twice (once by
the EFI loader and once by the self-relocator; see below for a
description of the latter). Specifically, only the sections
mentioned with the -j option in the final "objcopy" command are
retained in the EFI binary (see Make.rules).

** (2) Building Relocatable Binaries

ELF binaries are normally linked for a fixed load address and are thus
not relocatable. The only kind of ELF object that is relocatable are
shared objects ("shared libraries"). However, even those objects are
usually not completely position independent and therefore require
runtime relocation by the dynamic loader. For example, IA-64 binaries
normally require relocation of the global offset table.

The approach to building relocatable binaries in the GNU EFI build
environment is to:

(a) build an ELF shared object

(b) link
it together with a self-relocator that takes care of
applying the dynamic relocations that may be present in the
ELF shared object

(c) convert the resulting image to an EFI binary

The self-relocator is of course architecture dependent. The x86
version can be found in gnuefi/reloc_ia32.c, the x86_64 version
can be found in gnuefi/reloc_x86_64.c and the IA-64 version can be
found in gnuefi/reloc_ia64.S.

The self-relocator operates as follows: the startup code invokes it
right after EFI has handed off control to the EFI binary at symbol
"_start". Upon activation, the self-relocator searches the .dynamic
section (whose starting address is given by symbol _DYNAMIC) for the
dynamic relocation information, which can be found in the DT_REL,
DT_RELSZ, and DT_RELENT entries of the dynamic table (DT_RELA,
DT_RELASZ, and DT_RELAENT in the case of rela relocations, as is the
case for IA-64). The dynamic relocation information points to the ELF
relocation table. Once this table is
found, the self-relocator walks
through it, applying each relocation one by one. Since the EFI
binaries are fully resolved shared objects, only a subset of all
possible relocations need to be supported. Specifically, on x86 only
the R_386_RELATIVE relocation is needed. On IA-64, the relocations
R_IA64_DIR64LSB, R_IA64_REL64LSB, and R_IA64_FPTR64LSB are needed.
Note that the R_IA64_FPTR64LSB relocation requires access to the
dynamic symbol table. This is why the .dynsym section is included in
the EFI binary. Another complication is that this relocation requires
memory to hold the function descriptors (aka "procedure labels" or
"plabels"). Each function descriptor uses 16 bytes of memory. The
IA-64 self-relocator currently reserves a static memory area that can
hold 100 of these descriptors. If the self-relocator runs out of
space, it causes the EFI binary to fail with error code 5
(EFI_BUFFER_TOO_SMALL). When this happens, the manifest constant
MAX_FUNCTION_DESCRIPTORS in gnuefi/reloc_ia64.S
should be increased
and the application recompiled. An easy way to count the number of
function descriptors required by an EFI application is to run the
command:

```
objdump --dynamic-reloc example.so | fgrep FPTR64 | wc -l
```

assuming "example" is the name of the desired EFI application.

** (3) Creating the Function Descriptor for the IA-64 EFI Binaries

As mentioned above, the IA-64 PE32+ format assumes that the entry
point of the binary is a function descriptor. A function descriptors
consists of two double words: the first one is the code entry point
and the second is the global pointer that should be loaded before
calling the entry point. Since the ELF toolchain doesn't know how to
generate a function descriptor for the entry point, the startup code
in gnuefi/crt0-efi-ia64.S crafts one manually by with the code:

```
        .section .plabel, "a"
_start_plabel:
        data8   _start
        data8   __gp
```

this places the procedure label for entry point _start in
 a section
called ".plabel". Now, the only problem is that _start and __gp need
to be relocated _before_ EFI hands control over to the EFI binary.
Fortunately, PE32+ defines a section called ".reloc" that can achieve
this. Thus, in addition to manually crafting the function descriptor,
the startup code also crafts a ".reloc" section that has will cause
the EFI loader to relocate the function descriptor before handing over
control to the EFI binary (again, see the PECOFF spec mentioned above
for details).

A final question may be why .plabel and .reloc need to go in their own
COFF sections. The answer is simply: we need to be able to discard
the relocation entries that are generated for these sections. By
placing them in these sections, the relocations end up in sections
".rela.plabel" and ".rela.reloc" which makes it easy to filter them
out in the filter script. Also, the ".reloc" section needs to be in
its own section so that the objcopy program can recognize it and can
create the
 correct directory entries in the PE32+ binary.

** (4) Convenient and Portable Generation of UNICODE String Literals

As of gnu-efi-3.0, we make use (and somewhat abuse) the gcc option
that forces wide characters (WCHAR_T) to use short integers (2 bytes)
instead of integers (4 bytes). This way we match the Unicode character
size. By abuse, we mean that we rely on the fact that the regular ASCII
characters are encoded the same way between (short) wide characters
and Unicode and basically only use the first byte. This allows us
to just use them interchangeably.

The gcc option to force short wide characters is : -fshort-wchar

1.228 python3-pycryptodome 3.14.1

1.228.1 Available under license :

Copyright and licensing of the Python Cryptography Toolkit ("PyCrypto"):
~~~~~~

Previously, the copyright and/or licensing status of the Python
Cryptography Toolkit ("PyCrypto") had been somewhat ambiguous. The
original intention of Andrew M. Kuchling and other contributors has
been to dedicate PyCrypto to the public domain, but that intention was
not necessarily made clear in the original disclaimer (see
LEGAL/copy/LICENSE.orig).

Additionally, some files within PyCrypto had specified their own
licenses that differed from the PyCrypto license itself. For example,
the original RIPEMD.c module simply had a copyright statement and
warranty disclaimer, without clearly specifying any license terms.
(An updated version on the author's website came with a license that
contained a GPL-incompatible advertising clause.)

To rectify this situation for PyCrypto 2.1, the following steps have
been taken:

1. Obtaining explicit permission
 from the original contributors to
   dedicate their contributions to the public domain if they have not
   already done so. (See the "LEGAL/copy/stmts" directory for
   contributors' statements.)

2. Replacing some modules with clearly-licensed code from other
   sources (e.g. the DES and DES3 modules were replaced with new ones
   based on Tom St. Denis's public-domain LibTomCrypt library.)

3. Replacing some modules with code written from scratch (e.g. the
   RIPEMD and Blowfish modules were re-implemented from their
   respective algorithm specifications without reference to the old
   implementations).

4. Removing some modules altogether without replacing them.

To the best of our knowledge, with the exceptions noted below or
within the files themselves, the files that constitute PyCrypto are in
the public domain. Most are distributed with the following notice:

 The contents of this file are dedicated to the public domain. To
 the extent that dedication to
~~~~~~

the public domain is not available,
everyone is granted a worldwide, perpetual, royalty-free,
non-exclusive license to exercise all rights associated with the
contents of this file for any purpose whatsoever.
No rights are reserved.

RELEASE
The Linux man page maintainer proudly announces. . .

man-pages-5.13.tar.gz - man pages for Linux

Differences from the previous manual pages release are listed in
the file "Changes".

For further information, visit http://www.kernel.org/doc/man-pages/

POSIX PAGES
This package used to contains a copy of the POSIX 1003.1-2003
man pages. The POSIX pages are now distributed in the separate
man-pages-posix package.

THE PAGES
These pages are most of the section 2, 3, 4, 5, 7 man pages

for Linux. A few pages are provided in sections 1 and 8 for commands
that are not documented in other packages, and there are a few pages
in sections 5 and 8 for the timezone utilities.

[The timezone pages were taken from
ftp://elsie.nci.nih.gov/pub/tzcode2001a.tar.gz.]
[The section 3 man pages for the db routines have been taken from
ftp://ftp.terra.net/pub/sleepycat/db.1.86.tar.gz.]
[The rpc man pages were taken from the 4.4BSD-Lite
 CDROM.]

Here is a breakdown of what this distribution contains:

  Section 1 = user commands (intro, plus a few other pages)
  Section 2 = system calls
  Section 3 = libc calls
  Section 4 = devices (e.g., hd, sd)
  Section 5 = file formats and configuration files (e.g., wtmp, /etc/passwd)
  Section 6 = games (intro only)
  Section 7 = overviews, conventions, macro packages, etc.
  Section 8 = system administration (intro, plus a few other pages)

  This package contains no, or very few, section 1, 6, and 8 man pages
  because these should be distributed with the binaries they are written
  for. Sometimes Section 9 is used for man pages describing parts of
  the kernel.

  Note that only Section 2 is rather complete, but Section 3 contains
  several hundred man pages. If you want to write some man pages,
  or suggest improvements to existing pages, please visit
  http://www.kernel.org/doc/man-pages/ .

Copyright information:

  These man
 pages are distributed under a variety of copyright licenses.
  Although these licenses permit free distribution of the nroff sources
  contained in this package, commercial distribution may impose other
  requirements (e.g., acknowledgement of copyright or inclusion of the
  raw nroff sources with the commercial distribution).
  If you distribute these man pages commercially, it is your
  responsibility to figure out your obligations. (For many man pages,
  these obligations require you to distribute nroff sources with any
  pre-formatted man pages that you provide.) Each file that contains
  nroff source for a man page also contains the author(s) name, email
  address, and copyright notice.

Luis Javier Merino Morán <ljmerino@pandasoftware.es>
Martin Pool <mbp@sourcefrog.net>
Richard

Kreckel <Richard.Kreckel@ginac.de>
Vasya Pupkin <ptushnik@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages
  Fabian Kreutz
    Many math pages had their synopses compressed, as per suggestion
    from Fabian Kreutz.

Various pages
  Fabian Kreutz / aeb
    Many minor content and formatting bug fixes were made to the math
    pages, following suggestions from Fabian Kreutz (who recently
    translated many of the 1.70 math pages into German) and
    Andries Brouwer.

Various pages
  mtk
    For consistency, all instances of "super-user" were changed
    to the more common "superuser".

Various pages
  Vasya Pupkin / mtk
    After a note from Vasya Pupkin, I added <errno.h> to the SYNOPSIS
    of several Section 2 pages using the _syscallN() macros.

    In addition:
      -- erroneous semicolons at the end of _syscallN() were removed
        on various pages.

      --
types such as "uint" in syscallN() declarations were changed
        to "unsigned int", etc.

      -- various other minor breakages in the synopses were fixed.

    The affected pages are:

        getdents.2
        gettid.2
        llseek.2
        mmap2.2
        modify_ldt.2
        pivot_root.2

quotactl.2
readdir.2
sysctl.2
syslog.2
tkill.2

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

bind.2
  Florian Weimer
    Added 'const' to declaration of 'my_addr' in prototype.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=239762.

fcntl.2
  Martin Pool
    Added O_NOATIME to list of flags that can be changed via F_SETFL.
  mtk/aeb
    Noted F_GETOWN bug after suggestion from aeb.
    See also:
    http://marc.theaimsgroup.com/?l=linux-kernel&m=108380640603164&w=2

getrlimit.2
   mtk
    Material on getrusage.2 has been separated out into its own page.
    Rewrote discussion on RLIMIT_MEMLOCK to incorporate kernel
    2.6.9 changes.
    Added note on RLIMIT_CPU error in older kernels.
    Added RLIMIT_SIGPENDING.
    Also made a few other minor changes.

getrusage.2
  mtk
    This page is new(ish) -- it was created by splitting
    getrlimit.2.

    Repaired note on SIGCHLD behavior to note that the
    POSIX non-conformance has been fixed in 2.6.9.

kill.2
  Modified after suggestion from Emmanuel Colbus
    Changed wording of sentence under NOTES describing
    when signals can be sent to init(1).

mlock.2

munlock.2
mlockall.2
munlockall.2
    These have been consolidated into a single mlock.2 page.
    In the process, much duplication was eliminated
    and new information was added about RLIMIT_MEMLOCK
    and the changes
 in memory locking in kernel 2.6.9,

mmap.2
  mtk
    Added cross-ref to setrlimit(2) concerning memory locking limits.
  Eric Estievenart
    Note that MAP_FIXED replaces existing mappings

msgctl.2
  mtk
    Substantial language and formatting clean-ups.
    Added msqid_ds and ipc_perm structure definitions.

msgget.2
  mtk
    Substantial language and formatting clean-ups.
    Added notes on /proc files.

msgop.2
  mtk
    Substantial language and formatting clean-ups.
    Added notes on /proc files.

open.2
  Martin Pool
    Added O_NOATIME (new in Linux 2.6.8)
  mtk
    Reordered list of 'flags' description alphabetically

personality.2
  2004-11-03 applied patch from Martin Schulze

semctl.2
  mtk
    Substantial language and formatting clean-ups.
    Rewrote semun text.
    Added semid_ds and ipc_perm structure definitions.

semget.2
  mtk
    Substantial language and formatting clean-ups.

Added
notes on /proc files.
Rewrote BUGS note about semget()'s failure to initialize
semaphore values.

semop.2
mtk
Substantial language and formatting clean-ups.
Added notes on /proc files.

shmctl.2
mtk
Substantial language and formatting clean-ups.
Updated shmid_ds structure definitions.
Added information on SHM_DEST and SHM_LOCKED flags.
Noted that CAP_IPC_LOCK is not required for SHM_UNLOCK
since kernel 2.6.9.
Added notes on 2.6.9 RLIMIT_MEMLOCK changes.
Added RLIMIT_SIGPENDING (new in Linux 2.6.8)

shmget.2
mtk
Substantial language and formatting clean-ups.
Added notes on /proc files.

shmop.2
mtk
Substantial language and formatting clean-ups.
Changed wording and placement of sentence regarding attachment
of segments marked for destruction.

sigaction.2
mtk
Added mention of SIGCONT under SA_NOCLDSTOP.
Added SA_NOCLDWAIT.
Updated discussion for POSIX.1-2001 and SIGCHLD and sa_flags.
Noted that CLD_CONTINUED is supported since Linux 2.6.9.
Added SI_TKILL (new in Linux 2.4.19).
Other minor changes.

signal.2
mtk
Removed text on ignoring SIGCHLD; replaced with pointer
to sigaction.2.

sigwaitinfo.2
After bug report from Andrey Kiselev
Fixed prototype: "timeout" --> "*timeout"

as per: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=222145

stat.2
  Enrico Zini
    Added text to clarify that S_IS*() macros should be applied to
    st_mode field.
    as per: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=249698

swapon.2
  After Debian bug report from Anand Kumria
    Added "no swap space signature" to EINVAL error.
  mtk
    Added EINVAL error for swapoff() ("not currently a swap area").
    Added EBUSY error for swapon().
    A few formatting fixes.

times.2
  mtk
    In Linux 2.6, the return value
 of times changed; it is no
    longer time since boot, but rather:

        boot_time + 2^32 / HZ - 300

    Repaired note on SIGCHLD behavior to note that the
    POSIX non-conformance has been fixed in 2.6.9.
    Some formatting fixes.

undocumented.2
  After bug report from Johannes Berg
    Changed
      .TH UNIMPLEMENTED
    to:
      .TH UNDOCUMENTED
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=220741

wait.2
  mtk
    Added waitid(2).
    Added WCONTINUED and WIFCONTINUED (new in 2.6.10).
    Added text on SA_NOCLDSTOP.
    Updated discussion of SA_NOCLDWAIT to reflect 2.6 behavior.
    Much other text rewritten.

wait4.2
  mtk
    Rewrote this page, removing much duplicated information,
    and replacing with pointers to wait.2.

Luis Javier Merino Morán / mtk
CONFORMING TO said "SVr4, POSIX". Changed to "4.3BSD"

waitid.2
mtk
New link to wait.2

assert.3

After bug report from Branden Robinson
The assert() failure message goes to stderr not stdout.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=284814

ctime.3
mtk
Noted that 0 in tm_mday is interpreted to mean the last day
of the preceding month.

getnameinfo.3
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=229618
getnameinfo() does not set errno, it returns a non-zero
value indicating the error.
mtk
added EAI_OVERFLOW error

killpg.3
mtk
Minor changes to SEE ALSO and CONFORMING TO.

lseek64.3
aeb
New page by Andries Brouwer

tzset.3
Richard Kreckel
Change "NULL" to "empty" when talking about the value of TZ.
http://sources.redhat.com/bugzilla/show_bug.cgi?id=601

printf.3
After bug report from Jan Kuznik
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=205736
Fixed bad realloc() use in snprintf() example

realpath.3
mtk
Added discussion
of resolved_path == NULL.

random.4
  After bug report from John V. Belmonte
    Updated init and quit scripts to reflect kernel 2.4/2.6 reality
    (Scripts taken from drivers/char/random.c)
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=247779

proc.5
  mtk
    Updated description of /proc/loadavg to include
    nr_running(), nr_threads, last_pid.

    rtsig-max and rtsig-nr went away in 2.6.8

    updated statm, and fixed error in order of list

boot.7
  applied patch from Martin Schulze

capabilities.7
  mtk
    Added O_NOATIME for CAP_FOWNER

netdevice.7
  Karel Kulhavy and AEB
    Formatting fix after note from Karel Kulhavy and AEB, plus a
    few wording fixes.

signal.7
  mtk
    /proc/sys/kernel/rtsig-* were superseded by RLIMIT_SIGPENDING
    in kernel 2.6.8.

tcp.7
  mtk/aeb
    Updated details of interaction of TCP_CORK and TCP_NODELAY.

========== Changes in man-pages-2.01 ==========

Released:
 2004-12-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Carsten Hey <c.hey@web.de>

Johannes Berg <johannes@sipsolutions.de>
Joshua Kwan <joshk@triplehelix.org>
Marek Habersack <grendel@debian.org>
Martin Schulze <joey@infodrom.org>
Matthew Dempsky <jivera@flame.org>
Matthew Gregan <kinetik@orcon.net.nz>
Pedro Zorzenon Neto <pzn@terra.com.br>
Tony Crawford <tony@klosterdorf.de>

Apologies if I missed anyone!

Global changes
---

accept.2
close.2
send.2
setsid.2
socket.2
closedir.3
initgroups.3
mkstemp.3
opendir.3
readdir.3
telldir.3
  Matthew Dempsky, mtk
    triggered by http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=283179
    The wording describing how errno is set was fixed up in these pages.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

sendfile.2
  mtk
    Adjusted descriptions of argument file types to be closer to
    2.6 reality.
    Wording and formatting changes.

ctan.3
ctanh.3
  Tony Crawford
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=270817
    Formulae on the pages should be T = S / C not T = C / S.

errno.3

Martin Schulze, mtk
Removed errno declaration from prototype, added notes
on historical need for this declaration.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=174175

aio_return.3
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=224953
Changed erroneous "aio_return(2)" to "aio_return(3)".

posix_openpt.3
mtk
New by mtk

ptsname.3
mtk
Added description of ptsname_r().
Added ERRORS.

ptsname_r.3
mtk
New link to ptsname.3.

shm_open.3
Matthew Gregan
add <fcntl.h> to synopsis
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=271243

strcasecmp.3
Marek
Habersack
.SH "CONFORMING TO"
-BSD 4.4
+BSD 4.4, SUSv3
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=234443

strfry.3
Joshua Kwan
Added _GNU_SOURCE to prototype
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=213538

strftime.3
Cartsen Hey
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=276248

Changed range for "%S" from 0..61 to 0..60.

SUSv3 says 0..60. I think the manual page probably says
0..61, because that's what SUSv2 said.

(Some other implementations' man pages also say 0..61 --
e.g., Solaris 8 & 9, Tru64 5.1B; FreeBSD 5.1 says 0..60.)

The glibc manual currently says 0..60.

Given that SUSv3 says 0..60, I've changed the
manual page to also say this:

-The second as a decimal number (range 00 to 61).
+The second as a decimal number (range 00 to 60).
+(The range is up to 60 to allow
for occasional leap seconds.)

sysconf.3
Johannes Berg
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=226974
-.BR POSIX2_FORT_RUN " - " _SC_2_FORT_DEV
+.BR POSIX2_FORT_DEV " - " _SC_2_FORT_DEV

system.3
Pedro Zorzenon
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=242638
Noted use of _XOPEN_SOURCE to get macros from <stdlib.h>
for wait(2).

mtk
Changed name of argument from 'string' to 'command' (like POSIX).

Noted that glibc does nowadays explicitly check for the existence
of the shell if 'command' is NULL, rather than the older behavior
of assuming the shell exists and always returning 1 if
'command' is NULL.

Other wording and formatting clean-ups.

undocumented.3
Remove some functions names that *are* documented.

========== Changes in man-pages-2.02 ==========

Released: 2005-04-14

Contributors

The following people

contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>

Kai Makisara <Kai.Makisara@kolumbus.fi>
Marko Kohtala <marko.kohtala@gmail.com>
Martin Pool <mbp@sourcefrog.net>
Martin (Joey) Schulze <joey@infodrom.org>
Matthias Lang <matthias@corelatus.se>
Michael Haardt <michael@moria.de>
Michael Mühlebach <michael@anduin.ch>
Mike Frysinger <vapier@gentoo.org>
Sasa Stevanovic <mg94c18@alas.matf.bg.ac.yu>
Serguei Leontiev <leo@sai.msu.ru>

Apologies if I missed anyone!

Global changes
---

ctime.3
tzselect.8
zdump.8
zic.8
  Martin (Joey) Schulze
    Removed SEE ALSO reference to nonexistent newctime(3).
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=236884

Typographical
or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

clone.2
  mtk
    Noted the PID caching behavior of NPTL's getpid()
    wrapper under BUGS.

    Added futex(2), set_thread_area(2), set_tid_address(2),

tkill(2) under SEE ALSO.

epoll_ctl.2
epoll_create.2
Marko Kohtala / mtk
Improved various error descriptions.

epoll_wait.2
David Lloyd / Mike Frysinger, Marko Kohtala
Added EINTR to errors.

fcntl.2
Jamie Lokier / mtk
Improved discussion of F_SETOWN and F_SETSIG with respect to
multi-threaded programs.
Generally cleaned up the discussion of F_SETOWN.

Updated CONFORMING TO to note that F_GETOWN and F_SETOWN are
now in POSIX.

link.2
mtk
Noted discrepancy between Linux and POSIX.1 when oldpath
is a symbolic link.
See: http://bugs.linuxbase.org/show_bug.cgi?id=367
and: http://www.opengroup.org/austin/mailarchives/ag/msg08152.html

Michael Haardt / mtk
Clarified EXDEV error description: it isn't possible to link
across mount points, even if the mount points refer to the same
file system.

mincore.2
mtk, after note from Gordon Jin
Updated ERRORS.

pipe.2
As per message from Serguei Leontiev
Removed SVr2, AT&T, and BSD from CONFORMING TO, since
a pipe on those systems is actually bidirectional.
(Pipes are implemented as STREAMS on the former, and
sockets on the latter.)

posix_fadvise.2
mtk
Noted kernel version where posix_fadvise() appeared and
noted bug in handling of 'len' in kernels < 2.6.6.

rename.2
  Michael Haardt
    Clarified EXDEV error description: it isn't possible to rename
    a file across mount points, even if the mount points refer to
    the same file system.

semop.2
  mtk
    Noted kernel version numbers for semtimedop().

setitimer.2
   Matthias Lang, mtk
    Noted MAX_SEC_IN_JIFFIES ceiling.
    Added note about treatment of out-of-range tv_usec values.

sigqueue.2
  Johan Walles, Martin (Joey) Schulze
    Added sigqueue.2 to SEE ALSO.

times.2
  mtk
    Added notes on non-standard behavior: Linux allows 'buf' to
    be NULL, but POSIX.1 doesn't specify this and it's non-portable.

uselib.2
  Andries Brouwer
    Improved DESCRIPTION; clarified distinction between
    EACCES and ENOEXEC.

bcopy.3
  Heikki Orsila
    bcopy() handles overlapping case, but memcpy() does not,
    so for consistency memmove() should be also mentioned.

getmntent_r.3
  Martin (Joey) Schulze
    New link to man3/getmntent.3.

memcpy.3
  Small wording change after suggestion from Sasa Stevanovic.

strcasestr.3
  mtk
    Created as link to strstr.3.

strftime.3
  mtk
    Noted that SUSv2 allowed a range of 00 to 61 for %S specifier.

strstr.3
  mtk
    Added description
 of strcasestr().

random.4
  aeb
    Improved description of read from /dev/urandom.

st.4
  Kai Makisara
    Substantial updates.

man.7
  Martin Schulze
  Branden Robinson
  Colin Watson
    Mention the .URL macro more verbosely.

========== Changes in man-pages-2.03 ==========

Released: 2005-06-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Joey (Martin) Schulze <joey@infodrom.org>
Johannes Nicolai <johannes.nicolai@hpi.uni-potsdam.de>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Klaus Ethgen <Klaus@Ethgen.de>
Pavel Heimlich <tropikhajma@seznam.cz>
Ross Boylan <RossBoylan@stanfordalumni.org>
Vincent Fourmond <vincent.fourmond@9online.fr>

Apologies if I missed anyone!

Global changes
---

console.4
console_ioctl.4
mouse.4

tty.4
vcs.4
  Pavel Heimlich
    Change `ttys(4)' to `ttyS(4)'.

Typographical
 or grammatical errors have been corrected in several
places.

Changes to individual pages
---

clone.2
  mtk
    Substantially enhanced discussion of CLONE_THREAD.

    Added CLONE_SYSVSEM, CLONE_UNTRACED, CLONE_STOPPED.

    Other minor fixes.

execve.2
  aeb
    Noted effect of ptracing when execing a set-UID program.

fcntl.2
  Johannes Nicolai / mtk
    Noted F_SETOWN bug for socket file descriptor in Linux 2.4
    and earlier.

    Added text on permissions required to send signal to owner.

flock.2
  mtk
    Noted that lock conversions are not atomic.

getrusage.2
  mtk
    ru_nswap has never contained useful information.
    Kernel 2.6.6 clarified that with a patch
    ("[PATCH] eliminate nswap and cnswap"). See also:
    http://www.ussg.iu.edu/hypermail/linux/kernel/0404.1/0720.html

kill.2
  mtk
    Clarified wording of the 'pid == -1' case.

mount.2
  mtk

Added MNT_EXPIRE, plus a few other tidy-ups.

sched_setaffinity.2
  mtk
    Added text to note that sched_setaffinity() will migrate the
    affected process to one of the specified CPUs if necessary.

    Added a NOTE to point out that the affinity mask is actually a
    per-thread attribute that can be adjusted independently for
    each thread in a thread group.

shmctl.2
  mtk
    Noted aberrant Linux behavior with respect to new attaches to a
    segment that has already been marked for deletion.

    Noted changes in permissions required for SHM_LOCK/SHM_UNLOCK.

wait.2
  mtk
    Noted that the __W* flags can't be used with waitid().

confstr.3
  mtk
    Added _CS_GNU_LIBC_VERSION and _CS_GNU_LIBPTHREAD_VERSION.

hosts.5
  Ross Boylan / Martin Schulze
    various changes as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=304242

proc.5
  mtk
    Minor changes to discussion of /proc/PID/stat signal fields.
     Added 'rt_priority' and 'policy' to /proc/PID/stat.

capabilities.7
  mtk
    1,$s/inherited/inheritable/g

regex.7
  Vincent Fourmond / Joey (Martin) Schulze
    Removed discussion of `[[:<:]]' and `[[:>:]]' since they do
    not seem to be in the glibc implementation.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=295666

tzselect.8

Joey (Martin) Schulze / Klaus Ethgen
The default zoneinfo directory is now /usr/share/zoneinfo.
(was: /usr/local/etc/zoneinfo)
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=267471

========== Changes in man-pages-2.04 ==========

Vincent Lefevre <vincent@vinc17.org>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Various pages
mtk
For consistency across pages:

1,$s/nonzero/non-zero/g

Typographical or grammatical errors have been corrected in several
places.

New pages
----

pthreads.7
  mtk
    An overview of the Linux implementations of POSIX threads.

Changes to individual pages

_exit.2
  mtk
    Various
 minor changes.

epoll_ctl.2
  Mike Furr
    BUGS: In kernels < 2.6.9, EPOLL_CTL_DEL required a non-NULL
    'event', even though this argument is ignored.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306517

flock.2
  mtk / Kevin Ryde
    Clarified semantics of relationship between flock() locks
    and open file entries and file descriptors.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=291121

getitimer.2
  Olivier Croquette, Thierry Excoffier
    Noted the existence of the short sleep bug (up to 1 jiffy).

getrlimit.2
  mtk
    RLIMIT_RSS only has affect "in 2.4.x", not "in 2.4 and later".

getrusage.2
  Geoff Clare
    Since Linux 2.6, the ru_nvcsw and ru_nivcsw fields are used.

nice.2
  mtk / Guido Trotter
    Rewrote description of return value.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=296183

open.2
  Walter Harms
    O_DIRECT needs _GNU_SOURCE.
  mtk
    O_ASYNC works
 for pipes and FIFOs in Linux 2.6.
    Various minor fixes.

atexit.3
  mtk
    Various minor changes.

exit.3
  mtk
    Various minor changes.

getopt.3
  mtk / Philipp Spitzer
    Fix description of return value.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=308359

hsearch.3
  mtk
    Changed (char *) to (void *) in example.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=313607

log1p.3
  Justin Pryzby
    Make log(3) SEE ALSO log1p(3),
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=309578

makecontext.3
  Tanaka Akira
    Fix description of RETURN VALUE for makecontext(),
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=311800

on_exit.3
  mtk
    Various minor changes.

rand.3
  kabloom
    Small fix to a code example,
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=194842

realpath.3
  mtk / Thomas Hood

When specifying resolved_path as NULL,
realpath()
will (still) only allocate up to PATH_MAX bytes.
Plus other minor changes.
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=239424

rcmd.3
Dave Love
The required header file for these functions on Linux is <netdb.h>,
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=311680

scanf.3
Olivier Guilyardi
Arg for %p is a pointer to _a pointer to_ void,
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=263109

stdin.3
Vincent Lefevre
freopen() can change the descriptors associated with
stdin/stdout/stderr, as per
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=295859

strerror.3
Baurjan Ismagulov
strerror_r(3) requires #define _XOPEN_SOURCE 600,
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=290880

sysconf.3
Peter Cordes / mtk
Fix typo: "_SC_2_DEV" should be "_SC_2_C_DEV".

proc.5
mtk
Added pointers under /proc/sys/net
to tcp.7 and ip.7.

ip.7
mtk
Various wording and formatting fixes.
Reordered /proc/sys/net/ipv4/ip_* file descriptions alphabetically.

tcp.7
Dieter Brueggemann / mtk
Fixes to the discussion of SIOCATMARK and tcp_stdurg.
mtk
Various wording and formatting fixes.
Incorporated some new /proc/sys/net/ipv4/tcp_* file descriptions
from the 2.6.12 source file Documentation/networking/ip-sysctl.txt.

========== Changes in man-pages-2.05 ==========

Released: 2005-06-27

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

A Costa <agcosta@gis.net>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Bas Zoetekouw <bas@debian.org>
Dan Jacobson <jidanni@jidanni.org>
Delian Krustev <krustev@krustev.net>
Dora Anna Volgyesi <volgyesi@elte.hu>
Martin (Joey) Schulze <joey@infodrom.org>
Ove Kaaven <ovek@arcticnet.no>

Apologies if I missed
 anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places. (Special thanks to A Costa.)

Changes to individual pages

_exit.2
  mtk / aeb
      Reversed 2.04 introduction of the term "process termination
      function".

close.2
  mtk
      Clarified what type of lock close() affects.
      Minor formatting changes.

dup.2
  mtk
      Consistent use of terms "open file description",
      "file status flags", and "file descriptor flags".

Removed mention of lock sharing -- it was not accurate.
Minor formatting fixes.

fcntl.2
mtk
Consistent use of terms "open file description",
"file status flags", and "file descriptor flags".
Some rewriting of discussion of file descriptor flags
Under F_DUPFD, replaced some text duplicated in dup.2
with a cross ref to dup.2
Minor wording and formatting fixes.

fpclassify.3
mtk /
Martin (Joey) Schulze / Bas Zoetekouw
The return value of isinf() changed in glibc 2.02
to differentiate positive and negative infinity.
See: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=285765

getgid.2
getuid.2
Delian Krustev
Remove confusing text describing real and effective IDs.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=285852

getitimer.2
mtk
The short sleep bug (up to 1 jiffy) that was newly noted in
man-pages-2.04 has just been fixed in 2.6.12.

getpriority.2
mtk
Changed range documented in main text from -20..20 to -20..19.
Noted that the range is -20..20 on some systems.

open.2
mtk / aeb
Clarification of term "open file description" along with
explanation of what information it maintains.
Other wording improvements.
Various minor wording changes.

atexit.3
mtk / aeb
Reversed 2.04 introduction of the term "process termination
function".
mtk
Noted use of atexit() for establishing function to be invoked on

shared library unload.
Noted that atexit()-registered functions are not invoked on
abnormal termination.
Formatting fixes.

exit.3
mtk / aeb
Reversed 2.04 introduction of the term "process termination
function".
mtk
Minor rewording and formatting changes.

getloadavg.3
mtk
Added #define _BSD_SOURCE to prototype.

log2.3
Martin (Joey) Schulze
Add ERANGE error.

readdir.3
mtk
Added definition of Linux dirent structure.
Some formatting cleanups.

strtod.3
Dora Anna Volgyesi / mtk
strtold() and strtof() need _ISOC99_SOURCE or _XOPEN_SOURCE=600
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=246668

tdestroy.3
mtk
New link to tsearch.3.

tsearch.3
mtk
Added tdestroy to .TH line.

mem.4
mtk
Change "chown root:mem /dev/mem" to
"chown root:kmem /dev/mem".

null.4
mtk
Change "chown root:mem /dev/null /dev/zero" to
"chown root:root /dev/null /dev/zero".

vcs.4
  Dan Jacobson / Martin (Joey) Schulze
    Replaced "selection(1)" by "gpm(8)" under SEE ALSO
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=253515

signal.7
  Ove Kaaven
    SA_SIGACTION should be SA_SIGINFO
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=305369

urn.7
  mtk
    New link to uri.7

Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Many uses of hyphens and dashes were corrected.

New pages
---

canonicalize_file_name.3
  Walter Harms / mtk

Removed Pages
---

sstk.2
  mtk
    AFAIK, this system call has never actually done anything (other
    than be a stub) on any Unix.

Changes to individual pages
---

accept.2
  mtk
    Various wording and formatting fixes.

bind.2
  mtk
    Minor formatting changes

clone.2
  mtk
    Various minor wording improvements; some formatting fixes

connect.2
  mtk
    Various wording and formatting
 fixes.

epoll_create.2
  Bhavesh P Davda
    s/positive/non-negative/   [for file descriptor]

getrlimit.2
  mtk
    Documented RLIMIT_MSGQUEUE limit.
    RLIMIT_RSS ceased to have any effect in 2.4 in kernel 2.4.30.
    (It already didn't have any effect in 2.2.x and 2.6.x.)
    s/MADVISE_WILLNEED/MADV_WILLNEED/

listen.2
  mtk
    Removed historic comment on BSD backlog ceiling.
    Minor wording and formatting changes.

semop.2
  mtk
    Added BUG: in some circumstances, a process that is
    waiting for a semaphore to become zero is not woken
    up when the value does actually reach zero.
    http://marc.theaimsgroup.com/?l=linux-kernel&m=110260821123863&w=2
    http://marc.theaimsgroup.com/?l=linux-kernel&m=110261701025794&w=2

socket.2
  mtk
    Various minor wording improvements

umask.2
  mtk
    Added mkdir(2) to discussion, made term "file mode creation
    mask" clearer.
    Various, mostly
 small, wording changes

errno.3
  Martin Pool
    Change description for ESTALE
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=237344

fgetgrent.3
getgrent.3
getgrent_r.3
  David Lloyd
    Added SEE ALSO putgrent(3)
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=211336

getgrent.3
getgrnam.3
getpwent.3
getpwnam.3
  Lars Wirzenius / mtk
    Replace mention of /etc/{passwd,group} by references to
    "passwd/group database", and LDAP and NIS.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316117
  mtk
    Miscellaneous wording improvements
    Consistent DESCRIPTION and ERRORS wording across these pages.

getnameinfo.3
  mtk
    Relocate misplaced text describing gai_strerror().

getnetent.3
  Petter Reinholdtsen
    s/endservent/endnetent/
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316517

getspnam.3
  Lars Wirzenius / mtk
    Replace mention of /etc/shadow by references
 to
    "shadow password database", and LDAP and NIS.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316117
  mtk, Claus Weber
    Miscellaneous wording improvements
    Consistent DESCRIPTION wording vis-a-vis getpwnam.3 etc.

hsearch.3
  Frederik Deweerdt
    Fix hsearch_r() prototype

scanf.3
  Justin Pryzby / mtk
    Fix description of RETURN VALUE
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=317037
  mtk
    various parts substantially rewritten; added description of
    %n$ form; various text incorporated from the GNU C library
    documentation ((C) The Free Software Foundation).

shm_open.3
  mtk
    Modified details of how user and group ownership of a new
    object are set.
    Various minor wording and formatting cleanups.

elf.5
  Mike Frysinger
    tweaked the short description to include definition of 'ELF'
    add ELFOSABI_NONE to the ELFOSABI_ list
    tweak/add
 more machines to EM_ list for ehdr->e_machine
    fix indenting to be consistent
    tweak the display of the ELF_ST_* macros
    document the Elf_Dyn structure

proc.5
  mtk
    Updated discussion of /proc/stat.
    Added text on the /proc/sys/fs/mqueue/* files.

ip.7
  Steven Murdoch
    Change protocol in UDP prototype.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182635

tcp.7
  Dov Murik
    The first sentence under NOTES about SO_KEEPALIVE and SIGPIPE
    makes no grammatical sense (and possibly also no technical sense).
    It has been removed.

========== Changes in man-pages-2.07 ==========

Released: 2005-07-19

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Mike Frysinger <vapier@gentoo.org>

Apologies if I missed anyone!

Global changes

Various
 pages
  mtk
    The terms "set-user-ID" and "set-group-ID" are now used
    consistently (no abbreviations) across all manual pages.

Various pages
  mtk
    Consistent use of "saved set-user-ID" and "saved set-group-ID"
    (no more "saved user ID", "saved effective UID",
    saved group ID", etc.)

Various pages
  mtk
    Global fixes in textual descriptions:

      uid --> UID
      gid --> GID
      pid --> PID
      id --> ID

Various pages
  mtk
    Consistent use of st_atime, st_ctime, st_mtime, with
    explanatory text, instead of atime/ctime/mtime.

Various pages
  mtk
    Classical BSD versions are now always named x.yBSD (formerly
    there was a mix of x.yBSD and BSD x.y).

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

setresuid.2
  mtk
    Some rewording.

stat.2
  Mike Frysinger
    Improve description
 of st_dev and st_rdev.
  mtk
    Various wording and formatting improvements.

truncate.2
  mtk
    Some formatting fixes

Apologies if I missed anyone!

Global changes

Various pages
  mtk
    RFC references are now always written as "RFC\ nnn"
    (not "RFC nnn" or "RFCnnn").

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

du.1
  Mike Frysinger
    To get an effect like "-h", BLOCKSIZE must start with "human",
    not "HUMAN".

time.1
  Mike Frysinger
    s/standard output/standard error/

clone.2
  Paul Brook / mtk
    Fix small error in description of CLONE_PARENT_SETTID

connect.2
  Heikki Orsila
    Add EINTR error
    See http://lkml.org/lkml/2005/7/12/254

getpriority.2
  mtk
    Expanded discussion of relationship between user and kernel
    representations of the
 nice value.

    Added discussion of RLIMIT_NICE and a cross reference to
    getrlimit.2 under the description of the EACCES error.

    Noted 2.6.12 change in credentials checking for setpriority().

getrlimit.2
  mtk
    Added description of RLIMIT_RTPRIO

    Added description of RLIMIT_NICE

mmap.2
  mtk
    Noted bug in MAP_POPULATE for kernels before 2.6.7.

mremap.2
  mtk
    Added _GNU_SOURCE to prototype.
    Rewrote description of MREMAP_MAYMOVE.
    Rewrote description of EAGAIN error.
    Added discussion of resizing of memory locks.
    Added entries to SEE ALSO.
    Some formatting fixes.

msgctl.2
  mtk
    Added IPC_INFO, MSG_INFO, MSG_STAT descriptions.

nanosleep.2
  Baurzhan Ismagulov
    Add to prototype: define _POSIX_C_SOURCE 199309
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=314435

nice.2
  mtk
    Added sentence noting that range of the nice value is described

 in getpriority.2.
    Added cross-reference to setrlimit(2) for discussion on
    RLIMIT_NICE.

outb.2
  David N. Welton / Justin Pryzby / mtk
    Clarified the order of value and port arguments;
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=263756

pause.2
  mtk
    Added SEE ALSO for sigsuspend.2
    Some formatting fixes.

poll.2
  Tommy Pettersson
    nfds should be prototyped as nfds_t
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=322934

  mtk
    Some wording and formatting improvements.

prctl.2
  mtk
    Since kernel 2.6.13 PR_SET_DUMPABLE can also have the value 2.

rand.3
  Hrvoje Niksic / mtk
    Remove misleading text describing FreeBSD's sranddev() function.
    As per debian bug 328629

readv.2
  mtk / Walter harms
    Added LINUX NOTES on trickery performed by glibc when
    vector size exceeds IOV_MAX.

    Formatting clean-ups.

remap_file_pages.2

mtk
Added
text to note that start and size are both rounded downward.

sched_setparam.2
mtk
Modified discussion of privileges; added pointer to
sched_setscheduler.2 for a discussion of privileges and
resource limits.

sched_setscheduler.2
mtk
Modified discussion of privileges; added discussion of RLIMIT_RTPRIO.

semctl.2
mtk
Added IPC_INFO, SEM_INFO, SEM_STAT descriptions.

shmctl.2
mtk
Added IPC_INFO, SHM_INFO, SHM_STAT descriptions.

sigaction.2
mtk
Split sigpending(), sigprocmask(), and sigsuspend() out
into separate new pages.

Other minor changes

mtk
NOTES: described SA_NODEFER / sa_mask bug which was present in
all kernels up to and including 2.6.13.
See http://marc.theaimsgroup.com/?l=linux-kernel&m=112360948603171&w=2
and http://marc.theaimsgroup.com/?l=linux-kernel&m=112362164911432&w=2
List: linux-kernel
Subject: Signal handling
possibly wrong
From: Bodo Stroesser
Date: 2005-08-09 17:44:06

signal.2
mtk
Updated SEE ALSO to reflect splitting of sigaction.2 into
sigaction.2, sigsuspend.2, sigpending.2, sigprocmask.2

sigpending.2
mtk
New page created by splitting out from sigaction.2

Changed CONFORMING TO.

sigprocmask.2
mtk
New page created by splitting out from sigaction.2
Added text on effect of NULL for 'set' argument.
Added text noting effect of ignoring SIGBUS, SIGFPE, SIGILL,
and SIGSEGV.
Noted that sigprocmask() can't be used in multithreaded process.
Fixed EINVAL error diagnostic.
Changed CONFORMING TO.

sigsuspend.2
mtk
New page created by splitting out from sigaction.2
Added NOTES on usage.
Added new text to DESCRIPTION.
Changed CONFORMING TO.

stat.2
Mike Frysinger
Improve st_blocks description.

carg.3
Ramiro
Aceves / aeb
Change:
One has carg(z) = atan(creal(z) / cimag(z))
to:
One has tan(carg(z)) = cimag(z) / creal(z)

As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=326720

cmsg.3
mtk
s/SOL_TCP/IPPROTO_TCP/ (POSIX standard name)

dlopen.3
Alain Portal
s/-nostartupfiles/-nostartfiles/

getaddrinfo.3
mtk
Nowadays (since 2.3.4) glibc only sets the first ai_canonname
field if AI_CANONNAME was specified (the current behavior
is all that SUSv3 requires).

1,$s/PF_/AF_/g

Added descriptions of AI_ALL, AI_ADDRCONFIG, AI_V4MAPPED,
and AI_NUMERICSERV.

Some wording and formatting fixes.

getpwnam.3
  Bernhard R. Link / mtk
    Add NOTES text describing relationship of pw_dir and HOME and
    pointing out that applications should preferentially inspect HOME.

inet.3
  Mike Frysinger
    Mention "little endian" and "big endian".

    Added note about octal and hex interpretation of
      numbers-and-dots notation.

rpc.3
  mtk / Ludovic Courtes
    Commented out references to rpc_secure(3) -- we don't currently
    have such a page in the man-pages set.
    In response to http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=325115

setenv.3
  mtk
    glibc 2.3.4 fixed the "name contains '='" bug.

strnlen.3
  Mike Frysinger
    Added "#define _GNU_SOURCE" to prototype.

initrd.4
  Norbert Buchmuller / mtk
    Added text noting that the use or real-root-dev for changing
    the root device is obsolete, in favor of pivot root.
    (However, the page still needs to be rewritten to actually
    describe the pivot_root method...)
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=323621

proc.5
  mtk
    Improve text describing /proc/sys/fs/mqueue/* files.

    Describe /proc/sys/fs/suid_dumpable (new in 2.6.13).

    Added placeholder mention

of /proc/zoneinfo (new in 2.6.13).
More needs to be said about this file.

Repaired earlier cut and paste mistake which resulted
in part of the text of this page being duplicated.

utmp.5
Mike Frysinger
Added text on biarch details for ut_session and ut_tv.

capabilities.7
mtk
Added CAP_AUDIT_CONTROL and CAP_AUDIT_WRITE.

ip.7
mtk / Andrew Pimlott
Add a couple of words to make it clear that port is a 16-bit number.
Reformat long source lines (no text changed).

s/SOL_IP/IPPROTO_IP/ (POSIX standard name)

Hasso Tepper
Fix discussion of IPC_RECVTTL / IP_TTL.

signal.7
mtk
Updated SEE ALSO to reflect splitting of sigaction.2 into
sigaction.2, sigsuspend.2, sigpending.2, sigprocmask.2.

socket.7
mtk
Clarified details of use of SO_PEERCRED.

tcp.7
mtk
s/SOL_TCP/IPPROTO_TCP/ (POSIX standard name)
s/SOL_IP/IPPROTO_IP/ (POSIX
standard name)

udp.7
mtk
Added description of UDP_CORK socket option.

s/SOL_UDP/IPPROTO_UDP/ (POSIX standard name)
s/SOL_IP/IPPROTO_IP/ (POSIX standard name)

Samuel Thibault <samuel.thibault@ens-lyon.org>
Tomas Pospisek <tpo_deb@sourcepole.ch>
Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes
---

ptsname.3
getpt.3
unlockpt.3
openpty.3
posix_openpt.3
grantpt.3
pts.4
tty_ioctl.4
  mtk
    Added SEE ALSO for new pty.7 page.

Typographical or grammatical errors have been corrected in several
places.

New pages
---

pty.7
  mtk
    Overview of Unix 98 and
 BSD pseudo-terminals.

Changes to individual pages
---

ldd.1

mtk
Remove "-V" option (fix from Fedora man-pages-2.07-7).

fcntl.2
Peter Chubb / Trond Myklebust / mtk
Since kernel 2.6.10, a read lease can only be placed on a
file descriptor that is opened read-only.
See the following LKML thread of Aug 2005
("fcntl(F GETLEASE) semantics??"):
http://marc.theaimsgroup.com/?l=linux-kernel&m=112371777712197&w=2
http://marc.theaimsgroup.com/?l=linux-kernel&m=112374818213000&w=2
http://marc.theaimsgroup.com/?l=linux-kernel&m=112376335305284&w=2
http://marc.theaimsgroup.com/?l=linux-kernel&m=112377294030092&w=2

mprotect.2
mtk
Add new text to ENOMEM error.

mremap.2
mtk
Added description of MREMAP_FIXED and 'new_address' argument
under NOTES.
Revised text of EINVAL error.

read.2
Samuel Thibault / mtk
read() can fail with EINVAL when using
O_DIRECT
mtk
Added open(2) to SEE ALSO.

shmget.2
mtk
s/int/size_t/ for type of 'size' argument (fix from
Fedora man-pages-2.07-7).

write.2
Samuel Thibault / mtk
write() can fail with EINVAL when using O_DIRECT

atanh.3
mtk
Fix: s/acosh/atanh/ (fix from Fedora man-pages-2.07-7).

fopen.3
mtk
Improved "a+" description (fix from Fedora man-pages-2.07-7).

getrpcent.3
  mtk
    s/getrpcent/setrpcent/ (fix from Fedora man-pages-2.07-7).

stdio.3
  mtk / Justin Pryzby
    Removed references to fropen() and fwopen(), which are
    BSDisms that don't appear in glibc.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=331174

strftime.3
  mtk
    Typo fix: %Ry ==> %Ey [SUSv3 mentions...] (fix from
    Fedora man-pages-2.07-7).

nsswitch.conf.5
  mtk
    s/network/networks/ (fix from Fedora man-pages-2.07-7).

proc.5
  mtk
    Added description of /proc/sys/vm/legacy_va_layout.

socket.7
   mtk
    Update description of SO_RCVLOWAT and SO_SNDLOWAT.
    (fix derived from Fedora man-pages-2.07-7).

==================== Changes in man-pages-2.10 ====================

Released: 2005-10-19

Global changes

The changes in this release consist *solely* of formatting fixes, with
the aim bringing greater consistency to the manual pages according to
the following rules:

-- Function name references should *always* be followed by
  parentheses, "()" (possibly containing a manual page section
  number).

-- The parentheses following a function name should *not* be
  formatted. Thus, for example, instead of:

     .B name()

one should write:

.BR name ()

Much of the change was automated using two scripts:
add_parens_for_own_funcs.sh and unformat_parens.sh.
For the (possible) benefit of downstream manual page maintainers and
translators, I have placed these scripts in a new subdirectory 'scripts'.

NOTE THE FOLLOWING POINTS WELL:

--
These scripts provide a computer-assisted solution to the above
two goals. However, they are not perfect, and their output should
be scanned by a human. (To see what changes the two scripts
would make, without making them, use the "-n" command line option.)

-- The scripts do not fix all instances that violate the above rules:
some manual fixes are required. Two further scripts are provided
to help find remaining instances of function names without
following "()": find_dots_no_parens.sh and find_slashes_no_parens.sh.

The following changes were made:

-- add_parens_for_own_funcs.sh was applied to the pages in Sections
2 and 3.

-- unformat_parens.sh was applied to pages in Sections 2, 3, 4, and 7
(the only sections where such changes were required).

-- further changes (not so very many) were performed by hand.
(found places to fix with the assistance of find_dots_no_parens.sh
and find_slashes_no_parens.sh).

========== Changes in man-pages-2.11
==========

Released: 2005-10-24

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain PORTAL <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Various pages
  mtk
    Most instances of the constant "NULL" are not formatted (bolded) in
    man pages, but a few are. For consistency, formatting on "NULL" has
    been removed where it occurred.

    Many minor formatting fixes were made.

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

getrlimit.2
  mtk
    Added EINVAL error for rlim_cur > rlim_max when calling setrlimit().

path_resolution.2
  mtk
    Repaired discussion of capabilities and file system UID, which
    mistakenly had involved exec() in the discussion.

prctl.2
  mtk
    Removed text saying there
 is no library interface. There
    is nowadays.

mkfifo.3
  mtk
    Minor change to RETURN VALUE text.

sk98lin.4
  Alain Portal
    Formatting fixes.

capabilities.7
  mtk
    Minor changes.

========== Changes in man-pages-2.12 ==========

Released: 2005-10-31

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Akihiro MOTOKI <amotoki@dd.iij4u.or.jp>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Brian M. Carlson <sandals@crustytoothpaste.ath.cx>
herbert <herbert@gondor.apana.org.au>
Martin Landers <martin.landers@treibgut.net>
Michael Benedict <benedict@starbak.net>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

mlock.2
  mtk
    Reworded text around PAGESIZE, noting also that
    sysconf(_SC_PAGESIZE)
 can be used.

path_resolution.2
  mtk / aeb
    Removed words "as well" (added in 2.11) from the phrase
    "and it gets these last five capabilities if its fsuid is 0 as well"
    since there are (unusual) situations in which fsuid can be 0 while
    the effective UID is not.

    Reworked (cut down) discussion of capabilities, moving part of
    it into capabilities.7

setresuid.2
  mtk

Add text to note that setresuid() always modifies the file
system UID, and setresgid() likewise always modifies the file
system GID.

shmget.2
  mtk
Added (brief) description of SHM_HUGETLB.

sigaltstack.2
  mtk / Martin Landers
Noted that ss_sp is automatically aligned by the kernel.

byteorder.3
  Brian M. Carlson / herbert
Change <netinet/in.h> to <arpa/inet.h> in prototype; add text
explaining that some systems need the former header.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=265244

capabilities.7
   mtk
Reworked part of the discussion of exec() and capabilities.
Added sub-section "Effect of User ID Changes on Capabilities".
Reworked discussion of CAP_SYS_ADMIN and file-max.

========== Changes in man-pages-2.13 ==========

Released: 2005-11-03

This release consists entirely of formatting and typographical fixes.

Global changes

Typographical or grammatical errors have been corrected in several
places.

Various pages
  mtk
Function and page cross references that were italicized were
made bold (which is how the majority of function and page
cross references were already done).

Various pages
  mtk
Instances of things like "NULL-terminated string" were changed to
"null-terminated string".

Various pages
  mtk
      Pathnames, structures, arguments, and <header-files> that were
      bold were changed to italics.

Various pages
  mtk
      Instances
 of the constant "NULL" that were bold-faced were made
      unformatted (which is how most instances of "NULL" were already
      formatted.)

========== Changes in man-pages-2.14 ==========

Released: 2005-11-17

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Angelo <ang3l0@katamail.com>
Avery Pennarun <apenwarr@nit.ca>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Martin (Joey) Schulze <joey@infodrom.org>
Stefan Brüns <stefan.bruens@rwth-aachen.de>
Volker Reichelt <reichelt@igpm.rwth-aachen.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
----

rexec.3
  mtk / Justin Pryzby
      This page is taken as is from the FreeBSD 5.4 distribution.
      (Not checked against Linux reality, but likely things are
      the same.)
      See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=336875

Changes
 to individual pages
---

arch_prctl.2
  mtk
      Updated discussion about lack of prototype in glibc.

execve.2
  mtk
      Improved description of E2BIG error: it relates to the sum
      of the bytes in both environment and argument list.

fcntl.2
  mtk
      Clarified parts of the discussion of file leases,
      noting effect of open(O_NONBLOCK), interruption
      by signal handler, or termination by signal in
      lease breaker. In response to
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=339037

stat.2
  mtk / Stefan Brüns
      Added LINUX NOTES describing nanosecond timestamps.

frexp.3
  Volker Reichelt / mtk
      Fixed to point out that frexp() returns a number whose
      absolute value is >= 0.5 and < 1. Amended the example
      program to demonstrate this.

open.2
  mtk / Avery Pennarun
      Add EWOULDBLOCK error for file leases.

 In response to
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=339037

putenv.3
  mtk
      Although the glibc implementation returns -1 on error (and some
      other man pages (e.g., the BSDs) also document that value for
      error returns), SUSv3 merely says "non-zero" (and this is
      what manual pages on many implementations also say).

posix_memalign.3
  mtk
      Formerly, the page said that all systems declare memalign() in

<malloc.h>. In fact, many declare it in <stdlib.h>.

strtok.3
  mtk
    Almost a complete rewrite after Angelo pointed out
    that the existing page was deficient.

sd.4
  Martin Schulze
    Remove SEE ALSO for nonexistent scsi.4.

proc.5
  mtk
    Updated discussion of /proc/sys/kernel/pid_max.

signal.7
  mtk
    Added pthreads.7 to SEE ALSO.

ld.so.8
  mtk
    Fix typo: s/LD_DEBUG_OUTPUT/LD_PROFILE_OUTPUT/

========== Changes in man-pages-2.15 ==========

Released:
 2005-11-30

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
James Vega <jamessan@debian.org>
Malcolm Scott <mas90@io.malc.org.uk>
Senthil Kumar <senthilkumar_sen@hotpop.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

sigvec.3 -- for details, see below.

sigset.3 -- for details, see below.

Changes to individual pages
---

kill.2
  mtk
    Added text describing the 2.6.[0-7] EPERM bug that occurred
    when sending signals to a process group.

sigaction.2
  mtk
    Noted that si_signo is unused on Linux.

sigpending.2
  mtk
    Added BUGS noting wrapper function problem that existed
    in glibc versions <= 2.2.1.

sigpause.2
  mtk
    Moved to section 3; see also sigpause.3 below.

sigsetops.3
   mtk
    Added a GLIBC NOTES section describing sigisemptyset(),
    sigandset(), and sigorset().

sigvec.2
sigblock.2
  mtk
    These pages have been deleted, and replaced by a new sigvec.3
    man page that more fully describes the BSD signal API.

siggetmask.2
sigmask.2
sigsetmask.2
  mtk
    These links to the now-deleted sigblock.2 have been also been
    deleted. They are replaced by corresponding links in Section 3:
    sigmask.3, sigsetmask.3, siggetmask.3.

sigvec.3

mtk
This new page is provides a fuller description of the
BSD signal API than was provided in the now-deleted sigvec.2
and sigblock.2.

sigblock.3
siggetmask.3
sigmask.3
sigsetmask.3
mtk
Created as links to sigvec.3.

sigpause.3
mtk
Moved here from Section 2.

Some minor wording fixes; clarified System V origins of
X/Open flavor of this function.

sigset.3
mtk
New page describing the System
V signal API: sigset(), sighold(),
sigrelse(), sigignore().

strftime.3
James Vega
Add further text clarifying that %+ specifier is not supported in
glibc2.
mtk
Added GLIBC NOTES section describing optional 'flag' and 'width'
components of conversion specifiers.
Some wording changes to bring terminology closer to SUSv3.
Added an example program.

vm86old.2
mtk / aeb
Add as new link to vm86.2.

intro.7
mtk
Added a few words to reflect the fact that several of the section
7 pages provide overviews of various topics.

signal.7
mtk
Added some SEE ALSO entries.

socket.7
  Senthil Kumar / mtk
    Added text noting that select()/poll() do not respect SO_RCVLOWAT.

udp.7
  Malcolm Scott
    s/tcp_socket/udp_socket/ in example
    Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=340927

========== Changes in man-pages-2.16 ==========

Released:
 2005-12-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alan Stern <stern@rowland.harvard.edu>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Urs Thuermann <urs@isnogud.escape.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

HOWTOHELP
  Urs Thuermann
    Added instructions for finding maintainer in Debian package.

poll.2
  mtk
    Added NOTES about INFTIM constant provided on some other
    implementations.

shmop.2
  Alan Stern

The -1 error return of shmat() should be cast "(void *)".

strftime.3
  aeb
    Remove junk text (actually intended as source code comment
    in page).

ip.7
  Urs Thuermann
    Fix a typo: s/SOCK_RAW/SOCK_PACKET/

packet.7
  Urs Thuermann
    Clarification: s%SOCK_PACKET%PF_INET/SOCK_PACKET%

==========
Changes in man-pages-2.17 ==========

Released: 2005-12-13

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Justin Pryzby <justinpryzby@users.sourceforge.net>
Michael Haardt <michael@moria.de>
Urs Thuermann <urs@isnogud.escape.de>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

fmemopen.3
  Walter Harms / mtk
    New documentation for the glibc-specific fmemopen() and

open_memstream(). Based on glibc info page.

pipe.7
mtk (with prompting and suggestions for improvements by
Michael Haardt)
New page providing overview of pipes and FIFOs.

Changes to individual pages

HOWTOHELP
mtk
Added notes on how to
write example programs for manual pages.

fork.2
mtk
Added pointers to examples of fork() in wait.2 and pipe.2.

pipe.2
mtk
Added an example program.
Added SEE ALSO for new pipe.7 page.

wait.2
mtk
Added example program demonstrating use of fork() and waitpid().

carg.3
Justin Pryzby
Delete line that should have been deleted when applying
2.08 fix for this page.

getaddrinfo.3
mtk
Rearranged EAI_* list alphabetically.

inet.3
mtk
Added GLIBC NOTES describing feature test macros required
to expose declaration of inet_aton().

open_memstream.3
mtk
New link to new fmemopen.3.

fifo.4

mtk
Added SEE ALSO for new pipe.7 page.

environ.5
mtk
Removed BROWSER, since it seems not in fact to be common.

socket.7
Urs Thuermann
Added documentation of SO_TIMESTAMP.

tcp.7
mtk
Noted 200 millisecond ceiling imposed on TCP_CORK.

udp.7
mtk

Rearranged options into something approximating alphabetical order.

========== Changes in man-pages-2.18 ==========

Released: 2005-12-15

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Justin Pryzby <justinpryzby@users.sf.net>
Karsten Sperling <karsten.sperling@stud.uni-karlsruhe.de>
Martin (Joey) Schulze <joey@infodrom.org>
Mike Frysinger <vapier@gentoo.org>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

---

bind.2
  mtk
    Added mention of AF_INET6 address family.
    Added discussion of sockaddr structure and an example in the
    Unix domain.

recv.2
  mtk
    Put 'flags' list in alphabetical order.

send.2
  mtk
    Added cross-reference from discussion
 of MSG_MORE to UDP_CORK
    in udp(7).

    Put 'flags' list in alphabetical order.

err.3
  mtk
    Added CONFORMING TO section noting that these are
    non-standard BSDisms.

errno.3
  Justin Pryzby
    Added SEE ALSO for err.3.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867

gethostbyname.3
  Martin (Joey) Schulze / mtk
    Added references to nsswitch.conf(5); remove cross references
    to resolv+(8).
    See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=308397

perror.3
  Justin Pryzby
    Added SEE ALSO for err.3 .
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867

resolver.3
  mtk / Martin (Joey) Schulze
    Remove cross references to resolv+(8); add cross references to
    resolv.conf(5).
    See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=214892

    Added SEE ALSO entry for resolver(5);

see http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=251122

strerror.3
mtk / Stefan Puiu
Rewrote and extended the discussion of the two flavors of strerror_r(), and added some additional information on strerror().
Justin Pryzby
Added SEE ALSO for err.3, as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867

elf.5
Mike Frysinger
Fix three typos in identifier names.

operator.7
Karsten Sperling
The + operator should be in the list of unary operators.

raw.7
mtk
Small wording changes around discussion of SO_BSDCOMPAT.
Fixed a couple of wording errors elsewhere.
Reformatted some long lines.

socket.7
mtk, after a note by Stefan Puiu
Updated discussion of SO_BSDCOMPAT.

Reformatted some long lines.

Noted the Linux-specific feature whereby setsockopt() doubles the value given for SO_SNDBUF and SO_RCVBUF.

Noted kernel-imposed minimum values for SO_SNDBUF and SO_RCVBUF.

udp.7
mtk, after a note by
Stefan Puiu
Updated discussion of SO_BSDCOMPAT.

unix.7
mtk
Added new (UN)SUPPORTED FEATURES section in which it is noted that Unix domain sockets do not support MSG_OOB or MSG_MORE.

Noted details of SO_SNBUF and SO_RCVBUF support for

Unix domain sockets.

Released: 2005-12-23

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

HOWTOHELP
  mtk
    Minor changes.

bind.2
  Stefan Puiu / mtk
    Remove text under EINVAL error: "This may change in the
 future:
    see linux/unix/sock.c for details." This behavior has been
    unchanged for a long time, and seems unlikely to change.

    Add EADDRINUSE to errors.

send.2
  aeb
    Add cmsg(3) to SEE ALSO.

fopen.3

Walter Harms / mtk
Added description of 'x' mode character (exclusive open).

pipe.7
mtk / aeb
Some wording changes to description of pipes.

========== Changes in man-pages-2.20 ==========

Released: 2006-01-03

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

sigaltstack.2
mtk
Added some text to explain the usual scenario in which
sigaltstack() is employed.

getloadavg.3
mtk
Noted that this function is available since glibc 2.2.

strcpy.3
mtk
s/nulls/null bytes/

capabilities.7
mtk
Noted that capability bounding set appeared with kernel 2.2.11.

arp.7
icmp.7
ip.7
ipv6.7
netdevice.7
packet.7
raw.7
rtnetlink.7
socket.7

tcp.7
unix.7
udp.7
  mtk
    The only changes to these pages have been for formatting:
      -- Structure definitions were changed to K&R style
      -- Some long source lines were broken to fit into ~70
        character lines.
    No changes were made to the content of these pages (yet...).

Senthil Kumar <senthilkumar_sen@hotpop.com>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes
---

dd.1 cp.1
truncate.2 gethostname.2 lseek.2 listxattr.2 readlink.2
sysfs.2 stat.2 ustat.2 uname.2 getdomainname.2
argz_add.3
 asprintf.3 confstr.3 bstring.3 bzero.3 dlopen.3 fwide.3
gethostbyname.3 getline.3 getlogin.3 getnameinfo.3 getpass.3 hsearch.3
perror.3 printf.3 readdir.3 scanf.3 stpcpy.3 strdup.3 strfmon.3
strftime.3 string.3 strptime.3 sysconf.3 termios.3 ttyname.3
dsp56k.4 tty_ioctl.4
elf.5 proc.5 termcap.5
charsets.7 unix.7
  mtk
    Various pages use inconsistent terms for 'null byte' (which
    is the C99/SUSv3 term for the '\0' character).

To rectify this the following changes were made in the above pages:

Replace 'zero byte' with 'null byte'.
Replace 'null character' with 'null byte'.
Replace 'nulls' with 'null bytes'.
Replace 'NUL-terminated' by 'null-terminated'.
Replace 'NUL' by 'null byte'.
Replace 'terminating NUL' by 'terminating null byte'.
Replace 'final NUL' by 'terminating null byte'.
Replace 'NUL character' by 'null byte'.

Various pages
  mtk
    Replace "SysV"/"SYSV" by "System V".

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages
---

capget.2
  mtk
    Noted bug that could wrongly cause EPERM in unprivileged capset() with 'pid' field == getpid().

epoll_ctl.2
  mtk
    Noted that EPOLLONESHOT was added in 2.6.2.

gethostname.2
  mtk
    Added GLIBC NOTES describing operation of glibc's gethostname() wrapper function.

mmap.2
  mtk / Mike Frysinger
    Clarify relationship between mmap2(2) and mmap64(3).
  mtk
    A few other small rewordings.

mmap64.3
  Mike Frysinger
    New link to mmap.2.

open.2

mtk
Added BUG noting that O_ASYNC can't be enabled via
open(): fcntl() must be used for this purpose.

recv.2
Stefan Puiu
Relocate misplaced discussion of MSG_DONTWAIT.

dlopen.3
mtk
Rewrote discussion of dlopen() 'flag' argument;
added descriptions
of RTLD_NOLOAD, RTLD_DELETE,
and RTLD_DEEPBIND.

Noted use of atexit() to register a function that is
automatically called when a library is unloaded.

fmemopen.3
mtk
Rewrote substantial parts of the page, and relicensed under GPL.

fseeko.3
Mike Frysinger
Add RETURN VALUE section.

getopt.3
mtk
Noted historical use of <stdio.h> to declare getopt().

qsort.3
mtk / Falk Hueffner
Clarify how strcmp() should be used as the 'compar'
function by providing an example.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=348072

proc.5
mtk
Noted that /proc/mounts is pollable since kernel 2.6.15.

Documented /proc/PID/task.

Noted that the contents of /proc/PID/{cwd,exe,fd,root,task}
are not available if the main thread has terminated.

Senthil Kumar
Add pointer to random(4) for description of files under
/proc/sys/kernel/random.

udp.7
  Stefan Puiu / mtk
    Small rewording of discussion of SO_BSDCOMPAT
    (add cross-ref to socket(7)).

========== Changes in man-pages-2.22 ==========

Released: 2006-02-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andre Noll <maan@systemlinux.org>

Colin Tuckley <colin@tuckley.org>
Stefan Puiu <stefanpuiuro@yahoo.com>
Thomas Hood <jdthood@yahoo.co.uk>
Thorsten Kukuk <kukuk@suse.de>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

mmap.2
  aeb / mtk
    Noted that portable applications should specify fd as -1
    when using MAP_ANONYMOUS.
    Some rewriting of description of MAP_ANONYMOUS.

rt_sigreturn.2
  Thorsten Kukuk
    New link to sigreturn.2.

rt_sigsuspend.2
  mtk

New link to sigsuspend.2.

waitid.2
  mtk
    Noted that waitid() does not set infop->si_uid field on
    most other implementations.

getopt.3
  Walter harms / mtk
    Make clear that when calling getopt_long() and there are no
    short options, then 'optstring' should be "", not NULL.

openpty.3
  Thomas Hood / mtk
    In glibc 2.0.92, openpty() was modified to preferably open
    Unix 98 ptys instead of BSD ptys.

qsort.3
  mtk
    Small rewording under EXAMPLES.

strtol.3
strtoul.3
  Stefan Puiu
    s/string must begin/string may begin/

proc.5
  mtk
    Documented inotify files under /proc/sys/fs/inotify:
    max_queued_events, max_user_instances, and max_user_watches.

Kurt Wall <kwall@kurtwerks.com>
Martin (Joey) Schulze <joey@infodrom.org>
Matthias Andree <matthias.andree@gmx.de>
Robert Love <rlove@rlove.org>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Urs Thuermann <urs@isnogud.escape.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

inotify_init.2
inotify_add_watch.2
inotify_rm_watch.2
  Robert Love, with some additions by mtk.
    New pages describing the inotify API.

mbind.2
get_mempolicy.2
set_mempolicy.2
  Andi Kleen, with additional work by mtk
    New pages describing the NUMA memory allocation policy API.
    Drawn from the set at ftp://ftp.suse.com/pub/people/ak/numa.

rtc.4
  Urs Thuermann, with additional work by mtk
    New page describing the real-time clock driver.

inotify.7
  mtk
    Overview of the inotify API.

Changes to individual pages
---

clone.2
  Andi Kleen
    On x86, clone() should not be called through vsyscall,
    but directly through "int $0x80".

fcntl.2
  mtk
    Small wording changes.

    Added cross-ref to inotify.7 under the description of dnotify.

kill.2
  mtk / Britton Leo Kerin
    Small wording change under NOTES to clarify
    what happens when a process sends a signal to itself.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=350236

mlock.2
  mtk / Matthias Andree
    Added BUGS txt on interaction between MCL_FUTURE and
    RLIMIT_MEMLOCK.
    See the following LKML thread:
    http://marc.theaimsgroup.com/?l=linux-kernel&m=113801392825023&w=2
    "Rationale for RLIMIT_MEMLOCK"

msgop.2
  mtk / Samuel
 Thibault
    Rewrote declaration of 'msgp' to be "void *" in response
    to http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=350884
    Various other wording fixes.

open.2
  mtk
    Clarify distinction between "file creation flags" and
    "file status flags".

read.2
  Justin Pryzby
    Add SEE ALSO for pread(2).
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351873

sched_setaffinity.2
  mtk
    Major rewrite.

select.2
  mtk
    Added return types to prototypes for FD_SET(), FD_CLR(),
    FD_ZERO, and FD_ISSET().
    Other minor wording changes.

read.2

mtk
Add SEE ALSO for pwrite(2).
(Analogous with read.2 change above.)

errno.3
Kurt Wall / mtk
Add Linux specific errors to this page.

localeconv.3
mtk
Added cross-ref to locale.7 for 'struct lconv' defn.
Other minor wording changes.
Martin (Joey) Schulze
Added SEE ALSO refs for nl_langinfo.3

As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351831

scanf.3
mtk / Justin Pryzby
Minor formatting & wording fixes.

setlocale.3
Martin (Joey) Schulze
Added SEE ALSO refs for nl_langinfo.3
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351831

proc.5
mtk
Migrated description of inotify files to the new inotify.7 page.

ascii.7
Dan Jacobson / mtk
Add text describing characters 001 to 037.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=342173

locale.7
mtk
Minor wording and formatting changes.

========== Changes in man-pages-2.24 ==========

Released: 2006-02-17

Contributors

The following people contributed notes, ideas, or patches that have

been incorporated in changes in this release:

Joerg Habenicht <habenich@planetserver.com>
Luc Van Oostenryck <lkml@looxix.net>
Mike Frysinger <vapier@gentoo.org>
Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies
 if I missed anyone!

New pages
----

get_kernel_syms.2
create_module.2
delete_module.2
init_module.2
query_module.2
  FSF / mtk (with assistance of Luc Van Oostenryck)
    man-pages finally gets pages for these system calls, several
    of which are obsolete in Linux 2.6.
    Took the old GPLed pages dated 1996 and made a number of
    clean-ups and minor additions.

Global changes
----

various pages
  mtk
    Change "file name" to "filename"
    Change "path name" to "pathname"

stpncpy.3
strstr.3
strcmp.3
toupper.3
strlen.3
stpcpy.3
puts.3
strdup.3
strtok.3
isalpha.3
strspn.3
gets.3
strpbrk.3
  mtk after a suggestion from Samuel Thibault

Added SEE ALSO pointers to wide character equivalent functions
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351996

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

clone.2
mtk

Remove duplicate CLONE_STOPPED text.
Commented out crufty text describing EINVAL error
for the now obsolete CLONE_DETACHED flag.
Under CLONE_SIGHAND, noted that 'flags' must also include
CLONE_VM if CLONE_SIGHAND is specified.

fcntl.2
mtk
Under ERRORS: Separate out EAGAIN error for locking mmaped files.

inotify_add_watch.2
mtk
Minor wording fix.

msgop.2
mtk
Documented the EAGAIN error for msgrcv().

fnmatch.3
Mike Frysinger / mtk
Expand explanation of FNM_PATHNAME.

lockf.3
Joerg Habenicht / mtk
Fix up discussion of EAGAIN/EACCESS errors.

Apologies if I missed anyone!

New pages
---

mq_close.3
mq_getattr.3
mq_notify.3
mq_open.3
mq_receive.3
mq_send.3
mq_unlink.3
  mtk
    New pages describing POSIX message queue API.

posix_fallocate.3
  mtk, after a suggestion by James Peach
    New page describing posix_fallocate().

mq_overview.7
  mtk
    New page giving overview of the POSIX message queue API.

Changes to individual pages
---

lseek.2
  Michael Haardt
    Add a case to the EINVAL error text.
  mtk
    Various minor wording fixes
    Added SEE ALSO referring to new posix_fallocate.3.

posix_fadvise.2
  mtk
    Added "#define _XOPEN_SOURCE 600" to prototype.
    Added SEE ALSO referring to new posix_fallocate.3.

proc.5
  mtk
    Migrated information on POSIX message queues to new mqueue.7 page.

inotify.7
  Marten von Gagern
    Fix thinko: s/assuming a
non-blocking/assuming a blocking/

Nicolas François <nicolas.francois@centraliens.net>
Paul Brook <paul@nowt.org>
Siward de Groot <siward@wanadoo.nl>
Steve Beattie <sbeattie@suse.de>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes
---

clone.2
getdents.2
gettid.2
llseek.2
mmap2.2
modify_ldt.2
pivot_root.2
quotactl.2
readdir.2

sysctl.2
syslog.2
tkill.2
  mtk, aeb, Steve Beattie
    Added comment in SYNOPSIS to note that syscall(2)
 may be
    preferable over _syscallN (see intro(2)).

Various minor formatting changes were done on a range of
pages in Section 7. (No content was changed.)

New pages
----

openat.2
  mtk
    New page describing openat(2), added in kernel 2.6.16,
    and some notes on rationale for the at*(2) system calls.

mbind.2
  Andi Kleen, Christoph Lameter, mtk
    Added MPOL_MF_MOVE and MPOL_MF_MOVE_ALL descriptions,
    from numactl-0.9.2 man page.
    Plus a few other smaller fixes.

fexecve.3
  mtk
    New page describing fexecve(3).

futimes.3
  mtk
    New page describing futimes(3).

Changes to individual pages
----

execve.2
  mtk
    Added SEE ALSO pointing to new fexecve.3.

intro.2
  mtk, aeb, Steve Beattie
    Added some notes on syscall(2) versus _syscall.

msgctl.2
msgget.2
msgop.2
  mtk

Added SEE ALSO pointing to mq_overview.7.

open.2
mtk
Added SEE ALSO pointing to new
openat.2.

Split out part of the RETURN VALUE text into separate
NOTES section.

Modified wording referring to raw(8) to
indicate that this interface is deprecated.

poll.2
mtk
Added discussion of ppoll(2), which is new in 2.6.16.

ppoll.2
mtk
New link to poll.2.

recvmsg.2
sendmsg.2
mtk / Paul Brook
Added text to note that although POSIX says msg_controllen
should be socklen_t, glibc actually uses size_t.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=356502
and the associated glibc bug report.
http://sourceware.org/bugzilla/show_bug.cgi?id=2448
mtk
Various formatting fixes.

select.2
mtk
Updated to reflect the fact that pselect() has been implemented
in the kernel in 2.6.16; various other minor wording changes.

pselect() prototype needs "#define _XOPEN_SOURCE 600".

tempnam.3
Justin Pryzby
Clean up description of EEXIST error.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=357893

unlink.2
mtk
Added a little extra text to clarify EISDIR vs EPERM.

utime.2
  mtk
    Added new SEE ALSO entry pointing to new futimes.3 page.

exec.3
  mtk
    Added SEE ALSO pointing to new fexecve.3.

shm_unlink.3
  mtk
    New link to shm_open.3 (should have been made when page
    was originally written).

swab.3
  Walter Harms
    Add needed "#define _XOPEN_SOURCE".

undocumented.3
  mtk
    Updated to remove a few function names that are now documented.

capabilities.7
  mtk
    Various changes to bring this page closer to
    current kernel versions.

inotify.7
  mtk
    Noted that glibc 2.4 is required to get glibc support
    for inotify.

mq_overview.7
  mtk
    Some rewording and added a few words about System V
    message queues.

netlink.7
  Hasso Tepper
    Substantial updates to various parts of this page.
  mtk, Alain Portal
     Minor fixes

pthreads.7
  mtk
    Updated to reflect that the NPTL limitation that only the main
    thread could call setsid() and setpgid() was removed in 2.6.16.

raw.7

Hasso Tepper
Removed text implying that only in kernel 2.2 does IP_HDRINCL
prevent datagrams from being fragmented.

socket.7
mtk
Documented SO_SNDBUFFORCE and SO_RCVBUFFORCE socket options,
new in 2.6.14.

Placed socket options in alphabetical order.

========== Changes in man-pages-2.27 ==========

Released: 2006-03-24

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Charles P. Wright <cwright@cs.sunysb.edu>
Christoph Lameter <clameter@sgi.com>
Chuck Ebbert <76306.1226@compuserve.com>
Daniel Jacobowitz <dan@debian.org>
Ingo Molnar <mingo@elet.hu>
Heiko Carstens <heiko.carstens@de.ibm.com>
Janak
Desai <janak@us.ibm.com>
Paolo (Blaisorblade) Giarrusso <blaisorblade@yahoo.it>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes
---

man7/*
mtk
Various minor formatting changes were done on a range of
pages in Section 7. (No content was changed.)

New pages
---

unshare.2
  mtk, with reference to documentation by Janak Desai
    New page describing unshare(2), added in kernel 2.6.16.

Changes to individual pages
---

clone.2
fork.2
vfork.2
  mtk
    Added SEE ALSO pointing to new unshare.2.

mbind.2
  Christoph Lameter
    MPOL_MF_MOVE_ALL requires CAP_SYS_NICE not CAP_SYS_RESOURCE.

mremap.2
  mtk
    Clarified the description of MREMAP_FIXED and restructured
    the text to reflect the fact that this flag is exposed
    by glibc since version 2.4.

ptrace.2
  Chuck Ebbert, with assistance from Daniel Jacobowitz,
  Paolo (Blaisorblade) Giarrusso,
 and Charles P. Wright;
  after a suggestion from Heiko Carstens.
    Document the following ptrace requests:
      PTRACE_SETOPTIONS (2.4.6)
        plus associated flags:
          PTRACE_O_TRACESYSGOOD (2.4.6)
          PTRACE_O_TRACEFORK (2.5.46)
          PTRACE_O_TRACEVFORK (2.5.46)
          PTRACE_O_TRACECLONE (2.5.46)
          PTRACE_O_TRACEEXEC (2.5.46)
          PTRACE_O_TRACEVFORKDONE (2.5.60)
          PTRACE_O_TRACEEXIT (2.5.60)
      PTRACE_SETSIGINFO (2.3.99-pre6)
      PTRACE_GETSIGINFO (2.3.99-pre6)
      PTRACE_GETEVENTMSG (2.5.46)
      PTRACE_SYSEMU (since Linux 2.6.14)
      PTRACE_SYSEMU_SINGLESTEP (since Linux 2.6.14)

sched_get_priority_max.2
sched_setscheduler.2

sched_setparam.2
  mtk, Ingo Molnar
    Modified to document SCHED_BATCH policy, new in kernel 2.6.16.

    Text describing SCHED_BATCH was added to sched_setscheduler.2,

    and was drawn in part from Ingo Molnar's description in the
    mail message containing the patch that implemented this policy.

    Various other minor rewordings and formatting fixes.

proc.5
  mtk, using text from Documentation/filesystems/proc.txt
    Document /proc/sys/vm/drop_caches, new in kernel 2.6.16.
  mtk, using information from ChangeLog-2.6.14.
    Document /proc/PID/smaps, new in kernel 2.6.14.

capabilities.7
  mtk
    Noted affect of CAP_SYS_NICE for mbind(MPOL_MF_MOVE_ALL).

pthreads.7
  mtk
    Kernel 2.6.16 eliminated buggy behavior with respect to
    the alternate signal stack.

========== Changes in man-pages-2.28 ==========

Released: 2006-03-31

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Aleksandr Blokhin <sass@altlinux.ru>
Greg Johnson <gjohnson@lanl.gov>

Apologies if I missed anyone!

New pages
---

sem_post.3
sem_getvalue.3

sem_close.3
sem_open.3
sem_destroy.3
sem_wait.3
sem_unlink.3
sem_init.3
sem_overview.7
   mtk
      New pages describing the POSIX semaphores API.

      These pages supersede and provide a superset of the information
      in the glibc (3thr) "semaphores(3)" manual page.

Changes to individual pages
----

ppoll.2
  Aleksandr Blokhin
      Fix broken link.

ptrace.2
  mtk
      Wrapped long lines (no content changes).

semctl.2
semget.2
semop.2
  mtk
      Add SEE ALSO pointing to the new sem_overview.7 page.

elf.5
  Greg Johnson
      Removed SEE ALSO reference to nonexistent core(5).

==================== Changes in man-pages-2.29 ====================

Released: 2006-04-06

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Michael Haardt <michael@moria.de>
Roberto Jimenoca <robertojimenoca@terra.es>

Stefan Puiu
<stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes
---

getrlimit.2
prctl.2
sigaction.2
elf.5
signal.7
  mtk
    Added SEE ALSO entry referring to new core.5 page.

New pages
---

mkdirat.2
  mtk
    New page describing mkdirat(2), new in 2.6.16.

mknodat.2
  mtk
    New page describing mknodat(2), new in 2.6.16.

core.5
  mtk
    New page describing core dump files.

mkfifoat.3
  mtk
    New page describing mkfifoat(3).

Changes to individual pages
---

accept.2
getpeername.2
getsockname.2
  Michael Haardt / mtk
    Document EINVAL error for 'len' argument < 0.

fcntl.2

mtk
Expanded discussion of mandatory locking.

getrlimit.2
mtk
Added BUGS text on 2.6.x handling of RLIMIT_CPU limit
of zero seconds. See
http://marc.theaimsgroup.com/?l=linux-kernel&m=112256338703880&w=2

mkdir.2
mtk
Added SEE ALSO entry referring to new mkdirat.2.

mknod.2
mtk
Added SEE ALSO entry referring to new mknodat.2.

open.2
mtk / Roberto Jimenoca
Clarified discussion of file types affected by O_NONBLOCK.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=360243

openat.2
mtk
Rewrote NOTES describing rationale for openat().
Various other minor changes.

recv.2
Stefan Puiu
Removed a misleading cross-ref to socket.2.

shmop.2
mtk
Since 2.6.17-rc1, shmdt() gives the error EINVAL in a further
circumstance: if shmaddr is not aligned on a page boundary.

unshare.2
mtk
Remove text saying that specifying invalid flags "is likely
to cause compatibility problems" since the kernel now
(2.6.17-rc1) contains an explicit check for invalid bits
with a consequent EINVAL error.

mkfifo.3
mtk
Added SEE ALSO entry referring to new mkfifoat.3.

proc.5

mtk
Information on core_pattern and core_uses_pid has
been
migrated to the new core.5 page.

ip.7
Stefan Puiu
Removed paragraph referring to obsolete ipchains / ipfw(4).

sem_overview.7
mtk
Add SEE ALSO entry referring to pthreads.7.

========== Changes in man-pages-2.30 ==========

Released: 2006-04-17

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andre Lehovich <andrel@yahoo.com>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Karel Kulhavy <clock@twibright.com>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

New pages
---

linkat.2
mtk
New page describing linkat(), new in kernel 2.6.16

renameat.2
mtk
New page describing renameat(), new in kernel 2.6.16

symlinkat.2
mtk
New page describing symlinkat(), new in kernel 2.6.16

unlinkat.2

mtk
New page describing unlinkat(), new in kernel 2.6.16

Changes to individual pages
---

link.2
mtk
Added SEE ALSO entry pointing to new linkat.2 page.

openat.2
mtk
Added SEE ALSO entries pointing to new *at.2 pages.

rename.2
mtk
Added SEE ALSO entry pointing to new renameat.2 page.

rmdir.2
mtk
Added SEE ALSO entry pointing to new unlinkat.2 page.

symlink.2
mtk
Added SEE ALSO entry pointing to new symlinkat.2 page.

unlink.2
mtk
Added SEE ALSO entry pointing to new unlinkat.2 page.

termios.3
mtk / Karel Kulhavy
Document the feature test macros required to expose various flags.
Karel Kulhavy
Clarify 'speed' argument for cfsetispeed() text.
Karel Kulhavy / mtk
Note that LOBLK is not implemented on Linux.
mtk
Clarify arguments for cfsetspeed().
Various formatting changes.

full.4
Andre Lehovich
Add a sentence describing the purpose of full(4).

core.5
aeb / mtk

Rework text describing circumstances in which
core dump files are not produced.

mtk / Stefan Puiu

A core dump of a multithreaded process always includes the
PID in the core filename.

mtk / Stefan Puiu

Eliminate some accidentally duplicated text.

========== Changes in man-pages-2.31 ==========

Released: 2006-05-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Joshua Kwan <joshk@triplehelix.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Karel Kulhavy <clock@twibright.com>
Mark Glines <mark@glines.org>
Martin (Joey) Schulze <joey@infodrom.org>
Nishanth Aravamudan <nacc@us.ibm.com>
Reuben Thomas <rrt@sc3d.org>
Ryan S. Arnold <rsa@us.ibm.com>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Page renamings

The following pages have been relocated into section 7, since
that is their more natural home. SEE ALSO references in various
other
pages have been adjusted.

epoll.4
fifo.4
futex.4
complex.5
environ.5

(many pages outside man-pages actually *expect*
'environ' to be in Section 7.)

ipc.5
    renamed to svipc.7

".so" link files have been created to link the old file locations to the
new file locations. These links are added just to ensure that cross
references from any other (non-man-pages) pages will remain valid;
eventually these links will be removed.

New pages
----

fstatat.2
  mtk
    New page for fstatat(2), new in 2.6.16.

adjtime.3
  mtk
    New page for adjtime(3).

error.3
  Justin Pryzby / mtk
    New page describing error() and error_at_line()
    Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=186307

program_invocation_name.3
  mtk
    New page describing program_invocation_name and
    program_invocation_short_name variables.

sockatmark.3
  mtk
    New page for sockatmark(3).

ftm.7
  mtk
    New page describing feature
 test macros.

time.7
  mtk
    New page giving an overview of "time" on Linux systems.

Global changes
----

getgroups.2

wait4.2
chown.2
chdir.2
gettimeofday.2
initgroups.3
dirfd.3
  mtk
    Simplified wording around requirement for _BSD_SOURCE
    feature test macro.

times.2
time.2
gettimeofday.2
getitimer.2
nanosleep.2
ctime.3
rtc.4
  mtk
    Added SEE ALSO referring to new time.7.

err.3
errno.3
perror.3
strerror.3
  Justin Pryzby / mtk
    Add SEE ALSO referring to new error.3.

getdate.3
printf.3
scanf.3
  mtk
    Added SEE ALSO entry referring to setlocale.3.

Changes to individual pages
---

accept.2
  Mark Glines
    Remove mention of SOCK_RDM from this page, since this socket
    type does not support accept()ing connections.

adjtimex.2
  mtk
    Modified text referring to adjtime(); added SEE ALSO for new
    adjtime.3 page.

fsync.2

mtk, after a note by Karel Kulhavy
Rewrote
most of the DESCRIPTION, as well as some other parts
the page, to clarify use and operation of, and rationale for,
fsync(2) and fdatasync(2).

getitimer.2
mtk
Updated discussion of maximum timer value to reflect the fact
that the default jiffy is now 4 milliseconds.

Added text to note that current incorrect behavior of
normalizing tv_usec >= 1000000 will be repaired in a future
kernel; applications should be fixed now.

gettimeofday.2
Karel Kulhavy
Point out more explicitly that 'tz' argument should
normally be NULL.
mtk
Various other minor edits and formatting fixes.

mount.2
mtk
Since kernel 2.6.16, MS_NOATIME and MS_NODIRATIME are settable
on a per-mount basis.
Detail exactly which mount flags can be changed on MS_REMOUNT.

nanosleep.2
mtk / Karel Kulhavy
Clarify RETURN VALUE discussion.

openat.2
mtk
Add SEE ALSO reference pointing
to new fstatat.2.

program_invocation_short_name.3
mtk
New link to new program_invocation_name.3.

recv.2
mtk
Added SEE ALSO for new sockatmark.3.

rmdir.2
Joshua Kwan / Martin (Joey) Schulze / mtk
Correct wording of EBUSY case.

mtk
Add ".." case to ENOTEMPTY error

select.2
Karel Kulhavy
Note more clearly that fd_set arguments can be NULL.
mtk / Karel Kulhavy
Improve opening paragraph describing purpose of select().
mtk
Various other minor edits and formatting fixes.

semget.2
mtk / Nishanth Aravamudan
Add text to noting that the initial values of semaphores
in a new set are indeterminate.

shmget.2
mtk
Add text noting that contents of newly created segment are zero
values.

sigwaitinfo.2
mtk
Noted that all threads should block signal being waited for.

stat.2
Nishanth Aravamudan / mtk
Added NOTE that st_size is always returned as zero for
most
/proc files.
mtk
Add SEE ALSO reference pointing to new fstatat.2.

syscall.2
Justin Pryzby / mtk
Remove bogus BUGS text.

utime.2
mtk
Various minor changes.

confstr.3
mtk
Rewrote RETURN VALUE discussion.
Updated CONFORMING TO.
Removed BUGS.

ctanh.3

Martin (Joey) Schulze / mtk
Fix errors in DESCRIPTION.

ctime.3
mtk
The range of tm_sec is 0..60 (not 0..61).

error_at_line.3
error_message_count.3
error_on_per_line.3
error_print_progname.3
mtk
New links to new error.3.

fmemopen.3
mtk / Ryan S. Arnold
Add text noting that explicitly controlling output buffering
may be useful to catch errors on output operations on an
fmemopen() stream.

getline.3
Justin Pryzby
Add SEE ALSO pointing to getline.3.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=364772

strtod.3
strtoul.3
mtk
Describe correct handling of errno in
order to
distinguish error from success after the call.

Added EXAMPLE section which points to strtol.3 which provides
an example of the use of the analogous strtol(3).

strtol.3
mtk / Justin Pryzby
Add an example program.
mtk
Describe correct handling or errno in order to
distinguish error from success after the call.

tmpfile.3
Reuben Thomas
DESCRIPTION does not need to say "temporary file name"
just "temporary file", since the name is in any case
unavailable to the user.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=363518

mtk
In DESCRIPTION:
Change /automatically deleted when the program terminates normally/
to /automatically deleted when the program terminates/
since deletion occurs on both normal and abnormal termination.

ip.7
Karel Kulhavy / mtk
Various wording improvements and clarifications.

signal.7
mtk / Ulrich Drepper
Add text noting that a signal's disposition is process-wide,
shared by all threads.
mtk
Add text on changing signal dispositions.
Add text on "signal mask and pending signals".
Other minor edits.

time.7
mtk
Added SEE ALSO for new adjtime.3.

ld.so.8
Justin Pryzby
Remove bogus duplicate line.

========== Changes in man-pages-2.32 ==========

Released: 2006-05-13

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Johannes Weiner <root@hnaz.ath.cx>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Karel Kulhavy <clock@twibright.com>
Paul Brook <paul@nowt.org>
Pavel Heimlich <tropikhajma@seznam.cz>

Apologies if I missed anyone!

New pages
---

faccessat.2
  mtk
    New page for faccessat(2), new in 2.6.16.

fchmodat.2
  mtk
    New page for fchmodat(2),
 new in 2.6.16.

fchownat.2
  mtk
    New page for fchownat(2), new in 2.6.16.

futimesat.2
  mtk
    New page for futimesat(2), new in 2.6.16.

Changes to individual pages
---

access.2
  mtk
    Add SEE ALSO reference pointing to new faccessat.2 page.

capget.2
  mtk
    Reworded to reflect that capabilities are per-thread.

chmod.2
  mtk
    Add SEE ALSO reference pointing to new fchmodat.2 page.

chown.2
  mtk
    Add SEE ALSO reference pointing to new fchownat.2 page.

mmap.2
  mtk
    Updated discussion of MAP_NORESERVE since it is no longer
    restricted to MAP_PRIVATE mappings.
    Add reference to discussion of /proc/sys/vm/overcommit_memory
    in proc.5.

openat.2

mtk
Add SEE ALSO reference pointing to new faccessat.2, fchmodat.2,
fchownat.2, futimesat.2 pages.

shmget.2
mtk
Document SHM_NORESERVE flag, new in 2.6.15.

truncate.2
Paul Brook / mtk
Expand
text noting that ftruncate()/truncate() may fail if
asked to extend a file beyond its current length.
Add EPERM error.

utime.2
mtk
Add SEE ALSO reference pointing to new futimesat.2 page.

fopen.3
Justin Pryzby / mtk
Document 'm' (mmap) flag.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=365754
mtk
Document 'c' (notcancel) flag.

futimes.3
mtk
Add SEE ALSO reference pointing to new futimesat.2 page.

qsort.3
Johannes Weiner
Add missing "const" qualifies to cast in EXAMPLE.
mtk
Slight rewording of comments in EXAMPLE.

termios.3
Karel Kulhavy
Clarify meaning of IXANY.
Clarify relationship of MIN with VMIN and TIME with VTIME.
mtk
Noted that CIBAUD, OFDEL, and DELECHO are not implemented
on Linux.
Added explanatory paragraph for phrases "not in POSIX" and
"XSI".

capabilities.7
mtk

Reworded to reflect that capabilities
are per-thread.
Add ioprio_set() to list of operations permitted by
CAP_SYS_NICE.
Add ioprio_set() IOPRIO_CLASS_RT and IOPRIO_CLASS_IDLE
scheduling classes to list of operations permitted by
CAP_SYS_ADMIN.
Note effects of CAP_SYS_NICE for migrate_pages().

========== Changes in man-pages-2.33 ==========

Released: 2006-05-23

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Martin Osvald" <martin.osvald@gmail.com>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Page renamings
---

ftm.7
  mtk / Stefan Puiu
    renamed to the more suggestive feature_test_macros.7

New pages
---

mq_getsetattr.2
  mtk
    New page briefly describing mq_getsetattr(2), the system
    call that underlies
mq_setattr(3) and mq_getattr(3).

rpmatch.3
  Justin Pryzby / mtk
    New page for rpmatch(3).

Changes to individual pages
---

chmod.2
  mtk
    Remove mention of non-standard S_IREAD, S_IWRITE, S_IEXEC.
    POSIX does now document ELOOP.

open.2
  mtk
    Remove mention of non-standard S_IREAD, S_IWRITE, S_IEXEC.

mmap.2
  Justin Pryzby
    Add mincore(2) to SEE ALSO.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367401

msync.2
  Justin Pryzby
    Note that EINVAL can also be caused by
    flags == MS_SYNC | MS_ASYNC.

sched_setaffinity.2
  mtk
    Add CPU_ISSET, CPU_CLR, CPU_SET, CPU_ZERO to NAME section.

select.2
  mtk
    Various minor changes.

select_tut.2
  mtk
    Removed much material that is redundant with select.2.
    Various other changes.

umask.2
  mtk
    Substantial rewrite of description of 'mask'.

CPU_ISSET.3
CPU_CLR.3
CPU_SET.3
CPU_ZERO.3
  mtk

New links to sched_setaffinity.2

FD_CLR.3
FD_ISSET.3
FD_SET.3
FD_ZERO.3
  mtk
    New links to select.2.

fts.3
  Justin Pryzby
    Add SEE also referring to ftw.3.

ftw.3
  Justin Pryzby
    Add SEE also referring to fts.3.

getline.3
  Justin Pryzby
    Various minor clarifications.

mkstemp.3
  mtk
    Clarify that O_EXCL is an open(2) flag.

mq_open.3
  Martin Osvald
    Fix prototype declaration for 'attr'.

mq_notify.3
  Martin Osvald
    s/sigev_signal/sigev_signo/

mq_setattr.3
  mtk
    New link to mq_getattr.3.

mq_timedreceive.3
  mtk
    New link to mq_receive.3.

mq_timedsend.3
  mtk
    New link to mq_send.3.

setlocale.3
  Justin Pryzby
    Added SEE ALSO referring to rpmatch.3.

sigandset.3
sigisemptyset.3
sigorset.3
  mtk
    New links to sigsetops.3.

stdio.3
  Justin Pryzby
    Added SEE ALSO referring to unlocked_stdio.3
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367667

strchr.3
   Justin Pryzby
    Add description of strchrnul().

strchrnul.3
  mtk
    New link to strchr.3.

undocumented.3
  Justin Pryzby / mtk
    Updated to remove some functions that don't exist, and
    therefore don't need to be documented.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367671

unlocked_stdio.3
  Justin Pryzby
    Added SEE ALSO referring to stdio.3
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367667

mq_overview.7
  mtk
    Added section describing relationship between library
    interfaces and system calls.
    Added SEE ALSO referring to new mq_getsetattr.2.

feature_test_macros.7
  Stefan Puiu
    Fix typo: s/_POSIX_C_SOURCE/_POSIX_SOURCE/

========== Changes in man-pages-2.34 ==========

Released: 2006-06-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Aristeu Sergio
 Rozanski Filho <aris@cathedrallabs.org>
bert hubert <bert.hubert@netherlabs.nl>
Chris Curtis <chris.curtis@riptidesoftware.com>
Eduardo Madeira Fleury <efleury@br.ibm.com>
Joerg Scheurich <rusmufti@helpdesk.bera.rus.uni-stuttgart.de>
Justin Pryzby <justinpryzby@users.sf.net>
Kenichi Okuyama <okuyama.kenichi@oss.ntt.co.jp>

Mike Frysinger <vapier@gentoo.org>
Peter Eiserloh <eiserlohpp@yahoo.com>
Stefan Puiu <stefanpuiuro@yahoo.com>
Thomas Dickey <dickey@radix.net>
Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

Global changes
---

tzselect.8
zdump.8
zic.8
  mtk, Joey
    Added header comment noting that these pages are in the public
    domain.

bindresvport.3
getrpcent.3
getrpcport.3
rpc.3
xdr.3
rpc.5
  mtk, aeb, Joey
    Added following to top of these pages to clarify origin and
    license:
    .\" This page
 was taken from the 4.4BSD-Lite CDROM (BSD license)

New pages
---

ioprio_set.2
  Eduardo Madeira Fleury, with edits by mtk, and review by Jens Axboe
    New page for ioprio_get(2) and ioprio_set(2), new in 2.6.13.

offsetof.3
  Justin Pryzby / mtk
    New page describing offsetof() macro.

Changes to individual pages

_exit.2
  mtk
    Add SEE ALSO referring to exit_group.2.

acct.2
  mtk
    Add SEE ALSO referring to acct.5.

fcntl.2
  mtk
    Explicitly mention term "dnotify" in discussion of F_NOTIFY.

inotify_add_watch.2
  Aristeu Sergio Rozanski Filho / mtk
    s/<inotify.h>/<sys/inotify.h>/ in prototypes.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960
  mtk
    Renamed argument from 'path' to 'pathname'.
    Reword introductory paragraph to clarify that
    inotify_add_watch() may also modify an existing watch item.
  mtk
    The EINVAL error can also occur if 'fd' is
 not an inotify
    file descriptor.
  mtk
    Moved BUGS section from this page to inotify.7.

inotify_init.2
  Aristeu Sergio Rozanski Filho / mtk
    s/<inotify.h>/<sys/inotify.h>/ in prototypes.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960

inotify_rm_watch.2
  Aristeu Sergio Rozanski Filho / mtk
    s/<inotify.h>/<sys/inotify.h>/ in prototypes.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960

mtk

The EINVAL error can also occur if 'fd' is not an inotify file descriptor.

ioprio_get.2

mtk

New link to new ioprio_set.2.

mmap.2

mtk

Add SEE ALSO referring to remap_file_pages.2.

mount.2

Kenichi Okuyama

s/MNT_FORCE/MNT_EXPIRE/ under EINVAL error.

mremap.2

Mike Frysinger

s/unsigned long flags/int flags/ in SYNOPSIS.

pipe.2

mtk

Add SEE ALSO referring to popen.3.

posix_fadvise.2

mtk

Add SEE ALSO referring to readahead.2.

read.2

mtk

SEE ALSO for readv should refer to Section 2, not 3.

readahead.2

mtk

Add SEE ALSO referring to posix_fadvise.2.

send.2

Peter Eiserloh

Fix missing arguments in statement about equivalent send() and sendto() calls.

setsid.2

mtk

Add SEE ALSO referring to tcgetsid.3.

shmctl.2

mtk
Minor wording change at start of DESCRIPTION.

stat.2
mtk
Add SEE ALSO referring to access.2.

statfs.2
mtk
Relocated "Note" about f_fsid.

write.2
mtk
SEE ALSO for writev should refer to Section 2, not 3.

__setfpucw.3
mtk, Joey
Added license statement (GPL) after consultation with
Joerg Scheurich.

assert_perror.3
Justin Pryzby
Add #define _GNU_SOURCE to prototype

difftime.3
Joey
Added note about time_t representation on other systems.
Added CONFORMING TO.

ftw.3
Justin Pryzby / mtk
A fairly major revision...
Document FTW_ACTIONRETVAL;
include .SH "RETURN VALUE";
Reorganized and rewrote much of the page
Added an example program.

inet.3
Marc Lehmann
Fixed typo in NOTES.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=370277

isalpha.3
Joey
Updated CONFORMING TO.

mktemp.3
mtk

Updated CONFORMING TO.

printf.3
Walter Harms
Add documentation of %m.

readdir.3
mtk
Added SEE ALSO referring to ftw.3.

re_comp.3
mtk
Note that these functions are obsolete in favor of regcomp(3).
Justin Pryzby
Add SEE ALSO referring to regcomp.3

scandir.3
Mats Wichmann
Reworded CONFORMING TO statement on scandir() and alphasort().

strchr.3
Stefan Puiu
Fix prototype for strchrnul().

strtoul.3
Stefan Puiu
Add text clarifying treatment of strings starting with
minus sign.

tmpnam.3
mtk, after comments by Justin Pryzby
Add text noting the need to use open(O_EXCL).
mtk

Clarify discussion of use of free(3).
Various other minor changes to text and formatting.

tmpfile.3
mtk
Updated CONFORMING TO.

tmpnam.3
mtk, after comments by Justin Pryzby
Add text noting the need to use open(O_EXCL).
Updated CONFORMING TO.

undocumented.3
mtk

Remove offsetof(), which is now documented.

null.4
  mtk
    Added SEE ALSO referring to full.4.

console_codes.4
  Thomas Dickey
    Various improvements and corrections.

epoll.7
  mtk
    Added CONFORMING TO section mentioning FreeBSD kqueue and
    Solaris /dev/poll.

feature_test_macros.7
  mtk
    Added pointer to location of LFS specification.

futex.7
  mtk, after suggestion by Joey.
    Added license statement to page, after discussion with
    original author, bert hubert.
  mtk
    Reformat long lines; no content changes.

inotify.7
  mtk
    'path' argument renamed to 'pathname'.
    A few minor rewordings.
     Added BUGS section describing a couple of bugs.

ip.7
  mtk
    Add SEE ALSO referring to byteorder.3.

man.7
  Justin Pryzby
    Add SEE ALSO referring to groff_man(7).
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369253

========== Changes in man-pages-2.35 ==========

Released: 2006-07-06

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@suse.de>
Andrew Morton <akpm@osdl.org>
Bauke Jan Douma <bjdouma@xs4all.nl>
Davide Libenzi <davidel@xmailserver.org>
Denis Barbier <barbier@linuxfr.org>
Horacio Rodriguez Montero <Horacio.Rodriguez.Montero@galinter.com.ar>
Johan Lithander <johan.lithander@teligent.se>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Mike Frysinger <vapier@gentoo.org>
Stefan Puiu <stefanpuiuro@yahoo.com>
Thorsten Kukuk <kukuk@suse.de>

Apologies if I missed anyone!

Global
changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

sync_file_range.2
  Andrew Morton / mtk
    New page for sync_file_range(2), new in kernel 2.6.17.

Changes to individual pages
---

adjtime.3
  mtk
    Noted BUG that occurs if 'delta' is specified as NULL.
    See http://bugzilla.kernel.org/show_bug.cgi?id=6761

bind.2
  Stefan Puiu
    Add EADDRNOTAVAIL error.
  Stefan Puiu / mtk
    Make example code more complete.

epoll_ctl.2
  mtk / Davide Libenzi
    Added EPOLLRDHUP description.
  mtk
    Added SEE ALSO referring to poll.2.

poll.2
  mtk / Davide Libenzi
    Added POLLRDHUP description.
  mtk
    The correct header file is <poll.h>, not <sys/poll.h>.
    Rewrote and reformatted various other parts.

readlink.2
  mtk
    Nowadays, readlink() returns 'ssize_t', as required in
    POSIX.1-2001.

wavelan.4
  mtk

   Added license statement.

nscd.conf.5
  Thorsten Kukuk
    Add documentation for various new fields.

passwd.5
  Horacio Rodriguez Montero
    Add explanation of 'x' character in 'password' field.
  mtk
    The proper name of "*" is "asterisk" not "star".

tcp.7
  Johan Lithander
    Update RFC reference for ECN.
  Andi Kleen
    Add sentence on "low memory" limit for tcp_mem on 32-bit systems.

========== Changes in man-pages-2.36 ==========

Released: 2006-07-11

Contributors

The following people contributed notes, ideas, or patches that have

been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Jens Axboe <jans@suse.de>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Kyle McMartin <kyle@mcmartin.ca>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages

MAINTAINING
  mtk

  How to maintain man-pages.

TODO
  mtk
    Things that it would be nice to get done for man-pages one day.

scripts/FIXME_list.sh
  mtk
    This script, intended for use by manual page maintainers,
    displays the FIXMEs in the manual page source files.

Changes to individual pages
---

fdatasync.2
fsync.2
  mtk
    Added SEE ALSO referring to sync_file_range.2.

sendfile.2
  mtk / Jens Axboe
    Fix description of 'offset' argument to explain the case
    where 'offset' is NULL.

ferror.3
  Justin Pryzby
    Add SEE ALSO referring to fdopen.3.

intro.3
  mtk
    Removed information about Section 3 subsections -- it doesn't
    reflect current reality, and probably never has.

    Added SEE ALSO referring to intro.2.

tcp.7
  Kyle McMartin
    Correction: tcp_window_scaling is ENabled by default.

Released: 2006-08-02

Contributors

The
 following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Dean Gaudet <dean@arctic.org>
Frank van Viegen <F.C.vanViegen@UTwente.nl>
Helmut Grohne <helmut@subdivi.de>
Ivana Varekova <varekova@redhat.com>
Thomas Huriaux <thomas.huriaux@gmail.com>
Ville Skyttä <ville.skytta@iki.fi>

Apologies if I missed anyone!

Global changes

Thomas Huriaux / mtk

    Various formatting problems found as a result of reviewing the
    following command were fixed.

    for a in $(wc -l man?/*.?| awk '$1 > 2 {print $2}' | grep -v total); do
      echo $a; groff -Tascii -wmac -mman $a > /dev/null;
    done 2>&1 | less

    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=378544

Typographical or grammatical errors have been corrected in several
places.

New pages
----

readlinkat.2
  mtk (after prompting from Ivana Varekova)
    New page for readlinkat(2),
 new in kernel 2.6.16.

Changes to individual pages
----

ldd.1
  Ville Skyttä
    Document "-u" option.

chdir.2
  mtk
    Noted effect of fork() and execve() on current working directory.

chroot.2
  mtk
    Noted effect of fork() and execve() on root directory.

epoll_ctl.2
  Frank van Viegen / mtk
    Fix description of EBADF error.

exevce.2
  mtk
    Add text noting that effective IDs are copied to
    saved set-IDs during execve().
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=379297

getitimer.2
  mtk
    Noted effect of fork() and execve() on interval timers.

getrlimit.2
  mtk
    Noted effect of fork() and execve() on resource limits.

getpriority.2
  mtk
    Noted effect of fork() and execve().

inotify_add_watch.2
  mtk
    Some rewording; included text describing required file
    permissions.

intro.2
  mtk
    Revised description of standards under CONFORMING
 TO.

makecontext.3
  Helmut Grohne / mtk
    Point out that args following 'argc' are int.
  mtk
    Added an example program.
    Various minor wording fixes.

mmap.2
  mtk
    Expand description of MAP_POPULATE.
  mtk, after prompting by Dean Gaudet
    Expand description MAP_NONBLOCK.
  mtk
    Various minor formatting fixes.

openat.2
  mtk
    Added SEE ALSO linking to readlinkat.2.

nanosleep.2
  mtk
    Noted buggy behavior in Linux 2.4 and earlier when
    nanosleep() is restarted after receiving stop+SIGCONT signals.

nice.2
  mtk
    Very minor rewording.

readlink.2
  mtk
    Added SEE ALSO linking to readlinkat.2.

sched_setscheduler.2
  mtk
    Noted preservation of scheduling parameters across execve().

setpgid.2
  mtk

Noted effect of fork() and execve() on process group ID.

setsid.2
  mtk
    Noted effect of fork() and execve() on session ID.

umask.2
  mtk
    Noted effect
 of fork() and execve() on umask.

atexit.3
  mtk
    Noted inheritance of registrations across fork().

capabilities.7
  mtk
    Added material on privileges required for move_pages().
    CLONE_NEWNS needs CAP_SYS_ADMIN.
    keyctl(KEYCTL_CHOWN) and keyctl(KEYCTL_SETPERM) require
    CAP_SYS_ADMIN.

========== Changes in man-pages-2.38 ==========

Released: 2006-08-03

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Most pages
  mtk
    There was a major reworking of the CONFORMING TO sections
    in most manual pages.

    * generally try to rationalize the names used for standards.
      The preferred names are now documented as the head words
      of the list in standards(7). For the future: there is

probably no
need to talk about anything more than
C89, C99, POSIX.1-2001 (or later), xBSD, and SVr4.
(In particular, I've eliminated most references to XPG
and SVID, replacing them with references to SUS or SVr4.)

* eliminate discussion of errors that can occur on other
systems. This information exists only patchily in the
manual pages, is probably of limited use, is hard to maintain,
and was in some cases simply wrong (and probably always was).

* Tried to ensure that those interfaces specified in C99 or
POSIX.1-2001 are marked as such in their manual pages.

intro.1
intro.2
intro.3
intro.4
intro.5
intro.7
feature_test_macros.7
mtk
Added SEE ALSO referring to new standards.7.

Various pages
mtk
Changed instances of "HP UX" to "HP-UX".

Various pages
mtk
Changed instances of "DG-UX to "DG/UX"

Typographical or grammatical errors have been corrected in several
places.

New pages
---

standards.7
mtk
Based on material taken from intro.2, but expanded to
include discussion of many additional standards.

Changes to individual pages
---

bind.2
mtk

Minor wording change for ENOTSOCK error.

intro.2
  mtk
    Removed information on standards to new standards.7.

========== Changes in man-pages-2.39 ==========

Released: 2006-08-05

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Various pages
  mtk
    Updated CONFORMING TO and/or standards references
    in various pages that were missed for 2.38.

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

chdir.2
  mtk
    _XOPEN_SOURCE=500 also
 gets fchdir() prototype.

standards.7
  mtk
    Added a few more standards, and expand some explanations.

========== Changes in man-pages-2.40 ==========

Released: 2006-09-04

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@suse.de>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Christoph Hellwig <hch@lst.de>
Chuck Ebbert <76306.1226@compuserve.com>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Toralf Förster <toralf.foerster@gmx.de>

Apologies if I missed anyone!

Global changes
---

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
  mtk (after a note by Alain Portal)
    Make naming of 'pathname' argument consistent; various
    minor rewordings.

Typographical or grammatical errors have been corrected in several
places.

Changes
 to individual pages
---

clone.2
  mtk
    Reinstate text on CLONE_DETACHED, and add a few words.

execve.2
  mtk
    Added list of process attributes that are not preserved on exec().

fork.2
  mtk, after a suggestion by Christoph Hellwig
    Greatly expanded, to describe all attributes that differ
    in parent and child.

linkat.2
  mtk
    Document AT_SYMLINK_FOLLOW (new in 2.6.18).

set_mempolicy.2
  mtk / Andi Kleen
    Memory policy is preserved across execve().

write.2
  mtk / Alain Portal
    SEE ALSO for writev should refer to Section 2, not 3.
    (i.e., really make the change that was logged in 2.34)

getcwd.3
  Samuel Thibault / mtk
    Fix SYNOPSIS and CONFORMING TO text for getwd() and
    get_current_dir().
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=381692

proc.5
  Chuck Ebbert
    Document /proc/PID/auxv.

capabilities.7
  Alain Portal
    Restore
 text accidentally deleted in 2.39.

regex.7
  mtk / Alain Portal
    Change references to "1003.2" to "POSIX.2".

http://lwn.net/Articles/179434/

Changes to individual pages
---

ldd.1
  Stefan Puiu
    Note glibc version where "ldd -u" appeared.

execve.2
  mtk
    The PR_SET_NAME setting is not preserved across an execve().

fork.2
  mtk
    Mappings marked with madvise(MADV_DONTFORK) are not inherited
    by child.

getdtablesize.2
  mtk
    Noted that sysconf(_SC_OPEN_MAX) is preferred in portable
    applications.

getpagesize.2
  mtk
    Noted that sysconf(_SC_PAGE_SIZE) is preferred in portable
    applications.
    _SC_PAGE_SIZE is available on most systems.

madvise.2
  mtk
     Document MADV_REMOVE, new in 2.6.16.
    Document MADV_DONTFORK / MADV_DOFORK, new in 2.6.16.

mount.2
  mtk / Trond Myklebust
    MNT_FORCE can cause data loss.

mmap.2
  mtk
    Added note on Linux's old (pre-2.6.12) buggy treatment of
    length==0.
  Justin Pryzby / mtk
    Added some EINVAL errors.

mremap.2
  mtk
    Remove superfluous "#include <unistd.h>" from SYNOPSIS.

msync.2
  mtk
    Added EBUSY error for case where MS_INVALIDATE is applied to
    a locked region.

posix_fadvise.2
  Andrew Morton
    Since 2.6.18, POSIX_FADV_NOREUSE is a no-op.

prctl.2
  Marcel Holtmann / mtk
    Since kernel 2.6.18, setting 2 for PR_SET_DUMPABLE is no longer
    possible.
  Guillem Jover
    Updated Linux versions where the options where introduced.
    Added PR_SET_TIMING, PR_GET_TIMING, PR_SET_NAME, PR_GET_NAME,
    PR_SET_UNALIGN, PR_GET_UNALIGN, PR_SET_FPEMU, PR_GET_FPEMU,
    PR_SET_FPEXC, PR_GET_FPEXC.
   Michael Kerrisk
    Document PR_GET_ENDIAN and PR_SET_ENDIAN.

remap_file_pages.2
  mtk
    Add "#define _GNU_SOURCE" to SYNOPSIS.

sync_file_range.2
  mtk
    Noted that sync_file_range() appeared in kernel 2.6.17.

vfork.2
  mtk
    Noted interactions with fork handlers in multithreaded programs.

wait4.2
  mtk
    Added feature test macros to SYNOPSIS.

clog2.3
  mtk / aeb / Kevin Ryde
    Fix broken text in description.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386214

clog10.3
  Kevin Ryde
    Fix broken text in description.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386214

mq_receive.3
  Britton Leo Kerin
    Fix return type in SYNOPSIS; should be "ssize_t" not "mqd_t".
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=387551

qsort.2
  Hrvoje Niksic
    Fix wording referring to the use of strcmp() in 'compar'
    function.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=391402

sendfile.2
  mtk
    Added SEE ALSO referring to new splice.2 page.

termios.3
  mtk
    Documented IUTF8 (which was new in kernel 2.6.4).

tzset.3
  mtk
    Added some TZ examples.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386087

proc.5
  mtk
    Added delayacct_blkio_ticks (new in 2.6.18) to /proc/PID/statm.

ip.7
  Stuart MacDonald / Andi Kleen
    Fix discussion for TCP error queue /IP_RECVERR on TCP.

pthreads.7
  mtk
    Noted effect of RLIMIT_STACK resource limit for NPTL.

socket.7
  Senthil Kumar
    Place socket options in alphabetical order.

========== Changes in man-pages-2.42 ==========

Released: 2006-11-24

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andrew Morton <akpm@osdl.org>
Chuck Ebbert <76306.1226@compuserve.com>

Doug Goldstein <cardoe@gentoo.org>
Eduard Bloch
<blade@debian.org>
Evan Teran <eteran@alum.rit.edu>
Pavel Heimlich <tropikhajma@seznam.cz>
Petr Baudis <pasky@ucw.cz>
Randy Dunlap <rdunlap@xenotime.net>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

brk.2
  Evan Teran / mtk
    Add text describing behavior of the Linux brk() system call
    and point out that the glibc brk() wrapper provides different
    behavior.
  mtk
    Note that sbrk() is implemented as a library function in glibc
    that calls the brk() system call.

futex.2
  mtk
    FUTEX_FD is scheduled for removal in June 2007.

getaddrinfo.3
getnameinfo.3
  Ulrich Drepper, with edits by mtk
    Add text describing Internationalized Domain Name
    extensions.

open.2
  mtk / Eduard Bloch
    Fix description of O_LARGEFILE to mention required
 feature test
    macros.

ptrace.2

Chuck Ebbert
Since Linux 2.6.18, the PID of the new process is also available
for PTRACE_EVENT_VFORKDONE.

syslog.3
Doug Goldstein
Fix header file required for vsyslog() in SYNOPSIS.

wcwidth.3
Petr Baudis
Fix CONFORMING TO.

core.5
mtk
Linux 2.4.21 added core_pattern (which was already in 2.6).
Noted a few more reasons why a core dump file might not
be produced.

========== Changes in man-pages-2.43 ==========

Released: 2006-11-29

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <ak@suse.de>
David Brownell <david-b@pacbell.net>
Eduard Bloch <blade@debian.org>
Egmont Koblinger <egmont@uhulinux.hu>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes
to individual pages
---

ioperm.2
  mtk
    Clarify discussion of privilege requirements.
    Added ENOMEM to ERRORS.

open.2
  mtk / Eduard Bloch
    Clarify description of O_LARGEFILE.

crypt.3
  Egmont Koblinger
    Make description of MD5 output string less ambiguous.

strerror.3
  Reuben Thomas
    Add C99 to CONFORMING TO; see
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400634

rtc.4
  David Brownell

    Update the RTC man page to reflect the new RTC class framework:

    - Generalize ... it's not just for PC/AT style RTCs, and there
      may be more than one RTC per system.

    - Not all RTCs expose the same feature set as PC/AT ones; most
      of these ioctls will be rejected by some RTCs.

    - Be explicit about when {A,P}IE_{ON,OFF} calls are needed.

    - Describe the parameter to the get/set epoch request; correct
      the description of the get/set
 frequency parameter.

    - Document RTC_WKALM_{RD,SET}, which don't need AIE_{ON,OFF} and
      which support longer alarm periods.

    - Hey, not all system clock implementations count timer irqs any
      more now that the new RT-derived clock support is merging.

proc.5
  mtk
    s/fseek(3)/lseek(2)/ under /proc/PID/mem entry.

feature_test_macros.7
  mtk / Eduard Bloch

The LFS spec is now at http://opengroup.org/platform/lfs.html

raw.7
udp.7
Andi Kleen
Describe the correct default for UDP/RAW path MTU discovery.

New pages

---

termio.7
  mtk, after a bit of prodding by Reuben Thomas
      A brief discussion of the old System V termio interface,
      with pointers to pages that will contain the information
      that the reader
 probably wants.

scripts/find_repeated_words.sh
  mtk
      Find consecutive duplicate words in a man page, some of
      which may be grammar errors.

Global changes

Various pages
  Justin Pryzby / mtk
      Add "#define _ATFILE_SOURCE" to SYNOPSIS in following pages:
         faccessat.2
         fchmodat.2
         fchownat.2
         fstatat.2
         futimesat.2
         linkat.2
         mkdirat.2
         mknodat.2
         openat.2
         readlinkat.2
         renameat.2
         symlinkat.2
         unlinkat.2
         mkfifoat.3

Various pages
  mtk
      Various references to "getty" were changed to "mingetty", since
      that is the manual page more likely to be found on current systems.

Various pages
  mtk, after a suggestion by Reuben Thomas <rrt@sc3d.org>
      Updated various header pages to accurately reflect which functions
      are and are not part of C89. Also fixed/improved
 a few other
      CONFORMING TO entries.

Various pages

mtk
s/Unices/Unix systems/ on the 5 pages where it appears.

Various pages
mtk
Wrapped long source lines in the following files
getsockopt.2
mknodat.2
io_setup.2
select_tut.2
select.2
readlinkat.2
io_cancel.2
syslog.2
wcsncat.3
getipnodebyname.3
cmsg.3
wcpncpy.3
wcsrtombs.3
wcstok.3
fgetwc.3
wmemcmp.3
wcsspn.3
div.3
modf.3
stdio_ext.3
ctermid.3
des_crypt.3
wcsncmp.3
wmemchr.3
wcsstr.3
wmemcpy.3
wprintf.3
wcsnrtombs.3
termios.3
erf.3
ceil.3
lround.3
nextafter.3
wcsncpy.3
wmemset.3

getw.3
console_ioctl.4
sk98lin.4
environ.7
unix.7
time.7

Various pages
  mtk
    Added a SEE ALSO reference for feature_test_macros(7) to all
    pages where a feature test macro appears in the SYNOPSIS.

Various pages
  mtk
    Added SEE ALSO entry pointing to time.7
      alarm.2
      nanosleep.2
      ualarm.3
      usleep.3

Various pages
  Justin Pryzby / mtk
    Fixed consecutive duplicate word typos on a number of pages.

Typographical or grammatical errors have been corrected in several
places. (Special thanks to Nicolas François!)

Changes to individual pages
----

access.2
  mtk
    Since 2.6.20, access() honors the MS_NOEXEC mount flag.
  Jorge Peixoto de Morais Neto / mtk
    Improve ENOENT description.

clone.2
  mtk
    Added some detail to the prototype.
    Added some notes on IA-64's clone2().

epoll_ctl.2
  mtk

    Add text to note that EPOLLRDHUP appeared in kernel 2.6.17.

faccessat.2
  Justin Pryzby
    Various fixes as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411177
    * s/effective/real/ in description text.
    * added <fcntl.h> to synopsis.
    * various other changes.

getrlimit.2
  mtk / Fedora downstream patches; thanks to Ivana Varekova
    Added a few words to note that RLIMIT_NPROC is really a limit on
    threads.

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Fedora downstream patches; thanks to Ivana Varekova
    s%linux/aio.h%libaio.h% in SYNOPSIS.
    Changed return type from "long" to "int".

mbind.2
  Samuel Thibault / mtk
    Fix EINVAL description.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411777

mincore.2
  Nick Piggin
    Kernel 2.6.21 fixes several earlier bugs in mincore().
  Nick Pollitt
    Remove words "of a file" -- mincore() is describing

 memory residence information, not properties of a file.
  mtk
    Rewrote various parts to make the page clearer.

mmap.2
  mtk
    Rewrote and reorganized various parts to be clearer.
  Taken from Fedora downstream patches; thanks to Ivana Varekova
    Removed text stating that mmap() never returns 0; that's
    not true.

mount.2
  mtk / Val Henson
    Document MS_RELATIME, new in Linux 2.6.20.

open.2
  Andre Majorel / mtk
    On Linux, the error returned when opening a large file on a
    32-bit system is actually EFBIG, not EOVERFLOW.

posix_fadvise.2
  Pádraig Brady

Fix RETURN VALUE description: returns error number of failure.

rename.2
mtk / Timo Sirainen
Various improvements to DESCRIPTION.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=416012

semop.2
mtk
If sops contains multiple operations, then these are performed
in array order. All Unix systems that I know of do this,

and some Linux applications depend on this behavior. SUSv3
made no explicit statement here, but SUSv4 will explicitly
require this behavior.
Small rewording of explanation of "atomically".

signal.2
Nicolas François
Fix incorrect argument name in DESCRIPTION.
mtk
Small wording improvement.

socket.2
Nicolas François
Add reference to ipv6.7 page.

socketcall.2
Nicolas François
Fix .TH line.

splice.2
Benjamin Gilbert
Fix inconsistent argument names in SYNOPSIS and DESCRIPTION.

statvfs.2
mtk
Small wording clarification.

symlink.2
mtk / Nicolas François
Removed cryptic text under CONFORMING to referring to
"open(2) and NFS". There is no relevant text in open.2 as
far as I (mtk) can see.

time.2
mtk / Reuben Thomas
Remove sentence "gettimeofday() obsoleting time() on 4.3BSD".

This information is old, and probably no longer relevant.
See
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=403888

write.2
mtk, after an idea from a downstream Fedora patch.
Clarified discussion of /count == 0/ case.

ptrace.2
Chuck Ebbert
When the parent receives an event with PTRACE_EVENT_* set,
the child is not in the normal signal delivery path. This
means the parent cannot do ptrace(PTRACE_CONT) with a signal
or ptrace(PTRACE_KILL). kill() with a SIGKILL signal can be
used instead to kill the child process after receiving one
of these messages.

sched_setaffinity.2
mtk
Fix glibc version number in description of 'cpusetsize' argument.

vfork.2
mtk
Stripped some excess/outdated text from the BUGS section.

basename.3
mtk / Jorge Peixoto de Morais Neto
Add text to clarify that the pointer returned by these
functions may be into some part of 'path'.

dlopen.3
Taken from Fedora downstream patches; thanks to Ivana Varekova
+ Carlo
Marcelo Arenas Belon
Add "#include <stdlib.h>" to example program.

fclose.3
mtk
Complete rewrite. The existing page was hard to read,
and the RETURN VALUE description seems to be wrong.

getopt.3
mtk
Added getopt() example program.
mtk
Add a few words to clarify the operation of the GNU-specific
double-colon feature, which allows options to have optional
arguments.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=352139

glob.3
  Nicolas François
    Fix PROTOTYPE.

inet_network.3
  mtk, after an idea from a downstream Fedora patch.
    Clarified description of inet_network().

log.3
  Nicolas François
    Fix .TH line.

log10.3
  Nicolas François
    Fix .TH line.

malloc.3
  Nicolas François
    Small rewording to mention calloc().

posix_openpt.3
  Martín Ferrari
    Fix return type in SYNOPSIS; as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400971
     Needs _XOPEN_SOURCE == 600; as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400975
  Julien BLACHE
    s/ptsname/posix_openpt/ in RETURN VALUE

re_comp.3
  Taken from Fedora downstream patches; thanks to Ivana Varekova
    Add "#define _REGEX_RE_COMP" to SYNOPSIS.

regex.3
  Nicolas François
    Fix .TH line.

termios.3
  mtk
    Added .SS headers to give some structure to this page; and a small
    amount of reordering.
  mtk
    Added a section on canonical and non-canonical mode.
  mtk
    Enhanced the discussion of "raw" mode for cfmakeraw().
  mtk

Document CMSPAR.
mtk
Make description of PARODD a little clearer.
Reuben Thomas
Add SEE ALSO link to tty_ioctl.4
mtk
Add SEE ALSO link to console_ioctl.4

ualarm.3
mtk
Removed BSD prototype from synopsis.
Various rewordings.

usleep.3
mtk
Removed BSD prototype from synopsis.
Various rewordings.

termcap.5
Taken from Fedora downstream patches; thanks to Ivana Varekova
s/curses/ncurses/ under SEE ALSO

bootparam.7
Taken from Fedora downstream patches; thanks to Ivana Varekova
Documented "mem=nopentium".

feature_test_macros.7
mtk
The default treatment of _POSIX_C_SOURCE changed in glibc 2.4.
mtk, after a suggestion by Justin Pryzby
Added some text warning that the "__" macros that
<features.h> defines internally should never be
directly defined by programs.
mtk, based on notes by Jakub Jelinek
Document _FORTIFY_SOURCE
(See http://gcc.gnu.org/ml/gcc-patches/2004-09/msg02055.html)
mtk
Document _REENTRANT and _THREAD_SAFE.

mdoc.7
mtk / Nicolas François
Remove CONFIGURATION section, since this does not seem to be
true for Linux.

svipc.7
Nicolas François
Fix data types in associated data structures;
remove nonexistent semzcnt and semncnt

fields.

time.7
  mtk
    Since kernel 2.6.20, the software clock can also be 300 HZ.

========== Changes in man-pages-2.45 ==========

Released: 2007-04-05

Global changes

This release consists mainly of formatting fixes (to a large
number of pages) to achieve greater consistency across pages.
With the exception of the few individual changes noted below,
no changes were made to content.

Changes to individual pages
---

io_destroy.2
io_getevents.2
io_setup.2
io_cancel.2
io_submit.2
  mtk
    Clarified RETURN VALUE text

bindresvport.3
  mtk
    Rewrote prototype using modern C syntax.

========== Changes in man-pages-2.46 ==========

Released: 2007-04-06

Global changes

This release consists mainly of formatting fixes (to a large
number of pages) to achieve greater consistency across pages:

* Most instances of two or more consecutive blank lines in man
 page output were

shrunk to a single line.
* A number of example programs were reformatted
to more closely match K&R style.
* In various places (mainly code examples), the use of tabs was
replaced by spaces

With the exception of the few individual changes noted below,
no changes were made to content.

Changes to individual pages
---

bdflush.2
  mtk
    Add <sys/kdaemon.h> header file to SYNOPSIS.

sched_rr_get_interval.2
  mtk
    Moved timespec definition from SYNOPSIS into description.

select_tut.2
  mtk
    Make SYNOPSIS match select.2.

========== Changes in man-pages-2.47 ==========

Released: 2007-05-04

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
John Heffner <jheffner@psc.edu>

Apologies if I missed anyone!

Global changes

This release consists mainly of changes to source file
layout
(wrapped long lines; stripped trailing white space; started new

sentences on new lines).

There is very little change to output formatting or content (see the
notes below).

Changes to individual pages
---

sched_rr_get_interval.2
  mtk
    Remove crufty statement that this system call is not implemented.
    The nice interval can be used to control the size of
    the round-robin quantum.
    Corrected .TH line.

ip.7
  John Heffner / mtk
    Document IP_PMTUDISC_PROBE, which will be in 2.6.22.

========== Changes in man-pages-2.48 ==========

Released: 2007-05-04

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Colin Watson <cjwatson@debian.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>

Apologies if I missed anyone!

Global changes

This release consists mainly of changes to source file layout
(wrapped
 long lines; stripped trailing white space; started new
sentences on new lines).

There is very little change to output formatting or content (see the
notes below).

Various pages
  mtk
    In various places where it occurred,
    s/nonnegative/non-negative/

Various pages
  mtk
    s/wide character/wide-character/ when used attributively.

Changes to individual pages
---

man.7
  Justin Pryzby / Colin Watson / mtk
    .SH doesn't require quotes.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411303

========== Changes in man-pages-2.49 ==========

Released: 2007-05-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Akihiro MOTOKI <amotoki@dd.iij4u.or.jp>
Bruno Haible <bruno@clisp.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>

Apologies if I missed anyone!

New pages
---

bsd_signal.3
   mtk
    Documentation of bsd_signal().

euidaccess.3
  mtk
    Manual page for euidaccess() and eaccess().

getsubopt.3

mtk / Justin Pryzby
Documentation of getsubopt().

sysv_signal.3
mtk
Documentation of sysv_signal().

New links
---

epoll_pwait.2
mtk
New link to epoll_wait.2.

eaccess.3
mtk
New link to new euidaccess.3,

sem_timedwait.3
mtk
New link to sem_wait.3.

sem_trywait.3
mtk
New link to sem_wait.3.

Global changes

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages
---

access.3
mtk
Added SEE ALSO ref to new euidaccess.3 page.

epoll_wait.2
mtk
Added description of epoll_pwait(), new in kernel 2.6.19.

execve.2
mtk

Add text noting that Linux allows 'argv' and 'envp' to be
NULL, but warning that this is non-standard and non-portable,
and
should be avoided in portable programs.
Bug filed (http://bugzilla.kernel.org/show_bug.cgi?id=8408)
to get this changed, but maybe that won't be done because it
is an ABI change.
mtk
Added an example program.
mtk
Expanded the discussion of interpreter scripts and the
'optional-arg' argument of an interpreter script.
For further info, see
http://homepages.cwi.nl/~aeb/std/hashexclam-1.html
http://www.in-ulm.de/~mascheck/various/shebang/
mtk
Added text noting that FD_CLOEXEC causes record locks to be
released.
mtk
Mention effect of MS_NOSUID mount(2) flag for set-user-ID
programs.
mtk
Expanded description of handling of file descriptors during
execve(), adding text to note that descriptors 0, 1, and 2
may be treated specially.

faccessat.3
mtk
Added SEE ALSO ref to new euidaccess.3 page.

mmap.2
mtk
Place MAP_* flags list
in alphabetical order.

readv.2
mtk
A fairly substantial rewrite, which among other things
fixes the problem reported by Kyle Sluder in
http://bugzilla.kernel.org/show_bug.cgi?id=8399
And added some example code.

sigaction.2
mtk
Added text referring to the discussion of async-signal-safe
functions in signal(7).
A few other minor formatting and wording changes.

signal.2
  mtk
    Moved the discussion of async-signal-safe functions to signal(7).
    Added text referring to the discussion of async-signal-safe
    functions in signal(7).
    Added SEE ALSO entries referring to new bsd_signal.3 and
    sysv_signal.3 pages.

copysign.3
  Bruno Haible
    Clarify discussion of negative zero.

getopt.3
  mtk
    Add SEE ALSO ref to new getsubopt.3.

iconv_open.3
  Bruno Haible
    Describe the glibc/libiconv //TRANSLIT and //IGNORE extensions
    for 'tocode'.

iswblank.3
  Bruno
 Haible
    Update CONFORMING TO; iswblank() is in POSIX.1-2001.

inotify.7
  mtk
    Definitions for IN_DONT_FOLLOW, IN_MASK_ADD, and IN_ONLYDIR
    were added to glibc in version 2.5.

signal.7
  mtk
    Incorporated (and slightly modified) the text on
    async-signal-safe functions that was formerly in signal(2).
    Added SEE ALSO entries referring to new bsd_signal.3 and
    sysv_signal.3 pages.

========== Changes in man-pages-2.50 ==========

Released: 2007-05-21

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andreas Halter <halter@google.com>
Laird Shaw <netocrat@dodo.com.au>
Mike Frysinger <vapier@gentoo.org>

Apologies if I missed anyone!

Removed pages (!)

Most Section 1 man pages are removed
  mtk (with help from Mike Frysinger, Laird Shaw, Andreas Halter)
    Once upon time Andries added a number of Section
1 manual pages
    to man-pages. However, since that time, those pages have not
    seen much maintenance, and are not in fact distributed in most
    distributions. Instead most distributions supply the
    coreutils versions of these pages, which are currently
    maintained. In addition, man-pages provides the 1p pages,
    which document the portable subset of functionality of these
    commands. Since the man1 pages are mostly unneeded, and
    out of date, I'm removing them. The following pages disappear:

      chgrp.1
      chmod.1
      chown.1
      cp.1
      dd.1
      df.1
      diff.1
      dir.1
      dircolors.1
      du.1
      install.1
      ln.1
      ls.1
      mkdir.1
      mkfifo.1
      mknod.1
      mv.1
      rm.1
      rmdir.1
      touch.1
      vdir.1

    The following Section 1 pages will
be kept:

intro.1
ldd.1
time.1

========== Changes in man-pages-2.51 ==========

Released: 2007-05-28

Global changes

Various pages
  mtk
    (Hopefully) all cross references outside a page now include a
    section number. This should permit better resulting output
    from a man2html-type conversion.

Various pages
  mtk
    Convert function formatting of the form "\fBname\fP()" to
    ".BR name ()".

Changes to individual pages
---

futimesat.2
  mtk
    s/futimes/futimesat/ in .SH NAME line.

msgop.2
  mtk
    Put "msgrcv" and "msgsnd" in .SH NAME line.

mount.2
  mtk
    Add "umount2" to .SH NAME line.

wait.2
  mtk
    Add "waitid" to .SH NAME line.

getopt.3
  mtk
    Add "getopt_long" and "getopt_long_only" in .SH NAME line.

sem_wait.3

mtk
Add "sem_timedwait" and "sem_trywait" to .SH NAME line.

stdarg.3
mtk
Add "va_start", "va_arg", "va_end", "va_copy" to .SH NAME line.

========== Changes in man-pages-2.52 ==========

Released: 2007-05-29

"A foolish consistency is the hobgoblin of little minds, adored by
little statesmen and philosophers and divines"

Ralph Waldo Emerson (1803-1882)

"But damn it, these man pages are a mess!"

Global changes

Most of the changes below are about bringing greater consistency
to manual pages, including reducing the wide range of .SH
Section headings.

Typographical or grammatical errors have been corrected in several
places.

Various pages
mtk
Make 'manual' component of .TH line into the string
"Linux Programmer's Manual".
Reason: consistency.

Various pages
mtk
Changed date in .TH line into form YYYY-DD-MM.
Reason: consistency.

Various pages
mtk
Some .SH header lines were made into .SS lines. (One of the aims
here is to
reduce the number of non-standard .SH lines.)

Various pages

mtk

Change title .SH sections named "NOTE" to "NOTES", in some cases also changing the location of the section within the page.
Reason: consistency.

Various pages

mtk

Commented out .SH AUTHOR sections; the right place for documentation authorship sections is usually comments at the top of the page source.

Various pages

mtk

Changed .SH HISTORY to .SH VERSIONS.
Reason: in many cases, HISTORY was being used to describe Linux/glibc version information, as was already done for VERSIONS sections in other pages.

Various pages

mtk

Removed HISTORY section, or moved it as a subsection or paragraphs under another section e.g., NOTES.
Reason: there are too many arbitrary section (.SH) names, and a HISTORY section never was consistently used across Linux manual pages.

Various pages

mtk

Moved
SEE ALSO section to be last section on the page
Reason: consistency -- and this is where SEE ALSO should be!

Various pages

mtk

Relocated GLIBC NOTES as subsection under NOTES
Reason: reduce number of arbitrary section (.SH) names.

Various pages

mtk

Relocated LINUX NOTES as subsection under NOTES
Reason: reduce number of arbitrary section (.SH) names.

Various pages

mtk

Renamed some "AVAILABILITY" sections to "VERSIONS".
Reason: consistency.

Various pages

```
  mtk
     Renamed some "DIAGNOSTICS" sections to "RETURN VALUE".
     Reason: consistency.

getopt.3
tzselect.8
  mtk
     s/\.SH ENVIRONMENT VARIABLES/.SH ENVIRONMENT/
     Reason: consistency.

intro.2
select.2
sysctl.2
bsearch.3
dlopen.3
envz_add.3
fmtmsg.3
getgrent_r.3
getgrouplist.3
getpwent_r.3
getutent.3
hsearch.3
rtime.3
strptime.3
tsearch.3
vcs.4
wordexp.3
  mtk
     s/return 0/exit(EXIT_FAILURE)/ in main() of function example

    program.
     Reason: consistency.

mprotect.2
select_tut.2
dlopen.3
getgrent_r.3
getopt.3
getpwent_r.3
hsearch.3
select_tut.2
tsearch.3
  mtk
     Use symbolic constants (EXIT_SUCCESS, EXIT_FAILURE) in calls
     to exit().
     Reason: consistency.

access.2
```

chown.2
lseek.2
open.2
read.2
utmp.5
  mtk
    Renamed RESTRICTIONS section to NOTES, or moved text in a
    RESTRICTIONS section under existing NOTES section.
    Reason: consistency, and reduce number of arbitrary section (.SH)
    names.

Changes to individual pages
----

capget.2
  mtk
    s/\.SH FURTHER INFORMATION/.SH NOTES/

dup.2
  mtk
    s/\.SH WARNING/.SH NOTES/

kill.2
  mtk
    Renamed LINUX HISTORY section to LINUX NOTES, and relocated
    within page.

select_tut.2
  mtk
    Relocated example program and made its .SH title "EXAMPLE".

sigaltstack.2
  mtk
    Move code example into its own EXAMPLE section.

sigreturn.2

 mtk
    s/\.SH WARNING/.SH NOTES/

setuid.2
  mtk
    s/\.SH "LINUX-SPECIFIC REMARKS"/.SH LINUX NOTES/

shmget.2
  mtk
    Remove section about effect of fork()/exec()/exit(); shmop.2

contains the same text, and it only needs to be said once.

shmop.2
  mtk
    Minor rewording under DESCRIPTION.

daemon.3
  mtk
    Minor wording and formatting changes.

encrypt.3
  mtk
    Removed statement that glibc unconditionally exposes declarations
    of encrypt() and setkey(), since portable applications must
    use <unistd.h> and define _XOPEN_SOURCE to obtain the declarations
    of setkey() and encrypt(). Adjusted example program accordingly.

mkstemp.3
  mtk
    Slight rewording.

LDP.7
  mtk
    Minor wording and formatting changes.

man.7
  mtk
    Substantial rewrite, revising and extending the discussion
    about desired conventions for writing pages.
    There will be further updates to this page in the
 next few
    man-pages releases.

==================== Changes in man-pages-2.53 ====================

Released: 2007-05-30

  "A foolish consistency is the hobgoblin of little minds, adored by
   little statesmen and philosophers and divines"

      Ralph Waldo Emerson (1803-1882)

  "But damn it, these man pages are a mess!"

Global changes

Many many pages
  mtk
    Reordered sections to be more consistent, in some cases renaming
    sections or shifting paragraphs between sections.

man7/*
  mtk
    In various pages in this section, .SH headings were
    converted to .SS.

========== Changes in man-pages-2.54 ==========

Released: 2007-06-07

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Emmanuel Mogenet <emogenet@google.com>
Michael Berg <michaeljberg@gmail.com>

Apologies if I missed anyone!

Global changes

Various
 pages
  mtk
    Where there is an instruction in the SYNOPSIS about linking
    or compiling with a certain option, the option is now
    marked up in italics (e.g., "\fI-lm\fP").

Various pages
  mtk
    Added page numbers to page cross references.

A few pages
  mtk
    s/manpage/man page/, for consistency.

Typographical or grammatical errors have been corrected in several
places.

New pages
----

man-pages.7
  mtk
    A description of the conventions that should be followed
    when writing pages for the man-pages package.

Removed pages
----

man1/README
  mtk
    Already deleted most of the man1 pages previously, so
    this doesn't need to stay.

LDP.7
  mtk
    Removed this page since it is out of date, and the proper place
    to go for up-to-date information is http://www.tldp.org/

ksoftirq.9
  mtk
    Reason: this was the only Section 9 page, and it is old
    (Linux 2.4). The
 man9 section never took off as an idea, and
    I see little point in keeping a Section 9 with just a single
    old page.

Changes to individual pages

HOWTOHELP
  mtk
    Moved some material out of here into new man-pages.7.

alloc_hugepages.2
  mtk
    Minor rewrites, eliminating some duplication, and removing
    some outdated text.

epoll_pwait.2
  Michael Berg
    Fix broken link path;
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=425570

fcntl.2
  mtk
    Remove misleading text about setting O_ASYNC when calling
    open(); one must use fcntl() F_SETFL for this task.

fdatasync.2
  mtk
    Converted outdated BUGS note about fdatasync() being
    equivalent to fsync() on Linux 2.2 into a NOTES note
    about this historical behavior.

futex.2
  mtk
    Small rewording to fix "fails with the error EWOULDBLOCK"
    rather than "returns EWOULDBLOCK".
    See Red Hat bug 172828.

mprotect.2
   mtk, after an observation by Emmanuel Mogenet
    A much improved example program.
  mtk
    Significant rewrites and additions to description.

mremap.2
  mtk
    Remove text about the nonexistent BSD mremap() -- too
    much information, in my opinion.

sched_yield.2
  mtk
    Added ERRORS section.

set_mempolicy.2
  mtk
    Moved text for "Versions and Library Support".

set_tid_address.2
  mtk
    Small rewording in RETURN VALUE section.

sigaction.2
  mtk
    Add EXAMPLE section with a pointer to example in mprotect.2.

sync_file_range.2
  mtk
    Fix return type in SYNOPSIS. Add RETURN VALUE section.

atexit.3
  mtk
    Small rearrangement of text under NOTES.

bindresvport.3
  mtk
    Rewrite and substantial additional text.

exec.3
  mtk
    Minor clarifications for text on execlp() and execvp(). Removed
    FILES section, since it provides no useful additional info.

fenv.3
  mtk

    Moved link instructions from NOTES to SYNOPSIS.
    Added feenableexcept, fedisableexcept, fegetexcept
    to .SH NAME list.

fputwc.3
  mtk
    Added 'putwc' to .SH NAME list.

gethostbyname.3
  mtk
    s/int/socklen_t/ for type of gethostbyaddr() 'len' argument,
    and add a few more words in NOTES about the type used here.

login.3
  mtk
    Removed remark from NOTES about linking with -lutil; add
    text on that point to SYNOPSIS.

openpty.3
  mtk
    Removed redundant remark from NOTES about linking with -lutil
    since there is text on that point under SYNOPSIS.

sysconf.3
  mtk
    Added SEE ALSO referring to getconf(1).

unlocked_stdio.3
  mtk
    Revised .SH NAME section.

ascii.7
  mtk
    Minor rearrangement of order of text.

capabilities.7
  mtk
    s/exec()/execve(2)/ in various places.

complex.7
  mtk
    Changed "atan(1)" to "atan(1.0)" to prevent some versions of
    man2html(1) from
 mistaking that string as a page cross reference.

rtnetlink.7
  mtk
    Small restructuring to avoid 'cannot adjust line' from man(1).

ldconfig.8
  mtk
    Removed now very out-of-date sentence about need to link shared
    libraries with -lc.

man.7
  mtk
    Various text was moved out of this page into the new man-pages.7.

mdoc.7
  mtk
    Added SEE ALSO referring to new man-pages.7.

mdoc.samples.7
  mtk
    A few changes, hopefully done right, to eliminate some
    errors to stderr when rendering with man(1).

rtnetlink.7
  mtk
    Shorten a line in table so it fits in 80 columns.
    Minor rewording under BUGS.

tzselect.8
  mtk
    Moved EXIT STATUS section.

Global changes
---

clone.2
getdents.2
gettid.2
ioprio_set.2
llseek.2
mmap2.2
modify_ldt.2
mq_getsetattr.2
pivot_root.2
quotactl.2
readdir.2
sysctl.2
syslog.2
tkill.2
  mtk, after a note by Mike Frysinger
    Updated to reflect the fact that the _syscallN() macros
    have gone away,

Several pages
  mtk
    Change reference to path_resolution.2 to path_resolution.7.

Typographical or grammatical errors have been corrected in several
places.

Moved pages
---

path_resolution.2 has been moved to section 7, thus path_resolution.7
  mtk
    Reason: this is an overview
 page, not one describing as
    a specific system call.

Changes to individual pages

MAINTAINING
  mtk, after a note from Xose Vazquez Perez
    Added pointer to Red Hat man-pages bugzilla.
  mtk
    Added a release philosophy note on separating out big
    formatting changes into their own release that contains minimal
    content changes.

accept.2
  mtk
    Add new EXAMPLE section with pointer to example in bind.2.

arch_prctl.2
  mtk
    Added RETURN VALUE section.

bind.2
  mtk
    Expand example program, and move it to new EXAMPLE section.
    Added text pointing to example in getaddrinfo.3.

cacheflush.2
  mtk
    Convert NOTES section to CONFORMING TO and note that
    this call is Linux-specific.
    Other minor rewordings.

connect.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

create_module.2
  mtk
    Add ENOSYS error.

fcntl.2
flock.2

 mtk
    Small rewrite of SEE ALSO text pointing to Documentation/* in
    kernel source.

get_kernel_syms.2
  mtk
    Added ERRORS heading
    Add ENOSYS error.

getdtablesize.2
  mtk
    Added an ERRORS section.

getsid.2
  mtk
    Added a RETURN VALUE section.

getpid.2
  mtk
    Added an ERRORS section (stating that the calls are
    always successful).

ioctl_list.2
  mtk
    Add SEE ALSO reference to ioctl.2.

listen.2
  mtk
    Add new EXAMPLE section with pointer to example in bind.2.

query_module.2
  Martin (Joey) Schulze
    Add ENOSYS error.

recv.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

sched_get_priority_max.2
sched_rr_get_interval.2
sched_setscheduler.2

sched_yield.2
  mtk
    Modified .TH line

send.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

set_tid_address.2
  mtk
    Added an ERRORS section (stating that the call is

    always successful).

signal.2
  mtk, after a note from Alexander Taboriskiy
    Strengthen warning against the use of signal().
    Added siginterrupt(3) to SEE ALSO list.
  mtk
    Rewrote various parts; added an ERRORS section.

socket.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

stat.2
  mtk
    Added EXAMPLE program.

syscall.2
  mtk
    Converted to -man format; some rewrites; added an EXAMPLE.

sysctl.2
  mtk
    Improved the example program.

getnameinfo.3
  mtk
    Add text pointing to example in getaddrinfo.3.

getaddrinfo.3
  mtk
    Add example programs.
    Add getnameinfo() to SEE ALSO list.

memmove.3
  mtk / Serge van den Boom

Clarify discussion of what happens if 'src' and 'dest' overlap.

regex.3
  Justin Pryzby
    Add grep(1) to SEE ALSO list.

sigpause.3
  mtk after a note from Ulrich Drepper
    Clarify discussion of feature test macros that are needed
 to
    expose System V and BSD versions of this function in glibc.

undocumented.3
  mtk
    Removed some functions that have been documented.

wprintf.2
  Martin (Joey) Schulze
    Remove wscanf.3 from SEE ALSO list, since that page does not exist.

utmp.5
  Joey Hess
    Removed outdated note on xdm.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=418009
  Martin (Joey) Schulze
    Removed outdated note about Debian and libc5.

bootparam.7
  Martin (Joey) Schulze
    Fix order of commands listed under 'init='.

hier.7
  Joey Hess
    Add /media, remove /dos.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=418234

inotify.7
  mtk
    Added text describing what happens when the buffer given to
    read(2) is too small to return information about the next event,
    and noting the behavior change in 2.6.21.

man-pages.7
  mtk
    Added text to note that ERRORS list should be in alphabetical order.

mdoc.7
mdoc.samples.7

mtk
Added SEE ALSO reference to groff_mdoc(7).

unix.7
mtk
Added EXAMPLE section with pointer to bind.2 EXAMPLE.

ld.so.8
mtk
Simplify text describing --inhibit-rpath.
mtk, after a note by John Reiser
Describe use of $ORIGIN in rpath.

========== Changes in man-pages-2.56 ==========

Released: 2007-06-11

Global changes

Many pages
mtk
Removed version numbers in .TH lines.
Reason: these were only arbitrarily updated, and so impart no
useful information. Version information goes into a
VERSIONS section nowadays, and the date in the .TH line should
be updated to reflect the date of the last (significant)
change to the page.

Typographical or grammatical errors have been corrected in several
places.

========== Changes in man-pages-2.57 ==========

Released: 2007-06-17

Contributors

The following people
contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed anyone!

Global changes

Many pages
  mtk
    Fix section numbers in page cross references.

Changes to individual pages
---

access.2
  mtk
    Minor wording fixes.
    Small clarification of description of 'mode'.

bind.2
  mtk
    Small reworking of EXAMPLE program.

exit_group.2
  mtk
    Minor wording fixes.

exit.3
  mtk
    Added more detail on exit handlers.
    Minor wording fixes.

ioctl.2
  mtk
    Remove SEE ALSO reference to nonexistent mt.4.

modify_ldt.2
  Samuel Thibault / mtk
    In Linux 2.6, the 'modify_ldt_ldt_s' structure was renamed
    'user_desc'.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=378668
  mtk
    Include definition of 'user_desc' structure.
    Minor rewordings.

mprotect.2
   mtk
    Small reworking of EXAMPLE program.

sigaction.2
  mtk
    Removed reference to nonexistent sigsend(2).

a64l.3
  mtk
    Remove SEE ALSO reference to nonexistent itoa.3.

dysize.3
  mtk
    Removed SEE ALSO reference to nonexistent time.3.

encrypt.3
  mtk
    Removed SEE ALSO reference to nonexistent fcrypt.3.

fmemopen.3
  mtk
    Small reworking of EXAMPLE program.

fpurge.3
  mtk
    Remove SEE ALSO reference to nonexistent fclean.3.

getutent.3
  mtk
    s/ttyname(0)/ttyname(STDIN_FILENO)/ in program example.

vcs.4
  mtk
    s/exit(1)/exit(EXIT_FAILURE)/

environ.7
  mtk
    Correct some section numbers in page cross references.

man-pages.7
  mtk
    Modify requirements for example programs a little.

uri.7
  mtk
    Wrapped long source lines.

  mtk
    Add SEE ALSO link to new credentials.7.

New pages
---

credentials.7
  mtk
    An overview of Linux process identifiers (PIDs, PPIDs,
    PGIDS, SIDs, UIDs, GIDs).

Changes to individual pages
---

bind.2
  mtk
    Added some comments to example program.

getxattr.2
  mtk
    VERSIONS: In kernel since 2.4; glibc support since 2.3.

listen.2
  mtk
    Updated discussion of somaxconn limit.

listxattr.2
   mtk
    VERSIONS: In kernel since 2.4; glibc support since 2.3.

posix_fadvise.2
  mtk
    VERSIONS: Glibc support has been provided since version 2.2.

readahead.2
  mtk
    Added VERSIONS section.

remap_file_pages.2
  mtk
    Updated VERSIONS section with text on glibc support.

removexattr.2
  mtk
    VERSIONS: In kernel since 2.4; glibc support since 2.3.

semop.2
  mtk
    Added VERSIONS section with info on semtimedop().

setxattr.2
  mtk

VERSIONS: In kernel since 2.4; glibc support since 2.3.

dl_iterate_phdr.3
  mtk
    VERSIONS: Supported since glibc 2.2.4.

getloadavg.3
  mtk
    Added VERSIONS section.

posix_openpt.3
  mtk
    VERSIONS: Supported since glibc 2.2.1.

printf.3
  mtk after a suggestion by Mike Frysinger
    Add text to the introductory part of DESCRIPTION, about the
    'size' argument of snprintf() and vsnprintf().

shm_open.3
  mtk
    Added VERSIONS section; rewrote
 info about linking with -lrt.

strcat.3
  Marc Boyer
    Improve the discussion of strncat().

strcpy.3
  Marc Boyer
    Improve the discussion of strncpy().

proc.5
  mtk
    Added discussion of /proc/sys/net/core/somaxconn.

========== Changes in man-pages-2.59 ==========

Released: 2007-06-25

Global changes

Manual pages are now standardized on American spelling. See
http://en.wikipedia.org/wiki/American_and_British_English_spelling_differences
for more information on the differences. Formerly, different pages (and
sometimes even a single page!) employed American and British spelling

conventions; best to standardize on one spelling, and American English
is the standard in Computer Science.

Changes to individual pages
---

man-pages.7
  mtk
    Note that man-pages has now standardized on American spelling
    conventions.

execve.2
getxattr.2
listxattr.2
removexattr.2
setxattr.2
signal.2
syscall.2
aio_cancel.3
bindresvport.3
stdarg.3
charmap.5
bootparam.7
ipv6.7
man.7
path_resolution.7
uri.7
nscd.8
   mtk
    Corrected minor spelling/wording mistakes (i.e., changes
    independent of fixes for American spelling).

========== Changes in man-pages-2.60 ==========

Released: 2007-06-25

Global changes

Various pages
  mtk
    Wrapped lines in some files.

Various pages
  mtk
    Change "e.g. " to "e.g., ", or in some cases, "for example, ".

Various pages
  mtk
    Change "i.e. " to i.e., ", or in some cases, "that is, ".

Various pages
  mtk
    Removed AUTHORS section.

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

vfork.2
  mtk
    s/w.r.t/with respect to/

man-pages.7
  mtk
    Strengthened warning against use of AUTHORS section.

socket.2
socketpair.2
  mtk after a note by Martin (Joey) Schulze
    Add NOTES paragraph noting that <sys/types.h> isn't required
 by
    POSIX.1-2001 or Linux, but was required on some implementations.

accept.2
getsockname.2
recv.2
vm86.2
send.2
getgrouplist.3
memmem.3
nsswitch.conf.5
putenv.3
wprintf.3
  mtk
    Replace form `...' with \fI...\fP where the enclosed string
    is a pathname, type name, or argument name.

A few files
  mtk
    s/process' /process's/

gets.3
qsort.3

getaddrinfo.3
rpc.3
ungetwc.3
wcsnrtombs.3
capabilities.7
  mtk
    Add section number to page cross references.

time.1
bind.2
pivot_root.2
sysctl.2
  mtk
    Reordered .SH sections.

full.4
mouse.4
random.4
sd.4
  mtk
    Made CONFIG/CONFIGURING heading ==> CONFIGURATION

time.1
console_codes.4
random.4
sk98lin.4
charmap.5
ftpusers.5
bootparam.7
charsets.7
glob.7
mq_overview.7
unicode.7
uri.7
utf-8.7
  mtk
    Reformatted headings

New pages
----

backtrace.3
  mtk, with input from Justin Pryzby and Stefan Puiu
    Documents backtrace(), backtrace_symbols(), and
    backtrace_symbols_fd().

New
 links
----

backtrace_symbols.3
backtrace_symbols_fd.3
  mtk
    Links to backtrace.3.

__clone.2
  Stepan Kasal
    Link to clone.2.

Changes to individual pages

Makefile
  Serge van den Boom
    Fix setting of 'prefix' macro.

eval.1p
  Benno Schulenberg
    Fix bad text (concatenated line).

chdir.2
  mtk
    Fixed description of EACCES error.
    Added sentence defining "current working directory".
    Other minor wording changes.

cfree.3
  mtk
    Added SEE ALSO section.

clone.2
  mtk
    s/clone2/__clone2/.

fdatasync.2
  mtk
    Minor wording changes.

fork.2
  Alain Portal
    Fix small wording error.

gethostid.2

Stefan Puiu / mtk
Add NOTES on what happens if gethostid() can't open /etc/hostid.

idle.2
mtk
Made NOTES text into a VERSIONS section, since that's what it
really describes.

ioperm.2
mtk
Minor wording changes.

intro.2
mtk
Rewrite to reflect the fact that the _syscallN
macros are no longer available.

io_cancel.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_destroy.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_getevents.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_setup.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_submit.2
Ivana Varekova
Fix include in SYNOPSIS.
mtk
Add "Link with -laio" to SYNOPSIS.

ipc.2
mtk
Add semtimedop() to SEE ALSO.
Note that some architectures don't have ipc(2); instead
real system calls are provided for shmctl(), semctl(), etc.

killpg.2
mtk
Minor wording changes.

listen.2
  mtk
    Added <sys/types.h> to SYNOPSIS.

sched_setscheduler.2
  mtk
    Add NOTES para about permissions required to call
    sched_setscheduler() on other systems.

select.2
  mtk
    Noted that 'timeout' can also be changed if select()
 is
    interrupted by a signal.

setup.2
  mtk
    Remove reference to _syscall0() macro.

shmop.2
  mtk
    Changed text for EINVAL error.

socketcall.2
  mtk
    Add recvmsg() and sendmsg() to SEE ALSO.
    Note that some architectures don't have socketcall(2); instead
    real system calls are provided for socket(), bind(), etc.

swapon.2
  Ivana Varekova / mtk
    Update text for EPERM error describing the maximum number of
    swap files. (From downstream Fedora patch.)

write.2
  mtk
    Added details about seekable files and file offset.
    Noted that write() may write less than 'count' bytes, and
    gave some examples of why this might occur.
    Noted what happens if write() is interrupted by a signal.
    Minor wording changes.

__setfpucw.3
  mtk
    Added a CONFORMING TO section; other minor edits.

confstr.3

mtk
Minor rewrites in code example.

ctime.3
Justin Pryzby
Make SEE ALSO
refer to timegm.3

daemon.3
mtk
Small wording change.

dl_iterate_phdr.3
Michael Gehring
Comment was missing closing "*/".

dlopen.3
mtk
Formatting changes, and minor rewordings.
mtk, after a note by Serge van den Boom
Add a comment explaining the need for the rather
strange cast of the return value of dlsym().

fpclassify.3
mtk
Add "isinf" to NAME section.

getgrouplist.3
mtk
Minor rewording.

getline.3
mtk
Minor rewording, and note that '*n* is ignored
if '*lineptr' is NULL.

malloc.3
Ivana Varekova / mtk
Update description of MALLOC_CHECK_ to include description
for value 3. (From downstream Fedora patch.)

netlink.3
mtk
Added a CONFORMING TO section; other minor edits.

openpty.3
mtk
Minor changes to SYNOPSIS.

program_invocation_name.3
  mtk
    Shortened page title to INVOCATION_NAME.

rtnetlink.3
  mtk
    Added a CONFORMING
 TO section; other minor edits.

scanf.3
  Florian Ernst
    Fix duplicated word "the".
    (Really fix http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=412467 !)

select_tut.3
  mtk
    Small wording change.

setnetgrent.3
  mtk
    Added a CONFORMING TO section.

sigpause.3
  mtk
    Added a CONFORMING TO section.

strftime.3
  Just Pryzby
    Small wording fix.
  mtk
    Note use of "gcc -Wno-format-y2k" to avoid the "`%c' yields only
    last 2 digits of year in some locales" warning.

strstr.3
  mtk
    Add "strcasestr" to NAME section.

syslog.3
  mtk
    Small wording change.

termios.3
  mtk
    Reformat SYNOPSIS.
    Added a CONFORMING TO section.

timegm.3
  mtk
    Small wording changes.

ulimit.3
  mtk
    Remove erroneous text saying that glibc does not provide
    <ulimit.h>; it does.

initrd.4
  mtk
    Various reformattings.

core.5
  mtk
    Added a sentence noting why core
 dumps named "core.PID" were useful
    with LinuxThreads.

bootparam.7
  mtk
    Fix capitalization in .SS headings.

epoll.7
  mtk
    Language clean ups.

feature_test_macros.7
  mtk
    Added SEE ALSO section.

mq_overview.7
  mtk
    Reformatted headings; minor rewrites.

sem_overview.7
  mtk
    Reformatted headings; minor rewrites.

socket.7
  Loïc Minier <lool@dooz.org>
    Document argument type for SO_REUSEADDR.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=255881

uri.7
  mtk
    Wrap long line in SYNOPSIS.

ldconfig.8
  mtk
    Added SEE ALSO section.

========== Changes in man-pages-2.62 ==========

Released: 2007-07-09

This release consists solely of formatting fixes. There are no changes
to content.

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Stepan Kasal <kasal@ucw.cz>

Apologies if
 I missed anyone!

Global changes

Many many pages
  mtk
    Many many formatting fixes.

man[013]p/*
  Stepan Kasal
    Add section number to .TH line for POSIX pages in man[013]p.

========== Changes in man-pages-2.63 ==========

Released: 2007-07-16

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Arnd Bergmann <arndb@de.ibm.com>

Eduardo M. Fleury <efleury@br.ibm.com>
Ivana Varekova <varekova@redhat.com>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Marc Boyer <marc.boyer@enseeiht.fr>
Martin (Joey) Schulze <joey@infodrom.org>
Martin Röhricht <martin@roehricht.info>
Patrick Mansfield <patmans@us.ibm.com>
Pierre Habouzit <madcoder@debian.org>
Stepan Kasal <kasal@ucw.cz>

Apologies if I missed anyone!

Global changes
---

gettimeofday.2
madvise.2
msgctl.2
select.2
semctl.2
shmctl.2
syslog.2
stat.2
a64l.3
printf.3
termios.3
xdr.3
sd.4
  mtk
    Minor wording changes.

obsolete.2
syscall.2
unimplemented.2
  mtk
    Added SEE ALSO reference to syscalls.2.

New pages
---

sgetmask.2
  mtk
    A real man page for sgetmask(2) and ssetmask(2).
    (This page replaces a previous link of the same name, which
    linked to signal.2.)

spu_create.2
  Arnd Bergmann with additional work by Eduardo M. Fleury and mtk
    Document the PowerPC SPU spu_create() system call.
    (Originally taken from the kernel source file
    Documentation/filesystems/spufs.txt.)

spu_run.2
  Arnd Bergmann with additional work by Eduardo M. Fleury and mtk
    Document the PowerPC SPU spu_run() system call.
    (Originally taken from the kernel source file
    Documentation/filesystems/spufs.txt.)

spufs.7
  Arnd Bergmann with additional work by Eduardo M. Fleury and mtk
    Document the PowerPC SPU file system.
    (Originally taken from the kernel source file
    Documentation/filesystems/spufs.txt.)

Removed
 Pages

__clone.2
  mtk
    This file was created by accident in 2.61, as a copy of clone.2.
    (it should have been a link to clone.2.)

obsolete.2
  mtk
    Details on this page are covered in syscalls.2 and in
    respective syscall man pages (stat.2, uname.2).

undocumented.2
  mtk
    This page is very out of date, and in any case difficult
    to maintain. Information about undocumented system calls
    is maintained in the HOWTOHELP file, and probably in other
    places soon.

killpg.3
  mtk
    This rather incomplete page seems unnecessary since there
    is a killpg.2.

New links
---

chown32.2
fchown32.2
getegid32.2
geteuid32.2
getgid32.2
getgroups32.2
getresgid32.2

setgid32.2
setgroups32.2
setregid32.2
setresgid32.2
setresuid32.2
setreuid32.2
setuid32.2
  mtk
    Added as link to corresponding page
 without "32".

fcntl64.2
fstat64.2
fstatat64.2
fstatfs64.2
ftruncate64.2
getdents64.2
lstat64.2
pread64.2
pwrite64.2
sendfile64.2
stat64.2
statfs64.2
truncate64.2
  mtk
    Added as link to corresponding page without "64".

__clone2.2
clone2.2
  mtk
    Links to clone.2.

ugetrlimit.2
  mtk
    Link to getrlimit.2.

mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2
  mtk
    Added as links to corresponding section 3 pages.

fadvise64.2
fadvise64_64.2
  mtk
    Links to posix_fadvise.2.

rt_sigaction.2
rt_sigpending.2
rt_sigprocmask.2
rt_sigtimedwait.2
  mtk
    Added as link to corresponding page without "rt_" prefix.

rt_sigqueueinfo.2
  mtk
    Link to sigqueue.2.

madvise1.2
tuxcall.2
vserver.2
  mtk / Ivana Varekova
    Link to unimplemented.2.

Changes to individual pages
---

access.2
  mtk
    Fairly substantial rewrites of various parts,
    and a few additions.

chmod.2

 mtk
    Update SYNOPSIS to reflect the fact that fchmod(2) needs
    either "#define _XOPEN_SOURCE 500" or "#define _BSD_SOURCE".

chown.2
  mtk

Update SYNOPSIS to reflect the fact that fchmod(2) and lchown(2)
need either "#define _XOPEN_SOURCE 500" or "#define _BSD_SOURCE".
Added an example program.

killpg.2
mtk
Note that killpg() is actually a library function on Linux.

mmap.2
mtk
Added note that glibc mmap() wrapper nowadays invokes mmap2().

mmap2.2
Ivana Varekova / mtk
On most platforms the unit for 'offset' is 4096 bytes, not
the system page size.
mtk
Rewrote NOTES to note that glibc mmap() wrapper nowadays
invokes this system call.
mtk
Added an EXAMPLE program.

oldfstat.2
oldlstat.2
oldstat.2
mtk
Changed link to point to stat.2 (instead of obsolete.2).

olduname.2
oldolduname.2
mtk
Changed link to point to uname.2 (instead of obsolete.2).

sched_setaffinity.2
Martin Röhricht
Added _GNU_SOURCE to SYNOPSIS.

semctl.2
mtk
Remove reference discussion of ipc(2), since none of the
other System V IPC pages mention ipc(2).

semop.2
mtk
Add an example code segment.

shmctl.2
mtk

Add svipc(7) to SEE ALSO list.

sigaction.2
  mtk
    Reformatted tables as lists; other minor reformattings and
    wording changes.

sigqueue.2
  mtk
    Added info on rt_sigqueueinfo(2).

sigwaitinfo.2
  mtk
    Noted that sigwaitinfo() is a library function implemented on
    top of sigtimedwait().

ssetmask.2
  mtk
    Make this link point to new sgetmask.2 instead of signal.2.

stat.2
  mtk
    Add notes on the different system call interfaces that
    have appeared over time.

syscalls.2
  mtk
    A fairly substantial rewrite of this page,
    bringing it up to date with the current
    kernel version, and listing all system calls
    in
 tabular form.

uname.2
  mtk
    Add notes on the different system call interfaces that
    have appeared over time.

unimplemented.2
  mtk
    Add vserver, madvise1 to NAME line.
    Removed SEE ALSO reference to obsolete.2.
  Ivana Varekova
    Add tuxcall to NAME line.

mktemp.3
  Patrick Mansfield
    Fix description of return value.

strcat.3
  Marc Boyer
    Minor fix to example program.

undocumented.3
  mtk
    Add section numbers to function names; remove some functions
    since they are documented.

proc.5
  mtk
    Update/correct text on /proc/malloc.
  mtk, after a note by Pierre Habouzit, and a few comments by Justin Pryzby
    Update description of /proc/PID/stat to match 2.6.21.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=417933

inotify.7
  mtk
    IN_DONT_FOLLOW and IN_ONLYDIR are only available from 2.6.15.

signal.7
  Stepan Kasal / mtk
    Note SIGRTMIN value depends on glibc.
   mtk
    Various rewrites and additions to the text in real-time signals.
    Add SEE ALSO reference to sgetmask.2.

svipc.7
  mtk
    Add ipc(2) to SEE ALSO.

    glibc; see feature_test_macros.7 for details.

Changes to individual pages
---

mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2
  mtk
    Fix broken link

setpgid.2
  mtk
    Fairly substantial changes and corrections, including adding
    coverage of all of the interfaces that get/set PGIDs.

syscalls.2
  mtk / aeb
    Various rewordings; clear up some imprecisions.

lgamma.3
  mtk

 Added 'signgam' to SYNOPSIS and NAME line.

strerror.3
  mtk
    Note that the XPG version is provided since glibc 2.3.4.
    The page formerly said that the GNU-specific version
    is provided by default. That certainly isn't true
    nowadays, since _POSIX_C_SOURCE is set to 200112L by
    default, so that the XSI-compliant version is supplied
    by default.

man-pages.7
  mtk
    Added note pointing to feature_test_macros.7 for a description
    of how feature test macro requirements should be specified in
    manual pages. Various other minor fixes and changes.

feature_test_macros.7
  mtk
    Added note about how feature test macros are specified

in manual pages.
Many other corrections, improvements, additions, and
details about differences across glibc versions.

Global changes

Typographical or grammatical errors have been corrected in several
places.

Various pages
  mtk
    Use 'glibc' consistently to refer to GNU C library.

Various pages
  mtk
    Order errors under ERRORS alphabetically.

Various pages
  Nicolas François
    Spelling and formatting fixes, as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=439560

intro.2
select.2
fmtmsg.3
getgrent_r.3
envz_add.3
rtime.3
strptime.3
wordexp.3
  Maxime Vaudequin
    Add "#include <stdlib.h>" (to declare exit(3)) to example program.

New pages
---

timeradd.3
  mtk
    Description of timeradd(), timersub(), timerclear(),
    timerisset(), timercmp() macros for operating on
    struct timeval.

Removed pages
---

fdatasync.2
  mtk
    Somehow, over time, material on fdatasync(2) crept into
    fsync.2, and fdatasync also got added to the NAME section

of fsync.2. All of the material in fdatasync.2 that was
not already in fsync.2 has now been moved there, and
the former page has been removed.
In place of the content there, is now a link to fsync.2.

New links
---

clock_getres.2
clock_gettime.2
clock_settime.2
  mtk
    Link to man3/clock_getres.3.

fdatasync.2
  mtk
    Link to fsync.2.

fdopendir.3
  mtk
    Link to opendir.3.

gethostbyaddr_r.3
  Mats Wichmann
    Link to gethostbyaddr.3.

timerclear.3
timercmp.3
timerisset.3
timersub.3
  mtk
    Links to new timeradd.3.

Changes to individual pages

Makefile
  Mike Frysinger
    Make the install target of man-pages respect the standard
    "DESTDIR" variable as well as check the exit status of the
    install command so errors aren't ignored.

get_mempolicy.2
  Lee Schermerhorn
    changed the "policy" parameter to "mode" through out the
    descriptions

in an attempt to promote the concept that the memory
policy is a tuple consisting of a mode and optional set of nodes.

added requirement to link '-lnuma' to synopsis

rewrite portions of description for clarification.

added all errors currently returned by sys call.

removed cautionary note that use of MPOL_F_NODE|MPOL_F_ADDR
is not supported. This is no longer true.

added mmap(2) to SEE ALSO list.

getitimer.2
mtk
Since kernel 2.6.22, Linux setitimer() now conforms to POSIX.1,
giving an EINVAL error for a non-canonical tv_usec value.

gettimeofday.2
mtk
Replace discussion of timer* macros with a pointer
to new page timeradd.3.

ioctl_list.2
Nicolas George
Fixed argument type for BLKGETSIZE.

mbind.2
Lee Schermerhorn

changed the "policy" parameter to "mode" throughout the
descriptions in an attempt to promote the concept that the memory
policy is
a tuple consisting of a mode and optional set of nodes.

rewrite portions of description for clarification.

clarify interaction of policy with mmap()'d files and shared
memory regions, including SHM_HUGE regions.

defined how "empty set of nodes" specified and what this
means for MPOL_PREFERRED.

mention what happens if local/target node contains no
free memory.

clarify semantics of multiple nodes to BIND policy.

Note: subject to change. We'll fix the man pages when/if
this happens.

added all errors currently returned by sys call.

added mmap(2), shmget(2), shmat(2) to SEE ALSO list.

mmap.2
mprotect.2
François Diakhate
Add text noting that PROT_WRITE may (and on x86 does)
imply PROT_READ.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=441387

nfsservctl.2
Aleksandr Koltsoff
Fix prototype.

oldfstat.2
oldlstat.2
oldstat.2
mtk
Fix broken link

prctl.2
mtk
Update arches/kernel versions for PR_SET_UNALAIGN / PR_GET_UNALIGN.

readahead.2
mtk
Removed SEE ALSO reference to nonexistent fadvise.2.

reboot.2
mtk
Place SYNOPSIS comments inside C comments (/* ... */).

sched_setaffinity.2
Samuel Thibault
Note what thread is affected if 'pid' is specified
as 0, or as the value returned by getpid().

sched_setscheduler.2
Carsten Emde
Add text on real-time features of mainline Linux kernel.

select_tut.2
mtk
sync SYNOPSIS with select.2

set_mempolicy.2
  Lee Schermerhorn

    changed the "policy" parameter to "mode" throughout the
    descriptions in an attempt to promote the concept that the memory
    policy is a tuple consisting of a mode and optional set of nodes.

    added requirement to link '-lnuma' to synopsis

    rewrite portions of description for clarification.

     clarify interaction of policy with mmap()'d files.

      defined how "empty set of nodes" specified and what this
      means for MPOL_PREFERRED.

      mention what happens if local/target node contains no
      free memory.

      clarify semantics of multiple nodes to BIND policy.
      Note: subject to change. We'll fix the man pages when/if
          this happens.

    added all errors currently returned by sys call.

    added mmap(2) to SEE ALSO list.

sigaction.2
  mtk
    s/si_sign/si_errno/ in statement about which field is unused.
  Ari Entlich
    s/SIGILL/SIGCHLD/ for paragraph describing SIGCHLD.

stat.2
  mtk
    Improve text describing underlying system calls.

swapon.2
  Michael Prokop
    EINVAL also occurs if target path is on tmpfs or similar.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435885

sync.2
  mtk
    Incorporated material from now deleted fdatasync.2.

syscall.2
  mtk
    Small fix in example program.

uname.2
  mtk
    Improve text describing underlying system calls.

utime.2
  Vincent Lefevre / mtk
    Clarify utimes() behaviour when 'times' is NULL.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=431480
  mtk
    Other minor clarifications of description of utimes().

copysign.3
  Vincent Lefevre
    s/sign/sign bit/ to remove ambiguity in description.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435415

euidaccess.3
  mtk
    Changed NOTES to VERSIONS.

ffsl.3
  mtk
    Add ffsl and ffsll to NAME line.

fts.3
  mtk
    Removed statement that fts functions are expected to appear
    soon in POSIX; it's years old and has not yet come to pass.

ftw.3
  mtk / Geoff Clare
    Fixes/improvements for example program.

getdate.3
  mtk
    Add getdate_r to NAME section.

getaddrinfo.3
  mtk / Geoff Clare
    Fixes/improvements for example
 program.

gethostbyaddr.3
  Mats Wichmann

Add documentation for gethostbyaddr_r().
Plus a few other small fixes.

gethostbyname.3
mtk
Add gethostbyname2, gethostbyname2_r, gethostbyname_r,
gethostent_r to NAME line.

getmntent.3
mtk
Fix misnamed function references.

getopt.3
Jon Burgess
Fix small error in example program.

getrpcent.3
mtk
Add setrpcent and endrpcent to NAME line.

gsignal.3
Aleksandr Koltsoff
Fix gsignal() prototype.

hsearch.3
mtk
Add hcreate_r, hdestroy_r, hsearch_r to NAME line.

inet.3
Maxime Bizon
Correct definition of "struct in_addr".

isatty.3
mtk
Minor wording fix.

isgreater.3
mtk
Add islessequal to NAME line.

lgamma.3
Vincent Lefevre
Fix CONFORMING TO section.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=417592

log1p.3
mtk
Add log1pf and log1pl to NAME line.

longjmp.3
  Paul Brook
 / mtk
    After a call to longjmp(), the values of modified, non-volatile
    variables in the function that called setjmp() are unspecified.

makecontext.3
  Aleksandr Koltsoff
    Fix makecontext() prototype.

malloc.3
  mtk / Tolga Dalman
    Explain what happens for malloc(0), or calloc() where one of the
    arguments is 0.
  mtk
    Added notes on malloc()'s use of sbrk() and mmap().
  mtk
    Add mmap(2), alloca(3) to SEE ALSO.

mq_close.3
mq_getattr.3
mq_notify.3
mq_open.3
mq_receive.3
mq_send.3
mq_unlink.3
  mtk
    Add "Link with -lrt." to SYNOPSIS.

opendir.3
  Ulrich Drepper; some edits and additional text by mtk
    Document fdopendir().

readdir.3
  mtk, after a note by Andi Kleen
    Document DT_* constants for d_type.
  Ulrich Drepper / mtk
    Rework discussion of non-standard structure fields.

sem_wait.3
  mtk
    Minor improvements to example program.

syslog.3
  mtk
    Add vsyslog to NAME

section.

termios.3
  Nicolas François
    Fix XCASE feature test macro description.

wcsspn.3
  Aleksandr Koltsoff
    Add return type to prototype.

proc.5
  mtk
    Improve description of num_threads field under /proc/PID/stat.
  Maxime Vaudequin
    Fix path error (s%proc/sys%proc/sys/kernel%) in mentions of
    /proc/sys/ostype, /proc/sys/osrelease and proc/sys/version.
  Maxime Vaudequin
    I noticed things to correct and to clarify in subsection
    "/proc/filesystems" of proc.5:
    - clarify filesystems listing: not only FS compiled
      into the kernel, also FS kernel modules currently loaded
    - add a reference to fs(5)
    - add an explanation for FS marked with "nodev"
    - s/mount(1)/mount(8)/, also corrected in section "SEE ALSO"
    - clarify usage by mount: the current wording may lead to
      think /proc/filesystems is always used by mount when no FS
      is specified. So, usage of "may" which
 IMHO is more
      appropriate + additional explanations
      In mount(8) we can see:

          If no -t option is given, or if the auto type is
          specified, mount will try to guess the desired type.
          If mount was compiled with the blkid library, the
          guessing is done by this library. Otherwise, mount
          guesses itself by probing the superblock; if that
          does not turn up anything that looks familiar,
          mount will try to read the file /etc/filesystems,
          or, if that does not exist, /proc/filesystems.
          All of the filesystem types listed there will be
          tried, except for those that are labeled "nodev"
          (e.g., devpts, proc and nfs). If /etc/filesystems
          ends in a line with a single * only, mount will
          read /proc/filesystems afterwards.
  Samuel Thibault
    Since linux 2.6.11, /proc/stat has an eighth value
 for cpu
    lines: stolen time, which is the time spent in other operating

systems when running in a virtualized environment.

arp.7
Updated BUGS text referring to jiffies; refer to time.7 instead.

credentials.7
mtk
Add words to note that file system ID is Linux specific.

hier.7
Maxime Vaudequin
This is some corrections for hier.7:
- missing period for /media and /mnt
- /mnt description is not totally correct, it is true for some
distributions but in others /mnt is used as a temporary FS
mount point, as it is specified by FHS:
http://www.pathname.com/fhs/pub/fhs-2.3.html#MNTMOUNTPOINTFORATEMPORARILYMOUNT
- s/X-Windows/X-Window/ (3 occurrences)
- section "SEE ALSO": s/mount(1)/mount(8)/

man-pages.7
man.7
mdoc.7
mdoc.samples.7
mtk / Nicolas François
Nowadays tmac.XXX are called XXX.tmac.

pthreads.7
mtk
Update text about modern threading implementations

(NPTL vs LinuxThreads).

socket.7
mtk, after a note by Andi Kleen
Clarify that SO_SNDTIMEO and SO_RCVTIMEO only have effect for
socket I/O calls; not for multiplexing system calls like
select() and poll().

time.7
mtk
Add SEE ALSO reference to new timeradd.3.

========== Changes in man-pages-2.66 ==========

Released: 2007-10-01

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Amit K. Arora <aarora@linux.vnet.ibm.com>
David Chinner <dgc@sgi.com>
Fredrik Noring <noring@nocrew.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Maxime Vaudequin <maxime.vaudequin@gmail.com>
Ollie Wild <aaw@google.com>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

fallocate.2
  David Chinner, with some
 input from Amit Amora and mtk
    Describes the fallocate() system call, new in 2.6.23.

Changes to individual pages
---

close.2
  Fredrik Noring
    Add text cautioning about use of close() in
    multithreaded programs.

execve.2
  Ollie Wild / mtk
    Add text describing limit on total size of argv + envp,
    and changes that occurred with 2.6.23.
  mtk
    Add getopt(3) to SEE ALSO list.

open.2
  mtk, Acked by Ulrich Drepper
    Added description of O_CLOEXEC (new in 2.6.23) + other
    minor fixes for O_DIRECT.

recv.2
  mtk
    Added description of MSG_CMSG_CLOEXEC (new in 2.6.23).

sysctl.2
  mtk
    Strengthened the warning against using this system call
    and note that it may disappear in a future kernel version.

rpc.3
  Mats Wichmann
    Fix type definition for 'protocol' in prototypes of pmap_set()
    and pmap_getport().

========== Changes in man-pages-2.67 ==========

Released:
 2007-10-08

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Andrew Josey <a.josey@opengroup.org>
Maxime Vaudequin <maxime.vaudequin@gmail.com>

Apologies if I missed anyone!

Global changes
---

*.1p
*.3p
  mtk, after a note by Andi Kleen and consultation with Andrew Josey.
    Add a PROLOG section:
      This manual page is part of the POSIX Programmer's Manual.

The Linux implementation of this interface may differ
(consult the corresponding Linux manual page for details
of Linux behavior), or the interface may not be implemented
on Linux.

*.0p
*.1p
*.3p
  mtk
    Some formatting fixes, mostly to get rid of unwanted
    spaces before "," in formatted output.

*
/
  mtk
    Change all occurrences of my email address in man-pages source
    to
 my new gmail address.

Many many pages
  Maxime Vaudequin
    I noticed useless use of macros with alternating formatting
    (".IR" instead ".I" which suffices, ".BR" instead ".B", etc.)
    because there is only one element. For example in ldconfig.8:

      -.BR /sbin/ldconfig
      +.B /sbin/ldconfig

    This is not very important, it only makes the sources more tidy.
    To find these I used:

      egrep '^\.(B[RI]|R[IB]|I[RB]) ([^]+|\"[^\"]\+\")$'

    And if you want to make these changes, you can use:

      sed 's/^\(\.[BRI]\)[BRI]\(\([^]\+\|\"[^\"]\+\"\)\)$/\1\2/g'

fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
readlinkat.2
renameat.2
symlinkat.2
mkfifoat.3
  mtk, after http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=445436
    by Timo Juhani Lindfors
    Added <fcntl.h> to SYNOPSIS.

Typographical or grammatical errors have been corrected in several places.

New pages

_syscall.2
  mtk
    Created as a new page, by taking the content specific to

the _syscall() macros from intro(2).

Changes to individual pages

README
  mtk
    Brought up to date.

man-pages-*-Announce
  mtk
    Brought the info in here up to date.

intro.1
  mtk
    Added intro paragraph about section, plus a paragraph
    about exit status values.
    Move "user intro" text to NOTES.

get_mempolicy.2
  mtk
    Reorder ERRORS sections alphabetically

intro.2
  mtk
    Pretty much a complete rewrite, covering some additional topics.
    Moved _syscallN() material to new _syscall(2) page.

mbind.2
  mtk
    Reorder ERRORS sections alphabetically

mmap.2
  Maxime Vaudequin
    Fix syntax error in example program.

prctl.2
  mtk
    Linux 2.6.22 added support on Alpha for PR_SET_UNALIGN.

ptrace.2
  Nicolas François / mtk
    s/PTRACE_POKEUSR/PTRACE_POKEUSER/
    s/PTRACE_PEEKUSR/PTRACE_PEEKUSER/

read.2
  mtk / Geoff Clare

Add text describing timerfd EINVAL error for read(2).

set_mempolicy.2
  mtk
    Reorder ERRORS
 sections alphabetically

syscall.2
  mtk
    Added _syscall(2) and intro(2) to SEE ALSO section.

syscalls.2
  mtk
    Added fallocate(2); removed timerfd(2).

sysinfo.2
  mtk
    Removed reference to example in intro(2).

dlopen.3
  mtk
    Added "Link with -ldl." to SYNOPSIS.

getaddrinfo.3
  Ulrich Drepper / mtk
    Remove references to getipnodebyname.3 and getipnodebyaddr.3.

gethostbyname.3
  mtk / Ulrich Drepper
    Remove SEE ALSO references to getipnodebyname.3 and
    getipnodebyaddr.3.

  Pádraig Brady / mtk / Ulrich Drepper
    Point out that the functions described on this page
    are made obsolete by getaddrinfo(3) and getnameinfo(3).

getipnodebyname.3
  mtk
    Clarify that glibc does not implement these functions.

glob.3
  Ulrich Drepper / mtk
    Fix description of GLOB_ONLYDIR.
  mtk
    Added description of GLOB_TILDE_NOMATCH.
    Expanded the description of various flags.
    Various

wording fixes..

intro.3
  mtk
    Pretty much a complete rewrite, covering some additional topics.

posix_fallocate.3
  mtk
    Add SEE ALSO referring to fallocate.2.

rpc.3
  Sam Varshavchik
    Add some arg declarations to prototypes; fix typos.

setbuf.3
  Mike Frysinger
    Fix text in BUGS section.

sigset.3
  mtk
    The sigset() bugs were fixed in glibc 2.5.
    See http://sourceware.org/bugzilla/show_bug.cgi?id=1951

intro.4
  mtk
    Minor rewrites.

st.4
  Maxime Vaudequin
    Various small corrections, formattings and modifications.

elf.5
  Mike Frysinger
    Document:
    - new p_flag: PT_GNU_STACK
    - new sections: .gnu.version .gnu.version_d .gnu.version_r
      .note.GNU-stack
    - new structures: ElfN_Verdef ElfN_Verdaux ElfN_Verneed
      ElfN_Vernaux

intro.5
  mtk
    Minor rewrites.

proc.5
  Ivana Varekova / mtk
    Add text noting that since kernel 2.6.16, /proc/slabinfo is

only available if CONFIG_SLAB is enabled.
Maxime Vaudequin
Update description of /proc/pci.
Maxime Vaudequin
Give italic formatting to file names in proc.5.
mtk
The display type of the /proc/PID/stat fields changed
%lu to %u in Linux 2.6.22:
flags
rt_priority
policy

slabinfo.5
Ivana Varekova / mtk
Add text noting that since kernel 2.6.16, /proc/slabinfo is
only available if CONFIG_SLAB is enabled.

intro.6
mtk
Minor rewrites.

bootparam.7
Maxime Vaudequin
Update references to files in kernel "Documentation" directory.

intro.7
mtk
Minor rewrites.

ipv6.7
Andrew McDonald
Fix description of IPV6_ROUTER_ALERT option.

standards.7
mtk
Note online location of C99 standard.

intro.8
mtk
Some rewrites, plus new paragraph on exit status values.

Global changes
---

*.[013]p
  mtk
    Many whitespace clean-ups in formatted output.

mprotect.2
bind.2
mq_notify.3
makecontext.3
fmemopen.3
  David Härdeman / mtk
    Rename error handling function in example program
    (s/die/handle_error/).

Typographical or grammatical errors have been corrected in several places.

Removed
 pages

HOWTOHELP
MAINTAINING
  mtk

The content of these files is now available in HTML format.

New links
---

cfsetspeed.3
  mtk
    Link to termios.3.

Changes to individual pages
---

time.1
  Alain Portal
    Added "Linux User's Manual" to .TH line.

_syscall.2
  aeb / mtk
    Remove outdated text about pointer blocks for syscalls that have
    more than 5 arguments.

fcntl.2
  J. Bruce Fields
    Add warning that mandatory locking is unreliable.
  J. Bruce Fields
    Clarify details in description of file leases.
  J. Bruce Fields / mtk
    Minor wording edits.
  J. Bruce Fields
    Add F_GETLEASE under RETURN VALUE.

mmap.2
  mtk
    Handle errors using a custom handle_error() macro.

sched_setscheduler.2
  Mats Wichmann
    Add BUGS text noting that the return value from Linux
    sched_setschuler() does not conform to POSIX.

spu_create.2
  Jeremy Kerr
     Various updates and improvements.
  Luke Browning
    Refinement of text describing a "gang".
  mtk
    Minor edits.

spu_run.2
  Jeremy Kerr
    Various updates and improvements.
  mtk
    Minor edits.

err.3
  mtk
    Remove HISTORY section.

fopen.3
  Mike Frysinger
    Document 'e' (close-on-exec) option, new in glibc 2.7.

getloadavg.3
  Alain Portal / mtk
    Remove HISTORY section.

printf.3
  Andries E. Brouwer / mtk
    Fix the discussion of stdarg macros in the description of
    vprintf() description.

sem_wait.3
  mtk
    Handle errors using a custom handle_error() macro.

sigsetops.3
  Mats Wichmann
    Note that sigset_t objects must be initialized
    with sigemptyset() or sigfillset() before the other
    macros are employed.

termios.3
  mtk, after a note by Alain Portal
    Added cfsetspeed() to SYNOPSIS. Added text under CONFORMING TO
    noting that cfsetspeed() is BSD specific.

ttyslot.3
   Alain Portal
    Various references to "getty" were changed to "mingetty", since
    that is the manual page more likely to be found on current
    systems. (Completes changes that were made in man-pages-2.44.)

initrd.4
  mtk, after a note by Alain Portal
    Move "Configuration" section to top of page (like other

section 4 pages) and make it a .SH section.

full.4
  mtk
    Re-ordered CONFIGURATION section to go before DESCRIPTION.

sk98lin.4
  Maxime Vaudequin
    Fix reference to kernel Documentation file.

elf.5
  mtk
    Renamed HISTORY section to NOTES, and removed BSD specific info.

proc.5
  Maxime Vaudequin
    Mention grub(8) in same sentence as lilo(8).
  Maxime Vaudequin
    Improve description of /proc/sys/abi and
    /proc/sys/kernel/modprobe.

utmp.5
  Alain Portal
    Various references to "getty" were changed to "mingetty", since
    that is the manual page more likely to be found
 on current
    systems. (Completes changes that were made in man-pages-2.44.)

iso_8859-2.7
  Adam Borowski
    Reverse the 2.68 change applied by mtk in response to
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=445085
    that replaced "Sorbian" with "Serbian".
    (Sorbian is a language of 50000 people in Brandenburg.)

man-pages.7
  mtk
    Added CONFIGURATION to list of "standard" section names.

spufs.7
  Jeremy Kerr
    Various updates and improvements.
  mtk
    Minor edits.

tcp.7
  Maxime Vaudequin
    Fix reference to kernel Documentation file.

========== Changes in man-pages-2.70 ==========

Released: 2007-12-06

Global changes

Many pages
  mtk
    Remove section numbers for page references where the
    reference refers to the page itself. (This stops man2html
    producing links from a page back to itself.)

Typographical or grammatical errors have been corrected
 in several places.

Changes to individual pages
---

get_mempolicy.2
  mtk
    Add CONFORMING TO section.

io_getevents.2
  mtk
    Remove redundant SEE ALSO entry.

mbind.2
  mtk
    Add CONFORMING TO section.

msgop.2
  mtk
    Remove redundant SEE ALSO entries.

sigprocmask.2
  mtk
    Remove redundant SEE ALSO entry.

splice.2
  mtk
    Remove redundant SEE ALSO entry.
    Add SEE ALSO referring to vmsplice(2).

csin.3
  mtk
    Remove redundant SEE ALSO entry.
    Add SEE ALSO referring to ccos(3).

gethostbyname.3
  mtk
    Add gethostbyaddr_r to NAME section.

rint.3
  mtk
    Remove redundant SEE ALSO entry.

sigsetops.3
  mtk
    Minor rewording.

epoll.7
  mtk
    Minor rewording.

rexec.3
stdin.3
elf.5
operator.7
  mtk
    Replaced the use of mdoc macros on these pages with man
    macros. The only pages in man-pages that still use
    mdoc macros are mdoc.7 and mdoc.samples.7.

Typographical or grammatical errors have been corrected in several places.

Deleted pages

TODO
  mtk
    This information is now on the website.

Changes to individual pages

Changes.old
  mtk
    Reformat various change log entries to use a consistent format.
    Expand Debian bug report numbers to be URLs.
    Other minor tidy-ups.

fcntl.2
  mtk
     Document the F_DUPFD_CLOEXEC operation, which is
    new in kernel 2.6.24.

listen.2
  Josh Triplett
    Fix incorrect path for somaxconn.

getpw.3
  Alain PORTAL
    Add ENOENT error to ERRORS.

sysconf.3
  Mats Wichmann

Add documentation of _SC_NPROCESSORS_CONF and _SC_NPROCESSORS_ONLN.

tty.4
  John Sigler
    Add tty_ioctl(4) to SEE ALSO list.

regex.7
  Pascal MALAISE <malaise@magic.fr>
    Separate text on back references from that describing basic regexps,
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=379829.
  mtk
    Remove crufty text about word boundaries.

========== Changes in man-pages-2.72 ==========

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Alex Tuninga <atuninga@google.com>
Bert Wesarg <bert.wesarg@googlemail.com>
Maxime
 Vaudequin <maxime.vaudequin@gmail.com>
Rob Weryk <rjweryk@uwo.ca>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes

Various pages
  Alain PORTAL / mtk
    Format include files consistently (".I <.*\.h>").

Various pages
  Alain PORTAL / mtk
    Format pathname in italics (.I).

dbopen.3

mpool.3
recno.3
  Alain PORTAL
    Remove brackets ([]) around error names.

console.4
tty.4
ttyS.4
issue.5
ttytype.5
utmp.5
  mtk / Maxime Vaudequin
    Some systems have mingetty(8), others have agetty(8), so both
    should be mentioned when we are talking about getty-style programs.

Typographical or grammatical errors have been corrected in several places.

Renamed pages
---

filesystems.5
  mtk / Alain PORTAL
    Was previously fs.5

New links
---

argz.3
  Bert Wesarg / mtk
    Link to argz_add.3.

envz.3
  Bert Wesarg / mtk
    Link to envz_add.3.

fs.5
  mtk / Alain PORTAL
     Link to filesystems.5.

Changes to individual pages
---

readahead.2
  Rob Weryk

Fix declaration of 'offset' in SYNOPSIS.

seteuid.2
mtk
s/SETGUID/SETEUID/ in .TH line.

__setfpucw.3
mtk
Fixed include files references / formatting.

abort.3
mtk, after a note by Alex Tuninga
A fairly significant rewrite to clarify operation of abort().

argz_add.3
Bert Wesarg / mtk
s/envz/envz_add/ in SEE ALSO.

basename.3
mtk
s/DIRNAME/BASENAME/ in .TH line, and swap function names
in NAME section.

envz_add.3
Bert Wesarg / mtk
s/argz/argz_add/ in SEE ALSO.

flockfile.3
mtk
s/LOCKFILE/FLOCKFILE/ in .TH line.

getgrent_r.3
mtk
s/GETGRENT/GETGRENT_R/ in .TH line.

stdio.3
Sam Varshavchik
Reformat function list at end of page as a proper table.

ttyslot.3
Maxime Vaudequin
Revert earlier s/getty/mingetty/. This page talks about
historical
behavior, and that means "getty(8)".

undocumented.3
mtk
Remove reference to "obstack stuff"; it's not clear what

that is about.

console_ioctl.4
  mtk
    s/CONSOLE_IOCTLS/CONSOLE_IOCTL/ in .TH line.

proc.5
  mtk
    s/fs (5)/filesystems (5)/

man-pages.7
  mtk / Alain PORTAL
    Improve discussion of formatting of file names.

========== Changes in man-pages-2.73 ==========

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Pádraig Brady <P@draigBrady.com>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

Global changes

Various pages
  Alain PORTAL
    Formatting fixes.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages
---

mknod.2
  mtk, after a report

by Reuben Thomas
Clarify use of mkfifo() versus mknod().
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455825

fgetgrent.3
mtk
Small rewording.

fgetpwent.3
mtk
Small rewording.

rcmd.3
mtk
Noted feature test macro requirements.
BUGS: noted that iruserok() is not declared in glibc headers.

filesystems.5
mtk
Added Reiserfs, XFS, JFS to list of file systems.

========== Changes in man-pages-2.74 ==========

Released: 2007-12-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andrew Morton <akpm@linux-foundation.org>
David Brown <lkml@davidb.org>
Jeremy Kerr <jk@ozlabs.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Sam Morris <sam@robots.org.uk>
Sam Varshavchik <mrsam@courier-mta.com>
Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed
anyone!

Global changes

Various pages
  Alain PORTAL
    Formatting fixes.

Various pages
  mtk / Alain Portal
    s/``..."/"..."/

Various pages
  mtk
    s/epoch/Epoch/

Various pages
  mtk
    Make the standard indent for code samples, shell session
    logs, etc. to be ".in +4n".

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

_syscall.2
  mtk
    Nowadays there is _syscall6() also.

chroot.2
  mtk
    Various minor formatting changes.

epoll_wait.2
  mtk
    Fix types in structs.
    Formatting fixes.

mount.2
  mtk, after a note by Sam Morris
    Clarify that MS_NODIRATIME provides a subset of the
    functionality provided by MS_NOATIME.

sched_setaffinity.2
  mtk
    Minor rearrangement of text.

select_tut.2
  mtk

Fix (my) typos in argument names.
Formatting fixes.

spu_create.2
Jeremy
Kerr
We can use context FDs for the dirfd argument to the *at() syscalls.

times.2
mtk, after a note from David Brown and Andrew Morton
http://marc.info/?l=linux-kernel&m=119447727031225&w=2
Rework the text describing the return value to be closer
to the requirements of POSIX.1; move Linux details
to NOTES and add a warning not to rely on those details.
Add a warning about the -1 to -4095 bug which results
in a 41 second window where the glibc wrapper will wrongly
return -1 indicating an error.
mtk
Remove cruft HZ text.
Clarify text describing return value of clock(3).

getw.3
Mats Wichmann
CONFORMING TO: getw() and putw() were in SUSv2, but are not
in POSIX.1-2001.

hash.3
mtk / Alain Portal
Minor rewordings + formatting fixes.

st.4
Alain Portal / mtk
Many formatting fixes.
mtk
Place ERRORS in alphabetical order.

vcs.4
Samuel Thibault
Document VT_GETHIFONTMASK (new in 2.6.18) and add to example program;
attribute/text characters are in the host byte order.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=456437
mtk
Minor edits.

bootparam.7
Alain PORTAL
Formatting fixes.

inotify.7
  mtk
    Minor heading changes and reformattings.

man-pages.7
  mtk
    Note that code segments, structure definitions, shell session
    logs, should be indented by 4 spaces.

spufs.7
  Jeremy Kerr
    Add a little information about the differences to mbox.

  mtk
    Various reformattings.

Various pages
  Alain Portal
    Formatting fixes.

mlock.2
mprotect.2
mpool.3
offsetof.3
  Alain Portal
    Format SYNOPSIS in a manner consistent with other pages.

Various pages
  mtk / Alain Portal
    Format casts so that there is a non-breaking space after the
    type, and remove unnecessary parentheses around the casted value.
    Thus, for example, the following:

      .IR "(size_t) (\-1)" .

    becomes:

.IR "(size_t)\ \-1" .

Various pages
  mtk / Alain Portal
    Replace "-" by "\-" where a real dash is required.

Various pages
  mtk
    Make the formatting of instances of '*varname' consistent, changing
    instances such as:

        .RI * varname

    to:

        .I *varname

getgrouplist.3
getttyent.3
key_setsecret.3
mtrace.3
tcgetpgrp.3
tcgetsid.3
ttyslot.3
tty_ioctl.4
  mtk
    Remove extraneous .sp macros.

fcntl.2
outb.2
send.2
syscalls.2
getopt.3
proc.5
man-pages.7
standards.7
tcp.7
  mtk
    Remove/replace extraneous .sp macros.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

_syscall.2
  mtk
    Nowadays there are seven macros (see 2.74 change log also).

arch_prctl.2
  mtk, Acked by Andi Kleen
    Clarify interpretation of 'addr'; plus a few other minor edits
    and updates.

bind.2
  mtk
    Minor rewrites.

close.2
  mtk
    Clarify relationship between file descriptor
 and open file
    description.

connect.2
  mtk, Acked by Andi Kleen
    Since kernel 2.2, AF_UNSPEC for unconnecting a connected
    socket *is* supported.

execve.2
  Alain Portal
    Minor rewordings.

futimesat.2
  Alain Portal
    Remove duplicate "#include <fcntl.h>" from SYNOPSIS.

getgid.2
  mtk
    Add getresgid(2) and credentials(7) to SEE ALSO.

getpagesize.2
  mtk
    Small rewording.

getresuid.2
  mtk
    Rewrote various parts.

getuid.2
  mtk
    Add getresuid(2) and credentials(7) to SEE ALSO.

ioctl_list.2
  Alain Portal
    Use proper tables for layout, and various formatting fixes.
  mtk
    Various formatting fixes.

listen.2
  mtk
    Rewrote various parts.

mbind.2
  Andi Kleen / mtk / Alain Portal
    Modify explanation of EINVAL 'maxnode' error.

mmap.2
  mtk
    Add comma to clarify meaning of a sentence.

open.2
  mtk
    Clarify initial description of O_EXCL.
    Clarify
 description of behaviors of O_CREAT | O_EXCL
    for symbolic links.
    Clarify text describing use of lockfiles without O_EXCL.
  mtk, with input from Timo Sirainen and Trond Myklebust
    O_EXCL is supported on NFSv3 and later, with Linux 2.6 and later.

pipe.2
  mtk
    Rename 'filedes' argument 'pipefd'.

pivot_root.2
  mtk
    s/cwd/current working directory/

seteuid.2
  mtk
    Minor changes.

setpgid.2
  mtk
    Add credentials(7) to SEE ALSO, and updated copyright credits,
    to reflect my rewrite of a few months ago.

setsid.2
  mtk
    Add getsid(2) and credentials(7) to SEE ALSO.

spu_create.2
  Alain Portal / mtk; acked by Jeremy Kerr
    Minor formatting/wording changes.
  mtk
    Put EPERM in right alphabetical position in ERRORS list.

argz_add.3
  mtk
    Formatting fixes.

atexit.3
  mtk
    Minor changes to example program.

cerf.3
  mtk
    These functions are still not present as
 at glibc 2.7.

dbopen.3
  Alain Portal / mtk
    Various minor spelling and formatting fixes.

envz_add.3
  mtk
    Formatting fixes.

fexecve.3
  mtk
    Fix placement of feature test macro in SYNOPSIS.

fmax.3
fmin.3
  mtk
    Small rewording.

getline.3
  mtk
    Minor changes to example program.

getrpcent.3
getrpcport.3
  mtk

Use modern C prototypes in SYNOPSIS.

getutent.3
Alain Portal / mtk
Formatting fixes.

mbsnrtowcs.3
mbsrtowcs.3
mbstowcs.3
mtk
Use .IP tags to create properly formatted lists.

rpc.3
mtk
Convert function declarations to use modern C prototypes.
Add text and start of page describing header files
and types required by functions.
Reformat discussion of request under clnt_control().

xdr.3
mtk
Convert function declarations to use modern C prototypes.
Remove crufty "int empty" from xdrrec_eof() description.

console_codes.4
Phil Endecott

Relocate misplaced line:
"and if LF/NL (new line mode) is set also a carriage return;"
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=458338.

console_ioctl.4
mtk
Formatting fixes.

bootparam.7
mtk, after a note by Alan Portal
Fix reference to kernel documentation source file in the
"The Sound Driver" subsection.

man-pages.7
Alain Portal
Move CONFIGURATION description after SYNOPSIS description.
mtk / Alain Portal
Note that header files should be surrounded by angle brackets (<>).

posixoptions.7
mtk

Minor formatting and wording fixes.

rtnetlink.7
  Andreas Henriksson
    Fix description of RTM_F_EQUALIZE.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=458325.

signal.7
  mtk
    Minor formatting and wording fixes.

socket.7
  mtk
    Small rewording of discussion of O_ASYNC.

spufs.7
  mtk / Jeremy Kerr / Alain Portal
    s/SPE/SPU/

==========
Changes in man-pages-2.76 ==========

Released: 2008-01-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Carlo Marcelo Arenas Belon <carenas@sajinet.com.pe>
Jeremy Kerr <jk@ozlabs.org>
Sam Varshavchik <mrsam@courier-mta.com>
Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes
---

longjmp.3
printf.3
scanf.3
setbuf.3

setjmp.3
sk98lin.4
environ.7
  mtk
    Rework/remove use of ".ad" macros.

ioctl_list.2
mlock.2
mprotect.2
mremap.2
syslog.2
cfree.3
mpool.3
offsetof.3
rpc.3
stdin.3
  mtk
    Fix unbalanced quotes in formatting macros.

ftok.3
  mtk
    s/i-node/inode/, for consistency with other pages and POSIX.1-2001.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages
---

chown.2

 mtk
    Minor wording change.

dup.2
  mtk
    Reordered text in DESCRIPTION and added some details for dup2().

open.2
  Trond Myklebust / mtk
    Minor fix to O_EXCL changes in previous release.

gettid.2
  mtk
    Rewrote DESCRIPTION; noted that thread ID is not the same
    thing as a POSIX thread ID.

pipe.2

mtk
Rewrote DESCRIPTION; minor additions to EXAMPLE text.

umask.2
mtk
A few rewrites and additions.

strptime.3
Carlo Marcelo Arenas Belon / mtk
Add "#define _XOPEN_SOURCE" to example program.

initrd.4
mtk
Use quotes more consistently in formatting macros.

random.4
mtk, after a report by Daniel Kahn Gilmor
Add 2.6 details for /proc/sys/kernel/random/poolsize.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=459232.

pthreads.7
mtk
Minor changes.

spufs.7
mtk / Jeremy Kerr
Define abbreviation "MSS".

========== Changes in man-pages-2.77 ==========

Released:
2008-01-31

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Pavel Heimlich <tropikhajma@seznam.cz>
Phil Endecott <phil_vonar_endecott@chezphil.org>
Thomas Huriaux <thomas.huriaux@gmail.com>
Vincent Lefevre <vincent@vinc17.org>
WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

Global changes
---

stdarg.3
bootparam.7
  Thomas Huriaux
    Fix broken use of single quotes at start of line,
    as per: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462636

Typographical or grammatical errors have been corrected in several places.

New pages
---

remove_COLOPHON.sh
  mtk
    Script to remove the COLOPHON section from the man pages provided
    as command-line arguments. This is useful to remove the COLOPHON
    sections from all of the man pages in two different release trees
    in order to do a "diff -ruN"
 to see the "real" differences
    between the trees.

Changes to individual pages
---

fcntl.2
  mtk
    Replace tables with .TP macros.

fork.2
  mtk
    Added discussion of directory streams.
    Removed "#include <sys/types>" from SYNOPSIS.
    Changed authorship notice.

futex.2
  mtk
    Add ENOSYS error to errors.
  Phil Endecott
    Explicitly describe return value in the event of an error.

inotify_add_watch.2
  mtk
    Minor wording changes.

splice.2
  WANG Cong
    Fix types for 2 and 4 arguments in splice prototype.

wait.2
  Phil Endecott
    Clarify description of return value for WNOHANG.

tkill.2
  mtk
    Rewrote DESCRIPTION; emphasized that tkill() is obsoleted by
    tgkill().

alloca.3
  mtk
    Change description in NAME section.
    Various rewrites and additions (including notes on longjmp() and
    SIGSEGV).
  mtk / Vincent Lefevre
    Weaken warning
 against use of alloca(), and
    point out some cases where it can be useful;
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=461100.

bootparam.7
  Pavel Heimlich
    Remove junk line.

inotify.7
  mtk
    Replace tables with .TP macros.
    s/MultiSource Synchronization/MultiSource Synchronization (MSS)/

========== Changes in man-pages-2.78 ==========

Released: 2008-02-15

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Davide Libenzi <davidel@xmailserver.org>
Greg Banks <gnb@melbourne.sgi.com>

Michael Tokarev <mjt@tls.msk.ru>
Phil Endecott <phil_vonar_endecott@chezphil.org>

Apologies if I missed anyone!

Global changes
---

sigaction.2
signal.2
sigwaitinfo.2
signal.7
  mtk
    Add SEE ALSO entry referring to new signalfd.2 page.

Typographical or grammatical errors have been corrected in several places.

New pages
---

eventfd.2
  mtk, with input and review from Davide Libenzi
    Documents the eventfd() system call, new in 2.6.22.

signalfd.2
  mtk, with input and review from Davide Libenzi
    Documents the signalfd() system call, new in 2.6.22.

Changes to individual pages
---

futex.2
  mtk / Phil Endecott
    Improve wording describing error returns.

open.2
  Greg Banks
    Greatly expand the detail on O_DIRECT.

reboot.2
  mtk / Michael Tokarev
    Fix RETURN VALUE description: in some cases reboot() does not
    return.
  mtk
    Rename the 'flag' argument to 'cmd', since that is more meaningful,
    and also what is used in the kernel source.

Other minor wording changes.

========== Changes in man-pages-2.79 ==========

Released: 2008-03-07

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries
E. Brouwer <Andries.Brouwer@cwi.nl>
Chris Heath <chris@heathens.co.nz>
Davide Libenzi <davidel@xmailserver.org>
Fernando Luis Vázquez Cao <fernando@oss.ntt.co.jp>
Heikki Orsila <shdl@zakalwe.fi>
Jeremy Kerr <jk@ozlabs.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>

Michael Haardt <michael@moria.de>
Mike Frysinger <vapier@gentoo.org>
Ron Burk <ronburk@gmail.com>
Sam Varshavchik <mrsam@courier-mta.com>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Walter Harms <WHarms@bfs.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several places.

New pages
---

timerfd_create.2
  mtk, with input and review from Davide Libenzi
    Documents the timerfd_create(), timerfd_settime(), and
    timerfd_gettime() system calls, which are new in 2.6.25.

New links
----

timerfd_gettime.2
timerfd_settime.2
  mtk
    Links to new timerfd_create.2 page.

eventfd_read.3
eventfd_write.3
   mtk
    Links to eventfd.2.

Changes to individual pages

Makefile
  aeb
    Remove code relating to man1/README, which no longer exists.

execve.2
  mtk
    Clarify detail of RLIMIT_STACK/4 limit for argv+environ.

getitimer.2
  mtk
    Added SEE ALSO entry referring to timerfd_create.2.

getrusage.2
  mtk
    Minor rewordings.

open.2
  Michael Haardt
    Move discussion of 'mode' argument under description of O_CREAT.

signalfd.2
  mtk
    Fix type for 'ssi_ptr' field.
    See http://sources.redhat.com/ml/libc-hacker/2008-01/msg00002.html.

syscalls.2
  mtk
    Add timerfd_create(), timerfd_settime(), and timerfd_gettime()
    to list.

syslog.2

Jeremy Kerr
Add info on command type 10.
Add details on types 6, 7, 8, and 9.
Minor grammar fix.
mtk
Update LOG_BUF_LEN details.
Update RETURN VALUE section.
Notes capability
requirements under EPERM error.
Minor fix to description of type==3 and type==4.
Other minor edits.

ctime.3
Walter Harms
Note that POSIX requires localtime() to act as though tzset()
was called, but localtime_r() does not have the same requirement.
See also http://thread.gmane.org/gmane.comp.time.tz/2034/

getaddrinfo.3
mtk
Clarify discussion of NULL 'hints' argument; other minor rewrites.
mtk / Sam Varshavchik
Remove some duplicated text.

malloc.3
Lasse Kärkkäinen / Mike Frysinger / mtk
Clarify description of realloc() behavior for
((size == 0) && (ptr != NULL)).

posix_fallocate.3
Samuel Thibault
s/stdlib.h/fcntl.h/ in SYNOPSIS.

proc.5
Fernando Luis Vázquez Cao
Update /proc/[number]/cmdline description.
It used to be true that the command line arguments were
not accessible when the process had been swapped out.
In ancient kernels (circa
2.0.*) the problem was that the
kernel relied on get_phys_addr to access the user space buffer,
which stopped working as soon as the process was swapped out.
Recent kernels use get_user_pages for the same purpose and thus
they should not have that limitation.

epoll.7
Davide Libenzi / mtk
Clarify the somewhat unintuitive behavior that occurs if a file

descriptor in an epoll set is closed while other file descriptors
referring to the same underlying open file description remain
open.
See also http://thread.gmane.org/gmane.linux.kernel/596462/.
mtk
Clarify error that occurs if we add an epoll fd to its own set.
mtk
A few minor rewordings.
mtk, after a note by Chris Heath
Rework Q1/A1, describing what happens when adding the same
file descriptor twice to an epoll set, and when adding duplicate
file descriptors to the same epoll set.
Heikki Orsila / mtk / Davide
Libenzi
Clarify Q9/A9 to discuss packet/token-oriented files.
mtk, after comments by Davide Libenzi and Chris Heath
Added Q0/A0, making explicit that the key for items in an epoll
set is [file descriptor, open file description].
mtk, after a note by Ron Burk
Change A3, to note that when events are available,
the epoll file descriptor will indicate as being readable.
mtk
Add some further explanation to Q5/A5 about why an epoll file
descriptor cannot be passed across a Unix domain socket.

posixoptions.7
mtk
Add SEE ALSO entry for standards(7).

regex.7
mtk
Add grep(1) to SEE ALSO.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=348552.

standards.7
mtk
Add SEE ALSO entry for posixoptions(7).

time.7
mtk
Added SEE ALSO entry referring to timerfd_create.2.

Global changes
---

bdflush.2
inotify_add_watch.2
mprotect.2
sigprocmask.2

ctime.3
getusershell.3
setbuf.3
st.4
ip.7
packet.7
  mtk
    Replace "(il)legal" by "(not) permitted" or "(in)valid".

read.2
utime.2
filesystems.5
packet.7
  mtk
    s/time stamp/timestamp/, for consistency with majority use
    in other pages, and in POSIX.1.

madvise.2
mbind.2
mincore.2
mmap.2
mmap2.2
msync.2
remap_file_pages.2
  mtk
    Change name of 'start' argument to 'addr' for consistency
    with:
      * other memory-related interfaces
      * POSIX specification (for those interfaces in POSIX)
      * Linux and glibc source code (in at least some cases)

Various
 pages
  mtk
    s/filesystem/file system/, for consistency with majority use
    in other pages, and in POSIX.1.

Various pages
  mtk
    s/zeroes/zeros/, for consistency with majority use
    in other pages, and in POSIX.1.

abs.3
proc.5
  mtk
    s/builtin/built-in/, for consistency with majority use
    in other pages, and in POSIX.1.

mknod.2
ftw.3
  mtk
    s/normal file/regular file/

Various pages
  mtk
    s/nonempty/non-empty/

Various pages
  mtk
    s/nonzero/non-zero/

Various pages
  mtk
    s/realtime/real-time/, for consistency with majority usage.

Various pages
  mtk
    s/command line/command-line/ when used attributively.

Various pages
  mtk
    Use "run time" when non-attributive, "run-time" when attributive.

Various pages
  mtk
    Various pages that I wrote carried a slightly modified version
    of the "verbatim" license. In the interests of minimizing
    license proliferation,
 I've reverted the modified form
    so that the license is exactly the same as on other pages
    carrying the verbatim license.

epoll_ctl.2
getitimer.2
getrlimit.2
unix.7
  mtk
    s/since kernel x.y.z/since Linux x.y.z/

wait.2
inotify.7
  mtk
    Reformat kernel version information for flags.

Typographical or grammatical errors have been corrected in several places.
(Special thanks to Nicolas François.)

New pages
---

random_r.3
  mtk, after a suggestion by aeb
    Documents random_r(3), srandom_r(3), initstate_r(3), and
    setstate_r(3), which are the reentrant equivalents of
    random(3), srandom(3), initstate(3), and setstate(3).

New links
---

lutimes.3
  mtk
    Link to futimes.3.

initstate_r.3
setstate_r.3
srandom_r.3
  mtk
    Links to random_r.3.

daylight.3
timezone.3
tzname.3
  mtk
    Links to tzset.3.

isnanf.3
isnanl.3
  mtk
    Links to finite.3.

encrypt_r.3
setkey_r.3
  mtk
    Links
 to encrypt.3.

Changes to individual pages
---

clone.2
  mtk

Added note that CLONE_STOPPED (which no-one uses anyway) is
now deprecated.

epoll_create.2
mtk
Add NOTES section pointing out that 'size' argument is unused
since kernel 2.6.8.

epoll_ctl.2
mtk
Added portability note to BUGS text for EPOLL_CTL_DEL.

epoll_wait.2
mtk
If the 'sigmask' is NULL, then epoll_pwait() is equivalent
to epoll_wait().

fork.2
mtk
NOTES: since glibc 2.3.3, the glibc NPTL fork() wrapper
bypasses the fork() system call to invoke clone() with
flags providing equivalent functionality.

futex.2
mtk, after a note from Adrian Bunk
FUTEX_FD has been removed, as of kernel 2.6.26.

futimesat.2
mtk
Note that this system call is made obsolete by utimensat(2).

getgroups.2
Petter Reinholdtsen
SEE ALSO: Add getgrouplist(3).
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=479284.
mtk
NGROUPS_MAX increased in kernel 2.6.4.
SEE ALSO: Add credentials(7).
mtk
Reformat DESCRIPTION and RETURN VALUE sections to be more
consistent with man-pages style.
Add some more detail to descriptions of system calls.
Clarified what happens if caller of getgroups() is a member of
more than 'size' supplementary groups.
ERRORS: Add ENOMEM.

getpriority.2
mtk, after a note from Ingo Molnar

Add text in NOTES about the punchier effect of nice values in
kernel 2.6.23 and later.
Add Documentation/scheduler/sched-nice-design.txt to SEE ALSO list.

gettid.2
mtk
Added VERSIONS section noting that this system call first
appeared in 2.4.11.

kill.2
Marty Leisner / mtk
Add text explicitly noting that sig==0 can be used to check for
the existence of a PID or PGID.
mtk
A few minor rewordings.

mbind.2
mtk
The location of the numactl package has changed.

mmap.2
mtk
Added some .SS headings to make structure of page a little
more obvious.
mtk, with input from Nick Piggin
MAP_POPULATE supports both file and anonymous mappings.
Since 2.6.23, MAP_POPULATE supports private mappings.
Since 2.6.23, MAP_NONBLOCK causes MAP_POPULATE to be a no-op.
mtk
NOTES: Added details on mapping address that is selected by
kernel when MAP_FIXED is / isn't specified.

mount.2
mtk
The MS_REMOUNT changes in 2.4 were at 2.4.10 (not 2.4).
mtk
Minor wording change.

msgctl.2
mtk
Clarify that "unused" fields in msginfo structure are
"unused within the kernel".
msginfo.msgpool is measured in kilobytes, not bytes.
Minor rewordings in comments for msginfo structure.

msgop.2
mtk
Various minor rewordings and restructurings for clarity.

mtk, after a note from Reuben Thomas
Remove "msgop" from NAME section.

mkdir.2
mtk
Clarify meaning of "BSD group semantics".
SEE ALSO: add chown(2).

mknod.2
mtk
SEE ALSO: add chown(2) and chmod(2).

mmap.2
mtk
SEE ALSO: add mprotect(2) and shmat(2).

mprotect.2
Hamaji Shinichiro
SYNOPSIS: s/size_t *len/size_t len/

open.2
mtk
Note that O_CLOEXEC should be in the next POSIX.1 revision.
mtk
More than just ext2 supports "mount -o bsdgroups" nowadays,
so make the discussion about group ownership of new files a bit
more generic.
mtk
SEE ALSO: add chown(2) and chmod(2).

poll.2
mtk
If the 'sigmask' is NULL, then ppoll() is equivalent to poll()
with respect to signal mask manipulations.

posix_fadvise.2
mtk
s/posix_madvise (2)/posix_madvise (3)/;
(The referred-to page still doesn't exist yet, but hopefully
will do sometime soon.)

ptrace.2
Anoop, Acked by Roland
McGrath.
Re PTRACE_PEEKUSER: the offsets and data returned might not
match with the definition of struct user.
See also http://lkml.org/lkml/2008/5/8/375

recv.2
  Felix Kater / mtk
    Improve wording for EAGAIN error in discussion of MSG_DONTWAIT.

rmdir.2
  Martin Pitt
    POSIX.1 also allows EEXIST for the ENOTEMPTY error condition.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=467552.

sched_setscheduler.2
  mtk, with input from Ingo Molnar
    Add description of SCHED_IDLE policy (new in 2.6.23).
    Tweak description of SCHED_BATCH.
    Minor rewordings.

select_tut.2
  Justin Pryzby
    Various wording clean-ups.

semctl.2
  mtk
    Clarify that "unused" fields in seminfo structure are
    "unused within the kernel".
    Minor rewordings in comments for seminfo structure.

semop.2
  Aurelien Gerome
    Small fix in example code.

setpgid.2
  mtk / Karsten Weiss
    Clarify description
 of setpgid() a little.

shmctl.2
  mtk
    Clarify that "unused" fields in shminfo structure are
    "unused within the kernel".
    Minor rewordings in comments for shminfo structure.

shmop.2
  mtk, after a note from Reuben Thomas
    Remove "shmop" from NAME section.

signalfd.2
  mtk
    Added BUGS text noting that before kernel 2.6.25, the ssi_int
    and ssi_ptr fields are not set.

Added comments describing fields in signalfd_siginfo structure.
Update field names in example program (s/signo/ssi_signo/).
Various small fixes, and remove duplicated sentence.
Minor edits to structure definition.

sigqueue.2
mtk
Added some comments to code in NOTES.

stat.2
mtk
Minor wording change.

symlink.2
mtk
SEE ALSO: add lchown(2).

sync_file_range.2
mtk / Andrew Morton
Remove statement that (SYNC_FILE_RANGE_WAIT_BEFORE |
SYNC_FILE_RANGE_WRITE | SYNC_FILE_RANGE_WAIT_AFTER)
is
a traditional fdatasync(2) operation.
See https://bugzilla.mozilla.org/show_bug.cgi?id=421482
comments 129 to 131.

syscalls.2
mtk
This page is now up to date as at kernel 2.6.25.

syslog.2
mtk
Small tidy up of language relating to permissions/capabilities.

timerfd_create.2
mtk
Minor change to example program.
Minor wording change.

utime.2
Reuben Thomas
Remove unnecessary subheading for utimes().
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=477402.
mtk
Change description in NAME line ("or" is not correct: these calls
always change *both* timestamps).
CONFORMING TO: utimes() is in POSIX.1-2001.
mtk

Rename 'buf' argument of utime() to 'times' (like utimes()).
Clarify explanation of EACCES and EPERM errors.
Remove BUGS section, since it doesn't seem to add useful
information.
Clarified discussion of capabilities,
and noted that
CAP_DAC_OVERRIDE also has a role.
Other minor rewordings.

wait.2
mtk, after a note by Justin Pryzby
Add a sentence clarifying that even though the default disposition
of SIGCHLD is "ignore", explicitly setting the disposition to
SIG_IGN results in different treatment of zombies.

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
Kevin O'Gorman <kogorman@csc.calpoly.edu>
Add "Link with -lrt" to SYNOPSIS.

backtrace.3
Nicolas François
s/backtrace_symbols/backtrace_symbols_fd/ in one sentence.
mtk
Fix bogus reference to variable 'strings': should be:
"the array of pointers".

ctime.3
mtk
Add warning under NOTES that asctime(), ctime(), gmtime(), and
localtime() may each overwrite the static object returned by any
of the other calls.
Other minor edits.

dlopen.3
mtk
Add more detail to the description
of the fields in the
structure returned by dladdr().

fexecve.3
mtk
Clean up SYNOPSIS after work by cut-and-paste-Pete:

the necessary header file is <unistd.h> not <sys/time.h>!

futimes.3
  mtk
    Add documentation of lutimes(), which appeared in glibc 2.6.
  mtk
    Change description in NAME line ("or" is not correct: these calls
    always change *both* timestamps).
    CONFORMING TO: futimes() did not come from 4.2BSD. (It came from
    FreeBSD; see the FreeBSD man page.)

getenv.3
  mtk
    Noted that caller must not modify returned value string.
    Noted that getenv() is not reentrant: the buffer may be statically
    allocated and overwritten by later calls to getenv(), putenv(),
    setenv(), or unsetenv().
    Other minor rewrites.

getgrent.3
  Petter Reinholdtsen
    SEE ALSO: Add getgrouplist(3).
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=479284.

gethostbyname.3
  mtk
     Add 'h_errno' to NAME list.

getopt.3
  mtk
    Add 'optarg', 'optind', 'opterr', and 'optopt' to NAME section.
    Add subheading for getopt_long() and getopt_long_only()
    description.

getpt.3
  mtk
    Point out that this function should be avoided in favor of
    posix_openpt().
    Add ERRORS section referring to open(2).

getsubopt.3
  Daniel Burr
    SYNOPSIS: Fix declaration of valuep.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=476672.

malloc.3
  mtk
    RETURN VALUE: Note circumstances in which successful malloc() and

calloc() can return NULL.

mq_open.3
  mtk, after a note by Marty Leisner
    Note that <fcntl.h> is needed for O_* constants and <sys/stat.h>
    is needed for 'mode' constants.

opendir.3
  mtk
    Describe treatment of close-on-exec flag by opendir() and
    fdopendir().

openpty.3
  mtk
    SEE ALSO: add ttyname(3).

raise.3
  mtk / Timothy Baldwin

    Clarify semantics of raise() when called from a multithreaded
    program.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=476484.
  mtk
    Rewrites and additions to various parts of the page.

rand.3
  Tolga Dalman / aeb / mtk
    Remove outdated warning in NOTES; encourage the use of
    random(3) instead.
  Folkert van Heusden
    Clarify wording describing range of values returned by rand().

random.3
  aeb / mtk / Tolga Dalman
    Recommend use or random_r(3) for multithreaded applications
    that need independent, reproducible sequences of random numbers.

    Move references to "The Art of Computer Programming" and
    "Numerical Recipes", formerly in rand(3), to this page.

    Add drand48(93) to SEE ALSO list.

regex.3
  Heikki Orsila
    Clarify description of 'rm_eo' field.

sem_open.3
  mtk, after a note by Marty Leisner

Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is
needed for 'mode' constants.

sem_post.3
mtk
Added pointer to example in sem_wait(3).

sem_close.3
sem_destroy.3
sem_getvalue.3
sem_init.3
sem_open.3
sem_post.3
sem_unlink.3
sem_wait.3
mtk, after a note from Marty Leisner
Add text to SYNOPSIS noting the need to link with "-lrt" or
"-pthread".

setenv.3
mtk
setenv() copies 'name' and 'value' (contrast with putenv()).
unsetenv() of a nonexistent variable does nothing and is
considered successful.
Noted that setenv() and unsetenv() need not be reentrant.

shm_open.3
mtk, after a note by Marty Leisner
Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is
needed for 'mode' constants.

undocumented.3
mtk
initstate_r(3), setkey_r(3), setstate_r(3) are now documented.

utmp.5
Nicolas François
Small rewording.

resolv.conf.5
Nicolas François
gethostname() is in Section 2, not section 3.

ascii.7

Stuart Brady
Fix rendering of ' (backtick) and apostrophe (') in tables

charsets.7
  Nicolas François
    s/unicode.com/unicode.org/

credentials.7
  mtk
    NOTES: Pthreads requires that all threads share the same UIDs and
    GIDs. But the Linux kernel maintains separate UIDs and GIDs for
    every thread. NPTL does some work to ensure that credential
    changes by any thread are carried through to all POSIX threads in
    a process.
  mtk
    sysconf(_SC_NGROUPS_MAX) can be used to determine the number of
    supplementary groups that a process may belong to.
    Clarify that supplementary group IDs are specified in POSIX.1-2001.

epoll.7
  mtk, after a note from Sam Varshavchik
    For answer A2, change "not recommended" to "careful programming
    may be required".

inotify.7
  mtk
    Document SIGIO feature (new in 2.6.25) for inotify file descriptors.
  mtk
    Note that select()/poll()/epoll_wait() indicate
 a ready inotify
    file descriptor as readable.
  mtk
    Document IN_ATTRIB in a little more detail.

pthreads.7
  Justin Pryzby
    Grammar fix, plus fix typo in script.
  mtk
    Add list of thread-safe functions.

standards.7
  mtk
    Add a section on the upcoming POSIX revision.

ld.so.8
  Justin Pryzby / mtk
    Various wording improvements.

========== Changes in man-pages-3.00 ==========

Released: 2008-06-12, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Stuart Brady <sdbrady@ntlworld.com>

Apologies if I missed anyone!

Global changes

The POSIX.1 man pages (sections 0p, 1p, 3p) have been moved out
of this package into the separate man-pages-posix package.
This made sense because those pages are seldom changed (only formatting
fixes, etc.) so that it
 was unnecessary to redistribute them with each
man-pages release.

console_codes.4
random.4
dir_colors.5
proc.5
glob.7
  Stuart Brady
    s/`/\`/ for backquotes used in command substitution, for
    proper rendering in UTF-8.

Various pages
  mtk, after a note from Stuart Brady
    Using /'x'/ to denote a character (string) renders poorly in
    UTF-8, where the two ' characters render as closing single
    quotes. On the other hand, using /`x'/ renders nicely on UTF-8,
    where proper opening and closing single quotes are produced by
    groff(1), but looks ugly when rendered in ASCII. Using the
    sequence /\\aqx\\aq/ produces a reasonable rendering ('\\aq'
    is a vertical "apostrophe quote") in both UTF-8 and ASCII.
    So that change is made in a number of pages.
    See also http://www.cl.cal.ac.uk/~mgk25/ucs/quotes.html.

Various pages

  mtk
    Replace form /`string'/ by /"string"/, since the former renders
    poorly
 in ASCII.

termios.3
console_codes.4
tty_ioctl.4
termcap.5
charsets.7
  mtk
    Control character names (^X) are written boldface, without
    quotes.

printf.3
scanf.3
proc.5
glob.7
regex.7
  mtk
    Various edits to try and bring some consistency to the use of
    quotes.

Changes to individual pages
----

tty_ioctl.4
  mtk
    Small rewordings in description of packet mode.

locale.7
  mtk
    Minor formatting fixes.

==================== Changes in man-pages-3.01 ====================

Released: 2008-06-25, Munich

Yao Zhao <dragonlinux@gmail.com>
WANG Cong <wcong@critical-links.com>

Apologies if I missed anyone!

New and rewritten pages
---

acct.5
  mtk
    A complete rewrite of this page, now with much more detail.

hostname.7
  mtk
    A description of hostname resolution. Taken from FreeBSD 6.2,
    and lightly edited for man-pages style.

symlink.7
  mtk
    A description of symbolic links. Taken from FreeBSD 6.2, but

heavily edited for Linux details, improved readability, and
man-pages style.

Newly documented interfaces in existing pages
---

getrlimit.2
  mtk / Peter Zijlstra
    Add description of RLIMIT_RTTIME limit, new in 2.6.25.

mkstemp.3
  mtk
    Add description of mkostemp(), new in glibc 2.7.

core.5
  mtk, after a note by Petr Gajdos; review by Neil Horman
    Document core_pattern pipe syntax, which appeared in
    kernel 2.6.19.
    Add an example program demonstrating use of core_pattern
    pipe syntax.
  mtk
    Document /proc/PID/coredump_filter, new in kernel 2.6.23.
    Documentation was based on the text in
    Documentation/filesystems/proc.txt, plus testing, and

 checking the kernel source.

proc.5
  mtk
    Document /proc/PID/oom_score, which was new in kernel 2.6.11.
    This file displays the "badness" score of the process, which
    provides the basis for OOM-killer decisions.
  mtk
    Document /proc/PID/oom_adj, which was new in kernel 2.6.11.
    This file influences the oom_score of a process.
  mtk
    Document /proc/PID/limits, which was new in 2.6.24.
    This file displays a process's resource limits.
  mtk
    Document /proc/PID/fdinfo/*, which was new in 2.6.22.
    These files display info about each descriptor opened by the
    process: the current file offset, and the file access mode +
    file status flags as set in open() or fcntl(F_SETFL).
  mtk
    Document /proc/PID/mountinfo, which was new in 2.6.26.
    This file displays information about mount points.
    Closely based on text from Documentation/filesystems/proc.txt.

mtk
Document /proc/PID/mountstats,
which was new in 2.6.17.
This file displays statistics about mount points.
mtk
Document /proc/PID/status.
Samuel Thibault / mtk, review by Laurent Vivier,
Christian Borntraeger, and Andrew P
Document guest (virtual CPU) time field in /proc/stat.
Document guest (virtual CPU) time fields in /proc/PID/stat.

New links
---

mkostemp.3
mtk
Link to mkstemp.3.

getcwd.2
mtk
Link to getcwd.3, which describes several interfaces, among
them getcwd(), which is in fact a system call.

Global changes
---

sched_setaffinity.2
sched_setscheduler.2
set_mempolicy.2
mbind.2
mtk
SEE ALSO: Add cpuset(7).

chown.2
faccessat.2
fchmodat.2
fchownat.2
fstatat.2
getxattr.2
link.2
linkat.2
listxattr.2
open.2
readlink.2
removexattr.2
rename.2

setxattr.2
stat.2
symlink.2
symlinkat.2
unlink.2
futimes.3
remove.3
path_resolution.7
  mtk
    SEE ALSO: Add symlink(7).

intro.1
time.1
fcntl.2
gethostbyname.3
ioctl_list.2
   mtk
    Wrap source lines so that new sentence starts on new line.

addseverity.3
backtrace.3
dlopen.3
fmtmsg.3
getnameinfo.3
getpt.3
grantpt.3
makecontext.3
ptsname.3
tcgetsid.3
unlockpt.3
wordexp.3
  mtk
    Added VERSIONS section.

msgctl.2
msgget.2
semget.2
semop.2
pciconfig_read.2
basename.3
cmsg.3
ftok.3
console_ioctl.4
tzfile.5
mq_overview.7
pty.7
  mtk
    For consistency, "fix" cases where argument of .B or .I was

on the following source line.

adjtimex.2
getrusage.2
io_getevents.2
poll.2
select.2
semop.2
sigwaitinfo.2
aio_suspend.3
clock_getres.3
mq_receive.3
mq_send.3
sem_wait.3
proc.5
  mtk
    SEE ALSO: add time(7)

Typographical or grammatical errors have been corrected in several places.
(Special thanks to Nicolas François and Alain Portal.)

Changes to individual pages
---

acct.2
  mtk
    Add a few more words to DESCRIPTION.
    NOTES: Add pointer to acct(5).

alarm.2
   Alain Portal
    s/process/calling process/ so as to say that the alarm signal is
    delivered to the calling process.

brk.2
  Yao Zhao / mtk
    Clarify discussion of return value of sbrk().
  mtk
    DESCRIPTION: Add some sentences giving an overview of these
    interfaces.
    Add note recommending use of malloc(3).
    Change name of brk() argument to the simpler 'addr'.
    Add "(void *)" cast to "-1" for error return of sbrk().
    Removed some incorrect text about "brk(0)".
    Note that SUSv2 specified the return value of sbrk().
    Added a detail on the glibc brk() wrapper.
    Remove discussions of old standards (C89 and POSIX.1-1990);

CONFORMING TO already discusses the situation with respect
to more recent standards.

chmod.2
mtk
Clarify description of chmod() and fchmod().
Add further detail on S_ISUID, S_ISGID, and S_ISVTX permissions.
Reformat list of permissions
bits.

chown.2
mtk
Describe rules governing ownership of new files (bsdgroups
versus sysvgroups, and the effect of the parent directory's
set-group-ID permission bit).

chroot.2
Alain Portal
Clarify description a little.
s/changes the root directory/
changes the root directory of the calling process/

execve.2
mtk
Fix text that warns against use of NULL argv and envp.
Using a NULL envp does in fact seem to be portable (works
on Solaris and FreeBSD), but the Linux semantics for a NULL
argv certainly aren't consistent with other implementations.
See http://bugzilla.kernel.org/show_bug.cgi?id=8408.

getdents.2
mtk, after a note from George Spelvin
Document d_type field, present since kernel 2.6.4.
Other minor edits.

getitimer.2
mtk
Noted that POSIX.1 leaves interactions with alarm(), sleep(),
and usleep() unspecified.
Linux 2.6.16 removed the
MAX_SEC_IN_JIFFIES ceiling on timer
values.
Other minor changes.

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2

io_submit.2
  mtk, after a note by Masatake YAMOTO and input from Jeff Moyer
    Describe the unconventional error return provided by the
    wrapper function in libaio (and contrast with behavior if
    the system call is invoked via syscall(2)).
    See http://thread.gmane.org/gmane.linux.ltp/4445/
  Alain Portal / mtk
    Re-order ERRORS and SEE ALSO entries to be alphabetical.

io_getevents.2
  Alain Portal
    Small wording fix.

io_submit.2
  Jeff Moyer
    s/AIO request blocks/AIO control blocks/

mknod.2
  mtk
    Note that EEXIST applies, even if the pathname is a
    (possibly dangling) symbolic link.

nanosleep.2
  mtk, after a report from Stephane Chazelas
    Remove crufty discussion of HZ, and replace with a pointer
    to time(7).
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=485636
   mtk, after some discussions with Bart Van Assche and Roman Zippel
    NOTES: describe CLOCK_REALTIME versus CLOCK_NANOSLEEP
    See also http://thread.gmane.org/gmane.linux.kernel/696854/
    "nanosleep() uses CLOCK_MONOTONIC, should be CLOCK_REALTIME?"
  mtk
    Replace mentions of "process' by "thread".
    NOTES: describe case where clock_nanosleep() can be preferable.
    Some minor rewrites.

open.2
  mtk, after a note from Christoph Hellwig
    NOTES: Note that access mode flags are not single bits,
    and document the Linuxism "access mode 3".
    See also http://thread.gmane.org/gmane.linux.kernel/653123.

readdir.2
  mtk
    Minor wording fixes.

recv.2
  Alain Portal

Add comment to 'ee_pad' field in structure definition.

sched_setscheduler.2
mtk
Add pointer to discussion of RLIMIT_RTTIME in getrlimit.2.
mtk, after a note by Andrew Clayton
Rewrote and restructured various parts
of the page for greater
clarity.
mtk
Add more detail to the rules that are applied when an
unprivileged process with a non-zero RLIMIT_RTPRIO limit
changes policy and priority.
SEE ALSO: Add Documentation/scheduler/sched-rt-group.txt

sync_file_range.2
Pavel Machek
SYNC_FILE_RANGE_WRITE can block on writes greater than request
queue size. For some background, see
http://thread.gmane.org/gmane.linux.kernel/687713/focus=688340

syscalls.2
mtk
Added system call history back to version 1.2.
Fix typo on kernel version for pivot_root().

syslog.2
WANG Cong
Document ENOSYS error, which can occur if kernel was built without
CONFIG_PRINTK.

utime.2
Nicolas François
Clarify description of 'times' array for utimes().

adjtime.3
mtk
The longstanding bug that if delta was NULL, olddelta
didn't return the outstanding clock adjustment, is now fixed

(since glibc 2.8 + kernel 2.6.26).
http://sourceware.org/bugzilla/show_bug?id=2449
http://bugzilla.kernel.org/show_bug.cgi?id=6761

dprintf.3
mtk
Note that these functions are included in the next POSIX revision.
Remove editorial discussion about what the functions should have

been named.

ftime.3
  mtk
    Rewrote various pieces, and added some details.

getaddrinfo.3
  mtk
    Improve description or 'hints' and 'res' arguments.
    Add details on numeric strings that can be specified for 'node'.
    Other fairly major restructurings and rewrites to improve
    logical structure and clarity of the page.
    SEE ALSO: Add hostname(7).

gethostbyname.3
  mtk
    DESCRIPTION: Add reference to inet_addr(3) for dotted notation.
    SEE ALSO: add inet(3).
  mtk
    Added BUGS section noting that gethostbyname() does not
    recognize hexadecimal components in dotted address strings;
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482973

getmntent.3
   mtk, after Stuart Cunningham pointed out the typo
    Remove statement that LSB deprecates the functions
    "endmntent(), setmntent() [sic] and setmntent()".
    This doesn't seem to be true (I can't find mention of it
    being deprecated in any of the LSB specs). Rather, LSB simply
    doesn't specify these functions. (LSB 1.3 had a spec of
    setmntent(), but not getmntent() or endmntent(), and noted
    that having a spec of setmntent() was of little use without
    also having a spec of getmntent().)
    See also https://lists.linux-foundation.org/pipermail/lsb-discuss/2006-October/003078.html

getnameinfo.3
  Tolga Dalman
    Remove mention of sa_len field from example code.
    That field is a BSDism not present on Linux.
  mtk
    Various minor changes.

inet.3
  mtk / Stephane Chazelas
    inet_aton() is *not* in POSIX.1.
    Rewrote discussion
 of why inet_addr() is disfavored.
    SEE ALSO: Add getaddrinfo(3).

as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482979.
mtk, after a note by Stephane Chazelas
Describe the various address forms supported by inet_aton().
mtk
Rewrite description of inet_network().
Clarify discussion of inet_lnaof(), inet_netof(), and inet_makeaddr().
Add discussion of Classful Addressing, noting that it is obsolete.
Added an EXAMPLE program.
mtk
Relocate discussion of i386 byte order to NOTES.
Note that inet_aton() returns an address in network byte order.
SEE ALSO: Add byteorder(3) and getnameinfo(3).

inet_ntop.3
mtk
Remove unneeded header files from SYNOPSIS.
SEE ALSO: Add inet(3) and getnameinfo(3).
Make NAME line more precise.
Move errors to an ERRORS section.
Add EXAMPLE section pointing to inet_pton(3).

inet_pton.3
mtk / Stephane Chazelas
Remove
statement that inet_pton() extends inet_ntoa();
that's not really true, since inet_pton() doesn't support
all of the string forms that are supported by inet_ntoa().
SEE ALSO: Add getaddrinfo(3).
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482987.
mtk
Describe IPv6 address formats.
Describe dotted decimal format in more detail.
Add an example program.
mtk
Remove unneeded header files from SYNOPSIS.
Make NAME line more precise.
Make description of return value more precise.
SEE ALSO: Add inet(3).

mkfifo.3
mtk
Note that EEXIST applies, even if the pathname is a
(possibly dangling) symbolic link.

mkstemp.3
mtk
Fix discussion of O_EXCL flag.
These functions may also fail for any of the errors described

in open(2).
Various other rewordings.

readdir.3
mtk
Document DT_LNK (symbolic link) for d_type field.

Reorder DT_ entries alphabetically.

remainder.3
mtk
Recommend against drem(), in favor of remainder().

scanf.3
mtk, after a note from Stephane Chazelas
Add an ERRORS section documenting at least some of the errors
that may occur for scanf().
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254.
mtk, after a note from Stephane Chazelas; review by Stephane Chazelas
Document the GNU 'a' modifier for dynamically allocating strings.
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254.
Document the GNU 'm' modifier for dynamically allocating strings.

strcat.3
Andreas Herrmann
s/strcat/strncat/ (a typo that changed the semantics in
DESCRIPTION).

strerror.3
mtk, after a note from Daniele Giacomini
Modify SYNOPSIS to show prototypes of both versions of strerror_r(),
and make other small clarifications of the description regarding
the two versions.

random.4
George Spelvin (taking time out from his busy Broadway schedule),
with some tweaks by Matt Mackall and mtk
Add a Usage subsection that recommends most users to use
/dev/urandom, and emphasizes parsimonious usage of
/dev/random.

locale.5
Petr Baudis <pasky@suse.cz>
LC_TIME: Describe first_weekday and first_workday.

proc.5
mtk
The various CPU time fields in /proc/stat and /proc/PID/stat

return time in clock ticks (USER_HZ, cputime_to_clock_t(),
sysconf(_SC_CLK_TCK)).
Updated, clarified and expanded the description several
fields in /proc/[number]/stat.
mtk
Clarified and expanded the description of /proc/[number]/fd.
mtk
Updated and clarified the description of /proc/[number]/statm.
mtk
Updated and clarified the description of /proc/sys/fs/dentry-state.
mtk
Many formatting, wording, and grammar fixes.

man-pages.7
mtk
Enhanced description
of VERSIONS section.

mq_overview.7
mtk
Note that Linux does not currently support ACLs for POSIX
message queues.

sem_overview.7
mtk
Note that Linux supports ACLs on POSIX named semaphores
since 2.6.19.

time.7
mtk, with some suggestions from Bart Van Assche and Thomas Gleixner
Added some details about where jiffies come into play.
Added section on high-resolution timers.
Mentioned a few other time-related interfaces at various
points in the page.
See http://thread.gmane.org/gmane.linux.kernel/697378.

unix.7
mtk, after a note by Samuel Thibault
Provide a clear description of the three types of address that
can appear in the sockaddr_un structure: pathname, unnamed,
and abstract.

========== Changes in man-pages-3.02 ==========

Released: 2008-07-02, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that
 have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Reuben Thomas <rrt@sc3d.org>
Sam Varshavchik <mrsam@courier-mta.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>
WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

clock_nanosleep.2
  mtk
    A description of the clock_nanosleep() system call,
    which was added in kernel 2.6.

getgrouplist.3
  mtk
    A near complete rewrite, including additional information and
    a new example program.

getutmp.3
  mtk
    Documents getutmp(3) and getutmpx(3).

gnu_get_libc_version.3
  mtk
    Documents gnu_get_libc_version(3) and gnu_get_libc_release(3).

sigwait.3
  mtk
    Documents sigwait(3).

shm_overview.7
  mtk
    An overview of the POSIX shared memory API.

Newly documented interfaces in existing pages

---

updwtmp.3
  mtk
    Document updwtmpx(3).

New links
---

getutmpx.3
  mtk
    Link to getutmp.3.

gnu_get_libc_release.3
  mtk
    Link to gnu_get_libc_version.3

updwtmpx.3
  mtk
    Link to updwtmp.3

utmpxname.3
  mtk
    Link to getutent.3.

utmpx.5
  mtk
    Link to utmp.5.

Global changes

Various pages
  mtk
    s/user name/username/

Various pages
  mtk
    s/host name/hostname/

Changes to individual pages
---

fchmodat.2
  Alain Portal

SEE ALSO: add symlink.7. (3.01 changelog wrongly said this had been done.)

io_setup.2
Alain Portal
SEE ALSO: Remove superfluous text from RETURN VALUE.

mmap.2
mtk
SEE ALSO: Add mmap(2), shm_overview(7).

shmget.2
shmop.2
mtk
SEE ALSO: add shm_overview(7).

sigreturn.2
mtk
Added a bit more detail on what sigreturn() actually does.

signalfd.2
sigsuspend.2
mtk
SEE ALSO: Add
sigwait(3).

sigwaitinfo.2
mtk
Describe behavior when multiple threads are blocked in sigwaitinfo()/sigtimedwait().
SEE ALSO: Add sigwait(3).

dirfd.3
mtk
RETURN VALUE: describe return value on success.
Add an ERRORS section documenting POSIX.1-specified errors.

getaddrinfo.3
mtk, after a note by Stephane Chazelas
getaddrinfo() supports specifying IPv6 scope-IDs.

getlogin.3
mtk
ERRORS: add ENOTTY.
SEE ALSO: add utmp(5).

getutent.3
WANG Cong

utmpname() does return a value.

mtk

Add paragraph to start of DESCRIPTION recommending
use of POSIX.1 "utmpx" functions.
CONFORMING TO: mention utmpxname().
Add an ERRORS section.
There are no utmpx equivalents of the _r reentrant functions.
Clarify discussion of return values.
Add pointer to definition of utmp structure in utmp(5).
Clarify discussion of utmpx file on other systems (versus
Linux situation).

getutent.3

mtk

SEE ALSO: add getutmp(3)

inet_pton.3

Stephane Chazelas

Fix error in description of IPv6 presentation format:
s/x.x.x.x.x.x.x.x/x:x:x:x:x:x:x:x/.

setbuf.3

Reuben Thomas / mtk

Fix confused wording for return value of setvbuf().
Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=488104.

mtk

Other minor rewordings.

shm_open.3

mtk

SEE ALSO: add shm_overview(7).

random.4

mtk, after a note by Alain Portal

Slight rewording to make life easier for non-native English
speakers.

utmp.5

mtk

Add discussion of POSIX.1 utmpx specification.
Provide a little more detail on fields of utmp structure.
Added comments to macros for ut_type field.
Correct the description of the ut_id field.

mtk

Consolidate duplicated information about ut_tv and ut_session
on biarch platforms.

mtk

Move some text from

CONFORMING TO to NOTES.
Removed some crufty text.
SEE ALSO: add login(3), logout(3), logwtmp(3).
UT_LINESIZE is 32 (not 12).
mtk
SEE ALSO: add getutmp(3)

man-pages.7
mtk
Enhanced the discussion of font conventions.

signal.7
mtk
Note that the delivery order of multiple pending standard
signals is unspecified.
SEE ALSO: Add sigwait(3).

========== Changes in man-pages-3.03 ==========

Released: 2008-07-08, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@muc.de>
Hidetoshi Seto <seto.hidetoshi@jp.fujitsu.com>
Li Zefan <lizf@cn.fujitsu.com>
Paul Jackson <pj@sgi.com>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

getcpu.2
Andi Kleen, with some text and edits
by mtk
Documents the getcpu(2) system call, introduced in Linux 2.6.19.

sched_getcpu.3

mtk
Documents sched_getcpu(3), a wrapper for getcpu(2), provided since glibc 2.6.

cpuset.7
Paul Jackson, with review and editing by mtk, and comments by Hidetoshi Seto and Li Zefan
A description of the cpuset file system, the mechanism introduced kernel 2.6.12 for confining processes to designated processors and nodes. (Becomes the fourth largest page in man-pages!)

Newly documented interfaces in existing pages
---

readdir.3
mtk
Add documentation of readdir_r().

New links
---

updwtmpx.3
Alain Portal
Link to updwtmp.3 (3.02 changelog wrongly said this had been done).

readdir_r.3
mtk
Link to readdir.3.

aio_suspend.3
mq_receive.3
mq_send.3
scanf.3
sem_wait.3
usleep.3
inotify.7
  mtk
    ERRORS: Added reference to signal(7) in discussion of EINTR.

Various pages
  mtk
    Wrapped very long source lines.

Changes to individual pages
---

accept.2
  mtk
    Small wording change.

io_getevents.2
  mtk
    ERRORS: Add EINTR error.

open.2
  mtk
    ERRORS: Add EINTR error.

sigaction.2
  mtk
    Note circumstances in which each SA_* flag is meaningful.
  mtk
    Describe POSIX specification, and Linux semantics for

SA_NOCLDWAIT when establishing a handler for SIGCHLD.
mtk
Add pointer under SA_RESTART to new text in signal(7)
describing system call restarting.
mtk
Other minor edits.

truncate.2
mtk
ERRORS: Added EINTR error.

A few minor rewordings.

wait.2
mtk
Remove statement that WUNTRACED and WCONTINUED only have effect
if SA_NOCLDSTOP has not been set for SIGCHLD. That's not true.

errno.3
mtk
Add a pointer to signal(7) for further explanation of EINTR.

getgrouplist.3
mtk
SEE ALSO: Add passwd(5).

readdir.3
mtk
Remove <sys/types.h> from SYNOPSIS; POSIX.1-2001 does not
require it.
Some minor rewordings.

sleep.3
mtk
RETURN VALUE: explicitly mention interruption by signal handler.
SEE ALSO: add signal(7).

usleep.3
mtk
POSIX.1-2001 also only documents EINVAL.

group.5
mtk
SEE ALSO: Add getgrent(3), getgrnam(3).

passwd.5
mtk
SEE ALSO: Add getpwent(3), getpwnam(3).

proc.5
  mtk
    Add pointer to description of /proc/PID/cpuset in cpuset(7).

signal.7
  mtk
    Add a section describing system call restarting, and noting
    which system calls are affected
 by SA_RESTART, and which
    system calls are never restarted.
  mtk
    Describe the aberrant Linux behavior whereby a stop signal
    plus SIGCONT can interrupt some system calls, even if no
    signal handler has been established, and note the system
    calls that behave this way.
  mtk
    Note a few more architectures on which signal numbers are valid.
    SEE ALSO: added a number of pages.
  mtk
    Update async-signal-safe function list for POSIX.1-2004 (which
    adds sockatmark()).

========== Changes in man-pages-3.04 ==========

Released: 2008-07-15, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andrea Arcangeli <andrea@cpushare.com>
Andreas Mohr <andi@lisas.de>
Andrew Morgan <morgan@kernel.org>
Erik Bosman <ejbosman@cs.vu.nl>
John Brooks <aspecialj@gmail.com>
Nikanth
 Karthikesan <knikanth@suse.de>
Pavel Heimlich <tropikhajma@seznam.cz>
Petr Gajdos <pgajdos@suse.cz>
Sam Varshavchik <mrsam@courier-mta.com>
Serge Hallyn <serue@us.ibm.com>
Sripathi Kodi <sripathik@in.ibm.com>

Vincent Lefevre <vincent@vinc17.org>

Apologies if I missed anyone!

Web site
----

licenses.html
  mtk
    A page describing the preferred licenses for new pages that
    are contributed to man-pages.

New and rewritten pages
----

utimensat.2
  mtk
    New page documenting the utimensat() system call, new in 2.6.22,
    and futimens() library function.

end.3
  mtk
    Documents etext, edata, and end symbols.

Newly documented interfaces in existing pages
----

memchr.3
  mtk
    Add description of rawmemchr().

proc.5
  mtk
    Document /proc/config.gz (new in kernel 2.6).
  mtk, based on text from Documentation/vm/sysctl.txt
    Document /proc/sys/vm/oom_kill_allocating_task
     (new in Linux 2.6.24).
    Document /proc/sys/vm/oom_dump_tasks
    (new in Linux 2.6.25).
    Document /proc/sys/vm/panic_on_oom
    (new in Linux 2.6.18).

New links
----

edata.3
etext.3
  mtk
    Links to end.3.

futimens.3
  mtk
    Link to new utimensat.2.

getdate_err.3
  mtk
    Link to getdate.3.

h_errno.3
  mtk
    Link to gethostbyname.3.

optarg.3
opterr.3
optind.3
optopt.3
  mtk
    Links to getopt.3.

rawmemchr.3
  mtk
    Link to memchr.3.

sys_errlist.3
sys_nerr.3
  mtk
    Links to perror.3.

Global changes

Various pages
  mtk
    s/parameter/argument/ when talking about the things given
    to a function call, for consistency with majority usage.

Various pages
  mtk
    s/UNIX/Unix/, when not used as part of a trademark,
    for consistency with majority usage in pages.

Various pages
  mtk, after a note from Alain Portal
      Put SEE ALSO entries
 into alphabetical order.

Various pages
  mtk
      Remove period at end of SEE ALSO list.

Various pages
  mtk, after a note by Alain Portal
      Even when the CONFORMING TO section is just a list of standards,
      they should be terminated by a period.

getpriority.2
MB_LEN_MAX.3
MB_CUR_MAX.3
fwide.3
mblen.3
rtime.3
st.4
proc.5
bootparam.7
man-pages.7
utf-8.7
tcp.5
  mtk / Alain Portal
      Small wording fixes -- express <=, <, >=, > in words when in
      running text.

sched_setparam.2
sched_setscheduler.2
getgrent_r.3
hash.3
  mtk
      Minor rewording w.r.t. use of the term "parameter".

Typographical or grammatical errors have been corrected in several
other places. (Many, many thanks to Alain Portal!)

Changes to individual pages
----

capget.2
  Andrew Morgan
      Update in line with addition of file capabilities and
      64-bit capability sets in kernel 2.6.2[45].

clock_nanosleep.2
  mtk
    Add "Link with -lrt"
 to SYNOPSIS.

getrusage.2
  Sripathi Kodi
    Document RUSAGE_THREAD, new in 2.6.26.
  mtk
    Improve description of RUSAGE_CHILDREN.
    Add pointer to /proc/PID/stat in proc(5).
    Other minor clean-ups.

ioprio_set.2
  Nikanth Karthikesan
    Since Linux 2.6.25, CAP_SYS_ADMIN is longer required to set
    a low priority (IOPRIO_CLASS_IDLE).

mount.2
  mtk
    Since Linux 2.6.26, MS_RDONLY honors bind mounts.

openat.2
  mtk
    SEE ALSO: add utimensat(3).

prctl.2
  Serge Hallyn, with some edits/input from mtk
    Document PR_CAPBSET_READ and PR_CAPBSET_DROP.
  Erik Bosman
    Document PR_GET_TSC and PR_SET_TSC.
  mtk, reviewed by Andrea Arcangeli
    Document PR_SET_SECCOMP and PR_GET_SECCOMP.
  mtk
    PR_SET_KEEPCAPS and PR_GET_KEEPCAPS operate on a per-thread
    setting, not a per-process setting.
  mtk
    Clarify fork(2) details for PR_SET_PDEATHSIG.
  mtk
    Add description of PR_SET_SECUREBITS
 and PR_GET_SECUREBITS,
    as well as pointer to further info in capabilities(7).
  mtk
    PR_GET_ENDIAN returns endianness info in location pointed to by
    arg2 (not as function result, as was implied by previous text).
  mtk
    Expand description of PR_SET_NAME and PR_GET_NAME.

mtk
RETURN VALUE: bring up to date for various options.
mtk
Various improvements in ERRORS.
mtk
Note that PR_SET_TIMING setting of PR_TIMING_TIMESTAMP is not
currently implemented.
mtk
Minor changes:
* Clarify wording for PR_GET_UNALIGN, PR_GET_FPEMU, and
PR_GET_FPEXC.
* Some reformatting of kernel version information.
* Reorder PR_GET_ENDIAN and PR_SET_ENDIAN entries.

readlinkat.2
John Brooks / mtk
Fix and reword erroneous RETURN VALUE text.

recv.2
mtk
Noted which flags appeared in Linux 2.2.

sched_setaffinity.2
mtk, after a Fedora downstream patch

Update type used for cpusetsize argument in SYNOPSIS.

select.2
Andreas Mohr / mtk
Clarify "zero timeout" case.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=490868.

send.2
mtk
Noted which flags appeared in Linux 2.2.

sigaction.2
mtk
Document si_overrun and si_tid fields of siginfo structure.
Add some text for si_trapno field.
The si_errno field is *generally* unused.
mtk
Put descriptions of SA_* constants in alphabetical order.

signal.2
mtk
Rewrote and expanded portability discussion.
NOTES: Show the raw prototype of signal() (without use of

sighandler_t).

signalfd.2
  mtk
    Modify description of ssi_trapno field.

swapon.2
  mtk
    Fix two version number typos for MAX_SWAPFILES discussion:
    s/2.6.10/2.4.10/

utime.2
  mtk
     SEE ALSO: add utimensat(2), futimens(3).

dl_iterate_phdr.3
  Alain Portal
    SEE ALSO: Add elf(5).

crypt.3

 mtk, after a Fedora downstream patch
    Describe additional encryption algorithms.
    See also: https://bugzilla.redhat.com/show_bug.cgi?id=428280.

errno.3
  mtk
    Small rewrites in DESCRIPTION.

exec.3
  mtk, after a note from Alain Portal
    Small rewording.

exp10.3
  Alain Portal
    SEE ALSO: Add log10(3).

exp2.3
  Alain Portal
    Add C99 to CONFORMING TO.

fgetgrent.3
  Alain Portal
    Add references to group(5).
  mtk
    Minor rewordings.
    SEE ALSO: add fopen(3).

fgetpwent.3
  Alain Portal
    Add reference to passwd(5).
  mtk
    Minor rewordings.
    SEE ALSO: add fopen(3).

frexp.3
  Alain Portal
    Add C99 to CONFORMING TO.

futimes.3
  mtk
     SEE ALSO: remove futimesat(2); add utimensat(2).

getopt.3
  mtk
    Add details on initial value of optind, and note that it can
    be reset (to 1) to restart scanning of an argument vector.
    Add a NOTES section describing the
 glibc-specific behavior
    when optind is reset to 0 (rather than 1).
    See http://groups.google.com/group/comp.unix.programmer/browse_thread/thread/be0d0b7a07a165fb
  mtk
    Note glibc extensions under CONFORMING TO.

getspnam.3
  mtk
    Improve comments on struct spwd.

getpw.3
  Alain Portal
    RETURN VALUE: note that errno is set on error.
  mtk
    Add EINVAL error.

insque.3
  mtk / Alain Portal
    Minor rewordings.

log.3
  Alain Portal
    Remove unnecessary sentence in ERRORS.

log10.3
  mtk
    SEE ALSO: Add exp10(3).

offsetof.3
  Alain Portal
    Small wording improvement.

pow.3
  Alain Portal
    Remove unnecessary sentence in ERRORS.

printf.3
  mtk / Alain Portal
    Many small formatting fixes.

proc.5
  mtk
    Remove redundant summary list of files in description of
    /proc/sys/kernel.
    Make kernel version for /proc/sys/kernel/panic_on_oops more precise.
    Make kernel
 version for /proc/sys/kernel/pid_max more precise.
    Add Documentation/sysctl/vm.txt to SEE ALSO.
    Other minor edits.

profil.3
  mtk / Alain Portal
     Small wording improvement.

rtime.3
  mtk, after a note by Alain Portal
    Clarify meaning of midnight on 1 Jan 1900/1970.
  mtk
    Remove netdate(1) and rdate(1) from SEE ALSO, since these pages
    don't seem to exist on Linux systems.

scanf.3
  Vincent Lefevre / mtk
    Clarify treatment of initial white space by %% conversion
    specification.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435648.
  mtk
    Many small formatting fixes.

stdin.3
  Alain Portal
    Rename CONSIDERATIONS section to NOTES, and relocate
    to appropriate place on page.

tmpfile.3
  mtk, after a note by Alain Portal

Prepend "POSIX.1-2001 specifies that: " to the sentence stating
that tmpfile() may write to stdout. (AFAICS, glibc's tmpfile()
does
not do this.)

ttyname.3
Alain Portal
Remove unnecessary sentence in ERRORS.

wcsdup.3
Alain Portal
Make wording more precise: the memory allocated by wcsdup(3)
should be freed with free(3).

wordexp.3
Alain Portal / mtk
Move example into proper EXAMPLE section.

tty_ioctl.4
mtk / Petr Gajdos
The features in the "Get and Set Window Size" subsection
require the inclusion of <sys/ioctl.h>.

capabilities.7
Serge Hallyn, plus a bit of work by mtk
Document file capabilities, per-process capability bounding set,
changed semantics for CAP_SETPCAP, and other changes in 2.6.2[45].
Add CAP_MAC_ADMIN, CAP_MAC_OVERRIDE, CAP_SETFCAP.
Various smaller fixes.
mtk, plus review by Serge Hallyn and Andrew Morgan
Add text detailing how CAP_SETPCAP (theoretically) permits -- on
pre-2.6.25 kernels, and 2.6.25 and later kernels with file
capabilities disabled -- a thread to change
the capability sets
of another thread.
Add section describing rules for programmatically adjusting
thread capability sets.
Add some words describing purpose of inheritable set.
Note existence of CONFIG_SECURITY_CAPABILITIES config option.
Describe rationale for capability bounding set.
Document securebits flags (new in 2.6.26).
Remove obsolete BUGS section.
SEE ALSO: Add getcap(8), setcap(8), and various libcap pages.
mtk
Add text noting that if we set the effective flag for one
file capability, then we must also set the effective flag for all
other capabilities where the permitted or inheritable bit is set.
mtk

Since Linux 2.6.25, CAP_SYS_ADMIN is no longer required for
ioprio_set() to set IOPRIO_CLASS_IDLE class.
mtk
Reword discussion of CAP_LINUX_IMMUTABLE to be file-system neutral.

man-pages.7
mtk
A list of standards in the CONFORMING TO
list should be
terminated by a period.
The list of pages in a SEE ALSO list should not be
terminated by a period.

tcp.7
mtk
Correct a detail for sysctl_tcp_adv_win_scale.
Formatting fixes.

========== Changes in man-pages-3.05 ==========

Released: 2008-07-23, Konolfingen

Uli Schlacter <psychon@znc.in>

Apologies if I missed anyone!

New and rewritten pages
---

matherr.3
mtk, with review by Andries Brouwer
A description of the SVID-specified mechanism for reporting
math exceptions.

See http://thread.gmane.org/gmane.linux.man/266.

math_error.7
  mtk, with review and suggested input from Andries Brouwer
    A description of how math functions report errors.
    See http://thread.gmane.org/gmane.linux.man/249.

Global changes

Various pages
  mtk
    s/floating point/floating-point/ when used attributively.

Various pages
  mtk
    For consistency with majority usage:
    s/plus infinity/positive infinity/
    s/minus infinity/negative infinity/

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

brk.2
  mtk
    SEE ALSO: add end(3).

open.2
  Brian M. Carlson / mtk
    Remove ambiguity in description of support for O_EXCL on NFS.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=491791.

prctl.2
  mtk
    Place options in some semblance of alphabetical order.
    (No content or formatting
 changes were made.)

cerf.3
  mtk
    Bump version number: these functions are still missing in
    glibc 2.8.

fenv.3
  mtk
    SEE ALSO: Add math_error(7).

INFINITY.3
  mtk
    SEE ALSO: Add math_error(7).

nan.3
  mtk
    Remove unneeded "Compile with" piece in SYNOPSIS.
    SEE ALSO: Add math_error(7).

rpc.3
  mtk / Franck Jousseaume
    Fix errors introduced into a few prototypes when converting
    function declarations to use modern C prototypes in man-pages-2.75.

ipv6.7
  mtk, after a report from Uli Schlacter
    Document the IPV6_V6ONLY flag.

 Varshavchik <mrsam@courier-mta.com>
Tolga Dalman <tdalman@project-psi.org>

Apologies if I missed anyone!

New and rewritten pages
---

erfc.3
  mtk
    Created after removing the erfc() material from erf.3.
    Documents the complementary error function.

y0.3
  mtk
    Created after removing the y*() material from j0.3.
    Documents the Bessel functions of the second kind.
    Included ERRORS section; noted that an exception is not
    raised on underflow, see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6806;
    and errno is not set on overflow, see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6808;
    Included BUGS section noting that errno is incorrectly
    set for pole error; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6807.

scalbln.3
  mtk
    Created after removing the scalbln*() and scalbn*() material
    from scalb.3. Documents
 scalbln() and scalbn() functions.
    Included ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6803.

New and changed links
----

erfcf.3
erfcl.3
  mtk
    Changed these links to point to new erfc.3 page.

scalblnf.3
scalblnl.3
scalbn.3
scalbnf.3
scalbnl.3
  mtk
    Changed these links to point to new scalbln.3 page.

y0f.3
y0l.3
y1.3
y1f.3
y1l.3

yn.3
ynf.3
ynl.3
  mtk
    Changed these links to point to new y0.3 page.

Global changes

Various pages
  mtk
    s/floating point/floating-point/ when used attributively.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

crypt.3
  mtk
    Tweak discuss text describing support for Blowfish.

ctime.3
  mtk / Gernot Tenchio
    Added some words to make clear that the string returned by
    ctime() and asctime()
 is null-terminated.

math_error.7
  Sam Varshavchik
    Reverse order of SYNOPSIS and NAME sections.
  mtk
    NOTES: Summarize the state of glibc support for exceptions
    and errno for error reporting.

Changes to individual pages (math functions)

Almost all of the changes in this release relate to math man pages.
Very many changes were made to the math pages, including:

* Fixed feature test macros (FTMs). Often, the FTM requirements
 for the "float" and "long double" versions of a math function are
 different from the requirements for the "double" version. Each math

page now shows the correct FTM requirements for all three versions
of the function(s) it describes. This may have required either
a change to the existing FTM text (if the requirements for the
"double" function were already described), or the addition of an FTM
description to a SYNOPSIS where one was not previously present
(typically because
the "double" version of the function does not
require any FTMs to be defined).
* CONFORMING TO: in many cases, POSIX.1-2001 was not mentioned.
Where a function is specified in POSIX.1-2001, this is now noted.
Also, statements about what other standards a function conforms to
were generally clarified. (The wording about which functions conformed
to C99 was previously often done as an add on sentence; now it is made
part of the first sentence of the CONFORMING TO section, along with
POSIX.1-2001.)
* RETURN VALUE: in many cases, pages lacked descriptions of the return
value when the function arguments are special values such as +0, -0,
NaN (not-a-number), +infinity, -infinity, etc. This has been fixed.
I carried out tests on glibc 2.8 to ensure that all of these
functions match the RETURN VALUE descriptions (and the POSIX.1-2001
requirements).
* ERRORS: many pages lacked a clear (or indeed any) description of
how errno is set on error and what exception
is raised for each error.
This has been fixed. The ERRORS sections are now generally headed up
as per the POSIX.1 way of doing things, describing Pole / Range /
Domain errors, as applicable.
I carried out tests on glibc 2.8 to ensure that all of these
functions match the ERRORS descriptions. Deviations from POSIX.1-2001
requirements have been filed as glibc bug reports, and noted in the
man pages. (The pages now describe the situation for ERRORS as at glibc
2.8; I may eventually try and extend the text with descriptions of
changes in older versions of glibc.)
NOTE: one point that has not been covered in any page is the
circumstances that generate inexact (FE_INEXACT) exceptions.
(The details for these exceptions are not specified in POSIX.1-2001,
and I haven't gone looking for the standards that describe the details.)

acos.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.

   Rewrote ERRORS section.
    Updated CONFORMING TO.

acosh.3
  mtk

SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

asin.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.

asinh.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
Updated CONFORMING TO.

atan.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
Updated CONFORMING TO.

atan2.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION:
Some rewording.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
Updated CONFORMING TO.

atanh.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6759.

cbrt.3

mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added (null) ERRORS section.
Updated CONFORMING TO.

ceil.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.
NOTES: Added some details.

copysign.3
mtk
Added RETURN
VALUE section.
Updated CONFORMING TO.

cos.3
mtk
SYNOPSIS: Added feature test macro requirements.
Rewrote RETURN VALUE section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780.
Updated CONFORMING TO.

cosh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

erf.3
mtk
Removed the erfc() material (there is now a new erfc page).
Reason: the functions are logically separate; also their
return values differ, and it would have been confusing
to document them on the same page.
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6785.
Updated CONFORMING TO.

exp.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set; see
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6786.
    Updated CONFORMING TO.

exp10.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set for underflow;
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787.

exp2.3
  mtk
    Added RETURN VALUE and ERRORS sections.
    Updated CONFORMING TO.

expm1.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set for overflow;
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788.
    Updated CONFORMING TO.
    Added BUGS section, describing bogus underflow exception for -large,
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6778;
     and describing bogus invalid exception for certain +large,
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6814.

fabs.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Updated CONFORMING TO.

fdim.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    DESCRIPTION: Some rewording.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6796.
    Updated CONFORMING TO.

fenv.3

mtk
Make style of writing exception names consistent with other
pages and POSIX.1-2001.
Updated CONFORMING TO.

finite.3
mtk
SYNOPSIS: Fixed feature test macro requirements.

floor.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.

fma.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3
fmin.3
mtk
NAME: Make description clearer
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
CONFORMING TO: Added POSIX.1-2001.
Added RETURN VALUE and ERRORS sections.

fmod.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.

fpclassify.3
mtk
Minor wording changes.
CONFORMING TO: Added POSIX.1-2001.
SEE ALSO: Add signbit(3).

frexp.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added details to RETURN VALUE section.
    Added (null) ERRORS section.
    CONFORMING TO: Added POSIX.1-2001.

gamma.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    Added (null) RETURN VALUE section referring to tgamma(3).
    Added (null) ERRORS section referring to tgamma(3).
    CONFORMING TO: Rewrote.

hypot.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    DESCRIPTION: note that calculation is done without causing
    undue overflow or underflow.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not always set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6795.
    Updated CONFORMING TO.

ilogb.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Rewrote RETURN VALUE
 section.
    Rewrote ERRORS section; noted that errno is not set, and in some
    cases an exception is not raised; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6794.
    CONFORMING TO: Added POSIX.1-2001.

isgreater.3
  mtk
    NAME: Make description clearer
    Improve the description of isunordered().
    Added RETURN VALUE and ERRORS sections.
    Formatting fixes.
    A few wording improvements.

j0.3
  mtk
    Removed material for the y*() functions to a separate y0.3 page.
    Reason: the return values and errors/exceptions differ, and it
    would have been confusing to document them on the same page.

Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6805.

ldexp.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE and ERRORS sections.
Updated CONFORMING
TO.

lgamma.3
mtk
Note that these functions are deprecated.
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE and ERRORS sections referring to lgamma(3).
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6777.

log.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

log10.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

log1p.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6792.
Updated CONFORMING
TO.

log2.3
mtk
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

logb.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    DESCRIPTION: added a little detail; some rewordings.
    RETURN VALUE: Added details for special argument cases.
    Rewrote ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6793.
    CONFORMING TO: Added POSIX.1-2001.

lrint.3
  mtk
    DESCRIPTION: some rewording.
    RETURN VALUE: Added details for special argument cases.
    Added ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6798.
    CONFORMING TO: Added POSIX.1-2001.

lround.3
  mtk
    RETURN VALUE: Added details for special argument cases.
    Rewrote ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6797.
     CONFORMING TO: Added POSIX.1-2001.

modf.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.
    Added (null) ERRORS section.
    CONFORMING TO: Added POSIX.1-2001.

nan.3
  mtk
    Small wording changes.
    CONFORMING TO: Added POSIX.1-2001.

nextafter.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.
    Added ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6799.
    CONFORMING TO: Added POSIX.1-2001.

pow.3
  mtk
    SYNOPSIS: Added feature test macro requirements.

Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776.

remainder.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.
Added BUGS section noting that remainder(nan(""), 0)
wrongly causes a domain error; see
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6779

remquo.3
mtk
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3
fmin.3
mtk
NAME: Make description clearer
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
CONFORMING TO: Added POSIX.1-2001.

Added RETURN VALUE and ERRORS sections.

fmod.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.

fpclassify.3
CONFORMING TO: Added POSIX.1-2001.

rint.3

mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
ERRORS: no errors can occur (previous text was misleading).
CONFORMING TO: Added POSIX.1-2001.
NOTES: point out that lrint() may be preferred in some cases.

round.3
mtk
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
ERRORS: no errors can occur (previous text was misleading).
CONFORMING TO: Added POSIX.1-2001.
NOTES: point out that lround() may be preferred in some cases.

scalb.3
mtk
Removed the scalbn() and scalbln() material to a separate
scalbln.3 page. Reason: scalb() is obsolete; also the
exception/error conditions differ somewhat, so that it
would have been confusing to document them on the same page.
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: some rewrites and added details.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6803
and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6804.
CONFORMING TO: Rewrote.

signbit.3
mtk
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
Added RETURN VALUE section.
Added (null) ERRORS section.
CONFORMING TO: Added POSIX.1-2001.

sin.3
mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781.
Updated CONFORMING TO.

sincos.3

mtk
DESCRIPTION: Added details for special argument cases.
Added (null) RETURN VALUE section.
Added ERRORS section.

sinh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

sqrt.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

tan.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782.

Updated CONFORMING TO.

tanh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added (null) ERRORS section.
Updated CONFORMING TO.

tgamma.3
mtk
Added RETURN VALUE section.
Rewrote ERRORS section; noted that errno is not set /
incorrectly set in some cases; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6809
and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6810.
CONFORMING TO: Added POSIX.1-2001.
Added NOTES section to hold text explaining origin of tgamma().

trunc.3
mtk

RETURN VALUE: small rewording.
CONFORMING TO: Added POSIX.1-2001.
Added NOTES section explaining that result may be too large
to store in an integer type.

========== Changes in man-pages-3.07 ==========

Released: 2008-08-12, Konolfingen

Contributors

The following people contributed notes, ideas, or
patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Christoph Lameter <cl@linux-foundation.org>
Cliff Wickman <cpw@sgi.com>
Fabian Kreutz <kreutz@dbs.uni-hannover.de>
Filippo Santovito <filippo.santovito@email.it>
Gerrit Renker <gerrit@erg.abdn.ac.uk>
Heikki Orsila <shd@modeemi.cs.tut.fi>
Khalil GHORBAL <khalil.ghorbal@cea.fr>
Lee Schermerhorn <lee.schermerhorn@hp.com>
Maxin John <maxin.john@gmail.com>
Reuben Thomas <rrt@sc3d.org>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Sam Varshavchik <mrsam@courier-mta.com>
Soh Kam Yung <sohkamyung@gmail.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>
Pavel Heimlich <tropikhajma@seznam.cz>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages
---

move_pages.2
Christoph Lameter, various edits and improvements by mtk
Documentation of the move_pages() system call.
This page was formerly

part of the numactl package, but really
belongs in man-pages (since it describes a kernel interface).

clock_getcpuclockid.3
mtk
New page documenting the clock_getcpuclockid() library function,
available since glibc 2.2.

udplite.7
Gerrit Renker
Document the Linux implementation of the UDP-Lite protocol,
new in Linux 2.6.20.

Newly documented interfaces in existing pages
---

proc.5
Christoph Lameter, minor edits and improvements by mtk
Documentation of the /proc/PID/numa_maps file.
This material was formerly the numa_maps.5 page in the numactl
package, but really belongs in man-pages (since it describes
a kernel interface).

Global changes
---

nanosleep.2
inet_ntop.3
inet_pton.3
scanf.3
initrd.4
mtk
Fix mis-ordered (.SH) sections.

connect.2
socket.2
rtnetlink.3
arp.7
ddp.7
ip.7
ipv6.7
netlink.7
packet.7
raw.7
rtnetlink.7
socket.7

tcp.7
udp.7
unix.7
x25.7
  mtk
    s/PF_/AF_/ for socket family constants. Reasons: the AF_ and
    PF_ constants have always had the same values; there never has
    been a protocol family that had more than one address family,
    and POSIX.1-2001 only specifies the AF_* constants.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

execve.2
  mtk
    The floating-point environment is reset to the default
    during an execve().

get_mempolicy.2
  Lee Schermerhorn
    Misc cleanup of get_mempolicy(2):
    + mention that any mode flags will be saved with mode.
      I don't bother to document mode flags here because we
      already have a pointer to set_mempolicy(2) for more info
      on memory policy. mode flags are discussed there.
    + remove some old, obsolete [IMO] NOTES and 'roff comments.
  Lee Schermerhorn
    Update the
 get_mempolicy(2) man page to add in the description of
    the MPOL_F_MEMS_ALLOWED flag, added in 2.6.23.
  mtk
    Document additional EINVAL error that occurs is MPOL_F_MEMS_ALLOWED
    is specified with either MPOL_F_ADDR or MPOL_F_NODE.

getitimer.2
  mtk
    CONFORMING TO: POSIX.1-2008 marks getitimer() and setitimer()
    obsolete.

mbind.2
  Lee Schermerhorn
    Fix error conditions, now that the kernel silently ignores
    nodes outside the task's cpuset, as long as one valid node
    remains.

Now that cpuset man page exists, we can refer to it. Remove
stale comment regarding lack thereof.
Lee Schermerhorn
Add brief discussion of mode flags.
Lee Schermerhorn
Attempt to clarify discussion of MPOL_DEFAULT.
mtk
Fix URI reference for libnuma.

mprotect.2
mtk / Maxin John
Remove EFAULT from errors. Under ENOMEM error, note that
EFAULT was the error produced in some cases
for kernels before
2.4.19.

msgctl.2
mtk, after a note from Filippo Santovito
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

set_mempolicy.2
Lee Schermerhorn
Fix up the error return for nodemask containing nodes disallowed by
the process' current cpuset. Disallowed nodes are now silently ignored,
as long as the nodemask contains at least one node that is on-line,
allowed by the process' cpuset and has memory.

Now that we have a cpuset man page, we can refer to cpusets directly
in the man page text.

Lee Schermerhorn
Another attempt to rationalize description of MPOL_DEFAULT.

Since ~2.6.25, the system default memory policy is "local allocation".
MPOL_DEFAULT itself is a request to remove any non-default policy and
"fall back" to the surrounding context. Try to say that without delving
into implementation
details.

Lee Schermerhorn
Add discussion of mempolicy mode flags to set_mempolicy(2).
This adds another reason for EINVAL.

setpgid.2
mtk
CONFORMING TO: POSIX.1-2008 marks setpgrp() obsolete.

semctl.2
  mtk, after a note from Filippo Santovito
    In the ipc_perm structure definition, some fields were
    incorrectly named: s/key/__key/ and s/seq/__seq/.

shmctl.2
  Filippo Santovito / mtk
    In the ipc_perm structure definition, some fields were
    incorrectly named: s/key/__key/ and s/seq/__seq/.

utime.2
  mtk
    CONFORMING TO: POSIX.1-2008 marks utime() obsolete.
    CONFORMING TO: POSIX.1-2008 removes the POSIX.1-2001 LEGACY
    marking of utimes(), so mention of this point has been
    removed from the page.

vfork.2
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of vfork().

atan2.3
  Fabian Kreutz
    SEE ALSO Add carg(3).

bcmp.3
  mtk
    CONFORMING TO: POSIX.1-2008
 removes the specification of bcmp().

bsd_signal.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification ofcw
    bsd_signal().

bzero.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of bzero().

cexp2.3
  mtk
    AVAILABILITY: These functions are still not in glibc
    as at version 2.8.

clock_getres.3
  mtk
     SEE ALSO: Add clock_getcpuclockid(3).

clog2.3
  mtk
    AVAILABILITY: These functions are still not in glibc
    as at version 2.8.

ctime.3
  mtk
    POSIX.1-2008 marks asctime(), asctime_r(), ctime(), and ctime_r()
    as obsolete.

dprintf.3
  mtk
   CONFORMING TO: These functions are nowadays in POSIX.1-2008.

ecvt.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specifications of
    ecvt() and fcvt().

ftime.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of ftime().

ftw.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks ftw() as obsolete.

gcvt.3
   mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of gcvt().

getcwd.3
  Reuben Thomas / mtk
    Clarify description of getcwd() for buf==NULL case;
    CONFORMING TO: According to POSIX.1, the behavior of getcwd()
    is unspecified for the buf==NULL case.
  mtk
    Add an introductory paragraph giving an overview of what these
    functions do.
    Fix error in description of getwd(): it does not truncate the
    pathname; rather, it gives an error if the pathname exceeds
    PATH_MAX bytes.
    Rewrote RETURN VALUE section.
    Add EINVAL ENAMETOOLONG errors for getwd().
    Various other clarifications and wording fixes.
    CONFORMING TO: POSIX.1-2001 does not define any errors for
    getwd().

CONFORMING TO: POSIX.1-2008 removes the specification of getwd().

gethostbyname.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of gethostbyname(), gethostbyaddr(), and h_errno.

gets.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of gets().

iconv.3
iconv_close.3
iconv_open.3
mtk
VERSIONS: These functions are available in glibc since version 2.1.

index.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of index() and rindex().

isalpha.3
mtk
CONFORMING TO: POSIX.1-2008 marks isalpha() as obsolete.

makecontext.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of makecontext() and swapcontext().

memchr.3
mtk
VERSIONS: memrchr() since glibc 2.2; rawmemchr() since glibc 2.1.

mempcpy.3
mtk
VERSIONS: mempcpy() since glibc 2.1.

mktemp.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of mktemp().

opendir.3
mtk
CONFORMING TO: POSIX.1-2008 specifies fdopendir().

rand.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks rand_r() as obsolete.

siginterrupt.3
  mtk
    CONFORMING TO: POSIX.1-2008
 marks siginterrupt() as obsolete.

sigset.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks sighold(), sigignore(),
    sigpause(), sigrelse(), and sigset() as obsolete.

strchr.3
  mtk
    VERSIONS: strchrnul() since glibc 2.1.1.

tempnam.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks tempnam() as obsolete.

tmpnam.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks tmpnam() as obsolete.

toascii.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks toascii() as obsolete.

ualarm.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of ualarm().

ulimit.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks ulimit() as obsolete.

usleep.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of usleep().

standards.7
  mtk
    Updated details for POSIX.1-2008, and noted that if
    POSIX.1-2001 is listed in the CONFORMING TO section of a man
    page, then the reader can assume that the interface is also
    specified

in POSIX.1-2008, unless otherwise noted.

time.7
  mtk
      SEE ALSO: Add clock_getcpuclockid(3).

udp.7
  mtk
     SEE ALSO: add udplite(7).

Changes to individual pages (math functions)

Various changes here following on from the big update to the
math pages in the previous release. Test results going back
glibc 2.3.2 (so far) allowed updates to various pages to note
changes in historical behavior for error reporting by math
functions. Thanks to the following people for providing me
with test results on various distributions and glibc versions:
Alain Portal, Andries Brouwer, Fabian Kreutz, Heikki Orsila,
Khalil GHORBAL, Pavel Heimlich, Reuben Thomas, Samuel Thibault,
Soh Kam Yung, and Stephane Chazelas

cabs.3
cacos.3
cacosh.3
carg.3
casin.3
casinh.3
catan.3
catanh.3
ccos.3
ccosh.3
cexp.3
cimag.3
clog.3
clog10.3
conj.3
cpow.3
cproj.3
creal.3
csin.3
csinh.3
csqrt.3
ctan.3
ctanh.3
exp10.3

exp2.3
fdim.3
fenv.3
fma.3
fmax.3
fmin.3
log2.3
lrint.3
lround.3
nan.3
pow10.3
remquo.3
round.3
scalbln.3
sincos.3
tgamma.3
trunc.3
  mtk
    Added VERSIONS section noting that these functions first
    appeared in glibc in version 2.1.

cosh.3
  mtk
    BUGS: In glibc 2.3.4 and earlier, an FE_OVERFLOW exception is not
    raised when an overflow occurs.

fenv.3
  mtk / Fabian Kreuz
    Provide more detail in the description of rounding modes.
    Add text describing FLT_ROUNDS (formerly in fma.3).
    Add BUGS section pointing out the FLT_ROUNDS does not reflect
    changes by fesetround().

fma.3
  mtk
    Remove text about FLT_ROUNDS, replacing with a cross-reference
    to fenv(3).

fpclassify.3
  mtk
    CONFORMING TO: Note that the standards provide a weaker guarantee
    for the return value of isinf().

log.3
  mtk
    BUGS: In glibc 2.5 and earlier, log(nan("")) produces a bogus
    FE_INVALID exception.

lround.3
  mtk
    Add reference
 to fenv(3) for discussion of current rounding mode.

nextafter.3
  mtk
    BUGS: In glibc 2.5 and earlier these functions do not raise an
    FE_UNDERFLOW exception on underflow.

pow.3
  mtk
    BUGS: described buggy NaN return when x is negative and y is large.
    See also: http://sources.redhat.com/bugzilla/show_bug.cgi?id=3866.
    BUGS: Note the bogus FE_INVALID exception that occurred in glibc
    2.3.2 and earlier on overflow and underflow.

remainder.3
  mtk
    Add reference to fenv(3) for discussion of current rounding mode.

round.3
  mtk
    Add reference to fenv(3) for discussion of current rounding mode.

scalb.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of scalb().

tgamma.3
  mtk
    BUGS: In glibc 2.3.3, tgamma(+-0) produced a domain error
    instead of a pole error.

y0.3
  mtk
    In glibc 2.3.2 and earlier, these functions do not raise an
    FE_INVALID exception for a domain
 error.

math_error.7
  mtk
    Rewrite introductory paragraph.
    Point out that a NaN is commonly returned by functions that report
    a domain error.

========== Changes in man-pages-3.08 ==========

Released: 2008-08-27, Zurich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Gerrit Renker <gerrit@erg.abdn.ac.uk>
Li Zefan <lizf@cn.fujitsu.com>
Mike Bianchi <MBianchi@foveal.com>
Sam Varshavchik <mrsam@courier-mta.com>
Venkatesh Srinivas <me@acm.jhu.edu>
Vijay Kumar <vijaykumar@bravegnu.org>

Apologies if I missed anyone!

New and rewritten pages
---

getnetent_r.3
  mtk
    Documents getnetent_r(), getnetbyname_r(),
    and getnetbyaddr_r(), the reentrant equivalents of
    getnetent(), getnetbyname(), and getnetbyaddr().

getprotoent_r.3
  mtk
    Documents getprotoent_r(), getprotobyname_r(), and
    getprotobynumber_r(),
 the reentrant equivalents of
    getprotoent(), getprotobyname(), and getprotobynumber().

getrpcent_r.3
  mtk
    Documents getrpcent_r(), getrpcbyname_r(), and
    getrpcbynumber_r(), the reentrant equivalents of
    getrpcent(), getrpcbyname(), and getrpcbynumber().

getservent_r.3
  mtk
    Documents getservent_r(), getservbyname_r(), and
    getservbyport_r(), the reentrant equivalents of
    getservent(), getservbyname(), and getservbyport().

numa.7
  mtk
    A new page giving overview details for the Linux NUMA interfaces.
    Incorporates some material from mbind.2, and the description
    of /proc/PID/numa_maps from proc.5.

Newly documented interfaces in existing pages
---

crypt.3
  mtk
    Add description of crypt_r().

New and changed links
---

crypt.3
  mtk
    New link to crypt.3.

getnetbyname_r.3
getnetbyaddr_r.3
  mtk

  New links to new getnetent_r.3.

getprotobyname_r.3
getprotobynumber_r.3
  mtk
    New links to new getprotoent_r.3.

getrpcbyname_r.3
getrpcbynumber_r.3
  mtk
    New links to new getrpcent_r.3.

getservbyname_r.3
getservbyport_r.3
  mtk
    New links to new getservent_r.3.

numa_maps.5
  mtk
    Link to new numa(7) page, which incorporates the
    /proc/PID/numa_maps description.
    As part of the numactl() package, the /proc/PID/numa_maps

documentation was in a numa_maps.5 page; this link
ensures that "man 5 numa_maps" still works.
(Eventually, we may want to remove this link.)

Global changes
---

get_mempolicy.2
mbind.2
move_pages.2
set_mempolicy.2
  mtk
    Add reference to numa(7) for information on library support.
    Added a VERSIONS section.
    SEE ALSO: Add numa(7).

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
mkdirat.2
mknodat.2
linkat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
mkfifoat.3
psignal.3
strsignal.3
   mtk
    These interfaces are specified in POSIX.1-2008.

Changes to individual pages
---

eventfd.2
  Vijay Kumar
    When an eventfd overflows, select() indicates the file as both
    readable and writable (not as having an exceptional condition).

fcntl.2
  mtk
    F_DUPFD_CLOEXEC is specified in POSIX.1-2008.

getrlimit.2
  mtk
    NOTES: Add text mentioning the shell 'ulimit' (or 'limit')
    built-in command for setting resource limits.

gettimeofday.2
  mtk
    CONFORMING TO: POSIX.1-2008 marks gettimeofday() as obsolete.

link.2
  mtk
    Note kernel version where Linux stopped following symbolic
    links in 'oldpath'; see also http://lwn.net/Articles/294667.
    POSIX.1-2008 makes it implementation-dependent whether or not
    'oldpath' is dereferenced if it is a symbolic link.
    Add a reference to linkat(2) for an interface that allows
    precise
 control of the treatment of symbolic links.

mbind.2
  mtk
    Remove material on library support and numactl; that material
    is now in numactl.7.

mmap.2
  mtk
    Add kernel version numbers for MAP_32BIT.
    Add some details on MAP_32BIT (see http://lwn.net/Articles/294642).

move_pages.2
  mtk
    Added VERSIONS (from kernel 2.6.18) and CONFORMING TO sections.

open.2
  mtk
    O_CLOEXEC is specified in POSIX.1-2008.

socket.2
  mtk
    s/d/domain/ for name of argument.
    Add reference to socket(2) for further information on
    domain, type, and protocol arguments.

utimensat.2
  mtk
    CONFORMING TO: POSIX.1-2008 specifies utimensat() and futimens().

dirfd.3

mtk
CONFORMING TO: Add POSIX.1-2008; other minor changes.

exec.3
mtk
Small rewording: "s/returned/failed with/ [an error]".

fmemopen.3
mtk
Since glibc 2.7, it is possible to seek past the end of
a stream created by open_memstream().
Add a BUGS section
describing the bug in earlier glibc versions.

gethostbyname.3
mtk
Clarify exactly which functions are obsoleted by getnameinfo()
and getaddrinfo().

getnetent.3
mtk
Rephrase description in terms of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
In glibc 2.2, the type of the 'net' argument for getnetbyaddr()
changed from 'long' to 'uint32_t'.
mtk
Note that the gethostbyaddr() 'net' argument is in host byte order.
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getnetent_r.3.

getprotoent.3
mtk
Rephrase description in terms
of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a

statically allocated structure.
SEE ALSO: add getprotoent_r.3.

getrpcent.3
mtk
s/rpc/RPC/.
Rephrase description in terms of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getrpcent_r.3.

getservent.3
mtk
Rephrase description in terms of a database, rather than a file.
Note that
each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getservent_r.3.

mkdtemp.3
mtk
CONFORMING TO: this function is specified in POSIX.1-2008.

mq_notify.3
Venkatesh Srinivas
s/sigev_notify_function/sigev_thread_function/
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=494956.

realpath.3
mtk
Relocate text for resolved_path==NULL case to DESCRIPTION.
POSIX.1-2001 leaves the resolved_path==NULL case as
implementation-defined; POSIX.1-2008 specifies the behavior
described in this man page.

sem_init.3
mtk
POSIX.1-2008 rectifies the POSIX.1-2001 omission, specifying

that zero is returned by a successful sem_init() call.

core.5
  Mike Bianchi / mtk
    Make the page more helpful to non-programmers by referencing
    the documentation of the shell's 'ulimit' command in the
    discussion of RLIMIT_CORE and RLIMIT_FSIZE.
    SEE ALSO: Add bash(1).
  mtk
    Note that a core dump file can be used in a debugger.

proc.5
  mtk
    Remove /proc/PID/numa_maps material (it is now in numa(7)).

cpuset.7
  mtk
    SEE ALSO: Add numa(7).

inotify.7
  mtk / Li Zefan
    Explain bug that occurred in coalescing identical events in
    kernels before 2.6.25.
    (See commit 1c17d18e3775485bf1e0ce79575eb637a94494a2
    "A potential bug in inotify_user.c" in the 2.6.25 Changelog.)

pthreads.7
  mtk
    Update thread-safe functions list with changes in POSIX.1-2008.
    SEE ALSO: add proc(5).

signal.7
  mtk
    Update list of async-signal-safe functions for POSIX.1-2008.

==========
Changes in man-pages-3.09 ==========

Released: 2008-09-10, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Bernd Eckenfels <be-mail2006@lina.inka.de>
Bruno Haible <bruno@clisp.org>

Tolga Dalman <tdalman@project-psi.org>
Török Edwin <edwintorok@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

fopencookie.3
  mtk
      Document fopencookie(3), a library function that allows
      custom implementation of a stdio stream.

networks.5
  Martin (Joey) Schulze, with a few light edits by mtk
      Documents the /etc/networks file.

Global changes

Various pages
  mtk
      s/time zone/timezone/ for consistency across pages and
      with POSIX.1.

kill.2
sigaction.2
sigpending.2
sigprocmask.2
sigsuspend.2

confstr.3
ctermid.3
ctime.3
ferror.3
flockfile.3
fopen.3
getaddrinfo.3
getgrnam.3
getnameinfo.3
getopt.3
getpwnam.3
longjmp.3
popen.3
rand.3
readdir.3
setjmp.3
sigsetops.3
sigwait.3
strtok.3
tzset.3
unlocked_stdio.3
  mtk
    Add/fix feature test macro requirements.

Changes to individual pages
---

fcntl.2
  mtk, after a note by Mike Bianchi
    More clearly and consistently describe whether
    or not the third argument to fcntl() is required,
    and what its type should be.
  mtk
    Move description of negative l_len
 from NOTES, integrating
    it into the discussion of file locking.
    Minor rewrites of the text on file locking.

getrusage.2
  Bernd Eckenfels
    SEE ALSO: Add clock(3), clock_gettime(3).
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475

ioctl_list.2
  mtk
    Remove old sentence about where to send updates for this page.
    Add more detail on mount options that prevent updates to atime.

sched_setscheduler.2
  Carsten Emde
    Update kernel version numbers relating to real-time support.

stat.2
  H. Peter Anvin
    Note that lstat() will generally not trigger automounter
    action, whereas stat() will.

clock.3
  Bernd Eckenfels
    SEE ALSO: Add clock_gettime(3).
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475

clock_getres.3
  Tolga Dalman / mtk
    Add "Link with -lrt" to SYNOPSIS; remove now redundant
    sentence mentioning librt from NOTES.

getdate.3
  mtk
    Rewrite
 description of getdate_r() and integrate into main text
    (rather than describing in NOTES).
    Other parts rewritten for greater clarity.
    Make it clearer in the main text that glibc does not implement %Z;
    remove discussion of that point from NOTES.
    Added an example program.

hsearch.3
  mtk
    Noted that table size as specified by 'nel' is immutable.
    Described differences between hsearch() and hsearch_r().
    Added missing pieces to RETURN VALUE.
    Added a number of new entries under ERRORS.
    NOTES: added some basic advice on sizing the hash table;
    noted that when a table is destroyed, the caller is responsible
    for freeing the buffers pointed to by 'key' and 'data' fields.
    One of the BUGS was fixed in glibc 2.3.
    Rewrote and clarified various other pieces.
    Rename arguments for reentrant functions, using same name as
    glibc headers: s/ret/retval/; s/tab/htab/.
  mtk, after
 a suggestion by Timothy S. Nelson
    Integrate discussion of reentrant functions into main discussion
    (rather than as a short paragraph at the end).

iconv.3
  Bruno Haible
    Describe "shift sequence" input.

ptsname.3
  sukadev
    Fix return type of ptsname_r() in SYNOPSIS.

readdir.3
  H. Peter Anvin
    s/stat(2)/lstat(2)/ when discussing d_type (since we
    are talking about a case where we might be interested to
    whether the file itself is a symbolic link).

sigsetops.3
  Chris Head, signed-off-by: Mike Frysinger
    Fix typo: s/sigdelset/sigorset/

proc.5
  Mats Wichmann / mtk
    s/\[number]/[pid]/ in file names for /proc/PID files.
    And similar changes for task/[tid] sub-directories.
  mtk / Mats Wichmann
    In the description if /proc/[pid]/environ, remove reference to
    lilo(8)/grub(8) since there seems to be nothing in those pages
    that related to this /proc file.
  Michael Schurter / mtk
     Remove sentence wrongly saying that /proc/meminfo reports
    info in bytes;
    see http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462969
  mtk
    Note that /proc/meminfo reports system-wide memory usage
    statistics.
  Joe Korty
    Document new fields in /proc/interrupts that were added in
    Linux 2.6.24.

unix.7
  Marko Kreen
    Since glibc 2.8, _GNU_SOURCE must be defined in order to get
    the definition of the ucred structure from <sys/socket.h>.

========== Changes in man-pages-3.10 ==========

Released: 2008-09-23, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

André Goddard Rosa <andre.goddard@gmail.com>
George Spelvin <linux@horizon.com>
Pavel Heimlich <tropikhajma@seznam.cz>
Sam Varshavchik <mrsam@courier-mta.com>
John Reiser <jreiser@bitwagon.com>

Apologies if I missed anyone!

Global changes
---

closedir.3
dirfd.3
readdir.3
rewinddir.3
scandir.3
seekdir.3
telldir.3
  mtk
    Fix 'dir' argument name: should be 'dirp'.
    POSIX.1-2008 and glibc call this argument 'dirp' (consistent
    with the fact that it is a *pointer* to a DIR structure).

Changes to individual pages
---

clone.2
  mtk, after a comment by John Reiser
    Clarify text describing getpid() caching bug for clone() wrapper.
    See also:
    http://sourceware.org/bugzilla/show_bug.cgi?id=6910
    https://bugzilla.redhat.com/show_bug.cgi?id=417521

getpid.2
  mtk, after a comment by John Reiser
    Describe getpid()'s PID caching and its consequences.

timerfd_create.2
  Sam Varshavchik
    s/it_interval/it_value/ when talking about TIMERFD_ABSTIME.

closedir.3
  George Spelvin
    Clarify closedir()'s treatment of underlying file descriptor.

tsearch.3
  André Goddard Rosa
    Fix memory leak in example program.

    Add use of tdestroy to example program.
  mtk
    Add "#define _GNU_SOURCE" to example program.

protocols.5
  mtk, after a note from Pavel Heimlich
    Remove SEE ALSO references to nonexistent Guides to Yellow Pages

services.5
  mtk
    Remove some out-of-date bugs.
  mtk, after a note from Pavel Heimlich
    Remove SEE ALSO references to nonexistent Guides to Yellow Pages
    and Bind/Hesiod docs.
  mtk
    Remove crufty text about use of comma instead of slash to separate
    port and protocol.

Maxin B. John
 <maxin.john@ap.sony.com>
Maxin John <maxin.john@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>

Nicolas François <nicolas.francois@centraliens.net>
Pavel Heimlich <tropikhajma@seznam.cz>
Ricardo Catalinas Jiménez <jimenezrick@gmail.com>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

umount.2
  Michael Kerrisk
    Create a new page for umount() and umount2() by extracting
    existing material from mount.2 page.

New and changed links
---

umount2.2
  Michael Kerrisk
    Change link to point to new umount.2
      The umount2() material migrated from mount.2 to umount.2

Changes to individual pages
---

execve.2
  Michael Kerrisk
    _SC_ARG_MAX is no longer necessarily constant
      POSIX.1-2001 says that the values returned by sysconf()
      are constant for the life of the process.
      But the fact that, since Linux
 2.6.23, ARG_MAX is settable
      via RLIMIT_STACK means _SC_ARG_MAX is no longer constant,
      since it can change at each execve().
  Michael Kerrisk
    Linux now imposes a floor on the ARG_MAX limit
      Starting with Linux 2.6.23, the ARG_MAX limit became
      settable via (1/4 of) RLIMIT_STACK. This broke ABI
      compatibility if RLIMIT_STACK was set such that ARG_MAX
      was < 32 pages. Document the fact that since 2.6.25
      Linux imposes a floor on ARG_MAX, so that the old limit
      of 32 pages is guaranteed.

      For some background on the changes to ARG_MAX in

kernels 2.6.23 and 2.6.25, see:
http://sourceware.org/bugzilla/show_bug.cgi?id=5786
http://bugzilla.kernel.org/show_bug.cgi?id=10095
http://thread.gmane.org/gmane.linux.kernel/646709/focus=648101,
checked into 2.6.25 as
commit a64e715fc74b1a7dcc5944f848acc38b2c4d4ee2.

Also some reordering/rewording of the discussion of ARG_MAX.

fallocate.2
Michael Kerrisk
Note lack of glibc wrapper; caller must use syscall(2)
Glibc doesn't (and quite probably won't) include a
wrapper for this system call. Therefore, point out that
potential callers will need to use syscall(2), and rewrite
the RETURN VALUE text to show things as they would be if
syscall() is used.

Michael Kerrisk
Refer reader to posix_fallocate(3) for portable interface
Add a para to start of page that points out that this is the
low-level, Linux-specific API, and point the reader to
posix_fallocate(3) for the portable API.

getdents.2
readdir.3
Michael Kerrisk
d_type is currently only supported on ext[234]
As at kernel 2.6.27, only ext[234] support d_type.
On other file systems, d_type is always set to DT_UNKNOWN
(0).

getdents.2
Michael Kerrisk
Add an example program
Michael Kerrisk
comment out linux_dirent fields with varying location
The location of the fields after d_name varies according to
the size of d_name. We can't properly declare them in C;
therefore, put those fields inside a comment.
Michael Kerrisk
The DT_* constants are defined in <dirent.h>
Michael Kerrisk
Remove header files from SYNOPSIS
None of the header files provides what is needed.
Calls are made via syscall(2).
Michael Kerrisk
The programmer must define the linux_dirent structure

Point out that this structure is not defined in glibc headers.
Michael Kerrisk
s/dirent/linux_dirent/
The structure isn't currently defined in glibc headers,
and the kernel name of the structure is 'linux_dirent' (as
was already used in some, but not all, places in
this page).

getrlimit.2
Michael Kerrisk
Reword/relocate discussion of BSD's historical RLIMIT_OFILE
The old sentence sat on its own in an odd place, and anyway the
modern BSDs use the name RLIMIT_NOFILE.
Michael Kerrisk
Refer to execve(2) for RLIMIT_STACK's effect on ARG_MAX
Refer the reader to new text in execve(2) that describes how
(since Linux 2.6.23) RLIMIT_STACK determines the value of ARG_MAX.

getrusage.2
Michael Kerrisk
Rusage measures are preserved across execve(2)

mlock.2
Maxin John
Add EAGAIN error.

move_pages.2
Nicolas François
Make a detail of EPERM error more precise

mount.2
Michael Kerrisk
Add description of per-process namespaces
Describe per-process namespaces, including discussion
of clone() and unshare CLONE_NEWNS, and /proc/PID/mounts.
Michael Kerrisk
List a few other file systems that we may see in /proc/filesystems
Add some modern file systems to that list (xfs, jfs, ext3,
reiserfs).
Michael Kerrisk
Document MS_SILENT (and MS_VERBOSE)

mount.2
umount.2
Michael Kerrisk
Split umount*() out into a separate page
The length of this page means that it's becoming difficult
to parse which info is specific to mount() versus

umount()/umount2(), so split the umount material out into
its own page.

pause.2
Michael Kerrisk
Remove mention of words "library function"
This really is a system call.

readdir.2
Michael Kerrisk
The programmer must declare the old_linux_dirent structure
Glibc does not provide a definition of this structure.
Michael Kerrisk
s/dirent/old_linux_dirent/
Nowadays, this is the name of the structure in the
kernel sources.
Michael Kerrisk
Remove words "which may change"
These words
are slightly bogus: although the interface
is obsolete, for ABI-compatibility reasons, the kernel folk
should never be changing this interface.
Michael Kerrisk
Remove header files from SYNOPSIS
glibc doesn't provide any support for readdir(2),
so remove these header files (which otherwise suggest
that glibc does provide the required pieces).

recv.2
Nicolas François
Move kernel version number to first mention to MSG_ERRQUEUE.

semop.2
Kirill A. Shutemov
Fix typo in example
(The '&' before sop in the semop() call is unneeded.)

send.2
Michael Kerrisk
Make kernel version for MSG_CONFIRM more precise
s/2.3+ only/Since Linux 2.3.15/

sigaction.2
Michael Kerrisk
Refer reader to signal(7) for an overview of signals
Explain semantics of signal disposition during fork() and execve()
Refer to signal(7) for more details on signal mask.

sigaltstack.2
Michael Kerrisk
Explain inheritance of alternate signal stack across fork(2)

sigwaitinfo.2
Michael Kerrisk
Distinguish per-thread and process-wide signals
A sentence clarifying that pending signal set is union of per-thread and process-wide pending signal sets.

Michael Kerrisk
These interfaces have per-thread semantics
The page was previously fuzzy about whether these interfaces have process-wide or per-thread semantics. (E.g., now the page states that the calling *thread* (not process) is suspended until the signal is delivered.)

sigpending.2
Michael Kerrisk
Explain effect of fork() and execve() for pending signal set
Michael Kerrisk
Explain how thread's pending signal set is defined
The pending set is the union of per-thread pending signals and process-wide pending signals.

sigprocmask.2
Michael Kerrisk

Explain effects of fork() and execve() for signal mask

splice.2
Michael Kerrisk
Note that SPLICE_F_MOVE is a no-op since kernel 2.6.21

syscall.2
Michael Kerrisk
Add more detail about wrapper functions
Add a few more details about work generally done by wrapper functions. Note that syscall(2) performs the same steps.

tkill.2
Michael Kerrisk
EINVAL error can also occur for invalid TGID
The EINVAL error on an invalid TGID for tgkill() was not documented; this change documents it.

utimensat.2
Michael Kerrisk

POSIX.1-2008 revision will likely affect FTMs for futimens()
Make it clear that the POSIX.1 revision that is likely
to affect the feature test macro requirements for futimens()
is POSIX.1-2008.
Nicolas François
Make various wordings a little more precise.
The times argument point to *an array of* structures, and the

man-page should say that consistently.

wait4.2
Michael Kerrisk
wait3() is a library function layered on wait4().
On Linux wait3() is a library function implemented on top
of wait4(). (Knowing this is useful when using strace(2),
for example.)

atan2.3
Nicolas François
Fix error in description of range or return value
In recent changes to the man page, mtk accidentally changed
the description of the return value range to -pi/2..pi/2;
the correct range is -pi..pi.

cmsg.3
Nicolas François
Add parentheses after macro names.

ctime.3
Michael Kerrisk
Clarify mktime()'s use of tm_isdst
Describe use of tm_isdst for input to mktime();
explain how mktime() modifies this field.
(This field is left unchanged in case of error.)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=500178
Michael Kerrisk
Clarify wording
for ctime_r() and asctime_r() to indicate that
the buffer must be at least 26 *bytes*.
Michael Kerrisk
Minor rewording of mktime() description.

floor.3
Nicolas François
floor.3: Fix error in description: s/smallest/largest/

hsearch.3

André Goddard Rosa
Call hdestroy() after using hash table created by hcreate(),
for the sake of completeness

mq_getattr.3
Michael Kerrisk
mq_getattr() and mq_setattr() are layered on mq_getsetattr(2)
mq_getattr() and mq_setattr() are library functions layered on
top of the mq_getsetattr(2) system call.
(This is useful info for users of strace(1).)

mq_receive.3
Michael Kerrisk
mq_send() is a library function layered on mq_timedreceive() syscall
This info is useful for users of strace(1).

mq_send.3
Michael Kerrisk
mq_send() is a library function layered on mq_timedsend() syscall
This info is useful for
users of strace(1).

nextafter.3
Nicolas François
Make description more precise: s/next/largest/

readdir.3
Michael Kerrisk
SEE ALSO: add getdents(2)
Because readdir() is implemented on top of getdents(2).

realpath.3
Michael Kerrisk
Clarify that returned pathname is NULL terminated
Also clarify that null-byte is included in PATH_MAX limit.

proc.5
Michael Kerrisk
Rewrite and simplify description of /proc/mounts
Most of the relevant discussion is now under /proc/PID/mounts;
all that needs to be here is a mention of the pre-2.4.19
system-wide namespace situation, and a reference to the
discussion under /proc/PID/mounts.
Michael Kerrisk
Add description of /proc/PID/mounts
Largely cribbed from existing /proc/mounts discussion, which is
about to be rewritten.

mq_overview.7
  Michael Kerrisk
    Add mq_notify() to list of lib. functions
 and syscalls in MQ API

signal.7
  Michael Kerrisk
    Improve description in NAME section
    Add mention of sigaltstack(2).
    Describe syscalls that synchronously wait for a signal,
    Give overview of syscalls that block until a signal is caught
    Add overview of interfaces for sending signals.

  Michael Kerrisk
    Describe semantics w.r.t. fork() and execve()
      Include text describing semantics of fork() and execve() for
      signal dispositions, signal mask, and pending signal set.

========== Changes in man-pages-3.12 ==========

Released: 2008-10-29, Bucaramanga

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Bert Wesarg <bert.wesarg@googlemail.com>
Christian Grigis <glove@earthling.net>
Christoph Hellwig <hch@infradead.org>
Didier <did447@gmail.com>
Halesh S <halesh.s@india.com>
J.H.M. Dassen (Ray) <fsmla@xinara.org>
Jason
 Spiro <jasonspiro4@gmail.com>
Lefteris Dimitroulakis <edimitro@tee.gr>
Michael B. Trausch <mike@trausch.us>
Pierre Cazenave <pwc101@noc.soton.ac.uk>
Stefan Puiu <stefan.puiu@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_attr_init.3
  Michael Kerrisk
    New page for pthread_attr_init(3) and pthread_attr_destroy(3)

pthread_attr_setdetachstate.3
  Michael Kerrisk
    New page for pthread_attr_setdetachstate(3) and
    pthread_attr_getdetachstate(3)

pthread_attr_setguardsize.3
  Michael Kerrisk
    New page for pthread_attr_setguardsize(3) and
    pthread_attr_getguardsize(3)

pthread_attr_setscope.3
  Michael Kerrisk
    New page for pthread_attr_setscope(3) and pthread_attr_getscope(3)

pthread_attr_setstack.3
  Michael Kerrisk
    New page for pthread_attr_setstack(3) and pthread_attr_getstack(3)

pthread_attr_setstackaddr.3
  Michael Kerrisk
    New page for pthread_attr_setstackaddr(3)
 and
    pthread_attr_getstackaddr(3)

pthread_attr_setstacksize.3
  Michael Kerrisk
    New page for pthread_attr_setstacksize(3) and
    pthread_attr_getstacksize(3)

pthread_create.3
  Michael Kerrisk
    New page describing pthread_create(3)

pthread_detach.3
  Michael Kerrisk
    New page for pthread_detach(3)

pthread_equal.3
  Michael Kerrisk
    New page for pthread_equal(3)

pthread_exit.3
  Michael Kerrisk

New page describing pthread_exit(3)

pthread_getattr_np.3
  Michael Kerrisk
    New page for pthread_getattr_np(3)

pthread_join.3
  Michael Kerrisk
    New page for pthread_join(3)

pthread_self.3
  Michael Kerrisk
    New page for pthread_self(3)

pthread_tryjoin_np.3
  Michael Kerrisk
    New page for pthread_tryjoin_np(3) and pthread_timedjoin_np(3)

Newly documented interfaces in existing pages
---

dup.2
  Michael Kerrisk
    Add description
 of dup3()
      dup3() was added in kernel 2.6.27.

epoll_create.2
  Michael Kerrisk
    Add description of new epoll_create1()
      The new epoll_create1() system call appeared in Linux 2.6.27.

eventfd.2
  Michael Kerrisk
    Describe eventfd2() and EFD_NONBLOCK and EFD_CLOEXEC
      Linux 2.6.27 added eventfd(), which supports a flags argument
      that eventfd() did not provide. The flags so far implemented
      are EFD_NONBLOCK and EFD_CLOEXEC,

inotify_init.2
  Michael Kerrisk
    Add description of inotify_init1()
      The inotify_init1() system call was added in Linux 2.6.27.

pipe.2
  Michael Kerrisk
    Add description of new pipe2() syscall

pipe2() was added in 2.6.27. Describe the O_NONBLOCK and
O_CLOEXEC flags.

signalfd.2
Michael Kerrisk
Describe signalfd4() and SFD_NONBLOCK and SFD_CLOEXEC
Linux 2.6.27 added signalfd4(), which supports a flags argument
that signalfd() did not provide. The flags so far implemented
are SFD_NONBLOCK and SFD_CLOEXEC.

New and changed links
---

dup3.2
Michael Kerrisk
New link to dup.2
dup.2 now contains the description of the new dup3() syscall.

epoll_create1.2
Michael Kerrisk
New link to epoll_create.2
epoll_create.2 now includes a description of the new
epoll_create1() system call.

eventfd2.2
Michael Kerrisk
New link to eventfd.2
The eventfd.2 page has some details on the eventfd2() system call,
which was new in Linux 2.6.27.

inotify_init1.2
Michael Kerrisk
New link to inotify_init.2
inotify_init.2 now includes a description of the new
inotify_init1() system call.

pipe2.2
Michael Kerrisk
New link to pipe.2
pipe(2) now contains a description of the new pipe2() syscall.

pthread_attr_destroy.3
Michael
Kerrisk
New link to new pthread_attr_init.3

pthread_attr_getdetachstate.3

Michael Kerrisk
New link to new pthread_attr_setdetachstate.3

pthread_attr_getguardsize.3
Michael Kerrisk
New link to new pthread_attr_setguardsize.3

pthread_attr_getscope.3
Michael Kerrisk
New link to new pthread_attr_setscope.3

pthread_attr_getstack.3
Michael Kerrisk
New link to new pthread_attr_setstack.3

pthread_attr_getstackaddr.3
Michael Kerrisk
New link to new pthread_attr_setstackaddr.3

pthread_attr_getstacksize.3
Michael Kerrisk
New link to new pthread_attr_setstacksize.3

pthread_timedjoin_np.3
Michael Kerrisk
New link to new pthread_tryjoin_np.3

signalfd4.2
Michael Kerrisk
New link to signalfd.2
signalfd.2 now includes text describing signalfd4() system call,
new in Linux 2.6.27.

Global changes
---

eventfd.2, getdents.2, mprotect.2, signalfd.2, timerfd_create.2,
wait.2,
backtrace.3, clock_getcpuclockid.3, end.3, fmemopen.3,
fopencookie.3, getdate.3, getgrouplist.3, getprotoent_r.3,
getservent_r.3, gnu_get_libc_version.3, inet.3, inet_pton.3,
makecontext.3, matherr.3, offsetof.3, pthread_attr_init.3,
pthread_create.3, pthread_getattr_np.3, sem_wait.3, strtol.3, core.5
Michael Kerrisk
Add ".SS Program source" to EXAMPLE
Add ".SS Program source" to clearly distinguish shell session and
descriptive text from actual program code.

eventfd.2, execve.2, getdents.2, ioprio_set.2, mprotect.2,
signalfd.2, timerfd_create.2, wait.2, backtrace.3,
clock_getcpuclockid.3, end.3, fmemopen.3, fopencookie.3, frexp.3,
getdate.3, getgrouplist.3, getprotoent_r.3, getservent_r.3,
gnu_get_libc_version.3, inet.3, inet_pton.3, makecontext.3,
malloc.3, matherr.3, offsetof.3, pthread_attr_init.3,
pthread_create.3, pthread_getattr_np.3, sem_wait.3, strftime.3,
strtok.3, strtol.3, core.5, proc.5, cpuset.7, mq_overview.7
  Michael
Kerrisk
    Format user input in shell sessions in boldface

frexp.3, strftime.3, strtok.3
  Michael Kerrisk
    Relocate shell session above example program
      Move the shell session text that demonstrates the use of
      the example program so that it precedes the actual
      example program. This makes the page consistent with the
      majority of other pages.

Changes to individual pages
---

epoll_create.2
  Michael Kerrisk
    Say more about unused epoll_create() 'size' arg
      Supply a little more explanation about why the 'size' argument
      of epoll_create() is nowadays ignored.

eventfd.2
  Michael Kerrisk
    Remove crufty text relating to flags argument
      Remove sentence saying that glibc adds a flags argument
      to the syscall; that was only relevant for the older
      eventfd() system call.
getdents.2
  Christoph Hellwig
    Fix text relating
to DT_UNKNOWN and 'd_type' support
      Some file systems provide partial support for 'dt_type',
      returning DT_UNKNOWN for cases they don't support.
      Update the discussion of 'd_type' and DT_UNKNOWN to
      support this.

getpeername.2, getsockname.2
  Michael Kerrisk

SEE ALSO: add ip(7) and unix(7)

getsockopt.2
Michael Kerrisk
EINVAL can also occur if 'optval' is invalid
In some cases, EINVAL can occur if 'optval' is invalid.
Note this, and point reader to an example in ip(7).
In response to:
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092

inotify_init.2
pipe.2
timerfd_create.2
Michael Kerrisk
Clarify *_NONBLOCK description
Make it clear that the NONBLOCK flag sets an attribute in the new
open file description.

sched_yield.2
Michael Kerrisk
Rewrite description in terms of threads
The text formerly described the
operation of sched_yield() in
terms of processes. It should be in terms of threads.
Michael Kerrisk
Add NOTES text on appropriate use of sched_yield()
Strategic calls to sched_yield() can be used to improve
performance, but unnecessary use should be avoided.

sigaction.2
Michael Kerrisk
Clarify that sa_mask affects the *per-thread* signal mask
The page didn't previously clearly explain the scope of the
signal mask that is affected by sa_mask.

signalfd.2
Michael Kerrisk
Remove crufty text relating to flags argument
Remove sentence saying that glibc adds a flags argument
to the syscall; that was only relevant for the older
signalfd() system call.

sigprocmask.2
Michael Kerrisk
Clarify that sigprocmask() operates on a per-thread mask
The first sentence of the page was vague on the scope of the
attribute changed by sigprocmask().

Reword to make this
clearer and add a sentence in NOTES to explicitly state that
the signal mask is a per-thread attribute.

socket.2
Michael Kerrisk
Document SOCK_NONBLOCK and SOCK_CLOEXEC flags
These flags, specified in the 'type' argument, are supported
since Linux 2.6.27.

socketpair.2
Michael Kerrisk
Refer to socket(2) for SOCK_CLOEXEC and SOCK_NONBLOCK
Refer the reader to socket(2) for a description of the SOCK_CLOEXEC
and SOCK_NONBLOCK flags, which are supported by socketpair() since
Linux 2.6.27.

syscalls.2
Michael Kerrisk
Add new 2.6.27 system calls
Add pipe2(), dup3(), epoll_create1(), inotify_init1(),
eventfd2(), signalfd4().

timerfd_create.2
Michael Kerrisk
Document timerfd_create() TFD_CLOEXEC and TFD_NONBLOCK
TFD_CLOEXEC and TFD_NONBLOCK are supported since LInux 2.6.27.

vfork.2
Michael Kerrisk
Clarify meaning of "child releases the parent's memory"
The man page was not explicit about how the memory used by
the child is released back to the parent.

ctime.3
Michael Kerrisk
ctime_r() and localtime_r() need not set 'timezone' and 'daylight'
The man page already noted that these functions need not set
'tzname', but things could be clearer: it tzset() is not called,
then the other two variables also are not set.

Also, clarify that ctime() does set 'timezone' and 'daylight'.

dlopen.3
Michael Kerrisk
LD_LIBRARY_PATH is inspected once, at program start-up
Make it clear that LD_LIBRARY_PATH is inspected *once*, at
program start-up. (Verified from source and by experiment.)

fmemopen.3
  Michael Kerrisk
    Document binary mode (mode 'b')
      Glibc 2.9 adds support to fmemopen() for binary mode opens.
      Binary mode is specified
by inclusion of the letter 'b' in
      the 'mode' argument.

getaddrinfo.3
  Michael Kerrisk
    Clarify error descriptions with some examples
      Clarify the description of some errors by giving examples
      that produce the errors. (Text added for EAI_SERVICE and
      EAI_SOCKTYPE.)

      Also, add an error case for EAI_BADFLAGS.

gethostbyname.3
  Michael Kerrisk
    Rationalize text on POSIX.1-2001 obsolete interfaces
      POSIX.1 marks gethostbyname(), gethostbyaddr(), and 'h_errno'
      as obsolete. The man page explained this, but with some
      duplication. Remove the duplication, and otherwise tidy up
      discussion of this point.

popen.3
  Michael Kerrisk
    Change one-line description in NAME
      s%process I/O%pipe stream to or from a process%
  Michael Kerrisk
    Document 'e' (close-on-exec) flag
      glibc 2.9 implements the 'e' flag in 'type', which sets the

      close-on-exec flag on the underlying file descriptor.

raise.3
  Michael Kerrisk
    SEE ALSO: add pthread_kill(3)

readdir.3
  Christoph Hellwig
    Fix text relating to DT_UNKNOWN and 'd_type' support
      (This mirrors the previous change to getdents.2)
      Some file systems provide partial support for 'dt_type',
      returning DT_UNKNOWN for cases they don't support.
      Update the discussion of 'd_type' and DT_UNKNOWN to
      support this.

strcpy.3
  Jason Spiro
    Strengthen warning about checking against buffer overruns
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=413940

tty_ioctl.4
  Michael Kerrisk
    Explain capability requirements for TIOCCONS
      Explain capability requirements for TIOCCONS, and describe
      changes in 2.6.10 relating to capabilities.
  Michael Kerrisk
    Explain capability requirements for various ioctls
      For TIOCSLCKTRMIOS, TIOCSCTTY,
 TIOCEXCL, explain the exact
      capability that is required (the text formerly just said "root"
      in each case).

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/threads-max
      Defines the system-wide limit on the number of threads (tasks).

utmp.5
  Pierre Cazenave
    It is just "other" who should not have write perms on utmp
      The page was vague before, saying that utmp should not be
      writable by any user. This isn't true: it can be, and
      typically is, writable by user and group.

epoll.7
  Michael Kerrisk
    Mention epoll_create1() as part of epoll API
      epoll_create1() was added in Linux 2.6.27, and extends the
      functionality of epoll_create().

inotify.7
  Michael Kerrisk
    Mention inotify_init1() in overview of API
      Discuss the new inotify_init1() system call in the overview of
      the inotify API.

ip.7
  Michael Kerrisk
    Detail EINVAL
 error for IP_ADD_MEMBERSHIP socket option
      In response to:
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092

iso_8859-7.7
  Lefteris Dimitroulakis
    Add Drachma, Euro, and Greek Ypogegrammeni
      Also, amend description of characters 0241 and 0242.

man-pages.7
  Michael Kerrisk
    Example shell sessions should have user input boldfaced

pthreads.7
  Michael Kerrisk
    Describe return value from pthreads functions
      Describe the usual success (0) and failure (non-zero) returns,
      and note that POSIX.1-2001 specifies that pthreads functions
      can never fail with the error EINTR.

signal.7
  Michael Kerrisk
    Timeouts make socket interfaces non-restartable
      If setsockopt() is used to set a timeout on a socket(),
      then the various socket interfaces are not automatically
      restarted, even if SA_RESTART is specified when
      establishing the signal handler.
  Analogous behavior occurs
      for the "stop signals" case.

socket.7
  Michael Kerrisk
    SEE ALSO: add unix(7)

ld.so.8
  Michael Kerrisk
    Document LD_USE_LOAD_BIAS
      Drawing heavily on Jakub Jelinek's description in
      http://sources.redhat.com/ml/libc-hacker/2003-11/msg00127.html
      (Subject: [PATCH] Support LD_USE_LOAD_BIAS)
    --inhibit-rpath is ignored for setuid/setgid ld.so
      The --inhibit-rpath option is ignored if ld.so is setuid/setgid
      (not if the executable is setuid/setgid).
  Michael Kerrisk
    Since glibc 2.4, setuid/setgid programs ignore LD_ORIGIN_PATH
  Michael Kerrisk
    Fix description of LD_PROFILE and LD_PROFILE_OUTPUT
      Clarify that LD_PROFILE is pathname or a soname,
      and identify name of profiling output file.
      Fix description of LD_PROFILE_OUTPUT, which wasn't even close to
      the truth. (But why did it remain unfixed for

so many years?)
  Michael Kerrisk
    Since glibc 2.3.4, setuid/setgid programs ignore LD_DYNAMIC_WEAK
  Michael Kerrisk
    Since version 2.3.5, setuid/setgid programs ignore LD_SHOW_AUXV
  Michael Kerrisk
    Reorder lists of LD_* environment variables alphabetically
  Michael Kerrisk
    Since glibc 2.3.4, setuid/setgid programs ignore LD_DEBUG

========== Changes in man-pages-3.13 ==========

Released: 2008-11-07, Bucaramanga

Valdis Kletnieks <Valdis.Kletnieks@vt.edu>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_attr_setaffinity_np.3
   Michael Kerrisk
     New page for pthread_attr_setaffinity_np(3) and
     pthread_attr_getaffinity_np(3)

pthread_attr_setschedparam.3
  Michael Kerrisk
    New page for pthread_attr_setschedparam(3) and
    pthread_attr_getschedparam(3)

pthread_attr_setschedpolicy.3

Michael Kerrisk
New page for pthread_attr_setschedpolicy(3) and
pthread_attr_getschedpolicy(3)

pthread_setaffinity_np.3
Michael Kerrisk
New page for pthread_setaffinity_np(3) and pthread_getaffinity_np(3)

pthread_setschedparam.3
Michael Kerrisk
New page for pthread_setschedparam(3) and pthread_getschedparam(3)

pthread_setschedprio.3
Michael Kerrisk
New page for pthread_setschedprio(3)

New and changed links
---

pthread_attr_getaffinity_np.3
Michael Kerrisk
New link to new pthread_attr_setaffinity_np.3

pthread_attr_getschedparam.3
Michael Kerrisk
New link to
new pthread_attr_setschedparam.3

pthread_attr_getschedpolicy.3
Michael Kerrisk
New link to new pthread_attr_setschedpolicy.3

pthread_getaffinity_np.3
Michael Kerrisk
New link to new pthread_setaffinity_np.3

pthread_getschedparam.3
Michael Kerrisk
New link to new pthread_setschedparam.3

Global changes
---

pthread_attr_setaffinity_np.3
pthread_getattr_np.3
pthread_setaffinity_np.3

pthread_tryjoin_np.3
  Michael Kerrisk
    Explain _np suffix
      Add text to CONFORMING TO explaining that the "_np"
      suffix is because these functions are non-portable.

Changes to individual pages
---

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add sched_getcpu(3)

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: Add pthread_setaffinity_np(3)

sched_setaffinity.2
  Michael Kerrisk
    Clarify EINVAL error for cpusetsize < kernel mask size
      For sched_setaffinity(), the
 EINVAL error that occurs
      if 'cpusetsize' is smaller than the kernel CPU set size only
      occurs with kernels before 2.6.9.

vfork.2
  Michael Kerrisk
    Child holds parent's memory until execve() or *termination*
      The page was phrased in a few places to describe the child as
      holding the parent's memory until the child does an execve(2)
      or an _exit(2). The latter case should really be the more
      general process termination (i.e., either _exit(2) or abnormal
      termination).

clock_getres.3
  Michael Kerrisk
    CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable
      According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and
      CLOCK_THREAD_CPUTIME_ID clocks should be settable, but
      currently they are not.

pthread_attr_setstacksize.3
  Michael Kerrisk, after a report by Karsten Weiss
    EINVAL occurs on some systems if stacksize != page-size

    On MacOS X at least, pthread_attr_setstacksize(3) can fail
      with EINVAL if 'stacksize' is not a multiple of the system

page size. Best to mention this so as to aid people writing
portable programs.

pthread_create.3
  Karsten Weiss
    Fix bug in EXAMPLE program
      The calloc() line should read like this instead:

        tinfo = calloc(num_threads, sizeof(struct thread_info));

pthread_exit.3
  Michael Kerrisk
    BUGS: thread group with a dead leader and stop signals
      Document the bug that can occur when a stop signal
      is sent to a thread group whose leader has terminated.
      http://thread.gmane.org/gmane.linux.kernel/611611
      http://marc.info/?l=linux-kernel&m=122525468300823&w=2

resolver.3
  Michael Kerrisk
    Fix prototype of dn_expand()
      The 4th argument is "char *", not "unsigned char *".
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708

epoll.7
   Michael Kerrisk
    Fix error handling after accept() in example code
      Simply continuing after an error is in most cases wrong,
      and can lead to infinite loops (e.g., for EMFILE).
      So handle an error by terminating.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202

epoll.7
  Michael Kerrisk
    Add error handling for epoll_wait() call in example code

epoll.7
  Michael Kerrisk
    Improve example code
      Fill in some gaps in example code (variable declarations,
      adding listening socket to epoll set).
      Give variables more meaningful names.
      Other minor changes.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202

iso_8859-7.7
  Lefteris Dimitroulakis
    Add characters for Drachma and Greek Ypogegrammeni

Lines for these two characters were added in the previous patch,
but the actual characters were not included in
the 4th column
of the table. This fixes that.

pthreads.7
Michael Kerrisk
Add a section describing thread IDs
In particular, note that in each pthreads function that takes
a thread ID argument, that ID by definition refers to a thread
in the same process as the caller.

========== Changes in man-pages-3.14 ==========

Released: 2008-11-25, Bucaramanga

Apologies if I missed anyone!

New and rewritten pages

CPU_SET.3
  Michael Kerrisk
    New page documenting CPU_* macros
      This page contains material moved out of sched_setscheduler(2).
      It overwrites a previously existing link file with the same name.
  Michael Kerrisk
    Add description of macros for dynamically allocated CPU sets
      Add descriptions of CPU_ALLOC(), CPU_ALLOC_SIZE(), CPU_FREE(),
      CPU_SET_S(), CPU_CLR_S(), CPU_ISSET_S(), CPU_ZERO_S(),
      CPU_COUNT_S(), CPU_AND_S(), CPU_OR_S(), CPU_XOR_S(), and
      CPU_EQUAL_S().
  Michael Kerrisk
    Add documentation of CPU_COUNT()
  Michael Kerrisk
    Add description
 of CPU_AND(), CPU_OR, CPU_XOR(), and CPU_EQUAL()
      Plus a few other small clean-ups of the text
  Michael Kerrisk
    Various improvements in DESCRIPTION
      After review comments by Bert Wesarg:
      * Explain that cpu_set_t is a bitset, but should be considered
        opaque.
      * A CPU set can be duplicated with memset().
      * Size of a CPU set is rounded up to size of long.
      * CPU_SETSIZE is in bits, but the setsize argument is in bytes.
  Michael Kerrisk
    Document CPU_ALLOC()/CPU_ALLOC_SIZE() bug
      These macros return twice what they should because of thinko
      in glibc 2.8 and earlier. The bug is fixed for glibc 2.9.
      http://sourceware.org/bugzilla/show_bug.cgi?id=7029
  Michael Kerrisk
    NOTES: Discuss use of types in "prototypes" for these macros
      The SYNOPSIS shows types for arguments and return values, but
      these are really just suggestions:
 since the interfaces are
      macros, the compiler won't catch all violations of
      the "type rules". Warn the reader of this.

pthread_attr_setinheritsched.3
  Michael Kerrisk
    New page for pthread_attr_setinheritsched(3) and
    pthread_attr_getinheritsched(3)

pthread_cancel.3
  Michael Kerrisk
    New page for pthread_cancel(3)

pthread_cleanup_push.3
  Michael Kerrisk
    New page for pthread_cleanup_push(3) and pthread_cleanup_pop(3)

pthread_setcancelstate.3
  Michael Kerrisk
    New page for pthread_setcancelstate(3) and pthread_setcanceltype(3)

pthread_testcancel.3
  Michael Kerrisk
    New page for pthread_testcancel(3)

Newly documented interfaces in existing pages
---

clone.2
  Jens Axboe
    Document CLONE_IO (new in Linux 2.6.25)
      Some text also by mtk.
  Michael Kerrisk
    Document CLONE_NEWNET
  Michael Kerrisk
    Document CLONE_NEWUTS (new
 in Linux 2.6.19)
  Michael Kerrisk
    Document CLONE_NEWIPC flag (new in Linux 2.6.19)
  Michael Kerrisk
    Document CLONE_NEWPID flag (new in Linux 2.6.24)

mmap.2
  Michael Kerrisk
    Document MAP_STACK flag (new in Linux 2.6.27)

arp.7
  Michael Kerrisk
    Document /proc file retrans_time_ms (new in Linux 2.6.12)
  Michael Kerrisk
    Document /proc file base_reachable_time_ms (new in Linux 2.6.12)

icmp.7
  Michael Kerrisk
    Document icmp_ignore_bogus_error_responses (new in Linux 2.2)
      Text taken from Documentation/networking/ip-sysctl.txt
  Michael Kerrisk
    Document icmp_ratelimit and icmp_ratemask (new in Linux 2.4.10)
      Text taken from Documentation/networking/ip-sysctl.txt

Michael Kerrisk
Document icmp_echo_ignore_broadcasts (new in Linux 2.6.12)
Text taken from Documentation/networking/ip-sysctl.txt

tcp.7
Michael Kerrisk
Document /proc file tcp_slow_start_after_idle (new
in Linux 2.6.18)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_base_mss (new in Linux 2.6.17)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_frto_response (new in Linux 2.6.22)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_moderate_rcvbuf (new in Linux 2.4.17/2.6.7)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_congestion_control (new in Linux 2.4.13)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_no_metrics_save (new in Linux 2.6.6)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_mtu_probing (new in Linux 2.6.17)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_dma_copybreak (new in Linux 2.6.24)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_tso_win_divisor (new in Linux 2.6.9)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_allowed_congestion_control (new in Linux 2.4.20)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_workaround_signed_windows (new in Linux 2.6.26)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_available_congestion_control (new in Linux 2.4.20)
Text taken from Documentation/networking/ip-sysctl.txt
Michael Kerrisk
Document /proc file tcp_abc (new in Linux 2.6.15)
Text taken from Documentation/networking/ip-sysctl.txt

udp.7
Michael

Kerrisk
    Document /proc files udp_mem, udp_rmem_min, and udp_wmem_min
      All of these are new in Linux 2.6.25

New and changed links

CPU_ALLOC.3
CPU_ALLOC_SIZE.3
CPU_AND.3
CPU_AND_S.3
CPU_CLR_S.3
CPU_COUNT.3
CPU_COUNT_S.3
CPU_EQUAL.3
CPU_EQUAL_S.3
CPU_FREE.3
CPU_ISSET_S.3
CPU_OR.3
CPU_OR_S.3
CPU_SET_S.3
CPU_XOR.3
CPU_XOR_S.3
CPU_ZERO_S.3
  Michael Kerrisk
    New link to new CPU_SET.3

CPU_CLR.3
CPU_ISSET.3
CPU_ZERO.3
  Michael Kerrisk
    Update links to point to CPU_SET.3
      The documentation of the CPU_* macros migrated to a new
      location: CPU_SET.3.

pthread_attr_getinheritsched.3
  Michael Kerrisk
    New link to new pthread_attr_setinheritsched.3

pthread_cleanup_pop.3
  Michael Kerrisk
    New link to new pthread_cleanup_push.3

pthread_setcanceltype.3
  Michael Kerrisk
    New link to new pthread_setcancelstate.3

Global changes
---

clone.2
mount.2
unshare.2
proc.5
path_resolution.7
  Michael Kerrisk
    Global fix: s/namespace/mount-point namespace/, as appropriate
      In recent times, a number of other namespace flags have been
      added to clone(2). As such, it is no longer clear to use
      the generic term "namespace" to refer to the particular
      namespace controlled by CLONE_NEWNS; instead, use the
      term "mount-point namespace".
  Michael Kerrisk
    Global fix: s/mount-point namespace/mount namespace/
      This is more consistent with the term "mounts namespace"
      used in the 2008 ACM SIGOPS paper, "Virtual servers
      and checkpoint/restart in mainstream Linux".
      (I avoided the "s", because using the plural strikes me
      as klunky English, and anyway we don't talk about
      the "PIDs namespace" or the "networks namespace", etc..)

connect.2
listen.2
send.2
uname.2
cmsg.3
proc.5
arp.7
ddp.7
icmp.7
ip.7
raw.7
socket.7
tcp.7
udp.7
  Michael
 Kerrisk
    Global fix: eliminate mention of the obsolete sysctl(2) interface
      Many pages still mention use of the obsolete sysctl(2) system
      call, or used the term "sysctls"; rewrite these mentions to
      instead be in terms of /proc interfaces.

fcntl.2
signal.2

mbsnrtowcs.3
mbsrtowcs.3
mbtowc.3
wcrtomb.3
wcsnrtombs.3
wcsrtombs.3
wctomb.3
  Michael Kerrisk
    Global fix: s/multi-thread/multithread/

getdents.2
pthread_attr_init.3
pthread_create.3
pthread_getattr_np.3
pthread_setaffinity_np.3
pthread_setschedparam.3
pthread_tryjoin_np.3
  Michael Kerrisk
    Use consistent error-handling function names
      Many older pages use a handle_error() macro to do simple
      error handling from system and library function calls.
      Switch these pages to do similar.

Changes to individual pages
---

time.1
  Michael Kerrisk
    Note that some shells have a 'time' built-in command

  Therefore, to access the functionality described on this page,
      it may be necessary to specify the full pathname.

clone.2
  Michael Kerrisk
    Place list of CLONE_* flags in alphabetical order
      (No content changes.)
fsync.2
  Michael Kerrisk
    Update feature test macro requirements for fsync()
      Since glibc 2.8, the fsync() declaration is also exposed if
      _POSIX_C_SOURCE >= 200112L

sched_setaffinity.2
  Michael Kerrisk
    Add note on system-imposed restrictions on CPUs actually used
      After Loïc Domaigne's suggestion for pthread_setaffinity_np(3), add

similar text to this page noting that the system silently
limits the set of CPUs on which the process actually runs to
the set of CPUs physically present and the limits imposed by
cpuset(7).

sched_setaffinity.2
Michael Kerrisk
Removed discussion of CPU_* macros()
These macros are now moving
to a separate page.
Michael Kerrisk
Refer reader to pthread_setaffinity_np(3)
pthread_setaffinity_np() is preferable for setting
thread CPU affinity if using the POSIX threads API.

sysctl.2
Michael Kerrisk
Add prominent warning against using this system call
This was already stated under NOTES, but make it even more
prominent by adding a sentence at the start of the DESCRIPTION.

uname.2
Michael Kerrisk
Add C comments describing fields in utsname structure

atan2.3
Stefano Teso
Fix description of range of function value return
The range is not [-pi/2, pi/2], but [-pi, pi].

(mtk: This error was reported by Nicolas François, and
should have been fixed in 3.11, but somewhere along the way,
the fix got lost.)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=506299

bindresvport.3
Michael Kerrisk
Since glibc 2.8, EPFNOSUPPORT
error is now EAFNOSUPPORT
Glibc switched to using a POSIX-specified error code for
this error case.

http://bugs.linuxbase.org/show_bug.cgi?id=2375

clock_getres.3
Michael Kerrisk
CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable

According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and
CLOCK_THREAD_CPUTIME_ID clocks should be settable, but
currently they are not.

getgrnam.3
Michael Kerrisk
Clarify and add more detail in RETURN VALUE description
The page was a bit fuzzy in describing the return values for
various cases. In particular, it needed to be more explicit
in describing what happens for the "not found" case.

This is an analogous change to the change for
getpwnam.3, made after Andreas Henriksson's report.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787
Michael Kerrisk

Rename arguments to getgrnam_r() and getgrgid_r()
s/gbuf/grp/ and s/gbufp/result/, for consistency
with POSIX.1 argument names.
Michael Kerrisk
Clarify RETURN VALUE description
The page was a bit fuzzy in describing the return values for
various cases. In particular, it needed to be more explicit
in describing what happens for the "not found" case.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708

getpwnam.3
Michael Kerrisk
Rename arguments to getpwnam_r() and getpwuid_r()
s/pwbuf/pwd/ and s/pwbufp/result/, for consistency
with POSIX.1 argument names.
Michael Kerrisk
Clarify and add more detail in RETURN VALUE description
The page was a bit fuzzy in describing the return values for
various cases. In particular, it needed to be more explicit
in describing what happens for the "not found" case.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787
Michael Kerrisk
Add an EXAMPLE program for getpwnam_r()

inet_ntop.3
Michael Kerrisk
Rename 'cnt' argument to 'size'
This is consistent with POSIX.1, and also a more sensible name.
Michael Kerrisk
Rework text describing 'size' argument

(After a suggestion by Vegard Nossum.)
Also made a few other small rewordings to in the initial
paragraph.

makecontext.3
Michael Kerrisk
Add text on use of pointer arguments to makecontext()
Passing pointer arguments to makecontext() is possible,
but only on some architectures, and with no guarantees
of portability.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504699

pthread_attr_setaffinity_np.3
Michael Kerrisk
Various fixes after review by Loïc Domaigne
Reviewed-by: Loïc Domaigne

pthread_attr_setaffinity_np.3
pthread_setaffinity_np.3
Michael Kerrisk
Update to reflect new location of CPU_*() documentation
The CPU_*() macros are now documented in CPU_SET.3;
update to reflect that fact.
Michael Kerrisk
Remove redundant text relating to CPU sets
Information about CPU_SETSIZE can be found in CPU_SET.3, so
remove discussion of it here.

pthread_attr_setschedparam.3
pthread_setschedparam.3
Michael Kerrisk
Remove text saying that only sched_priority is required by POSIX.1
Loïc Domaigne points out that if a system implements
SCHED_SPORADIC (which Linux does not), then other
fields are also specified in sched_param. The simple
solution is just to remove that phrase from the man
page.

pthread_cancel.3
pthread_detach.3
pthread_join.3
pthread_setaffinity_np.3
Michael Kerrisk
Make text of ESRCH error consistent

pthread_setaffinity_np.3
Michael Kerrisk

Add
text to EINVAL error mentioning cpuset(7)
Michael Kerrisk
Various improvements after review by Loïc Domaigne
Various fix-ups after Loïc's review.

Reviewed-by: Loïc Domaigne

pthread_setschedparam.3
Michael Kerrisk
PTHREAD_INHERIT_SCHED is default for inherit scheduler attribute
In EXAMPLE, note that PTHREAD_INHERIT_SCHED is the default for
the inherit scheduler attribute.

syslog.3
Masanari Iida
LOG_KERN messages can't be generated from user processes
Masanari notes that this is an FAQ for logger(1) and that
Solaris and FreeBSD document this point in syslog(3).
The glibc info page also hides this comment in its source:

Internally, there is also LOG_KERN, but LOG_KERN == 0,
which means if you try to use it here, just selects default.

proc.5
Ivana Varekova
Fix reference to kernel source file
Use relative reference
to Documentation/mtrr.txt.

arp.7
Michael Kerrisk
Add kernel version numbers for /proc interfaces

cpuset.7
Michael Kerrisk
SEE ALSO: add CPU_SET(3)

epoll.7
Michael Kerrisk
Note glibc version that added epoll support

icmp.7
Michael Kerrisk
Add kernel version numbers to /proc file descriptions

inotify.7
Vegard Nossum

Fix description of max_user_watches
It seems that inotify(7) is wrong here:

"/proc/sys/fs/inotify/max_user_watches
This specifies a limit on the number of watches that can be
associated with each inotify instance."

On my system, the default value for this variable is 8192. But I
cannot create more than 8192 watches in total for the same UID
even when they are on different inotify instances. So I suggest
to rephrase this as: "This specifies an upper limit on the
number of watches that can be created
per real user ID."

ip.7
Michael Kerrisk
Reorder socket options alphabetically
Michael Kerrisk
Added kernel version numbers for IP_* socket options
Michael Kerrisk
Relocate kernel version information for IP_PMTUDISC_PROBE
Michael Kerrisk
Add kernel version numbers for /proc/sys/net/ipv4/ip_* files
Michael Kerrisk
Remove mention of kernel header from description of IP_RECVERR
Looks like glibc has had this definition since about version 2.1.
Michael Kerrisk
Relocate kernel version information for ip_mreqn structure
Michael Kerrisk
Relocate info about Linux-specific sockopts to NOTES
Also add some source comments about non-standard Linux-specific
options that are not yet documented.

netlink.7
Vegard Nossum
Fix incorrect variable names in example code
s/snl/sa/ * 2

pthreads.7
Michael Kerrisk
Add section on cancellation points
This section includes a list of the functions that must and
may be cancellation points.
Michael Kerrisk
Rework, and fix small error in, thread-safe function list
Integrate the changes that occurred in POSIX.1-2008 into the
main list (to be consistent with the list, elsewhere on this
page, of functions that are cancellation points).

Also, fix an error that said that strerror() was added to
the list in POSIX.1-2008. It was strsignal() that was
added. (strerror() was already in the list in POSIX.1-2001.)
Michael Kerrisk
Tweak text on sigpause() cancellation point
In POSIX.1-2008, this function moves from the "must be"
to the "may be" list.
Michael Kerrisk
Add ref to signal(7) for further info on use of real-time signals
signal(7) provides some further details on the use of real-time
signals by the two Linux threading
implementations.
Michael Kerrisk
SEE ALSO: add pthread_attr_init() and pthread_cancel()

tcp.7
Michael Kerrisk
Update description of tcp_rmem defaults for Linux 2.6
Michael Kerrisk
Add kernel version numbers for TCP_* socket options
Note kernel version were each socket option first appeared.
Michael Kerrisk
The tcp_bic* proc files disappeared in Linux 2.6.13
Michael Kerrisk
tcp_vegas_cong_avoid disappeared in Linux 2.6.13
Michael Kerrisk
Add mention of RFC 4138 for 'tcp_frto' /proc file
Michael Kerrisk
Remove mention of /proc in VERSIONS
This information is not indicated for each /proc interface
Michael Kerrisk
Clarify that tcp_mem measures in units of the system page size
Michael Kerrisk
Update tcp_frto description for 2.6.22 changes
Linux 2.6.22 added a mode value 2 ("Enable SACK-enhanced
F-RTO if flow uses SACK").
Michael
Kerrisk
Fix alphabetical order in /proc file list
A few entries were slightly out of order.
Michael Kerrisk
Remove obsolete statement about /proc from VERSIONS
Much of the text has been updated to 2.6.27 or so,
so this statement no longer applies.
Michael Kerrisk
Add kernel version numbers for each /proc interface
Note kernel version where each /proc interface first appeared

Michael Kerrisk
tcp_westwood /proc file disappeared in Linux 2.6.13
Michael Kerrisk
Update description of tcp_wmem defaults for Linux 2.6

========== Changes in man-pages-3.15 ==========

Released: 2008-12-05, Bucaramanga

Contributors

Rob Landley <rob@landley.net>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

makedev.3
Michael Kerrisk
New page for makedev(), major(), and minor() macros

pthread_cleanup_push_defer_np.3
Michael Kerrisk
New page for pthread_cleanup_push_defer_np(3) and
pthread_cleanup_pop_restore_np(3)

Newly documented interfaces in existing pages
---

accept.2
  Michael Kerrisk
    Document accept4() system call, new in Linux 2.6.28

fmemopen.3
  Petr Baudis
    Add description of open_wmemstream(3)

tcp.7
  Michael Kerrisk
    Document MSG_TRUNC flag for TCP sockets

New
 and changed links
---

accept4.2
  Michael Kerrisk
    New link to accept.2
      accept.2 now documents the new accept4() system call.

open_wmemstream.3
  Petr Baudis
    New link to fmemopen.3
      fmemopen.3 now documents open_wmemstream().
pthread_cleanup_pop_restore_np.3
  Michael Kerrisk
    New link to new pthread_cleanup_push_defer_np.3

Global changes
---

accept.2
listen.2
recv.2
getpeername.2
getsockname.2
shutdown.2
socketpair.2
  Michael Kerrisk
    Global fix: SEE ALSO: add socket(7)

bind.2
rcmd.3

capabilities.7
ip.7
  Michael Kerrisk
    Global fix: s/reserved port/privileged port/
      Some pages used one term, some pages the other term;
      make some consistency.

connect.2
getpeername.2
getsockname.2
  Michael Kerrisk
    Use consistent argument names
      Most other sockets pages are using the names 'addr'
      and 'addrlen'; make these pages do the same.

getpeername.2
getsockname.2
getsockopt.2
recv.2
send.2
shutdown.2
sockatmark.3
socket.7
udplite.7
   Michael Kerrisk
    SYNOPSIS: Rename socket file descriptor argument to 'sockfd'
      Many sockets man pages use the name 'sockfd' already.
      For consistency, changes the others to do so as well.

gnu_dev_major.3
gnu_dev_makedev.3
gnu_dev_minor.3
major.3
minor.3
  Michael Kerrisk
    New links to new makedev(3) page

Changes to individual pages

_exit.2
  Michael Kerrisk
    Since glibc 2.3, the exit() wrapper function invokes exit_group(2)
      This information is useful to users of strace(1).

accept.2
  Michael Kerrisk

Clarify details when returned address is truncated
If the returned address is truncated, the 'addrlen' argument
indicates the actual size of the address, rather than a count
of the number of bytes in the truncated buffer.

Also clarify that
if 'addr' argument is NULL, then 'addrlen'
should is unused, and should also be NULL.
Michael Kerrisk
Reorder ERRORS list
Some errors were listed under a separate "may" heading.
There's probably no real need to do this; integrate
those errors into the main list.

exit_group.2
Michael Kerrisk
Note that since glibc 2.3, exit(2) invokes exit_group()

futex.2
Michael Kerrisk
Mention that glibc provides no wrapper function for futex()

get_thread_area.2
Michael Kerrisk
Note that glibc provides no wrapper for this system call

getdomainname.2
Michael Kerrisk
Substantial rewrite
Expand description of setdomainname() and getdomainname().
Note that getdomainname() is implemented as a library function
in glibc.
Note limits on size of domain name.
Reorganize ERRORS list.

gethostname.2
Michael Kerrisk
Various parts rewritten
Write a paragraph describing sethostname().

Clarify differences between glibc's gethostbyname() and
the kernel gethostbyname() system calls.

gethostname.2
Michael Kerrisk
Note that HOST_NAME_MAX is 64 on Linux
Also note that in pre-1.0 days, the limit on hostnames
was 8 bytes.

getpeername.2
  Michael Kerrisk
    Note that returned address may be truncated if buffer is too small

getsid.2
  Michael Kerrisk
    Simplified version information and moved to a new VERSIONS section

getsockname.2
  Michael Kerrisk
    Note that returned address is truncated if buffer is too small

mknod.2
  Michael Kerrisk
    Refer reader to makedev(3) to build a device ID

mmap.2
  Michael Kerrisk
    Loosen language around how 'addr' hint is interpreted
      Mel Gorman reported that in Linux 2.6.27, 'addr' is rounded
      down to a page boundary.

      Before kernel 2.6.26,
 if 'addr' was taken as a hint, it was
      rounded up to the next page boundary. Since Linux 2.6.24,
      it is rounded down. Therefore, loosen the description of
      this point to say that the address is rounded to "a nearby
      page boundary".

open.2
  Michael Kerrisk
    EFBIG error is now EOVERFLOW (since Linux 2.6.24)
      When a 32-bit app opens a file whose size is too big to be
      represented in 31-bits, POSIX.1 specifies the error EOVERFLOW.
      Linux used to give EFBIG for this case, but 2.6.24 fixed this.

      Also, add some text to describe the error scenario in
      more detail.

pread.2
  Michael Kerrisk
    Note that glibc emulation for these calls uses lseek(2)
      (This makes it clearer that the emulated calls are not atomic.)

recv.2
send.2
  Michael Kerrisk

Make names of "address" and "address length" args more consistent
Make the names of these arguments
more consistent with other
sockets man pages.

recv.2
Michael Kerrisk
Clarify details when returned address is truncated
If the recvfrom() returned address is truncated, the 'fromlen'
argument indicates the actual size of the address, rather than
a count of the number of bytes in the truncated buffer.

Also clarify that the 'from' argument can be NULL, in which
case 'fromlen' should is unused, and should also be NULL.
Michael Kerrisk
Internet datagram and netlink sockets support MSG_TRUNC for recv(2)
Internet datagram (since Linux 2.4.27/2.6.8),
and netlink (since Linux 2.6.22) sockets support
the MSG_TRUNC flag for recv(2).

select.2
Michael Kerrisk
Rewrote text describing feature test macros requirement for pselect()

select_tut.2
Michael Kerrisk
Fix SHUT_FD* macros in example program
Add "do {} while (0)"

set_thread_area.2
Michael Kerrisk
Note that glibc provides no wrapper for this system call

setfsgid.2
setfsuid.2
Michael Kerrisk
Simplify version information and move to a VERSIONS section

setsid.2
Michael Kerrisk
Rework RETURN VALUE section; add an ERRORS section

setup.2
Michael Kerrisk
Relocate some CONFORMING TO text to VERSIONS and NOTES

stat.2
Michael Kerrisk

Document EOVERFLOW error
Michael Kerrisk
Refer reader to major() and minor() to decompose a device ID

syscalls.2
Michael Kerrisk
Fix version numbers for a few system calls
Some 2.6 system calls were wrongly mentioned as also being
backported into a 2.4.x kernel.

uname.2
Michael Kerrisk
DESCRIPTION: Point reader at NOTES for further info on field lengths

atan.3
Andries E. Brouwer
Fix return value description
The correct range for the return value is [-pi/2,pi/2].
(mtk's fix in
the last change to the return value text was
a botch-up of a (correct) suggestion by Nicolas François.)

atexit.3
Michael Kerrisk
atexit() and on_exit(3) register functions on the same list
Michael Kerrisk
Terminating registered function using longjmp() is undefined
According to POSIX.1, using longjmp() to terminate execution of
a function registered using atexit() produces undefined results.
Michael Kerrisk
Calling exit(3) more than once produces undefined results
If an exit handler itself calls exit(3), the results are
undefined (see the POSIX.1-2001 specification of exit(3)).
Michael Kerrisk
The same exit handler may be registered multiple times
Michael Kerrisk
Calling _exit(2) terminates processing of exit handlers
Michael Kerrisk
Terminating registered function using longjmp() is undefined
According to POSIX.1, using longjmp() to terminate
execution of
a function registered using atexit() produces undefined results.

bindresvport.3
Mats Wichmann
SYNOPSIS: s/**/*/ in prototype
Michael Kerrisk
Fix errors regarding port used, plus other rewrites

Glibc's bindresvport() takes no notice of sin->sin_port:
it always returns an arbitrary reserved port in the
anonymous range (512-1023). (Reported by Mats Wichmann.)

Also:
* Add EADDRINUSE and EACCES errors.
* Mention use of getsockname(2).
* Other minor rewrites and reorderings of the text.
* Explicitly note that glib's bindresvport() ignores
sin->sin_port.
* Change license There's now virtually no text remaining from
the 1.70 version of this page.

Reviewed-by: Mats Wichmann
Reviewed-by: Petr Baudis

dlopen.3
Petr Baudis
Describe confusing dladdr() behavior
dladdr()
will act unexpectedly if called from non-pic code on a
compile-time-generated function pointer.

fmemopen.3
Michael Kerrisk
Add VERSIONS section
Petr Baudis
SEE OPEN: Add fopencookie(3)
fopencookie(3) is used to implement fmemopen().

fopen.3
Petr Baudis
SEE ALSO: Add fmemopen(3) and fopencookie(3)

fopencookie.3
Petr Baudis
fopencookie() needs _GNU_SOURCE feature test macro

getaddrinfo.3
Petr Baudis
Document results ordering and /etc/gai.conf
This patch documents the order of the getaddrinfo(3) results
(RFC 3484), how should the application deal with that,
mentions the extremely common cause of having multiple
results per query (both IPv4 and IPv6 addresses available)
and mentions /etc/gai.conf.

(mtk: Minor tweaks, and note glibc version for /etc/gai.conf)

isatty.3
  Michael Kerrisk
    Complete rewrite of this page,
 with rather more detail

memmem.3
  Michael Kerrisk
    Remove sentence saying that libc 5.0.9 is still widely used
      That was a *long* time ago.

on_exit.3
  Michael Kerrisk
    Document handling of registrations on fork(2) and execve(2)
      Treatment in these cases is the same as for atexit(3).
  Michael Kerrisk
    Arg given to registered function is status from *last* call to exit()
      It's a subtle point, but if a registered function itself
      calls exit(3), then subsequent functions that were registered
      with on_exit(3) will see the exit status given to the more
      recent exit(3) call.
  Michael Kerrisk
    Note that same function may be registered multiple times

setlocale.3
locale.7
  Michael Kerrisk
    Clean up the description of LANGUAGE environment variable
      Clean up the $LANGUAGE description, by removing bogus comments
      from setlocale(3) and expanding the mention
 in locale(7).

      Maybe you will decide that a more detailed description
      should be left to the gettext(3) documentation, but I
      actually care about the invisible part of the patch more
      since the comments have put me off the track initially
      ($LANGUAGE has nothing to do with setlocale(3) and is
       completely isolated to gettext, as obvious from the
       glibc sources).

proc.5
  Michael Kerrisk
    /proc/stat: s/minor/disk_idx/ in description of /proc/stat
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=225619

capabilities.7
  Drake Wilson
    Various minor fixes as per Debian bug 471029

The relevant pieces of
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=471029 are:

- Delete duplicate subentry for KEYCTL_CHOWN/KEYCTL_SETPERM
operations in the CAP_SYS_ADMIN entry. (It feels like that
capability entry should be converted
to a list, but I've
left it in semicolon-delimited form for now.)

- Remove text about ENFILE from the text about the
/proc/sys/fs/file-max limit in the CAP_SYS_ADMIN entry, since
this is already described in the man pages for the relevant
ofile-creating system calls.

- Correct or clarify a few other bits of grammar and such;
see the diff file itself for details.

socket.7
Michael Kerrisk
SEE ALSO: add tcp(7) and udp(7)

tcp.7
Michael Kerrisk
Relocate out-of-band data discussion
Move to a new subsection entitled "Sockets API".
Michael Kerrisk
Note that MSG_PEEK can be used on out-of-band data

time.7
Michael Kerrisk
SEE ALSO: add clock_gettime(3)

unix.7
Michael Kerrisk
Unix domain sockets don't support the recv() MSG_TRUNC flag
Michael Kerrisk
Retitled subsection "(Un)supported features"
to "Sockets API"
This is consistent with the recent change in tcp(7).

Michael Kerrisk
SEE ALSO: Add pthread_getcpuclockid(3)

fmemopen.3
Michael Kerrisk
Fix VERSIONS information

gethostid.3
Michael Kerrisk

Before version 2.2, glibc stored the host ID in /var/adm/hostid
Also: rewrite some text describing the /etc/hostid file, so that
this location is referred to just once on the page.
Michael Kerrisk
RETURN VALUE: describe return value of sethostid()
Michael Kerrisk
Added BUGS section noting that ID can't be guaranteed to be unique
Michael Kerrisk
Added ERRORS section describing errors for sethostid()
Michael Kerrisk
Update section number to reflect relocation into Section 3

printf.3
Michael Kerrisk
Source and destination buffers may not overlap for *s*printf()
http://sourceware.org/bugzilla/show_bug.cgi?id=7075

Some existing code relies on techniques like the following to
append text to a buffer:

```
$ cat s.c
#include <stdio.h>
char buf[80] = "not ";
main()
{
   sprintf(buf,
"%sfail", buf);
puts(buf);
return 0;
}

$ cc s.c
$ ./a.out
not fail
```

However, the standards say the results are undefined if source
and destination buffers overlap, and with suitable compiler
options, recent changes can cause unexpected results:

```
$ cc -v 2>&1 | grep gcc
gcc version 4.3.1 20080507 (prerelease) [gcc-4_3-branch revision 135036] (SUSE Linux)
$ cc -D_FORTIFY_SOURCE -O2 s.c
$ ./a.out
fail
```

readdir.3
Michael Kerrisk

Rewrite text describing 'dirent' fields standardized in POSIX.1

Michael Kerrisk

Clarify text for return value/errno setting for end-of-stream case

nscd.8

Petr Baudis

Correct NOTES section on reloading configuration files

It behaved this way at least since
"Sun Oct 18 15:02:11 1998 +0000",
some four months after including the nscd implementation
in glibc. But there does seem to be a short window between
glibc-2.1 and glibc-2.1.3 when nscd -i was not available,
I don't think it's worth muddling the point of the page
with that, though.

---

bind.2
  Michael Kerrisk
    SEE ALSO: Add getifaddrs(3)

epoll_create.2
   Michael Kerrisk
    Document EMFILE error
      This error is encountered when the limit imposed by
      /proc/sys/fs/epoll/max_user_instances is encountered.
  Michael Kerrisk
    Clarify distinction between epoll instance and epoll file descriptor
      Reword so that the notion of an epoll instance is made clear,
      and made distinct from the notion of an epoll file descriptor.
      Some other minor rewordings also.

epoll_ctl.2

Michael Kerrisk
Reordered parts of the text
Michael Kerrisk
Introduce notion of epoll instance
Introduce notion of epoll instance as distinct from
epoll file descriptor. Plus other wording clean-ups.
Michael Kerrisk
Document ENOSPC error (new in Linux 2.6.28)
This error results when the limit imposed by
/proc/sys/fs/epoll/max_user_watches is encountered.

epoll_wait.2
Michael Kerrisk
Introduce
the notion of an epoll instance into text

getdents.2
Michael Kerrisk
Before kernel < 2.6.4, 'd_type' was effectively always DT_UNKNOWN

gethostid.2
Michael Kerrisk
Rename file (was misnamed gethostd.2 in previous release)

getsockname.2
Michael Kerrisk
SEE ALSO: Add getifaddrs(3)

signalfd.2
Michael Kerrisk
Fix description of fork() semantics
The page text described the semantics of the initial
implementation of signalfd(). These were changed early on,
but the man page wasn't updated.

byteorder.3
Michael Kerrisk
SEE ALSO: add endian(3)

longjmp.3
Michael Kerrisk
Clarify wording re saving/restoring signal mask
Michael Kerrisk
siglongjmp() restores signal mask iff 'savesigs' was non-zero
Note that siglongjmp() restores signal mask if, and only
if, 'savesigs' argument of sigsetjmp() was non-zero. (Previous
text omitted the "and

only if".)

memccpy.3
  Michael Kerrisk
    Fix CONFORMING TO: s/C99/POSIX.1-2001/
  Michael Kerrisk
    If the memory areas overlap, the results are undefined

sethostid.3
  Michael Kerrisk
    Rename file (was misnamed sethostd.3 in previous release)

setjmp.3
  Michael Kerrisk
    Clarify wording re saving/restoring signal mask
  Michael Kerrisk
    Clarify when setjmp() provides BSD vs System V signal mask semantics

strsep.3
  Michael Kerrisk
    BUGS: explicitly list problems afflicting strsep()
      Previously, the page said this function suffered the same
      problems as strtok(), but in fact strsep() doesn't suffer
      from all of the same problems as strtok(), so explicitly
      list just the problems of strsep() in the strsep.3 page.

proc.5
  Michael Kerrisk
    Add pointer to epoll(7) for description of epoll /proc files

epoll.7
  Michael Kerrisk
    Various wording changes to improve clarity
and consistency

  Michael Kerrisk
    Global fix: Fix xrefs to clock_*.? pages to reflect move to section 2

clock_nanosleep.2
execve.2
fork.2
nanosleep.2
sigaction.2
timerfd_create.2
pthread_getcpuclockid.3
ualarm.3
usleep.3
pthreads.7
time.7
  Michael Kerrisk
    Global fix: s/(3)/(2)/ in section number xrefs for timer_*() API
      The POSIX timers API is implemented (mostly) within the kernel,
       so these interfaces are system calls. Although there are as yet
      no man pages, when they are added they should be in Section 2,
      not 3. Therefore fix those pages that currently refer to these
      interfaces as being in Section 3.

Changes to individual pages
----

capget.2
  Andi Kleen
    Add some details and relocate a paragraph
      While writing a little program using capset
      I found the capset manpage quite light on crucial
      details and I had to resort to RTFS.

      This patch improves the points I found unclear
      and also moves one misplaced paragraph around.

clock_getres.2
  Michael Kerrisk
    Move page from Section 3 to Section 2

eventfd.2
  Michael Kerrisk
    glibc eventfd() supports the use of eventfd2() since version 2.9

fork.2
  Michael Kerrisk
    SEE ALSO: add daemon(3)

getdents.2
  Michael Kerrisk
    Remove unneeded HAVE_D_TYPE
 from example program
      Since d_type will always just return DT_UNKNOWN before
      kernel 2.6.4, we don't need to use a conditional for
      determining whether we use this flag.

nanosleep.2
  Michael Kerrisk
    Relocated misplaced BUGS heading

select_tut.2
  Michael Kerrisk
    Clean up error checking in example program (no semantic changes)
  Michael Kerrisk
    Many parts tidied and rewritten
      Remove some redundant text, clarify various pieces,
      tidy example code, etc.
  Michael Kerrisk
    Bug fixes + rewrites in example program
      Sebastien pointed out that the first example program
      wrongly thinks it can count signals.
      Also, some further rewrites by mtk.

socket.2
  Michael Kerrisk
    BUGS: Remove discussion SOCK_UUCP
      As time goes on, this sentence becomes less a piece of humor,
      and more a puzzle.

stat.2
  Michael Kerrisk
    Note
 that open(O_NOATIME) also causes st_atime not to be updated

timerfd_create.2
  Michael Kerrisk
    Add BUGS noting that timerfd supports fewer clock types than
    timer_create()

btowc.3
  Michael Kerrisk
    SEE ALSO: add wctob(3)

clock_getcpuclockid.3
  Michael Kerrisk
    SEE ALSO: add pthread_getcpuclockid(3)

cos.3
  Michael Kerrisk
    SEE ALSO: add sincos(3)

fexecve.3
  Timo Sirainen
    Note that fexecve() depends on a mounted /proc
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514043
  Michael Kerrisk
    CONFORMING TO: note addition of fexecve() in POSIX.1-2008
  Michael Kerrisk
    'fd' must be opened read-only and refer to a file that is executable

fmemopen.3
  Michael Kerrisk
    CONFORMING TO: note that these functions are in POSIX.1-2008

getifaddrs.3
  Lucio Maciel
    Fix memory leak in example program
  Petr Baudis
    Various small fixes

getpwnam.3
  Michael Kerrisk

 SEE ALSO: add getspnam(3)

remainder.3
  Michael Kerrisk
    SEE ALSO: add div(3)

scandir.3
  Michael Kerrisk
    CONFORMING TO: alphasort() and scandir()
 are added to POSIX.1-2008
  Michael Kerrisk
    CONFORMING TO: note that versionsort() was added to glibc in
    version 2.1

sem_wait.3
  Michael Kerrisk
    SEE ALSO: add clock_gettime(2)

significand.3
  Michael Kerrisk
    Add CONFORMING TO noting that this function is unstandardized

sigwait.3
  Michael Kerrisk
    Add EXAMPLES section referring to pthread_sigmask(3)

sin.3
  Michael Kerrisk
    SEE ALSO: add sincos(3)

stpcpy.3
  Michael Kerrisk
    Add BUGS section noting the possibility of buffer overruns
  Michael Kerrisk
    Add missing pieces/fix various problems in example program
  Michael Kerrisk
    CONFORMING TO: stpcpy() is nowadays on the BSDs
  Michael Kerrisk
    SEE ALSO: add stpcpy.3

wcscasecmp.3
  Michael Kerrisk
    CONFORMING TO: note that this function is added in POSIX.1-2008

wcsdup.3
  Michael Kerrisk
    CONFORMING TO: note that this function was added in POSIX.1-2008

wcsncasecmp.3
   Michael Kerrisk
    CONFORMING TO: note that this function is added in POSIX.1-2008

wctob.3
  Michael Kerrisk
    SEE ALSO: add btowc(3)

proc.5
  Michael Kerrisk
    Remove mention of epoll/max_user_instances
      (Since this interface appeared in 2.6.28, and then
      disappeared in 2.6.29.)

ascii.7
  Michael Kerrisk
    Update SEE ALSO list to include pages added in 3.17
  Michael Kerrisk

SEE ALSO: add recently added iso_8859-*(7) pages

epoll.7
Michael Kerrisk
remove documentation of /proc/sys/fs/epoll/max_user_instances
This /proc interface appeared in 2.6.28. but will be
removed in 2.6.29.

Also, document change in default value of
/proc/sys/fs/epoll/max_user_watches (was 1/32 of lowmem,
now 1/25 of lowmem).

koi8-r.7
Michael Kerrisk
SEE ALSO: add koi8-u(7); remove crufty text

standards.7
Michael Kerrisk
Update to note that latest
POSIX/SUS was ratified in 2008

time.7
Michael Kerrisk
SEE ALSO: add pthread_getcpuclockid(3)

========== Changes in man-pages-3.19 ==========

New and changed links
---

timer_gettime.2
  Michael Kerrisk
    New link to new timer_settime.2

Global changes

Various pages
  Kir Kolyshkin
    Trivial punctuation fixes in SEE ALSO
      In SEE ALSO, when a few man pages are referenced, those
      are divided by commas. Every reference is on a separate
      line, and all lines but the last one should end with
      comma. I spotted one place where there is no comma in
      between references, and mocked up an awk script to find
      similar places:

      for f in man*/*; do
        awk '
          /^.SH ["]SEE ALSO["]/ {
            sa=1; print "== " FILENAME " =="; print; next
          }

```
            /^\.(PP|SH)/ {
               sa=0; no=0; next

        }
            /^\.BR/ {
               if (sa==1) {
                  print;
                  if (no == 1)
                     print "Missing comma in " FILENAME " +" FNR-1; no=0
               }
            }
            /^\.BR .*)$/ {
               if (sa==1)
                  no=1;
               next
            }
            /\.\\"/ {next}
            /.*/ {
               if (sa==1) {
                  print; next
               }
            }
          ' $f;
      done | fgrep 'Missing comma'
```

This patch fixes all the places found by the above script.

Also, there is an extra dot at the end of uri.7 "SEE ALSO"
section. Removed as per man-pages(7) recommendation.

Changes to individual pages
---

getitimer.2
clock_getcpuclockid.3
time.7
  Michael Kerrisk
    SEE ALSO: add timer_create(2)

getitimer.2
  Michael Kerrisk
    Rename arguments for consistency with other timer pages
      Also some other minor wording improvements

splice.2
  Mark Hills
    ERRORS: Add EINVAL case for file opened O_APPEND

Target file cannot be opened in append (O_APPEND) mode

In kernels prior to v2.6.27 splice() to a file in
append mode is broken, and since that version it is
disallowed. It is possible this behaviour may change
in the future; see the kernel commit message
(efc968d450e013049a662d22727cf132618dcb2f) for more
information.

syscalls.2
  Michael Kerrisk
    Note that getpmsg(2) and putmsg(2) are unimplemented
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514771

timerfd_create.2
  Michael Kerrisk
    ERRORS: add EFAULT

timerfd_create.2
  Michael Kerrisk
    Rename timerfd_settime() 'curr_value'
 arg to 'old_value'
      For consistency with related pages.

vm86.2
  Parag Warudkar
    CONFORMING TO: Add 32-bit specific
      Note that this call is only on *32-bit* Intel

mq_open.3
  Michael Kerrisk
    ERRORS: add ENOENT error for name == "/"

mq_open.3
  Michael Kerrisk
    ERRORS: Add EACCES error for name containing > 1 slash

sem_open.3
  Michael Kerrisk
    ERRORS: add EINVAL error where name == "/"

sem_open.3
  Jens Thoms Toerring
    Add case of non-well-formed name to ENOENT

shm_open.3
  Michael Kerrisk
    Clarify rules for construction of shared memory object names

proc.5
  Michael Kerrisk
    Add description of /proc/sys/kernel/sysrq
      Reported by: Goerghe Cosorea <gheorghe.coserea@gmail.com>

proc.5
  Michael Kerrisk
    Put /proc/modules entry in correct alphabetical order

ascii.7
  Kir Kolyshkin
    Fix formatting of tables on second page to use monospaced font

mq_overview.7
   Michael Kerrisk
    Clarify construction rules for message queue object names

sem_overview.7
  Michael Kerrisk
    Clarify construction rules for semaphore object names
      See also
http://groups.google.com/group/comp.os.linux.development.apps/browse_thread/thread/b4a67caa765cb65f

Global changes
---

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
numa.7

Michael
Kerrisk
Make source layout of 'Link with' text consistent with other pages
No actual change to formatted output, but this makes the
page sources more consistent for the purpose of grepping, etc.

mempcpy.3
signbit.3
significand.3
Michael Kerrisk
Global fix: acknowledge FSF in copyright
These pages are heavily based on original material in
glibc info pages, but the comments in the source of the pages
did not acknowledge the FSF copyright on the original material.
Fix that.

accept.2
read.2
recv.2
send.2
write.2
Michael Kerrisk
Fix discussion of EAGAIN/EWOULDBLOCK errors
For a non-blocking socket, POSIX.1-2001/2008 allow either
EAGAIN or EWOULDBLOCK to be returned in cases where a call
would have blocked. Although these constants are defined
with the same value on most Linux architectures (PA-RISC
is the exception), POSIX.1
does not require them to have
the same value. Therefore, a portable application using
the sockets API should test for both errors when checking
this case.

(NB POSIX.1 only mentions EWOULDBLOCK in the context of
the sockets interfaces.)

Change made after a note cross-posted on linux-arch@vger,
http://thread.gmane.org/gmane.linux.debian.ports.hppa/5615
and a suggestion for write(2) from Carlos O'Donell

basename.3
getgrent.3

iso_8859-9.7
koi8-r.7
koi8-u.7
  Michael Kerrisk
    Add explicit character set encoding to first line of source
      Nowadays mandb has
provision to understand a character set
      encoding that is explicitly indicated in the first line
      of the source. As pointed out by Colin Watson, including
      such an explicit indication on pages encoded in anything
      other than ISO 8859-1 or UTF-8 is useful for man-pages
      that aren't shipped in UTF-8.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519209
      and for some other background (responded to by Colin Watson
      in the above report):
      http://thread.gmane.org/gmane.comp.internationalization.linux/6040
      ("man page encoding", 5 Jul 2005)

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    VERSIONS: glibc support is provided since version 2.10

fcntl.2
  Michael Kerrisk
    Remove mention of EWOULDBLOCK from discussion of mandatory locking
      In the kernel, the error on encountering a mandatory lock is

EAGAIN. Although EAGAIN and EWOULDBLOCK are the same on
most Linux architectures, on some they are not, so don't
mention EWOULDBLOCK as it is misleading. (Mea culpa.)

getcontext.2
Michael Kerrisk
Note that POSIX.1-2008 removes the specification of getcontext()

getitimer.2
Michael Kerrisk
Note that POSIX.1-2008 recommends POSIX timers API instead of this API

gettimeofday.2
Michael Kerrisk
Note that POSIX.1-2008 recommends clock_gettime() instead of this API

ptrace.2
Michael Kerrisk
Note use of 'data' for PTRACE_SYS{CALL,EMU} and PTRACE_*_SINGLESTEP
These operations use the 'data' argument as a signal number,
like PTRACE_CONT.

ptrace.2
Mike Frysinger
only reference <sys/user.h>
The kernel no longer installs linux/user.h, so update
references to sys/user.h.

recv.2
Michael Kerrisk
Add 'iovec' defn to defn of 'msghdr' structure

The 'msghdr' structure includes a field of type 'iovec',
so show the definition of that structure in this page.

rename.2
Michael Kerrisk
Make ENOENT description consistent with POSIX.1-2008

timerfd_create.2
Michael Kerrisk
ERRORS: add EINVAL for invalid 'flags' for timer_settime()

truncate.2
Michael Kerrisk
SYNOPSIS: Fix description of feature test macro requirements
After a report by Arvid Norlander.

bcopy.3
  Michael Kerrisk
    Note that POSIX.1-2008 removes specification of bcopy()

bsd_signal.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sigaction(2) instead of this API

ctime.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends strftime(3) instead of these functions

ecvt.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sprintf(3) instead of these functions

gcvt.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sprintf(3) instead of this function

getcwd.3
   Michael Kerrisk
    Note that getcwd() should be used instead of the obsolete getwd()

getgrent.3
  Michael Kerrisk
    Returned buffer may be statically allocated and overwritten by
    later calls

gethostbyname.3
  Michael Kerrisk
    POSIX.1-2008 recommends getaddrinfo(3) and getnameinfo(3) instead

getnetent_r.3
  Michael Kerrisk
    Fix function name in text: s/getnetbynumber_r/getnetbyaddr_r/
      The SYNOPSIS showed the right function name (getnetbyaddr_r),
      but the text repeatedly used the wrong name (getnetbynumber_r).
      Probably, this was a cut-and-paste error.

getpwent.3
  Michael Kerrisk
    Returned buffer may be statically allocated and overwritten by
    later calls

index.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends strchr(3) and strrchr(3) instead

isalpha.3
  Michael Kerrisk
    Explain why POSIX.1-2008 marks isascii(3) obsolete

lockf.3
  Nikanth Karthikesan

   Update pointer to documentation in kernel source

makecontext.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends the use of POSIX threads instead

mq_notify.3
  Michael Kerrisk
    Document the POSIX.1-2008 optional EINVAL error
      POSIX.1-2008 allows an optional EINVAL error if
      notification==NULL and the caller is not currently
      registered to receive notifications.

posix_fallocate.3
  Michael Kerrisk
    Clarify that EINVAL also occurs of 'len' *equals* zero
      See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_fallocate.3
  Michael Kerrisk
    Document POSIX.1-2001 and POSIX.1-2008 specifications for EINVAL error
      See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_memalign.3
  Michael Kerrisk
    Document handling of size==0 case for posix_memalign()

pthread_exit.3
  Michael Kerrisk
    Fix error in DESCRIPTION: s/pthread_create/pthread_exit/

realpath.3
  Michael Kerrisk
     Rework resolved_path==NULL discussion w.r.t. POSIX.1-200[18]
      Although the page already mentioned the resolved_path==NULL
      feature, and that this feature was added in POSIX.1-2008, there
      was still some crufty text in BUGS that hadn't been updated to
      reflect the POSIX.1-2008 changes.

      Also, some other minor wording and grammar fixes.

scalb.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends scalbln*(3) instead

seekdir.3
  Michael Kerrisk
    SYNOPSIS: Fix type of 'offset' argument: s/off_t/long/
      And add a NOTES section pointing out that 'off_t'
      was indeed used in glibc 2.1.1 and earlier.
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230

sem_post.3
  Michael Kerrisk
    Document EOVERFLOW error

shm_open.3
  Michael Kerrisk
    Recast discussion on name length to exclude terminating NULL byte
      Probably it's clearer to describe
 the length of the IPC object
      name as a count that excludes the null terminator.

siginterrupt.3
  Michael Kerrisk
    Note that POSIX.1-2008 recommends sigaction() instead

sigset.3
  Michael Kerrisk
    Note APIs that POSIX.1-2008 recommends instead of these obsolete APIs

strftime.3
  Michael Kerrisk
    Small fix to description of %G
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=516677

strftime.3
  Michael Kerrisk
    Add details on ISO 8601 week-based dates
      ISO 8602 week-based dates are relevant for %G, %g, and %V,
      and the existing details on these dates are a little thin.

strftime.3
  Michael Kerrisk
    Remove mention of year from ISO 8601 standard
      The text mentioned the 1988 8601 standard, but there have
      already been two revisions of the standard since then, so
      simply remove mention of the year.

telldir.3
  Michael Kerrisk
    SYNOPSIS: Fix return type:
s/off_t/long/
      And add a NOTES section pointing out that 'off_t'
      was indeed used in glibc 2.1.1 and earlier.
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230

timeradd.3
  Michael Kerrisk
    Note that on some systems, <=, >=, == don't work for timercmp()

timeradd.3
  Michael Kerrisk
    SYNOPSIS: Fix return types of timerisset() and timercmp()

toascii.3
  Michael Kerrisk
    Note why POSIX.1-2008 marks this function obsolete

console_ioctl.4
  Alan Curry
    Fix 'argp' type for KDGETLED description
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517485

group.5
  Michael Kerrisk
    Various minor rewordings and improvements

resolv.conf.5
  Michael Kerrisk
    Document 'ip6-bytestring' option

resolv.conf.5
  Michael Kerrisk
    Document 'edns0' option

resolv.conf.5
  Michael Kerrisk
    Document 'ip6-dotint' / 'no-ip6-dotint' option

resolv.conf.5
  Michael Kerrisk
     Note that maximum value of 'ndots' option is capped to 15

resolv.conf.5
  Michael Kerrisk

Note that maximum value of 'timeout' option is capped to 30

hier.7
Michael Kerrisk
Add description of /srv
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=520904

ip.7
Michael Kerrisk
Fix type used to declare sin6_port
The page should use the type specified by POSIX,
rather than the (equivalent) type used in the kernel

ipv6.7
Teddy Hogeborn
Fix types used to declare sin6_family and sin6_port
The page should use the types specified by POSIX,
rather than the (equivalent) types used in the kernel.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517074

mq_overview.7
Michael Kerrisk
Recast discussion on name length to exclude terminating NULL byte
Probably it's clearer to describe the length of the IPC object
name as a count that
excludes the null terminator.

rtld-audit.7
Michael Kerrisk
Note that multiple libraries in LD_AUDIT doesn't work
This is reportedly fixed in glibc 2.10.
See http://sourceware.org/bugzilla/show_bug.cgi?id=9733

sem_overview.7
Michael Kerrisk
Fix discussion of length of semaphore names
Because of the "sem." prefix added by glibc to a semaphore
name, the limit on the length of the name (excluding the
terminating null byte) is 251 characters.

========== Changes in man-pages-3.21 ==========

Released: 2009-04-15, Los Gatos

---

initrd.4
  Michael Kerrisk
    Various minor wording improvements

initrd.4
  Frank Dana
    Add missing word in description

feature_test_macros.7
  Michael Kerrisk
    Update for glibc 2.10 changes to <features.h>
      From glibc 2.10, <features.h> understands the values 200809

for _POSIX_C_SOURCE and 700 for _XOPEN_SOURCE, and makes
corresponding changes to defaults for other feature test macros.
Michael Kerrisk
Add an example program
This example program makes it possible to explore what
feature test macros are set depending
on the glibc version
and the macros that are explicitly set.

ldconfig.8
Michael Kerrisk
/etc/ld.so.conf also include libraries found in /lib and /usr/lib

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Rewrite crufty text about number of args in older version of clone()
      Some bit rot had crept in regarding the discussion of the
      number of arguments in older versions of this syscall.
      Simplify the text to just say that Linux 2.4 and earlier
      didn't have ptid, tls, and ctid arguments.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533868
  Michael Kerrisk
    Fix version number for CLONE_NEWIPC
      It's 2.6.19, not 2.4.19.
  Michael Kerrisk
    Fix errors in argument names in text (ptid, ctd)

execve.2
  Mike Frysinger
    Remove erroneous statement that
 pending signal set is cleared
    on execve(2).

fcntl.2
  Michael Kerrisk
    The kernel source file mandatory.txt is now mandatory-locking.txt
  Michael Kerrisk
    The Documentation/* files are now in Documentation/filesystems

flock.2
  Michael Kerrisk
    Remove unneeded reference to Documentation/mandatory.txt
      Mandatory locks are only implemented by fcntl() locking
  Michael Kerrisk
    The Documentation/* files are now in Documentation/filesystems

fork.2
  Jeff Moyer
    Document fork() behaviour for the Linux native AIO io_context
      It was noted on lkml that the fork behaviour is documented
      for the POSIX AIO calls, but not for the Linux native calls.
      Here is a patch which adds a small blurb that folks will
      hopefully find useful.

Upon fork(), the child process does not inherit the
io_context_t data structures returned by io_setup,
and thus cannot
submit further asynchronous I/O or
reap event completions for said contexts.

getdents.2
Michael Kerrisk
The d_type field is fully supported on Btrfs

mount.2
Michael Kerrisk
Document MS_STRICTATIME, update description of MS_RELATIME
Starting with Linux 2.6.30, the MS_RELATIME behavior became
the default, and MS_STRICTATIME is required to obtain the
traditional semantics.

poll.2
Michael Kerrisk
Remove EBADF error from ERRORS
As reported by Motohiro:

"man poll" describe this error code.

>ERRORS
> EBADF An invalid file descriptor was given in one of the sets.

but current kernel implementation ignore invalid file descriptor,
not return EBADF.
...

In the other hand, SUSv3 talk about

> POLLNVAL
> The specified fd value is invalid. This flag is only valid in the
> revents
member; it shall ignored in the events member.

and

> If the value of fd is less than 0, events shall be ignored, and
> ireevents shall be set to 0 in that entry on return from poll().

but, no desribe EBADF.
(see http://www.opengroup.org/onlinepubs/009695399/functions/poll.html)

So, I think the implementation is correct.

Why don't we remove EBADF description?

sigaction.2
Michael Kerrisk
Expand description of si_utime and si_stime fields of siginfo_t

stat.2
Michael Kerrisk
Improve wording of ENOTDIR error

syscalls.2
Michael Kerrisk
Add preadv() and pwritev(), new in kernel 2.6.30

wait.2
Gokdeniz Karadag
Document CLD_DUMPED and CLD_TRAPPED si_code values

daemon.3
Michael Kerrisk
Clarify discussion of 'noclose' and 'nochdir' arguments

ffs.3
Petr Baudis
SEE ALSO: add memchr(3)

fmemopen.3
Petr Baudis
Relocate BUGS
section to correct position
Petr Baudis
NOTES: there is no file descriptor associated with the returned stream
Alexander Lamaison pointed out that this is not obvious
from the documentation, citing an example with passing the
FILE * handle to a function that tries to fstat() its
fileno() in order to determine the buffer size.
Michael Kerrisk
CONFORMING TO: remove note that these functions are GNU extensions
That sentence is now redundant, since these functions
are added in POSIX.1-2008.

lockf.3
Michael Kerrisk
Clarify relationship between fcntl() and lockf() locking

memchr.3
Petr Baudis
SEE ALSO: add ffs(3)

readdir.3
  Michael Kerrisk
    The d_type field is fully supported on Btrfs

setjmp.3
  Mike Frysinger
    Fix typo and clarify RETURN description
      The word "signal" was duplicated in NOTES, and the RETURN
      section refers to
 setjmp() and sigsetjmp(), and mentions
      longjmp(), but not siglongjmp().

strcmp.3
  Petr Baudis
    SEE ALSO: add strverscmp(3)

strcpy.3
  Mark Hills
    SEE ALSO: Add strdup(3)

complex.7
  Michael Kerrisk
    Add missing header file for example program
  Reimar Döffinger
    Fix type used in example code
    man complex (from release 3.18) contains the following code:
      complex z = cexp(I * pi);
    Reading the C99 standard, "complex" is not a valid type,
    and several compilers (Intel ICC, ARM RVCT) will refuse to compile.
    It should be
      double complex z = cexp(I * pi); instead.

environ.7
  Michael Kerrisk
    Note that last element in environ array is NULL
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528628
  Michael Kerrisk
    Wording fixes

mq_overview.7
  Michael Kerrisk
    Note that mkdir and mount commands here need superuser privilege
  Michael Kerrisk

    Fix example showing contents of /dev/mqueue file

standards.7

Michael Kerrisk
Remove references to dated books
Gallmeister and Lewine are rather old books. Probably,
there are better books to consult nowadays, and anyway,
this man page isn't intended to be a bibliography.

========== Changes in man-pages-3.23 ==========

Released: 2009-09-30, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Aaron Gardner <aaron.j.gardner@gmail.com>
Andrey Vihrov <vihrov@gmail.com>
Christoph Hellwig <hch@lst.de>
Georg Sauthoff <gsauthof@techfak.uni-bielefeld.de>
Leslie P. Polzer <sky@viridian-project.de>
Marc Lehmann <debian-reportbug@plan9.de>
Mark Hills <mark@pogo.org.uk>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nicolas François <nicolas.francois@centraliens.net>
Serge Hallyn <serue@us.ibm.com>
Siward
de Groot <siward@ziggo.nl>
rui rlex <rui.rlex@gmail.com>

Apologies if I missed anyone!

Changes to individual pages
---

execve.2
pipe.2
tee.2
fmemopen.3
mq_notify.3
qsort.3
Michael Kerrisk
Replace use of assert() by code that checks argc
See http://bugzilla.kernel.org/show_bug.cgi?id=13569

As noted by Andrey:
The purpose of the assert macro, defined in <assert.h>,
is to provide a tool to check for programming mistakes
or program logic errors. However, the assert macro must
never be used to perform checks for run time errors,
since, with the NDEBUG macro defined, expressions within
the assert macro invocations are not evaluated/checked
for, resulting in behavior that was not originally intended.
...
The pages affected in the core package are

execve(2)
pipe(2)
tee(2)

fmemopen(3)
mq_notify(3)
qsort(3)

getrusage.2
Michael Kerrisk
ru_inblock and ru_oublock are now implemented
These fields of the rusage structure are filled in since
Linux 2.6.22.

mmap.2
Michael Kerrisk
Add brief documentation of MAP_HUGETLB
This flag is new in 2.6.32, and serves a similar
purpose to the shmget() SHM_HUGETLB flag.

open.2
Christoph Hellwig
add some comments on O_SYNC and friends

poll.2
Michael Kerrisk
Clarify wording describing of 'nfds' argument.
reported by: rui rlex <rui.rlex@gmail.com>

semctl.2
Nicolas François
Remove some redundant words

setpgid.2
Michael Kerrisk
Add an explanation of orphaned process groups

splice.2
tee.2
vmsplice.2
  Mark Hills
    Fix return type
      Since glibc 2.7, the return type for these functions
      is ssize_t (formerly it was long).

stat.2
  Nicolas
 François
    Fix small bug in example program
      Since it is a failure, EXIT_FAILURE looks more appropriate
      than EXIT_SUCCESS.

umount.2
  Michael Kerrisk
    glibc only exposes MNT_DETACH and MNT_EXPIRE since version 2.11
      See http://sourceware.org/bugzilla/show_bug.cgi?id=10092

exit.3
  Michael Kerrisk
    Add a pointer to explanation of orphaned process groups in setpgid(2)

fflush.3
  Michael Kerrisk
    fflush() discards buffered input

ffs.3
  Michael Kerrisk
    Clarify that ffsl() and ffsll() are GNU extensions

getaddrinfo.3
  Michael Kerrisk
    Note nonstandard assumed hints.ai_flags value when hints is NULL
      When hints is NULL, glibc assumes hints.ai_flags is
      AI_V4MAPPED|AI_ADDRCONFIG whereas POSIX says 0.
      According to Ulrich Drepper, glibc's behavior is better.

getmntent.3
  Mike Frysinger
    setmntent() argument is 'filename' not 'fp'
      The description
 of setmntent() formerly used the wrong
      argument name.

posix_fallocate.3

Nicolas François
Fix reference to POSIX.1-2008
The sentence mentions twice POSIX.1-2001.
I guess the second one should be POSIX.1-2008.
This should be checked in the standard.

setenv.3
Michael Kerrisk
Improve ERRORS section
Add ENOMEM error; improve EINVAL description. Also, make
RETURN VALUE section a little more accurate in its mention
of errno.

strftime.3
Nicolas François
Fix error in description: s/Monday/Thursday/

proc.5
Nicolas François
Fix page cross reference
max_user_watches is better explained in epoll(7) than inotify(7).

proc.5
Michael Kerrisk
dmesg is in section 1, not section 8

capabilities.7
Michael Kerrisk
FS UID manipulations affect CAP_LINUX_IMMUTABLE and CAP_MKNOD
Nowadays, file system UID manipulations also affect
CAP_LINUX_IMMUTABLE (since 2.6.3) and CAP_MKNOD (since 2.6.29).

capabilities.7
Michael Kerrisk
Fix version number for CAP_MKNOD in FS UID manipulations
A recent patch said "since 2.6.29". It should have
been "since 2.6.30".

capabilities.7
Nicolas François
Reword a bad sentence in description of capability bounding set.

mq_overview.7
Michael Kerrisk
Change documented ranges for msg_max and msgsize_max
Linux 2.6.28 changed the permissible ranges for
these /proc files.

tcp.7
udp.7
  Nicolas François
    Replace references to syctl interfaces with /proc

New and rewritten pages
---

add_key.2
  David Howells
    New page documenting add_key(2)
      Taken from keyutils-1.1 package.

keyctl.2
  David Howells
    New page documenting keyctl(2)
      Taken from keyutils-1.1 package.

request_key.2
  David Howells
    New page documenting request_key(2)
      Taken from keyutils-1.1 package.

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/non-root/unprivileged/

Various pages
  Michael Kerrisk
    Global fix: s/non-privileged/unprivileged/

Various pages
  Michael Kerrisk
    Global fix: /non-superuser/unprivileged user/

Various pages
  Michael Kerrisk
    s/non-/non/
      The tendency in English, as prescribed in style guides like
      Chicago MoS, is toward removing hyphens after prefixes

like "non-" etc.

Various pages
  Michael Kerrisk
    Global fix: s/re-/re/
      The tendency in English, as prescribed in style guides like
      Chicago MoS, is toward removing hyphens after prefixes
      like "re-" etc.

Various pages
  Michael Kerrisk
    Global fix: s/multi-/multi/
      The tendency in English, as prescribed in style guides like
      Chicago MoS, is toward removing hyphens after prefixes
      like "multi-" etc.

Various pages
  Michael Kerrisk
    Global fix: s/pre-/pre/
      The tendency in English, as prescribed in style guides like
      Chicago MoS, is toward removing hyphens after prefixes
      like "pre-" etc.

Various pages
  Michael Kerrisk
    Global fix: s/sub-/sub/
      The tendency in English, as prescribed in style guides like
      Chicago MoS, is toward removing hyphens after prefixes
      like "sub-" etc.

stime.2
time.2

sem_wait.3
strftime.3
strptime.3
timeradd.3
rtc.4
core.5
proc.5
icmp.7

time.7
  Michael Witten
    Global fix: Consistently define the Epoch
      All definitions of the Epoch have been refactored to the following:

        1970-01-01 00:00:00 +0000 (UTC)

      That form is more consistent, logical, precise, and internationally
      recognizable than the other variants.

      Also, some wording has been altered as well.

spu_create.2
getopt.3
passwd.5
  Michael Kerrisk
    Global fix: s/non-existing/nonexistent/

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
utimensat.2
mkfifoat.3
  Michael Kerrisk
    Update feature test macro requirements
      Starting in glibc 2.10, defining _XOPEN_SOURCE >= 700,
      or _POSIX_C_SOURCE >= 200809 exposes the declarations
of
      these functions.

Changes to individual pages
----

clock_getres.2
  Michael Kerrisk
    Update text on nonsetabble CLOCK_*_CPUTIME_ID clocks
      SUSv3 permits, but does not require CLOCK_THREAD_CPUTIME_ID and

CLOCK_PROCESS_CPUTIME_ID to be settable.
See http://bugzilla.kernel.org/show_bug.cgi?id=11972.

execve.2
Colin Watson
Fix description of treatment of caught signals
Caught signals reset to their default on an execve() (not
to being ignored).

fcntl.2
Michael Kerrisk
s/F_OWNER_GID/F_OWNER_PGRP/
Peter Zijlstra took the name change I suggested.
Michael Kerrisk
Document F_[SG]ETOWN_EX; update details on F_SETOWN
Linux 2.6.32 adds F_SETOWN_EX and F_GETOWN_EX.
Linux 2.6.12 changed (broke) the former behavior of
F_SETOWN with respect to threads.

intro.2
intro.3
Michael Kerrisk
Make subsection
heading consistent with other intro.? pages
These pages used "Copyright Terms"; the other intro.? pages
used "Copyright Conditions". Make these pages like the others.

sendfile.2
Michael Kerrisk
Clarify behavior when 'offset' is NULL

seteuid.2
Michael Kerrisk
Note unstandardized behavior for effective ID
POSIX.1 doesn't require that the effective ID can be changed
to the same value it currently has (a no-op). The man page
should note this, since some other implementations
don't permit it.

setgid.2
Michael Kerrisk
Fix EPERM error description
s/effective group ID/real group ID/
This bug lived in man pages for 15 years before Jason
spotted it! I checked back in Linux 1.0, and the behavior
was as the fixed man page describes.

setreuid.2

Michael Kerrisk
Add more detail on POSIX.1 specification for these syscalls

setuid.2
Michael Kerrisk
Remove crufty statement that seteuid() is not in POSIX
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=569812

stime.2
strftime.3
tzset.3
zic.8
Michael Witten
GMT -> UTC (where appropriate)

sync_file_range.2
Christoph Hellwig
Add some big warnings re data integrity
This system call is by design completely unsuitable for any data
integrity operations. Make that very clear in the manpage.

CPU_SET.3
Vlastimil Babka
SYNOPSIS: Fix return types for CPU_COUNT_*()
These functions return 'int' not void'.

confstr.3
Michael Kerrisk
Fix feature test macro requirements

daemon.3
Michael Kerrisk
Fix description of 'nochdir' argument.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819

gethostbyname.3
Michael Kerrisk
Document feature test macro requirements for herror() and hstrerror()
Since glibc 2.8, one of _BSD_SOURCE,
_SVID_SOURCE,
or _GNU_SOURCE is required.

getline.3
Michael Kerrisk
Update to reflect that these functions were standardized in POSIX.1-2008

getnameinfo.3
Michael Kerrisk

Document feature test macros requirements for NI_MAXHOST and NI_MAXSERV
Since glibc 2.8, one of _BSD_SOURCE, _SVID_SOURCE, or _GNU_SOURCE
must be defined to obtain these definitions.

getopt.3
Jonathan Nieder
Fix feature test macro requirements

memchr.3
Michael Kerrisk
Add feature test macro requirements for memrchr()

nextafter.3
Michael Kerrisk
Fix notable error in DESCRIPTION.
"less than y" should be "less than x".

popen.3
Michael Kerrisk
Fix feature test macro requirements

pthread_attr_setdetachstate.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
Denis Barbier
Argument name is 'attr' not 'thread'
The function argument was misnamed in the DESCRIPTION
on these
three pages.

rtnetlink.3
Michael Kerrisk
Various fixes in example code
Edward reported a problem in the example code, where a variable
seems to be misnamed. Upon inspection, there seem to be a few
such instances, and this patch is my best guess at how things
should look.

sched_getcpu.3
Michael Kerrisk
Place correct header file in SYNOPSIS

sleep.3
Bill O. Gallmeister
sleep() puts calling *thread* to sleep (not calling *process*)

sleep.3
Bill O. Gallmeister

Add nanosleep(2) to SEE ALSO

strftime.3
Michael Kerrisk
%z is defined in SUSv3
So, substitute "GNU" tag in man page by "SU".

strftime.3
Michael Witten
Move 822-compliant date format example to EXAMPLES section
The RFC 822-compliant date format given in the description
of `%z' is now moved to the `EXAMPLES' section (note: `EXAMPLE'
has been
renamed `EXAMPLES').

Furthermore, that format example is now actually
RFC 822-compliant (using `%y' instead of `%Y') and has been
qualified as being correct only when in the context of at least
an English locale. Also, `%T' is used in place of `%H:%M:%S'.

For completeness, an RFC 2822-compliant format example has been
similarly added.

strftime.3
Michael Witten
Expand introductory text

strftime.3
Michael Witten
Clarification of %z specifier

string.3
Mark Hills
Add stpcpy() to this list of string functions

strptime.3
Michael Kerrisk
Initialize tm structure in example program

undocumented.3
Michael Kerrisk
Remove pages now documented
By now, the following are documented:

fopencookie(3)
freeifaddrs(3)
rawmemchr(3)
readdir_r(3)

getutmp(3)
getutmpx(3)
utmpxname(3)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819

group.5
Michael Kerrisk
s/passwd/password/
The page inconsistently used "passwd" and "password"
to refer to the same field.

capabilities.7
Michael Kerrisk
Update securebits discussion to use SECBIT_* flags

feature_test_macros.7
Michael Kerrisk
_POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE
Since glibc 2.10, _POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE

path_resolution.7
Michael Kerrisk
Add readlink(2) to SEE ALSO
Michael Kerrisk
Fix NAME line
The poorly constructed part preceding "\-" causes apropos
not to be able to find the subject.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=558300

signal.7
Michael Kerrisk
Fix discussion of SIGUNUSED
Clarify that this signal really is synonymous with SIGSYS.
See http://bugzilla.kernel.org/show_bug.cgi?id=14449

Apologies if I missed anyone!

New and rewritten pages
---

migrate_pages.2
  Andi Kleen
    New page documenting migrate_pages(2).
      Andi's text based on the move_pages.2 page;
      additional edits by mtk.
      migrate_pages(2) was new in Linux 2.6.16.

quotactl.2
  Jan Kara
    Major updates

      Update the page to consolidate information from the
      outdated man-pages quotactl.2 page and the quotactl.2
      page in the "quota-tools" package. The page in "quota-tools"
      has now been dropped by Jan Kara, so that there is just one
      canonical quotactl.2 page (in pan-pages).
  Michael Kerrisk
      Various other pieces added to the page by mtk.

Newly documented interfaces in existing pages
---

fcntl.2
  Michael Kerrisk
    Document F_SETPIPE_SZ and F_GETPIPE_SZ
      These commands, new in kernel 2.6.35, set and get the capacity
      of pipes.

madvise.2
  Andi Kleen
    Document MADV_HWPOISON
  Michael Kerrisk
    Added documentation of MADV_MERGEABLE and MADV_UNMERGEABLE
      These flags (used for Kernel Samepage Merging, KSM)
      are new in 2.6.32.
  Andi Kleen
    Document MADV_SOFT_OFFLINE
      This operation was added in
 Linux 2.6.33.

mmap.2
  Michael Kerrisk
    Document MAP_UNINITIALIZED flag
      New in Linux 2.6.33.

prctl.2
  Andi Kleen

Document the hwpoison prctls in 2.6.32

sched_setscheduler.2
Michael Kerrisk
Document SCHED_RESET_ON_FORK
New in Linux 2.6.32

umount.2
Michael Kerrisk
Document UMOUNT_NOFOLLOW
New in Linux 2.6.34.

mkstemp.3
Michael Kerrisk
Document mkstemps() and mkostemps()
These functions are new in glibc 2.11. They allow the template string to include a suffix after the "XXXXXX" string.

proc.5
Michael Kerrisk
Document /proc/sys/vm/memory_failure_early_kill
New in 2.6.32. Description based on the text in Documentation/sysctl/vm.txt.
Michael Kerrisk
Document /proc/sys/vm/memory_failure_recovery
New in Linux 2.6.32. Description based on the text in Documentation/sysctl/vm.txt.
Michael Kerrisk

Document /proc/sys/fs/pipe-max-size

socket.7
Jan Engelhardt
Document SO_DOMAIN and SO_PROTOCOL
These read-only socket options were new in Linux 2.6.32.

New and changed links
---

fstatvfs.2
Michael Kerrisk
Adjust link to point to Section 3

fstatvfs.3
statvfs.2
Michael Kerrisk
New link to page relocated to Section 3

mkstemps.3
mkostemps.3
  Michael Kerrisk
    New links to mkstemp.3
      mkstemp.3 now describes mkstemps(3) and mkostemps(3).

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
getline.3
  Michael Kerrisk
    Add 'L' to constants in feature test macro specifications
      Be consistent with POSIX, which uses constants such as 200809L.

Global changes
---

open.2
sync_file_range.2
umount.2
  Michael Kerrisk
    Global fix: s/filesystem/file system/

Changes to individual pages
---

fcntl.2
  Michael Kerrisk
    Note
 that glibc 2.11 papers over the kernel F_GETOWN bug
      Since version 2.11, glibc works around the kernel limitation for
      process groups IDs < 4096 by implementing F_GETOWN via F_GETOWN_EX.

futex.2
  Michael Kerrisk
    Various fixes in SEE ALSO

getpriority.2
nice.2
  Francesco Cosoleto
    Move renice from section 8 to section 1

getrusage.2
  Mark Hills

Add ru_maxrss
See kernel commit 1f10206.
Mark Hills
Description of maintained fields
These descriptions are taken from NetBSD 5.0's getrusage(2).
Michael Kerrisk
Enhanced description of various fields

mlock.2
Michael Kerrisk
/proc/PID/status VmLck shows how much memory a process has locked
After a note from Tom Swigg, it seems sensible mention VmLck here.

mount.2
Petr Uzel
Fix incorrect path

move_pages.2
Andi Kleen
Clarify includes/libraries

mremap.2
Michael Kerrisk
Clarify existence
of fifth argument.

msgctl.2
semctl.2
shmctl.2
Francesco Cosoleto
Move ipcs from section 8 to section 1

open.2
Michael Kerrisk
Remove ambiguity in text on NFS and O_EXCL.

poll.2
Michael Kerrisk
Fix discussion of ppoll() timeout argument
1. Rename ppoll)(_ argument to "timeout_ts" to distinguish it
from the poll() argument in the text.
2. More accurately describe the poll() call that is equivalent
to ppoll().

posix_fadvise.2
Michael Kerrisk
Add sync_file_range(2) under SEE ALSO

prctl.2
  Michael Kerrisk
    Correct PR_SET_KEEPCAPS description
      The "keep capabilities" flag only affects the treatment of
      permitted capabilities, not effective capabilities.
      Also: other improvements to make the PR_SET_KEEPCAPS text clearer.

select_tut.2
  Michael Kerrisk
    Fix bug in example program

sigaction.2
  Michael Kerrisk
    Add TRAP_BRANCH
 and TRAP_HWBKPT to si_code values for SIGTRAP
  Michael Kerrisk
    Rearrange text describing fields set by sigqueue(2)
  Michael Kerrisk
    Add details for signals sent by POSIX message queue notifications
  Michael Kerrisk
    Improve description of various siginfo_t fields
  Michael Kerrisk
    Add some details for SIGTRAP and si_trapno
  Andi Kleen
    Document hwpoison signal extensions

statfs.2
  Michael Kerrisk
    Bring statfs struct type declarations closer to glibc reality
  Fang Wenqi
    Add definition EXT4_SUPER_MAGIC = 0xEF53
  Michael Kerrisk
    Document f_frsize field.

statvfs.2
  Michael Kerrisk
    Move this page to section 3 (since it's a library call)

swapon.2
  Ivana Hutarova Varekova
    Note effect of CONFIG_MEMORY_FAILURE on MAX_SWAPFILES
      From 2.6.32, MAX_SWAPFILES is decreased by 1 if the kernel is
      built with CONFIG_MEMORY_FAILURE.

syscalls.2
  Michael Kerrisk

Bring system call list up to date with Linux 2.6.33
Michael Kerrisk
Fix kernel version number for utimes()

cproj.3
Michael Kerrisk
Note fix for C99 conformance in glibc 2.12.

crypt.3
Petr Baudis
Correct note on key portion significance
As Marcel Moreaux notes:

> The Linux manpage for crypt()[1] contains the following
> statement as the last sentence of the NOTES section:
>
> > In the SHA implementation the entire key is significant
> > (instead of only the first 8 bytes in MD5).
>
> It should probably say "DES" where it says "MD5" (and maybe
> "MD5/SHA" where it says "SHA"), because in MD5 password hashing,
> the entire key is significant, not just the first 8 bytes.

This patch fixes the wording.

fmemopen.3
Michael Kerrisk
Bug fix in example program

ftw.3
Michael Kerrisk
Note that if 'fn' changes
CWD, the results are undefined
Michael Kerrisk
Clarify description of fpath argument
As reported by Pierre Habouzit, 'fpath' is not relative
to 'dirpath'. It is either relative to the calling process's
current working directory (if 'dirpath' was relative), or it
is absolute (if 'dirpath' was absolute).

getaddrinfo.3
Christian Franke
Fix a field name mixup: s/ai_family/ai_flags/

getline.3
Robert Wohlrab
Remove unneeded check before free()
The manpage of getline shows an example with an extra NULL pointer

check before it calls free. This is unneeded according to free(3):

If ptr is NULL, no operation is performed.

This patch removes the "if" check.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572508

log.3
log10.3
log2.3
Jan Engelhardt
Add cross-references to other-base logarithmic functions

opendir.3
Petr Baudis
Specify feature test macro requirements for fdopendir(3)
Currently, there is no note on the fact that fdopendir() is
POSIX.2008-only.

openpty.3
Eric Blake
Use const as appropriate
Michael Kerrisk
Note glibc version that added "const" to function arguments
Michael Kerrisk
Explicitly note that these functions are not in POSIX

resolver.3
Michael Kerrisk
Fix declaration of dn_comp() in SYNOPSIS
Remove the second 'exp_dn' from the calling signature.

termios.3
Michael Kerrisk
Change NOFLSH text to speak of characters, not signals

core.5
Michael Kerrisk
Update description of coredump_filter
Kernel 2.6.24 added MMF_DUMP_ELF_HEADERS.
Kernel 2.6.28 added MMF_DUMP_HUGETLB_PRIVATE and
MMF_DUMP_HUGETLB_SHARED.

elf.5
Daisuke HATAYAMA
Document PN_XNUM extension
In linux-2.6.34-rc1, an ELF core extension was added; user-land

tools manipulating ELF core dump such as gdb and binutils has
already been modified before; so elf.5 needs to be modified
accordingly.

You can follow information on the ELF extension via the LKML post:
http://lkml.org/lkml/2010/1/3/103
Date Mon, 04 Jan 2010 10:06:07 +0900 (JST)
Subject ... elf coredump: Add extended numbering support

This Linux-specific extension was added in kernel 2.6.34.

Reviewed-by: Petr Baudis <pasky@suse.cz>

Michael Kerrisk
Remove EI_BRAND
As reported by Yuri Kozlov and confirmed by Mike Frysinger,
EI_BRAND is not in GABI
(http://www.sco.com/developers/gabi/latest/ch4.eheader.html)
It looks to be a BSDism
Michael Kerrisk
Remove words under '.note': "described below"
The existing text is broken, because there is
no '"Note Section" format' describe
below. Simplest
solution is to remove the words "described below".

filesystems.5
Jeff Barry
Add discussion of ntfs and ext4

proc.5
Michael Kerrisk
Simplify description of /proc/sys and /proc/sys/fs
In the description of these directories, there's no need
to list all the files and subdirectories that they contain;
that information is provided by the entries that follow.

services.5
Yuri Kozlov
Remove crufty reference to nonexistent BUGS section

capabilities.7
Michael Kerrisk
Document CAP_SYS_RESOURCE and F_SETPIPE_SZ
With CAP_SYS_RESOURCE, a process can increase pipe capacity above
/proc/sys/ps/pipe-max-size.
Michael Kerrisk
Add get_robust_list() info under CAP_SYS_PTRACE

Michael Kerrisk
Add MADV_HWPOISON under CAP_SYS_ADMIN

signal.7
Michael Kerrisk
Make a clearer statement about nonportable aspect of signal(2)
Make
a clearer statement that signal(2) is less portable for
establishing a signal handler.

socket.7
Michael Kerrisk
Use consistent language to describe read-only socket options

udp.7
Michael Kerrisk
Add FIONREAD warning.
Warn that FIONREAD can't distinguish case of a zero-length
datagram from the case where no datagrams are available.

mq_unlink.3
  Lnac Huard
    Fix return type in SYNOPSIS (s/mqd_t/int/)

recv.2
send.2
  Michael Kerrisk
    Remove obsolete reference to glibc version in NOTES

recv.2
send.2
  Nicholas Hunt
    Adjust type shown for msg_controllen to glibc reality
      This patch fixes the type of msg_controllen in the struct msghdr
      definition given in send.2 and recv.2 to match the definition in
      glibc and the kernel.

select.2
  Michael Kerrisk
    Update NOTES on old glibc pselect()
      Make it clear that modern glibc uses the kernel pselect()
      on systems where
 it is available.
      See https://bugzilla.kernel.org/show_bug.cgi?id=14411

statfs.2
  Guillem Jover
    Fix copy & paste error for __SWORD_TYPE definition

sysfs.2
  Michael Kerrisk
    Clarify that this syscall is obsolete.
      And strengthen recommendation to use /proc/filesystems instead.

write.2
  Michael Kerrisk
    Add EDESTADDRREQ error

a64l.3
  Peng Haitao
    Fix error in NOTES, s/a64l/l64a/

error.3
  Linus Nilsson
    Change "perror" to "strerror" in DESCRIPTION of error()

mq_send.3
  Michael Kerrisk
    Fix EAGAIN description (s/empty/full)

initrd.4
  Yuri Kozlov
    Fix IP address in explanation of NFS example

tzfile.5
  Michael Kerrisk
    Add information on version 2 format timezone files
      Updated using information from the tzcode 2010l release at
      ftp://elsie.nci.nih.gov/pub.
      (It's an open question whether or not a version of tzfile.5
      should live independently
 in man-pages. It was added to the
      man-pages set many years ago. For now, I'll follow a
      conservative course that causes least pain to downstream,
      by continuing to maintain a separate copy in man-pages.)

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=594219

    Fix decimal values in encoding tables
      Octal and hexadecimal values are right, but there are some
      off-by one errors in decimal values. Correct values are
      printed by this command:

        perl -pi -e 'if (s/^([0-7]+)\t([0-9]+)\t([0-9a-fA-F]+)//)
          {printf "%03o\t%d\t%s", hex($3), hex($3), $3;};' man7/*.7

Changes to individual
 pages
---

capget.2
  Michael Kerrisk
    SYNOPSIS: Remove unneeded "undef _POSIX_SOURCE"

fcntl.2
  Michael Kerrisk
    Add feature test macro requirements for F_GETOWN and F_SETOWN

fcntl.2
  Michael Kerrisk
    Note feature test macro requirements for F_DUPFD_CLOEXEC

getrlimit.2
  Michael Kerrisk
    Document units for RLIMIT_RTTIME limit
      This limit is in microseconds

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=596492

lseek.2
  Michael Kerrisk

Removed note about return type on ancient systems

mount.2
Michael Kerrisk
Definitions of various MS_* constants only appeared in glibc 2.12
See http://sourceware.org/bugzilla/show_bug.cgi?id=11235

stat.2
Michael Kerrisk
Update information on nanosecond timestamp fields
Update feature test macro requirements for exposing these fields.
Note that these fields are specified in POSIX.1-2008.

timer_create.2
Michael Kerrisk
Factor out generic material that was moved to new sigevent(7) page

aio_fsync.3
Michael Kerrisk
Add reference to new sigevent(7) page

atanh.3
Michael Kerrisk
glibc 2.10 fixed pole error bug
http://sourceware.org/bugzilla/show_bug.cgi?id=6759
was resolved.

cerf.3
Michael Kerrisk
Make it clearer that this function is unimplemented

cos.3
Michael Kerrisk
errno is now correctly set to EDOM on a domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780
was (silently) resolved.

expm1.3
Michael Kerrisk
errno is now correctly set to ERANGE on a range error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788
was (silently) resolved.

fmod.3
Michael Kerrisk
errno is now correctly set to EDOM for the x==inf domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6784

was (silently) resolved.

insque.3
  Michael Kerrisk
    Noted prev == NULL bug in glibc 2.4 and earlier
      As noted by Remi Denis-Courmont, glibc nowadays allows
      'prev' to be NULL, as required by POSIX for initializing
      a linear list. But in glibc 2.4 and earlier, 'prev' could
      not be NULL. Add a BUGS section noting this.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=551201
  Michael Kerrisk
    Added info on circular lists, and initializing circular lists
  Michael Kerrisk
    Added example program

lgamma.3
  Michael Kerrisk
    glibc 2.10 fixed pole error bug
      http://sourceware.org/bugzilla/show_bug.cgi?id=6777
      was (silently) resolved.

log2.3
  Matthew Flaschen
    log2() function does not conform to C89
      log2(), log2f(), and log2l() do not conform to C89.
      They are defined in C99. See http://flash-gordon.me.uk/ansi.c.txt
      and
http://www.schweikhardt.net/identifiers.html

mq_notify.3
  Michael Kerrisk
    Factor out generic material that was moved to new sigevent(7) page

pow.3
  Michael Kerrisk
    errno is now correctly set to ERANGE on a pole error
      http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776
      was (silently) resolved.

pthread_kill_other_threads_np.3
  Michael Kerrisk
    CONFORMING TO: Note meaning of "_np" suffix

rand.3
  Michael Kerrisk
    Clarify description of range of returned value
  Michael Kerrisk

Add an example program
Michael Kerrisk
Expand description of rand_r()

random.3
W. Trevor King
Update initstate() return value description to match glibc

readdir.3
Michael Kerrisk
Clarify that "positive error numbers" are listed in ERRORS

rexec.3
Michael Kerrisk
SYNOPSIS: Add header file and feature test macro requirements

sigpause.3
Michael Kerrisk
Correct discussion of
when BSD vs SysV version is used in glibc

sin.3
Michael Kerrisk
errno is now correctly set to EDOM on a domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781
was (silently) resolved.

tan.3
Michael Kerrisk
errno is now correctly set to EDOM on a domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782
was (silently) resolved.

wcscasecmp.3
wcsncasecmp.3
wcsnlen.3
Michael Kerrisk
Added VERSIONS section

boot.7
Yuri Kozlov
Update list of major Linux distributions

feature_test_macros.7
Michael Kerrisk
Make text on required placement of macros more prominent
Move the text that notes the requirement that feature test macros
must be defined before including any header files to the top of

the page, and highlight the text further, so that the reader will
not miss this point.

pthreads.7
signal.7
  Michael Kerrisk
    Add SEE ALSO reference to new sigevent(7) page

tcp.7
  Michael Kerrisk
    Clarify header file details for SIOCINQ and SIOCOUTQ
      Also note synonymous FIONREAD and TIOCOUTQ.

gai_cancel.3
gai_error.3
gai_suspend.3
  Petr Baudis
    New links to new getaddrinfo_a.3 page

error_one_per_line.3
  Michael Kerrisk
     Fix misnamed link file (was error_on_per_line.3)

execvpe.3
  Michael Kerrisk
    New link to exec.3

sigstack.3
  Michael Kerrisk
    New link to sigaltstack.2
      No new programs should use sigstack(3). Point the user to the
      better sigaltstack(2), whose man page briefly mentions sigstack(3).

vlimit.3
  Michael Kerrisk
    New link to getrlimit.2
      No new programs should
 use vlimit(3). Point the user to the
      better setrlimit(2), whose man page briefly mentions vlimit(3).

vtimes.3
  Michael Kerrisk
    New link to getrusage.2

No new programs should use vtimes(3). Point the user to the
better getrusage(2), whose man page briefly mentions vtimes(3).

Global changes

Various pages
  Michael Kerrisk
    Switch to American usage: "-wards" ==> "-ward"
      American English uses "afterward" in preference to "afterwards",
      and so on

chdir.2
chmod.2
chown.2
gethostname.2
getsid.2
pread.2
setpgid.2
sigaltstack.2
stat.2
truncate.2
wait.2
dirfd.3
getsubopt.3
mkdtemp.3
mkstemp.3
siginterrupt.3
strdup.3
  Michael Kerrisk
    Simplify feature test macro requirements

Changes to individual pages
---

getrlimit.2
  Michael Kerrisk
    Add mention of the ancient vlimit() function

getrusage.2
  Michael Kerrisk
    Add mention of the ancient vtimes()
 function

io_cancel.2
io_destroy.2

io_getevents.2
io_setup.2
io_submit.2
  Michael Kerrisk
    SEE ALSO: add aio(7)

sched_setscheduler.2
  Michael Kerrisk
    ERRORS: note that NULL 'param' yields EINVAL

stat.2
  Michael Kerrisk
    Note feature test macro requirements for blkcnt_t and blksize_t

timer_create.2
  Michael Kerrisk
    Standardize on name 'sevp' for sigevent argument

truncate.2
  Michael Kerrisk
    Correct and simplify ftruncate() feature test macro requirements
      The glibc 2.12 feature test macro requirements for ftruncate() are
      buggy; see http://sourceware.org/bugzilla/show_bug.cgi?id=12037.
      Corrected the requirements in the SYNOPSIS, and added a BUGS
      section describing the problem in glibc 2.12.

aio_cancel.3
  Michael Kerrisk
    Add pointer to aio(7) for example program
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008;
 add VERSIONS section

aio_error.3
  Michael Kerrisk
    Wording improvements in RETURN VALUE
    Add pointer to aio(7) for example program
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_fsync.3
  Michael Kerrisk
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_read.3
  Michael Kerrisk
    Various minor rewordings and additions

Add pointer to sigevent(7) for details of notification of I/O completion
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_return.3
Michael Kerrisk
Improve description in RETURN VALUE
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the
aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_suspend.3
Michael Kerrisk
Various additions and rewordings.
Give some arguments more meaningful names.
More explicitly describe the 'nitems' argument.
Explicitly note that return is immediate if an I/O operation
has already completed.
Note that aio_error(3) should be used to scan the aiocb list
after a successful return.
Add references to other relevant pages.
Various other pieces rewritten.
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_write.3
Michael Kerrisk
Add pointer to sigevent(7) for details of notification of I/O completion
Various minor rewordings and additions
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008;
add VERSIONS section

clearenv.3
Michael Kerrisk
Fix error in feature test macro requirements

dysize.3
Michael Kerrisk
Remove crufty statement about old SCO bug

exec.3
Michael Kerrisk
Add feature test macro requirements for execvpe()
Rewrite description of PATH and mention _CS_PATH
Note execvp() and execlp() behavior for filename containing a slash

getaddrinfo.3
  Michael Kerrisk
    Add SEE ALSO reference to new getaddrinfo_a.3 page

gethostbyname.3
  Michael Kerrisk
    Fix formatting of feature test macros

getw.3
  Michael Kerrisk
    Fix feature test macros

malloc.3
  Landijk
    Remove editorializing comments on memory overcommitting
      See https://bugzilla.kernel.org/show_bug.cgi?id=19332
  Michael Kerrisk
    Various minor reorganizations and wording fix-ups

mq_notify.3
  Michael Kerrisk
    Standardize on name 'sevp' for sigevent argument

nl_langinfo.3
  Michael Haardt
     Make it clear that nl_langinfo() interacts with setlocale()
    Add an example program

posix_openpt.3
  Michael Kerrisk
    Fix feature test macro requirements

rand.3
  Michael Kerrisk
    Remove duplicate #include in example program

strtok.3
  Petr Baudis
    Add reference to strtok() example in getaddrinfo(3)

inotify.7
  Michael Kerrisk
    Added section noting limitations and caveats of inotify

sigevent.7
  Michael Kerrisk
    Add SEE ALSO reference to new getaddrinfo_a.3 page

Add SEE ALSO referring to new aio(7) page

suffixes.7
Michael Kerrisk
Change explanation of ".rpm" to "RPM software package"

========== Changes in man-pages-3.29 ==========

Released: 2010-10-19, Detroit

Apologies if I missed anyone!

New and rewritten pages
---

subpage_prot.2
Michael Kerrisk
New page documenting the PowerPC-specific subpage_prot(2)

aio_init.3
Michael Kerrisk
New page documenting aio_init(3)

Newly documented interfaces in existing pages

---

posix_fadvise.2
  Michael Kerrisk
    Document the architecture-specific arm_fadvise64_64() system call
      This ARM-specific system call fixes the argument ordering
      for that architecture. Since Linux 2.6.14.

sync_file_range.2
   Michael Kerrisk
    Document the architecture-specific sync_file_range2() system call
      As described in commit edd5cd4a9424f22b0fa08bef5e299d41befd5622,
      the sync_file_range() argument order is broken for some
      architectures (PowerPC, ARM, tile). The remedy was a different
      system call using the right argument order on those architectures.

psignal.3
  Guillem Jover
    Document psiginfo()
      psiginfo() was added to glibc in version 2.10.
  Michael Kerrisk
    Add details, VERSIONS, and BUGS for psiginfo()

ip.7
  Balazs Scheidler
    Document IP_RECVORIGDSTADDR
    Document IP_TRANSPARENT
  Michael Kerrisk
    Document IP_FREEBIND
      Text based on input from Lennart Poettering and Balazs Scheidler.
      See https://bugzilla.kernel.org/show_bug.cgi?id=20082

New and changed links

    New link to posix_fadvise.2

psiginfo.3
  Guillem Jover
    New link to psignal.3

Global changes

Many pages
  Michael Kerrisk
    global fix: s/Unix/UNIX/
      The man pages were rather inconsistent in the use of "Unix"
      versus "UNIX". Let's go with the trademark usage.

Various pages
  Michael Kerrisk
    Global fix: s/pseudo-terminal/pseudoterminal/

grantpt.3, ptsname.3, unlockpt.3, pts.4
  Michael Kerrisk
    Global fix: s/pty/pseudoterminal/

recv.2, cmsg.3, unix.7
  Michael Kerrisk
    global fix: s/UNIX socket/UNIX domain socket/

fmtmsg.3, gethostbyname.3, termios.3
  Michael Kerrisk
    Global fix: s/Unixware/UnixWare/

Changes to individual pages
---

inotify_rm_watch.2
  Michael Kerrisk
    SYNOPSIS: fix type of 'wd' argument

posix_fadvise.2
   Michael Kerrisk
    Rewrite VERSIONS, noting that the system call is fadvise64()

syscalls.2
  Michael Kerrisk
    Add the PowerPC-specific subpage_prot() system call
    Add sync_file_range2()

truncate.2
  Michael Kerrisk
    Fix feature test macros

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
  Michael Kerrisk
    SEE ALSO: Add lio_listio(3)

gai_cancel.3
gai_error.3
gai_suspend.3
  Michael Kerrisk
    Make these into links
      In the previous release, these files were accidentally made copies
      of getaddrinfo_a.3, instead of being made as link files.

getifaddrs.3
  Thomas Jarosch
    Prevent possible NULL pointer access in example program

malloc.3
  Michael Kerrisk
    Emphasize that malloc() and realloc() do not initialize allocated memory

malloc_hook.3
  Ivana Varekova
    Warn that these functions are deprecated

strcpy.3
  Michael Kerrisk
    Formatting
 fixes in strncpy() example implementation code

ip.7
  Michael Kerrisk
    Reword NOTES on Linux-specific options

sigevent.7
  Michael Kerrisk
    SEE ALSO: Add aio_read(3), aio_write(3), and lio_listio(3)

unix.7

Michael Kerrisk
Document the autobind feature
Michael Kerrisk
Fix description of abstract socket names
As reported by Lennart Poettering:
The part about "abstract" sockets is misleading as it suggests
that the sockaddr returned by getsockname() would necessarily
have the size of sizeof(struct sockaddr), which however is not
the case: getsockname() returns exactly the sockaddr size that
was passed in on bind(). In particular, two sockets that are
bound to the same sockaddr but different sizes are completely
independent.
See https://bugzilla.kernel.org/show_bug.cgi?id=19812
Michael Kerrisk

Fix description of "pathname" sockets
As reported by Lennart Poettering:
The part about "pathname" sockets suggests usage of
sizeof(sa_family_t) + strlen(sun_path) + 1
for calculating the sockaddr size. Due to alignment/padding
this is probably not a good idea. Instead, one should use
offsetof(struct sockaddr_un, sun_path) + strlen() + 1
or something like that.
See https://bugzilla.kernel.org/show_bug.cgi?id=19812

========== Changes in man-pages-3.30 ==========

Released: 2010-11-01, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Bernhard Walle <bernhard@bwalle.de>
David Prevot <davidp@altern.org>
Eric W. Biederman <ebiederm@xmission.com>
Florian Lehmann <flo.lehmann@googlemail.com>

Apologies if I missed anyone!

New and rewritten pages
---

kexec_load.2
  Andi Kleen
    New page documenting kexec_load(2)
  Michael Kerrisk
    Add license
  Michael Kerrisk
    Incorporate fixes from Eric W. Biederman
      Eric noted that a few instances of "virtual" should
      be "physical" and noted:

        There is an expectation that at hand off from sys_kexec that
        virtual and physical addresses will be identity mapped. But
        this isn't the old Alpha booting convention where you have
        a virtual address and then you have to parse the page table
        to figure out where your kernel was actually loaded.
  Michael
 Kerrisk
    Additions and edits by mtk
      Various wording and layout improvements.
      Fixed the name of a constant: s/KEXEC_ARCH_I386/KEXEC_ARCH_386/.
      Added RETURN VALUE and ERRORS sections.
      Added VERSIONS section
      Note that CONFIG_KEXEC is needed
      Removed details of using syscall; the reader can find them in
      syscall(2).
      Added some details for KEXEC_PRESERVE_CONTEXT.
      Revised the text mentioning the kernel header, since it is
      not yet exported, and it's not certain that it will be.

lio_listio.3
  Michael Kerrisk
    New page documenting lio_listio(3)

Newly documented interfaces in existing pages
---

reboot.2

Andi Kleen
Document LINUX_REBOOT_KEXEC
Some fix-ups by Michael Kerrisk
Michael Kerrisk
Place 'cmd' values in alphabetical order.

unshare.2
Michael Kerrisk
Document
CLONE_NEWIPC
Michael Kerrisk
Document CLONE_NEWNET
Lucian Adrian Grijincu
Improve description of CLONE_NEWNET
CLONE_NEWNET creates a new network namespace from scratch.
You don't have anything from the old network namespace in
the new one. Even the loopback device is new.
Michael Kerrisk
Document CLONE_SYSVSEM
Michael Kerrisk
Document CLONE_NEWUTS
Michael Kerrisk
Relocate discussion of CAP_SYS_ADMIN to CLONE_NEWNS section
And rewrite the EPERM description to be more general in
preparation for the new flags to be documented.

Global changes

Various pages
Michael Kerrisk
Add reference to feature_test_macros(7)
Some pages simply list feature test macro requirements in
the form:

#define #GNU_SOURCE
#include <someheader.h>

For these pages, add a "See feature_test_macros(7)"
comment
on the "#define" line.

Various pages
Michael Kerrisk
SEE ALSO: Remove redundant reference to feature_test_macros(7)

Various pages

David Prevot
Use greater consistency in NAME line
(Remove definite article at start of descriptive clause.)

Various pages
Michael Kerrisk
SEE ALSO: Place entries in correct order

Various pages
Michael Kerrisk
ERRORS: Place entries in correct order

Various pages
Michael Kerrisk
Add section number to references to functions documented in other pages

Various pages
Michael Kerrisk
Remove redundant section number in page references
Remove section number in function references that are for
functions documented on this page.

armscii-8.7

iso_8859-13.7
iso_8859-14.7
koi8-u.7
David Prevot
Capitalize hexadecimal numbers

Changes to individual pages
---

access.2
Michael Kerrisk
Note use of faccessat(2) for checking symbolic link permissions
Michael Kerrisk
Give an example of a safer alternative to using access()

clone.2
Michael Kerrisk
Clarify when CLONE_NEWNET implementation was completed

faccessat.2
  Michael Kerrisk
    Note that faccessat() is racy

fcntl.2
  Michael Kerrisk
    RETURN VALUE: Improve description of F_GETFD and F_GETFL

inotify_add_watch.2
  Michael Kerrisk
    Document ENOENT error

mlock.2
  Michael Kerrisk
    Improve wording describing /proc/PID/status /VmLck field
  Michael Kerrisk
    shmctl() SHM_LOCKed memory is not included in VmLck

reboot.2
  Michael Kerrisk
    Place 'cmd' values in alphabetical order

subpage_prot.2
  Michael Kerrisk
    Change 1-line page description
  Michael Kerrisk
    Improvements after review by Paul Mackerras

timer_settime.3
  Michael Kerrisk
    Remove redundant
 SEE ALSO reference

euidaccess.3
  Michael Kerrisk
    Note the use of faccessat(2) to operate on symbolic links
  Michael Kerrisk
    Note that the use of euidaccess() is racy

fenv.3
  Michael Kerrisk
    Clarify wording relating to glibc version

getgrent.3
getgrent_r.3
getgrnam.3
  Michael Kerrisk

Refer reader for group(5) for more info on group structure

getopt.3
Bernhard Walle
Use constants in getopt_long() example
The description of getopt_long() mentions the constants
required_argument, no_argument and optional_argument.
Use them in the example to make the code easier to understand.

getpw.3
Michael Kerrisk
Change comment describing pw_gecos

getpw.3
getpwent.3
getpwent_r.3
Michael Kerrisk
Refer reader to passwd(5) for more info on the passwd structure

getpwent.3
getpwnam.3
Michael Kerrisk
Note that pw_gecos is not in POSIX
And change the comment describing
this field

getpwent_r.3
Michael Kerrisk
Change comment describing pw_gecos

getpwnam.3
Michael Kerrisk
Some rewording and restructuring

sched_getcpu.3
Michael Kerrisk
Fix feature test macro requirements

strnlen.3
Michael Kerrisk
Fix feature test macro requirements

group.5
Michael Kerrisk
Various minor rewordings

hosts.5
protocols.5

spufs.7
termio.7
  David Prevot
    Remove definite article from NAME section
      Please find inline another tiny patch in order to shrink
      the definite article from some other pages (found with
      "rgrep -i ' \\\- the' man*").

passwd.5
  Michael Kerrisk
    Various minor rewordings

proc.5
  Michael Kerrisk
    Add reference to mlock(2) for further info on /proc/PID/status VmLck

armscii-8.7
  David Prevot
    Write the character set name as ArmSCII

cp1251.7
  David Prevot
    Capitalize hexadecimal numbers

ip.7
  David Prevot
     Fix name of socket option: s/IP_TTL/IP_TRANSPARENT/
  David Prevot
    Place socket options in alphabetical order

koi8-r.7
  David Prevot
    Fix special character names
      Comparing to koi8-u.7, I noticed some inconsistencies in special
      character names. After checking with the following Unicode related
      pages, please find inline (and gzipped attached, hopefully not
      messing with encoding), a patch in order to make it right, on an
      Unicode point of view.

      http://www.unicode.org/charts/PDF/U2500.pdf
      http://www.unicode.org/charts/PDF/U25A0.pdf
      http://www.unicode.org/charts/PDF/U0080.pdf
      http://www.unicode.org/charts/PDF/U1D400.pdf
  David Prevot
    Fix SEE ALSO reference and letter names
      The koi8-r(7) (Russian Net Character Set) manual page refers
      to iso-8859-7(7) manual page, which is the Latin/Greek one.
      I guess it should

refer instead to the iso-8859-5(7)
(Latin/Cyrillic) one. This is addressed at the end of the patch.

It has also been spotted that letter names are different in
this manual page and in the Unicode related page [0], the
first part of the page address this.

0: http://www.unicode.org/charts/PDF/U0400.pdf

man-pages.7
Michael Kerrisk
Update example
The old example used the chmod(2) man page, but the
feature test macro requirements on that page had changed.
Update to use an example from a different page (acct(2),
whose feature test macro requirements are probably unlikely
to change in the future).

========== Changes in man-pages-3.31 ==========

Released: 2010-11-12, Munich

Contributors

  Michael Kerrisk
    Add notes on fcntl64()

fstatat.2
  Michael Kerrisk
    Add NOTES on fstatat64(), the name of the underlying system call

getdents.2
  Michael Kerrisk
    Added notes on getdents64()

getgid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getgroups.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getpagesize.2
  Michael Kerrisk
    Improve description of getpagesize()
      Improve description of getpagesize() and relocate discussion
      of sysconf(_SC_PAGESIZE).

      In part inspired by
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=537272

getresuid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getrlimit.2
  Michael Kerrisk
    Add example program for prlimit()

getuid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

open.2
  Ivana Hutarova Varekova
    O_EXCL can be used without O_CREAT for block devices
      Since Linux 2.6 there is a possibility to use O_EXCL without
      O_CREAT. See patch: http://lkml.org/lkml/2003/8/10/221.

pread.2
  Michael Kerrisk
    Add notes on pread64() and pwrite64()
      See https://bugzilla.kernel.org/show_bug.cgi?id=23072
  Michael Kerrisk
    SEE ALSO: add readv(3)

readv.2
  Michael Kerrisk
    Wording fix: readv() and writev() are system calls, not functions

sendfile.2
  Michael Kerrisk
    Add notes on sendfile64()

setfsgid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls
 added in Linux 2.4

setfsuid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

setgid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

setresuid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

setreuid.2
  Michael Kerrisk

Add NOTES explaining 32-bit system calls added in Linux 2.4

setuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

sigqueue.2
pthreads.7
signal.7
Michael Kerrisk
SEE ALSO: Add pthread_sigqueue(3)

stat.2
Michael Kerrisk
Fix EOVERFLOW error description
2<<31 should read 1<<31 (which equals 2^31).

statfs.2
Michael Kerrisk
Add notes on statfs64() and fstatfs64()

swapon.2
Hugh Dickins
Document SWAP_FLAG_DISCARD and discarding of swap pages

truncate.2
Michael Kerrisk
Add notes on truncate64() and ftruncate64()

memcpy.3
Michael Kerrisk
Change "should not overlap" to "must not overlap"
glibc 2.12 changed things so that applications that use memcpy() on
overlapping regions will encounter problems. (The standards have
long said that the behaviors is undefined if the memory areas
overlap.)

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=603144
In reference of http://lwn.net/Articles/414467/
and http://article.gmane.org/gmane.comp.lib.glibc.alpha/15278

usleep.3
Petr Uzel
usleep() suspends calling thread, not process

core.5
Michael Kerrisk
Change single quote to double quote in shell session example

The example section has a sample shell session containing:

echo '|$PWD/core_pattern_pipe_test %p UID=%u GID=%g sig=%s'

But $PWD won't be expanded in single quotes. It should be double quotes around the entire argument or some other form.

pthreads.7
Michael Kerrisk
Added description of async-cancel-safe functions

unix.7
Michael Kerrisk
Reworded the text of various errors
Michael Kerrisk
Added ENOENT error

========== Changes in man-pages-3.33 ==========

Released: 2011-09-16, Munich

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

sync.2
  Michael Kerrisk
    Added new syncfs() system call
      syncfs() was added in Linux 2.6.39.

New and changed links
---

syncfs.2
  Michael Kerrisk
    New link for sync(2).

Global changes

Various pages
  Simon Paillard
    Global fix: properly escape minus sign

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Note that CLONE_STOPPED was removed in 2.6.38

execve.2
  Michael Kerrisk [Sebastian Geiger]
    Note that the first argv[] value should contain name of executable

fcntl.2
  Michael Kerrisk [Reuben Thomas]
    Note that F_GETFL also retrieves file access mode

getrlimit.2
  Michael Kerrisk [Ryan Mullen]
    Remove mention of kernel versions in discussion of RLIMIT_CPU
  Michael Kerrisk [Seonghun Lim]
    Fix example program and add _FILE_OFFSET_BITS requirement

mlock.2
  Michael Kerrisk [Brian M.
 Carlson]
    Clarify EINVAL error
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?625747
  Michael Kerrisk [Seonghun Lim]
    Simplify and correct text for EPERM error

mprotect.2
  Seonghun Lim
    Fix off-by-one error in a memory range
  Seonghun Lim
    Fix small bug in example program
      The description of the example program says that it makes the
      third page "read-only". Thus use PROT_READ instead of PROT_NONE.

open.2
  Folkert van Heusden
    Remove text describing O_CLOEXEC as Linux-specific
      O_CLOEXEC is specified in POSIX.1-2008, as noted
      elsewhere in the page.

readlink.2
  Michael Kerrisk [Dan Jacobson]
    SEE ALSO: Add readlink(1)

sendfile.2
  Akira Fujita
    Since 2.6.33, 'out_fd' can refer to any file type
      Linux kernel commit cc56f7de7f00d188c7c4da1e9861581853b9e92f
      meant sendfile(2) can work with any output file.
  Michael Kerrisk
    Shift
 text on falling back to read()/write() to NOTES
  Michael Kerrisk [Tolga Dalman]
    Remove mention of kernel version for 'in_fd' argument
  Tolga Dalman
    Add an explicit reference to splice(2)
      Unlike sendfile(), splice() can transfer data
      between a pair of sockets.

sigaction.2
  Michael Kerrisk [Tolga Dalman]
    Add a little info about ucontext_t

stat.2
  Michael Kerrisk [Jon Grant]
    Small rewording of ENAMETOOLONG error

sync.2
  Michael Kerrisk
    Some rewrites to description of sync()

syscalls.2
  Michael Kerrisk
    Added fanotify_init() and fanotify_mark() to syscall list
  Michael Kerrisk
    Added new 2.6.39 system calls
  Michael Kerrisk
    Updated for Linux 3.0 system calls
  Michael Kerrisk
    Update kernel version at head of syscall list
  Michael Kerrisk
    Update to mention 3.x kernel series

syslog.2
  Michael Kerrisk [Serge E. Hallyn]
    Update for kernel 2.6.37
 changes
      Document /proc/sys/kernel/dmesg_restrict.
      Document CAP_SYSLOG.

time.2

Michael Kerrisk [Alexander Schuch]
NOTES: Fix description of "Seconds since the Epoch"

timerfd_create.2
Michael Kerrisk [Josh Triplett]
Note behavior when timerfd_settime() old_value is NULL
See http://bugs.debian.org/cgi-bin/bugreport.cgi?641513
Tomislav Jonjic
Fix small error in description of timerfd_settime()

truncate.2
Seonghun Lim
Remove redundant EINTR description

unlink.2
Hendrik Jan Thomassen
Improve EBUSY description

cacos.3
cacosh.3
catan.3
catanh.3
Michael Kerrisk [Richard B. Kreckel, Andries Brouwer]
Fix formula describing function
The man pages for cacos(), cacosh(), catan(), catanh()
contain incorrect formulae describing the functions.

cacos.3
Michael Kerrisk
Add example program

cacosh.3
Michael Kerrisk
Add example program

cacosh.3
casinh.3
catan.3
catanh.3
Michael Kerrisk
SEE ALSO: Add reference to inverse function

catan.3
Michael Kerrisk
Add example program

catanh.3
Michael Kerrisk

Add example program

ccos.3
ccosh.3
csin.3
csinh.3
ctan.3
ctanh.3
Michael Kerrisk
SEE ALSO Add reference to "arc" inverse function

cexp.3
Michael Kerrisk
SEE ALSO: add cexp(3)

clog.3
Michael Kerrisk
SEE ALSO: Add reference to clog(2)

crypt.3
Michael Kerrisk [Jan Engelhardt]
Fix header file and feature test macro requirements for crypt_r()

err.3
Seonghun Lim
Clean up description of error message source
In the second paragraph of DESCRIPTION section, one of the
sources of error messages is incorrect: the four functions obtain
error message only from errno, and "a code" is just relevant
with errc() and warnc(), which are not present on Linux.
see http://www.unix.com/man-page/freebsd/3/ERR/
.

Then, the third paragraph becomes a duplicate.

fflush.3
Regid Ichira
Fix wording error
See http://bugs.debian.org/cgi-bin/bugreport.cgi?614021

hsearch.3
Seonghun Lim
Update ERRORS section
EINVAL can occur for hdestroy_r().
EINVAL can't occur for hcreate().
Other minor fixes.

lockf.3

Michael Kerrisk [Mikel Ward]
ERRORS: EBADF can also occur for nonwritable file descriptor
As noted in the DESCRIPTION, the file descriptor must be writable
in order to place a lock.

malloc.3
Seonghun Lim
Reorder prototypes in SYNOPSIS
calloc() comes before realloc() in the other sections,
so should do in SYNOPSIS, too.

mbstowcs.3
Michael Kerrisk
SEE ALSO: add reference to wcstombs(3)

memcmp.3
Michael Kerrisk [Sebastian Unger]
Clarify that comparison interprets bytes as "unsigned char"

realpath.3
Michael
Kerrisk [Seonghun Lim]
Fix EINVAL error
Since glibc 2.3, resolved_path can be non-NULL (with the
semantics already documented in the page).

scandir(3)
Mike Frysinger
Add ENOENT/ENOTDIR errors

siginterrupt.3
Michael Kerrisk [Luis Javier Merino]
Remove misleading sentence about signal(2) and system call interruption

strlen.3
Michael Kerrisk [Jon Grant]
SEE ALSO: Add strnlen(3)

strnlen.3
Michael Kerrisk [Jon Grant]
CONFORMING TO: Note that strnlen() is in POSIX.1-2008

strtoul.3
Michael Kerrisk [Tolga Dalman]
Fix NOTES section constants

termios.3
Michael Kerrisk

Use "terminal special characters" consistently throughout page
Michael Kerrisk [Paul Evans]
Add documentation of _POSIX_VDISABLE
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=627841
Michael Kerrisk
Add a description of STATUS character
Michael Kerrisk
Added description
of SWTCH character
Michael Kerrisk
Add names of terminal special characters
Michael Kerrisk
List terminal special characters in alphabetical order

wcstombs.3
Michael Kerrisk
SEE ALSO: add mbstowcs(3)

console_codes.4
Petr Pisar
Add ESC [3 J
Linux 3.0 (commit f8df13e0a901fe55631fed66562369b4dba40f8b)
implements \E[3J to allow scrambling content of console
including scroll-back buffer
(http://thread.gmane.org/gmane.linux.kernel/1125792).

proc.5
Michael Kerrisk [Stan Sieler]
Add description of 'PPid' field of /proc/PID/status
Michael Kerrisk [Stan Sieler]
Add description of 'SigQ' field of /proc/PID/status

capabilities.7
Michael Kerrisk [Serge E. Hallyn]
Document CAP_SYSLOG and related changes in Linux 2.6.37
Michael Kerrisk
File capabilities are no longer optional
Starting with Linux 2.6.33, the CONFIG_SECURITY_FILE_CAPABILITIES
has been removed, and file capabilities are always part of the
kernel.

complex.7
Michael Kerrisk
Updated SEE ALSO list to include all complex math functions

ipv6.7
Michael Kerrisk [Simon Cross]
Fix description of address notation: "8 4-digit hexadecimal numbers"

signal.7
  Seonghun Lim
    Remove crufty repeated info about LinuxThreads

unix.7
  Michael Kerrisk
    Add pointer to cmsg(3) for an example of the use of SCM_RIGHTS

========== Changes in man-pages-3.34 ==========

Released: 2011-09-23, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Alan Curry <pacman@kosh.dhis.org>
Benjamin Poirier <benjamin.poirier@gmail.com>
Brian M. Carlson <sandals@crustytoothpaste.net>
David Howells <dhowells@redhat.com>
David Prévot <taffit@debian.org>
Denis
 Barbier <bouzim@gmail.com>
Doug Goldstein <cardoe@cardoe.com>
Eric Blake <eblake@redhat.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Neil Horman <nhorman@tuxdriver.com>
Paul Pluzhnikov <ppluzhnikov@google.com>
Reuben Thomas <rrt@sc3d.org>
Stefan Puiu <stefan.puiu@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Stephen Cameron <scameron@beardog.cce.hp.com>
Sunil Mushran <sunil.mushran@oracle.com>

Apologies if I missed anyone!

New and rewritten pages
---

rt_sigqueueinfo.2
  Michael Kerrisk [Stephan Mueller]
    New page for rt_sigqueueinfo(2) and rt_tgsigqueueinfo(2)
      This replaces the previous '.so' man page link file for
      rt_sigqueueinfo.2, which linked to this sigqueue() man page.

cciss.4
  Stephen M. Cameron
    New man page for cciss driver
      I obtained the information in this man page as a consequence
      of having worked on
 the cciss driver for the past several years,
      and having written considerable portions of it.
  Michael Kerrisk
    Copyedit by mtk

hpsa.4
  Stephen M. Cameron
    New man page for the hpsa driver
      I obtained the information in this man page as a consequence
      of being the main author of the hpsa driver.
  Michael Kerrisk
    Copyedits my mtk

Newly documented interfaces in existing pages
----

fstatat.2
  Michael Kerrisk [David Howells]
    Document AT_NO_AUTOMOUNT
      This flag was added in Linux 2.6.38.

lseek.2
  Michael Kerrisk [Eric Blake, Sunil Mushran]
    Document SEEK_HOLE and SEEK_DATA
      These flags, designed for discovering holes in a file,
      were added in Linux 3.1. Included comments from Eric
      Blake and Sunil Mushran.

madvise.2
  Doug Goldstein
    Add MADV_HUGEPAGE and MADV_NOHUGEPAGE
      Document the MADV_HUGEPAGE
 and MADV_NOHUGEPAGE flags added to
      madvise() in Linux 2.6.38.

New and changed links
---

rt_tgsigqueueinfo.2
  Michael Kerrisk
    New link to new rt_sigqueueinfo.2 page

sigqueue.2
  Michael Kerrisk
    Create link to page that was relocated to section 3

Global changes

Various pages
  Michael Kerrisk
    Change reference to "sigqueue(2)" to "sigqueue(3)"

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    ERRORS: Add EPERM and ESPIPE errors

lseek.2
  Michael Kerrisk [Alan Curry, Reuben Thomas]
    Remove suspect note about 'whence' being incorrect English

prctl.2
  Paul Pluzhnikov
    PR_SET_DUMPABLE makes process non-ptrace-attachable

readlink.2
  Guillem Jover
    Document using st_size to allocate the buffer
  Michael Kerrisk
    Added copyright text + changelog note for Guillem Jover's patch

sched_setscheduler.2
  Michael Kerrisk

    Document 2.6.39 changes to rules governing changes from SCHED_IDLE policy
      Since Linux 2.6.39, unprivileged processes under the
      SCHED_IDLE policy can switch to another nonrealtime
      policy if their nice value falls within the range

permitted by their RLIMIT_NICE limit.

tkill.2
  Michael Kerrisk
    SEE ALSO: Add rt_sigqueueinfo (2)

btowc.3, wctob.3
  Michael Kerrisk [Brian M. Carlson]
    Add pointers to better, thread-safe alternative functions
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=606899

fwide.3
  Michael Kerrisk
    Add _ISOC95_SOURCE to feature test macro requirements
      Since glibc 2.12, _ISOC95_SOURCE can also be used to expose
      prototype of this function.

index.3
  Michael Kerrisk [Jon Grant]
    Fix text mentioning terminating null

pthread_sigqueue.3
  Michael Kerrisk
    Replace explicit mention of rt_tgsigqueueinfo() with SEE ALSO reference

sigqueue.3
   Michael Kerrisk
    Move this page to section 3
      Now that the underlying system call rt_sigqueueinfo(2) is
      properly documented, move sigqueue() to Section 3, since
      it is really a library function.
  Michael Kerrisk
    Update text in line with existence of new rt_sigqueueinfo.2 page

wcsnlen.3
  Jon Grant
    Improve description of 'maxlen' argument
      It's worth clarifying 'maxlen' is in wide-char units, not bytes.

wprintf.3
  Michael Kerrisk
    Add _ISOC95_SOURCE to feature test macro requirements
      Since glibc 2.12, _ISOC95_SOURCE can also be used to expose
      prototype of these functions.

feature_test_macros.7
  Michael Kerrisk
    Document _ISOC95_SOURCE

_ISOC95_SOURCE was added in glibc 2.12 as a means
to expose C90 Amendment 1 definitions.

ip.7
  Benjamin Poirier [Neil Horman]
    Improve description of IP_MTU_DISCOVER

signal.7
  Michael Kerrisk
    SEE ALSO: Add rt_sigqueueinfo(2)

========== Changes in man-pages-3.35 ==========

Released: 2011-10-04, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
David Prévot <taffit@debian.org>
Denis Barbier <bouzim@gmail.com>
Eric W. Biederman <ebiederm@xmission.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Kevin Lyda <kevin@ie.suberic.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages
---

recvmmsg.2
  Andi Kleen, Michael Kerrisk
    New man page for recvmmsg(2)

setns.2
  Eric W. Biederman
    New manual page for setns(2)

Michael Kerrisk
Various improvements

Global changes

Various
pages
Michael Kerrisk
Global fix: remove spaces around em-dash
Normal English typographical convention is not to have
spaces around em dashes.

Various pages
Michael Kerrisk
Global fix: s/null pointer/NULL pointer/

Various pages
Michael Kerrisk
Global fix: use ORing
Use "ORing", not "OR'ing", nor an italic ".IR OR ing".

Various pages
Michael Kerrisk
Global fix: consistent use of "null wide character"
Bring more consistency to the discussion of
"[terminating] null wide character"
by writing (at least in the initial use in a page)
"[terminating] null wide character (L'\0')".

Various pages
Michael Kerrisk
Global fix: consistent use of "null byte"
Bring more consistency to the discussion of
"[terminating] null byte"
by writing (at least in the initial use in a page)
"[terminating] null
byte ('\0')".

mount.2, prctl.2
Michael Kerrisk
s/task/thread/ for consistency with other pages

Changes to individual pages
---

lseek.2
  Guillem Jover
    CONFORMING TO: Note other systems that have SEEK_HOLE+SEEK_DATA

recv.2
  Michael Kerrisk
    Add mention of recvmmsg(2)

recvmmsg.2
  Michael Kerrisk
    SEE ALSO: add sendmmsg(2)

send.2
  Michael Kerrisk
    CONFORMING TO: POSIX.1-2008 adds MSG_NOSIGNAL

sigwaitinfo.2
  Michael Kerrisk
    Note that attempts to wait for SIGKILL and SIGSTOP are silently ignored

stat.2
  Michael Kerrisk
    Note POSIX.1-2001 and POSIX.1-2008 requirements for lstat()
  Michael Kerrisk
    Regarding automounter action, add a reference to fstatat(2)
  Michael Kerrisk
    Clean up text describing which POSIX describes S_IF* constants

aio_cancel.3
  Michael Kerrisk [Jon Grant]
    Clarify meaning of "return status" and "error status"

gets.3
  Michael Kerrisk
     POSIX.1-2008 marks gets() obsolescent
       The page formerly erroneously stated that POSIX.1-2008
       removed the specification of this function.

mbsnrtowcs.3
  Michael Kerrisk
    CONFORMING TO: Add POSIX.1-2008
       This function is specified in the POSIX.1-2008 revision.

regex.3
  Michael Kerrisk [Reuben Thomas]
    Change "terminating null" to "terminating null byte"

stpcpy.3

stpncpy.3
  Mike Frysinger
    Note that these functions are in POSIX.1-2008
      Update the "CONFORMING TO" sections of these functions to
      note that they are now part of the POSIX.1-2008 standard.

stpncpy.3
  Michael Kerrisk
    Change "terminating null" to "terminating null byte"

strcpy.3
  Mike Frysinger
    SEE ALSO: Add stpncpy(3)

strdup.3
  Michael Kerrisk
    CONFORMING TO: strndup() is in POSIX.1-2008

wcpcpy.3
wcpncpy.3
wcsnlen.3
wcsnrtombs.3
  Michael Kerrisk
    CONFORMING TO: Add POSIX.1-2008

    These functions are specified in the POSIX.1-2008 revision.

proc.5
  Eric W. Biederman
    Document /proc/[pid]/ns/
  Michael Kerrisk
    Some edit's to Eric Biederman's /proc/[pid]/ns/ additions

capabilities.7
  Michael Kerrisk
    List setns(2) as an operation allowed by CAP_SYS_ADMIN

Apologies if I missed anyone!

New and rewritten pages
---

sendmmsg.2
  Michael Kerrisk [Stephan Mueller]
    New page for sendmmsg(2)
      Some pieces inspired by an initial attempt by Stephan Mueller.

Newly documented interfaces in existing pages
---

fallocate.2
  Lucian Adrian Grijincu
    Document FALLOC_FL_PUNCH_HOLE
      FALLOC_FL_PUNCH_HOLE was added in Linux 2.6.38,
      for punching holes in the allocated space in a file.

Changes
 to individual pages
---

dup.2
  Michael Kerrisk
    SYNOPSIS: Add "#include <fcntl.h>" for O_* constants

fallocate.2
  Michael Kerrisk
    Substantial restructuring of DESCRIPTION
      The addition of a second class of operation ("hole punching")
      to the man page made it clear that some significant restructuring
      is required. So I substantially reworked the page, including the
      preexisting material on the default "file allocation" operation.
  Michael Kerrisk [Josef Bacik]
    Add further details for FALLOC_FL_PUNCH_HOLE
  Michael Kerrisk
    ERRORS: Add EPERM error case for FALLOC_FL_PUNCH_HOLE

fork.2
  Michael Kerrisk
    NOTES: Describe clone() call equivalent to fork()

fsync.2
  Christoph Hellwig
    Various improvements
      - explain the situation with disk caches better
      - remove the duplicate fdatasync() explanation in the NOTES
        section
      - remove an incorrect note about fsync() generally requiring two
        writes
      - remove an obsolete ext2 example note
      - fsync() works on any file descriptor (doesn't need to be
        writable); correct the EBADF error code explanation
  Michael Kerrisk [Guillem Jover]
    Note that some systems require a writable file descriptor
      An edited version of Guillem Jover's comments:
      [While the file descriptor does not need to be writable on Linux]
      that's not a safe portable assumption to make on POSIX in general
      as that behavior is not specified and as such is
      implementation-specific. Some Unix systems do actually fail on
      read-only file descriptors, for example [HP-UX and AIX].

mount.2
  Michael Kerrisk [Junjiro Okajima]
    Removed erroneous statement about MS_RDONLY and bind mounts

open.2
  Jessica McKellar
    Fix grammar in O_DIRECT description

      Some small grammar fixes to the O_DIRECT description.

pipe.2
  Michael Kerrisk [Salvo Tomaselli]
    SYNOPSIS: Add "#include <fcntl.h>" for O_* constants
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=659750

sched_rr_get_interval.2
  Clemens Ladisch
    Update notes on modifying quantum
      Since Linux 2.6.24, it is no longer possible to
      modify the SCHED_RR quantum using setpriority(2).
      (Slight edits to Clemens' patch by mtk.)
  Michael Kerrisk
    Reordered various pieces of text
  Michael Kerrisk
    Reworded text of ESRCH error

send.2
  Michael Kerrisk
    Add mention of sendmmsg(2)

sync.2
  Michael Kerrisk [Simone Piccardi]
    PROTOTYPE: Fix return type of syncfs()

vfork.2
  Michael Kerrisk [starlight]
    Clarify what is duplicated in the child
      Add some words to make it clear to the reader that vfork(),
      like fork(), creates duplicates of process attributes
       in the child.
  Michael Kerrisk
    Note clone() flags equivalent to vfork()
  Michael Kerrisk [starlight, Mike Frysinger]
    Add some notes on reasons why vfork() still exists
  Michael Kerrisk [starlight]
    Clarify that calling *thread* is suspended during vfork()
  Michael Kerrisk
    CONFORMING TO: Note that POSIX.1-2001 marked vfork() obsolete

gets.3
  Michael Kerrisk

Document C11 and glibc 2.16 changes affecting gets()

pthread_sigmask.3
  Michael Kerrisk [Pat Pannuto]
    Fix comment that was inconsistent with code in example program

sem_wait.3
  Walter Harms
    EXAMPLE: Remove extraneous line of output from shell session

wcsnrtombs.3
wcsrtombs.3
wcstombs.3
  Michael Kerrisk
    Fix-ups for e9c23bc636426366d659809bc99cd84661e86464

core.5
  Michael Kerrisk [Junjiro Okajima]
    Document %E specifier for core_pattern

passwd.5
  Michael Kerrisk [Walter Haidinger]
    s/asterisk/asterisk
 (*)/ to improve clarity
  Michael Kerrisk
    Correct note on passwd field value when shadowing is enabled
      When password shadowing is enabled, the password field
      contains an 'x' (not "*").

proc.5
  Elie De Brauwer
    Fix description of fourth field of /proc/loadavg
      SIgned-off-by: Elie De Brauwer <eliedebrauwer@gmail.com>

resolv.conf.5
  Michael Kerrisk [Slaven Rezic]
    Describe syntax used for comments
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=656994

feature_test_macros.7
  Michael Kerrisk
    Document _ISOC11_SOURCE

inotify.7
  Michael Kerrisk [Yang Yang]
    Note that 'cookie' field is set to zero when unused

man.7

Michael Kerrisk
Various fixes for description of NAME section
As noted by reporter:
* The code sample given for the NAME section is incomplete because
the actual content sample is not given.
* Additionally, the description
assumes that the item described is
a command, which need not be the case.
* The command makewhatis is not present on my system; the
documented tool to create the whatis database is called mandb.
* The description on .SH NAME in man(7) should either copy the
relevant paragraph of lexgrog(1) or refer to it.

========== Changes in man-pages-3.37 ==========

Released: 2012-03-06, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Denys Vlasenko <dvlasenk@redhat.com>
Mark R. Bannister <cambridge@users.sourceforge.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Oleg Nesterov <oleg@redhat.com>
Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages
---

getent.1
Mark R. Bannister

New page to document 'getent' binary provided by glibc

Changes to individual pages
---

bdflush.2

Michael Kerrisk
Note that bdflush() is deprecated, and does nothing

nfsservctl.2
Michael Kerrisk
Note that this system call was removed in Linux 3.1

ptrace.2
Denys Vlasenko [Oleg Nesterov, Tejun Heo]
add extended description of various ptrace quirks
Changes include:

s/parent/tracer/g, s/child/tracee/g - ptrace interface now
is sufficiently cleaned up to not treat tracing process
as parent.

Deleted several outright false statements:
- pid 1 can be traced
- tracer is not shown as parent in ps output
- PTRACE_ATTACH is not "the same behavior as if tracee had done
a PTRACE_TRACEME": PTRACE_ATTACH delivers a SIGSTOP.
- SIGSTOP _can_ be injected.
- Removed mentions of SunOS and Solaris as irrelevant.
- Added a few more known bugs.

Added a large block of text in DESCRIPTION which doesn't focus
on mechanical description of each flag and operation, but rather
tries to describe a bigger picture. The targeted audience is
a person which is reasonably knowledgeable in Unix but did not
spend years working with ptrace, and thus may be unaware of its
quirks. This text went through several iterations of review by
Oleg Nesterov and Tejun Heo.
This block of text intentionally uses as little markup as possible,
otherwise future modifications to it will be very hard to make.
Michael Kerrisk
Global clean-up of page
* Wording and formatting fixes to existing text and
Denys Vlasenko's new text.
* Various technical amendments and improvements to
Denys Vlasenko's new text.
* Added FIXME for various problems
with the current text.
Michael Kerrisk
Integrated changes after further review from Denys Vlasenko

syscalls.2
Michael Kerrisk
Note that nfsservctl(2) was removed in Linux 3.1

Note that bdflush(2) is deprecated

capabilities.7
Michael Kerrisk
Add CAP_WAKE_ALARM
Michael Kerrisk
Add various operations under CAP_SYS_ADMIN
Add perf_event_open(2) to CAP_SYS_ADMIN
Add VM86_REQUEST_IRQ vm86(2) command to CAP_SYS_ADMIN
Update CAP_NET_ADMIN with notes from include/linux/capability.h
Add nfsservctl(2) to CAP_SYS_ADMIN
Michael Kerrisk
Add ioctl(FIBMAP) under CAP_SYS_RAWIO
Michael Kerrisk
Add virtual terminal ioctl()s under CAP_SYS_TTY_CONFIG
Michael Kerrisk
Update CAP_NET_RAW with notes from include/linux/capability.h
Michael Kerrisk
Add F_SETPIPE_SZ case to CAP_SYS_RESOURCE
Add POSIX messages queues queues_max case to CAP_SYS_RESOURCE
Update
CAP_SYS_RESOURCE with notes from include/linux/capability.h
Michael Kerrisk
SEE ALSO: Add libcap(3)

ld.so.8
Michael Kerrisk
Add --audit command-line option

Apologies if I missed anyone!

New and rewritten pages
---

get_nprocs_conf.3
  Beas Petr
    New page documenting get_nprocs_conf(3) and get_nprocs(3)
  Michael Kerrisk
    Some additions and improvements

malloc_get_state.3
  Michael Kerrisk
    New page documenting malloc_get_state(3) and malloc_set_state(3)

mallopt.3
  Michael Kerrisk
    New man page for mallopt(3)

mtrace.3
  Michael Kerrisk
    Complete rewrite of page, adding much more detail

scandirat.3
  Mark R Bannister
    New page for scandirat(3) (new in glibc 2.15)

Newly documented interfaces in existing pages
---

posix_memalign.3
  Michael Kerrisk

Document aligned_alloc(3)
aligned_alloc() is new in C11.
Michael Kerrisk
Document pvalloc(3)

qsort.3
Mark R Bannister
Add documentation of qsort_r(3)
Ben Bacarisse
Improvements to Mark R Bannister's qsort_r() patch
Michael Kerrisk
Add VERSIONS section for qsort_r()

New and changed links
---

aligned_alloc.3
Michael Kerrisk
New link to posix_memalign.3

get_nprocs.3
Beas Petr
Link to new get_nprocs_conf.3 page

malloc_set_state.3
Michael Kerrisk
Link to new malloc_get_state.3 page

pvalloc.3
Michael Kerrisk
New link to posix_memalign.3

Global changes

Various pages
Michael Kerrisk
Global formatting fix: balance .nf/.fi pairs

Various pages
Michael Kerrisk
Global fix: place sections in correct order

Various pages
Michael Kerrisk [Justin T Pryzby]
Global fix: Remove duplicated words

Remove instances of duplicate words found using Justin's
grep-fu:

```
for f in man?/*.[1-9]; do

    grep -HE ' ([[:alpha:]]{2,} +)\1' "$f" |
        grep -Evw '(proc|hugetlbfs|XXX*|root|long) *\1';
done | grep -E --colo ' ([[:alpha:]]{2,} +)\1'
```

Various pages
  Michael Kerrisk
    Correct order of SEE ALSO entries

Changes to individual pages
---

futimesat.2
  Michael Kerrisk
    PROTOTYPE: Correct header file and feature test macro requirements

keyctl.2
  Bjarni Ingi Gislason
    Strip trailing tabs from source line
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=664688

ptrace.2
  Denys Vlasenko
    Document PTRACE_GETEVENTMSG for PTRACE_EVENT_EXEC
  Denys Vlasenko
    Various fixes to recent updates of this page

symlinkat.2
  Michael Kerrisk [Eric Blake]
    PROTOTYPE: Correct header file

syscalls.2
  Michael Kerrisk
    Remove unimplemented system calls from main syscall list
      The unimplemented system calls are in any case noted lower
down
      in the page. Also: rearrange the text describing the unimplemented
      system calls.
  Michael Kerrisk
    Note a few system calls that were removed in Linux 2.6
  Michael Kerrisk
    Add process_vm_readv(2) and process_vm_writev(2)

unlinkat.2
  Michael Kerrisk [Eric Blake]
    PROTOTYPE: Correct header file
  Michael Kerrisk
    PROTOTYPE: Add <fcntl.h> for AT_* constants

utimensat.2
  Michael Kerrisk
    PROTOTYPE: Add <fcntl.h> for AT_* constants

copysign.3
  Michael Kerrisk [Tolga Dalman]
    DESCRIPTION: Add a couple of examples

malloc.3
  Michael Kerrisk
    NOTES: Add a short discussion of arenas
  Michael Kerrisk
    Replace discussion of MALLOC_CHECK_ with pointer to mallopt(3)
  Michael Kerrisk
    SEE ALSO: Add mtrace(3)
    SEE ALSO: add malloc_get_state(3)

posix_memalign.3
  Michael Kerrisk
    Rename memalign() argument
      Rename "boundary" to "alignment" for consistency
       with posix_memalign().
  Michael Kerrisk
    Improve discussion of feature test macros and header files for valloc(3)

rtnetlink.3
  Kirill Brilliantov [Sergei Zhirikov]
    Fix example code, rta_len assignment should use RTA_LENGTH()
      See also http://bugs.debian.org/655088

scandir.3
  Mark R Bannister
    SEE ALSO: Add scandirat(3)

sigqueue.3
  Nix
    Remove rt_sigqueueinfo from TH line
      rt_sigqueueinfo() now has its own manual page, so should not
      be listed in the .TH line of this page.

tzset.3
  Peter Schiffer

Correct description for Julian 'n' date format
The Julian 'n' date format counts starting from 0, not 1.
Michael Kerrisk
Add some clarifying remarks to discussion of Julian day formats

packet.7
Michael Kerrisk [Iain Fraser]
Fix comment on 'sll_hatype' field

tcp.7
Michael Kerrisk [Artyom Pervukhin]
Correct RFC for TIME_WAIT assassination
hazards

========== Changes in man-pages-3.39 ==========

Released: 2012-04-17, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhijith Das <adas@redhat.com>
Alexander Kruppa <akruppa@gmail.com>

Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
<who@connect.carleton.ca>

Apologies if I missed anyone!

New and rewritten pages
---

malloc_trim.3
  Michael Kerrisk
    New man page for malloc_trim(3)

malloc_usable_size.3
  Michael Kerrisk
    New man page for malloc_usable_size(3)

Newly documented interfaces in existing pages
---

prctl.2
  Cyrill Gorcunov
    Document PR_SET_MM (new in Linux 3.3)
  Michael Kerrisk
    Various edits and improvements to Cyrill's patch

Changes to individual pages
---

epoll_create.2
  Michael Kerrisk
    Rework discussion of 'size' argument
  Michael Kerrisk
    Add .SS for description of epoll_create1()

epoll_wait.2
  Michael Kerrisk [Armin Rigo]
    Another thread can add to epoll instance while epoll_wait is blocked
      See https://bugzilla.kernel.org/show_bug.cgi?id=43072
   Michael Kerrisk
    Clarify that epoll_pwait() blocks calling *thread*
    A few wording improvements

fchmodat.2

Michael Kerrisk [Mike Frysinger]
Note difference between glibc wrapper and underlying system call
The wrapper function has a 'flags' argument (which currently
serves no purpose), while the underlying system call does not.

fcntl.2
Abhijith Das
Explain behaviour of F_GETLEASE during lease break
Michael Kerrisk [Eric Blake]
Change type of arg from "long" to "int"
Various fcntl(2) commands require an integral 'arg'.
The man page said it must be "long" in all such cases.
However, for the cases covered by POSIX, there is an
explicit requirement that these arguments be "int".
Update the man page to reflect. Probably, all of the
other "long" cases (not specified in POSIX) should

be "int", and this patch makes them so. Based on a
note fromEric Blake, relating to F_DUPFD_CLOEXEC.

gettimeofday.2
Michael Kerrisk
Reorganize content
The main change is to move the historical information about
the 'tz_dsttime' to NOTES.
Michael Kerrisk [Felix]
Note that compiler issues warnings if 'tv' is NULL

mmap.2
Michael Kerrisk [Kevin O'Gorman]
Clarify that this system call should not be invoked directly
See https://bugzilla.kernel.org/show_bug.cgi?id=42892
Michael Kerrisk
Clarify NOTES discussion of mmap() versus mmap2()

poll.2
Michael Kerrisk [Michael Welsh Duggan]
Document negative value in 'fd' field
Michael Kerrisk
Document semantics of passing zero in 'events' field

ptrace.2
Denys Vlasenko
Various fixes
For some reason, the PTRACE_TRACEME paragraph talks about some
general aspects of ptraced process behavior. It repeats
the
"tracee stops on every signal" information even though that was

already explained just a few paragraphs before. Then it describes
legacy SIGTRAP on execve().

This patch deletes the first part, and moves the second part up,
into the general ptrace description. It also adds
"If PTRACE_O_TRACEEXEC option is not in effect" to the description
of the legacy SIGTRAP on execve().

The patch also amends the part which says "For requests other
than PTRACE_KILL, the tracee must be stopped." - PTRACE_ATTACH
also doesn't require that.

sigaction.2
  Michael Kerrisk [Andreas Jaeger,]
    Clarify that the use of SI_SIGIO is for Linux 2.2 only
      See also http://sourceware.org/bugzilla/show_bug.cgi?id=6745

sigprocmask.2
  Mike Frysinger
    ERRORS: add EFAULT

times.2
  Michael Kerrisk [Simone Piccardi]
    ERRORS: Add EFAULT

div.3
  Michael
 Kerrisk [Reuben Thomas]
    CONFORMING TO: Add C99

fread.3
  Regid Ichira
    Clarify further that return value is number of items, not bytes
      See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=665780

getaddrinfo.3
  Michael Kerrisk [Jak]
    Correct type of ai_addrlen field

malloc.3
  Michael Kerrisk
    SEE ALSO: add malloc_usable_size(3)
    SEE ALSO: Add malloc_trim(3)

mallopt.3
  Michael Kerrisk
    Fix text describing M_PERTURB and free()
    SEE ALSO: Add malloc_trim(3)

memchr.3
  Michael Kerrisk [Reuben Thomas]
    Remove mention of terminating null in description of rawmemchr()

perror.3
  Michael Kerrisk [Jesus Otero]
    Note that use of 'sys_errlist' is deprecated

rcmd.3
  Michael Kerrisk
    glibc eventually added a declaration of iruserok() in version 2.12

sysconf.3
  Michael Kerrisk [Ricardo Catalinas Jiménez]
    Add mention of _SC_SYMLOOP_MAX

nologin.5
  Michael Kerrisk [Tetsuo
 Handa]
    nologin must not only exist, but *be readable* to be effective

nsswitch.conf.5
  Mark R Bannister
    Significant rewrites and improvements
      This patch applies to nsswitch.conf.5 in man-pages-3.36.

      My changes almost completely rewrite large sections of the
      man page. They are needed to add clarity, correct grammar,
      reduce confusion, and bring up-to-date with the latest glibc.
      I have checked the man page against the nss source code in
      glibc 2.14.90.

      Historical notes are demoted to the footer.

      The rewrite makes the man page much clearer to
      understand, more authoratitive, and easier to read.
  Michael Kerrisk
    Light edits to Mark Bannister's changes

capabilities.7
  Michael Kerrisk
    Add prctl(PR_SET_MM) to CAP_SYS_RESOURCE

epoll.7
  Michael Kerrisk
    Some minor clarifications at start of DESCRIPTION

netlink.7
  Jeff Mahoney
 [Petr Gajdos]
    Note cases where nonprivileged users can use netlink multicast groups
      See also https://bugzilla.novell.com/show_bug.cgi?id=754611

unix.7
  Michael Kerrisk [Tetsuo Handa]
    Add a detail on autobind feature

ld.so.8
  Jonathan Nieder [Reuben Thomas]
    Document effect of hwcaps on search path
      Wording by Aurelien Jarno from Debian glibc's r4701 (2011-06-04).

      Addresses http://bugs.debian.org/622385

Vadim Mikhailov <vadim.mikhailov@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

process_vm_readv.2
  Mike Frysinger, Christopher Yeoh, Michael Kerrisk
    New page for process_vm_readv(2) and process_vm_writev(2)

mcheck.3
  Michael Kerrisk
    New man page for mcheck(3) and related functions
      Also describes mcheck_check_all(3), mcheck_pedantic(3),
      and mprobe(3)

Newly documented interfaces in existing pages
---

rcmd.3
   Michael Kerrisk
    Document "_af" variants of these functions
      Document rcmd_af(), rresvport_af(), iruserok_af(), ruserok_af().
      Also some restructuring and other clarifications.

rexec.3
  Michael Kerrisk
    Document rexec_af()

New and changed links
---

iruserok_af.3
rcmd_af.3
rresvport_af.3
ruserok_af.3
  Michael Kerrisk
    New links to rcmd.3

rexec_af.3
  Michael Kerrisk
    New link to rexec.3

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk
    Clarify difference between CLOCK_MONOTONIC and CLOCK_MONOTONIC_RAW
      Note interactions of these two clocks with discontinuous
      adjustments to the system time and NTP/adjtime(2).

fallocate.2
  Michael Kerrisk [John Sullivan]
    Fix description of ENOSYS and EOPNOTSUP errors
      As reported in https://bugzilla.redhat.com/show_bug.cgi?id=680214

fchmodat.2
   Michael Kerrisk [Mike Frysinger]
    Improve discussion of difference between wrapper and underlying syscall

gettimeofday.2
  Michael Kerrisk
    gettimeofday() is affected by discontinuous jumps in the system time
      Advise reader to use clock_gettime(2), if they need a
      monotonically increasing time source.
  Michael Kerrisk
    SEE ALSO: Add clock_gettime(2)

prctl.2
  Michael Kerrisk
    Add PR_TASK_PERF_EVENTS_DISABLE and PR_TASK_PERF_EVENTS_ENABLE
      Add some basic documentation of these operations, with a pointer to
      tools/perf/design.txt for more information.
  Michael Kerrisk [Marcel Holtmann]
    Amend details of PR_SET_PDEATHSIG

ptrace.2
  Michael Kerrisk [Mike Frysinger]
    Note SPARC deviation with respect to get/set regs
      SPARC reverses the use of 'addr' and 'data' for
      PTRACE_GETREGS, PTRACE_GETFPREGS, PTRACE_SETREGS,
      and PTRACE_SETFPREGS.

send.2

  Stefan Puiu
    Document EACCES error case for UDP

sigaction.2
  Michael Kerrisk
    Remove mention of raise(3) for SI_USER
      For a long time now, glibc's raise(3) didn't yield SI_USER
      for the signal receiver, so remove mention of raise(3)
      here. The user can deduce the details, if needed, by looking
      at the recently updated raise(3) page.

aio_cancel.3
  Michael Kerrisk [Jon Grant]
    Rewrite RETURN VALUE section to be clearer

aio_init.3
  Michael Kerrisk [Jon Grant]
    Remove extraneous "POSIX" from NAME section

btree.3
dbopen.3
hash.3
mpool.3
recno.3
  Michael Kerrisk [Brian M. Carlson]
    Note that glibc no longer provides these interfaces
      glibc stopped providing these interfaces with v2.2.
      Nowadays, the user that finds these pages probably wants
      the libdb API, so note this in the page.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=337581

fopen.3
   Michael Kerrisk
    BUGS: Note limitation on number of flag characters parsed in 'mode'
  Michael Kerrisk
    Note that 'c' and 'e' flags are ignored for fdopen()
      Determined from reading libio/iofdopen.c.
  Michael Kerrisk
    Document ",ccs=string" feature of 'mode' for fopen()/freopen()

getgrnam.3
  Michael Kerrisk [Ulrich Drepper]
    Fix discussion of _SC_GETGR_R_SIZE_MAX
      The value is not meant to be a maximum (as was specified in
      SUSv3) but an initial guess at the required size
      (as specified in SUSv4).

getpwnam.3
  Michael Kerrisk [Ulrich Drepper]
    Fix discussion of _SC_GETPW_R_SIZE_MAX

The value is not meant to be a maximum (as was specified in
SUSv3) but an initial guess at the required size
(as specified in SUSv4).

malloc.3
mallopt.3
mtrace.3
Michael Kerrisk
SEE ALSO: add mcheck(3)

memchr.3
Michael Kerrisk
Clarify description, omitting
mention of "strings" and "characters"
The existing text slipped into talking about characters and
strings, which could mislead readers into thing that, for
example, searches for the byte '\0' are treated specially.
Therefore, rewrite in terms of "bytes" and "memory areas".

At the same time, make a few source file clean-ups.

mkstemp.3
Michael Kerrisk
Add "mkstemps" and "mkostemps" to NAME line

posix_openpt.3
Michael Kerrisk [Vadim Mikhailov]
Add some details on use of the slave pathname
An explicit pointer to ptsname(3) is useful, as is a note
of the fact that the slave device pathname exists only as
long as the master device is held open.

raise.3
Michael Kerrisk
Add some notes on underlying system call that is used

rcmd.3
Michael Kerrisk
Add some details of the rresvport() 'port' argument

resolver.3
Petr Baudis
Note that
many options are documented in resolv.conf(5)

scandir.3
Michael Kerrisk [Daniel J Blueman]
Improve EXAMPLE source code: s/0/NULL/ in scandir() call

strchr.3
  James Hunt
    Explain behavior when searching for '\0'

strerror.3
  Eric Blake [Stefan Puiu]
    Improve strerror_r() description
      POSIX requires that perror() not modify the static storage
      returned by strerror(). POSIX 2008 and C99 both require that
      strerror() never return NULL (a strerror() that always
      returns "" for all inputs is valid for C99, but not for POSIX).

      http://sourceware.org/bugzilla/show_bug.cgi?id=12204
      documents glibc's change to come into compliance with POSIX
      regarding strerror_r() return value. The GNU strerror_r() use
      of 'buf' was confusing - I ended up writing a test program that
      proves that 'buf' is unused for valid 'errnum', but contains
      truncated "unknown
 message" for out-of-range 'errnum'.

      See also http://austingroupbugs.net/view.php?id=382
  Bernhard Walle
    Correct description of error return for XSI strerror_r()
  Michael Kerrisk [Eric Blake]
    Note how to use 'errno' to detect errors when calling strerror()
  Michael Kerrisk [Jon Grant]
    Add an example of the kind of string returned by strerror()

resolv.conf.5
  Petr Baudis
    Document "single-request" option

inotify.7
  Michael Kerrisk
    Note buffer size that guarantees being able to read at least one event
  James Hunt
    Correct description of size of inotify_event structure

iso_8859-1.7
  Eugen Dedu
    Add "-" for SOFT HYPHEN
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=156154

netdevice.7
  Brian F. G. Bidulock
    Document some SIOC configuration ioctls
      This patch adds common but missing SIOC configuration ioctls to

the netdevice.7 manual pages that are
not documented anywhere
else. SIOCSIFPFLAGS and SIOCGIFPFLAGS are linux-specific. Flag
values come from Linux 2.6.25 kernel headers for sockios. The
others are standard BSD ioctls that have always been implemented
by Linux and were verified from inspecting netdevice.c kernel
code.

socket.7
Michael Kerrisk [Alexey Toptygin]
Correct description of SO_BROADCAST

tcp.7
lepton
Correct description for TCP_MAXSEG on modern kernel

========== Changes in man-pages-3.41 ==========

Released: 2012-05-11, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Stefan Puiu <stefan.puiu@gmail.com>
Stephen Hemminger <shemminger@vyatta.com>
Vincent Lefevre
<vincent@vinc17.net>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

get_robust_list.2
  Ivana Varekova [Michael Kerrisk]
    New page documenting get_robust_list(2) and set_robust_list(2)

mallinfo.3
  Michael Kerrisk [KOSAKI Motohiro, Paul Pluzhnikov]
    New page for mallinfo(3)

malloc_info.3
  Michael Kerrisk [Jakub Jelinek]
    New page for malloc_info(3)

malloc_stats.3
  Michael Kerrisk [KOSAKI Motohiro]
    New man page for malloc_stats(3)

Newly documented interfaces in existing pages
---

madvise.2
  Jason Baron
    Document MADV_DONTDUMP and MADV_DODUMP

New and changed links
---

set_robust_list.2
  Michael Kerrisk
    New link to new get_robust_list.2 page

LIST_ENTRY.3
LIST_HEAD.3
LIST_INIT.3
LIST_INSERT_AFTER.3
LIST_INSERT_HEAD.3
LIST_REMOVE.3
TAILQ_ENTRY.3
TAILQ_HEAD.3
TAILQ_INIT.3
TAILQ_INSERT_AFTER.3
TAILQ_INSERT_HEAD.3
TAILQ_INSERT_TAIL.3
TAILQ_REMOVE.3
CIRCLEQ_ENTRY.3
CIRCLEQ_HEAD.3
CIRCLEQ_INIT.3
CIRCLEQ_INSERT_AFTER.3
CIRCLEQ_INSERT_BEFORE.3
CIRCLEQ_INSERT_HEAD.3
CIRCLEQ_INSERT_TAIL.3
CIRCLEQ_REMOVE.3
  Michael Kerrisk
    New link to queue.3
      The queue(3) page documents these macros, so it makes sense to
      have links for the names.

DES_FAILED.3
  Michael Kerrisk
    New link to des_crypt.3
      The des_crypt(3) page documents this macro, so it makes sense
      to have a link for the name.

qsort_r.3
  Michael Kerrisk
    New link to qsort.3
      Overlooked to add this link in 3.38, when documentation of
      qsort_r() was added to the qsort.3 page.

Global changes

---

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
inotify_init.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
setns.2
splice.2
symlinkat.2
sync.2
tee.2
unlinkat.2
vmsplice.2
  Michael Kerrisk [Lauri Kasanen]
    Global fix: note glibc version that added library support

confstr.3
strcasecmp.3
strcat.3
strcmp.3
strcpy.3
strdup.3
strftime.3
strlen.3
strnlen.3
strpbrk.3
strspn.3
strtok.3
strxfrm.3
  Michael Kerrisk [Andries E. Brouwer]
    Clarify that these functions operate on bytes, not (wide) characters
      Change 'character(s)' to 'byte(s)' to make clear that these
      functions operate on bytes, not wide / UTF8 characters.
      (POSIX uses 'byte(s)' similarly, to make this point.)

icmp.7
ipv6.7
packet.7
raw.7
rtnetlink.7

unix.7
x25.7
  Michael Kerrisk
    Remove names of constants from NAME line
      Some of the sockets/network protocol pages included names of
      the corresponding address family constants in the NAME line,
      but this wasn't done consistently across all pages, and probably
      it adds little value in those pages that did do this. So, remove
      these constants from those pages that have
 them in the NAME
      section.

Changes to individual pages
----

clock_getres.2
  Michael Kerrisk [Josh Triplett]
    Expand description of CLOCK_REALTIME
      Make it clear that this clock may be discontinuous, and is
      affected my incremental NTP and clock-adjtime(2) adjustments.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=540872

epoll_wait.2
  Michael Kerrisk
    Clarify that 'timeout' is a *minimum* interval
      Make it clear that 'timeout' is a minimum interval; the actual
      interval will be rounded up to the system clock granularity,
      and may overrun because of kernel scheduling delays.

execve.2
  Michael Kerrisk
    Rewording to deemphasize libc5 details

fork.2
  Mike Frysinger
    ERRORS: add ENOSYS
      Can occur on, for example, non-MMU hardware.

getcpu.2
  Mike Frysinger
    Add RETURN VALUE and ERRORS sections
  Michael Kerrisk
     Refer reader to NOTES for more info about 'tcache'
  Michael Kerrisk
    DESCRIPTION: reword a sentence to be clearer

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Michael Kerrisk
    Rewrite to focus on system call API
      Rewrite to focus on the system call interface, adding
      some notes on the libaio wrapper differences.
      See the following mail:
      2012-05-07 "aio manuals", linux-man@vger
      http://thread.gmane.org/gmane.linux.man/1935/focus=2910

      Other minor rewrites.

mount.2
  Michael Kerrisk
    Comment out an old Linux libc detail

open.2
  Nick Piggin [KOSAKI Motohiro, Jan Kara, Hugh Dickins]
    Describe race of direct I/O and fork()
      Rework 04cd7f64, which didn't capture the details correctly.
      See the April/May 2012 linux-man@ mail thread "[PATCH]
      Describe race of direct read and fork for unaligned buffers"
      http://thread.gmane.org/gmane.linux.kernel.mm/77571

poll.2
   Michael Kerrisk
    Clarify that 'timeout' is a *minimum* interval
      Make it clear that 'timeout' is a minimum interval; the actual
      interval will be rounded up to the system clock granularity,
      and may overrun because of kernel scheduling delays.
  Michael Kerrisk
    Clarify discussion of wrapper function emulation
      Clarify that glibc (as well as old libc) provides emulation
      using select(2) on older kernels that don't have a poll()
      system call.
  Michael Kerrisk
    Make the meaning of a zero timeout explicit
      Clarify that timeout==0 causes an immediate return, even if
      no file descriptors are ready.

pread.2
  Michael Kerrisk [Kasper Dupont]
    BUGS: Note O_APPEND + pwrite() does the wrong thing
      See https://bugzilla.kernel.org/show_bug.cgi?id=43178

recvmmsg.2
  Michael Kerrisk
    Clarify that 'timeout'
is a *minimum* interval
      Make it clear that 'timeout' interval will be rounded up to the
      system clock granularity, and may overrun because of kernel
      scheduling delays.

select.2
  Michael Kerrisk
    Clarify that 'timeout' is a *minimum* interval
      Make it clear that 'timeout' is a minimum interval; the actual
      interval will be rounded up to the system clock granularity,
      and may overrun because of kernel scheduling delays.
  Michael Kerrisk
    Expand description of the self-pipe trick
  Michael Kerrisk
    Add further details on pselect6() system call that underlies pselect()

semop.2
  Michael Kerrisk
    Clarify that 'timeout' of semtimedop() is a *minimum* interval
      Make it clear that 'timeout' interval will be rounded up to the
      system clock granularity, and may overrun because of kernel
      scheduling delays.

signal.2
  Michael Kerrisk
    Note that 'sig_t'
requires _BSD_SOURCE
      Also remove some old Linux libc details

sigwaitinfo.2
  Michael Kerrisk
    Clarify that 'timeout' of sigtimedwait() is a *minimum* interval
      Make it clear that 'timeout' is a minimum interval; the actual
      interval will be rounded up to the system clock granularity,
      and may overrun because of kernel scheduling delays.

stat.2
  Bjarni Ingi Gislason
    Formatting fixes
      From "groff -ww" (or "man --warnings=w ..."):

          warning: around line 442: table wider than line width

      GNU man uses line length of 78.

Use text blocks. Two spaces between sentences or better: start
each sentence in a new line.

syscalls.2
  Bjarni Ingi Gislason
    Formatting fixes
      From "groff -ww ..." (or "man --warnings=w ..."):

        warning: around line 157: table wider than line width

      Have to use text blocks. Move some text
to its correct column.
      Split text to two columns to avoid hyphenation.

sysinfo.2
  Michael Kerrisk
    Remove reference to obsolete libc5

syslog.2
  Michael Kerrisk
    Remove some details about obsolete Linux libc

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
  Michael Kerrisk
    ERRORS: Add/update ENOSYS error

aio_cancel.3
  Michael Kerrisk
    Clarify what happens when a request isn't successfully canceled
  Michael Kerrisk
    Add pointers to aio(7) and sigevent(7)

dbopen.3
  Michael Kerrisk
    SYNOPSIS: Add header file <fcntl.h>
      Upstreamed from Debian, and consistent with FreeBSD
      dbopen(3) man page.

fmemopen.3
  Michael Kerrisk
    Note details of POSIX.1-2008 specification of 'b' in 'mode'
  Michael Kerrisk [Rich Felker]

BUGS: fmemopen() doesn't correctly set file position in some cases
If 'mode' is append, but 'size' does not cover
a null byte
in 'buf', then fmemopen() incorrectly sets the initial file
position to -1, rather than the next byte after the end of
the buffer.

See http://sourceware.org/bugzilla/show_bug.cgi?id=13151
Michael Kerrisk
BUGS: fmemopen() incorrectly handles size==0 case
If size is zero, fmemopen() fails, This is surprising behavior,
and not specified in POSIX.1-2008.

See http://sourceware.org/bugzilla/show_bug.cgi?id=11216

Reported-by; Alex Shinn <alexshinn@gmail.com>
Michael Kerrisk
BUGS: Note silent ABI change for fmemopen() in glibc 2.9
Michael Kerrisk [Rich Felker]
BUGS: Append mode does not force writes to append
Append mode correctly sets the initial offset but does
not force subsequent writes to append at end of stream.

See http://sourceware.org/bugzilla/show_bug.cgi?id=13152
Michael Kerrisk [Eric Blake]

BUGS: Note inconsistent treatment of 'b' in 'mode'
fopen() permits, for example, both "w+b" and "wb+",
but only the latter is meaningful to fmemopen().

See http://sourceware.org/bugzilla/show_bug.cgi?id=12836

fopencookie.3
Michael Kerrisk [Petr Baudis]
Correct description of return for user-supplied 'write' function
See http://sourceware.org/bugzilla/show_bug.cgi?id=2074

getaddrinfo.3
Jean-Michel Vourgère
Note that AI_ADDRCONFIG is not affected by loopback addresses
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=660479

iconv.3
Michael Kerrisk
Upstream useful NOTE from Debian
Warn the reader that the pointer arguments can't be
interpreted as C style strings. Also, note possible
alignment requirements for the referenced bytes sequences,

Michael Kerrisk
Write a better paragraph introducing iconv() and its arguments

isgreater.3

Michael Kerrisk [Vincent Lefevre]
Clarify that the arguments to these macros must be real-floating
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=609033

lio_listio.3
Michael Kerrisk
Clarify that async notification occurs when *all* I/Os complete

makedev.3
Michael Kerrisk
SYNOPSIS: Correct return types of major() and minor()
See https://bugzilla.redhat.com/show_bug.cgi?id=754188

Reported-by; Zdenek Kabelac <zkabelac@redhat.com>

malloc.3
Michael Kerrisk
SEE ALSO: Add malloc_info(3)

malloc_get_state.3
Michael Kerrisk
Fix wordos in function names in NAME line

mallopt.3
Michael Kerrisk
Fix example program
The example code was a version that was not consistent with
the shell output shown on the page.

Reported-bY: Simon Paillard <spaillard@debian.org>
Michael Kerrisk
Restore accidentally omitted line in shell session
Michael
Kerrisk
SEE ALSO: Add malloc_stats(3)

mmap64.3
Michael Kerrisk
Change target of link to mmap.2 (was mmap2.2)
Upstreamed from Red Hat / Fedora

realpath.3
Michael Kerrisk [Casper Dik]

Remove note about Solaris possibly returning a relative path

syslog.3
Michael Kerrisk [Ralph Corderoy]
Document behavior when 'ident' argument to openlog() is NULL
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/382096
Michael Kerrisk
Update CONFORMING TO for POSIX.1-2008
POSIX.1-2008 doesn't change any details, but make
that more explicit.

undocumented.3
Michael Kerrisk
Remove some functions that have been documented

sd.4
Michael Kerrisk
Remove reference to nonexistent scsi(4) page
Upstreamed from RedHat / Fedora

sk98lin.4
Michael Kerrisk [Stephen Hemminger]
Note that this driver was removed in 2.6.28
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/528020

passwd.5
Michael Kerrisk
Upstream pieces from Red Hat/Fedora
Note mention of empty password field.
Add description of "*NP*" in password field.
Michael Kerrisk
Various minor fixes and improvements

proc.5
Michael Kerrisk
Note that CAP_SYS_ADMIN processes can override file-max
Upstreamed from red Hat / Fedora
Michael Kerrisk
Document /proc/[pid]/cgroup
Upstreamed from Red Hat / Fedora

resolv.conf.5
Michael Kerrisk
Take a Debian improvement into upstream

tzfile.5
Michael Kerrisk
Mention timezone directories in DESCRIPTION

Note that timezone files are usually in /usr/lib/zoneinfo
or /usr/share/zoneinfo.
Michael Kerrisk
Drop SYNOPSIS
The SYNOPSIS doesn't correspond to a user-visible file.
Michael Kerrisk
SEE ALSO: Add pointer to glibc source file timezone/tzfile.h
Michael Kerrisk
SEE ALSO: add tzset(3) and tzselect(8)

ascii.7
Bjarni Ingi Gislason
Indent for "troff" makes table too wide
Fix following from "groff -t -ww ...":

warning: around line 53: table wider than line width

Extra indent for "troff" makes the table look misplaced
(default "ps" output).

cp1251.7
Bjarni Ingi Gislason
table too wide
From "nroff -ww -t ...":

warning: around line 44: table wider than line width

Columns are made narrower (column gutter decreased).

ipv6.7
Stefan Puiu
Add ENODEV error for bind() to link-local IPv6 address

signal.7
Michael Kerrisk [Simone Piccardi]
Clarify that SIGLOST is unused
Michael Kerrisk
Comment out crufty BUGS text on SIGLOST
It must be a very long time since the statement there
about SIGLOST was true. (The text seems to date back to
1996.)
Michael Kerrisk
Update architectures for tables of signal numbers

utf-8.7
Brian M. Carlson
Two clarifications
This patch clarifies that 0xc0 and 0xc1 are not valid in any UTF-8

encoding[0], and it also references RFC 3629 instead of RFC 2279.

[0] In order to have 0xc0, you'd have to have a two-byte encoding
with all the data bits zero in the first byte (and thus only six
bits of data), which would be an ASCII character encoded in the
non-shortest form. Similarly with 0xc1.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=538641

ldconfig.8
nscd.8
  Michael Kerrisk
    Remove path prefix from NAME line
      Command names shown in NAME are normally just the basename,
      not the full pathname of the command.

========== Changes in man-pages-3.42 ==========

Apologies if I missed anyone!

Global changes

Various pages
  Sami Kerola
    Global fix: use UR macro where applicable
      The syntax .UR http://example.com paired with .UE will create
      links which one can interact, if the pager allows that. One
      way to see the effect is ask the man(1) command to use browser
      display, e.g.:

        man -H man7/uri.7

      ("\:" is optional groff syntax to permit hyphenless line breaks.)

Changes to individual pages
---

ldd.1
  Michael Kerrisk
    Add security note on untrusted executables
      See also http://www.catonmat.net/blog/ldd-arbitrary-code-execution/
      and
      http://tldp.org/HOWTO/Program-Library-HOWTO/shared-libraries.html

clone.2
   Michael Kerrisk
    Rewrite discussion of sys_clone

futex.2

    Consolidate error descriptions to ERRORS
  Michael Kerrisk

Various wording fix-ups
Michael Kerrisk
Fix description of EINVAL error
The current text seems incorrect. Replace with a more general description.

getdents.2
select_tut.2
atof.3
atoi.3
pthread_create.3
pthread_sigmask.3
rtime.3
setbuf.3
tsearch.3
netlink.7
Michael Kerrisk [Jan Engelhardt]
Remove unneeded casts

get_robust_list.2
get_thread_area.2
getcpu.2
getdents.2
gettid.2
io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2

set_thread_area.2
sgetmask.2
spu_create.2
spu_run.2
subpage_prot.2
sysctl.2
tkill.2
Michael Kerrisk
Add note to SYNOPSIS that there is no glibc wrapper for system call
Reduce the chance that the reader

may be misled into thinking
that there is a wrapper function for this system call by noting
explicitly in the SYNOPSIS that there is no glibc wrapper and
pointing the reader to NOTES for further details.

ioprio_set.2
Colin McCabe
Clarify the multithreaded behavior of ioprio_set(2)
Michael Kerrisk [, Kalle Olavi Niemitalo]
Document who==0 for IOPRIO_WHO_PROCESS and IOPRIO_WHO_PGRP
For IOPRIO_WHO_PROCESS, who==0 means operate on the caller.
For IOPRIO_WHO_PGRP, who==0 means operate on the caller's
process group.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=652443

migrate_pages.2
Michael Kerrisk [Christoph Lameter, JoonSoo Kim]
Fix description of return value

mount.2
Michael Kerrisk
For MS_REMOUNT, source is ignored

mprotect.2
Michael Kerrisk [Rasmus Villemoes]
'addr' argument is not const
As reported by Rasmus:

Both my system's man-pages (3.22) and the latest online
(3.41) show:

int mprotect(const void *addr, size_t len, int prot);

as the prototype for mprotect(2). However, POSIX [1] and the
actual sys/mman.h (on all the systems I checked) do not have
the const qualifier on the first argument.

msgctl.2
semctl.2
shmctl.2
svipc.7
Michael Kerrisk
Don't mention that ipc_perm is defined in <sys/ipc.h>
There's no need to mention that the 'ipc_perm' structure
is defined in <sys/ipc.h>. That's an implementation detail,
and furthermore <sys/ipc.h> is itself included by the other
System V IPC header files. The current text might lead the

reader to conclude that they must include <sys/ipc.h>, which
is not the case (it is required neither on Linux, nor by the
standards).

msgctl.2
msgget.2
msgop.2
semctl.2
semget.2
semop.2
shmctl.2
shmget.2
Michael Kerrisk
NOTES: <sys/types.h> and <sys/ipc.h> aren't strictly needed
Add text to NOTES to say that the <sys/types.h> and <sys/ipc.h>
header files aren't required by Linux or the standards, but may
be needed for portability to old systems.

ptrace.2
Denys Vlasenko
Explain WNOHANG behavior and EINTR bug
I didn't like the "SIGKILL operates similarly, with exceptions"
phrase (if it's different, then it's not "similar", right?),
and now I got around to changing it. Now it says simply:
"SIGKILL does not generate signal-delivery-stop and therefore
the tracer can't suppress it."

Replaced "why WNOHANG is not reliable" example with a more
realistic one (the one which actually inspired to add this
information to man page in the first place): we got
ESRCH - process is gone! - but waitpid(WNOHANG)
can still
confusingly return 0 "no processes to wait for".

Replaced "This means that unneeded trailing arguments may
be omitted" part with a much better recommendation
to never do that and to supply zero arguments instead.
(The part about "undocumentedness" of gcc behavior was bogus,
btw - deleted).

Expanded BUGS section with the explanation and an example
of visible strace behavior on the buggy syscalls which
exit with EINTR on ptrace attach. I hope this will lead
to people submitting better bug reports to lkml about
such syscalls.

seteuid.2
Michael Kerrisk

Note glibc version where setegid() implementation changed
In glibc 2.2/2.3, setegid() switched from setregid() to setresgid().

set_tid_address.2
Michael Kerrisk
Rename 'ctid' argument for consistency with clone(2) page
Michael Kerrisk
Some
rewordings and minor clarifications

sigwaitinfo.2
Michael Kerrisk [Daniel Zingaro]
Some wording clarifications
Mainly rewording things like "is delivered" to "becomes pending",
which is more accurate terminology.

syscall.2
Michael Kerrisk
Add some more details to the description of syscall(2)
And add another example of using syscall() to the program example.

syscalls.2
Michael Kerrisk
Add kcmp(2)
Michael Kerrisk
Move discussion of set_zone_reclaim(2) out of main table
This system call was never visible to user space, so it makes
sense to move it out of the main table of system calls into
the notes below the table.

getifaddrs.3
Michael Kerrisk [Adrian Dabrowski]
Note that ifa_addr and ifa_netmask can be NULL

readdir.3
Michael Kerrisk [Jan Engelhardt]
Handle -1 error from pathconf() in example code snippet
Improve the example
demonstrating allocation of a buffer
for readdir_r() to handle -1 error return from pathconf().
Otherwise, naive readers may think that pathconf() return
value can be used without checking.

realpath.3
Shawn Landden
Use past tense with ancient history (libc4, libc5)

regex.3

Michael Kerrisk
Correct SEE ALSO reference to glibc manual "regex" section

rtime.3
Michael Kerrisk [Jan Engelhardt]
Fix broken pointer cast in example code

sem_close.3
sem_destroy.3
sem_getvalue.3
sem_init.3
sem_open.3
sem_post.3
sem_unlink.3
sem_wait.3
sem_overview.7
Michael Kerrisk
Note that "cc -pthread" is required; "-lrt" no longer works
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/874418

sigwait.3
Michael Kerrisk
Reword "is delivered" to "becomes pending"

strcat.3
Michael Kerrisk
Add some text to emphasize the dangers of buffer overruns
Michael Kerrisk
NOTES:
Add discussion of strlcat()

strcpy.3
Michael Kerrisk
Note that info is lost when strncpy() doesn't null terminate
Michael Kerrisk
Add some text to emphasize possibility of buffer runs with strcpy()
Michael Kerrisk
NOTES: Add a discussion of strlcpy()
Inspired by https://lwn.net/Articles/506530/
Michael Kerrisk
Fix description of the null-byte padding performed by strncpy()

tsearch.3
Michael Kerrisk
NOTES: remove redundant discussion of unorthodox use of term "postorder"
This point is already covered at greater length in the main
text of the page (See the piece "More commonly, ...").
Michael Kerrisk

Clarify use for first argument to the twalk() 'action' function
There's a number of details in POSIX that are omitted in
the current version of this page.
Michael Kerrisk
Some wording fixes

core.5
Michael Kerrisk
Note effect of madvise(2)
MADV_DONTDUMP flag

capabilities.7
Michael Kerrisk
Document CAP_BLOCK_SUSPEND

glob.7
Bjarni Ingi Gislason
Change 8 bit characters to 7 bit representation
Fixes rendering errors for accented 'a' characters.
Michael Kerrisk [Aaron Peschel]
Update bash(1) command used to obtain classical globbing behavior
The man page formerly noted the bash(1) v1 command to do this.

iso_8859-1.7
Bjarni Ingi Gislason
Explanation of SOFT HYPHEN and the code for it
<groff: iso_8859-2.7>:89: warning: can't find special character `shc'

This is the only "iso_8859-*.7" file that has this (now)
undefined character. The code in column four in "iso_8859-1.7" is
"0x2D" ("HYPHEN, MINUS SIGN" or "HYPHEN-MINUS") instead of "0xAD".
See Debian bug 156154 (or package "manpages").

There should be an explanation for this graphic character and the
code should
be 0xAD in iso_8859-1.7 (as in all others), even
though "[gn]roff" does not display a "HYPHEN" in that position of
the table.

The line with "SOFT HYPHEN" gets a footnote and a short
explanation.

mdoc.7
Bjarni Ingi Gislason
Fixing a warning and a table
Fis warning from "groff -ww ..." (or "man --warnings=w ..."):

<groff: mdoc.7>:294: warning:

tab character in unquoted macro argument

In one table the distance between columns is too small in the
"ps" output. (Bug in the groff "doc.tmac" macro?)

mdoc.samples.7
Bjarni Ingi Gislason
Fix warnings from [ng]roff, corrections
From "man -ww ..." (groff -ww ...):

<standard input>:541: warning:
tab character in unquoted macro argument
[+3 similar warnings]
<standard input>:813: warning: macro `Pu' not defined
Usage:
.Rv -std in sections 2 and 3 only (#1669)
mdoc warning: A .Bl directive has no matching .El (#1821)

String "Pu" defined as a row of punctuation characters.
".Bl" and ".El" fixed.
Some arguments, that start with a period or are the name of a
macro, protected with "\&".
Variable name for macro ".Rv" corrected.

netdevice.7
Bjarni Ingi Gislason
Line in table too long
Fix warning from "man ..." ("nroff -ww ..."):

nroff: netdevice.7: warning: around line 98:
table wider than line width

Fix: No right adjustment in text blocks in tables.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673873

netlink.7
Bjarni Ingi Gislason
Line in table is too long
Fix warning from "man ..." ("nroff -ww ..."):

nroff: netlink.7: warning: around line 195:
table wider than line width

Horizontal line incorporated into table.
No right adjustment of text blocks in tables.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673875
Simon Paillard [Herbert Xu]
Change description of "*_pid" fields to "Port ID"
As reported by Herbert Xu, these should not be considered as PIDs.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=383296

rtnetlink.7
Bjarni Ingi Gislason
Line in table too long
Fix warning from "man ..." ("nroff -ww ..."):

nroff: rtnetlink.7: warning: around line 415:
table wider than line width

Column gutter reduced to fit line length.
Right adjustment in text blocks removed in tables.
Some header made centered in tables.
One table put on same page.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674051

socket.7
Martin H
Document SO_MARK socket option

Commit 4a19ec5800fc3bb64e2d87c4d9fdd9e636086fe0 in Jan 2008 added
the new SO_MARK socket option.

This patch is based on text from the commit message.

See https://bugzilla.kernel.org/show_bug.cgi?id=16461.

svipc.7
Michael Kerrisk
SYNOPSIS: Remove include of <sys/types.h> and <sys/ipc.h>
Including <sys/types.h> and <sys/ipc.h> isn't needed on Linux
and isn't really relevant for the explanation on this page.

========== Changes in man-pages-3.43 ==========

Released: 2012-10-05, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adrian Bunk <bunk@kernel.org>
Anatoli Klassen <anatoli@aksoft.net>
Andreas Schwab <schwab@linux-m68k.org>
Bjarni Ingi Gislason <bjarniig@rhi.hi.is>
David Prévot <taffit@debian.org>
Eric Dumazet <edumazet@google.com>
Florian
 Weimer <fweimer@redhat.com>
Frédéric Brière <fbriere@fbriere.net>
Fredrik Arnerup <arnerup@kth.se>
Guillem Jover <guillem@hadrons.org>
Jan Engelhardt <jengelh@inai.de>
Michael Kerrisk <mtk.manpages@gmail.com>

Trevor Woerner <twoerner@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

getenv.3
  Michael Kerrisk [Florian Weimer, Andreas Schwab]
    Document secure_getenv(3)

New and changed links
---

phys.2
  Michael Kerrisk
    New link to unimplemented.2

secure_getenv.3
  Michael Kerrisk
    New link to getenv.3

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/-/\\-/ when real hyphen is required (e.g., in code)

Various pages
  David Prévot [Michael Kerrisk]
    Global fix: Various consistency
 fixes for SEE ALSO

Various pages
  Michael Kerrisk
    Global fix: use "Linux kernel source" consistently
      Rather than "kernel source".

Various pages
  Michael Kerrisk
    Global fix: disable justification and hyphenation in SEE ALSO
      For a better visual result, disable justification and hyphenation
      in SEE ALSO where page names are long.

syscalls.2
uname.2
boot.7
  Michael Kerrisk
    Global fix: s/OS/operating system/

Changes to individual pages
----

epoll_wait.2
  Michael Kerrisk [Fredrik Arnerup]
    Describe timeout limitation in kernels < 2.6.37
      As reported by Fredrik (and as far as I can tell the problem
      went back to 2.6.0):

      The timeout argument has an upper limit. Any values above that
      limit are treated the same as -1, i.e. to wait indefinitely.
      The limit is given by:

        #define EP_MAX_MSTIMEO min(1000ULL * MAX_SCHEDULE_TIMEOUT
 / HZ, \
        (LONG_MAX - 999ULL) / HZ)

      That is, the limit depends on the size of a long and the timer
      frequency. Assuming the long is never smaller than 32 bits
      and HZ never larger than 1000, the worst case is 35 minutes.
      I think this should be mentioned under "BUGS".

Although this is likely to be fixed in the future
(http://lkml.org/lkml/2010/8/8/144), the problem exists in
at least 2.6.14 - 2.6.35. I don't know if select(2) and poll(2)
are affected.

https://bugzilla.kernel.org/show_bug.cgi?id=20762
Michael Kerrisk
Add pointer to select(2) for discussion of close in another thread

getitimer.2
Michael Kerrisk [Trevor Woerner]
Note Linux's odd handling of the new_value==NULL case
Michael Kerrisk [Trevor Woerner]
Fix types used to declare fields in timeval struct

keyctl.2
David Prévot
Reorder SEE ALSO,
without .br

poll.2
Michael Kerrisk
Add pointer to select(2) for discussion of close in another thread

select.2
Michael Kerrisk [Stephane Fillod]
Note behavior if monitored file descriptor is closed in another thread
Executive summary: a sane application can't rely on any
particular behavior if another thread closes a file descriptor
being monitored by select().

See https://bugzilla.kernel.org/show_bug.cgi?id=40852
Michael Kerrisk
Clarify equivalent pselect() code in terms of threads
s/sigprogmask/pthread_sigmask/

semop.2
Michael Kerrisk
Recast discussion of blocking behavior in terms of threads
semop() blocks the calling thread, not the process.
Michael Kerrisk
SEE ALSO: Add clone(2)
Give reader a clue about CLONE_SYSVSEM.

shutdown.2
Michael Kerrisk [Eric Dumazet]
Document EINVAL error (and associated bug)

Eric
Dumazet noted that EINVAL was not documented. Some further
digging shows that it's also not diagnosed consistently.
See https://bugzilla.kernel.org/show_bug.cgi?id=47111.

sigaction.2
Michael Kerrisk
Tweak SA_RESETHAND description

timer_settime.2
Michael Kerrisk
Small rewording around discussion of pointer arguments

wait4.2
Adrian Bunk
Note that these functions are nonstandard and recommend alternatives
Some edits to Adrian's patch by mtk.
Michael Kerrisk
CONFORMING TO: Note SUS details for wait3()

gnu_get_libc_version.3
Michael Kerrisk
Remove unneeded "#define _GNU_SOURCE" from SYNOPSIS

pthread_kill.3
pthread_sigqueue.3
Michael Kerrisk
Remove wording "another"
Writing "another thread" in these pages implies that these
functions can't be used to send a signal to the calling thread
itself, which is of course untrue.

sigvec.3
Michael
Kerrisk
Add "int" arg to sv_handler definition in sigvec structure
Michael Kerrisk
Fix small error in discussion of blocking of signals
The signal that causes the handler to be invoked is blocked,
but saying "by default" implies that this can be changed via
the API. It cannot. (One needs sigaction(2) for that.)

syslog.3
Simon Josefsson
Remove (apparently bogus) text claiming LOG_AUTH is deprecated
LOG_AUTH is in POSIX, and widely available. There
seems to be no basis to the claim it is deprecated.

Quoting Simon:
I cannot find any other source that claim LOG_AUTH is
deprecated in any way. LOG_AUTH is distinct from
LOG_AUTHPRIV. The GNU C Library manual only documents
LOG_AUTH. The header files contains both without any
comment. Common systems like Debian appear to refer to
both auth and
authpriv facilities in syslog configurations.
Popular daemons appear to use both facilities.
Both facilities are discussed in several RFCs.

See https://bugzilla.kernel.org/show_bug.cgi?id=46091

ttyname.3
Michael Kerrisk
SEE ALSO: Add ctermid(3)

proc.5
Michael Kerrisk
Clarify header file related to 'flags' field of /proc/PID/stat
Michael Kerrisk [Frédéric Brière]
Update description of 'starttime' field of /proc/PID/stat
The unit of measurement changed from jiffies to clock ticks in
Linux 2.6.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=675891
Michael Kerrisk
Document /proc/sys/kernel/kptr_restrict
Michael Kerrisk [Kees Cook]
Document /proc/sys/fs/protected_symlinks
Based on text in Documentation/sysctl/fs.txt by Kees Cook
Michael Kerrisk [Kees Cook]
Document /proc/sys/fs/protected_hardlinks
Based
on text in Documentation/sysctl/fs.txt by Kees Cook

capabilities.7
Michael Kerrisk
Document interaction of CAP_SYSLOG and /proc/sys/kernel/kptr_restrict

ip.7
Michael Kerrisk
SEE ALSO: Add ipv6(7)
SEE ALSO: Add icmp(7)

man-pages.7
Michael Kerrisk
Add some advice about disabling hyphenation in SEE ALSO

ld.so.8
  Michael Kerrisk
    Describe interpretation of slashes in dependency strings
  Michael Kerrisk
    Repeat note that LD_LIBRARY_PATH is ignored in privileged programs
      This point is already noted when discussing search order for
      libraries, but it's worth repeating under the specific discussion
      of LD_LIBRARY_PATH further down the page.
  Michael Kerrisk
    Add some details for LD_PRELOAD
    Note that LD_PRELOAD list separator can be space or colon

========== Changes in man-pages-3.44 ==========

Released: 2012-11-07, Barcelona

Contributors

The
 following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Bert Hubert <bert.hubert@netherlabs.nl>
David Prévot <taffit@debian.org>
James Youngman <jay@gnu.org>
Kees Cook <keescook@chromium.org>
Lars Wirzenius <liw@iki.fi>
Lucas De Marchi <lucas.de.marchi@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Rusty Russell <rusty@rustcorp.com.au>
Simon Paillard <spaillard@debian.org>
Thomas Habets <thomas@habets.se>

Apologies if I missed anyone!

New and rewritten pages
---

delete_module.2
  Michael Kerrisk
    Rewrite to Linux 2.6+ reality
  Michael Kerrisk

Change license and copyright

There is now nothing left of the original FSF-copyrighted page. So, change the copyright and license.

Michael Kerrisk [Lucas De Marchi, Rusty Russell]

Substantial reorganization after comments from Rusty Russell

Rusty notes that O_NONBLOCK is almost always used in practice. Therefore, it would be better to reorganize the page to consider that "the default".

init_module.2

Michael Kerrisk

Rewrite to Linux 2.6+ reality

Michael Kerrisk

Change copyright and license

Little of the original page now remains. Change copyright and license

Michael Kerrisk [Rusty Russell]

Changes after review comments from Rusty Russell

Kees Cook

Add various pieces describing Linux 2.6+ behavior

Pieces take from, or inspired by, a patch sent by Kees.

getauxval.3

Michael Kerrisk

Document getauxval() function added in glibc 2.16

Global changes

Various pages

Michael Kerrisk

Global fix: Use consistent capitalization in NAME section

The line(s) in the NAME section should only use capitals where English usage dictates that. Otherwise, use

lowercase throughout.

Various pages

Michael Kerrisk

Global fix: "userspace" ==> "user space" or "user-space"

Existing pages variously use "userspace or "user space". But, "userspace" is not quite an English word. So change "userspace" to "user space" or, when used attributively, "user-space".

Changes to individual pages
---

clock_getres.2
clock_nanosleep.2
  Michael Kerrisk
    Linking with -lrt is no longer needed from glibc 2.17 onward

create_module.2
  Michael Kerrisk
    Note that this system call is present only in kernels before 2.6
  Michael Kerrisk
    Note that ENOSYS probably indicates kernel 2.6+

execve.2
  Michael Kerrisk
    Document treatment of PR_SET_PDEATHSIG on execve()
  Michael Kerrisk
    Document treatment of SECBIT_KEEP_CAPS securebits flag on execve()

fork.2
  Michael Kerrisk
    Note treatment of default timer slack value on fork()

getdomainname.2
   Simon Paillard [Lars Wirzenius]
    Point out that these calls relate to NIS, not DNS
      See http://bugs.debian.org/295635

get_kernel_syms.2
  Michael Kerrisk
    Note that this system call is present only in kernels before 2.6

ipc.2
  Michael Kerrisk
    Update note on architectures that don't have ipc()
      Replace mention of ia64 with x86-64 and ARM.

link.2
  Michael Kerrisk
    Add EPERM error triggered by /proc/sys/fs/protected_hardlink

prctl.2
  Michael Kerrisk
    Mention Documentation/prctl/no_new_privs.txt for PR_SET_NO_NEW_PRIVS
  Kees Cook
    update seccomp sections for mode 2 (BPF)
      This adds a short summary of the arguments used

for "mode 2" (BPF) seccomp.
Michael Kerrisk
Small improvements to PR_SET_SECCOMP discussion
Note type of 'arg3' for SECCOMP_MODE_FILTER.
Add pointer to Documentation/prctl/seccomp_filter.txt.
Michael Kerrisk
Note 'seccomp' semantics with respect to fork(), execve(), and prctl()
Michael Kerrisk
Document PR_SET_TIMERSLACK and PR_GET_TIMERSLACK
Michael Kerrisk
Reword PR_SET_NAME and PR_GET_NAME in terms of threads
Plus tfix
Kees Cook
document PR_SET_NO_NEW_PRIVS, PR_GET_NO_NEW_PRIVS
This adds a short description of the no_new_privs bit,
as described in Documentation/prctl/no_new_privs.txt.

ptrace.2
Michael Kerrisk
Clarify that some operations are not present on all architectures
PTRACE_GETREGS, PTRACE_SETGREFS, PTRACE_GETFPREGS,
and PTRACE_GETSPREGS are not present on all architectures.
PTRACE_SYSEMU and PTRACE_SYSEMU_SINGLESTEP are present only
on x86.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=122383

query_module.2
Michael Kerrisk
Add a few words clarifying reference to /sys/module
Michael Kerrisk
Note that
this system call is present only in kernels before 2.6
Michael Kerrisk
Note that ENOSYS probably indicates kernel 2.6+
Michael Kerrisk
SEE ALSO: Add modinfo(8) and lsinfo(8)
Michael Kerrisk
Move some information in NOTES to VERSIONS

socketcall.2
Michael Kerrisk
Update note on architectures that don't have socketcall()
Replace mention of ia64 with x86-64 and ARM.

times.2
Thomas Habets
Recommend clock_gettime(2) as alternative to times(2)

clock_getcpuclockid.3
  Michael Kerrisk
    Linking with -lrt is no longer needed from glibc 2.17 onward

fts.3
  Simon Paillard [James Youngman]
    Improve description of physical vs. logical tree walking
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=633505

getenv.3
  Michael Kerrisk
    SEE ALSO: add getauxval(3)

proc.5
  Michael Kerrisk
    Document /proc/meminfo
      Info mostly taken from Documentation/filesystems/proc.txt
       and Documentation/vm/hugetlbpage.txt.
  Michael Kerrisk
    Default for /proc/sys/fs/protected_{hardlinks,symlinks} is now 0
      The default setting of 1 in/proc/sys/fs/protected_hardlinks
      and /proc/sys/fs/protected_symlinks caused one too many
      breakages for Linus's taste, so commit 561ec64ae67e changed
      the default for both files to 0.
    Note system call error yielded by /proc/sys/fs/protected_symlinks
      Note that violating 'protected_symlinks' restrictions
      causes system calls to fail with the error EACCES.
  Michael Kerrisk
    Since Linux 2.6.27, /proc/sys/kernel/modprobe depends on CONFIG_MODULES

ipv6.7
  Bert Hubert
    Document IPV6_RECVPKTINFO

man-pages.7
  Michael Kerrisk
    Note rules for capitalization in NAME section

time.7
  Michael Kerrisk
    Add a subsection on timer slack

ld.so.8
  Michael Kerrisk
    SEE ALSO: add getauxval(3)

clone.2
Michael Kerrisk
Since 2.6.30, CLONE_NEWIPC also supports POSIX message queues

delete_module.2
Michael Kerrisk
Small rewording of description of effect of O_TRUNC

getrlimit.2
Michael Kerrisk [Trevor Woerner]
Document Linux's nonstandard treatment or RLIMIT_CPU soft limit
Upon encountering the RLIMIT_CPU soft limit when a SIGXCPU handler
has been installed, Linux invokes the signal handler *and* raises
the soft limit by one second. This behavior repeats until the
limit is encountered. No other implementation that I tested

(Solaris 10, FreeBSD 9.0, OpenBSD 5.0) does this, and it seems
unlikely to be POSIX-conformant. The (Linux-specific)
RLIMIT_RTTIME soft limit exhibits similar behavior.
Michael Kerrisk
Point reader at discussion of /proc/[pid]/limits in proc(5)

io_getevents.2
Michael Kerrisk
io_getevents() may cause segfault when called with invalid ctx_id
For reference see: http://marc.info/?l=linux-aio&m=130089887002435&w=2

recv.2
Michael
Kerrisk [Eric Dumazet]
UNIX domain sockets support MSG_TRUNC since 3.4

sendmmsg.2
Elie De Brauwer
Add example program for sendmmsg()

stat.2
Simon Paillard
Clarify description of EOVERFLOW error
The EOVERFLOW error is not only for st_size, but also
inode and block size fields. See glibc source file
sysdeps/unix/sysv/linux/xstatconv.c and kernel source
file fs/stat.c. Also, fix bit/byte confusion
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604928

syscalls.2
Michael Kerrisk
Update various references to "i386" to "x86"
Michael Kerrisk
Add s390_runtime_instr(2)

sysctl.2
Michael Kerrisk
Mention CONFIG_SYSCTL_SYSCALL
Michael Kerrisk
Calls to sysctl() log warnings to the kernel log since 2.6.24

syslog.2
Michael Kerrisk
Substantially reorganize discussion of commands
Make the layout of the discussion of the commands

more readable.
Michael Kerrisk

Add kernel symbolic 'type' names
Michael Kerrisk
Clarify SYSLOG_ACTION_SIZE_UNREAD semantics
SYSLOG_ACTION_SIZE_UNREAD returns the number of bytes
available for reading via SYSLOG_ACTION_READ.
Michael Kerrisk
Clarify where SYSLOG_ACTION_READ_ALL places data it reads
Michael Kerrisk
Clarify semantics of SYSLOG_ACTION_CLEAR
The SYSLOG_ACTION_CLEAR command (5) does not really clear
the ring buffer; rather it affects the semantics of what
is returned by commands 3 (SYSLOG_ACTION_READ_ALL) and
4 (SYSLOG_ACTION_READ_CLEAR).
Michael Kerrisk
Clarify discussion of privileges for commands 3 and 10
Michael Kerrisk
Add mention of CONFIG_LOG_BUF_SHIFT

wait.2
Michael Kerrisk
BUGS: Document odd waitid() behavior when 'infop' is NULL

getifaddrs.3
Michael Kerrisk [Julien Cristau]
Update description
of ifa_data to Linux 2.6+ reality
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778

memcmp.3
Michael Kerrisk [Jon Grant]
Enhance RETURN VALUE text and remove redundant text from DESCRIPTION
Note that sign of result equals sign of difference between
first two bytes that differ (treated as "unsigned char")."

mkstemp.3
Michael Kerrisk [Florian Weimer]
Deemphasize discussion of mode 066 in glibc 2.0.6
Glibc 2.0.6 is now so ld that the discussion of details
of that version can be deemphasized placing just under
NOTES.

See https://bugzilla.kernel.org/show_bug.cgi?id=51811

strcmp.3
Michael Kerrisk [Jon Grant]
Enhance RETURN VALUE text and remove redundant text from DESCRIPTION
Note that sign of result equals sign of difference between
first two bytes that differ (treated as "unsigned char")."

ttyname.3
  Michael Kerrisk

  Fix confused text in ERRORS
      The existing text suggested that the ERRORS applied
      only for ttyname_r(). However, 2 of the 3 errors
      can occur for ttyname().

undocumented.3
  Michael Kerrisk
    Remove some now documented functions

proc.5
  Michael Kerrisk [Jim Paris]
    Correct description of SwapFree in /proc/meminfo
  Michael Kerrisk
    Note change of /proc/[pid]/limits file permissions in 2.6.36

resolv.conf.5
  Simon Paillard
    Document IPv6 format for nameserver
      See: http://bugs.debian.org/610036

capabilities.7
  Michael Kerrisk [Rens van der Heijden]
    Correct URL for POSIX.1e draft

ipv6.7
  Gao Feng
    Add description of getsockopt() for IPV6_MTU
      In IPv4,IP_MTU is only supported by getsockopt.
      In IPv6, we can use IPV6_MTU to set socket's MTU,
      but the return value of getsockopt() is the path MTU.

rtnetlink.7
  Michael Kerrisk [Julien Cristau]

   Update description of IFLA_STATS to Linux 2.6+ reality
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778

socket.7
  Michael Kerrisk [YOSHIFUJI Hideaki]
    Document 'sockaddr' and 'sockaddr_storage' types
  Andi Kleen
    Explain effect of SO_SNDTIMEO for connect()
      When SO_SNDTIMEO is set before connect(), then connect()
      may return EWOULDBLOCK when the timeout fires.

========== Changes in man-pages-3.46 ==========

Released: 2013-01-27, Canberra

Zsbán Ambrus <ambrus@math.bme.hu>

Apologies if I missed anyone!

New and rewritten pages
---

kcmp.2
  Cyrill Gorcunov, Michael Kerrisk
    New page for kcmp(2)

Newly documented interfaces in existing pages
---

init_module.2
   Michael Kerrisk [Kees Cook, Rusty Russell, Lucas De Marchi]
    Document finit_module(2)
  Rusty Russell [Lucas De Marchi, Kees Cook]
    Document finit_module() 'flags' argument
      Document MODULE_INIT_IGNORE_MODVERSIONS and
      MODULE_INIT_IGNORE_VERMAGIC. (Some edits by mtk.)

New and changed links
---

finit_module.2
  Michael Kerrisk
    New link to init_module.2

__after_morecore_hook.3
__free_hook.3
__malloc_initialize_hook.3
__memalign_hook.3
__realloc_hook.3
  Michael Kerrisk
    New link to malloc_hook.3

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/tty/terminal/

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Add kernel versions for various CLONE_* constants
  Michael Kerrisk

CLONE_NEWIPC governs mechanisms that don't have filesystem pathnames
Michael Kerrisk
CLONE_NEWIPC doesn't mount the POSIX
MQ file system
Michael Kerrisk
Add an example program (CLONE_NEWUTS)
Michael Kerrisk
Some reworking of CLONE_NEWIPC text
No substantial content changes.
Michael Kerrisk
SEE ALSO: add kcmp(2)
SEE ALSO: add setns(2)

fallocate.2
Michael Kerrisk
FALLOC_FL_* flags are defined in glibc only since 2.18

getxattr.2
removexattr.2
setxattr.2
Michael Kerrisk [Andrew Perepechko,]
Note that ENOATTR is a synonym for ENODATA
Various people have pointed out that strace(1) shows ENODATA
for the case where the named attribute does not exist, or
the process has no access to this attribute. ENODATA
and ENOATTR are in fact defined as synonyms. Point this out
in the man page, so that people understand the strace(1) info.

See https://bugzilla.kernel.org/show_bug.cgi?id=51871

getxattr.2
listxattr.2
removexattr.2
setxattr.2
Michael Kerrisk
Put
errors under ERRORS section
The errno values on these pages were listed in a nonstandard
way under the RETURN VALUE section. Put them in ERRORS sections.

init_module.2
Michael Kerrisk [Rusty Russell]
ERRORS: Add errors for module signatures (EBADMSG, ENOKEY)

link.2
mkdir.2
mknod.2
open.2

rename.2
symlink.2
write.2
mkfifo.3
  Mark Hills
    Document EDQUOT error
      The return error EDQUOT is not documented in open(2), write(2),
      symlink(2) etc.

      Whether inodes or disk blocks are required for each function
      is something I based on received wisdom and BSD documentation,
      rather than tracing the code to the kernel. For symlink(2)
      this certainly depends on the file system type.

listxattr.2
  Michael Kerrisk [Theodore Ts'o]
    Fix RETURN VALUE description
      On success, 0 may be returned, so change wording from
      "positive number" to "nonnegative number".

outb.2
   Michael Kerrisk
     Add SYNOPSIS

prctl.2
  Kees Cook
    Document PR_SET_PTRACER
      Document the Yama LSM's prctl handler that allows processes to
      declare ptrace restriction exception relationships via
      PR_SET_PTRACER.
  Michael Kerrisk
    Make it explicit that PR_SET_PTRACER replaces previous setting
      The attribute is a scalar, not a list.
  Shawn Landden
    Document EINVAL error for PR_SET_PTRACER
  Michael Kerrisk
    Document PR_GET_TID_ADDRESS

ptrace.2
  Michael Kerrisk
    Document PTRACE_O_EXITKILL
  Michael Kerrisk
    Place PTRACE_SETOPTIONS list in alphabetical order

query_module.2
  Michael Kerrisk
    Must be called using syscall(2)
      Yes, the call is way obsolete, but add this info

for completeness.

recvmmsg.2
  Elie De Brauwer
    Add/correct kernel version info for recvmmsg() and MSG_WAITFORNONE
      This patch isolates the since/version
related fixes as requested.
      This change introduces the following delta:
       * The page states it was added in 2.6.32 but it is only added
         2.6.33 (ref: http://kernelnewbies.org/Linux_2_6_33)
       * The MSG_WAITFORONE flag was in turn only added in 2.6.34
        (ref: http://kernelnewbies.org/Linux_2_6_34)
  Elie De Brauwer
    Add an example program

setns.2
  Michael Kerrisk
    Add example program

sigaction.2
  Michael Kerrisk [Zsbán Ambrus]
    Note feature test macro requirements for 'siginfo_t'
      See https://bugzilla.kernel.org/show_bug.cgi?id=52931

syscalls.2
  Michael Kerrisk
    Add kern_features(2)
  Michael Kerrisk
    Add utrap_install(2)
      Sparc-specific, present since ancient times
  Michael Kerrisk
    Add finit_module(2)

sysctl.2
  Michael Kerrisk [Garrett Cooper]
    ERRORS: EACCES as a synonym for EPRM
      See https://bugzilla.kernel.org/show_bug.cgi?id=46731
       and http://thread.gmane.org/gmane.linux.ltp/11413/focus=957635
         From: Garrett Cooper <yanegomi <at> gmail.com>
         Subject: Re: [LTP] [PATCH] sysctl03: sysctl returns EACCES after 2.6.33-rc1
         Newsgroups: gmane.linux.kernel, gmane.linux.ltp
         Date: 2010-03-04 18:35:33 GMT

unshare.2
  Michael Kerrisk
    Update NOTES on unimplemented flags
  Michael Kerrisk
    Fix text problems in description of CLONE_FS

Michael Kerrisk
SEE ALSO: add kcmp(2)
SEE ALSO: add setns(2)
Michael Kerrisk
Reorder CLONE_NEWUTS entry in list

difftime.3
Michael Kerrisk [Michal Gorny]
Remove crufty text about 'time_t' on "other systems"
Back in 2006, some text came in via Debian patches that seems
crufty. Remove it.

See https://bugzilla.kernel.org/show_bug.cgi?id=46731

getaddrinfo.3
getnameinfo.3
Michael Kerrisk [Peter Budny]
Fix some confused references to function names
See https://bugzilla.kernel.org/show_bug.cgi?id=52741

getspnam.3
Michael Kerrisk [Wolfgang Rohdewald]
ERRORS: Add EACCES
See https://bugzilla.kernel.org/show_bug.cgi?id=52681

__setfpucw.3
Michael Kerrisk
Add proper page cross refs for alternate functions

core.5
proc.5
Kees Cook
Clarify suid_dumpable versus core_pattern
In Linux 3.6, additional requirements were placed on core_pattern
when suid_dumpable is set to 2. Document this and include commit
references.
Justin Lebar
statm's "shared" field refers to pages backed by files
I noticed that statm's "shared" field doesn't match the sum of
all the "shared" entries in smaps [1].

The kernel docs explain that statm's "shared" field is "number of
pages that are shared (i.e. backed by a file)" [2]. smaps appears
to
call a page shared if it's mapped by at least two processes,
which explains this discrepancy.

I'm not a kernel hacker, but it appears to me they do mean "i.e."

and not "e.g." in the statm description: In
fs/proc/task_mmu.c::task_statm, I see

*shared = get_mm_counter(mm, MM_FILEPAGES);

Here's a patch which updates the man page to match the (hopefully
correct) kernel docs.

[1] https://bugzilla.mozilla.org/show_bug.cgi?id=807181
[2]
http://git.kernel.org/?p=linux/kernel/git/torvalds/linux.git;a=blob;f=Documentation/filesystems/proc.txt;h=a1793d67
0cd01bd374eddf54ffdfc768504291ff;hb=HEAD

proc.5
Kees Cook
Put /proc/sys/kernel/hotplug in alphabetical order
Kees Cook
Document /proc/sys/kernel/dmesg_restrict
Kees Cook
Linux 3.4 changed permissions needed to change kptr_restrict
Michael Kerrisk [Samuel Thibault, Simon Paillard]
Add
field numbers for /proc/PID/stat
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Add numbering to /proc/stat "cpu" fields
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Michael Kerrisk
Reorganize text describing /proc/stat "cpu" fields
Michael Kerrisk
Rewording of suid_dumpable text after comments from Kees Cook
Michael Kerrisk [Samuel Thibault, Simon Paillard]
Add field numbers for /proc/[pid]/statm
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Michael Kerrisk
Document /proc/stat "cpu" "nice_guest" field
Info taken from commit ce0e7b28fb75cb003cfc8d0238613aaf1c55e797
Michael Kerrisk [Peter Lekeynstein]
Document /prod/[pid]/oom_score_adj
Text taken directly from Documentation/filesystems/proc.txt,
with some light editing.

See https://bugzilla.kernel.org/show_bug.cgi?id=50421

shells.5
Michael
Kerrisk
Add /etc/bash to list of example shells

ttytype.5
  Michael Kerrisk
    Add proper xref for termcap and terminfo pages

capabilities.7
  Michael Kerrisk
    Add kcmp(2) under CAP_SYS_PTRACE

man-pages.7
  Michael Kerrisk
    Update description of Section 7

========== Changes in man-pages-3.47 ==========

Released: 2013-02-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Lennart Poettering <lennart@poettering.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Radek Pazdera <rpazdera@redhat.com>
Reuben Thomas <rrt@sc3d.org>
Shawn Landden <shawnlandden@gmail.com>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vweaver1@eecs.utk.edu>

Apologies
 if I missed anyone!

New and rewritten pages
---

perf_event_open.2
  Vincent Weaver
    New page documenting perf_event_open(2)

pthread_setname_np.3
  Chandan Apsangi, Michael Kerrisk
    New page for pthread_setname_np(3) and pthread_getname_np(3)

sln.8
  Michael Kerrisk [Peter Schiffer]
    New page documenting the 'sln' command provided by glibc
      Inspired by a Red Hat downstream page, but with rather
      more detail.

Newly documented interfaces in existing pages
---

prctl.2
  Michael Kerrisk [Shawn Landden, Lennart Poettering]
    Document PR_SET_CHILD_SUBREAPER and PR_GET_CHILD_SUBREAPER

ip.7
  Radek Pazdera
    Add source-specific multicast sockopts
      This patch adds documentation of several source-specific multicast
      socket options that were added to kernel with implementation
      of IGMPv3 in 2.5.68.

      The
 following socket options were added:
        IP_ADD_SOURCE_MEMBERSHIP
        IP_DROP_SOURCE_MEMBERSHIP
        IP_BLOCK_SOURCE
        IP_UNBLOCK_SOURCE
        IP_MSFILTER

Pages moved across sections
---

getcontext.3
  Michael Kerrisk
    This page really belongs in Section 3 (moved from Section 2)

getdtablesize.3
  Michael Kerrisk
    Move from Section 2

New and changed links
---

getcontext.2
  Michael Kerrisk
    Make link to page moved into Section 3

getdtablesize.2
  Michael Kerrisk
    Link to renamed getdtablesize.3

setcontext.2
  Michael Kerrisk
    Modify link to point to Section 3

pthread_getname_np.3
  Michael Kerrisk
    New link to new pthread_setname_np.3

setcontext.3
  Michael Kerrisk
    Link to getcontext page renamed into Section 3

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    SEE ALSO: add
 fallocate(1)

flock.2
  Michael Kerrisk
    SEE ALSO: add flock(1)

fork.2
  Michael Kerrisk
    SEE ALSO: add exit(2)

getpriority.2
  Michael Kerrisk
    BUGS: note that nice value is per-thread on Linux

getrlimit.2
  Michael Kerrisk
    SEE ALSO: add prlimit(1)

gettid.2
  Michael Kerrisk

SEE ALSO: add various system calls that use thread IDs

ioprio_set.2
Michael Kerrisk
SEE ALSO: add ionice(1)

sched_setaffinity.2
Michael Kerrisk
SEE ALSO: add taskset(1)

sched_setparam.2
Michael Kerrisk
Scheduling policy and parameters are per-thread on Linux
Direct the reader to the discussion in sched_setscheduler(2).

sched_setscheduler.2
Michael Kerrisk
Scheduling policy and parameters are per-thread on Linux
Michael Kerrisk
SEE ALSO: add chrt(1)

setsid.2
Michael Kerrisk
SEE ALSO: add setsid(1)

shmop.2
Michael Kerrisk [Peter Schiffer]
ERRORS: Add EIDRM

Taken from Red Hat downstream patch

sigaction.2
makecontext.3
Michael Kerrisk
Change getcontext/setcontext page ref to Section 3

signal.2
Michael Kerrisk [Reuben Thomas]
Clarify System V vs BSD semantics for signal()

syscalls.2
Michael Kerrisk
The list on this page is not just syscalls common to all platforms
Michael Kerrisk
Add perfctr(2)
Add ppc_rtas(2)
Michael Kerrisk
Add kernel version number of utrap_install(2)

unimplemented.2
  Michael Kerrisk [Peter Schiffer]
    Remove mention of kernel version number in DESCRIPTION

inet.3
  Michael Kerrisk [Peter Schiffer]
    Fix error in EXAMPLE using inet_aton()
      See https://bugzilla.redhat.com/show_bug.cgi?id=837090
      Patch taken from Red Hat downstream.

posix_fallocate.3
  Michael Kerrisk
    SEE ALSO: add fallocate(1)

regex.3
  Reuben Thomas
    Clarify details of matching
      The first is that it's far from
 clear that the end points of the
      complete string match are stored in the zero'th element of the
      regmatch_t array; secondly, the phrase "next largest substring
      match" is positively misleading, implying some sort of size
      ordering, whereas in fact they are ordered according to their
      appearance in the regex pattern.

scanf.3
  Michael Kerrisk
    Clarify meaning of "string conversions" for 'm' modifier
  Mike Frysinger
    Update %a vs %m documentation
      POSIX.1-2008 adopted the 'm' flag for dynamic allocation. Update
      page to cover it and relegate the glibc-specific 'a' flag to
      NOTES.

strtol.3
  Michael Kerrisk [Peter Schiffer]
    Replace some bogus text about "thousands separator"
      See https://bugzilla.redhat.com/show_bug.cgi?id=652870

sysconf.3
  Michael Kerrisk [Peter Schiffer]
    Use "_SC_PAGESIZE" consistently on page
      s/_SC_PAGE_SIZE/_SC_PAGESIZE/
 in one instance.
      From Red Hat downstream patch.

nscd.conf.5

Peter Schiffer
Add max-db-size and auto-propagate descriptions, default values, + misc
* added missing valid services (services and netgroup)
* added many default values for options
* reordered options according to the nscd.conf file
(logical order)
* added 2 missing options: max-db-size and auto-propagate

nsswitch.conf.5
Peter Schiffer
Mention initgroups db

proc.5
Michael Kerrisk
Document /proc/profile
Michael Kerrisk [Peter Schiffer]
Update /proc/sys/fs/file-nr to include Linux 2.6 details
Michael Kerrisk
Clarify relationship between file-max and file-nr
The third value in /proc/sys/fs/file-nr is the same as
the value in /proc/sys/fs/file-max.
Michael Kerrisk
Note message written to kernel log when file-max limit is hit
Info
from Documentation/sysctl/fs.txt.
Michael Kerrisk
Mention lscpu(1) under discussion of /proc/cpuinfo

resolv.conf.5
Michael Kerrisk [Peter Schiffer]
Document "single-request-reopen" option
Taken from Red Hat downstream patch

See https://bugzilla.redhat.com/show_bug.cgi?id=717770
See http://thread.gmane.org/gmane.linux.man/3161

utmp.5
Michael Kerrisk
SEE ALSO: add utmpdump(1)

cpuset.7
Simon Paillard
Add missing 'cpuset.' prefix for some flags
See kernel commit e21a05cb408bb9f244f11a0813d4b355dad0822e

svipc.7
Michael Kerrisk
SEE ALSO: add ipcmk(1), ipcrm(1), ipcs(1)

termio.7
  Michael Kerrisk
    SEE ALSO: add reset(1), setterm(1), stty(1), tty(4)

ld.so.8
  Michael Kerrisk [Peter Schiffer]
    LD_VERBOSE does not work with ld.so --list and --verify
      From Red Hat downstream patch

      See https://bugzilla.redhat.com/show_bug.cgi?id=532629
  Michael
 Kerrisk
    SEE ALSO: add sln(8)

zdump.8
  Michael Kerrisk [Peter Schiffer]
    Bring up to date with zdump --help
      Patch taken from Red Hat downstream.

========== Changes in man-pages-3.48 ==========

Released: 2013-03-05, Munich

Apologies if I missed anyone!

New and rewritten pages
----

getunwind.2
  Marcela Maslanova
    New page documenting getunwind(2)
      Taken from Red Hat downstream man pages set
  Michael Kerrisk
    Much rewriting
      Some text taken from arch/ia64/kernel/unwind.c.

perfmonctl.2
  Ivana Varekova
    New page documenting IA-64-specific perfmonctl(2)
      Taken from Red Hat downstream man pages
  Michael Kerrisk
    Rework discussion of PFM_CREATE_CONTEXT
    Add VERSIONS and CONFORMING TO
    Note that there
 is no glibc wrapper
    Remove PFM_CREATE_EVTSETS, PFM_DELETE_EVTSETS, PFM_GETINFO_EVTSETS
      These don't exist, and it appears they never have.
    Fix argument types for PFM_WRITE_PMCS, PFM_WRITE_PMDS, PFM_READ_PMDS
      The types that were being used don't exist!
    Briefly document PFM_GET_FEATURES, PFM_DEBUG, PFM_GET_PMC_RESET_VAL

gai.conf.5
  Ulrich Drepper
    New page documenting gai.conf
      Taken from Red Hat downstream pages

nss.5
  Ulrich Drepper

New page describing nss.conf

Newly documented interfaces in existing pages
---

clock_getres.2
  Cyril Hrubis
    Document CLOCK_REALTIME_COARSE and CLOCK_MONOTONIC_COARSE
  Cyril Hrubis
    Document CLOCK_BOOTTIME
  Michael Kerrisk
    Some improvements to CLOCK_BOOTTIME description

ptrace.2
  Denys Vlasenko
    Document PTRACE_GETREGSET, PTRACE_SETREGSET, PTRACE_SEIZE, and friends
      Document PTRACE_GETREGSET,
 PTRACE_SETREGSET,
      PTRACE_SEIZE, PTRACE_INTERRUPT, and PTRACE_LISTEN.

New and changed links
---

fattach.2
fdetach.2
getmsg.2
isastream.2
putmsg.2
  Michael Kerrisk [Peter Schiffer]
    New link to unimplemented.2
      Taken from Red Hat downstream.

      See https://bugzilla.redhat.com/show_bug.cgi?id=436407

Global changes

Many pages
  Michael Kerrisk
    Global fix: remove unneeded double quotes in .SH headings

Many pages
  Michael Kerrisk
    Global fix: remove unneeded double quotes in .SS headings

Many pages
  Michael Kerrisk
    Global fix: use consistent capitalization in .SS headings
      Capitalization in .SS sections across pages (and sometimes even
      within a single page) is wildly inconsistent. Make it consistent.
      Capitalize first word in heading, but otherwise use lower case,
      except where English usage (e.g., proper nouns) or programming
       language requirements (e.g., identifier names) dictate otherwise.

Many pages
  Michael Kerrisk [Denys Vlasenko]
    Remove double blank lines in output

Various pages
  Michael Kerrisk
    Fix order of SH sections

Changes to individual pages
----

accept.2
  Michael Kerrisk
    NAME: Add "accept4"

access.2
  Colin Walters
    Note that access() may also fail for FUSE
      Since in some cases (e.g. libguestfs's guestmount) it also has the
      semantics where files can appear owned by root, but are actually
      mutable by the user, despite what one might infer from the Unix
      permissions.

getpeername.2
  Michael Kerrisk [Kai Kunschke]
    Clarify semantics of getpeername() for datagram sockets
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674034

getuid.2
  Michael Kerrisk
    Remove duplicate section heading

mmap.2
  Cyril Hrubis
    Add note
 about partial page in BUGS section
      This adds a note about Linux behavior with partial page at the end
      of the object. The problem here is that a page that contains only

part of a file (because the file size is not multiple of PAGE_SIZE)
stays in page cache even after the mapping is unmapped and the file
is closed. So if some process dirties such page, other mappings
will see the changes rather than zeroes.
Michael Kerrisk [Török Edwin]
Some 'flags' values require a feature test macro to be defined
Add text to NOTES noting that some MAP_* constants are
defined only if a suitable feature test macro is defined.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=542601
Cyril Hrubis
Document EOVERFLOW error

open.2
Michael Kerrisk
Clarify list of file creation flags
POSIX.1-2008 TC1 clarified this, so that O_CLOEXEC,
O_DIRECTORY,
and O_NOFOLLOW are also in this list.

prctl.2
Cyrill Gorcunov
Add some details for PR_GET_TID_ADDRESS

read.2
Michael Kerrisk [Zack Weinberg]
Clarify interaction of count==0 and error checking
POSIX deliberately leaves this case open, so the man
page should be less specific about what happens.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533232
Michael Kerrisk [Marc Lehmann]
Remove crufty text about O_NONBLOCK on files
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=700529
Michael Kerrisk
Clarify details for seekable files

unimplemented.2
Michael Kerrisk [Peter Schiffer]
Add various STREAMS interfaces to NAME
Taken from Red Hat downstream.

See https://bugzilla.redhat.com/show_bug.cgi?id=436407

cexp2.3
Michael Kerrisk
Still does not exist in glibc 2.17

exit.3

Michael Kerrisk
Note that a call to execve()
clears exit handler registrations

getaddrinfo.3
Michael Kerrisk
SEE ALSO: Add gai.conf(5)

malloc_trim.3
Michael Kerrisk
Remove duplicate section title

printf.3
Marshel Abraham [Graham Gower, Graham Gower]
Fix error handling in example code
See https://bugzilla.kernel.org/show_bug.cgi?id=23282

pthread_yield.3
Michael Kerrisk [Aristeu Rozanski]
Add _GNU_SOURCE feature test macro to SYNOPSIS

resolver.3
resolv.conf.5
Michael Kerrisk [Nathan Stratton Treadway, Simon Heimberg]
RES_DEBUG is only available if glibc is compiled with debug support
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=692136
and https://bugzilla.kernel.org/show_bug.cgi?id=43061

strtol.3
Michael Kerrisk [Peter Schiffer]
Remove crufty text from previous fix

core.5
Michael Kerrisk
Document CONFIG_COREDUMP

capabilities.7
Andrey Vagin
Nonexistent bits are no longer shown as set
in /proc/PID/status Cap*

inotify.7
Michael Kerrisk
A monitoring process can't easily distinguish events triggered by itself

ip.7
Flavio Leitner [Peter Schiffer]
Improve explanation about calling listen() or connect()

man-pages.7
  Michael Kerrisk
    Describe rules for capitalization in .SS headings

rtnetlink.7
  Pavel Emelyanov
    Add info about ability to create links with given index
      Since kernel v3.7 the RTM_NEWLINK message now accepts nonzero
      values in ifi_index field. Mention this fact in the respective
      rtnetlink.7 section.

socket.7
  Pavel Emelyanov
    SO_BINDTODEVICE is now readable
      SO_BINDTODEVICE is readable since kernel 3.8.

========== Changes in man-pages-3.49 ==========

Released: 2013-03-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have
 been
incorporated in changes in this release:

Michael Kerrisk <mtk.manpages@gmail.com>

Global changes

The goal of the changes below to consistently format copyright
and license information in the comments in the page source
at the top of each page. This allows for easy scripting to
extract that information. Following these changes the comments
the top of the page source should now consistently have the form:

  .\" <copyright info, possibly spread over several lines>
  .\"
  .\" %%%LICENSE_START(<license-type>)
  .\" <license text>
  .\" %%%LICENSE_END

.\" <other comments>

Note that the 'license-type' is merely descriptive. Its purpose is
to simplify scripting for the purpose of gathering statistics on
types of licenses used in man-pages. It is NOT a statement about
the actual licensing of the page; that license is contain INSIDE the
LICENSE_START...LICENSE_END clause.

All pages
  Michael Kerrisk
    Add a LICENSE_START()...LICENSE_END clause
in source at
    top of each page that encapsulates the license text.
  Michael Kerrisk
    Put copyright info at top of page, followed by blank line and LICENSE

Various pages
  Michael Kerrisk
     Update info in source comments on where to get a copy of the GPL

Various pages
  Michael Kerrisk
    Remove "Hey Emacs" comment in page source
      Only certain pages have this; there is no consistency, so
      remove it from all pages
  Michael Kerrisk
    Remove "-*- nroff -*-" comment at top of source

========== Changes in man-pages-3.50 ==========

Released: 2013-03-15, Munich

Simon Paillard <spaillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages
---

canonicalize_file_name.3
  Michael Kerrisk
    Rewrite page, adding much more detail

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/END_LICENSE/LICENSE_END/

Various pages
  Michael Kerrisk
    Global fix: s/bitmask/bit mask/

Changes to individual pages
---

getent.1
  Mark R Bannister
    netgroup description incorrectly refers to initgroups

capget.2
  Michael Kerrisk
    Update URL for libcap

fork.2
  Michael Kerrisk
    Port access permission bits (ioperm()) are turned off in
 the child

futex.2
  Michael Kerrisk

'timeout' is a minimum duration that the call will wait, not a maximum

ioperm.2
Michael Kerrisk
Note that iopl() level of 3 is needed to access ports
Michael Kerrisk
'num' is *bits* not bytes!
Michael Kerrisk
Linux 2.6.8 lifted the port limit to 65,536
See http://article.gmane.org/gmane.linux.kernel/202624/
From: Stas Sergeev <stsp <at> aknet.ru>
Subject: [patch][rfc] Larger IO bitmap
Date: 2004-05-07 19:55:03 GMT
Michael Kerrisk
ioperm() operates on the calling *thread* (not process)
Michael Kerrisk
Clarify meaning of 'turn_on' argument
Plus form formatting fixes.
Michael Kerrisk
Clarify that default state of permission bits in child is off
Michael Kerrisk
NOTES: add mention of /proc/ioports
Michael Kerrisk
SEE ALSO: add outb(2)

iopl.2
Michael Kerrisk
CAP_SYS_RAWIO is required
to *raise* the I/O privilege level
Michael Kerrisk
Clarify that the two least significant bits of 'level' are what matter
Michael Kerrisk
SEE ALSO: add outb(2)

syscalls.2
Michael Kerrisk
Add version information for all (other) syscalls
Michael Kerrisk
Add perfmonctl(2)

futimes.3
Michael Kerrisk [Jonathan Nieder]
ERRORS: Add ENOSYS for lutimes()
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=620746

getpass.3
Michael Kerrisk [Erik Saule]
Suggest use of the ECHO flag as an alternative

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=644261

realpath.3
  Michael Kerrisk
    Document GNU extensions for EACCES and ENOENT errors

stdarg.3
  Michael Kerrisk [Friedrich Delgado Friedrichs]
    Describe va_copy()
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=575077

termios.3
  Michael Kerrisk [Bernhard Kuemel]
    Mention that noncanonical mode
 does not do input processing
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=643854

random.4
  Elie De Brauwer
    Document write and document the ioctl interface of /dev/random
      The update consists out of two parts:
       - a minor thing which just documents what happens if a write to
         /dev/(u)random is performed, which is used in the example
         script but not explicitly mentioned.
       - the other (biggest) part is the documentation of the ioctl()
         interface which /dev/(u)random exposes. This ioctl() lives in
         drivers/char/random.c and the primitives can be found in
         include/linux/random.h

      One comment remains, there used to be an RNDGETPOOL ioctl() which
      disappeared in v2.6.9. I found two patches on the net:
      - http://www.kernel.org/pub/linux/kernel/people/akpm/patches/2.6/2.6.8.1/2.6.8.1-mm4/broken-out/dev-random-remove-rndgetpool-ioctl.patch
       - https://lkml.org/lkml/2004/3/25/168

      But as far as I can tell the first one got applied but the 2nd
      one seems more correct. The result is that even today one can
      still find traces of the RNDGETPOOL ioctl() in the header files.
      Is this there for historical reasons or because it might break
      userspace, even though using it will just give an EINVAL.

bootparam.7
  Jose Luis Domingo Lopez
    Document 'rootfstype' option
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182014

capabilities.7
  Michael Kerrisk

Add various pieces under CAP_SYS_RAWIO
Info obtained by grepping the kernel source.
Michael Kerrisk
Add CAP_SYS_RESOURCE /proc/PID/oom_score_adj case

netlink.7
Andrey Vagin
Add a note about broadcast messages to multiple groups

socket.7
Michael Kerrisk [Florian Weimer]
Define _GNU_SOURCE to obtain the definition of 'struct
ucred'
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572210

========== Changes in man-pages-3.51 ==========

Released: 2013-04-17, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andreas Jaeger <aj@suse.de>
Andrew Clayton <andrew@digital-domain.net>
Brian M. Carlson <sandals@crustytoothpaste.net>
Changhee Han <ch0.han@lge.com>
Cyril Hrubis <chrubis@suse.cz>

Radek
Pazdera <rpazdera@redhat.com>
Ralph Loader <suckfish@ihug.co.nz>

Simon Paillard <spaillard@debian.org>
The Wanderer <wanderer@fastmail.fm>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

sched_rr_get_interval.2
  Michael Kerrisk
    Document /proc/sys/kernel/sched_rr_timeslice_ms

proc.5
  Pavel Emelyanov
    Document /proc/[pid]/map_files directory
      This directory was added in Linux v3.3 and provides info about
      files being mmap-ed in a way very similar to how /proc/[pid]/fd
      works.

      v2: Added examples of how links look like and noted dependency
      on kernel config option CONFIG_CHECKPOINT_RESTORE.
  Michael Kerrisk
    Document /proc/sys/kernel/shm_rmid_forced

capabilities.7
  Michael Kerrisk
    Document /proc/sys/kernel/cap_last_cap

Global changes

Various pages
  Michael Kerrisk
    Global
 fix: fix placement of word "only"

Various pages
  Simon Paillard
    License headers: consistent format

Various pages
  Michael Kerrisk
    Global fix: s/since kernel/since Linux/

Various System V IPC pages in Section 2
  Michael Kerrisk

Add "System V" to .TH line and text
Make it clear that these pages relate to System V IPC,
not POSIX IPC.

Changes to individual pages
---

access.2
Michael Kerrisk [The Wanderer]
Clarify RETURN VALUE for F_OK
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=705293

alarm.2
Michael Kerrisk
Correct the description of behavior when 'seconds' is 0

clone.2
Michael Kerrisk [Peter Schiffer]
Add prototype for syscall to SYNOPSIS
And further clarify the distinction between the system call
and the wrapper function in the introductory text.
Michael Kerrisk
Update feature test macro requirements
The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749
Michael Kerrisk [Mike Frysinger]
Clarify differences between clone2() syscall and wrapper function
Michael Kerrisk [Mike Frysinger]
Note those architectures where the sys_clone argument order differs
Michael Kerrisk [Mike Frysinger]
Add short subsection noting that blackfin, m68k, and sparc are different
Michael Kerrisk
Move clone2() text to subsection in description
The description of ia64 clone2() should follow the discussion
of the raw system call interface.
Michael Kerrisk
Change subhead for ia64 discussion

getcpu.2
Michael Kerrisk
Recommend that 'tcache' should be specified as NULL nowadays

io_cancel.2
Jeff Moyer, Michael Kerrisk [Cyril Hrubis]
Improve description

io_destroy.2
  Jeff Moyer
    Improve description
      The
 description was rather vague, citing a "list of I/O contexts"
      and stating that it "can" cancel outstanding requests. This
      update makes things more concrete so that the reader knows exactly
      what's going on.

io_getevents.2
  Jeff Moyer
    The 'timeout' argument is not updated
      I looked back through the kernel code, and the timeout was
      never updated in any case. I've submitted a patch upstream
      to change the comment above io_getevents.

io_setup.2
  Jeff Moyer
    Clarify nr_events
      nr_events is technically the number of completion events that can
      be stored in the completion ring. The wording of the man page:
      "capable of receiving at least nr_events" seems dubious to me,
      only because I worry that folks might interpret that to mean
      'nr_events' total, instead of 'nr_events' concurrently.

      Further, I've added information on where to find
 the per-user
      limit on 'nr_events', /proc/sys/fs/aio-max-nr. Let me know if
      you think that is not relevant.

listxattr.2
  Michael Kerrisk
    Explain use of 'size' argument

lseek.2
  Michael Kerrisk [Andreas Jaeger]
    _GNU_SOURCE must be defined to get SEEK_DATA and SEEK_HOLE definitions
      See http://sourceware.org/bugzilla/show_bug.cgi?id=15312

mmap.2
  Michael Kerrisk
    Add pointers to relevant /proc files described in proc(5)

posix_fadvise.2
pread.2
readahead.2
sync_file_range.2
truncate.2

Michael Kerrisk
Refer to syscall(2) for ABI semantics on certain 32-bit architectures
Also: in sync_file_range.2 and posix_fadvise.2 remove description of conventional calling signature as flawed, and in posix_fadvise.2, de-emphasize focus on ARM, and rather phrase as a more general discussion of certain architectures.

readdir.2
Michael Kerrisk
readdir(2) doesn't
exist on x86-64

semop.2
Michael Kerrisk
Clarify the discussion of 'semadj'

shmctl.2
Michael Kerrisk
Refer to proc(5) for description of /proc/sys/kernel/shm_rmid_forced

syscall.2
Changhee Han
Add notes that caution users when passing arguments to syscall()
For example, passing 'long long' on ARM-32 requires special treatment.
Mike Frysinger [Michael Kerrisk]
Document the exact calling convention for architecture system calls
Mike Frysinger [Kyle McMartin]
Add PA-RISC details under calling conventions
Michael Kerrisk [Mike Frysinger]
Refine discussion of ARM and other ABIs

syscalls.2
Michael Kerrisk
Update kernel version number at start of list

umask.2
Michael Kerrisk
SEE ALSO: add acl(5)

unshare.2
Michael Kerrisk
Update feature test macro requirements
The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

fopencookie.3

Michael Kerrisk [Ralph Loader]
Correct definition of cookie_io_functions_t

pthread_setname_np.3
Andrew Clayton
The thread argument is passed in by value

readir.3
seekdir.3
telldir.3
Michael Kerrisk
Eliminate the implication that these functions deal with "offsets"
The directory position dealt with by the readdir() and
friends is not a simple file offset in modern file systems.
Typically, it is some kind of cookie value. Add text and
make other changes to these pages to eliminate the
implication that this is an offset, and warn the reader
that directory positions should be treated strictly as
opaque values.

In the process, rename the 'offset' argument of seekdir(3)
to 'loc', and add some text to readdir(3) to note that
the 'd_off' field is the same value returned by telldir(3)
at the current directory position.

See also https://lwn.net/Articles/544298/

scalb.3
Mark H Weaver
Fix prototypes for scalbf() and scalbl()

sched_getcpu.3
Michael Kerrisk
Update feature test macro requirements
The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

ualarm.3
Michael Kerrisk [Nicolas Hillegeer]
Add note on the behavior when 'usecs' is zero
POSIX.1-2001 does not specify the behavior in this case
and no other system that I checked documented the behavior.
Probably, most or all systems do what Linux does in this
case: cancel any pending alarm, just as alarm(0) does.
Add that info in NOTES.

elf.5

Mike Frysinger
Add byte positions for all EI_xxx fields
When describing e_ident, most of the EI_xxx defines mention the
exact byte number.
This is useful when manually hacking an ELF
with a hex editor. However, the last few fields don't do this,
which means you have to count things up yourself.
Add a single word to each so you don't have to do that.

proc.5
Michael Kerrisk
Refer to sched_rr_get_interval(2) for info on sched_rr_timeslice_ms
Since Linux 3.9, /proc/sys/kernel/sched_rr_timeslice_ms can
be used to change the SCHED_RR quantum.
Michael Kerrisk
SEE ALSO: Add sysctl(8)
Krzysztof Konopko
Simplify the example of printing out environ
The binutils package contains a very handy utility to
print out null-byte delimited strings from a file. This
can replace a rather complex expression with cat(1)
provided as an example for printing out /proc/[pid]/environ.
Michael Kerrisk
Update /proc/PID/maps example
Update to 64-bit example that includes "[heap]", "[stack],
and "[vdso]"
Michael Kerrisk
Formatting fixes for /proc/PID/maps
Mike Frysinger
Document the "pathname" field of /proc/PID/maps
Michael Kerrisk
Add reference to capabilities(7) for /proc/sys/kernel/cap_last_cap
Michael Kerrisk
/proc/PID/maps: add a reference to mmap(2)

ip.7
Radek Pazdera
Document IP_MULTICAST_ALL
This commit adds documentation for the IP_MULTICAST_ALL socket
option.

The option was added to the Linux kernel in 2.6.31:

Author Nivedita Singhvi <niv@us.ibm.com>
Commit f771bef98004d9d141b085d987a77d06669d4f4f

The description is based on a previous one [3] posted by the
original author of the code -- Nivedita, but it is slightly

re-worded.

I tested it myself and it works as described.

References:
[1] http://lxr.free-electrons.com/source/net/ipv4/ip_sockglue.c#L972
[2] http://lxr.free-electrons.com/source/net/ipv4/igmp.c#L2267
[3] http://patchwork.ozlabs.org/patch/28902/

units.7
Brian M. Carlson
units should use an actual µ
The units(7) man page uses an ASCII u in place of the actual Greek letter mu. Since we're in the twenty-first century, with UTF-8-compatible terminals and terminal emulators, we should use the actual letter µ instead of an ASCII approximation.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=704787

========== Changes in man-pages-3.52 ==========

Released: 2013-07-04, Christchurch

Simon Paillard <spaillard@debian.org>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    Add
 PERF_IOC_FLAG_GROUP documentation
      The perf_event_open() ENABLE/DISABLE/RESET ioctls can take an
      argument, PERF_IOC_FLAG_GROUP. This wasn't documented at all
      until about a year ago (despite the support being there from
      the beginning) so I missed this when initially writing
      the man page.

socket.7
  Pavel Emelyanov, Michael Kerrisk
    Document SO_PEEK_OFF option
      Since Linux 3.4 there appeared an ability to specify the
      offset in bytes from which the data will be MSG_PEEK-ed.
      Describe this socket option in the socket(7) page, where
      all the other socket options are described.

Global changes

Various pages
  Michael Kerrisk
    Convert inline formatting (\fX...\fP) to dot-directive formatting

readdir.2
asprintf.
getline.3
getlogin.3

pthread_setname_np.3
readdir.3
strerror.3
  Michael Kerrisk [Jon Grant]
    Clarify that terminating null byte is
 '\0'

Changes to individual pages
---

execve.2
  Peter LaDow
    Add envp to the Linux notes about NULL pointers
      During the review of static analysis results, we discovered a
      functional, but non-portable, use of execve(). For example:

        char *cmd[] = { "/path/to/some/file", NULL };
        execve(cmd[0], cmd, NULL);

      The call succeeds. Yet, the static analysis tool (rightly)
      pointed out that envp could be dereferenced. But digging into
      glibc and the kernel, it appears that like argv, envp when NULL
      is treated as if it were an empty list.

      So, to clear things up, I'm submitting this patch to update the
      man page to indicate that envp is treated like argv.

fallocate.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

io_setup.2
  Cyril Hrubis [Jeff Moyer]
    Clarify the nr_events parameter

  Currently the io_setup.2 man page describes what the kernel really
      does, i.e., that the resulting context may be able to hold more
      than the 'nr_event's operations because the memory allocated in
      kernel is rounded to be multiple of page size.

      It is better not to expose this implementation detail and
      simply state that the resulting context is suitable for
      'nr_events' operations.

perf_event_open.2
  Vince Weaver
    Clarify the perf_event_open() wakeup_events/wakeup_watermark fields

Clarify the perf_event_open() wakeup_events/wakeup_watermark
fields a bit, based on info from kernel commit cfeb1d90a1b1.
Vince Weaver
Update to match the Linux 3.10 release
This patch updates the perf_event_open() documentation to include
new interfaces added in the 3.10 kernel.

It also documents a few [To be documented] instances left over
from
the 3.7 kernel.
Vince Weaver
Small correction to description of 'flags' argument

prctl.2
Michael Kerrisk
Note equivalents of PR_SET_NAME
pthread_setname_np() and pthread_getname_np() and
/proc/self/task/TID/comm provide access to the same
attribute.

pread.2
Michael Kerrisk [ ]
pread() and pwrite() are especially useful in multithreaded applications

recv.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

semctl.2
Michael Kerrisk [Simone Piccardi]
'sem_nsems' is 'unsigned long' since Linux 2.4

shmget.2
Michael Kerrisk
Rewrite RETURN VALUE and mention that 'errno' is set on error

sigaction.2
Michael Kerrisk [Brian Norris]
RETURN VALUE: mention that 'errno' is set on error

signal.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

sigpending.2
Michael Kerrisk
RETURN VALUE: mention that 'errno'

is set on error

sigprocmask.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

sigsuspend.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

syscall.2
  Mike Frysinger
    Document s390/s390x calling convention

a64l.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function l64a() is not thread safe.

abs.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions abs(), labs(), llabs() and imaxabs() are
      thread-safe.

aio_error.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_error() is thread safe.

aio_return.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_return() is thread safe.

alloca.3
  Adrian Bunk
    Correct information on getting non-inlined version with gcc+glibc
      - remove the incorrect information
 that -fno-builtin would help
      - add -std=c11 to the list of strict options
      - emphasize more that both the gcc option and not including
        alloca.h are needed
      - add the #ifdef from the glibc alloca.h to make the situation
        clearer

bindresvport.3
  Peng Haitao

ATTRIBUTES: Note function that is thread-safe
Before glibc 2.17, bindresvport() is not thread-safe.
Since glibc 2.17, it is thread-safe, the patch can refer to URL:
http://sourceware.org/git/?p=glibc.git;a=commit;h=f6da27e53695ad1cc0e2a9490358decbbfdff5e5

canonicalize_file_name.3
Michael Kerrisk
Put CONFORMING TO section in right location

catgets.3
Michael Kerrisk [Jon Grant]
Clarify that null byte is '\0'

ceil.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ceil(), ceilf() and ceill() are thread safe.

cimag.3
Peng Haitao
ATTRIBUTES:
Note functions that are thread-safe
The functions cimag(), cimagf() and cimagl() are thread safe.

clock_getcpuclockid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function clock_getcpuclockid() is thread safe.

conj.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions conj(), conjf() and conjl() are thread safe.

crypt.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function crypt() is not thread safe.

ctermid.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function ctermid() is thread safe with exceptions.

dirfd.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

drand48.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions drand48(), erand48(), lrand48(), nrand48(),
      mrand48(), jrand48(),
srand48(), seed48() and lcong48() are
      not thread safe.

ecvt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions ecvt() and fcvt() return a string located in a
      static buffer which is overwritten by the next call to the
      functions, so they are not thread-safe.

encrypt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions encrypt() and setkey() are not thread safe.

ether_aton.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions ether_aton() and ether_ntoa() are not thread safe.

fcloseall.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function fcloseall() is not thread safe.

ferror.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions ferror(), clearerr(), feof() and fileno() are
      thread safe.

fgetgrent.3
   Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

fgetpwent.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

fgetwc.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

fmtmsg.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      Before glibc 2.16, fmtmsg() is not thread-safe.
      Since glibc 2.16, it is thread-safe, the patch can refer to URL:
      http://sourceware.org/git/?p=glibc.git;a=commit;h=7724defcf8873116fe4efab256596861eef21a94

fputwc.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

getdate.3
  Peng Haitao
    ATTRIBUTES: Note functions that are and aren't thread-safe

getgrent.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function getgrent() is not thread safe.

getgrnam.3
  Peng Haitao
    ATTRIBUTES: Note functions that are and aren't
 thread-safe

getline.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

getlogin.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function getlogin() is not thread safe.
      The function cuserid() is thread-safe with exceptions.
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

getpass.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe

getpwent.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function getpwent() is not thread safe.

getpwnam.3
  Peng Haitao

ATTRIBUTES: Note functions that are and aren't thread-safe

getspnam.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getttyent.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe

getusershell.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The
functions getusershell(), setusershell() and endusershell()
are not thread safe.

getutent.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

hsearch.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

hsearch.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions hsearch(), hcreate() and hdestroy() are not
thread-safe.

localeconv.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The function localeconv() returns a pointer to a structure which
might be overwritten by subsequent calls to localeconv() or by
calls to setlocale(), so it is not thread-safe.
Peng Haitao
Add RETURN VALUE section

malloc_info.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

mblen.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The

function mblen() is not thread safe.

mbrlen.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function mbrlen() is thread safe with exceptions.

mbrtowc.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function mbrtowc() is thread safe with exceptions.

mktemp.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

modf.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions modf(), modff() and modfl() are thread safe.

popen.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

pthread_attr_setinheritsched.3
  Michael Kerrisk
    Note the scheduling attributes affected by this function

pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_attr_setscope.3
  Michael Kerrisk [Manuel Traut, Siddhesh Poyarekar]
    The inherit-scheduler attribute must be set
 to PTHREAD_EXPLICIT_SCHED
      In order for the attributes set by these functions to have
      an effect, the caller must use pthread_attr_setinheritsched(3)
      to set the inherit-scheduler attribute of the attributes object
      to PTHREAD_EXPLICIT_SCHED.

ptsname.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function ptsname() is not thread safe.

putenv.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

putpwent.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

qecvt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions qecvt() and qfcvt() are not thread-safe.

random.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error
  Michael Kerrisk
    Add EINVAL error for setstate()
  Michael Kerrisk
    BUGS: initstate() does not return NULL on error
      http://sourceware.org/bugzilla/show_bug.cgi?id=15380

random_r.3
   Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

readdir.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The data returned by readdir() may be overwritten by subsequent
      calls to readdir() for the same directory stream, so it is not
      thread-safe.

re_comp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions re_comp() and re_exec() are not thread safe.

rexec.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions rexec() and rexec_af() are not thread safe.

round.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions round(), roundf() and roundl() are thread safe.

scalbln.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe

The functions scalbn(), scalbnf(),
scalbnl(), scalbln(),
scalblnf() and scalblnl() are thread safe.

scandir.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

siginterrupt.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

signbit.3
Peng Haitao
ATTRIBUTES: Note macro that is thread-safe
The macro signbit() is thread safe.

sigsetops.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

stdio_ext.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions __fbufsize(), __fpending(), __fpurge() and
__fsetlocking() are not thread safe.

strdup.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

strerror.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function strerror() is not thread safe.

strftime.3
Michael Kerrisk
Clarify details of return value
Michael
Kerrisk
BUGS: 'errno' is not set if the result string would exceed 'max' bytes

strtok.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function strtok() is not thread safe.
Michael Kerrisk [Georg Sauthoff]

Add more detail on the operation of strtok()
Add a number of missing details on the operation of strtok()

tempnam.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

timegm.3
Jérémie Galarneau
copy the string returned by getenv()
The example of a portable version of timegm() uses the string returned by getenv() after calling setenv() on the same environment variable. The tz string may be invalid as per getenv.3:

"The string pointed to by the return value of getenv() may be statically allocated, and can be modified by a subsequent call to getenv(), putenv(3), setenv(3), or unsetenv(3)."

tmpnam.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function tmpnam() is thread safe with exceptions.

trunc.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions trunc(), truncf() and truncl() are thread safe.

ttyname.3
Michael Kerrisk
ATTRIBUTES: Note functions that are and aren't thread-safe

ttyslot.3
Michael Kerrisk
ATTRIBUTES: Note functions that are not thread-safe

usleep.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

wcsdup.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

core.5

Michael Kerrisk
Implicitly adding the PID to a core filename was dropped in 2.6.27

proc.5
Michael Kerrisk
Document /proc/[pid]/fd/ anon_inode symlinks
Mike Frysinger
Document /proc/[pid]/fd/ symlinks a bit more

Describe the type:[inode] syntax used in this dir

bootparam.7
Michael Kerrisk [Dan Jacobson]
Remove outdated text on LILO and LoadLin
Strike the discussion of LILO and LoadLin, which
are long obsolete, and make a brief mention of GRUB.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604019
Regid
Remove mention of the deprecated rdev(8)
The deprecated rdev(8) command was removed from util-linux in 2010.
See https://git.kernel.org/?p=utils/util-linux/util-
linux.git;a=commit;h=a3e40c14651fccf18e7954f081e601389baefe3fO
Andrea Remondini
Document the 'resume' boot parameter

inotify.7
Michael Kerrisk [Jon Grant]
Clarify that null byte is '\0'

iso_8859-2.7
Eric S. Raymond
Remove incorrect reference to nonexistent groff glyph \[shc]
The reference incorrectly attempted to duplicate an
actual soft hyphen (hex 0xad) just before it in the
file.

man-pages.7
Peng Haitao
Add description of "ATTRIBUTES"
"ATTRIBUTES" section can mention thread safety,
cancellation safety, and async-cancel-safety.

socket.7
Michael Kerrisk
Note that 'optval' for socket options is an 'int' in most cases

tcp.7
Michael Kerrisk

Note that 'optval' for socket options is an 'int' in most cases

udp.7
  Michael Kerrisk
    Note that 'optval' for socket options is an 'int' in most cases

  Michael Kerrisk
    SEE ALSO: add restart_syscall(2)

open.2
  Michael Kerrisk [Geoffrey Thomas]
    Remove warning that O_DIRECTORY is only for use with opendir(3)
      O_DIRECTORY can also be used with, for example, O_PATH.

perf_event_open.2
  Vince Weaver
    Improve PERF_SAMPLE_BRANCH_STACK documentation
  Vince Weaver
    Fix indentation of the MMAP layout section
      The indentation of the MMAP layout section wasn't quite right.
      I think this improves things but I admit I'm not an expert at the
      low-level indentation directives.
  Vince Weaver

Update PERF_IOC_FLAG_GROUP info
It turns out PERF_IOC_FLAG_GROUP was broken from 75f937f24bd9
(in Linux 2.6.31, the initial perf_event release) until
724b6daa1 (Linux 3.4).

I've done some extensive kernel source code digging plus

running tests of various kernels and I hope the info
presented is accurate now.

(Patch edited somewhat by mtk.)
Vince Weaver
Improve sysfs files documentation
This improves the documentation of the various
perf_event_open()-related sysfs files.

ptrace.2
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
If SEIZE was used, initial auto-attach stop is EVENT_STOP
For every PTRACE_O_TRACEfoo option, mention that old-style SIGSTOP
is replaced by PTRACE_EVENT_STOP if PTRACE_SEIZE attach was used.

Mention the same thing again in the description of
PTRACE_EVENT_STOP.
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
Mention that PTRACE_PEEK* libc API and kernel API are different
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
Clarify PTRACE_INTERRUPT, PTRACE_LISTEN, and group-stop behavior

readlink.2
Michael Kerrisk
Document use of empty
'pathname' argument
Michael Kerrisk
Change error check in example program from "< 0" to "== -1"
Chuck Coffing
Fix possible race condition in readlink.2 example
I noticed that the example in the readlink.2 man pages does error
checking for a race condition that would cause the value of the
symbolic link to get larger. However, it doesn't handle the
opposite case, in which the value gets shorter. (The NULL
terminator is always set at the old, longer offset.) This could
cause the program to operate on uninitialized data.

setpgid.2
Michael Kerrisk [Graud]
s/SIGTSTP/SIGTTIN/ when discussing reads from terminal
See https://bugzilla.kernel.org/show_bug.cgi?id=60504

clog2.3
  Michael Kerrisk
    Note that these functions are still not present in glibc 2.17

dirfd.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function
dirfd() is thread safe.

div.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions div(), ldiv(), lldiv() and imaxdiv() are thread
      safe.

fabs.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions fabs(), fabsf() and fabsl() are thread safe.

fdim.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions fdim(), fdimf() and fdiml() are thread safe.

fflush.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function fflush() is thread safe.

finite.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions finite(), finitef(), finitel(), isinf(), isinff(),
      isinfl(), isnan(), isnanf() and isnanl() are thread safe.

flockfile.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions flockfile(), ftrylockfile() and funlockfile()
are
      thread safe.

floor.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe

The functions floor(), floorf() and floorl() are thread safe.

resolv.conf.5
  Simon Paillard
    Explain how to set empty domain
      See http://bugs.debian.org/463575

capabilities.7
  Michael Kerrisk
    Add open_by_handle_at(2) under CAP_DAC_READ_SEARCH

inotify.7
  Michael Kerrisk [Felix Schulte]
    Clarify description of IN_MOVED_FROM and IN_MOVED_TO

man-pages.7
  Michael Kerrisk
    DESCRIPTION should note versions for new interface features or behavior

udp.7
  Benjamin Poirier
    Add missing #include directive
      Using the UDP_CORK socket option documented in udp.7 requires
      including <netinet/udp.h>.

ld.so.8
  Michael Kerrisk
    Rework rpath token expansion text
  Michael Kerrisk
    Describe $PLATFORM rpath token
  Michael Kerrisk
    Describe $LIB rpath token

  Michael Kerrisk
    Document LD_BIND_NOT
  Michael Kerrisk [Simon Paillard]
    Add reference to pthreads(7) in discussion of LD_ASSUME_KERNEL

Michael Kerrisk
Global fix: s/file system/filesystem/
Notwithstanding 24d01c530c5a3f75217543d02bf6712395e5f90c,
"filesystem" is the form used by the great majority of man pages
outside the man-pages project and in a number of other sources,
so let's go with that.

Changes to individual pages
---

access.2
J. Bruce Fields
Fix outdated NFS information
Note that NFS versions since version 3 support an "access" call
so that the client doesn't have to guess permissions or ID
mapping on its own.

(See RFC 1813 sections 1.7 and 3.3.4.)

adjtimex.2
Michael Kerrisk
SEE ALSO: Add adjtimex(8)

clock_getres.2
Michael Kerrisk [Rodrigo Campos]
Note circumstances in which "SMP" note applies.
Michael Kerrisk
Add kernel version for CLOCK_*_CPUTIME_ID
CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID
appeared in 2.6.12.
Michael Kerrisk
Add VERSIONS section

futex.2
  Michael Kerrisk
    The 'timeout' can be rounded upwards by clock granularity and also overrun

kill.2
  Michael Kerrisk
    Small improvements to text on historical rules for permissions

nfsservctl.2
  Michael Kerrisk
    Note commands that were only in Linux 2.4.x and earlier

open.2
  Robert Harris
    Add mmap(2) to list of calls that fail when given an O_PATH descriptor
  Doug Goldstein
    Add EINVAL to errors list
      EINVAL can be returned by open(2) when the underlying filesystem
      doesn't support O_DIRECT. It is documented in the NOTES section
      but this patch adds it to the list
 of possible errors.

perf_event_open.2
  Vince Weaver
    PERF_SAMPLE_BRANCH_STACK updates
      This started out as just adding the new perf_event_open features
      from Linux 3.11 (which was the addition of transactional memory
      defines for PERF_SAMPLE_BRANCH_STACK samples) but turned into a
      general cleanup of the PERF_SAMPLE_BRANCH_STACK documentation.

      The main clarification is that at least one of the non-privilege
      values must be set or else perf_event_open() will return an EINVAL
      error.
  Michael Kerrisk
    Reorder text describing fields of 'perf_event_header' structure
      Place the fields with the shorter descriptions first, to make the
      information easier to read.

poll.2
  Michael Kerrisk
    Clarify wording of 'timeout' as a "minimum" interval

sched_setaffinity.2
  Michael Kerrisk [Christos Tsopokis]
    Clarify that these system calls affect a per-thread
 attribute

sched_setparam.2

Michael Kerrisk
Clarify that this system call applies to threads (not processes)

sched_setscheduler.2
Michael Kerrisk
Clarify that this system call applies to threads (not processes)

select.2
Michael Kerrisk [G.raud]
Clarify wording of 'timeout' as a "minimum" interval

setfsgid.2
Michael Kerrisk [Oleg Nesterov]
Clarify description of return value
More clearly describe the weirdness in the return value of this system call, and note the problems it creates in BUGS
Michael Kerrisk
Correct header file in SYNOPSIS
Michael Kerrisk
Refer to setfsuid(2) for an explanation of why setfsgid() is obsolete
Michael Kerrisk
Wording improvements

setfsuid.2
Michael Kerrisk [Oleg Nesterov]
Clarify description of return value
More clearly describe the weirdness in the return value of this system call, and note the problems it creates
in BUGS
Michael Kerrisk [Chen Gang]
Clarify historical details and note that setfsuid() is obsolete
Michael Kerrisk
Wording improvements
Michael Kerrisk
Correct header file in SYNOPSIS

sigwaitinfo.2
Michael Kerrisk
Clarify wording of 'timeout' as a "minimum" interval

syscall.2
Johan Erlandsson
Add missing argument in example
Johan Erlandsson
Correct registers for arm/EABI
Registers was off by one.

Reference:

http://www.arm.linux.org.uk/developer/patches/viewpatch.php?id=3105/4

See also:
http://peterdn.com/post/e28098Hello-World!e28099-in-ARM-assembly.aspx
https://wiki.debian.org/ArmEabiPort
http://en.wikipedia.org/wiki/Calling_convention#ARM

wait.2
Michael Kerrisk [Hannes Landeholm]
Add details on the fifth argument provided by raw waitid() system call
See https://bugzilla.kernel.org/show_bug.cgi?id=60744

clock.3
Michael Kerrisk
clock() switched from using times(2) to clock_gettime() in glibc 2.18

drand48_r.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions drand48_r(), erand48_r(), lrand48_r(),
nrand48_r(), mrand48_r(), jrand48_r(), srand48_r(), seed48_r(),
and lcong48_r() are thread safe.

fma.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fma(), fmaf() and fmal() are thread safe.

fmax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fmax(), fmaxf() and fmaxl() are thread safe.

fmin.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fmin(), fminf() and fminl() are thread safe.

fpclassify.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fpclassify(), isfinite(), isnormal(), isnan(), and
isinf() are thread safe.

frexp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions frexp(), frexpf() and frexpl() are thread safe.

gethostbyname.3
  Michael Kerrisk [Jon Grant]
    gai_strerror() is the modern replacement for herror() and hstrerror()
  Michael Kerrisk
    Update feature test macro requirements for herror() and hstrerror()
  Michael Kerrisk
    Add feature test macro requirements for h_errno

ilogb.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions ilogb(), ilogbf() and ilogbl() are thread safe.

ldexp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions ldexp(), ldexpf() and ldexpl() are thread safe.

lrint.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions lrint(), lrintf(), lrintl(), llrint(), llrintf(),
      and llrintl() are thread safe.

lround.3
   Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions lround(), lroundf(), lroundl(), llround(),
      llroundf() and llroundl() are thread safe.

lseek64.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function lseek64() is thread safe.

mbsinit.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function mbsinit() is thread safe.

nextafter.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions nextafter(), nextafterf(), nextafterl(),
      nexttoward(), nexttowardf() and nexttowardl() are thread safe.

posix_memalign.3

Michael Kerrisk [Will Newton]
'errno" is indeterminate after a call to posix_memalign()
Michael Kerrisk [Will Newton]
Clarify wording on "return value" when size==0

printf.3
Christopher Hall
Correctly describe the meaning of a negative precision
The printf(3) manpage says that a negative precision is taken to be zero, whereas printf(3p) says that a negative precision is taken as if the precision were omitted. glibc agrees with the latter (POSIX) specification.

Test code:

```
printf("%f\n",42.0);      // "42.000000"
printf("%.*f\n",0,42.0);  // "42"
printf("%.*f\n",-1,42.0); // "42.000000"
```

This patch corrects the explanation to match what actually happens.

rewinddir.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function rewinddir() is thread safe.

rint.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions nearbyint(), nearbyintf(), nearbyintl(), rint(), rintf() and rintl() are thread safe.

seekdir.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function seekdir() is
thread safe.

telldir.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function telldir() is thread safe.

wctomb.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function wctomb() is not thread safe.

wavelan.4
  Michael Kerrisk [Elie De Brauwer]
    This driver disappeared in 2.56.35

dir_colors.5
  Michael Kerrisk [Stas]
    Add various synonyms
      See http://bugs.debian.org/553477
  Simon Paillard [Stas]
    Add keywords SUID, SGID, STICKY, STICKY_OTHER_WRITABLE, OTHER_WRITABLE
      See http://bugs.debian.org/553477
      See ls.c and dircolors.c in coreutils

proc.5
  Peter Schiffer
    Document /proc/[pid]/io file
      Attempt to document fields in the /proc/[pid]/io file, based on
      the Documentation/filesystems/proc.txt. The text will probably
      need some grammar corrections.
  Michael Kerrisk [Marko Myllynen]
    /proc/sys/fs/inode-max
 went away in Linux 2.4
      Also, the 'preshrink' field in /proc/sys/fs/inode-state became
      a dummy value in Linux 2.4.

      See https://bugzilla.kernel.org/show_bug.cgi?id=60836
  Michael Kerrisk [A. Costa]
    Note block size used by /proc/partitions
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=666972
  Michael Kerrisk
    Add rationale on drop_caches and note that it can hurt performance
      See also http://lwn.net/Articles/562211/

bootparam.7
  Michael Kerrisk [Eugen Dedu]
    Remove "lilo" entries from SEE ALSO
      See http://bugs.debian.org/604019

inotify.7
  Michael Kerrisk
    SEE ALSO: add inotifywait(1) and inotifywatch(1)

ip.7
  Simon Paillard
    IP_MULTICAST_IF setsockopt recognizes struct mreq (compatibility)
      Kernel added compatibility only recently in
      3a084ddb4bf299a6e898a9a07c89f3917f0713f7
      See: http://bugs.debian.org/607979

standards.7
   Michael Kerrisk
     Add mention of SUSv4-TC1 (POSIX.1-2013)

========== Changes in man-pages-3.55 ==========

Released: 2013-12-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alfred Agrell <alfred@agrell.info>
Andreas Sandberg <andreas.sandberg@it.uu.se>
Christoph Hellwig <hch@infradead.org>
David Gibson <david@gibson.dropbear.id.au>

janh <a0vhv@t-online.de>

Apologies if I missed anyone!

Global changes
---

assert.3
assert_perror.3
rexec.3
rpc.3
  Michael Kerrisk [Jon Grant]
    Reword a sentence to use more gender-neutral language

Changes to individual pages
----

execve.2
  Michael Kerrisk
    'arg...' for interpreter scripts starts with argv[1]

fallocate.2
  Christoph Hellwig
    Clarify the zeroing behavior
      fallocate() zeroes only space that did not previously contain
      data, but leaves existing data untouched.

futex.2
  Rodrigo Campos
    Fix link to Rusty's futex example library
      When I asked to webmaster@kernel.org, Konstantin Ryabitsev
      answered that the ".nl." is "an obsolete scheme and really

      should be changed to just ftp.kernel.org".

getgroups.2
  Michael Kerrisk
    Note that NGROUPS_MAX is defined in <limits.h>
  Michael Kerrisk
    Clarify that sysconf(_SC_NGROUPS_MAX) is a run-time technique
  Michael Kerrisk
    Document /proc/sys/kernel/ngroups_max

ioctl.2
  Michael Kerrisk [KOSAKI Motohiro, David Gibson]
    'request' argument is typed as 'unsigned long' in glibc
      See https://bugzilla.kernel.org/show_bug.cgi?id=42705

perf_event_open.2
  Vince Weaver
    Linux 3.12 rdpmc/mmap
      It turns out that the perf_event mmap page rdpmc/time setting was
      broken, dating back to the introduction of the feature. Due

to a mistake with a bitfield, two different values mapped to
the same feature bit.

A new somewhat backwards compatible interface was introduced
in Linux 3.12. A much longer report on the issue can be found
here:
https://lwn.net/Articles/567894/
Vince Weaver
Linux 3.12 adds PERF_SAMPLE_IDENTIFIER
A new PERF_SAMPLE_IDENTIFIER sample type was added in Linux 3.12.
Vince Weaver
E2BIG documentation
The following documents the E2BIG error return for
perf_event_open().

I actually ran into this error the hard way and it took me
half a day to figure out why my ->size value was changing.
Vince Weaver
Linux 3.12 adds PERF_EVENT_IOC_ID
A new perf_event related ioctl, PERF_EVENT_IOC_ID, was added
in Linux 3.12.
Vince Weaver
PERF_COUNT_SW_DUMMY support
Support for the PERF_COUNT_SW_DUMMY event type was added in
Linux 3.12.
Vince Weaver [Andreas Sandberg]
PERF_EVENT_IOC_PERIOD update
The PERF_EVENT_IOC_PERIOD ioctl was broken until 2.6.36,
and it turns out that the ARM architecture has some
differing behavior too.

pipe.2
Trevor Bramwell
Fix error in example program

poll.2
Michael Kerrisk [Paolo Bonzini]
Clarify meaning of events==0
events==0 does not mean that revents is always returned as
zero. The "output only" events (POLLHUP, POLLERR, POLLNVAL)
can still be returned.

See https://bugzilla.kernel.org/show_bug.cgi?id=61911

readlink.2
Michael Kerrisk [Yuanhang Zheng]
Fix typo in error message in example program

recv.2
  Michael Kerrisk
    Remove out-of-date statement that UNIX domain does not support MSG_TRUNC
      Should have removed that sentence as part of
      commit a25601b48b822eb1882ae336574b8d062a17e564

sched_get_priority_max.2
  Michael Kerrisk
    Add SCHED_IDLE to discussion

send.2
  Michael Kerrisk
    RETURN VALUE: these calls return number of bytes (not characters) sent

setreuid.2
  Michael Kerrisk
    Small clarification to description of when saved
 set-user-ID is set

sigpending.2
  Michael Kerrisk
    Note treatment of signals that are blocked *and* ignored

stat.2
  Michael Kerrisk
    Note filesystem support for nanosecond timestamps
      Add some detail on which native filesystems do and don't
      support nanosecond timestamps.
  Michael Kerrisk
    Cosmetic reworking of timestamp discussion in NOTES
  Michael Kerrisk [Yang Yang]
    Update discussion of nanosecond timestamps
      The existing text describes the timestamp fields as 'time_t'
      and delegates discussion of nanosecond timestamps under NOTES.
      Nanosecond timestamps have been around for a while now,
      and are in POSIX.1-2008, so reverse the orientation of the
      discussion, putting the nanosecond fields into DESCRIPTION
      and detailing the historical situation under NOTES.

symlink.2
  Michael Kerrisk
    Further fine tuning of argument names
      Follow-up
 to f2ae6dde0c68448bec986d12fe32268a2c98bfd9
      See https://sourceware.org/bugzilla/show_bug.cgi?id=16073
  Michael Kerrisk [Fabrice Bauzac]
    Give arguments of symlink() more meaningful names

adjtime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function adjtime() is thread safe.

alloca.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function alloca() is thread safe.

asinh.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions asinh(), asinhf() and asinhl() are thread safe.

atan.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions atan(), atanf() and atanl() are thread safe.

atof.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function atof() is thread safe with exceptions.

atoi.3
  Peng Haitao
    ATTRIBUTES: Note functions that
 are thread safe with exceptions
      The functions atoi(), atol() and atoll() are thread safe with
      exceptions.

bcmp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bcmp() is thread safe.

bcopy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bcopy() is thread safe.

bsd_signal.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bsd_signal() is thread safe.

bzero.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function bzero() is thread safe.

cbrt.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions cbrt(), cbrtf() and cbrtl() are thread safe.

copysign.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions copysign(), copysignf() and copysignl() are thread safe.

cos.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions cos(), cosf() and cosl() are thread safe.

cproj.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions cproj(), cprojf() and cprojl() are thread safe.

creal.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions creal(), crealf() and creall() are thread safe.

daemon.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function daemon() is thread safe.

des_crypt.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ecb_crypt(), cbc_crypt() and des_setparity() are thread safe.

difftime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function difftime() is thread safe.

dysize.3
Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function dysize()
is thread safe.

erf.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions erf(), erff() and erfl() are thread safe.

erfc.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions erfc(), erfcf() and erfcl() are thread safe.

euidaccess.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions euidaccess() and eaccess() are thread safe.

expm1.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions expm1(), expm1f() and expm1l() are thread safe.

fexecve.3
Michael Kerrisk
POSIX.1-2008 specifies fexecve()
Michael Kerrisk
Explain the use and rationale of fexecve()

ftime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function ftime() is thread safe.

ftok.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function
ftok() is thread safe.

ftw.3
Michael Kerrisk
nftw() visits directories with FTW_D if FTW_DEPTH was not specified
Michael Kerrisk
Explain probable cause of FTW_NS

futimes.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions futimes() and lutimes() are thread safe.

getaddrinfo.3
Michael Kerrisk
Explain one use case for AI_ADDRCONFIG
Michael Kerrisk
Highlight difference in ai_flags when hints==NULL
NOTES already described how glibc differs from POSIX.
Add a pointer to that text from the point in DESCRIPTION
where hints==NULL is discussed.

kcmp.3
Shawn Landden
Reword slightly awkward section

malloc.3
Greg Price
Scale back promises of alignment
It's not true that the return value is suitably aligned for "any
variable"; for example, it's unsuitable for a variable like
float *x __attribute__ ((__vector_size__
(32)));
which requires 32-byte alignment. Types like this are defined in
<avxintrin.h>, and with 16-byte alignment in <emmintrin.h> and
<xmmintrin.h>, so the application programmer need not even know
that a vector_size attribute has been applied.

On an x86 architecture, a program that loads from or stores to a
pointer with this type derived from malloc can crash because GCC
generates an aligned load/store, like MOVDQA.

The C99 standard (TC3, as of N1256) does say the return value is
suitably aligned for "any type of object". The C11 standard (as
of N1570) revises this to any type with "fundamental alignment",
which means an alignment "supported by the implementation in all
contexts", which I suppose tautologically includes aligning
malloc/realloc return values.

The actual behavior of current glibc malloc
is to align to the
greater of 2 * sizeof(size_t) and __alignof__ (long double),
which may be one bit greater than this commit promises.

mq_receive.3
Michael Kerrisk [janh]
msg_len must be greater than *or equal to* mq_msgsize

See https://bugzilla.kernel.org/show_bug.cgi?id=64571

setenv.3
  Michael Kerrisk
    Clarify that setenv() returns success in the overwrite==0 case

sigsetops.3
  Michael Kerrisk [Robert P. J. Day]
    Add 'const' to sigisemptyset(), sigorset(), sigandset() declarations
  Michael Kerrisk
    Rework text describing sigisemptyset(), sigorset(), and sigandset()

statvfs.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions statvfs() and fstatvfs() are thread safe.

stdarg.3
  Peng Haitao
    ATTRIBUTES: Note macros that are thread-safe
      The macros va_start(), va_arg(), va_end() and va_copy() are
      thread safe.

termios.3

  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions tcgetattr(), tcsetattr(), tcsendbreak(),
      tcdrain(), tcflush(), tcflow(), cfmakeraw(), cfgetispeed(),
      cfgetospeed(), cfsetispeed(), cfsetospeed() and cfsetspeed()
      are thread safe.

ungetwc.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function ungetwc() is thread safe.

unlockpt.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function unlockpt() is thread safe.

usleep.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function usleep() is thread safe.

wcpcpy.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcpcpy() is thread safe.

wcscasecmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcscasecmp() is thread safe with exceptions.

wcscat.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscat() is thread safe.

wcschr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcschr() is thread safe.

wcscmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscmp() is thread safe.

wcscpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscpy() is thread safe.

wcscspn.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcscspn() is thread safe.

wcslen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcslen() is thread safe.

wcsncasecmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcsncasecmp() is thread safe with exceptions.

wcsncat.3
Peng Haitao
ATTRIBUTES:

Note function that is thread-safe
The function wcsncat() is thread safe.

wcsncmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsncmp() is thread safe.

wcsncpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsncpy() is thread safe.

wcsnlen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsnlen() is thread safe.

wcspbrk.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcspbrk() is thread safe.

wcsrchr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsrchr() is thread safe.

wcsspn.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsspn() is thread safe.

wcsstr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsstr() is
thread safe.

wcstoimax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions wcstoimax() and wcstoumax() are thread safe with
exceptions.

wcstok.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe

The function wcstok() is thread safe.

wcswidth.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcswidth() is thread safe with exceptions.

wctrans.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wctrans() is thread safe with exceptions.

wctype.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wctype() is thread safe with exceptions.

wcwidth.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcwidth() is thread safe with exceptions.

wmemchr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemchr() is thread safe.

wmemcmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemcmp() is thread safe.

wmemcpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemcpy() is thread safe.

wmemmove.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemmove() is thread safe.

wmemset.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemset() is thread safe.

tty_ioctl.4

  Michael Kerrisk [Liu Jiaming]
    Note that 'arg' should be 0 in the usual case when using TIOCSCTTY
  Michael Kerrisk
    Rework text on root to discuss just in terms of capabilities

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/ngroups_max

capabilities.7
  Michael Kerrisk
    Fix 2 version
 numbers under "Effect of user ID changes on capabilities"

feature_test_macros.7
  Michael Kerrisk
    Add _ISOC11_SOURCE to example program

tcp.7
  Michael Kerrisk
    Fix (nontrivial) wordo in discussion of MSG_TRUNC
      s/MSG_PEEK/MSG_TRUNC/

ld.so.8
  Michael Kerrisk [Alfred Agrell]
    Fix crufty wording in one sentence

========== Changes in man-pages-3.56 ==========

Released: 2014-01-11, Christchurch

In memory of Doris Church (1939-2013)

Apologies if I missed anyone!

New and rewritten pages
---

fgetc.3
gets.3
   David Malcolm
      Split gets(3) to isolate unsafe gets(3) to a page on its own
         Currently man3/gets.3 documents various safe I/O functions, along
         with the toxic "gets" function.

         At the risk of being melodramatic, this strikes me as akin to
         storing rat poison in a food cabinet, in the same style of
         packaging as the food, but with a post-it note on it saying
         "see warnings below".

         I think such "never use this" functions should be quarantined
         into their own manpages, rather than listing them alongside

sane functions.

The attached patch does this for "gets", moving the documentation
of the good functions from man3/gets.3 into man3/fgetc.3,
updating the SO links in the relevant functions to point at the
latter.

It then rewrites man3/gets.3 to spell out that "gets" is toxic
and should never be
used (with a link to CWE-242 for good
measure).
Michael Kerrisk [Andre Majorel]
Tweaks to David Malcolm's patch

vdso.7
Mike Frysinger
New page documenting the vDSO mapped into each process by the kernel

Newly documented interfaces in existing pages
---

reboot.2
Elie De Brauwer
Document LINUX_REBOOT_SW_SUSPEND

New and changed links
---

fgets.3
getc.3
getchar.3
ungetc.3
Michael Kerrisk
Adjust links to gets(3) to point to fgetc(3)

Global changes

Various pages
Michael Kerrisk
Global fix of "NULL pointer"
Change "NULL pointer" to "NULL" or null pointer".
POSIX uses the term "null pointer", not "NULL pointer".

Various pages

Michael Kerrisk
Stylistic changes to code example
For ease of reading, don't embed assignments inside if().

Various pages
Michael Kerrisk
Replace uses of
"i.e.," in main text with "that is" or similar
Usual man-pages style is to use "i.e." only within
parenthetical expressions.

Various pages
Michael Kerrisk
Replace uses of "e.g." in main text with "for example" or similar
Usual man-pages style is to use "e.g." only within
parenthetical expressions.

Various pages
Michael Kerrisk
Add "Program source" subheading under EXAMPLE

Various pages
Michael Kerrisk
Add "static" to global variables and functions in example program

Changes to individual pages
---

clock_getres.2
Michael Kerrisk [Nadav Har'El]
Improve description of CLOCK_PROCESS_CPUTIME_ID
See https://bugzilla.kernel.org/show_bug.cgi?id=67291

close.2
Michael Kerrisk [P?draig Brady]
Note that errors from close() should be used only for diagnosis
In particular, retrying after EINTR is a bad idea.

See http://austingroupbugs.net/view.php?id=529

See http://thread.gmane.org/gmane.comp.lib.glibc.alpha/37702
Subject: [RFC][BZ #14627] Make linux close errno to EINPROGRESS
when interrupted in signal.

execve.2
Michael Kerrisk [Marco Dione]
Add further cases to EFAULT error

See https://sourceware.org/bugzilla/show_bug.cgi?id=16402

perf_event_open.2
  Vince Weaver [Sudhanshu Goswami]
    Clarify issues with the disabled bit
      Clarify the perf_event_open behavior with respect to the disabled
      bit and creating event groups.
  Vince Weaver [Sudhanshu Goswami]
    Clarify issues with the exclusive bit
      Warn that using the perf_event_open "exclusive" bit, while
      it might seem like a good idea, might lead to all 0 results
      in some common usage cases.

reboot.2
  Elie De Brauwer
    Mention RB_POWER_OFF
      The manpage did not mention RB_POWER_OFF which
 is the glibc
      symbolic name for LINUX_REBOOT_CMD_POWER_OFF.

      $ cd /usr/include
      $ cat x86_64-linux-gnu/sys/reboot.h | grep POWER_OFF
       define RB_POWER_OFF   0x4321fedc
  Elie De Brauwer
    Add "Linux" to kernel version numbers
  Michael Kerrisk
    Add RB_SW_SUSPEND synonym
  Michael Kerrisk
    Add RB_KEXEC synonym

setpgid.2
  Michael Kerrisk [Joseph S. Myers]
    BSD getpgrp() and setpgrp() go away in glibc 2.19

socket.2
  Michael Kerrisk [Dongsheng Song]
    Remove crufty statement that AF_INET does not support SOCK_SEQPACKET
      Linux AF_INET supports SOCK_SEQPACKET via SCTP.

syscall.2
  Mike Frysinger
    Fix ia64 registers
      The original list of registers was created by confusing strace
      source code--this is for parsing legacy 32-bit code (which is
      dead and no one cares). Update the list to reflect native ia64
      syscall interface.

syscall.2

syscalls.2
getauxval.3
  Mike Frysinger
    Add references to new vdso(7) page

utimensat.2
  Michael Kerrisk
    Small wording improvement for times!=NULL case

dlopen.3
  Michael Kerrisk [Mike Frysinger]
    Update remarks on cast needed when assigning dlsym() return value
      POSIX.1-2013 eases life when casting the dlsym() return value to a
      function pointer
  Michael Kerrisk [Stephen Kell]
    Fix description of dli_sname
      See https://sourceware.org/bugzilla/show_bug.cgi?id=16262

getline.3
  Michael Kerrisk [Luke Hutchison]
    Correct description of how '*n' is used when '*lineptr' == NULL
      See https://sourceware.org/bugzilla/show_bug.cgi?id=5468
  Michael Kerrisk
    Remove SEE ALSO reference to unsafe gets(3)

mcheck.3
  Simon Paillard [Raphael Geissert]
    typo in compiler flag
      See http://bugs.debian.org/732464

mkstemp.3
  Michael Kerrisk [Janne Blomqvist]
    Better
 describe 'flags' that can be specified for mkostemp()

printf.3
  Michael Kerrisk [Arif Zaman]
    Fix memory leak in snprintf() example
      See http://stackoverflow.com/questions/19933479/snprintf-man-page-example-memory-leak

pthread_kill.3
  Michael Kerrisk [Mathieu Desnoyers]
    POSIX.1-2008 removes ESRCH
      POSIX.1-2001 mistakenly documented an ESRCH error, and
      POSIX.1-2008 removes this error. Glibc does return
      this error in cases where it can determine that a thread ID
      is invalid, but equally, the use of an invalid thread ID
      can cause a segmentation fault.

puts.3
  Michael Kerrisk
    SEE ALSO: replace reference to gets(3) with fgets(3)

scanf.3
  Michael Kerrisk [Ondej Bílka]
    Improve discussion of obsolete 'a' dynamic allocation modifier

setjmp.3
  Michael Kerrisk [Joseph S. Myers]
    BSD setjmp() semantics go away in glibc 2.19

sigpause.3
  Michael Kerrisk [Joseph
 S. Myers]
    BSD sigpause() goes away in glibc 2.19
  Michael Kerrisk
    Correct feature text macro requirements
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sigpause() is thread safe.

sigqueue.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sigqueue() is thread safe.

sigwait.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sigwait() is thread safe.

sin.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sin(), sinf() and sinl() are thread safe.

sincos.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sincos(), sincosf() and sincosl() are thread safe.

string.3
  Moritz 'Morty' Strübe
    Add short description of the functions
      It is helpful to have a short description about what the different
      functions

in string.h do.
  Michael Kerrisk
    Fixes and enhancements to Moritz Strübe's patch

strptime.3
  Michael Kerrisk [Mathieu Malaterre, Simon Paillard]
    Add number ranges to comments in 'tm' structure
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729570
  Michael Kerrisk
    Point to ctime(3) for more details on 'tm' structure
  Michael Kerrisk
    Some rewording and reorganization

strsep.3
  Michael Kerrisk
    Clarify description
      The use of "symbols" in the existing description is confusing;
      it's "bytes". Other fixes as well.

strspn.3
  Michael Kerrisk [Mathieu Malaterre]
    Improve description in NAME
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=723659

strstr.3
  Michael Kerrisk
    Clarify RETURN VALUE: s/substring/located substring/

sysv_signal.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sysv_signal() is thread
 safe.

tan.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions tan(), tanf() and tanl() are thread safe.

tanh.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions tanh(), tanhf() and tanhl() are thread safe.

toascii.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function toascii() is thread safe.

toupper.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread safe with exceptions
      The functions toupper() and tolower() are thread safe with
      exceptions.

towctrans.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function towctrans() is thread safe.

towlower.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function towlower() is thread safe with exceptions.

towupper.3
  Peng Haitao
    ATTRIBUTES: Note function that is
 thread safe with exceptions
      The function towupper() is thread safe with exceptions.

ualarm.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function ualarm() is thread safe.

wcpncpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcpncpy() is thread safe.

proc.5
  Michael Kerrisk [Sworddragon2]
    Fix formula for CommitLimit under /proc/meminfo
      See https://bugzilla.kernel.org/show_bug.cgi?id=60991

credentials.7
  Michael Kerrisk
    List APIs that operate on process groups
  Michael Kerrisk
    Add details on controlling terminal and foreground/background jobs

feature_test_macros.7
  Michael Kerrisk
    Document _DEFAULT_SOURCE
  Michael Kerrisk [Joseph S. Myers]

From glibc 2.19, _BSD_SOURCE no longer causes __FAVOR_BSD
Starting with glibc 2.19, _BSD_SOURCE no longer causes BSD
definitions to be favored in cases
where standards conflict.

libc.7
Mike Frysinger
SEE ALSO: add various entries

man-pages.7
Michael Kerrisk [Mike Frysinger]
Add STYLE GUIDE section
Incorporate some of the existing material in the page
into the STYLE GUIDE, and add a lot more material, mainly
drawn from the "Global changes" sections in the release
changelogs.
Michael Kerrisk
Add historical note on reason for use of American spelling
Michael Kerrisk [Mike Frysinger]
Various improvements to style guide

packet.7
Willem de Bruijn [Daniel Borkmann]
Document fanout, ring, and auxiliary options
This patch adds descriptions of the common packet socket options
PACKET_AUXDATA, PACKET_FANOUT, PACKET_RX_RING, PACKET_STATISTICS,
PACKET_TX_RING
and the ring-specific options
PACKET_LOSS, PACKET_RESERVE, PACKET_TIMESTAMP, PACKET_VERSION
Michael Kerrisk
Add kernel version numbers for PACKET_VERSION and PACKET_TIMESTAMP

ld.so.8
Michael Kerrisk [Matthias Klose]
Default output file for D_DEBUG is stderr not stdout
See https://sourceware.org/bugzilla/show_bug.cgi?id=6874

========== Changes in man-pages-3.57 ==========

Released: 2014-01-24, Munich

Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>
 <socketpair@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

msgop.2
  Michael Kerrisk
    Document MSG_COPY

open.2
  Michael Kerrisk, Andy Lutomirski
    Document O_TMPFILE
      O_TMPFILE is new in Linux 3.11

perf_event_open.2
  Vince Weaver [Andi Kleen]
    PERF_SAMPLE_TRANSACTION support in Linux 3.13
      The following patch adds descriptions of the new perf_event_open.2

PERF_SAMPLE_TRANSACTION sample type as added in Linux 3.13.

The descriptions
are based on information provided by Andi Kleen,
both in the e-mail

[PATCH 1/6] perf, core: Add generic transaction flags v5

sent to the linux-kernel list as well as an e-mail

[PATCH] Document transaction flags in perf_event_open manpage

sent to the linux-man list.

The implementation is based heavily on the Intel Haswell
processor. Documentation can be found at this page:
http://software.intel.com/en-us/blogs/2013/05/03/intelr-transactional-synchronization-extensions-intelr-tsx-profiling-with-linux-0
as well as in section 18.11.5.1 of volume 3 of the
Intel 64 and IA-32 Architecture Software Developer's Manual.

ptrace.2
Andrey Vagin
Add description for PTRACE_PEEKSIGINFO
Retrieve signals without removing them from a queue.
Andrey Vagin
Add description for PTRACE_GETSIGMASK and PTRACE_SETSIGMASK
These two
commands allow to examine and change mask of blocked
signals.

socket.7
Eliezer Tamir
Add description for SO_BUSY_POLL
Add description for the SO_BUSY_POLL socket option.

tcp.7
Michael Kerrisk [Jerry Chu]
Document TCP_USER_TIMEOUT
Text slightly adapted from Jerry Chu's (excellent) commit
message (commit dca43c75e7e545694a9dd6288553f55c53e2a3a3).
Michael Kerrisk
Document TCP_CONGESTION

Global changes

Various pages
  Michael Kerrisk
    Reword to avoid use of "etc."

Various pages
  Peng Haitao [Andre Majorel]
    Make wording around thread-safety and setlocale() more precise

getdate.3
strptime.3
locale.5
  Michael Kerrisk
    Replace "weekday" with less ambiguous language
      Notwithstanding POSIX's use of the term "weekday", in everyday
      English, "weekday" is commonly understood to mean a day in the
      set [Monday..Friday] (vs one of the
 "weekend" days).

Changes to individual pages
----

epoll_wait.2
  Michael Kerrisk [Jonas Jonsson]
    Clarify wording of EINTR error
      See https://bugzilla.kernel.org/show_bug.cgi?id=66571

faccessat.2
  Michael Kerrisk
    Note that the system call takes only three arguments

fallocate.2
  Michael Kerrisk
    Note filesystems that support FALLOC_FL_PUNCH_HOLE operation

fcntl.2
  Michael Kerrisk
    BUGS: The O_SYNC and O_DSYNC flags are not modifiable using F_SETFL
  Michael Kerrisk
    Add subsections under BUGS
      There's several bugs listed. It's helpful to mark
      them separately.
  Michael Kerrisk
    POSIX.1 specifies F_SETOWN and F_GETOWN for sockets/SIGURG

getrlimit.2
  Michael Kerrisk [ ]
    Note that rlim_cur can be set lower than current resource consumption

getsockopt.2
  Michael Kerrisk
    SEE ALSO: add ip(7) and udp(7)

keyctl.2
  Michael Kerrisk
     SEE ALSO: mention Documentation/security/keys.txt

linkat.2
  Michael Kerrisk
    Add ENOENT for O_TMPFILE created with O_EXCL
  Michael Kerrisk
    ERRORS: Add EINVAL

lseek.2
  Michael Kerrisk
    Note which filesystems support SEEK_HOLE/SEEK_DATA

msgop.2
  Michael Kerrisk
    Note that MSG_EXCEPT is Linux-specific

open.2
  Michael Kerrisk
    Update CONFORMING TO
      Add POSIX.1-2008. Add mention of O_TMPFILE.
      Update text on various flags that were added in POSIX.1-2008, and
      whose definitions can, since glibc 2.12, be obtained by suitably
      defining _POSIX_C_SOURCE or _XOPEN_SOURCE
  Michael Kerrisk
    Add pointer in description to BUGS, for O_ASYNC limitation
  Michael Kerrisk
    Remove crufty duplicate text on modifying file status flags

ptrace.2
  Michael Kerrisk
    Add details to descriptions of PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

select.2
  Michael Kerrisk [Marc Lehmann]
     RETURN VALUE: Fix discussion of treatment of file descriptor sets
       See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=574370

syscalls.2
  Michael Kerrisk
    Remove madvise1() from main list
      madvise1() is one of the system calls that was never

implemented, and listed toward the bottom of the page.

timer_create.2
  Michael Kerrisk
    Add pointer to proc(5) for info on /proc/[pid]/timers

unlinkat.2
  Michael Kerrisk [Mike Frysinger:]
    ERRORS: Add EISDIR
      See https://bugzilla.kernel.org/show_bug.cgi?id=29702

ferror.3
  Michael Kerrisk
    clearerr(), feof(), and ferror() are also POSIX-conformant
  Michael Kerrisk [Reuben Thomas]
    CONFORMING TO: add fileno()

gets.3
  Ian Abbott
    SEE ALSO: add fgets(3)

mq_receive.3
mq_send.3
  Michael Kerrisk [Simone Piccardi]
    SYNOPSIS: s/unsigned/unsigned int/

printf.3
  Michael Kerrisk
    Small reorganization of text in EXAMPLE

rand.3
   Michael Kerrisk
    s/unsigned/unsigned int/ in example

stpcpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function stpcpy() is thread safe.

stpncpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function stpncpy() is thread safe.

strcat.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strcat() and strncat() are thread safe.

strchr.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strchr(), strrchr() and strchrnul() are thread safe.

strcmp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions strcmp() and strncmp() are thread safe.

strftime.3
  Brandon Edens
    Change "week day" to "day of week"
      See https://bugzilla.kernel.org/show_bug.cgi?id=68861

strstr.3
  Peng Haitao
    ATTRIBUTES: Note function that
 is thread safe with exceptions
      The function strstr() is thread safe.
      The function strcasestr() is thread safe with exceptions.

strtod.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread safe with exceptions
      The functions strtod(), strtof() and strtold() are thread safe
      with exceptions.

strtoimax.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread safe with exceptions
      The functions strtoimax() and strtoumax() are thread safe with
      exceptions.

strtol.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread safe with exceptions
      The functions strtol(), strtoll() and strtoq() are thread safe
      with exceptions.

tcgetpgrp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions tcgetpgrp() and tcsetpgrp() are thread safe.

tcgetsid.3
  Peng Haitao

ATTRIBUTES: Note function that is thread-safe

The function tcgetsid() is thread safe.

core.5
Bernhard Walle
Mention that %E exists since Linux 3.0
'%E' in the 'core_pattern' has been introduced in kernel commit 57cc083ad9e1bfeeb4a0ee831e7bb008c8865bf0 which was included in version 3.0. Add that information to the manual page.

filesystems.5
Michael Kerrisk [Axel Beckert]
Add reference to proc(5) for more details on /proc/filesystems
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=735590

locale.5
Michael Kerrisk
SEE ALSO: add locale(7)

proc.5
Michael Kerrisk
Document /proc/[pid]/timers
Michael Kerrisk
Update discussion of wchan
Remove crufty reference to /etc/psdatabase in /proc/PID/stat.
Add /proc/PID/wchan.

See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/737452

environ.7
Michael Kerrisk [Gioele Barabucci]
Correct reference to locale(7) (not locale(5))
locale(7) is the right place for details of the LC_* environment variables.

See http://bugs.debian.org/638186
Michael Kerrisk
Improve references for discussion of locale environment variables
Michael Kerrisk
SEE ALSO: add catopen(3)
Michael Kerrisk
SEE ALSO: add locale(5)

man-pages.7
Michael Kerrisk
Prefer "usable" over "useable"

netdevice.7
  Tilman Schmidt
    Document SIOCGIFCONF case ifc_req==NULL
      Add the missing description of the possibility to call SIOCGIFCONF
      with ifc_req==NULL to determine the needed buffer size, as
      described in
      http://lkml.indiana.edu/hypermail/linux/kernel/0110.1/0506.html
      and verified against source files net/core/dev_ioctl.c and
      net/ipv4/devinet.c in the current kernel git tree.
      This functionality has been present since the beginning of the 2.6
      series. It's about time
it gets documented.

      While I'm at it, also generally clarify the section on
      SIOCGIFCONF.

standards.7
  Michael Kerrisk
    Enhance description of V7
  Michael Kerrisk
    Add C11

tcp.7
  Michael Kerrisk
    Describe format of tcp_*_congestion_control /proc files
      Describe format of tcp_allowed_congestion_control and
      tcp_available_congestion_control.

========== Changes in man-pages-3.58 ==========

Apologies if I missed anyone!

Global changes

Various pages
  Peter Schiffer, Michael Kerrisk [Weizhou Pan]
    Convert pages containing non-ASCII in source code comments to use UTF-8
      Done using a slightly modified version of Peter Schiffer's
      convert_to_utf_8.sh script. The script was modified so as *not*
      a "coding:" marker to the groff source. For now, we'll only put
      that marker on pages that contain non-ASCII characters in the
      rendered text.

      See https://bugzilla.kernel.org/show_bug.cgi?id=60807

New and rewritten pages

A note from Christoph Hellwig prompted me to perform a task that has
been queued for a while: merging the text of the man pages for the
*at([23]) ("directory file descriptor") APIs into their corresponding
traditional pages. When the *at([23]) pages were originally written
(mostly in 2006), the APIs were not part of POSIX and (in most cases)
were not available on other systems. So, it made some sense to wall
them off into their own separate pages. Eight years later, with the
APIs now all in POSIX (except scandirat()), it is much more sensible
to document the newer APIs alongside their traditional counterparts,
so that the newer APIs are not "hidden", and the reader can more
easily see the differences between the APIs.

Thus, the text of 14 pairs of pages has been merged, and the "merged
from" pages have been converted to links to the "merged to" pages.
Along
the way, a few other fixes were made to the pages, as noted
below.

One page that did not undergo such a change was utimensat(2), which
is different enough from utime(2) that it warrants a separate page.
Unlike the other *at() pages, the utimensat(2) page was also already
self-contained, rather than defining itself in terms of differences
from utime(2) as the other *at() pages did.

access.2
  Michael Kerrisk
    Merge text from faccessat(2)
  Michael Kerrisk
    Remove faccessat() race warning
      That point is already covered in existing text in this page.
  Michael Kerrisk
    access() also conforms to POSIX.1-2008

chmod.2
  Michael Kerrisk
    Merge text from fchmodat(2)
  Michael Kerrisk
    Use argument name 'pathname' throughout page

(Some APIs were using 'path' while others used 'pathname')
Michael Kerrisk
CONFORMING TO: chmod() and fchmod() are also in POSIX.1-2008

chown.2
Michael Kerrisk
Merge text
of fchownat(2)
Michael Kerrisk
AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE
Michael Kerrisk
Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others used 'pathname')
Michael Kerrisk
Remove sentence that fchownat() is present on Solaris
That point was only really relevant before fchownat() was
standardized in POSIX.1.2008.
Michael Kerrisk
CONFORMING TO: chown(), fchown(), lchown() are in POSIX.1-2008

link.2
Michael Kerrisk
Merge text of linkat(2)
Michael Kerrisk
CONFORMING TO: link() is in POSIX.1-2008
Michael Kerrisk
AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE

mkdir.2
Michael Kerrisk
Merge text of mkdirat(2)
Michael Kerrisk
CONFORMING TO: mkdir() is in POSIX.1-2008

mknod.2
Michael Kerrisk
Merge text of mknodat(2)
Michael Kerrisk
CONFORMING TO: mknod(2) is in POSIX.1-2008

open.2
Michael Kerrisk
Merge text from openat(2)
Michael Kerrisk
Remove sentence that openat() is present on Solaris
That point was only really relevant before openat() was
standardized in POSIX.1.2008.

readlink.2
  Michael Kerrisk
    Merge text of readlinkat(2)
  Michael Kerrisk
    CONFORMING TO: readlink() is in POSIX.1-2008.
  Michael Kerrisk
    Use argument name 'pathname' throughout page
      (Some APIs were using 'path' while others used 'pathname')

rename.2
  Michael Kerrisk
    Merge text of renameat(2)
  Michael Kerrisk
    CONFORMING TO: rename(2) is in POSIX.1-2008

stat.2
  Michael Kerrisk
    Merge text from fstatat(2)
  Michael Kerrisk
    AT_EMPTY_PATH and AT_NO_AUTOMOUNT are Linux-specific
      These flags require _GNU_SOURCE.
  Michael Kerrisk
    Use argument name 'pathname' throughout page
      (Some APIs were using 'path' while others
 used 'pathname')
  Michael Kerrisk
    Remove sentence that fstatat() is present on Solaris
      That point was only really relevant before fstatat() was
      standardized in POSIX.1.2008.
  Michael Kerrisk
    CONFORMING TO: stat(), fstat(), lstat() are specified in POSIX.1-2008

symlink.2
  Michael Kerrisk
    Merge text of symlinkat(2)
  Michael Kerrisk
    CONFORMING TO: symlink() is in POSIX.1-2008

unlink.2
  Michael Kerrisk
    Merge text of unlinkat(2)
  Michael Kerrisk
    Remove sentence that unlinkat() is present on Solaris
      That point was only really relevant before unlinkat() was
      standardized in POSIX.1.2008.
  Michael Kerrisk
    CONFORMING TO: unlink() is in POSIX.1-2008

mkfifo.3
  Michael Kerrisk
    Merge text of mkfifoat(3)
  Michael Kerrisk
    CONFORMING TO: mkfifo() is in POSIX.1-2008

scandir.3
  Michael Kerrisk
    Merge text of scandirat(3)
  Michael Kerrisk

    Update feature test macro requirements
      The FTM requirements changed in glibc 2.10.
  Michael Kerrisk
    Remove libc4/libc5 note under CONFORMING TO
      No-one much cares about Linux libc these days.
  Michael Kerrisk
    Put detail about alphasort under a NOTES heading
      This text was under CONFORMING TO, which made no sense.
  Michael Kerrisk
    Rework CONFORMING TO text

Newly documented interfaces in existing pages
---

prctl.2
  Kir Kolyshkin
    Document PR_SET_MM options in Linux 3.5
      Some of the PR_SET_MM options were merged to vanilla kernel
      later, and appeared in Linux 3.5. Those are:

        - PR_SET_MM_ARG_START
        - PR_SET_MM_ARG_END
        - PR_SET_MM_ENV_START
        - PR_SET_MM_ENV_END
        - PR_SET_MM_AUXV
        - PR_SET_MM_EXE_FILE

socket.7
  Neil Horman
    Document the SO_RXQ_OVFL
 socket option
  Michael Kerrisk
    Add kernel version number for SO_RXQ_OVFL

New and changed links

---

faccessat.2
  Michael Kerrisk
    Convert to link to access.2

fchmodat.2
  Michael Kerrisk
    Convert to link to chmod.2

fchownat.2
  Michael Kerrisk
    Convert to link to chown.2

fstatat.2
  Michael Kerrisk
    Convert to link to stat.2

linkat.2
  Michael Kerrisk
    Convert to link to link.2

mkdirat.2
  Michael Kerrisk
    Convert to link to mkdir.2

mknodat.2
  Michael Kerrisk
    Convert to link to mknod.2

openat.2
  Michael Kerrisk
    Convert to link to open.2

readlinkat.2
  Michael Kerrisk
    Convert to link to symlink.2

renameat.2
  Michael Kerrisk
    Convert to link rename.2

symlinkat.2
  Michael Kerrisk
    Convert to link to symlink.2

unlinkat.2
  Michael Kerrisk

Convert to link to unlink.2

mkfifoat.3
Michael Kerrisk
Convert to link to mkfifo.3

scandirat.3
Michael Kerrisk
Convert to link to scandir.3

Changes to individual pages
---

alarm.2
Michael Kerrisk
Note semantics of alarm with respect to fork() and execve()

fcntl.2
Michael Kerrisk
Warn that F_GETLK info may already be out of date when the call returns

intro.2
Michael Kerrisk
Describe policy on documenting differences between syscall and glibc API

mmap2.2
Michael Kerrisk
Reword note on glibc mmap() wrapper invocation of mmap2()
Michael Kerrisk
This system call does not exist on x86-64

msgctl.2
Michael Kerrisk
ERRORS: add EPERM for unprivileged attempt to set msg_qbytes > MSGMNB

prctl.2
Michael Kerrisk [Xiawei Chen]
Clarify that PR_GET_TIMERSLACK is returned as the function result
Michael Kerrisk
Clarify that PR_GET_SECCOMP is returned as function result
Michael Kerrisk
Clarify that PR_GET_NO_NEW_PRIVS is returned as function
result

ptrace.2
Michael Kerrisk [Andrew Hunter]
Make it clearer that glibc and syscall APIs differ for PTRACE_PEEK*

Thanks to Denys Vlasenko's additions in 78686915aed6bd12
this page does note that the glibc API for PTRACE_PEEK*
differs from the raw syscall interface. But, as the report
at https://bugzilla.kernel.org/show_bug.cgi?id=70801 shows,
this information could be more obvious. This patch makes its so.

sgetmask.2
  Michael Kerrisk
    Note that these system calls don't exist on x86-64

swapon.2
  Michael Kerrisk
    Split EINVAL cases into separate entries under ERRORS
  Michael Kerrisk
    Add EINVAL error for invalid flags to swapon()

syscalls.2
  Michael Kerrisk
    SEE ALSO: add intro(2)

umount.2
  Michael Kerrisk
    Split EINVAL cases into separate items
  Michael Kerrisk
    ERRORS: Add EINVAL case that was new in 2.6.34

utime.2
  Michael Kerrisk

   Add note that modern applications probably want utimensat(2) etc.

crypt.3
  Michael Kerrisk [KOSAKI Motohiro]
    ERRORS: Add EINVAL and EPERM errors
      See https://bugzilla.kernel.org/show_bug.cgi?id=69771

getifaddrs.3
  Michael Kerrisk
    Enhance example program
      Print statistics for AF_PACKET interfaces.
      Add missing feature test macro definition.
      Reformat output.

iswctype.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function iswctype() is thread safe.

sem_post.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_post() is thread safe.

sem_unlink.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_unlink() is thread safe.

sem_wait.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sem_wait(), sem_trywait() and sem_timedwait() are
       thread safe.

setbuf.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions setbuf(), setbuffer(), setlinebuf() and setvbuf()
      are thread safe.

strlen.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strlen() is thread safe.

strnlen.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strnlen() is thread safe.

strpbrk.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strpbrk() is thread safe.

strsep.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strsep() is thread safe.

swab.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function swab() is thread safe.

resolv.conf.5

Carlos O'Donell
DESCRIPTION: mention that the data is trusted
In a recent discussion about DNSSEC it
was brought to my
attention that not all system administrators may understand
that the information in /etc/resolv.conf is fully trusted.
The resolver implementation in glibc treats /etc/resolv.conf
as a fully trusted source of DNS information and passes on
the AD-bit for DNSSEC as trusted.

This patch adds a clarifying sentence to make it absolutely
clear that indeed this source of information is trusted.

ascii.7
Michael Kerrisk [Sulaiman Mustafa]
Fix rendering of single quote (decimal character 39)
Michael Kerrisk
SEE ALSO: add utf-8(7)
Michael Kerrisk [Duncan de Wet]
Remove mention of ISO 8859-1 as being the default encoding on Linux

packet.7
Neil Horman
Document PACKET_FANOUT_QM fanout mode
Michael Kerrisk
Add kernel version for PACKET_FANOUT_QM
Daniel Borkmann
Improve PACKET_QDISC_BYPASS description

socket.7
Michael Kerrisk
Add kernel version number for SO_BUSY_POLL

========== Changes in man-pages-3.62 ==========

Released: 2014-03-11, Munich

  Michael Kerrisk
    Document LC_TELEPHONE

Removed Pages
---

sync.8
  Michael Kerrisk [Christoph Hellwig, Pádraig Brady]
    Sometime in the 20th century (before my watch), a sync(8)
    page into man-pages. It documents the sync command from
    "fileutils", which long ago become coreutils, and the
    piece under NOTES note some behavior of sync(2)
    that ceased to be true many years ago. The man-pages
    project generally focuses on only Linux kernel and

(g)libc interfaces, so this sync(8) page doesn't really
belong. Furthermore, coreutils has a sync(1) page which
covers the same command. After discussions on the
coreutils list, I've decided to retire this page from
man-pages.

Changes to individual pages
---

clone.2
Michael Kerrisk
Note that CLONE_THREAD also in effect requires CLONE_VM

stat.2
Michael Kerrisk [Marius Gaubas]
Warn the reader that the 'stat' structure definition is not precise
Padding fields aren't shown, and the order of fields varies
somewhat across architectures.

gethostbyname.3
Michael Kerrisk
Remove redundant FTM requirements
_GNU_SOURCE implies _SVID_SOURCE and _BSD_SOURCE, so

_BSD_SOURCE || _SVID_SOURCE || _GNU_SOURCE

is the same as

  Michael Kerrisk
    Make warning not to use this function more prominent

qecvt.3
  Michael Kerrisk [Joseph S. Myers]
    Recommend snprintf(3) not sprintf(3)

raise.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function raise() is thread safe.

remove.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function remove() is thread safe.

sem_destroy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_destroy() is thread safe.

sem_getvalue.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_getvalue()
 is thread safe.

sem_init.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_init() is thread safe.

sockatmark.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sockatmark() is thread safe.

strcpy.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe

The functions strcpy() and strncpy() are thread safe.
Michael Kerrisk [Rick Stanley]
Fix a bug, and improve discussion of forcing termination with strncpy()

strspn.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions strspn() and strcspn() are thread safe.

tempnam.3
Michael Kerrisk
Make warning not to use this function more prominent

tmpnam.3
Michael Kerrisk
Recommend use mkstemp(3) or tmpfile(3) instead

locale.5
Michael Kerrisk
Add intro section that lists all of the LC categories
Michael Kerrisk

'p_cs_precedes' is for *positive* values
Michael Kerrisk
Clarify 'p_sign_posn' and 'n_sign_posn'; simplify 'n_sign_posn'
Add initial sentence for 'p_sign_posn' and 'n_sign_posn'.
Remove repeated list for 'n_sign_posn'.
Michael Kerrisk
Document LC_MESSAGES 'yesstr' and 'nostr'
Michael Kerrisk
Clarify LC_MONETARY 'n_cs_precedes'
Michael Kerrisk
LC_MONETARY: Document 'int_p_sign_posn' and 'int_n_sign_posn'
Michael Kerrisk
Clarify/rework 'p_cs_precedes' and 'n_cs_precedes'
Michael Kerrisk
LC_MONETARY: document 'int_p_sep_by_space' and 'int_n_sep_by_space'
Michael Kerrisk
Remove crufty reference to POSIX.2
Michael Kerrisk
LC_MONETARY: document 'int_p_cs_precedes' and 'int_n_cs_precedes'
Michael Kerrisk
Clarify/simplify 'n_sep_by_space'
Michael Kerrisk
LC_TIME: document 'cal_direction' and 'date_fmt'
Michael Kerrisk
Clarify 'p_sep_by_space'

feature_test_macros.7
  Michael Kerrisk
    _BSD_SOURCE and _SVID_SOURCE are deprecated in glibc 2.20
  Michael Kerrisk
    _GNU_SOURCE implicitly defines other macros
      Saying that _GNU_SOURCE has the "effects of" other macros is not
      quite precise.
  Michael Kerrisk
    Reword glibc version for _ISOC95_SOURCE
  Michael Kerrisk
    _ISOC99_SOURCE also exposes C95 definitions
  Michael Kerrisk
    _ISOC11_SOURCE implies the effects of _ISOC99_SOURCE
  Michael Kerrisk
    Note version number for _POSIX_C_SOURCE >= 200112L implies C99/C95
      _POSIX_C_SOURCE >= 200112L causes C95 definitions to be
      exposed only since glibc 2.12 and C99 definitions only
      since 2.10.
  Michael Kerrisk
    _XOPEN_SOURCE may implicitly define _POSIX_SOURCE and _POSIX_C_SOURCE
  Michael Kerrisk
    Reword glibc version for _ISOC99_SOURCE
  Michael Kerrisk
    Rework discussion of _ISOC99_SOURCE
  Michael
 Kerrisk
    Improve discussion of _DEFAULT_SOURCE
  Michael Kerrisk
    _POSIX_C_SOURCE >= 200112L implies C95 and C95 features

========== Changes in man-pages-3.63 ==========

Released: 2014-03-18, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Christoph Hellwig <hch@infradead.org>
Corrado Zoccolo <czoccolo@gmail.com>
Gregory P. Smith <gps@google.com>

Joseph S. Myers <joseph@codesourcery.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>
Phillip Susi <psusi@ubuntu.com>
Robert P. J. Day <rpjday@crashcourse.ca>
Stefan Puiu <stefan.puiu@gmail.com>
Zhu Yanhai <zhu.yanhai@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

duplocale.3
  Michael Kerrisk
    New page documenting duplocale(3)

newlocale.3
  Michael Kerrisk [Mike Frysinger]
    New page documenting newlocale(3) and freelocale(3)

towlower.3
  Michael Kerrisk
    Largely rewrite description of towlower() to be simpler and clearer

towupper.3
  Michael Kerrisk
    Largely rewrite description of towupper() to be simpler and clearer

uselocale.3
  Michael Kerrisk
    New page documenting uselocale(3)

Newly documented interfaces in existing pages
---

open.2
  Michael Kerrisk
    Document O_DSYNC and rewrite discussion of O_SYNC

isalpha.3
  Michael Kerrisk
    Document the "_l" locale APIs
      The GNU C library v2.3 added some locale APIs, most of which
      were later specified in POSIX.1-2008, namely:

isalnum_l()
isalpha_l()
isblank_l()
iscntrl_l()
isdigit_l()

isgraph_l()
islower_l()
isprint_l()
ispunct_l()
isspace_l()
isupper_l()
isxdigit_l()
isascii_l()

Also update and correct various pieces in CONFORMING TO
(and remove a few crufty old pieces there).

strerror.3
Michael Kerrisk
Document strerror_l()

toupper.3
Michael Kerrisk
Document toupper_l() and tolower_l()

towlower.3
Michael Kerrisk
Document towlower_l()

towupper.3
Michael Kerrisk
Document towupper_l()

proc.5
Michael Kerrisk
Document /proc/sys/kernel/random/uuid

locale.7
Michael Kerrisk
Document LC_ADDRESS
Document LC_IDENTIFICATION
Document LC_MEASUREMENT
Document LC_NAME
Document LC_PAPER
Document LC_TELEPHONE

New and changed links
---

freelocale.3
  Michael Kerrisk
    New link
 to new newlocale.3 page

isalnum_l.3
isascii_l.3
isblank_l.3
iscntrl_l.3
isdigit_l.3
isgraph_l.3
islower_l.3
isprint_l.3
ispunct_l.3
isspace_l.3
isupper_l.3
isxdigit_l.3
  Michael Kerrisk
    New links to isalpha.3

tolower_l.3
toupper_l.3
  Michael Kerrisk
    New links to toupper.3

towlower_l.3
  Michael Kerrisk
    New link to towlower.3

towupper_l.3
  Michael Kerrisk
    New link to towupper.3

Global changes

Various pages
  Michael Kerrisk
    Global change: "upper case" ==> "uppercase", "lower case" ==> lowercase"

Changes to individual pages
---

mount.2
  Michael Kerrisk
    SEE ALSO: add blkid(1)

msgop.2
  Michael Kerrisk
    Document two MSG_COPY failure modes
      Since Linux 3.14, the kernel now diagnoses two errors
      when using msgrcv() MSG_COPY:
      * MSG_COPY must be specified with IPC_NOWAIT
      * MSG_COPY can't be specified with MSG_EXCEPT

open.2

  Michael Kerrisk
    Organize some material under additional subheadings in NOTES
      There's an amorphous mass of material under NOTES. Structure
      it with some subheadings, and do a little reorganizing.
  Michael Kerrisk
    Add other system calls and functions that are like openat()
      fanotify_mark(2), name_to_handle_at(2), and scandirat(3) have a
      directory file descriptor argument for the same reason as openat().
      Also: reword the rationale for the *at() functions somewhat.
  Michael Kerrisk
    Clarify ELOOP error interaction with O_PATH

readahead.2
  Phillip Susi [Corrado Zoccolo, Gregory P. Smith, Zhu Yanhai, Michael Kerrisk, Christoph Hellwig]
    Don't claim the call blocks until all data has been read
      The readahead(2) man page was claiming that the call blocks until
      all data has been read into the cache. This is incorrect.

      See https://bugzilla.kernel.org/show_bug.cgi?id=54271

stat.2
   Michael Kerrisk
    SEE ALSO: add ls(1) and stat(1)

fts.3
  Christoph Hellwig [Michael Kerrisk]
    The fts(3) API does not work with LFS builds
      As pointed out during a recent discussion on libc-hacker the
      fts(3) APIs can't be used with large file offsets:

        https://sourceware.org/bugzilla/show_bug.cgi?id=15838

mbrtowc.3

mbsnrtowcs.3
mbsrtowcs.3
mbtowc.3
  Michael Kerrisk
    Add entries in SEE ALSO
      Mainly inspired by the POSIX pages.

mbsinit.3
  Michael Kerrisk
    SEE ALSO: add mbrlen(3), mbrtowc(3), and wcrtomb(3)

mbsrtowcs.3
wcsrtombs.3
  Michael Kerrisk
    SEE ALSO: add mbsinit(3)

mbstowcs.3
  Michael Kerrisk [Stefan Puiu]
    Add example program
      And add some SEE ALSO entries

memcmp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memcmp() is thread safe.

memcpy.3
  Peng Haitao
    ATTRIBUTES: Note
 function that is thread-safe
      The function memcpy() is thread safe.

memfrob.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memfrob() is thread safe.

memmem.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memmem() is thread safe.

memmove.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memmove() is thread safe.

mempcpy.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mempcpy() and wmempcpy() are thread safe.

memset.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memset() is thread safe.

strerror.3
Michael Kerrisk
CONFORMING TO: strerror() and strerror_r() are in POSIX.1-2008
Michael Kerrisk
Add SS heading for strerror_r()

toupper.3
Michael Kerrisk
Rewrite to more explicitly bring locales into
the discussion
Michael Kerrisk
Retitle BUGS section to NOTES
These are not really bugs, just background info.

wcrtomb.3
wcsnrtombs.3
wcsrtombs.3
wcstombs.3
wctomb.3
Michael Kerrisk
SEE ALSO: add various entries
Mainly inspired by POSIX

core.5
Mike Frysinger [Michael Kerrisk]
Document core_pattern %d specifier
Document %P core_pattern specifier
Michael Kerrisk
Rearrange core_pattern specifiers alphabetically

locale.5
Michael Kerrisk
SEE ALSO: add newlocale(3) + duplocale(3)

feature_test_macros.7
Michael Kerrisk [Joseph S. Myers]
Remove mention of bogus _ISOC95_SOURCE macro
The _ISOC95_SOURCE macro is defined in <features.h>, but it
does nothing. So remove discussion of it, and move some of

the discussion of C95 under the _ISOC99_SOURCE subhead.
Michael Kerrisk [Carlos O'Donell]
Add packaging note for _BSD_SOURCE/_SVID_SOURCE/_DEFAULT_SOURCE
To compile warning-free across glibc < 2.20 and glibc >= 2.20
code may been to define both _DEFAULT_SOURCE and either
_BSD_SOURCE or _SVID_SOURCE.
Michael Kerrisk
Reword description of C90

locale.7
Michael Kerrisk
Add subsection on POSIX.1-2008 (originally GNU) extensions to locale API
Michael Kerrisk
Remove reference to LI18NUX2000
LI18NUX2000 is difficult to even find these days, and in any case
this page does not document gettext(), so notes about gettext()
in the CONFORMING TO section here make no sense.
Michael Kerrisk
SEE ALSO: add mbstowcs(3) and wcstombs(3)
SEE ALSO: add newlocale(3) + duplocale(3)

man-pages.7
Michael Kerrisk
Add preferred term "superblock"
Michael Kerrisk
Add preferred terms "uppercase" and "lowercase"

========== Changes in man-pages-3.64 ==========

Released: 2014-04-06,
Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhay Sachan <sachan.abhay@gmail.com>
Alexey Samsonov <samsonov@google.com>
Andrey Vagin <avagin@openvz.org>
Aneesh Kumar K.V <aneesh.kumar@linux.vnet.ibm.com>
Christoph Hellwig <hch@infradead.org>
David Prévot <taffit@debian.org>

Eric Dumazet <edumazet@google.com>
Eric W. Biederman <ebiederm@xmission.com>
Jan Kara <jack@suse.cz>
Kir Kolyshkin <kir@openvz.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Peter Hurley <peter@hurleysoftware.com>
Petr Gajdos <pgajdos@suse.cz>
Robert P. J. Day <rpjday@crashcourse.ca>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

open_by_handle_at.2
  Michael Kerrisk [Mike Frysinger, Neil Brown, Aneesh Kumar K.V,
  Christoph Hellwig]
    New page describing name_to_handle_at(2) and open_by_handle_at(2)

inotify.7
  Michael Kerrisk
    Rewrite introductory section
    Reorganize "Limitations and caveats" subsection
  Michael Kerrisk
    Further describe the race when adding a watch to a new subtree
  Michael Kerrisk
    Directory renames may invalidate multiple paths cached by application
  Michael Kerrisk
    Add paragraph on cache consistency checking
  Michael Kerrisk
    Mention cache rebuilding to handle overflow events
  Michael Kerrisk
    Moving an object to another filesystem generates IN_DELETE_SELF
  Michael Kerrisk [Jan Kara]
    Add text on dealing with rename() events
  Michael Kerrisk
    Note rationale and consequences of event coalescing
  Michael Kerrisk [Eric W. Biederman]
    Inotify doesn't work for remote and pseudo filesystems
  Michael Kerrisk
    Add some examples of events generated by various system calls
  Michael Kerrisk

BUGS: IN_ONESHOT does now cause IN_IGNORED when the watch is dropped
A silent change as a result of the fanotify work in kernel 2.6.36.
Michael Kerrisk
Note that IN_DELETE_SELF will be followed by IN_IGNORED
Michael Kerrisk
Note that IN_UNMOUNT will be followed by an IN_IGNORED event
Michael Kerrisk
Inotify does not report events for mmap(2) and msync(2)
Michael Kerrisk
Add examples of syscalls that trigger IN_ATTRIB
Michael Kerrisk
Add some examples of syscalls that trigger IN_MODIFY
Michael Kerrisk
execve(2) also generates IN_ACCESS
Michael Kerrisk
Add examples of syscalls that trigger IN_CREATE

Newly documented interfaces in existing pages
---

perf_event_open.2
Vince Weaver [Michael Kerrisk]
Document the PERF_FLAG_FD_CLOEXEC flag

The Linux 3.14 release adds support for the PERF_FLAG_FD_CLOEXEC flag.

feature_test_macros.7
Michael Kerrisk
Document _LARGEFILE_SOURCE

tcp.7
Michael Kerrisk [Eric Dumazet]
Document /proc/sys/net/ipv4/tcp_autocorking
Text heavily based on Documentation/networking/ip-sysctl.txt

New and changed links
---

name_to_handle_at.2
Michael Kerrisk
New link to new open_by_handle_at(2) page

Global changes
---

fmemopen.3
getaddrinfo.3
mq_notify.3
offsetof.3
aio.7
  Michael Kerrisk
    Print size_t/ssize_t values using %z printf() modifier
      There are fewer and fewer systems these days that don't
      support the %z specifier mandated in C99. So replace the
      use of %ld/%lu + (long) cast with %zd/%zu.

Changes to individual pages
---

bdflush.2
fsync.2
sync.2
  Kir Kolyshkin
    SEE ALSO: remove update(8) reference
      Remove
 reference to update(8) man page, since there is no such
      page. This is an ancient BSD leftover I believe.

chown.2
  Michael Kerrisk
    Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

getxattr.2
  Abhay Sachan
    Fix RETURN VALUE description
      A EA can have length zero.

inotify_add_watch.2
  Michael Kerrisk
    ERRORS: add ENAMETOOLONG

inotify_init.2
  Michael Kerrisk
    Add pointer to inotify(7)

link.2
  Michael Kerrisk
    When AT_EMPTY_PATH is specified, 'olddirfd' must not refer to a
    directory

mmap.2

Andrey Vagin
The file descriptor for a file mapping must be readable
There is no difference between MAP_SHARED and MAP_PRIVATE.

open.2
Michael Kerrisk
SEE ALSO: add open_by_name_at(2)

perf_event_open.2
Vince Weaver
Document PERF_EVENT_IOC_PERIOD behavior change
Linux 3.14 (in commit bad7192b842c83e580747ca57104dd51fe08c223)
changes
the perf_event PERF_EVENT_IOC_PERIOD ioctl() behavior
on all architectures to update immediately, to match the behavior
found on ARM.

stat.2
Michael Kerrisk
Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

syscalls.2
Michael Kerrisk
Add sched_getattr() and sched_setattr()
And update kernel version to 3.14

abort.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function abort() is thread safe.

confstr.3
Michael Kerrisk
SEE ALSO: add getconf(1), fpathconf(3), sysconf(3), pathconf(3)

exit.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function exit() is not thread safe.

fenv.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions feclearexcept(), fegetexceptflag(), feraiseexcept(),
fesetexceptflag(), fetestexcept(), fegetround(), fesetround(),
fegetenv(),
feholdexcept(), fesetenv(), feupdateenv(),
feenableexcept(), fedisableexcept() and fegetexcept() are thread

safe.

fpathconf.3
Michael Kerrisk
SEE ALSO: add confstr(3)

fseek.3
Michael Kerrisk [Petr Gajdos]
Document EINVAL error for negative file offset

fseeko.3
Michael Kerrisk
Add feature test macro requirements

fts.3
Michael Kerrisk [Mike Frysinger]
Remove mention of "32-bit systems" in BUGS

fwide.3
wprintf.3
Michael Kerrisk [Robert P. J. Day]
Remove mention of bogus _ISOC95_SOURCE feature test macro

getline.3
Alexey Samsonov
Caller should free the allocated buffer even if getline() failed
Relevant discussion in glibc bugzilla:
https://sourceware.org/bugzilla/show_bug.cgi?id=5666

getloadavg.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getloadavg() is thread safe.

getpt.3
Peng Haitao
ATTRIBUTES:
Note function that is thread-safe
The function getpt() is thread safe.

if_nametoindex.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions if_nametoindex() and if_indextoname() are thread safe.

index.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe

The functions index() and rindex() are thread safe.

mkfifo.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions mkfifo() and mkfifoat() are thread safe.

netlink.3
  Michael Kerrisk
    SEE ALSO: make the reference for libnetlink the libnetlink(3) man page

random.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions random(), srandom(), initstate() and setstate()
      are thread safe.

random_r.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions random_r(), srandom_r(), initstate_r() and
       setstate_r() are thread safe.

sigvec.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sigvec(), sigblock(), sigsetmask() and
      siggetmask() are thread safe.

      The macro sigmask() is thread safe.

sysconf.3
  Michael Kerrisk
    SEE ALSO: add confstr(3)

termios.3
  Michael Kerrisk [Peter Hurley]
    Fix error in discussion of MIN > 0, TIME == 0 noncanonical mode
      As reported by Peter Hurley, for the MIN > 0, TIME == 0 case:

        read() may unblock when MIN bytes are available but return
        up to the 'count' parameter if more input arrives in between
        waking and copying into the user buffer.
        ...
        read() may also _not_ return until MIN bytes have been
        received, even if 'count' bytes have been received.
  Michael Kerrisk
    Add a note on interaction of O_NONBLOCK with noncanonical MIN/TIME

POSIX leaves the behavior open.
Michael Kerrisk
Clarify termination conditions for MIN > 0, TIME > 0
Michael Kerrisk
Clarify behavior if data is available before noncanonical read()
Michael Kerrisk
Add descriptive titles to noncanonical read() cases

symlink.7
Michael Kerrisk
Add subsection on opening a symbolic link with O_PATH
Michael Kerrisk
name_to_handle_at(2) and open_by_handle_at(2) optionally follow symlinks
Michael Kerrisk
Mention use of readlink(2) to read contents of a symlink

========== Changes in man-pages-3.65 ==========

Released: 2014-04-20, Munich

Apologies if I missed anyone!

New and rewritten pages
---

inet_net_pton.3
  Michael Kerrisk
    New page describing inet_net_pton(3) and inet_net_ntop(3)

Newly documented interfaces in existing pages
---

fallocate.2
  Michael Kerrisk, Namjae Jeon [Christoph Hellwig, Dave Chinner]
    Document FALLOC_FL_COLLAPSE_RANGE

prctl.2
   Michael Kerrisk [Alex Thorlton]
    Document PR_SET_THP_DISABLE and PR_GET_THP_DISABLE

proc.5
  Michael Kerrisk
    Document /proc/[pid]/stack
  Michael Kerrisk
    Document /proc/[pid]/clear_refs

New and changed links
---

inet_net_ntop.3
  Michael Kerrisk
    New link to new inet_net_pton.3

Changes to individual pages
---

fcntl.2
  Michael Kerrisk
    Note the race when O_CLOEXEC is used at same time as fork()+execve()

madvise.2
  Michael Kerrisk

SEE ALSO: see prctl(2)
Because of PR_SET_THP_DISABLE.

mlock.2
Michael Kerrisk
Describe treatment of MCL_FUTURE during fork(2) and execve(2)

msync.2
Michael Kerrisk [Richard Hansen, Greg Troxel]
Warn that one of MS_SYNC or MS_ASYNC is required

open.2
Michael Kerrisk
Add more detail on the race that O_CLOEXEC is designed to avoid
Michael Kerrisk [Matthew Dempsky]
Remove
crufty text stating that O_DIRECTORY is Linux-specific
Michael Kerrisk
Note which filesystems support O_TMPFILE

perf_event_open.2
Vince Weaver [Michael Kerrisk]
Clarify EACCES and EPERM errors
Clarify the reasons for EACCES and EPERM errors.
Vince Weaver [Michael Kerrisk]
Make the ERRORS section more comprehensive.
Determined both by code inspection and by writing a large
number of test programs.

personality.2
Michael Kerrisk
Available execution domains are listed in <sys/personality.h>
Michael Kerrisk
Fix discussion of return value

prctl.2
Michael Kerrisk
ERRORS: document EINVAL for PR_GET_NO_NEW_PRIVS
ERRORS: document EINVAL for PR_SET_PDEATHSIG
ERRORS: document EINVAL for PR_SET_TIMING
ERRORS: document EINVAL for PR_SET_DUMPABLE
ERRORS: document EINVAL for PR_SET_NO_NEW_PRIVS

shmget.2
Michael Kerrisk
Rewrite description of SHMMNI
default value
Michael Kerrisk

Note default value of SHMMAX
Note default value for SHMALL

byteorder.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions htonl(), htons(), ntohl() and ntohs() are thread safe.

fexecve.3
Michael Kerrisk [Steven Stewart-Gallus]
If 'fd' is a close-on-exec file descriptor for a script, fexecve() fails
See https://bugzilla.kernel.org/show_bug.cgi?id=74481

ffs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ffs(), ffsl() and ffsll() are thread safe.

getauxval.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getauxval() is thread safe.

getcontext.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getcontext() and setcontext() are thread safe.

getsubopt.3
Peng Haitao
ATTRIBUTES: Note function that
is thread-safe
The function getsubopt() is thread safe.

getutmp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getutmp() and getutmpx() are thread safe.

inet.3
Michael Kerrisk
Note success and error return for inet_aton()

inet.3
Michael Kerrisk [Craig McQueen]
The form 'a.b' if is suitable for Class A addresses (not class C)
Michael Kerrisk

SEE ALSO: add inet_net_pton(3)

makecontext.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions makecontext() and swapcontext() are thread safe.

pthread_attr_setdetachstate.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setdetachstate() and
pthread_attr_getdetachstate() are thread safe.

pthread_attr_setguardsize.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setguardsize()
and
pthread_attr_getguardsize() are thread safe.

sigsetops.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sigemptyset(), sigfillset(), sigaddset(),
sigdelset(), sigismember(), sigisemptyset(), sigorset() and
sigandset() are thread safe.

proc.5
Petr Gajdos
Improve /proc/[pid]/smaps entries description
Michael Kerrisk
/proc/PID/smaps is present only if CONFIG_PROC_PAGE_MONITOR
Michael Kerrisk
Note kernel version for /proc/sys/kernel/{shmall,shmmax}
Michael Kerrisk
Note kernel version for /proc/sys/kernel/{msgmax,msgmnb}

capabilities.7
Michael Kerrisk
SEE ALSO: add capsh(1)

libc.7
Michael Kerrisk
Add musl libc

========== Changes in man-pages-3.66 ==========

Released: 2014-05-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in
 the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alan Curry <rlwinm@sdf.org>
Carsten Andrich <carsten.andrich@tu-ilmenau.de>
Daniel Borkmann <dborkman@redhat.com>
David Prévot <taffit@debian.org>
Eric Siegerman <pub08-knl@davor.org>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jan Kara <jack@suse.cz>
Jan Moskyto Matejka <mq@suse.cz>
John Marshall <jm18@sanger.ac.uk>
Lukáš Czerner <lczerner@redhat.com>
Manfred Spraul <manfred@colorfullife.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Miklos Szeredi <miklos@szeredi.hu>
Neil Horman <nhorman@tuxdriver.com>
Peng Haitao <penght@cn.fujitsu.com>
Peter Schiffer <pschiffe@redhat.com>
Randy Dunlap <rdunlap@infradead.org>
Silvan Jegen <s.jegen@gmail.com>
Simon Paillard <spaillard@debian.org>
Stefan Puiu <stefan.puiu@gmail.com>
Steven Stewart-Gallus <sstewartgallus00@mylangara.bc.ca>
Stijn Hinterding <contact@stijnhinterding.nl>
Willem de Bruijn <willemb@google.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies
 if I missed anyone!

New and rewritten pages
---

fanotify_init.2
  Heinrich Schuchardt, Michael Kerrisk
    New page documenting fanotify_init(2)

fanotify_mark.2

Heinrich Schuchardt, Michael Kerrisk
New page documenting fanotify_mark(2)

sched_setscheduler.2
Michael Kerrisk
Page rewritten
Stripped out the general scheduling material, which
moved to sched(7), and rewrote much of the remainder.
Changed copyright and license since pretty much all
of the content was or is written by mtk.

fanotify.7
Heinrich Schuchardt, Michael Kerrisk
New page providing overview of the fanotify API

sched.7
Michael Kerrisk
New page providing an overview of the scheduling APIs
Most of this content derives from sched_setscheduler(2). In
preparation for adding a sched_setattr(2) page, it makes
sense to isolate out this general content to
a separate
page that is referred to by the other scheduling pages.

Newly documented interfaces in existing pages
---

fallocate.2
Lukas Czerner [Michael Kerrisk]
Document FALLOC_FL_ZERO_RANGE
FALLOC_FL_ZERO_RANGE was added in Linux 3.14,
for zeroing ranges in the allocated space in a file.

rename.2
Miklos Szeredi [Michael Kerrisk]
Document renameat2() system call added in Linux 3.15

shmop.2
Michael Kerrisk
Document SHM_EXEC

Changes to individual pages
---

flock.2
Michael Kerrisk

Employ term "open file description" in DESCRIPTION
And include reference to open(2) for an explanation of the term.

getpriority.2
Michael Kerrisk
SEE ALSO: add sched(7)

getsockopt.2
Carsten Andrich
SEE ALSO: add packet(7)

link.2
Michael Kerrisk [Steven Stewart-Gallus]
Document ENOENT error for linkat()
See https://bugzilla.kernel.org/show_bug.cgi?id=73301

msgget.2
Michael Kerrisk
Reword EEXIST error

msgop.2
Michael Kerrisk
Note capability required to raise MQ size beyond MSGMNB

msync.2
Michael Kerrisk [Heinrich Schuchardt]
s/flushes... back to disk/flushes... back to filesystem/

nice.2
Michael Kerrisk
SEE ALSO: add sched(7)

open.2
Peter Schiffer
Update note on alignment of user buffer and file offset for O_DIRECT
The sentence in open(2) man page in notes for O_DIRECT flag:

"Under Linux 2.6, alignment to 512-byte boundaries suffices."

is not universally correct. The alignment is a property of the
storage, for example, 4k-sector drives with no 512 byte sector
emulation will be unable to perform 512-byte direct I/O.
Michael Kerrisk
Note some of the various synonyms for "open file description"
Michael Kerrisk
Remove repetitious
text on use of fcntl() to change file status flags

open_by_handle_at.2
  Michael Kerrisk
    Mention FreeBSD analogs

posix_fadvise.2
  Michael Kerrisk [Eric Siegerman]
    Fix wording error under "Architecture-specific variants"
      See https://bugzilla.kernel.org/show_bug.cgi?id=75431

process_vm_readv.2
  Michael Kerrisk [Stijn Hinterding]
    Add feature test macro requirements
      The _GNU_SOURCE FTM must be defined.

read.2
  Michael Kerrisk
    BUGS: detail nonatomicity bug with respect to file offset updates
      This bug was fixed in Linux 3.14, with commit
      9c225f2655e36a470c4f58dbbc99244c5fc7f2d4
      See also http://thread.gmane.org/gmane.linux.kernel/1649458

sched_get_priority_max.2
  Michael Kerrisk
    Small changes consistent with migration of content to sched(7)

sched_rr_get_interval.2
  Michael Kerrisk
    Small changes consistent with migration of content to sched(7)

sched_setaffinity.2
   Michael Kerrisk
    Small changes consistent with migration of content to sched(7)

sched_setparam.2
  Michael Kerrisk
    Small changes consistent with migration of content to sched(7)

sched_yield.2
  Michael Kerrisk
    Small changes consistent with migration of content to sched(7)

semget.2
  Michael Kerrisk
    Consolidate discussion on noninitialization of semaphores
      The fact that semget() does not initialize the semaphores
      in a new set was covered in two places (in DESCRIPTION
      and BUGS). Consolidate these into one place (in NOTES)
      and also point out that POSIX.1-2008 says that a future

version of the standard may require an implementation to
initialize the semaphores to 0.
Michael Kerrisk
Clarify SEMMNS versus SEMMSL*SEMMNI
Michael Kerrisk
Rework EINVAL text a little
Michael Kerrisk
Clarify wording for EEXIST error

shmget.2
Manfred Spraul
Clarify SHMALL
The default for SHMALL is a limit of 8 GB, regardless of
PAGE_SIZE. The current documentation does not mention that
and is therefore more difficult to understand than necessary.
Manfred Spraul
Correct math error
2097152 is 2^21, not 2^20.
Michael Kerrisk
Reword EEXIST error
Michael Kerrisk
Clarify one of the EINVAL cases
Michael Kerrisk
Note that SHM_NORESERVE is a Linux extension
Michael Kerrisk [Simon Paillard]
Fix kernel version numbers in discussion of SHMALL
Michael Kerrisk
Rework EINVAL text
Michael Kerrisk
Move and rework discussion of mode bits
Michael Kerrisk
Reword description of O_EXCL

shmop.2
Michael Kerrisk
Move fork(2), execve(2), _exit(2) discussion to NOTES
Michael Kerrisk
Add subheads for shmat() and shmdt()
Michael Kerrisk
Rework discussion of SHM_RDONLY and SHM_REMAP
into list format
Michael Kerrisk
Structure the attach cases as a list

sigaction.2
Alan Curry
Fix bad cross reference (times(2) not time(2))
The system call that reports child CPU usage is times(2),

not time(2).

symlink.2
Michael Kerrisk [Steven Stewart-Gallus]
Document ENOENT error for symlinkat()
See https://bugzilla.kernel.org/show_bug.cgi?id=73301

syscalls.2
Michael Kerrisk
Add renameat2()
And bump kernel version.

write.2
Michael Kerrisk
BUGS: detail nonatomicity bug with respect to file offset updates
This bug was fixed in Linux 3.14, with commit
9c225f2655e36a470c4f58dbbc99244c5fc7f2d4
See also http://thread.gmane.org/gmane.linux.kernel/1649458

pthread_attr_setinheritsched.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setinheritsched() and
pthread_attr_getinheritsched()
are thread safe.

pthread_attr_setschedparam.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setschedparam() and
pthread_attr_getschedparam() are thread safe.

pthread_attr_setschedpolicy.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setschedpolicy() and
pthread_attr_getschedpolicy() are thread safe.

pthread_attr_setscope.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setscope() and pthread_attr_getscope()
are thread safe.

pthread_attr_setstack.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setstack() and pthread_attr_getstack()

are thread safe.

sched_getcpu.3
  Michael Kerrisk
    SEE ALSO: add sched(7)

termios.3
  Michael Kerrisk [Yuri Kozlov]
     Rework intro text for 'c_oflag'
  Michael Kerrisk
    OFDEL is in POSIX.1-2001, so remove "(Not in POSIX)" text

proc.5
  Jan Moskyto Matejka [Randy Dunlap]
    Improve description of /proc/stat 'intr' field
      The sum at the beginning of line "intr" includes also
      unnumbered interrupts.

packet.7
  Carsten Andrich [Neil Horman]
    Improve sockopt documentation for packet sockets
  Carsten Andrich [Willem de Bruijn]
    PACKET_LOSS has inverse meaning
  Stefan Puiu [Daniel Borkmann, Carsten Andrich]
    Status in PACKET_RX_RING is actually a bit mask
  Michael Kerrisk [Carsten Andrich]
    SEE ALSO: add /tools/testing/selftests/net/psock_tpacket.c

========== Changes in man-pages-3.67 ==========

Released: 2014-05-21, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated
 in changes in this release:

Andy Lutomirski <luto@amacapital.net>
Aurelien Jarno <aurelien@aurel32.net>
Bill Allombert <ballombe@debian.org>
Christoph Hellwig <hch@infradead.org>
Davidlohr Bueso <davidlohr@hp.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>

Ingo Schwarze <schwarze@usta.de>
Jan Kara <jack@suse.cz>
Jon Grant <jg@jguk.org>
Juri Lelli <juri.lelli@gmail.com>
Lucas De Marchi <lucas.demarchi@profusion.mobi>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Peter Zijlstra <peterz@infradead.org>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Sam Varshavchik <mrsam@courier-mta.com>
Simon Paillard <spaillard@debian.org>
Steven Stewart-Gallus <sstewartgallus00@mylangara.bc.ca>
Török Edwin <edwin@etorok.net>
William Morriss <wjmelements@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

sched_setattr.2
  Michael Kerrisk, Peter Zijlstra [Juri Lelli]
    New page describing sched_setattr(2)
 and sched_getattr(2)

system.3
  Michael Kerrisk
    Rewrote large parts of the page and added a number of details

Newly documented interfaces in existing pages
---

sched.7
  Peter Zijlstra, Michael Kerrisk [Juri Lelli]
    Document SCHED_DEADLINE

New and changed links
---

renameat2.2
  Michael Kerrisk
    New link to rename.2

sched_getattr.2
  Michael Kerrisk

New link to new sched_setattr

Changes to individual pages
---

bind.2
  Michael Kerrisk
    ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

chown.2
  Michael Kerrisk
    NOTES: Add some subheadings

connect.2
  Michael Kerrisk [William Morriss]
    ERRORS: Add EADDRNOTAVAIL for ephemeral port range exhaustion
      Verified from testing and the kernel source.
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=745775
  Michael Kerrisk
    Remove mention
 of ip_local_port_range under EAGAIN error

create_module.2
delete_module.2
init_module.2
query_module.2
  Michael Kerrisk [Lucas De Marchi]
    Clarify glibc header file declaration/ABI wrapper details
      create_module(), delete_module(), init_module(), and
      query_module() are not declared in header files, but
      through an accident of history glibc provides an ABI
      for them that it continues to maintain, for
      compatibility reasons.

execve.2
  Michael Kerrisk [Steven Stewart-Gallus]
    Note SIGKILL case when execve() fails beyond the point of no return
  Michael Kerrisk
    NOTES: Add a subheading and reorder paragraphs

fanotify_init.2
  Heinrich Schuchardt [Michael Kerrisk]
    Document range of permitted flags for event_f_flags
      With a new patch included in the mm tree, event_f_flags is
      checked for allowable values.

fcntl.2

Michael Kerrisk
Add "file locking" subheading
under NOTES

fork.2
Michael Kerrisk
ERRORS: SCHED_DEADLINE tasks can fail with EAGAIN
SCHED_DEADLINE tasks can fail with EAGAIN unless the
reset-on-fork flag is set.

futex.2
Michael Kerrisk
Note that there is no glibc wrapper

getpriority.2
Rasmus Villemoes
Fix prototypes for getpriority() and setpriority()
The who argument has type id_t (which happens to be u32 on linux).

get_robust_list.2
Rasmus Villemoes
Add <sys/types.h> to synopsis of get_robust_list()
If one were to implement wrappers for [gs]et_robust_list() using the
given prototypes, one would also have to include sys/types.h to get
a definition of size_t.

getrusage.2
Michael Kerrisk [Bill Allombert]
_GNU_SOURCE must be defined to obtain RUSAGE_THREAD definition
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=746569

link.2
open.2
Andy Lutomirski [Michael Kerrisk]
Update AT_EMPTY_PATH and O_PATH documentation

listen.2
Michael Kerrisk
ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

mbind.2
Rasmus Villemoes
Fix prototype for mbind(2)
The nmask argument is const. The return type in numaif.h is long.
(Well, at least <numaif.h> says nmask is const. The current kernel
does not define it as a const argument, but sys_mbind() only
passes it to get_nodes(), which does treat it as const.)

msgop.2
  Davidlohr Bueso [Michael Kerrisk]
    Enhance description of "full queue" criteria

poll.2
  Rasmus Villemoes
    Add <signal.h> to synopsis for ppoll()
      One needs to #include <signal.h> to get the definition of the
      type (sigset_t) of the mask argument to ppoll().

readlink.2
  Rasmus Villemoes
    Fix return type of readlinkat()

recv.2
  Michael Kerrisk
    Clarify details of msg_name and msg_namelen fields

recvmmsg.2

 Michael Kerrisk
    Describe timeout bug
      See https://bugzilla.kernel.org/show_bug.cgi?id=75371
      and http://thread.gmane.org/gmane.linux.man/5677

remap_file_pages.2
  Andy Lutomirski [Christoph Hellwig, Andy Lutomirski]
    remap_file_pages() has no benefit for real files
      Linux commit 3ee6dafc677a68e461a7ddafc94a580ebab80735 caused
      remap_file_pages to be emulated when used on real file.

sched_get_priority_max.2
  Michael Kerrisk
    'policy' can also be SCHED_DEADLINE

sched_setaffinity.2
  Rasmus Villemoes
    Fix prototype for sched_setaffinity()
      The mask argument is const.

sched_setparam.2
  Michael Kerrisk
    ERRORS: mark errors that apply just for sched_setparam()
  Michael Kerrisk
    ERRORS: Add EINVAL for invalid arguments
  Michael Kerrisk
    SEE ALSO: add sched_setattr(2)

sched_setscheduler.2
  Michael Kerrisk
    ERRORS: mark errors that apply just to sched_setscheduler()
  Michael Kerrisk
    ERRORS: add EINVAL case for pid < 0
  Michael Kerrisk
    ERRORS: separate out EINVAL cases

semget.2
  Michael Kerrisk
    NOTES: Add subheadings and reorder paragraphs

semop.2
  Rasmus Villemoes
    Fix prototypes for semop() and semtimedop()
      The nsops arguments have type size_t, not unsigned, and the
      timeout argument of semtimedop() is const.
  Michael Kerrisk
    NOTES: Add a subheading

send.2
  Michael Kerrisk
    Add details on various 'msghdr' fields
  Michael Kerrisk
    ERRORS: Add EAGAIN for ephemeral port range exhaustion
  Michael Kerrisk
    Add some subheadings under DESCRIPTION

shmget.2
  Michael Kerrisk
    NOTES: Add a subheading

stat.2
  Michael Kerrisk [Aurelien Jarno]
    Describe feature test macro requirements for file type test macros
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728240
  Michael Kerrisk
    Update FTM requirements
 for lstat()
  Michael Kerrisk
    Split discussion of 'st_mode' fields into type and permissions
  Michael Kerrisk
    Move text on S_I*() macros to follow text on S_I* macros
      That ordering is more logical

stime.2
  Rasmus Villemoes
    Fix prototype for stime()

The argument is const, both according to the actual header files and
according to <http://www.sco.com/developers/devspecs/vol1a.pdf>.

syscall.2
Rasmus Villemoes
Fix prototype for syscall()
The first argument and the return value of syscall() has type long,
not int.

getopt.3
Michael Kerrisk
EXAMPLE: Add subheadings to distinguish the two example programs

malloc.3
Michael Kerrisk
Reword text referring to mallopt(3)
Linux libc is no longer "recent"; drop mention of it.

pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_setaffinity_np.3
pthread_setschedparam.3
pthread_setschedprio.3
pthread_yield.3
pthreads.7
Michael Kerrisk
Change references to "sched_setscheduler(2)" to "sched(7)"
Change consistent with the fact that the scheduling overview
page is now sched(7) not sched_setscheduler(2).

pthread_attr_setstackaddr.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setstackaddr() and
pthread_attr_getstackaddr() are thread safe.

pthread_attr_setstacksize.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setstacksize() and
pthread_attr_getstacksize() are thread safe.

pthread_kill.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_kill() is thread safe.

pthread_kill_other_threads_np.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_kill_other_threads_np()
is thread safe.

pthread_self.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_self() is thread safe.

pthread_setcancelstate.3
  Michael Kerrisk
    Add paragraph breaks to "Asynchronous cancelability" subsection

pthread_setcancelstate.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_setcancelstate() and
      pthread_setcanceltype() are thread safe.
  Michael Kerrisk
    NOTES: Add some subheadings

pthread_setschedparam.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_setschedparam() and pthread_getschedparam()
      are thread safe.

pthread_setschedprio.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_setschedprio() is thread safe.

pthread_sigmask.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
       The function pthread_sigmask() is thread safe.

pthread_sigqueue.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_sigqueue() is thread safe.

pthread_testcancel.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_testcancel() is thread safe.

pthread_yield.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_yield() is thread safe.

remquo.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions remquo(), remquof() and remquol() are thread safe.

rtime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function rtime() is thread safe.

sched_getcpu.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sched_getcpu() is thread safe.

stpcpy.3
  Ingo Schwarze
    Note some history of
 stpcpy()
      Quoting Ingo:
      I just noticed that the stpcpy(3) manual contains a speculation
      that appears to be untrue on closer investigation: That function
      did not originate in MS DOS, but in Lattice C on AmigaDOS.

      Here is a patch against the git master HEAD to fix that, and add
      some more historical information. To provide some background and
      allow you to more easily verify the correctness of the patch, i'm
      appending my mail to <misc@openbsd.org>, where i'm giving some
      more details about the history and pointing to some primary
      sources. That mail also contains the (similar, but shorter)
      patch i just committed to the OpenBSD manual page.

strcasecmp.3
  Michael Kerrisk [Aurelien Jarno, Török Edwin]
    Explain why strcasecmp()+strncasecmp() are also declared in <string.h>
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729436

strcpy.3
   Michael Kerrisk
    NOTES: Add a subheading

fd.4

Michael Kerrisk [Sam Varshavchik]
Fix floppy disk device names
The naming convention shown in the page was ancient.
Now, the page is consistent with Documentation/devices.txt
(where it is noted that "The use of the capital letters
D, H and E for the 3.5" models have been deprecated, since
the drive type is insignificant for these devices"

proc.5
Michael Kerrisk
Document /proc/timer_stats
Michael Kerrisk
(Briefly) document /proc/timer_list
Michael Kerrisk
Add /proc/sys/kernel/{sched_rt_period_us,sched_rt_runtime_us}
Reference sched(7) for an explanation of these two files

capabilities.7
Michael Kerrisk
Mention sched_setattr(2) under CAP_SYS_NICE

cpuset.7
Michael Kerrisk
SEE ALSO: add sched(7)

credentials.7
Michael Kerrisk
Mention sched_getattr() as a place where credentials
are checked

fanotify.7
Heinrich Schuchardt [Jan Kara]
BUGS: error events can be lost when reading from fanotify FD
Michael Kerrisk [Heinrich Schuchardt]
Fix description of FAN_EVENT_NEXT()
FAN_EVENT_NEXT() does not update 'meta'; rather, it returns a
pointer to the next metadata structure. In addition, generally
rework the description to be a bit clearer and more detailed.
Heinrich Schuchardt
Document FAN_EVENT_METADATA_LEN

ip.7
Michael Kerrisk
Note cases where an ephemeral port is used
Michael Kerrisk
Remove BUGS text on glibc failing to declare in_pktinfo
Michael Kerrisk
Clarify 'ip_local_port_range' and mention the term "ephemeral ports"

Michael Kerrisk
Note some more details about assignment of ephemeral ports
Michael Kerrisk
BUGS: ephemeral port range exhaustion is diagnosed inconsistently
Different system calls use different 'errno'
values to diagnose
exhaustion of the ephemeral port range.

sched.7
Michael Kerrisk
Document sched_rt_period_us and sched_rt_runtime_us /proc files
And rework and relocate the text on dealing with runaway
real-time processes.
Michael Kerrisk
Mention sched_setattr(2) in list of APIs that can change policies
Michael Kerrisk
sched_setattr(2) can also be used to set 'nice' value
Michael Kerrisk
Remove mention of sched_setscheduler() when talking about sched_priority
There are nowadays multiple ways to set sched_priority (and
in fact there always were, since we also had sched_setparam(2)).
Michael Kerrisk
SEE ALSO: Add Documentation/scheduler/sched-design-CFS.txt
Michael Kerrisk
Don't mention sched_setscheduler(2) in discussions of setting policies
In a couple of places, sched_setscheduler(2) is mentioned as the
way of setting policies.
But now there is sched_setattr(2) as
well, rewrite the text in a more generic way.
Michael Kerrisk
Rework summary text describing sched_setattr(2) and sched_getattr(2)
Note that these APIs are a superset of sched_setscheduler(2)
and sched_getscheduler(2).
Michael Kerrisk
Remove crufty text relating to sched_setscheduler()
All of the removed text is in sched_setscheduler(2) and
should have been trimmed from this page.
Michael Kerrisk
SEE ALSO: Mention more files in Documentation/scheduler/ directory

========== Changes in man-pages-3.68 ==========

Released: 2014-05-28, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alastair McKinstry <mckinstry@computer.org>
Carsten Grohmann <carstengrohmann@gmx.de>
Colin
 Williams <colinwilliams1968@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Lars Wirzenius <liw@iki.fi>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Richard Braakman <richard.braakman@jollamobile.com>
Simon Paillard <spaillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages
----

localedef.1
  Marko Myllynen, Richard Braakman, Alastair McKinstry, Lars Wirzenius
    New page for localedef(1)
      Add new page based on Debian localedef(1) page.

New and changed links
----

procfs.5
  New link to proc.5
    Since the term "procfs" is widely used, it seems reasonable to have
    a link from that name to proc(5).

Changes to individual pages
----

locale.1
  Marko Myllynen
    Provide a step-by-step example of how to use a custom locale
  Marko Myllynen
    Use

LC_TELEPHONE instead of LC_MESSAGES in the example
yesstr/nostr in LC_MESSAGES are planned to be changed at some
point [1], so it's better to provide an example which won't
be obsoleted by that change.

[1] https://sourceware.org/bugzilla/show_bug.cgi?id=16975

adjtimex.2
Michael Kerrisk
Add feature test macro requirements

clone.2
Michael Kerrisk
ERRORS: add cross-reference to fork(2) for explanation of EAGAIN

fork.2
Michael Kerrisk
ERRORS: add pid_max and threads-max to EAGAIN
And rewrite text to be the same as pthread_create(3).

getrlimit.2
Michael Kerrisk
RLIMIT_NPROC is not enforced if CAP_SYS_ADMIN or CAP_SYS_RESOURCE

remap_file_pages.2
Rasmus Villemoes
Fix prototype
The pgoff argument has type size_t, not ssize_t (and in the
kernel it is unsigned long).

set_mempolicy.2
Rasmus Villemoes
Fix prototype for set_mempolicy(2)
The nodemask argument is const. The return type in numaif.h is long.

swapon.2
Rasmus Villemoes
Remove header from synopsis
The <asm/page.h> header is not readily available, and the comment
seems to indicate that it is for getting PAGE_SIZE. But it is
never mentioned why one would need to know that, and it is in any
case better obtained using sysconf(), provided by <unistd.h>.

a64l.3
Rasmus Villemoes
Fix prototype for a64l()
The argument is const, both according to POSIX and the
glibc headers.

adjtime.3
  Rasmus Villemoes
    Add required header
      The prototype for adjtime(3) is declared in <sys/time.h>.

argz_add.3
  Rasmus Villemoes
    Fix prototypes
      Update the prototypes of argz_{delete,extract,next} to agree with
      glibc headers and manual.

bstring.3
  Rasmus Villemoes
    Fix prototypes
      The length parameter n
 has type size_t in bcmp(), bcopy() and
      bzero().

envz_add.3
  Rasmus Villemoes
    Fix prototypes
      The envz_len parameters for envz_entry() and envz_get() are not
      passed by reference.

fpathconf.3
  Rasmus Villemoes
    Fix prototype
      The path argument to pathconf() is const.

fseek.3
  Rasmus Villemoes
    Fix prototype
      The pos argument to fsetpos() is const.

gcvt.3
  Rasmus Villemoes
    Fix prototype
      The ndigit parameter to gcvt() has type int.

getaddrinfo_a.3
  Rasmus Villemoes
    Fix prototype
      The pointer arguments to gai_suspend() are const.

getauxval.3
  Rasmus Villemoes
    Fix permissions

There doesn't seem to be any reason for getauxval.3 to be
executable...

getnameinfo.3
Rasmus Villemoes
Fix prototype
The hostlen and servlen parameters have type socklen_t.
(The types changed in glibc 2.2)
Michael
Kerrisk
Note types of 'hostlen'; and 'servlen' in glibc < 2.2

getrpcent.3
Rasmus Villemoes
Fix prototype
The argument to getrpcbyname() is const.

getrpcport.3
Rasmus Villemoes
Add #include and fix prototype
The prototype for getrpcport() is obtained by #include'ing
<rpc/rpc.h>. Also, update its prototype.

getspnam.3
Rasmus Villemoes
Fix prototype
The struct spwd argument to putspent() is const.

getutent.3
Rasmus Villemoes
Fix prototypes
The arguments to getutid(), getutline(), and pututline()
are const.

inet.3
Rasmus Villemoes
Fix prototype
The parameters to inet_makeaddr have type in_addr_t.

inet_net_pton.3
Rasmus Villemoes
srcfix, cfix
Use a consistent style throughout the man-pages.

key_setsecret.3
Rasmus Villemoes
Fix prototypes
Remove const qualifiers from arguments to key_decryptsession,

key_encryptsession, and key_setsecret.

makecontext.3
  Rasmus Villemoes
    Fix prototype
      The second argument to swapcontext() is const.

makedev.3
  Rasmus Villemoes
    Fix prototype
      gnu_dev_makedev, and hence its trivial macro wrapper makedev, takes
      two unsigned int parameters; this is consistent with it being the
      inverse of (gnu_dev_)major/minor, which return unsigned int.

malloc_trim.3
  Rasmus Villemoes
    Fix prototype
      As mentioned further down, malloc_trim returns an integer.

mq_getattr.3
  Rasmus Villemoes
    Fix prototype
      The newattr parameter to mq_setattr is const.

newlocale.3
  Marko Myllynen
    List all available category masks
  Michael Kerrisk
    Add LC_ALL_MASK description

nl_langinfo.3
  Marko Myllynen
    Expand the example code a bit
      Better illustrate querying elements from different categories.

perror.3
  Rasmus Villemoes
    Fix declaration
      The elements of the array sys_errlist are also const.

pthread_attr_setaffinity_np.3
pthread_attr_setdetachstate.3
pthread_attr_setguardsize.3
pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_attr_setscope.3
pthread_attr_setstack.3

pthread_attr_setstackaddr.3
pthread_attr_setstacksize.3
  Rasmus Villemoes
    Constify parameters
      Each of the pthread_attr_get* functions extract some piece of
      information from a pthread_attr_t, which is passed by const
      reference. Add the const keyword to the prototypes of these
      functions.

pthread_cleanup_push_defer_np.3
  Michael Kerrisk [Rasmus Villemoes]
    Add feature test macro requirements

pthread_create.3
  Michael Kerrisk [Carsten Grohmann]
    Add pid_max limit to EAGAIN error cases

pthread_equal.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe

      The function pthread_equal() is thread safe.

pthread_exit.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_exit() is thread safe.

pthread_getcpuclockid.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_getcpuclockid() is thread safe.

pthread_setaffinity_np.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_setaffinity_np() and
      pthread_getaffinity_np() are thread safe.

pthread_setconcurrency.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_setconcurrency() and
      pthread_getconcurrency() are thread safe.

pthread_setname_np.3
  Rasmus Villemoes
    Fix prototype

The name parameter of pthread_getname_np is an output parameter and hence not const.

pthread_setschedparam.3
Rasmus Villemoes
Fix prototypes
Add return type for pthread_{s,g}etschedparam.

pthread_setschedprio.3
Rasmus Villemoes
Fix prototype
Add return type for pthread_setschedprio.

pthread_sigqueue.3
Rasmus Villemoes
Add missing #include <signal.h>

rcmd.3
Rasmus Villemoes
Fix prototypes
Unlike the BSDs, the second argument of rcmd() and rcmd_af() has type unsigned short.
The first argument of iruserok_af() has type const void*.

re_comp.3
Rasmus Villemoes
Fix prototypes
re_comp and re_exec take const char* arguments.

resolver.3
Rasmus Villemoes
Fix prototypes and extern-declaration
Fix const- and signedness of various char* parameters.

Also, there is no "struct state", but _res is a struct __res_state. (Actually, _res is errno-like in that it is really a macro expanding to (*__res_state()).)

rexec.3
Rasmus Villemoes

Fix prototypes
The user, passwd and cmd arguments to rexec and rexec_af are all const.

rtime.3
Rasmus Villemoes

Replace header
The header <rpc/des_crypt.h> does not provide rtime();
<rpc/auth_des.h> does, as is also implied in both the NOTES and
EXAMPLE sections.

scandir.3
Rasmus Villemoes
Fix prototypes
The alphasort and versionsort functions take arguments of type
const struct dirent **, not const void *.

setlocale.3
Michael Kerrisk [Marko Myllynen]
Simplify locale category listing and add GNU-specific locale categories
Some information that was here will move to locale(7).
Marko Myllynen
Remove now obsolete NOTES section

setnetgrent.3
Rasmus Villemoes
Fix prototype
The buflen argument to getnetgrent_r has type size_t.

sigvec.3
Rasmus Villemoes
Fix prototype
The vec argument to sigvec is const.

tsearch.3
Rasmus Villemoes
Fix prototype
The rootp argument to tfind is "void * const *",
not "const void **".

core.5
Michael Kerrisk
Core dump files are nowadays core.pid by default

locale.5
Marko Myllynen
Document mon_grouping and grouping properly
Michael Kerrisk
Note default value for 'first_workday'
Michael Kerrisk [Marko Myllynen]
Add brief descriptions of collating-element and collating-symbol
Marko Myllynen
t_fmt_ampm is needed only for locales that employ AM/PM convention
Michael Kerrisk [Marko Myllynen]

Remove crufty reference to /usr/lib/nls/src
That file is nowhere to be found
Marko Myllynen
Clarify LC_TIME/am_pm and LC_NAME keywords usage
am_pm should be defined only if AM/PM convention is used to signal
applications they should not try to print them when using them in
unwanted.

Same
for all LC_NAME keywords expect for name_fmt which should be
always defined.
Marko Myllynen
Clarify lang_term / lang_lib
As noted by Keld Simonsen in the lib-locales@sourceware mailing
list:

https://sourceware.org/ml/libc-locales/2014-q2/msg00008.html
From: Keld Simonsen <keld at rap dot rap dot dk>
To: Marko Myllynen <myllynen at redhat dot com>
Date: Tue, 29 Apr 2014 17:02:09 +0200

lang_term reflects ISO 639-2/T (terminology) codes, while
lang_lib reflects ISO 639-2/B (bibliographic) codes.
lang_term is preferred over lang_lib codes for locale names.
There are 20 specific ISO 639-2/B codes.
Marko Myllynen
Correct the FILES section

proc.5
Michael Kerrisk
'pid_max' is a system-wide limit on number of threads and processes
Since PIDs > /proc/sys/kernel/pid_max are not allocated,
this
file thus also imposes a system-wide limit on the number of
threads and processes.

capabilities.7
Michael Kerrisk
CAP_SYS_ADMIN allows overriding RLIMIT_NPROC
Michael Kerrisk
CAP_SYS_PTRACE allows process_vm_readv(2) and process_vm_writev(2)

charsets.7
Michael Kerrisk [Marko Myllynen]
Remove crufty statement that Romanian may be switching to ISO 8859-16
Michael Kerrisk
Remove ancient paragraph on charsets supported in glibc 2.3.2
That test is rather ancient, and probably of little use.

fanotify.7
  Heinrich Schuchardt
    Fix to example program: fanotify read() should use aligned buffer

inotify.7
  Heinrich Schuchardt
    Add example program
      This example of the usage of the inotify API shows the
