      usage of inotify_init1(2) and inotify_add_watch(2) as well
      as polling and reading from the inotify file descriptor.
  Heinrich Schuchardt
    munmap()
 does not generate inotify events

locale.7
  Marko Myllynen [Michael Kerrisk]
    Document the LOCPATH environment variable
  Michael Kerrisk
    Add further details on various categories

========== Changes in man-pages-3.69 ==========

Released: 2014-06-14, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>
Jan Chaloupka <jchaloup@redhat.com>
Jeff Layton <jlayton@poochiereds.net>
Kirill A. Shutemov <kirill.shutemov@linux.intel.com>
KOSAKI Motohiro <kosaki.motohiro@jp.fujitsu.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Petr Gajdos <pgajdos@suse.cz>
Qian Lei <qianl.fnst@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Vasiliy Kulikov <segoon@openwall.com>

Walter
Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

iconv.1
  Marko Myllynen [Michael Kerrisk]
    New page for the iconv(1) command

iconvconfig.8
  Marko Myllynen
    New page for iconvconfig(8)

Newly documented interfaces in existing pages
---

fcntl.2
  Jeff Layton, Michael Kerrisk
    Document open file description locks
      As provided by the fcntl() operations F_OFD_SETLK,
      F_OFD_SETLKW, and F_OFD_GETLK

Changes to individual pages
---

locale.1
  Marko Myllynen
    Add FILES section, add charmap(5) reference
  Marko Myllynen
    Align with recent charmap(5) / repertoiremap(5) changes

execve.2
  Michael Kerrisk [NeilBrown]
    Before kernel 2.6.0, RLIMIT_NPROC had no effect for set*uid()
  Michael Kerrisk [Vasiliy Kulikov]
    RLIMIT_NPROC is checked
 only if preceded by set*uid()
  Michael Kerrisk [Vasiliy Kulikov, NeilBrown, KOSAKI Motohiro]
    Document EAGAIN error
      See also https://bugzilla.kernel.org/show_bug.cgi?id=42704

fcntl.2
  Michael Kerrisk
    Detail the limitations of traditional (process-associated) locks
  Michael Kerrisk [Jeff Layton]
    Describe how to check whether the kernel supports a particular command
  Michael Kerrisk
    ERRORS: add EINVAL for invalid 'cmd'
  Michael Kerrisk
    Add para introducing advisory locks and noting existence of OFD locks
  Michael Kerrisk [Jeff Layton]
    Add notes on F_SETLKW deadlock detection and its limitations
  Michael Kerrisk
    Add an explicit note that mandatory locking is not in POSIX
  Michael Kerrisk
    Rewrite introductory paragraphs on mandatory locking
      Make the structure more logical, and also explicitly mention
      OFD locks.
  Michael Kerrisk [Jeff Layton]
    Reword discussion
 of mandatory lock bug a little
      Jeff Layton confirmed that the bug remains even in modern kernels.
  Michael Kerrisk
    Explain POSIX background to EACCES/EAGAIN error for F_GETLK
  Michael Kerrisk
    Add NOTES subhead for record locking and NFS
  Michael Kerrisk [NeilBrown]
    Note treatment of locks when an NFS client loses contact with the server
  Michael Kerrisk [Jeff Layton]
    nfsv4leasetime controls the "contact lost" interval for NFSv4

flock.2
  Michael Kerrisk
    In some modern BSDs, fcntl() and flock() locks do interact
      So, reword and extend the discussion of this topic in NOTES.
  Michael Kerrisk
    Move NOTES text describing implementation of flock()
  Michael Kerrisk [NeilBrown]
    Add more details on NFS, including Linux 2.6.37 changes
      Also: move NOTES text describing interaction of fcntl()
      and flock() locks.

fork.2
  Michael Kerrisk
    Add notes on inheritance
 of flock() and OFD locks across fork()

lseek.2
  Michael Kerrisk

Add reference to open(2) for discussion of file descriptors and OFDs

open.2
Michael Kerrisk
Rework and extend the discussion of open file descriptions

open_by_handle_at.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

recvmmsg.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

remap_file_pages.2
Michael Kerrisk [Kirill A. Shutemov]
Note that remap_file_pages() is deprecated

sendmmsg.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

seteuid.2
Michael Kerrisk
seteuid() and setegid() are implemented as library functions
Michael Kerrisk
Error checking should always be performed, even when caller is UID 0

setresuid.2
Michael Kerrisk
Document EAGAIN error that can occur after kernel alloc_uid() failure
Michael Kerrisk
Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer
occurs
Michael Kerrisk
Correct the description of the EAGAIN error
Michael Kerrisk
Error checking should always be performed, even when caller is UID 0

setreuid.2
Michael Kerrisk
Document EAGAIN error that can occur after kernel alloc_uid() failure
Michael Kerrisk
Error checking should always be performed, even when caller is UID 0
Michael Kerrisk
Add EAGAIN error for hitting RLIMIT_NPROC limit
Michael Kerrisk
Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

setuid.2
  Michael Kerrisk
    Document EAGAIN error that can occur after kernel alloc_uid() failure
  Michael Kerrisk
    Correct the description of the EAGAIN error
  Michael Kerrisk
    Error checking should always be performed, even when caller is UID 0
  Michael Kerrisk
    Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

statfs.2
  Cyril Hrubis
    Update MAGIC constants

  Most of the updates are taken from /usr/include/linux/magic.h,
      some were found by grepping the Linux source code.
  Cyril Hrubis [Michael Kerrisk]
    fstatfs(2) was broken on file descriptors from pipe(2)

syscalls.2
  Michael Kerrisk
    Note that remap_file_pages() is deprecated

basename.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions basename() and dirname() are thread safe.

catgets.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function catgets() is thread safe.

getdate.3
  Rasmus Villemoes
    Use blank definition of _GNU_SOURCE in example program

getdirentries.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function getdirentries() is thread safe.

getdtablesize.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function getdtablesize() is thread safe.

iconv.3
  Qian Lei
 [Peng Haitao]
    ATTRIBUTES: Note function that is thread-safe
      The function iconv() is thread safe.
  Michael Kerrisk
    SEE ALSO: add iconvconfig(8)

lockf.3
  Qian Lei [Peng Haitao]
    ATTRIBUTES: Note function that is thread-safe
      The function lockf() is thread safe.

malloc_get_state.3
  Rasmus Villemoes
    SYNOPSIS: use correct header
      The nonstandard functions malloc_set_state() and
      malloc_get_state() are provided by <malloc.h> not <stdlib.h>.

malloc_usable_size.3
  Qian Lei
    ATTRIBUTES: Note function that is thread-safe
      The function malloc_usable_size() is thread safe.

matherr.3
  Qian Lei [Peng Haitao]
    ATTRIBUTES: Note function that is thread-safe
      The function matherr() is thread safe.

mkdtemp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function mkdtemp() is thread safe.

mkstemp.3
  Peng Haitao
    ATTRIBUTES:
 Note functions that are thread-safe
      The functions mkstemp(), mkostemp(), mkstemps() and mkostemps()
      are thread safe.

mq_close.3
  Qian Lei
    ATTRIBUTES: Note function that is thread-safe
      The function mq_close() is thread safe.

mq_getattr.3
  Qian Lei

ATTRIBUTES: Note function that is thread-safe
The functions mq_getattr() and mq_setattr() are thread safe.

mq_open.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function mq_open() is thread safe.

mq_receive.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mq_receive() and mq_timedreceive() are thread safe.

mq_send.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mq_send() and mq_timedsend() are thread safe.

mq_unlink.3
Qian Lei
ATTRIBUTES: Note function that is thread-safe
The function mq_unlink() is thread
safe.

posix_fallocate.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function posix_fallocate() is thread safe.

posix_openpt.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function posix_openpt() is thread safe.

siginterrupt.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function siginterrupt() is not thread safe.

system.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function system() is thread safe.

charmap.5
Marko Myllynen
Update to match current glibc
charmap(5) was outdated, bring it to closer to reality by fixing

syntax descriptions to match current glibc code and practices,
adding missing options, removing obsolete comments and references,
and removing now incorrect examples.

locale.5
Marko Myllynen
Clarify AM/PM settings a bit

localedef(1) complains if really undefined, should be empty instead.
Also: add some SEE ALSO references.
Marko Myllynen
Document glibc conventions regarding days and week
Based on existing practice and glibc community wiki page at
https://sourceware.org/glibc/wiki/Locales

proc.5
Michael Kerrisk [Jan Chaloupka, Walter Harms]
Add a brief description of /proc/fs

repertoiremap.5
Marko Myllynen
New page for repertoiremap(5)
Rather obsolete feature but localedef(1) refers to repertoiremaps.

bootparam.7
Petr Gajdos
Describe 'rootflags' and 'rootdelay' kernel parameters
Patch based on text from Documentation/kernel-parameters.txt

charsets.7
Marko Myllynen
Update to reflect past developments
Rewrite the introduction to make Unicode's prominence more obvious.
Reformulate parts of the text to reflect current Unicode world.
Minor clarification
for ASCII/ISO sections, some other minor fixes.
Marko Myllynen
List CJK encodings in the order of C, J, K

environ.7
Michael Kerrisk
SEE ALSO: add env(1), printenv(1), ld.so(8)

locale.7
Marko Myllynen
Add some SEE ALSO references

man-pages.7

Michael Kerrisk
Note that .TH 'date' field is nowadays automatically updated by scripts

signal.7
Michael Kerrisk
Describe EINTR semantics for recvmmsg(2)
Michael Kerrisk
Clarify text describing EINTR semantics for socket interfaces

unicode.7
Marko Myllynen
Update to reflect past developments
The unicode(7) page will look more modern with few small changes:

- drop old BUGS section, editors cope with UTF-8 ok these days,
and perhaps the state-of-the-art is better described elsewhere
anyway than in a man page
- drop old suggestion about avoiding combined characters
- refer to LANANA
for Linux zone, add registry file reference
- drop a reference to an inactive/dead mailing list
- update some reference URLs

utf-8.7
Marko Myllynen
Drop an old comment about UTF-8 replacing ISO 8859
And add locale(1) under SEE ALSO.

========== Changes in man-pages-3.70 ==========

Released: 2014-07-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Florian Weimer <fweimer@redhat.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nadav Har'El <nyh@math.technion.ac.il>

NeilBrown <neilb@suse.de>
Rich Felker <dalias@libc.org>
Robert P. J. Day <rpjday@crashcourse.ca>
Simon Paillard <spaillard@debian.org>
Tomi
 Salminen <tlsalmin@gmail.com>
Walter Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>
 <kirillnow@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

sprof.1
  Michael Kerrisk [Marko Myllynen]
    New page for the glibc sprof(1) command

Newly documented interfaces in existing pages
---

epoll_ctl.2
  NeilBrown
    Document EPOLLWAKEUP

epoll.7
  NeilBrown
    Document EPOLLWAKEUP

Changes to individual pages
---

iconv.1
iconvconfig.8
  Marko Myllynen
    Clarify gconv file terminology a bit

ldd.1
  Michael Kerrisk
    SEE ALSO: add sprof(1)

connect.2
  Michael Kerrisk
    ERRORS: add EPROTOTYPE

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=708394

dup.2
  Michael Kerrisk [Rich Felker]
    Fix erroneous discussion regarding closing 'newfd' before calling dup2()
      And propose a workaround
 if the caller cares about catching
      close() time errors.

      See http://stackoverflow.com/questions/23440216/race-condition-when-using-dup2#comment36888604_23444465
      and http://austingroupbugs.net/view.php?id=411
  Michael Kerrisk
    Rework and enhance discussion of dup2()
      In particular, note that dup2() performs the steps of closing
      and reusing 'newfd' atomically.
  Michael Kerrisk
    Add subhead for dup3()

epoll_ctl.2
  Michael Kerrisk
    BUGS: EPOLLWAKEUP is silently ignored without CAP_BLOCK_SUSPEND
      If the caller does not have CAP_BLOCK_SUSPEND, then EPOLLWAKEUP
      is silently ignored.

fcntl.2
  Michael Kerrisk [Tomi Salminen]
    The return value for F_SETPIPE_SZ is the pipe capacity
  Michael Kerrisk
    ERRORS: Document ENOTDIR error for F_NOTIFY
  Michael Kerrisk
    Use proper page cross-references in F_NOTIFY discussion
  Michael Kerrisk
    Suggest the
 use of real-time signals with F_NOTIFY

getitimer.2
  Michael Kerrisk
    Rewrite a few pieces to clarify some details

inotify_add_watch.2
  Michael Kerrisk
    Clarify that the target of a watch is an i-node
      The target of a watch is an i-node, not a pathname. Clarify
      the text to prevent the reader possibly misunderstanding
      that establishing watches by two different links to the same
      file might create different watch descriptors.

open.2
  Michael Kerrisk []
    O_CLOEXEC is also one the flags not ignored when O_PATH is specified

pipe.2
  Elie De Brauwer
    PIPE_BUF is defined in limits.h
      To make use of PIPE_BUF in an application one should include
      <limits.h>. Adding a reference to this inclusion.

poll.2
  Michael Kerrisk [Nadav Har'El]
    The negate-fd-to-ignore technique does not work for file descriptor 0
      See https://bugzilla.kernel.org/show_bug.cgi?id=79411

set_tid_address.2
   Michael Kerrisk [Rich Felker]
    Use "thread" rather than "process" in DESCRIPTION
  Michael Kerrisk
    SEE ALSO: add gettid(2)

shmop.2
  Michael Kerrisk
    Explain SHMLBA in much more detail

splice.2
  Michael Kerrisk
    Document EAGAIN error
      See https://bugzilla.kernel.org/show_bug.cgi?id=48641

syscalls.2
  Carlos O'Donell
    Add prlimit64(2)
      While trying to reconcile the new features in glibc with the
      documented entries in the linux kernel man pages I noticed that
      glibc exports prlimit64 for use by 32-bit applications (as does
      the linux kernel), but that prlimit64 was not defined in the
      syscalls list or in the prlimit-related page.

      This is not the complete fix for this, but I don't have the time
      to explain why and when prlimit64 should be used (or how it should
      be used safely). Therefore I'm just patching the syscalls.2
 list
      to show that prlimit64 exists and was added in 2.6.36 (verified
      with git by checking out the tags before and after).

syslog.2
  Michael Kerrisk

Rework introductory paragraph
Michael Kerrisk [Robert P. J. Day]
Rework text describing loglevels
The kernel header file mentioned in the discussion of the KERN_*
constants has morphed and is no longer exported inside glibc.
And the definitions of the constants themselves changed subtly
with kernel commit 04d2c8c83d0e3ac5f78aeede51babb3236200112.
So, rewrite the description of the constants to be a bit more
abstract.
Michael Kerrisk
Rewrite parts of the page, and import /proc/sys/kernel/printk
* Move /proc/sys/kernel/printk from proc(5) to this page,
and correct various details in the discussion of that file.
* Rewrite and correct various other details on the page.
* Clean out some crufty text.
* Miscellaneous minor fixes.
Michael Kerrisk
Update SYSLOG_ACTION_CONSOLE_OFF + SYSLOG_ACTION_CONSOLE_ON description
Details changed in Linux 2.6.32

tee.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

vmsplice.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

ether_aton.3
Michael Kerrisk
Make description of ether_line() bug a little more informative

mallopt.3
Michael Kerrisk [Florian Weimer]
MALLOC_MMAP_THRESHOLD_ and MALLOC_MMAP_MAX_ *do* work in setgid programs
My testing on this point was bogus, overlooking details of
strace(1)'s behavior with setuid programs.

See https://sourceware.org/bugzilla/show_bug.cgi?id=12155

printf.3
Michael Kerrisk [Rich Felker]
Remove libc4 and libc5 details

Rich Felker noted that "scare text" in the man page warned about
the use of snprintf() on libc, and that some people had cited

this as a reason not to use snprintf(). Linux libc is now
ancient history, so there is no real need to keep that text.
But, while we're at it, we may as well clear out all of the
other ancient libc4 and libc5 pieces in the page. They are
nowadays more clutter than help.
Michael Kerrisk
SUSv3 and later agree with C99 for the snprintf() return value
Determined by inspection of the SUSv3 and SUSv4 specifications.
Michael Kerrisk
Remove some old text about glibc 2.0 changes
We probably don't now need such ancient info.
Michael Kerrisk
Update references to standards for C and S conversion specifiers

profil.3
Michael Kerrisk
SEE ALSO: add sprof(1)

charmap.5
Marko Myllynen
Various minor updates and improvements
- more precise title
- extend description a bit
- document previously omitted WIDTH_DEFAULT
Marko Myllynen
Remove accidental ISO C compliance reference
glibc refers in locale/programs/charmap.c to ISO C 99 section
7.17.(2) and ISO C 99 section 5.2.1.(3) that if a character map
is not ASCII compatible then the locale using it is not ISO C
compliant. This does not state anything about the character set
itself.

proc.5
Michael Kerrisk
Replace /proc/sys/kernel/printk discussion with reference to syslog(2)
It makes more sense to have the /proc/sys/kernel/printk with
the related material in syslog(2).
Michael Kerrisk
Rewrite /proc/sys/kernel/printk description

inotify.7
Michael Kerrisk
Clarify which events are generated for watched directories
Really, with respect to watched directories, events fall into

three classes (not two, as was shown):

* Events that can be generated only for the watched directory.

* Events that can be generated only for objects that are inside
the watched directory.
* Events that can be generated both for the watched directory
and for objects inside the directory.

So, mark these three classes more clearly in the list of inotify
events.
Heinrich Schuchardt [Michael Kerrisk]
BUGS: Note possible bug triggered by watch descriptor reuse
Watch descriptor IDs are returned by inotify_add_watch().
When calling inotify_rm_watch() an IN_IGNORED is placed on the
inotify queue pointing to the ID of the removed watch.

inotify_add_watch() should not return a watch descriptor ID for
which events are still on the queue but should return an
unused ID.

Unfortunately, the existing Kernel
code does not provide such a
guarantee.

Actually, in rare cases watch descriptor IDs are returned by
inotify_add_watch() for which events are still on the inotify
queue.

See https://bugzilla.kernel.org/show_bug.cgi?id=77111
Michael Kerrisk
Add further detail to the watch descriptor reuse bug
As well as inotify_rm_watch(), file deletion and unmounting a
filesystem can also cause a watch descriptor to be deleted.
Michael Kerrisk
The watch descriptor reuse bug may be hard to hit in practice
Explain the circumstances in detail, indicating that the
bug may be very unlikely to occur in practice.
Michael Kerrisk
Clarify description of IN_EXCL_UNLINK
Clarify the text a little, in particular making it clearer
that the target of a watch is an i-node (not a pathname).
Michael Kerrisk
Clarify IN_ONESHOT explanation

Make it clearer that the target of monitoring is an i-node,
not a pathname.
Michael Kerrisk
Make comment on 'mask' field more accurate

libc.7
Michael Kerrisk

Clarify man-pages policy on documenting C libraries other than glibc
Michael Kerrisk
Use absolute dates in discussion of libc vs glibc

pipe.7
Elie De Brauwer
Add reference that the pipe capacity can be changed
In fcntl(2) F_SETPIPE_SZ, F_GETPIPE_SZ and
/proc/sys/fs/pipe-max-size are defined, however
pipe(7) still defines the pipe capacity as being
a static entity. Adding a reference to fcntl(2).
Michael Kerrisk [Walter Harms]
Clarify that since 2.6.35, 65535 bytes is the default pipe capacity

ld.so.8
Michael Kerrisk
Clarify that LD_PROFILE can specify just a single shared object
Michael Kerrisk
Clarify that LD_PROFILE output is appended to target file
The LD_PROFILE
output is appended to any existing
contents of the target file.
Michael Kerrisk
SEE ALSO: add sprof(1)

========== Changes in man-pages-3.71 ==========

Released: 2014-08-17, Chicago

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

group_member.3
  Michael Kerrisk
    New page documenting group_member(3)

isfdtype.3
  Michael Kerrisk
    New page documenting isfdtype(3)

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    Document new comm_exec flag
      Linux 3.16 (more specifically, commit 82b897782d10fcc4)
      added support for differentiating between process renames
      caused by exec versus those caused by other methods.
  Vince Weaver
    Document new mmap2 record type
      Linux 3.16 (more specifically, commit a5a5ba72843dd05f9)
      enabled the enhanced mmap2 record support.
      The interface was added in Linux 3.12 but disabled until
      Linux 3.16.
  Vince Weaver

 Document PERF_SAMPLE_BRANCH_COND
      Linux 3.16 (more specifically, commit bac52139f0b7ab31330)
      adds support for gathering PERF_SAMPLE_BRANCH_COND
      conditional branch values when doing PERF_SAMPLE_BRANCH_STACK
      sampling.

proc.5
  Michael Kerrisk
    Document /proc/PID/comm
  Michael Kerrisk
    Document /proc/PID/pagemap
  Michael Kerrisk
    Document /proc/PID/personality
  Michael Kerrisk
    Document /proc/PID/syscall
  Michael Kerrisk
    Document /proc/kpagecount
  Michael Kerrisk
    Document /proc/kpageflags
  Michael Kerrisk
    Document /proc/sys/vm/overcommit_kbytes

capabilities.7
  Michael Kerrisk
    Add CAP_AUDIT_READ
      CAP_AUDIT_READ is new in Linux 3.16.

sync_file_range.2
timer_create.2
uname.2
wait.2
  Michael Kerrisk
    NOTES: add "C library/kernel ABI differences" subheading

Changes to individual pages
---

access.2
  Michael Kerrisk
    Glibc falls back to using access() on kernels that lack faccessat()

bdflush.2
fsync.2
sync.2
proc.5
  Adrian Bunk
    Change "sync(1)" to "sync(8)"

bind.2
  Michael Kerrisk [Ryan Hammonds]
    Correct EINVAL
 error description
      As pointed out by Ryan:

        My application is trying to bind an IPv4 UDP socket to an
        address. I've found that passing an invalid address length
        to bind() causes bind to return EINVAL. According to the
        bind(2) manpage, this should only occur when using unix
        domain sockets (which I am not).

chmod.2
  Michael Kerrisk
    Glibc falls back to chmod() on kernels that don't support fchmodat()
  Michael Kerrisk
    Glibc falls back to chown()/lchown() on kernels that lack fchownat()

epoll_wait.2
  Michael Kerrisk
    NOTES: describe raw epoll_pwait() system call differences

getgroups.2
  Michael Kerrisk
    SEE ALSO: add group_member(3)

getpriority.2
  Michael Kerrisk
    Enhance discussion of kernel nice range versus user-space nice range
  Michael Kerrisk
    Move text describing nice range on other systems

getrlimit.2
  Michael Kerrisk

  Add cross reference to core(5) in discussion of RLIMIT_CORE
  Michael Kerrisk
    Describe the "large" resource limit bug on 32-bit platforms
      See https://bugzilla.kernel.org/show_bug.cgi?id=5042.
  Michael Kerrisk
    Glibc's setrlimit() and getrlimit() are implemented using prlimit()

kexec_load.2
  Michael Kerrisk
    Note limit of 16 for 'nr_segments'
  Michael Kerrisk
    Clarify the 'flags' bits that contain the architecture
  Michael Kerrisk
    Add KEXEC_ARCH_68K to list of architectures for 'flags'
  Michael Kerrisk
    Reword description of 'flags' a little

link.2
  Michael Kerrisk
    Glibc falls back to link() on kernels that lack linkat()
      Unless 'flags' contains AT_SYMLINK_FOLLOW.

mkdir.2
  Michael Kerrisk
    Glibc falls back to mkdir() on kernels that don't support mkdirat()

perf_event_open.2
  Vince Weaver
    Clarify PERF_SAMPLE_STACK_USER usage
      This clarifies the PERF_SAMPLE_STACK_USER
 section.
      I found these issue while implementing some code that uses
      the option. The important change is fixing the name of the
      sample_stack_user parameter, the rest is just some wording

fixes and minor clarifications.
  Vince Weaver
    Clarify PERF_SAMPLE_DATA_SRC usage
      When checking the fields in the PERF_SAMPLE_DATA_SRC type samples
      you need to shift the masks before doing the compare.

      Although the value you are checking (perf_mem_data_src) is
      specified as a bitfield so this might all fall apart if trying
      to access the field in a cross-endian way. The Power people
      were working on this issue, not sure if they resolved it.

poll.2
  Michael Kerrisk
    Describe fifth argument (sigsetsize) of raw ppoll() system call

process_vm_readv.2
  Michael Kerrisk [Ville Ylenius]
    Fix typo in example program

readlink.2
  Michael Kerrisk

   Glibc falls back to readlink() on kernels that lack readlinkat()

recv.2
  Michael Kerrisk
    'addrlen' should be NULL (not 0) if we don't need sender address

rename.2
  Michael Kerrisk
    Glibc falls back to rename() when the kernel doesn't have renameat()

sigwaitinfo.2
  Michael Kerrisk
    The raw sigtimedwait() system call has a fifth argument

symlink.2
  Michael Kerrisk
    Glibc falls back to symlink() on kernels that lack symlinkat()

sysinfo.2
  Michael Kerrisk
    Add VERSIONS section

unlink.2
  Michael Kerrisk
    Glibc falls back to unlink() or rmdir() on kernels that lack unlinkat()

atoi.3
  Michael Kerrisk
    Downgrade discussion of atoq()
      Remove most references to atoq() in this page, since this function
      was present only in Linux libc (not glibc).

cerf.3
cexp2.3
clog2.3
  Michael Kerrisk
    Update version number on "Not yet in glibc" sentence

fgetgrent.3
getgrent.3
getgrent_r.3
getgrnam.3
   Michael Kerrisk [Rob Landley]
    Clarify that 'gr_mem' is a NULL-terminated array of pointers

fseeko.3
  Michael Kerrisk
    Add VERSIONS section

ftw.3
  Michael Kerrisk
    Add VERSIONS section

getauxval.3
  Michael Kerrisk
    Document ENOENT error
      And add an entry to BUGS explaining the ambiguity that was
      present before the addition of this error.

getgrouplist.3
  Michael Kerrisk
    SEE ALSO: add group_member(3)

getline.3
  Rahul Bedarkar
    Close opened file at end of example program

memmem.3
  Michael Kerrisk
    Rewrite text of glibc 2.0 bug

printf.3
  Michael Kerrisk [Jakub Wilk]
    Clarify details of the %n conversion specifier

See http://bugs.debian.org/756602
Michael Kerrisk [Jakub Wilk]
Note use of 'j', 'z', and 't' length modifiers for '%n'
See http://bugs.debian.org/756602
Michael Kerrisk
Update with some SUSv3 details

setbuf.3
Michael
Kerrisk
Remove ancient Linux libc and 4.x BSD details

strstr.3
Michael Kerrisk
Remove discussion of Linux libc bugs
Linux libc is old enough that we needn't care any longer.

strtod.3
Michael Kerrisk
Explain NAN(n-char-sequence)

strtod.3
Michael Kerrisk
SEE ALSO: add nan(3), nanf(3), NANL(3)

updwtmp.3
Michael Kerrisk
Replace AVAILABILITY section with note to link logwtmp() using -lutil
Linux libc details are no longer needed these days.

core.5
Rahul Bedarkar
Close opened file in example program

proc.5
Michael Kerrisk
Fix kernel version numbers for /proc/PID/stat fields

proc.5
Jan Chaloupka
Add missing proc stats fields
Adding missing proc stats fields from
https://www.kernel.org/doc/Documentation/filesystems/proc.txt
Michael Kerrisk [Simon Paillard]
Remove crufty text under 'timer_stats'
Michael Kerrisk
Update /proc/PID/stat

'state' field documentation
  Michael Kerrisk
    Improve description of /proc/PID/stat fields added in Linux 3.3 and 3.5
  Michael Kerrisk
    Refer to getauxval(3) in discussion of /proc/PID/auxv
  Michael Kerrisk
    Rework formatting of /proc/PID/stat list
      Make the field numbers more prominent.
  Michael Kerrisk
    Note that /proc/PID/cmdline is read-only
  Michael Kerrisk
    Rework discussion of CommitLimit and /proc/sys/vm/overcommit_memory
  Michael Kerrisk
    Improve discussion of /proc/sys/vm/overcommit_ratio

charsets.7
  David Prévot [Marko Myllynen]
    Tidy up list
      Remove German from main list, to be consistent with earlier
      removal of Dutch and French (in commit a8ed5f7430e0d1).

inotify.7
  Michael Kerrisk
    Note that IN_ONLY_DIR can be used to avoid races
  Michael Kerrisk
    Note that insertion of IN_MOVED_FROM+IN_MOVED_TO pair is not atomic
  Michael Kerrisk
     Mention use of timeout when reading IN_MOVED_TO after IN_MOVED_FROM

man-pages.7
  Michael Kerrisk
    Add description of "C library/kernel ABI differences" subsection
  Michael Kerrisk
    Rework text describing sections (stylistic improvements)

vdso.7
  Mike Frysinger
    Add new i386 vdso symbols in Linux 3.15
  Michael Kerrisk
    Note kernel version that exports new i386 symbols (Linux 3.15)

========== Changes in man-pages-3.72 ==========

Released: 2014-09-07, Mountain View

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Christian von Roques <roques@mti.ag>
Holger Hans Peter Freyther <holger@moiji-mobile.com>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Rusty Russell <rusty@rustcorp.com.au>
Sorin
 Dumitru <sdumitru@ixiacom.com>

Apologies if I missed anyone!

New and rewritten pages
---

memusage.1
  Peter Schiffer, Michael Kerrisk [Jan Chaloupka]
    New page for glibc memusage(1) command

memusagestat.1
  Peter Schiffer [Jan Chaloupka, Michael Kerrisk]
    New page for glibc memusagestat(1) command

mtrace.1
  Peter Schiffer [Jan Chaloupka]
    New page describing the glibc mtrace(1) command

Changes to individual pages
---

connect.2
  Michael Haardt
    Note that a new socket should be used if connect() fails

fcntl.2
  Michael Kerrisk
    One must define _GNU_SOURCE to get the F_OFD_* definitions

poll.2, select.2
  Rusty Russell

Fix erroneous description of "available for write".
POSIX says: "POLLOUT Normal data may be written without blocking.". This "may" is misleading, see the POSIX write page:

Write requests to a pipe or FIFO shall be handled in the same way as a regular file with the following exceptions:
...
If the O_NONBLOCK flag is clear, a write request may cause the thread to block, but on normal completion it shall return nbyte.
...
When attempting to write to a file descriptor (other than a pipe or FIFO) that supports non-blocking writes and cannot accept the data immediately:

If the O_NONBLOCK flag is clear, write() shall block the calling thread until the data can be accepted.

If the O_NONBLOCK flag is set, write() shall not block the thread. If some data can be written without blocking the thread, write() shall write what it can and return the number of bytes written. Otherwise, it shall return -1 and set errno to [EAGAIN].

The net result is that write() of more than 1 byte on a socket, pipe or FIFO which is "ready" may block: write() (unlike read!) will attempt to write the entire buffer and only return a short write under exceptional circumstances.

Indeed, this is the behaviour we see in Linux:

https://github.com/rustyrussell/ccan/commit/897626152d12d7fd13a8feb36989eb5c8c1f3485
https://plus.google.com/103188246877163594460/posts/BkTGTMHDFgZ

errno.3
Michael Kerrisk
SEE ALSO: add errno(1)

rtnetlink.3
Holger Hans Peter Freyther
Fix parameters for the send() call in the example

inotify.7
Michael Kerrisk
IN_OPEN and IN_CLOSE_NOWRITE can also occur for directories
Michael Kerrisk

IN_CLOSE_WRITE occurs only for files (not monitored directory)
Michael Kerrisk
IN_MODIFY is generated for files only (not monitored directories)
Michael Kerrisk
IN_ACCESS
occurs only for files inside directories
IN_ACCESS does not occur for monitored directory.

packet.7
Sorin Dumitru
Fix include file
It looks like most of the socket options from this man pages
are not defined in <netpacket/packet.h>. They are defined in
<linux/if_packet.h> so we should include that one.

========== Changes in man-pages-3.73 ==========

Released: 2014-09-21, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

namespaces.7
  Michael Kerrisk [Eric W. Biederman]
    New page providing overview of Linux namespaces

pid_namespaces.7
  Michael Kerrisk [Eric W. Biederman, Vasily Kulikov, Rob Landley,
                Serge Hallyn]
    New page describing PID namespaces

user_namespaces.7
  Michael Kerrisk [Eric W. Biederman, Andy Lutomirski, Serge Hallyn]
    New page describing user namespaces.

Newly documented interfaces in existing pages
---

clone.2
  Eric W. Biederman [Michael Kerrisk]
    Document CLONE_NEWUSER for creating a new user namespace

setns.2
  Eric W. Biederman, Michael Kerrisk
    Document the PID, user, and mount namespace support
      Document CLONE_NEWPID,
 CLONE_NEWUSER, and CLONE_NEWNS flags.

unshare.2
  Michael Kerrisk [Eric W. Biederman]
    Document CLONE_NEWPID
  Michael Kerrisk [Eric W. Biederman]
    Document CLONE_NEWUSER
  Michael Kerrisk
    Document CLONE_THREAD, CLONE_SIGHAND, and CLONE_VM

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Move some CLONE_NEWNET text to namespaces.7
  Michael Kerrisk
    Move some CLONE_NEWUTS text 2 to namespaces.7
  Michael Kerrisk
    Move some CLONE_NEWIPC text to namespaces.7
  Michael Kerrisk

Reword discussion of CLONE_NEWNS, removing text also in namespaces(7)
Michael Kerrisk
Standardize text on CLONE_NEW* flags and CAP_SYS_ADMIN
Michael Kerrisk
EINVAL if (CLONE_NEWUSER|CLONE_NEWPID) && (CLONE_THREAD|CLONE_PARENT)
Michael Kerrisk
Add more detail on the meaning of CLONE_SYSVSEM

flock.2
Michael Kerrisk [J. Bruce Fields]
Don't mention "classical BSD"
in discussion of fcntl()/flock interaction
The noninteraction of flock(2) and fcntl(2) locks does
not seem to be classical BSD semantics (at least, checking
the 4.4BSD sources suggest that the lock types do interact,
although there have been other systems also where fcntl()
and flock() locks do not interact). So, fix the text
discussing "classical BSD" lock semantics.

getunwind.2
Michael Kerrisk [Yuri Kozlov]
Fix description of return value
s/size of unwind table/size of the unwind data/

mount.2
Eric W. Biederman
Clarify use of 'mountflags' and 'data' for MS_REMOUNT

reboot.2
Michael Kerrisk [Justin Cormack, Eric W. Biederman]
Document effect of reboot() inside PID namespaces

semop.2
Michael Kerrisk
Refer to clone(2) for semantics of CLONE_SYSVSEM and semadj lists

seteuid.2
setgid.2
setresuid.2
setreuid.2
setuid.2
Michael Kerrisk
EINVAL
can occur if UID/GID is not valid in caller's user namespace

setns.2
Michael Kerrisk [Eric W. Biederman]
Clarify capabilities required for reassociating with a mount namespace

Michael Kerrisk
Specify kernel version on each CLONE_NEW* flag
And remove text on flags from VERSIONS.

unshare.2
Michael Kerrisk
Add an example program
Michael Kerrisk
Clarify semantics of CLONE_SYSVSEM
Michael Kerrisk
CLONE_SYSVSEM does not require CAP_SYS_ADMIN
Michael Kerrisk
Note flags implied by CLONE_THREAD and CLONE_VM

clock.3
Michael Kerrisk [Vincent Lefevre]
The implementation uses clock_gettime() was to improve *accuracy*
(The man page text mistakenly used the word "precision".)

drand48.3
Michael Kerrisk [Lorenzo Beretta]
Remove crufty text about SVID 3 marking drand48() obsolete
See http://bugs.debian.org/758293

proc.5
Michael Kerrisk
Move /proc/[pid]/mounts
text to namespaces.7
Michael Kerrisk
Move /proc/[pid]/mountstats text to namespaces.7

capabilities.7
Michael Kerrisk
Refer reader to user_namespaces(7) for a discussion of capabilities
Michael Kerrisk
Document CAP_SETUID and CAP_SETGID for user namespace mappings
Michael Kerrisk
setns() needs CAP_SYS_ADMIN in the *target* namespace
Michael Kerrisk
Since Linux 3.8, user namespaces no longer require CAP_SYS_ADMIN

mq_overview.7
Michael Kerrisk
Refer to namespaces(7) for info on POSIX MQs and IPC namespaces

svipc.7
Michael Kerrisk
Refer to namespaces(7) for info on System V IPC and IPC namespaces

========== Changes in man-pages-3.74 ==========

Released: 2014-10-03, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Arto
 Bendiken <arto@bendiken.net>
Ben Hutchings <ben@decadent.org.uk>
Benjamin Herr <ben@0x539.de>
C. Alex North-Keys <erlkonig@talisman.org>
Carlos O'Donell <carlos@redhat.com>

Wieland Hoffmann <themineo@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

pldd.1
  Michael Kerrisk
    New page for pldd(1) command added to glibc in version 2.15

cp1252.7
  Marko Myllynen
    New page documenting CP 1252
      CP 1252 is probably one of the most used Windows Code Pages so

let's add a page for it
alongside with the already provided
CP 1251 page.

Table generated from /usr/share/i18n/charmaps/CP1252.

Newly documented interfaces in existing pages
---

mq_overview.7
Michael Kerrisk
Document /proc/sys/fs/mqueue/msgsize_default
Michael Kerrisk
Document /proc/sys/fs/mqueue/msg_default

Changes to individual pages
---

ldd.1
Michael Kerrisk
SEE ALSO: add pldd(1)

execve.2
Michael Kerrisk [C. Alex North-Keys]
Remove unneeded ".sh" extension in interpreter script example
See https://bugzilla.kernel.org/show_bug.cgi?id=84701

fanotify_init.2
Heinrich Schuchardt
BUGS: O_CLOEXEC is ignored
Michael Kerrisk [Heinrich Schuchardt]
The 'event_f_flags' failure to check invalid flags was fixed in 3.15

fanotify_mark.2
Michael Kerrisk
Note that various bugs were fixed in Linux 3.16

getrlimit.2
Michael Kerrisk
[Doug Ledford]
Since Linux 3.5, the accounting formula for RLIMIT_MSGQUEUE has changed

open.2
Michael Kerrisk [Shriramana Sharma]
Fix number and formula in description of EOVERFLOW error

readlink.2
  Michael Kerrisk [Ben Hutchings]
    Fix description of readlinkat() with empty 'pathname'
  Michael Kerrisk
    SEE ALSO: add realpath(3)

sched_setattr.2
sched_setscheduler.2
  Michael Kerrisk
    SEE ALSO: add chrt(1)

shmget.2
  Manfred Spraul [Michael Kerrisk, Davidlohr Bueso]
    Update for increase of SHMALL and SHMMAX
      The default values of SHMALL and SHMMAX have been increased.

syscalls.2
  Michael Kerrisk
    Add 3 new system calls added in Linux 3.17

vmsplice.2
  Cyril Hrubis
    vmsplice() does not fail when nr_segs==0
      This nr_segs==0 case is no-op; the call succeeds and no
      EINVAL error is returned.

dlopen.3
  Michael Kerrisk
    SEE ALSO: add pldd(1)

fseeko.3
  Michael
 Kerrisk [Thomas Mack]
    _FILE_OFFSET_BITS must be defined before including any header file

getgrent.3
  Carlos O'Donell
    Add ENOENT and EAGAIN to error list

mq_getattr.3
  Michael Kerrisk
    Add an example program
      The example program can be used to discover the default
      'mq_maxmsg' and 'mq_msgsize' values used to create a queue with
      a mq_open(3) call in which 'attr' is NULL.

mq_open.3
  Michael Kerrisk

Two /proc files control the defaults for the attrp==NULL case
Refer the reader to the discussion in mq_overview(7) for a
discussion of these files, which exist since Linux 3.5.

realpath.3
Michael Kerrisk
SEE ALSO: add realpath(1)

proc.5
Elie De Brauwer
Document /proc/buddyinfo
This patch adds a short description about the contents of
/proc/buddyinfo and how this file can be used to assist
in checking for memory fragmentation issues.
Michael Kerrisk
Mention pmap(1) in discussion of /proc/PID/smaps

armscii-8.7
Marko Myllynen
Charset pages unification, minor cleanups

ascii.7
Marko Myllynen
Charset pages unification, minor cleanups
This and [the related *.7] patches will provide unification of
charset pages, minor cleanups, and some unifying cosmetic
changes. References are adjusted so that all pages include
a reference to charsets(7), which contains a description of
these sets, stray comments are removed, some obsolete
statements (like ISO 8859-1 being the de-facto ASCII
replacement) are removed, and some minor reformatting
to minimize diff's between the pages are done.

The actual substance, the character tables, remain unchanged.

This series changes the following pages (under man7): ascii,
armscii, cp1251, koi8-r, koi8-u, and all of iso_8859-*.

cp1251.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-10.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-11.7
Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-13.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-14.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-15.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-16.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-1.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-2.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-3.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-4.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-5.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-6.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-7.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-8.7
Marko Myllynen

Charset pages unification, minor cleanups

iso_8859-9.7
Marko Myllynen
Charset pages unification, minor cleanups

koi8-r.7
Marko Myllynen
Charset pages unification, minor cleanups
- remove stray comments, streamline description
(charsets(7) and Wikipedia provide more detailed
and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

koi8-u.7
Marko Myllynen
Charset pages unification, minor cleanups
- remove stray comments, streamline description
(charsets(7) and Wikipedia provide more detailed
and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

mq_overview.7
Michael Kerrisk
Update queues_max
details for Linux 3.14
And in general rework the text a little.
Michael Kerrisk
Update discussion of HARD_MSGMAX
The limit has changed in 2.6.33 and then again in 3.5.
Michael Kerrisk [Arto Bendiken]
Update details for 'queues_max' limit
Things changed in Linux 3.5.
See https://bugs.launchpad.net/bugs/1155695
Michael Kerrisk
Update details on defaults and ceiling for 'msgsize_max' limit
Michael Kerrisk
Rework discussion of HARD_MSGMAX
Michael Kerrisk [Davidlohr Bueso]
Various fixes after review from Davidlohr Bueso

sched.7
Michael Kerrisk
SEE ALSO: add taskset(1)

ld.so.8
Michael Kerrisk
SEE ALSO: add pldd(1)

Michael Kerrisk
SEE ALSO: add dlopen(3)
Michael Kerrisk
SEE ALSO: add ld(1)

========== Changes in man-pages-3.75 ==========

Released: 2014-10-15, Düsseldorf

Contributors

The following
people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Jonny Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Robert Schweikert <rjschwei@suse.com>
Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_rwlockattr_setkind_np.3
Robert Schweikert [Michael Kerrisk]
New page documenting pthread_rwlockattr_[sg]etkind_np(3)
Documents pthread_rwlockattr_setkind_np(3) and
pthread_rwlockattr_getkind_np(3).

New and changed links
---

pthread_rwlockattr_getkind_np.3
Robert Schweikert
New link to pthread_rwlockattr_setkind_np(3)

Changes to individual pages

---

readlink.2
  Michael Kerrisk [Jonny Grant]
    Add free() call to example program

readv.2
  Michael Kerrisk
     The raw preadv() and pwritev() syscalls split 'offset' into 2 arguments

signal.7
  Michael Kerrisk
    pthread_mutex_lock() and pthread_cond_wait() are restartable
      pthread_mutex_lock(, pthread_cond_wait(), and related APIs are
      automatically restarted if interrupted by a signal handler.

unix.7
  Michael Kerrisk [Carlos O'Donell, David Miller, Tetsuo Handa]
    Various additions and rewordings
      Notable changes:
      * Clarify some details for pathname sockets.
      * Add some advice on portably coding with pathname sockets.
      * Note the "buggy" behavior for pathname sockets when
        the supplied pathname is 108 bytes (after a report by
        Tetsuo Handa).

========== Changes in man-pages-3.76 ==========

Released: 2014-12-31, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports,
 notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

adjtimex.2
  Laurent Georget
    Add fields in struct timex description
      This patch updates the man page with the new fields added in
      struct timex since last edition of the man page.
  Laurent Georget [Michael Kerrisk]
    Document ADJ_TAI
  Michael Kerrisk
    Improve description of ADJ_OFFSET_SINGLESHOT
  Michael Kerrisk
    Add brief documentation of ADJ_MICRO and ADJ_NANO

Michael Kerrisk
Reformat return value list
And remove
numeric values, since they're not needed
Michael Kerrisk
Other 'modes' bits are ignored on ADJ_OFFSET_*
Other bits in 'modes' are ignored if modes contains
ADJ_OFFSET_SINGLESHOT or ADJ_OFFSET_SS_READ.
Michael Kerrisk
Add nanosecond details
Fixes https://bugzilla.kernel.org/show_bug.cgi?id=61171.
Michael Kerrisk
Document ADJ_OFFSET_SS_READ
Michael Kerrisk
Reformat 'times' flags as list
And remove numeric values, since they're not needed.
Michael Kerrisk
Note effect of ADJ_NANO for ADJ_SETOFFSET
Michael Kerrisk
Add comment noting that timex structure contains padding bytes
Michael Kerrisk
Add more details to description of 'tai' field
Michael Kerrisk
Note meaning of "PLL" abbreviation
Michael Kerrisk
Clarify which 'timex' field is used by each 'modes' bit
Michael Kerrisk
Document timex 'status' bits
Michael Kerrisk
Clarify treatment of other 'modes' bits for ADJ_OFFSET_*
Michael Kerrisk
Update RFC number: RFC 5905 obsoletes RFC 1305
Michael Kerrisk
Briefly document ADJ_SETOFFSET
Michael Kerrisk
Note PPS (pulse per second) fields in timex structure

sigreturn.2
Michael Kerrisk
Add (a lot) more detail on the signal trampoline
And rewrite much of the page.

Newly documented interfaces in existing pages
---

proc.5
Bernhard Walle

Document /proc/thread-self
/proc/thread-self has been introduced in Linux 3.17 with
commit 0097875bd41528922fb3bb5f348c53f17e00e2fd.
Sven Hoexter [Michael Kerrisk, Kamezawa Hiroyuki]
Document "VmSwap" field of /proc/[pid]/status
Florian Westphal
Document /proc/net/netfilter/nfnetlink_queue

Changes to individual pages
---

localedef.1
Marko Myllynen
Mention default path
for compiled files

clock_nanosleep.2
Michael Kerrisk
Note that 'clock_id' can also be a CPU clock ID

epoll_ctl.2
Michael Kerrisk
Regular files and directories can't be monitored with epoll_ctl()

ioctl.2
Heinrich Schuchardt
Rename 'd' argument to 'fd' in text
In most other manpages file descriptors are called 'fd'.
This patches renames attribute 'd' to 'fd'.

madvise.2
Michael Kerrisk
VERSIONS: Support for madvise() is now configurable
Support for this system call now depends on the
CONFIG_ADVISE_SYSCALLS configuration option.

open.2
Michael Kerrisk
Enhance rationale discussion for openat() and friends

posix_fadvise.2
Mel Gorman
Document the behavior of partial page discard requests
It is not obvious from the interface that "partial page discard"
requests are ignored. It should be spelled out.
Michael Kerrisk [Weijie Yang]
ERRORS:

Since 2.6.16, the kernel correctly deals with the ESPIPE case
  Michael Kerrisk
    Support for fadvise64() is now configurable
      Support for this system call now depends on the
      CONFIG_ADVISE_SYSCALLS configuration option.

prctl.2
  Andreas Schwab
    Correct description of null-termination in PR_GET_NAME and PR_SET_NAME
      The size of the process name has always been at most 16 byte
      including the null terminator. This also means that the
      name returned by PR_GET_NAME is always null-terminated.
  Michael Kerrisk
    PR_SET_NAME silently truncates strings that exceed 16 bytes

restart_syscall.2
  Michael Kerrisk
    Add some text explaining why restart_syscall() exists

sched_setaffinity.2
  Michael Kerrisk
    NOTES: Add paragraph on how to discover set of CPUs available on system
  Michael Kerrisk
    SEE ALSO: add nproc(1) and lscpu(1)

select.2
  Michael Kerrisk
    SEE ALSO: add
restart_syscall(2)

semop.2
  Michael Kerrisk
    Add note that interrupted semtimedop() returns 'timeout' unchanged
  Michael Kerrisk
    Remove information about semtimedop() EAGAIN that is repeated elsewhere
  Michael Kerrisk
    Add subsection head for semtimedop()

setsid.2
  Michael Kerrisk
    Rewrite some pieces and add some details
      Among other changes, add an explanation of why setsid() can't
      be called from a process group leader

sgetmask.2
  Michael Kerrisk
    Since 3.16, support for these system calls is configurable
      Support for these calls is now dependent on the setting of the

CONFIG_SGETMASK_SYSCALL option.

sigaction.2
  Michael Kerrisk
    Document SA_RESTORER
  Michael Kerrisk
    Add some detail on the sa_restorer field
  Michael Kerrisk
    SEE ALSO: add sigreturn(2)

splice.2
  Michael Kerrisk
    Reformat description of 'fd_in' and 'off_in' to improve readability

syscall.2
   Michael Kerrisk
    SEE ALSO: add errno(3)

syscalls.2
  Michael Kerrisk
    SEE ALSO: add errno(3)
  Michael Kerrisk
    3.19 adds execveat()
  Michael Kerrisk
    Add bpf(2) to list

tee.2
  Michael Kerrisk
    Add shell session demonstrating use of the example program

tkill.2
  Michael Kerrisk [Rich Felker]
    Remove bogus text saying tgid==-1 makes tgkill() equivalent to tkill()

abort.3
  Michael Kerrisk
    Note that SIGABRT is raised as though raise(3) is called
      Also note that abort() is POSIX.1-2008 compliant.

cmsg.3
  David Wragg
    Ensure buf is suitably aligned in sending example
      Inspection of the definition of CMSG_FIRSTHDR (both in glibc and
      the suggested definition in RFC3542) shows that it yields the
      msg_control field. So when sending, the pointer placed in
      msg_control should be suitably aligned as a struct cmsghdr.
      In the sending example,

buf was declared as a bare char array,
and so is not necessarily suitably aligned.

The solution here involves placing buf inside a union, and is
based on the sockets/scm_rights_send.c sample from The Linux
Programming Interface "dist" source code collection.

exp10.3
Michael Kerrisk
Before glibc 2.19, exp() did not give ERANGE error on underflow
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787

ftw.3
Michael Kerrisk
FTW_CHDIR has no effect on the 'fpath' argument passed to fn()

getopt.3
Michael Kerrisk [Jonny Grant]
Ensure that 'nsecs' is used

ilogb.3
Michael Kerrisk [Will Newton]
Since glibc 2.16, ilogb() does correctly diagnose domain errors

memcmp.3
Michael Haardt
Document return value for n==0 case
Michael Haardt
Warn against use of memcmp() for comparing security-critical data

mq_open.3
Michael Kerrisk
Document the O_CLOEXEC
flag
Michael Kerrisk
Place 'flags' constants in alphabetical order

pow.3
Manuel López-Ibáñez
Add note on performance characteristics of pow()

pthread_setschedparam.3
Simon Newton
Fix logic error in example program
The example program will crash if -A is used, since 'attr'
is uninitialized.

$ ./a.out -A

*** Error in `./a.out': free(): invalid pointer: 0xb779c3c4 ***
Aborted (core dumped)

Small fixes to example program

sigvec.3
Michael Kerrisk
Starting with version 2.21, glibc no longer exports sigvec()

sysconf.3
Josh Triplett
Document _SC_NGROUPS_MAX
Already documented in getgroups(2), but not in sysconf(3).

termios.3
Michael Kerrisk
SEE ALSO: add tset(1)

tgamma.3
Michael Kerrisk
Since glibc 2.18, errno is correctly set to EDOM when (x == -infinity))

wordexp.3
Carlos O'Donell
Make
it clear that WRDE_NOCMD prevents command substitution
The use of WRDE_NOCMD prevents command substitution. If the flag
WRDE_NOCMD is set then no command substitution shall occur and
the error WRDE_CMDSUB will be returned if such substitution is
requested when processing the words.

The manual page as-is makes it seem like the command substitution
occurs, and an error is returned *after* the substitution.
This patch clarifies that.

locale.5
Marko Myllynen
Describe the formats of values
locale(5) describes what a locale should define but doesn't
spell out how (in what format). The patch attempts to address
this, it also has few trivial additional enhancements.

* Reference to locale(7) for category descriptions.
* Clarify first_workday in NOTES a bit.
* Add upstream BZ reference for two missing LC_ADDRESS fields.
Marko
Myllynen
Fix miscoded character

resolv.conf.5
  Jan Chaloupka
    Add missing no-tld-query option
      Based on commit [1], the no-tld-query option exists for
      resolv.conf configuration file. Description of this option
      is provided in [2]. This patch just copies this option
      into resolv.conf.5 man page. Plus changes 'a' member
      into 'an' before 'unqualified name as if it ...'
      on the third line of [2]. Based on [3], this option
      was added in glibc 2.14 as solving [4] bug.

      [1] https://sourceware.org/git/?p=glibc.git;a=commitdiff;h=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8
      [2] http://www.daemon-systems.org/man/resolv.conf.5.html man page.
      [3]
https://sourceware.org/git/?p=glibc.git;a=blob;f=NEWS;h=952f32af17e7fb49c4c1a305de673a13075bfaf5;hb=f87df
b1f11c01f2ccdc40d81e134cd06b32e28e8
      [4] https://sourceware.org/bugzilla/show_bug.cgi?id=12734

credentials.7
  Josh Triplett
    Cross-reference getgroups(2)
      Since credentials.7 discusses supplementary GIDs, it should
      reference getgroups(2).

fanotify.7
  Heinrich Schuchardt
    Allow relative paths in example
      The current example code requires passing an absolute
      path to the mount to be watched.

      By passing AT_FDCWD to fanotify_mark it can use both
      absolute and relative paths.
  Heinrich Schuchardt
    fallocate(2) creates no events
      fallocate(2) should create FAN_MODIFY events but does not.
  Heinrich Schuchardt [Michael Kerrisk]
    fanotify notifies only events generated on the same mount
      Unfortunately, fanotify does not inform listeners for all paths
      under which a touched filesystem object is visible, but only the
      listener using the same path as the process touching the
      filesystem object.
  Heinrich Schuchardt
    Update BUGS
 to note bugs still not fixed in 3.17
      I bumped the Linux version number in the BUGS section to 3.17.

inotify.7

Heinrich Schuchardt
fallocate(2) does not trigger inotify events
Calling fallocate(2) does not result in inotify events.

locale.7
Marko Myllynen
Improve LOCPATH description
LOCPATH is ignored by privileged programs.

Add locale archive references.

Add FILES section.

man-pages.7
Michael Kerrisk [Laurent Georget]
Clarify that SEE ALSO entries may refer to pages from other projects

signal.7
Michael Kerrisk
Mention other "slow devices"
Reads from eventfd(2), signalfd(2), timerfd(2), inotify(7),
and fanotify(7) file descriptors are also slow operations
that are restartable.
Michael Kerrisk
Fix SO_RECVTIMEO/ SO_SENDTIMEO confusion in text
Michael Kerrisk
Since Linux 3.8, reads on inotify(7) file descriptors are
restartable
Michael Kerrisk
inotify(7) reads no longer show the odd EINTR error after SIGCONT
Since kernel 3.7, reads from inotify(7) file descriptors no longer
show the (Linux oddity) behavior of failing with EINTR when the
process resumes after a stop signal + SIGCONT.
Michael Kerrisk
SEE ALSO: add sigreturn(2)

unix.7
Michael Kerrisk [Scott Harvey]
Fix buglet in code snippet in BUGS section

ld.so.8
Carlos O'Donell
Add --inhibit-cache option
The dynamic loader has 6 options, only 5 are documented.
This patch documents the sixth option i.e. `--inhibit-cache`.
Jonathan Wakely [Siddhesh Poyarekar]
Correct documentation of $ORIGIN
As noted by Siddhesh:

The ld.so man page says:

$ORIGIN (or equivalently ${ORIGIN})
This expands to the directory containing the
application executable.
Thus, an application located
in somedir/app could be compiled with

This is incorrect since it expands to the directory containing the DSO and not the application executable. This seems like deliberate behaviour in dl-object.c, so it needs to be fixed in the man page.

See http://stackoverflow.com/questions/26280738/what-is-the-equivalent-of-loader-path-for-rpath-specification-on-linux/26281226#26281226

========== Changes in man-pages-3.77 ==========

Released: 2015-01-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexandre Bique <bique.alexandre@gmail.com>
Andre Majorel <aym-xunil@teaser.fr>
Andy Lutomirski <luto@amacapital.net>
Daniel Borkmann <dborkman@redhat.com>
Dave
Hansen <dave.hansen@intel.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Ignat Loskutov <ignat.loskutov@gmail.com>
Jeff Epler <jepler@unpythonic.net>
Jérôme Pouiller <jezz@sysmic.org>
Kees Cook <keescook@chromium.org>
Laurent Georget <laurent.georget@supelec.fr>
Masanari Iida <standby24x7@gmail.com>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>

Mike Frysinger <vapier@gentoo.org>
Richard Cochran <richardcochran@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Troy Davis <troy@yort.com>
Vince Weaver <vincent.weaver@maine.edu>
Will Drewry <wad@chromium.org>

Apologies if I missed anyone!

New and rewritten pages
---

seccomp.2
  Kees Cook, Michael Kerrisk, Will Drewry [Andy Lutomirski]
    New page documenting seccomp(2)
      Combines documentation from prctl, in-kernel seccomp_filter.txt
      and dropper.c, along with details specific to the new system
 call.

Newly documented interfaces in existing pages
---

netlink.7
  Stephan Mueller [Michael Kerrisk]
    Add NETLINK_CRYPTO

Changes to individual pages
---

adjtimex.2
  Laurent Georget [Richard Cochran, Jeff Epler]
    Clarify the 'ppm scaling' used in struct timex
      This patch makes explicit and clarifies the unit used for
      the fields "freq", "ppsfreq" and "stabil" in struct timex.
  Michael Kerrisk [Masanari Iida]
    Note that TIME_ERROR is the modern synonym for TIME_BAD

perf_event_open.2
  Vince Weaver
    Clarify the PERF_FLAG_FD_* flags
      This change clarifies the behavior of the PERF_FLAG_FD_OUTPUT and
      PERF_FLAG_FD_NO_GROUP flags to perf_event_open(), and removes
      the related FIXME comments.

      While writing tests to validate the behavior of these flags I

discovered that PERF_FLAG_FD_OUTPUT has been broken since the
2.6.35 kernel release.

prctl.2
Dave Hansen [Michael Kerrisk]
Add description of Intel MPX calls
The 3.19 kernel will have support for Intel MPX, including
a pair of new prctl() calls (PR_MPX_ENABLE_MANAGEMENT and
PR_MPX_DISABLE_MANAGEMENT) for enabling and disabling the
kernel's management of the "bounds tables". Add a
descriptions of the interface.
Michael Kerrisk
Add mention of seccomp(2) under PR_SET_SECCOMP
Michael Kerrisk
Suggest /proc/PID/status "Seccomp" as alternative to PR_GET_SECCOMP
Michael Kerrisk
SIGKILL can also occur PR_GET_SECCOMP in SECCOMP_MODE_FILTER mode
Kees Cook [Andy Lutomirski]
Document SECCOMP_MODE_FILTER vs EFAULT
This notes the distinction made between EINVAL and EFAULT when
attempting to use SECCOMP_MODE_FILTER with PR_SET_SECCOMP.

setns.2
pid_namespaces.7
Mike Frysinger
Elaborate discussion of the PID namespace descendant limitation
The setns(2) man page already mentions that CLONE_NEWPID may only
be used with descendant namespaces, but this nuance could be
listed in a few more places so it is not missed.

shmget.2
Michael Kerrisk [Akihiro Motoki]
Make wording of SHMALL description a little clearer

sigaction.2
Michael Kerrisk
Add siginfo_t fields for SECCOMP_RET_TRAP

memchr.3
strstr.3
Alexandre Bique
Reference memmem(3) in SEE ALSO section

memcmp.3
Michael Kerrisk [Michael Haardt]
NOTES: add some detail on avoiding memcmp() of cryptographic data

Wording largely based on comments from Michael Haardt.

pthread_tryjoin_np.3
  Jérôme Pouiller [Michael Kerrisk]
    Document EINVAL error for pthread_timedjoin_np()

mem.4
  Elie De Brauwer
    /dev/kmem depends on CONFIG_DEVKMEM
  Elie De Brauwer
    Correct /dev/port group in example

   mem.4 mentions that group for /dev/port should be set to 'mem'
      However, all other files (/dev/mem and /dev/kmem) use the kmem
      group in their examples and on my system /dev/port belongs to
      kmem. Hence the 'mem' group was probably a typo:
  Elie De Brauwer
    Add CONFIG_STRICT_DEVMEM
      Since 2.6.26 the CONFIG_NONPROMISC_DEVMEM options limits the
      physical addresses which can be accessed through /dev/mem.

random.4
  Heinrich Schuchardt
    Describe handling of O_NONBLOCK
      /dev/random and /dev/urandom treat O_NONBLOCK differently.
      This should be described in the manpage.
  Heinrich Schuchardt
    Mention PRNG used by urandom
      /dev/urandom uses a pseudo-random number generator to replace
      missing entropy.

proc.5
  Michael Kerrisk
    Document "Seccomp" field of /proc/PID/status

epoll.7
  Michael Kerrisk [Ignat Loskutov]
    Use epoll_create1() rather than
 epoll_create() in the code example
      epoll_create1() is more or less the preferred API for new
      applications, since it allows for some flags and avoids the
      misdesigned epoll_create() argument, and so it seems sensible
      to use that in the example, rather than epoll_create().

tcp.7
  Troy Davis
    Clarify tcp_tw_recycle on Internet-facing hosts
      Clarify that tcp_tw_recycle will break communication with many

general-purpose remote Internet hosts (namely, remote NAT devices)
even when the Linux device itself is not behind NAT.

========== Changes in man-pages-3.78 ==========

Released: 2015-01-22, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexey Ishchuk <aishchuk@linux.vnet.ibm.com>
Carlos
O'Donell <carlos@redhat.com>
Christian Seiler <christian@iwakd.de>
Daniel J Blueman <daniel@quora.org>
David Drysdale <drysdale@google.com>
David Herrmann <dh.herrmann@gmail.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Elliot Hughes <enh@google.com>
Jessica McKellar <jessica.mckellar@gmail.com>
Kees Cook <keescook@chromium.org>
Michael Hayes <mike@aiinc.ca>
Michael Kerrisk <mtk.manpages@gmail.com>
Rich Felker <dalias@aerifal.cx>
Vince Weaver <vincent.weaver@maine.edu>

Apologies if I missed anyone!

New and rewritten pages
---

execveat.2
  David Drysdale, Michael Kerrisk [Rich Felker]
    New page for execveat(2)

memfd_create.2
  Michael Kerrisk, David Herrmann
    New page for memfd_create() system call
      Including notes about file sealing

s390_pci_mmio_write.2
  Alexey Ishchuk
    New page for s390 s390_pci_mmio_write() and s390_pci_mmio_read()
      New manual page for the new PCI MMIO memory access system

      calls, s390_pci_mmio_write() and s390_pci_mmio_read(),
      added for the s390 platform.

Newly documented interfaces in existing pages
---

fcntl.2
  David Herrmann [Michael Kerrisk]
    Document F_ADD_SEALS and F_GET_SEALS commands

proc.5
  Elie De Brauwer
    Document /proc/sys/vm/compact_memory
  Michael Kerrisk
    Document /proc/sys/fs/nr_open

New and changed links
---

s390_pci_mmio_read.2
  Michael Kerrisk
    New link to new s390_pci_mmio_write(2) page

Changes to individual pages
---

dup.2
  Michael Kerrisk
    Add reference to RLIMIT_NOFILE for EMFILE error
  Michael Kerrisk
    Add reference to RLIMIT_NOFILE for EBADF error on 'newfd'.

execve.2
fexecve.3
  Michael Kerrisk
    SEE ALSO: add execveat(2)

fallocate.2
mmap.2
open.2

truncate.2
write.2
  Michael Kerrisk
    ERRORS: add EPERM for operation denied by file seal

fcntl.2
  Michael Kerrisk
    ERRORS: add EBUSY case for F_SETPIPE_SZ
  Michael Kerrisk
    Add reference to RLIMIT_NOFILE for F_DUPFD EINVAL error on 'arg'.
  Michael Kerrisk
    ERRORS: add open file description lock error cases

getrlimit.2
  Michael Kerrisk
    Update text on RLIMIT_NOFILE ceiling to refer to /proc/sys/fs/file-max

mbind.2
  Michael Kerrisk [Daniel J Blueman]
    Clarify EFAULT text

mmap.2
shmget.2
shm_open.3
  Michael Kerrisk
    SEE ALSO: add memfd_create(2)

open.2
  Michael Kerrisk
    Refer to RLIMIT_NOFILE for explanation of EMFILE error
  Michael Kerrisk
    Add execveat(2) in system call list under "Rationale for openat()"

perf_event_open.2
  Vince Weaver
    Clarify description of overflow events
      Update the perf_event_open manpage to be more consistent when
      discussing overflow events. It merges the discussion of
      poll-type notifications with those generated by SIGIO
       signal handlers.
      This addresses the remaining FIXMEs is the document.
  Vince Weaver
    Remove inaccurate paragraph describing attr.config
      Remove an inaccurate paragraph about values in the attr.config
      field. This information was never true in any released kernel;
      it somehow snuck into the manpage because it is still described
      this way in tools/perf/design.txt in the kernel source tree.
  Michael Kerrisk

Correct the kernel version number for PERF_COUNT_HW_CACHE_NODE
Michael Kerrisk
Add some kernel version numbers to various fields and constants

ptrace.2
sigaction.2
seccomp.2
Kees Cook
Ptrace and siginfo details
While writing some additional seccomp tests, I realized
PTRACE_EVENT_SECCOMP wasn't documented yet. Fixed this, and added
additional notes related to ptrace events SIGTRAP details.

readv.2
Michael Kerrisk
Update details
on glibc readv()/writev() wrapper behavior
And add a historical detail about Linux 2.0.

select.2
Michael Kerrisk
Mention RLIMIT_NOFILE as a possible cause of EINVAL error

syscall.2
Kees Cook
Add arm64 and mips
Add mips and arm64 to tables, along with some further
details on these architectures,

syscalls.2
Michael Kerrisk
Add s390_pci_mmio_read(2) and s390_pci_mmio_write(2)
Michael Kerrisk
Note kernel() version that introduced get_kernel_syms()
Note kernel version that introduced ppc_rtas()
Note kernel version that introduced create_module()
Note kernel version that added setup()
Michael Kerrisk
Remove some details for sync_file_range2()
Make the table a bit simpler. The details can anyway be
found in the system call man page.

utimensat.2
Michael Kerrisk [Elliot Hughes]
If both tv_sec fields are UTIME_OMIT, the file need not
exist
As noted by Elliot, if both tv_sec fields are UTIME_OMIT,
utimensat() will return success even if the file does not exist.

errno.3
  Michael Kerrisk
    The RLIMIT_NOFILE resource limit is a common cause of EMFILE

exec.3
  Michael Kerrisk
    SEE ALSO: add execveat(2)

fclose.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument
      Harmonize all the manual pages to use "stream" for FILE*
      instead of randomly using "fp" or "stream." Choosing something
      and being consistent helps users scan the man pages quickly
      and understand what they are looking at.

fexecve.3
  Michael Kerrisk
    Rewrite the script+close-on-exec problem as a BUG
      Also, add one or two details about this scenario.
  Michael Kerrisk
    The natural idiom when using fexecve() is to use the close-on-exec flag

fmemopen.3
  Michael Kerrisk
    Consistency fix: use "stream"
 as name for "FILE *" argument

fopencookie.3
  Michael Kerrisk
    Consistency fix: use "stream" as name for "FILE *" argument

getgrent_r.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

getline.3
  Michael Kerrisk
    Consistency fix: use "stream" as name for "FILE *" argument

getmntent.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

getpw.3
  Michael Kerrisk [Carlos O'Donell]
    Describe return value when 'uid' is not found

getpwent_r.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

getspnam.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

malloc_info.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

posix_fallocate.3
  Michael Kerrisk
    Note that posix_fallocate() is implemented using fallocate(2)

putgrent.3
  Carlos O'Donell
    Consistency
 fix: use "stream" as name for "FILE *" argument
      Harmonize all the manual pages to use "stream" for FILE*
      instead of randomly using "fp" or "stream." Choosing something
      and being consistent helps users scan the man pages quickly
      and understand what they are looking at.

locale.5
  Akihiro Motoki
    Correct variable name

proc.5
  Michael Kerrisk
    Remove bogus statement about NR_OPEN being a ceiling for file-max

========== Changes in man-pages-3.79 ==========

Released: 2015-02-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>

Heinrich Schuchardt <xypron.glpk@gmx.de>
J William Piggott <elseifthen@gmx.com>
Masanari Iida <standby24x7@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Scot Doyle <lkml14@scotdoyle.com>
Sergey
 V. Zubkov <cubbi@cubbi.com>
Stephan Mueller <stephan.mueller@atsec.com>
Vince Weaver <vincent.weaver@maine.edu>
Vivek Goyal <vgoyal@redhat.com>

Apologies if I missed anyone!

New and rewritten pages
---

getrandom.2
  Heinrich Schuchardt, Theodore T'so, Michael Kerrisk
    New page documenting getrandom(2)
      Kernel 3.17 introduces a new system call getrandom(2).

kexec_load.2
  Vivek Goyal, Michael Kerrisk
    Add documentation of kexec_file_load(2)
  Michael Kerrisk, Vivek Goyal
    Rewrite and extend documentation of kexec_load().

New and changed links
---

kexec_file_load.2
  Michael Kerrisk
    New link to kexec_load.2

Changes to individual pages
---

personality.2
  Michael Kerrisk
    SEE ALSO: add setarch(8)

prctl.2
  Michael Kerrisk
    Unused arguments of PR_MPX_(EN,DIS}ABLE_MANAGEMENT must be zero

reboot.2

Michael Kerrisk
SEE ALSO:
add kexec_load(2)

socket.2
Stephan Mueller
document AF_ALG
Add a reference to the AF_ALG protocol accessible via socket(2).

fflush.3
Michael Kerrisk [Sergey V. Zubkov]
Clarify that flushing of input streams occurs only for seekable files
See https://bugzilla.kernel.org/show_bug.cgi?id=91931
Michael Kerrisk [Sergey V. Zubkov]
POSIX.1-2008 specifies the behavior when flushing input streams
POSIX.1-2001 did not have a specification for input streams,
but POSIX.1-2008 added one.

getopt.3
Michael Kerrisk
SEE ALSO: add getopt(1)

random.3
Heinrich Schuchardt
SEE ALSO: add getrandom(2)

termios.3
Michael Kerrisk
SEE ALSO: add reset(1), setterm(1), tput(1)

tzset.3
J William Piggott
Document behavior when TZ filespec omits the colon
If the TZ filespec omits the leading colon, glibc will parse
it for any valid format, i.e., it will
still work.
J William Piggott
Add description for posixrules file
J William Piggott
Correct system timezone file path
J William Piggott
There are only two TZ formats
tzset(3) currently states that there are three TZ formats. The
first two it lists are actually variations of the POSIX-style
TZ format, of which there are at least five variations.

This patch corrects this to match the POSIX specification of
TZ having only two formats.

J William Piggott
Filespec omitted incorrect
Paragraph three of the DESCRIPTION section says
that when TZ is set, but empty, then UTC is used.

Later it says if the TZ filespec is omitted then the file
/usr/share/zoneinfo/localtime is used. This is incorrect,
it will use UTC in that case as well.
J William Piggott
Fix incorrect TZ string representation
The TZ string
representation indicates that the start/end
rules are required; this is incorrect.
J William Piggott
Add ENVIRONMENT section + other rearrangements
FILES section was overly verbose and included
environment variables. Added ENVIRONMENT section,
removing ENV VARS from the FILES section.

random.4
Heinrich Schuchardt
SEE ALSO: add getrandom(2)

passwd.5
Michael Kerrisk
SEE ALSO: add chfn(1), chsh(1)

capabilities.7
Michael Kerrisk
SEE ALSO: add setpriv(1)

signal.7
Michael Kerrisk
Add getrandom(2) to list of restartable system calls
Michael Kerrisk
Add F_OFD_SETLKW to list of restartable operations

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_fat.2
  Heinrich Schuchardt [Michael Kerrisk]

New man page for the ioctl(2) FAT API
The ioctl(2) system call may be used to retrieve information about
the FAT file system and to set file attributes.

madvise.2
Michael Kerrisk
Summary: this page has been significantly reorganised and rewritten
Michael Kerrisk
Recast discussion of 'advice' into two groups of values
madvise() is one of those system calls that has congealed over
time, as has the man page. It's helpful to split the discussion
of 'advice' into those
flags into two groups:

* Those flags that are (1) widespread across implementations;
(2) have counterparts in posix_madvise(3); and (3) were present
in the initial Linux madvise implementation.
* The rest, which are values that (1) may not have counterparts
in other implementations; (2) have no counterparts in
posix_madvise(3); and (3) were added to Linux in more recent
times.
Michael Kerrisk
Explicitly list the five flags provided by posix_fadvise()
Over time, bit rot has afflicted this page. Since the original
text was written many new Linux-specific flags have been added.
So, now it's better to explicitly list the flags that
correspond to the POSIX analog of madvise().
Jan Chaloupka [Hugh Dickins, Michael Kerrisk]
Starting with Linux 3.5, more file systems support MADV_REMOVE
Michael Kerrisk
Split EINVAL
error into separate cases
Michael Kerrisk
Explain MADV_REMOVE in terms of file hole punching
Michael Kerrisk
MADV_REMOVE can be applied only to shared writable mappings
Michael Kerrisk
MADV_REMOVE cannot be applied to locked or Huge TLB pages
Michael Kerrisk [Vlastimil Babka]
Clarify that MADV_DONTNEED has effect on pages only if it succeeds
Michael Kerrisk [Vlastimil Babka]
Clarifications for MADV_DONTNEED
Michael Kerrisk [Michal Hocko]
Improve MADV_DONTNEED description
Michael Kerrisk
MADV_DONTNEED cannot be applied to Huge TLB or locked pages
Michael Kerrisk [Vlastimil Babka]
Remove mention of "shared pages" as a cause of EINVAL for MADV_DONTNEED

Michael Kerrisk [Vlastimil Babka]
Note Huge TLB as a cause of EINVAL for MADV_DONTNEED
Michael Kerrisk [Minchan Kim]
Add mention of VM_PFNMAP in discussion of MADV_DONTNEED and MADV_REMOVE
Michael Kerrisk

Drop sentence saying that kernel may ignore 'advice'
The sentence creates misunderstandings, and does not really
add information.
Michael Kerrisk
Note that some Linux-specific 'advice' change memory-access semantics
Michael Kerrisk
NOTES: Remove crufty text about "command" versus "advice"
The point made in this fairly ancient text is more or less evident
from the DESCRIPTION, and it's not clear what "standard" is being
referred to.
Michael Kerrisk
Mention POSIX.1-2008 addition of POSIX_MADV_NOREUSE
Michael Kerrisk
Remove "POSIX.1b" from CONFORMING TO
Michael Kerrisk
Move mention of posix_fadvise() from CONFORMING TO to SEE ALSO
Michael Kerrisk
ERRORS: add EPERM error case for MADV_HWPOISON
Michael Kerrisk
Note that madvise() is nonstandard, but widespread

Newly documented interfaces in existing pages
---

proc.5
Michael Kerrisk
(Briefly) document /proc/PID/attr/socketcreate
Michael Kerrisk
(Briefly) document /proc/PID/attr/keycreate
Michael Kerrisk [Stephen Smalley]
Document /proc/PID/attr/{current,exec,fscreate,prev}
Heavily based on Stephen Smalley's text in
https://lwn.net/Articles/28222/
From: Stephen Smalley <sds@epoch.ncsc.mil>
To: LKML and others
Subject: [RFC][PATCH] Process Attribute API for Security Modules
Date: 08 Apr 2003 16:17:52 -0400
Michael Kerrisk
Document /proc/sys/kernel/auto_msgmni

socket.7

David Wilson [Michael Kerrisk]
Document SO_REUSEPORT socket option

New and changed links
---

get_thread_area.2
Andy Lutomirski
Make get_thread_area.2 a link to rewritten set_thread_area.2 page

Changes to individual pages
---

time.1
Michael Kerrisk
Make option argument formatting consistent with other pages

access.2
Denys Vlasenko
Explain how access() check treats capabilities
We have users who are terribly confused why their binaries
with CAP_DAC_OVERRIDE capability see EACCESS from access() calls,
but are able to read the file.

The reason is access() isn't the "can I read/write/execute this
file?" question, it is the "(assuming that I'm a setuid binary,)
can *the user who invoked me* read/write/execute this file?"
question.

That's why it uses real UIDs as documented, and why it ignores
capabilities when capability-endorsed binaries are run by non-root
(this patch adds this information).

To make users more likely to notice this less-known detail,
the patch expands the explanation with rationale for this logic
into a separate paragraph.

arch_prctl.2
set_thread_area.2
get_thread_area.2
Andy Lutomirski
Improve TLS documentation
The documentation for set_thread_area was very vague. This
improves it, accounts for recent kernel changes, and merges
it with get_thread_area.2.

get_thread_area.2 now becomes a link.

While I'm at it, clarify the related arch_prctl.2 man page.

cacheflush.2
  Ralf Baechle
    Update some portability details and bugs
  Michael Kerrisk
    Refer reader to BUGS in discussion of EINVAL error

capget.2
  Michael Kerrisk
    Document V3 capabilities constants
  Michael Kerrisk
    Rewrite discussion of kernel versions that support file capabilities
      File capabilities ceased to be optional in Linux 2.6.33.

clone.2
  Peng Haitao
    Fix description of CLONE_PARENT_SETTID
      CLONE_PARENT_SETTID only stores child thread ID in parent memory.

clone.2
execve.2
  Kevin Easton
    Document interaction
 of execve(2) with CLONE_FILES
      This patch the fact that a successful execve(2) in a process that
      is sharing a file descriptor table results in unsharing the table.

      I discovered this through testing and verified it by source
      inspection - there is a call to unshare_files() early in
      do_execve_common().

fcntl.2
  Michael Kerrisk [Jeff Layton]
    Clarify cases of conflict between traditional record and OFD locks
      Verified by experiment on Linux 3.15 and 3.19rc4.

fork.2
  Michal Hocko
    EAGAIN is not reported when task allocation fails
      I am not sure why we have:

        "EAGAIN fork() cannot allocate sufficient memory to copy
         the parent's page tables and allocate a task structure
         or the child."

The text seems to be there from the time when man-pages
were moved to git so there is no history for it.

And it doesn't
reflect reality: the kernel reports both
dup_task_struct and dup_mm failures as ENOMEM to the
userspace. This seems to be the case from early 2.x times
so let's simply remove this part.
Heinrich Schuchardt
Child and parent run in separate memory spaces
fork.2 should clearly point out that child and parent
process run in separate memory spaces.
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

getpid.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

getxattr.2
Michael Kerrisk
Various rewordings plus one or two details clarified
Michael Kerrisk
Add pointer to example in listxattr(2)

killpg.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

listxattr.2
Heinrich Schuchardt
Provide example program
Michael Kerrisk
Reword discussion of size==0 case
Michael
Kerrisk
Add note on handling increases in sizes of keys or values
Michael Kerrisk
Remove mention of which filesystems implement ACLs
Such a list will only become outdated (as it already was).

migrate_pages.2
Jan Stancek
Document EFAULT and EINVAL errors
I encountered these errors while writing testcase for migrate_pages
syscall for LTP (Linux test project).

I checked stable kernel tree 3.5 to see which paths return these.

Both can be returned from get_nodes(), which is called from:
SYSCALL_DEFINE4(migrate_pages, pid_t, pid, unsigned long, maxnode,
const unsigned long __user *, old_nodes,
const unsigned long __user *, new_nodes)

The testcase does following:
EFAULT
a) old_nodes/new_nodes is area mmaped with PROT_NONE
b) old_nodes/new_nodes is area not mmapped in process address

space, -1 or area that has been just munmmaped

EINVAL
a) maxnodes overflows kernel limit
b) new_nodes contain node, which has no memory or does not exist
or is not returned for get_mempolicy(MPOL_F_MEMS_ALLOWED).

modify_ldt.2
Andy Lutomirski
Overhaul the documentation
This clarifies the behavior and documents all four functions.
Andy Lutomirski
Clarify the lm bit's behavior
The lm bit should never have existed in the first place. Sigh.

mprotect.2
Mark Seaborn
Mention effect of READ_IMPLIES_EXEC personality flag
I puzzled over mprotect()'s effect on /proc/*/maps for a while
yesterday -- it was setting "x" without PROT_EXEC being specified.
Here is a patch to add some explanation.

msgget.2
Michael Kerrisk
Add details of MSGMNI default value

msgop.2
Michael Kerrisk
Clarify wording of MSGMAX and MSGMNB
limits

perf_event_open.2
Vince Weaver
Clarify PERF_EVENT_IOC_REFRESH behavior
Currently the PERF_EVENT_IOC_REFRESH ioctl, when applied to a group
leader, will refresh all children. Also if a refresh value of 0
is chosen then the refresh becomes infinite (never runs out).
Back in 2011 PAPI was relying on these behaviors but I was told

that both were unsupported and subject to being removed at any time.
(See https://lkml.org/lkml/2011/5/24/337)
However the behavior has not been changed.

This patch updates the manpage to still list the behavior as
unsupported, but removes the inaccurate description of it
only being a problem with 2.6 kernels.

prctl.2
  Michael Kerrisk [Bill McConnaughey]
    Mention file capabilities in discussion of PR_SET_DUMPABLE
  Michael Kerrisk
    Greatly expand discussion of "dumpable" flag
      In particular,
 detail the interactions with
      /proc/sys/fs/suid_dumpable.
  Michael Kerrisk
    Reorder paragraphs describing PR_SET_DUMPABLE
  Michael Kerrisk
    Mention SUID_DUMP_DISABLE and SUID_DUMP_USER under PR_SET_DUMPABLE
  Michael Kerrisk
    Executing a file with capabilities also resets the parent death signal

ptrace.2
  James Hunt
    Explain behaviour should ptrace tracer call execve(2)
      This behaviour was verified by reading the kernel source and
      confirming the behaviour using a test program.
  Denys Vlasenko
    Add information on PTRACE_SEIZE versus PTRACE_ATTACH differences
      Extend description of PTRACE_SEIZE with the short summary of its
      differences from PTRACE_ATTACH.

      The following paragraph:

      PTRACE_EVENT_STOP
          Stop induced by PTRACE_INTERRUPT command, or group-stop, or ini-
          tial ptrace-stop when a new child is attached (only if attached
           using PTRACE_SEIZE), or PTRACE_EVENT_STOP if PTRACE_SEIZE was used.

      has an editing error (the part after last comma makes no sense).
      Removing it.

      Mention that legacy post-execve SIGTRAP is disabled by PTRACE_SEIZE.

sched_setattr.2
  Michael Kerrisk [Christophe Blaess]
    SYNOPSIS: remove 'const' from 'attr' sched_getattr() argument

semget.2
  Michael Kerrisk
    Note default value for SEMMNI and SEMMSL

semop.2
  Michael Kerrisk
    Note defaults for SEMOPM and warn against increasing > 1000

sendfile.2
  Eric Wong
    Caution against modifying sent pages

setxattr.2
  Michael Kerrisk
    ERRORS: add ENOTSUP for invalid namespace prefix
  Michael Kerrisk
    Remove redundant text under ENOTSUP error
  Michael Kerrisk
    Note that zero-length attribute values are permitted
  Michael Kerrisk
    Rework text describing 'flags' argument

stat.2
  Michael Kerrisk
    NOTES:
 add "C library/kernel ABI differences" subheading

statfs.2
  Michael Kerrisk [Jan Chaloupka]
    Document the 'f_flags' field added in Linux 2.6.36
  Michael Kerrisk
    Clarify that 'statfs' structure has some padding bytes
      The number of padding bytes has changed over time, as some
      bytes are used, so describe this aspect of the structure
      less explicitly.
  Tao Ma
    Add OCFS2_SUPER_MAGIC
  Michael Kerrisk
    Use __fsword_t in statfs structure definition
      This more closely matches modern glibc reality.
  Michael Kerrisk
    Add a note on the __fsword_t type
  Michael Kerrisk
    Document 'f_spare' more vaguely

wait.2
  Michael Kerrisk

Note that waitpid() is a wrapper for wait4()
Michael Kerrisk
Note that wait() is a library function implemented via wait4()

wait4.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

encrypt.3
Rob Somers
Improve code example
I (and some others) found that the original example code
did not seem to work as advertised. The new code (used by
permission of the original author, Jens Thoms Toerring)
was found on comp.os.linux.development.

mktemp.3
Luke Faraone
DESCRIPTION reference to BUGS corrected
mktemp(3)'s DESCRIPTION referenced NOTES, but no such
section exists. Corrected to refer to BUGS.

pthread_attr_setschedparam.3
Tobias Herzke
Describe EINVAL in ERRORS

resolver.3
host.conf.5
Simon Paillard
host.conf 'order' option deprecated, replaced by nsswitch.conf(5)
http://www.sourceware.org/bugzilla/show_bug.cgi?id=2389
http://repo.or.cz/w/glibc.git/commit/b9c65d0902e5890c4f025b574725154032f8120a

Reported at http://bugs.debian.org/270368,
http://bugs.debian.org/396633, and http://bugs.debian.org/344233.

statvfs.3
Michael
Kerrisk
Document missing 'f_flag' bit values
And reorganize information relating to which flags are in
POSIX.1.
Michael Kerrisk [Jan Chaloupka]
statvfs() now populates 'f_flag' from statfs()'s f_flag field
These changes came with glibc 2.13, and the kernel's addition of
a 'f_flags' field in Linux 2.6.36.

syslog.3

Michael Kerrisk [Doug Goldstein]
Remove unneeded <stdarg.h>
vsyslog() does not need this.

tzset.3
J William Piggott
Add offset format
tzset.3 does not illustrate the POSIX offset format.
Specifically, there is no indication in the manual
what the optional components of it are.

random.4
Michael Kerrisk
Note maximum number of bytes returned by read(2) on /dev/random
Michael Kerrisk [Mathieu Malaterre]
Since Linux 3.16, reads from /dev/urandom return at most 32 MB
See https://bugs.debian.org/775328
and
https://bugzilla.kernel.org/show_bug.cgi?id=80981#c9

core.5
Michael Kerrisk [Bill McConnaughey]
Executing a file that has capabilities also prevents core dumps
Michael Kerrisk
Document "%i" and "%I" core_pattern specifiers

intro.5
Michael Kerrisk
Remove words "and protocols"
There are no protocol descriptions in Section 5. Protocols are
in Section 7.

proc.5
Michael Kerrisk
Add reference to prctl(2) in discussion of /proc/sys/fs/suid_dumpable
And note that /proc/sys/fs/suid_dumpable defines the
value assigned to the process "dumpable" flag in certain
circumstances.
Michael Kerrisk
Note that CAP_SYS_ADMIN is required to list /proc/PID/map_files
This might however change in the future; see the Jan 2015 LKML thread:

Re: [RFC][PATCH v2] procfs: Always expose /proc/<pid>/map_files/

and make it readable

resolv.conf.5
Michael Kerrisk

SEE ALSO: add nsswitch.conf(5)

capabilities.7
Michael Kerrisk
Mention SECBIT_KEEP_CAPS as an alternative to prctl() PR_SET_KEEPCAPS
Chris Mayo
NOTES: add last kernel versions for obsolete options
The CONFIG_SECURITY_CAPABILITIES option was removed by
commit 5915eb53861c5776cfec33ca4fcc1fd20d66dd27

The CONFIG_SECURITY_FILE_CAPABILITIES option removed in
Linux 2.6.33 as already mentioned in DESCRIPTION.

pthreads.7
Michael Kerrisk
SEE ALSO: add fork(2)

unix.7
Jan Chaloupka
Mention SOCK_STREAM socket for ioctl_type of ioctl()
from https://bugzilla.redhat.com/show_bug.cgi?id=1110401.

unix.7 is not clear about socket type of ioctl_type argument of
ioctl() function. The description of SIOCINQ is applicable only
for SOCK_STREAM socket. For SOCK_DGRAM, udp(7) man page gives

correct description of SIOCINQ

ldconfig.8
Michael Kerrisk
Place options in alphabetical order
Michael Kerrisk
Note glibc version number for '-l' option
Michael Kerrisk
Document -c/--format option
Michael Kerrisk
Add long form of some options
Michael Kerrisk [Patrick Horgan]
ld.so.conf uses only newlines as delimiters
mtk: confirmed by reading source of parse_conf() in
elf/ldconfig.c.
Michael Kerrisk
Document -V/--version option
Michael Kerrisk
Document -i/--ignore-aux-cache option

ld.so.8
Michael Kerrisk

Relocate "Hardware capabilities" to be a subsection under notes
This is more consistent with standard man-pages headings
and layout.
Michael Kerrisk
(Briefly) document LD_TRACE_PRELINKING
Michael Kerrisk
Remove duplicate description of LD_BIND_NOT

========== Changes in man-pages-3.81 ==========

Released:
2015-03-02, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexandre Oliva <aoliva@redhat.com>
Carlos O'Donell <carlos@redhat.com>
Ma Shimiao <mashimiao.fnst@cn.fujitsu.com>

attributes.7
Alexandre Oliva, Michael Kerrisk [Carlos O'Donell]
New page describing POSIX safety concepts

Global changes

Many pages
Peng Haitao, Michael Kerrisk
Reformat existing thread-safety information to use a
tabular format, rather than plain text.

Changes to individual pages
---

mmap.2
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function mmap() and munmap() are
thread safe.

a64l.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

acos.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function acos(), acosf() and acosl() are thread safe.

acosh.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function acosh(), acoshf() and acoshl() are thread safe.

addseverity.3
  Ma Shimiao
    ATTRIBUTES: Note function is thread-safe
      The function addseverity() is thread safe.

aio_cancel.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_cancel() is thread safe.

aio_fsync.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_fsync() is thread safe.

aio_read.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
       The function aio_read() is thread safe.

aio_suspend.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe

The function aio_suspend() is thread safe.

aio_write.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_write() is thread safe.

argz_add.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

asin.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function asin(), asinf() and asinl() are thread safe.

assert.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

assert_perror.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

atan2.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function atan2(), atan2f() and atan2l() are thread safe.

atanh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function atanh(), atanhf() and atanhl() are thread safe.

backtrace.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

btowc.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function btowc() in glibc is thread safe.
Its marking matches glibc marking.

cabs.3

Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function cabs(), cabsf() and cabsl() are thread safe.

cacos.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function cacos(), cacosf() and cacosl() are thread safe.

cacosh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions cacosh(), cacoshf() and cacoshl() in glibc are
thread safe. Its markings match glibc markings.

canonicalize_file_name.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The functions canonicalize_file_name() in glibc is thread safe.
Its marking matches glibc marking.

carg.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function carg(), cargf() and cargl() are thread safe.

casin.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions casin(), casinf() and casinl() are thread safe.
Their markings match glibc markings.

casinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions casinh(), casinhf() and casinhl() in glibc are
thread safe. Its markings match glibc markings.

catan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions catan(), catanf() and catanl() are thread safe.
Their markings match glibc markings.

catanh.3
Ma Shimiao
ATTRIBUTES: Note functions

that are thread-safe
The functions catanh(), catanhf() and catanhl() in glibc are
thread safe. Its markings match glibc markings.

catopen.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions catopen() and catclose() are thread safe.

cfree.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function cfree() in glibc is thread safe.
Its marking matches glibc marking.

clog10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions clog10(), clog10f() and clog10l() in glibc are
thread safe. Its markings match glibc markings.

clog.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function clog(), clogf() and clogl() are thread safe.

closedir.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function closedir() in glibc is thread safe.
Its marking matches glibc marking.

confstr.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function confstr() is thread safe.

cosh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions cosh(), coshf() and coshl() in glibc are thread safe.
Its markings match glibc markings.

cpow.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions cpow(), cpowf() and cpowl() in glibc are thread safe.
Its markings match glibc markings.

crypt.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

ctermid.3
  Ma Shimiao
    Modify thread-safety information
      According to the change of source code, ctermid's level has been
      changed from MT-Unsafe to MT-Safe. After modifying,
 the marking
      matches the glibc marking.

drand48.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

drand48_r.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

ecvt.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be same as glibc manual.

ecvt_r.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The markings match glibc markings.

encrypt.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc
 manual.

envz_add.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

exec.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions execl(), execlp(), execle(), execv(), execvp() and execvpe() are thread safe.

exit.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

exp10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

exp2.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function exp2(), exp2f() and exp2l() are thread safe.

exp.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function exp(), expf() and expl() are thread safe.

fclose.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe

The function fclose() is thread safe.
Its marking matches glibc marking.

fcloseall.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

fgetc.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fgetwc.3
Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fgetws.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fmod.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function fmod(), fmodf() and fmodl() are thread safe.

fnmatch.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function fnmatch() is thread safe with exceptions.

fopen.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

fopencookie.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fread.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fread() and fwrite() are thread safe.

gamma.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions gamma(), gammaf() and gammal() are not thread safe.
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getcontext.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

getcwd.3
  Peng Haitao

   ATTRIBUTES: Note functions that are thread-safe
      The functions getcwd(), getwd() and get_current_dir_name() are
      thread safe.

getdate.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getenv.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions getenv() and secure_getenv() are thread safe.

getfsent.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions setfsent(), getfsent(), endfsent(), getfsspec()
      and getfsfile() are not thread safe.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrent.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
       Its marking matches glibc marking.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrnam.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrouplist.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function getgrouplist() is thread safe with exceptions.

getlogin.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getopt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions getopt(), getopt_long() and getopt_long_only() are
       not thread safe.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpass.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpwent.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpwnam.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

gets.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its marking matches glibc marking.

getw.3
  Peng Haitao
     ATTRIBUTES: Note functions that are thread-safe
      The functions getw() and putw() are thread safe.

gnu_get_libc_version.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions gnu_get_libc_version() and gnu_get_libc_release()

are thread safe.

hsearch.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

iconv.3
Peng Haitao
Modify thread-safety information

inet.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions inet_aton() and inet_addr() are thread safe with exceptions.
The functions inet_network(), inet_ntoa(), inet_makeaddr(), inet_lnaof() and inet_netof() are thread safe.
Modify thread-safety information
After researching and talking,
we think inet_network() and
inet_ntoa() should be marked with locale.
After changing, the markings match glbc markings.

inet_pton.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function inet_pton() is thread safe with exceptions.

iswdigit.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswdigit() is thread safe with exceptions.

iswgraph.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswgraph() is thread safe with exceptions.

iswlower.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswlower() is thread safe with exceptions.

iswprint.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions

The function iswprint() is thread safe with exceptions.

iswpunct.3
Peng
Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswpunct() is thread safe with exceptions.

iswspace.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswspace() is thread safe with exceptions.

iswupper.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswupper() is thread safe with exceptions.

iswxdigit.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswxdigit() is thread safe with exceptions.

j0.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function j0(), j1f() jnl() and so on are thread safe.

lio_listio.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

log10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function log10(), log10f() and log10l() are thread safe.

log2.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function log2(), log2f() and log2l() are thread safe.

log.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function log(), logf() and logl() are thread safe.

makecontext.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

makedev.3
  Peng Haitao
    ATTRIBUTES: Note macros that are thread-safe
      The macros makedev(), major() and minor() are thread safe.

malloc.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function malloc(), free(), calloc() and realloc() are
      thread safe.

mblen.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in
 glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

mbstowcs.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The marking matches glibc marking.

mbtowc.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function mbtowc() is not thread safe.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

mktemp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function mktemp() is thread safe.

mtrace.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions mtrace() and muntrace() are not thread safe.

nan.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The markings match glibc markings.

nl_langinfo.3
   Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function nl_langinfo() is thread safe with exceptions.

opendir.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The markings match glibc markings.

pow10.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function pow10(), pow10f() and pow10l() are thread safe.

pow.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function pow(), powf() and powl() are thread safe.

pthread_setcancelstate.3
  Michael Kerrisk
    Add async-signal-safety information

ptsname.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

putenv.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-unsafe
      The function putenv() is
 thread unsafe.

puts.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions fputc(), fputs(), putc(), putchar() and puts() are
      thread safe.

putwchar.3

Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

qecvt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be same as glibc manual.

rand.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The functions rand(), rand_r() and srand() are thread safe.

random_r.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

readdir.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more
detailed, change the
thread-safety information to be same as glibc manual.

realpath.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

regex.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions regcomp() and regexec() are thread safe with
exceptions.
The functions regerror() and regfree() are thread safe.

remainder.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

scalb.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

The function scalb(), scalbf() and scalbl() are thread safe.

setenv.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-unsafe
The function setenv() and unsetenv() are thread unsafe.

siginterrupt.3
Ma Shimiao
Modify thread-safety information
As annotation
in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

sigset.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The functions sigset(), sighold(), sigrelse() and sigignore()
are thread safe.

sinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function sinh(), sinhf() and sinhl() are thread safe.

sqrt.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function sqrt(), sqrtf() and sqrtl() are thread safe.

stdarg.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

stdio_ext.3
Ma Shimiao
Modify thread-safety information
Change the thread safety information to be the same as glibc.

strcasecmp.3
Peng Haitao
ATTRIBUTES:
Note functions that are thread safe with exceptions
The functions strcasecmp() and strncasecmp() are thread safe
with exceptions.

strerror.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

strfmon.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its marking matches glibc marking.

strfry.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strfry() is thread safe.

strftime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function strftime() is thread safe with exceptions.

strptime.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function strptime() is thread safe with exceptions.

strtok.3
  Ma Shimiao
    Modify thread-safety
 information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

strverscmp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strverscmp() is thread safe.

strxfrm.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The marking matches glibc marking.

syslog.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread safe with exceptions
      The functions openlog() and closelog() are thread safe.
      The functions syslog() and vsyslog() are thread safe with

exceptions.

tempnam.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function tempnam() is thread safe.

termios.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to
be the same as glibc manual.
Ma Shimiao
Modify thread-safety information
As this is man page for Linux, we don't need thread safety information for bsd

tgamma.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions tgamma(), tgammaf() and tgammal() in glibc are thread safe. Its markings match glibc markings.

timegm.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions timelocal() and timegm() are thread safe with exceptions.

tmpfile.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its markings match glibc markings.

tmpnam.3
Peng Haitao
Modify thread-safety information
When the argument s is NULL, tmpnam() should be MT-Unsafe.

toupper.3
Ma Shimiao
Modify thread-safety information
After researching and talking, we think toupper() and tolower() should not be marked with locale.
After changing, the markings match glbc markings.

tsearch.3

Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions' markings match glibc markings.

ttyname.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be same as glibc manual.

tzset.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function tzset() is thread safe with exceptions.

wcsdup.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

wctomb.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

y0.3
Ma Shimiao
ATTRIBUTES: Note functions
that are thread-safe
The function y0(), y1f() ynl() and so on are thread safe.

Apologies if I missed anyone!

New
 and rewritten pages
---

nptl.7
  Michael Kerrisk
    New page with details of the NPTL POSIX threads implementation

Newly documented interfaces in existing pages
---

user_namespaces.7
  Eric W. Biederman [Michael Kerrisk]
    Document /proc/[pid]/setgroups

Changes to individual pages
---

intro.1
  Stéphane Aulery
    Prompt is not % but $
  Stéphane Aulery
    Various improvements
      - Add reference to other common shells dash(1), ksh(1)
      - Add a reference to stdout(3)
      - Separate cp and mv descriptions
      - Add examples of special cases of cd
      - Add su(1) and shutdown(8) references for section Logout
        and poweroff
      - Move Control-D to section Logout and poweroff
      - Fix some little formatting errors
  Stéphane Aulery
    Add cross references cited
  Stéphane Aulery

  Order SEE ALSO section

clone.2
  Josh Triplett
    Document that clone() silently ignores CLONE_PID and CLONE_STOPPED
      Normally, system calls return EINVAL for flags they don't support.
      Explicitly document that clone does *not* produce an error for
      these two obsolete flags.
  Michael Kerrisk

Small rewording of explanation of clone() wrt threads
Clone has so many effects that it's an oversimplification to say
that the *main* use of clone is to create a thread. (In fact,
the use of clone() to create new processes may well be more
common, since glibc's fork() is a wrapper that calls clone().)

getgroups.2
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread
attribute. NPTL uses a signal-based mechanism to ensure that
when one thread changes its
credentials, all other threads change
credentials to the same values. By this means, the NPTL
implementation conforms to the POSIX requirement that the threads
in a process share credentials.
Michael Kerrisk
ERRORS: add EPERM for the case where /proc/PID/setgroups is "deny"
Michael Kerrisk
Note capability associated with EPERM error for setgroups(2)
Michael Kerrisk
Refer reader to user_namespaces(7) for discussion of /proc/PID/setgroups
The discussion of /proc/PID/setgroups has moved from
proc(5) to user_namespaces(7).

getpid.2
Michael Kerrisk
Note that getppid() returns 0 if parent is in different PID namespace

getsockopt.2
Konstantin Shemyak
Note RETURN VALUE details when netfilter is involved

ioctl_list.2
Heinrich Schuchardt
SEE ALSO ioctl_fat.2
Add FAT_IOCTL_GET_VOLUME_ID
SEE ALSO ioctl_fat.2
Heinrich Schuchardt

include/linux/ext2_fs.h
Include linux/ext2_fs.h does not contain any ioctl definitions
anymore.

Request codes EXT2_IOC* have been replaced by FS_IOC* in
linux/fs.h.

Some definitions of FS_IOC_* use long* but the actual code expects

int* (see fs/ext2/ioctl.c).

msgop.2
  Bill Pemberton
    Remove EAGAIN as msgrcv() errno
      The list of errnos for msgrcv() lists both EAGAIN and ENOMSG as
      the errno for no message available with the IPC_NOWAIT flag.
      ENOMSG is the errno that will be set.
  Bill Pemberton
    Add an example program

open.2
  Michael Kerrisk [Jason Vas Dias]
    Mention blocking semantics for FIFO opens
      See https://bugzilla.kernel.org/show_bug.cgi?id=95191

seccomp.2
  Jann Horn [Kees Cook, Mikael Pettersson, Andy Lutomirski]
    Add note about alarm(2) not being sufficient to limit runtime
  Jann Horn
    Explain blacklisting
 problems, expand example
  Michael Kerrisk [Kees Cook]
    Add mention of libseccomp

setgid.2
  Michael Kerrisk
    Clarify that setgid() changes all GIDs when caller has CAP_SETGID
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.

setresuid.2
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread
 changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.

setreuid.2
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.
  Michael Kerrisk
    SEE ALSO: add credentials(7)

setuid.2
  Michael Kerrisk
    Clarify that setuid() changes all UIDs when caller has CAP_SETUID
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL
 credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.

sigaction.2
  Michael Kerrisk
    Add discussion of rt_sigaction(2)
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc wrapper gives an EINVAL error on attempts to change the
      disposition of either of the two real-time signals used by NPTL.

sigpending.2
  Michael Kerrisk
    Add discussion of rt_sigpending(2)

sigprocmask.2
  Michael Kerrisk
    Add discussion of rt_sigprocmask(2)
  Michael Kerrisk
    Note treatment of signals used internally by NPTL

    The glibc wrapper silently ignores attempts to block the two
      real-time signals used by NPTL.

sigreturn.2
  Michael Kerrisk

Add discussion of rt_sigreturn(2)

sigsuspend.2
Michael Kerrisk
Add discussion of rt_sigsuspend(2)

sigwaitinfo.2
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc wrappers silently ignore attempts to wait for
signals used by NPTL.
Michael Kerrisk
Add discussion of rt_sigtimedwait(2)

socket.2
Heinrich Schuchardt
SEE ALSO close(2)
The description mentions close(2). Hence it should also be
referenced in the SEE ALSO section.

syscall.2
Jann Horn
Add x32 ABI

umount.2
Eric W. Biederman
Document the effect of shared subtrees on umount(2)
Eric W. Biederman
Correct the description of MNT_DETACH
I recently realized that I had been reasoning improperly about
what umount(MNT_DETACH)
did based on an insufficient description
in the umount.2 man page, that matched my intuition but not the
implementation.

When there are no submounts, MNT_DETACH is essentially harmless to
applications. Where there are submounts, MNT_DETACH changes what
is visible to applications using the detach directories.
Michael Kerrisk
Move "shared mount + umount" text to a subsection in NOTES

aio_return.3
Stéphane Aulery
Document the return value on error
Reported by Alexander Holler <holler@ahsoftware.de>

clock.3
Stéphane Aulery

CLOCKS_PER_SEC = 1000000 is required by XSI, not POSIX
Debian Bug #728213 reported by Tanaka Akira <akr@fsij.org>

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728213

dlopen.3
Michael Kerrisk
Amend error in description of dlclose() behavior
The current text says that unloading depends on
whether
the reference count falls to zero *and no other libraries
are using symbols in this library*. That latter text has
been there since man-pages-1.29, but it seems rather dubious.
How could the implementation know whether other libraries
are still using symbols in this library? Furthermore, no
other implementation's man page mentions this point.
Seems best to drop this point.
Michael Kerrisk
Add some details for RTLD_DEFAULT
Michael Kerrisk
Add some details on RTLD_NEXT and preloading
Michael Kerrisk
RTLD_NEXT works for symbols generally, not just functions
The common use case is for functions, but RTLD_NEXT
also applies to variable symbols.
Michael Kerrisk
dlclose() recursively closes dependent libraries
Note that dlclose() recursively closes dependent libraries
that were loaded by dlopen()
Michael
Kerrisk
Rename second dlopen() argument from "flag" to "flags"
This is more consistent with other such arguments
Michael Kerrisk
Reformat text on RTLD_DEFAULT and RTLD_NEXT

  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The markings match glibc markings.

mq_open.3
  Torvald Riegel
    Add EINVAL error case for invalid name
      This behavior is implementation-defined
 by POSIX. If the name
      doesn't start with a '/', glibc returns EINVAL without attempting
      the syscall.

popen.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The marking matches glibc marking.

pthread_kill.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc pthread_kill() function gives an error on attempts
      to send either of the real-time signals used by NPTL.

pthread_sigmask.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc implementation silently ignores attempts to block the two
      real-time signals used by NPTL.

pthread_sigqueue.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc pthread_sigqueue() function gives an error on attempts
      to send either of the real-time signals used by NPTL.

resolver.3
  Stéphane Aulery [Jakub Wilk]
     Document missing options used by _res structure indicate defaults
      Missing options: RES_INSECURE1, RES_INSECURE2, RES_NOALIASES,
      USE_INET6, ROTATE, NOCHECKNAME, RES_KEEPTSIG, BLAST, USEBSTRING,
      NOIP6DOTINT, USE_EDNS0, SNGLKUP, SNGLKUPREOP, RES_USE_DNSSEC,
      NOTLDQUERY, DEFAULT

      Written from the glibc source and resolv.conf.5.

      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=527136
  Stéphane Aulery

RES_IGNTC is implemented

rint.3
Matt Turner
Document that halfway cases are rounded to even
Per IEEE-754 rounding rules.

The round(3) page describes the behavior of rint and nearbyint
in the halfway cases by saying:

These functions round x to the nearest integer, but round
halfway cases away from zero [...], instead of to the
nearest even integer like rint(3)

sigqueue.3
Michael Kerrisk
NOTES:
add "C library/kernel ABI differences" subheading
Michael Kerrisk
Clarify version info (mention rt_sigqueueinfo())

sigsetops.3
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc sigfillset() function excludes the two real-time
signals used by NPTL.

sigwait.3
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc sigwait() silently ignore attempts to wait for
signals used by NPTL.

xdr.3
Taisuke Yamada
Clarified incompatibility and correct usage of XDR API
See http://bugs.debian.org/628099

console_codes.4
Scot Doyle
Add Console Private CSI sequence 15
An undocumented escape sequence in drivers/tty/vt/vt.c brings the
previously accessed virtual terminal to the foreground.
mtk: Patch misattributed to Taisuke Yamada in Git commit
because of a muck up on my part.
Michael Kerrisk
Add kernel version number for CSI sequence 15

random.4
Michael Kerrisk
Fix permissions shown for the devices
These days, the devices are RW for everyone.

filesystems.5
Michael Kerrisk
Remove dubious claim about comparative performance of ext2
Perhaps it was the best filesystem performance-wise in
the 20th century, when that text was written. That probably
ceased to be true quite a long time ago, though.
Stéphane Aulery
Add cross references for ext filesystems
Stéphane Aulery
Specifies the scope of this list and its limits.

host.conf.5
hosts.5

resolv.conf.5
  Stéphane Aulery [Paul E Condon]
    Cross references of these pages.
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=298259

host.conf.5
  Stéphane Aulery
    Rework discussion of nospoof, spoofalert, spoof and RESOLV_SPOOF_CHECK
      The keywords and environment variables "nospoof", "spoofalert",
      "spoof" and RESOLV_SPOOF_CHECK were added to glibc 2.0.7 but
      never implemented

      Move descriptions to historical section and reorder it for clarity

      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=773443

hosts.5
  Stéphane
 Aulery [Vincent Lefevre]
    Mention 127.0.1.1 for FQDN and IPv6 examples
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=562890

proc.5
  Taisuke Yamada
    Document /proc/PID/status VmPin field
      See https://bugs.launchpad.net/bugs/1071746
  Michael Kerrisk
    Document (the obsolete) /proc/PID/seccomp
  Michael Kerrisk
    Replace description of 'uid_map' with a reference to user_namespaces(7)
      All of the information in proc(5) was also present in
      user_namespaces(7), but the latter was more detailed
      and up to date.
  Taisuke Yamada
    Fix SELinux /proc/pid/attr/current example
      Since the /proc/pid/attr API was added to the kernel, there
      have been a couple of changes to the SELinux handling of
      /proc/pid/attr/current. Fix the SELinux /proc/pid/attr/current
      example text to reflect these changes and note which kernel
      versions first included
 the changes.

securetty.5
  Stéphane Aulery [Nicolas FRANCOIS]
    Note that the pam_securetty module also uses this file
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528015

      This patch is a modified version of the one proposed without

parts specific to Debian.

boot.7
Michael Witten
Copy edit
While a lot of the changes are issues of presentation,
there are also issues of grammar and punctuation.
Michael Witten
Mention `systemd(1)' and its related `bootup(7)'
It's important that the reader receive contemporary information.

credentials.7
Michael Kerrisk
SEE ALSO: add pthreads(7)
Michael Kerrisk
Add reference to nptl(7)

feature_test_macros.7
Michael Kerrisk
Update discussion of _FORTIFY_SOURCE
Since the initial implementation a lot more checks were added.
Describe all the checks would be too verbose (and would
soon
fall out of date as more checks are added). So instead, describe
the kinds of checks that are done more generally.
Also a few other minor edits to the text.

hier.7
Stéphane Aulery
First patch of a series to achieve compliance with FHS 2.3
Stéphane Aulery
SGML and XML directories are separated in FHS 2.3
Stéphane Aulery
Add missing directories defined by FHS 2.3
Stéphane Aulery
Identify which directories are optional
Stéphane Aulery
Document /initrd, /lost+found and /sys
Ubuntu Bug #70094 reported by Brian Beck
https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/70094
Stéphane Aulery
Explain YP, which is not obvious

ipv6.7
Stéphane Aulery [David Madore]
SOL_IPV6 and other SOL_* options socket are not portable
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=472447

man-pages.7
  Michael Kerrisk [Bill Pemberton]

    Add indent(1) command that produces desired formatting for example code
  Stéphane Aulery
    Improve description of sections in accordance with intro pages

packet.7
  Michael Kerrisk
    Rework description of fanout algorithms as list
  Michael Kerrisk
    Remove mention of needing UID 0 to create packet socket
      The existing text makes no sense. The check is based
      purely on a capability check. (Kernel function
      net/packet/af_packet.c::packet_create()
  Michael Kerrisk
    Remove text about ancient glibc not defining SOL_PACKET
      This was fixed in glibc 2.1.1, which is a long while ago.
      And in any case, there is nothing special about this case;
      it's just one of those times when glibc lags.
  Michael Kerrisk
    Rework description of 'sockaddr_ll' fields as a list
  Michael Kerrisk
    Various minor edits

pthreads.7
  Michael Kerrisk
    Add references to nptl(7)

raw.7
   Michael Kerrisk
    Rephrase "Linux 2.2" language to "Linux 2.2 or later"
      The man page was written in the LInux 2.2 timeframe, and
      some phrasing was not future-proof.

signal.7
  Michael Kerrisk
    Note when Linux added realtime signals
  Michael Kerrisk
    Correct the range of realtime signals
  Michael Kerrisk
    Summarize 2.2 system call changes that resulted from larger signal sets
  Michael Kerrisk
    SEE ALSO: add nptl(7)

tcp.7
  Peter Adkins
    Document removal of TCP_SYNQ_HSIZE

Looking over the man page for 'tcp' I came across a reference to
tuning the 'TCP_SYNQ_HSIZE' parameter when increasing
'tcp_max_syn_backlog' above 1024. However, this static sizing was
removed back in Linux 2.6.20 in favor of dynamic scaling - as
part of commit 72a3effaf633bcae9034b7e176bdbd78d64a71db.

user_namespaces.7
Eric W. Biederman
Update the documentation to
reflect the fixes for negative groups
Files with access permissions such as rwx---rwx give fewer
permissions to their group then they do to everyone else. Which
means dropping groups with setgroups(0, NULL) actually grants a
process privileges.

The unprivileged setting of gid_map turned out not to be safe
after this change. Privileged setting of gid_map can be
interpreted as meaning yes it is ok to drop groups. [Eric
additionally noted: Setting of gid_map with privilege has been
clarified to mean that dropping groups is ok. This allows
existing programs that set gid_map with privilege to work
without changes. That is, newgidmap(1) continues to work
unchanged.]

To prevent this problem and future problems, user namespaces were
changed in such a way as to guarantee a user can not obtain
credentials without
privilege that they could not obtain without
the help of user namespaces.

This meant testing the effective user ID and not the filesystem
user ID, as setresuid(2) and setregid(2) allow setting any process
UID or GID (except the supplementary groups) to the effective ID.

Furthermore, to preserve in some form the useful applications
that have been setting gid_map without privilege, the file
/proc/[pid]/setgroups was added to allow disabling setgroups(2).
With setgroups(2) permanently disabled in a user namespace, it
again becomes safe to allow writes to gid_map without privilege.
Michael Kerrisk
Rework some text describing permission rules for updating map files
No (intentional) change to the facts, but this restructuring
should make the meaning easier to grasp.
Michael Kerrisk
Update kernel version associated with 5-line limit for
map files
As at Linux 3.18, the limit is still five lines, so mention the
more recent kernel version in the text.

Michael Kerrisk [Alban Crequy]
Handle /proc/PID/setgroups in the example program
Michael Kerrisk
Rework text describing restrictions on updating /proc/PID/setgroups
No (intentional) changes to factual description, but the
restructured text is hopefully easier to grasp.
Michael Kerrisk
Explain why the /proc/PID/setgroups file was added

ldconfig.8
Michael Kerrisk
Note use of /lib64 and /usr/lib64 on some 64-bit architectures

ld.so.8
Michael Kerrisk
Note the use of /lib64 and /usr/lib64 on some 64-bit architectures

========== Changes in man-pages-3.83 ==========

Released: 2015-04-19, Munich

New and changed links
---

newfstatat.2
Michael Kerrisk
New link to fstatat64.2

prlimit64.2
Michael Kerrisk
New link to getrlimit.2

Global changes

Various section 3 math pages
Michael Kerrisk
Note that these functions are also in POSIX.1-2001 and POSIX.1-2008

Changes to individual pages
---

getent.1
Robin H. Johnson
Document options
The options to getent are now documented, after being around for
nearly a decade without changes.
Michael Kerrisk
Document help and version options

fallocate.2
Michael Kerrisk
Fix kernel version number for FALLOC_FL_ZERO_RANGE
FALLOC_FL_ZERO_RANGE was added in 3.15, not 3.14.
Michael Kerrisk
Note that SMB3 added FALLOC_FL_ZERO_RANGE support in Linux
3.17

getrlimit.2

Michael Kerrisk
Note that the underlying system call for prlimit() is prlimit64()
Michael Kerrisk
Remove "_FILE_OFFSET_BITS == 64" from prlimit() FTM requirements
"_FILE_OFFSET_BITS == 64" is not needed to get the prlimit()
declaration.

ioctl_list.2
Nikos Mavrogiannopoulos
SIOCADDRT accepts in6_rtmsg in INET6 protocol
Heinrich Schuchardt
TFD_IOC_SET_TICKS
timerfd_create.2 mentions TFD_IOC_SET_TICKS. We should add it to
ioctl_list.2, too.

llseek.2
Michael Kerrisk
Advise reader to use lseek(2) instead
Michael Kerrisk
llseek() exists on 32-bit platforms to support seeking to large offsets

madvise.2
David Rientjes
Specify MADV_REMOVE returns EINVAL for hugetlbfs
madvise(2) actually returns with error EINVAL for MADV_REMOVE
when used for hugetlb VMAs, not EOPNOTSUPP, and this has been
the case since MADV_REMOVE
was introduced in commit f6b3ec238d12
("madvise(MADV_REMOVE): remove pages from tmpfs shm backing
store"). Specify the exact behavior.
Michael Kerrisk
SEE ALSO: add posix_madvise(2)

poll.2
Michael Kerrisk [Andreas Baak]
SEE ALSO: add epoll(7)

posix_fadvise.2
Michael Kerrisk
Add "C library/kernel ABI differences" subsection

pread.2
Michael Kerrisk
Add "C library/kernel ABI differences" subsection

seccomp.2
Michael Kerrisk [Pierre Chifflier, Kees Cook]
Note that seccomp_data is read-only

stat.2
  Michael Kerrisk
    Add some details on various "stat" versions
      Three versions of "stat" appeared on 32-bit systems,
      dealing with structures of different (increasing) sizes.
      Explain some of the details, and also note that the
      situation is simpler on modern 64-bit architectures.
  Michael Kerrisk
    Add mention of newfstatat()

 The underlying system call for fstatat() is newfstatat()
      on some architectures.

symlink.2
  Michael Kerrisk [Jonny Grant]
    ERRORS: add linkpath=="" case for ENOENT

syscalls.2
  Michael Kerrisk
    Remove prlimit()
      There really is only the prlimit64() system call.
  Michael Kerrisk
    Add some details about the "multiple versions of system calls"
      The multiple-system-call-version phenomenon is particularly a
      feature of older 32-bit platforms. Hint at that fact in the text.

timerfd_create.2
  Cyrill Gorcunov [Michael Kerrisk]
    Document TFD_IOC_SET_TICKS ioctl() operation
  Michael Kerrisk
    Add some details to C library/kernel ABI differences

unshare.2
  Michael Kerrisk [Fabien Pichot]
    Remove mention of "System V" from discussion of CLONE_NEWIPC
      These days, CLONE_NEWIPC also affects POSIX message queues.

asprintf.3
  Zeng Linggang
    ATTRIBUTES: Note functions that
 are thread-safe

carg.3
  Michael Kerrisk
    Add introductory sentence explaining what these functions calculate

ccos.3

Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ccosh.3
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

cexp.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

clock.3
Ma Shimiao
ATTRIBUTES: Note functions that is thread-safe

clog.3
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

csin.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

csinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions
calculate

csqrt.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Simplify description of what these functions calculate

ctan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ctanh.3
Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ctime.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

exec.3
Michael Kerrisk
SYNOPSIS: Clarify calling signature for execl() and execlp()
Michael Kerrisk [Andreas Baak]
Correct prototype for execle()
Make the prototype shown into correct C.

ftw.3
Michael Kerrisk [Felix Sedlmeier]
ftw() and nftw() differ for the non-stat-able symlink case
The POSIX specification of ftw() says
that an un-stat-able
symlink may yield either FTW_NS or FTW_SL. The specification
of nftw() does not carry this statement.
Michael Kerrisk
CONFORMING TO: add POSIX.1-2008
Michael Kerrisk
Update POSIX version references in NOTES

getcwd.3
Jann Horn [Michael Kerrisk]
Note behavior for unreachable current working directory
Michael Kerrisk
Add ENOMEM error

gethostbyname.3
Michael Kerrisk [Jonny Grant]
Clarify that NO_ADDRESS and NO_DATA are synonyms
Michael Kerrisk
Add some detail for NO_DATA
Text consistent with POSIX and FreeBSD's gethostbyname() man page.
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

getnetent.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

get_nprocs_conf.3
Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

getutent.3
Zeng Linggang
ATTRIBUTES: Note functions that
aren't thread-safe

glob.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

insque.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

login.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

lseek64.3
Michael Kerrisk
Clarify details with respect to 32-bit and 64-bit systems

malloc.3
Michael Kerrisk
Add ENOMEM error

mbsnrtowcs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

mbsrtowcs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

mq_notify.3
Michael Kerrisk
Add "C library/kernel ABI differences" subsection

mq_open.3
Michael Kerrisk [Fabien Pichot]
NOTES: explain differences from the underlying system call
The check for the slash at the start of a pathname is done in glibc

openpty.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

perror.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

posix_memalign.3
  Zeng Linggang
    ATTRIBUTES: Note functions that aren't thread-safe

printf.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe
  Walter Harms [Michael Kerrisk]
    Simplify the example code

qsort.3
  Michael Kerrisk [Rob Landley]
    alphasort() and versionsort() are not suitable for 'compar'
      In glibc 2.10, the prototypes of alphasort() and versionsort()
      were changed so that the arguments switched from 'const void *' to
      'const struct dirent **', to match the POSIX.1-2008 specification
      of alphasort(). As such, compiler warnings will result if
      these functions are used as the arguments of qsort().

        warning: passing argument 4 of 'qsort' from incompatible
        pointer type
        expected '__compar_fn_t' but argument is of type
        'int (*)(const struct dirent
**, const struct dirent **)'

      Therefore, remove the ancient NOTES text suggesting that
      alphasort() and versionsort() can be used as suitable
      'compar' arguments for qsort().

realpath.3
  Michael Kerrisk [Jon Grant]
    Add ENOMEM error

scandir.3
  Michael Kerrisk
    glibc 2.10 changed the argument types for alphasort() and versionsort()
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

scanf.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

setnetgrent.3

Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

significand.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

strcasecmp.3
Michael Kerrisk [Jonny Grant]
Clarify that strcasecmp() does a byte-wise comparison
Michael Kerrisk
CONFORMING TO: add POSIX.1-2008

unlocked_stdio.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

updwtmp.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

wcrtomb.3

ATTRIBUTES: Note function that isn't thread-safe

wcsnrtombs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

wcsrtombs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

wordexp.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

wprintf.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

proc.5
Michael Kerrisk
Describe "mnt_id" field of /proc/PID/fdinfo
Michael Kerrisk
Note that abstract sockets are included in /proc/net/unix
Michael Kerrisk
Update description /proc/sys/unix 'Type' field

The existing text was very crufty. UNIX domain sockets
support more than SOCK_STREAM for a _very_ long time now.
Michael Kerrisk
Add some detail to /proc/PID/timers
Michael Kerrisk [Vlastimil Babka]

Enhance discussion of /proc/PID/status 'VmSwap' field

epoll.7
Michael Kerrisk
SEE ALSO: add poll(2) and select(2)

icmp.7
YOSHIFUJI Hideaki/
Document net.ipv4.ping_group_range knob

nptl.7
Michael Kerrisk
Add reference to timer_create(2)

========== Changes in man-pages-4.00 ==========

Released: 2015-05-07, Munich

New and rewritten pages
---

get_phys_pages.3
  William Woodruff
    Document get_phys_pages() and get_avphys_pages()

loop.4
  Urs Thuermann, Michael Kerrisk
    New page documenting the loop device

xattr.7

 Andreas Gruenbacher
    Import attr(5) man page from the 'attr' project
      After discussions with Andreas Gruenbacher, it makes sense to
      move this page into man-pages, since it mostly relates to
      kernel details. Since this is an overview page,
      we'll move it to Section 7.
  Michael Kerrisk
     Rename page
      "xattr" is a more meaningful name than "attr" (it resonates
      with the names of the system calls), so as long as we are
      moving the page to a new section, we'll change the name as well,
      and retain an acl(5) link so that old references remain valid.

Newly documented interfaces in existing pages
---

mmap.2
  Michael Kerrisk [Andi Kleen]
    Document MAP_HUGE_2MB, MAP_HUGE_1GB, and MAP_HUGE_SHIFT

shmget.2
  Michael Kerrisk [Andi Kleen]
    Document SHM_HUGE_2MB, SHM_HUGE_1GB, and SHM_HUGE_SHIFT

resolver.3
  Michael Kerrisk [Jonathan
 Nieder]
    Add descriptions of some other resolver functions
      Add res_ninit(), res_nquery(), res_nsearch(),
      and res_nquerydomain(), res_nmkquery(), res_nsend().

tty_ioctl.4
  Frédéric Maria [Stephane Fillod, Andreas Heiduk]
    Document TIOCMIWAIT and TIOCGICOUNT
  Michael Kerrisk
    Document TIOCGEXCL

Michael Kerrisk
Document TIOGCPKT
Michael Kerrisk
Document TIOCSPTLCK
Michael Kerrisk
Document TIOCGPTLCK

New and changed links

CMSG_DATA.3
Michael Kerrisk
New link to cmsg(3)

CMSG_LEN.3
Michael Kerrisk
New link to cmsg(3)

dprintf.3
Michael Kerrisk
Convert to a link to printf.3

get_avphys_pages.3
William Woodruff
New link to new get_phys_pages.3 page

res_ninit.3
res_nmkquery.3
res_nquery.3
res_nquerydomain.3
res_nsearch.3
res_nsend.3
Michael Kerrisk
New links to resolver(3) man page

loop-control.4
Michael Kerrisk
New link to loop.4

attr.5
Michael Kerrisk
New link to xattr(7)

Global changes
---

chown.2
execve.2
prctl.2
truncate.2
proc.5
capabilities.7
ld.so.8
  Michael Kerrisk
    Tighter wording: 'mode bit' rather than 'permission bit'
      For sticky, set-UID, and set-GID mode bits (as used in POSIX).

Changes to individual pages
----

add_key.2
keyctl.2
request_key.2
  Michael Kerrisk
    SEE ALSO: add keyrings(7)

add_key.2
request_key.2
  Michael Kerrisk
    SEE ALSO: add keyctl(3)

epoll_ctl.2
  Michael Kerrisk
    After EPOLLHUP, EOF will be seen only after all data has been consumed

epoll_wait.2
  Michael Kerrisk
    Clarify that signal mask treatment in epoll_pwait() is per-thread
      s/sigprocmask()/pthread_sigmask()/

fcntl.2
  Michael Kerrisk [Vegard Nossum]
    Note an F_SETSIG corner case

get_mempolicy.2, set_mempolicy
  Brice Goglin
    Policy is per thread, not
 per process

getxattr.2
listxattr.2
removexattr.2
setxattr.2

capabilities.7
  Michael Kerrisk
    Adjust "attr(5)" references to "xattr(7)"

ioctl.2
  Michael Kerrisk
    SEE ALSO: add console_ioctl(2) and tty_ioctl(2)

listxattr.2
xattr.7
  Michael Kerrisk
    Describe listxattr(2) E2BIG error and document it as a BUG

mkdir.2
  Michael Kerrisk
    Wording fixes + point reader at stat(2) for explanation of file mode
  Michael Kerrisk [Andreas Grünbacher]
    Further tweaks to text on S_ISVTX and 'mode' argument

mknod.2
  Michael Kerrisk
    Rewordings + point reader at stat(2) for details of mode bits

mmap.2
  Michael Kerrisk
    Remove text that implies that munmap() syncs MAP_SHARED mapping to file
      The existing text in this page:

          MAP_SHARED Share this mapping.   Updates to the mapping
                are visible to other processes that map this
                file, and are
carried through to the underly
                ing file. The file may not actually be
                updated until msync(2) or munmap() is called.

      implies that munmap() will sync the mapping to the underlying
      file. POSIX doesn't require this, and some light reading of the
      code and some light testing (fsync() after munmap() of a large
      file) also indicates that Linux doesn't do this.

msync.2
  Michael Kerrisk
    Rework text of DESCRIPTION
      Rewrite the text somewhat, for easier comprehension.
      No (intentional) changes to factual content

nfsservctl.2
  Michael Kerrisk [J. Bruce Fields]

Note that nfsservctl() was replaced by files in nfsd filesystem

open.2
Michael Kerrisk [Andreas Gruenbacher]
open() honors the S_ISVTX, S_ISUID, and S_ISGID bits in 'mode'
Michael Kerrisk
Tighten wording: use 'mode bit' rather than 'permission bit'
Michael
Kerrisk [NeilBrown]
BUGS: O_CREAT | O_DIRECTORY succeeds if pathname does not exist

poll.2
Michael Kerrisk [Ian Pilcher]
Clarify that signal mask treatment in ppoll() is per-thread
s/sigprocmask()/pthread_sigmask()/
Michael Kerrisk [Sam Varshavchik]
After POLLHUP, EOF will be seen only after all data has been consumed
Michael Kerrisk
Make it clearer which bits are ignored in 'events'

prctl.2
Michael Kerrisk [David Wilcox, Filipe Brandenburger]
Note that "parent" for purposes of PR_SET_DEATHSIG is a *thread*
See https://bugzilla.kernel.org/show_bug.cgi?id=43300

sendfile.2
Michael Kerrisk [Jason Newton]
Note that sendfile does not support O_APPEND for 'out_fd'
See https://bugzilla.kernel.org/show_bug.cgi?id=82841
Michael Kerrisk [Gregor Jasny]
RETURN VALUE: note the possibility of "short sends"
See https://bugzilla.kernel.org/show_bug.cgi?id=97491
Michael Kerrisk [Askar Safin]
Clarify text on 'out_fd' and regular files in Linux 2.4
See https://bugzilla.kernel.org/show_bug.cgi?id=86001

shutdown.2
Michael Kerrisk [Stéphane Aulery]
BUGS: UNIX domain sockets now detect invalid 'how' values
Bug fixed in Linux 3.7.
See https://bugzilla.kernel.org/show_bug.cgi?id=47111

sigaction.2
Michael Kerrisk
Refer the reader to fcntl(2) F_SETSIG for further details on si_fd

stat.2
Jann Horn

Add note about stat() being racy
Andreas Gruenbacher
Improve description of some mode constants
Michael Kerrisk [Andreas Grünbacher]
Remove excessive leading zeros on some constants
Michael Kerrisk
Add text on POSIX terms "file mode bits" and "file permission bits"
Recent changes to various pages employ this distinction.
Michael Kerrisk
Tighten wording: use 'mode bit' rather than 'permission bit'
According
to POSIX, the 9 UGO*RWX bits are permissions, and
'mode' is used to refer to collectively to those bits plus sticky,
set-UID, and set_GID bits.

syslog.2
Michael Kerrisk
SEE ALSO: add dmesg(1)

umask.2
open.2
mknod.2
mkdir.2
Andreas Gruenbacher
Explain what default ACLs do
Explain the effect that default ACLs have (instead of the umask)
in umask.2. Mention that default ACLs can have an affect in
open.2, mknod.2, and mkdir.2.

unshare.2
Michael Kerrisk [Florian Weimer]
Give the reader a hint that unshare() works on processes or threads
See https://bugzilla.kernel.org/show_bug.cgi?id=59281

atexit.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

bsearch.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

cmsg.3
Michael Kerrisk [Christopher Head]
Fix error in SCM_RIGHTS code sample
Remove erroneous second
initialization of msg.msg_controllen
in the example code for SCM_RIGHTS.

See https://bugzilla.kernel.org/show_bug.cgi?id=15952

CPU_SET.3
  Chris Metcalf
    Clarify language about "available" cpus
      The CPU_SET.3 man page uses the adjective "available" when
      explaining what the argument to CPU_SET() means. This is
      confusing, since "available" isn't well-defined. The kernel
      has a set of adjectives (possible, present, online, and active)
      that qualify cpus, but normally none of these are what the
      cpu_set_t bit index means: it's just "which cpu", using the
      kernel's internal numbering system, even if that cpu isn't
      possible or present.

      This change removes the word "available" and adds a sentence
      warning that cpu sets may not be contiguous due to dynamic
      cpu hotplug, etc.

err.3
  Zeng Linggang
    ATTRIBUTES: Note functions
 that are thread-safe

ftw.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

gethostbyname.3
  Carlos O'Donell
    NSS plugins searched first
  Carlos O'Donell
    "order" is obsolete

on_exit.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

printf.3
  Michael Kerrisk [Egmont Koblinger]
    Merge dprintf() and vdprintf() discussion into this page
  Michael Kerrisk
    SEE ALSO: add puts(3)
  Michael Kerrisk
    Move return value discussion to proper RETURN VALUE section

putpwent.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

qsort.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

regex.3
  Michael Kerrisk [Laurence Gonsalves]
    Fix error in description of 'cflags'
      'cflags' is a bit mask of *zero* (not one) or more flags.

resolver.3
  Stéphane Aulery
    Add info about RES_INSECURE1 and RES_INSECURE2 option in debug mode

scanf.3
  Joern Heissler
    Improve description of %n specifier

setjmp.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

setlocale.3
   Zeng Linggang
    ATTRIBUTES: Note function that isn't thread-safe

  Zeng Linggang
    ATTRIBUTES: Note function that isn't thread-safe

strsignal.3
  Zeng Linggang
    ATTRIBUTES: Note function that isn't thread-safe

sysconf.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

undocumented.3
  William Woodruff
    Remove documented functions

tty_ioctl.4
  Michael Kerrisk [Denis Du]
    Fix error in code example

proc.5
  Michael Kerrisk [Cameron Norman, Vasiliy Kulikov]
    Document /proc mount options
      Document the 'hidepid' and 'gid' mount options that were added in
      Linux 3.3. See https://bugzilla.kernel.org/show_bug.cgi?id=90641
      Based on text by Vasiliy Kulikov in
      Documentation/filesystems/proc.txt.
  Michael Kerrisk [Kirill A. Shutemov]

Improve
description of /proc/PID/status
Guillem Jover
Document /proc/PID/exe behaviour on unlinked pathnames
Michael Kerrisk [Weijie Yang]
Document /proc/PID/status VmPMD

resolv.conf.5
Stéphane Aulery [Thomas Hood]
Document use-vc option added to glibc 2.14
Fix Ubuntu bug #1110781:
https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/1110781
Stéphane Aulery [Thomas Hood]
Document RES_SNGLKUPREOP
Fix Ubuntu bug #1110781:
https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/1110781

tzfile.5
Sam Varshavchik
Add various details on version 2 format

aio.7
Michael Kerrisk
Add details and update URL for OLS 2003 paper on AIO

bootparam.7
Michael Kerrisk [Alain Kalker]
Update discussion of 'debug' option
See https://bugzilla.kernel.org/show_bug.cgi?id=97161
Michael Kerrisk
Summary of multiple changes: remove cruft from this page.

Much of the detail on hardware specifics in this page dates
from the 20th century. (The last major update to this page was in
man-pages-1.14!) It's hugely out of date now (many of these
devices disappeared from the kernel years ago.) So, I've taken
a large scythe to the page to remove anything that looks
seriously dated. In the process, the page has shrunk to less
than 50% of its previous size.
Michael Kerrisk
Remove "buff=" details
This seems to have gone away in Linux 2.2.
Michael Kerrisk
Remove crufty "Mouse drivers" options
Michael Kerrisk
Remove crufty "General non-device-specific boot arguments" options
Michael Kerrisk
Remove crufty "Hard disks" options

Michael Kerrisk
Remove crufty "mem=" details
Michael Kerrisk
Remove crufty details on IBM MCA bus devices
Michael Kerrisk
Remove 'swap=" details

This seems to have gone away in Linux 2.2,
Michael Kerrisk
Remove crufty floppy disk driver options
In the specific case of floppy drives: the drivers still
exist, but it's been a while since most of saw these devices
in the wild. So, just refer the reader to the kernel source
file for details. (The detail in this man page was after all
originally drawn from that file.)
Remove crufty "ISDN drivers" options
Michael Kerrisk
Remove crufty "line printer driver" options
Michael Kerrisk
Remove crufty "Serial port drivers" options
Michael Kerrisk
Remove crufty reference to CONFIG_BUGi386
That option disappeared in Linux 2.4.
Michael Kerrisk
Remove crufty text
"bootsetups array" dates from Linux 2.0.
Michael Kerrisk
Remove crufty "Video hardware" options
Michael Kerrisk
Remove crufty SCSI device driver options

fanotify.7
Michael Kerrisk [Heinrich Schuchardt]
Since Linux 3.19, fallocate(2) generates FAN_MODIFY events

inotify.7
Michael Kerrisk [Heinrich Schuchardt]
Since Linux 3.19, fallocate(2) generates IN_MODIFY events

ip.7
Michael Kerrisk
Explain how IP_ADD_MEMBERSHIP determines its argument type
Michael Kerrisk [Jiri Pirko, Magnus REFTEL]
Clarify details of the IP_MULTICAST_IF socket option
Michael Kerrisk [Advait Dixi]
Remove dubious text that says that SO_PRIORITY sets IP TOS
See https://bugzilla.kernel.org/show_bug.cgi?id=35852
Michael Kerrisk

Relocate misplaced text describing ENOPROTOOPT error

packet.7
Graham Shaw
Add sll_protocol to list of required fields for outbound packets

pthreads.7
Michael Kerrisk [KOSAKI Motohiro]
Using thread IDs whose lifetime has expired gives undefined behavior
See https://bugzilla.kernel.org/show_bug.cgi?id=53061

raw.7
Michael Kerrisk
[Tetsuo Handa]
For incoming datagrams, sin_port is set to zero
Michael Kerrisk
Mention sendto(), recvfrom(), and so on when discussing address format
This gives the reader a little context for the following
discussion of 'sin_port'.
Michael Kerrisk
Remove crufty reference to <netinet/in.h>
Michael Kerrisk
Replace reference to RFC 1700 with pointer to IANA protocol number list

signal.7
Michael Kerrisk [Steinar H. Gunderson]
Clarify that I/O operations on disks are not interrupted by signals
See https://bugzilla.kernel.org/show_bug.cgi?id=97721

unix.7
Michael Kerrisk [Christophe Lohr]
Remove mention of UNIX_PATH_MAX
This kernel constant is not exposed to user space.
Michael Kerrisk
Note the 108 bytes for sun_path is how things are done on Linux
And refer the reader to NOTES for discussion of portability.

xattr.7
Michael Kerrisk

Document EA limits for Btrfs
Michael Kerrisk
Document VFS-imposed limits on EAs
VFS imposes a 255-byte limit on EA names, and a 64kB limit on
EA values.
Michael Kerrisk
The ext[234] block limitation applies to sum of all EAs
It is not a per-EA limit.

Michael Kerrisk
Clarify permissions required to work with 'user' EAs
Michael Kerrisk
ext2 and ext3 no longer need mounting with 'user_xattr' for user EAs
Michael Kerrisk
Add various relevant pages to SEE ALSO
Michael Kerrisk
Add CONFORMING TO section
Michael Kerrisk
Modify headings to man-pages norms
Michael Kerrisk
Btrfs also supports extended attributes
Michael Kerrisk
File capabilities are implemented using *security* attributes
Not *system* attributes
Michael Kerrisk
Describe limit on EA values for JFS, XFS, and Reiserfs
Michael Kerrisk
Explicitly mention some
of the xattr system calls in DESCRIPTION
Naming the system calls helps to orient the reader

nscd.8
Michael Kerrisk
Add mention of 'services' and 'netgroup' databases
This makes the page consistent with nscd.conf(5).

========== Changes in man-pages-4.01 ==========

Released: 2015-07-23, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

bpf.2
  Alexei Starovoitov, Michael Kerrisk [Daniel Borkmann]
    New page documenting bpf(2)

__ppc_get_timebase.3
  Tulio Magno Quites Machado Filho
    New page documenting __ppc_get_timebase() and __ppc_get_timebase_freq()
      Glibc 2.16 was released with a new function for the Power
      architecture that can read its Time Base Register.
      Glibc 2.17 adds a function to read the frequency at which the Time
      Base Register of Power processors is updated.

queue.3
  Michael Kerrisk [David Leppik, Doug Klima]
    Reimport from latest FreeBSD page
      Long ago,
 Doug Klima noted that many macros were not
      documented in the queue(3) page. Fix by reimporting from
      latest [1] FreeBSD man page.

      [1] Revision 263142, Modified Fri Mar 14 03:07:51 2014 UTC

      This also fixes https://sourceware.org/bugzilla/show_bug.cgi?id=1506

      This time, I'll learn from past mistakes and not convert
      from 'mdoc' to 'man' macros.
  Michael Kerrisk
    Use subsections in DESCRIPTION
  Michael Kerrisk
    Remove SEE ALSO reference to nonexistent tree(3)
  Michael Kerrisk
    Use real hyphens in code samples
  Michael Kerrisk
    Comment out text for functions not in glibc
  Michael Kerrisk
    Replace HISTORY with CONFORMING TO

Newly documented interfaces in existing pages
---

rename.2
  Michael Kerrisk [Miklos Szeredi]
    Document RENAME_WHITEOUT
      Heavily based on text by Miklos Szeredi.

New and changed links

__ppc_get_timebase_freq.3
   Tulio Magno Quites Machado Filho
      New link to new __ppc_get_timebase(3) page

Global changes

Various pages
  Michael Kerrisk [Andries E. Brouwer]
    Remove "ABI" from "C library/kernel ABI differences" subheadings
      The "ABI" doesn't really convey anything significant in
      the title. These subsections are about describing differences
      between the kernel and (g)libc interfaces.

Changes to individual pages
---

intro.1
  Michael Kerrisk [Andries E. Brouwer]
    Drop intro paragraph on '$?' shell variable
      As Andries notes, this piece of text is rather out of place in
      a page that was intended to provide a tutorial introduction for
      beginners logging in on a Linux system.

locale.1
  Marko Myllynen
    A minor output format clarification
      A minor clarification for the locale output format which was
      brought up at
      https://sourceware.org/bugzilla/show_bug.cgi?id=18516.

      For reference, see
      https://sourceware.org/bugzilla/show_bug.cgi?id=18516
      http://pubs.opengroup.org/onlinepubs/9699919799/utilities/locale.html

    Add CONFORMING TO section

capget.2
  Julian Orth
    Clarify that hdrp->pid==0 is equivalent gettid() not getpid()

chroot.2
  Jann Horn
    chroot() is not intended for security; document attack
      It is unfortunate that this discourages this use of chroot(2)
      without pointing out alternative solutions - for example,

OpenSSH and vsftpd both still rely on chroot(2) for security.

Bind mounts should theoretically be usable as a replacement, but
currently, they have a similar problem (CVE-2015-2925) that hasn't
been fixed in ~6 months, so I'd rather not add it to the manpage
as a solution before a fix lands.

clock_getres.2
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

eventfd.2
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

execve.2
  Michael Kerrisk
    Elaborate on envp/argv
 as NULL behavior

_exit.2
  Michael Kerrisk
    Open stdio frames are not flushed, temporary files are deleted
      Many years ago, text was added to the page saying that it is
      implementation-dependent whether stdio streams are flushed and
      whether temporary are removed. In part, this change appears to
      be because POSIX.1-2001 added text related to this point.
      However, that seems to have been an error in POSIX, and the
      text was subsequently removed for POSIX.1-2008. See
      https://collaboration.opengroup.org/austin/interps/documents/9984/AI-085.txt
      Austin Group Interpretation reference 1003.1-2001 #085

fallocate.2
  Namjae Jeon [Michael Kerrisk]
    Document FALLOC_FL_INSERT_RANGE
  Michael Kerrisk
    Since Linux 4.2, ext4 supports FALLOC_FL_INSERT_RANGE

fcntl.2
  Michael Kerrisk
    OFD locks are proposed for inclusion in the next POSIX revision

getrlimit.2
  Zeng
 Linggang
    ATTRIBUTES: Note functions that are thread-safe

getrusage.2

Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

gettid.2
Michael Kerrisk
Note that for a thread group leader, gettid() == getpid()

iopl.2
Michael Kerrisk
Remove some historical libc5 and glibc 1 details
These details are ancient, and long ago ceased to be relevant.

ioprio_set.2
Michael Kerrisk [Jens Axboe]
Document meaning of ioprio==0

mlock.2
Michael Kerrisk [Mehdi Aqadjani Memar]
Document another ENOMEM error case
ENOMEM can occur if locking/unlocking in the middle of a region
would increase the number of VMAs beyond the system limit (64k).

mmap.2
Michal Hocko [Eric B Munson]
Clarify MAP_POPULATE
David Rientjes has noticed that MAP_POPULATE wording might promise
much more than the kernel actually provides and intends to provide.
The primary usage
of the flag is to pre-fault the range. There is
no guarantee that no major faults will happen later on. The pages
might have been reclaimed by the time the process tries to access
them.
Michal Hocko [Eric B Munson]
Clarify MAP_LOCKED semantics
MAP_LOCKED had a subtly different semantic from mmap(2)+mlock(2)
since it has been introduced.
mlock(2) fails if the memory range cannot get populated to
guarantee that no future major faults will happen on the range.
mmap(MAP_LOCKED) on the other hand silently succeeds even if
the range was populated only partially.

Fixing this subtle difference in the kernel is rather awkward
because the memory population happens after mm locks have been
dropped and so the cleanup before returning failure (munlock)
could operate on something else than the originally mapped area.

E.g. speculative userspace page fault handler catching SEGV and
doing mmap(fault_addr, MAP_FIXED|MAP_LOCKED) might discard portion
of a racing mmap and lead to lost data. Although it is not clear
whether such a usage would be valid, mmap page doesn't explicitly
describe requirements for threaded applications so we cannot
exclude this possibility.

This patch makes the semantic of MAP_LOCKED explicit and suggests
using mmap + mlock as the only way to guarantee no later major
page faults.

Michael Kerrisk

ERRORS: point out that ENOMEM can occur even for munmap()

mprotect.2

Michael Kerrisk

Note ENOMEM error that can occur when we reach limit on maximum VMAs

open.2
read.2
write.2

Michael Kerrisk [Mike Hayward]

Clarify that O_NONBLOCK is a no-op for regular files and block devices

perf_event_open.2

Vince Weaver [Joerg Roedel]

Exclude_host/exclude_guest
clarification

This patch relates to the exclude_host and exclude_guest bits added
by the following commit:

exclude_host, exclude_guest; Linux 3.2
commit a240f76165e6255384d4bdb8139895fac7988799
Author: Joerg Roedel <joerg.roedel@amd.com>
Date: Wed Oct 5 14:01:16 2011 +0200

perf, core: Introduce attrs to count in either host or guest mode

The updated manpage text clarifies that the "exclude_host" and
"exclude_guest" perf_event_open() attr bits only apply in the
context of a KVM environment and are currently x86 only.

Vince Weaver

Document PERF_SAMPLE_REGS_INTR

This patch relates to the addition of PERF_SAMPLE_REGS_INTR
support added in the following commit:

perf_sample_regs_intr; Linux 3.19
commit 60e2364e60e86e81bc6377f49779779e6120977f

Author: Stephane Eranian <eranian@google.com>

perf: Add ability to sample machine state on interrupt

The primary difference between PERF_SAMPLE_REGS_INTR and the
existing PERF_SAMPLE_REGS_USER is that the new support will
return kernel register values. Also if precise_ip is
set higher than 0 then the PEBS register state will be returned
rather than the saved interrupt state.

This patch incorporates feedback from Stephane Eranian and
Andi Kleen.

prctl.2
seccomp.2
  Michael Kerrisk
    Clarify that SECCOMP_SET_MODE_STRICT disallows exit_group(2)
      These days, glibc implements _exit() as a wrapper around
      exit_group(2). (When seccomp was originally introduced, this was
      not the case.) Give the reader a clue that, despite what glibc is
      doing, what SECCOMP_SET_MODE_STRICT permits is the true _exit(2)
      system call,
 and not exit_group(2).

pread.2
read.2
readv.2
sendfile.2
write.2
  Michael Kerrisk
    Clarify that Linux limits transfers to a maximum of 0x7ffff000 bytes
      See https://bugs.debian.org/629994 and
      https://bugs.debian.org/630029.

pread.2
  Michael Kerrisk
    Rewrite RETURN VALUE section
      (Also drop the text on pwrite() returning zero; that seems bogus.)

ptrace.2
  Michael Kerrisk [Vegard Nossum]
    PTRACE_O_TRACEEXIT clarification

readv.2
  Michael Kerrisk
    Remove BUGS heading
      The text on mixing I/O syscalls and stdio is a general point
      of behavior. It's not a bug as such.

recv.2
send.2
  Michael Kerrisk
    Explain some subtleties of MSG_DONTWAIT versus O_NONBLOCK

rename.2
  Michael Kerrisk
  Michael Kerrisk
    Note that RENAME_NOREPLACE can't be employed with RENAME_EXCHANGE

sched_setaffinity.2
  Michael Kerrisk
    Add an example program
  Michael Kerrisk [Florian Weimer]
     Explain how to deal with 1024-CPU limitation of glibc's cpu_set_t type
  Michael Kerrisk
    Mention the use of the 'isolcpus' kernel boot option

sched_setattr.2
  Julian Orth
    Remove a const attribute
      The attr argument of sched_setattr was documented as const but the
      kernel will modify the size field of this struct if it contains an
      invalid value. See the documentation of the size field for details.

seccomp.2
  Michael Kerrisk
    SEE ALSO: add bpf(2)

send.2
  Michael Kerrisk
    Expand on subtleties of MSG_NOSIGNAL versus ignoring SIGPIPE

sigaltstack.2
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

socket.2
  Stephan Mueller
    Update documentation reference for AF_ALG

truncate.2
  Michael Kerrisk
    ERRORS: ftruncate() can fail if the file descriptor is not writable

utimensat.2
  Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

After research, We think utimensat() and futimens() are thread-safe.
But, there are not markings of utimensat() and futimens() in glibc
document.

File capabilities also trigger AT_SECURE
Michael Kerrisk
(Briefly) document AT_HWCAP2

getgrent_r.3
Zeng Linggang
ATTRIBUTES: Note functions that are/aren't thread-safe

gethostbyname.3
Michael Kerrisk [Laszlo Ersek]
Remove mention of IPv6 addresses, which are not supported
As reported by Laszlo Ersek:

gethostbyname(3) fails to resolve the IPv6 address "::1",
but the manual page says: "If name is an IPv4 or IPv6 address,
no lookup is performed and gethostbyname() simply copies name
into the h_name field [...]".

Debian bug report:
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455762

glibc bug
report:
http://sourceware.org/bugzilla/show_bug.cgi?id=5479

SUSv3 link for gethostbyname(3):
http://www.opengroup.org/onlinepubs/000095399/functions/gethostbyname.html

It seems that the glibc behavior is conformant, and the manual
page is in error.

  Marko Myllynen
    Document strfmon_l(3)
      Describe strfmon_l(3).

      http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html
  Marko Myllynen
    Fix CONFORMING TO

AFAICS strfmon(3) is now defined in POSIX and the glibc
implementation is as specified there.

http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html
Marko Myllynen
Rewrite the example
I think the example is more accurate when we use the exact
locale names and also the Euro sign where appropriate.

xcrypt.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

xdr.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

console_codes.4
Scot Doyle [Pavel
Machek, Michael Kerrisk]
Add CSI sequence for cursor blink interval
Add a Console Private CSI sequence to specify the current
console's cursor blink interval. The interval is specified
as a number of milliseconds until the next cursor display
state toggle, from 50 to 65535.

null.4
Michael Kerrisk
Note that reads from /dev/zero are interruptible since Linux 2.6.31

core.5
Michael Kerrisk
Mention 'coredump_filter' boot option

host.conf.5
Michael Kerrisk
Wording fix: s/resolv+/the resolver library/
The term "resolv+" seems to be historical cruft.

hosts.equiv.5
Carlos O'Donell
Fix format, clarify IdM needs, and provide examples.
In some recent work with a Red Hat customer I had the opportunity
to discuss the fine nuances of the ruserok() function and related
API which are used to implement rlogin and rsh.

It came to my

attention after working with QE on some automated
internal testing that there were no good examples in the hosts.equiv
manual page showing how the format was supposed to work for this
file and for ~/.rhosts, worse the "format" line showed that there
should be spaces between arguments when that would clearly lead
to incorrect behaviour. In addition some things that the format
allows you to write are just wrong like "-host -user" which makes
no sense since the host is already rejected, and should be written
as "host -user" instead. I added notes in the example to make it
clear that "-host -user" is invalid.

I fixed three things:

(a) The format line.
- Either +, or [-]hostname, or +@netgrp or -@netgrp.
- Either +, or [-]username, or +@netgrp or -@netgrp.
- You must specify something in the hostname portion so remove

optional brackets.

(b) Clarify language around credentials
- If the host is not trusted you must provide credentials to
the login system and that could be anything really and it
depends on your configuration e.g. PAM or whatever IdM you have.

(c) Provide real-world examples
- Provide several real world examples and some corner case
examples for how you would write something. Hopefully others
can add examples as they see fit.

Michael Kerrisk [Carlos O'Donell, Arjun Shankar]
Improve explanation in EXAMPLE

locale.5
Marko Myllynen
Document map to_inpunct, map to_outpunct
See e.g. fa_IR for reference.
Marko Myllynen
Document class in LC_CTYPE
See e.g. the locale zh_CN and

http://en.cppreference.com/w/cpp/string/wide/towctrans
http://en.cppreference.com/w/cpp/string/wide/wctrans
Marko Myllynen
Add iconv(1) reference
Marko Myllynen
Document character transliteration
See e.g. da_DK for reference.

(Not sure should we actually provide an example here?)

Marko Myllynen

Document era keywords

This patch completes the LC_TIME section - since these era keywords are so tightly coupled, I'm providing them as a single patch.

Based on
http://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap07.html
http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf

Marko Myllynen

Document default_missing

Marko Myllynen

Document outdigit and alt_digits

See e.g. fa_IR for reference.

Marko Myllynen

Refer to locale(7) more prominently

It's probably a good idea to refer to locale(7) so that a reader can check what a category is about before describing them in detail.

Marko Myllynen

Document charclass and charconv

See e.g. the locales ja_JP and ko_KR and

http://en.cppreference.com/w/cpp/string/wide/towctrans
http://en.cppreference.com/w/cpp/string/wide/wctrans

Marko Myllynen

Copy is not exclusive in LC_CTYPE and LC_COLLATE

See e.g. da_DK for reference.

Marko Myllynen

Remove the FIXME for timezone

The timezone of LC_TIME is not in POSIX, only 6 (out of ~300) glibc locales define it, the glibc code comment below from glibc.git/programs/ld-time.c seems to suggest it's not a good idea, and there's been a proposal in upstream [1] to remove the existing timezone definitions from glibc locales so I think it's actually better to leave this one undocumented:

/* XXX We don't perform any tests on the timezone value since this is
simply useless, stupid $&$!@... */

1) https://sourceware.org/ml/libc-alpha/2015-06/msg00098.html

Move the remaining LC_COLLATE FIXMEs together while at it.

Marko Myllynen

Fix country_isbn format

Both plain numbers and Unicode code points are used in glibc locales but checking the code reveals that country_isbn

is handled like the rest of its category expect for country_num
which was clarified earlier.
Marko Myllynen
Sort according to the standard
Sort the options so that those defined in POSIX are listed first,
then followed by those defined in ISO/IEC TR 14652 in the order
of common convention in many widely used glibc locales.

Actual descriptions are unchanged.

http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap07.html
Marko Myllynen
Refer to strftime(3) where appropriate
The relationship between the locale time format syntax
and strftime()
cannot be considered as obvious.
Marko Myllynen
Document map "totitle"
See e.g. locales/i18n for reference.
Michael Kerrisk [Marko Myllynen]
Remove BUGS section saying man page is not complete
To some degree, this is true of many pages. And anyway, this
page is much better after recent work by Marko.

proc.5
Michael Kerrisk
List /proc/vmstat fields
Michael Kerrisk
Tweak /proc/vmstat text
Michael Kerrisk
Add /proc/crypto entry with a pointer to further information
Michael Kerrisk [Kees Cook]
Document /proc/sys/kernel/sysctl_writes_strict
Based on text in Documentation/sysctl/kernel.txt.
Michael Kerrisk
Move misordered /proc/[pid]/timers entry
Michael Kerrisk
Refer to bpf(2) for explanation of /proc/sys/net/core/bpf_jit_enable

repertoiremap.5
Marko Myllynen
Symbolic names AKA mnemonics
A long time ago in glibc, repertoire
maps were used (but they
were removed already in 2000), those mapping files were named
as mnemonics, so "mnemonic" is a term that would almost
certainly come up if somebody studies glibc side (perhaps even
the related standards like ISO 9945 [which I don't have access

to]) so I thought it's worth to mention to term in the man page
to make sure we're talking about the same thing, otherwise
someone might wonder is that something different or not.

IOW, symbolic names and mnemonics are often used interchangeably,
let's mention the other often used term in the page, too.

capabilities.7
  Michael Kerrisk
    CAP_SYS_ADMIN allows calling bpf(2)

locale.7
  Marko Myllynen
    LC_CTYPE determines transliteration rules on glibc systems

packet.7
   [Cortland Setlow]
    Fix description of binding a packet socket to an interface

pty.7
  NeilBrown [Peter Hurley]
     Clarify asynchronous nature of PTY I/O
       A PTY is not like a pipe - there may be delayed between data
       being written at one end and it being available at the other.

       This became particularly apparent after
           commit f95499c3030f
         ("n_tty: Don't wait for buffer work in read() loop")
       in Linux 3.12

       See also the mail thread at https://lkml.org/lkml/2015/5/1/35
          Date   Mon, 04 May 2015 12:32:04 -0400
          From   Peter Hurley <>
          Subject Re: [PATCH bisected regression] input_available_p()
                  sometimes says 'no' when it should say 'yes'

rtld-audit.7
  Ben Woodard
    Use correct printf() specifier for pointer types
       In the example code you used %x rather than %p in the example
       code for an audit library. The problem is that it truncates the
       pointers on 64b platforms. So you get something
 like:

       la_symbind64(): symname = strrchr sym->st_value = 0x7f4b8a3f8960
       ndx = 222 flags = 0x0 refcook = 8b53e5c8 defcook = 8b537e30

       rather than:

la_symbind64(): symname = fclose sym->st_value = 0x7fa452dd49b0
ndx = 1135 flags = 0x0 refcook = 0x7fa453f395c8 defcook = 0x7fa453f32e30

This has bitten me a handful of times when playing around with
audit test libraries to investigate its behavior.

sched.7
Michael Kerrisk
Remove ancient, wildly optimistic prediction about future of RT patches
It seems the patches were not merged by 2.6.30...

socket.7
Michael Kerrisk
SEE ALSO: add bpf(2)

vdso.7
Nathan Lynch [Mike Frysinger]
Update for ARM
The 32-bit ARM architecture in Linux has gained a vDSO as of the
4.1 release. (I was the primary author.)

Document the symbols exported by the ARM VDSO.

Accepted kernel submission:
http://lists.infradead.org/pipermail/linux-arm-kernel/2015-March/332573.html

==========Changes in man-pages-4.02==========

Released: 2015-08-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Daniel Borkmann <daniel@iogearbox.net>
David Rientjes <rientjes@google.com>
Dilyan Palauzov <dilyan.palauzov@aegee.org>
Gabriel F. T. Gomes <gftg@linux.vnet.ibm.com>
Gleb Fotengauer-Malinovskiy <glebfm@altlinux.org>
Goswin von Brederlow <goswin-v-b@web.de>
Heinrich Schuchardt <xypron.glpk@gmx.de>

Jonathan David Amery <jdamery@ysolde.ucam.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Mike Kravetz <mike.kravetz@oracle.com>
Nicholas Miell <nmiell@gmail.com>
Nikola Forró <nforro@redhat.com>
Sam Varshavchik <mrsam@courier-mta.com>
Yaarit
<yaarit@gmail.com>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

dladdr.3
  Michael Kerrisk
    New page documenting dladdr() and dladdr1()
      Relocate/rewrite dladdr() text formerly contained in dlopen(3).

      Add documentation of dladdr1().
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

dlerror.3
  Michael Kerrisk
    Migrate dlerror(3) to new separate man page
  Michael Kerrisk
    Note that the returned message may be in a statically allocated buffer
  Michael Kerrisk
    Note that the returned string does not include a trailing newline
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

dlinfo.3
  Michael Kerrisk
    New page describing dlinfo(3)
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

dlopen.3
  Michael Kerrisk
    This page was substantially rewritten and
 enhanced. Notably:
    * the dladdr(), dlsym, dlvsym(), and dlerror() content were moved
      to separate new pages;

* documentation for dlmopen was added;
* and other changes as noted below.

Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

Michael Kerrisk
Move atexit() discussion under "Initialization and Finalization"

Michael Kerrisk
Move discussion of _init() and _fini() to NOTES

Michael Kerrisk
Rework the discussion of initialization and finalization functions
Deemphasize the obsolete _init/_fini and give more prominence
to gcc constructors/destructors.

Michael Kerrisk
dlclose() will unload the object when all references have been released

Michael Kerrisk
EXAMPLE: Remove mention of "-rdynamic"
That option isn't needed for compiling and running this program.

Michael Kerrisk
Remove reference to ld.so info page
The command
"info ld.so" simply shows the man page...

Michael Kerrisk
Add VERSIONS section

Michael Kerrisk
Reorganize conformance information for 'flags'

dlsysm.3

Michael Kerrisk
Move dlsym() and dlvsym() content to new separate page

Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

Newly documented interfaces in existing pages
---

dlopen.3

Michael Kerrisk, Carlos O'Donell
Document dlmopen(3)

nl_langinfo.3

Sam Varshavchik, Michael Kerrisk
Add documentation for nl_langinfo_l(3)

__ppc_set_ppr_med.3

Gabriel F. T. Gomes
Document PPC functions providing access to PPR
GNU C Library 2.18 adds functions (__ppc_set_ppr_low(3),

__ppc_set_ppr_med(3), __ppc_set_ppr_med_low(3)) that provide
access to the Program Priority Register (PPR).

__ppc_yield.3
Gabriel F. T. Gomes
Document PPC performance-hint functions

GNU C Library 2.18 adds functions __ppc_yield(3), __ppc_mdoio(3),
and __ppc_mdoom(3) that can be used provide a hint that
performance could be improved if shared resources are released
for use by other processors.

New and changed links
---

dladdr1.3
Michael Kerrisk
New link to (new) dladdr(3) page

dlmopen.3
Michael Kerrisk
New link to dlopen.3

dlvsym.3
Michael Kerrisk
Adjust link to point to new self-contained dlsym(3) page

nl_langinfo_l.3
Michael Kerrisk
New link to nl_langinfo.3

__ppc_mdoio.3
Gabriel F. T. Gomes
New link to __ppc_yield.3

__ppc_mdoom.3
Gabriel F. T. Gomes
New link to __ppc_yield.3

__ppc_set_ppr_low.3
Gabriel F. T. Gomes
New link to __ppc_set_ppr_med.3

__ppc_set_ppr_med_low.3
Gabriel F. T. Gomes
New link to __ppc_set_ppr_med.3

Global changes

Very many pages
  Michael Kerrisk
    Update
 CONFORMING TO section to reflect POSIX.1-2001 and POSIX.1-2008
    details. (By now, I believe all pages should be up to date with
    respect to appropriately mentioning POSIX.1-2001 and POSIX.1-2008.)

ldd.1
sprof.1
execve.2
dlopen.3
ld.so.8
  Michael Kerrisk
    Prefer "shared object" over "shared library"
      The man pages variously use "shared library" or "shared object".
      Try to more consistently use one term ("shared object"), while
      also pointing out on a few pages that the terms are synonymous.

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Add mention of POSIX.1-2008 regarding EAGAIN vs EWOULDBLOCK

bpf.2
  Daniel Borkmann
    Various updates/follow-ups to address some fixmes
      A couple of follow-ups to the bpf(2) man-page, besides others:

       * Description of map data types
       * Explanation on eBPF tail calls and program arrays
       *
 Paragraph on tc holding ref of the eBPF program in the kernel
       * Updated ASCII image with tc ingress and egress invocations
       * __sync_fetch_and_add() and example usage mentioned on arrays
       * minor reword on the licensing and other minor fixups

execve.2
  Michael Kerrisk
    Reword text on POSIX and #!

io_getevents.2

Michael Kerrisk
Note return value on interruption by a signal handler
Michael Kerrisk
Clarify details of return value for timeout-expired case
Michael Kerrisk
Clarify and extend discussion of 'timeout' argument

mmap.2
Michael Kerrisk
Note that 'length' need not be a page-size multiple for munmap()
Michael Kerrisk [David Rientjes, David Rientjes, Mike Kravetz]
Describe mmap()/munmap() argument requirements for huge-page mappings
Michael Kerrisk
Move discussion of timestamps to NOTES
A straight move; no changes to the content.
This content
is better placed in NOTES.

seccomp.2
Michael Kerrisk
SEE ALSO: mention libseccomp pages
SEE ALSO: add scmp_sys_resolver(1)

sigaction.2
Michael Kerrisk
Correct the list of flags that were added in POSIX.1-2001

socketpair.2
Michael Kerrisk [Goswin von Brederlow]
Clarify use of SOCK_* flags in 'type' argument
See http://bugs.debian.org/794217

atexit.3
Michael Kerrisk
SEE ALSO: add dlopen(3)

clock_getcpuclockid.3
Michael Kerrisk
Improve wording of EPERM error
It's imprecise to say that this is an "optional" error
in POSIX.1.

dl_iterate_phdr.3
Michael Kerrisk
Note that 'size' allows callback() to discover structure extensions
Michael Kerrisk
SEE ALSO: add dladdr(3)
Michael Kerrisk

CONFORMING TO: note that this function appears on some other systems

fseeko.3
Michael Kerrisk
Remove crufty NOTES section
This ancient System
V detail is unneeded.

getutent.3
Michael Kerrisk
Mention POSIX.1-2008 for the "utmpx" functions

iconv_close.3
iconv_open.3
Michael Kerrisk
CONFORMING TO: change "UNIX98" to "SUSv2"

malloc.3
Michael Kerrisk
Change "UNIX 98" to "SUSv2"

mktemp.3
Gleb Fotengauer-Malinovskiy
Reference mkdtemp(3) in addition to mkstemp(3)
Mention mkdtemp(3) as another secure alternative to mktemp(3).

See also https://sourceware.org/bugzilla/show_bug.cgi?id=2898.

mq_receive.3
mq_send.3
Michael Kerrisk
Clarify discussion of 'timeout'
In particular, remove the word 'ceiling', which falsely
suggests that the call might return prematurely.

nl_langinfo.3
Michael Kerrisk
Explicitly describe the return value on success
Michael Kerrisk
POSIX specifies that the caller may not modify the returned string
Michael Kerrisk
Enhance RETURN VALUE description
Note
some further cases where returned string may be
invalidated or overwritten.

perror.3
Michael Kerrisk

Reformat CONFORMING to information
Michael Kerrisk
Note that 'sys_errlist' and 'sys_nerr' are not in POSIX.1

posix_openpt.3
Michael Kerrisk
Reword text regarding systems that don't have posix_openpt()

printf.3
Michael Kerrisk
CONFORMING TO: update details for dprintf() and vdprintf()

setlogmask.3
Michael Kerrisk
Remove useless statement in CONFORMING TO
Saying that the description in PSOX.1-2001 is flawed,
without saying what the fla is, is not helpful.
(And no, I don't know what the flaw is.)

shm_open.3
Michael Kerrisk
Add POSIX.1-2008 details regarding group ID of new shared memory object

strfmon.3
Michael Kerrisk
Fix erroneous CONFORMING to
strfmon() is in POSIX.1.

fanotify.7
Heinrich Schuchardt
Clarify effects of file moves
If files or directories are moved to other mounts, the inode is
deleted. Fanotify marks are lost.

mq_overview.7
Michael Kerrisk
Remove unneeded CONFORMING TO section

nptl.7
Michael Kerrisk [Nicholas Miell]
Note that i386 and x86-64 binaries can't share mutexes

sched.7
Nikola Forró
Fix descriptions of sched_get_priority_max() / sched_get_priority_min()

sem_overview.7
Michael Kerrisk

Remove unneeded CONFORMING TO section

shm_overview.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

sigevent.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

symlink.7
  Michael Kerrisk
    Update with POSIX.1-2008 details for link(2)

ld.so.8
  Michael Kerrisk [Jonathan David Amery]
    Items in LD_LIBRARY_PATH can also be delimited by semicolons
      See http://bugs.debian.org/794559.

========== Changes in man-pages-4.03 ==========

Released: 2015-12-05,
 Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexander Shishkin <alexander.shishkin@linux.intel.com>
Alexei Starovoitov <ast@plumgrid.com>
Andy Lutomirski <luto@kernel.org>

Ville Skyttä <ville.skytta@iki.fi>
Vince Weaver <vincent.weaver@maine.edu>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    4.1 adds AUX sample support
  Vince Weaver
    4.1 data_offset and data_size fields
  Vince Weaver
 [Alexander Shishkin]
    Document aux_{head,tail,offset,size} support
  Vince Weaver
    4.0 update rdpmc documentation
  Vince Weaver
    4.1 adds PERF_RECORD_ITRACE_START
  Vince Weaver
    Document 4.1 clockid support
  Vince Weaver [Steven Rostedt, Masami Hiramatsu]
    4.1 PERF_EVENT_IOC_SET_BPF support

Vince Weaver
4.1 adds AUX_FLAG_OVERWRITE support
Vince Weaver
4.1 PERF_SAMPLE_BRANCH_CALL_STACK
Vince Weaver
4.1 adds aux_watermark
Vince Weaver
Add possibility of EBUSY error

prctl.2
Andy Lutomirski [Kees Cook, Serge Hallyn]
Document operations for ambient capabilities
Michael Kerrisk
Rework PR_CAP_AMBIENT text
Note that arg4 and arg5 must be zero for CAP_AMBIENT
RETURN VALUE: Add PR_CAP_AMBIENT + PR_CAP_AMBIENT_IS_SET case
ERRORS: document PR_CAP_AMBIENT error cases

__ppc_set_ppr_med.3
Gabriel F. T. Gomes
Document PPC functions providing
access to PPR
GNU C Library commit 1747fcda4902a3b46183d93fb16ed9b436b2608b
extends the priorities that can be set to the Program Priority
Register (PPR), with the functions: __ppc_set_ppr_very_low(3)
and __ppc_set_ppr_med_high(3).

capabilities.7
Andy Lutomirski [Kees Cook, Serge Hallyn]
Document ambient capabilities
Michael Kerrisk
Various additions and reworkings for ambient capability text

New and changed links

__ppc_set_ppr_med_high.3
Gabriel F. T. Gomes
New link to __ppc_set_ppr_med.3

__ppc_set_ppr_very_low.3
Gabriel F. T. Gomes
New link to __ppc_set_ppr_med.3

Changes to individual pages
---

mremap.2
  Eric B Munson [Michal Hocko]
    Add note about mremap() with locked areas
      When mremap() is used to move or expand a mapping that is locked
      with mlock() or equivalent it will attempt to populate the new
       area. However, like mmap(MAP_LOCKED), mremap() will not fail if
      the area cannot be populated. Also like mmap(MAP_LOCKED) this
      might come as a surprise to users and should be noted.
open.2
  Michael Kerrisk [David Drysdale]
    Remove accidental mention of O_TTY_INIT
      An earlier edit mentioned O_TTY_INIT as a file creation flag.
      That's true, according POSIX, but Linux does not implement
      this flag, so remove mention of it.

pipe.2
  Michael Kerrisk
    SEE ALSO: add splice(2)

prctl.2
  Michael Kerrisk
    Reorder options alphabetically
      Employ a pseudo-alphabetical order, ordering options after removal
      of any "PR_", "PR_SET_", or "PR_GET" prefix.
  Michael Kerrisk
    Fix alphabetical misplacements in ERRORS

ptrace.2
  Tycho Andersen
    Document PTRACE_O_SUSPEND_SECCOMP flag
  Michael Kerrisk
    Document /proc/sys/kernel/yama/ptrace_scope
  Michael Kerrisk
     Note that PTRACE_ATTACH cannot be applied to nondumpable processes
  Michael Kerrisk
    SEE ALSO: add prctl(2)

reboot.2
  Casper Ti. Vector
    1-argument reboot() is also provided by alternative libc

seccomp.2
  Michael Kerrisk
    Describe use of 'instruction_pointer' data field
  Michael Kerrisk [Kees Cook]
    Note why all filters in a set are executed even after SECCOMP_RET_KILL

signalfd.2
  Michael Kerrisk
    Describe semantics with respect to SCM_RIGHTS

syscalls.2
  Michael Kerrisk
    Add mlock(2)
  Michael Kerrisk
    Add userfaultfd()

daemon.3
  Michael Kerrisk [Johannes Stüttgen]
    Note that daemon() is buggy with respect to controlling tty acquisition

dirfd.3
  Jonathan Wakely
    Remove outdated NOTES
      As stated in the SYNOPSIS, since glibc 2.10 this function is also
      declared by the relevant X/Open and POSIX macros.

dlopen.3
  Michael Kerrisk
    Make it more explicit
 that LD_BIND_NOW overrides RTLD_LAZY
  Michael Kerrisk [Florian Weimer]
    Correct the pathname used in EXAMPLE
      Quoting Florian:

        This does not work because libm.so can be a linker script:

            handle = dlopen("libm.so", RTLD_LAZY);

        The proper way to do this is to include <gnu/lib-names.h>
        and use LIBM_SO.

      See https://bugzilla.kernel.org/show_bug.cgi?id=108821
  Michael Kerrisk
    Include a shell session showing build/run in EXAMPLE
  Michael Kerrisk
    Change arguments to main() to "void" in EXAMPLE

fgetgrent.3
  Zeng Linggang
    ATTRIBUTES: Note function that is not thread-safe

fgetpwent.3
  Zeng Linggang
    ATTRIBUTES: Note function that is not thread-safe

getauxval.3
  Michael Kerrisk
    Add some details for AT_SECURE

getspnam.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are/aren't thread-safe

mallinfo.3
  Zeng Linggang
     ATTRIBUTES: Note function that is not thread-safe

mallopt.3
  Carlos O'Donell
    Document M_ARENA_TEST and M_ARENA_MAX

posix_fallocate.3
  Michael Kerrisk
    Clarify text relating to MT-safety
  Carlos O'Donell
    Mention glibc emulation caveats

termios.3
  Olivier TARTROU
    Add missing details on behaviour of PARMRK
      For a serial terminal, with a specific configuration, input bytes
      with value 0377 are passed to the program as two bytes, 0377 0377.

tty_ioctl.4
  Michael Kerrisk [Peter Hurley]
    Note that TIOCTTYGSTRUCT went away in Linux 2.5.67

core.5
  Ross Zwisler
    Add info about DAX coredump filtering flags
      Kernel 4.4 added two new core dump filtering flags,
      MMF_DUMP_DAX_PRIVATE and MMF_DUMP_DAX_SHARED.

      These flags allow us to explicitly filter DAX mappings.
      This is desirable because DAX mappings, like hugetlb
      mappings, have the potential to
be very large.

nsswitch.conf.5
  Nikola Forró
    Add list of files being read when "files" service is used
      This is not mentioned anywhere. Users can assume that the file

being read is something like /etc/$DATABASE, but that's not
always the case. It's better to explicitly specify which
file is read for each respective database. The list of
files was acquired from glibc source code.

proc.5
Heinrich Schuchardt [Michael Kerrisk]
Add details for threads-max
Add detail information for threads-max.
The checks for minimum and maximum values exist since kernel 4.1.
https://lkml.org/lkml/2015/3/15/96
Heinrich Schuchardt
/proc/sys: Describe whitespace characters
Michael Kerrisk
Document 'CapAmb' in /proc/PID/status
Michael Kerrisk
Add reference to ptrace(2) for /proc/sys/kernel/yama/ptrace_scope

aio.7
Michael Kerrisk [Meikun Wang]

Add missing include file, <fcntl.h>, to example program

mq_overview.7
Michael Kerrisk [Arto Bendiken]
Document QSIZE bug that appeared in 3.5 and was fixed in 4.2

path_resolution.7
Michael Kerrisk
Clarify recursive resolution of symlinks and note limits

pipe.7
Michael Kerrisk
SEE ALSO: add splice(2)

rtld-audit.7
Namhyung Kim
Fix (typo) error in la_pltenter() description
s/la_pltenter()/la_pltexit()/

la_pltenter() is called regardless of the value of
framesizep but la_pltexit() is called only if la_pltenter()
returns with non-zero framesizep set. I spent long time to
figure out why la_pltexit() is not called at all.

signal.7
Michael Kerrisk [Michael Hocko]
Note async-signal-safe functions added by POSIX.1-2008 TC1

tcp.7
  Daniel Borkmann [Michael Kerrisk]
    Improve paragraphs on tcp_ecn and add tcp_ecn_fallback bullet
      Improve description
 of tcp_ecn, fix the RFC number and it's
      not a boolean anymore since long time, and add a description
      for tcp_ecn_fallback.

      See also kernel doc under Documentation/networking/ip-sysctl.txt
      on tcp_ecn and tcp_ecn_fallback.

ld.so.8
  Michael Kerrisk
    LD_POINTER_GUARD has been removed in glibc 2.23
  Michael Kerrisk
    Describe secure-execution mode
  Michael Kerrisk [Maria Guseva]
    Replace mentions of set-UID/set-GID programs with secure-execution mode
      Inspired by a patch from Maria Guseva.
  Maria Guseva [Silvan Jegen]
    LD_DEBUG is effective in secure-execution mode if /etc/suid-debug exists

========== Changes in man-pages-4.04 ==========

Released: 2015-12-29, Munich

Apologies if I missed anyone!

New and rewritten pages
---

copy_file_range.2
  Anna Schumaker [Darrick J. Wong, Christoph Hellwig, Michael Kerrisk]
    New page documenting copy_file_range()
      copy_file_range() is a new system call for copying ranges of data
      completely in the kernel. This gives filesystems an opportunity to
      implement some kind of "copy acceleration", such as reflinks or
      server-side-copy (in the case of NFS).

personality.2
  Michael Kerrisk
    This page has been greatly expanded, to add descriptions of
    personality domains.

fmemopen.3
  Michael Kerrisk [Adhemerval Zanella]
    Significant reworking of this page:
    * Rework discussion of the (obsolete) binary mode
    * Split open_memstream(3) description into a separate page.
    * Note various fmemopen() bugs that were fixed in glibc 2.22

* Greatly expand description of 'mode' argument
* Rework description of 'buf' and 'len' arguments
* Expand discussion

of "current position" for fmemopen() stream

ntp_gettime.3
Michael Kerrisk
New page describing ntp_gettime(3) and ntp_gettimex(3)

open_memstream.3
Michael Kerrisk
New page created by split of fmemopen(3).
At the same time, add and rework a few details in the text.

posix_spawn.3
Bill O. Gallmeister, Michael Kerrisk
New man page documenting posix_spawn(3) and posix_spawnp(3)

readdir.3
Michael Kerrisk [Florian Weimer]
Split readdir_r() content into separate page
As suggested by Florian Weimer:

> It may make sense to move this documentation to a separate
> manual page, specific to readdir_r. This will keep the
> readdir() documentation nice and crisp. Most programmers
> will never have to consult all these details.

Michael Kerrisk
Near complete restructuring of the page and add some further details
Michael Kerrisk [Florian Weimer, Rich Felker,
Paul Eggert]
Add a lot more detail on portable use of the 'd_name' field

readdir_r.3
Michael Kerrisk [Florian Weimer]
New page created after split of readdir(3).
Michael Kerrisk [Florian Weimer]
Explain why readdir_r() is deprecated and readdir() is preferred
Michael Kerrisk [Florian Weimer]
Remove misleading code example using pathconf()

lirc.4
Alec Leamas
New page documenting lirc device driver

Newly documented interfaces in existing pages
---

adjtimex.2
  Michael Kerrisk
    Document ntp_adjtime(3)

epoll_ctl.2
  Michael Kerrisk [Jason Baron]
    Document EPOLLEXCLUSIVE

madvise.2
  Minchan Kim [Michael Kerrisk]
    Document MADV_FREE
      Document the MADV_FREE flag added to madvise() in Linux 4.5.

proc.5
  Michael Kerrisk
    Document CmaTotal and CmaFree fields of /proc/meminfo
  Michael Kerrisk
    Document additional /proc/meminfo
 fields
      Document DirectMap4k, DirectMap4M, DirectMap2M, DirectMap1G
  Michael Kerrisk
    Document MemAvailable /proc/meminfo field
  Michael Kerrisk
    Document inotify /proc/PID/fdinfo entries
  Michael Kerrisk
    Document fanotify /proc/PID/fdinfo entries
  Michael Kerrisk
    Add some kernel version numbers for /proc/PID/fdinfo entries
  Michael Kerrisk [Patrick Donnelly]
    /proc/PID/fdinfo displays the setting of the close-on-exec flag
      Note also the pre-3.1 bug in the display of this info.

socket.7
  Craig Gallek [Michael Kerrisk, Vincent Bernat]
    Document some BPF-related socket options
      Document the behavior and the first kernel version for each of the
      following socket options:

        SO_ATTACH_FILTER
        SO_ATTACH_BPF
        SO_ATTACH_REUSEPORT_CBPF
        SO_ATTACH_REUSEPORT_EBPF
        SO_DETACH_FILTER
        SO_DETACH_BPF

        SO_LOCK_FILTER

New and changed links
---

isalpha_l.3
  Michael Kerrisk
    New link to isalpha.3

longjmp.3
  Michael Kerrisk
    Replace page with link to setjmp(3), which now incorporates longjmp()

ntp_adjtime.3
  Michael Kerrisk
    New link to adjtimex(2)

ntp_gettimex.3
  Michael Kerrisk
    New link to ntp_gettime.3

open_wmemstream.3
  Michael Kerrisk
    Update link to point to new open_memstream(2) page

posix_spawnp.3
  Michael Kerrisk
    New link to new posix_spawn.3 page

siglongjmp.3
  Michael Kerrisk
    Rewire link to point to setjmp(3)

strerror_l.3
  Michael Kerrisk
    New link to strerror.3
      Fix missing link

Global changes

Various pages
  Michael Kerrisk
    Update FTM requirements (_DEFAULT_SOURCE)
  Michael Kerrisk
    Update feature test macro requirements
      Update to use _DEFAULT_SOURCE, and also changes brought by
      glibc

commit 266865c0e7b79d4196e2cc393693463f03c90bd8.

Various pages
  Michael Kerrisk
    Simplify FTM requirements
      Looking at <features.h> (or feature_test_macros(7)), one can
      see that when _XOPEN_SOURCE is defined with the value 700
      (or greater), then _POSIX_C_SOURCE is defined with the value
      200809L (or greater). Therefore, terms in the man pages such as

        _XOPEN_SOURCE\ >=\ 700 || _POSIX_C_SOURCE\ >=\ 200809L

      can be simplified to:

        _POSIX_C_SOURCE\ >=\ 200809L

Various pages
  Michael Kerrisk
    Simplify FTM requirements
      Looking at <features.h> (or feature_test_macros(7)), one can
      see that when _XOPEN_SOURCE is defined with the value 600
      (or greater), then _POSIX_C_SOURCE is defined with the value
      200112L (or greater). Therefore, terms in the man pages such as

        _XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L

      can be simplified to:

        _POSIX_C_SOURCE\ >=\ 200112L

Various pages
  Michael Kerrisk
    Simplify FTM requirements
      _XOPEN_SOURCE implies _POSIX_C_SOURCE >=2, so simplify FTM
      requirements in various pages.

Various pages
  Michael Kerrisk
    Remove "or 'cc -std=c99'" from SYNOPSIS
      Under the FTM requirements all of these pages document the
      requirement for _ISOC99_SOURCE. And feature_test_macros(7) now
      documents that "cc -std=c99" produces the same effect as defining
      _ISOC99_SOURCE. So, all of these pages don't additionally need
      to specify "or 'cc -std=c99'" under the FTM requirements
      in the SYNOPSIS. Removing that redundant text also simplifies
      the SYNOPSIS a little.

Various pages

Michael Kerrisk
Simplify FTM requirements
Looking at <features.h> (or feature_test_macros(7)), one can
see that when _XOPEN_SOURCE
is defined with the value 600
(or greater), then _POSIX_C_SOURCE is defined with the value
200112L (or greater). Therefore, terms in the man pages such as

_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L

can be simplified to:

_POSIX_C_SOURCE\ >=\ 200112L

Various pages
Michael Kerrisk
Remove references to _XOPEN_SOURCE_EXTENDED in SYNOPSIS
_XOPEN_SOURCE_EXTENDED is obsolete (it existed in SUSv1, but not
subsequent standards). _XOPEN_SOURCE >= 500 produces the same
effects as (_XOPEN_SOURCE && _XOPEN_SOURCE_EXTENDED). Modifying
the SYNOPSIS of various ages that contain:

_XOPEN_SOURCE\ >=\ 500 ||
_XOPEN_SOURCE\ &&\ _XOPEN_SOURCE_EXTENDED

to just:

_XOPEN_SOURCE\ >=\ 500

This has the following benefits:

a) Simplifying the SYNOPSIS by removing ancient

historical information.

b) Preventing users from being misled into using
_XOPEN_SOURCE_EXTENDED in new source code.

Various pages
Michael Kerrisk
Remove mention of the obsolete _POSIX_SOURCE macro from SYNOPSIS
_POSIX_SOURCE was a POSIX.1-1990 creation that was soon made
obsolete by _POSIX_C_SOURCE. Retaining mention of it
in the feature test macro requirements section of the
SYNOPSIS doesn't contain important information, and may
mislead readers into actually trying to use this macro.
A few mentions of it are maintained in a some pages where
defining _POSIX_SOURCE inhibits some behavior.

Various sockets-related pages
  Michael Kerrisk [Carlos O'Donell]
    Use consistent argument/variable names for socket addresses and lengths
      As noted by Carlos, there's quite a bit of inconsistency across
      pages. Use 'addr' and 'addrlen' consistently
 in variables and
      function arguments.

Various pages
  Michael Kerrisk
    Wording fix: "current file offset" ==> "file offset"
      "File offset" is the preferred POSIX terminology.

Various pages
  Michael Kerrisk
    Word "descriptor" more precisely
      Use either "file descriptor" or "message queue descriptor".

Various pages
  Michael Kerrisk
    ERRORS: add reference to signal(7) in description of EINTR

Changes to individual pages
----

locale.1
  Marko Myllynen
    Add "locale -c charmap" as an example
      Addresses https://bugzilla.kernel.org/show_bug.cgi?id=104511.

localedef.1
  Marko Myllynen
    Add hint on purpose of --no-archive
      Indicate why using --no-archive might be a good idea. The issue
      is that if you create a custom locale with localedef(1) and put
      it to the locale archive then during the next glibc upgrade the
      locale archive
 is updated as well and your custom locale is gone.)

accept.2
  Michael Kerrisk
    ERRORS: improve description for EBADF

adjtimex.2
  Michael Kerrisk [John Stultz]
    Various improvements after feedback from John Stultz

Michael Kerrisk
Remove FTM requirements
It seems that adjtimex() never needed _BSD_SOURCE (and my earlier commit 5918743bc8b02b was simply a blunder).
Michael Kerrisk
Split EINVAL error cases
Michael Kerrisk
Note treatment of out-of-range buf.offset
Michael Kerrisk
Don't refer reader to adjtime(3)
Probably, it's not wise to suggest adjtime(3) as the more portable API. Rather, ntp_adjtime(3) should be used.
Michael Kerrisk [Naresh Kamboju]
Update details of buf.offset EINVAL error
Michael Kerrisk
SEE ALSO: add ntp_gettime(3)
Michael Kerrisk
Improve description of some PPS timex fields
Michael Kerrisk
Add ATTRIBUTES section
William Preston [Petr Gajdos]
Update a detail in adjtimex return value description
Michael Kerrisk
Note range constraints and clamping for ADJ_FREQUENCY

bdflush.2
Michael Kerrisk
Note that glibc support for this system call went away in version 2.23

bind.2
Michael Kerrisk
Improve description of ENOENT error

bpf.2
Michael Kerrisk
Document close-on-exec semantics
The close-on-exec file descriptor flag is automatically enabled for FDs returned by bpf().

chmod.2
Michael Kerrisk
Clarify terminology (file mode versus file permission bits)

chown.2
Michael Kerrisk
ERRORS: improve EBADF description

clone.2
unshare.2
  Michael Kerrisk
    Remove mention of _BSD_SOURCE and _SVID_SOURCE
      The right way to expose declarations for these Linux-specific
      system calls was always _GNU_SOURCE. Mentioning the historical
      use of _BSD_SOURCE
 and _SVID_SOURCE just clouds the issue.

connect.2
  Michael Kerrisk
    ERRORS: improve EBADF description

create_module.2
  Michael Kerrisk
    Glibc 2.23 removed last vestiges of support for this system call

delete_module.2
  Michael Kerrisk
    Glibc 2.23 removed last vestiges of support for this system call

epoll_ctl.2
  Michael Kerrisk
    Document ELOOP error for circular monitoring loops

eventfd.2
  Michael Kerrisk
    Note that eventfd info is available in /proc/PID/fdinfo

execve.2
  Michael Kerrisk [Krzysztof Adamski]
    Add EPERM error for capabilities check of capability-dumb binaries
  Michael Kerrisk
    Add reference to ld-linux.so(8)
  Michael Kerrisk
    SEE ALSO: add system(3)

fanotify_init.2
  Michael Kerrisk
    Note kernel version that allowed O_CLOEXEC for event_f_flags

fcntl.2
flock.2
  Michael Kerrisk
    SEE ALSO: add lslocks(8)

fcntl.2
  Michael Kerrisk [Jason Vas Dias]

Rework description
of F_SETOWN
As suggested by Jason, make it clearer that I/O signalling
requires the use of both F_SETOWN and O_ASYNC. While we're at,
make a few other cleanups to the text.
Michael Kerrisk
Remove mention of _BSD_SOURCE to get definition of F_SETOWN/F_GETOWN
This usage went away in glibc 2.20, and the simplest remedy
is just to omit mention of it.

futex.2
Michael Kerrisk
FUTEX_CLOCK_REALTIME can now be used with FUTEX_WAIT

get_kernel_syms.2
Michael Kerrisk
Note that glibc does not support this system call

init_module.2
Michael Kerrisk
Glibc 2.23 removed last vestiges of support for this system call

ioctl_list.2
Heinrich Schuchardt
Include uapi/linux/wireless.h
Add the list of wireless IOCTLs.
Heinrich Schuchardt
Path to sockios.h
sockios.h is now in include/uapi
Heinrich Schuchardt
Add reference to netdevice.7
netdevice.7 describes most of the IOCTLs of sockios.h
Heinrich Schuchardt
Transfer structure (wireless.h IOCTLs)
The sole parameter to be passed to the wireless.h IOCTLs is
of type struct iwreq *.

ioperm.2
Michael Kerrisk [Alex Henrie]
ioperm.2: Permissions are inherited across fork(2)
See https://bugzilla.kernel.org/show_bug.cgi?id=99911

iopl.2
Michael Kerrisk [Alex Henrie]
Permissions are not inherited across fork(2) or preserved on execve(2)
See https://bugzilla.kernel.org/show_bug.cgi?id=99901

lseek.2

Michael Kerrisk
FUSE now supports SEEK_HOLE and SEEK_DATA
Michael Kerrisk
NFS supports SEEK_HOLE and SEEK_DATA

Michael Kerrisk
SEE ALSO: add open(2)

madvise.2
Michael Kerrisk
Clarify MADV_HWPOISON wording to say that it applies to a page range

mknod.2
Michael Kerrisk
SEE ALSO: add mknod(1)

mount.2
Michael Kerrisk
SEE ALSO: add findmnt(8)

open.2
Michael Kerrisk
NOTES: mention existence of proc/PID/fd and /proc/PID/fdinfo
Mark Post [Petr Gajdos]
O_TMPFILE support is now provided bt Btrfs

pipe.2
Michael Kerrisk [Eric Blake]
Note treatment of 'pipefd' on error

poll.2
Michael Kerrisk [Josh Triplett]
Document spurious EAGAIN error that can occur on other systems
Light reworking of text proposed by Josh Triplett.

readlink.2
Michael Kerrisk
Clarify EINVAL error description

recv.2
Heinrich Schuchardt
Equivalence to read()
Describe the recv(2)-read(2) and the recvfrom(2)-recv(2)
equivalences for zero-valued arguments.
Michael Kerrisk
MSG_WAITALL has no effect for datagram sockets

recv.2

cmsg.3
  Nikola Forró
    Fix type of cmsg_len member of cmsghdr structure
      The type shown for cmsg_len member of cmsghdr structure is socklen_t,
      but the actual
 type used by glibc and the kernel is size_t.
      The information was obtained from glibc source code:
      http://bit.ly/21m1RMp
  Michael Kerrisk
    Note that cmsg_len is typed as socklen_t in POSIX.1

sched_setaffinity.2
  Michael Kerrisk [Florian Weimer, Florian Weimer]
    Warn that CPU_ALLOC() may allocate a slightly CPU set than requested
  Michael Kerrisk [Florian Weimer]
    Add reference to CPU_ALLOC(3)

sched_setattr.2
  Michael Kerrisk [Akihiro Suda]
    EPERM depends on affinity mask of target thread, not calling thread

select.2
  Michael Kerrisk [Josh Triplett]
    Document spurious EAGAIN error that can occur on other systems
      Light reworking of text proposed by Josh Triplett.
  Nikos Mavrogiannopoulos
    Mention the 'fd_set' size limitation early and refer to poll(2)
      Change this because of the serious limitation of select()
      imposing a limit on the range of file descriptors that
 can
      be monitored. This is currently mentioned too late in the
      documentation (in the NOTES section). The man page should
      warn early and refer to poll(2) as soon as possible.
  Michael Kerrisk
    Add details on the glibc fixed-size fd_set limitation
      No modern application should use select() on Linux.

select_tut.2
  Michael Kerrisk
    Some readability fixes to example program
  Michael Kerrisk
    Better variable names in example program
  Michael Kerrisk
    Simplify 'if' logic in example program
  Michael Kerrisk
    Use correct type (socklen_t) for addrlen

semctl.2
  Michael Kerrisk [Davidlohr Bueso, Manfred Spraul, Philip Semanchuk]
    NOTES: note when 'sempid' is set on various implementations
      See https://bugzilla.kernel.org/show_bug.cgi?id=112271 and
      http://thread.gmane.org/gmane.linux.kernel/2162754/
        Subject: [PATCH] Don't set sempid in semctl syscall.
         Date: 2016-02-26 12:21:38 GMT

semop.2
  Michael Kerrisk
    Tweak comment describing 'sempid'

sendfile.2
  Askar Safin
    Fix incorrect description in text referring to splice(2)
  Michael Kerrisk
    SEE ALSO: add copy_file_range(2)

setpgid.2
  Michael Kerrisk
    Correct/simplify FTM requirements for BSD setpgrp() and getpgrp()

signalfd.2
  Michael Kerrisk
    Note that signalfd info is available in /proc/PID/fdinfo

sigprocmask.2
  Michael Kerrisk [Mike Frysinger]
    Explicitly refer the reader to sigsetops(3)
      This man page did not make it obvious which functions
      should be used for manipulating signals sets, nor where
      those functions were documented.

socketpair.2
  Michael Kerrisk [Eric Blake]
    Note treatment of 'sv' on error

splice.2
  Askar Safin
    Improve description of 0 return value.
      See https://bugzilla.kernel.org/show_bug.cgi?id=90911

statfs.2

 Michael Kerrisk [Jakub Wilk]
    Use consistent case for hex constants

sync.2

Christoph Hellwig
Clarify description and document the Linux data integrity guarantees

syscall.2
Mike Frysinger
Add more architectures and improve error documentation
Move the error register documentation into the main table rather
than listing them in sentences after the fact.

Add sparc error return details.

Add details for alpha/arc/m68k/microblaze/nios2/powerpc/superh/
tile/xtensa.

syscalls.2
Michael Kerrisk
Add copy_file_range(2)

times.2
Kondo, Naoya
Fix an incorrect description in NOTES
The text has an incorrect description in NOTES, it says
that (2^32/HZ) - 300 is about 429 million. It is correct
only if HZ=10 which does not look common today. So just
removing "(i.e., about 429 million)" is good enough.

truncate.2
Michael Kerrisk

SEE ALSO: add truncate(1)

uselib.2
Michael Kerrisk
Mention CONFIG_USELIB
Michael Kerrisk
Note that glibc does not support this (obsolete) system call

wait.2
wait4.2
Michael Kerrisk
Rename the "status" argument to "wstatus"
The fact that exit(3)/_exit(2) has an argument called
"status" and the same name is used in the arguments to the
wait*() calls can a little too easily lead the user into
thinking that the two arguments hold the same information,
when of course they don't. So, use a different name
for the argument of the wait*() functions, to reduce
the chances of such confusion.

backtrace.3
  Michael Kerrisk [Martin Gebert]
    Small fixes to example program

clearenv.3
  Michael Kerrisk [Matt Zimmerman]
    Clarify the use and effect of clearenv()
      See http://bugs.debian.org/679323
  Michael Kerrisk
    Variables can be added to
 the environment after calling clearenv()

clog10.3
  Michael Kerrisk
    Show an alternative equivalence for clog10()
  Michael Kerrisk
    Update CONFORMING TO
      Fix grammar error and add C11.

dl_iterate_phdr.3
  Michael Kerrisk [Paul Pluzhnikov]
    Describe 'struct dl_phdr_info' fields added in glibc 2.4
      See https://bugzilla.kernel.org/show_bug.cgi?id=103011
  Michael Kerrisk [Simon Que]
    Note that first object visited by 'callback' is the main program
      See https://bugzilla.kernel.org/show_bug.cgi?id=94141

errno.3
  Michael Kerrisk
    Add some explanation of ENOENT error

exec.3
  Michael Kerrisk
    SEE ALSO: add system(3)

exp.3
  Michael Kerrisk [Joachim Wuttke]
    SEE ALSO: add expm1(3)

fopen.3
  Michael Kerrisk
    SEE ALSO: add open_memstream(3)

fts.3
  Michael Kerrisk
    BUGS: glibc-2.23 now has LFS support for the fts functions

gamma.3
  Michael Kerrisk [Alan Cox]

  gamma() was documented in SVID 2

getaddrinfo.3
  Michael Kerrisk [Andreas Schwab, Orion Poplawski]
    Update FTM requirements for glibc 2.22
      Since glibc 2.22 getaddrinfo() etc. are only declared for
      POSIX.1-2001 or later.

getcwd.3
  Michael Kerrisk
    SEE ALSO: add pwd(1)

opendir.3
  Michael Kerrisk
    Help the reader by explicitly mentioning the use of readdir(3)

perror.3
  Michael Kerrisk
    Suggest use of strerror(3) in place of deprecated 'sys_errlist'

posix_fallocate.3
  Jérémie Galarneau
    ERRORS: add EINTR
      The glibc implementation of posix_fallocate(), which calls
      fallocate(), may be interrupted. The fallocate() emulation
      also makes use of pread()/pwrite(), which may also be
      interrupted.

posix_memalign.3
  Michael Kerrisk [Eric Blake]
    Note posix_memalign()'s treatment of 'memptr' on error

pthread_setaffinity_np.3
  Michael Kerrisk
    SEE ALSO: add
 CPU_SET(3)

queue.3
  Dr. Tobias Quathamer
    Remove double CONFORMING TO section

rcmd.3
  Nikola Forró
    Add missing condition concerning .rhosts file
      The list of conditions determining if iruserok() and ruserok()

functions automatically fail is incomplete. According to glibc
source code, the functions also fail if the .rhosts file
is hard linked anywhere.

setbuf.3
Michael Kerrisk
SEE ALSO: add stdbuf(1)

setjmp.3
Michael Kerrisk
Rewrite and merge longjmp()/siglongjmp() discussion into this page
The discussion of nonlocal gotos is much easier to read if
setjmp() and longjmp() are discussed in the same page. While
we're at it, rework almost the entire text and add several
more details.
Michael Kerrisk
Note the interactions of longjmp() and non-async-signal-safe functions
POSIX.1-2008 TC2 adds explicit text on this point.

See http://austingroupbugs.net/view.php?id=516#c1195
Michael Kerrisk
Explain why nonlocal gotos make code harder to maintain
Michael Kerrisk
Reword warning on longjmp() to function that has already returned
Michael Kerrisk
Remove reference to obsolete _XOPEN_SOURCE_EXTENDED

sleep.3
Michael Kerrisk
SEE ALSO: add sleep(1)

strftime.3
Michael Kerrisk [Jeremy Harris]
Note which 'tm' fields are used to calculate each output string
See https://bugzilla.redhat.com/show_bug.cgi?id=1162218

strlen.3
Michael Kerrisk [Alan Aversa]
CONFORMING TO: add C11

system.3
Michael Kerrisk
SEE ALSO: add execve(2)

termios.3
Dr. Tobias Quathamer
Document line length in canonical mode
See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/tree/drivers/tty/n_tty.c#n1673

See https://bugs.debian.org/797479
Michael Kerrisk
SEE ALSO: add tty(1)

Michael Kerrisk [Peter Hurley]
Further improvements to recent tweaks of canonical mode 4096 char limit

timegm.3
Michael Kerrisk [Stephen Hurd, Mats Wichmann]
Remove sample implementation of timegm()
Stephen and Mats both question the wisdom of showing a portable
non-thread-safe implementation of timegm(), and I find it
hard to disagree. So, remove this code.

See https://bugzilla.kernel.org/show_bug.cgi?id=103701
Michael Kerrisk
Expand DESCRIPTION a little

st4.4
Dr. Tobias Quathamer
Remove spurious copyright section

tty_ioctl.4
Michael Kerrisk
SEE ALSO: add ldattach(1)

elf.5
Michael Kerrisk [Gabriel Corona, Mike Frysinger]
Fix description of STV_PROTECTED
Michael Kerrisk
Improve description of STV_DEFAULT
Michael Kerrisk
Improve description of STV_HIDDEN
Chris Pick
Remove erroneous, duplicate SHN_* section
Michael Kerrisk
[Chris Pick]
Reword discussion of range values a little

gai.conf.5
Michael Kerrisk
Add VERSIONS section

group.5
Michael Kerrisk
SEE ALSO: add groups(2)
SEE ALSO: add gpasswd(1)
SEE ALSO: add sg(1)

SE ALSO: add gshadow(5)
SEE ALSO: add chgrp(1)

locale.5
Marko Myllynen [Mike Frysinger]
tel + fax are deprecated

nsswitch.conf.5
Nikola Forró
Update NSS compatibility mode description

utmp.5
Michael Kerrisk
SEE ALSO: add lslogins(1)

aio.7
Andreas Gruenbacher
Improve example
When aio_sigevent.sigev_notify is set to SIGEV_SIGNAL, signal handlers called for asynchronous I/O operations will have si->si_code set to SI_ASYNCIO. Check to make sure that si->si_value.sival_ptr is defined.

capabilities.7
Michael Kerrisk
Explain safety check for capability-dumb binaries
Michael Kerrisk
SEE ALSO: add sg(1), su(1)
SEE ALSO: add id(1), group(5), passwd(5)

credentials.7
Michael Kerrisk
SEE ALSO: add groups(2)

environ.7
Michael Kerrisk
Describe the Bourne "NAME=value command" syntax
Michael Kerrisk
Add some details describing hos shell's environment is initialized
Michael Kerrisk
Note that child of fork(2) inherits copy of parent's environment
Michael Kerrisk
SEE ALSO: add pam_env(3)

epoll.7
Michael Kerrisk
Mention that epoll info is available via /proc/PID/fdinfo

fanotify.7
  Michael Kerrisk
    Refer reader to proc(5) for info on /proc/PID/fdinfo fanotify entries

feature_test_macros.7
  Michael Kerrisk
    Add a summary of some FTM key points
  Michael Kerrisk
    Give an early hint about some macros being defined by default
  Michael Kerrisk
    Clarify relation between _XOPEN_SOURCE >=500 and _XOPEN_SOURCE_EXTENDED
      Emphasize that defining _XOPEN_SOURCE >=500 produces same

      effects as defining _XOPEN_SOURCE_EXTENDED.
  Michael Kerrisk
    Note that man pages don't mention _XOPEN_SOURCE_EXTENDED
      As per previous commit, mention of _XOPEN_SOURCE_EXTENDED
      has generally been removed from the man pages.
  Michael Kerrisk
    Note effects of "cc -std=c99" and "cc -std=c11"
  Michael Kerrisk
    Clarify some _ISOC99_SOURCE / _DEFAULT_SOURCE details
  Michael Kerrisk
    Clarify that _XOPEN_SOURCE_EXTENDED is obsolete
      Since SUSv2, _XOPEN_SOURCE_EXTENDED is no longer specified
      in the standard.

inotify.7
  Michael Kerrisk
    Refer reader to proc(5) for info on /proc/PID/fdinfo inotify entries

ip.7
  Eric Dumazet
    Document IP_BIND_ADDRESS_NO_PORT socket option

mq_overview.7
  Michael Kerrisk
    Note that the close-on-exec flag is automatically set on MQ descriptors

namespaces.7
  Michael Kerrisk
    SEE ALSO: add lsns(1)
      lsns(1) was recently
 added in util-linux, probably to appear
      in next release (2.28?).

pipe.7

Michael Kerrisk [Jason Vas Dias]
Clarify that I/O signalling requires use of both F_SETOWN and O_ASYNC
Michael Kerrisk
SEE ALSO: add mkfifo(1)

signal.7
Michael Kerrisk
Note the interactions of longjmp() and non-async-signal-safe functions
See http://austingroupbugs.net/view.php?id=516#c1195.

socket.7
Michael Kerrisk
SEE ALSO: add pcap(3)
SEE ALSO: add wireshark(1) and tcpdump(8)

standards.7
Michael Kerrisk
Add POSIX.1-2008 TC2 (POSIX.1-2016)

svipc.7
Michael Kerrisk
Tweak description of 'sempid'
Michael Kerrisk
SEE ALSO: add lsipc(1)

symlink.7
Michael Kerrisk [Zefram]
Some "magic" symlinks have permissions other than 0777
See https://bugs.debian.org/743525

time.7
Michael Kerrisk
SEE ALSO: add timeout(1)
SEE ALSO: add ntp_adjtime(3) and ntp_gettime(3)

unicode.7
Dr. Tobias Quathamer
Document private use areas
See https://bugs.debian.org/285444

unix.7
Heinrich Schuchardt
Add example
A complete example demonstrating the usage of sockets for local
interprocess communication is added.
Michael Kerrisk
Introduce term "sequenced-packet" for SOCK_SEQPACKET
Michael Kerrisk

Some wording improvements

========== Changes in man-pages-4.06 ==========

Released: 2016-05-09, Oslo

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexander Miller <alex.miller@gmx.de>
Alon Bar-Lev <alon.barlev@gmail.com>
Benjamin Poirier <bpoirier@suse.com>
Christoph Hellwig <hch@lst.de>
Colin Ian King <colin.king@canonical.com>

Georg Sauthoff
 <gsauthof@techfak.uni-bielefeld.de>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jakub Wilk <jwilk@jwilk.net>
Jordan Birks <birkses@hotmail.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nikola Forró <nforro@redhat.com>
Rasmus Villemoes <linux@rasmusvillemoes.dk>
Serge E. Hallyn <serge@hallyn.com>
Serge Hallyn <serge.hallyn@ubuntu.com>
Valery Reznic <valery_reznic@yahoo.com>
Zubair Lutfullah Kakakhel <Zubair.Kakakhel@imgtec.com>

Apologies if I missed anyone!

New and rewritten pages
---

cgroups.7
  Serge Hallyn, Michael Kerrisk
    New page documenting cgroups

cgroup_namespaces.7

Michael Kerrisk [Serge Hallyn]
New page describing cgroup namespaces

Newly documented interfaces in existing pages
---

clone.2
Michael Kerrisk
Document CLONE_NEWCGROUP

readv.2
Christoph Hellwig
Document preadv2() and pwritev2()
setns.2
Michael Kerrisk
Document CLONE_NEWCGROUP

unshare.2
Michael Kerrisk
Document CLONE_NEWCGROUP

Changes to individual pages
---

clock_getres.2
Michael Kerrisk [Rasmus Villemoes]
Note that coarse clocks need architecture and VDSO support

clone.2
fork.2
Nikola Forró
Document ERESTARTNOINTR error code

clone.2
Michael Kerrisk [Colin Ian King]
ERRORS: add EINVAL for improperly aligned 'child_stack' value

execve.2
Michael Kerrisk [Valery Reznic]
Since Linux 2.6.28, recursive script interpretation is supported

fcntl.2
Michael Kerrisk
Note that mandatory locking is now governed by a configuration option

fsync.2

Michael Kerrisk [Georg Sauthoff]
Give some examples of files where sync can fail with EINVAL

getrlimit.2
Michael Kerrisk
SEE ALSO: add cgroups(7)

ioctl_fat.2
Heinrich Schuchardt
Use %04x to print volume ID
Leading zeroes
should be used when display a FAT volume ID.

ioprio_set.2
Michael Kerrisk
SEE ALSO: add cgroups(7)

lseek.2
Michael Kerrisk
Note that 'off_t' is an integer data type defined by POSIX

memfd_create.2
Michael Kerrisk
Note that memfd_create() does not have a glibc wrapper

mount.2
Michael Kerrisk
MS_MANDLOCK requires CAP_SYS_ADMIN (since Linux 4.5)

quotactl.2
Michael Kerrisk
Document Q_GETNEXTQUOTA and Q_XGETNEXTQUOTA
Michael Kerrisk
Rework/reorder ERRORS list
Make into a single alphabetically ordered list
Michael Kerrisk
Note kernel version that removed Q_GETSTATS
Michael Kerrisk
Add kernel version for G_GETINFO, Q_SETINFO, and Q_GETFMT

readv.2
Michael Kerrisk
Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

semctl.2
Michael Kerrisk
From kernel 4.6, Linux now updates 'sempid' on SETALL operations

sigaction.2
  Michael Kerrisk
    Document SEGV_BNDERR
  Michael Kerrisk
    Document SEGV_PKUERR

syscalls.2
  Michael Kerrisk
    Add preadv2() and pwritev2()

write.2
  Michael Kerrisk
    Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

makedev.3
  Mike Frysinger
    Use <sys/sysmacros.h> in SYNOPSIS
      Defining these functions via <sys/types.h> causes problems for
      some folk. As noted by Zack Wein:

        libstdc++ force-enables _GNU_SOURCE, which means people
        writing in C++ _can't_ avoid these nonstandard macros by
        using a strict conformance mode.

      Since glibc has basically always used <sys/sysmacros.h>,
      update the docs to have people include that instead.
  Michael Kerrisk
    NOTES: mention that <sys/types.h> may also define these macros

popen.3
  Nikola Forró
    RETURN VALUE: describe successful case
      Reference:
      http://pubs.opengroup.org/onlinepubs/9699919799/functions/popen.html
       http://pubs.opengroup.org/onlinepubs/9699919799/functions/pclose.html

strtod.3
  Michael Kerrisk [Ed Avis]
    Improve a detail in RETURN VALUE

core.5
  Michael Kerrisk
    Document /proc/sys/kernel/core_pipe_limit

locale.5
  Marko Myllynen
    Adjust LC_IDENTIFICATION / abbreviation
      Tiny tweak to locale.5 based on ISO/IEC TR 14652:

http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf
Marko Myllynen
Update LC_ADDRESS after glibc change
This patch updates locale.5 to match the recent glibc change
in commit a837257199ffab76237385b830cc7b6179fc2f18
Marko Myllynen
Complete LC_COLLATE
Here's the first attempt to (almost) complete the locale.5 manual
page by documenting all (but perhaps one) of the missing
LC_COLLATE keywords.
Mike Frysinger
country_car: Add a better description

nsswitch.conf.5
Marko Myllynen
Document group merging
Document the recently merged glibc group merge support.
Glibc commit ced8f8933673f4efda1d666d26a1a949602035ed
https://sourceware.org/glibc/wiki/Proposals/GroupMerging

proc.5
Michael Kerrisk
Move /proc/PID/cgroup discussion to cgroups(7) page
Michael Kerrisk
Add some background on why /proc/PID/mountinfo was added
Michael Kerrisk
Improve description of /proc/PID/mountinfo 'root' field
Michael Kerrisk
Add pointer to cgroups(7) for documentation of /proc/cgroups
Michael Kerrisk
Add reference to core(5) for info on /proc/sys/kernel/core_pipe_limit

cpuset.7
Michael Kerrisk
SEE ALSO: add cgroups(7)

ip.7
Benjamin Poirier
Fix incorrect sockopt name
"IP_LEAVE_GROUP" does not exist. It was perhaps a confusion with
MCAST_LEAVE_GROUP. Change the text to IP_DROP_MEMBERSHIP which has

the same function as MCAST_LEAVE_GROUP and is documented in the
ip.7 man page.

Reference:

Linux kernel net/ipv4/ip_sockglue.c do_ip_setsockopt()

namespaces.7
  Michael Kerrisk
    SEE ALSO: add cgroups(7), cgroup_namespaces(7)

vdso.7
  Zubair Lutfullah Kakakhel [Mike Frysinger]
    Update for MIPS
      Document the symbols exported by the MIPS VDSO.
      VDSO support was added from kernel 4.4 onwards.

      See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/log/arch/mips/vdso
  Michael Kerrisk [Rasmus Villemoes]
    The __kernel_clock_* interfaces don't support *_COARSE clocks on PowerPC

ld.so.8
  Michael Kerrisk [Alon Bar-Lev]
    Document use of $ORIGIN, $LIB, and $PLATFORM in environment variables
      These strings are meaningful in LD_LIBRARY_PATH and LD_PRELOAD.

New and rewritten
pages
---

ioctl_fideduperange.2
Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
New page documenting the FIDEDUPERANGE ioctl

Document the FIDEDUPERANGE ioctl, formerly known as
BTRFS_IOC_EXTENT_SAME.

ioctl_ficlonerange.2
Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
New page documenting FICLONE and FICLONERANGE ioctls
Document the FICLONE and FICLONERANGE ioctls, formerly known as
the BTRFS_IOC_CLONE and BTRFS_IOC_CLONE_RANGE ioctls.

nextup.3
Michael Kerrisk
New page documenting nextup(), nextdown(), and related functions

mount_namespaces.7
Michael Kerrisk [Michael Kerrisk]
New page describing mount namespaces

Newly documented interfaces in existing pages
---

mount.2
Michael Kerrisk
Document flags used to set propagation type
Document MS_SHARED, MS_PRIVATE, MS_SLAVE, and MS_UNBINDABLE.
Michael Kerrisk
Document the MS_REC flag

ptrace.2
Michael Kerrisk [Kees Cook, Jann Horn, Eric W. Biederman, Stephen Smalley]
Document ptrace access modes

proc.5
Michael Kerrisk
Document /proc/[pid]/timerslack_ns
Michael Kerrisk
Document /proc/PID/status 'Ngid' field
Michael Kerrisk
Document /proc/PID/status fields: 'NStgid', 'NSpid', 'NSpgid', 'NSsid'
Michael Kerrisk
Document /proc/PID/status 'Umask' field

New and changed links
---

preadv2.2
pwritev2.2

Michael Kerrisk
New links to readv(2)

nextdown.3
nextdownf.3
nextdownl.3
nextupf.3
nextupl.3
Michael Kerrisk
New links to nextup(3)

Changes to individual pages
---

ldd.1
Michael Kerrisk
Add a little more detail on why ldd is unsafe with untrusted executables
Michael Kerrisk
Add more detail on the output of ldd

localedef.1
Marko Myllynen
Drop --old-style
description
The glibc upstream decided to drop localedef(1) --old-style
option [1] altogether, I think we can do the same with
localedef(1), the option hasn't done anything in over 16
years and I doubt anyone uses it.

add_key.2
Mitch Walker
Empty payloads are not allowed in user-defined keys

chroot.2
Michael Kerrisk
SEE ALSO: add pivot_root(2)

clone.2
Michael Kerrisk
Add reference to mount_namespaces(7) under CLONE_NEWNS description

fork.2
Michael Kerrisk
Add ENOMEM error for PID namespace where "init" has died

futex.2
Michael Kerrisk

Correct an ENOSYS error description

Since Linux 4.5, FUTEX_CLOCK_REALTIME is allowed with FUTEX_WAIT.

Michael Kerrisk [Darren Hart]

Remove crufty text about FUTEX_WAIT_BITSET interpretation of timeout

Since Linux 4.5, FUTEX_WAIT also understands FUTEX_CLOCK_REALTIME.

Michael Kerrisk [Thomas Gleixner]

Explain how to get equivalent of FUTEX_WAIT with an absolute timeout

Michael Kerrisk

Describe FUTEX_BITSET_MATCH_ANY

Describe FUTEX_BITSET_MATCH_ANY and FUTEX_WAIT and FUTEX_WAKE equivalences.

Michael Kerrisk

Note that at least one bit must be set in mask for BITSET operations

At least one bit must be set in the 'val3' mask supplied for the FUTEX_WAIT_BITSET and FUTEX_WAKE_BITSET operations.

Michael Kerrisk [Thomas Gleixner, Darren Hart]

Fix descriptions of various timeouts

Michael Kerrisk

Clarify clock default and choices for FUTEX_WAIT

getitimer.2

Michael Kerrisk

Substantial rewrites to various parts of the page

Michael Kerrisk [Tom Callaway]

Change license to note that page may be modified

The page as originally written carried text that said the page may be freely distributed but made no statement about modification. In the 20+ years since it was first written, the page has in fact seen repeated, sometimes substantial, modifications, and only a small portion of the original text remains. One could I suppose rewrite the last few pieces that remain from the original, but as the largest contributor to the pages existing text, I'm just going to relicense it to explicitly note that modification is permitted. (I presume the failure by the original author to grant permission to modify was simply an oversight; certainly, the large number of people who have changed the page have taken that to be the case.)

See also https://bugzilla.kernel.org/show_bug.cgi?id=118311

get_mempolicy.2

Michael Kerrisk [Jörn Engel]

Correct rounding to 'maxnodes' (bits, not bytes)

Michael Kerrisk [Jörn Engel]

Fix prototype for get_mempolicy()

In numaif.h, 'addr'

is typed as 'void *'

getpriority.2
  Michael Kerrisk
    Make discussion of RLIMIT_NICE more prominent
      The discussion of RLIMIT_NICE was hidden under the EPERM error,
      where it was difficult to find. Place some relevant text in
      DESCRIPTION.
  Michael Kerrisk
    Note that getpriority()/setpriority deal with same attribute as nice(2)
  Michael Kerrisk [Robin Kuzmin]
    Clarify equivalence between lower nice value and higher priority

get_robust_list.2
  Michael Kerrisk
    get_robust_list() is governed by PTRACE_MODE_READ_REALCREDS

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_fideduperange(2) and ioctl_ficlonerange(2)

kcmp.2
  Michael Kerrisk
    kcmp() is governed by PTRACE_MODE_READ_REALCREDS
  Shawn Landden
    Note about SECURITY_YAMA
kill.2
  Michael Kerrisk [John Wiersba]
    Clarify the meaning if sig==0

lookup_dcookie.2
  Michael Kerrisk
    SEE ALSO: add oprofile(1)

mmap.2
   Michael Kerrisk [Rahul Bedarkar]
    EXAMPLE: for completeness, add munmap() and close() calls

mount.2
  Michael Kerrisk
    Restructure discussion of 'mountflags' into functional groups
      The existing text makes no differentiation between different
      "classes" of mount flags. However, certain flags such as
      MS_REMOUNT, MS_BIND, MS_MOVE, etc. determine the general
      type of operation that mount() performs. Furthermore, the
      choice of which class of operation to perform is performed in
      a certain order, and that order is significant if multiple
      flags are specified. Restructure and extend the text to

reflect these details.
Michael Kerrisk
Relocate text on multimounting and mount stacking to NOTES
The text was somewhat out of place in its previous location;
NOTES is a better location.
Michael Kerrisk
Remove version numbers attached to flags
that are modifiable on remount
This information was simply bogus. Mea culpa.
Michael Kerrisk
Refer reader to mount_namespaces(7) for details on propagation types
Michael Kerrisk
SEE ALSO: s/namespaces(7)/mount_namespaces(7)/
Omar Sandoval
MS_BIND still ignores mountflags
This is clear from the do_mount() function in the kernel as of v4.6.
Michael Kerrisk
Note the default treatment of ATIME flags during MS_REMOUNT
The behavior changed in Linux 3.17.
Michael Kerrisk
Clarify that MS_MOVE ignores remaining bits in 'mountflags'
Michael Kerrisk
Note kernel version that added MS_MOVE
Michael Kerrisk
MS_NOSUID also disables file capabilities
Michael Kerrisk
Relocate/demote/rework text on MS_MGC_VAL
The use of this constant has not been needed for 15 years now.
Michael Kerrisk
Clarify that 'source' and 'target' are pathnames, and can refer
to files
Michael Kerrisk
Update example list of filesystem types
Put more modern examples in; remove many older examples.
Michael Kerrisk
MS_LAZYTIME and MS_RELATIME can be changed on remount
Michael Kerrisk
Explicitly note that MS_DIRSYNC setting cannot be changed on remount
Michael Kerrisk
Move text describing 'data' argument higher up in page
In preparation for other reworking.
Michael Kerrisk
Since Linux 2.6.26, bind mounts can be made read-only

open.2
Eric Biggers
Refer to correct functions in description of O_TMPFILE

pciconfig_read.2
  Michael Kerrisk [Tom Callaway]
    Change license to note that page may be modified
      Niki Rahimi, the author of this page, has agreed that it's okay
      to change the license to note that the page can be modified.

      See https://bugzilla.kernel.org/show_bug.cgi?id=118311

perf_event_open.2
  Michael Kerrisk

   If pid > 0, the operation is governed by PTRACE_MODE_READ_REALCREDS
  Jann Horn
    Document new perf_event_paranoid default
  Keno Fischer [Vince Weaver]
    Add a note that dyn_size is omitted if size == 0
      The perf_output_sample_ustack in kernel/events/core.c only writes
      a single 64 bit word if it can't dump the user registers. From the
      current version of the man page, I would have expected two 64 bit
      words (one for size, one for dyn_size). Change the man page to
      make this behavior explicit.

prctl.2
  Michael Kerrisk
    Some wording improvements in timer slack description
  Michael Kerrisk
    Refer reader to discussion of /proc/[pid]/timerslack_ns
      Under discussion of PR_SET_TIMERSLACK, refer the reader to
      the /proc/[pid]/timerslack_ns file, documented in proc(5).

process_vm_readv.2
  Michael Kerrisk
    Rephrase permission rules in terms of a ptrace access mode check

ptrace.2
   Michael Kerrisk [Jann Horn]
    Update Yama ptrace_scope documentation
      Reframe the discussion in terms of PTRACE_MODE_ATTACH checks,
      and make a few other minor tweaks and additions.
  Michael Kerrisk, Jann Horn
    Note that user namespaces can be used to bypass Yama protections
  Michael Kerrisk
    Note that PTRACE_SEIZE is subject to a ptrace access mode check
  Michael Kerrisk
    Rephrase PTRACE_ATTACH permissions in terms of ptrace access mode check

quotactl.2
  Michael Kerrisk [Jacob Willoughby]

'dqb_curspace' is in bytes, not blocks
This error appears to have been injected into glibc
when copying some headers from BSD.

See https://bugs.debian.org/825548

recv.2
Michael Kerrisk [Tom Gundersen]
With pending 0-length datagram read() and recv() with flags == 0 differ

setfsgid.2
setfsuid.2
Jann Horn [Michael Kerrisk]
Fix note about errors from
the syscall wrapper
See sysdeps/unix/sysv/linux/i386/setfsuid.c in glibc-2.2.1.
(This code is not present in modern glibc anymore.)
Michael Kerrisk
Move glibc wrapper notes to "C library/kernel differences" subsection

sysinfo.2
Michael Kerrisk
Rewrite and update various pieces

umask.2
Michael Kerrisk
NOTES: Mention /proc/PID/status 'Umask' field

umount.2
Michael Kerrisk
SEE ALSO: add mount_namespaces(7)

unshare.2
Michael Kerrisk
Add reference to mount_namespaces(7) under CLONE_NEWNS description

utimensat.2
Michael Kerrisk [Rob Landley]
Note that the glibc wrapper disallows pathname==NULL

wait.2
Michael Kerrisk
Since Linux 4.7, __WALL is implied if child being ptraced
Michael Kerrisk
waitid() now (since Linux 4.7) also supports __WNOTHREAD/__WCLONE/__WALL

assert.3
Nikos Mavrogiannopoulos

Improved description
Removed text referring to text
not being helpful to users. Provide
the error text instead to allow the reader to determine whether it is helpful. Recommend against using NDEBUG for programs to exhibit deterministic behavior. Moved description ahead of recommendations.
Michael Kerrisk
Clarify details of message printed by assert()

fmax.3
fmin.3
Michael Kerrisk
SEE ALSO: add fdim(3)

getauxval.3
Cownie, James H
Correct AT_HWCAP result description

inet_pton.3
Stefan Puiu
Mention byte order

malloc_hook.3
Michael Kerrisk
glibc 2.24 removes __malloc_initialize_hook

memmem.3
Michael Kerrisk [Shawn Landden]
Note that memmem() is present on some other systems

mkdtemp.3
mktemp.3
Michael Kerrisk
SEE ALSO: add mktemp(1)

printf.3
Michael Kerrisk [Shawn Landden]
Note support in other C libraries for %m and %n

strcasecmp.3
Michael Kerrisk [Ori Avtalion]
Make details
of strncasecmp() comparison clearer

strcat.3
Michael Kerrisk
Add a program that shows the performance characteristics of strcat()

In honor of Joel Spolksy's visit to Munich, let's start educating
Schlemiel The Painter.

strtoul.3
Michael Kerrisk
SEE ALSO: add a64l(3)

strxfrm.3
Michael Kerrisk [Florian Weimer]
Remove NOTES section
strxfrm() and strncpy() are not precisely equivalent in the
POSIX locale, so this NOTES section was not really correct.

See https://bugzilla.kernel.org/show_bug.cgi?id=104221

console_codes.4
console_ioctl.4
tty.4
vcs.4
charsets.7
Marko Myllynen
Remove console(4) references
0f9e647 removed the obsolete console(4) page but we still have few
references to it. The patch below removes them or converts to refs
to console_ioctl(4) where appropriate.

console_ioctl.4
Michael Kerrisk [Chris Gassib]
The argument
to KDGETMODE is an 'int'

lirc.4
Alec Leamas
Update after upstreamed lirc.h, bugfixes.

st.4
Kai Mäkisara
Fix description of read() when block is larger than request
Kai Mäkisara
Update MTMKPART for kernels >= 4.6
Update the description of the MTMKPART operation of MTIOCTOP to match
the changes in kernel version 4.6.

charmap.5
Marko Myllynen
Clarify keyword syntax
Updates charmap(5) to match the syntax all the glibc
charmap files are using currently.

elf.5
  Michael Kerrisk
    SEE ALSO: add readelf(1)

locale.5
  Marko Myllynen
    Document missing keywords, minor updates
  Marko Myllynen
    Clarify keyword syntax
  Marko Myllynen
    Adjust conformance

proc.5
namespaces.7
  Michael Kerrisk
    Move /proc/PID/mounts information to proc(5)
      There was partial duplication, and some extra information
      in namespaces(7). Move everything
 to proc(5).

proc.5
  Michael Kerrisk
    /proc/PID/fd/* are governed by PTRACE_MODE_READ_FSCREDS
      Permission to dereference/readlink /proc/PID/fd/* symlinks is
      governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
  Michael Kerrisk
    /proc/PID/timerslack_ns is governed by PTRACE_MODE_ATTACH_FSCREDS
      Permission to access /proc/PID/timerslack_ns is governed by
      a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
  Michael Kerrisk
    Document /proc/PID/{maps,mem,pagemap} access mode checks
      Permission to access /proc/PID/{maps,pagemap} is governed by a
      PTRACE_MODE_READ_FSCREDS ptrace access mode check.

      Permission to access /proc/PID/mem is governed by a
      PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
  Michael Kerrisk
    Note /proc/PID/stat fields that are governed by PTRACE_MODE_READ_FSCREDS
  Michael Kerrisk
    /proc/PID/{cwd,exe,root} are
 governed by PTRACE_MODE_READ_FSCREDS
      Permission to dereference/readlink /proc/PID/{cwd,exe,root} is
      governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
  Michael Kerrisk
    /proc/PID/io is governed by PTRACE_MODE_READ_FSCREDS
      Permission to access /proc/PID/io is governed by
      a PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Michael Kerrisk
/proc/PID/{personality,stack,syscall} are governed by PTRACE_MODE_ATTACH_FSCREDS
Permission to access /proc/PID/{personality,stack,syscall} is
governed by a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/{auxv,environ,wchan} are governed by PTRACE_MODE_READ_FSCREDS
Permission to access /proc/PID/{auxv,environ,wchan} is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
Move shared subtree /proc/PID/mountinfo fields to mount_namespaces(7)
Move information on shared subtree fields in /proc/PID/mountinfo
to mount_namespaces(7).
Michael Kerrisk ["Yuming Ma()"]
Note that /proc/net is now virtualized per network namespace
Michael Kerrisk
Add references to mount_namespaces(7)

repertoiremap.5
Michael Kerrisk
Marko Myllynen
Clarify keyword syntax

utmp.5
Michael Kerrisk
SEE ALSO: add logname(1)

capabilities.7
Michael Kerrisk [Andy Lutomirski]
Note on SECURE_NO_CAP_AMBIENT_RAISE for capabilities-only environment
Michael Kerrisk
Add a detail on use of securebits

cgroup_namespaces.7
Michael Kerrisk
SEE ALSO: add namespaces(7)

cgroups.7
Michael Kerrisk
ERRORS: add mount(2) EBUSY error

cp1251.7
cp1252.7
iso_8859-1.7
iso_8859-15.7
iso_8859-5.7
koi8-r.7
koi8-u.7
Marko Myllynen
Add some charset references

Add some references to related charsets here and there.

credentials.7
Michael Kerrisk

SEE ALSO: add runuser(1)
SEE ALSO: add newgrp(1)
SEE ALSO: add sudo(8)

feature_test_macros.7
Michael Kerrisk
Emphasize that applications should not directly include <features.h>

man-pages.7
Michael Kerrisk
Clarify which sections man-pages provides man pages for
Michael Kerrisk [Josh Triplett]
Add a few more details on formatting conventions
Add some more details for Section 1 and 8 formatting.
Separate out formatting discussion into commands, functions,
and "general".

namespaces.7
Michael Kerrisk
/proc/PID/ns/* are governed by PTRACE_MODE_READ_FSCREDS
Permission to dereference/readlink /proc/PID/ns/* symlinks is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
Nowadays, file changes in /proc/PID/mounts are notified differently
Exceptional condition for select(), (E)POLLPRI for (e)poll
Michael Kerrisk
Remove /proc/PID/mountstats description
This is a duplicate of information in proc(5).
Michael Kerrisk
Refer to new mount_namespaces(7) for information on mount namespaces

netlink.7
Andrey Vagin
Describe netlink socket options
Michael Kerrisk
Rework version information
(No changes in technical details.)

pid_namespaces.7
Michael Kerrisk
SEE ALSO: add namespaces(7)

unix.7

Michael Kerrisk
Move discussion on pathname socket permissions to DESCRIPTION
Michael Kerrisk
Expand discussion of socket permissions
Michael Kerrisk
Fix statement about permissions needed to connect to a UNIX domain socket
Read permission is not required (verified by experiment).
Michael Kerrisk
Clarify ownership and permissions assigned during socket creation
Michael Kerrisk [Carsten Grohmann]
Update text on socket permissions on other systems
At least
some of the modern BSDs seem to check for write
permission on a socket. (I tested OpenBSD 5.9.) On Solaris 10,
some light testing suggested that write permission is still
not checked on that system.
Michael Kerrisk
Note that umask / permissions have no effect for abstract sockets
W. Trevor King
Fix example code: 'ret' check after accept populates 'data_socket'
Michael Kerrisk
Move some abstract socket details to a separate subsection
Michael Kerrisk
Note that abstract sockets automatically disappear when FDs are closed

user_namespaces.7
Michael Kerrisk [Micha Zegan]
Clarify meaning of privilege in a user namespace
Having privilege in a user NS only allows privileged
operations on resources governed by that user NS. Many
privileged operations relate to resources that have no
association with any namespace type, and only processes

with privilege in the initial user NS can perform those
operations.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk [Micha Zegan]
List the mount operations permitted by CAP_SYS_ADMIN
List the mount operations permitted by CAP_SYS_ADMIN in a
noninitial userns.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk [Micha Zegan]
CAP_SYS_ADMIN allows mounting cgroup filesystems
See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk
Clarify details of CAP_SYS_ADMIN and cgroup v1 mounts

With respect to cgroups version 1, CAP_SYS_ADMIN in the user
namespace allows only *named* hierarchies to be mounted (and
not hierarchies that have a controller).
Michael Kerrisk
Clarify CAP_SYS_ADMIN details for mounting FS_USERNS_MOUNT filesystems
Michael Kerrisk
Correct user namespace
rules for mounting /proc
Michael Kerrisk
Describe a concrete example of capability checking
Add a concrete example of how the kernel checks capabilities in
an associated user namespace when a process attempts a privileged
operation.
Michael Kerrisk
Correct kernel version where XFS added support for user namespaces
Linux 3.12, not 3.11.
Michael Kerrisk
SEE ALSO: add ptrace(2)
SEE ALSO: add cgroup_namespaces(7)

utf-8.7:
Shawn Landden
Include RFC 3629 and clarify endianness which is left ambiguous
The endianness is suggested by the order the bytes are displayed,
but the text is ambiguous.

========== Changes in man-pages-4.08 ==========

Released: 2016-10-08, Munich

Apologies if I missed anyone!

New and rewritten pages
---

quotactl.2
  Eugene Syromyatnikov [Michael Kerrisk]
    Updated information regarding disk quota flags
      Added information regarding DQF_SYS_FILE flag; updated definition
      of V1_DQF_RSQUASH, which has been defined privately and defined
      publicly as DQF_ROOT_SQUASH.
  Eugene Syromyatnikov
    Updated information regarding XFS-specific quotactl subcommands

Added information regarding
structure definitions used for
XFS-specific subcommands, updated flag constants, added
information regarding ignored syscall arguments, added notes on
usage of kernel UAPI header.
Eugene Syromyatnikov
Additions regarding project quotas
Added information regarding presence of project quotas.

bswap.3
Michael Kerrisk
New page documenting bswap_16(), bswap_32(), and bswap_64()

cgroups.7
Michael Kerrisk
Substantial rewrites, additions, and corrections.

Newly documented interfaces in existing pages
---

readv.2
Michael Kerrisk
Document the pwritev2() RWF_SYNC and RWF_DSYNC flags

proc.5
Michael Kerrisk
Document /proc/PID/seccomp
Jann Horn
Document /proc/[pid]/task/[tid]/children
Document the /proc/[pid]/task/[tid]/children interface from
CRIU, and more importantly, document why it's usually not

a good interface.

New and changed links
---

bswap_16.3
bswap_32.3
bswap_64.3
New link to new bswap.3

Global changes

Various pages
  Michael Kerrisk
    Fix section ordering
      Various pages had sections in an order different from
      that prescribed in man-pages(7).

Various pages
  Michael Kerrisk [Mike Frysinger]
    Consistently use /proc/[pid] (not /proc/PID)

Various pages
  Michael Kerrisk
    Fix order of SEE ALSO entries
      Entries should be ordered first by section, and then alphabetically
      within the section.

Various pages
  Michael Kerrisk
    Order ERRORS alphabetically

Various pages
  Michael Kerrisk
    Remove section number from page self reference
      Fix places where pages refer to the function that they describe
      and include a section number in that reference. Such references
      cause some HTML-rendering tools to create self-references
in the
      page.

A few pages
  Michael Kerrisk
    Eliminate groff "cannot adjust line" warnings

Changes to individual pages
----

pldd.1
  Michael Kerrisk [Carlos O'Donell]
    Note gdb(1) command that can be used as a replacement for pldd
      Taken from Carlos O'Donnell's suggestion in
      https://sourceware.org/bugzilla/show_bug.cgi?id=18035#c2
  Michael Kerrisk
    BUGS: pldd has not worked since glibc 2.19

accept.2
  Michael Kerrisk
    Mention epoll(7) alongside poll()/select()

Michael Kerrisk
Demote discussion of DECNet to NOTES
DECNet ceased to be important long ago...

adjtimex.2
Nikola Forró
Fix kernel version references

chroot.2
Michael Kerrisk
Note user namespace requirements for CAP_SYS_CHROOT

clone.2
Keno Fischer [Josh Triplett]
Adjust syscall prototype and expand CLONE_SETTLS description
Michael Kerrisk [Josh Triplett,
Josh Triplett]
Document raw syscall interfaces on various other architectures
Michael Kerrisk
Change types for 'ptid' and 'ctid' in syscall prototypes
These types changed from 'void *' to 'int *' back in Linux 3.8.
Michael Kerrisk
EINVAL is generated by glibc wrapper for NULL 'fn' or 'child_stack'
Clarify that this error is produced by the wrapper function, not
the underlying system call. In particular, the point is that the
raw system call can accommodate a NULL pointer for 'child_stack'.
Michael Kerrisk [Elliott Hughes]
Make the implications of CLONE_FILES more explicit
If CLONE_FILES is not set, the duplicated FDs nevertheless share
file offset and status flags via the open file description.
Michael Kerrisk
Mention kcmp() under notes

close.2
Michael Kerrisk
Add mention of the close-on-exec flag
Michael Kerrisk
Clarify discussion
noting that close() does not flush buffer cache

epoll_wait.2
Mike Crowe
Clarify that the timeout is measured against CLOCK_MONOTONIC

execve.2
Michael Kerrisk
Mention use of 'environ' to access environment list
Michael Kerrisk

Note that real UID, real GID, and supplementary GIDs are unchanged

fanotify_init.2
Heinrich Schuchardt
Update BUGS information

fcntl.2
Michael Kerrisk
Note an important detail of F_SETOWN permission rules for signals
F_SETOWN records the caller's credentials at the time of
the fcntl() call, and it is these saved credentials that
are used for subsequent permission checks.
Michael Kerrisk
Make the description of the effect of close-on-exec a little clearer
Michael Kerrisk
Clarify that F_GETFD and F_GETFL return flags via the function result

fork.2
Michael Kerrisk
PID of new process also does not match any existing session ID

fsync.2
Michael Kerrisk
SEE ALSO: add pwritev(2)
Since Linux 4.7, pwritev() has flags related to I/O
integrity completion.

getdomainname.2
Michael Kerrisk
Note user namespace requirements for CAP_SYS_ADMIN

getgroups.2
Michael Kerrisk
Note user namespace requirements for CAP_SETGID

gethostname.2
Michael Kerrisk
Note user namespace requirements for CAP_SYS_ADMIN

getrlimit.2
Michael Kerrisk
Note user namespace semantics for CAP_SYS_RESOURCE

getsid.2
Michael Kerrisk
Rework description to be somewhat clearer
Michael Kerrisk
Correct the definition of "session ID"

getunwind.2
  Michael Kerrisk
    Simplify text referring to vdso(7)
      The detail given here is redundant, since this info is also
      in vdso(7).

kcmp.2
  Michael Kerrisk
    Add an example program

kill.2
  Michael Kerrisk
    Note the user namespace requirement for CAP_KILL

killpg.2
   Michael Kerrisk
    Refer reader to kill(2) for signal permission rules

mlock.2
  Sebastian Andrzej Siewior
    Document that fork() after mlock() may be a bad idea in a RT process

mmap.2
  Jann Horn
    Describe treatment of 'offset' for MAP_ANONYMOUS
  Michael Kerrisk [Siward de Groot]
    Small improvement to description of MAP_SHARED
      See https://sourceware.org/bugzilla/show_bug.cgi?id=6887

msgctl.2
msgget.2
msgop.2
semctl.2
semget.2
semop.2
shmctl.2
shmget.2
shmop.2
  Michael Kerrisk
    Note the user namespace requirements for CAP_IPC_OWNER

open.2
  Michael Kerrisk
    Clarify user namespace capability requirements for O_NOATIME
  Michael Kerrisk
    NOTES: kcmp() can be used to test if two FDs refer to the same OFD
  Michael Kerrisk

F2FS support for O_TMPFILE was added in Linux 3.16
Michael Kerrisk
Clarify the rules about how the group ID of a new file is determined

prctl.2
Michael Kerrisk

Refer to proc(5) for effects of dumpability on ownership of /proc/PID/*
Michael Kerrisk
ERRORS: Add EACCES error for PR_SET_SECCOMP-SECCOMP_MODE_FILTER
Michael Kerrisk
Simplify list of cases where "dumpable" attribute is reset
Michael Kerrisk
Note user namespace requirements for PR_CAPBSET_DROP CAP_SETPCAP

readlink.2
Michael Kerrisk [Ursache Vladimir]
Make example program handle links that report a size of zero
Some "magic" symlinks created by the kernel (e.g., those under
/proc and /sys) report 'st_size' as zero. Modify the example
program to handle that possibility.
Michael Kerrisk
Emphasize that truncation of returned buffer generates no error

readv.2
Michael Kerrisk [Christoph Hellwig]
Clarify that RWF_DSYNC and RWF_SYNC apply only to data being written
Michael Kerrisk
Add preadv2() and pwritev2() to NAME line

reboot.2
Michael Kerrisk
Note user
namespace requirements around CAP_SYS_BOOT

rename.2
Michael Kerrisk [Tim Savannah]
Clarify that ERRORS may cause rename to fail (not to be nonatomic)

sched_setaffinity.2
Michael Kerrisk
Note user namespace requirements for CAP_SYS_NICE

seccomp.2
Michael Kerrisk
CAP_SYS_ADMIN is required only in caller's user namespace

select_tut.2

Peter Wu
Fix various issues in example program

seteuid.2
Michael Kerrisk
Note user namespace requirements for CAP_SETUID and CAP_SETGID

setgid.2
Michael Kerrisk
Note user namespace requirements for CAP_SETGID

setpgid.2
Michael Kerrisk
Add a reference to credentials(7)

setpgid.2
setsid.2
Michael Kerrisk
Relocate some text on sessions and sessions leaders
Some text that was in setpgid(2) is better placed in setsid(2).

setresuid.2
Michael Kerrisk
Note user namespace requirements for CAP_SETUID

setreuid.2
Michael Kerrisk

Note user namespace requirements for CAP_SETUID and CAP_SETGID

setsid.2
Michael Kerrisk
Refer to credentials(7) for details for details on controlling terminal
Refer to credentials(7) for details of how a session obtains
a controlling terminal.

set_thread_area.2
Michael Kerrisk
Add get_thread_area() to NAME

setuid.2
Michael Kerrisk
Note user namespace requirements for CAP_SETUID

sigprocmask.2
Keno Fischer
Expand/clarify libc/kernel sigset_t difference

stat.2
  Michael Kerrisk [Ursache Vladimir, Mats Wichmann]
    Improve discussion of 'st_size' for /proc and /sys files
  Michael Kerrisk
    _BSD_SOURCE and _SVID_SOURCE no longer expose nanosecond timestamps

umask.2
  Michael Kerrisk
    Provide a rationale for the existence of /proc/PID/status 'Umask' field

wait.2
  Michael Kerrisk
    Remove erroneous statement that waitpid() is implemented via wait4()
      There is a fallback
 to wait4(), but only if the kernel does
      not provide a waitpid() system call.

bindresvport.3
rcmd.3
ip.7
  Michael Kerrisk
    Note user namespace requirements for CAP_NET_BIND_SERVICE

byteorder.3
  Michael Kerrisk
    SEE ALSO: add bswap(3)

dlopen.3
  Michael Kerrisk
    dlmopen() is still broken in glibc 2.24

endian.3
  Michael Kerrisk
    SEE ALSO: add bswap(3)

ffs.3
  Michael Kerrisk [Stefan Tauner]
    Correct feature test macro requirements

fmemopen.3
  Michael Kerrisk [Rich Felker]
    Remove bogus suggestion to use setbuffer()

getlogin.3
  Michael Kerrisk
    Update feature test macro requirements for cuserid()

getumask.3

Michael Kerrisk
Note that getumask() is still unavailable in glibc 2.24
Michael Kerrisk
Point to umask(2) for a thread-safe way to discover process's umask

mkstemp.3
Quentin Rameau
Fix _POSIX_C_SOURCE value for mkstemp()
The correct _POSIX_C_SOURCE
value has always been 200809L,
not 200112L.

pthread_join.3
Michael Kerrisk [Mats Wichmann]
Note that the caller might do clean up after joining with a thread
Michael Kerrisk []
Clarify use of 'retval' pointer

resolver.3
Ray Bellis
Correct arguments to res_ninit(res_state statep)

strverscmp.3
Michael Kerrisk
Add an example program

wcstombs.3
Michael Kerrisk [Igor Liferenko]
wcsrtombs() does not provide thread-safe interface to same functionality
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360

core.5
Mike Frysinger [Michael Kerrisk]
Add more details for output paths and the crash handler
People sometimes assume that the crash handler runs in the same
context as the crashing process. They would be incorrect :).

proc.5
Mike Frysinger
Clarify the root symlink and mount namespaces
If the target process is in a different
mount namespace, the root
symlink actually shows that view of the filesystem.
Michael Kerrisk [Mike Frysinger]
Expand discussion of /proc/[pid]/root
Add a shell example showing that /proc/[pid]/root is more
than a symlink. Based on an example provided by Mike Frysinger
in an earlier commit message.

Michael Kerrisk
Explain rules determining ownership of /proc/PID/* files
Describe the effect of the "dumpable" attribute on ownership
of /proc/PID files.
Michael Kerrisk
Note effect of 'suid_dumpable' on ownership of /proc/PID files
Michael Kerrisk
Refer to ptrace(2) for info on effect of suid_dumpable on ptraceability
Michael Kerrisk
Add reference to core(5) in discussion of 'suid_dumpable'
Michael Kerrisk
Note that 'suid_dumpable' mode 1 is insecure
Michael Kerrisk
Document /proc/meminfo '+ShmemHugePages' and 'ShmemPmdMapped' fields

Michael Kerrisk
Document /proc/PID/status 'RssAnon', 'RssFile', and 'RssShmem' fields
Michael Kerrisk
Document /proc/PID/status 'HugetlbPages' field
Michael Kerrisk [Zefram]
Clarify that /proc/PID/statm 'shared' field counts *resident* pages
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360
Michael Kerrisk
Add reference to umask(2) in discussion of /proc/PID/status 'Umask'
Michael Kerrisk
Clarify user namespace requirements for /proc/sys/fs/protected_hardlinks
Michael Kerrisk
Note changes to config option governing /proc/[pid]/task/[tid]/children
Michael Kerrisk
Clarify description of /proc/PID/statm 'lib' and 'dt' fields
These fields are always zero since Linux 2.6.
Namhyung Kim [Petr Cermak]
Add description of CLEAR_REFS_MM_HIWATER_RSS
Michael Kerrisk
Update example VM values in /proc/PID/status

capabilities.7
Michael Kerrisk
Add
note about nosuid to file capabilities section
Michael Kerrisk
SEE ALSO: add proc(5)
Michael Kerrisk
SEE ALSO: add setsid(2) and setpgid(2)

glob.7
Michael Kerrisk [Arnaud Gaillard]
Clarify that syntactically incorrect patterns are left unchanged

packet.7
  Michael Kerrisk
    Clarify user namespace requirements for CAP_NET_RAW

pipe.7
  Michael Kerrisk [Patrick McLean]
    Document FIONREAD

raw.7
  Michael Kerrisk
    Clarify user namespace requirements for CAP_NET_RAW
      Also remove mention of UID 0 as a method or creating
      a raw socket. As far as I can tell from reading the
      kernel source (net/ipv4/af_inet.c), this is not true.

socket.7
  Michael Kerrisk
    SIOCSPGRP: refer to fcntl(2) F_SETOWN for correct permission rules
      The permission rules described for SIOCCPGRP are wrong. Rather
      than repeat the rules here, just refer the reader to fcntl(2),
      where
 the rules are described for F_SETOWN.

unix.7
  Michael Kerrisk [Laurent Georget, Ivan Kharpalev]
    Remove mention of recvmsg() from discussion of EPIPE error
      See https://bugzilla.kernel.org/show_bug.cgi?id=137351

ld.so.8
  Michael Kerrisk
    Expand description of LD_DEBUG
      Provide a list of the categories, and note that multiple
      categories can be specified.
  Michael Kerrisk
    Add glibc version for LD_USE_LOAD_BIAS
  Michael Kerrisk
    Clarify text describing whether secure-mode programs preload libraries
  Michael Kerrisk
    Remove discussion of environment variables understood by libc5
      libc5 disappeared long ago, so cease cluttering up this page
      with those ancient details. Thus, remove discussion of the
      following environment variables: LD_AOUT_LIBRARY_PATH,
      LD_AOUT_PRELOAD, LD_KEEPDIR, LD_NOWARN, and LDD_ARGV0.
  Michael Kerrisk
    Remove text with ancient
 libc4 and Linux libc details
  Michael Kerrisk

Remove mention of "ELF only"
Drawing a distinction between ELF-only features versus a,out
ceased to be relevant long ago, so cluttering the page
with "ELF-only" serves no purpose.

========== Changes in man-pages-4.09 ==========

Released: 2016-12-12, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

pkey_alloc.2
  Dave Hansen [Michael Kerrisk]
    New page documenting pkey_alloc(2) and pkey_free(2)

pthread_getattr_default_np.3
  Michael Kerrisk
    New page documenting pthread_getattr_default_np(3) and pthread_setattr_default_np(3)

strfromd.3
  Wainer dos Santos Moschetta
    New page documenting strfromd(3), strfromf(3), and strfroml(3)
      The ISO/IEC TS 18661-1 specifies the strfrom() class
      of functions that convert a float-point value to string.

fuse.4
  Keno Fischer [Michael Kerrisk]
    New page describing /dev/fuse
      This is my writeup of a basic description of /dev/fuse after
      playing with it for a few hours today. It is of course
 woefully
      incomplete, and since I neither have a use case nor am working
      on this code, I will not be in a position to expand it in the
      near future. However, I'm hoping this could still serve as a
      handy reference for others looking at this interface.

[mtk: Notwithstanding the incompleteness of this page,
it's a good base for future extension.]

tmpfs.5
  Michael Kerrisk
    New page documenting the tmpfs filesystem

pkeys.7
  Dave Hansen [Michael Kerrisk]
    New page with overview of Memory Protection Keys

random.7
  Michael Kerrisk [Theodore Ts'o, Nikos Mavrogiannopoulos, Laurent Georget]
    New page providing an overview of interfaces for obtaining randomness
      Contains material extracted from getrandom(2) and random(4),
      as well as new material.

sock_diag.7
  Pavel Emelyanov, Dmitry V. Levin
    New page documenting NETLINK_SOCK_DIAG interface

close.2
getpriority.2
nice.2
timer_create.2
timerfd_create.2
random.4
elf.5
proc.5
sched.7
   Various authors
    These pages also saw substantial updates, as described under
    "Changes to individual pages".

Newly documented interfaces in existing pages
---

mmap.2
  Michael Kerrisk
    Add (much) more detail on MAP_GROWSDOWN

mprotect.2
  Dave Hansen
    Document the new pkey_mprotect() system call
  Eugene Syromyatnikov
    Document PROT_SEM, PROT_SAO, PROT_GROWSUP, and PROT_GROWSDOWN

prctl.2
  Eugene Syromyatnikov
    Document PR_SET_FP_MODE and PR_GET_FP_MODE

perf_event_open.2
  Vince Weaver
    PERF_RECORD_SWITCH support
      Linux 4.3 introduced two new record types for recording context
      switches: PERF_RECORD_SWITCH and PERF_RECORD_SWITCH_CPU_WIDE.
  Vince Weaver
    Add PERF_SAMPLE_BRANCH_CALL branch sample type
  Vince Weaver
    PERF_SAMPLE_BRANCH_IND_JUMP branch_sample_type
      Linux 4.2 added a new branch_sample_type: PERF_SAMPLE_BRANCH_IND_JUMP
  Vince Weaver
    Document PERF_RECORD_MISC_PROC_MAP_PARSE_TIMEOUT
  Vince Weaver
    Document sample_max_stack and /proc/sys/kernel/perf_event_max_stack
      Linux 4.8 added a new sample_max_stack parameter, as well as
      /proc/sys/kernel/perf_event_max_stack which limits it and a new
      EOVERFLOW error return.
  Dave Hansen
    PERF_RECORD_LOST_SAMPLES record type
      Linux 4.2 added a new record type: PERF_RECORD_LOST_SAMPLES
      It is generated when hardware samples (currently only Intel PEBS)
      are lost.

ptrace.2
  Michael Kerrisk
    Document PTRACE_SECCOMP_GET_FILTER
  Michael Kerrisk
    Document PTRACE_GET_THREAD_AREA and PTRACE_SET_THREAD_AREA

namespaces.7
  Michael Kerrisk [Eric W. Biederman]
    Document the NS_GET_USERNS and NS_GET_PARENT ioctl() operations

sched.7
  Michael Kerrisk [Mike Galbraith]
    Document the autogroup feature
      Includes documenting autogroup nice value
  Michael Kerrisk
    Autogrouping breaks traditional semantics of nice in many cases
      When autogrouping is enabled (the default in many distros)
      there are many traditional use cases where the nice value
      ceases to have any effect.
  Michael Kerrisk
    Add a subsection on nice value and group scheduling

New and changed links
---

killpg.2
  Michael Kerrisk
    New link to relocated killpg(3) page

pkey_free.2
  Michael Kerrisk
    New link to new pkey_alloc(2) page

pkey_mprotect.2
  Michael Kerrisk
    New link to mprotect(2)

pthread_setattr_default_np.3
  Michael Kerrisk
    New link to new pthread_getattr_default_np.3

strfromf.3
  Wainer dos Santos Moschetta
    New link to strfromd(3)

strfroml.3
  Wainer dos Santos Moschetta
    New link to strfromd(3)

Global changes

Various
 pages
  Michael Kerrisk
    Remove ancient libc4 and libc5 details
      It's nearly 20 years now since Linux libc went away.
      Remove some ancient details from the pages.

Various pages
  Michael Kerrisk
    Add cross references to new tmpfs(5) page

Various pages
  Michael Kerrisk
    Change section number from 2 to 3 in killpg() references

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Remove editorializing comments about 'socklen_t'
  Michael Kerrisk
    Simplify the discussion of 'socklen_t'
      We don't really need to list the old OSes in this discussion.

adjtimex.2
clock_getres.2
gettimeofday.2
  Michael Kerrisk
    SEE ALSO: add hwclock(8)

bind.2
connect.2
getpeername.2
getsockname.2
getsockopt.2
  Michael Kerrisk
    Replace discussion of 'socklen_t' with reference to accept(2)
      The discussion of 'socklen_t' editorializes and is repeated

   across several pages. Replace it with a reference to accept(2),
      where some details about this type are provided.

chmod.2
  Michael Kerrisk
    SEE ALSO: add chmod(1)

chown.2
  Michael Kerrisk
    SEE ALSO: add chgrp(1) and chown(1)

chroot.2
  Michael Kerrisk
    SEE ALSO: add chroot(1)

clone.2
  Michael Kerrisk
    The CLONE_*_SETTID operations store TID before return to user space
      CLONE_PARENT_SETTID and CLONE_CHILD_SETTID store the new
      TID before clone() returns to user space

close.2

Michael Kerrisk [Daniel Wagner]
Rework and greatly extend discussion of error handling
Further clarify that an error return should be used only
for diagnostic or remedial purposes.
Michael Kerrisk
Other UNIX implementations also close the FD, even if reporting an error
Looking at some historical source code suggests
that the "close() always closes regardless of error
return"
behavior has a long history, predating even POSIX.1-1990.
Michael Kerrisk
Note that future POSIX plans to require that the FD is closed on error
See http://austingroupbugs.net/view.php?id=529#c1200.
Michael Kerrisk
Clarify the variation in EINTR behavior per POSIX and other systems

fallocate.2
Darrick J. Wong
Document behavior with shared blocks
Note that FALLOC_FL_UNSHARE may use CoW to unshare blocks to
guarantee that a disk write won't fail with ENOSPC.

fanotify_mark.2
Heinrich Schuchardt
Mention FAN_Q_OVERFLOW
To receive overflow events it is necessary to set this bit
in fanotify_mark().

fcntl.2
Michael Kerrisk
F_GETPIPE_SZ allocates next power-of-2 multiple of requested size
Add some detail about current implementation, since this helps
the user understand the effect of the user pipe limits added in
Linux
4.5 (described in pipe(7)).
Michael Kerrisk
Add EPERM that occurs for F_SETPIPE_SZ when user pipe limit is reached

fideduperange.2
Darrick J. Wong [Omar Sandoval]
Fix the discussion of maximum sizes
Fix the discussion of the limitations on the dest_count and
src_length parameters to the fideduperange ioctl() to reflect
what's actually in the kernel.

fsync.2
Michael Kerrisk
SEE ALSO: add fileno(3)

fileno(3) is useful if one is combining fflush(3)/fclose(3)
and fsync(2).
Michael Kerrisk
SEE ALSO: add fflush(3)

getgroups.2
Andrew Clayton
FTM requirements fix for setgroups(2)

gethostname.2
Michael Kerrisk
SEE ALSO: add hostname(1)

get_mempolicy.2
Michael Kerrisk
Note that 'addr' must be NULL when 'flags' is 0

getpriority.2
Michael Kerrisk
Warn that autogrouping voids the effect of 'nice' in many cases
Refer the reader
to sched(7) for the details.
Michael Kerrisk
Expand discussion of getpriority() return value
Michael Kerrisk
The nice value supplied to setpriority() is clamped
Note that the nice value supplied to setpriority() is clamped
to the permitted range.
Michael Kerrisk
Improve description of setpriority() return value

getpriority.2
sched.7
Michael Kerrisk
Move nice value details from getpriority(2) to sched(7)
Centralizing these details in sched(7) is more logical.

getrandom.2
random.4
Michael Kerrisk
Consolidate and improve discussion on usage of randomness
Currently, recommendations on how to consume randomness are
spread across both getrandom(2) and random(4) and the general
opinion seems to be that the text in getrandom(2) does a
somewhat better job. Consolidate the discussion to a single
page (getrandom(2)) and address some of the
concerns
expressed about the existing text in random(4).

[Some of this text ultimately made its way into the new
random(7) page.]

getrandom.2
Michael Kerrisk
Remove material incorporated into random(7)
Michael Kerrisk
Note advantages of fact that getrandom() doesn't use file descriptors
Michael Kerrisk
Clarify that getrandom() is not "reading" from /dev/{random,urandom}

getrlimit.2
Michael Kerrisk
Refer to sched(7) in discussion of RLIMIT_RTPRIO and RLIMIT_RTTIME
Michael Kerrisk
Describe the range of the RLIMIT_NICE limit
Michael Kerrisk
Refer to sched(7) in the discussion of RLIMIT_NICE
Michael Kerrisk
SEE ALSO: add credentials(7)

ioctl_ficlonerange.2
ioctl_fideduperange.2
Darrick J. Wong
Clarify the behavior of the FIDEDUPERANGE ioctl

kill.2
Michael Kerrisk
SEE ALSO: add kill(1)

mbind.2
Michael Kerrisk [Christoph Lameter]

Memory policy is a per-thread attribute, not a per-process attribute

mbind.2
set_mempolicy.2
Piotr Kwapulinski [Christoph Lameter, Michael Kerrisk]
Add MPOL_LOCAL NUMA memory policy documentation

mount.2
Michael Kerrisk
SEE ALSO: add mountpoint(1)

mprotect.2
Michael Kerrisk
CONFORMING TO: note that pkey_mprotect() is Linux-specific

nice.2
  Michael Kerrisk
    Warn that autogrouping voids the effect of 'nice' in many cases
  Michael Kerrisk
    CONFORMING TO: Remove an ancient SVr4 detail on errno values
  Michael Kerrisk
    Rework discussion of nice() return value and standards conformance
      Make the text a little clearer. In particular, clarify that the
      raw system call (still) returns 0 on success.
  Michael Kerrisk
    Clarify the range of the nice value, and note that it is clamped
  Michael Kerrisk
    Add mention of RLIMIT_NICE
  Michael Kerrisk
    Move discussion of handling the
 -1 success return to RETURN VALUE
      This detail was rather hidden in NOTES. Also, rework the text
      a little.
  Michael Kerrisk
    Clarify that nice() changes the nice value of the calling *thread*
  Michael Kerrisk
    Add "C library/kernel differences" subsection heading
  Michael Kerrisk
    Add reference to sched(7) for further details on the nice value

open.2
  Michael Kerrisk
    ubifs supports O_TMPFILE starting with Linux 4.9
  Michael Kerrisk
    Document ENOMEM that occurs when opening FIFO because of pipe hard limit

perf_event_open.2
  Vince Weaver
    Add cycles field in LBR records
      Linux 4.3 added a cycles field to the PERF_SAMPLE_BRANCH_STACK
      last branch records.
  Vince Weaver
    Update time_shift sample code
      Linux 4.3 improved the accuracy of the clock/ns conversion routines.
  Michael Kerrisk
    Clarify the use of signals for capturing overflow events

pipe.2
   Michael Kerrisk
    Add ENFILE error for user pipe hard limit reached

prctl.2
  Eugene Syromyatnikov

Some additional details regarding the PR_GET_UNALIGNED operation
Eugene Syromyatnikov
Note the output buffer size for PR_GET_TID_ADDRESS operation on x32/n32
Michael Kerrisk
Remove numeric definitions of PR_FP_MODE_FR and PR_FP_MODE_FRE bits

ptrace.2
Keno Fischer
Document the behavior of PTRACE_SYSEMU stops
Keno Fischer
Expand documentation PTRACE_EVENT_SECCOMP traps
In Linux 4.8, the order of PTRACE_EVENT_SECCOMP and
syscall-entry-stops was reversed. Document both behaviors and
their interaction with the various forms of restart.

quotactl.2
Eugene Syromyatnikov
Describe Q_XQUOTASYNC, which is present but no-op in recent kernels

reboot.2
Wang Long
Note errors for invalid commands inside a PID namespace

sched_setattr.2
Michael Kerrisk
Fix cross reference
for further info on the nice value
The information moved from getpriority(2) to sched(7).

sched_setscheduler.2
Michael Kerrisk [Daniel Berrange]
Mention SCHED_DEADLINE
Give the reader a clue that there is another policy
available that can't be set via sched_setscheduler(2).

seccomp.2
Jann Horn
Document changed interaction with ptrace
Before kernel 4.8, the seccomp check will not be run again
after the tracer is notified. Fixed in kernel 4.9.
Michael Kerrisk
NOTES: mention ptrace(PTRACE_SECCOMP_GET_FILTER) to dump seccomp filters

set_mempolicy.2
Michael Kerrisk
Reformat list of modes

setsid.2

Michael Kerrisk
Improve wording of text on calling setsid() after fork()+_exit()
Michael Kerrisk
SEE ALSO: add sched(7)
List sched(7), because setsid(2) is part of the machinery
of autogrouping.

sigaction.2
Dave Hansen

Further documentation of SEGV_PKUERR

signalfd.2
Michael Kerrisk
Document ssi_addr_lsb field of signalfd_siginfo

symlink.2
Michael Kerrisk
SEE ALSO: add namei(1)

sync_file_range.2
Michael Kerrisk
Fix description for ESPIPE error
A file descriptor can't refer to a symbolic link.

syscalls.2
Michael Kerrisk
Add pkey_alloc(), pkey_free(), and pkey_mprotect()
New system calls in Linux 4.9.
Michael Kerrisk
Add ppc_swapcontext(2)

timer_create.2
Michael Kerrisk
Document CLOCK_BOOTTIME
Michael Kerrisk
Document CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

timerfd_create.2
Michael Kerrisk
Document CLOCK_BOOTTIME, CLOCK_REALTIME_ALARM, and CLOCK_BOOTTIME_ALARM
Michael Kerrisk
Document TFD_TIMER_CANCEL_ON_SET
Michael Kerrisk
Rework discussion on relative and absolute timers

unlink.2
Michael Kerrisk

SEE ALSO: add unlink(2)

utime.2
utimensat.2
Michael Kerrisk
SEE ALSO: add touch(1)

wait.2
Michael Kerrisk
On some architectures, waitpid() is a wrapper that calls wait4().

atof.3
Wainer dos Santos Moschetta
SEE ALSO: add strfromd(3)

ctime.3
Michael Kerrisk
Add ERRORS section
Michael Kerrisk
RETURN VALUE: describe return values more explicitly

errno.3
Michael Kerrisk [Igor Liferenko]
Add glibc error text for EILSEQ

fclose.3
fflush.3
Michael Kerrisk
SEE ALSO: add fileno(2)

getlogin.3
Michael Kerrisk
Remove deprecated _REENTRANT from FTM requirements for getlogin_r()
Michael Kerrisk
SEE ALSO: add logname(1)

isalpha.3
Michael Kerrisk
Note circumstances where 'c' must be cast to 'unsigned char'

killpg.3
Michael Kerrisk
Move killpg.2 from section to section 3

mallopt.3
Michael Kerrisk [Siddhesh Poyarekar]
Document 0 as default value of M_ARENA_MAX and explain its meaning
Michael

Kerrisk
    Improve description of M_ARENA_TEST
  Michael Kerrisk
    Document default value for M_ARENA_TEST
  Michael Kerrisk
    Note default value of M_PERTURB

mbsnrtowcs.3
  Michael Kerrisk [Igor Liferenko]
    Note behavior of mbsnrtowcs() for an incomplete character
      Note the behavior of mbsnrtowcs() when an incomplete character
      is found at end of the input buffer.

mbstowcs.3
wcstombs.3
  Michael Kerrisk [Igor Liferenko]
    Improve language relating to "initial state"
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=839705

mbstowcs.3
  Michael Kerrisk [Igor Liferenko]
    Add missing include to example program
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=845172

mq_close.3
  Michael Kerrisk
    DESCRIPTION: add reference to mq_notify(3)

mq_open.3
  Eugene Syromyatnikov
    Clarification regarding usage of mq_flags attribute in mq_open()

mq_receive.3
mq_send.3
   Eugene Syromyatnikov
    Clarification regarding reasons behind EBADF

printf.3
  Wainer dos Santos Moschetta
    SEE ALSO: add strfromd(3)

pthread_attr_init.3
  Michael Kerrisk
    SEE ALSO: add pthread_setattr_default_np(3)

pthread_create.3
  Michael Kerrisk
    SEE ALSO: add pthread_setattr_default_np(3)

ptsname.3
  Michael Kerrisk
    Note that ptsname_r() is proposed for future inclusion in POSIX.1
  Michael Kerrisk
    CONFORMING TO:: clarify that only ptsname() is standardized (so far)

remainder.3
  Michael Kerrisk
    Note fix to remainder(nan(""), 0) handling
      The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6779
      has been fixed in glibc 2.15.
  Michael Kerrisk
    Document fixes for EDOM handling for range errors
      The bug http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783
      was fixed in glibc 2.15.

setjmp.3
  Michael Kerrisk
    _BSD_SOURCE must be *explicitly*
 defined to get BSD setjmp() semantics

strtod.3
  Wainer dos Santos Moschetta
    SEE ALSO: add strfromd(3)

tgamma.3
  Michael Kerrisk
    Document fixes to give ERANGE for underflow range error
      The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6810
      was fixed in glibc 2.19.

timegm.3
  Michael Kerrisk
    Add ERRORS section
  Michael Kerrisk [Vincent Lefevre]
    Add RETURN VALUE section

tmpnam.3
  Michael Kerrisk
    Properly document tmpnam_r(3)

toupper.3
  Michael Kerrisk
    Note circumstances where 'c' must be cast to 'unsigned char'

ttyname.3
  Michael Kerrisk

SEE ALSO: add tty(1)

console_ioctl.4
Michael Kerrisk
Add brief descriptive text for KDGKBMODE modes
Miroslav Koskar
Add K_OFF keyboard mode

random.4
Michael Kerrisk
Add reference to new random(7) page
Michael Kerrisk
Rework formatting of /proc interfaces
Make the information
easier to parse by formatting the file
descriptions as hanging lists. No significant content changes.
Nikos Mavrogiannopoulos [Laurent Georget]
Provide a more accurate description of /dev/urandom
This documents the "property" of /dev/urandom of being able to
serve numbers prior to pool being initialized, and removes any
suggested usages of /dev/random which are disputable
(i.e., one-time pad). Document the fact /dev/random is only
suitable for applications which can afford indeterminate delays
since very few applications can do so. Smooth the alarming
language about a theoretical attack, and mention that its
security depends on the cryptographic primitives used by the
kernel, as well as the total entropy gathered.
Michael Kerrisk [Laurent Georget, Theodore Ts'o]
Improve discussion of /dev/urandom, blocking reads, and signals
The
text currently states that O_NONBLOCK has no effect for
/dev/urandom, which is true. It also says that reads from
/dev/urandom are nonblocking. This is at the least confusing.
If one attempts large reads (say 10MB) from /dev/urandom
there is an appreciable delay, and interruption by a signal
handler will result in a short read. Amend the text to
reflect this.

elf.5
Mike Frysinger
Add subsection headers at major points
The current pages dumps all the content into one big DESCRIPTION
with no real visual break up between logically independent
sections. Add some subsection headers to make it easier to
read and scan.
Mike Frysinger
Document notes
Document the Elf{32,64}_Nhdr structure, the sections/segments that

contain notes, and how to interpret them. I've been lazy and only
included the GNU extensions here,
especially as others are not
defined in the elf.h header file as shipped by glibc.

filesystems.5
Michael Kerrisk
SEE ALSO: add fuse(4)

proc.5
Dave Hansen
Describe new ProtectionKey 'smaps' field
Michael Kerrisk
Add example ProtectionKey output for 'smaps' file
Michael Kerrisk
Add pointers to sched(7) for autogroup files
sched(7) describes /proc/sys/kernel/sched_autogroup_enabled
and /proc/PID/autogroup.
Michael Kerrisk
Add /proc/sys/fs/pipe-user-pages-{hard,soft} entries
Michael Kerrisk
Improve description of the KernelPageSize and MMUPageSize 'smaps' fields
Michael Kerrisk
Rework 'smaps' ProtectionKey text and add some details
Michael Kerrisk
Mention lslocks(8) in discussion of /proc/locks
Michael Kerrisk
Describe Shmem field of /proc/meminfo
Michael Kerrisk
Rework 'smaps' VmFlags text, and add kernel version and example output

proc.5
pipe.7
Michael Kerrisk
Move /proc/sys/fs/pipe-max-size content from proc(5) to pipe(7)

resolv.conf.5
Carlos O'Donell [Florian Weimer]
Timeout does not map to resolver API calls

utmp.5
Michael Kerrisk
SEE ALSO: add users(1)

capabilities.7
Michael Kerrisk
CAP_SYS_ADMIN governs ptrace(2) PTRACE_SECCOMP_GET_FILTER
Michael Kerrisk

CAP_SYS_ADMIN allows privileged ioctl() operations on /dev/random

cgroups.7
Michael Kerrisk
Add details on 'cpu' CFS bandwidth control

credentials.7
Michael Kerrisk
SEE ALSO: add setpriv(1)
Michael Kerrisk
SEE ALSO: add shadow(5)

feature_test_macros.7
Michael Kerrisk [Zack Weinberg]
Note that _REENTRANT and _THREAD_SAFE are now deprecated
Michael Kerrisk
Note that "cc -pthread" defines _REENTRANT

inotify.7
Michael Kerrisk
Note a subtlety of event generation when monitoring a directory

libc.7
Michael Kerrisk

Add a note on why glibc 2.x uses the soname libc.so.6
Michael Kerrisk
Add a few historical details on Linux libc4 and libc5
Just for historical interest. Details taken from
http://www.linux-m68k.org/faq/glibcinfo.html.

mdoc.7
Michael Kerrisk
Add a cross-reference to groff_mdoc(7)

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add user_namespaces(7)

mount_namespaces.7
user_namespaces.7
Michael Kerrisk
Migrate subsection on mount restrictions to mount_namespaces(7)
This section material in the user_namespaces(7) page was written
before the creation of the mount_namespaces(7) manual page.
Nowadays, this material properly belongs in the newer page.

netlink.7

Dmitry V. Levin
Document NETLINK_INET_DIAG rename to NETLINK_SOCK_DIAG
Dmitry V. Levin
Add references to sock_diag(7)

pid_namespaces.7
Michael Kerrisk
Refer to namespaces(7) for information
about NS_GET_PARENT

pipe.7
Michael Kerrisk, Vegard Nossum [Vegard Nossum]
Document /proc files controlling memory usage by pipes
Document /proc/sys/fs/pipe-max-size and
/proc/sys/fs/pipe-user-pages-{soft,hard}.
Michael Kerrisk
Document pre-Linux 4.9 bugs in pipe limit checking

sched.7
Michael Kerrisk
Add a new introductory paragraph describing the nice value
Michael Kerrisk
Add more precise details on CFS's treatment of the nice value
Michael Kerrisk
Mention RLIMIT_NICE in the discussion of the nice value
Michael Kerrisk
NOTES: mention cgroups CPU controller
Michael Kerrisk
Add introductory sentence mentioning CFS scheduler
Michael Kerrisk
Add nice(2), getpriority(2), and setpriority(2) to API list
Michael Kerrisk
Make it clearer that SCHED_OTHER is always scheduled below real-time
Michael Kerrisk
Give the page a more generic NAME

The page isn't just about APIs.

standards.7
Michael Kerrisk
POSIX.1-2016 (POSIX.1-2008 TC2) has now been released

symlink.7
Michael Kerrisk
SEE ALSO: add namei(1)

uri.7
Jakub Wilk

Use "example.com" as example domain

user_namespaces.7
  Michael Kerrisk
    Add reference to namespaces(7) for NS_GET_USERNS operation
  Michael Kerrisk
    Add reference to namespaces(7) for NS_GET_PARENT operation

========== Changes in man-pages-4.10 ==========

Released: 2017-03-13, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adam Martindale <adam.john.martindale@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

add_key.2
  Michael Kerrisk [Eugene Syromyatnikov, David Howells]
    Major improvements and additions
      The page has doubled in length.

ioctl_iflags.2
  Michael Kerrisk
    New page describing inode flags and ioctl() operations

ioctl_ns.2
  Michael Kerrisk
    New page created by splitting ioctl(2) operations out of namespaces(7)

keyctl.2
  Michael Kerrisk, Eugene Syromyatnikov [David Howells, Mat Martineau]
     A vast number of additions and improvements
       The
 page has gone from somewhat over 100 lines to well over
       1000 lines and now more or less documents the complete interface
       provided by this system call.

getentropy.3
  Michael Kerrisk

New page documenting getentropy(3)
getentropy(3) is added to glibc in version 2.25.

keyrings.7
David Howells
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk [Eugene Syromyatnikov, David Howells]
Very many additions and improvements
Michael Kerrisk
Document /proc/keys
Michael Kerrisk
Document /proc/sys/kernel/keys/persistent_keyring_expiry
Michael Kerrisk
Document /proc/key-users
Michael Kerrisk
Document /proc/sys/kernel/keys/gc_delay
Michael Kerrisk
Document /proc files that define
key quotas

persistent-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various clean-ups and additions

process-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various additions and improvements

request_key.2
Michael Kerrisk, Eugene Syromyatnikov [David Howells]
Very many additions and improvements
The page is now three times its former length.

session-keyring.7
Michael Kerrisk

New page (written by David Howells) adopted from keyutils
Since
this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various reworking and additions

signal-safety.7
Michael Kerrisk
New page created by migrating the signal-safety discussion from
signal(7). Along the way some more details got added.
Michael Kerrisk [KASAKI Motohiro]
Note async-signal-safety problems caused by pthread_atfork()
See https://bugzilla.kernel.org/show_bug.cgi?id=25292
Michael Kerrisk [KASAKI Motohiro]
Note glibc deviations from POSIX requirements
See https://bugzilla.kernel.org/show_bug.cgi?id=25292

thread-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various rewordings and additions

user-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various reworking and improvements

user-session-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various rewordings and additions

Newly documented interfaces in existing pages

---

bzero.3
  Michael Kerrisk
    Document explicit_bzero() (new in glibc 2.25)
      Also, reword the description of bzero somewhat.

proc.5
  Michael
 Kerrisk
    Document /proc/sys/vm/user_reserve_kbytes
  Michael Kerrisk
    Document /proc/sys/vm/admin_reserve_kbytes
  Michael Kerrisk
    Document /proc/sys/fs/mount-max
  Michael Kerrisk
    Document /proc/PID/status 'NoNewPrivs' field

New and changed links
---

explicit_bzero.3
  Michael Kerrisk
    New link to bzero.3

Changes to individual pages
---

chmod.2
  Michael Kerrisk
    ERRORS: add EPERM error for immutable/append-only file

chown.2
  Michael Kerrisk
    ERRORS: add EPERM error for immutable/append-only file

chroot.2
  Michael Kerrisk
    SEE ALSO: add switch_root(8)

clock_getres.2
  Michael Kerrisk
    Note POSIX.1 requirements re relative time services and CLOCK_REALTIME

clone.2
  Michael Kerrisk

clone() does not execute fork handlers

execve.2
Michael Kerrisk
Rework text describing when effective IDs aren't transformed by execve()
Michael
Kerrisk
File capabilities can be ignored for the same reasons as set-UID/set-GID
Michael Kerrisk
The 'no_new_privs' bit inhibits transformations of the effective IDs

fork.2
Michael Kerrisk
cgroup PIDs controller may also be trigger for EAGAIN error

fsync.2
Michael Kerrisk
SEE ALSO: add posix_fadvise(2)

getrandom.2
Michael Kerrisk
Remove getentropy(3) details and defer to new getentropy(3) page
Michael Kerrisk
Starting with glibc 2.25, getrandom() is now declared in <sys/random.h>
Michael Kerrisk
glibc support was added in version 2.25

getrlimit.2
Michael Kerrisk
Document role of RLIMIT_NOFILE for FD passing over UNIX sockets

getxattr.2
listxattr.2
Andreas Gruenbacher
Document E2BIG errors

inotify_add_watch.2
Michael Kerrisk
Note "inode" as a synonym for "filesystem object"
Consistent with clarifications just made in inotify(7).

ioctl.2
Michael Kerrisk
SEE ALSO: add ioctl_ns(2), ioctl_iflags(2)

ioctl_fat.2
Brian Masney
Correctly reference volume ID instead of volume label

kcmp.2
  Michael Kerrisk
    Mention the clone(2) flags relating to various kcmp() 'type' values
  Michael Kerrisk
    KCMP_FILE: note reasons why FDs may refer to same open file description

link.2
  Michael Kerrisk
    When using linkat() AT_EMPTY_PATH, 'olddirfd' must not be a directory
  Michael Kerrisk
    ERRORS: add EPERM for immutable/append-only files
  Michael Kerrisk
    Note limits where EMLINK is encountered on ext4 and Btrfs

listxattr.2
  Michael Kerrisk
    Eliminate extra E2BIG error text
      Andreas' patch added a second description of E2BIG that
      was (mostly) more detailed than the existing text. Combine
      the two texts.

lseek.2
  Michael Kerrisk
    O_APPEND overrides the effect of lseek() when doing file writes
  Michael Kerrisk
    Remove ancient
 info about whence values and return values on old systems
  Michael Kerrisk
    Remove slightly bogus advice about race conditions
      The page already (by now) contains a reference to open(2)
      for a discussion of open file descriptions. Leave it at that,
      since the reader can then deduce how things work.

madvise.2
  Michael Kerrisk
    Note that madvise() is generally about improving performance

mbind.2
  Krzysztof Kulakowski [Michael Kerrisk]
    Update MPOL_BIND description
      The behavior of MPOL_BIND changed in Linux 2.6.26.

mincore.2
  Michael Kerrisk
    SEE ALSO: add madvise(2), posix_fadvise(2), posix_madvise(3)

mlock.2

Michael Kerrisk
Note pre-4.9 bug in RLIMIT_MEMLOCK accounting for overlapping locks
Michael Kerrisk
SEE ALSO: add mincore(2)

mmap.2
Michael Kerrisk
mincore(2) can be used to discover which pages of a mapping are resident

mount.2
Michael Kerrisk [Rob
Landley]
Refer to mount_namespaces(7) for details of default propagation type

nanosleep.2
Michael Kerrisk
Describe "creeping sleep" problem
nanosleep() has a problem if used in a program that catches
signals and those signals are delivered at a very high rate.
Describe the problem, and note that clock_nanosleep(2)
provides a solution.
Michael Kerrisk
BUGS: explicitly note that the Linux 2.4 bug was fixed in Linux 2.6

open.2
Michael Kerrisk
Make it clear that O_APPEND implies atomicity
Michael Kerrisk
Clarify distinction between file creation flags and file status flags
Michael Kerrisk
Note ambiguity of ELOOP error when using O_NOFOLLOW
Michael Kerrisk
Restructure O_NOFOLLOW text for easier parsing
Michael Kerrisk
Clarify that O_NOFOLLOW is now in POSIX

poll.2
select.2
Nicolas Biscos
Add a reference to the sigset discussion in sigprocmask(2)
A little while back, I added a note to sigprocmask.2 that
discussed the difference between the libc's and the kernel's
sigset_t structures. I added that note, because I saw this being
done wrong in a tool tracing system calls (causing subtle bugs).
As it turns out, the same bugs existed for ppoll and pselect, for
the same reason. I'm hoping by adding the reference here, future
writers of similar tools will find that discussion and not make
the same mistake.

posix_fadvise.2
  Michael Kerrisk
    Mention /proc/sys/vm/drop_caches
      It may be helpful for the reader of this page to know about
      /proc/sys/vm/drop_caches.
  Michael Kerrisk
    Reorganize some text
      Details for various flags were hidden under NOTES.
      Move them to DESCRIPTION, to make the details more
      obvious.
  Michael Kerrisk
    One can use open(2)
 + mmap(2) + mincore(2) as a 'fincore'
      Note that open(2) + mmap(2) + mincore(2) can be used to get a view
      of which pages of a file are currently cached.
  Michael Kerrisk [Maik Zumstrull]
    Note that POSIX_FADV_DONTNEED *may* try to write back dirty pages
  Michael Kerrisk
    SEE ALSO: mincore(2)

prctl.2
  Michael Kerrisk
    Clarify that the ambient capability set is per-thread
  Keno Fischer
    Be more precise in what causes dumpable to reset
  Michael Kerrisk
    The no_new_privs setting is per-thread (not per-process)
  Michael Kerrisk
    Mention /proc/PID/status 'NoNewPrivs' field
  Michael Kerrisk
    Add reference to seccomp(2) in discussion of PR_SET_NO_NEW_PRIVS

ptrace.2
  Omar Sandoval
    Clarify description of PTRACE_O_EXITKILL

read.2
  Michael Kerrisk [Kai NODA]
    Rework text in DESCRIPTION that talks about limits for 'count'
      See https://bugzilla.kernel.org/show_bug.cgi?id=86061
   Michael Kerrisk [Steven Luo]
    Remove crufty text about EINTR and partial read
      Remove bogus text saying that POSIX permits partial read
      to return -1/EINTR on interrupt by a signal handler.
      That statement already ceased to be true in SUSv1 (1995)!

      See https://bugzilla.kernel.org/show_bug.cgi?id=193111

readv.2
  Michael Kerrisk
    Remove generic advice about mixing stdio and syscalls on same file
      There is nothing specific to readv()/writev() about this advice.

recv.2
  Michael Kerrisk [Vincent Bernat]
    Remove duplicate paragraph
      man-pages-1.34 included changes that duplicated an existing
      paragraph. Remove that duplicate.
  Michael Kerrisk
    SEE ALSO: add ip(7), ipv6(7), tcp(7), udp(7), unix(7)

remap_file_pages.2
  Michael Kerrisk
    remap_file_pages() has been replaced by a slower in-kernel emulation

send.2
  Michael Kerrisk
    SEE ALSO: add ipv6(7),
 socket(7), unix(7)

setxattr.2
  Michael Kerrisk
    ERRORS: add EPERM for immutable/append-only files

signalfd.2
  Michael Kerrisk
    signalfd() doesn't play well with helper programs spawned by libraries
      See https://lwn.net/Articles/415684/.
  Michael Kerrisk
    signalfd can't be used to receive synchronously generated signals
      Signals such as the SIGSEGV that results from an invalid
      memory access can be caught only with a handler.

stat.2
  Michael Kerrisk
    EXAMPLE: extend program to also show ID of the containing device
  Michael Kerrisk
    NOTES: mention fstatat() AT_NO_AUTOMOUNT in discussion of automounting

statfs.2
  Namhyung Kim
    Add more filesystem types
      Add missing magic numbers from /usr/include/linux/magic.h

syscall.2

```
  Mike Frysinger
    Add endian details with 64-bit splitting
      Architectures that split 64-bit values across register pairs
      usually
 do so according to their C ABI calling convention (which
      means endianness).  Add some notes to that effect, and change the
      readahead example to show a little endian example (since that is
      way more common than big endian).

      Also start a new list of syscalls that this issue does not apply
      to.
  Mike Frysinger
    Note parisc handling of aligned register pairs
      While parisc would normally have the same behavior as ARM/PowerPC,
      they decide to write shim syscall stubs to unpack/realign rather
      than expose the padding to userspace.

tkill.2
  Jann Horn
    Document EAGAIN error for real-time signals

truncate.2
  Michael Kerrisk
    Note use of ftruncate() for POSIX shared memory objects

unlink.2
  Michael Kerrisk
    ERRORS: add EPERM error for immutable/read-only files

vfork.2
  Michael Kerrisk
    Explain why the child should not call exit(3)
  Michael Kerrisk
     Another reason to use vfork() is to avoid overcommitting memory
  Michael Kerrisk
    Note some caveats re the use of vfork()
      Inspired by Rich Felker's post at http://ewontfix.com/7/.
      See also https://sourceware.org/bugzilla/show_bug.cgi?id=14749 and
      See also https://sourceware.org/bugzilla/show_bug.cgi?id=14750.
  Michael Kerrisk
    SEE ALSO: add _exit(2)

write.2
  Michael Kerrisk  [Kai NODA]
    Alert the reader that there is a limit on 'count'
      See https://bugzilla.kernel.org/show_bug.cgi?id=86061

aio_suspend.3
```

Michael Kerrisk
Note that the glibc implementation is not async-signal-safe
See https://sourceware.org/bugzilla/show_bug.cgi?id=13172

backtrace.3
Michael Kerrisk
SEE ALSO: add addr2line(1) and gdb(1)

bcmp.3
bcopy.3
bzero.3
memccpy.3
memchr.3
memcmp.3
memcpy.3
memfrob.3
memmem.3
memmove.3
memset.3
Michael Kerrisk
SEE ALSO: add bstring(3)

exec.3
Michael
Kerrisk
execl() and execle() were not async-signal-safe before glibc 2.24

fopen.3
Michael Kerrisk [Helmut Eller]
Describe freopen() behavior for NULL pathname argument
See https://bugzilla.kernel.org/show_bug.cgi?id=191261
Michael Kerrisk
Note the open(2) flags that correspond to the 'mode' argument
Michael Kerrisk
Change argument name: 'path' to 'pathname'
For consistency with open(2).
Michael Kerrisk
Add subsection headings for each function

fts.3
Michael Kerrisk
Use better argument name for fts_children() and fts_set()
Michael Kerrisk
Fix minor error in FTSENT structure definition
Michael Kerrisk
Improve explanation of 'fts_errno'
Michael Kerrisk
Give a hint that there are further fields in the FTSENT structure

Michael Kerrisk
Clarify meaning of zero as 'instr' value for fts_set()

ftw.3
Michael Kerrisk
Correctly handle use
of stat info for FTW_NS in example program
Michael Kerrisk
Clarify that stat buffer is undefined for FTW_NS

getline.3
Michael Kerrisk
EXAMPLE: better error handling
Michael Kerrisk [Kent Fredic]
EXAMPLE: handle null bytes in input
Jann Horn
Document ENOMEM error case
see the error handling in libio/iogetdelim.c
Michael Kerrisk
EXAMPLE: specify file to be opened as command-line argument
Michael Kerrisk
Use better variable name in example program

getmntent.3
Michael Kerrisk [Anders Thulin]
Prefer '\\' as the escape to get a backslash
See https://bugzilla.kernel.org/show_bug.cgi?id=191611

getopt.3
Michael Kerrisk
Reword discussion of error handling and reporting
The existing description was hard to understand. Break
it into a bullet list that separates out the details
in a manner that is easier to parse.
Michael Kerrisk

Correct details of use of <stdio.h> to get getopt() declaration
Michael Kerrisk [John Wiersba]
Remove some redundant text

mq_open.3
Michael Kerrisk [Adam Martindale]
Include definition of the 'mq_attr' structure in this man page
Make the reader's life a little easier by saving them from
having to refer to mq_getattr(3).

mq_send.3
Michael Kerrisk [Adam Martindale]

Refer to mq_overview(7) for details on range of message priority

__ppc_set_ppr_med.3
Wainer dos Santos Moschetta
Note need for _ARCH_PWR8 macro
The _ARCH_PWR8 macro must be defined to get the
__ppc_set_ppr_very_low() and __ppc_set_ppr_med_high()
definitions.

printf.3
Michael Kerrisk
Document nonstandard 'Z' modifier
Michael Kerrisk
Document 'q' length modifier
Michael Kerrisk [Erik Roland van der Meer]
Fix a small bug in example code
Move the second call to va_end(ap)
to above the if-block that
precedes it, so that the va_list 'ap' will be cleaned up in
all cases.
Michael Kerrisk [Nadav Har'El]
As a nonstandard extension, GNU treats 'll' and 'L' as synonyms
See https://bugzilla.kernel.org/show_bug.cgi?id=190341.
Michael Kerrisk
Add references to setlocale(3) in discussions of locales
Michael Kerrisk
SEE ALSO: remove bogus self reference (dprintf(3))

random.3
Michael Kerrisk
Relocate information of "optimal" value of initstate() 'n' argument
The information was a bit hidden in NOTES.

random_r.3
Michael Kerrisk [Jan Ziak]
'buf.state' must be initialized to NULL before calling initstate_r()
See https://bugzilla.kernel.org/show_bug.cgi?id=192801.
Michael Kerrisk
Add some usage notes for setstate_r()
Michael Kerrisk
Note that 'buf' records a pointer to 'statebuf'
See https://sourceware.org/bugzilla/show_bug.cgi?id=3662.
Michael Kerrisk
Add BUGS section pointing out the weirdness of the initstate_r() API

resolver.3
Michael Kerrisk
RES_AAONLY, RES_PRIMARY, RES_NOCHECKNAME, RES_KEEPTSIG are deprecated

These options were never implemented; since glibc 2.25, they
are deprecated.
Michael Kerrisk
The RES_NOIP6DOTINT is removed in glibc 2.25
Michael Kerrisk
Note that RES_BLAST was unimplemented and is now deprecated
Michael Kerrisk
RES_USE_INET6 is deprecated since glibc 2.25
Michael Kerrisk
RES_USEBSTRING was removed in glibc 2.25

resolver.3
resolv.conf.5
Michael Kerrisk
Note that RES_USEBSTRING defaults to off

scandir.3
Michael Kerrisk [Ian Jackson]
Fix errors in example program
See http://bugs.debian.org/848231.
Michael Kerrisk
Improve logic of the example program

scanf.3
Michael Kerrisk
Document the quote (') modifier
for decimal conversions

sem_post.3
setjmp.3
Michael Kerrisk
SEE ALSO: add signal-safety(7)

sem_wait.3
Michael Kerrisk [Fabjan Sukalia]
Remove statement that SA_RESTART does not cause restarting
This has not been true since Linux 2.6.22. The description
of EINTR maintains a reference to signal(7), which explains
the historical details.

See https://bugzilla.kernel.org/show_bug.cgi?id=192071

sleep.3
Michael Kerrisk [Mike Frysiner]
Note that sleep() is implemented via nanosleep(2)
See https://bugzilla.kernel.org/show_bug.cgi?id=73371.
Michael Kerrisk [Mike Frysinger]
Note that sleep() sleeps for a real-time number of seconds

See https://bugzilla.kernel.org/show_bug.cgi?id=73371.
Michael Kerrisk
Convert BUGS text to "Portability notes" subsection
The existing text is not a bug, as such.
Michael Kerrisk
DESCRIPTION: minor reworking

strerror.3
Heinrich Schuchardt
Indicate reasonable buffer size for strerror_r() and strerror_l()
Add a hint which buffer size is needed for
strerror_r() and strerror_l().

strverscmp.3
Michael Kerrisk [Vivenzio Pagliari]
Fix comparison error in example program

system.3
Michael Kerrisk
In the glibc implementation, fork handlers are not executed by system()

random.4
Michael Kerrisk [Jon Jensen]
Note that entropy_avail will be a number in the range 0..4096

core.5
Michael Kerrisk
Clarify that dumping program's initial CWD is root directory
Michael Kerrisk
The target of core dump piping can also be a script

filesystems.5
Michael Kerrisk
SEE ALSO: add btrfs(5), nfs(5), tmpfs(5)

intro.5
Michael Kerrisk
Document the reality that by now Section 5 also covers filesystems
There are by now, from various filesystem projects, various
pages in Section
5 that document different filesystems.
Change intro(5) to reflect that.

Documented after following: http://bugs.debian.org/847998

proc.5
Mike Frysinger [Michael Kerrisk]
Clarify /proc/pid/environ behavior

/proc/pid/environ reflects process environment at
start of program execution; it is set at time of execve(2)
Michael Kerrisk
Add reference to slabinfo(5) in discussion of /proc/meminfo 'Slab' field
Michael Kerrisk
Add entries for "keys" files that refer reader to keyrings(7)
Michael Kerrisk
Remove duplicate /proc/[pid]/seccomp entry
Michael Kerrisk
Mention other system calls that create 'anon_inode' file descriptors
Mention a few other system calls that create file descriptors
that display an 'anon_inode' symlink in /proc/PID/fd
Michael Kerrisk
Add some detail on overcommit_memory value 1
Michael Kerrisk
Add reference to vdso(7)
in discussion of /proc/PID/maps

resolv.conf.5
Michael Kerrisk
ip6-bytestring was removed in glibc 2.25
Michael Kerrisk
The ipc-dotint and no-ip6-dotint options were removed in glibc 2.25
Michael Kerrisk
The 'inet6' option is deprecated since glibc 2.25

slabinfo.5
Michael Kerrisk
SEE ALSO: add slabtop(1)

capabilities.7
Michael Kerrisk [Casey Schaufler]
Add subsection with notes to kernel developers
Provide some notes to kernel developers considering how to choose
which capability should govern a new kernel feature.
Michael Kerrisk
Further enhance the recommendation against new uses of CAP_SYS_ADMIN
Michael Kerrisk
Explicitly point from CAP_SYS_ADMIN to "Notes for kernel developers"
Michael Kerrisk
Add another case for CAP_DAC_READ_SEARCH
Michael Kerrisk
Refer to execve(2) for the reasons that file capabilities may be ignored
Michael Kerrisk
Document a new use of CAP_SYS_RESOURCE
Michael Kerrisk
Add some more operations governed by CAP_SYS_ADMIN
Michael Kerrisk

Adjust references to chattr(1) to point to ioctl_iflags(2)

environ.7
Michael Kerrisk
Mention prctl(2) PR_SET_MM_ENV_START and PR_SET_MM_ENV_END operations

inotify.7
Michael Kerrisk
Point out that inotify monitoring is inode based

ip.7
Michael Kerrisk
SEE ALSO: add ip(8)

man.7
uri.7
Jakub Wilk
Use "www.kernel.org" in example URLs
Apparently www.kernelnotes.org is now a spam site.

mount_namespaces.7
Michael Kerrisk [Rob Landley]
Rework the discussion of defaults for mount propagation types
Add rather more detail. In particular, note the cases where the
default propagation type is MS_PRIVATE vs MS_SHARED.

namespaces.7
Michael Kerrisk
EXAMPLE: fix an error in shell session
Michael Kerrisk
EXAMPLE: rename the example
program
Use a more generic name, since this program may be expanded
in various ways in the future.
Michael Kerrisk
SEE ALSO: add ip-netns(8)
Michael Kerrisk
Remove content split out into ioctl_ns(2)

netlink.7
Michael Kerrisk
NETLINK_IP6_FW went away in Linux 3.5
Michael Kerrisk
NETLINK_W1 went away in Linux 2.6.18
Michael Kerrisk
Add NETLINK_SCSITRANSPORT to list
Michael Kerrisk
Add NETLINK_RDMA to list

Michael Kerrisk
NETLINK_FIREWALL was removed in Linux 3.5
Michael Kerrisk
NETLINK_NFLOG was removed in Linux 3.17
Jakub Wilk
Update libnl homepage URL
The original URL is 404.

pid_namespaces.7
user_namespaces.7
Michael Kerrisk
Adjust references to namespaces(7) to ioctl_ns(2)

pid_namespaces.7
Keno Fischer
CLONE_SIGHAND|CLONE_VM|CLONE_NEWPID is no longer disallowed

pipe.7
Michael Kerrisk
Since Linux 4.9,
pipe-max-size is ceiling for the default pipe capacity
Michael Kerrisk
Clarify that default pipe capacity is 16 pages
The statement that the default pipe capacity is 65536 bytes
is accurate only on systems where the page size is 4096B.
See the use of PIPE_DEF_BUFFERS in the kernel source.

random.7
Michael Kerrisk
Mention getentropy(3)
Michael Kerrisk
SEE ALSO: add getentropy(3)
Michael Kerrisk
SEE ALSO: add getauxval(3)
A small hint to the reader that some random bytes arrive
in the auxiliary vector.

signal.7
Michael Kerrisk
SIGSYS: add reference to seccomp(2)
Michael Kerrisk
Change description of SIGSYS to "Bad system call"
This is the more typical definition.
Michael Kerrisk
SIGPIPE: add reference to pipe(7)
Michael Kerrisk
SIGXFSZ: add reference to setrlimit(2)
Michael Kerrisk

Add a name for SIGEMT
Michael
Kerrisk
SIGXCPU: add reference to setrlimit(2)
Michael Kerrisk
Migrated signal-safety discussion to new signal-safety(7) page

unix.7
Michael Kerrisk [Sergey Polovko]
Since Linux 3.4, UNIX domain sockets support MSG_TRUNC
This was correctly noted in recv(2), but the unix(7) page
was not correspondingly updated for the Linux 3.4 change.
Michael Kerrisk [Willy Tarreau]
Document ETOOMANYREFS for SCM_RIGHTS send exceeding RLIMIT_NOFILE limit

user_namespaces.7
Michael Kerrisk
Change page cross reference: keyctl(2) ==> keyrings(7)

ld.so.8
Michael Kerrisk
LD_BIND_NOT has effect only for function symbols
Michael Kerrisk
Describe use of LD_DEBUG with LD_BIND_NOT
Michael Kerrisk
In secure mode, LD_AUDIT restricts the libraries that it will load
Michael Kerrisk
LD_AUDIT understands $ORIGIN, $LIB, and $PLATFORM

========== Changes in man-pages-4.11
==========

Released: 2017-05-03, Baden, Switzerland

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexander Alemayhu <alexander@alemayhu.com>
Alexander Miller <alex.miller@gmx.de>
Andrea Arcangeli <aarcange@redhat.com>

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_userfaultfd.2
  Michael Kerrisk, Mike Rapoport
    New page describing ioctl(2) operations for userfaultfd

statx.2
  David Howells, Michael Kerrisk [Andreas Dilger]
    New page describing statx(2) system call added in Linux 4.11

userfaultfd.2

Mike Rapoport, Michael Kerrisk [Andrea Arcangeli]
New page describing userfaultfd(2) system call.

pthread_atfork.3
Michael Kerrisk
New page describing pthread_atfork(3)

slabinfo.5
Michael Kerrisk
Rewrite to try to bring the content close to current reality
There's still gaps to fill in, but the existing page
was in any case hugely out of date.

inode.7
Michael Kerrisk
New page with information about inodes
David Howells provided a statx(2) page that duplicated much of
the information from stat(2). Avoid such duplication
by moving the common information in stat(2) and statx(2)
to a new page.

Renamed pages
---

ioctl_console.2
Michael Kerrisk
Renamed from console_ioctl.4
Most ioctl() man pages are in section 2, so move this one there
for consistency.
Michael Kerrisk
Note type of 'argp' for a various operations
For some commands, there was no clear statement about the type
of the 'argp' argument.

ioctl_tty.2
Michael Kerrisk
Renamed from tty_ioctl(4)
All other ioctl(2) pages are in section 2. Make this
page consistent.
Michael Kerrisk
Packet mode state change events give POLLPRI events for poll(2)

Newly documented interfaces in existing pages
---

ioctl_ns.2

Michael Kerrisk
Document the NS_GET_NSTYPE operation added in Linux 4.11
Michael Kerrisk
Document the NS_GET_OWNER_UID operation added in Linux 4.11

proc.5
Michael Kerrisk
Document /proc/sys/kernel/sched_child_runs_first

namespaces.7
Michael Kerrisk
Document the /proc/sys/user/* files added in Linux 4.9

socket.7
Francois Saint-Jacques, Michael Kerrisk
Document SO_INCOMING_CPU

New and changed links
---

console_ioctl.4
Michael Kerrisk
Link for old name of ioctl_console(2) page

tty_ioctl.4
Michael Kerrisk
Link for old name of ioctl_tty(2)
page

Global changes

Various pages
Michael Kerrisk
Change page cross-references from tty_ioctl(4) to ioctl_tty(2)
Michael Kerrisk
Change page cross-references for console_ioctl(4) to ioctl_console(2)

Changes to individual pages
---

alarm.2
Michael Kerrisk
SEE ALSO: add timer_create(2) and timerfd_create(2)

chmod.2
fsync.2
mkdir.2
mknod.2
open.2
truncate.2
umask.2
utime.2
utimensat.2
  Michael Kerrisk
    Add/replace references to inode(7)

clone.2
  Michael Kerrisk
    CLONE_NEWCGROUP by an unprivileged process also causes an EPERM error

clone.2
unshare.2
  Michael Kerrisk
    Exceeding one of the limits in /proc/sys/user/* can cause ENOSPC
  Michael Kerrisk
    CLONE_NEWPID yields ENOSPC if nesting limit of PID namespaces is reached
  Michael Kerrisk
    Exceeding the maximum nested user namespace limit now gives ENOSPC
      Formerly, if the limit of 32 nested
 user namespaces was exceeded,
      the error EUSERS resulted. Starting with Linux 4.9, the error
      is ENOSPC.

epoll_ctl.2
  Michael Kerrisk
    Defer to poll(2) for an explanation of EPOLLIN
  Michael Kerrisk [Nicolas Biscos]
    EPOLLERR is also set on write end of a pipe when the read end is closed
  Michael Kerrisk [Nicolas Biscos]
    Give the reader a clue that the 'events' field can be zero
      'events' specified as zero still allows EPOLLHUP and
      EPOLLERR to be reported.

_exit.2
  Michael Kerrisk
    On exit, child processes may be inherited by a "subreaper"
      It is no longer necessarily true that orphaned processes
      are inherited by PID 1.
  Michael Kerrisk
    Only the least significant byte of exit status is passed to the parent

fcntl.2

Michael Kerrisk
Mention memfd_create() in the discussion of file seals
Give the reader a clue about what kinds of objects can
be employed with file seals.
Michael Kerrisk
File seals are not generally applicable to tmpfs(5) files
As far as I can see, file seals can be applied only to
memfd_create(2) file descriptors. This was checked by experiment
and by reading mm/shmem.c::shmem_get_inode((), where one finds
the following line that applies to all new shmem files:

```
info->seals = F_SEAL_SEAL;
```

Only in the code of the memfd_create() system call is this
setting reversed (in mm/shmem.c::memfd_create):

```
if (flags & MFD_ALLOW_SEALING)
    info->seals &= ~F_SEAL_SEAL;
```

fork.2
Michael Kerrisk
SEE ALSO: add pthread_atfork(3)

getdents.2
open.2
stat.2
statx.2
Michael Kerrisk
SEE ALSO: add inode(7)

getdtablesize.2
attr.5
Alexander Miller
Move .so directive to first line
Improves compatibility with the man
and other dumb tools
that process man page files.

getpid.2
Michael Kerrisk
Mention init(1) and "subreapers" in discussion of parent PID

ioctl_list.2
Cyril Hrubis [Arnd Bergmann]
BLKRASET/BLKRAGET take unsigned long

ioctl_ns.2
Michael Kerrisk

ERRORS: document ENOTTY

kexec_load.2
sched_setaffinity.2
bootparam.7
Michael Kerrisk
Documentation/kernel-parameters.txt is now in Documentation/admin-guide/

lseek.2
Michael Kerrisk
SEE ALSO: add fallocate(2)
Both of these pages discuss file holes.

mincore.2
Michael Kerrisk
SEE ALSO: add fincore(1)

mmap.2
Michael Kerrisk
Remove ancient reference to flags that appear on some other systems
MAP_AUTOGROW, MAP_AUTORESRV, MAP_COPY, and MAP_LOCAL may have
appeared on some systems many years ago, but the discussion here
mentions no details and the systems and flags probably ceased to
be relevant
long ago. So, remove this text.
Michael Kerrisk
SEE ALSO: add userfaultfd(2)

open.2
Michael Kerrisk
Add statx() to list of "at" calls in rationale discussion

poll.2
Michael Kerrisk
Expand discussion of POLLPRI
Michael Kerrisk [Nicolas Biscos]
POLLERR is also set on write end of a pipe when the read end is closed

posix_fadvise.2
Michael Kerrisk
SEE ALSO: add fincore(1)

prctl.2
Mike Frysinger
PR_SET_MM: Refine CONFIG_CHECKPOINT_RESTORE requirement
The Linux 3.10 release dropped the c/r requirement and opened it
up to all users.
Mike Frysinger

PR_SET_MM: Document new PR_SET_MM_MAP{,_SIZE} helpers
Mike Frysinger
PR_SET_MM: Document arg4/arg5 zero behavior
The kernel will immediately reject calls where arg4/arg5 are not
zero. See kernel/sys.c:prctl_set_mm().
Michael Kerrisk
Explain rationale for use of subreaper processes
Michael
Kerrisk
Note semantics of child_subreaper setting on fork() and exec()
Michael Kerrisk
Improve description of PR_SET_CHILD_SUBREAPER

rename.2
Michael Kerrisk [Georg Sauthoff]
Note that there is no glibc wrapper for renameat2()

sched_setaffinity.2
Michael Kerrisk
SEE ALSO: add get_nprocs(3)

select.2
Michael Kerrisk [Matthew Wilcox, Carlos O'Donell]
Linux select() is buggy wrt POSIX in its check for EBADF errors
Michael Kerrisk
Show correspondence between select() and poll() readiness notifications
Michael Kerrisk
Give a hint that sets must be reinitialized if using select() in a loop
Michael Kerrisk
Refer to POLLPRI in poll(2) for info on exceptional conditions
Michael Kerrisk
Move mislocated text describing the self-pipe text from BUGS to NOTES

sigaction.2
Michael Kerrisk
Show the prototype of an SA_SIGINFO signal handler

signalfd.2
Michael Kerrisk

SIGKILL and SIGSTOP are silently ignored in 'mask'

sigprocmask.2
Dmitry V. Levin
Do not specify an exact value of rt_sigprocmask's 4th argument
As sizeof(kernel_sigset_t) is not the same for all architectures,
it would be better not to mention any numbers as its value.
Michael Kerrisk

'set' and 'oldset' can both be NULL

sigwaitinfo.2
Michael Kerrisk
sigwaitinfo() can't be used to accept synchronous signals

socketcall.2
Mike Frysinger
Document call argument

stat.2
Michael Kerrisk
Remove information migrated to inode(7) page
Michael Kerrisk
Restructure field descriptions as a hanging list
Michael Kerrisk
Remove "Other systems" subsection
These details about other systems were added in 1999,
and were probably of limited use then, and even less today.
However, they do clutter the page, so remove them.
Michael Kerrisk
DESCRIPTION: add
list entries for 'st_uid' and 'st_gid'
Michael Kerrisk
Add some subsection headings to ease readability
David Howells
ERRORS: correct description of ENOENT
Michael Kerrisk
Give 'struct stat' argument a more meaningful name ('statbuf')
Marcin lusarz
Tweak description of AT_EMPTY_PATH
Currently it says when dirfd is AT_FDCWD it can be something
other than directory, which doesn't make much sense. Just swap
the order of sentences.
Michael Kerrisk
Add slightly expanded description of 'st_ino' field
Michael Kerrisk
DESCRIPTION: add a list entry for 'st_ino'
Michael Kerrisk
DESCRIPTION: add a list entry for 'st_nlinks' field

syscalls.2
Michael Kerrisk
Add membarrier(2)
Michael Kerrisk
Fix kernel version for userfaultfd(2)
Michael Kerrisk
Linux 4.11 added statx()

Michael Kerrisk
Include deprecated getunwind(2) in list

wait.2
Michael Kerrisk
Orphaned children may be adopted by a "subreaper", rather by than PD 1

bzero.3
Michael Kerrisk [Zack Weinberg]
Add correct header file for explicit_bzero()

cfree.3
Michael Kerrisk
cfree() is removed from glibc in version 2.26

exit.3
Michael Kerrisk
Improve discussion of zombie processes

getentropy.3
Nikos Mavrogiannopoulos [Michael Kerrisk, Florian Weimer]
Correct header file
Michael Kerrisk [Frank Theile]
SYNOPSIS: add missing return type for getentropy() declaration

grantpt.3
Michael Kerrisk
Tell a more nuanced story about what grantpt() does or does not do

insque.3
Michael Kerrisk
SEE ALSO: add queue(3)

queue.3
Michael Kerrisk
SEE ALSO: add insque(3)

shm_open.3
Michael Kerrisk
Clarify that POSIX shared memory uses tmpfs(5)

syslog.3
Michael Kerrisk [Ian Abbott, Walter Harms]
Reorganize page text for easier parsing and better
readability
Michael Kerrisk
Various rewordings and improvements
Michael Kerrisk

Note default value for 'facility' when calling openlog()
Michael Kerrisk
SEE ALSO: add journalctl(1)

ttyname.3
Dmitry V. Levin
Document ENODEV error code
Christian Brauner
NOTES: warn about a confusing case that may occur with mount namespaces

wcsdup.3
Jan Heberer
RETURN VALUE: fix error in return value description
Return value for failure was accidentally changed from NULL to
-1 in man-pages commit 572acb41c48b6b8e690d50edff367d8b8b01702a.

elf.5
Michael Kerrisk
SEE ALSO: add elfedit(1), nm(1), size(1), strings(1), and strip(1)

nsswitch.conf.5
Florian Weimer
Mention sudoers
It turns out that sudo drops things into nsswitch.conf, too.

proc.5
Michael Kerrisk
Refer to namespaces(7) for discussion of /proc/sys/user/* files
Michael Kerrisk
Simplify /proc/slabinfo
entry
Don't repeat (out-of-date) info from slabinfo(5); just defer to
that page.

tmpfs.5
Michael Kerrisk
tmpfs supports extended attributes, but not 'user' extended attributes

environ.7
Jakub Wilk
Fix name of function that honors TMPDIR
tempnam() takes the TMPDIR environment variable into account, unlike
tmpnam(), which always creates pathnames within /tmp.

hostname.7
Marko Myllynen
Use lower case for hostname example
Marko Myllynen

Use generic names in examples
Marko Myllynen
Describe accepted characters for hostname

inotify.7
Michael Kerrisk [Nicolas Iooss]
Mounting a filesystem on top of a monitored directory causes no event

man-pages.7
Michael Kerrisk
Note preferred approach for 'duplicate' errors

pid_namespaces.7
Michael Kerrisk
The maximum nesting depth for PID namespaces is 32

user_namespaces.7
Stephan Bergmann
Fixes to example
While toying around with the userns_child_exec example program on the
user_namespaces(7) man page, I noticed two things:

* In the EXAMPLE section, we need to mount the new /proc before
looking at /proc/$$/status, otherwise the latter will print
information about the outer namespace's PID 1 (i.e., the real
init). So the two paragraphs need to be swapped.

* In the program source, make sure to close pipe_fd[0] in the
child before exec'ing.

pthreads.7
Michael Kerrisk
SEE ALSO: add pthread_rwlockattr_setkind_np(3)

pty.7
Michael Kerrisk
Mention a couple of other applications of pseudoterminals

sem_overview.7
Michael Kerrisk
SEE ALSO: add shm_overview(7)

signal.7
Michael Kerrisk
SEE ALSO: add sigreturn(2)

tcp.7
Michael Kerrisk

Note indications for OOB data given by select(2) and poll(2)
Chema Gonzalez
tcp_abc was removed in 3.9

xattr.7
Michael Kerrisk
SEE ALSO: add ioctl_iflags(2)
People sometimes confuse xattrs and inode flags. Provide a link
to the page that describes inode flags to give them a tip.

ld.so.8
Michael Kerrisk
Mention quoting when using "Rpath tokens" in LD_AUDIT and LD_PRELOAD
Michael Kerrisk
Expand description of /etc/ld.so.preload
Michael Kerrisk
Mention ldconfig(8) in discussion of /etc/ld.so.cache

zdump.8
Jakub Wilk
Add OPTIONS section heading

========== Changes in man-pages-4.12 ==========

Released: 2017-07-13, London

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

sulit <sulitsrc@foxmail.com>

<hiroki.ishii@miraclelinux.com>

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_getfsmap.2
  Darrick J. Wong
    Document the GETFSMAP ioctl
      Document the new GETFSMAP ioctl that returns the physical layout of a
      (disk-based) filesystem.

Newly documented interfaces in existing pages
---

namespaces.7
  Kirill Tkhai [Michael Kerrisk]
    Document the /proc/[pid]/ns/pid_for_children file

Changes to individual pages
---

ldd.1
  Michael Kerrisk

'objdump -p prog | grep NEEDED' doesn't give quite same info as 'ldd'

chmod.2
  Michael Kerrisk
    Put fchmod() feature test macro requirements in a more readable format
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirements changes for fchmod()

chown.2
  Michael Kerrisk
    When file owner or group is changed, file capabilities are cleared
  Michael Kerrisk
     Changes to file owner by root also clear set-UID and set-GID bits

clone.2
  Michael Kerrisk
    Update BUGS to reflect fact that PID caching was removed in glibc 2.25

epoll_wait.2
  Michael Kerrisk
    Clarify semantics of returned 'data' field
      The returned 'data' is the 'data' most recently set via
      epoll_ctl().

get_mempolicy.2
  Michael Kerrisk [Nadav Har'El, Andi Kleen]
    SYNOPSIS: fix return type of get_mempolicy()
      See https://bugzilla.kernel.org/show_bug.cgi?id=97051

getpid.2
  Carlos O'Donell, Michael Kerrisk
    Note that PID caching is removed as of glibc 2.25
      Since glibc 2.25 the PID cache is removed.

      Rationale given in the release notes:
      https://sourceware.org/glibc/wiki/Release/2.25#pid_cache_removal

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_getfsmap(2)

ioctl_getfsmap.2
  Michael Kerrisk
    Fix ordering of sections
  Michael Kerrisk

   Add VERSIONS section
  Michael Kerrisk

ERRORS: order alphabetically

madvise.2
Michael Kerrisk
Remove bogus text re POSIX_MADV_NOREUSE
There is a POSIX_FADV_NOREUSE for posix_fadvise(),
but no POSIX_MADV_NOREUSE for any API in POSIX.

membarrier.2
Michael Kerrisk
Add ENOSYS error for 'nohz_full' CPU setting

mount.2
NeilBrown
Revise description of MS_REMOUNT | MS_BIND
MS_REMOUNT|MS_BIND affects all per-mount-point
flag. MS_RDONLY is only special because it,
uniquely, is both a per-mount-point flag *and* a
per-filesystem flag.

So the sections of per-mount-point flags and
MS_REMOUNT can usefully be clarified.

open.2
Michael Kerrisk
Note some further advantages of the *at() APIs

pipe.2
Michael Kerrisk
SEE ALSO: add tee(2) and vmsplice(2)

readv.2
Michael Kerrisk
glibc 2.26 adds library support for preadv2()
and pwritev2()

sched_setaffinity.2
Michael Kerrisk
Mention cpuset cgroups as a cause of EINVAL error

seccomp.2
Mike Frysinger
Expand SECCOMP_RET_KILL documentation

sigaction.2
Michael Kerrisk
Note feature test macro requirements for 'si_code' constants
Michael Kerrisk

Add a subheading for the description of 'si_code'
Michael Kerrisk
TRAP_BRANCH and TRAP_HWBKPT are present only on IA64

sigaltstack.2
Michael Kerrisk
Note that specifying SS_ONSTACK in ss.ss_flags decreases portability
In the Illumos source (which presumably mirrors its Solaris
ancestry), there is this check in the sigaltstack()
implementation:

```
if (ss.ss_flags & ~SS_DISABLE)
    return (set_errno(EINVAL));
```

And in the FreeBSD source we find similar:

```
if ((ss->ss_flags & ~SS_DISABLE) != 0)

 return (EINVAL);
```

Michael Kerrisk
Note buggy addition of ss.ss_flags==SS_ONSTACK
Note buggy addition of ss.ss_flags==SS_ONSTACK as a synonym
for ss_flags==0. No other implementation does this, AFAIK.
And it was not needed :-(.
Michael Kerrisk
Specifying 'ss' returns the current settings without changing them
Michael Kerrisk
Give 'oss' argument a more meaningful name: 'old_ss'
Michael Kerrisk
Some minor reworking of the text
Michael Kerrisk
ERRORS: update description of EINVAL error

splice.2
tee.2
vmsplice.2
Michael Kerrisk
SEE ALSO: add pipe(7)

splice.2
Michael Kerrisk
ERRORS: split EINVAL error cases
Michael Kerrisk
ERRORS: add EINVAL for case where both descriptors refer to same pipe

timer_create.2
Michael Kerrisk
Document the CONFIG_POSIX_TIMERS option added in Linux 4.10

wait.2
  Michael Kerrisk
    Note glibc 2.26 changes
 to feature test macro requirements for waitid()

acosh.3
asinh.3
atanh.3
  Alex Henrie
    Remove C89 designation.
      See https://bugzilla.kernel.org/show_bug.cgi?id=196319

bsd_signal.3
  Michael Kerrisk
    Note feature test macro requirements changes for glibc 2.26

dl_iterate_phdr.3
  Michael Kerrisk
    dl_iterate_phdr() shows the order in which objects were loaded
      dl_iterate_phdr() tells us not just which objects are
      loaded, but also the order in which they are loaded
      (the "link-map order"). Since the order is relevant for
      understanding symbol resolution, give the reader this clue.
  Michael Kerrisk
    Expand the code example, and show sample output
  Michael Kerrisk
    List values for the 'p_type' field

dlsym.3
  Michael Kerrisk
    _GNU_SOURCE is needed to get RTLD_DEFAULT and RTLD_NEXT definitions

flockfile.3
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirement
 changes

fpathconf.3
  Michael Kerrisk
    Rework RETURN VALUE description to add more detail
  Michael Kerrisk
    Add an errors section
  Michael Kerrisk
    Largely rewrite the description of _PC_CHOWN_RESTRICTED
  Michael Kerrisk
    Rewrite description of _PC_PIPE_BUF
      The existing description was not accurate, and lacked details.

ftw.3
  Michael Kerrisk
    BUGS: document a probable glibc regression in FTW_SLN case
      See https://bugzilla.redhat.com/show_bug.cgi?id=1422736
      and http://austingroupbugs.net/view.php?id=1121.

getaddrinfo.3
  Quentin Rameau
    Fix _POSIX_C_SOURCE value for getaddrinfo()
      The correct _POSIX_C_SOURCE value is 200112L, not 201112L in features.h.

getcontext.3
  Carlos O'Donell
    Exemplar structure should use 'ucontext_t'.

getgrent.3
  Michael Kerrisk
    Note glibc 2.22 changes for feature test macro requirements

grantpt.3
ptsname.3
unlockpt.3
  Ferdinand
 Thiessen [Michael Kerrisk]
    Update feature test macro-requirements for glibc 2.24

if_nametoindex.3
  Douglas Caetano dos Santos
    Add ENODEV error for if_nametoindex()

malloc.3
  Michael Kerrisk
    Document the reallocarray() added in glibc 2.26

nl_langinfo.3
  Michael Kerrisk
    Note feature test macro requirements for nl_langinfo_l()

posix_madvise.3
  Dr. Tobias Quathamer
    Remove paragraph about POSIX_FADV_NOREUSE
      POSIX_FADV_NOREUSE is documented for posix_fadvise, and a
      corresponding POSIX_MADV_NOREUSE flag is not specified by POSIX.
      See https://bugs.debian.org/865699

ptsname.3
  Michael Kerrisk [Arjun Shankar]

Since glibc 2.26, ptsname_r() no longer gives EINVAL for buf==NULL

rand.3
Michael Kerrisk
Note glibc 2.24 feature test macro requirement changes for rand_r()

resolver.3
Michael Kerrisk
Add basic notes on 'op' argument of res_nmkquery() and res_mkquery()

sigpause.3
Michael Kerrisk
Note glibc 2.26 changes to feature test macro requirements

sigwait.3
Michael Kerrisk
Note glibc 2.26 feature test macro changes

strtol.3
Heinrich Schuchardt
Mention 0X prefix
The prefix 0x may be capitalized as 0X.

See ISO/IEC 9899:1999.

sysconf.3
Michael Kerrisk [Pavel Tikhomirov]
Rework RETURN VALUE description to add more detail
Make the discussion clearer, and add a few details.
Also, fix the problem report from Pavel Tikhomirov
who noted that the man page falsely said that errno
is not changed on a successful return.

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=195955
Michael Kerrisk
Add ERRORS section

ttyslot.3
Michael Kerrisk
Fix error in feature test macro requirements
Michael Kerrisk
Note feature test macro requirements changes in glibc 2.24
Michael Kerrisk
Clarify
details of use of <stdlib.h> file

unlocked_stdio.3
Michael Kerrisk

Note glibc 2.24 feature test macro requirement changes

elf.5
Michael Kerrisk
SEE ALSO: add dl_iterate_phdr(3)

nsswitch.conf.5
DJ Delorie
Clarify group merge rules
This minor patch clarifies when merging is not done,
and how duplicate entries are merged.

proc.5
Michael Kerrisk
Document that 'iowait' field of /proc/stat is unreliable
Text taken from Chao Fan's kernel commit 9c240d757658a3ae996.

slabinfo.5
Michael Kerrisk [Jorge Nerin]
SEE ALSO: add some references to relevant kernel source files

tmpfs.5
Michael Kerrisk
SEE ALSO: add memfd_create(2), mmap(2), shm_open(3)

capabilities.7
Michael Kerrisk
Clarify the effect on process capabilities when UID 0 does execve(2)
Michael Kerrisk
Note effect on capabilities when a process with UID != 0 does execve(2)
Michael Kerrisk [David
Lewis]
Fix reversed descriptions of CAP_MAC_OVERRIDE and CAP_MAC_ADMIN
Michael Kerrisk
SEE ALSO: add filecap(8), netcap(8), pscap(8)

cgroup_namespaces.7
Michael Kerrisk
Add some further explanation of the example shell session
Michael Kerrisk
Fix a bug in shell session example

inode.7
Michael Kerrisk
Note glibc 2.24 feature test macro changes for S_IFSOCK and S_ISSOCK()

man.7
G. Branden Robinson

Undocument "URL" macro in man(7) in favor .UR+.UE

pid_namespaces.7
Michael Kerrisk
Mention /proc/[pid]/ns/pid_for_children

pipe.7
Michael Kerrisk
SEE ALSO: add tee(2) and vmsplice(2)

sigevent.7
Michael Kerrisk
Mention signal.h header file

signal.7
Michael Kerrisk [lilydjwg]
Since Linux 3.8, read(2) on an inotify FD is restartable with SA_RESTART
See https://bugzilla.kernel.org/show_bug.cgi?id=195711
Michael Kerrisk
read() from an inotify FD is no
longer interrupted by a stop signal
(Change was in Linux 3.8.)

tcp.7
Michael Kerrisk
Document value '2' for tcp_timestamps
Since Linux 4.10, the value '2' is meaningful for tcp_timestamps
Ruben Kerkhof
Change default value of tcp_frto
The default changed in c96fd3d461fa495400df24be3b3b66f0e0b152f9
(Linux 2.6.24).

ld.so.8
Michael Kerrisk
Greatly expand the explanation of LD_DYNAMIC_WEAK
Carlos O'Donell
Expand DT_RUNPATH details.
ld.so.8: Expand DT_RUNPATH details.

Every 3 years we get asked why DT_RUNPATH doesn't work like DT_RPATH.
The most recent question was here:
https://www.sourceware.org/ml/libc-help/2017-06/msg00013.html

We need to expand the description of DT_RUNPATH to cover this
situation and explain that the DT_RUNPATH entries apply only to the
immediate DT_NEEDED, not that of another, say dlopen'd
child object.
Michael Kerrisk

Since glibc 2.2.5, LD_PROFILE is ignored in secure-execution mode
Michael Kerrisk
Make notes on secure-execute mode more prominent
Place each note on secure-execution mode in a separate
paragraph, to make it more obvious.
Michael Kerrisk
Note that libraries in standard directories are not normally set-UID
In secure mode, LD_PRELOAD loads only libraries from standard
directories that are marked set-UID. Note that it is unusual for
a library to be marked in this way.
Michael Kerrisk
SEE ALSO: add elf(5)
Michael Kerrisk
Note version where secure-execution started ignoring LD_USE_LOAD_BIAS
Michael Kerrisk
Correct glibc version that ignores LD_SHOW_AUXV in secure-execution mode
Ignored since 2.3.4 (not 2.3.5).
Michael Kerrisk
Rewrite LD_DEBUG_OUTPUT description and note that .PID is appended

==========
Changes in man-pages-4.13 ==========

Released: 2017-09-15, Munich

 <niya3@mail.ru>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_mutex_consistent.3
  Yubin Ruan, Michael Kerrisk
    New page documenting pthread_mutex_consistent(3)

pthread_mutexattr_getpshared.3
   Michael Kerrisk
    New page for pthread_mutexattr_getpshared(3) and pthread_mutexattr_setpshared(3)

pthread_mutexattr_init.3
  Michael Kerrisk
    New page for pthread_mutexattr_init(3) and pthread_mutexattr_destroy(3)

pthread_mutexattr_setrobust.3

Yubin Ruan, Michael Kerrisk
New page for pthread_mutexattr_setrobust(3) and pthread_mutexattr_getrobust(3)

sysfs.5
Michael Kerrisk [Mark Wielaard]
New page documenting the sysfs filesystem
Just a skeleton page so far, but perhaps it will be filled out
over time.

Newly documented interfaces in existing pages
---

fcntl.2
Jens Axboe, Michael Kerrisk
Describe the set/get write hints commands that are added in Linux 4.13
Document F_GET_RW_HINT, F_SET_RW_HINT, F_GET_FILE_RW_HINT, and
F_SET_FILE_RW_HINT.

ioctl_tty.2
Aleksa Sarai, Michael Kerrisk
Add TIOCGPTPEER documentation

kcmp.2
Cyrill Gorcunov
Add KCMP_EPOLL_TFD description

keyctl.2
Eugene Syromyatnikov
Document the KEYCTL_RESTRICT_KEYRING operation
Eugene Syromyatnikov [Stephan Müller]
Document the ability to provide KDF parameters in KEYCTL_DH_COMPUTE

New and changed links
---

pthread_mutexattr_destroy.3
Michael Kerrisk
New link to new pthread_mutexattr_init.3 page

pthread_mutexattr_getrobust.3
pthread_mutexattr_getrobust_np.3
pthread_mutexattr_setrobust_np.3
Michael Kerrisk
New links to new pthread_mutexattr_setrobust.3 page

pthread_mutexattr_setpshared.3

Michael Kerrisk
New link to new pthread_mutexattr_getpshared.3 page

Global changes

Various pages
Michael Kerrisk
Use .EX/.EE for EXAMPLE programs

Various pages
Michael Kerrisk
Use consistent markup for code snippets
Change .nf/.fi to .EX/.EE

Various pages
Michael Kerrisk
Use
consistent markup for code snippets
The preferred form is

.PP/.IP
.in +4n
.EX
<code>
.EE
.in
.PP/.IP

Various pages
Michael Kerrisk
Formatting fix: replace blank lines with .PP/.IP
Blank lines shouldn't generally appear in *roff source (other
than in code examples), since they create large vertical
spaces between text blocks.

Various pages
Michael Kerrisk [Bjarni Ingi Gislason]
Add a non-breaking space between a number and a unit (prefix)
Based on a patch by Bjarni Ingi Gislason.

Various pages
Michael Kerrisk [Bjarni Ingi Gislason]
Use en-dash for ranges
Based on a patch by Bjarni Ingi Gislason.

A few pages

Michael Kerrisk
Fix misordering of sections
Michael Kerrisk
Fix order of SEE ALSO entries

Changes to individual pages
---

ldd.1
Michael Kerrisk
Add more detail on ldd security implications, noting glibc 2.27 changes

add_key.2
backtrace.3
syslog.3
Michael Kerrisk
Fix misordered SEE ALSO entries

add_key.2
request_key.2
keyrings.7
Eugene Syromyatnikov
Update Linux documentation pointers

chown.2
Michael Kerrisk
Update kernel version in note on support for grpid/nogrpid mount options
There has been no change since Linux 2.6.25, so update the
kernel version to 4.12.

execve.2
Michael Kerrisk
SEE ALSO: add get_robust_list(2)

getrandom.2
Michael Kerrisk [Fabio Scotoni]
SYNOPSIS: make return type of getrandom() 'ssize_t'
This accords with glibc headers and the Linux kernel source.

getrlimit.2
Thiago Jung Bauermann
Mention unit used by RLIMIT_CORE and RLIMIT_FSIZE
Michael Kerrisk
Note that RLIMIT_AS and RLIMIT_DATA are rounded down to system page size
Michael Kerrisk
Mention unit for RLIMIT_DATA

getrlimit.2
mmap.2
malloc.3
  Jonas Grabber
    RLIMIT_DATA affects mmap(2) since Linux 4.7

get_robust_list.2
  Michael Kerrisk
    Detail the operation of robust futex lists
  Michael Kerrisk
    Since Linux 2.6.28, robust futex lists also have an effect for execve(2)
  Michael Kerrisk
    Clarify that "thread ID" means "kernel thread ID"
  Michael Kerrisk
    SEE ALSO: add pthread_mutexattr_setrobust(3)

ioctl_getfsmap.2
  Darrick J. Wong
    Correct semantics of FMR_OF_LAST flag

ioctl_userfaultfd.2
  Mike Rapoport
    Document replacement of ENOSPC with ESRCH
  Mike Rapoport
    Update uffdio_api.features description
      There is no requirement that uffdio_api.features must be zero
      for newer kernels. This field actually defines what features
      space would like to enable.

io_submit.2
  Sage Weil
    Acknowledge possibility of short return
      Note
 that the return value may be a value less than 'nr'
      if not all iocbs were queued at once.

ipc.2
  Michael Kerrisk
    SEE ALSO: add svipc(7)

keyctl.2
  Eugene Syromyatnikov
    mention keyctl_dh_compute(3) and keyctl_dh_compute_alloc (3)
      These functions have been added in keyutils 1.5.10
  Eugene Syromyatnikov
    Mention ENOMEM in ERRORS
  Eugene Syromyatnikov
    Update kernel documentation path reference

move_pages.2
  Otto Ebeling [Michael Kerrisk]
    Note permission changes that occurred in Linux 4.13

mprotect.2
  Michael Kerrisk [Shrikant Giridhar]
    Add warning about the use of printf() in the example code

open.2
  NeilBrown
    Improve O_PATH documentation
      - fstatfs is now permitted.
      - ioctl isn't, and is worth listing explicitly
      - O_PATH allows an automount point to be opened with
        triggering the mount.

prctl.2
seccomp.2
  Eugene Syromyatnikov

  Update pointer to in-kernel seccomp documentation

prctl.2
ptrace.2
  Eugene Syromyatnikov
    Update pointer to in-kernel Yama documentation

prctl.2
  Eugene Syromyatnikov
    Update pointer to in-kernel no_new_privs flag documentation

readlink.2
  Michael Kerrisk [Jason Noakes]
    Fix an off-by-one error in example code

seccomp.2
  Kees Cook
    Clarify SECCOMP_RET_KILL kills tasks not processes

select_tut.2
  Michael Kerrisk [Sergey Z.]
    Clarify an ambiguity with respect to select() and EAGAIN
      See https://bugzilla.kernel.org/show_bug.cgi?id=196345

set_tid_address.2
  Elliott Hughes
    Note that there's no glibc wrapper for set_tid_address()

socket.2
  Michael Kerrisk [Yubin Ruan]
    socket() uses the lowest available file descriptor

_syscall.2
  Michael Kerrisk
    Remove redundant comment from EXAMPLE
      A discussion of the nroff source of the manual
      page isn't very useful...

sysfs.2
   Michael Kerrisk
    Add a pointer to sysfs(5) to help possibly confused readers
  Michael Kerrisk
    Make it clearer near the start of the page that sysfs(2) is obsolete

timer_create.2
  Michael Kerrisk
    Strengthen the warning about use of printf() in the example program
  Michael Kerrisk
    Update cross reference: signal(7) should be signal-safety(7)

umount.2
  NeilBrown
    Revise MNT_FORCE description
      MNT_FORCE does not allow a busy filesystem to be unmounted. Only
      MNT_DETACH allows that. MNT_FORCE only tries to abort pending
      transactions, in the hope that might help umount not to block,

      Also, other filesystems than NFS support MNT_FORCE.

unshare.2
  Eugene Syromyatnikov
    Update pointer to in-kernel unshare documentation

wait.2
  Michael Kerrisk [ ]
    POSIX.1-2008 TC1 clarifies treatment of 'si_pid' for waitid() WNOHANG

cmsg.3
  Sukadev Bhattiprolu
    Add
 a scatter/gather buffer to sample code
  Michael Kerrisk
    Reorganize the text somewhat (no content changes)

crypt.3

Konstantin Shemyak [Michael Kerrisk]
Add description of previously undocumented 'rounds' parameter
Konstantin Shemyak
Encryption isn't done with SHA-xxx, but with a function based on SHA-xxx
Konstantin Shemyak
Clarify that ending of the salt string with '$' is optional

exit.3
Michael Kerrisk
Mention the prctl(2) PR_SET_PDEATHSIG operation
Michael Kerrisk
SEE ALSO: add get_robust_list(2)
Michael Kerrisk
Add a heading to delimit discussion of signals sent to other processes

exp2.3
Alex Henrie
Remove C89 designation

log1p.3
Alex Henrie
Document fixes to give EDOM or ERANGE on error

matherr.3
Michael Kerrisk
Note that glibc 2.27 removes the 'matherr' mechanism
Michael Kerrisk
Remove crufty feature test macro requirements

pow10.3
Michael
Kerrisk
Note that pow10() is now obsolete in favor of exp10()
Also, the pow10() functions are no longer supported by glibc,
starting with version 2.27.

sincos.3
Michael Kerrisk
Note that sincos() is intended to be more efficient than sin() + cos()

cciss.4
hpsa.4
Eugene Syromyatnikov [Don Brace, Meelis Roos]
Mention cciss removal in Linux 4.14
During the Linux 4.13 development cycle, the cciss driver has been
removed in favor of the hpsa driver, which has been amended with
some legacy board support.

initrd.4
proc.5
bootparam.7
  Eugene Syromyatnikov
    Update pointer to in-kernel initrd documentation

initrd.4
  Eugene Syromyatnikov
    Update pointer to in-kernel root over NFS documentation

intro.4
  Michael Kerrisk
    SEE ALSO: add mknod(1) and mknod(2)

host.conf.5
  Michael Kerrisk
    Add cross-reference to hosts(5)

locale.5
  Marko Myllynen
    Refer
 to existing locales for encoding details
      Since I don't think it would make sense to try to have different
      explanation for each glibc version on the locale(5) man page, I'm
      proposing that we apply the below patch so that we refer to
      existing locale definition files in general and not spell out the
      exact format or any certain locale as a definitive guideline.

nologin.5
  Michael Kerrisk
    Add a sentence explaining why nologin is useful

proc.5
  Eugene Syromyatnikov
    Document removal of htab-reclaim sysctl file
      This PPC-specific sysctl option has been removed in Linux 2.4.9.2,
      according to historic Linux repository commit log.
  Eugene Syromyatnikov
    Add description for cpuN lines in /proc/stat
  Eugene Syromyatnikov
    Add description for softirq line in /proc/stat
  Eugene Syromyatnikov
    Document removal of timer_stats file
  Michael Kerrisk
    Note Linux
 4.9 changes to privileges for /proc/[pid]/timerslack_ns
  Michael Kerrisk
    Show command used to mount /proc

Michael Kerrisk
Explicitly note in intro that some /proc files are writable
Eugene Syromyatnikov
Update pointer to in-kernel SysRq documentation
Michael Kerrisk
SEE ALSO: add sysfs(5)
Eugene Syromyatnikov
Update pointer to in-kernel security keys documentation
Benjamin Peterson
Fix path to binfmt_misc docs
Eugene Syromyatnikov
Update pointer to in-kernel MTRR documentation
Eugene Syromyatnikov
Update reference to kernel's crypto API documentation

tzfile.5
Paul Eggert
Sync from tzdb upstream
This makes tzfile.5 a copy of the tzdb version, except that the
tzdb version's first line is replaced by man-pages boilerplate.
The new version documents version 3 format, among other things.
Also, it removes the "Summary of the timezone information
file
format" section, which should no longer be needed due to
improvements in the part of the man page.

capabilities.7
Michael Kerrisk
Note semantics for a program that is set-UID-root and has capabilities
Note semantics for a program that is both set-user-ID-root and has
file capabilities.
Michael Kerrisk [Dennis Knorr]
Note that a set-UID-root program may have an empty file capability set

cgroups.7
Michael Kerrisk
SEE ALSO: systemd-cgls(1)

cpuset.7
Eugene Syromyatnikov
Update pointer to in-kernel cpusets documentation

keyrings.7
Eugene Syromyatnikov
Document description restriction for logon keys
"logon" type has additional check that enforces colon-separated
prefix in key descriptions.
Eugene Syromyatnikov

Add pointers to kernel's documentation
Mostly because of asymmetric-keys.txt, which is outside
security/keys
for some reason.

man-pages.7
Michael Kerrisk
Expand the guidance on formatting code snippets

netlink.7
David Wilder
Change buffer size in example code about reading netlink message
Michael Kerrisk [Rick Jones]
Add a comment on 8192 buffer size in example code

pthreads.7
Michael Kerrisk
SEE ALSO: add pthread_mutexattr_destroy(3) and pthread_mutexattr_init(3)

signal.7
Michael Kerrisk
Since glibc 2.26, SIGUNUSED is no longer defined

tcp.7
Vincent Bernat
tcp_tw_recycle is removed from Linux 4.12
And it is completely broken.

unicode.7
Eugene Syromyatnikov
Update pointer to in-kernel Unicode terminal support documentation

========== Changes in man-pages-4.14 ==========

Released: 2017-11-27, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated
in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

pthread_spin_init.3
  Michael Kerrisk [Peter Zijlstra, Thomas Gleixner, Zack Weinberg,
          Florian Weimer]
    New page describing pthread_spin_init(3) and pthread_spin_destroy(3)

pthread_spin_lock.3

  Michael Kerrisk [Carlos O'Donell]
    New page describing functions that lock and unlock spin locks
      Add a page describing pthread_spin_lock(3), pthread_spin_unlock(3),
      and pthread_spin_trylock(3).

smartpqi.4
  Don Brace [Michael Kerrisk, G. Branden Robinson]
      Document the smartpqi SCSI driver

veth.4
  Tomáš Pospíšek, Eric Biederman, Michael Kerrisk

New page documenting veth virtual ethernet devices
Based on a page from Tomáš Pospíšek, with some clean-ups by mtk.

Removed pages
---

infnan.3:
Michael Kerrisk
This function was in libc4 and libc5, but never part
of glibc. It ceased to be relevant nearly 20 years
ago. Time to remove the man page.

Newly documented interfaces in existing pages
---

ioctl_userfaultfd.2
userfaultfd.2
Prakash Sangappa [Andrea Arcangeli, Mike Rapoport]
Add description for UFFD_FEATURE_SIGBUS

madvise.2
Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]
Document MADV_WIPEONFORK and MADV_KEEPONFORK
Michael Kerrisk
Note fork() and execve() semantics for wipe-on-fork setting

membarrier.2
Mathieu Desnoyers
Update membarrier manpage for 4.14
Add documentation for these new membarrier() commands:
MEMBARRIER_CMD_PRIVATE_EXPEDITED
MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED

memfd_create.2
Mike Kravetz
Add description of MFD_HUGETLB (hugetlbfs) support
hugetlbfs support for memfd_create() was recently merged by Linus
and should be in the Linux 4.14 release. To request hugetlbfs
support a new memfd_create() flag (MFD_HUGETLB) was added.

readv.2
Christoph Hellwig
Document RWF_NOWAIT added in Linux 4.14

seccomp.2
Tyler Hicks

Document the SECCOMP_GET_ACTION_AVAIL operation added in Linux 4.14
Tyler Hicks
Document the SECCOMP_FILTER_FLAG_LOG
flag added in Linux 4.14
Tyler Hicks
Document the SECCOMP_RET_LOG action added In Linux 4.14
Michael Kerrisk [Kees Cook]
Add description of SECCOMP_RET_KILL_PROCESS
Michael Kerrisk
Add SECCOMP_RET_KILL_THREAD description and rework SECCOMP_RET_KILL text
Michael Kerrisk
Document the seccomp audit logging feature added in Linux 4.14

seccomp.2
proc.5
Tyler Hicks
Document the seccomp /proc interfaces added in Linux 4.14
Document the seccomp /proc interfaces in Linux 4.14:
/proc/sys/kernel/seccomp/actions_avail and
/proc/sys/kernel/seccomp/actions_logged.

sigaltstack.2
Michael Kerrisk [Stas Sergeev]
Document the SS_AUTODISARM flag added in Linux 4.7

proc.5
Michael Kerrisk
Document /proc/locks
Oliver Ebert
Document /proc/kpagecgroup
Oliver Ebert
Add KPF_BALLOON, KPF_ZERO_PAGE, and KPF_IDLE for /proc/kpageflags

pid_namespaces.7
Michael Kerrisk
Document /proc/sys/kernel/ns_last_pid

New and changed links
---

pthread_spin_destroy.3
Michael Kerrisk
New link to new pthread_spin_init.3 page

pthread_spin_trylock.3
pthread_spin_unlock.3
Michael Kerrisk

New links to new pthread_spin_lock.3 page

Global changes

Various pages
  Michael Kerrisk
    Consistently use "x86-64", not "x86_64"
      When referring to the architecture, consistently use "x86-64",
      not "x86_64". Hitherto, there was a mixture of usages, with
      "x86-64" predominant.

Various pages
  G. Branden Robinson
    Replace incorrect uses of Latin abbreviation "cf.".
      People seem to be using "cf." ("conferre"), which means "compare",
      to mean "see" instead, for which the Latin abbreviation would be
      "q.v." ("quod vide" -> "which see").

      In some cases "cf." might actually be the correct term but it's
       still not clear what specific aspects of a function/system call
      one is supposed to be comparing.

Changes to individual pages
---

capget.2
  Michael Kerrisk
    Clarify discussion of kernels that have no VFS capability support

clock_getres.2
  Michael Kerrisk
    clock_gettime() may be implemented in the vDSO

clone.2
  Michael Kerrisk
    Warn that the clone() wrapper modifies child_stack in the parent
  Michael Kerrisk
    Rework the discussion of the historical CLONE_PID for clarity
  Michael Kerrisk
    Add NOTES heading
  Michael Kerrisk
    Add a reference to new veth(4) page
  Michael Kerrisk
    Eliminate some redundant phrasing in discussion of "fn()"

Michael Kerrisk
Combine redundant paragraphs describing child_stack==NULL
Michael Kerrisk
Note that child_stack can be NULL when using the raw system call
Michael Kerrisk
Remove a redundant paragraph

connect.2
Michael Kerrisk
Clarify that ECONNREFUSED is for stream sockets

fcntl.2
Michael Kerrisk [Jens Axboe]
Inode read-write hints persist only until the filesystem is unmounted

flock.2
Michael Kerrisk
Move NFS details to a headed subsection
Michael Kerrisk [Petr Uzel]
Placing an exclusive lock over NFS requires the file is open for writing

fork.2
Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]
Document effect of MADV_WIPEONFORK

fork.2
getsid.2
setpgid.2
setsid.2
Ahmad Fatoum
Include <sys/types.h> in SYNOPSIS to obtain declaration of pid_t

fsync.2
Craig Ringer
ERRORS: add ENOSPC

getcpu.2
Michael Kerrisk
getcpu() may have an implementation in the vDSO

getpid.2
Michael Kerrisk
Mention that PID == TGID, and note contrast with TID
Michael Kerrisk
SEE ALSO: add gettid(2)

getrandom.2
Michael Kerrisk [Fabio Scotoni]

ERRORS: add ENOSYS

getrlimit.2
Michael Kerrisk [Scott Vokes]
Make it clear RLIMIT_NPROC is a limit on current number of processes
https://twitter.com/silentbicycle/status/893849097903505409

gettid.2
Michael Kerrisk
SEE ALSO: add getpid(2)

gettimeofday.2
Michael Kerrisk
Note that gettimeofday() may be implemented in the vDSO

ioctl_userfaultfd.2
Michael Kerrisk
Rework version information for feature bits

io_submit.2
Goldwyn Rodrigues
Add iocb details to io_submit
Add more information about the iocb structure. Explains the
fields of the I/O control block structure which is passed to the
io_submit() call.
Michael Kerrisk
Add cross-reference to io_getevents(2)
Michael Kerrisk
Cross reference pwritev(2) in discussion of RWF_SYNC and RWF_DSYNC

membarrier.2
Mathieu Desnoyers
Update example to take TSO into account
The existing example given specifically states that
it focus on
x86 (TSO memory model), but gives a read-read vs write-write
ordering example, even though this scenario does not require
explicit barriers on TSO.

So either we change the example architecture to a weakly-ordered
architecture, or we change the example to a scenario requiring
barriers on x86.

Let's stay on x86, but provide a Dekker as example instead.
Mathieu Desnoyers
Adapt the MEMBARRIER_CMD_SHARED return value documentation to
reflect that it now returns -EINVAL when issued on a system
configured for nohz_full.

memfd_create.2
  Michael Kerrisk
    Note the limit for size of 'name'

mkdir.2
  Michael Kerrisk [Raghavendra D Prabhu]
    ERRORS: document EINVAL error for invalid filename

mmap.2
  Michael Kerrisk
    Add explicit text noting that 'length' must be greater than 0
      Currently, this detail is hidden in ERRORS.
 Make it clear in
      the main text.
  Michael Kerrisk
    SEE ALSO: add ftruncate(2)

mremap.2
  Mike Kravetz [Florian Weimer, Jann Horn]
    Add description of old_size == 0 functionality
      Since at least the 2.6 time frame, mremap() would create a new
      mapping of the same pages if 'old_size == 0'. It would also leave
      the original mapping. This was used to create a 'duplicate
      mapping'.

      A recent change was made to mremap() so that an attempt to create a
      duplicate a private mapping will fail.
  Michael Kerrisk [Michal Hocko, Mike Kravetz]
    BUGS: describe older behavior for old_size==0 on private mappings
      Explain the older behavior, and why it changed. This is a
      follow-up to Mike Kravetz's patch documenting the behavior
      for old_size==0 with shared mappings.
  Michael Kerrisk
    Reformat EINVAL errors as a list

open.2
  Michael Kerrisk

    By contrast with O_RDONLY, no file permissions are required for O_PATH
      Note one of the significant advantages of O_PATH: many of the
      operations applied to O_PATH file descriptors don't require
      read permission, so there's no reason why the open() itself
      should require read permission.
  Michael Kerrisk
    Note use of O_PATH to provide O_EXEC functionality
  Michael Kerrisk
    Mention O_PATH file descriptor use with fexecve(3)

Michael Kerrisk
ERRORS: document EINVAL error for invalid filename
Michael Kerrisk
Clarify that O_TMPFILE creates a *regular* file
Michael Kerrisk
Make it explicit that O_CREAT creates a regular file
Michael Kerrisk
Since glibc 2.26, the open() wrapper always uses the openat() syscall
Michael Kerrisk
Change pathname used in discussion of rationale for openat()
/path/to/file is a little confusing as a pathname
Michael Kerrisk
Make the purpose of open() a little clearer at the start of the page

open_by_handle_at.2
NeilBrown
Clarifications needed due to NFS reexport
NeilBrown [Lennart Poettering]
Clarify MAX_HANDLE_SZ
As hinted in the kernel source, MAX_HANDLE_SZ is a hint
rather than a promise.

pipe.2
Michael Kerrisk [Marin H.]
Since Linux 4.5, fcntl() can be used to set O_DIRECT for a pipe
See https://bugzilla.kernel.org/show_bug.cgi?id=197917

pivot_root.2
Michael Kerrisk
SEE ALSO: add switch_root(8)

pkey_alloc.2
Breno Leitao
Fix argument order
Currently pkey_alloc() syscall has two arguments, and the very
first argument is still not supported and should be set to zero.
The second argument is the one that should specify the
page access rights.

ptrace.2
Michael Kerrisk
SEE ALSO: add ltrace(1)

reboot.2
Michael Kerrisk [Micha Zegan]
Fix bogus description of reboot() from non-initial PID namespace
The current text was confused (mea culpa). No signal is sent to
the init() process. Rather, depending on the 'cmd' given to

reboot(), the 'group_exit_code' value will set to either SIGHUP or
SIGINT, with the effect that one of those signals is reported to
wait() in the parent process.

See https://bugzilla.kernel.org/show_bug.cgi?id=195899
Michael Kerrisk
SEE ALSO: remove reboot(8) (synonym for halt(8)); add shutdown(8)
Michael Kerrisk
SEE ALSO: add systemctl(1), systemd(1)

recvmmsg.2
sendmmsg.2
Elliot Hughes
Type fixes in SYNOPSIS
[mtk: The raw system calls use "unsigned int", but the glibc
wrappers have "int" for the 'flags' argument.]

sched_setaffinity.2
Michael Kerrisk
SEE ALSO: add numactl(8)

sched_yield.2
Michael Kerrisk [Peter Zijlstra]
sched_yield()
is intended for use with real-time scheduling policies

seccomp.2
Michael Kerrisk [Adhemerval Zanella, Florian Weimer, Kees Cook]
Add some Caveats regarding the use of seccomp filters
Michael Kerrisk
Document the "default" filter return action
The kernel defaults to either SECCOMP_RET_KILL_PROCESS
or SECCOMP_RET_KILL_THREAD for unrecognized filter
return action values.
Michael Kerrisk [Kees Cook]
Change SECCOMP_RET_ACTION to SECCOMP_RET_ACTION_FULL
In Linux 4.14, the action component of the return value
switched from being 15 bits to being 16 bits. A new macro,
SECCOMP_RET_ACTION_FULL, that masks the 16 bits was added,
to replace the older SECCOMP_RET_ACTION.
Michael Kerrisk
Explicitly note that other threads survive SECCOMP_RET_KILL_THREAD
Michael Kerrisk
SEE ALSO: add strace(1)

send.2
Grégory Vander Schueren
Add EALREADY to ERRORS

setns.2
Michael Kerrisk
SEE ALSO: add nsenter(1)

shmop.2
Yubin Ruan
Note that return value of shmat() is page-aligned

sigaction.2
Michael Kerrisk
Rework discussion of SA_SIGINFO handler arguments
Expand and rework the text a little, in particular adding
a reference to sigreturn(2) as a source of further
information about the ucontext argument.
Michael Kerrisk
Mention that libc sets the act.sa_restorer field

sigaltstack.2
Michael Kerrisk [Walter Harms]
Reword BUGS text to be a little clearer
Michael Kerrisk
Add explicit error handling to example code
Michael Kerrisk
Add use of sigaction() to example code

sigreturn.2
Michael Kerrisk
Make it a little clearer that a stack frame is created by the kernel
Michael Kerrisk
glibc has a simple wrapper for sigreturn() that returns ENOSYS

splice.2
Michael Kerrisk
Since Linux 2.6.31,'fd_in'
and 'fd_out' may both refer to pipes

stat.2
Michael Kerrisk [Richard Knutsson]
Use lstat() instead of stat()
It's more logical to use lstat() in the example code,
since one can then experiment with symbolic links, and
also the S_IFLNK case can also occur.
NeilBrown
Correct AT_NO_AUTOMOUNT text and general revisions
Expand on the relationship between fstatat() and the other three
functions, and improve the description of AT_NO_AUTOMOUNT.
Specifically, both stat() and lstat() act the same way with

respect to automounts, and that behavior matches fstatat() with
the AT_NO_AUTOMOUNT flag.

statfs.2
Michael Kerrisk
Add some comments noting filesystems that are no longer current
Michael Kerrisk
Add comments describing a few filesystem types

time.2
Michael Kerrisk
Note that time() may be implemented in the vDSO
Michael Kerrisk
[Victor Porton]
Language fix-up: clarify that "tasks" means "work"
See https://bugzilla.kernel.org/show_bug.cgi?id=197183

userfaultfd.2
Mike Rapoport
BUGS: document spurious UFFD_EVENT_FORK

write.2
fsync.2
close.2
NeilBrown [Jeff Layton]
Update description of error codes
Since 4.13, errors from writeback are more reliably reported
to all file descriptors that might be relevant.

Add notes to this effect, and also add detail about ENOSPC and
EDQUOT which can be delayed in a similar many to EIO - for NFS
in particular.

abort.3
Michael Kerrisk
Starting with glibc 2.27, abort() does not attempt to flush streams
Michael Kerrisk
SEE ALSO: add assert(3)

backtrace_symbols_fd(3)
Stefan Puiu [Walter Harms]
backtrace_symbols_fd() can trigger a call to malloc()

daemon.3
Michael Kerrisk
SEE ALSO: add daemon(7), logrotate(8)

errno.3

Michael
Kerrisk
Note use of errno(1) to look up error names and numbers
Michael Kerrisk
Update error list for POSIX.1-2008
POSIX.1-2008 specified a couple of new errors not present in
POSIX.1-2001.
Michael Kerrisk [Walter Harms]
Note the use of perror(3) and strerror(3)
Michael Kerrisk
Recast the advice against manually declaring 'errno'
Recast the advice against manually declaring 'errno' to
a more modern perspective. It's 13 years since the original
text was added, and even then it was describing old behavior.
Cast the description to be about behavior further away in
time, and note more clearly that manual declaration will
cause problems with modern C libraries.
Michael Kerrisk
Add some missing errors
Michael Kerrisk
Error numbers are positive values (rather than nonzero values)
POSIX.1-2008 noted the explicitly
the change (to align with
the C standards) that error numbers are positive, rather
than nonzero.
Michael Kerrisk
Reorganize the text and add some subheadings
Restructure the text and add some subheadings for better
readability. No (intentional) content changes.
Michael Kerrisk [Wesley Aptekar-Cassels]
Note that error numbers vary somewhat across architectures
Added after a patch from Wesley Aptekar-Cassels that proposed
to add error numbers to the text.
Michael Kerrisk
Note the <errno.h> also provides the symbolic error names
Michael Kerrisk [Walter Harms]
Explicitly note that error numbers vary also across UNIX systems

exec.3
Michael Kerrisk
glibc 2.24 dropped CWD from the default path
Document the glibc 2.24 change that dropped CWD from the default
search path employed by execlp(), execvp() and execvpe() when
PATH
is not defined.

fexecve.3
Michael Kerrisk

O_PATH file descriptors are also usable with fexecve()
Cristian Rodríguez
fexecve() is now implemented with execveat(2), where available
Michael Kerrisk
Add some detail on the glibc implementation of fexecve() via execveat(2)

ffs.3
Michael Kerrisk
glibc 2.27 relaxes the FTM requirements for ffsl() and ffsll()

get_nprocs_conf.3
Michael Kerrisk
SEE ALSO: add nproc(1)

lround.3
Michael Kerrisk [David Eckardt]
Clarify that lround() rounds *halfway cases" away from zero
See https://bugzilla.kernel.org/show_bug.cgi?id=194601

makedev.3
Adrian Bunk
glibc has deprecated exposing the definitions via <sys/types.h>

mallinfo.3
Jakub Wilk
Fix the example
Remove reference to non-standard "tlpi_hdr.h" and replace calls to
functions that were declared in this header.

malloc.3
Michael Kerrisk
SEE ALSO: add valgrind(1)

popen.3
Michael Kerrisk
Add a cross reference to Caveats in system(3)
All of the same risks regarding system() also apply to popen().

pthread_detach.3
Michael Kerrisk [Rahul Bedarkar]
Improve sentence describing freeing of resources on process termination
As reported by Rahul, the existing sentence could be read as
meaning that resources of joined and terminated detached
threads are freed only at process termination. Eliminate
that possible misreading.

pthread_yield.3
Michael Kerrisk [Peter Zijlstra]

pthread_yield() is intended for use with real-time scheduling policies

setlocale.3
Michael Kerrisk [Kištof Želechovski]
The standards do not specify all of the locale categories

sockatmark.3
Seonghun Lim
Fix cruft in code example

stdio.3
Michael Kerrisk
Use proper section cross references in function list
Michael Kerrisk
Remove crufty
reference to pc(1)

sysconf.3
Michael Kerrisk
Mention get_nprocs_conf(3)
Mention get_nprocs_conf(3) in discussion of _SC_NPROCESSORS_CONF
and _SC_NPROCESSORS_ONLN.

system.3
Michael Kerrisk [Bastien Roucaries]
Create a "Caveats" subsection to hold warnings about the use of system()
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=882222
Michael Kerrisk [Bastien Roucaries]
Mention PATH explicitly in discussion of system() and set-UID programs
Michael Kerrisk [Bastien Roucaries]
Note that user input for system() should be carefully sanitized
Michael Kerrisk
Mention file capabilities in discussion of privileged programs
Michael Kerrisk
Correctly note which shell Debian uses as (noninteractive) /bin/sh

core.5
Michael Kerrisk
Add some notes on systemd and core dumps
Michael Kerrisk
Dumps are not produced if core_pattern is empty and core_uses_pid is 0

Michael Kerrisk [Per Böhlin]
RLIMIT_CORE is not enforced when piping core dump to a program
Michael Kerrisk
SEE ALSO: add systemd-coredump(8)
Michael Kerrisk
SEE ALSO: add coredumpctl(1)

filesystems.5
  Michael Kerrisk [Jonny Grant]
    Replace crufty URL reference for 'smb' with up-to-date URL
  Michael Kerrisk [Jonny Grant]
    Refer to VFAT as an extended FAT (not DOS) filesystem

proc.5
  Michael Kerrisk [Miklos Szered, Ram Pai]
    Correct the description of the parent mount ID for /proc/PID/mountinfo
  Oliver Ebert
    Add mmap-exclusive bit for /proc/[pid]/pagemap
  Marcus Folkesson
    Update description of /proc/<pid>/oom_score
  Lucas Werkmeister
    Clarify permissions in /proc/[pid]/fd/
  Michael Kerrisk
    Add reference to pid_namespaces(7) for /proc/sys/kernel/ns_last_pid

shells.5
  Michael Kerrisk
    SEE ALSO: add pam_shells(8)

sysfs.5
  Michael Kerrisk
    Add a brief explanation
 of /sys/kernel
  Michael Kerrisk
    Add a brief description of /sys/class/net
  Michael Kerrisk
    Add a brief description of /sys/kernel/mm
  Michael Kerrisk
    Add brief description of /sys/kernel/debug/tracing
  Michael Kerrisk
    Add a description of /sys/kernel/mm/hugepages

arp.7
  Michael Kerrisk
    SEE ALSO: add arpd(8)

capabilities.7
  Michael Kerrisk
    Add a reference to xattr(7) in the discussion of extended attributes
  Michael Kerrisk
    SEE ALSO: add captest(8)

epoll.7
  Michael Kerrisk

Note existence of kcmp() KCMP_EPOLL_TFD operation

fifo.7
Michael Kerrisk
Refer reader to pipe(7) for details of I/O semantics of FIFOs

hier.7
Michael Kerrisk
SEE ALSO: add file-hierarchy(7)

icmp.7
Michael Kerrisk
SEE ALSO: add rdisc(8)

man-pages.7
Michael Kerrisk
Note that "x86-64" is generally preferred over "x86_64"
G. Branden Robinson
Add a use case for real
minus character

namespaces.7
Michael Kerrisk
Add a reference to new veth(4) page
Michael Kerrisk
EXAMPLE: refer also to example in clone(2)

pid_namespaces.7
Michael Kerrisk
SEE ALSO: add reboot(2)
Add because reboot(2) has special semantics for non-initial
PID namespaces.

pthreads.7
Michael Kerrisk
SEE ALSO: add pthread_spin_init(3) and pthread_spin_lock(3)

socket.7
Michael Kerrisk [Petr Malat, Tobias Klausmann]
Correct the description of SO_RXQ_OVFL

standards.7
Michael Kerrisk
SEE ALSO: add getconf(1), confstr(3), pathconf(3), sysconf(3)

user_namespaces.7
Christian Brauner [Michael Kerrisk]
Document new 340 line idmap limit

ld.so.8
  Michael Kerrisk [Yubin Ruan]
    Simplify language around conferring capabilities
      The statement "conferring permitted or effective capabilities"
      to the process is somewhat redundant. Binaries with capabilities
       confer capabilities only to those process capability sets, so it's
      simpler to just say "confers capabilities to the process".

========== Changes in man-pages-4.15 ==========

Released: 2018-02-02, Palo Alto

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

NeilBrown
 <neilb@suse.com>
Nikola Forró <nforro@redhat.com>
Nikolay Borisov <nborisov@suse.com>
Pradeep Kumar <pradeepsixer@gmail.com>
QingFeng Hao <haoqf@linux.vnet.ibm.com>
Ricardo Biehl Pasquali <pasqualirb@gmail.com>
roblabla <man-pages@roblab.la>
Roman Gushchin <guro@fb.com>
Shawn Landden <slandden@gmail.com>
Stefan Hajnoczi <stefanha@redhat.com>
Stefan Raspl <raspl@linux.vnet.ibm.com>

Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages
---

s390_sthyi.2
  QingFeng Hao [Michael Kerrisk]
    New page for s390-specific s390_sthyi(2)

network_namespaces.7
  Michael Kerrisk
    New page describing network namespaces
      Based on content moved from namespaces(7)

vsock.7
  Stefan Hajnoczi [Jorgen Hansen, Michael Kerrisk]
    Document the VSOCK socket address family

Newly documented interfaces in existing pages
---

cgroups.7
  Michael Kerrisk [Tejun Heo]
     Document cgroups v2 "thread mode"
  Michael Kerrisk [Tejun Heo]
    Document cgroup v2 delegation via the 'nsdelegate' mount option
  Michael Kerrisk
    Document the cgroup.max.depth and cgroup.max.descendants files
  Michael Kerrisk
    Document 'release_agent' mount option
  Michael Kerrisk [Roman Gushchin]
    Document /sys/kernel/cgroup/delegate
  Michael Kerrisk [Roman Gushchin]
    Document /sys/kernel/cgroup/features
  Michael Kerrisk [Roman Gushchin]
    Document cgroups v2 cgroup.stat file

Global changes

Various pages
  G. Branden Robinson
    Standardize on "nonzero"

Also add this term to the style guide in man-pages(7).

Changes to individual pages
---

bpf.2
  Nikolay Borisov
    Sync list of supported map types with 4.14 kernel

copy_file_range.2
  Michael Kerrisk
    Library support was added in glibc 2.27
  Shawn Landden
    glibc provides a
 user-space emulation where the system call is absent
  Florian Weimer
    EFBIG errors are possible, similar to write(2)
  Michael Kerrisk
    ERRORS: add EISDIR
  Michael Kerrisk
    Order ERRORS alphabetically
  Michael Kerrisk
    Add comment to code example explaining use of syscall(2)

fcntl.2
read.2
write.2
  NeilBrown
    Document "Lost locks" as cause for EIO.
      If an advisory lock is lost, then read/write requests on any
      affected file descriptor can return EIO - for NFSv4 at least.

memfd_create.2
  Michael Kerrisk
    glibc support for memfd_create() was added in version 2.27

mlock.2
  Michael Kerrisk
    Make details for MLOCK_ONFAULT a little more explicit
  Michael Kerrisk
    glibc support for mlock2() is added in version 2.27

mmap.2
  John Hubbard [Michael Hocko]
    MAP_FIXED is no longer discouraged
      MAP_FIXED has been widely used for a very long time, yet the man
      page

still claims that "the use of this option is discouraged".
  John Hubbard
    MAP_FIXED updated documentation
        -- Expand the documentation to discuss the hazards in
          enough detail to allow avoiding them.

        -- Mention the upcoming MAP_FIXED_SAFE flag.

        -- Enhance the alignment requirement slightly.

mount.2
  Keno Fischer [Michael Kerrisk]
    Add EINVAL error condition when MS_BINDing MNT_LOCKED submounts

mprotect.2
pkey_alloc.2
  Michael Kerrisk
    Glibc support for memory protection keys was added in version 2.27

perf_event_open.2
  Michael Kerrisk
    SEE ALSO: add perf(1)

pkey_alloc.2
  Michael Kerrisk
    Clarify description of pkey_alloc() 'flags' argument

prctl.2
  Michael Kerrisk
    Defer to capabilities(7) for discussion of the "keep capabilities" flag

recvmmsg.2
sendmmsg.2
  Nikola Forró
    Point out that error handling is unreliable

seccomp.2
  Michael Kerrisk
     Clarify that SECCOMP_RET_TRAP SIGSYS signal is thread-directed

syscalls.2
  Michael Kerrisk
    Add s390-specific s390_sthyi(2) to syscall list

unshare.2
  Michael Kerrisk
    Clarify that EUSERS occurred only until kernel 4.8

errno.3
  Michael Kerrisk
    'errno -s' can be used to search for errors by string in description
  Michael Kerrisk
    Add Linux error text corresponding to ENOMEM

fgetpwent.3
  Michael Kerrisk
    Add missing ATTRIBUTES preamble

fts.3
  Michael Kerrisk [Pradeep Kumar]
    fts_pathlen = strlen(fts_path) + strlen(fts_name)

fuse.4
  Michael Kerrisk
    Places errors in alphabetical order (no content changes)

veth.4
  Michael Kerrisk
    Add network_namespaces(7)

sysfs.5
  Michael Kerrisk
    Refer to cgroups(7) for information about files in /sys/kernel/cgroup

capabilities.7
  Michael Kerrisk
    Note which capability sets are affected by SECBIT_NO_SETUID_FIXUP
      Note explicitly
 that SECBIT_NO_SETUID_FIXUP is relevant for
      the permitted, effective, and ambient capability sets.
  Michael Kerrisk
    Deemphasize the ancient prctl(2) PR_SET_KEEPCAPS command
      The modern approach is SECBITS_KEEP_CAPS.
  Michael Kerrisk
    Clarify effect of CAP_SETFCAP
      Make it clear that CAP_SETFCAP allows setting arbitrary
      capabilities on a file.
  Michael Kerrisk
    Clarify which capability sets are effected by SECBIT_KEEP_CAPS
      This flag has relevance only for the process permitted and
      effective sets.
  Michael Kerrisk
    Rephrase CAP_SETPCAP description
      * Mention kernel versions.
      * Place current kernel behavior first
  Michael Kerrisk

SECBIT_KEEP_CAPS is ignored if SECBIT_NO_SETUID_FIXUP is set
Michael Kerrisk
Ambient set is also cleared when UIDs are set to nonzero value

cgroups.7
Michael Kerrisk
Add a more complete description
of cgroup v1 named hierarchies
Michael Kerrisk
Add a section on unmounting cgroup v1 filesystems
Michael Kerrisk
Add subsection describing cgroups v2 subtree delegation
Michael Kerrisk
Mention ENOENT error that can occur when writing to subtree_control file
Michael Kerrisk
Add list of currently available version 2 controllers
Nikolay Borisov
Add information about RDMA controller
Michael Kerrisk
Rewrite the description of cgroup v2 subtree control
Michael Kerrisk [Tejun Heo]
Note Linux 4.11 changes to cgroup v2 delegation containment rules
Michael Kerrisk
systemd(1) nowadays automatically mounts the cgroup2 filesystem
Michael Kerrisk
Clarify that cgroup.controllers is read-only
Michael Kerrisk
Elaborate a little on problems of splitting threads across cgroups in v1
Michael Kerrisk [Tejun Heo]
Tweak the description of delegation of cgroup.subtree_control

ip.7
Ricardo Biehl Pasquali
INADDR_* values cannot be assigned directly to 's_addr'
Michael Kerrisk
s/INADDR_ANY/INADDR_LOOPBACK/ in discussion of htonl()
INADDR_LOOPBACK is a better example, since it is not
byte-order neutral.

namespaces.7
network_namespaces.7
Michael Kerrisk
Move content from namespaces(7) to network_namespaces(7)

pid_namespaces.7
Michael Kerrisk
SEE ALSO: add mount_namespaces(7)

sched.7
  Michael Kerrisk [Andrea Parri]
    Correctly describe effect of priority changes for RT threads
      The placement of a thread in the run queue for its new
      priority depends on the direction of movement in priority.
      (This appears to contradict POSIX, except in the case of
      pthread_setschedprio().)

user_namespaces.7
  Michael Kerrisk
    Mention NS_GET_OWNER_UID ioctl() operation

========== Changes in man-pages-4.16 ==========

Song Liu <songliubraving@fb.com>
Tomi Salminen <tsalminen@forcepoint.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

membarrier.2
  Mathieu Desnoyers [Michael Kerrisk]
    Document new membarrier commands introduced in Linux 4.16
      Document the following membarrier commands introduced in
      Linux 4.16:

        MEMBARRIER_CMD_GLOBAL_EXPEDITED
          (the old enum label MEMBARRIER_CMD_SHARED is now an
          alias to preserve header backward compatibility)
        MEMBARRIER_CMD_REGISTER_GLOBAL_EXPEDITED
        MEMBARRIER_CMD_PRIVATE_EXPEDITED_SYNC_CORE
        MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_SYNC_CORE

mmap.2
   Jan Kara [Ross Zwisler, Michael Kerrisk]
     Add description of MAP_SHARED_VALIDATE and MAP_SYNC
  Michal Hocko [John Hubbard, Michael Kerrisk, Jann Horn]
     Document new MAP_FIXED_NOREPLACE flag
       4.17+ kernels offer a new MAP_FIXED_NOREPLACE flag which allows
       the caller to atomically probe for a given address range.

readv.2
io_submit.2
  Jürg Billeter
     Document RWF_APPEND added in Linux 4.16

capabilities.7
  Michael Kerrisk
     Describe file capability versioning
  Michael Kerrisk [Serge E. Hallyn]
     Document namespaced-file capabilities
     [There's still more work to be done on this new text]

Changes to individual pages
---

bpf.2
  Michael Kerrisk
    Update list of architectures that support JITed eBPF
      And note kernel version numbers where support is added.
  Michael Kerrisk
    Kernel 4.15 added CONFIG_BPF_JIT_ALWAYS_ON

     This causes the JIT compiler to be always on and
      forces bpf_jit_enable to 1.

execve.2
  Michael Kerrisk
    Note that describing execve as "executing a new process" is misleading
      This misdescription is so common that it's worth calling it out
      explicitly.
  Michael Kerrisk
    More explicitly describe effect of execve() in the opening paragraph

fallocate.2
  Michael Kerrisk
    Since Linux 4.16, Btrfs supports FALLOC_FL_ZERO_RANGE

getrlimit.2
  Michael Kerrisk
    CAP_SYS_RESOURCE capability is required in *initial user namespace*

io_submit.2
  Michael Kerrisk
    Add kernel version numbers for various 'aio_rw_flags' flags
  Michael Kerrisk
    Place 'aio_rw_flags' in alphabetical order

mmap.2
  Jann Horn
    MAP_FIXED is okay if the address range has been reserved
      Clarify that MAP_FIXED is appropriate if the specified address
      range has been reserved using an existing mapping,
 but shouldn't
      be used otherwise.
  Michael Kerrisk
    Move the text on MAP_FIXED to NOTES
      This text has become rather long, making it somewhat
      unwieldy in the discussion of the mmap() flags. Therefore,
      move it to NOTES, with a pointer in DESCRIPTION referring

the reader to NOTES.
Michael Kerrisk [Heinrich Schuchardt]
Clarify that when addr==NULL, address chosen by kernel is page-aligned
Michael Kerrisk
Add a little historical detail on the obsolete MAP_DENYWRITE

mount.2
Michael Kerrisk
ERRORS: add EBUSY for the case of trying to stack same mount twice
Michael Kerrisk
Remove a couple of obsolete EBUSY errors
As far as I can tell, these EBUSY errors disappeared
with the addition of stackable mounts in Linux 2.4.

msgget.2
semget.2
shmget.2
Michael Kerrisk
The purpose of "flags" == 0 is to obtain ID of an existing IPC object

This was implied in these pages, but the meaning of "flags" == 0
could be more explicit, as indicated by questions such as
https://stackoverflow.com/questions/49833569/flag-value-of-semget-function

open.2
Jann Horn
Document more -ETXTBSY conditions
Jakub Wilk
Add missing argument for snprintf() in example code

perf_event_open.2
Song Liu
Add type kprobe and uprobe
Two new types kprobe and uprobe are being added to
perf_event_open(), which allow creating kprobe or
uprobe with perf_event_open. This patch adds
information about these types.

ptrace.2
Jann Horn
Copy retval info for SECCOMP_GET_FILTER to right section
The "RETURN VALUE" section made a claim that was incorrect for
PTRACE_SECCOMP_GET_FILTER. Explicitly describe the behavior of
PTRACE_SECCOMP_GET_FILTER in the "RETURN VALUE" section (as
usual), but leave the
now duplicate description in the section
describing PTRACE_SECCOMP_GET_FILTER, since the
PTRACE_SECCOMP_GET_FILTER section would otherwise probably become

harder to understand.

readv.2
Michael Kerrisk
Remove redundant sentence

seccomp.2
Michael Kerrisk
Note that execve() may change syscall numbers during life of process
On a multiarch/multi-ABI platform such as modern x86, each architecture/ABI (x86-64, x32, i386)has its own syscall numbers, which means a seccomp() filter may see different syscall numbers over the life of the process if that process uses execve() to execute programs that has a different architectures/ABIs.
Michael Kerrisk
Note which architectures support seccomp BPF
Michael Kerrisk
In EXAMPLE, clearly note that x32 syscalls are >= X32_SYSCALL_BIT

shutdown.2
Carsten Grohmann
SEE ALSO: add close(2)

syscall.2
Adam
Borowski
Add riscv

wait.2
Michael Kerrisk [Robin Kuzmin]
wait() and waitpid() block the calling thread (not process)

wait4.2
Michael Kerrisk [Martin Mares]
Soften the warning against the use of wait3()/wait4()
These functions are nonstandard, but there is no replacement.

See https://bugzilla.kernel.org/show_bug.cgi?id=199215

crypt.3
encrypt.3
Carlos O'Donell [Michael Kerrisk]
Add notes about _XOPEN_CRYPT
The distribution may choose not to support _XOPEN_CRYPT in the case that the distribution has transitioned from glibc crypt to libxcrypt.

fseek.3

Michael Kerrisk [Andy Owen]
ERRORS: EBADF should be ESPIPE
Michael Kerrisk
Improve EPIPE error text

getcwd.3
Carlos O'Donell
Mention that "(unreachable)" is no longer returned for glibc >= 2.27.

makedev.3
Michael Kerrisk
Since glibc 2.28, <sys/types.h> no longer defines these macros

pthread_create.3
Frederic Brault
Note default thread stack size for several architectures

tsearch.3
Jann Horn
Clarify items vs nodes
The manpage claimed that tsearch() returns a pointer to a data item. This is incorrect; tsearch() returns a pointer to the corresponding tree node, which can also be interpreted as a pointer to a pointer to the data item.

Since this API is quite unintuitive, also add a clarifying sentence.
Jann Horn
tdelete() can return dangling pointers
POSIX says that deleting the root node must cause tdelete() to return some unspecified non-NULL pointer. Glibc implements it by returning a dangling pointer to the (freed) root node.
Therefore, explicitly note that tdelete() may return bad pointers that must not be accessed.

elf.5
Michael Kerrisk
SEE ALSO: add patchelf(1)

filesystems.5
Michael Kerrisk
Add an entry for tmpfs(5)

group.5
Michael Kerrisk
SEE ALSO: add vigr(8)

passwd.5

Michael Kerrisk
SEE ALSO: add vipw(8)

sysfs.5
Michael Kerrisk
Add brief note on /sys/fs/smackfs

tmpfs.5
Mike Frysinger
Document current mount options
Some of this content is moved from the mount(8) man page.
Style was based on proc(5) sections.
Michael Kerrisk
Remove reference to mount(8) for discussion of mount options
The mount options are now described in this page.
Michael Kerrisk
SEE ALSO: add Documentation/vm/transhuge.txt
Michael Kerrisk
Reformat 'huge' and 'mpol' mount option values as lists
Michael Kerrisk
Describe 'mpol' mount options
Based on text from Documentation/filesystems/tmpfs.txt.
Michael Kerrisk
Document 'huge' mount options
Based on text from Documentation/vm/transhuge.txt.
Michael Kerrisk
SEE ALSO: add set_mempolicy(2)
Michael Kerrisk
Document mpol=local mount option

capabilities.7
Michael Kerrisk
Remove redundant mention of PTRACE_SECCOMP_GET_FILTER

cgroups.7
Michael Kerrisk
cgroup.events transitions generate POLLERR as well as POLLPRI

mount_namespaces.7
Michael Kerrisk
Note another case where shared "peer groups" are formed

namespaces.7
Michael Kerrisk [Konstantin Khlebnikov]
Mention that device ID should also be checked when comparing NS symlinks
When comparing two namespaces symlinks to see if they refer to
the same namespace, both the inode number and the device ID
should be compared. This point was already made clear in

ioctl_ns(2), but was missing from this page.
Michael Kerrisk
Note an idiosyncrasy of /proc/[pid]/ns/pid_for_children
/proc/[pid]/ns/pid_for_children has a value only after first
child is
created in PID namespace. Verified by experiment.

network_namespaces.7
Michael Kerrisk
Network namespaces isolate the UNIX domain abstract socket namespace
Michael Kerrisk
Add cross reference to unix(7)
For further information on UNIX domain abstract sockets.

posixoptions.7
Carlos O'Donell
Expand XSI Options groups
We define in detail the X/Open System Interfaces i.e. _XOPEN_UNIX
and all of the X/Open System Interfaces (XSI) Options Groups.

The XSI options groups include encryption, realtime, advanced
realtime, realtime threads, advanced realtime threads, tracing,
streams, and legacy interfaces.
Michael Kerrisk
Use a more consistent, less cluttered layout for option lists
Michael Kerrisk
Make function lists more consistent and less cluttered
Use more consistent layout for lists of functions, and
remove punctuation from the lists
to make them less cluttered.

socket.7
Michael Kerrisk [Tomi Salminen]
Fix error in SO_INCOMING_CPU code snippet
The last argument is passed by value, not reference.

time.7
Michael Kerrisk [Enrique Garcia]
Mention clock_gettime()/clock_settime() rather than [gs]ettimeofday()
gettimeofday() is declared obsolete by POSIX. Mention instead
the modern APIs for working with the realtime clock.

See https://bugzilla.kernel.org/show_bug.cgi?id=199049

unix.7
Michael Kerrisk [Rusty Russell]
ERRORS: add EBADF for sending closed file descriptor with SCM_RIGHTS

vdso.7
  Michael Kerrisk
    VDSO symbols (system calls) are not visible to seccomp(2) filters

xattr.7
  Michael Kerrisk
    SEE ALSO: add selinux(8)

ld.so.8
  Mike Frysinger
    Make lack of separator escaping explicit
      Make it clear that the delimiters in LD_PRELOAD, LD_LIBRARY_PATH,
      and LD_AUDIT cannot be escaped
 so people don't try various methods
      (such as \:) to workaround it.
  Michael Kerrisk
    Remove unneeded mention of PATH in discussion of LD_LIBRARY_PATH
      This brief sentence doesn't add value to the text.

========== Changes in man-pages-5.00 ==========

Released: 2019-03-06, Munich

Apologies if I missed anyone!

New and rewritten pages
----

s390_guarded_storage.2
  Eugene Syromyatnikov
    New page documenting s390_guarded_storage(2) s390-specific system call

address_families.7
  Michael Kerrisk [Eugene Syromyatnikov]
    New page that contains details of socket address families
      There is too much detail in socket(2). Move most of it into
      a new page instead.

bpf-helpers.7
  Michael
 Kerrisk [Daniel Borkmann, Quentin Monnet]
    Add new man page for eBPF helper functions
      (autogenerated from kernel source files)

Removed Pages
---

mdoc.7
mdoc.samples.7
  Michael Kerrisk [Ingo Schwarze]
    Remove mdoc(7) and mdoc.samples(7)
      groff_mdoc(7) from the groff project provides a better
      equivalent of mdoc.samples(7) and the 'mandoc' project
      provides a better mdoc(7). And nowadays, there are virtually
      no pages in "man-pages" that use mdoc markup.

Newly documented interfaces in existing pages
---

fanotify_init.2
fanotify.7
  nixiaoming [Amir Goldstein, Michael Kerrisk]
    Document FAN_REPORT_TID
      fanotify_init.2: add new flag FAN_REPORT_TID
      fanotify.7: update description of member pid in
        struct fanotify_event_metadata
  Amir Goldstein
    Document FAN_MARK_FILESYSTEM
      Monitor fanotify
 events on the entire filesystem.
  Matthew Bobrowski [Amir Goldstein]
    Document FAN_OPEN_EXEC and FAN_OPEN_EXEC_PERM

io_submit.2
  Adam Manzanares
    Document IOCB_FLAG_IOPRIO

msgctl.2
semctl.2
shmctl.2
  Davidlohr Bueso [Joe Lawrence, Michael Kerrisk]
    Document STAT_ANY commands

prctl.2
  Konrad Rzeszutek Wilk [Michael Kerrisk]
    Document PR_SET_SPECULATION_CTRL and PR_GET_SPECULATION_CTRL

sched_setattr.2
  Claudio Scordino [Michael Kerrisk]
    Document SCHED_FLAG_DL_OVERRUN and SCHED_FLAG_RECLAIM

socket.2
  Tobias Klauser
    Document AF_XDP
      Document AF_XDP added in Linux 4.18.

inotify.7
  Henry Wilson
    Document IN_MASK_CREATE

unix.7
  Michael Kerrisk
    Document SO_PASSSEC
  Michael Kerrisk
    Document SCM_SECURITY ancillary data

New and changed links
---

reallocarray.3
  Michael Kerrisk
    New link to malloc(3)

precedence.7
  Josh Triplett
    Add as a redirect
 to operator.7

Global changes

Various pages
  Michael Kerrisk [G. Branden Robinson]
    Use '\e' rather than '\\' to get a backslash

Various pages
  Michael Kerrisk [Bjarni Ingi Gislason, G. Branden Robinson]
    Use zerowidth space in appropriate locations

Various pages
  Michael Kerrisk
    Clarify the distinction between "file descriptor" and "file description"

Various pages
  Mike Rapoport
    Update paths for in-kernel memory management documentation files

A few pages
  Michael Kerrisk
    Change references to '2.6.0-test*' series kernels to just '2.6.0'

Changes to individual pages
---

iconv.1
  Marko Myllynen
    SEE ALSO: add uconv(1)

localedef.1
  Howard Johnson
    Note that -f and -c, are reversed from what you might expect

time.1
  Michael Kerrisk [Johannes Altmanninger]
    Document the -q/--quiet option
  Jakub Wilk
    Update bug reporting address

bpf.2
  Tobias
 Klauser
    Update JIT support list for Linux 4.18
      JIT support for x86-32 was during the Linux 4.18 release cycle.
      Also correct the entry for MIPS (only MIPS64 is supported).
  Oded Elisha
    Fix bug in example
  Quentin Monnet
    SEE ALSO: add bpf-helpers(7)

capget.2
  Michael Kerrisk
    Remove crufty sentence suggesting use of deprecated functions
      Remove crufty sentence suggesting use of deprecated capsetp(3) and
      capgetp(3); the manual page for those functions has long (at least
      as far back as 2007) noted that they are deprecated.
  Michael Kerrisk
    Remove first paragraph, which repeats details from capabilities(7)

chroot.2
  Michael Kerrisk
    Mention /proc/[pid]/root

clock_getres.2
  Michael Kerrisk [Jens Thoms Toerring]

CLOCK_MONOTONIC_RAW does not count while the system is suspended
Michael Kerrisk [Jens Thoms Toerring]
On Linux CLOCK_MONOTONIC counts
time that the system has run since boot
Michael Kerrisk [Jens Thoms Toerring]
CLOCK_MONOTONIC does not count while the system is suspended
Michael Kerrisk
ERRORS: add EINVAL error for noncanonical clock_settime() value

clone.2
Michael Kerrisk
Rework discussion of threads and signals
The discussion is phrased in terms of signals sent using kill(2),
but applies equally to a signal sent by the kernel.
Jann Horn
Pending CLONE_NEWPID prevents thread creation
Michael Kerrisk
Clarify the discussion of threads and signals
And explicitly introduce the terms "process-directed" and
"thread-directed" signals.
Eugene Syromyatnikov
Add information about clone and clone2 on IA-64
Michael Kerrisk
ERRORS: EINVAL occurs with CLONE_NEWUSER if !CONFIG_USER_NS

connect.2
Benjamin Peterson
Document error semantics of nonblocking UNIX domain sockets

epoll_ctl.2
Michael Kerrisk
Use the term "interest list" consistently

epoll_wait.2
Michael Kerrisk
Clarify the behavior when epoll_wait()-ing on an empty interest list
Michael Kerrisk
Note that epoll_wait() round robins through the set of ready descriptors

eventfd.2
Michael Kerrisk
Move text noting that eventfd() creates a FD earlier in the page

fcntl.2
Michael Kerrisk
Actual pipe capacity may in practice be less than nominal capacity
The number of bytes that can be written to the pipe may be less
(sometimes substantially less) than the nominal capacity.

Eugene Syromyatnikov
Mention that l_sysid is not used even if present
Michael Kerrisk
Briefly explain the meaning of the 'l_sysid' field in 'struct flock'

futex.2
Benjamin Peterson
Make the example use C11 atomics rather than GCC builtins

getcpu.2
Tobias Klauser [Michael Kerrisk]
getcpu() now has a glibc wrapper;
remove mention of syscall(2)
The glibc wrapper was added in glibc 2.29, release on 1 Feb 2019.

getgid.2
getpid.2
getuid.2
pipe.2
syscall.2
Eugene Syromiatnikov [Michael Kerrisk]
Describe 2nd return value peculiarity
Some architectures (ab)use second return value register for
additional return value in some system calls. Let's describe this.

getgroups.2
Michael Kerrisk
Note that a process can drop all groups with: setgroups(0, NULL)

getrlimit.2
Eugene Syromyatnikov
Note that setrlimit(RLIMIT_CPU) doesn't fail
Michael Kerrisk
Resource limits are process-wide attributes shared by all threads
This was already noted in pthreads(7), but bears repeating here.
Eugene Syromyatnikov
Correct information about large limits on 32-bit architectures

gettid.2
Michael Kerrisk
Glibc provides a wrapper since version 2.30

gettimeofday.2
Michael Kerrisk
ERRORS: add EINVAL
for noncanonical 'tv' argument to settimeofday()

gettimeofday.2

clock_getres.2
  Michael Kerrisk [Jens Thoms Toerring]
    ERRORS: EINVAL can occur if new real time is less than monotonic clock

getxattr.2
removexattr.2
setxattr.2
  Michael Kerrisk [Andreas Gruenbacher, Enrico Scholz]
    ERRORS: replace ENOATTR with ENODATA
      See also https://bugzilla.kernel.org/show_bug.cgi?id=201995

inotify_add_watch.2
  Paul Millar
    Add IN_ONLYDIR based error
  Henry Wilson
    Note errors that can occur for IN_MASK_CREATE

io_submit.2
  Jeff Moyer
    Fix the description of aio_data
      aio_data is not a kernel-internal field.

madvise.2
  Michal Hocko [Niklas Hambüchen]
    MADV_FREE clarify swapless behavior

memfd_create.2
  Marc-André Lureau
    Update hugetlb file-sealing support
  Lucas De Marchi
    Fix header for memfd_create()
  Joseph C. Sible
    _GNU_SOURCE is required

mmap.2
  Elliott Hughes

  Explicitly state that the fd can be closed
  Jann Horn [Michal Hocko, William Kucharski]
    Fix description of treatment of the hint
      The current manpage reads as if the kernel will always pick a free
      space close to the requested address, but that's not the case.

mount.2
  Michael Kerrisk
    Clearly distinguish per-mount-point vs per-superblock mount flags
  Michael Kerrisk
    MS_SILENT is ignored when changing propagation type

Michael Kerrisk
Attempts to change MS_SILENT setting during remount are silently ignored
Michael Kerrisk [Harry Mallon]
Document EROFS for read-only filesystems
See https://bugzilla.kernel.org/show_bug.cgi?id=200649
Michael Kerrisk
Clarify that per-superblock flags are shared during remount
Michael Kerrisk
Remove crufty sentence about MS_BIND + MS_REMOUNT
Michael Kerrisk
Mention /proc/PID/mountinfo
Many people are unaware of the /proc/PID/mountinfo
file. Provide
a helpful clue here.
Michael Kerrisk
Mandatory locking also now requires CONFIG_MANDATORY_FILE_LOCKING
Michael Kerrisk [Simone Piccardi]
Add MS_STRICTATIME to list of flags that can be used in remount
Michael Kerrisk
EACCES: note some reasons why a filesystem may be read-only
Michael Kerrisk
SEE ALSO: add ioctl_iflags(2)

msgop.2
Michael Kerrisk
Correct the capability description for msgsnd() EACCESS error

nfsservctl.2
Michael Kerrisk
Add VERSIONS section noting that this system call no longer exists

open.2
Lucas Werkmeister
Document ENXIO for sockets
Michael Kerrisk
Clarify a special use case of O_NONBLOCK for devices
Eugene Syromiatnikov
Mention presence of unused O_RSYNC definition
O_RSYNC is defined in <asm/fcntl.h> on HP PA-RISC, but is not
used anyway.
Eugene Syromiatnikov
Document FASYNC usage
in Linux UAPI headers
Andrew Price
Remove O_DIRECT-related quotation
Remove a section that adds no benefit to the discussion of O_DIRECT.
Michael Kerrisk [Robin Kuzmin]
Clarify that O_NONBLOCK has no effect on poll/epoll/select

perf_event_open.2
  Vince Weaver [Wang Nan]
    Document the PERF_EVENT_IOC_PAUSE_OUTPUT ioctl
      The PERF_EVENT_IOC_PAUSE_OUTPUT ioctl was introduced in Linux 4.7.
  Vince Weaver
    Fix wording in multiplexing description
  Vince Weaver
    Clarify exclude_idle
  Vince Weaver
    Document the PERF_EVENT_IOC_QUERY_BPF ioctl
  Vince Weaver
    Document the PERF_EVENT_IOC_MODIFY_ATTRIBUTES ioctl
  Vince Weaver
    Fix prctl behavior description

pivot_root.2
  Elvira Khabirova
    Explain the initramfs case and point to switch_root(8)
  Joseph Sible [Joseph C. Sible]
    Document EINVAL if root is rootfs

pkey_alloc.2
  Michael Kerrisk [Szabolcs Nagy]
    Switch
 to glibc prototype in SYNOPSIS

poll.2
  Michael Kerrisk
    Note that poll() and ppoll() are not affected by O_NONBLOCK

posix_fadvise.2
  Eugene Syromyatnikov
    Describe the difference between fadvise64/fadvise64_64

prctl.2
  Benjamin Peterson
    PR_SET_MM_EXE_FILE may now be used as many times as desired
  Michael Kerrisk
    Add some further historical details on PR_SET_MM_EXE_FILE
  Michael Kerrisk [Jann Horn]
    Explain the circumstances in which the parent-death signal is sent
  Michael Kerrisk
    Rework the PR_SET_PDEATHSIG description a little, for easier readability
  Michael Kerrisk
    Add additional info on PR_SET_PDEATHSIG
      The signal is process directed and the siginfo_t->si_pid
      filed contains the PID of the terminating parent.

Michael Kerrisk
Note libcap(3) APIs for operating on ambient capability set
(However, the libcap APIs do not yet seem to have
manual pages...)
Michael Kerrisk
Mention libcap APIs for operating on capability bounding set

ptrace.2
Dmitry V. Levin
Do not say that PTRACE_O_TRACESYSGOOD may not work
Jann Horn
BUGS: ptrace() may set errno to zero

readdir.2
Eugene Syromyatnikov
Fix struct old_linux_dirent in accordance with current definition

readv.2
Xiao Yang [Florian Weimer]
Fix wrong errno for an unknown flag

rename.2
Michael Kerrisk
glibc 2.28 adds library support for renameat2()
Tobias Klauser
Add feature test macro for renameat2()
The glibc wrapper for renameat2() was added in glibc 2.28 and
requires _GNU_SOURCE.
Eugene Syromiatnikov
Some additional notes regarding RENAME_WHITEOUT
Lucas Werkmeister [Michael Kerrisk]
Add kernel versions for RENAME_NOREPLACE support
Michael Kerrisk
Rework list of supported filesystems for RENAME_NOREPLACE
Tobias Klauser
renameat2()
now has a glibc wrapper; remove mention of syscall(2)

s390_runtime_instr.2
Eugene Syromyatnikov
Add a note about runtime_instr.h availability

s390_sthyi.2
Eugene Syromyatnikov [Heiko Carstens]
Some minor additions

sched_setattr.2
Michael Kerrisk

Add a bit more detail for SCHED_DEADLINE

sched_setparam.2
Michael Kerrisk
Clarify that scheduling parameters are per-thread (not per-process)

seccomp.2
Michael Kerrisk
(Briefly) document SECCOMP_FILTER_FLAG_SPEC_ALLOW
Michael Kerrisk
SEE ALSO: add bpfc(1)

select.2
Michael Kerrisk
BUGS: the use of value-result arguments is a design bug
Michael Kerrisk [Robin Kuzmin]
Note that select() and pselect() are not affected by O_NONBLOCK

select_tut.2
Michael Kerrisk [Antonio Chirizzi]
Diagnose inet_aton() errors with simple fprintf() (not perror())

setgid.2
Michael Kerrisk
Clarify EPERM capability requirements with respect
to user namespaces

setns.2
Michael Kerrisk
When joining a user namespace, it must be a descendant user namespace
Michael Kerrisk
Note capability requirements for changing PID namespace
Note capability requirements for changing network, IPC, or UTS namespace
Note capability requirements for changing cgroup namespace
Michael Kerrisk
Some text restructuring and reordering

set_thread_area.2
Eugene Syromyatnikov
Mention related prctl() requests in SEE ALSO
Eugene Syromyatnikov
Mention that get_thread_area() is also Linux-specific
Eugene Syromyatnikov
Describe set_thread_area()/get_thread_area() on m68k/MIPS

setuid.2
Michael Kerrisk
Clarify EPERM capability requirements with respect to user namespaces

sigaction.2
  Eugene Syromyatnikov [Michael Kerrisk]
    Describe obsolete usage of struct sigcontext as signal handler argument

sigsuspend.2
  Michael Kerrisk
    Clarify that
 sigsuspend() suspends the calling *thread*

socket.2
  Michael Kerrisk
    Remove references to external docs
      This information is all in the new address_families(7)
  Michael Kerrisk
    Add cross reference to address_families(7)
  Eugene Syromyatnikov
    Reinstate AF_VSOCK mention
  Michael Kerrisk
    Simplify list of address families
      Remove many of the details that are in address_families(7)
  Nikola Forró
    Remove notes concerning AF_ALG and AF_XDP
      All address families are now documented in address_families.7.
  Michael Kerrisk
    Remove some more obscure protocols from address family list
      The list of address families in this page is still
      overwhelmingly long. So let's shorten it.
      The removed entries are all in address_families(7).
  Michael Kerrisk
    Remove a few obsolete protocols
      Documentation for these remains in address_families(7)

socketpair.2
   Eugene Syromyatnikov
    Note that AF_TIPC also supports socketpair(2)
      Introduced by Linux commit v4.12-rc1~64^3~304^2~1.

stat.2
  Michael Kerrisk [Alessandro Vesely]
    ERRORS: ENOENT can occur where a path component is a dangling symlink
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=909789
  Benjamin Peterson
    SEE ALSO: add statx(2)

statx.2
  Tobias Klauser [Michael Kerrisk]
    statx() now has a glibc wrapper; remove mention of syscall(2)

syscall.2
  Eugene Syromyatnikov [Michael Kerrisk]
    Elaborate x32 ABI specifics
  snyh
    Fix wrong retval register number in alpha architecture
  Helge Deller
    parisc needs care with syscall parameters
  Michael Kerrisk
    Rework table to render within 80 columns

syscalls.2
  Eugene Syromyatnikov
    Change example of a thin syscall wrapper to chdir()
      As truncate(3) should dispatch between truncate/truncate64,
      as noted
 later in the page.
  Eugene Syromyatnikov [Michael Kerrisk]
    Update syscall table
      Added: arc_gettls, arc_settls, arc_usr_cmpxchg, arch_prctl,
      atomic_barrier, atomic_cmpxchg_32, bfin_spinlock, breakpoint,
      clone2, cmpxchg, cmpxchg_badaddr, dma_memcpy, execv, get_tls,
      getdomainname, getdtablesize, gethostname, getxgid, getxpid,
      getxuid, metag_get_tls, metag_set_fpu_flags,metag_set_tls,
      metag_set_global_bit, newfstatat, old_adjtimex, oldumount,
      or1k_atomic, pread, pwrite, riscv_flush_icache,
      sched_get_affinity, sched_set_affinity, set_tls, setaltroot,
      sethae, setpgrp, spill, sram_alloc, sram_free, swapcontext,
      switch_endian, sys_debug_setcontext, syscall, sysmips, timerfd,
      usr26, usr32, xtensa.

      Uncommented: memory_ordering

      Renamed: ppc_rtas to rtas (__NR_rtas), ppc_swapcontext to
      swapcontext (__NR_swapcontext).
   Eugene Syromyatnikov
    Note about s390x and old_mmap
  Michael Kerrisk
    Add s390_guarded_storage(2)
  Michael Kerrisk
    Update syscall list for Linux 4.18
  Eugene Syromyatnikov
    Note that not all architectures return errno negated
  Helge Deller
    parisc Linux does not any longer emulate HP-UX
  Michael Kerrisk
    Comment out details of a few system calls that only ever briefly existed

unshare.2
  Michael Kerrisk [Shawn Landden]
    Same EINVAL errors as for clone(2) can also occur with unshare(2)
  Tycho Andersen
    Note EINVAL when unsharing pid ns twice
      The kernel doesn't allow unsharing a pid NS if it has
      previously been unshared.

ustat.2
  Michael Kerrisk
    Starting with version 2.28, glibc no longer provides a wrapper function

vmsplice.2
  Andrei Vagin
    Note that vmsplice can splice pages from pipe to memory

wait.2
  Michael Kerrisk
    Add some cross references
 to core(5)

write.2
  Michael Kerrisk [Nadav Har'El]
    RETURN VALUE: clarify details of partial write and
      https://bugzilla.kernel.org/show_bug.cgi?id=197961
  Goldwyn Rodrigues
    Add details on partial direct I/O writes

alloca.3
  Michael Kerrisk [Robin Kuzmin]
    Prevent any misunderstanding about when allocated memory is released

bsd_signal.3
  Xiao Yang
    Fix the wrong version of _POSIX_C_SOURCE

bstring.3
  Michael Kerrisk [Emil Fihlman]
    Correct argument list for memmem() prototype

cmsg.3
  Michael Kerrisk
    Explain zero-initialization requirement for CMSG_NXTHDR()
  Michael Kerrisk
    Remove out of place mention of MSG_CTRUNC
      This detail is covered in recvmsg(2), and now also in unix(7).
  Michael Kerrisk
    Note that CMSG_FIRSTHDR can return NULL

Michael Kerrisk
Remove unnecessary 'fdptr' intermediate variable in example code

des_crypt.3
encrypt.3
Michael Kerrisk

The functions described in these pages are removed in glibc 2.28

dlsym.3
Michael Kerrisk
Describe a case where a symbol value may be NULL

errno.3
Michael Kerrisk [Robert P. J. Day]
Mention that errno(1) is part of the 'moreutils' package

exec.3
Michael Kerrisk [Eugene Syromyatnikov]
Note that SPARC provides an execv() system call

exit.3
Mike Frysinger
Note wider sysexits.h availability

ferror.3
Elliot Hughes
Warn about closing the result of fileno()

fnmatch.3
Elliott Hughes
Clarify "shell wildcard pattern"

getaddrinfo.3
Michael Kerrisk [Eric Sanchis]
Fix off-by-one error in example client program

getcwd.3
Michael Kerrisk
Rework text on use of getcwd() system call
Make it clear that all of the library functions described on this
page will use the getcwd() system call if it is present.
Michael Kerrisk
Add details on the getcwd() syscall and how it
used by libc functions
Michael Kerrisk
Reorder the text describing "(unreachable)" being returned by getcwd()

getmntent.3
  Elliot Hughes
    Clarify that endmntent() should be used rather than fclose()

isatty.3
  Michael Kerrisk [Jakub Wilk]
    Most non-tty files nowadays result in the error ENOTTY
      Historically, at least FIFOs and pipes yielded the error EINVAL.

lockf.3
  Ian Turner
    ERRORS: add EINTR

malloc.3
  Michael Kerrisk
    Add reference to glibc MallocInternals wiki
  Michael Kerrisk
    Note that calloc() detects overflow when multiplying its arguments
  Michael Kerrisk
    Since glibc 2.29, reallocarray() is exposed by defining _DEFAULT_SOURCE
      Info gleaned from glibc NEWS file.

pthread_attr_init.3
  Michael Kerrisk [Göran Häggsjö, Jakub Wilk]
    Use correct printf() specifier for "size_t" in example program

pthread_rwlockattr_setkind_np.3
  Carlos O'Donell
    Remove bug notes

pthread_setname_np.3
   Jakub Wilk
    Explain _np suffix
      Add text to CONFORMING TO explaining that the "_np"
      suffix is because these functions are non-portable.

putenv.3
  Michael Kerrisk
    Note a glibc extension: putenv("NAME") removes an environment variable

resolver.3
  Michael Becker
    Add documentation of res_nclose()

strcmp.3
  Heinrich Schuchardt
    Clarify that strcmp() is not locale aware

strcpy.3
  Matthew Kilgore
    Fix example code for strncpy, which could pass an incorrect length
  Michael Kerrisk [Frank Theile]
    Use "destination" consistently (instead of "target" sometimes)

strfry.3
  Keith Thompson
    Remove incorrect reference to rand(3)

string.3
strlen.3
strnlen.3
  Michael Kerrisk [Jakub Wilk]
    Use 'bytes' not 'characters'
      This is in line with POSIX terminology.

system.3
  Michael Kerrisk [Jonny Grant]
    Use '(char *) NULL' rather than '(char *) 0'
  Michael
 Kerrisk
    Note that system() can fail for the same reasons as fork(2)
  Arkadiusz Drabczyk
    Mention that 'errno' is set on error

termios.3
  Eugene Syromyatnikov
    Note an XTABS alpha issue

trunc.3
  Michael Kerrisk [Eric Benton, G. Branden Robinson]
    Make the description a little clearer
  Michael Kerrisk
    Emphasize that the return value is a floating-point number

xcrypt.3
  Jason A. Donenfeld
    Warn folks not to use these functions

lirc.4
  Sean Young
    Fix broken link
  Sean Young
    Document error returns more explicitly
  Sean Young
    lirc.h include file is in /usr/include/linux/lirc.h
  Sean Young [Alec Leamas, Mauro Carvalho Chehab]

Remove ioctls and feature bits which were never implemented
Sean Young
Unsupported ioctl() operations always return ENOTTY
Sean Young
LIRC_MODE_LIRCCODE has been replaced by LIRC_MODE_SCANCODE
Sean Young
Document remaining
ioctl (LIRC_GET_REC_TIMEOUT)
Now all ioctls are documented.
Sean Young
Timeout reports are enabled by default
Sean Young
Some devices are send only
Sean Young
Update SEE ALSO
Sean Young
LIRC_CAN_SET_REC_DUTY_CYCLE_RANGE was never supported
No driver ever supported such a thing.
Michael Kerrisk
Clarify the description LIRC_SET_REC_TIMEOUT

tty.4
Michael Witten
Add `vcs(4)' and `pty(7)' to the `SEE ALSO' section

vcs.4
Mattias Engdegård [Michael Witten]
Fix broken example code

core.5
Michael Kerrisk
Add cross reference to vdso(7) where "virtual DSO" is mentioned

filesystems.5
Eugene Syromyatnikov
Mention sysfs(2)

host.conf.5
Nikola Forró
Clarify glibc versions in which spoof options were removed

proc.5
Michael Kerrisk [Philip Dumont]
Document /proc/[tid]
See also https://bugzilla.kernel.org/show_bug.cgi?id=201441
Michael Kerrisk
Add an overview section describing the groups of files under /proc
Keno Fischer [Robert O'Callahan]

Correct description of NStgid
Lucas Werkmeister
Document fdinfo format for timerfd
Stephan Knauss
Mention /proc/uptime includes time spent in suspend
Michael Kerrisk
Reword /proc/PID/fdinfo timerfd field descriptions as a hanging list
Michael Kerrisk
SEE ALSO: add htop(1) and pstree(1)
fs/proc/uptime.c:uptime_proc_show() fetches time using
ktime_get_boottime which includes the time spent in suspend.
Michael Kerrisk
Document /proc/PID/status CoreDumping field
Michael Kerrisk
Mention choom(1) in discussion of /proc/[pid]/oom_score_adj
Michael Kerrisk
Add a few details on /proc/PID/fdinfo timerfd
Michael Kerrisk
Document /proc/meminfo KReclaimable field
Michael Kerrisk
Explain how to determine top-most mount in /proc/PID/mountinfo
Explain how to determine the top-most mount at a particular
location by inspecting /proc/PID/mountinfo.
Michael Kerrisk [Jakub Wilk]
Remove bogus suggestion to use cat(1) to read files containing '\0'
Michael Kerrisk
Refer to mount(2) for explanation of mount vs superblock options
Michael Kerrisk
Fix description of /proc/PID/* ownership to account for user namespaces
Elvira Khabirova
Describe ambiguities in /proc/<pid>/maps
Michael Kerrisk [Nick Gregory]
Since Linux 4.5, "stack:" is no longer shown in /proc/PID/maps
Nikola Forró
Document /proc/[pid]/status Speculation_Store_Bypass field
Alan Jenkins
Vmalloc information is no longer calculated (Linux 4.4)
Michael Kerrisk [Alexander E. Patrakov, Jakub Wilk, Michael Kerrisk]
Use 'tr '\000' '\n' to display contents of /proc/PID/environ
Michael Kerrisk
Setting dumpable to 1 reverts ownership of /proc/PID/*
to effective IDs
Michael Kerrisk
Document /proc/meminfo LazyFree field
Michael Kerrisk
Fix kernel source pathname for soft-dirty documentation
Michael Kerrisk
/proc/[pid]/status VmPMD field was removed in Linux 4.15

resolv.conf.5
  Nikola Forró
    Document no-reload (RES_NPRELOAD) option

tzfile.5
  Paul Eggert
    Sync from tzdb upstream

capabilities.7
  Michael Kerrisk
    Fix some imprecisions in discussion of namespaced file capabilities
      The file UID does not come into play when creating a v3
      security.capability extended attribute.
  Michael Kerrisk
    Note that v3 security.attributes are transparently created/retrieved
  Michael Kerrisk
    Improve the discussion of when file capabilities are ignored
      The text stated that the execve() capability transitions are not
      performed for the same reasons that setuid and setgid mode bits
      may be ignored (as
 described in execve(2)). But, that's not quite
      correct: rather, the file capability sets are treated as empty
      for the purpose of the capability transition calculations.
  Michael Kerrisk
    Rework bounding set as per-thread set in transformation rules
  Michael Kerrisk
    Substantially rework "Capabilities and execution of programs by root"
      Rework for improved clarity, and also to include missing details
      on the case where (1) the binary that is being executed has
      capabilities attached and (2) the real user ID of the process is
      not 0 (root) and (3) the effective user ID of the process is 0
      (root).
  Marcus Gelderie
    Add details about SECBIT_KEEP_CAPS
      The description of SECBIT_KEEP_CAPS is misleading about the
      effects on the effective capabilities of a process during a
      switch to nonzero UIDs. The effective set is cleared based on
      the
 effective UID switching to a nonzero value, even if
      SECBIT_KEEP_CAPS is set. However, with this bit set, the
      effective and permitted sets are not cleared if the real and
      saved set-user-ID are set to nonzero values.
  Marcus Gelderie
    Mention header for SECBIT constants
      Mention that the named constants (SECBIT_KEEP_CAPS and others)
      are available only if the linux/securebits.h user-space header
      is included.

Michael Kerrisk
Add text introducing bounding set along with other capability sets
Michael Kerrisk [Allison Randal]
Update URL for location of POSIX.1e draft standard
Michael Kerrisk
CAP_SYS_CHROOT allows use of setns() to change the mount namespace
Michael Kerrisk [Pierre Chifflier]
Ambient capabilities do not trigger secure-execution mode
Michael Kerrisk
Add a subsection on per-user-namespace "set-user-ID-root" programs
Michael Kerrisk
Rework discussion of exec and UID 0, correcting a couple of details
Clarify the "Capabilities and execution of programs by root"
section, and correct a couple of details:
* If a process with rUID == 0 && eUID != 0 does an exec,
the process will nevertheless gain effective capabilities
if the file effective bit is set.
* Set-UID-root programs only confer a full set of capabilities
if the binary does not also have attached capabilities.
Michael Kerrisk
Update URL for libcap tarballs
The previous location does not seem to be getting updated.
(For example, at the time of this commit, libcap-2.26
had been out for two months, but was not present at
http://www.kernel.org/pub/linux/libs/security/linux-privs.
Michael Kerrisk
Clarify which capability sets capset(2) and capget(2) apply to
capset(2) and capget(2) apply
operate only on the permitted,
effective, and inheritable process capability sets.
Michael Kerrisk
Correct the description of SECBIT_KEEP_CAPS
Michael Kerrisk
Add background details on capability transformations during execve(2)
Add background details on ambient and bounding set when
discussing capability transformations during execve(2).
Michael Kerrisk
Document the 'no_file_caps' kernel command-line option

cgroup_namespaces.7
Michael Kerrisk [Troy Engel]
Clarify the example by making an implied detail more explicit.
See https://bugzilla.kernel.org/show_bug.cgi?id=201047

cgroups.7
Michael Kerrisk
Add more detail on v2 'cpu' controller and realtime threads
Explicitly note the scheduling policies that are relevant for the

v2 'cpu' controller.
Michael Kerrisk
Document the use of 'cgroup_no_v1=named' to disable v1 named hierarchies

This feature was added in Linux 5.0.
Michael Kerrisk [Mike Weilgart]
Complete partial sentence re kernel boot options and 'nsdelegate'
https://bugzilla.kernel.org/show_bug.cgi?id=201029
Michael Kerrisk
Reframe the text on delegation to include more details about cgroups v1
Michael Kerrisk [Leah Hanson]
Rework discussion of writing to cgroup.type file
In particular, it is possible to write "threaded" to a
cgroup.type file if the current type is "domain threaded".
Previously, the text had implied that this was not possible.
Michael Kerrisk [Balbir Singh, Marcus Gelderie]
Soften the discussion about delegation in cgroups v1
Balbir pointed out that v1 delegation was not an accidental
feature.

epoll.7
Michael Kerrisk
Introduce the terms "interest list" and "ready list"
Michael Kerrisk
Consistently use the term "interest list" rather than "epoll
set"
Michael Kerrisk
Reformat Q&A list
Michael Kerrisk
Note that edge-triggered notification wakes up only one waiter
Note a useful performance benefit of EPOLLET: ensuring that
only one of multiple waiters (in epoll_wait()) is woken
up when a file descriptor becomes ready.
Michael Kerrisk
Expand the discussion of the implications of file descriptor duplication
In particular, note that it may be difficult for an application
to know about the existence of duplicate file descriptors.

feature_test_macros.7
Michael Kerrisk [Andreas Westfeld]
Add more detail on why FTMs must be defined before including any header

inotify.7
Michael Kerrisk [Paul Millar]
Note ENOTDIR error that can occur for IN_ONLYDIR
Note ENOTDIR error that occurs when requesting a watch on a
nondirectory with IN_ONLYDIR.

ip.7
  Bert Hubert
    IP_RECVTTL error fixed

      I need to get the TTL of UDP datagrams from userspace, so I set
      the IP_RECVTTL socket option. And as promised by ip.7, I then get
      IP_TTL messages from recvfrom. However, unlike what the manpage
      promises, the TTL field gets passed as a 32 bit integer.

man.7
  Michael Kerrisk
    SEE ALSO: remove mdoc.samples(7)

mount_namespaces.7
  Michael Kerrisk
    SEE ALSO: add findmnt(8)

namespaces.7
  Michael Kerrisk
    List factors that may pin a namespace into existence
      Various factors may pin a namespace into existence, even when it
      has no member processes.
  Michael Kerrisk [Tycho Kirchner]
    Briefly explain why CAP_SYS_ADMIN is needed to create nonuser namespaces
  Michael Kerrisk
    Mention ioctl(2) in discussion of namespaces APIs
  Michael Kerrisk
    SEE ALSO: add pam_namespace(8)

pid_namespaces.7
  Michael Kerrisk
    Clarify the semantics for the adoption of orphaned
 processes
      Because of setns() semantics, the parent of a process may reside
      in the outer PID namespace. If that parent terminates, then the
      child is adopted by the "init" in the outer PID namespace (rather
      than the "init" of the PID namespace of the child).
  Michael Kerrisk
    Note a detail of /proc/PID/ns/pid_for_children behavior
      After clone(CLONE_NEWPID), /proc/PID/ns/pid_for_children is empty
      until the first child is created. Verified by experiment.
  Michael Kerrisk
    Note that a process can do unshare(CLONE_NEWPID) only once

sched.7
  Michael Kerrisk [Eugene Syromyatnikov]
    In the kernel source SCHED_OTHER is actually called SCHED_NORMAL
  Michael Kerrisk

SEE ALSO: add ps(1) and top(1)
Michael Kerrisk
SEE ALSO: add chcpu(1), lscpu(1)

signal.7
Michael Kerrisk [Robin Kuzmin]
Clarify that sigsuspend() and pause() suspend the calling *thread*
Helge
Deller
Add signal numbers for parisc
Michael Kerrisk
Unify signal lists into a signal table that embeds standards info
Having the signals listed in three different tables reduces
readability, and would require more table splits if future
standards specify other signals.
Michael Kerrisk
Reorder the architectures in the signal number lists
x86 and ARM are the most common architectures, but currently
are in the second subfield in the signal number lists.
Instead, swap that info with subfield 1, so the most
common architectures are first in the list.
Michael Kerrisk
Place signal numbers in a separate table
The current tables of signal information are unwieldy,
as they try to cram in too much information.
Michael Kerrisk
Insert standards info into tables
Michael Kerrisk
SEE ALSO: add clone(2)

socket.7
Michael Kerrisk
Refer reader to unix(7) for information on SO_PASSSEC
Michael Kerrisk
SEE ALSO: add address_families(7)

socket.7
unix.7
Michael Kerrisk
Move text describing SO_PEERCRED from socket(7) to unix(7)
This is, AFAIK, an option specific to UNIX domain sockets, so
place it in unix(7).

tcp.7
udp.7
Michael Kerrisk
Add a reference to socket(7) noting existence of further socket options

unix.7
  Michael Kerrisk
    Enhance the description of SCM_RIGHTS
      The existing description is rather thin. More can be said.
  Michael Kerrisk
    There is a limit on the size of the file descriptor array for SCM_RIGHTS
      The limit is defined in the kernel as SCM_MAX_FD (253).
  Michael Kerrisk
    Rework SO_PEERCRED text for greater clarity
  Michael Kerrisk [Felipe Gasper]
    Clarify SO_PASSCRED behavior
  Michael Kerrisk
    Explicitly note that SO_PASSCRED provides SCM_CREDENTIALS
 messages
  Michael Kerrisk
    If the buffer to receive SCM_RIGHTS FDs is too small, FDs are closed
  Michael Kerrisk
    One must send at least one byte of real data with ancillary data
  Michael Kerrisk
    Ancillary data forms a barrier when receiving on a stream socket
  Michael Kerrisk
    When sending ancillary data, only one item of each type may be sent
  Michael Kerrisk
    Improve wording describing socket option argument/return values
  Michael Kerrisk
    Clarify treatment of incoming ancillary data if 'msg_control' is NULL
  Michael Kerrisk
    Note behavior if buffer to receive ancillary data is too small
  Michael Kerrisk
    Fix a minor imprecision in description of SCM_CREDENTIALS
  Michael Kerrisk
    Refer reader to socket(7) for information about SO_PEEK_OFF

user_namespaces.7
  Michael Kerrisk
    Rework terminology describing ownership of nonuser namespaces
      Prefer the word "owns" rather than
 "associated with" when
      describing the relationship between user namespaces and non-user
      namespaces. The existing text used a mix of the two terms, with
      "associated with" being predominant, but to my ear, describing the
      relationship as "ownership" is more comprehensible.

vdso.7
  Helge Deller
    Fix parisc gateway page description

ld.so.8

Michael Kerrisk [Florian Weimer, David Newall]
Document the --preload command-line option added in glibc 2.30
Michael Kerrisk
Note delimiters for 'list' in --audit and --inhibit-rpath
Michael Kerrisk
Place OPTIONS in alphabetical order
Michael Kerrisk
LD_PRELOAD-ed objects are added to link map in left-to-right order

zdump.8
Paul Eggert
Sync from tzdb upstream

zic.8
Paul Eggert
Sync from tzdb upstream

========== Changes in man-pages-5.01 ==========

Released: 2019-05-09, Munich

Contributors

The
following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhinav Upadhyay <er.abhinav.upadhyay@gmail.com>
Andreas Korb <andreas.d.korb@gmail.com>
Anisse Astier <anisse@astier.eu>
Brice Goglin <Brice.Goglin@inria.fr>
Carlos O'Donell <carlos@redhat.com>
Dr. Jürgen Sauermann <mail@xn--jrgen-sauermann-zvb.de>
Egmont Koblinger <egmont@gmail.com>
Elias Benali <stackptr@users.sourceforge.net>
Elliot Hughes <enh@google.com>
Florian Weimer <fweimer@redhat.com>
Hugues Evrard <hevrard@google.com>
Jakub Nowak <jakub.jakub.nowak@gmail.com>
Jakub Wilk <jwilk@jwilk.net>
Keegan Saunders <keeganwsaunders@gmail.com>
Lucas Werkmeister <mail@lucaswerkmeister.de>
Marcus Huewe <suse-tux@gmx.de>
Michael Kerrisk <mtk.manpages@gmail.com>

Michael Witten <mfwitten@gmail.com>
Seth Troisi <sethtroisi@google.com>
Slavomir Kaslev <kaslevs@vmware.com>
Vincent Lefevre <vincent@vinc17.net>
Wladimir
Mutel <muwlgr@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

tsearch.3
  Florian Weimer [Michael Kerrisk]
    Document the twalk_r() function added in glibc 2.30

New and changed links
---

twalk_r.3
  Michael Kerrisk
    New link to twalk(3) page

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Note that 'addrlen' is left unchanged in the event of an error
      See http://austingroupbugs.net/view.php?id=836.

bpf.2
  Michael Kerrisk
    Update kernel version info for JIT compiler

clone.2
  Michael Kerrisk [Jakub Nowak]
    CLONE_CHILD_SETTID has effect before clone() returns *in the child*
      CLONE_CHILD_SETTID may not have had effect by the time clone()
      returns in the parent, which could be relevant if the
      CLONE_VM flag is employed. The relevant kernel code is in
       schedule_tail(), which is called in ret_from_fork()
      in the child.

      See https://bugzilla.kernel.org/show_bug.cgi?id=203105

execve.2
exec.3
  Michael Kerrisk [Dr. Jürgen Sauermann]
    Consistently use the term 'pathname' (not 'path')

execve.2
  Michael Kerrisk
    Note that stack+environ size is also limited to 3/4 of _STK_LIM
      In fs/exec.c::prepare_arg_pages(), we have:

          limit = _STK_LIM / 4 * 3;
          limit = min(limit, bprm->rlim_stack.rlim_cur / 4);
  Michael Kerrisk [Dr. Jürgen Sauermann]
    SEE ALSO: refer to exec(3) (rather than execl(3))

pipe.2
  Michael Kerrisk
    Note that 'pipefd' is left unchanged in the event of an error
      See http://austingroupbugs.net/view.php?id=467.

sched_setaffinity.2
  Michael Kerrisk [Brice Goglin]
    Correct details of return value of sched_getaffinity() syscall

setfsgid.2
  Michael Kerrisk
    Rewrite for improved
 clarity and defer to setfsuid() for details
      Rewrite for improved clarity and defer to setfsuid(2) for the
      rationale of the fsGID rather than repeating the same details
      in this page.

setfsuid.2
  Michael Kerrisk
    Rewrite for improved clarity and to hint history more explicitly
      The current text reads somewhat clumsily. Rewrite it to introduce
      the eUID and fsUID in parallel, and more clearly hint at the
      historical rationale for the fsUID, which is detailed lower in
      the page.

socketpair.2
  Michael Kerrisk
    Clarify that 'sv' is left unchanged in the event of an error
      See also http://austingroupbugs.net/view.php?id=483.

splice.2
  Slavomir Kaslev

EAGAIN can occur when called on nonblocking file descriptors

syscalls.2
Michael Kerrisk [Andreas Korb]
Remove crufty text about i386 syscall dispatch table
The removed text long ago ceased to be
accurate. Nowadays, the
dispatch table is autogenerated when building the kernel (via
the kernel makefile, arch/x86/entry/syscalls/Makefile).

tee.2
Slavomir Kaslev
EAGAIN can occur when called on nonblocking file descriptors

fopen.3
Elliot Hughes
Explain BSD vs glibc "a+" difference
Where is the initial read position for an "a+" stream?

POSIX leaves this unspecified. Most BSD man pages are silent, and
MacOS has the ambiguous "The stream is positioned at the end of
the file", not differentiating between reads and writes other than
to say that fseek(3) does not affect writes. glibc's documentation
explicitly specifies that the initial read position is the
beginning of the file.

mallinfo.3
Elliott Hughes
Further discourage use of mallinfo()
The BUGS section already explains why you need to be cautious
about using mallinfo,
but given the number of bug reports we see
on Android, it seems not many people are reading that far. Call it
out up front.

malloc_trim.3
Carlos O'Donell
Update trimming information
Since glibc 2.8, commit 68631c8eb92, the malloc_trim function has
iterated over all arenas and free'd back to the OS all page runs
that were free. This allows an application to call malloc_trim to
consolidate fragmented chunks and free back any pages it can to
potentially reduce RSS usage.

posix_memalign.3
Elliot Hughes
Some functions set errno
True of bionic, glibc, and musl. (I didn't check elsewhere.)

resolver.3
  Michael Kerrisk [Wladimir Mutel]
    Mention that some functions set 'h_errno'

stdarg.3
  Michael Kerrisk [Vincent Lefevre]
    Remove the NOTES section describing the ancient varargs macros
      stdarg.h is now 30 years old, and gcc long ago (2004)
 ceased to
      implement <varargs.h>. There seems little value in keeping this
      text.

      See https://bugzilla.kernel.org/show_bug.cgi?id=202907
  Michael Kerrisk [Egmont Koblinger]
    Add a note that "..." in function signature means a variadic function
      Egmont suggested adding this, because the string "..." appears
      at several other points in the page, but just to indicate that
      some text is omitted from example code.

strerror.3
  Jakub Wilk
    Don't discuss buffer size for strerror_l()
      Unlike strerror_r(), strerror_l() doesn't take buffer length as an
      argument.

strtol.3
strtoul.3
  Jakub Wilk
    SEE ALSO: add strtoimax(3), strtoumax(3)

sysconf.3
  Michael Kerrisk [Hugues Evrard]
    Clearly note that _SC_PAGESIZE and _SC_PAGE_SIZE are synonyms

tsearch.3
  Florian Weimer
    Do not use const arguments in twalk() callback
      The const specifier is not
 part of the prototype (it only applies
      to the implementation), so showing it here confuses the reader.
  Michael Kerrisk
    SYNOPSIS: add missing definition of 'VISIT' type
  Michael Kerrisk
    Reformat twalk() and twalk_r() prototypes for easier readability

console_codes.4
  Jakub Wilk

Document that \e[1;n] and \e[2;n] support 16 colors
Source: setterm_command() in drivers/tty/vt/vt.c

elf.5
Michael Kerrisk [Keegan Saunders]
A data segment does not have PF_X

proc.5
Michael Witten [Anisse Astier]
Add missing Inode field to /proc/net/unix

hostname.7
Florian Weimer
HOSTALIASES/search path processing is DNS-specific
Other NSS modules do not necessarily honor these settings.

inode.7
Michael Kerrisk
Note that timestamp fields measure time starting at the Epoch
Michael Kerrisk
Timestamp fields are structures that include a nanosecond component
Michael Kerrisk

Add references to execve(2) to describe set-UID/set-GID behaviors

========== Changes in man-pages-5.02 ==========

Released: 2019-08-02, Munich

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

fanotify.7
fanotify_init.2
fanotify_mark.2
  Matthew Bobrowski [Amir Goldstein, Jan Kara]
    Document FAN_REPORT_FID and directory modification events

vdso.7
  Tobias Klauser [Palmer Dabbelt]
    Document vDSO for RISCV

Renamed pages
---

sysvipc.7
  svipc(7) is renamed to sysvipc(7).
    The name sysvipc is a bit more natural, and is the name used in
    /proc/sysvipc.

New and
changed links
---

svipc.7
  Michael Kerrisk
    Add old name of sysvipc(7) page as a link

Global changes

Various pages
  Michael Kerrisk
    Change reference to svipc(7) to sysvipc(7)

Changes to individual pages
---

pldd.1
  G. Branden Robinson [Michael Kerrisk]
    Document glibc's unbreakage of tool
      After a longstanding breakage, pldd now works again (glibc 2.30).

bpf.2
  Michael Kerrisk
    Correct kernel version for JIT support on s390

chdir.2
  Michael Kerrisk
    Add ENOTDIR error for fchdir()

execve.2
  Michael Kerrisk [Eugene Syromyatnikov]
    Since Linux 5.1, the limit on the #! line is 255 chars (rather than 127)
  Shawn Landden [Michael Kerrisk]
    Add more detail about Shebangs
  Michael Kerrisk
    Linux is not alone in ignoring the set-UID and set-GID bits for scripts

mount.2
  Michael Kerrisk
    ERRORS: Add a couple of EINVAL errors
 for MS_MOVE
  Michael Kerrisk
    SEE ALSO: add chroot(2) and pivot_root(2)

mprotect.2
  Mark Wielaard
    pkey_mprotect() acts like mprotect() if pkey is set to -1, not 0

mprotect.2
pkey_alloc.2
  Mark Wielaard [Florian Weimer]
    _GNU_SOURCE is required for the pkey functions.

pivot_root.2
  Michael Kerrisk
    ERRORS: EINVAL occurs if 'new_root' or its parent has shared propagation
  Michael Kerrisk
    'new_root' must be a mount point
      It appears that 'new_root' may not have needed to be a mount
      point on ancient kernels, but already in Linux 2.4.5 this changed.
  Michael Kerrisk
    'put_old' can't be a mount point with MS_SHARED propagation
  Michael Kerrisk
    SEE ALSO: add mount(2)

poll.2
  Michael Kerrisk [Alan Stern]
    Note that poll() equivalent code for ppoll() is not quite equivalent

prctl.2
  Yang Xu [Cyrill Gorcunov]
    Correct some details for PR_SET_TIMERSLACK

setxattr.2
  Finn
 O'Leary [Michael Kerrisk]
    Add ERANGE to 'ERRORS' section

tkill.2
  Michael Kerrisk
    glibc 2.30 provides a wrapper for tgkill()

dlopen.3
  Michael Kerrisk
    Clarify the rules for symbol resolution in a dlopen'ed object
      The existing text wrongly implied that symbol look up first
      occurred in the object and then in main, and did not mention
      whether dependencies of main where used for symbol resolution.
  Michael Kerrisk
    Clarify when an executable's symbols can be used for symbol resolution
      The --export-dynamic linker option is not the only way that main's
      global symbols may end up in the dynamic symbol table and thus be
      used to satisfy symbol reference in a shared object. A symbol
      may also be placed into the dynamic symbol table if ld(1)
      notices a dependency in another object during the static link.
  Michael Kerrisk

An object opened with RTLD_LOCAL
can be promoted to RTLD_GLOBAL
Michael Kerrisk
Note that symbol use might keep a dlclose'd object in memory
Michael Kerrisk
On dlclose(), destructors are called when reference count falls to 0
Michael Kerrisk
Make it clear that RTLD_NODELETE also affects global variables
Michael Kerrisk
Clarify that constructors are called only when library is first loaded

exec.3
Matthew Kenigsberg
Explain function groupings
I've found the exec man page quite difficult to read when trying to find the behavior for a specific function. Since the names of the functions are inline and the order of the descriptions isn't clear, it's hard to find which paragraphs apply to each function. I thought it would be much easier to read if the grouping based on letters is stated.

getutent.3
Michael Kerrisk [Thorsten Glaser]
Fix missing include file in EXAMPLE

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=932382

on_exit.3
Michael Kerrisk [Sami Kerola]
Stack variables may be out of scope when exit handler is invoked

strcat.3
Michael Kerrisk [Eric Sanchis]
Fix off-by-one error in example code

cpuid.4
Michael Kerrisk
SEE ALSO: add cpuid(1)

elf.5
Michael Kerrisk
SEE ALSO: add ld.so(8)

proc.5
Michael Kerrisk
Correct description of /proc/PID/status 'ShdPnd' and 'SigPnd' fields
These fields are signal masks, not counters.
Michael Kerrisk

Clarify that various mask fields in /proc/PID/status are in hexadecimal

capabilities.7
Michael Kerrisk
Add a note about using strace on binaries that have capabilities
Michael Kerrisk
Add pivot_root(2) to CAP_SYS_ADMIN list
Michael Kerrisk
CAP_FOWNER also allows modifying user xattrs on sticky directories

cgroup_namespaces.7
Michael Kerrisk
Some wording fixes to improve
clarity
Michael Kerrisk
In the example shell session, give second shell a different prompt

credentials.7
Michael Kerrisk
Note that /proc/PID/status shows a process's credentials
Michael Kerrisk
SEE ALSO: add tcgetsid(3)

fanotify.7
Matthew Bobrowski
Reword FAN_REPORT_FID data structure inclusion semantics
Michael Kerrisk
Clarify logic in ESTALE check
Michael Kerrisk
Reorder text in EXAMPLE
Michael Kerrisk
Reformat program output to fit in 80 columns

mount_namespaces.7
Michael Kerrisk
Clarify implications for other NS if mount point is removed in one NS
If a mount point is deleted or renamed or removed in one mount
namespace, this will cause an object that is mounted at that
location in another mount namespace to be unmounted (as verified
by experiment). This was implied by the existing text, but it is
better to make this detail
explicit.
Michael Kerrisk
SEE ALSO: add pivot_root(2), pivot_root(8)

namespaces.7
Michael Kerrisk
Note initial values of hostname and domainname in a new UTS namespace

sched.7
  Michael Kerrisk
    SEE ALSO: add pthread_getschedparam(3)

signal.7
  Michal Sekletar [Oleg Nesterov, Michael Kerrisk]
    Clarify that siginfo_t isn't changed on coalescing
  Michael Kerrisk
    Various fields in /proc/PID/status show signal-related information
  Michael Kerrisk
    Add subsection on queuing and delivery semantics for standard signals

socket.7
  Michael Kerrisk
    select()/poll()/epoll honor SO_RCVLOWAT since Linux 2.6.28

unix.7
  Michael Kerrisk
    Note SCM_RIGHTS interaction with RLIMIT_NOFILE
      If the file descriptors received in SCM_RIGHTS would cause
      the process to its exceed RLIMIT_NOFILE limit, the excess
      FDs are discarded.

user_namespaces.7
  Michael Kerrisk
    Describe the effect
 of file-related capabilities inside user namespaces
  Michael Kerrisk
    Describe how kernel treats UIDs/GIDs when a process accesses files

vdso.7
  Tobias Klauser
    Mention removal of Blackfin port in Linux 4.17

ld.so.8
  Michael Kerrisk [Matthias Hertel]
    Note some further details of secure-execution mode
      Note some further details of the treatment of environment
      variables in secure execution mode. In particular (as noted by
      Matthias Hertel), note that ignored environment variables are also
      stripped from the environment. Furthermore, there are some other
      variables, not used by the dynamic linker itself, that are also
      treated in this way (see the glibc source file
      sysdeps/generic/unsecvars.h).

========== Changes in man-pages-5.03 ==========

Released: 2019-10-11, Munich

Apologies if I missed anyone!

New and rewritten pages
---

pidfd_open.2
  Michael Kerrisk [Christian Brauner, Florian Weimer,
 Daniel Colascione]
    New page documenting pidfd_open(2)

pidfd_send_signal.2
  Michael Kerrisk [Florian Weimer, Christian Brauner]
    New page documenting pidfd_send_signal(2)

pivot_root.2
  Michael Kerrisk [Eric W. Biederman, Reid Priedhorsky, Philipp Wendler]
    This page has been completely rewritten, adding a lot of missing
    details (including the use of pivot_root(".", ".")) and an example
    program. In addition, the text prevaricating on whether or not
    pivot_root() might change the root and current working directories has
    been eliminated, and replaced with a simple description of the behavior
    of the system call, which has not changed for 19 years, and will not
    change in the future. Many longstanding errors in the old version of
    the page have also been corrected.

ipc_namespaces.7
  Michael Kerrisk
    New page with content migrated from namespaces(7)

uts_namespaces.7
  Michael Kerrisk

  New page with content migrated from namespaces(7)

Newly documented interfaces in existing pages

---

clone.2
  Christian Brauner, Michael Kerrisk
    Document CLONE_PIDFD
      Add an entry for CLONE_PIDFD. This flag is available starting
      with kernel 5.2. If specified, a process file descriptor
      ("pidfd") referring to the child process will be returned in
      the ptid argument.

fanotify_mark.2
  Jakub Wilk
    Document FAN_MOVE_SELF

ptrace.2
  Dmitry V. Levin [Michael Kerrisk]
    Document PTRACE_GET_SYSCALL_INFO

regex.3
  Rob Landley
    Document REG_STARTEND

New and changed links
---

res_nclose.3
  Michael Kerrisk
    Add NEW link to resolver.3

Global changes

Various pages
  Michael Kerrisk
    SEE ALSO: correct list order

Various pages
  Michael Kerrisk
    Remove section number from references to function in its own
 page

Various pages
  Michael Kerrisk
    ERRORS: correct alphabetical order

Changes to individual pages
---

localedef.1
  Marko Myllynen
    Describe recently added options
      Describe few recently added options (present in glibc-2.29).

clone.2
  Michael Kerrisk
    SEE ALSO: add pidfd_open(2)

copy_file_range.2
  Amir Goldstein [Dave Chinner]
    Kernel v5.3 updates

fanotify_mark.2
  Jakub Wilk
    Add kernel version numbers for some FAN_* constants

getdomainname.2
  Michael Kerrisk
    Add mention of UTS namespaces

gethostname.2
  Michael Kerrisk [Jakub Wilk]
    Mention UTS namespaces

io_submit.2
  Matti Moell [Matti Möll]
    Fix kernel version numbers for 'aio_rw_flags' flags

kill.2
  Michael Kerrisk
    SEE ALSO: add pidfd_send_signal(2)

mmap.2
  Nikola Forró
    Fix EINVAL conditions
      Since introduction of MAP_SHARED_VALIDATE, in case flags contain
      both
 MAP_PRIVATE and MAP_SHARED, mmap() doesn't fail with EINVAL,
      it succeeds.

      The reason for that is that MAP_SHARED_VALIDATE is in fact equal
      to MAP_PRIVATE | MAP_SHARED.

mount.2

Michael Kerrisk [Reid Priedhorsky]
Describe the concept of "parent mounts"
Michael Kerrisk
NOTES: add subsection heading for /proc/[pid]/{mounts,mountinfo}
Michael Kerrisk
Rework the text on mount namespaces a little
Eliminate the term "Per-process namespaces" and add a reference
to mount_namespaces(7).

move_pages.2
Yang Xu [Michael Kerrisk]
Mark E2BIG as deprecated
E2BIG was removed in 2.6.29, we should mark it as deprecated.

perf_event_open.2
Michael Kerrisk [Alexey Budankov]
SEE ALSO: add Documentation/admin-guide/perf-security.rst

prctl.2
Michael Kerrisk
Clarify that PR_GET_SPECULATION_CTRL returns value as function result
Michael Kerrisk
Clarify
that PR_MCE_KILL_GET returns value via function result
Michael Kerrisk
Clarify that PR_GET_FP_MODE returns value as function result
Michael Kerrisk
RETURN VALUE: add some missing entries
Note success return for PR_GET_SPECULATION_CTRL and PR_GET_FP_MODE.

rt_sigqueueinfo.2
Michael Kerrisk
Note that 'si_code' can't be specified as SI_KERNEL
Michael Kerrisk
The rules for 'si_code' don't apply when sending a signal to oneself
The restriction on what values may be specified in 'si_code'
apply only when sending a signal to a process other than the
caller itself.
Michael Kerrisk
Rename 'uinfo' argument to 'info'
This is more consistent with the naming in other pages
that refer to a 'siginfo_t' structure.
Michael Kerrisk
SEE ALSO: add pidfd_send_signal(2)

sched_setaffinity.2
Michael Kerrisk
RETURN VALUE: sched_getaffinity() syscall differs

from the wrapper

setns.2
  Mike Frysinger
    Fix CLONE_NEWNS restriction info

sigaction.2
  Michael Kerrisk
    SEE ALSO: add pidfd_send_signal(2)

signalfd.2
  Andrew Clayton, Michael Kerrisk
    Note about interactions with epoll & fork

statx.2
  Michael Kerrisk [Simone Piccardi]
    Clarify details of a case where an invalid 'mask' value may be rejected

syscall.2
  Shawn Anastasio
    Add information for powerpc64
  Michael Kerrisk [Adam Borowski, Florin Blanaru]
    Update name of syscall instruction for riscv

syscalls.2
  Michael Kerrisk
    Add fsconfig(), fsmount(), fsopen(), fspick(), move_mount(), open_tree()
  Michael Kerrisk [(), Michael(), Kerrisk(),]
    Add new syscalls in 5.1
      Add io_uring_enter(), io_uring_register(), io_uring_setup(), and
      pidfd_send_signal().
  Michael Kerrisk
    Add clone3() and pidfd_open()

uname.2
  Michael Kerrisk
    Replace reference to namespaces(7)
 with reference to uts_namespaces(7)

errno.3
  Rasmus Villemoes
    Add some comments on EAGAIN/EWOULDBLOCK and EDEADLK/EDEADLOCK

fexecve.3
  Michael Kerrisk [Simone Piccardi]
    ENOSYS occurs only if the kernel provides no execveat() syscall
  Michael Kerrisk [Simone Piccardi]
    ERRORS: add ENOENT

getauxval.3
  Raphael Moreira Zinsly
    Add new cache geometry entries

printf.3
  Vincent Lefevre
    Add detail on the first digit with the %e format

pthread_setcancelstate.3
pthreads.7
signal-safety.7
  Carlos O'Donell
    Describe issues with cancellation points in signal handlers

strtok.3
  Michael Kerrisk [eponymous alias]
    Correct description of use of 'saveptr' argument in strtok_r()
  Michael Kerrisk [eponymous alias]
    The caller should not modify 'saveptr' between strtok_r() calls
  Michael Kerrisk
    Add portability note for strtok_r() '*saveptr' value
      On some implementations, '*saveptr' must be
 NULL on first call
      to strtok_r().

smartpqi.4
  Murthy Bhat [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
    Add sysfs entries
  Gilbert Wu [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
    Add module param expose ld first
  Dave Carroll [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
    Add module param to hide vsep

core.5
  Paul Wise
    Explain the new situation with argument splitting
      Things changed in Linux v5.3-rc3 commit 315c69261dd3 from
      splitting after template expansion to splitting beforehand.

resolv.conf.5
  Nikola Forró
    Update information about search list
      Since glibc 2.26, the number of domains in the search list is
      no longer limited.

man-pages.7
  Michael Kerrisk

Relocate and enhance the text on semantic newlines
Michael Kerrisk [Paul Wise]
Paragraphs should not be separated by blank lines

mount_namespaces.7
Michael
Kerrisk
Explain how a namespace's mount point list is initialized
Provide a more detailed explanation of the initialization of
the mount point list in a new mount namespace.
Michael Kerrisk [Eric W. Biederman]
Clarify description of "less privileged" mount namespaces
Michael Kerrisk
SEE ALSO: refer to example in pivot_root(2)
Michael Kerrisk [Eric W. Biederman]
It may be desirable to disable propagation after creating a namespace
After creating a new mount namespace, it may be desirable to
disable mount propagation. Give the reader a more explicit
hint about this.

mq_overview.7
sysvipc.7
Michael Kerrisk
Adjust references to namespaces(7) to ipc_namespaces(7)

namespaces.7
Michael Kerrisk
Remove content migrated to new ipc_namespaces(7) page
Michael Kerrisk
Remove content migrated to uts_namespaces(7)
Michael Kerrisk
Include manual
page references in the summary table of namespace types
Make the page more compact by removing the stub subsections that
list the manual pages for the namespace types. And while we're
here, add an explanation of the table columns.

operator.7
Michael Kerrisk [Rick Stanley]
Prefix and postfix ++/-- have different precedences
Harbison and Steele also agree on this.

signal.7
Michael Kerrisk
Enhance the text on process-directed and thread-directed signals
clone(2) has a good description of these concepts; borrow
from it liberally.
Michael Kerrisk

SEE ALSO: add pidfd_send_signal(2)

user_namespaces.7
Michael Kerrisk
Improve explanation of meaning of ownership of nonuser namespaces

========== Changes in man-pages-5.04 ==========

Released: 2019-11-19, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in
the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andrew Price <anprice@redhat.com>
Christian Brauner <christian.brauner@ubuntu.com>
Florian Weimer <fweimer@redhat.com>
Jakub Wilk <jwilk@jwilk.net>
Jan Kara <jack@suse.cz>
Jann Horn <jannh@google.com>
Kenigbolo Meya Stephen <kenigbol@ut.ee>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mikael Magnusson <mikachu@gmail.com>
Robert Edmonds <edmonds@debian.org>
Silviu Popescu <silviupopescu1990@gmail.com>
Torin Carey <torin@tcarey.uk>
Witold Baryluk <witold.baryluk@gmail.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

clone.2
Michael Kerrisk [Christian Brauner, Jakub Wilk]
Document clone3()

wait.2
Michael Kerrisk

Add P_PIDFD for waiting on a child referred to by a PID file descriptor

bpf-helpers.7
Michael Kerrisk
Refresh against kernel v5.4-rc7

New and changed links
---

clone3.2
Michael Kerrisk
New link to clone(2)

Changes to individual pages
---

clone.2
Michael Kerrisk
Rename arguments for consistency with clone3()
Make the names of the clone() arguments the same as the fields
in the clone3() 'args' struct:

ctid ==> child_pid
ptid ==> parent_tid
newtls ==> tld
child_stack ==> stack
Michael Kerrisk
Consistently order paragraphs for CLONE_NEW* flags
Sometimes the descriptions of these flags mentioned the
corresponding section 7 namespace manual page and then the
required capabilities, and sometimes the order was the was
the reverse. Make it consistent.
Michael Kerrisk [Christian Brauner, Jann Horn]
EXAMPLE: Allocate child's
stack using mmap(2) rather than malloc(3)
Christian Brauner suggested mmap(MAP_STACK), rather than
malloc(), as the canonical way of allocating a stack for the
child of clone(), and Jann Horn noted some reasons why
(MAP_STACK exists elsewhere, and mmap() returns a page-aligned
block of memory, which is useful if we want to set up a guard
page at the end of the stack).
Michael Kerrisk [Christian Brauner]
Tidy up the description of CLONE_DETACHED
The obsolete CLONE_DETACHED flag has never been properly
documented, but now the discussion CLONE_PIDFD also requires
mention of CLONE_DETACHED. So, properly document CLONE_DETACHED,

and mention its interactions with CLONE_PIDFD.
Michael Kerrisk [Christian Brauner]
Give the introductory paragraph a new coat of paint
Change the text in the introductory paragraph (which was written

20 years ago) to reflect the fact that clone*() does more things
nowadays.
Michael Kerrisk
Remove wording that suggests CLONE_NEW* flags are for containers
These flags are used for implementing many other interesting
things by now.
Michael Kerrisk
Remove various details that are already covered in namespaces pages
Remove details of UTS, IPC, and network namespaces that are
already covered in the corresponding namespaces pages in section 7.

clone.2
proc.5
Michael Kerrisk
Adjust references to namespaces(7)
Adjust references to namespaces(7) to be references to pages
describing specific namespace types.

fallocate.2
Andrew Price
Add gfs2 to the list of punch hole-capable filesystems

ioctl_iflags.2
Michael Kerrisk [Robert Edmonds]
Emphasize that FS_IOC_GETFLAGS and FS_IOC_SETFLAGS argument is 'int *'

ioctl_list.2
Michael Kerrisk

Add reference to ioctl(2) SEE ALSO section
The referenced section lists various pages that document ioctls.

mmap.2
Michael Kerrisk
Note that MAP_STACK exists on some other systems
Michael Kerrisk
Some rewording of the description of MAP_STACK
Reword a little to allow for the fact that there are now
two reasons to consider using this flag.

pidfd_open.2
Michael Kerrisk
Note the waitid() use case for PID file descriptors

Michael Kerrisk
Add a subsection header "Use cases for PID file descriptors"
Michael Kerrisk
Make it a little more explicit the CLONE_PIDFD returns a PID FD

pivot_root.2
Michael Kerrisk
EXAMPLE: allocate stack using mmap() MAP_STACK rather than malloc()

quotactl.2
Yang Xu [Jan Kara]
Add some details about Q_QUOTAON

seccomp.2
cgroups.7
Michael Kerrisk
Switch to "considerate language"

select.2
Michael Kerrisk
POLLIN_SET/POLLOUT_SET/POLLEX_SET
are now defined in terms of EPOLL*
Since kernel commit a9a08845e9acbd224e4ee466f5c1275ed50054e8, the
equivalence between select() and poll()/epoll is defined in terms
of the EPOLL* constants, rather than the POLL* constants.

wait.2
Michael Kerrisk
waitid() can be used to wait on children in same process group as caller
Since Linux 5.4, idtype == P_PGID && id == 0 can be used to wait
on children in same process group as caller.
Michael Kerrisk
Clarify semantics of waitpid(0, ...)
As noted in kernel commit 821cc7b0b205c0df64cce59aacc330af251fa8f7,
threads create an ambiguity: what if the calling process's PGID
is changed by another thread while waitpid(0, ...) is blocked?
So, clarify that waitpid(0, ...) means wait for children whose
PGID matches the caller's PGID at the time of the call to
waitpid().

getauxval.3
Michael Kerrisk [Witold Baryluk]
Clarify that AT_BASE_PLATFORM and AT_EXECFN return pointers to strings
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=942207

resolv.conf.5
Florian Weimer
Attempt clarify domain/search interaction

The domain directive is historic at this point; it should not
be used.

netdevice.7
  Michael Kerrisk [Silviu Popescu]
    Small wording fix in description of SIOCGIFCONF
      SIOCGIFCONF returns "network layer" addresses (not "transport
      layer").

uts_namespaces.7
  Michael Kerrisk
    Add a little more detail on scope of UTS namespaces

========== Changes in man-pages-5.05 ==========

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

clone.2
  Adrian Reber [Christian Brauner, Michael Kerrisk]
    Add clone3() set_tid information
  Michael Kerrisk
    Document CLONE_CLEAR_SIGHAND

fcntl.2
  Joel Fernandes [Michael Kerrisk]
    Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

memfd_create.2
  Joel Fernandes
    Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

loop.4
  Yang Xu
    Document LOOP_SET_BLOCK_SIZE
  Yang Xu
    Document LOOP_SET_DIRECT_IO

proc.5
  Michael Kerrisk
    Document /proc/sys/vm/unprivileged_userfaultfd

Changes to individual pages
---

capget.2
  Michael Kerrisk [Yang Xu]
    Add missing details in EPERM error for setting inheritable capabilities

clone.2
  Michael Kerrisk
    Note that CLONE_THREAD causes similar behavior to CLONE_PARENT
      The introductory paragraphs note that "the calling process" is
      normally synonymous with the "the parent process", except in the
      case of CLONE_PARENT. The same is also true of CLONE_THREAD.
  Christian Brauner [Michael Kerrisk]
    Mention that CLONE_PARENT is off-limits for inits
  Michael Kerrisk [Colin Ian King]
    Add old EINVAL error for AArch64
  Michael Kerrisk
    ERRORS: add EINVAL for use of CLONE_PARENT by an init process

futex.2
  Ponnuvel Palaniyappan
    Fix
 a bug in the example

listen.2
  Michael Kerrisk [Peter Gajdos]
    The 'somaxconn' default value has increased to 4096

modify_ldt.2
set_thread_area.2
  Andy Lutomirski [Markus T Metzger]
    Fix type of base_addr

move_pages.2
  John Hubbard [Michal Hocko]
    Remove ENOENT from the list of possible return values

open.2
  Adam Borowski
    No need for /proc to make an O_TMPFILE file permanent
      In the example snippet, we already have the fd, thus there's no
      need to refer to the file by name. And, /proc/ might be not

mounted or not accessible.
Michael Kerrisk [Joseph C. Sible]
In O_TMPFILE example, describe alternative linkat() call
This was already shown in an earlier version of the page,
but Adam Borowski's patch replaced it with an alternative.
Probably, it is better to show both possibilities.

perf_event_open.2
Daniel Colascione
Mention EINTR for perf_event_open

ptrace.2
Denys Vlasenko
PTRACE_EVENT_STOP does not always report SIGTRAP

quotactl.2
Michael Kerrisk
Don't show numeric values of Q_XQUOTAON XFS_QUOTA_?DQ_* flags
The programmer should not need to care about the numeric values,
and their inclusion is verbosity.
Yang Xu [Michael Kerrisk]
Add EINVAL error of Q_XQUOTARM operation

stime.2
Michael Kerrisk
Note that stime() is deprecated

syscall.2
Petr Vorel [Cyril Hrubis]
Update feature test macro requirements

sysctl.2
Michael Kerrisk
This system call was removed in Linux 5.5; adjust the page accordingly

userfaultfd.2
Yang Xu [Michael Kerrisk]
Add EPERM error

cmsg.3
Rich Felker
Clarify alignment issues and correct method of accessing CMSG_DATA()
From an email by Rich Felker:

It came to my attention while reviewing possible breakage with
move to 64-bit time_t that some applications
are dereferencing
data in socket control messages (particularly SCM_TIMESTAMP*)

in-place as the message type, rather than memcpy'ing it to
appropriate storage. This necessarily does not work and is not
supportable if the message contains data with greater alignment
requirement than the header. In particular, on 32-bit archs,
cmsghdr has size 12 and alignment 4, but struct timeval and
timespec may have alignment requirement 8.
Michael Kerrisk [Rich Felker]
Modify CMSG_DATA() example to use memcpy()
See previous patch to this page for rationale

exit.3
Benjamin Peterson [Mike Frysinger]
Use hex for the status mask

ftime.3
Michael Kerrisk
Note that this function is deprecated

getpt.3
Samuel Thibault
Remove mention of O_NOCTTY
The glibc implementation of getpt has actually never been setting

malloc.3
Vegard Nossum

Clarify realloc() return value
Petr Vorel
Remove duplicate _GNU_SOURCE

console_codes.4
Adam Borowski
Document \e[90m to 97, 100 to 107
Adam Borowski
\e[21m is now underline
Since 65d9982d7e523a1a8e7c9af012da0d166f72fc56 (4.17), it follows
xterm rather than common sense and consistency, being the only
command 1..9 where N+20 doesn't undo what N did. As libvte
0.51.90 got changed the same way, this behaviour will probably
stay.
Adam Borowski
Update \e[38m and \e[48m
Supported since cec5b2a97a11ade56a701e83044d0a2a984c67b4 (3.16).

cgroups.7
Michael Kerrisk
The v2 freezer controller was added in Linux 5.2
Michael Kerrisk

Split discussion of cgroups.events file and v2 release notification
In preparation for adding a description of the "frozen" key.
Michael Kerrisk
Describe the cgroup.events "frozen" key
Michael Kerrisk
Improve the discussion of the advantages of v2 release notification

inotify.7
Nick Shipp
Merge late perror() into fprintf() in example code

netlink.7
Antonin Décimo
Fix alignment issue in example

packet.7
kevin sztern [Michael Kerrisk]
Add missing tpacket_auxdata field (tp_vlan_tpid)

rtnetlink.7
Antonin Décimo
ifa_index is an unsigned int

tcp.7
Michael Kerrisk
tcp_low_latency is ignored since Linux 4.14

unix.7
Michael Kerrisk
The PID sent with SCM_CREDENTIALS must match an existing process

vsock.7
Mikhail Golubev [Michael Kerrisk]
Add missing structure element
The structure 'struct sockaddr_vm' has additional element
'unsigned char svm_zero[]' since version v3.9-rc1.

ldconfig.8
DJ Delorie
Document file filter and symlink pattern expectations

========== Changes in man-pages-5.06 ==========

Released: 2020-04-11, Munich

Apologies if I missed anyone!

New and rewritten pages
---

openat2.2
  Aleksa Sarai [Michael Kerrisk]
    Document new openat2(2) syscall

pidfd_getfd.2
  Michael Kerrisk [Christian Brauner]
    New manual page documenting the pidfd_getfd() system call

select.2
  Michael Kerrisk
    Rewrite DESCRIPTION
      Improve structure and readability, at the same time incorporating
      text and details that were formerly in select_tut(2). Also
      move a few details in other parts of the page into DESCRIPTION.
  Michael Kerrisk
    Consolidate the discussion of pselect into a headed subsection
  Michael Kerrisk
    Consolidate historical glibc pselect() details under one subhead
  Michael Kerrisk
    Consolidate info on usleep() emulation in one place
  Michael Kerrisk
    Place the discussion of the self-pipe technique in a headed subsection
  Michael Kerrisk
    Note that FD_SET() and FD_CLR() do not return errors
  Michael Kerrisk
    Remove details of historical #include requirements
      The POSIX situation has been the norm for a long time now,
      and including ancient details overcomplicates the page.
  Michael Kerrisk
    Remove some ancient information about pre-POSIX types for 'timeout'

select_tut.2
   Michael Kerrisk
    Eliminate duplication of info across select_tut.2 and select2
      There was a lot of a duplication of info in SYNOPSIS, DESCRIPTION
      RETURN VALUE, and SEE ALSO. Move all of the info to one place:
      the select(2) page.

sysvipc.7
  Michael Kerrisk
    Rewrite this page as just a summary of the System V IPC APIs
      All of the other details in this page have by now been moved into

the relevant *ctl(2) pages.

time_namespaces.7
  Michael Kerrisk [Andrei Vagin, Dmitry Safonov, Thomas Gleixner]
    New page documenting time namespaces

Newly documented interfaces in existing pages
---

arch_prctl.2
  Keno Fischer
    Add ARCH_SET_CPUID subcommand

clock_getres.2
  Benjamin Peterson
    Document CLOCK_TAI
  Michael Kerrisk
    Add CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

prctl.2
  Mike Christie [Michal Hocko, Michael Kerrisk, Bart Van
 Assche]
    Document PR_SETIO_FLUSHER/GET_IO_FLUSHER

setns.2
  Michael Kerrisk
    Document CLONE_NEWTIME

statx.2
  Eric Biggers
    Document STATX_ATTR_VERITY

unshare.2
  Michael Kerrisk
    Document CLONE_NEWTIME

socket.7
  Ricardo Biehl Pasquali, Michael Kerrisk
    Add description of SO_SELECT_ERR_QUEUE
  Alejandro Colomar [Michael Kerrisk]
    Document SO_TIMESTAMPNS

Global changes

Various pages

Michael Kerrisk
Remove a few mentions of the ancient "Linux libc"

Various pages
Michael Kerrisk
Global formatting fix: disfavor nonstandard .TP indents
In many cases, these don't improve readability, and (when stacked)
they sometimes have the side effect of sometimes forcing text
to be justified within a narrow column range.

Various pages
Michael Kerrisk [Christian Brauner]
Fix clumsy wording around "nonnegative file descriptors"

Changes to individual pages
---

clock_getres.2
Helge Deller [Michael Kerrisk]
Consecutive calls for CLOCK_MONOTONIC may return same value
Consecutive calls to clock_gettime(CLOCK_MONOTONIC) are guaranteed
to return MONOTONIC values, which means that they either return
the *SAME* time value like the last call, or a later (higher) time
value.
Eric Rannaud
Dynamic POSIX clock devices can return other errors
Michael Kerrisk
Improve description of CPU-time clocks
Michael Kerrisk
Add an example program
Michael Kerrisk
CLOCK_REALTIME_COARSE is not settable
Michael Kerrisk
Note that CPU-time clocks are not settable.
Explicitly note that CLOCK_PROCESS_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID are not settable.
Michael Kerrisk
Clarify that CLOCK_TAI is nonsettable
Michael Kerrisk
Clarify that CLOCK_MONOTONIC is system-wide
Michael
Kerrisk
ERRORS: add EINVAL for attempt to set a nonsettable clock
Michael Kerrisk
Move text in BUGS to NOTES
The fact that CLOCK_PROCESS_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID are not settable isn't a bug,

since POSIX does allow the possibility that these clocks
are not settable.
Michael Kerrisk
SEE ALSO: add time_namespaces(7)

clock_nanosleep.2
Michael Kerrisk
clock_nanosleep() can also sleep against CLOCK_TAI
Michael Kerrisk
clock_nanosleep() also supports CLOCK_BOOTTIME
Presumably (and from a quick glance at the source code)
since Linux 2.6.39, when CLOCK_BOOTTIME was introduced.

clock_nanosleep.2
timer_create.2
timerfd_create.2
Michael Kerrisk
Add various missing errors
Mostly verified by testing and reading the code.

There is unfortunately quite a bit of inconsistency across API~s:

clock_gettime clock_settime clock_nanosleep timer_create timerfd_create

CLOCK_BOOTTIME y n (EINVAL) y y y
CLOCK_BOOTTIME_ALARM y n (EINVAL) y [1] y [1] y [1]
CLOCK_MONOTONIC y n (EINVAL) y y y
CLOCK_MONOTONIC_COARSE y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_MONOTONIC_RAW y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_REALTIME y y y y y
CLOCK_REALTIME_ALARM y n (EINVAL) y [1] y [1] y [1]
CLOCK_REALTIME_COARSE y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_TAI y n (EINVAL) y y n (EINVAL)
CLOCK_PROCESS_CPUTIME_ID
y n (EINVAL) y y n (EINVAL)
CLOCK_THREAD_CPUTIME_ID y n (EINVAL) n (EINVAL [2]) y n (EINVAL)
pthread_getcpuclockid() y n (EINVAL) y y n (EINVAL)

[1] The caller must have CAP_WAKE_ALARM, or the error EPERM results.

[2] This error is generated in the glibc wrapper.

connect.2
Michael Kerrisk [Eric Dumazet]
Update the details on AF_UNSPEC
Update the details on AF_UNSPEC and circumstances in which
socket can be reconnected.

dup.2
  Michael Kerrisk
    SEE ALSO: add pidfd_getfd(2)

epoll_ctl.2
  Michael Kerrisk
    Various minor additions and clarifications

epoll_wait.2
  Michael Kerrisk
    A few minor additions and rewrites

execve.2
  Michael Kerrisk
    Add a subhead for the discussion of effect on process attributes
  Michael Kerrisk
    Explicitly note
 that argv[argc] == NULL in the new program
  Michael Kerrisk
    ERRORS: ENOENT does not occur for missing shared libraries
      See http://sourceware.org/bugzilla/show_bug.cgi?id=12241.

_exit.2
  Michael Kerrisk
    Clarify that raw _exit() system call terminates only the calling thread

inotify_add_watch.2
  Michael Kerrisk
    EXAMPLE: add reference to example in inotify(7)

io_submit.2
  Julia Suvorova
    Add IOCB_CMD_POLL opcode

lseek.2
  Michael Kerrisk [Matthew Wilcox]
    ERRORS: ENXIO can also occur SEEK_DATA in middle of hole at end of file

madvise.2
  Michael Kerrisk [Andrea Arcangeli]
    Incorporate some (ancient) comments about MADV_HUGEPAGE
      Back in 2011, a mail from Andrea Arcangeli noted some details
      that I never got round to incorporating into the manual page.

mmap.2
  Michael Kerrisk
    Add a subhead for the 'flags' argument

Michael Kerrisk
Move some text hidden at the end of
DESCRIPTION to NOTES

msgctl.2
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)
Michael Kerrisk
Copy information on 'msqid_ds' fields from sysvipc(7)

open.2
Michael Kerrisk
Clarify that O_NOFOLLOW is relevant (only) for basename of 'pathname'
Aleksa Sarai
Add references to new openat2(2) page
Michael Kerrisk
Note EINVAL error for invalid character in basename of 'pathname'

pidfd_open.2
Michael Kerrisk
Mention pidfd_getfd(2)

poll.2
Michael Kerrisk
Add an example program
Michael Kerrisk
Mention epoll(7) in the introductory paragraph
Michael Kerrisk
Improve description of EFAULT error
Michael Kerrisk
Fix description of ENOMEM error

select_tut.2
Michael Kerrisk
Adjust header file includes in example
Employ <sys/select.h>, rather than the historical header files.

semctl.2
Michael Kerrisk
Copy information
on 'semid_ds' fields from sysvipc(7)
Michael Kerrisk
Add a reference to the example in shmop(2)
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)

semget.2
Michael Kerrisk

EXAMPLE: add an example program

semop.2
Michael Kerrisk
Add a reference to the semop(2) example in shmop(2)

shmctl.2
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)
Michael Kerrisk
Note that execute permission is not needed for shmat() SHM_EXEC
Michael Kerrisk
Copy information on 'shmid_ds' fields from sysvipc(7)
Michael Kerrisk
Some small improvements to the description of the 'shmid_ds' structure

shmget.2
Michael Kerrisk
Add a reference to the example in shmop(2)

shmop.2
Michael Kerrisk
EXAMPLE: add a pair of example programs
Add example programs demonstrating usage of shmget(2), shmat(2),
semget(2), semctl(2),
and semop(2).

sigaction.2
signal.7
Zack Weinberg
Document kernel bugs in delivery of signals from CPU exceptions

stat.2
Michael Kerrisk
Clarify definitions of timestamp fields
In particular, make it clear that atime and mtime relate to the
file *data*.

syscalls.2
Michael Kerrisk
Add new Linux 5.6 system calls
Michael Kerrisk
Note that the 5.x series followed 4.20

timer_create.2
Michael Kerrisk
timer_create(2) also supports CLOCK_TAI
Michael Kerrisk

Mention clock_getres(2) for further details on the various clocks

timerfd_create.2
Michael Kerrisk [Thomas Gleixner]
Note a case where timerfd_settime() can fail with ECANCELED
Michael Kerrisk [devi R.K, Thomas Gleixner]
Negative changes to CLOCK_REALTIME may cause read() to return 0
Michael Kerrisk
Rework text for EINVAL for invalid clock ID
Michael Kerrisk
Refer reader to clock_getres(2) for
further details on the clocks

unshare.2
Michael Kerrisk
Add CLONE_NEWCGROUP and CLONE_NEWTIME to example program

exit.3
Michael Kerrisk [Walter Harms]
Small improvement to the discussion of 'status' argument

ftok.3
Michael Kerrisk
EXAMPLE: add a reference to the example in semget(2)

getifaddrs.3
Michael Kerrisk [Michael Galassi]
EXAMPLE: remove unneeded loop variable

nl_langinfo.3
Eugene Syromyatnikov
Document era-related locale elements
Eugene Syromyatnikov
Add information about AM/PM time format locale elements
Eugene Syromyatnikov
Mention the respective strftime(3) conversion specifications

sem_init.3
Michael Kerrisk
Add references to example code in shm_open(3) and sem_wait(3)

sem_post.3
Michael Kerrisk
Add a reference to code example code in shm_open(3)

shm_open.3
Michael Kerrisk
EXAMPLE: add some example programs

strcmp.3
  Michael Kerrisk

  Add an example program
  Michael Kerrisk [Andrew Micallef, Walter Harms]
    Rework text describing return value to be clearer
  Michael Kerrisk
    Note that the comparison is done using unsigned char
  Michael Kerrisk
    SEE ALSO: add ascii(7)

strftime.3
  Eugene Syromyatnikov [Michael Kerrisk]
    Refer to the relevant nl_langinfo(3) items
  Eugene Syromyatnikov
    Expand %E and %O description
  Eugene Syromyatnikov
    Consistently document fall-back format string

proc.5
  Mike Frysinger
    Clarify /proc/[pid]/cmdline mutability

cgroups.7
  Michael Kerrisk
    Update list of cgroups v2 controllers
      Update the list of cgroups v2 controllers (several controllers
      were missing).
  Michael Kerrisk
    Add a subsection on cgroup v2 mount options and include 'nsdelegate'
  Michael Kerrisk
    Document the cgroups v2 'memory_localevents' mount option
  Michael Kerrisk
    SEE ALSO: add Documentation/admin-guide/cgroup-v2.rst

namespaces.7
   Michael Kerrisk
    Add time namespaces information
  Michael Kerrisk
    Eliminate some superfluous info from display of /proc/PID/ns links

path_resolution.7
  Aleksa Sarai
    Update to mention openat2(2) features

socket.7
  Michael Kerrisk

Note SCM message types for SO_TIMESTAMP and SO_TIMESTAMPNS

tcp.7
  Michael Kerrisk
    SEE ALSO: mention Documentation/networking/ip-sysctl.txt

time.7
  Michael Kerrisk
    Add small subsection on clocks and time namespaces

unix.7
  Heinrich Schuchardt
    Correct example

vsock.7
  Stefano Garzarella [Jorgen Hansen, Stefan Hajnoczi]
    Add VMADDR_CID_LOCAL description

========== Changes in man-pages-5.07 ==========

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_fslabel.2
  Eric Sandeen
    New page documenting filesystem get/set label ioctl(2) operations

Removed pages
---

ioctl_list.2
  Michael Kerrisk [Heinrich Schuchardt, Eugene Syromyatnikov]
    This page was first added more than 20 years ago. Since
    that time it has seen hardly any update, and is by now
    very much out of date, as reported by Heinrich Schuchardt
    and confirmed by Eugene Syromyatnikov.

    As Heinrich says:

      Man-pages like netdevices.7 or ioctl_fat.2 are what is
      needed to help a user who does not want to read through the
      kernel code.

If ioctl_list.2 has not been reasonably maintained since
Linux 1.3.27 and hence is not a reliable source of
information, shouldn't it be dropped?

My answer is, yes (but
let's move a little info into ioctl(2)).

Newly documented interfaces in existing pages
---

adjtimex.2
  Arnd Bergmann [Richard Cochran, Michael Kerrisk]
    Document clock_adjtime(2)

clock_getres.2
  Richard Cochran [Michael Kerrisk]
    Explain dynamic clocks

clone.2
  Christian Brauner, Michael Kerrisk
    Document the clone3() CLONE_INTO_CGROUP flag

mremap.2
  Brian Geffon, Michael Kerrisk [Lokesh Gidra]
    Document MREMAP_DONTUNMAP

open.2
  Joseph C. Sible [Michael Kerrisk]
    Document fs.protected_fifos and fs.protected_regular

prctl.2
  Dave Martin
    Add PR_SPEC_INDIRECT_BRANCH for SPECULATION_CTRL prctls
  Dave Martin
    Add PR_SPEC_DISABLE_NOEXEC for SPECULATION_CTRL prctls
  Dave Martin
    Add PR_PAC_RESET_KEYS (arm64)

ptrace.2
  Joseph C. Sible
    Document PTRACE_SET_SYSCALL

proc.5
  Michael Kerrisk
    Document /proc/sys/fs/protected_regular
  Michael

Kerrisk
    Document /proc/sys/fs/protected_fifos
  Michael Kerrisk
    Document /proc/sys/fs/aio-max-nr and /proc/sys/fs/aio-nr

New and changed links
---

clock_adjtime.2
  Arnd Bergmann
    New link to adjtimex(2)

Global changes

Various pages
  Michael Kerrisk
    Retitle EXAMPLE section heading to EXAMPLES
      EXAMPLES appears to be the wider majority usage across various
      projects' manual pages, and is also what is used in the POSIX
      manual pages.

Various pages
  Michael Kerrisk
    Correct bogus POSIX.1 standards names
      POSIX.1-2003 ==> POSIX.1-2001 TC1
      POSIX.1-2004 ==> POSIX.1-2001 TC2
      POSIX.1-2013 ==> POSIX.1-2008 TC1
      POSIX.1-2016 ==> POSIX.1-2008 TC2

Various pages
  Michael Kerrisk
    Add section number in page cross-reference.

Various pages
  Kir Kolyshkin
    Add missing commas in SEE ALSO

Various pages
  Michael Kerrisk
     Remove AVAILABILITY section heading
      In the few pages where this heading (which is "nonstandard" within
      man-pages) is used, it always immediately follows CONFORMING TO
      and generally contains information related to standards. Remove
      the section heading, thus incorporating AVAILABILITY into
      CONFORMING TO.

Various pages
  Michael Kerrisk
    Remove section number in page self-references

Various pages
  Michael Kerrisk
    Put SEE ALSO entries in alphabetical order

Various pages
  Michael Kerrisk
    Place SH sections in standard order
      Fix various pages that deviated from the norm described in
      man-pages(7).

Various "aio" pages
  Michael Kerrisk [Andi Kleen, Jeff Moyer]
    Change uses of aio_context_t to io_context_t

Changes to individual pages
---

bpf.2
  Peter Wu
    Update enum bpf_map_type and enum bpf_prog_type
  Richard Palethorpe
     Change note on unprivileged access
       The kernel now allows calls to bpf() without CAP_SYS_ADMIN
       under some circumstances.

clone.2
  Michael Kerrisk
    Add kernel version numbers for clone_args fields
  Michael Kerrisk
    Combine separate NOTES sections

close.2
  Michael Kerrisk [Lukas Czerner, Peter Schiffer, Thierry Lelegard]
    Note behavior when close() happens in a parallel thread
      If one thread is blocked in an I/O system call on a file descriptor
      that is closed in another thread, then the blocking system call
      does not return immediately, but rather when the I/O operation
      completes. This surprises some people, but is longstanding
      behavior.

connect.2
  Stefan Puiu
    Can return EACCES because of SELinux

execve.2
  Michael Kerrisk [Eric Hopper]
    Changes to the "dumpable" flag may change ownership of /proc/PID files
  Michael Kerrisk
    Improve/correct
 discussion of changes to dumpable flag during execve(2)
      The details were not quite accurate. Defer to prctl(2)
      for the more complete picture.
  Nikola Forró
    Clarify signal sent to the process on late failure
  Michael Kerrisk
    SEE ALSO: add capabilities(7)

fanotify_init.2
  Amir Goldstein [Matthew Bobrowski]
    Move out of place entry FAN_REPORT_FID
      It was inserted in the middle of the FAN_CLASS_ multi flags bit
      and broke the multi flag documentation.
  Michael Kerrisk [Alexander Morozov, Amir Goldstein, Jan Kara]
    Remove mention of FAN_Q_OVERFLOW as an input value in 'mask'
      See https://bugzilla.kernel.org/show_bug.cgi?id=198569.
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Clarification about FAN_EVENT_ON_CHILD and new events
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Clarification about FAN_MARK_MOUNT and FAN_REPORT_FID

getdents.2
  Petr Vorel [Michael
 Kerrisk]
    Mention glibc support for getdents64()
      Support was added in glibc 2.30.
  Chris Lamb
    Correct linux_dirent definition in example code
      It is "unsigned long" earlier up in the file

gettid.2
  Michael Kerrisk [Joseph C. Sible]
    Document header file and feature test macro requirements for gettid()

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_fslabel(2)
  Michael Kerrisk
    Remove mentions of ioctl_list(2)
  Michael Kerrisk
    Move subsection on "ioctl structure" from ioctl_list(2) to ioctl(2)

io_setup.2
  Michael Kerrisk
    Tweak description of /proc/sys/fs/aio-max-nr

mbind.2
  Li Xinhai [Michael Kerrisk]
    Remove note about MPOL_MF_STRICT been ignored

mmap.2
  Michael Kerrisk [Heinrich Schuchardt]
    Don't mark MAP_ANON as deprecated

move_pages.2
  Yang Shi [Michal Hocko]
    Returning positive value is a new error case

mremap.2
  Michael Kerrisk
    Remove
 mention of "Segmentation fault" in EFAULT text
      "Segmentation fault" (SIGSEGV) is not exactly the same thing as
      EFAULT.
  Michael Kerrisk
    Reorder some paragraphs in NOTES
  Michael Kerrisk
    Move a paragraph from DESCRIPTION to NOTES

msgctl.2
  Michael Kerrisk
    Correct description of 'msg_ctime' field
      Verified by inspecting kernel source.

nfsservctl.2
  Michael Kerrisk
    SEE ALSO: add nfsd(7)

open.2
  Michael Kerrisk
    Some '*at' APIs have functionality that isn't in conventional APIs
      Note that another reason to use the *at() APIs is to access
      'flags' functionality that is not available in the corresponding
      conventional APIs.
  Michael Kerrisk
    Add a few more APIs to list in "Rationale for openat()..."
      There have been a few more dirfd APIs added in recent times.
  Michael Kerrisk
    Explain ways in which a 'directory file descriptor' can be

obtained
  Michael Kerrisk
    Add openat2() to list of APIs that take a 'dirfd' argument

openat2.2
  Michael Kerrisk [Aleksa Sarai]
    Various changes after feedback from Aleksa Sarai

poll.2
  Michael Kerrisk
    Add license to example program

prctl.2
  Dave Martin
    Sort prctls into alphabetical order
  Dave Martin
    Clarify that prctl can apply to threads
      The current synopsis for prctl(2) misleadingly claims that prctl
      operates on a process. Rather, some (in fact, most) prctls operate
  Dave Martin [Dave Hansen]
    Document removal of Intel MPX prctls
  Dave Martin
    Fix mis-description of thread ID values in procfs
  Dave Martin
    Work around bogus constant "maxsig" in PR_SET_PDEATHSIG
  Michael Kerrisk
    Add reference to proc(5) for /proc/self/task/[tid]/comm
  Dave Martin [Michael Kerrisk]
    Add health warning
  Dave Martin
    Clarify the unsupported hardware case of EINVAL

rename.2
   Michael Kerrisk
    SEE ALSO: add rename(1)

s390_runtime_instr.2
  Heiko Carstens [Eugene Syromyatnikov, Michael Kerrisk]
    Document signum argument behavior change
      Document that the signum argument is ignored in newer kernels, but
      that user space should pass a valid real-time signal number for
      backwards compatibility.

semctl.2
  Michael Kerrisk [Manfred Spraul]
    Correct description of sem_ctime field

semget.2

Michael Kerrisk
Add license to example program

shmctl.2
Michael Kerrisk
Correct 'shm_ctime' description

shmop.2
Michael Kerrisk
Add license to example programs

statfs.2
Michael Kerrisk [David Adam]
Add SMB2 constant to filesystem types list

syscall.2
Dave Martin [Will Deacon]
arm64: Fix syscall number register size
Dave Martin [Russell King]
arm: Use real register names for arm/OABI

sysfs.2
Michael Kerrisk
SEE
ALSO: add proc(5) and sysfs(5)

utimensat.2
Goldwyn Rodrigues
Immutable flag returns EPERM
Linux kernel commit 337684a1746f "fs: return EPERM on immutable
inode" changed the return value of the utimensat(2) from -EACCES
to -EPERM in case of an immutable flag.

wait4.2
Michael Kerrisk
Update wait3() feature test macro requirements for changes in glibc 2.26

cexp2.3
Michael Kerrisk
Still not present in glibc 2.31

cmsg.3
Michael Kerrisk
CONFORMING TO: note which CMSG_* APIs are in current and upcoming POSIX

dirfd.3
Michael Kerrisk
SEE ALSO: add openat(2)

dlsym.3
  Alexander Monakov
    Extend discussion of NULL symbol values
      Avoid implying that use of IFUNC is the only way to produce a
      symbol with NULL value. Give more scenarios how a symbol may get
      NULL value, but explain that in those scenarios dlsym() will fail
      with Glibc's ld.so due
 to an implementation inconsistency.

err.3
  Michael Kerrisk
    EXAMPLES: use EXIT_FAILURE rather than 1 as exit status

expm1.3
  Michael Kerrisk
    The expm1() bogus underflow floating-point exception has been fixed
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6778
  Michael Kerrisk
    The bogus invalid floating-point exception bug has been fixed
      https://www.sourceware.org/bugzilla/show_bug.cgi?id=6814.

fdim.3
  Michael Kerrisk
    BUGS: these functions did not set errno on some architectures
      https://www.sourceware.org/bugzilla/show_bug.cgi?id=6796

ftw.3
  Michael Kerrisk
    glibc eventually fixed a regression in FTW_SLN behavior
      For details, see:
      https://bugzilla.redhat.com/show_bug.cgi?id=1422736
      http://austingroupbugs.net/view.php?id=1121
      https://bugzilla.redhat.com/show_bug.cgi?id=1422736

getauxval.3
  YunQiang Su
    MIPS, AT_BASE_PLATFORM passes
 ISA level

getdtablesize.3
  Michael Kerrisk
    Remove redundant statement that getdtablesize() is a library function

malloc.3
  Michael Kerrisk
    Add 'reallocarray' in NAME
  Michael Kerrisk

Add VERSIONS section noting when reallocarray() was added to glibc

newlocale.3
Michael Kerrisk [Piotr Caban]
Fix a valgrind issue in example program
See https://bugzilla.kernel.org/show_bug.cgi?id=202977.

nextafter.3
Michael Kerrisk
Since glibc 2.23, these functions do set errno
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6799.

posix_spawn.3
Olivier Gayot [Adhemerval Zanella]
Clarify by using name of steps rather than syscalls
Olivier Gayot [Adhemerval Zanella]
Document implementation using clone() since glibc 2.24
Olivier Gayot [Adhemerval Zanella]
Document POSIX_SPAWN_USEVFORK
Added a few lines about POSIX_SPAWN_USEVFORK so that it appears

clearly that since glibc 2.24, the flag has no effect.
Olivier Gayot [Adhemerval Zanella]
Document the POSIX_SPAWN_SETSID attribute

pow.3
Michael Kerrisk
BUGS: pow() performance problem for some (rare) inputs has been fixed
See https://sourceware.org/bugzilla/show_bug.cgi?id=13932
Michael Kerrisk
Several bugs in glibc's pow() implementation were fixed in glibc 2.16
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=3866.
Michael Kerrisk
Add a subheading to mark off historical bugs that are now fixed

printf.3
Tobias Stoeckmann
Prevent signed integer overflow in example

ptsname.3
Bruno Haible
Fix description of failure behaviour of ptsname_r()

random.3
John Marshall
Change "RAND_MAX" tp "2^31-1"

scalb.3

Michael Kerrisk
These functions now correctly set errno for the EDOM and ERANGE cases
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803
and https://www.sourceware.org/bugzilla/show_bug.cgi?id=6804

scalbln.3
Michael Kerrisk
These functions now correctly set errno for the ERANGE case
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803

scanf.3
Michael Kerrisk [Jürgen Sauermann]
Clarify that 'x' specifier allows a 0x/0X prefix in input string

sem_getvalue.3
Michael Kerrisk [Andrea Galbusera]
Note that glibc's sem_getvalue() doesn't return EINVAL errors
See https://bugzilla.kernel.org/show_bug.cgi?id=204273

setlogmask.3
Michael Kerrisk
Note that LOG_UPTO() is included in the next POSIX release

shm_open.3
Michael Kerrisk
Add license to example programs

sincos.3
Michael Kerrisk
The glibc implementation does now give EDOM for a domain error
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=15467

stdarg.3
Michael Kerrisk
SEE ALSO: add vprintf(3), vscanf(3), vsyslog(3)

strcmp.3
Michael Kerrisk
Add license to example programs

strftime.3
Urs Thuermann
ISO week number can be 52, add example

y0.3
Michael Kerrisk
These functions now correctly diagnose a pole error
https://sourceware.org/bugzilla/show_bug.cgi?id=6807

Michael Kerrisk
errno is now correctly set to ERANGE on underflow
https://www.sourceware.org/bugzilla/show_bug.cgi?id=6808

loop.4
Michael Kerrisk [Vlad]
'lo_flags' is nowadays "r/w"
See https://bugzilla.kernel.org/show_bug.cgi?id=203417

veth.4
Devin J. Pohly
Add a more direct example
iproute2 allows you to specify the netns for either side of a veth
interface at creation time. Add an example of this to veth(4) so
it doesn't sound like you have to move the interfaces in a
separate step.

core.5
Michael Kerrisk [Jonny Grant]
Mention 'sysctl -w' as a way of changing core_pattern
setting
Michael Kerrisk [Jonny Grant]
Note that not dumping core of an unreadable binary is a security measure
Michael Kerrisk [Jonny Grant]
Explain that core_pattern %e is process/thread 'comm' value
The 'comm' value is typically the same as the (possibly
truncated) executable name, but may be something different.

filesystems.5
Michael Kerrisk
SEE ALSO: add sysfs(5) and xfs(5)

locale.5
Michael Kerrisk [Helge Kreutzmann]
Improve description of 'first_weekday'

proc.5
Michael Kerrisk
Note kernel version for /proc/PID/smaps VmFlags "wf" flag
Michael Kerrisk
Add "um" and "uw" to VmFlags in /proc/[pid]/smaps
Michael Kerrisk
Add "mp" to VmFlags in /proc/[pid]/smaps
Michael Kerrisk
Note kernel version that removed /proc/PID/smaps VmFlags "nl" flag
Ian Rogers
Add "wf" to VmFlags in /proc/[pid]/smaps
Michael Kerrisk

Note kernel version for /proc/PID/smaps
VmFlags "dd" flag
Michael Kerrisk
Add "sf" to VmFlags in /proc/[pid]/smaps
Michael Kerrisk [Kirill A. Shutemov]
Remove "mp" under VmFlags in /proc/[pid]/smaps
Michael Kerrisk [Eric Hopper]
Alert the reader that UID/GID changes can reset the "dumpable" attribute
Keno Fischer
Fix an outdated note about map_files
The restriction to CAP_SYS_ADMIN was removed from map_files in 2015.
Michael Kerrisk [Helge Kreutzmann]
Better explanation of some /proc/ide fields
Michael Kerrisk
TASK_COMM_LEN limit includes the terminating '\0'
Clarify this detail in the discussion of /proc/[pid]/comm.
Michael Kerrisk
Add a detail to /proc/[pid]/comm
Note the connection to the "%e" specifier in
/proc/sys/kernel/core_pattern.

securetty.5
Michael Kerrisk [Helge Kreutzmann]
Improve wording of .SH one-line description

tzfile.5
Michael Kerrisk
Sync
to 2020a tzdb release
From https://www.iana.org/time-zones, version 2020a.
Michael Kerrisk
Explain UT abbreviation

ascii.7
Michael Kerrisk [Helge Kreutzmann]
SEE ALSO: fix sort order in entries

bpf-helpers.7
Michael Kerrisk
Resync against kernel 5.7

cgroups.7
Marcus Gelderie
Mention cgroup.sane_behavior file
The cgroup.sane_behavior file returns the hard-coded value "0" and
is kept for legacy purposes. Mention this in the man-page.
Michael Kerrisk
Note the existence of the clone3() CLONE_INTO_CGROUP flag

credentials.7
  Michael Kerrisk
    Alert reader that UID/GID changes can affect process capabilities
  Michael Kerrisk
    Changes to process UIDs/GIDs can effect the "dumpable" attribute
  Michael Kerrisk
    Add a list of the APIs that change a process's credentials

fanotify.7
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Fix fanotify_fid.c example
   Michael Kerrisk
    Wrap some long lines in example program

fanotify.7
fanotify_mark.2
  Amir Goldstein [Matthew Bobrowski]
    Clarify FAN_ONDIR in output mask
      FAN_ONDIR was an input only flag before introducing
      FAN_REPORT_FID. Since the introduction of FAN_REPORT_FID, it can
      also be in output mask.

hier.7
  Thomas Piekarski [Gary Perkins]
    Updating from FHS 2.3 to 3.0
      See https://bugzilla.kernel.org/show_bug.cgi?id=206693

inotify.7
  Michael Kerrisk [Jason Etherton]
    Add missing #include in example program

ip.7
  Michael Kerrisk [Martin Doucha]
    Note a few more valid 'protocol' values
      See https://bugzilla.kernel.org/show_bug.cgi?id=204981
  Michael Kerrisk
    SEE ALSO: add netdevice(7)

man-pages.7
  Michael Kerrisk
    Rename EXAMPLE to EXAMPLES
  Michael Kerrisk
    Describe COPYRIGHT section
      man-pages doesn't use COPYRIGHT sections in manual pages,
but
      various projects do. Make some recommendations about placement
      of the section.

Michael Kerrisk
Add REPORTING BUGS section
man-pages doesn't have a REPORTING BUGS section in manual pages,
but many other projects do. Make some recommendations about
placement of that section.
Michael Kerrisk
Mention AUTHORS in summary section list
Although man-pages doesn't use AUTHORS sections, many projects do
use an AUTHORS section in their manual pages, so mention it in
man-pages to suggest some guidance on the position at which
to place that section.

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add mount(8), umount(8)

namespaces.7
Michael Kerrisk
Document /proc/sys/user/max_time_namespaces

netlink.7
Michael Kerrisk [Idan Katz]
Update path for NETLINK_CONNECTOR docs in kernel source tree
Michael Kerrisk [Fabien Siron]
Note that NETLINK_SOCK_DIAG is preferred over NETLINK_INET_DIAG

pid_namespaces.7
Michael Kerrisk
Note that /proc/sys/kernel/ns_last_pid is virtualized per PID NS
Michael Kerrisk
Correct capability requirements for write to /proc/sys/kernel/ns_last_pid
CAP_SYS_ADMIN is needed in the user NS that owns the PID NS.

rtnetlink.7
Jan Moskyto Matejka [Michael Kerrisk]
Add missing RTA_* attributes

standards.7
Michael Kerrisk [Geoff Clare]
Add some more standards
Add: SUSv4 2016 edition, POSIX.1-2017, and SUSv4 2018 edition
Michael Kerrisk
Remove mention of bogus "POSIX" names
The terms POSIX.1-{2003,2004,2013,2016} were inventions of
my imagination, as confirmed by consulting Geoff Clare of
The Open Group. Remove these names.

symlink.7

Michael Kerrisk
Describe differences in the treatment of symlinks in the dirname
Describe differences in
the treatment of symlinks in the dirname
part of pathname.

tcp.7
Michael Kerrisk [vrafaeli@msn.com]
Update info on tcp_syn_retries default value
See https://bugzilla.kernel.org/show_bug.cgi?id=202885.

user_namespaces.7
Michael Kerrisk [Léo Stefanesco]
Clarify that "system time" means "calendar time"

xattr.7
Achilles Gaikwad
Add attr(1) as relevant page to SEE ALSO

ldconfig.8
Florian Weimer
Mention new default for --format in glibc 2.32

zdump.8
Michael Kerrisk [Marco Curreli, Paul Eggert]
Update to latest upstream tz release
Look under "Latest version", which is 2020a.

========== Changes in man-pages-5.08 ==========

Released: 2020-08-13, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

prctl.2
  Dave Martin
    Add SVE prctls (arm64)
      Add documentation for the PR_SVE_SET_VL and PR_SVE_GET_VL
      prctls added in Linux 4.15 for arm64.
  Dave Martin [Catalin Marinas]
    Add tagged address ABI control prctls (arm64)
      Add documentation for the PR_SET_TAGGED_ADDR_CTRL and
      PR_GET_TAGGED_ADDR_CTRL prctls added in Linux 5.4 for arm64.

setns.2
  Michael Kerrisk
    Document the use of PID file descriptors with setns()

Starting with Linux 5.8, setns() can take a PID file descriptor as
an argument, and move the caller
into or more of the namespaces of
the thread referred to by that descriptor.

capabilities.7
Michael Kerrisk
Document CAP_BPF
Michael Kerrisk
Add CAP_PERFMON

symlink.7
Aleksa Sarai
Document magic links more completely

Global changes

A few pages
Michael Kerrisk
Use \` rather than `
\` produces better rendering in PDF.

Various pages
Michael Kerrisk [Geoff Clare]
Use "\(ti" instead of "~"
A naked tilde ("~") renders poorly in PDF. Instead use "\(ti",
which renders better in a PDF, and produces the same glyph
when rendering on a terminal.

Various pages
Michael Kerrisk [Geoff Clare]
Use "\(ha" rather than "^" in code
This renders better in PDF.

Various pages
Mike Frysinger
Drop "coding: UTF-8" header
This header is used inconsistently -- man pages are UTF-8 encoded
but not setting this marker.
It's only respected by the man-db
package, and seems a bit anachronistic at this point when UTF-8
is the standard default nowadays.

Various pages
Mike Frysinger
Trim leading blank comment line

Very few pages do this, so trim them.

Various pages
  Mike Frysinger
    Use standard .\" comment style
      The \" comment produces blank lines. Use the .\" that the vast
      majority of the codebase uses instead.

Various pages
  Mike Frysinger [G. Branden Robinson]
    Various pages: Drop t comment header
      Historically, a comment of the following form at the top of a
      manual page was used to indicate too man(1) that the use of tbl(1)
      was required in order to process tables:

        '\" t

      However, at least as far back as 2001 (according to Branden),
      man-db's man(1) automatically uses tbl(1) as needed, rendering
      this comment unnecessary.
 And indeed many existing pages in
      man-pages that have tables don't have this comment at the top of
      the file. So, drop the comment from those files where it is
      present.

Changes to individual pages
----

ioctl_tty.2
  Michael Kerrisk
    Fix a confusing wording error in description of TIOCSPTLCK

iopl.2
  Thomas Piekarski [victorm007@yahoo.com]
    Updating description of permissions and disabling interrupts
      Update description of permissions for port-mapped I/O set
      per-thread and not per-process. Mention that iopl() can not
      disable interrupts since Linux 5.5 anymore and is in general
      deprecated and only provided for legacy X servers.

      See https://bugzilla.kernel.org/show_bug.cgi?id=205317

keyctl.2
  Oleksandr Kravchuk
    Declare auth_key to fix a compilation error in example code

lseek.2

Andrew Price
List gfs2 support for SEEK_HOLE/SEEK_DATA

mount.2
Michael Kerrisk
ERRORS: add EINVAL for bind mount of mount namespace inode

open.2
Michael Kerrisk
Say a bit more about what happens when 'mode' is wrongly omitted

pidfd_open.2
Michael Kerrisk
Add the setns(2) use case for PID file descriptors
Michael Kerrisk
Close the pidfd in EXAMPLE
Close the PID file descriptor in the example program, to hint to
the reader that like every other kind of file descriptor, a PID FD
should be closed.

prctl.2
Michael Kerrisk
The parent death signal is cleared on some credential changes
See kernel/cred.c::commit_creds() in the Linux 5.6 source code.

seccomp.2
Andy Lutomirski
Improve x32 and nr truncation notes

send.2
recv.2
Alyssa Ross
Add msg_iovlen POSIX note
msg_iovlen is incorrectly typed (according to POSIX) in addition
to msg_controllen, but unlike msg_controllen, this wasn't
mentioned for msg_iovlen.

setns.2
Michael Kerrisk
EXAMPLE: use O_CLOEXEC when opening namespace file descriptor
Michael Kerrisk
It is possible to setns() to the caller's current PID namespace
The page currently incorrectly says that 'fd' must refer to
a descendant PID namespace. However, 'fd' can also refer to
the caller's current PID namespace. Verified by experiment,
and also comments in kernel/pid_namespace.c (Linux 5.8-rc1).

sync.2

Jeff Layton
syncfs() now returns errors if writeback fails
A patch has been merged for v5.8 that changes how syncfs() reports errors. Change the sync() manpage accordingly.

syscalls.2
Michael Kerrisk
Add faccessat2(), added in Linux 5.8

sysctl.2
Michael Kerrisk
glibc removed support for sysctl() starting in version 2.32

atoi.3
Arkadiusz Drabczyk
Explain disadvantages of atoi()
Michael Kerrisk
Relocate BUGS section
Michael Kerrisk
Add NOTES section explaining 0 return value on error
And note that this is not specified by POSIX.

fread.3
Arkadiusz Drabczyk
Add example
Arkadiusz Drabczyk
Explain that file position is moved after calling fread()/fwrite()
Corresponding manpage on FreeBSD already contains that information.

getpt.3
posix_openpt.3
pts.4
Michael Kerrisk
Use the term "pseudoterminal multiplexor device" for /dev/ptmx
Let's use some consistent terminology for this device.

posix_memalign.3
Bruno Haible
Clarify how to free the result of posix_memalign

pthread_rwlockattr_setkind_np.3
Carlos O'Donell [Kumar Kartikeya Dwivedi]
Clarify a PTHREAD_RWLOCK_PREFER_WRITER_NP detail

queue.3
Alejandro Colomar
Remove wrong code from example

Alejandro Colomar
Comment out text for functions not in glibc (related: 6559169cac)

pts.4
Michael Kerrisk
Remove NOTES on BSD pseudoterminals
This information is already covered better in pty(7). No need to
mention it again here.

hosts.5
Thomas Bartelsmeier
Clarify capability for IPv6 outside of examples
Resolves https://bugzilla.kernel.org/show_bug.cgi?id=208279

proc.5
Jakub Wilk
Use "pwd -P" for printing cwd
"/bin/pwd" happens to work with the GNU coreutils implementation,
which has -P as the default, contrary to POSIX requirements.

Use "pwd -P" instead, which is shorter, easier to type, and should
work everywhere.
Arkadiusz Drabczyk
Inform that comm in /proc/pid/{stat,status} might also be truncated
pgrep for example searches for a process name in /proc/pid/status

resolv.conf.5
Michael Kerrisk [Helge Kreutzmann]
Clarify that ip6-bytestring was removed in 2.25

capabilities.7
Dan Kenigsberg
Clarify
that CAP_SYS_NICE relates to *lowering* the nice value
Saikiran Madugula
CAP_SYS_RESOURCE: add two more items for POSIX message queues
CAP_SYS_RESOURCE also allows overriding /proc/sys/fs/mqueue/msg_max
and /proc/sys/fs/mqueue/msgsize_max.
Michael Kerrisk [Dan Kenigsberg]
Clarify wording around increasing process nice value
Michael Kerrisk
SEE ALSO: add getpcaps(8)

cgroups.7
cpuset.7
Sven Hoexter
Update kernel cgroup documentation references
cgroups-v1/v2 documentation got moved to the "admin-guide" subfolder

and converted from .txt files to .rst

ip.7
  Michael Kerrisk [Stephen Hemminger]
    Remove mention of ipfw(4) which was in long obsolete ipchains project

man-pages.7
  Michael Kerrisk
    Add some notes on generating optimal glyphs
      Getting nice renderings of ^ ` and ~ requires special
      steps in the page source.

pty.7
  Michael Kerrisk

   Explicitly mention CONFIG_LEGACY_PTYS
      Explicitly mention CONFIG_LEGACY_PTYS, and note that it is disabled
      by default since Linux 2.6.30.
  Michael Kerrisk
    Relocate a paragraph to NOTES

standards.7
  Michael Kerrisk
    Add an entry for POSIX.1-1988
  Michael Kerrisk [Geoff Clare]
    Correct various details in the explanation of XPG/POSIX/SUS

ld.so.8
  Florian Weimer [Michael Kerrisk]
    List more places in which dynamic string tokens are expanded
      This happens for more than just DT_RPATH/DT_RUNPATH.
  Arkadiusz Drabczyk
    Explain that empty entry in LD_LIBRARY_PATH means cwd

zic.8
  Michael Kerrisk
    Sync to 2020a tzdb release
      From https://www.iana.org/time-zones, version 2020a.

========== Changes in man-pages-5.09 ==========

Released: 2020-11-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog
below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alejandro Colomar <colomar.6.4.3@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

circleq.3
  Alejandro Colomar
    New page with 'circleq' content extracted from queue(3)

list.3
  Alejandro Colomar
    New page with 'list' content extracted from queue(3)

pthread_attr_setsigmask_np.3
  Michael Kerrisk
    New page for pthread_attr_setsigmask_np() + pthread_attr_getsigmask_np()

     Add a page documenting the pthread_attr_setsigmask_np(3) and
       pthread_attr_getsigmask_np(3) functions added in glibc 2.32.

slist.3
  Alejandro Colomar
    New page with 'slist' content extracted from queue(3)

stailq.3
  Alejandro Colomar
    New page with 'stailq' content extracted from queue(3)

tailq.3
  Alejandro Colomar
    New page with 'tailq' content extracted from queue(3)

system_data_types.7
  Alejandro Colomar, Michael Kerrisk
    A new page documenting a wide range of system data types.

kernel_lockdown.7
  David Howells, Heinrich Schuchardt [Michael Kerrisk]
    New page documenting the Kernel Lockdown feature

queue.7
  Alejandro Colomar
    Create summary page for 'queue' APIs
      The former queue(3) page was rather unwieldy, as it attempted to
      describe too many APIs. After splitting that content out into a
      number of smaller pages (circleq.3, list.3, slist.3, stailq.3,

and
tailq.3) move the much-reduced queue(3) page, which is now
essentially a summary of those APIs, from Section 3 to Section 7.

Newly documented interfaces in existing pages
---

fanotify_init.2
fanotify.7
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Document FAN_REPORT_DIR_FID

fanotify_init.2
fanotify.7
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Document FAN_REPORT_NAME

statx.2
Ira Weiny
Add STATX_ATTR_DAX

strerror.3
Michael Kerrisk
Document strerrorname_np() and strerrordesc_np()
strerrorname_np() and strerrordesc_np() were added in glibc 2.32.

strsignal.3
Michael Kerrisk
Document sigabbrev_np() and sigdescr_np().
sigabbrev_np() and sigdescr_np() were added in glibc 2.32.

loop.4
Yang Xu
Document LOOP_CONFIGURE ioctl
Yang Xu
Document LO_FLAGS_DIRECT_IO flag

capabilities.7
Michael Kerrisk
Document the CAP_CHECKPOINT_RESTORE
capability added in Linux 5.9

ip.7
Stephen Smalley [Paul Moore]
Document IP_PASSSEC for UDP sockets

ip.7

socket.7
  Stephen Smalley
    Document SO_PEERSEC for AF_INET sockets
  Sridhar Samudrala
    Document SO_INCOMING_NAPI_ID

socket.7
unix.7
  Stephen Smalley [Serge Hallyn, Simon McVittie]
    Add initial description for SO_PEERSEC

getcwd.2
mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2
  Michael Kerrisk
    Reinstate links to section 3 pages that document system calls
      Some of the links removed in commit 247c654385128fd0748 should
      have been kept, because in some cases there are real system
      calls whose wrapper functions are documented in Section 3.

queue.3
  Alejandro Colomar
    Link to queue(7)

sigabbrev_np.3
  Michael Kerrisk
    New link to strsignal.3

sigdescr_np.3
   Michael Kerrisk
    New link to strsignal.3

strerrordesc_np.3
  Michael Kerrisk
    New link to strerror(3)

strerrorname_np.3
  Michael Kerrisk
    New link to strerror(3)

sys_siglist.3
  Michael Kerrisk
    New link to strsignal(3)

Global changes

Various pages
  Alejandro Colomar
      Use ``sizeof`` consistently through all the examples in the
      following way:

      - Use the name of the variable instead of its type as argument for
        ``sizeof``.

Various pages
Alejandro Colomar
Use sizeof() to get buffer size (instead of hardcoding macro name)

Various pages
Michael Kerrisk
Use \(aq instead of ' inside monospace fonts
Use \(aq to get an unslanted single quote inside monospace code blocks. Using a simple ' results in a slanted quote inside PDFs.

Various pages
Michael Kerrisk, Alejandro Colomar
Use C99 style to declare loop counter variables
Rather than:

sometype x;

for (x = ...; ...)

use

for (sometype x = ...; ...)

This brings the declaration and use closer together (thus aiding readability) and also clearly indicates the scope of the loop counter variable.

Various pages
Alejandro Colomar
Switch printf() casts to use [u]intmax_t + %ju / %jd
Let's move to the 21st century. Instead of casting system data types to long/long long/etc. in printf() calls, instead cast to intmax_t or uintmax_t, the largest available signed/unsigned integer types.

Various pages
Alejandro Colomar
Omit 'int' keyword for 'short', 'long' and 'long long' types

Various pages
Alejandro Colomar
Remove unneeded casts

Various pages
Alejandro Colomar
In printf(): s/0x%/%#/ except when followed by X instead of x

Use printf()'s
'#' flag character to prepend the string "0x".

However, when the number is printed in uppercase, and the prefix
is in lowercase, the string "0x" needs to be manually written.

Various pages
  Michael Kerrisk
    Use C99-style declarations for readability
      Rather than writing things such as:

        struct sometype *x;
        ...
        x = malloc(sizeof(*x));

      let's use C99 style so that the type info is in the same line as
      the allocation:

        struct sometype *x = malloc(sizeof(*x));

Various pages
  Alejandro Colomar
    Cast to 'unsigned long' rather than 'long' when printing with "%lx"

stdarg.3
  Alejandro Colomar
    Declare variables with different types in different lines
    In particular, don's mix a variable and a pointer declaration
    on the same line: TYPE x, *p;

Changes to individual pages
---

memusage.1
  Michael Kerrisk
     EXAMPLES: remove doubled calculations
       The same calculations are repeated in malloc() and printf() calls.
       For better readability, do the calculations once.
  Michael Kerrisk
    Use %zu rather than %zd when printing 'size_t' values

clock_getres.2
  Alejandro Colomar
    EXAMPLES: use 'const' when appropriate
  Alejandro Colomar [Jakub Wilk]
    Cast 'time_t' to 'int' for printf() and fix the length modifiers
  Michael Kerrisk [Tony May]

Fix type and variable name in dynamic clock code example

clone.2
Michael Kerrisk
CAP_CHECKPOINT_RESTORE can now be used to employ 'set_tid'

epoll_ctl.2
Michael Kerrisk
epoll instances can be nested to a maximum depth of 5
This limit appears to be an off-by-one count against
EP_MAX_NESTS (4).
Michael Kerrisk
Move some version info from CONFORMING TO to VERSIONS

eventfd.2
Alejandro Colomar
Use 'PRIxN' macros when printing
C99 fixed-width integer types

futex.2
Alejandro Colomar
Use appropriate types

getdents.2
Alejandro Colomar
SYNOPSIS: add missing header and feature test macro

intro.2
intro.3
credentials.7
feature_test_macros.7
standards.7
Michael Kerrisk
SEE ALSO: add system_data_types(7)

ioctl_ns.2
stat.2
Alejandro Colomar [Konstantin Bukin]
Fix signedness of printf specifiers

membarrier.2
Alejandro Colomar
Note that glibc does not provide a wrapper

mprotect.2
Alejandro Colomar
Use "%p" rather than casting to 'long' when printing pointer values

mq_getsetattr.2
  Alejandro Colomar
    Use 'const' when appropriate

msgop.2
  Yang Xu
    Add restriction on ENOSYS error

open.2
  Michael Kerrisk [henrik@optoscale.no]
    ERRORS: add EBUSY

openat.2
  Alejandro Colomar
    SYNOPSIS: return long
      The Linux kernel uses long as the return type for this syscall.
      As glibc provides
 no wrapper, use the same type the kernel uses.

open_by_handle_at.2
  Alejandro Colomar
    Use "%u" rather than "%d" when printing 'unsigned int' values

perf_event_open.2
  Alexey Budankov
    Update the man page with CAP_PERFMON related information

recv.2
send.2
  Michael Kerrisk
    Add cross references to pages with further info about ancillary data

sched_getattr.2
  Aleksa Sarai
    Update to include changed size semantics

seccomp.2
  Michael Kerrisk [Jann Horn]
    Warn reader that SECCOMP_RET_TRACE can be overridden
      Highlight to the reader that if another filter returns a
      higher-precedence action value, then the ptracer will not
      be notified.
  Michael Kerrisk [Rich Felker]
    Warn against the use of SECCOMP_RET_KILL_THREAD
      Killing a thread with SECCOMP_RET_KILL_THREAD is very likely
      to leave the rest of the process in a broken state.
  Michael Kerrisk [Rich Felker]

EXAMPLES: use SECCOMP_RET_KILL_PROCESS rather than SECCOMP_RET_KILL
Alejandro Colomar
Use ARRAY_SIZE() macro instead of raw sizeof division

setns.2
Michael Kerrisk
Correct the version for time namespace support

sigaction.2
Michael Kerrisk [Alejandro Colomar]
Use correct POSIX type for siginfo_t.si_value

syscalls.2
Michael Kerrisk
Move system calls from discontinued ports out of main syscall list
Various ports that had their own indigenous system calls have
been discontinued. Remove those system calls (none of which had
manual pages!) to a separate part of the page, to avoid
cluttering the main list of system calls.
Michael Kerrisk
Add close_range (Linux 5.9)

timerfd_create.2
Alejandro Colomar
Use 'PRIxN' macros when printing C99 fixed-width integer types

userfaultfd.2
Michael Kerrisk
Use a better type (uint64_t) for 'len' in EXAMPLES
Alejandro
Colomar
Use 'PRIx64' rather than "%llx" when printing 64-bit fixed-width types

argz_add.3
envz_add.3
Michael Kerrisk [Jonny Grant]
Point out that 'error_t' is an integer type

bsearch.3
Alejandro Colomar
Fix intermediate type and remove unneeded casts

bswap.3
Jakub Wilk
Use strtoull() for parsing 64-bit numbers

dlopen.3
Michael Kerrisk

Clarify DT_RUNPATH/DT_RPATH details
It is the DT_RUNPATH/DT_RPATH of the calling object (not the executable) that is relevant for the library search. Verified by experiment.

errno.3
Michael Kerrisk [Alejandro Colomar]
Note that the pthreads APIs do not set errno

fopencookie.3
Alejandro Colomar
printf()'s .* expects an int; cast accordingly
Alejandro Colomar
Fix bugs in example

fread.3
Alejandro Colomar
Move ARRAY_SIZE logic into macro

freeaddrinfo.3
Marko Hrastovec
Fix memory leaks in freeaddrinfo()
examples

getline.3
Alejandro Colomar
Use %zd rather than %zu when printing 'ssize_t' values

lseek64.3
Michael Kerrisk
Since glibc 2.28. the 'llseek' symbol is no longer available

mallinfo.3
Michael Kerrisk
The 'usmblks' field is nowadays always 0

offsetof.3
Alejandro Colomar
Use "%zu" rather than "%zd" when printing 'size_t' values

perror.3
Michael Kerrisk
sys_errlist and sys_nerr are no longer exposed by <stdio.h>
The change came with the release of glibc 2.32.

posix_fallocate.3
Érico Rolim
Add EOPNOTSUPP error code.

psignal.3
strsignal.3
  Michael Kerrisk
    Consolidate information on 'sys_siglist' in one page (strsignal(3))

pthread_attr_init.3
  Michael Kerrisk
    SEE ALSO: add pthread_attr_init(3)

pthread_attr_init.3
pthread_create.3
pthread_getattr_np.3
  Michael Kerrisk
    Use correct type (size_t) for some variables

pthread_getattr_np.3
  Alejandro Colomar
     Use "%zu" and "%zx" when printing 'size_t' values

pthread_sigmask.3
  Michael Kerrisk
    SEE ALSO: add pthread_attr_setsigmask_np(3)

qsort.3
  Alejandro Colomar
    Fix casts
  Alejandro Colomar
    SYNOPSIS: move code from queue.3 to stailq.3

regex.3
  Alejandro Colomar
    Add example program
  Alejandro Colomar
    Remove unnecessary include

strsignal.3
  Michael Kerrisk [Hauke Fath]
    Note that starting with v2.32, glibc no longer exports 'sys_siglist'
  Michael Kerrisk
    Further addition on version range for sys_siglist
  Michael Kerrisk
    Note that 'sys_siglist' is nonstandard

strtod.3
  Jonathan Wakely
    Fix return value for underflow

strtol.3
  Alejandro Colomar
    EXAMPLES: simplify errno checking
  Alejandro Colomar
    EXAMPLES: as the default base, use special value 0
  Alejandro Colomar
    EXAMPLES: delimit output string using ""

tsearch.3
  Alejandro Colomar
    Simplify
 type usage and remove unneeded casts
  Alejandro Colomar
    Use size_t for malloc() argument

loop.4
  Yang Xu
    Add some details about lo_flags

core.5
  Alejandro Colomar
    Use adequate type

locale.5
  Florian Weimer
    Decimal points, thousands separators must be one character

proc.5
  Michael Kerrisk
    Update capability requirements for accessing /proc/[pid]/map_files
  Jann Horn [Mark Mossberg]
    Document inaccurate RSS due to SPLIT_RSS_COUNTING
  Michael Kerrisk
    Note "open file description" as (better) synonym for "file handle"

resolv.5
  Florian Weimer
    Document the trust-ad option

aio.7
  Alejandro Colomar
    Use perror() directly

bpf-helpers.7
  Michael Kerrisk [Jakub Wilk]
    Resync with current kernel source

capabilities.7

Michael Kerrisk
Under CAP_SYS_ADMIN, group "sub-capabilities" together
CAP_BPF, CAP_PERFMON, and CAP_CHECKPOINT_RESTORE have all been

added to split out the power of CAP_SYS_ADMIN into weaker pieces.
Group all of these capabilities together in the list under
CAP_SYS_ADMIN, to make it clear that there is a pattern to these
capabilities.
Michael Kerrisk
CAP_SYS_ADMIN implies CAP_CHECKPOINT_RESTORE
But the latter, weaker capability is preferred.
Michael Kerrisk
Add kernel doc reference for CAP_PERFMON

fanotify.7
Alejandro Colomar
Pass array to read(2) directly instead of a pointer to it

fanotify.7
fanotify_mark.2
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Generalize documentation of FAN_REPORT_FID

feature_test_macros.7
Jakub Wilk
Update list of macros that inhibit default definitions

man.7
Michael Kerrisk [G. Branden Robinson]
Clarify that alternating typeface macros print arguments without spaces

man-pages.7
Michael Kerrisk
Add some more requests re code examples
Michael Kerrisk
Soften the statement that ideal programs should be short

namespaces.7
Michael Kerrisk
A 'time_for_children' symlink can also pin a namespace

pid_namespaces.7
Michael Kerrisk
Update capability requirements for /proc/sys/kernel/ns_last_pid

pthreads.7
Michael Kerrisk
Explicitly note that pthreads APIs return an errno-style value on error

rtld-audit.7
  Florian Weimer [Carlos O'Donell]
    Clarify la_version handshake
      Returning its argument without further checks is almost always
      wrong for la_version.
  Alejandro Colomar
    Use "%u" rather than "%d" when printing 'unsigned int' values

sigevent.7
  Michael Kerrisk
    Note that 'sigev_notify_thread_id' is Linux-specific

socket.7
  Michael Kerrisk
    SEE ALSO: add ipv6(7)

========== Changes in man-pages-5.10 ==========

Released: 2020-12-21, Munich

Contributors

The following people contributed patches/fixes
 or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed
anyone!

Newly documented interfaces in existing pages
---

access.2
  Michael Kerrisk
    Document faccessat2()
      faccessat2() was added in Linux 5.8 and enables a fix to
      longstanding bugs in the faccessat() wrapper function.

membarrier.2
  Peter Oskolkov [Alejandro Colomar]
    Update for Linux 5.10
      Linux kernel commit 2a36ab717e8fe678d98f81c14a0b124712719840
      (part of 5.10 release) changed sys_membarrier prototype/parameters
      and added two new commands [MEMBARRIER_CMD_PRIVATE_EXPEDITED_RSEQ
      and MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_RSEQ].

mount.2
statfs.2
  Ross Zwisler
    Add NOSYMFOLLOW flags to mount(2) and statfs(2)

New and changed links
---

faccessat2.2
  Michael Kerrisk
    New link to access.2

CIRCLEQ_EMPTY.3
CIRCLEQ_FIRST.3
CIRCLEQ_FOREACH.3
CIRCLEQ_FOREACH_REVERSE.3
CIRCLEQ_HEAD_INITIALIZER.3
CIRCLEQ_LAST.3
CIRCLEQ_LOOP_NEXT.3

CIRCLEQ_LOOP_PREV.3
CIRCLEQ_NEXT.3
CIRCLEQ_PREV.3
  Michael Kerrisk
    Add missing links to circleq.3

pthread_attr_getsigmask_np.3
  Michael Kerrisk
    New link to pthread_attr_setsigmask_np.3

Global changes

Various pages
  Alejandro Colomar
    Use Oxford comma

Changes to individual pages
---

access.2
  Michael Kerrisk
    BUGS: note that faccessat() wrapper function emulation ignores ACLs

bpf.2
  Michael Kerrisk
    Place EXAMPLES section in correct location

cacheflush.2
  Alejandro Colomar
    Document Architecture-specific variants
  Alejandro Colomar [Heinrich Schuchardt]
    Document __builtin___clear_cache() as a more portable alternative

chroot.2
memfd_create.2
tailq.3
  Michael Kerrisk [Alejandro Colomar]
    Fix unbalanced .nf/.fi

clock_getres.2
  Michael Kerrisk
    Place ERRORS in alphabetical order

clone.2
sigaltstack.2

Michael Kerrisk
clone(CLONE_VM)
disables the alternate signal stack

getrlimit.2
Michael Kerrisk
State more precisely the range of kernel versions that had RLIMIT_LOCKS

getrusage.2
Michael Kerrisk
Note that the 'vtimes' symbol exists only up to glibc 2.32

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
Alejandro Colomar
SYNOPSIS: s/io_context_t/aio_context_t/
Linux uses aio_context_t for these syscalls,
and it's the type provided by <linux/aio_abi.h>.
Use it in the SYNOPSIS.

libaio uses 'io_context_t', but that difference is already noted
in NOTES.

io_setup.2
Alejandro Colomar
SYNOPSIS: return long

link.2
Mathias Rav
ERRORS: add ENOENT when target is deleted
Linux kernel commit aae8a97d3ec30788790d1720b71d76fd8eb44b73 (part
of kernel release v2.6.39) added a check to disallow creating a
hard link to an unlinked file.

llseek.2

Michael Kerrisk
Note size of 'loff_t' type
Michael Kerrisk
Point the reader to lseek64(3) for info about llseek(3)
Michael Kerrisk
Some mild rewriting to ease reading of the info in this page

mmap.2
Michael Kerrisk

Clarify SIGBUS text and treatment of partial page at end of a mapping

msgctl.2
Michael Kerrisk
Make comments in 'msqid_ds' definition more compact
Michael Kerrisk
Place list of field descriptions in same order as structure definition
Michael Kerrisk
Use field name "msg_cbytes" rather than "__msg_cbytes"
Michael Kerrisk
Add description of 'msg_cbytes' field

openat.2
Colin Ian King
Fix include path, should be linux/openat2.h

perf_event_open.2
Namhyung Kim [Alejandro Colomar]
Update man page with recent kernel changes
Alejandro Colomar
Assign calculated value explicitly to 'config'

restart_syscall.2
Alejandro Colomar
SYNOPSIS: Fix restart_syscall()
return type

set_tid_address.2
Alejandro Colomar
SYNOPSIS: Fix set_tid_address() return type

shmctl.2
Michael Kerrisk
Place list of field descriptions in same order as structure definition

sigaction.2
Michael Kerrisk
Clarify description of SA_NODEFER
Clarify description of SA_NODEFER, and note interaction with
act.sa_mask.
Michael Kerrisk
Add a cross-reference to signal(7) for further info on 'ucontext_t'

sigaltstack.2
Michael Kerrisk
Clarify that the alternate signal stack is per-thread
Clarify that the alternate signal stack is per-thread (rather
than process-wide).

spu_create.2
  Michael Kerrisk
    Add kernel version numbers for SPU_CREATE_AFFINITY_SPU/_MEM
  Michael Kerrisk
    Relocate paragraph on 'mode' argument
  Michael Kerrisk [Alejandro Colomar]
    Clarify that spu_create() now has 4 arguments but once had only 3

subpage_prot.2
   Alejandro Colomar
    SYNOPSIS: Fix return type: s/long/int/

syscalls.2
  Michael Kerrisk
    Add process_madvise()
  Michael Kerrisk
    Note that sysctl() was removed in Linux 5.5

timer_getoverrun.2
  Michael Kerrisk
    timer_getoverrun() now clamps the overrun count to DELAYTIMER_MAX
      See https://bugzilla.kernel.org/show_bug.cgi?id=12665.

uselib.2
posix_memalign.3
profil.3
rtime.3
  Michael Kerrisk
    Remove some text about libc/libc5
      With this change, there remain almost no vestiges of information
      about the long defunct Linux libc.

errno.3
  Michael Kerrisk
    Note another possible cause of the EMFILE error

getcontext.3
  Michael Kerrisk
    Mention SA_SIGINFO flag when talking about 3-argument signal handler
  Michael Kerrisk
    SEE ALSO: add signal(7)

list.3
  Michael Kerrisk
    NAME: remove LIST_PREV, which is not documented in this page

lseek64.3

Michael Kerrisk
Remove
section numbers from interface list
Michael Kerrisk
Remove sentence saying lseek64() is an alias for llseek()
Michael Kerrisk
NOTES: describe the origin of lseek64() in LFS

nextafter.3
Michael Kerrisk
Remove duplicate "BUGS" section heading

pthread_tryjoin_np.3
Michael Kerrisk [Mike Crowe]
Note that pthread_timedjoin_np() uses CLOCK_REALTIME, but there's a bug

rcmd.3
Michael Kerrisk
SEE ALSO: remove intro(2)

strnlen.3
Michael Kerrisk [Heinrich Schuchardt]
Fix a small inconsistency in the text

elf.5
Michael Kerrisk
SEE ALSO: add objcopy(1)

filesystems.5
Ahelenia Ziemiaska [Alejandro Colomar]
Fix link to user space tooling for ncpfs
Ahelenia Ziemiaska [Alejandro Colomar]
Note ncpfs removal from kernel

attributes.7
Michael Kerrisk
SEE ALSO: add signal-safety(7)

fanotify.7
Amir Goldstein [Jan Kara]
Fix outdated description

kernel_lockdown.7
Michael Kerrisk
Remove unneeded quotes

packet.7
Baruch Siach [Alejandro Colomar]

Update references to kernel documentation

pthreads.7
Michael Kerrisk
Rephrase function list in terms of POSIX rather than SUS
The list was using an inconsistent mixture of "POSIX" and "SUS".

signal.7
Michael Kerrisk [Heinrich Schuchardt, Dave Martin]
Add some details on the execution of signal handlers
Add a "big picture" of what happens when a signal handler
is invoked.
Michael Kerrisk
Add pidfd_send_signal() to list of APIs for sending signals
Michael Kerrisk
Mention 'ucontext_t' in the discussion of signal handler execution
Michael Kerrisk
SEE ALSO: add swapcontext(3)

signal-safety.7
Michael Kerrisk
Note async-signal-safety details for errno

standards.7
Michael Kerrisk
Add URL for POSIX.1-2008/SUSv4
Michael Kerrisk
Add LFS (Large File Summit)
Michael Kerrisk [Rob Landley]
Fix some URLs for locations of the standards
Michael Kerrisk
Relocate the discussion on POSIX manual pages

tcp.7
Alejandro Colomar [Philip Rowlands]
tcp_syncookies: It is now an integer [0, 2]
Since Linux kernel 3.12, tcp_syncookies can have the value 2,
which sends out cookies unconditionally.

========== Changes in man-pages-5.11 ==========

Released: 2021-03-21, Munich

Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

close_range.2
  Stephen Kitt, Michael Kerrisk [Christian Brauner]
    New page documenting close_range(2)

process_madvise.2
  Suren Baghdasaryan, Minchan Kim [Michal Hocko, Alejandro Colomar,
  Michael Kerrisk]
    Document process_madvise(2)

fileno.3
  Michael Kerrisk
    Split fileno(3) content out of ferror(3) into new page
      fileno(3) differs from the other functions in various ways.
      For example, it is governed by different standards,
      and can set 'errno'. Conversely, the other functions
      are about examining the status of a stream, while
      fileno(3) simply obtains the underlying file descriptor.

      Furthermore, splitting this function out allows
      for some cleaner upcoming changes in ferror(3).

Newly documented interfaces in existing pages
---

epoll_wait.2
  Willem de Bruijn [Dmitry V. Levin]
    Add documentation of epoll_pwait2()
      Expand the epoll_wait() page with epoll_pwait2(), an epoll_wait()
      variant that takes a struct timespec to enable nanosecond
      resolution timeout.

fanotify_init.2
fanotify.7
  Jan Kara [Steve Grubb]
    Document FAN_AUDIT flag and FAN_ENABLE_AUDIT

madvise.2
  Michael Kerrisk
    Add descriptions of MADV_COLD and MADV_PAGEOUT
      Taken from process_madvise(2).

openat2.2
  Jens Axboe
    Add RESOLVE_CACHED

prctl.2
  Gabriel Krisman Bertazi
    Document Syscall User Dispatch

mallinfo.3
  Michael Kerrisk
    Document mallinfo2() and note that mallinfo() is deprecated
      Document the mallinfo2() function
 added in glibc 2.33.
    Update example program to use mallinfo2()

system_data_types.7
  Alejandro Colomar
    Add off64_t to system_data_types(7)

ld.so.8
  Michael Kerrisk
    Document the --argv0 option added in glibc 2.33

New and changed links
---

epoll_pwait2.2
  Dmitry V. Levin
    New link to epoll_wait(2)

mallinfo2.3
  Michael Kerrisk
    New link to mallinfo(3)

off64_t.3
  Alejandro Colomar
    New link to system_data_types(7)

Global changes

Various pages
  Alejandro Colomar
    SYNOPSIS: Use 'restrict' in prototypes
      This change has been completed for *all* relevant pages

(around 135 pages in total).

Various pages
  Alejandro Colomar [Zack Weinberg]
    Remove unused <sys/types.h>
      The manual pages are already inconsistent in which headers need
      to be included. Right now, not all of the types used by a
      function have their required
header included in the SYNOPSIS.

      If we were to add the headers required by all of the types used by
      functions, the SYNOPSIS would grow too much. Not only it would
      grow too much, but the information there would be less precise.

      Having system_data_types(7) document each type with all the
      information about required includes is much more precise, and the
      info is centralized so that it's much easier to maintain.

      So let's document only the include required for the function
      prototype, and also the ones required for the macros needed to
      call the function.

      <sys/types.h> only defines types, not functions or constants, so
      it doesn't belong to man[23] (function) pages at all.

      I ignore if some old systems had headers that required you to
      include <sys/types.h> *before* them (incomplete headers), but if
      so, those implementations
would be broken, and those headers
      should probably provide some kind of warning. I hope this is not
      the case.

      [mtk: Already in 2001, POSIX.1 removed the requirement to
      include <sys/types.h> for many APIs, so this patch seems
      well past due.]

A few pages
  Alejandro Colomar
    Add notes about missing glibc wrappers

_exit.2
abort.3
err.3
exit.3
pthread_exit.3
setjmp.3
  Alejandro Colomar
    SYNOPSIS: Use 'noreturn' in prototypes

Use standard C11 'noreturn' in these manual page for
functions that do not return.

Various pages
Ganimedes Colomar [Alejandro Colomar]
Normalize SYNOPSIS notes about nonexistent glibc wrappers
To easily distinguish documentation about glibc wrappers from
documentation about kernel syscalls, let's have a normalized
'Note' in the SYNOPSIS, and a further explanation in the page body
(NOTES in most of them),
as already happened in many (but not all)
of the manual pages for syscalls without a wrapper. Furthermore,
let's normalize the messages, following membarrier.2 (because it's
already quite extended), so that it's easy to use grep to find
those pages.
Normalize NOTES about nonexistent glibc wrappers
This commit normalizes texts under sections other than SYNOPSIS
(most of them in NOTES).

Global changes (formatting fixes and minor edits)

Various pages
Michael Kerrisk
ERRORS: remove redundant statement that 'errno' is set
This is implied in every other manual page. There is no need to
state it explicitly in these pages.

Various pages
Michael Kerrisk
Use periods more consistently inside code comments
In general, complete sentences in free-standing comments
should be terminated by periods.

A
few pages
Michael Kerrisk
Better table formatting
In particular, allow for rendering in widths different from
(especially less than) 80 columns.

Various pages
Michael Kerrisk
Consistency fix-up in FTMs
Generally, place '||' at start of a line, rather than the end of
the previous line.

Rationale: this placement clearly indicates that each piece
is an alternative.

Various pages
Michael Kerrisk [Alejandro Colomar]
Bring more whitespace consistency in SYNOPSIS
The use of vertical white space in the SYNOPSIS sections
is rather inconsistent. Make it more consistent, subject to the
following heuristics:

* Prefer no blank lines between function signatures by default.
* Where many functions are defined in the SYNOPSIS, add blank
lines where needed to improve readability, possibly by using

blank lines to separate logical groups of functions.

Various pages
Alejandro Colomar
Consistently use 'unsigned int'
Most pages use 'unsigned int' (and the kernel too).
Make them all do so.

Various pages
Michael Kerrisk
Various improvements in wording in RETURN VALUE

Various pages
Michael Kerrisk
s/Glibc versions </Glibc </ in Feature Test Macro discussions
Use a more compact notation that will render less wide
on the terminal.

Various pages
Michael Kerrisk
Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings
are used in to describe the fact that 'errno' is set on error.
There's no reason for the difference in wordings, since the same
thing is being described in each case. Switch to a standard
wording that is the same as FreeBSD and similar to the wording

used in POSIX.1.

In this change, "to indicate the cause of the error"
is changed to "to indicate the error".

Various pages
Michael Kerrisk

Add missing .nf/.fi in FTM info

Various pages
Michael Kerrisk
Simplify mark-up for Feature Test Macro requirements
Different source styles are used in different pages to achieve the same formatted output, and in some cases the source mark-up is a rather convoluted combination of .RS/.RE/.TP/.PD macros. Simplify this greatly, and unify all of the pages to use more or less the same source code style. This makes the source code rather easier to read, and may simplify future scripted global changes.

The feature test macro info is currently bracketed by .nf/.fi pairs. This is not strictly necessary (i.e., it makes no difference to the rendered output), but for the moment we keep these
"brackets" in case they may be replaced with something else.

Various pages
Michael Kerrisk
Use real minus signs in pathnames

Various pages
Michael Kerrisk
Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings are used in to describe the fact that 'errno' is set on error. There's no reason for the difference in wordings, since the same thing is being described in each case. Switch to a standard wording that is the same as FreeBSD and similar to the wording used in POSIX.1.

In this change, reword various cases saying that 'errno' is set "appropriately" to "is set to indicate the error".

Various pages
Michael Kerrisk
Improve formatting in ATTRIBUTES
Make the formatting more consistent inside the tables in the ATTRIBUTES sections. Make the source code more uniform; in

particular, eliminate the use of custom tweaks using 'lbwNN'/'lwNN' and .br macros. In addition, ensure that hyphenation and text justification do not occur inside the tables.

Various pages
Michael Kerrisk
Use .nf/.fi in SYNOPSIS

The majority of pages use .nf/.fi in SYNOPSIS, but there are
still many that don't and use .br to achieve newlines. Fix many
of those. This brings greater consistency to the pages, which
eases editing and may ease future scripted edits to the pages.

Various pages
  Michael Kerrisk
    Standardize wording around setting of 'errno' on error
      In the RETURN VALUE sections, a number of different wordings
      are used in to describe the fact that 'errno' is set on error.
      There's no reason for the difference in wordings, since the same
      thing is being described in each case. Switch to a standard
      wording that is the
same as FreeBSD and similar to the wording
      used in POSIX.1.

      In this change, miscellaneous descriptions of the setting
      of 'errno' are reworded to the norm of "is set to indicate
      the error".

Various pages
  Michael Kerrisk
    Use "\-" to generate real minus in circumstances where appropriate
      Use \- for math formulas, pathnames, manual page cross references,
      etc.

Various pages
  Michael Kerrisk
    Inside code blocks (.EX/.EE) use \- to get real minus signs
      A real minus can be cut and pasted...

Various pages
  Alejandro Colomar
    Remove explicit blank lines, replacing them with .PP when appropriate

Various pages
  Michael Kerrisk
    Use internally consistent continuation indents in SYNOPSIS
      In the SYNOPSIS, a long function prototype may need to be
      continued over to the next line. The continuation line is
      indented according to the following
rules:

      1. If there is a single such prototype that needs to be continued,
        then align the continuation line so that when the page is
        rendered on a fixed-width font device (e.g., on an xterm) the
        continuation line starts just below the start of the argument
        list in the line above. (Exception: the indentation may be

adjusted if necessary to prevent a very long continuation line
or a further continuation line where the function prototype is
very long.)

Thus:

```
int tcsetattr(int fd, int optional_actions,
        const struct termios *termios_p);
```

2. But, where multiple functions in the SYNOPSIS require
continuation lines, and the function names have different
lengths, then align all continuation lines to start in the
same column. This provides a nicer rendering
in PDF output
(because the SYNOPSIS uses a variable width font where
spaces render narrower than most characters).

Thus:

```
int getopt(int argc, char * const argv[],
        const char *optstring);
int getopt_long(int argc, char * const argv[],
        const char *optstring,
        const struct option *longopts, int *longindex);
```

Various pages
Michael Kerrisk
Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings
are used in to describe the fact that 'errno' is set on error.
There's no reason for the difference in wordings, since the same
thing is being described in each case. Switch to a standard
wording that is the same as FreeBSD and similar to the wording
used in POSIX.1.

In
this change, fix some instances stating that 'errno' is set
"appropriately" to instead say "to indicate the error".

Various System V IPC pages
Michael Kerrisk
Improve wording describing RETURN VALUE and setting of 'errno'

Changes to individual pages
---

alloc_hugepages.2

Michael Kerrisk
CONFORMING TO: reword to reflect that these system calls are long gone

cacheflush.2
Alejandro Colomar
Update SYNOPSIS for glibc wrapper
Glibc uses 'void *' instead of 'char *'.
And the prototype is declared in <sys/cachectl.h>.

clone.2
Valentin Kettner
Fix types in clone_args
A file descriptor is an int so it should be stored through an int
pointer while parent_tid should have the same type as child_tid
which is pid_t pointer.

close.2
Michael Kerrisk
SEE ALSO: add close_range(2)

copy_file_range.2
Alejandro Colomar
Document glibc
wrapper instead of kernel syscall
Glibc uses 'off64_t' instead of 'loff_t'.

delete_module.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
The Linux kernel uses 'unsigned int' instead of 'int' for the
'flags' parameter. As glibc provides no wrapper, use the same
type the kernel uses.

epoll_create.2
Michael Kerrisk
CONFORMING TO: mention that epoll_create1() is Linux-specific

epoll_wait.2
Michael Kerrisk
CONFORMING TO: mention that epoll_pwait() is Linux-specific

execve.2
Palmer Dabbelt
Correct the versions of Linux that don't have ARG_MAX argv/envp size

execveat.2
Alejandro Colomar
Fix prototype

It's been 6 years since execveat(2) was added to the kernel,
and there's still no glibc wrapper. Let's document the kernel
syscall prototype.

getcpu.2
Michael Kerrisk [Alejandro Colomar]
Rewrite page to describe glibc wrapper
function
Since glibc 2.29, there is a wrapper for getcpu(2).
The wrapper has only 2 arguments, omitting the unused
third system call argument. Rework the manual page
to reflect this.

getgid.2
getuid.2
Michael Kerrisk
Note that these interfaces never modify 'errno'
See https://www.austingroupbugs.net/view.php?id=511
and the POSIX.1-2008 specifications of the interfaces.

gethostname.2
Michael Kerrisk
Update FTM requirements for gethostname()

getpagesize.2
getdtablesize.3
Michael Kerrisk
Update/correct FTM requirements

getrusage.2
Michael Kerrisk
Starting in 2.33, glibc no longer provides vtimes()

ioctl_tty.2
Michael Kerrisk
Reformat argument type information
The current mark-up renders poorly. To resolve this, move
the type information into a separate line.

ipc.2
Alejandro Colomar
Fix prototype parameter types

kcmp.2
Michael Kerrisk
Since Linux 5.12, kcmp() availability is unconditional
kcmp() is no longer dependent on CONFIG_CHECKPOINT_RESTORE.

keyctl.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      The Linux kernel uses 'unsigned long'.
      There's no reason to use the typedef '__kernel_ulong_t'.

lookup_dcookie.2
  Alejandro Colomar
    Use standard types: u64 -> uint64_t

madvise.2
  Michael Kerrisk
    SEE ALSO: add process_madvise(2)

mlock.2
  Alejandro Colomar
    mlock2(): Fix prototype parameter types
      The documented prototype for mlock2() was a mix of the
      glibc wrapper prototype and the kernel syscall prototype.
      Let's document the glibc wrapper prototype, which is shown below.
  Michael Kerrisk
    CONFORMING TO: note more explicitly which APIs are in the standards

mmap2.2
  Alejandro Colomar
    Fix prototype parameter types
      There are many
 slightly different prototypes for this syscall,
      but none of them is like the documented one.
      Of all the different prototypes,
      let's document the asm-generic one.

mount.2
  Michael Kerrisk
    Note that the 'data' argument can be NULL

move_pages.2
  Alejandro Colomar
    Add notes about missing glibc wrappers

open.2
rename.2
  Alyssa Ross
    Refer to tmpfs rather than shmem
      If I'm understanding correctly, tmpfs is a filesystem built on
      shmem, so I think it's more correct (and probably much more
      widely understandable) to refer to tmpfs here.

pciconfig_read.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      Use the glibc prototypes instead of the kernel ones.
      Exception: use 'int' instead of 'enum'.

pidfd_open.2
  Michael Kerrisk
    Note the process_madvise(2) use case for PID file descriptors

readlink.2
  Michael Kerrisk [Jonny Grant]
     Emphasize that the returned buffer is not null-terminated

s390_pci_mmio_write.2
  Alejandro Colomar
    SYNOPSIS: Add 'const' qualifier
      s390_pci_mmio_write() uses 'const void *' instead of 'void *'.

sched_setattr.2
  Alejandro Colomar
    Add note about missing glibc wrappers

semctl.2
  Yang Xu [Alejandro Colomar, Manfred Spraul]
    Correct SEM_STAT_ANY description

socketcall.2
  Alejandro Colomar
    Add note about missing glibc wrapper

splice.2
  Alejandro Colomar
    Use 'off64_t' instead of 'loff_t'
      The kernel syscall uses 'loff_t', but the glibc wrapper uses 'off64_t'.
      Let's document the wrapper prototype, as in other pages.

spu_create.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter type
      The 'flags' parameter of spu_create() uses 'unsigned int'.

spu_run.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      The 2nd and 3rd parameters of spu_run()
 use 'uint32_t *'.

stat.2
  Jonathan Wakely [Alejandro Colomar]
    Remove <unistd.h> from SYNOPSIS
      There seems to be no reason <unistd.h> is shown here, so remove it.
  Michael Kerrisk
    Move the obsolete _BSD_SOURCE FTM to the end of the FTM info

syscall.2
  Peter H. Froehlich
    Update superh syscall convention

syscalls.2
  Michael Kerrisk
    Add epoll_pwait2()

tkill.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      All but the last parameters of t[g]kill() use 'pid_t',
      both in the kernel and glibc.

vmsplice.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter type
      The 3rd parameter of vmsplice() uses 'size_t' in glibc.

bstring.3
  Michael Kerrisk
    SEE ALSO: add string(3)

circleq.3
list.3
slist.3
stailq.3
tailq.3
  Alejandro Colomar
    Improve readability, especially in SYNOPSIS

circleq.3
  Alejandro Colomar
    Fix CIRCLEQ_LOOP_*() return
 type

crypt.3
  Michael Kerrisk
    Reformat FTM info (in preparation for next patch)
  Michael Kerrisk
    Update crypt() FTM requirements to note glibc 2.28 changes

ecvt.3
gcvt.3
  Michael Kerrisk
    Update FTM requirements

error.3
  Michael Kerrisk [Alejandro Colomar, Walter Harms]
    Clarify the meaning of 'status==0' for error(3)

ferror.3
  Michael Kerrisk
    Remove fileno(3) content that was migrated to new fileno(3) page
  Michael Kerrisk
    Add a RETURN VALUE section
  Michael Kerrisk
    POSIX.1-2008: these functions won't change 'errno' if 'stream' is valid
      See https://www.austingroupbugs.net/view.php?id=401.

fread.3
  Alessandro Bono
    EXAMPLES: swap size and nmemb params
      It works both ways, but this one feels more right. We are reading
      four elements sizeof(*buffer) bytes each.

fseeko.3
  Michael Kerrisk
    Move info about obsolete FTM from SYNOPSIS to NOTES
      This
 makes the SYNOPSIS more consistent with other pages.

ftime.3
  Michael Kerrisk
    glibc 2.33 has removed ftime()

ftw.3
  Alejandro Colomar
    SYNOPSIS: Remove duplicate header

gethostbyname.3
  Michael Kerrisk
    Move mention of <sys/socket.h> from SYNOPSIS to DESCRIPTION
      The functions are all declared in <netdb.h>. <sys/socket.h> is only
      needed for the AF_* constants.

gethostid.3
  Michael Kerrisk
    Update FTM requirements for gethostid()

get_phys_pages.3
  Alejandro Colomar [Jakub Wilk]
    glibc gets the info from sysinfo(2) since 2.23

grantpt.3
ptsname.3
unlockpt.3
  Michael Kerrisk
    Remove mention of _XOPEN_SOURCE_EXTENDED FTM
      This rather ancient FTM is not mentioned in other pages for
      reasons discussed in feature_test_macros(7). Remove this FTM
      from the three pages where it does appear.

malloc.3
  Alejandro Colomar [Johannes Pfister]
    Document that realloc(p,
 0) is specific to glibc and nonportable

malloc_hook.3
  Alejandro Colomar
    SYNOPSIS: Use 'volatile' in prototypes

malloc_trim.3
  Dmitry Vorobev
    Remove mention of free() call
      'malloc_trim' was and is never called from the 'free' function.

pthread_create.3
  Michael Kerrisk [Paran Lee]
    Fix undeclared variable error in example program
  Michael Kerrisk
    Fix a signedness error in the example code

puts.3
  Michael Kerrisk
    Reorder functions more logically (group related functions together)

qecvt.3
  Michael Kerrisk
    Update feature test macro requirements

setbuf.3
  Michael Kerrisk
    POSIX doesn't require errno to be unchanged after successful setbuf()
      See https://www.austingroupbugs.net/view.php?id=397#c799

setlocale.3

Michael Kerrisk [Alejandro Colomar, Bruno Haible]
Restructure a particularly difficult sentence

simpleq.3
stailq.3
queue.7
SIMPLEQ_*.3
Alejandro Colomar

Document SIMPLEQ_*() as an alias to STAILQ_*() macros

strerror.3
Alejandro Colomar
strerrorname_np() and strerrordesc_np() first appeared on glibc 2.32

string.3
Michael Kerrisk
SEE ALSO: add bstring(3)

system.3
Alejandro Colomar [Ciprian Dorin Craciun]
Document bug and workaround when the command name starts with a hyphen

environ.7
Bastien Roucariès
Reorder the text
Move the text describing how to set environment variable before
the list(s) of variables in order to improve readability.
Bastien Roucariès
Document convention of string in environ
Document the name=value system and that nul byte is forbidden.
Bastien Roucariès
Document that HOME, LOGNAME, SHELL, USER are set at login time
and point to the su(1) manual page.
Bastien Roucariès
Add see also ld.so(8) for LD_ variables
Michael Kerrisk [Bastien Roucariès]
Improve the description
of PATH
Add more details of how PATH is used, and mention the legacy
use of an empty prefix.
Bastien Roucariès [Alejandro Colomar, Bastien Roucaries, Vincent Lefevre]
Document valid values of pathnames for SHELL, PAGER and EDITOR/VISUAL
Michael Kerrisk [Bastien Roucariès]
Note the default if PAGER is not defined
Michael Kerrisk
Be a little more precise when discussing 'exec'
Say "execve(2)" instead of "exec(3)", and note that this step

starts a new program (not a new process!).
  Michael Kerrisk [Bastien Roucariès]
    Relocate and reword the mention of _GNU_SOURCE

man-pages.7
  Michael Kerrisk
    Document "acknowledgement" as the preferred spelling
  Michael Kerrisk
    Add some notes on comments in example code
  Michael Kerrisk
    Add a FORMATTING AND WORDING CONVENTIONS section
      In man-pages-5.11, a large number of pages were edited to achieve

 greater consistency in the SYNOPSIS, RETURN VALUE and ATTRIBUTES
      sections. To avoid future inconsistencies, try to capture some of
      the preferred conventions in text in man-pages(7).
  Michael Kerrisk
    Note some rationale for the use of real minus signs

netdevice.7
  Pali Rohár [Alejandro Colomar]
    Update documentation for SIOCGIFADDR SIOCSIFADDR SIOCDIFADDR

netlink.7
  Pali Rohár [Alejandro Colomar]
    Fix minimal Linux version for NETLINK_CAP_ACK
      NETLINK_CAP_ACK option was introduced in commit 0a6a3a23ea6e which first
      appeared in Linux version 4.3 and not 4.2.
  Pali Rohár [Alejandro Colomar]
    Remove IPv4 from description
      rtnetlink is not only used for IPv4
  Philipp Schuster
    Clarify details of netlink error responses
      Make it clear that netlink error responses (i.e., messages with
      type NLMSG_ERROR (0x2)), can be longer than sizeof(struct
      nlmsgerr).
 In certain circumstances, the payload can be longer.

shm_overview.7
  Michael Kerrisk
    SEE ALSO: add memfd_create(2)

sock_diag.7
  Pali Rohár [Alejandro Colomar]
    Fix recvmsg() usage in the example

tcp.7
  Enke Chen

Documentation revision for TCP_USER_TIMEOUT

uri.7
Michael Kerrisk
Note that 'logical' quoting is the norm in Europe

========== Changes in man-pages-5.12 ==========

Released: 2021-06-20, Christchurch

Apologies if I missed anyone!

New and rewritten pages
----

seccomp_unotify.2
  Michael Kerrisk [Tycho Andersen, Jann Horn, Kees Cook, Christian Brauner
          Sargun Dhillon]
    New page documenting the seccomp user-space notification mechanism

MAX.3
  Alejandro Colomar
    New page to document MAX() and MIN()

Newly documented interfaces in existing pages
----

seccomp.2
  Tycho Andersen [MichaelKerrisk]
    Document SECCOMP_GET_NOTIF_SIZES
  Tycho Andersen
    Document SECCOMP_FILTER_FLAG_NEW_LISTENER   [Michael Kerrisk]
  Tycho Andersen
    Document SECCOMP_RET_USER_NOTIF [Michael Kerrisk]

set_mempolicy.2
  Huang Ying [Alejandro Colomar, "Huang, Ying"]
    Add mode flag MPOL_F_NUMA_BALANCING

userfaultfd.2
  Peter Xu
 [Alejandro Colomar, Mike Rapoport]
    Add UFFD_FEATURE_THREAD_ID docs

Peter Xu [Alejandro Colomar, Mike Rapoport]
Add write-protect mode docs

proc.5
Michael Kerrisk
Document /proc/sys/vm/sysctl_hugetlb_shm_group

system_data_types.7
Alejandro Colomar
Add 'blksize_t'
Alejandro Colomar
Add 'blkcnt_t'
Alejandro Colomar
Add 'mode_t'
Alejandro Colomar
Add 'struct sockaddr'
Alejandro Colomar
Add 'cc_t'
Alejandro Colomar
Add 'socklen_t'

New and changed links
---

blkcnt_t.3
Alejandro Colomar
New link to system_data_types(7)

blksize_t.3
Alejandro Colomar
New link to system_data_types(7)

cc_t.3
Alejandro Colomar
New link to system_data_types(7)

MIN.3
Michael Kerrisk
New link to MIN.3

New link to system_data_types(7)

socklen_t.3
  Alejandro Colomar
    New link to system_data_types(7)

Global changes

Many pages
  Alejandro Colomar
    SYNOPSIS: Use syscall(SYS_...); for system calls without a wrapper

Many pages
  Alejandro Colomar
    SYNOPSIS: Document why each header is required

Many pages
  Alejandro Colomar
    SYNOPSIS: Remove unused includes

Various pages
  Alejandro Colomar
    Add note about the use of syscall(2)

Various pages
  Alejandro Colomar
    SYNOPSIS: Miscellaneous fixes to includes

A few pages
  Alejandro Colomar
    SYNOPSIS: Add missing 'const'

Changes to individual pages
---

dup.2
  Michael Kerrisk
    Rewrite the description of dup() somewhat
      As can be seen by any number of StackOverflow questions, people
      persistently misunderstand what dup() does, and the existing manual
      page text, which talks of "copying" a file descriptor doesn't help.
       Rewrite the text a little to try to prevent some of these
      misunderstandings, in particular noting at the start that dup()
      allocates a new file descriptor.
  Michael Kerrisk
    Clarify what silent closing means

Alejandro Colomar
SYNOPSIS: Use consistent comments through pages

epoll_wait.2
Alejandro Colomar
Move misplaced subsection to NOTES from BUGS

execveat.2
Michael Kerrisk
Library support has been added in glibc 2.34

_exit.2
Michael Kerrisk
Add a little more detail on the raw _exit() system cal

exit_group.2
Alejandro Colomar
Use 'noreturn' in prototypes

flock.2
Aurelien Aptel [Alejandro Colomar]
Add CIFS details
CIFS flock() locks behave differently than the standard.
Give an overview of those differences.

ioperm.2
Alejandro Colomar
Remove obvious comment

memfd_create.2
mmap.2
shmget.2
Michael Kerrisk [Yang Xu]

Document the EPERM error for huge page allocations
This error can occur if the caller is does not have CAP_IPC_LOCK
and is not a member of the sysctl_hugetlb_shm_group.

mmap.2
Bruce Merry
Clarify that MAP_POPULATE is best-effort

mount.2
Topi Miettinen
Document SELinux use of MS_NOSUID mount flag

open.2
Alejandro Colomar [Walter Harms]

Fix bug in linkat(2) call example
AT_EMPTY_PATH works with empty strings (""), but not with NULL
(or at least it's not obvious).
Michael Kerrisk
Make it clearer that an FD is an index into the process's FD table
Sometimes people are confused, thinking a file descriptor is just a
number....

perfmonctl.2
Michael Kerrisk
This system call was removed in Linux 5.10

pipe.2
Alejandro Colomar
SYNOPSIS: Fix incorrect prototype
Michael Kerrisk
Rearrange SYNOPSIS so that minority version pipe() is at end

ptrace.2
Dmitry V. Levin [Alejandro Colomar, Mathieu Desnoyers]
Mention PTRACE_GET_SYSCALL_INFO in RETURN VALUE section

seccomp.2
Michael Kerrisk
Reorder list of SECCOMP_SET_MODE_FILTER flags alphabetically
(No content changes.)
Michael Kerrisk
SEE ALSO: add seccomp_unotify(2)

select.2
Michael Kerrisk
Strengthen the warning regarding the low value of FD_SETSIZE
All modern code should avoid select(2) in favor of poll(2)
or epoll(7).
Michael Kerrisk
Relocate sentence about the fd_set value-result arguments to BUGS

syscalls.2
Michael Kerrisk
perfmonctl(2) was removed in Linux 5.10

bswap.3
Alejandro Colomar
bswap_*() are implemented using functions
Even though it's true that they are macros,
it's transparent to the user.

The user will see their results casted to unsigned types

after the conversion due to the underlying
functions,
so it's better to document these as the underlying functions,
specifying the types.

cmsg.3
unix.7
Michael Kerrisk
Refer to seccomp_unotify(2) for an example of SCM_RIGHTS usage

cpow.3
Alejandro Colomar
Use 'complex' after the type consistently

ctime.3
Michael Kerrisk [Katsuhiro Numata]
Restore documentation of 'tm_gmtoff' field

errno.3
Alejandro Colomar [Florian Weimer, Mark Kettenis]
Fix ENODATA text
ENODATA is an XSI STREAMS extension (not base POSIX).

exec.3
Josh Triplett [Alejandro Colomar]
Clarify that execvpe() uses PATH from the caller, not envp
Josh Triplett [Alejandro Colomar]
Fix description of 'e' variants
The envp argument specifies the environment of the new process
image, not "the environment of the caller".

fflush.3
Alejandro Colomar
SEE ALSO: Add fpurge(3)

getline.3
[Ahelenia Ziemiaska, Alejandro
Colomar]
!*lineptr is sufficient
No implementation or spec requires *n to be 0 to allocate
a new buffer.

getopt.3
James O. D. Hunt [Alejandro Colomar]
Clarify behaviour

printf.3
Utkarsh Singh [Alejandro Colomar]

Add overall structure of format string

pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
Alejandro Colomar
SYNOPSIS: Use 'restrict' in prototypes

pthread_mutexattr_setrobust.3
Michael Kerrisk
Note that the *_np() APIs are deprecated since glibc 2.34
Alejandro Colomar
SYNOPSIS: Remove incorrect 'const'

pthread_mutex_consistent.3
Michael Kerrisk
Note that pthread_mutexattr_setrobust() is now deprecated

pthread_yield.3
Michael Kerrisk
Note that this function is deprecated since glibc 2.34

rpc.3
Alejandro Colomar
SYNOPSIS: Fix prototypes (misc.)

scanf.3
Alyssa Ross [Alejandro Colomar]
Clarify that %n supports type modifiers

xdr.3
Alejandro Colomar
SYNOPSIS: Fix prototype types
Use the same types glibc uses, and add a missing 'const'.

capabilities.7
Michael Kerrisk
CAP_IPC_LOCK also governs memory allocation using huge pages

environ.7
Josh Triplett [Alejandro Colomar]
Remove obsolete admonishment of the GZIP environment variable

kernel_lockdown.7
dann frazier [Alejandro Colomar]
Remove description of lifting via SysRq (not upstream)
The patch that implemented lockdown lifting via SysRq ended up
getting dropped[*] before the feature was merged upstream. Having
the feature documented but unsupported has caused some confusion

for our users.

mount_namespaces.7
namespaces.7
Michael Kerrisk
Relocate reference to pam_namespace(8) from namespaces.7 to
mount_namespaces.7.

signal.7
Michael Kerrisk
Add reference to seccomp_unotify(2)
The seccomp user-space notification
feature can cause changes in
the semantics of SA_RESTART with respect to system calls that
would never normally be restarted. Point the reader to the page
that provide further details.

vsock.7
Alyssa Ross
ioctls are on /dev/vsock, not sockets

1.236.1 Available under license :

utf8proc license

utf8proc is a software package originally developed
by Jan Behrens and the rest of the Public Software Group, who
deserve nearly all of the credit for this library, that is now maintained by the Julia-language developers. Like the original utf8proc,
whose copyright and license statements are reproduced below, all new
work on the utf8proc library is licensed under the [MIT "expat"
license](http://opensource.org/licenses/MIT):

Copyright © 2014-2015 by Steven G. Johnson, Jiahao Chen, Tony Kelman, Jonas Fonseca, and other contributors listed in the git history.

Permission is hereby granted, free of charge, to any person obtaining a
copy of this software and associated documentation files (the "Software"),
to deal in the Software without restriction, including without limitation
the rights to use, copy, modify, merge, publish, distribute, sublicense,
and/or sell copies of the Software, and to permit persons to whom the
Software is furnished to do so, subject
 to the following conditions:

The above copyright notice and this permission notice shall be included in
all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of

this
License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute
copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

1.237.1 Available under license :

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which
contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies
of the Program's
source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the

notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole
or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered
independent and separate works in
themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it,
under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or
executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the
source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt

otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made

generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF

MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year  name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and
`show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

lxml is copyright Infrae and distributed under the BSD license (see
doc/licenses/BSD.txt), with the following exceptions:

Some code, such a selftest.py, selftest2.py and
src/lxml/_elementpath.py are derived from ElementTree and
cElementTree. See doc/licenses/elementtree.txt for the license text.

lxml.cssselect and lxml.html are copyright Ian Bicking and distributed
under the BSD license (see doc/licenses/BSD.txt).

test.py, the test-runner script, is GPL and copyright Shuttleworth
Foundation. See doc/licenses/GPL.txt. It is believed the unchanged
inclusion of test.py to run the unit test suite falls under the
"aggregation" clause of the GPL and thus does not affect the license
of the rest of the package.

The isoschematron implementation uses several XSL and RelaxNG resources:
* The (XML syntax) RelaxNG schema for schematron, copyright International
  Organization for Standardization (see
  src/lxml/isoschematron/resources/rng/iso-schematron.rng for the license
  text)
* The skeleton
 iso-schematron-xlt1 pure-xslt schematron implementation
  xsl stylesheets, copyright Rick Jelliffe and Academia Sinica Computing
  Center, Taiwan (see the xsl files here for the license text:
  src/lxml/isoschematron/resources/xsl/iso-schematron-xslt1/)
* The xsd/rng schema schematron extraction xsl transformations are unlicensed
  and copyright the respective authors as noted (see
  src/lxml/isoschematron/resources/xsl/RNG2Schtrn.xsl and
  src/lxml/isoschematron/resources/xsl/XSD2Schtrn.xsl)

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership

of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct,

indirect, special,
incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Metadata-Version: 1.2
Name: grpcio-tools
Version: 1.45.0
Summary: Protobuf code generator for gRPC
Home-page: https://grpc.io

Author: The gRPC Authors
Author-email: grpc-io@googlegroups.com
License: Apache License 2.0
Description: gRPC Python Tools
    ==========

    Package for gRPC Python tools.

    Supported Python Versions

    Python >= 3.6

    Installation

    The gRPC Python tools package is available for Linux, Mac OS X, and Windows.

    Installing From PyPI
    ~~~~~~~~~~~~~~~~~~~~

    If you are installing locally...

    ::

      $ pip install grpcio-tools

    Else system wide (on Ubuntu)...

    ::

      $ sudo pip install grpcio-tools

    If you're on Windows make sure that you installed
 the :code:`pip.exe` component
    when you installed Python (if not go back and install it!) then invoke:

    ::

      $ pip.exe install grpcio-tools

    Windows users may need to invoke :code:`pip.exe` from a command line ran as
    administrator.

    n.b. On Windows and on Mac OS X one *must* have a recent release of :code:`pip`
    to retrieve the proper wheel from PyPI. Be sure to upgrade to the latest
    version!

    You might also need to install Cython to handle installation via the source
    ~~~~~~~~~~~~~~~~~~~~

distribution if gRPC Python's system coverage with wheels does not happen to
include your system.

Installing From Source
~~~~~~~~~~~~~~~~~~~~~~

Building from source requires that you have the Python headers (usually a
package named :code:`python-dev`) and Cython installed. It further requires a
GCC-like compiler to go smoothly; you can
probably get it to work without
GCC-like stuff, but you may end up having a bad time.

::

```
$ export REPO_ROOT=grpc  # REPO_ROOT can be any directory of your choice
$ git clone -b RELEASE_TAG_HERE https://github.com/grpc/grpc $REPO_ROOT
$ cd $REPO_ROOT
$ git submodule update --init

$ cd tools/distrib/python/grpcio_tools
$ python ../make_grpcio_tools.py

# For the next command do `sudo pip install` if you get permission-denied errors
$ GRPC_PYTHON_BUILD_WITH_CYTHON=1 pip install .
```

You cannot currently install Python from source on Windows. Things might work
out for you in MSYS2 (follow the Linux instructions), but it isn't officially
supported at the moment.

Troubleshooting
~~~~~~~~~~~~~~~

Help, I ...

* **... see a** :code:`pkg_resources.VersionConflict` **when I try
to install
grpc**

This is likely because :code:`pip` doesn't own the offending dependency,
which in turn is likely because your operating system's package manager owns
it. You'll need to force the installation of the dependency:

:code:`pip install --ignore-installed $OFFENDING_DEPENDENCY`

For example, if you get an error like the following:

::

Traceback (most recent call last):
File "<string>", line 17, in <module>
...
File "/usr/lib/python2.7/dist-packages/pkg_resources.py", line 509, in find
raise VersionConflict(dist, req)
pkg_resources.VersionConflict: (six 1.8.0 (/usr/lib/python2.7/dist-packages), Requirement.parse('six>=1.10'))

You can fix it by doing:

::

sudo pip install --ignore-installed six

* **... see compiler errors
on some platforms when either installing from source or from the source distribution**

If you see

::

/tmp/pip-build-U8pSsr/cython/Cython/Plex/Scanners.c:4:20: fatal error: Python.h: No such file or directory
#include "Python.h"
^
compilation terminated.

You can fix it by installing `python-dev` package. i.e

::

sudo apt-get install python-dev

If you see something similar to:

::

third_party/protobuf/src/google/protobuf/stubs/mathlimits.h:173:31: note: in expansion of macro 'SIGNED_INT_MAX'
static const Type kPosMax = SIGNED_INT_MAX(Type); \\
^

And your toolchain is GCC (at the time of this writing, up through at least
GCC 6.0), this is probably a bug where GCC chokes on constant expressions
when the :code:`-fwrapv` flag is specified. You should consider setting your
environment with :code:`CFLAGS=-fno-wrapv` or using clang (:code:`CC=clang`).

Usage

Given protobuf include directories :code:`$INCLUDE`, an output directory
:code:`$OUTPUT`, and proto files :code:`$PROTO_FILES`, invoke as:

::

```
  $ python -m grpc_tools.protoc -I$INCLUDE --python_out=$OUTPUT --grpc_python_out=$OUTPUT
$PROTO_FILES
```

To use as a build step in distutils-based projects, you may use the provided
command class in your :code:`setup.py`:

::

```
  setuptools.setup(
    # ...
    cmdclass={
      'build_proto_modules': grpc_tools.command.BuildPackageProtos,
    }
    # ...
  )
```

Invocation of the command will walk the project tree and transpile every
:code:`.proto`
file into a :code:`_pb2.py` file in the same directory.

Note that this particular approach requires :code:`grpcio-tools` to be
installed on the machine before the setup script is invoked (i.e. no
combination of :code:`setup_requires` or :code:`install_requires` will provide
access to :code:`grpc_tools.command.BuildPackageProtos` if it isn't already
installed). One way to work around this can be found in our
:code:`grpcio-health-checking`
`package <https://pypi.python.org/pypi/grpcio-health-checking>`_:

::

```
  class BuildPackageProtos(setuptools.Command):
    """Command to generate project *_pb2.py modules from proto files."""
    # ...
    def run(self):
      from grpc_tools import command
      command.build_package_protos(self.distribution.package_dir[''])
```

Now including :code:`grpcio-tools` in :code:`setup_requires` will provide the
command on-setup as desired.

For more information on command classes, consult :code:`distutils` and
:code:`setuptools` documentation.

1.240.1 Available under license :

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for

them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1)
assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your

rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code;
keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the

Corresponding Source fixed on a durable physical medium
customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product
(including a physical distribution medium), accompanied by a
written offer, valid for at least three years
and valid for as
long as you offer spare parts or customer support for that product
model, to give anyone who possesses the object code either (1) a
copy of the Corresponding Source for all the software in the
product that is covered by this License, on a durable physical
medium customarily used for software interchange, for a price no
more than your reasonable cost of physically performing this
conveying of source, or (2) access to copy the
Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the
written offer to provide the Corresponding Source. This
alternative is allowed only occasionally and noncommercially, and
only if you received the object code with such an offer, in accord
with subsection 6b.

d) Convey the object code by offering access from a designated
place (gratis or for a charge), and offer equivalent access to the
Corresponding Source in
the same way through the same place at no
further charge. You need not require recipients to copy the
Corresponding Source along with the object code. If the place to
copy the object code is a network server, the Corresponding Source
may be on a different server (operated by you or a third party)
that supports equivalent copying facilities, provided you maintain
clear directions next to the object code saying where to find the
Corresponding Source. Regardless of what server hosts the
Corresponding Source, you remain obligated to ensure that it is
available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided
you inform other peers where the object code and Corresponding
Source of the work are being offered to the general public at no
charge under subsection 6d.

A separable portion of the object code, whose source code is excluded
from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any
tangible personal property which is normally used for personal, family,

or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you

received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor

version. For
purposes of this definition, "control" includes the right to grant
patent sublicenses in a manner consistent with the requirements of
this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free
patent license under the contributor's essential patent claims, to
make, use, sell, offer for sale, import and otherwise run, modify and
propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express
agreement or commitment, however denominated, not to enforce a patent
(such as an express permission to practice a patent or covenant not to
sue for patent infringement). To "grant" such a patent license to a
party means to make such an agreement or commitment not to enforce a
patent against the party.

If you convey a covered work, knowingly relying on a patent license,
and the Corresponding Source of the work is not available for anyone
to copy, free of charge and under the terms of this
License, through a
publicly available network server or other readily accessible means,
then you must either (1) cause the Corresponding Source to be so
available, or (2) arrange to deprive yourself of the benefit of the
patent license for this particular work, or (3) arrange, in a manner
consistent with the requirements of this License, to extend the patent
license to downstream recipients. "Knowingly relying" means you have
actual knowledge that, but for the patent license, your conveying the
covered work in a country, or your recipient's use of the covered work
in a country, would infringe one or more identifiable patents in that
country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or
arrangement, you convey, or propagate by procuring conveyance of, a
covered work, and grant a patent license to some of the parties
receiving the covered work authorizing them to use, propagate, modify
or convey a specific copy of the covered
work, then the patent license
you grant is automatically extended to all recipients of the covered
work and works based on it.

A patent license is "discriminatory" if it does not include within
the scope of its coverage, prohibits the exercise of, or is
conditioned on the non-exercise of one or more of the rights that are
specifically granted under this License. You may not convey a covered
work if you are a party to an arrangement with a third party that is
in the business of distributing software, under which you make payment
to the third party based on the extent of your activity of conveying

the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or
that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you

have the
option of following the terms and conditions either of that numbered
version or of any later version published by the Free Software
Foundation. If the Program does not specify a version number of the
GNU General Public License, you may choose any version ever published
by the Free Software Foundation.

If the Program specifies that a proxy can decide which future
versions of the GNU General Public License can be used, that proxy's
public statement of acceptance of a version permanently authorizes you
to choose that version for the Program.

Later license versions may give you additional or different
permissions. However, no additional obligations are imposed on any
author or copyright holder as a result of your choosing to follow a
later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY
APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT
HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS"
WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO,
THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM
IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF
ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS
THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY
GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE
USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF
DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD
PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF
SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided
above cannot be given local legal effect according to their terms,
reviewing courts shall apply local law that most closely approximates
an absolute waiver of all civil liability in connection with the

Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,

if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want
to do, use the GNU Lesser General
Public License instead of this License. But first, please read
<https://www.gnu.org/licenses/why-not-lgpl.html>.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
them if you wish), that you receive source code or can get it if you
want it, that you can change the software or use pieces of it in new
free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you
these rights or asking you to surrender the rights. Therefore, you have
certain responsibilities if you distribute copies of the software, or if
you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must pass on to the recipients the same
freedoms that you received. You must make sure that they, too, receive

or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees"

and
"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is
not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The
"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that

Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of

your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section

7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical

medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option

remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating

where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For
purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting

any implied license or other defenses to infringement that may
otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or
otherwise) that contradict the conditions of this License, they do not
excuse you from the conditions of this License. If you cannot convey a
covered work so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you may
not convey it at all. For example, if you agree to terms that obligate you
to collect a royalty for further conveying from those to whom you convey
the Program, the only way you could satisfy both those terms and this
License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have
permission to link or combine any covered work with a work licensed
under version 3 of the GNU Affero General Public License into a single
combined work, and to convey the resulting work. The terms of this
License will continue to apply to the part which is the covered work,
but the special requirements of the GNU Affero General Public License,
section 13, concerning interaction through a network will apply to the
combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of
the GNU General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing version number. If the
Program specifies that a certain numbered version of the GNU General
Public License "or any later version" applies to it, you
have the
option of following the terms and conditions either of that numbered
version or of any later version published by the Free Software
Foundation. If the Program does not specify a version number of the
GNU General Public License, you may choose any version ever published
by the Free Software Foundation.

If the Program specifies that a proxy can decide which future
versions of the GNU General Public License can be used, that proxy's
public statement of acceptance of a version permanently authorizes you
to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest

to attach them to the start of each source file to most effectively
state the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where
the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation, either version 3 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

PREAMBLE

The purpose of this License is to make a manual, textbook, or other
functional and useful document @dfn{free} in the sense of freedom: to
assure everyone the effective freedom to copy and redistribute it,
with or without modifying it, either commercially or noncommercially.
Secondarily, this License preserves for the author and publisher a way
to get credit for their work, while not being considered responsible
for modifications made by others.

This License is a kind of ``copyleft'', which means that derivative
works of the document
 must themselves be free in the same sense. It
complements the GNU General Public License, which is a copyleft
license designed for free software.

We have designed this License in order to use it for manuals for free
software, because free software needs free documentation: a free
program should come with manuals providing the same freedoms that the
software does. But this License is not limited to software manuals;
it can be used for any textual work, regardless of subject matter or
whether it is published as a printed book. We recommend this License
principally for works whose purpose is instruction or reference.

@item
APPLICABILITY AND DEFINITIONS

This License applies to any manual or other work, in any medium, that
contains a notice placed by the copyright holder saying it can be
distributed under the terms of this License. Such a notice grants a
world-wide, royalty-free license, unlimited in duration, to use that
work under the conditions stated herein. The ``Document'', below,

refers
to any such manual or work. Any member of the public is a
licensee, and is addressed as ``you''. You accept the license if you
copy, modify or distribute the work in a way requiring permission
under copyright law.

A ``Modified Version'' of the Document means any work containing the
Document or a portion of it, either copied verbatim, or with
modifications and/or translated into another language.

A ``Secondary Section'' is a named appendix or a front-matter section
of the Document that deals exclusively with the relationship of the
publishers or authors of the Document to the Document's overall
subject (or to related matters) and contains nothing that could fall
directly within that overall subject. (Thus, if the Document is in
part a textbook of mathematics, a Secondary Section may not explain
any mathematics.) The relationship could be a matter of historical
connection with the subject or with related matters, or of legal,
commercial, philosophical, ethical or political
position regarding
them.

The ``Invariant Sections'' are certain Secondary Sections whose titles
are designated, as being those of Invariant Sections, in the notice
that says that the Document is released under this License. If a
section does not fit the above definition of Secondary then it is not
allowed to be designated as Invariant. The Document may contain zero
Invariant Sections. If the Document does not identify any Invariant
Sections then there are none.

The ``Cover Texts'' are certain short passages of text that are listed,
as Front-Cover Texts or Back-Cover Texts, in the notice that says that
the Document is released under this License. A Front-Cover Text may
be at most 5 words, and a Back-Cover Text may be at most 25 words.

A ``Transparent'' copy of the Document means a machine-readable copy,
represented in a format whose specification is available to the
general public, that is suitable for revising the document
straightforwardly with generic text editors or (for
images composed of
pixels) generic paint programs or (for drawings) some widely available
drawing editor, and that is suitable for input to text formatters or
for automatic translation to a variety of formats suitable for input
to text formatters. A copy made in an otherwise Transparent file
format whose markup, or absence of markup, has been arranged to thwart
or discourage subsequent modification by readers is not Transparent.
An image format is not Transparent if used for any substantial amount
of text. A copy that is not ``Transparent'' is called ``Opaque''.

Examples of suitable formats for Transparent copies include plain
ASCII without markup, Texinfo input format, La@TeX{} input
format, SGML or XML using a publicly available
DTD, and standard-conforming simple HTML,
PostScript or PDF designed for human modification. Examples
of transparent image formats include PNG, XCF and
JPG@. Opaque formats include proprietary formats that can be
read and edited only by proprietary word
 processors, SGML or
XML for which the DTD and/or processing tools are
not generally available, and the machine-generated HTML,
PostScript or PDF produced by some word processors for
output purposes only.

The ``Title Page'' means, for a printed book, the title page itself,
plus such following pages as are needed to hold, legibly, the material
this License requires to appear in the title page. For works in
formats which do not have any title page as such, ``Title Page'' means
the text near the most prominent appearance of the work's title,
preceding the beginning of the body of the text.

The ``publisher'' means any person or entity that distributes copies
of the Document to the public.

A section ``Entitled XYZ'' means a named subunit of the Document whose
title either is precisely XYZ or contains XYZ in parentheses following
text that translates XYZ in another language. (Here XYZ stands for a
specific section name mentioned below, such as ``Acknowledgements'',
``Dedications'', ``Endorsements'',
 or ``History''.)  To ``Preserve the Title''
of such a section when you modify the Document means that it remains a
section ``Entitled XYZ'' according to this definition.

The Document may include Warranty Disclaimers next to the notice which
states that this License applies to the Document. These Warranty
Disclaimers are considered to be included by reference in this
License, but only as regards disclaiming warranties: any other
implication that these Warranty Disclaimers may have is void and has
no effect on the meaning of this License.

@item
VERBATIM COPYING

You may copy and distribute the Document in any medium, either
commercially or noncommercially, provided that this License, the
copyright notices, and the license notice saying this License applies
to the Document are reproduced in all copies, and that you add no other

conditions whatsoever to those of this License. You may not use technical measures to obstruct or control the reading or further copying of the copies you make or distribute. However, you may accept compensation in exchange for copies. If you distribute a large enough number of copies you must also follow the conditions in section 3.

You may also lend copies, under the same conditions stated above, and you may publicly display copies.

@item
COPYING IN QUANTITY

If you publish printed copies (or copies in media that commonly have printed covers) of the Document, numbering more than 100, and the Document's license notice requires Cover Texts, you must enclose the copies in covers that carry, clearly and legibly, all these Cover Texts: Front-Cover Texts on the front cover, and Back-Cover Texts on the back cover. Both covers must also clearly and legibly identify you as the publisher of these copies. The front cover must present the full title with all words of the title equally prominent and visible. You may add other material on the covers in addition. Copying with changes limited to the covers, as long as they preserve the title of the Document and satisfy these conditions, can be treated as verbatim copying in other respects.

If the required texts for either cover are too voluminous to fit legibly, you should put the first ones listed (as many as fit reasonably) on the actual cover, and continue the rest onto adjacent pages.

If you publish or distribute Opaque copies of the Document numbering more than 100, you must either include a machine-readable Transparent copy along with each Opaque copy, or state in or with each Opaque copy a computer-network location from which the general network-using public has access to download using public-standard network protocols a complete Transparent copy of the Document, free of added material. If you use the latter option, you must take reasonably prudent steps, when you begin distribution of Opaque copies in quantity, to ensure that this Transparent copy will remain thus accessible at the stated location until at least one year after the last time you distribute an Opaque copy (directly or through your agents or retailers) of that edition to the public.

It is requested, but not required, that you contact the authors of the Document well before redistributing any large number of copies, to give

them a chance to provide you with an updated version of the Document.

@item
MODIFICATIONS

You may copy and distribute a Modified Version of the Document under
the conditions of sections 2 and 3 above, provided that you release
the Modified Version under precisely this License, with the Modified
Version filling the role of the Document, thus licensing distribution
and modification of the Modified Version to whoever possesses a copy
of it. In addition, you must do these things in the Modified Version:

@enumerate A
@item
Use in the Title Page (and on the covers, if any) a title distinct
from that of the Document, and from those of previous versions
(which should, if there were any, be listed in the History section
of the Document). You may use the same
 title as a previous version
if the original publisher of that version gives permission.

@item
List on the Title Page, as authors, one or more persons or entities
responsible for authorship of the modifications in the Modified
Version, together with at least five of the principal authors of the
Document (all of its principal authors, if it has fewer than five),
unless they release you from this requirement.

@item
State on the Title page the name of the publisher of the
Modified Version, as the publisher.

@item
Preserve all the copyright notices of the Document.

@item
Add an appropriate copyright notice for your modifications
adjacent to the other copyright notices.

@item
Include, immediately after the copyright notices, a license notice
giving the public permission to use the Modified Version under the
terms of this License, in the form shown in the Addendum below.

@item
Preserve in that license notice the full lists of Invariant Sections
and required Cover Texts given in the

Document's license notice.

@item
Include an unaltered copy of this License.

@item
Preserve the section Entitled ``History'', Preserve its Title, and add
to it an item stating at least the title, year, new authors, and
publisher of the Modified Version as given on the Title Page. If
there is no section Entitled ``History'' in the Document, create one
stating the title, year, authors, and publisher of the Document as
given on its Title Page, then add an item describing the Modified
Version as stated in the previous sentence.

@item
Preserve the network location, if any, given in the Document for
public access to a Transparent copy of the Document, and likewise
the network locations given in the Document for previous versions
it was based on. These may be placed in the ``History'' section.
You may omit a network location for a work that was published at
least four years before the Document itself, or if the original
publisher of the version it refers to gives permission.

@item
For any
section Entitled ``Acknowledgements'' or ``Dedications'', Preserve
the Title of the section, and preserve in the section all the
substance and tone of each of the contributor acknowledgements and/or
dedications given therein.

@item
Preserve all the Invariant Sections of the Document,
unaltered in their text and in their titles. Section numbers
or the equivalent are not considered part of the section titles.

@item
Delete any section Entitled ``Endorsements''. Such a section
may not be included in the Modified Version.

@item
Do not retitle any existing section to be Entitled ``Endorsements'' or
to conflict in title with any Invariant Section.

@item
Preserve any Warranty Disclaimers.
@end enumerate

If the Modified Version includes new front-matter sections or

appendices that qualify as Secondary Sections and contain no material
copied from the Document, you may at your option designate some or all
of these sections as invariant. To do this, add their titles to the
list of Invariant
 Sections in the Modified Version's license notice.
These titles must be distinct from any other section titles.

You may add a section Entitled ``Endorsements", provided it contains
nothing but endorsements of your Modified Version by various
parties---for example, statements of peer review or that the text has
been approved by an organization as the authoritative definition of a
standard.

You may add a passage of up to five words as a Front-Cover Text, and a
passage of up to 25 words as a Back-Cover Text, to the end of the list
of Cover Texts in the Modified Version. Only one passage of
Front-Cover Text and one of Back-Cover Text may be added by (or
through arrangements made by) any one entity. If the Document already
includes a cover text for the same cover, previously added by you or
by arrangement made by the same entity you are acting on behalf of,
you may not add another; but you may replace the old one, on explicit
permission from the previous publisher that added the old
 one.

The author(s) and publisher(s) of the Document do not by this License
give permission to use their names for publicity for or to assert or
imply endorsement of any Modified Version.

@item
COMBINING DOCUMENTS

You may combine the Document with other documents released under this
License, under the terms defined in section 4 above for modified
versions, provided that you include in the combination all of the
Invariant Sections of all of the original documents, unmodified, and
list them all as Invariant Sections of your combined work in its
license notice, and that you preserve all their Warranty Disclaimers.

The combined work need only contain one copy of this License, and
multiple identical Invariant Sections may be replaced with a single
copy. If there are multiple Invariant Sections with the same name but
different contents, make the title of each such section unique by
adding at the end of it, in parentheses, the name of the original
author or publisher of that section if
 known, or else a unique number.
Make the same adjustment to the section titles in the list of
Invariant Sections in the license notice of the combined work.

In the combination, you must combine any sections Entitled ``History''
in the various original documents, forming one section Entitled
``History''; likewise combine any sections Entitled ``Acknowledgements'',
and any sections Entitled ``Dedications''. You must delete all
sections Entitled ``Endorsements.''

@item
COLLECTIONS OF DOCUMENTS

You may make a collection consisting of the Document and other documents
released under this License, and replace the individual copies of this
License in the various documents with a single copy that is included in
the collection, provided that you follow the rules of this License for
verbatim copying of each of the documents in all other respects.

You may extract a single document from such a collection, and distribute
it individually under this License, provided you insert a copy of this
License
 into the extracted document, and follow this License in all
other respects regarding verbatim copying of that document.

@item
AGGREGATION WITH INDEPENDENT WORKS

A compilation of the Document or its derivatives with other separate
and independent documents or works, in or on a volume of a storage or
distribution medium, is called an ``aggregate'' if the copyright
resulting from the compilation is not used to limit the legal rights
of the compilation's users beyond what the individual works permit.
When the Document is included in an aggregate, this License does not
apply to the other works in the aggregate which are not themselves
derivative works of the Document.

If the Cover Text requirement of section 3 is applicable to these
copies of the Document, then if the Document is less than one half of
the entire aggregate, the Document's Cover Texts may be placed on
covers that bracket the Document within the aggregate, or the
electronic equivalent of covers if the Document is in electronic
 form.
Otherwise they must appear on printed covers that bracket the whole
aggregate.

@item
TRANSLATION

Translation is considered a kind of modification, so you may
distribute translations of the Document under the terms of section 4.
Replacing Invariant Sections with translations requires special

permission from their copyright holders, but you may include translations of some or all Invariant Sections in addition to the original versions of these Invariant Sections. You may include a translation of this License, and all the license notices in the Document, and any Warranty Disclaimers, provided that you also include the original English version of this License and the original versions of those notices and disclaimers. In case of a disagreement between the translation and the original version of this License or a notice or disclaimer, the original version will prevail.

If a section in the Document is Entitled ``Acknowledgements'', ``Dedications'', or ``History'', the requirement (section 4) to Preserve its Title (section 1) will typically require changing the actual title.

@item
TERMINATION

You may not copy, modify, sublicense, or distribute the Document except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, or distribute it is void, and will automatically terminate your rights under this License.

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, receipt of a copy of some or all of the same material does not give you any rights to use it.

@item
FUTURE REVISIONS OF THIS LICENSE

The Free Software Foundation may publish new, revised versions
of the GNU Free Documentation License from time to time. Such new
versions will be similar in spirit to the present version, but may
differ in detail to address new problems or concerns. See
@uref{http://www.gnu.org/copyleft/}.

Each version of the License is given a distinguishing version number.
If the Document specifies that a particular numbered version of this
License ``or any later version'' applies to it, you have the option of
following the terms and
 conditions either of that specified version or
of any later version that has been published (not as a draft) by the
Free Software Foundation. If the Document does not specify a version
number of this License, you may choose any version ever published (not
as a draft) by the Free Software Foundation. If the Document
specifies that a proxy can decide which future versions of this
License can be used, that proxy's public statement of acceptance of a
version permanently authorizes you to choose that version for the
Document.

@item
RELICENSING

``Massive Multiauthor Collaboration Site'' (or ``MMC Site'') means any
World Wide Web server that publishes copyrightable works and also
provides prominent facilities for anybody to edit those works. A
public wiki that anybody can edit is an example of such a server. A
``Massive Multiauthor Collaboration'' (or ``MMC'') contained in the
site means any set of copyrightable works thus published on the MMC
site.

``CC-BY-SA'' means the Creative Commons
 Attribution-Share Alike 3.0
license published by Creative Commons Corporation, a not-for-profit
corporation with a principal place of business in San Francisco,
California, as well as future copyleft versions of that license
published by that same organization.

``Incorporate'' means to publish or republish a Document, in whole or
in part, as part of another Document.

An MMC is ``eligible for relicensing'' if it is licensed under this
License, and if all works that were first published under this License
somewhere other than this MMC, and subsequently incorporated in whole
or in part into the MMC, (1) had no cover texts or invariant sections,
and (2) were thus incorporated prior to November 1, 2008.

The operator of an MMC Site may republish an MMC contained in the site

under CC-BY-SA on the same site at any time before August 1, 2009,
provided the MMC is eligible for relicensing.

@end enumerate

@page
@heading ADDENDUM: How to use this License for your documents

To use this License
 in a document you have written, include a copy of
the License in the document and put the following copyright and
license notices just after the title page:

@smallexample
@group
 Copyright (C) @var{year} @var{your name}.
 Permission is granted to copy, distribute and/or modify this document
 under the terms of the GNU Free Documentation License, Version 1.3
 or any later version published by the Free Software Foundation;
 with no Invariant Sections, no Front-Cover Texts, and no Back-Cover
 Texts. A copy of the license is included in the section entitled ``GNU
 Free Documentation License".
@end group
@end smallexample

If you have Invariant Sections, Front-Cover Texts and Back-Cover Texts,
replace the ``with@dots{}Texts."@: line with this:

@smallexample
@group
   with the Invariant Sections being @var{list their titles}, with
   the Front-Cover Texts being @var{list}, and with the Back-Cover Texts
   being @var{list}.
@end group
@end smallexample

If you have Invariant
 Sections without Cover Texts, or some other
combination of the three, merge those two alternatives to suit the
situation.

If your document contains nontrivial examples of program code, we
recommend releasing these examples in parallel under your choice of
free software license, such as the GNU General Public License,
to permit their use in free software.

Medusa, the asynchronous communications framework upon which
supervisor's server and client code is based, was created by Sam
Rushing:

Medusa was once distributed under a 'free for non-commercial use'
license, but in May of 2000 Sam Rushing changed the license to be
identical to the standard Python license at the time. The standard
Python license has always applied to the core components of Medusa,
this
change just frees up the rest of the system, including the http
server, ftp server, utilities, etc. Medusa is therefore under the
following license:

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

   "License" shall mean the terms and conditions for use, reproduction,
   and distribution as defined by Sections 1 through 9 of this document.

   "Licensor" shall mean the copyright owner or entity authorized by
   the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the
editorial
revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its

distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

GNU LIBRARY GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the library GPL. It is
numbered 2 because it goes with version 2 of the ordinary GPL.]

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public Licenses are intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users.

This license, the Library General Public License, applies to some

specially designated Free Software Foundation software, and to any other libraries whose authors decide to use it. You can use it for your libraries, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the library, or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link a program with the library, you must provide complete object files to the recipients so that they can relink them with the library, after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

Our method of protecting your rights has two steps: (1) copyright the library, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the library.

Also, for each distributor's protection, we want to make certain that everyone understands that there is no warranty for this free library. If the library is modified by someone else and passed on, we want its recipients to know that what they have is not the original version, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that companies distributing free software will individually obtain patent licenses, thus in effect transforming the program into proprietary software. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License, which was designed for utility programs. This license, the GNU Library General Public License, applies to certain

designated libraries. This license is quite different from the ordinary one; be sure to read it in full, and don't assume that anything in it is the same as in the ordinary license.

The reason we have a separate public license for some libraries is that they blur the distinction we usually make between modifying or adding to a program and simply using it. Linking a program with a library, without changing the library, is in some sense simply using the library, and is analogous to running a utility program or application program. However, in a textual and legal sense, the linked executable is a combined work, a derivative of the original library, and the ordinary
General Public License
treats it as such.

Because of this blurred distinction, using the ordinary General Public License for libraries did not effectively promote software sharing, because most developers did not use the libraries. We concluded that weaker conditions might promote sharing better.

However, unrestricted linking of non-free programs would deprive the users of those programs of all benefit from the free status of the libraries themselves. This Library General Public License is intended to permit developers of non-free programs to use free libraries, while preserving your freedom as a user of such programs to change the free libraries that are incorporated in them. (We have not seen how to achieve this as regards changes in header files, but we have achieved it as regards changes in the actual functions of the Library.) The hope is that this will lead to faster development of free libraries.

The precise terms and conditions for copying, distribution and modification
follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, while the latter only works together with the library.

Note that it is possible for a library to be covered by the ordinary General Public License rather than by this special one.

GNU LIBRARY GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Library General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below,
refers to any such software library or work
which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if
its contents constitute a work based
on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you
also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices
stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no
charge to all third parties under the terms of this License.

d) If a facility in the modified Library refers to a function or a
table of data to be supplied by an application program that uses
the facility, other than as an argument passed when the facility
is invoked, then you must make a good faith effort to ensure that,
in the event an application does not supply such function or
table, the facility still operates, and performs whatever part of
its purpose remains meaningful.

(For example, a function in a library to compute square roots has
a purpose that is entirely well-defined independent of the
application. Therefore, Subsection 2d requires
that any
application-supplied function or table used by this function must
be optional: if the application does not supply it, the square
root function must still compute square roots.)

These requirements apply to the modified work as a whole. If
identifiable sections of that work are not derived from the Library,
and can be reasonably considered independent and separate works in
themselves, then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based
on the Library, the distribution of the whole must be on the terms of
this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote
it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution
of derivative or
collective works based on the Library.

In addition, mere aggregation of another work not based on the Library
with the Library (or with a work based on the Library) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public
License instead of this License to a given copy of the Library. To do
this, you must alter all the notices that refer to this License, so
that they refer to the ordinary GNU General Public License, version 2,

instead of to this License. (If a newer version than version 2 of the ordinary GNU General Public License has appeared, then you can specify that version instead if you wish.) Do not make any other change in these notices.

Once this change is made in a given copy, it is irreversible for that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this License. Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small

inline
functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may distribute the object code for the work under the terms of Section 6. Any executables containing that work also fall under Section 6, whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also compile or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library
and its use are covered by
this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable source code for the Library including whatever changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

c) If distribution of the work is made by offering access to copy from a designated place, offer equivalent access to copy the above specified materials from the same place.

d) Verify that the user has already received a copy of these
materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the
Library" must include any data and utility programs needed for
reproducing the executable from it. However, as a special exception,
the source code distributed need not include anything that is normally
distributed (in either source or binary form) with the major
components (compiler, kernel, and so on) of the operating system on
which the executable
runs, unless that component itself accompanies
the executable.

It may happen that this requirement contradicts the license
restrictions of other proprietary libraries that do not normally
accompany the operating system. Such a contradiction means you cannot
use both them and the Library together in an executable that you
distribute.

7. You may place library facilities that are a work based on the
Library side-by-side in a single library together with other library
facilities not covered by this License, and distribute such a combined
library, provided that the separate distribution of the work based on
the Library and of the other library facilities is otherwise
permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work
based on the Library, uncombined with any other library
facilities. This must be distributed under the terms of the
Sections above.

b) Give prominent notice with the combined
library of the fact
that part of it is a work based on the Library, and explaining
where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute
the Library except as expressly provided under this License. Any
attempt otherwise to copy, modify, sublicense, link with, or
distribute the Library is void, and will automatically terminate your
rights under this License. However, parties who have received copies,
or rights, from you under this License will not have their licenses
terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not
signed it. However, nothing else grants you permission to modify or
distribute the Library or its derivative works. These actions are
prohibited by law if you do not accept this License. Therefore, by

modifying or distributing the Library (or any work based on the Library), you indicate your acceptance
of this License to do so, and
all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other
pertinent obligations, then as a consequence you
may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through
that system in reliance on consistent application of that
system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in

certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Library General Public License from time to time. Such new versions will be similar in spirit to the present version, but
may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software
generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE

LIBRARY
(INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Library General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Library General Public License for more details.

You should have received a copy of the GNU Library General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the

library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
675 Mass Ave, Cambridge, MA 02139, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work
which contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not

covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those

sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component

itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy
the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6.
Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free
redistribution of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through
any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number
of this License which applies to it and "any
later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals

of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE
LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE
PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING,
REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING
OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED
TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY
YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER
PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

License: SMAIL-GPL
                SMAIL GENERAL PUBLIC LICENSE
                 (Clarified 11 Feb 1988)
.
Everyone is permitted to copy and distribute verbatim copies
of this license, but changing it is not allowed. You can also
use this wording to make the terms for other programs.
.
  The license agreements of most software companies keep you at the
mercy of those companies. By

contrast, our general public license is
intended to give everyone the right to share SMAIL. To make sure that you get the rights we want you to have, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. Hence this license agreement.

.

Specifically, we want to make sure that you have the right to give away copies of SMAIL, that you receive source code or else can get it if you want it, that you can change SMAIL or use pieces of it in new free programs, and that you know you can do these things.

.

To make sure that everyone has such rights, we have to forbid you to deprive anyone else of these rights. For example, if you distribute copies of SMAIL, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights.

.

Also, for our own protection, we must make certain that everyone finds out that there is
no warranty for SMAIL. If SMAIL is modified by someone else and passed on, we want its recipients to know that what they have is not what we distributed, so that any problems introduced by others will not reflect on our reputation.

.

Therefore we (Landon Curt Noll and Ronald S. Karr) make the following terms which say what you must do to be allowed to distribute or change SMAIL.

.

.

COPYING POLICIES

.

1. You may copy and distribute verbatim copies of SMAIL source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy a valid copyright notice "Copyright (C) 1988 Landon Curt Noll & Ronald S. Karr" (or with whatever year is appropriate); keep intact the notices on all files that refer to this License Agreement and to the absence of any warranty; and give any other recipients of the SMAIL program a copy of this License Agreement along with the program. You may charge a distribution fee for the physical act of transferring a copy.

.

2. You may modify your copy or copies of SMAIL or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

.

a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

.

b) cause the whole of any work that you distribute or publish,
that in whole or in part contains or is a derivative of SMAIL or
any part thereof, to be licensed at no charge to all third
parties on terms identical to those contained in this License
Agreement (except that you may choose to grant more extensive
warranty protection to some or all third parties, at your option).

.

c) You may charge a distribution fee for the physical act of
transferring a copy, and you may at your option offer warranty
protection in exchange for a fee.

.

Mere aggregation of another unrelated program
with this program (or its
derivative) on a volume of a storage or distribution medium does not bring
the other program under the scope of these terms.

.

3. You may copy and distribute SMAIL (or a portion or derivative of it,
under Paragraph 2) in object code or executable form under the terms of
Paragraphs 1 and 2 above provided that you also do one of the following:

.

a) accompany it with the complete corresponding machine-readable
source code, which must be distributed under the terms of
Paragraphs 1 and 2 above; or,

.

b) accompany it with a written offer, valid for at least three
years, to give any third party free (except for a nominal
shipping charge) a complete machine-readable copy of the
corresponding source code, to be distributed under the terms of
Paragraphs 1 and 2 above; or,

.

c) accompany it with the information you received as to where the
corresponding source code may be obtained. (This alternative is
allowed
only for non-commercial distribution and only if you
received the program in object code or executable form alone.)

.

For an executable file, complete source code means all the source code for
all modules it contains; but, as a special exception, it need not include
source code for modules which are standard libraries that accompany the
operating system on which the executable file runs.

.

4. You may not copy, sublicense, distribute or transfer SMAIL
except as expressly provided under this License Agreement. Any attempt
otherwise to copy, sublicense, distribute or transfer SMAIL is void and
your rights to use the program under this License agreement shall be
automatically terminated. However, parties who have received computer
software programs from you with this License Agreement will not have
their licenses terminated so long as such parties remain in full compliance.

.

5. If you wish to incorporate parts of SMAIL into other free programs whose distribution conditions are different, write to Landon Curt Noll & Ronald S. Karr via the Free Software Foundation at 51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA. We have not yet worked out a simple rule that can be stated here, but we will often permit this. We will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software.

.

Your comments and suggestions about our licensing policies and our software are welcome! This contract was based on the contract made by the Free Software Foundation. Please contact the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301, USA, or call (617) 542-5942 for details on copylefted material in general.

.

NO WARRANTY

.

BECAUSE SMAIL IS LICENSED FREE OF CHARGE, WE PROVIDE ABSOLUTELY NO WARRANTY, TO THE EXTENT PERMITTED BY APPLICABLE STATE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING, LANDON CURT NOLL & RONALD S. KARR AND/OR OTHER PARTIES PROVIDE SMAIL "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF SMAIL IS WITH YOU. SHOULD SMAIL PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW WILL LANDON CURT NOLL & RONALD S. KARR AND/OR ANY OTHER PARTY WHO MAY MODIFY AND REDISTRIBUTE SMAIL AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY LOST PROFITS, LOST MONIES, OR OTHER SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS) SMAIL, EVEN IF YOU HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES, OR FOR ANY CLAIM BY ANY OTHER PARTY.

A. HISTORY OF THE SOFTWARE
==========

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands as a successor of a language called ABC. Guido remains Python's principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see http://www.cnri.reston.va.us) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations (now Zope Corporation, see http://www.zope.com). In 2001, the Python Software Foundation (PSF, see http://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation is a sponsoring member of
the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)
0.9.0 thru 1.2		1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.2	2.1.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes
2.1.3	2.1.2	2002	PSF	yes
2.2.1	2.2	2002	PSF	yes
2.2.2	2.2.1	2002	PSF	yes
2.2.3	2.2.2	2003	PSF	yes
2.3	2.2.2	2002-2003	PSF	yes

2.3.1	2.3	2002-2003	PSF	yes
2.3.2	2.3.1	2002-2003	PSF	yes
2.3.3	2.3.2	2002-2003	PSF	yes
2.3.4	2.3.3	2004	PSF	yes
2.3.5	2.3.4	2005	PSF	yes
2.4	2.3	2004	PSF	yes
2.4.1	2.4	2005	PSF	yes
2.4.2	2.4.1	2005	PSF	yes
2.4.3	2.4.2	2006	PSF	yes
2.4.4	2.4.3	2006	PSF	yes
2.5	2.4	2006	PSF	yes
2.5.1	2.5	2007	PSF	yes
2.5.2	2.5.1	2008	PSF	yes
2.5.3	2.5.2	2008	PSF	yes
2.6	2.5	2008	PSF	yes
2.6.1	2.6	2008	PSF	yes
2.6.2	2.6.1	2009	PSF	yes
2.6.3	2.6.2	2009	PSF	yes
2.6.4	2.6.3	2009	PSF	yes
2.6.5	2.6.4	2010	PSF	yes
3.0	2.6	2008	PSF	yes
3.0.1	3.0	2009	PSF	yes
3.1	3.0.1	2009	PSF	yes
3.1.1	3.1	2009	PSF	yes
3.1.2	3.1	2010	PSF	yes
3.2	3.1	2010	PSF	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON
==========

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

---

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010 Python Software Foundation; All Rights Reserved" are retained in Python alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise

using Python, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an
office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the
Individual or Organization ("Licensee") accessing and otherwise using
this software in source or binary form and its associated
documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License
Agreement, BeOpen hereby grants Licensee a non-exclusive,
royalty-free, world-wide license to reproduce, analyze, test, perform
and/or display publicly, prepare derivative works, distribute, and
otherwise use the Software alone or in any derivative version,
provided, however, that the BeOpen Python License is retained in the
Software, alone or in any derivative version prepared by Licensee.

3.
BeOpen is making the Software available to Licensee on an "AS IS"
basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE
SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS
AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY
DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all
respects by the law of the State of California, excluding conflict of
law provisions. Nothing in this License Agreement shall be deemed to
create any relationship of
agency, partnership, or joint venture
between BeOpen and Licensee. This License Agreement does not grant
permission to use BeOpen trademarks or trade names in a trademark
sense to endorse or promote products or services of Licensee, or any

third party. As an exception, the "BeOpen Python" logos available at
http://www.pythonlabs.com/logos.html may be used according to the
permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1
---

1. This LICENSE AGREEMENT is between the Corporation for National
Research Initiatives, having an office at 1895 Preston White Drive,
Reston, VA 20191 ("CNRI"), and the Individual or Organization
("Licensee") accessing and otherwise using Python 1.6.1 software in
source or binary form and its associated documentation.

2. Subject to the terms and conditions
 of this License Agreement, CNRI
hereby grants Licensee a nonexclusive, royalty-free, world-wide
license to reproduce, analyze, test, perform and/or display publicly,
prepare derivative works, distribute, and otherwise use Python 1.6.1
alone or in any derivative version, provided, however, that CNRI's
License Agreement and CNRI's notice of copyright, i.e., "Copyright (c)
1995-2001 Corporation for National Research Initiatives; All Rights
Reserved" are retained in Python 1.6.1 alone or in any derivative
version prepared by Licensee. Alternately, in lieu of CNRI's License
Agreement, Licensee may substitute the following text (omitting the
quotes): "Python 1.6.1 is made available subject to the terms and
conditions in CNRI's License Agreement. This Agreement together with
Python 1.6.1 may be located on the Internet using the following
unique, persistent identifier (known as a handle): 1895.22/1013. This
Agreement may also be obtained from a proxy server on the Internet
using the following
 URL: http://hdl.handle.net/1895.22/1013".

3. In the event Licensee prepares a derivative work that is based on
or incorporates Python 1.6.1 or any part thereof, and wants to make
the derivative work available to others as provided herein, then
Licensee hereby agrees to include in any such work a brief summary of
the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS"
basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT

INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6.
This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission
to use CNRI trademarks or
trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

Name: setuptools
Version: 0.6c9
Summary: Download, build, install, upgrade, and uninstall Python packages -- easily!
Home-page: http://pypi.org/pypi/setuptools
Author: Phillip J. Eby
Author-email: distutils-sig@python.org
License: PSF or ZPL
Description: ================================

Installing and Using Setuptools

==========

.. contents:: **Table of Contents**

Installation Instructions

Windows

=======

Install setuptools using the provided ``.exe`` installer. If you've previously installed older versions of setuptools, please delete all ``setuptools*.egg`` and ``setuptools.pth`` files from your system's ``site-packages`` directory (and any other ``sys.path`` directories) FIRST.

If you are upgrading a previous version of setuptools that was installed using an ``.exe`` installer,
please be sure to also *uninstall that older version*
via your system's "Add/Remove Programs" feature, BEFORE installing the newer version.

Once installation is complete, you will find an ``easy_install.exe`` program in your Python ``Scripts`` subdirectory. Be sure to add this directory to your ``PATH`` environment variable, if you haven't already done so.

RPM-Based Systems

==========

Install setuptools using the provided source RPM. The included ``.spec`` file assumes you are installing using the default ``python`` executable, and is not specific to a particular Python version. The ``easy_install`` executable will be installed to a system ``bin`` directory such as ``/usr/bin``.

If you wish to install to a location other than the default Python

installation's default ``site-packages`` directory (and ``$prefix/bin`` for
scripts), please use the ``.egg``-based
installation approach described in the
following section.

Cygwin, Mac OS X, Linux, Other
==========

1. Download the appropriate egg for your version of Python (e.g.
``setuptools-0.6c9-py2.4.egg``). Do NOT rename it.

2. Run it as if it were a shell script, e.g. ``sh setuptools-0.6c9-py2.4.egg``.
Setuptools will install itself using the matching version of Python (e.g.
``python2.4``), and will place the ``easy_install`` executable in the
default location for installing Python scripts (as determined by the
standard distutils configuration files, or by the Python installation).

If you want to install setuptools to somewhere other than ``site-packages`` or
your default distutils installation locations for libraries and scripts, you
may include EasyInstall command-line options such as ``--prefix``,
``--install-dir``, and so on, following the ``.egg`` filename
on the same
command line. For example::

sh setuptools-0.6c9-py2.4.egg --prefix=~

You can use ``--help`` to get a full options list, but we recommend consulting
the `EasyInstall manual`_ for detailed instructions, especially `the section
on custom installation locations`_.

.. _EasyInstall manual: http://peak.telecommunity.com/DevCenter/EasyInstall
.. _the section on custom installation locations: http://peak.telecommunity.com/DevCenter/EasyInstall#custom-installation-locations

Cygwin Note

If you are trying to install setuptools for the **Windows** version of Python
(as opposed to the Cygwin version that lives in ``/usr/bin``), you must make
sure that an appropriate executable (``python2.3``, ``python2.4``, or
``python2.5``) is on your **Cygwin** ``PATH`` when invoking the egg. For
example, doing the following at a Cygwin bash prompt will install setuptools
for the **Windows** Python found at ``C:\\Python24``::

ln -s /cygdrive/c/Python24/python.exe python2.4
PATH=.:$PATH sh setuptools-0.6c9-py2.4.egg

rm python2.4

Downloads
=========

All setuptools downloads can be found at `the project's home page in the Python
Package Index`_. Scroll to the very bottom of the page to find the links.

.. _the project's home page in the Python Package Index: http://pypi.org/pypi/setuptools

In addition to the PyPI downloads, the development version of ``setuptools``
is available from the `Python SVN sandbox`_, and in-development versions of the
`0.6 branch`_ are available as well.

.. _0.6 branch: http://svn.python.org/projects/sandbox/branches/setuptools-0.6/#egg=setuptools-dev06

.. _Python SVN sandbox: http://svn.python.org/projects/sandbox/trunk/setuptools/#egg=setuptools-dev

---
Using
Setuptools and EasyInstall

Here are some of the available manuals, tutorials, and other resources for
learning about Setuptools, Python Eggs, and EasyInstall:

* `The EasyInstall user's guide and reference manual`_
* `The setuptools Developer's Guide`_
* `The pkg_resources API reference`_
* `Package Compatibility Notes`_ (user-maintained)
* `The Internal Structure of Python Eggs`_

Questions, comments, and bug reports should be directed to the `distutils-sig
mailing list`_. If you have written (or know of) any tutorials, documentation,
plug-ins, or other resources for setuptools users, please let us know about
them there, so this reference list can be updated. If you have working,
tested patches to correct problems or add features, you may submit them to
the `setuptools bug tracker`_.

.. _setuptools bug tracker: http://bugs.python.org/setuptools/
.. _Package Compatibility Notes: http://peak.telecommunity.com/DevCenter/PackageNotes
.. _The Internal Structure of Python Eggs: http://peak.telecommunity.com/DevCenter/EggFormats
.. _The setuptools Developer's Guide: http://peak.telecommunity.com/DevCenter/setuptools
.. _The pkg_resources API reference: http://peak.telecommunity.com/DevCenter/PkgResources
.. _The EasyInstall user's guide and reference manual: http://peak.telecommunity.com/DevCenter/EasyInstall
.. _distutils-sig mailing list: http://mail.python.org/pipermail/distutils-sig/

Credits
----

* The original design for the ``.egg`` format and the ``pkg_resources`` API was
co-created by Phillip Eby and Bob Ippolito. Bob also implemented the first
version of ``pkg_resources``, and supplied the OS X operating system version
compatibility algorithm.

* Ian Bicking implemented many early "creature
comfort" features of
easy_install, including support for downloading via Sourceforge and
Subversion repositories. Ian's comments on the Web-SIG about WSGI
application deployment also inspired the concept of "entry points" in eggs,
and he has given talks at PyCon and elsewhere to inform and educate the
community about eggs and setuptools.

* Jim Fulton contributed time and effort to build automated tests of various
aspects of ``easy_install``, and supplied the doctests for the command-line
``.exe`` wrappers on Windows.

* Phillip J. Eby is the principal author and maintainer of setuptools, and
first proposed the idea of an importable binary distribution format for
Python application plug-ins.

* Significant parts of the implementation of setuptools were funded by the Open
Source Applications Foundation, to provide a plug-in infrastructure for the
Chandler PIM application.
In addition, many OSAF staffers (such as Mike
"Code Bear" Taylor) contributed their time and stress as guinea pigs for the
use of eggs and setuptools, even before eggs were "cool". (Thanks, guys!)

==========
Advice for new contributors
==========

New contributor and not sure what to do? Want to help but just don't know how to get started? This is the section for you.

.. admonition:: Get up and running!

If you are new to contributing to Django, the :doc:`/intro/contributing` tutorial will give you an introduction to the tools and the workflow.

This page contains more general advice on ways you can contribute to Django, and how to approach that.

If you are looking for a reference on the details of making code contributions, see the :doc:`/internals/contributing/writing-code/index` documentation.

First steps
==========

Start with these steps to discover Django's development process.

* **Triage tickets**

If an `unreviewed ticket`_ reports a bug, try and reproduce it. If you can reproduce it and it seems valid, make a note that you confirmed the bug and accept the ticket. Make sure the ticket is filed under the correct component
area. Consider writing a patch that adds a test for the bug's behavior, even if you don't fix the bug itself. See more at :ref:`how-can-i-help-with-triaging`

* **Look for tickets that are accepted and review patches to build familiarity with the codebase and the process**

Mark the appropriate flags if a patch needs docs or tests. Look through the changes a patch makes, and keep an eye out for syntax that is incompatible with older but still supported versions of Python. :doc:`Run the tests

</internals/contributing/writing-code/unit-tests>` and make sure they pass.
Where possible and relevant, try them out on a database other than SQLite.
Leave comments and feedback!

* **Keep old patches up to date**

Oftentimes the codebase will change between a patch being submitted and the
time it gets reviewed. Make sure it still applies cleanly and functions as
expected. Updating a patch is both useful and important! See more on
:doc:`writing-code/submitting-patches`.

*
Write some documentation

Django's documentation is great but it can always be improved. Did you find
a typo? Do you think that something should be clarified? Go ahead and
suggest a documentation patch! See also the guide on
:doc:`writing-documentation`.

.. note::

    The `reports page`_ contains links to many useful Trac queries, including
    several that are useful for triaging tickets and reviewing patches as
    suggested above.

    .. _reports page: https://code.djangoproject.com/wiki/Reports

* **Sign the Contributor License Agreement**

The code that you write belongs to you or your employer. If your
contribution is more than one or two lines of code, you need to sign the
`CLA`_. See the `Contributor License Agreement FAQ`_ for a more thorough
explanation.

.. _CLA: https://www.djangoproject.com/foundation/cla/
.. _Contributor License Agreement FAQ: https://www.djangoproject.com/foundation/cla/faq/
.. _unreviewed ticket: https://code.djangoproject.com/query?status=!closed&stage=Unreviewed

Guidelines
==========

As
a newcomer on a large project, it's easy to experience frustration. Here's
some advice to make your work on Django more useful and rewarding.

* **Pick a subject area that you care about, that you are familiar with, or
that you want to learn about**

You don't already have to be an expert on the area you want to work on; you become an expert through your ongoing contributions to the code.

* **Analyze tickets' context and history**

Trac isn't an absolute; the context is just as important as the words. When reading Trac, you need to take into account who says things, and when they were said. Support for an idea two years ago doesn't necessarily mean that the idea will still have support. You also need to pay attention to who *hasn't* spoken -- for example, if an experienced contributor hasn't been recently involved in a discussion, then a ticket may not have the support required to get into
Django.

* **Start small**

It's easier to get feedback on a little issue than on a big one. See the `easy pickings`_.

* **If you're going to engage in a big task, make sure that your idea has support first**

This means getting someone else to confirm that a bug is real before you fix the issue, and ensuring that there's consensus on a proposed feature before you go implementing it.

* **Be bold! Leave feedback!**

Sometimes it can be scary to put your opinion out to the world and say "this ticket is correct" or "this patch needs work", but it's the only way the project moves forward. The contributions of the broad Django community ultimately have a much greater impact than that of any one person. We can't do it without **you**!

* **Err on the side of caution when marking things Ready For Check-in**

If you're really not certain if a ticket is ready, don't mark it as such. Leave a comment instead, letting others know your thoughts. If you're mostly certain,
but not completely certain, you might also try asking on IRC to see if someone else can confirm your suspicions.

* **Wait for feedback, and respond to feedback that you receive**

Focus on one or two tickets, see them through from start to finish, and repeat. The shotgun approach of taking on lots of tickets and letting some fall by the wayside ends up doing more harm than good.

* **Be rigorous**

When we say ":pep:`8`, and must have docs and tests", we mean it. If a patch
doesn't have docs and tests, there had better be a good reason. Arguments
like "I couldn't find any existing tests of this feature" don't carry much
weight--while it may be true, that means you have the extra-important job of
writing the very first tests for that feature, not that you get a pass from
writing tests altogether.

* **Be patient**

It's not always easy for your ticket or your patch to be reviewed quickly.
This isn't personal. There are a lot of tickets and pull requests to
get
through.

Keeping your patch up to date is important. Review the ticket on Trac to
ensure that the *Needs tests*, *Needs documentation*, and *Patch needs
improvement* flags are unchecked once you've addressed all review comments.

Remember that Django has an 8 month release cycle, so there's plenty of time
for your patch to be reviewed.

Finally, a well-timed reminder can help. See :ref:`contributing code FAQ
<new-contributors-faq>` for ideas here.

.. _easy pickings: https://code.djangoproject.com/query?status=!closed&easy=1
BSD-3-Clause
Django is licensed under the three-clause BSD license; see the file
LICENSE for details.

Django includes code from the Python standard library, which is licensed under
the Python license, a permissive open source license. The copyright and license
is included below for compliance with Python's terms.

Copyright (c) 2001-present Python Software Foundation; All Rights Reserved

A. HISTORY OF THE SOFTWARE
==========

Python was created in the early 1990s by Guido van Rossum at Stichting
Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands
as a successor of a language called ABC. Guido remains Python's
principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see http://www.cnri.reston.va.us) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations, which became Zope Corporation. In 2001, the Python Software Foundation (PSF, see https://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation was a sponsoring member of the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

Release	Derived from	Year	Owner	GPL-compatible? (1)
0.9.0 thru 1.2		1991-1995	CWI	yes
1.3 thru 1.5.2	1.2	1995-1999	CNRI	yes
1.6	1.5.2	2000	CNRI	no
2.0	1.6	2000	BeOpen.com	no
1.6.1	1.6	2001	CNRI	yes (2)
2.1	2.0+1.6.1	2001	PSF	no
2.0.1	2.0+1.6.1	2001	PSF	yes
2.1.1	2.1+2.0.1	2001	PSF	yes
2.1.2	2.1.1	2002	PSF	yes
2.1.3	2.1.2	2002	PSF	yes
2.2 and above	2.1.1	2001-now	PSF	yes

Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's
direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON
===

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2
----

1. This LICENSE AGREEMENT is between the Python Software Foundation
("PSF"), and the Individual or Organization ("Licensee") accessing and
otherwise using this software ("Python") in source or binary form and
its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby
grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce,
analyze, test, perform and/or display publicly, prepare derivative works,
distribute, and otherwise use Python alone or in any derivative version,
provided, however, that PSF's License Agreement
and PSF's notice of copyright,
i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010,
2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020 Python Software Foundation;
All Rights Reserved" are retained in Python alone or in any derivative version
prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on
or incorporates Python or any part thereof, and wants to make
the derivative work available to others as provided herein, then
Licensee hereby agrees to include in any such work a brief summary of
the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS"
basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY
OTHER USERS OF PYTHON
FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS
A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON,
OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at http://www.pythonlabs.com/logos.html may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1

---

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: http://hdl.handle.net/1895.22/1013".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a

brief summary of
the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS"
basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON
1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS
A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1,
OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

7. This License Agreement shall be governed by the federal
intellectual property law of the United States, including without
limitation the federal copyright law, and, to the extent such
U.S.
federal law does not apply, by the law of the Commonwealth of
Virginia, excluding Virginia's conflict of law provisions.
Notwithstanding the foregoing, with regard to derivative works based
on Python 1.6.1 that incorporate non-separable material that was
previously distributed under the GNU General Public License (GPL), the
law of the Commonwealth of Virginia shall govern this License
Agreement only as to issues arising under or with respect to
Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this
License Agreement shall be deemed to create any relationship of
agency, partnership, or joint venture between CNRI and Licensee. This
License Agreement does not grant permission to use CNRI trademarks or
trade name in a trademark sense to endorse or promote products or
services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying,
installing or otherwise using Python 1.6.1, Licensee agrees to be
bound by the terms and conditions
of this License Agreement.

ACCEPT

Font Awesome Free License

Font Awesome Free is free, open source, and GPL friendly. You can use it for
commercial projects, open source projects, or really almost whatever you want.
Full Font Awesome Free license: https://fontawesome.com/license.

Icons: CC BY 4.0 License (https://creativecommons.org/licenses/by/4.0/)
In the Font Awesome Free download, the CC BY 4.0 license applies to all icons
packaged as SVG and JS file types.

Fonts: SIL OFL 1.1 License (https://scripts.sil.org/OFL)
In the Font Awesome Free download, the SIL OLF license applies to all icons
packaged as web and desktop font files.

Code: MIT License (https://opensource.org/licenses/MIT)
In the Font Awesome Free download, the MIT license applies to all non-font and
non-icon files.

Attribution
Attribution is required by MIT, SIL OLF, and CC BY licenses. Downloaded Font
Awesome Free files already contain embedded comments with sufficient
attribution, so you shouldn't need to do anything
additional when using these
files normally.

We've kept attribution comments terse, so we ask that you do not actively work

to remove them from files, especially code. They're a great way for folks to learn about Font Awesome.

Brand Icons
All brand icons are trademarks of their respective owners. The use of these trademarks does not indicate endorsement of the trademark holder by Font Awesome, nor vice versa. **Please do not use brand logos for any purpose except to represent the company, product, or service to which they refer.**
django.dispatch was originally forked from PyDispatcher.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents

of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price.
Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the

source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate

copyright notice and disclaimer of warranty; keep intact all the
notices that refer to this License and to the absence of any warranty;
and give any other recipients of the Program a copy of this License
along with the Program.

You may charge a fee for the physical act of transferring a copy, and
you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion
of it, thus forming a work based on the Program, and copy and
distribute such modifications or work under the terms of Section 1
above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices
stating that you changed the files and the date of any change.

b) You must cause
any work that you distribute or publish, that in
whole or in part contains or is derived from the Program or any
part thereof, to be licensed as a whole at no charge to all third
parties under the terms of this License.

c) If the modified program normally reads commands interactively
when run, you must cause it, when started running for such
interactive use in the most ordinary way, to print or display an
announcement including an appropriate copyright notice and a
notice that there is no warranty (or else, saying that you provide
a warranty) and that users may redistribute the program under
these conditions, and telling the user how to view a copy of this
License. (Exception: if the Program itself is interactive but
does not normally print such an announcement, your work based on
the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If
identifiable sections of that work
are not derived from the Program,
and can be reasonably considered independent and separate works in
themselves, then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based
on the Program, the distribution of the whole must be on the terms of
this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution of derivative or
collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt

otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made

generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF

MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR
THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU
General Public License as published by
the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

  Gnomovision version 69, Copyright (C) year name of author
  Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
  This is free software, and you are welcome to redistribute
it
  under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

 Yoyodyne, Inc., hereby disclaims all copyright interest in the program
 `Gnomovision' (which makes passes at compilers) written by James Hacker.

 <signature of Ty Coon>, 1 April 1989
 Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this
 is what you want to do, use the GNU Lesser General
Public License instead of this License.

MediaTek Inc. grants permission to use and redistribute aforementioned firmware files for the use with devices containing MediaTek chipsets, but not as part of the Linux kernel or in any other form which would require these files themselves to be covered by the terms of the GNU General Public License or the GNU Lesser General Public License.

These firmware files are distributed in the hope that they will be useful, but are provided WITHOUT ANY WARRANTY, INCLUDING BUT NOT LIMITED TO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE.
The README file from the original package from Micronas appears below. Only the part about the firmware redistribution in section 0 is relevant, all other sections are completely obsolete.

WIS GO7007SB Public Linux Driver

*** Please see the file RELEASE-NOTES for important last-minute updates ***

0. OVERVIEW AND LICENSING/DISCLAIMER

This driver kit contains Linux drivers for the WIS GO7007SB multi-format video encoder. Only kernel version 2.6.x is supported. The video stream is available through the Video4Linux2 API and the audio stream is available through the ALSA API (or the OSS emulation layer of the ALSA system).

The files in kernel/ and hotplug/ are licensed under the GNU General Public License Version 2 from the Free Software Foundation. A copy of the license is included in the file COPYING.

The example applications in apps/ and C header files in include/ are licensed under a permissive license included in the source files which allows copying, modification and redistribution for any purpose without attribution.

The firmware files included in the firmware/ directory may be freely redistributed only in conjunction with this document; but modification,

tampering and reverse engineering are prohibited.

MICRONAS USA, INC., MAKES NO WARRANTIES TO ANY PERSON OR ENTITY WITH RESPECT TO THE SOFTWARE OR ANY DERIVATIVES THEREOF OR ANY SERVICES OR LICENSES AND DISCLAIMS ALL IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION WARRANTIES OF MERCHANTABILITY, SUPPORT, AND FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.

1. SYSTEM REQUIREMENTS

This driver requires Linux kernel 2.6. Kernel 2.4 is not supported. Using kernel 2.6.10 or later is recommended, as earlier kernels are known to have unstable USB 2.0 support.

A fully built kernel source tree must be available. Typically this will be linked from "/lib/modules/<KERNEL VERSION>/build" for convenience. If this link does not exist, an extra parameter will need to be passed to the `make` command.

All vendor-built kernels should already be configured properly. However, for custom-built kernels, the following options need to be enabled in the kernel as built-in or modules:

CONFIG_HOTPLUG - Support for hot-pluggable devices
CONFIG_MODULES - Enable loadable module support
CONFIG_KMOD - Automatic kernel module loading
CONFIG_FW_LOADER - Hotplug firmware loading support
CONFIG_I2C - I2C support
CONFIG_VIDEO_DEV - Video For Linux
CONFIG_SOUND - Sound card support
CONFIG_SND - Advanced Linux Sound Architecture
CONFIG_USB - Support for Host-side USB
CONFIG_USB_DEVICEFS - USB device filesystem
CONFIG_USB_EHCI_HCD - EHCI HCD (USB 2.0) support

Additionally, to use the example application, the following options need to be enabled in the ALSA section:

CONFIG_SND_MIXER_OSS - OSS Mixer API
CONFIG_SND_PCM_OSS - OSS PCM (digital audio) API

The hotplug scripts, along with the fxload utility, must also be installed. These scripts can be obtained from <http://linux-hotplug.sourceforge.net/>. Hotplugging is used for loading firmware into the Cypruss EZ-USB chip using

fxload and for loading firmware into the driver using the firmware agent.

2. COMPILING AND INSTALLING THE DRIVER

Most users should be able to compile the driver by simply running:

```
$ make
```

in the top-level directory of the driver kit. First the kernel modules will be built, followed by the example applications.

If the build system is unable to locate the kernel source tree for the currently-running kernel, or if the module should be built for a kernel other than the currently-running kernel, an additional parameter will need to be passed to make to specify the appropriate kernel source directory:

```
$ make KERNELSRC=/usr/src/linux-2.6.10-custom3
```

Once the compile completes, the driver and firmware files should be installed by running:

```
$ make install
```

The kernel modules will be placed in "/lib/modules/<KERNEL VERSION>/extra" and the firmware files will be placed in the appropriate hotplug firmware directory, usually /lib/firmware. In addition, USB maps and scripts will be placed in /etc/hotplug/usb to enable fxload to initialize the EZ-USB control chip when the device is connected.

3. PAL/SECAM TUNER CONFIGURATION (TV402U-EU only)

The PAL model of the Plextor ConvertX TV402U may require additional configuration to correctly select the appropriate TV frequency band and audio subchannel.

Users with a device other than the Plextor ConvertX TV402U-EU should skip this section.

The wide variety of PAL TV systems used in Europe requires that additional information about the local TV standards be passed to the driver in order to properly tune TV channels. The two necessary parameters are (a) the PAL TV band, and (b) the audio subchannel format in use.

In many cases, the appropriate TV band selection is passed to the driver from applications. However, in some cases, the application only specifies that the driver should use PAL but not the specific information about the appropriate TV band. To work around this issue, the correct TV band may be specified in the "force_band" parameter to the wis-sony-tuner module:

TV band	force_band
PAL B/G	B
PAL I	I
PAL D/K	D
SECAM L	L

If the "force_band" parameter is specified, the driver will ignore any TV band specified by applications and will always use the band provided in the module parameter.

The other parameter that can be specified is the audio subchannel format. There are several stereo audio carrier systems in use, including NICAM and three varieties of A2. To receive audio broadcast on one of these stereo carriers, the "force_mpx_mode" parameter must be specified to the wis-sony-tuner module.

TV band	Audio subcarrier	force_mpx_mode
PAL B/G	Mono (default)	1
PAL B/G	A2	2
PAL B/G	NICAM	3
PAL I	Mono (default)	4
PAL I	NICAM	5
PAL D/K	Mono (default)	6
PAL D/K	A2 (1)	7
PAL D/K	A2 (2)	8
PAL D/K	A2 (3)	9
PAL D/K	NICAM	10
SECAM L	Mono (default)	11
SECAM L	NICAM	12

If the "force_mpx_mode" parameter is not specified, the correct mono-only mode will be chosen based on the TV band. However, the tuner will not receive stereo audio or bilingual broadcasts correctly.

To pass the "force_band" or "force_mpx_mode" parameters to the wis-sony-tuner module, the following line must be added to the modprobe configuration file, which varies from one Linux distribution to another.

options wis-sony-tuner force_band=B force_mpx_mode=2

The above example would force the tuner to the PAL B/G TV band and receive stereo audio broadcasts on the A2 carrier.

To verify that the configuration has been placed in the correct location, execute:

$ modprobe -c | grep wis-sony-tuner

If the configuration line appears, then modprobe will pass the parameters correctly the next time the wis-sony-tuner module is loaded into the kernel.

4. TESTING THE DRIVER

Because few Linux applications are able to correctly capture from Video4Linux2 devices with
only compressed formats supported, the new driver should be tested with the "gorecord" application in the apps/ directory.

First connect a video source to the device, such as a DVD player or VCR. This will be captured to a file for testing the driver. If an input source is unavailable, a test file can still be captured, but the video will be black and the audio will be silent.

This application will auto-detect the V4L2 and ALSA/OSS device names of the hardware and will record video and audio to an AVI file for a specified number of seconds. For example:

$ apps/gorecord -duration 60 capture.avi

If this application does not successfully record an AVI file, the error messages produced by gorecord and recorded in the system log (usually in /var/log/messages) should provide information to help resolve the problem.

Supplying no parameters to gorecord will cause it to probe the available devices and exit. Use the -help flag for usage information.

5. USING THE DRIVER

The

V4L2 device implemented by the driver provides a standard compressed format API, within the following criteria:

* Applications that only support the original Video4Linux1 API will not be able to communicate with this driver at all.

* No raw video modes are supported, so applications like xawtv that expect only uncompressed video will not function.

* Supported compression formats are: Motion-JPEG, MPEG1, MPEG2 and MPEG4.

* MPEG video formats are delivered as Video Elementary Streams only. Program Stream (PS), Transport Stream (TS) and Packetized Elementary Stream (PES) formats are not supported.

* Video parameters such as format and input port may not be changed while the encoder is active.

* The audio capture device only functions when the video encoder is actively capturing video. Attempts to read from the audio device when the encoder is inactive will result in an I/O error.

* The native format of the audio device is 48Khz 2-channel 16-bit little-endian PCM, delivered through the ALSA system. No audio compression is implemented in the hardware. ALSA may convert to other uncompressed formats on the fly.

The include/ directory contains a C header file describing non-standard features of the GO7007SB encoder, which are described below:

GO7007IOC_S_COMP_PARAMS, GO7007IOC_G_COMP_PARAMS

These ioctls are used to negotiate general compression parameters.

To query the current parameters, call the GO7007IOC_G_COMP_PARAMS ioctl with a pointer to a struct go7007_comp_params. If the driver is not set to MPEG format, the EINVAL error code will be returned.

To change the current parameters, initialize all fields of a struct go7007_comp_params and call the GO7007_IOC_S_COMP_PARAMS ioctl with a pointer to this structure. The driver will return the current parameters with any necessary changes to conform to the limitations of the hardware or current compression mode. Any or all fields can be set to zero to request a reasonable default value. If the driver is not set to MPEG format, the EINVAL error code will be returned. When I/O

is in progress, the EBUSY error code will be returned.

Fields in struct go7007_comp_params:

__u32 gop_size — The maximum number of frames in each Group Of Pictures; i.e. the maximum number of frames minus one between each key frame.

__u32 max_b_frames — The maximum number of sequential bidirectionally-predicted frames. (B-frames are not yet supported.)

enum go7007_aspect_ratio aspect_ratio — The aspect ratio to be encoded in the meta-data of the compressed format.

Choices are:

GO7007_ASPECT_RATIO_1_1
GO7007_ASPECT_RATIO_4_3_NTSC
GO7007_ASPECT_RATIO_4_3_PAL
GO7007_ASPECT_RATIO_16_9_NTSC
GO7007_ASPECT_RATIO_16_9_PAL

__u32 flags — Bit-wise OR of control flags (below)

Flags in struct go7007_comp_params:

GO7007_COMP_CLOSED_GOP — Only produce self-contained GOPs, used to produce streams appropriate for random seeking.

GO7007_COMP_OMIT_SEQ_HEADER — Omit the stream sequence header.

GO7007IOC_S_MPEG_PARAMS, GO7007IOC_G_MPEG_PARAMS

These ioctls are used to negotiate MPEG-specific stream parameters when the pixelformat has been set to V4L2_PIX_FMT_MPEG.

To query the current parameters, call the GO7007IOC_G_MPEG_PARAMS ioctl with a pointer to a struct go7007_mpeg_params. If the driver is not set to MPEG format, the EINVAL error code will be returned.

To change the current parameters, initialize all fields of a struct go7007_mpeg_params and call the GO7007_IOC_S_MPEG_PARAMS ioctl with a

pointer to this structure. The driver will return the current parameters with any necessary changes to conform to the limitations of the hardware or selected MPEG mode. Any or all fields can be set to zero to request a reasonable default value. If the driver is not set to MPEG format, the EINVAL error code will be returned. When I/O is in progress, the EBUSY error code will be returned.

Fields in struct go7007_mpeg_params:

enum go7007_mpeg_video_standard
mpeg_video_standard The MPEG video standard in which to compress the video.

Choices are:
GO7007_MPEG_VIDEO_MPEG1

GO7007_MPEG_VIDEO_MPEG2
GO7007_MPEG_VIDEO_MPEG4

__u32 flags — Bit-wise OR of control flags (below)

__u32 pali — The profile and level indication to be stored in the sequence header. This is only used as an indicator to the decoder, and does not affect the MPEG features used in the video stream. Not valid for MPEG1.

Choices for MPEG2 are:
GO7007_MPEG2_PROFILE_MAIN_MAIN

Choices for MPEG4 are:
GO7007_MPEG4_PROFILE_S_L0
GO7007_MPEG4_PROFILE_S_L1

GO7007_MPEG4_PROFILE_S_L2
GO7007_MPEG4_PROFILE_S_L3
GO7007_MPEG4_PROFILE_ARTS_L1
GO7007_MPEG4_PROFILE_ARTS_L2
GO7007_MPEG4_PROFILE_ARTS_L3
GO7007_MPEG4_PROFILE_ARTS_L4
GO7007_MPEG4_PROFILE_AS_L0
GO7007_MPEG4_PROFILE_AS_L1
GO7007_MPEG4_PROFILE_AS_L2
GO7007_MPEG4_PROFILE_AS_L3
GO7007_MPEG4_PROFILE_AS_L4
GO7007_MPEG4_PROFILE_AS_L5

Flags in struct go7007_mpeg_params:

GO7007_MPEG_FORCE_DVD_MODE Force all compression parameters and bitrate control settings to comply

with DVD MPEG2 stream requirements. This overrides most compression and bitrate settings!

GO7007_MPEG_OMIT_GOP_HEADER Omit the GOP header.

GO7007_MPEG_REPEAT_SEQHEADER Repeat the MPEG sequence header at the start of each GOP.

GO7007IOC_S_BITRATE, GO7007IOC_G_BITRATE

These ioctls are used to set and query the target bitrate value for the compressed video stream. The bitrate may be selected by storing the target bits per second in an int and calling GO7007IOC_S_BITRATE with a pointer to the int. The bitrate may be queried by calling GO7007IOC_G_BITRATE with a pointer to an int where the current bitrate will be stored.

Note that this is the primary means of controlling the video quality for all compression modes, including V4L2_PIX_FMT_MJPEG. The VIDIOC_S_JPEGCOMP ioctl is not supported.

Installing the WIS PCI Voyager Driver

The WIS PCI Voyager driver requires several patches to the Linux 2.6.11.x kernel source tree before compiling the driver. These patches update the in-kernel SAA7134 driver to the newest development version and patch bugs in the TDA8290/TDA8275 tuner driver.

The following patches must be downloaded from Gerd Knorr's website and applied in the order listed:

http://dl.bytesex.org/patches/2.6.11-2/i2c-tuner
http://dl.bytesex.org/patches/2.6.11-2/i2c-tuner2
http://dl.bytesex.org/patches/2.6.11-2/v4l2-api-mpeg
http://dl.bytesex.org/patches/2.6.11-2/saa7134-update

The following patches are included with this SDK and can be applied in any

order:

patches/2.6.11/saa7134-voyager.diff
patches/2.6.11/tda8275-newaddr.diff
patches/2.6.11/tda8290-ntsc.diff

Check to make sure the CONFIG_VIDEO_SAA7134 option
is enabled in the kernel
configuration, and build and install the kernel.

After rebooting into the new kernel, the GO7007 driver can be compiled and installed:

```
$ make SAA7134_BUILD=y
$ make install
$ modprobe saa7134-go7007
```

There will be two V4L video devices associated with the PCI Voyager. The first device (most likely /dev/video0) provides access to the raw video capture mode of the SAA7133 device and is used to configure the source video parameters and tune the TV tuner. This device can be used with xawtv or other V4L(2) video software as a standard uncompressed device.

The second device (most likely /dev/video1) provides access to the compression functions of the GO7007. It can be tested using the gorecord application in the apps/ directory of this SDK:

```
$ apps/gorecord -vdevice /dev/video1 -noaudio test.avi
```

Currently the frame resolution is fixed at 720x480 (NTSC) or 720x576 (PAL), and the video standard must be specified to both the raw and the compressed video devices
(xawtv and gorecord, for example).

RELEASE NOTES FOR WIS GO7007SB LINUX DRIVER

Last updated: 5 November 2005

- Release 0.9.7 includes new support for using udev to run fxload. The install script should automatically detect whether the old hotplug scripts or the new udev rules should be used. To force the use of hotplug, run "make install USE_UDEV=n". To force the use of udev, run "make install USE_UDEV=y".

- Motion detection is supported but undocumented. Try the `modet` app

for a demonstration of how to use the facility.

- Using USB2.0 devices such as the TV402U with USB1.1 HCDs or hubs can
cause buffer overruns and frame drops, even at low framerates, due to
inconsistency in the bitrate control mechanism.

- On devices with an SAA7115, including the Plextor ConvertX, video height
values of 96,
128, 160, 192, 256, 320, and 384 do not work in NTSC mode.
All valid heights up to 512 work correctly in PAL mode.

- The WIS Star Trek and PCI Voyager boards have no support yet for audio
or the TV tuner.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that

you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which
contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies

of the Program's
source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole
or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered
independent and separate works in
themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest

your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the

source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each
time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution
of the Program by
all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any

patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.

EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along

with this program; if not, write to the Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w'
and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Lesser General
Public License instead of this License.
Copyright (C) 2009-2017 Advanced Micro Devices, Inc. All rights reserved.

REDISTRIBUTION: Permission is hereby granted, free of any license fees,
to any person obtaining a copy of this microcode (the "Software"), to
install, reproduce, copy and distribute copies, in binary form only, of
the Software and to permit persons to whom the Software is provided to
do the same, provided that the following conditions are met:

No reverse engineering, decompilation, or disassembly of this Software
is permitted.

Redistributions must reproduce the above copyright notice, this
permission notice, and the following disclaimers and notices in the
Software documentation and/or other materials provided with the

Software.

DISCLAIMER: THE USE OF THE SOFTWARE IS AT YOUR SOLE RISK. THE SOFTWARE IS PROVIDED "AS IS" AND WITHOUT WARRANTY OF ANY KIND AND COPYRIGHT HOLDER AND ITS LICENSORS EXPRESSLY DISCLAIM ALL WARRANTIES, EXPRESS AND IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY,
FITNESS FOR A PARTICULAR PURPOSE AND NON-INFRINGEMENT.
COPYRIGHT HOLDER AND ITS LICENSORS DO NOT WARRANT THAT THE SOFTWARE WILL MEET YOUR REQUIREMENTS, OR THAT THE OPERATION OF THE SOFTWARE WILL BE UNINTERRUPTED OR ERROR-FREE. THE ENTIRE RISK ASSOCIATED WITH THE USE OF THE SOFTWARE IS ASSUMED BY YOU. FURTHERMORE, COPYRIGHT HOLDER AND ITS LICENSORS DO NOT WARRANT OR MAKE ANY REPRESENTATIONS REGARDING THE USE OR THE RESULTS OF THE USE OF THE SOFTWARE IN TERMS OF ITS CORRECTNESS, ACCURACY, RELIABILITY, CURRENTNESS, OR OTHERWISE.

DISCLAIMER: UNDER NO CIRCUMSTANCES INCLUDING NEGLIGENCE, SHALL COPYRIGHT HOLDER AND ITS LICENSORS OR ITS DIRECTORS, OFFICERS, EMPLOYEES OR AGENTS ("AUTHORIZED REPRESENTATIVES") BE LIABLE FOR ANY INCIDENTAL, INDIRECT, SPECIAL OR CONSEQUENTIAL DAMAGES (INCLUDING DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, AND THE LIKE) ARISING OUT OF THE USE, MISUSE OR INABILITY TO USE THE SOFTWARE, BREACH OR DEFAULT, INCLUDING
THOSE ARISING FROM INFRINGEMENT OR ALLEGED INFRINGEMENT OF ANY PATENT, TRADEMARK, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT EVEN IF COPYRIGHT HOLDER AND ITS AUTHORIZED REPRESENTATIVES HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. IN NO EVENT SHALL COPYRIGHT HOLDER OR ITS AUTHORIZED REPRESENTATIVES TOTAL LIABILITY FOR ALL DAMAGES, LOSSES, AND CAUSES OF ACTION (WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE) EXCEED THE AMOUNT OF US$10.

Notice: The Software is subject to United States export laws and regulations. You agree to comply with all domestic and international export laws and regulations that apply to the Software, including but not limited to the Export Administration Regulations administered by the U.S. Department of Commerce and International Traffic in Arm Regulations administered by the U.S. Department of State. These laws include restrictions on destinations, end users and end use.

All rights reserved.

Redistribution. Reproduction and redistribution in binary form, without
modification, for use solely in conjunction with a Qualcomm Atheros, Inc.
chipset, is permitted provided that the following conditions are met:

Redistributions must reproduce the above copyright notice and the following
disclaimer in the documentation and/or other materials provided with the
distribution.

Neither the name of Qualcomm Atheros, Inc. nor the names of its suppliers
may be used to endorse or promote products derived from this Software
without specific prior written permission.

No reverse engineering, decompilation, or disassembly of this Software is permitted.

Limited patent license. Qualcomm Atheros, Inc. (Licensor) grants you (Licensee) a limited, worldwide, royalty-free, non-exclusive license under the Patents to make, have made, use, import, offer to sell and sell the Software. No hardware per se is licensed hereunder.
The term Patents as used in this agreement means only those patents or patent applications owned solely and exclusively by Licensor as of the date of Licensors submission of the Software and any patents deriving priority (i.e., having a first effective filing date) therefrom. The term Software as used in this agreement means the firmware image submitted by Licensor, under the terms of this license, to git://git.kernel.org/pub/scm/linux/kernel/git/firmware/linux-firmware.git.
Notwithstanding anything to the contrary herein, Licensor does not grant and Licensee does not receive, by virtue of this agreement or the Licensors submission of any Software, any license or other rights under any patent or patent application owned by any affiliate of Licensor or any other entity (other than Licensor), whether expressly, impliedly, by virtue of estoppel or exhaustion, or otherwise.

DISCLAIMER. THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

Redistribution. Reproduction and redistribution in binary form, without
modification, for use solely in conjunction with a NXP
chipset, is permitted provided that the following conditions are met:

. Redistributions must reproduce the above copyright notice and the following
  disclaimer in the documentation and/or other materials provided with the
  distribution.

. Neither the name of NXP nor the names of its suppliers
  may be used to endorse or promote products derived from this Software
  without specific prior written permission.

. No reverse engineering, decompilation, or disassembly of this Software is
  permitted.

Limited patent license. NXP (.Licensor.) grants you
(.Licensee.) a limited, worldwide, royalty-free, non-exclusive license under
the Patents to make, have made, use, import, offer to sell and sell the

Software. No hardware per se is licensed hereunder.
The term .Patents. as used in this agreement means only those
patents or patent
applications owned solely and exclusively by Licensor as of the date of
Licensor.s submission of the Software and any patents deriving priority (i.e.,
having a first effective filing date) therefrom. The term .Software. as used in
this agreement means the firmware image submitted by Licensor, under the terms
of this license, to git://git.kernel.org/pub/scm/linux/kernel/git/firmware/
linux-firmware.git.
Notwithstanding anything to the contrary herein, Licensor does not grant and
Licensee does not receive, by virtue of this agreement or the Licensor's
submission of any Software, any license or other rights under any patent or
patent application owned by any affiliate of Licensor or any other entity
(other than Licensor), whether expressly, impliedly, by virtue of estoppel or
exhaustion, or otherwise.

WARRANTIES OF MERCHANTABILITY AND
FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL
THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT,
INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING,
BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS
OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND
ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR
TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE
USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

This Notice.txt file contains certain notices of software components included
with the software that Qualcomm Atheros, Inc. ("Qualcomm Atheros") is required
to provide you. Except where prohibited by the open source license, the content
of this notices file is only provided to satisfy Qualcomm Atheros's attribution
and notice requirement; your use of these software components together with the
Qualcomm Atheros software (Qualcomm Atheros software hereinafter referred to
as "Software") is subject to the terms of your agreement from Qualcomm Atheros.
Compliance with all copyright laws and software license agreements included in
the notice section of this file are the responsibility of the user. Except as
may be granted by separate express written agreement, this file provides no
license to any patents, trademarks, copyrights, or other intellectual property
of Qualcomm Incorporated or any of its subsidiaries.

Qualcomm is a trademark of Qualcomm Incorporated, registered in the United States
and
other countries. All Qualcomm Incorporated trademarks are used with permission.
Other products and brand names may be trademarks or registered trademarks of their
respective owners.

/ ***
*
* Fowler/Noll/Vo- hash
*
* The basis of this hash algorithm was taken from an idea sent
* as reviewer comments to the IEEE POSIX P1003.2 committee by:
*
*   Phong Vo (http://www.research.att.com/info/kpv/)
*   Glenn Fowler (http://www.research.att.com/~gsf/)
*
* In a subsequent ballot round:
*
*   Landon Curt Noll (http://www.isthe.com/chongo/)
*
* improved on their algorithm. Some people tried this hash
* and found that it worked rather well. In an EMail message
* to Landon, they named it the ``Fowler/Noll/Vo" or FNV hash.
*
* FNV hashes are designed to be fast while maintaining a low
* collision rate. The FNV speed allows one to quickly hash
 lots
* of data while maintaining a reasonable collision rate. See:
*
*   http://www.isthe.com/chongo/tech/comp/fnv/index.html
*

* for more details as well as other forms of the FNV hash.
*
*
* Please do not copyright this code. This code is in the public domain.

This Notice.txt file contains certain notices of software components
included with the software that Qualcomm Atheros, Inc. ("Qualcomm
Atheros") is required to provide you. Except where prohibited by the
open source license, the content of this notices file is only provided
to satisfy Qualcomm Atheros's attribution and notice requirement; your
use of these software components together with the Qualcomm Atheros
software (Qualcomm Atheros software hereinafter referred to as
"Software") is subject to the terms of your agreement from Qualcomm
Atheros. Compliance with all copyright laws and software license
agreements included in the notice section of this file are the
responsibility of the user. Except as may be granted by separate
express written agreement, this file provides no license to any
patents, trademarks, copyrights, or other intellectual property of
Qualcomm Incorporated or any of its subsidiaries.

Qualcomm is a trademark of Qualcomm Incorporated, registered in the
United States
and other countries. All Qualcomm Incorporated
trademarks are used with permission. Other products and brand names
may be trademarks or registered trademarks of their respective owners.

File: ieee_crc32.c

```
/*
*  COPYRIGHT (C) 1986 Gary S. Brown.  You may use this program, or
*  code or tables extracted from it, as desired without
 restriction.
*
*  First, the polynomial itself and its table of feedback terms.  The
*  polynomial is
*  X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
*  Note that we take it "backwards" and put the highest-order term in
*  the lowest-order bit.  The X^32 term is "implied"; the LSB is the
*  X^31 term, etc.  The X^0 term (usually shown as "+1") results in
*  the MSB being 1
*
*  Note that the usual hardware shift register implementation, which
*  is what we're using (we're merely optimizing it by doing eight-bit
*  chunks at a time) shifts bits into the lowest-order term.  In our
*  implementation, that means shifting towards the right.  Why do we
*  do it this way?  Because the calculated CRC must be transmitted in
*  order from highest-order term to lowest-order term.  UARTs transmit
*  characters in order from LSB to MSB.  By storing the CRC this way
*  we hand it to the UART in the order low-byte to high-byte; the UART
*  sends each low-bit
 to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes
*
*      The table can be generated at runtime if desired; code to do so
*      is shown later.  It might not be obvious, but the feedback
*      terms simply represent the results of eight shift/xor opera
*      tions for all combinations of data and CRC register values
*
*      The values must be right-shifted by eight bits by the "updcrc
*      logic; the shift must be unsigned (bring in zeroes).  On some
*      hardware you could probably optimize the shift in assembler by
*      using byte-swap instructions
```

```
*      polynomial $edb88320
*
*
* CRC32 code derived from work by Gary S. Brown.
*/
```

File: md5.c

//
//
$Id: //depot/sw/branches/qca_main_wifi2.0/perf_pwr_offload/drivers/target/src/misc/crypto/md5.c#1 $
//
// This code implements the MD5 message-digest algorithm.
// The algorithm is due to Ron Rivest. This code was
// written by Colin Plumb in 1993, no copyright is claimed.
// This code is in the public domain; do with it what you wish.
//
// Equivalent code is available from RSA Data Security, Inc.
// This code has been tested against that, and is equivalent,
// except that you don't need to include two pages of legalese
// with every copy.
//
// To compute the message digest of a chunk of bytes, declare an
// MD5Context structure, pass it to MD5Init, call MD5Update as

// needed on buffers full of bytes, and then call MD5Final, which
// will fill a supplied 16-byte array with the digest.
//

TERMS AND CONDITIONS FOR
USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source,
and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the

interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work
of authorship, including the
original version of the Work and any modifications or additions to
that Work or Derivative Works thereof, that is intentionally submitted
to Licensor for inclusion in the Work by the copyright owner or by an
individual or Legal Entity authorized to submit on behalf of the
copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent to
the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control
systems, and issue tracking systems that are managed by, or on behalf
of, the Licensor for the purpose of discussing and improving the Work,
but excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently
incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
copyright license to reproduce, prepare Derivative Works of, publicly
display, publicly perform, sublicense, and distribute the Work and
such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except
as stated in this section) patent license to make, have made, use,
offer to sell, sell, import, and otherwise transfer the Work, where
such license applies only to those patent claims licensable by such
Contributor that are necessarily infringed by their Contribution(s)
alone or by combination of their Contribution(s) with the Work to
which such Contribution(s) was submitted. If
You institute patent
litigation against any entity (including a cross-claim or counterclaim
in a lawsuit) alleging that the Work or a Contribution incorporated
within the Work constitutes direct or contributory patent
infringement, then any patent licenses granted to You under this
License for that Work shall terminate as of the date such litigation
is filed.

4. Redistribution. You may reproduce and distribute copies of the Work
or Derivative Works thereof in any medium, with or without

modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and

2. You must cause any modified files to carry prominent notices stating that You changed the files; and

3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

   You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission
to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed
to in writing, Licensor provides the Work (and each Contributor
provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR
CONDITIONS OF ANY KIND, either express or implied, including, without
limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT,
MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely
responsible for determining the appropriateness of using or
redistributing the Work and assume any risks associated with Your
exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise, unless
required by applicable law (such as deliberate and grossly
negligent
acts) or agreed to in writing, shall any Contributor be liable to You
for damages, including any direct, indirect, special, incidental, or
consequential damages of any character arising as a result of this
License or out of the use or inability to use the Work (including but
not limited to damages for loss of goodwill, work stoppage, computer
failure or malfunction, or any and all other commercial damages or
losses), even if such Contributor has been advised of the possibility
of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer, and
charge a fee for, acceptance of support, warranty, indemnity, or other
liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only on
Your own behalf and on Your sole responsibility, not on behalf of any
other Contributor, and only if You agree to indemnify, defend, and
hold each Contributor
harmless for any liability incurred by, or
claims asserted against, such Contributor by reason of your accepting
any such warranty or additional liability.

or, if you are accepting on behalf of an entity, the entity and its affiliates
exercising rights hereunder (Licensee) subject to the terms of this software
license agreement (Agreement), unless Licensee and Broadcom Corporation
(Broadcom) execute a separate written software license agreement governing
use of the Software. ANY USE, REPRODUCTION, OR DISTRIBUTION OF THE SOFTWARE
CONSTITUTES LICENSEES ACCEPTANCE OF THIS AGREEMENT.

1. License. Subject to the terms and conditions of this Agreement, Broadcom hereby grants to Licensee a limited, non-exclusive, non-transferable, royalty-free license: (i) to use and integrate the Software with any other software; and (ii) to reproduce and distribute the Software complete, unmodified, and as provided by Broadcom, solely for use with Broadcom proprietary integrated circuit product(s) sold by Broadcom with which the Software was designed to be used, or their successors.

2. Restrictions. Licensee shall distribute Software with a copy of this Agreement. Licensee shall not remove, efface or obscure any copyright or trademark notices from the Software. Reproductions of the Broadcom copyright notice shall be included with each copy of the Software, except where such Software is embedded in a manner not readily accessible to the end user. Licensee shall not: (i) use, license, sell or otherwise distribute the Software except as provided in this Agreement; (ii) attempt to modify in any way, reverse engineer, decompile or disassemble any portion of the Software; or (iii) use the Software or other material in violation of any applicable law or regulation, including but not limited to any regulatory agency. This Agreement shall automatically terminate upon Licensees failure to comply with any of the terms of this Agreement. In such event, Licensee will destroy all copies of the Software and its component parts.

3. Ownership. The Software is licensed and not sold. Title to and ownership of the Software, including all intellectual property rights thereto, and any portion thereof remain with Broadcom or its licensors. Licensee hereby covenants that it will not assert any claim that the Software created by or for Broadcom infringe any intellectual property right owned or controlled by Licensee.

4. Disclaimer. THE SOFTWARE IS OFFERED AS IS, AND BROADCOM PROVIDES AND GRANTS AND LICENSEE RECEIVES NO SUPPORT AND NO WARRANTIES OF ANY KIND, EXPRESS OR IMPLIED, BY STATUTE, COMMUNICATION OR CONDUCT WITH LICENSEE, OR OTHERWISE. BROADCOM SPECIFICALLY DISCLAIMS ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A SPECIFIC PURPOSE, OR NONINFRINGEMENT CONCERNING THE SOFTWARE OR ANY UPGRADES TO OR DOCUMENTATION FOR THE SOFTWARE. WITHOUT LIMITATION OF THE ABOVE, BROADCOM GRANTS NO WARRANTY THAT THE SOFTWARE IS ERROR-FREE OR WILL OPERATE WITHOUT INTERRUPTION, AND GRANTS NO WARRANTY REGARDING ITS USE OR THE RESULTS THEREFROM INCLUDING, WITHOUT LIMITATION, ITS CORRECTNESS, ACCURACY, OR RELIABILITY. TO THE MAXIMUM EXTENT PERMITTED BY LAW, IN NO EVENT SHALL BROADCOM OR ANY OF ITS LICENSORS HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER FOR BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE) OR OTHERWISE, ARISING OUT OF THIS AGREEMENT OR USE, REPRODUCTION, OR DISTRIBUTION

OF THE SOFTWARE, INCLUDING BUT NOT LIMITED TO LOSS OF DATA AND LOSS OF PROFITS, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THESE LIMITATIONS SHALL APPLY NOTWITHSTANDING ANY FAILURE OF ESSENTIAL PURPOSE OF ANY LIMITED REMEDY.

5. Export Laws. LICENSEE UNDERSTANDS AND AGREES THAT THE SOFTWARE IS SUBJECT TO UNITED STATES AND OTHER APPLICABLE EXPORT-RELATED LAWS AND REGULATIONS AND THAT LICENSEE MAY NOT EXPORT, RE-EXPORT OR TRANSFER THE SOFTWARE OR ANY DIRECT PRODUCT OF THE SOFTWARE EXCEPT AS PERMITTED UNDER THOSE LAWS.
WITHOUT LIMITING THE FOREGOING, EXPORT, RE-EXPORT, OR TRANSFER OF THE SOFTWARE TO CUBA, IRAN, NORTH KOREA, SUDAN, AND SYRIA IS PROHIBITED.
This is a concatenation of LICENCE.txt and NOTICE.txt from the
open-ath9k-htc-firmware repository describing licensing terms for the
firmware image and its sources.

The source code repository is publicly available at
https://github.com/qca/open-ath9k-htc-firmware .

LICENCE.txt

* SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.
*/
Copyright (C) 2015-2019 Advanced Micro Devices, Inc., All rights reserved.

Permission is hereby granted by Advanced Micro Devices, Inc. ("AMD"),
free of any license fees, to any person obtaining a copy of this
microcode in binary form (the "Software") ("You"), to install,
reproduce, copy and distribute copies of the Software and to permit
persons to whom the Software is provided to do the same, subject to
the following terms and conditions. Your use of any portion of the
Software shall constitute Your acceptance of the following terms and
conditions. If You do not agree to the following terms and conditions,
do not use, retain or redistribute any portion of the Software.

If You redistribute this Software, You must reproduce the above

copyright notice and this license with the Software.
Without specific, prior, written permission from AMD, You may not reference AMD or AMD products in the promotion of any product derived from or incorporating this Software in any manner that implies that AMD
endorses or has certified such product derived from or incorporating this Software.

You may not reverse engineer, decompile, or disassemble this Software or any portion thereof.

THE SOFTWARE IS PROVIDED "AS IS" WITHOUT ANY EXPRESS OR IMPLIED WARRANTY OF ANY KIND, INCLUDING BUT NOT LIMITED TO WARRANTIES OF MERCHANTABILITY, NONINFRINGEMENT, TITLE, FITNESS FOR ANY PARTICULAR PURPOSE, OR WARRANTIES ARISING FROM CONDUCT, COURSE OF DEALING, OR USAGE OF TRADE. IN NO EVENT SHALL AMD OR ITS LICENSORS BE LIABLE FOR ANY DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF PROFITS, BUSINESS INTERRUPTION, OR LOSS OF DATA OR INFORMATION) ARISING OUT OF AMD'S NEGLIGENCE, GROSS NEGLIGENCE, THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF AMD HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. BECAUSE SOME JURISDICTIONS PROHIBIT THE EXCLUSION OR LIMITATION OF LIABILITY FOR CONSEQUENTIAL OR INCIDENTAL DAMAGES OR THE EXCLUSION OF IMPLIED WARRANTIES, THE ABOVE LIMITATION MAY
NOT APPLY TO YOU.

Without limiting the foregoing, the Software may implement third party technologies for which You must obtain licenses from parties other than AMD. You agree that AMD has not obtained or conveyed to You, and that You shall be responsible for obtaining the rights to use and/or distribute the applicable underlying intellectual property rights related to the third party technologies. These third party technologies are not licensed hereunder.

If You use the Software (in whole or in part), You shall adhere to all applicable U.S., European, and other export laws, including but not limited to the U.S. Export Administration Regulations ("EAR"), (15 C.F.R. Sections 730 through 774), and E.U. Council Regulation (EC) No 1334/2000 of 22 June 2000. Further, pursuant to Section 740.6 of the EAR, You hereby certify that, except pursuant to a license granted by the United States Department of Commerce Bureau of Industry and Security or as otherwise permitted pursuant to a License
Exception
under the U.S. Export Administration Regulations ("EAR"), You will not (1) export, re-export or release to a national of a country in Country Groups D:1, E:1 or E:2 any restricted technology, software, or source code You receive hereunder, or (2) export to Country Groups D:1, E:1 or E:2 the direct product of such technology or software, if such

foreign produced direct product is subject to national security
controls as identified on the Commerce Control List (currently found
in Supplement 1 to Part 774 of EAR). For the most current Country
Group listings, or for additional information about the EAR or Your
obligations under those regulations, please refer to the U.S. Bureau
of Industry and Securitys website at ttp://www.bis.doc.gov/.
The following XC4000 firmware file "dvb-fe-xc4000-1.4.1.fw" was
created based on version 1.4 of "xc4000_firmwares.h".

Firmware provided as part of an XC4000 Linux developers kit by Brian
Mathews <bmathews@xceive.com> to Devin Heitmueller
<dheitmueller@kernellabs.org> on July 1, 2009.

The code was released by Xceive under the following license:

// Copyright (c) 2009, Xceive Corporation <info@xceive.com>
//
// Permission to use, copy, modify, and/or distribute this software, only
// for use with Xceive ICs, for any purpose with or without fee is hereby
// granted, provided that the above copyright notice and this permission
// notice appear in all source code copies.
//
// THE SOFTWARE IS PROVIDED "AS IS" AND THE AUTHOR DISCLAIMS ALL WARRANTIES
// WITH REGARD TO THIS SOFTWARE INCLUDING ALL IMPLIED WARRANTIES OF
// MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR
// ANY SPECIAL, DIRECT, INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES
// WHATSOEVER RESULTING FROM
LOSS OF USE, DATA OR PROFITS, WHETHER IN AN
// ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF
// OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

License For Customer Use of NVIDIA Software

IMPORTANT NOTICE -- READ CAREFULLY: This License For Customer Use of NVIDIA Software ("LICENSE") is the agreement which governs use of the software of NVIDIA Corporation and its subsidiaries ("NVIDIA") downloadable herefrom, including computer software and associated printed materials ("SOFTWARE"). By downloading, installing, copying, or otherwise using the SOFTWARE, you agree to be bound by the terms of this LICENSE. If you do not agree to the terms of this LICENSE, do not download the SOFTWARE.

RECITALS

Use of NVIDIA's products requires three elements: the SOFTWARE, the hardware, and a personal computer. The SOFTWARE is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE may be protected by various patents, and is not sold, and instead is only licensed for use, strictly in accordance with this document. The hardware is protected by various patents,
and is sold, but this agreement does not cover that sale, since it may not necessarily be sold as a package with the SOFTWARE. This agreement sets forth the terms and conditions of the SOFTWARE LICENSE only.

1. DEFINITIONS

1.1 Customer. Customer means the entity or individual that downloads or otherwise obtains the SOFTWARE.

2. GRANT OF LICENSE

2.1 Rights and Limitations of Grant. NVIDIA hereby grants Customer the following non-exclusive, non-transferable right to use the SOFTWARE, with the following limitations:

2.1.1 Rights. Customer may install and use multiple copies of the SOFTWARE on a shared computer or concurrently on different computers, and make multiple back-up copies of the SOFTWARE, solely for Customer's use within Customer's Enterprise. "Enterprise" shall mean individual use by Customer or any legal entity (such as a corporation or university) and the subsidiaries it owns by more than fifty percent (50%).

2.1.2 Open Source Exception. Notwithstanding
the foregoing terms
of Section 2.1.1, SOFTWARE may be copied and redistributed solely for use on operating systems distributed under the terms of an OSI-approved open source license as listed by the Open Source Initiative at http://opensource.org, provided that the binary files thereof are not modified, and Customer provides a copy of this license with the SOFTWARE.

2.1.3 Limitations.

No Reverse Engineering. Customer may not reverse engineer, decompile, or disassemble the SOFTWARE, nor attempt in any other manner to obtain the source code.

Usage. SOFTWARE is licensed only for use with microprocessor(s) which have been (i) designed by NVIDIA and (ii) either (a) sold by or (b) licensed by NVIDIA. Customer shall not use SOFTWARE in conjunction with, nor cause SOFTWARE to be executed by, any other microprocessor.

No Translation. Customer shall not translate SOFTWARE, nor cause or permit SOFTWARE to be translated, from the architecture or language in which it is originally provided
by NVIDIA, into any other architecture or language.

No Rental. Customer may not rent or lease the SOFTWARE to someone else.

3. TERMINATION

This LICENSE will automatically terminate if Customer fails to comply with any of the terms and conditions hereof. In such event, Customer must destroy all copies of the SOFTWARE and all of its component parts.

Defensive Suspension. If Customer commences or participates in any legal proceeding against NVIDIA, then NVIDIA may, in its sole discretion, suspend or terminate all license grants and any other rights provided under this LICENSE during the pendency of such legal proceedings.

4. COPYRIGHT

All title and copyrights in and to the SOFTWARE (including but not limited to all images, photographs, animations, video, audio, music, text, and other information incorporated into the SOFTWARE), the accompanying printed materials, and any copies of the SOFTWARE, are owned by NVIDIA, or its suppliers. The SOFTWARE is protected by copyright laws
and international treaty provisions. Accordingly,
Customer is required to treat the SOFTWARE like any other copyrighted material, except as otherwise allowed pursuant to this LICENSE and that it may make one copy of the SOFTWARE solely for backup or archive purposes.

5. APPLICABLE LAW

This agreement shall be deemed to have been made in, and shall be

construed pursuant to, the laws of the State of California.

6. DISCLAIMER OF WARRANTIES AND LIMITATION ON LIABILITY

6.1 No Warranties. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, THE SOFTWARE IS PROVIDED "AS IS" AND NVIDIA AND ITS SUPPLIERS DISCLAIM ALL WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

6.2 No Liability for Consequential Damages. TO THE MAXIMUM EXTENT PERMITTED BY APPLICABLE LAW, IN NO EVENT SHALL NVIDIA OR ITS SUPPLIERS BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES WHATSOEVER (INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF BUSINESS PROFITS, BUSINESS INTERRUPTION, LOSS OF BUSINESS INFORMATION, OR ANY OTHER PECUNIARY LOSS) ARISING OUT OF THE USE OF OR INABILITY TO USE THE SOFTWARE, EVEN IF NVIDIA HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. MISCELLANEOUS

The United Nations Convention on Contracts for the International Sale of Goods is specifically disclaimed. If any provision of this LICENSE is inconsistent with, or cannot be fully enforced under, the law, such provision will be construed as limited to the extent necessary to be consistent with and fully enforceable under the law. This agreement is the final, complete and exclusive agreement between the parties relating to the subject matter hereof, and supersedes all prior or contemporaneous understandings and agreements relating to such subject matter, whether oral or written. Customer agrees that it will not ship, transfer or export the SOFTWARE into any country, or use the SOFTWARE in any manner, prohibited by the United States Bureau of Export Administration or any export laws, restrictions or regulations. This LICENSE may only be modified in writing signed by an authorized officer of NVIDIA.

4) Nothing shall obligate Silicon Labs to provide you with source code for Software licensed and provided to you in object code.

Limited patent license. Silicon Labs grants a worldwide, non-exclusive, no-charge, royalty-free patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer this Software, where such license applies only to those patent claims licensable by Silicon Labs that are necessarily infringed by this Software. This patent license shall not apply to any combinations that include this Software. No hardware is licensed hereunder.

If you institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Software itself infringes your patent(s), then your rights granted under this license shall terminate as of the date such litigation is filed.

DISCLAIMER. THIS SOFTWARE IS PROVIDED BY SILICON LABS "AS IS." ANY EXPRESS OR
IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL SILICON LABS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.IN NO EVENT SHALL SILICON LABS TOTAL LIABILITY TO YOU, WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE), OR OTHERWISE, EXCEED THE PRICE PAID BY YOU FOR THE SOFTWARE.

The following software may be included in this product: wpa_supplicant

LICENSE ISSUES
==========

The OpenSSL toolkit stays under a dual license, i.e. both the conditions of the OpenSSL License and the original SSLeay license apply to the toolkit. See below for the actual license texts. Actually both licenses are BSD-style Open Source licenses. In case of any license issues related to OpenSSL please contact openssl-core@openssl.org.

OpenSSL License

--------------------------------------------------------------------------------

/*-
 *  COPYRIGHT (C) 1986 Gary S. Brown.  You may use this program, or
*  code or tables extracted from it, as desired without restriction.
*
*  First, the polynomial itself and its table of feedback terms.  The
*  polynomial is
*  X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
*  Note that we take it "backwards" and put the highest-order term in
*  the lowest-order bit.  The X^32 term is "implied"; the LSB is the
*  X^31 term, etc.  The X^0 term (usually shown as "+1") results in
*  the MSB being 1
*
*  Note that the usual hardware shift register implementation, which
*  is what we're using (we're merely optimizing it by doing eight-bit
*  chunks at a time) shifts bits into the lowest-order term.  In our
*  implementation, that means shifting towards the right.  Why do we
*  do it this way?  Because the calculated CRC must be transmitted in
*  order from highest-order
 term to lowest-order term.  UARTs transmit
*  characters in order from LSB to MSB.  By storing the CRC this way
*  we hand it to the UART in the order low-byte to high-byte; the UART
*  sends each low-bit to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes
*
*      The table can be generated at runtime if desired; code to do so
*      is shown later.  It might not be obvious, but the feedback
*      terms simply represent the results of eight shift/xor opera
*      tions for all combinations of data and CRC register values
*
*      The values must be right-shifted by eight bits by the "updcrc
*      logic; the shift must be unsigned (bring in zeroes).  On some
*      hardware you could probably optimize the shift in assembler by
*      using byte-swap instructions
```

```
*      polynomial
 $edb88320
*
```

```
/*
  The AES algorithm Rijndael implemented for block and key sizes of 128,
  192 and 256 bits (16, 24 and 32 bytes) by Brian Gladman.

  I retain copyright in this code but I encourage its free use provided
  that I don't carry any responsibility for the results. I am especially
  happy to see it used in free and open source software. If you do use
  it I would appreciate an acknowledgement of its origin in the code or
  the product that results and I would also appreciate knowing a liitle
  about the use to which it is being put. I am grateful to Frank Yellin
  for some ideas that are used in this implementation.

  Dr B. R. Gladman <brg@gladman.uk.net> 1st June 2001.

The following XC500 firmware file "dvb-fe-xc5000-1.6.114.fw" was
created based on "xc5000_firmwares_32000Khz.h".

Firmware provided as part of an XC5000 Linux developers kit by Brian
Mathews <bmathews@xceive.com> to Devin Heitmueller <dheitmueller@linuxtv.org>
on July 1, 2009.

The code was released by Xceive under the following license:

// Copyright (c) 2009, Xceive Corporation <info@xceive.com>
//
// Permission to use, copy, modify, and/or distribute this software, only
// for use with Xceive ICs, for any purpose with or without fee is hereby
// granted, provided that the above copyright notice and this permission
// notice appear in all source code copies.

//
// THE SOFTWARE IS PROVIDED "AS IS" AND THE AUTHOR DISCLAIMS ALL WARRANTIES
// WITH REGARD TO THIS SOFTWARE INCLUDING ALL IMPLIED WARRANTIES OF
// MERCHANTABILITY AND FITNESS. IN NO EVENT SHALL THE AUTHOR BE LIABLE FOR
// ANY SPECIAL, DIRECT, INDIRECT, OR CONSEQUENTIAL DAMAGES OR ANY DAMAGES
// WHATSOEVER RESULTING FROM LOSS OF
USE, DATA OR PROFITS, WHETHER IN AN
// ACTION OF CONTRACT, NEGLIGENCE OR OTHER TORTIOUS ACTION, ARISING OUT OF
// OR IN CONNECTION WITH THE USE OR PERFORMANCE OF THIS SOFTWARE.

Amlogic Co., Inc. grants permission to use and redistribute
aforementioned firmware files for the use with devices containing
Amlogic chipsets, but not as part of the Linux kernel or in any other
form which would require these files themselves to be covered by the
terms of the GNU General Public License or the GNU Lesser General
Public License.

These firmware files are distributed in the hope that they will be
useful, but are provided WITHOUT ANY WARRANTY, INCLUDING BUT NOT
LIMITED TO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A
PARTICULAR PURPOSE.

*
* This file defines the cryptographic functions that need to be implemented
* for wpa_supplicant and hostapd. When TLS is not used,
 internal
* implementation of MD5, SHA1, and AES is used and no external libraries are
* required. When TLS is enabled (e.g., by enabling EAP-TLS or EAP-PEAP), the
* crypto library used by the TLS implementation is expected to be used for
* non-TLS needs, too, in order to save space by not implementing these
* functions twice.
*
* Wrapper code for using each crypto library is in its own file (crypto*.c)
* and one of these files is build and linked in to provide the functions
* defined here.

==========

File: ieee_crc32.c

```
/*
*  COPYRIGHT (C)
 1986 Gary S. Brown.  You may use this program, or
*  code or tables extracted from it, as desired without restriction.
*
*  First, the polynomial itself and its table of feedback terms.  The
*  polynomial is
*  X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
*  Note that we take it "backwards" and put the highest-order term in
*  the lowest-order bit.  The X^32 term is "implied"; the LSB is the
*  X^31 term, etc.  The X^0 term (usually shown as "+1") results in
*  the MSB being 1
*
*  Note that the usual hardware shift register
 implementation, which
*  is what we're using (we're merely optimizing it by doing eight-bit
*  chunks at a time) shifts bits into the lowest-order term.  In our
*  implementation, that means shifting towards the right.  Why do we
*  do it this way?  Because the calculated CRC must be transmitted in
*  order from highest-order term to lowest-order term.  UARTs transmit
*  characters in order from LSB to MSB.  By storing the CRC this way
*  we hand it to the UART in the order low-byte to high-byte; the UART
*  sends each low-bit to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes

*
*      The table can be generated at runtime if desired; code to do so
*      is shown later.  It might not be obvious, but the feedback
*      terms simply represent the results of eight shift/xor opera
*      tions for all combinations of data and CRC register values
*
*      The values must be right-shifted by eight bits by the "updcrc
```

```
*      logic; the shift must be unsigned (bring in zeroes).  On some
*      hardware you could probably optimize the shift in assembler by
*      using byte-swap instructions
*      polynomial $edb88320
*
*

* CRC32 code derived from work by Gary S. Brown.
*/

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION,
 AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the
copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source,
and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the
original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

1. You must give any other recipients of the Work or Derivative Works a copy of this License; and

2. You must cause any modified files to carry prominent notices stating that You changed the files; and

3. You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

4. If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must

include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names,
trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless

required by applicable law (such as deliberate and grossly negligent
acts)
 or agreed to in writing, shall any Contributor be liable to You
for damages, including any direct, indirect, special, incidental, or
consequential damages of any character arising as a result of this
License or out of the use or inability to use the Work (including but
not limited to damages for loss of goodwill, work stoppage, computer
failure or malfunction, or any and all other commercial damages or
losses), even if such Contributor has been advised of the possibility
of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer, and
charge a fee for, acceptance of support, warranty, indemnity, or other
liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only on
Your own behalf and on Your sole responsibility, not on behalf of any
other Contributor, and only if You agree to indemnify, defend, and
hold each Contributor harmless for
 any liability incurred by, or
claims asserted against, such Contributor by reason of your accepting
any such warranty or additional liability.

END OF TERMS AND CONDITIONS

//
// This code implements the MD5 message-digest algorithm.
// The algorithm is due to Ron Rivest. This code was
// written by Colin Plumb in 1993, no copyright is claimed.
// This code is in the public domain; do with it what you wish.
//
// Equivalent code is available from RSA Data Security, Inc.
// This code has been tested against that, and is equivalent,
// except that you don't need to include two pages of legalese
// with every copy.
//
// To compute the message digest of a chunk of bytes, declare an
// MD5Context structure, pass it to MD5Init, call MD5Update as
// needed on buffers full of bytes, and then call MD5Final, which
// will fill a supplied 16-byte array with
 the digest.
//

File:aes.c

/*
 * For this file, which was received with alternative licensing options for
* distribution, Qualcomm Atheros, Inc. has selected the BSD license.
*/

/*
* AES (Rijndael) cipher
*
* Modifications to public domain implementation:
* - support only 128-bit keys
* - cleanup
* - use C pre-processor to make it easier to change S table access
* - added option (AES_SMALL_TABLES) for reducing code size by about 8 kB at
*   cost of reduced throughput (quite small difference on Pentium 4,
*   10-25% when using -O1 or -O2 optimization)
*

==========
===

File: md5.c

//
//
// This code implements the MD5 message-digest algorithm.
// The algorithm is due to Ron Rivest. This code was
// written by Colin Plumb in 1993, no copyright is claimed.
// This code is in the public domain; do with it what you wish.
//
// Equivalent code is available from RSA Data Security, Inc.
// This code has been tested against that, and is equivalent,
// except that you don't need to include two pages of legalese
// with every copy.
//
// To compute the message digest of a chunk of bytes, declare an
// MD5Context structure, pass it to MD5Init, call MD5Update as
// needed on buffers full of bytes, and then call MD5Final, which
// will fill a supplied 16-byte array with the digest.
//

File: aes.c

```
/*
* For this file, which was received with alternative licensing options for
* distribution, Qualcomm Atheros, Inc. has selected the BSD license.
*/

/*
* AES (Rijndael) cipher
*
* Modifications to public domain implementation:
* - support only 128-bit
 keys
* - cleanup
* - use C pre-processor to make it easier to change S table access
* - added option (AES_SMALL_TABLES) for reducing code size by about 8 kB at
*   cost of reduced throughput (quite small difference on Pentium 4,
*   10-25% when using -O1 or -O2 optimization)
*
* Copyright (c) 2003-2005, Jouni Malinen <jkmaline@cc.hut.fi>

Copyright (c) 2018, Cavium, Inc. All rights reserved.

Software License Agreement

ANY USE, REPRODUCTION, OR DISTRIBUTION OF THE ACCOMPANYING BINARY SOFTWARE CONSTITUTES LICENSEEE'S ACCEPTANCE OF THE TERMS AND CONDITIONS OF THIS AGREEMENT.

Licensed Software. Subject to the terms and conditions of this Agreement, Cavium, Inc. ("Cavium") grants to Licensee a worldwide, non-exclusive, and royalty-free license to use, reproduce, and distribute the binary software in its complete and unmodified form as provided by Cavium.

Restrictions. Licensee must reproduce the Cavium copyright notice above with each binary software copy. Licensee must not reverse engineer, decompile, disassemble or modify in any way the binary software. Licensee must not use the binary software in violation of any applicable law or regulation. This Agreement shall automatically terminate upon Licensee's breach of any term or condition of this Agreement in which case, Licensee shall destroy all copies of the binary software.

Warranty Disclaimer. THE LICENSED SOFTWARE IS OFFERED "AS IS," AND CAVIUM GRANTS AND LICENSEE RECEIVES NO WARRANTIES OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY, OR BY COURSE OF COMMUNICATION OR DEALING WITH LICENSEE, OR OTHERWISE. CAVIUM AND ITS LICENSORS SPECIFICALLY DISCLAIM ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, OR NONINFRINGEMENT OF THIRD PARTY RIGHTS, CONCERNING THE LICENSED SOFTWARE, DERIVATIVE WORKS, OR ANY DOCUMENTATION PROVIDED WITH THE FOREGOING. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, CAVIUM DOES NOT WARRANT THAT THE LICENSED SOFTWARE IS ERROR-FREE OR WILL OPERATE WITHOUT INTERRUPTION, AND CAVIUM GRANTS NO WARRANTY REGARDING ITS USE OR THE RESULTS THEREFROM, INCLUDING ITS CORRECTNESS, ACCURACY, OR RELIABILITY.

Limitation of Liability. IN NO EVENT WILL LICENSEE, CAVIUM, OR ANY OF CAVIUM'S LICENSORS HAVE ANY LIABILITY HEREUNDER FOR ANY INDIRECT, SPECIAL, OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER FOR BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), OR OTHERWISE, ARISING OUT OF THIS AGREEMENT, INCLUDING DAMAGES FOR LOSS OF PROFITS, OR THE COST OF PROCUREMENT OF SUBSTITUTE GOODS, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Export and Import Laws. Licensee acknowledges and agrees that the Licensed Software (including technical data and related technology) may be controlled by

the export control laws, rules, regulations, restrictions and national security controls of the United States and other applicable foreign agencies (the "Export Controls"), and agrees not export or re-export, or allow the export or re-export of export-controlled the Licensed
Software (including technical data
and related technology) or any copy, portion or direct product of the foregoing in violation of the Export Controls. Licensee hereby represents that (i) Licensee is not an entity or person to whom provision of the Licensed Software (including technical data and related technology) is restricted or prohibited by the Export Controls; and (ii) Licensee will not export, re-export or otherwise transfer the export-controlled Licensed Software (including technical data and related technology) in violation of U.S. sanction programs or export control regulations to (a) any country, or national or resident of any country, subject to a United States trade embargo, (b) any person or entity to whom shipment is restricted or prohibited by the Export Controls, or (c) anyone who is engaged in activities related to the design, development, production, or use of nuclear materials, nuclear facilities, nuclear weapons, missiles or chemical or biological weapons.
***** INTEL BINARY FIRMWARE RELEASE LICENCE **********

Copyright (c) 2014-15 Intel Corporation.
All rights reserved.

Redistribution.

Redistribution and use in binary form, without modification, are permitted provided that the following conditions are met:

* Redistributions must reproduce the above copyright notice and the following disclaimer in the documentation and/or other materials provided with the distribution.
* Neither the name of Intel Corporation nor the names of its suppliers may be used to endorse or promote products derived from this software without specific prior written permission.
* No reverse engineering, decompilation, or disassembly of this software is permitted.

Limited patent license.

Intel Corporation grants a world-wide, royalty-free, non-exclusive license under patents it now or hereafter owns or controls to make, have made, use, import, offer to sell and sell ("Utilize") this software, but solely to
the
extent that any such patent is necessary to Utilize the software alone. The patent license shall not apply to any combinations which include this software. No hardware per se is licensed hereunder.

DISCLAIMER.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT
LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY
OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF
SUCH DAMAGE.
PLEASE READ THIS LICENSE AGREEMENT ("AGREEMENT") CAREFULLY. THIS AGREEMENT IS
A BINDING LEGAL AGREEMENT ENTERED INTO BY AND BETWEEN YOU (OR IF YOU ARE
ENTERING INTO THIS AGREEMENT ON BEHALF OF AN ENTITY, THEN THE ENTITY THAT YOU
REPRESENT) AND QUALCOMM TECHNOLOGIES, INC. ("QTI" "WE" "OUR" OR "US"). THIS IS
THE AGREEMENT THAT APPLIES TO YOUR USE OF THE DESIGNATED AND/OR LINKED
APPLICATIONS, THE ENCLOSED QUALCOMM TECHNOLOGIES' MATERIALS, INCLUDING RELATED
DOCUMENTATION AND ANY UPDATES OR IMPROVEMENTS THEREOF
(COLLECTIVELY, "MATERIALS"). BY USING OR COMPLETING THE INSTALLATION OF THE
MATERIALS, YOU ARE ACCEPTING THIS AGREEMENT AND YOU AGREE TO BE BOUND BY ITS
TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO THESE TERMS, QTI IS UNWILLING TO
AND DOES NOT LICENSE THE MATERIALS TO YOU. IF YOU DO NOT AGREE TO THESE TERMS
YOU MUST DISCONTINUE THE INSTALLATION PROCESS AND YOU MAY NOT USE THE MATERIALS
OR RETAIN ANY COPIES OF THE MATERIALS. ANY USE OR POSSESSION OF THE MATERIALS
BY YOU IS SUBJECT
TO THE TERMS AND CONDITIONS SET FORTH IN THIS AGREEMENT.

1. RIGHT TO USE DELIVERABLES; RESTRICTIONS.

1.1 License. Subject to the terms and conditions of this Agreement,
including, without limitation, the restrictions, conditions, limitations and
exclusions set forth in this Agreement, QTI hereby grants to you a
nonexclusive, limited license under QTI's copyrights to: (i) install and use
the Materials; and (ii) to reproduce and redistribute the binary code portions
of the Materials (the "Redistributable Binary Code"). You may make and use a
reasonable number of copies of any documentation.

1.2 Redistribution Restrictions. Distribution of the Redistributable Binary
Code is subject to the following restrictions: (i) Redistributable Binary Code
may only be distributed in binary format and may not be distributed in source
code format:; (ii) the Redistributable Binary Code may only operate in
conjunction with platforms incorporating Qualcomm Technologies, Inc.
chipsets;
(iii) redistribution of the Redistributable Binary Code must include the .txt
file setting forth the terms and condition of this Agreement; (iv) you may not
use Qualcomm Technologies' or its affiliates or subsidiaries name, logo or
trademarks; and (v) copyright, trademark, patent and any other notices that

appear on the Materials may not be removed or obscured.

1.3 Additional Restrictions. Except as expressly permitted by this Agreement, you shall have no right to sublicense, transfer or otherwise disclose the Materials to any third party. You shall not reverse engineer, reverse assemble, reverse translate, decompile or reduce to source code form any portion of the Materials provided in object code form or executable form. Except for the purposes expressly permitted in this Agreement, You shall not use the Materials for any other purpose. QTI (or its licensors) shall retain title and all ownership rights in and to the Materials and any alterations, modifications (including all derivative works), translations or adaptations made of the Materials, and all copies thereof, and nothing herein shall be deemed to grant any right to You under any of QTI's or its affiliates' patents. You shall not subject the Materials to any third party license terms (e.g., open source license terms). You shall not use the Materials for the purpose of identifying or providing evidence to support any potential patent infringement claim against QTI, its affiliates, or any of QTI's or QTI's affiliates' suppliers and/or direct or indirect customers. QTI hereby reserves all rights not expressly granted herein.

1.4 Third Party Software and Materials. The Software may contain or link to certain software and/or materials that are written or owned by third parties. Such third party code and materials may be licensed under separate or different terms and conditions and are not licensed to you under the terms of this Agreement.
You agree to comply with all terms and conditions imposed on you in the applicable third party licenses. Such terms and conditions may impose certain obligations on you as a condition to the permitted use of such third party code and materials. QTI does not represent or warrant that such third party licensors have or will continue to license or make available their code and materials to you.

1.5 Feedback. QTI may from time to time receive suggestions, feedback or other information from You regarding the Materials. Any suggestions, feedback or other disclosures received from You are and shall be entirely voluntary on the part of You. Notwithstanding any other term in this Agreement, QTI shall be free to use suggestions, feedback or other information received from You, without obligation of any kind to You. The Parties agree that all inventions, product improvements, and modifications conceived of or made by QTI that are based, either in whole or in part,
on ideas, feedback, suggestions, or
recommended improvements received from You are the exclusive property of QTI, and all right, title and interest in and to any such inventions, product improvements, and modifications will vest solely in QTI.

1.6 No Technical Support. QTI is under no obligation to provide any form of technical support for the Materials, and if QTI, in its sole discretion, chooses to provide any form of support or information relating to the

Materials, such support and information shall be deemed confidential and proprietary to QTI.

2. WARRANTY DISCLAIMER. YOU EXPRESSLY ACKNOWLEDGE AND AGREE THAT THE USE OF THE MATERIALS IS AT YOUR SOLE RISK. THE MATERIALS AND TECHNICAL SUPPORT, IF ANY, ARE PROVIDED "AS IS" AND WITHOUT WARRANTY OF ANY KIND, WHETHER EXPRESS OR IMPLIED. QTI ITS LICENSORS AND AFFILIATES MAKE NO WARRANTIES, EXPRESS OR IMPLIED, WITH RESPECT TO THE MATERIALS OR ANY OTHER INFORMATION OR DOCUMENTATION
PROVIDED UNDER THIS AGREEMENT, INCLUDING
BUT NOT LIMITED TO ANY WARRANTY OF
MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR AGAINST INFRINGEMENT, OR ANY EXPRESS OR IMPLIED WARRANTY ARISING OUT OF TRADE USAGE OR OUT OF A COURSE OF DEALING OR COURSE OF PERFORMANCE. NOTHING CONTAINED IN THIS AGREEMENT SHALL BE CONSTRUED AS (I) A WARRANTY OR REPRESENTATION BY QTI, ITS LICENSORS OR AFFILIATES AS TO THE VALIDITY OR SCOPE OF ANY PATENT, COPYRIGHT OR OTHER INTELLECTUAL PROPERTY RIGHT OR (II) A WARRANTY OR REPRESENTATION BY QTI THAT ANY MANUFACTURE OR USE WILL BE FREE FROM INFRINGEMENT OF PATENTS, COPYRIGHTS OR OTHER INTELLECTUAL PROPERTY RIGHTS OF OTHERS, AND IT SHALL BE THE SOLE RESPONSIBILITY OF YOU TO MAKE SUCH DETERMINATION AS IS NECESSARY WITH RESPECT TO THE ACQUISITION OF LICENSES UNDER PATENTS AND OTHER INTELLECTUAL PROPERTY OF THIRD PARTIES.

3. NO OTHER LICENSES OR INTELLECTUAL PROPERTY RIGHTS. Neither this Agreement, nor any act by QTI or any of its affiliates pursuant to this Agreement or relating to the Materials
(including, without limitation, the provision by QTI
or its affiliates of the Materials), shall provide to You any license or any other rights whatsoever under any patents, trademarks, trade secrets, copyrights or any other intellectual property of QTI or any of its affiliates, except for the copyright rights expressly licensed under this Agreement. You understand and agree that:

(i) Neither this Agreement, nor delivery of the Materials, grants any right to practice, or any other right at all with respect to, any patent of QTI or any of its affiliates; and

(ii) A separate license agreement from QUALCOMM Incorporated is needed to use or practice any patent of QUALCOMM Incorporated. You agree not to contend in any context that, as a result of the provision or use of the Materials, either QTI or any of its affiliates has any obligation to extend, or You or any other party has obtained any right to, any license, whether express or implied, with respect to any patent
of QTI or any of its affiliates for any purpose.

4. TERMINATION. This Agreement shall be effective upon acceptance, or access or use of the Materials (whichever occurs first) by You and shall continue until terminated. You may terminate the Agreement at any time by deleting and

destroying all copies of the Materials and all related information in Your possession or control. This Agreement terminates immediately and automatically, with or without notice, if You fail to comply with any provision hereof. Additionally, QTI may at any time terminate this Agreement, without cause, upon notice to You. Upon termination You must, to the extent possible, delete or destroy all copies of the Materials in Your possession and the license granted to You in this Agreement shall terminate. Sections 1.2 through 10 shall survive the termination of this Agreement. In the event that any restrictions, conditions, limitations are found to be either invalid or unenforceable, the rights granted to You in
Section 1 (License) shall be null, void and ineffective
from the Effective Date, and QTI shall also have the right to terminate this Agreement immediately, and with retroactive effect to the effective date.

5. LIMITATION OF LIABILITY. IN NO EVENT SHALL QTI, QTI's AFFILIATES OR ITS LICENSORS BE LIABLE TO YOU FOR ANY INCIDENTAL, CONSEQUENTIAL OR SPECIAL DAMAGES, INCLUDING BUT NOT LIMITED TO ANY LOST PROFITS, LOST SAVINGS, OR OTHER INCIDENTAL DAMAGES, ARISING OUT OF THE USE OR INABILITY TO USE, OR THE DELIVERY OR FAILURE TO DELIVER, ANY OF THE DELIVERABLES, OR ANY BREACH OF ANY OBLIGATION UNDER THIS AGREEMENT, EVEN IF QTI HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. THE FOREGOING LIMITATION OF LIABILITY SHALL REMAIN IN FULL FORCE AND EFFECT REGARDLESS OF WHETHER YOUR REMEDIES HEREUNDER ARE DETERMINED TO HAVE FAILED OF THEIR ESSENTIAL PURPOSE. THE ENTIRE LIABILITY OF QTI, QTI's AFFILIATES AND ITS LICENSORS, AND THE SOLE AND EXCLUSIVE REMEDY OF YOU, FOR ANY CLAIM OR CAUSE OF ACTION
ARISING HEREUNDER (WHETHER IN CONTRACT, TORT, OR OTHERWISE) SHALL NOT EXCEED US$50.

6. INDEMNIFICATION. You agree to indemnify and hold harmless QTI and its officers, directors, employees and successors and assigns against any and all third party claims, demands, causes of action, losses, liabilities, damages, costs and expenses, incurred by QTI (including but not limited to costs of defense, investigation and reasonable attorney's fees) arising out of, resulting from or related to: (i) any breach of this Agreement by You; and (ii) your acts, omissions, products and services. If requested by QTI, You agree to defend QTI in connection with any third party claims, demands, or causes of action resulting from, arising out of or in connection with any of the foregoing.

7. ASSIGNMENT. You shall not assign this Agreement or any right or interest under this Agreement, nor delegate any obligation to be performed under this Agreement, without QTI's prior written consent. For purposes of
this Section 7,
an "assignment" by You under this Section shall be deemed to include, without limitation, any merger, consolidation, sale of all or substantially all of its assets, or any substantial change in the management or control of You. Any attempted assignment in contravention of this Section 9 shall be void. QTI may freely assign this Agreement or delegate any or all of its rights and obligations hereunder to any third party.

8. COMPLIANCE WITH LAWS; APPLICABLE LAW. You agree to comply with all applicable local, international and national laws and regulations and with U.S. Export Administration Regulations, as they apply to the subject matter of this Agreement. This Agreement is governed by the laws of the State of California, excluding California's choice of law rules.

9. CONTRACTING PARTIES. If the Materials are downloaded on any computer owned by a corporation or other legal entity, then this Agreement is formed by and between QTI and such entity. The individual accepting
the terms of this
Agreement represents and warrants to QTI that they have the authority to bind such entity to the terms and conditions of this Agreement.

10. MISCELLANEOUS PROVISIONS. This Agreement, together with all exhibits attached hereto, which are incorporated herein by this reference, constitutes the entire agreement between QTI and You and supersedes all prior negotiations, representations and agreements between the parties with respect to the subject matter hereof. No addition or modification of this Agreement shall be effective unless made in writing and signed by the respective representatives of QTI and You. The restrictions, limitations, exclusions and conditions set forth in this Agreement shall apply even if QTI or any of its affiliates becomes aware of or fails to act in a manner to address any violation or failure to comply therewith. You hereby acknowledge and agree that the restrictions, limitations, conditions and exclusions imposed in this Agreement on
the rights granted in
this Agreement are not a derogation of the benefits of such rights. You further acknowledges that, in the absence of such restrictions, limitations, conditions and exclusions, QTI would not have entered into this Agreement with You. Each party shall be responsible for and shall bear its own expenses in connection with this Agreement. If any of the provisions of this Agreement are determined to be invalid, illegal, or otherwise unenforceable, the remaining provisions shall remain in full force and effect. This Agreement is entered into solely in the English language, and if for any reason any other language version is prepared by any party, it shall be solely for convenience and the English version shall govern and control all aspects. If You are located in the province of Quebec, Canada, the following applies: The Parties hereby confirm they have requested this Agreement and all related documents be prepared in English.

Software License Agreement

ANY USE, REPRODUCTION, OR DISTRIBUTION OF THE ACCOMPANYING BINARY SOFTWARE
CONSTITUTES LICENSEEE'S ACCEPTANCE OF THE TERMS AND CONDITIONS OF THIS AGREEMENT.

Licensed Software. Subject to the terms and conditions of this Agreement, Cavium, Inc. ("Cavium") grants to Licensee a worldwide, non-exclusive, and royalty-free license to use, reproduce, and distribute the binary software in its complete and unmodified form as provided by Cavium.

Restrictions. Licensee must reproduce the Cavium copyright notice above with each binary software copy. Licensee must not reverse engineer, decompile, disassemble or modify in any way the binary software. Licensee must not use the binary software in violation of any applicable law or regulation. This Agreement shall automatically terminate upon Licensee's breach of any term or condition of this Agreement in which case, Licensee shall destroy all copies of the binary software.

Warranty
Disclaimer. THE LICENSED SOFTWARE IS OFFERED "AS IS," AND CAVIUM GRANTS AND LICENSEE RECEIVES NO WARRANTIES OF ANY KIND, WHETHER EXPRESS, IMPLIED, STATUTORY, OR BY COURSE OF COMMUNICATION OR DEALING WITH LICENSEE, OR OTHERWISE. CAVIUM AND ITS LICENSORS SPECIFICALLY DISCLAIM ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, TITLE, OR NONINFRINGEMENT OF THIRD PARTY RIGHTS, CONCERNING THE LICENSED SOFTWARE, DERIVATIVE WORKS, OR ANY DOCUMENTATION PROVIDED WITH THE FOREGOING. WITHOUT LIMITING THE GENERALITY OF THE FOREGOING, CAVIUM DOES NOT WARRANT THAT THE LICENSED SOFTWARE IS ERROR-FREE OR WILL OPERATE WITHOUT INTERRUPTION, AND CAVIUM GRANTS NO WARRANTY REGARDING ITS USE OR THE RESULTS THEREFROM, INCLUDING
ITS CORRECTNESS, ACCURACY, OR RELIABILITY.

Limitation of Liability. IN NO EVENT WILL LICENSEE, CAVIUM, OR ANY OF CAVIUM'S LICENSORS HAVE ANY LIABILITY HEREUNDER FOR ANY INDIRECT, SPECIAL, OR CONSEQUENTIAL DAMAGES, HOWEVER CAUSED AND ON ANY THEORY
OF LIABILITY, WHETHER
FOR BREACH OF CONTRACT, TORT (INCLUDING NEGLIGENCE), OR OTHERWISE, ARISING OUT OF THIS AGREEMENT, INCLUDING DAMAGES FOR LOSS OF PROFITS, OR THE COST OF PROCUREMENT OF SUBSTITUTE GOODS, EVEN IF SUCH PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Export and Import Laws. Licensee acknowledges and agrees that the Licensed Software (including technical data and related technology) may be controlled by the export control laws, rules, regulations, restrictions and national security controls of the United States and other applicable foreign agencies (the "Export Controls"), and agrees not export or re-export, or allow the export or re-export of export-controlled the Licensed Software (including technical data and related technology) or any copy, portion or direct product of the foregoing in violation of the Export Controls. Licensee hereby represents that
(i) Licensee is not an entity or person to whom provision of the Licensed Software (including technical
data and related technology) is restricted or
prohibited by the Export Controls; and (ii) Licensee will not export, re-export

or otherwise transfer the export-controlled Licensed Software (including technical data and related technology) in violation of U.S. sanction programs or export control regulations to (a) any country, or national or resident of any country, subject to a United States trade embargo, (b) any person or entity to whom shipment is restricted or prohibited by the Export Controls, or (c) anyone who is engaged in activities related to the design, development, production, or use of nuclear materials, nuclear facilities, nuclear weapons, missiles or chemical or biological weapons.

All rights reserved not granted herein.

Limited License.

Texas Instruments Incorporated grants a world-wide, royalty-free, non-exclusive license under copyrights and patents it now or hereafter owns or controls to make, have made, use, import, offer to sell and sell ("Utilize") this software subject to the terms herein. With respect to the foregoing patent license, such license is granted solely to the extent that any such patent is necessary to Utilize the software alone. The patent license shall not apply to any combinations which include this software, other than combinations with devices manufactured by or for TI (TI Devices). No hardware patent is licensed hereunder.

Redistributions must preserve existing copyright notices and reproduce this license (including the above copyright notice and the disclaimer and (if applicable) source code license limitations below) in the documentation and/or other materials provided with the distribution

Redistribution
and use in binary form, without modification, are permitted
provided that the following conditions are met:

* No reverse engineering, decompilation, or disassembly of this software is permitted with respect to any software provided in binary form.

* any redistribution and use are licensed by TI for use only with TI Devices.

* Nothing shall obligate TI to provide you with source code for the software licensed and provided to you in object code.

If software source code is provided to you, modification and redistribution of the source code are permitted provided that the following conditions are met:

* any redistribution and use of the source code, including any resulting derivative works, are licensed by TI for use only with TI Devices.

* any redistribution and use of any object code compiled from the
source code and any resulting derivative works, are licensed by TI
for use only with TI Devices.

Neither the name of Texas Instruments
Incorporated nor the names of its
suppliers may be used to endorse or promote products derived from this
software without specific prior written permission.

DISCLAIMER.

THIS SOFTWARE IS PROVIDED BY TI AND TIS LICENSORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL TI AND TIS LICENSORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
This Notice.txt file contains certain notices of software components
included with the software that Qualcomm Atheros, Inc. ("Qualcomm
Atheros") is required to provide you. Except where prohibited by the
open source license, the content of this notices file is only provided
to satisfy Qualcomm Atheros's attribution and notice requirement; your
use of these software components together with the Qualcomm Atheros
software (Qualcomm Atheros software hereinafter referred to as
"Software") is subject to the terms of your agreement from Qualcomm
Atheros. Compliance with all copyright laws and software license
agreements included in the notice section of this file are the
responsibility of the user. Except as may be granted by separate
express written agreement, this file provides no license to any
patents, trademarks, copyrights, or other intellectual property of
Qualcomm Incorporated or any of its subsidiaries.

==========

File:
ieee_crc32.c

/*

```
*  COPYRIGHT (C) 1986 Gary S. Brown.  You may use this program, or
*  code or tables extracted from it, as desired without restriction.
*
*  First, the polynomial itself and its table of feedback terms.  The
*  polynomial is
*  X^32+X^26+X^23+X^22+X^16+X^12+X^11+X^10+X^8+X^7+X^5+X^4+X^2+X^1+X^0
*
*  Note that we take it "backwards" and put the highest-order term in
*  the lowest-order bit.  The X^32 term is "implied"; the LSB is the
*  X^31 term, etc.  The X^0 term (usually shown as "+1") results in
*  the MSB being 1
*
*  Note that the usual hardware shift register implementation, which
*  is what we're using (we're merely optimizing it by doing eight-bit
*  chunks at a time) shifts bits into the lowest-order term.  In our
*  implementation, that means shifting towards the right.  Why do we
*  do it this way?  Because the calculated CRC must be transmitted in
*  order from highest-order term to lowest-order term.  UARTs transmit
*  characters in
 order from LSB to MSB.  By storing the CRC this way
*  we hand it to the UART in the order low-byte to high-byte; the UART
*  sends each low-bit to hight-bit; and the result is transmission bit
*  by bit from highest- to lowest-order term without requiring any bit
*  shuffling on our part.  Reception works similarly
*
*  The feedback terms table consists of 256, 32-bit entries.  Notes
*
*      The table can be generated at runtime if desired; code to do so
*      is shown later.  It might not be obvious, but the feedback
*      terms simply represent the results of eight shift/xor opera
*      tions for all combinations of data and CRC register values
*
*      The values must be right-shifted by eight bits by the "updcrc
*      logic; the shift must be unsigned (bring in zeroes).  On some
*      hardware you could probably optimize the shift in assembler by
*      using byte-swap instructions
*      polynomial $edb88320
*
*
* CRC32 code derived from work by Gary S.
 Brown.

* license.
*
* See README and COPYING for more details.
*
* This file defines the cryptographic functions that need to be implemented
* for wpa_supplicant and hostapd. When TLS is not used, internal
* implementation of MD5, SHA1, and AES is used and no external libraries are
* required. When TLS
 is enabled (e.g., by enabling EAP-TLS or EAP-PEAP), the
* crypto library used by the TLS implementation is expected to be used for
* non-TLS needs, too, in order to save space by not implementing these
* functions twice.
*
* Wrapper code for using each crypto library is in its own file (crypto*.c)
* and one of these files is build and linked in to provide the functions
* defined here.
*/
```

```

File: md5.c
//
// $Id: //depot/sw/branches/qca_main_wifi2.0/perf_pwr_offload/drivers/target/src/misc/crypto/md5.c#1 $
//
// This code implements the MD5 message-digest algorithm.
// The algorithm is due to Ron Rivest.  This code was
// written by Colin Plumb in 1993, no copyright is claimed.
// This code is in the public domain; do with it what you wish.
//
// Equivalent code is available from RSA Data Security, Inc.
// This code has been tested against that, and is equivalent,
// except that you don't need to
 include two pages of legalese
// with every copy.
//
// To compute the message digest of a chunk of bytes, declare an
// MD5Context structure, pass it to MD5Init, call MD5Update as
// needed on buffers full of bytes, and then call MD5Final, which
// will fill a supplied 16-byte array with the digest.
//
