so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many
people have made
generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public

License from time to time.
Such new versions will be similar in spirit to the present version,
but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library
specifies a version number of this License which applies to it and
"any later version", you have the option of following the terms and
conditions either of that version or of any later version published by
the Free Software Foundation. If the Library does not specify a
license version number, you may choose any version ever published by
the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free
programs whose distribution conditions are incompatible with these,
write to the author to ask for permission. For software which is
copyrighted by the Free Software Foundation, write to the Free
Software Foundation; we sometimes make exceptions for this. Our
decision will be guided by the two goals of preserving the free
status
of all derivatives of our free software and of promoting the sharing
and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO
WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR
OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY
KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE
IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR
PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE
LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME
THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN
WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY
AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU
FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR
CONSEQUENTIAL
DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE
LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING
RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A
FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF
SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH
DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line
and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or
modify it under the terms of the GNU Lesser General Public
License as published by the Free Software Foundation; either
version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public
License along with this library; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You
should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
library `Frob' (a library for tweaking knobs) written by James Random Hacker.

<signature of Ty Coon>, 1 April 1990
Ty Coon, President of Vice

That's all there is to it!
Boost Software License - Version 1.0 - August 17th, 2003

Permission is hereby granted, free of charge, to any person or organization

obtaining a copy of the software and accompanying documentation covered by this license (the "Software") to use, reproduce, display, distribute, execute, and transmit the Software, and to prepare derivative works of the Software, and to permit third-parties to whom the Software is furnished to do so, all subject to the following:

The copyright notices in the Software and this entire statement, including the above license grant, this restriction and the following disclaimer, must be included in all copies of the Software, in whole or in part, and all derivative works of the Software, unless such copies or derivative works are solely in the form of machine-executable object code generated by a source language processor.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS
FOR A PARTICULAR PURPOSE, TITLE AND NON-INFRINGEMENT. IN NO EVENT SHALL THE COPYRIGHT HOLDERS OR ANYONE DISTRIBUTING THE SOFTWARE BE LIABLE FOR ANY DAMAGES OR OTHER LIABILITY, WHETHER IN CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of

this License,
each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute
copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

you may not use this file except in compliance with the License.
You may obtain a copy of the License at

http://www.apache.org/licenses/LICENSE-2.0

Unless required by applicable law or agreed to in writing, software
distributed under the License is distributed on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.
See the License for the specific language governing permissions and
limitations under the License.

GCC RUNTIME LIBRARY EXCEPTION

Version 3.1, 31 March 2009

Copyright (C) 2009 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this
license document, but changing it is not allowed.

This GCC Runtime Library Exception ("Exception") is an additional

permission under section 7 of the GNU General Public License, version 3 ("GPLv3"). It applies to a given file (the "Runtime Library") that bears a notice placed by the copyright holder of the file stating that the file is governed by GPLv3 along with this Exception.

When you use GCC to compile a program, GCC may combine portions of certain GCC header files and runtime libraries with the compiled program. The purpose of this Exception is to allow compilation of non-GPL (including proprietary) programs to use, in this way, the header files and runtime libraries covered by this Exception.

0. Definitions.

A file is an "Independent Module" if it either requires the Runtime Library
for execution after a Compilation Process, or makes use of an interface provided by the Runtime Library, but is not otherwise based on the Runtime Library.

"GCC" means a version of the GNU Compiler Collection, with or without modifications, governed by version 3 (or a specified later version) of the GNU General Public License (GPL) with the option of using any subsequent versions published by the FSF.

"GPL-compatible Software" is software whose conditions of propagation, modification and use would permit combination with GCC in accord with the license of GCC.

"Target Code" refers to output from any compiler for a real or virtual target processor architecture, in executable form or suitable for input to an assembler, loader, linker and/or execution phase. Notwithstanding that, Target Code does not include data in any format that is used as a compiler intermediate representation, or used for producing a compiler intermediate representation.

The "Compilation Process" transforms code
entirely represented in
non-intermediate languages designed for human-written code, and/or in Java Virtual Machine byte code, into Target Code. Thus, for example, use of source code generators and preprocessors need not be considered part of the Compilation Process, since the Compilation Process can be understood as starting with the output of the generators or preprocessors.

A Compilation Process is "Eligible" if it is done using GCC, alone or with other GPL-compatible software, or if it is done without using any work based on GCC. For example, using non-GPL-compatible Software to optimize any GCC intermediate representations would not qualify as an

Eligible Compilation Process.

1. Grant of Additional Permission.

You have permission to propagate a work of Target Code formed by
combining the Runtime Library with Independent Modules, even if such
propagation would otherwise violate the terms of GPLv3, provided that
all Target Code was generated by Eligible Compilation Processes. You
may
 then convey such a combination under terms of your choice,
consistent with the licensing of the Independent Modules.

2. No Weakening of GCC Copyleft.

The availability of this Exception does not imply any general
presumption that third-party software is unaffected by the copyleft
requirements of the license of GCC.

OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for
software and other kinds of works.

The licenses for most software and other practical works are designed
to take away your freedom to share and change the works. By contrast,
the GNU General Public License is intended to guarantee your freedom to
share and change all versions of a program--to make sure it remains free
software for all its users. We, the Free Software Foundation, use the
GNU General Public License for most of our software; it applies also to
any other work released this way by its authors. You can apply it to
your programs, too.

When we speak of free software, we are referring to
freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
them if you wish), that you receive source code or can get it if you
want it, that you can change the software or use pieces of it in new
free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you
these rights or asking you to surrender the rights. Therefore, you have
certain responsibilities if you distribute copies of the software, or if
you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must pass on to the recipients the same
freedoms that you received. You must make sure that they, too, receive
or can get the source code. And you must show them these terms so they
know their rights.

Developers that use the GNU GPL protect your rights with two steps:
(1)
assert copyright on the software, and (2) offer you this License
giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains
that there is no warranty for this free software. For both users' and
authors' sake, the GPL requires that modified versions be marked as
changed, so that their problems will not be attributed erroneously to
authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees"
and
"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a

computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but

which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered
by this License only if the output, given its
content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive

interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in

the same way through the same place at no
further charge. You need not require recipients to copy the
Corresponding Source along with the object code. If the place to
copy the object code is a network server, the Corresponding Source
may be on a different server (operated by you or a third party)
that supports equivalent copying facilities, provided you maintain
clear directions next to the object code saying where to find the
Corresponding Source. Regardless of what server hosts the
Corresponding Source, you remain obligated to ensure that it is
available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided
you inform other peers where the object code and Corresponding
Source of the work are being offered to the general public at no
charge under subsection 6d.

A separable portion of the object code, whose source code is excluded
from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any
tangible personal property which is normally used for personal, family,
or household purposes, or (2) anything designed or sold for incorporation
into a dwelling. In determining whether a product is a consumer product,
doubtful cases shall be resolved in favor of coverage. For a particular
product received by a particular user, "normally used" refers to a
typical or common use of that class of product, regardless of the status
of the particular user or of the way in which the particular user
actually uses, or expects or is expected to use, the product. A product
is a consumer product regardless of whether the product has substantial
commercial, industrial or non-consumer uses, unless such uses represent
the only significant mode of use of the product.

"Installation Information" for a User Product means any methods,
procedures, authorization
keys, or other information required to install
and execute modified versions of a covered work in that User Product from
a modified version of its Corresponding Source. The information must
suffice to ensure that the continued functioning of the modified object
code is in no case prevented or interfered with solely because
modification has been made.

If you convey an object code work under this section in, or with, or
specifically for use in, a User Product, and the conveying occurs as
part of a transaction in which the right of possession and use of the
User Product is transferred to the recipient in perpetuity or for a
fixed term (regardless of how the transaction is characterized), the

Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in
ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the
entire Program shall
be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or
limiting liability differently from the
terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions;
the above
requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright
holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the

Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the

patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM

IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17.
Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful,

but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with
the library. If this is what you want to
do, use the GNU Lesser General
Public License instead of this License. But first, please read
<http://www.gnu.org/philosophy/why-not-lgpl.html>.

GNU LESSER GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates
the terms and conditions of version 3 of the GNU General Public
License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by the Library is deemed a mode of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the function or data, the facility still operates, and performs whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of

this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from a header file that is part of the Library. You may convey such object code under terms of your choice, provided that, if the incorporated material is not limited to numerical parameters, data structure layouts and accessors, or small macros, inline functions and templates (ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that, taken together, effectively do not restrict modification of the portions of the Library contained in the Combined Work and reverse engineering for debugging such modifications, if you also do each of the following:

a) Give prominent notice with each copy of the Combined Work that the Library is used in it and that the Library and its use are covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license document.

c) For a Combined Work that displays copyright notices during execution, include the copyright notice for the Library among these notices, as well as a reference directing the user to the copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this License, and the Corresponding Application Code in a form suitable for, and under terms that permit, the user to recombine or relink the Application with a modified version of the Linked Version to produce a modified Combined Work, in the manner specified by section 6 of the GNU GPL for conveying

Corresponding Source.

1) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (a) uses at run time a copy of the Library already present on the user's computer system, and (b) will operate properly with a modified version of the Library that is interface-compatible with the Linked Version.

e) Provide Installation Information, but only if you would otherwise be required to provide such information under section 6 of the GNU GPL, and only to the extent that such information is necessary to install and execute a modified version of the Combined Work produced by recombining or relinking the Application with a modified version of the Linked Version. (If you use option 4d0, the Installation Information must accompany the Minimal Corresponding Source and Corresponding Application Code. If you use option 4d1, you must provide the Installation Information in the manner specified by section 6 of the GNU GPL for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the Library side by side in a single library together with other library facilities that are not Applications and are not covered by this License, and convey such a combined library under terms of your choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities, conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions of the GNU Lesser General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version

of the GNU Lesser General Public License "or any later version"
applies to it, you have the option of following
 the terms and
conditions either of that published version or of any later version
published by the Free Software Foundation. If the Library as you
received it does not specify a version number of the GNU Lesser
General Public License, you may choose any version of the GNU Lesser
General Public License ever published by the Free Software Foundation.

 If the Library as you received it specifies that a proxy can decide
whether future versions of the GNU Lesser General Public License shall
apply, that proxy's public statement of acceptance of any version is
permanent authorization for you to choose that version for the
Library.
==========
compiler_rt License
==========

The compiler_rt library is dual licensed under both the University of Illinois
"BSD-Like" license and the MIT license. As a user of this code you may choose
to use it under either license. As a contributor, you agree to allow your code
to be used under both.

Full text of the relevant licenses is included below.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
59 Temple Place, Suite 330, Boston, MA 02111-1307 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed
to make sure that you
have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and

(2) offer you this license which gives you legal permission to copy, distribute
and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which
contains
a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies
of the Program's
source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License

along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole
or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered
independent and separate works in
themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of

a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License.

However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that

system; it is up to the author/donor to decide if he or she is willing
to distribute software through
any other system and a licensee cannot
impose that choice.

This section is intended to make thoroughly clear what is believed to
be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License
may add an explicit geographical distribution limitation excluding
those countries, so that distribution is permitted only in or among
countries not thus excluded. In such case, this License incorporates
the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions
of the General Public License from time to time. Such new versions will
be similar in spirit to the present version, but may differ in detail to
address new problems or concerns.

Each version is given a distinguishing version number. If the Program
specifies a version number
of this License which applies to it and "any
later version", you have the option of following the terms and conditions
either of that version or of any later version published by the Free
Software Foundation. If the Program does not specify a version number of
this License, you may choose any version ever published by the Free Software
Foundation.

10. If you wish to incorporate parts of the Program into other free
programs whose distribution conditions are different, write to the author
to ask for permission. For software which is copyrighted by the Free
Software Foundation, write to the Free Software Foundation; we sometimes
make exceptions for this. Our decision will be guided by the two goals
of preserving the free status of all derivatives of our free software and
of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY
FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW.
EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES
PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED
OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF
MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS
TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE

PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN
IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License,
or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

```
  Gnomovision version 69, Copyright (C) year  name of author
  Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
  This is free software, and you are welcome to redistribute it
  under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and
`show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

```
 Yoyodyne, Inc., hereby disclaims all copyright interest in the program
 `Gnomovision' (which makes passes at compilers) written by James Hacker.

 <signature of Ty Coon>, 1 April 1989
 Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.

1.195.1 Available under license :

MIT

1.196 ccache 4.6

1.196.1 Available under license :

= Ccache copyright and license

== Overall license

The license for ccache as a whole is as follows:

This program is free software; you can redistribute it and/or modify it under
the terms of the GNU General Public License as published by the Free Software
Foundation; either version 3 of the License, or (at your option) any later
version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY
WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A
PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with

this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

The full license text can be found in GPL-3.0.txt and at https://www.gnu.org/licenses/gpl-3.0.html.

== Copyright and authors

Ccache is a collective work with contributions from many people, listed in AUTHORS.adoc
 and at https://ccache.dev/credits.html. Subsequent additions by contributing authors are implicitly licensed to the public under the same terms (GNU GPL version 3 or later), but the contributing authors retain copyrights on their portions of the work.

The copyright for ccache as a whole is as follows:

Copyright (C) 2002-2007 Andrew Tridgell
Copyright (C) 2009-2022 Joel Rosdahl and other contributors

== Files derived from other sources

The ccache distribution contain some files from other sources and some have been modified for use in ccache. These files all carry attribution notices, and may qualify as ``separate and independent works in themselves'' for purposes of the GPL: that is, if separated from the ccache sources, they may be usable under less restrictive terms.

Creative Commons Legal Code

CC0 1.0 Universal

  CREATIVE COMMONS CORPORATION IS NOT A LAW FIRM AND DOES NOT PROVIDE
  LEGAL
 SERVICES. DISTRIBUTION OF THIS DOCUMENT DOES NOT CREATE AN
  ATTORNEY-CLIENT RELATIONSHIP. CREATIVE COMMONS PROVIDES THIS
  INFORMATION ON AN "AS-IS" BASIS. CREATIVE COMMONS MAKES NO WARRANTIES
  REGARDING THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS
  PROVIDED HEREUNDER, AND DISCLAIMS LIABILITY FOR DAMAGES RESULTING FROM
  THE USE OF THIS DOCUMENT OR THE INFORMATION OR WORKS PROVIDED
  HEREUNDER.

Statement of Purpose

The laws of most jurisdictions throughout the world automatically confer
exclusive Copyright and Related Rights (defined below) upon the creator
and subsequent owner(s) (each and all, an "owner") of an original work of
authorship and/or a database (each, a "Work").

Certain owners wish to permanently relinquish those rights to a Work for
the purpose of contributing to a commons of creative, cultural and
scientific works ("Commons") that the public can reliably and without fear
of later claims of infringement build upon, modify, incorporate in other
works,
 reuse and redistribute as freely as possible in any form whatsoever
and for any purposes, including without limitation commercial purposes.

These owners may contribute to the Commons to promote the ideal of a free culture and the further production of creative, cultural and scientific works, or to gain reputation or greater distribution for their Work in part through the use and efforts of others.

For these and/or other purposes and motivations, and without any expectation of additional consideration or compensation, the person associating CC0 with a Work (the "Affirmer"), to the extent that he or she is an owner of Copyright and Related Rights in the Work, voluntarily elects to apply CC0 to the Work and publicly distribute the Work under its terms, with knowledge of his or her Copyright and Related Rights in the Work and the meaning and intended legal effect of CC0 on those rights.

1. Copyright and Related Rights. A Work made available under CC0 may be protected by copyright and
related or neighboring rights ("Copyright and
Related Rights"). Copyright and Related Rights include, but are not limited to, the following:

i. the right to reproduce, adapt, distribute, perform, display, communicate, and translate a Work;
ii. moral rights retained by the original author(s) and/or performer(s);
iii. publicity and privacy rights pertaining to a person's image or likeness depicted in a Work;
iv. rights protecting against unfair competition in regards to a Work, subject to the limitations in paragraph 4(a), below;
v. rights protecting the extraction, dissemination, use and reuse of data in a Work;
vi. database rights (such as those arising under Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, and under any national implementation thereof, including any amended or successor version of such directive); and
vii. other similar, equivalent or corresponding
rights throughout the
world based on applicable law or treaty, and any national implementations thereof.

2. Waiver. To the greatest extent permitted by, but not in contravention of, applicable law, Affirmer hereby overtly, fully, permanently, irrevocably and unconditionally waives, abandons, and surrenders all of Affirmer's Copyright and Related Rights and associated claims and causes of action, whether now known or unknown (including existing as well as future claims and causes of action), in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv) for any purpose whatsoever, including without limitation commercial, advertising or promotional

purposes (the "Waiver"). Affirmer makes the Waiver for the benefit of each member of the public at large and to the detriment of Affirmer's heirs and successors, fully intending
that such Waiver shall not be subject to
revocation, rescission, cancellation, termination, or any other legal or equitable action to disrupt the quiet enjoyment of the Work by the public as contemplated by Affirmer's express Statement of Purpose.

3. Public License Fallback. Should any part of the Waiver for any reason be judged legally invalid or ineffective under applicable law, then the Waiver shall be preserved to the maximum extent permitted taking into account Affirmer's express Statement of Purpose. In addition, to the extent the Waiver is so judged Affirmer hereby grants to each affected person a royalty-free, non transferable, non sublicensable, non exclusive, irrevocable and unconditional license to exercise Affirmer's Copyright and Related Rights in the Work (i) in all territories worldwide, (ii) for the maximum duration provided by applicable law or treaty (including future time extensions), (iii) in any current or future medium and for any number of copies, and (iv)
for any purpose whatsoever, including without
limitation commercial, advertising or promotional purposes (the "License"). The License shall be deemed effective as of the date CC0 was applied by Affirmer to the Work. Should any part of the License for any reason be judged legally invalid or ineffective under applicable law, such partial invalidity or ineffectiveness shall not invalidate the remainder of the License, and in such case Affirmer hereby affirms that he or she will not (i) exercise any of his or her remaining Copyright and Related Rights in the Work or (ii) assert any associated claims and causes of action with respect to the Work, in either case contrary to Affirmer's express Statement of Purpose.

4. Limitations and Disclaimers.

a. No trademark or patent rights held by Affirmer are waived, abandoned, surrendered, licensed or otherwise affected by this document.
b. Affirmer offers the Work as-is and makes no representations or warranties of any kind concerning the
Work, express, implied,
statutory or otherwise, including without limitation warranties of title, merchantability, fitness for a particular purpose, non infringement, or the absence of latent or other defects, accuracy, or the present or absence of errors, whether or not discoverable, all to the greatest extent permissible under applicable law.
c. Affirmer disclaims responsibility for clearing rights of other persons that may apply to the Work or any use thereof, including without limitation any person's Copyright and Related Rights in the Work. Further, Affirmer disclaims responsibility for obtaining any necessary consents, permissions or other rights required for any use of the

Work.

d. Affirmer understands and acknowledges that Creative Commons is not a party to this document and has no duty or obligation with respect to this CC0 or use of the Work.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate

as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work

by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation
("PSF"), and the Individual or Organization ("Licensee") accessing and
otherwise using this software ("Python") in source or binary form and
its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby
grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce,
analyze, test, perform and/or display publicly, prepare derivative works,
distribute, and otherwise use Python alone or in any derivative version,
provided, however, that PSF's License Agreement and PSF's notice of copyright,
i.e., "Copyright (c) 2001, 2002, 2003, 2004, 2005, 2006, 2007, 2008, 2009, 2010,
2011, 2012, 2013, 2014, 2015, 2016, 2017, 2018, 2019, 2020, 2021 Python Software Foundation;
All
Rights Reserved" are retained in Python alone or in any derivative version
prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on
or incorporates Python or any part thereof, and wants to make
the derivative work available to others as provided herein, then
Licensee hereby agrees to include in any such work a brief summary of
the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS"
basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR
IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS
FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT
INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON
FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS
A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON,
OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY
THEREOF.

6. This License Agreement will automatically terminate upon a material
breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any
relationship of agency, partnership, or joint venture between PSF and
Licensee. This License Agreement does not grant permission to use PSF
trademarks or trade name in a trademark sense to endorse or promote
products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee
agrees to be bound by the terms and conditions of this License
Agreement.

GNU LESSER GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

This version of the GNU Lesser General Public License incorporates

the terms and conditions of version 3 of the GNU General Public License, supplemented by the additional permissions listed below.

0. Additional Definitions.

As used herein, "this License" refers to version 3 of the GNU Lesser General Public License, and the "GNU GPL" refers to version 3 of the GNU General Public License.

"The Library" refers to a covered work governed by this License, other than an Application or a Combined Work as defined below.

An "Application" is any work that makes use of an interface provided by the Library, but which is not otherwise based on the Library. Defining a subclass of a class defined by
the Library is deemed a mode
of using an interface provided by the Library.

A "Combined Work" is a work produced by combining or linking an Application with the Library. The particular version of the Library with which the Combined Work was made is also called the "Linked Version".

The "Minimal Corresponding Source" for a Combined Work means the Corresponding Source for the Combined Work, excluding any source code for portions of the Combined Work that, considered in isolation, are based on the Application, and not on the Linked Version.

The "Corresponding Application Code" for a Combined Work means the object code and/or source code for the Application, including any data and utility programs needed for reproducing the Combined Work from the Application, but excluding the System Libraries of the Combined Work.

1. Exception to Section 3 of the GNU GPL.

You may convey a covered work under sections 3 and 4 of this License without being bound by section 3 of the GNU GPL.

2. Conveying Modified Versions.

If you modify a copy of the Library, and, in your modifications, a facility refers to a function or data to be supplied by an Application that uses the facility (other than as an argument passed when the facility is invoked), then you may convey a copy of the modified version:

a) under this License, provided that you make a good faith effort to ensure that, in the event an Application does not supply the

function or data, the facility still operates, and performs
whatever part of its purpose remains meaningful, or

b) under the GNU GPL, with none of the additional permissions of
this License applicable to that copy.

3. Object Code Incorporating Material from Library Header Files.

The object code form of an Application may incorporate material from
a header file that is part of the Library. You may convey such object
code under terms of your choice, provided that, if the incorporated
material is not limited to numerical parameters,
data structure
layouts and accessors, or small macros, inline functions and templates
(ten or fewer lines in length), you do both of the following:

a) Give prominent notice with each copy of the object code that the
Library is used in it and that the Library and its use are
covered by this License.

b) Accompany the object code with a copy of the GNU GPL and this license
document.

4. Combined Works.

You may convey a Combined Work under terms of your choice that,
taken together, effectively do not restrict modification of the
portions of the Library contained in the Combined Work and reverse
engineering for debugging such modifications, if you also do each of
the following:

a) Give prominent notice with each copy of the Combined Work that
the Library is used in it and that the Library and its use are
covered by this License.

b) Accompany the Combined Work with a copy of the GNU GPL and this license
document.

c) For a Combined Work that
displays copyright notices during
execution, include the copyright notice for the Library among
these notices, as well as a reference directing the user to the
copies of the GNU GPL and this license document.

d) Do one of the following:

0) Convey the Minimal Corresponding Source under the terms of this
License, and the Corresponding Application Code in a form

suitable for, and under terms that permit, the user to
recombine or relink the Application with a modified version of
the Linked Version to produce a modified Combined Work, in the
manner specified by section 6 of the GNU GPL for conveying
Corresponding Source.

1) Use a suitable shared library mechanism for linking with the
Library. A suitable mechanism is one that (a) uses at run time
a copy of the Library already present on the user's computer
system, and (b) will operate properly with a modified version
of the Library that is interface-compatible
with the Linked
Version.

e) Provide Installation Information, but only if you would otherwise
be required to provide such information under section 6 of the
GNU GPL, and only to the extent that such information is
necessary to install and execute a modified version of the
Combined Work produced by recombining or relinking the
Application with a modified version of the Linked Version. (If
you use option 4d0, the Installation Information must accompany
the Minimal Corresponding Source and Corresponding Application
Code. If you use option 4d1, you must provide the Installation
Information in the manner specified by section 6 of the GNU GPL
for conveying Corresponding Source.)

5. Combined Libraries.

You may place library facilities that are a work based on the
Library side by side in a single library together with other library
facilities that are not Applications and are not covered by this
License, and convey such a combined
library under terms of your
choice, if you do both of the following:

a) Accompany the combined library with a copy of the same work based
on the Library, uncombined with any other library facilities,
conveyed under the terms of this License.

b) Give prominent notice with the combined library that part of it
is a work based on the Library, and explaining where to find the
accompanying uncombined form of the same work.

6. Revised Versions of the GNU Lesser General Public License.

The Free Software Foundation may publish revised and/or new versions
of the GNU Lesser General Public License from time to time. Such new
versions will be similar in spirit to the present version, but may

differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library as you received it specifies that a certain numbered version of the GNU Lesser General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that published version or of any later version published by the Free Software Foundation. If the Library as you received it does not specify a version number of the GNU Lesser General Public License, you may choose any version of the GNU Lesser General Public License ever published by the Free Software Foundation.

If the Library as you received it specifies that a proxy can decide whether future versions of the GNU Lesser General Public License shall apply, that proxy's public statement of acceptance of any version is permanent authorization for you to choose that version for the Library.

GNU GENERAL PUBLIC LICENSE
Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <https://fsf.org/>
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you

these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1)
assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand
ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS

0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and
"recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy,
is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

1. Source Code.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.

A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The
"System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally
available free
programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is
covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose

of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed;
section 10
makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

4. Conveying Verbatim Copies.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately
publish on each copy an appropriate copyright notice;
keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:

a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a

written offer, valid for at least three years
and valid for as
long as you offer spare parts or customer support for that product
model, to give anyone who possesses the object code either (1) a
copy of the Corresponding Source for all the software in the
product that is covered by this License, on a durable physical
medium customarily used for software interchange, for a price no
more than your reasonable cost of physically performing this
conveying of source, or (2) access to copy the
Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the
written offer to provide the Corresponding Source. This
alternative is allowed only occasionally and noncommercially, and
only if you received the object code with such an offer, in accord
with subsection 6b.

d) Convey the object code by offering access from a designated
place (gratis or for a charge), and offer equivalent access to the
Corresponding Source
in the same way through the same place at no
further charge. You need not require recipients to copy the
Corresponding Source along with the object code. If the place to
copy the object code is a network server, the Corresponding Source
may be on a different server (operated by you or a third party)
that supports equivalent copying facilities, provided you maintain
clear directions next to the object code saying where to find the
Corresponding Source. Regardless of what server hosts the
Corresponding Source, you remain obligated to ensure that it is
available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided
you inform other peers where the object code and Corresponding
Source of the work are being offered to the general public at no
charge under subsection 6d.

A separable portion of the object code, whose source code is excluded
from the Corresponding Source
as a System Library, need not be
included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any
tangible personal property which is normally used for personal, family,
or household purposes, or (2) anything designed or sold for incorporation
into a dwelling. In determining whether a product is a consumer product,
doubtful cases shall be resolved in favor of coverage. For a particular
product received by a particular user, "normally used" refers to a
typical or common use of that class of product, regardless of the status

of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.

"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent

that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty
or limiting liability differently from the
terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on

those licensors and authors.

All other non-permissive additional terms are considered "further restrictions" within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms

of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions; the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

9. Acceptance Not Required for Having Copies.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However,

nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.

An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party's predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights
granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For
purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that

contain the covered work, unless you entered into that
arrangement,
or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

12. No Surrender of Others' Freedom.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it,
you have the
option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY
OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
state the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where
the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation, either version 3 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program. If not, see <https://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short
notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate
parts of the General Public License. Of course, your program's commands
might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school,
if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see
<https://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program
into proprietary programs. If your program is a subroutine library, you
may consider it more useful to permit linking proprietary applications with

the library. If this is what you want
to do, use the GNU Lesser General
Public License instead of this License. But first, please read
<https://www.gnu.org/philosophy/why-not-lgpl.html>.

1.197.1 Available under license :

GNU LESSER GENERAL PUBLIC LICENSE
Version 2.1, February 1999

Copyright (C) 1991, 1999 Free Software Foundation, Inc.
51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

[This is the first released version of the Lesser GPL. It also counts
as the successor of the GNU Library Public License, version 2, hence
the version number 2.1.]

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
Licenses are intended to guarantee your freedom to share and change
free software--to make sure the software is free for all its users.

This license, the Lesser General Public License, applies to some
specially designated software packages--typically libraries--of the
Free Software Foundation and other authors who decide to use it. You
can use it too, but we suggest
you first think carefully about whether
this license or the ordinary General Public License is the better
strategy to use in any particular case, based on the explanations below.

When we speak of free software, we are referring to freedom of use,
not price. Our General Public Licenses are designed to make sure that
you have the freedom to distribute copies of free software (and charge
for this service if you wish); that you receive source code or can get
it if you want it; that you can change the software and use pieces of
it in new free programs; and that you are informed that you can do
these things.

To protect your rights, we need to make restrictions that forbid
distributors to deny you these rights or to ask you to surrender these
rights. These restrictions translate to certain responsibilities for
you if you distribute copies of the library or if you modify it.

For example, if you distribute copies of the library, whether gratis or for a fee, you must give the recipients all the rights that we gave you. You must make sure that they, too, receive or can get the source code. If you link other code with the library, you must provide complete object files to the recipients, so that they can relink them with the library after making changes to the library and recompiling it. And you must show them these terms so they know their rights.

We protect your rights with a two-step method: (1) we copyright the library, and (2) we offer you this license, which gives you legal permission to copy, distribute and/or modify the library.

To protect each distributor, we want to make it very clear that there is no warranty for the free library. Also, if the library is modified by someone else and passed on, the recipients should know that what they have is not the original version, so that the original author's reputation will not be affected by problems that might be introduced by others.

Finally, software patents pose a constant threat to the existence of any free program. We wish to make sure that a company cannot effectively restrict the users of a free program by obtaining a restrictive license from a patent holder. Therefore, we insist that any patent license obtained for a version of the library must be consistent with the full freedom of use specified in this license.

Most GNU software, including some libraries, is covered by the ordinary GNU General Public License. This license, the GNU Lesser General Public License, applies to certain designated libraries, and is quite different from the ordinary General Public License. We use this license for certain libraries in order to permit linking those libraries into non-free programs.

When a program is linked with a library, whether statically or using a shared library, the combination of the two is legally speaking a combined work, a derivative of the original library. The ordinary General Public License therefore permits such linking only if the entire combination fits its criteria of freedom. The Lesser General Public License permits more lax criteria for linking other code with the library.

We call this license the "Lesser" General Public License because it does Less to protect the user's freedom than the ordinary General Public License. It also provides other free software developers Less

of an advantage over competing non-free programs. These disadvantages are the reason we use the ordinary General Public License for many libraries. However, the Lesser license provides advantages in certain special circumstances.

For example, on rare occasions, there may be a special need to encourage the widest possible use of a certain library, so that it becomes a de-facto standard. To achieve this, non-free programs must be allowed to use the library. A more frequent case is that a free library does the same job as widely used non-free libraries. In this case, there is little to gain by limiting the free library to free software only, so we use
the Lesser General Public License.

In other cases, permission to use a particular library in non-free programs enables a greater number of people to use a large body of free software. For example, permission to use the GNU C Library in non-free programs enables many more people to use the whole GNU operating system, as well as its variant, the GNU/Linux operating system.

Although the Lesser General Public License is Less protective of the users' freedom, it does ensure that the user of a program that is linked with the Library has the freedom and the wherewithal to run that program using a modified version of the Library.

The precise terms and conditions for copying, distribution and modification follow. Pay close attention to the difference between a "work based on the library" and a "work that uses the library". The former contains code derived from the library, whereas the latter must be combined with the library in order to run.

GNU LESSER GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any software library or other program which contains a notice placed by the copyright holder or other authorized party saying it may be distributed under the terms of this Lesser General Public License (also called "this License"). Each licensee is addressed as "you".

A "library" means a collection of software functions and/or data prepared so as to be conveniently linked with application programs (which use some of those functions and data) to form executables.

The "Library", below, refers to any such software library or work which has been distributed under these terms. A "work based on the Library" means either the Library or any derivative work under

copyright law: that is to say, a work containing the Library or a portion of it, either verbatim or with modifications and/or translated straightforwardly into another language. (Hereinafter, translation is included without
limitation in the term "modification".)

"Source code" for a work means the preferred form of the work for making modifications to it. For a library, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the library.

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running a program using the Library is not restricted, and output from such a program is covered only if its contents constitute a work based on the Library (independent of the use of the Library in a tool for writing it). Whether that is true depends on what the Library does and what the program that uses the Library does.

1. You may copy and distribute verbatim copies of the Library's complete source code as you receive it, in any medium, provided that you conspicuously and appropriately publish
on each copy an
appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and distribute a copy of this License along with the Library.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Library or any portion of it, thus forming a work based on the Library, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) The modified work must itself be a software library.

b) You must cause the files modified to carry prominent notices stating that you changed the files and the date of any change.

c) You must cause the whole of the work to be licensed at no charge to all third parties under the terms of this License.

d) If a facility in the modified

Library refers to a function or a
table of data to be supplied by an application program that uses
the facility, other than as an argument passed when the facility
is invoked, then you must make a good faith effort to ensure that,
in the event an application does not supply such function or
table, the facility still operates, and performs whatever part of
its purpose remains meaningful.

(For example, a function in a library to compute square roots has
a purpose that is entirely well-defined independent of the
application. Therefore, Subsection 2d requires that any
application-supplied function or table used by this function must
be optional: if the application does not supply it, the square
root function must still compute square roots.)

These requirements apply to the modified work as a whole. If
identifiable sections of that work are not derived from the Library,
and can be reasonably considered independent and separate works in
themselves,
then this License, and its terms, do not apply to those
sections when you distribute them as separate works. But when you
distribute the same sections as part of a whole which is a work based
on the Library, the distribution of the whole must be on the terms of
this License, whose permissions for other licensees extend to the
entire whole, and thus to each and every part regardless of who wrote
it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to
exercise the right to control the distribution of derivative or
collective works based on the Library.

In addition, mere aggregation of another work not based on the Library
with the Library (or with a work based on the Library) on a volume of
a storage or distribution medium does not bring the other work under
the scope of this License.

3. You may opt to apply the terms of the ordinary GNU General Public
License instead of this License to
a given copy of the Library. To do
this, you must alter all the notices that refer to this License, so
that they refer to the ordinary GNU General Public License, version 2,
instead of to this License. (If a newer version than version 2 of the
ordinary GNU General Public License has appeared, then you can specify
that version instead if you wish.) Do not make any other change in
these notices.

Once this change is made in a given copy, it is irreversible for

that copy, so the ordinary GNU General Public License applies to all subsequent copies and derivative works made from that copy.

This option is useful when you wish to copy part of the code of the Library into a program that is not a library.

4. You may copy and distribute the Library (or a portion or derivative of it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you accompany it with the complete corresponding machine-readable source code, which must be distributed
under the terms of Sections 1 and 2 above on a medium customarily used for software interchange.

If distribution of object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place satisfies the requirement to distribute the source code, even though third parties are not compelled to copy the source along with the object code.

5. A program that contains no derivative of any portion of the Library, but is designed to work with the Library by being compiled or linked with it, is called a "work that uses the Library". Such a work, in isolation, is not a derivative work of the Library, and therefore falls outside the scope of this License.

However, linking a "work that uses the Library" with the Library creates an executable that is a derivative of the Library (because it contains portions of the Library), rather than a "work that uses the library". The executable is therefore covered by this
License.
Section 6 states terms for distribution of such executables.

When a "work that uses the Library" uses material from a header file that is part of the Library, the object code for the work may be a derivative work of the Library even though the source code is not. Whether this is true is especially significant if the work can be linked without the Library, or if the work is itself a library. The threshold for this to be true is not precisely defined by law.

If such an object file uses only numerical parameters, data structure layouts and accessors, and small macros and small inline functions (ten lines or less in length), then the use of the object file is unrestricted, regardless of whether it is legally a derivative work. (Executables containing this object code plus portions of the Library will still fall under Section 6.)

Otherwise, if the work is a derivative of the Library, you may

distribute the object code for the work under the terms of Section 6. Any executables
containing that work also fall under Section 6,
whether or not they are linked directly with the Library itself.

6. As an exception to the Sections above, you may also combine or link a "work that uses the Library" with the Library to produce a work containing portions of the Library, and distribute that work under terms of your choice, provided that the terms permit modification of the work for the customer's own use and reverse engineering for debugging such modifications.

You must give prominent notice with each copy of the work that the Library is used in it and that the Library and its use are covered by this License. You must supply a copy of this License. If the work during execution displays copyright notices, you must include the copyright notice for the Library among them, as well as a reference directing the user to the copy of this License. Also, you must do one of these things:

a) Accompany the work with the complete corresponding machine-readable
source code for the Library including whatever
changes were used in the work (which must be distributed under Sections 1 and 2 above); and, if the work is an executable linked with the Library, with the complete machine-readable "work that uses the Library", as object code and/or source code, so that the user can modify the Library and then relink to produce a modified executable containing the modified Library. (It is understood that the user who changes the contents of definitions files in the Library will not necessarily be able to recompile the application to use the modified definitions.)

b) Use a suitable shared library mechanism for linking with the Library. A suitable mechanism is one that (1) uses at run time a copy of the library already present on the user's computer system, rather than copying library functions into the executable, and (2) will operate properly with a modified version of the library, if the user
installs one, as long as the modified version is
interface-compatible with the version that the work was made with.

c) Accompany the work with a written offer, valid for at least three years, to give the same user the materials specified in Subsection 6a, above, for a charge no more than the cost of performing this distribution.

d) If distribution of the work is made by offering access to copy

from a designated place, offer equivalent access to copy the above specified materials from the same place.

e) Verify that the user has already received a copy of these materials or that you have already sent this user a copy.

For an executable, the required form of the "work that uses the Library" must include any data and utility programs needed for reproducing the executable from it. However, as a special exception, the materials to be distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

It may happen that this requirement contradicts the license restrictions of other proprietary libraries that do not normally accompany the operating system. Such a contradiction means you cannot use both them and the Library together in an executable that you distribute.

7. You may place library facilities that are a work based on the Library side-by-side in a single library together with other library facilities not covered by this License, and distribute such a combined library, provided that the separate distribution of the work based on the Library and of the other library facilities is otherwise permitted, and provided that you do these two things:

a) Accompany the combined library with a copy of the same work based on the Library, uncombined with any other library facilities. This must be distributed under the terms of the Sections above.

b) Give prominent notice with the combined library of the fact that part of it is a work based on the Library, and explaining where to find the accompanying uncombined form of the same work.

8. You may not copy, modify, sublicense, link with, or distribute the Library except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense, link with, or distribute the Library is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

9. You are not required to accept this License, since you have not

signed it. However, nothing else grants you permission to modify or distribute the Library or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing
the Library (or any work based on the
Library), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Library or works based on it.

10. Each time you redistribute the Library (or any work based on the Library), the recipient automatically receives a license from the original licensor to copy, distribute, link with or modify the Library subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties with this License.

11. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute
so as to satisfy simultaneously your obligations under this
License and any other pertinent obligations, then as a consequence you may not distribute the Library at all. For example, if a patent license would not permit royalty-free redistribution of the Library by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Library.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply, and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system which is implemented by public license practices. Many people
have made
generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to

be a consequence of the rest of this License.

12. If the distribution and/or use of the Library is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Library under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

13. The Free Software Foundation may publish revised and/or new versions of the Lesser General Public
License from time to time.
Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Library specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Library does not specify a license version number, you may choose any version ever published by the Free Software Foundation.

14. If you wish to incorporate parts of the Library into other free programs whose distribution conditions are incompatible with these, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of
all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

15. BECAUSE THE LIBRARY IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE LIBRARY, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE LIBRARY "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE LIBRARY IS WITH YOU. SHOULD THE LIBRARY PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY

AND/OR REDISTRIBUTE THE LIBRARY AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL
DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE LIBRARY (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE LIBRARY TO OPERATE WITH ANY OTHER SOFTWARE), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Libraries

If you develop a new library, and you want it to be of the greatest possible use to the public, we recommend making it free software that everyone can redistribute and change. You can do so by permitting redistribution under these terms (or, alternatively, under the terms of the ordinary General Public License).

To apply these terms, attach the following notices to the library. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line
and a pointer to where the full notice is found.

<one line to give the library's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This library is free software; you can redistribute it and/or modify it under the terms of the GNU Lesser General Public License as published by the Free Software Foundation; either version 2.1 of the License, or (at your option) any later version.

This library is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU Lesser General Public License for more details.

You should have received a copy of the GNU Lesser General Public License along with this library; if not, write to the Free Software Foundation, Inc., 51 Franklin St, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

You should
also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the library, if

necessary. Here is a sample; alter the names:

 Yoyodyne, Inc., hereby disclaims all copyright interest in the
 library `Frob' (a library for tweaking knobs) written by James Random Hacker.

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public

License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work
which contains
a notice placed by the copyright holder saying it may be distributed
under the terms of this General Public License. The "Program", below,
refers to any such program or work, and a "work based on the Program"
means either the Program or any derivative work under copyright law:
that is to say, a work containing the Program or a portion of it,
either verbatim or with modifications and/or translated into another
language. (Hereinafter, translation is included without limitation in
the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not
covered by this License; they are outside its scope. The act of
running the Program is not restricted, and the output from the Program
is covered only if its contents constitute a work based on the
Program (independent of having been made by running the Program).
Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim
copies of the Program's
source code as you receive it, in any medium, provided that you
conspicuously and appropriately publish on each copy an appropriate
copyright notice and disclaimer of warranty; keep intact all the
notices that refer to this License and to the absence of any warranty;
and give any other recipients of the Program a copy of this License
along with the Program.

You may charge a fee for the physical act of transferring a copy, and
you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion
of it, thus forming a work based on the Program, and copy and
distribute such modifications or work under the terms of Section 1
above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices
stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in

whole or in part contains or is derived from the Program or any
part thereof, to be licensed as a whole at no charge to all third
parties under the terms of this License.

c) If the modified program normally reads commands interactively

when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer

to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6.
Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to

this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version
number of this License which applies to it and "any
later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE
LAW. EXCEPT WHEN
OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS),
EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it

free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
convey the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the
License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands
`show w' and `show c' should show the appropriate
parts of the General Public License. Of course, the commands you use may
be called something other than `show w' and `show c'; they could even be
mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program
`Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into
proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the
library. If this is what you want to do, use the GNU Library General
Public License instead of this License.
This is the full-colour version of the currently unofficial Linux logo
("currently unofficial" just means that there has been no paperwork and
that I have not really announced it yet). It was created by Larry Ewing,
and is freely usable as long as you acknowledge Larry as the original
artist.

Note that there are black-and-white versions of this available that
scale down to smaller sizes and are better for letterheads or whatever
you want to use it for: for the full range of logos take a look at
Larry's web-page:

/* nicstar.c v0.22 Jawaid Bazyar (bazyar@hypermall.com)
* nicstar.c, M. Welsh (matt.welsh@cl.cam.ac.uk)
*

```
* Hacked October, 1997 by Jawaid Bazyar, Interlink Advertising Services Inc.
*  http://www.hypermall.com/
* 10/1/97 - commented out CFG_PHYIE bit - we don't care when the PHY
* interrupts us (except possibly for removal/insertion of the cable?)
* 10/4/97 - began heavy inline documentation of the code. Corrected typos
* and spelling mistakes.
* 10/5/97 - added code to handle PHY interrupts, disable PHY on
* loss of link, and correctly re-enable PHY when link is
* re-established. (put back CFG_PHYIE)
*
*   Modified to work with the IDT7721 nicstar -- AAL5 (tested) only.
*
* R. D. Rechenmacher <ron@fnal.gov>, Aug. 6, 1997
*
* Linux driver for the IDT77201 NICStAR PCI ATM controller.
* PHY component is expected to be 155 Mbps S/UNI-Lite or IDT 77155;
* see init_nicstar() for PHY initialization to change this. This driver
* expects the Linux ATM stack to support scatter-gather
 lists
* (skb->atm.iovcnt != 0) for Rx skb's passed to vcc->push.
*
* Implementing minimal-copy of received data:
*   IDT always receives data into a small buffer, then large buffers
*    as needed. This means that data must always be copied to create
*    the linear buffer needed by most non-ATM protocol stacks (e.g. IP)
*    Fix is simple: make large buffers large enough to hold entire
*    SDU, and leave <small_buffer_data> bytes empty at the start. Then
*    copy small buffer contents to head of large buffer.
*   Trick is to avoid fragmenting Linux, due to need for a lot of large
*    buffers. This is done by 2 things:
*      1) skb->destructor / skb->atm.recycle_buffer
*          combined, allow nicstar_free_rx_skb to be called to
*          recycle large data buffers
*      2) skb_clone of received buffers
*   See nicstar_free_rx_skb and linearize_buffer for implementation
*    details.
*

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the
power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable

(except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work
includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional
attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License
does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including
negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct, indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this
License. However, in accepting such
obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");
you may not use this file except in compliance with the License.
You may obtain a copy of the License at

http://www.apache.org/licenses/LICENSE-2.0

Unless required by applicable law or agreed to in writing, software
distributed under the License is distributed on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied.
See the License for the specific language governing permissions and
limitations under the License.

---- LLVM Exceptions to the Apache 2.0 License ----

As an exception, if, as a result of your compiling your source code, portions
of this Software are embedded into an Object form of such source code, you
may redistribute such embedded portions in such Object form without complying
with the conditions of Sections 4(a), 4(b) and 4(d) of the License.

In addition, if you combine or link compiled
forms of this Software with
software that is licensed under the GPLv2 ("Combined Software") and if a
court of competent jurisdiction determines that the patent provision (Section

3), the indemnity provision (Section 9) or other Section of the License
conflicts with the conditions of the GPLv2, you may retroactively and
prospectively choose to deem waived or otherwise exclude such Section(s) of
the License, but only in their entirety and only with respect to the Combined
Software.

==
Software from third parties included in the LLVM Project:
==
The LLVM Project contains third party software which is under different license
terms. All such code will be identified clearly using at least one of two
mechanisms:
1) It will be in a separate directory tree with its own `LICENSE.txt` or
  `LICENSE` file at the top containing the specific
 license and restrictions
  which apply to that software, or
2) It will contain specific license and restriction terms at the top of every
  file.

==
Legacy LLVM License (https://llvm.org/docs/DeveloperPolicy.html#legacy):
==

The libc++ library is dual licensed under both the University of Illinois
"BSD-Like" license and the MIT license. As a user of this code you may choose
to use it under either license. As a contributor, you agree to allow your code
to be used under both.

Full text of the relevant licenses is included below.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership
of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial
revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct

or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Building EFI Applications Using the GNU Toolchain

David Mosberger <davidm@hpl.hp.com>

Last update: 04/09/2007

* Introduction

This document has two parts: the first part describes how to develop
EFI applications for IA-64,x86 and x86_64 using the GNU toolchain and the EFI
development environment contained in this directory. The second part
describes some of the more subtle aspects of how this development
environment works.

* Part 1: Developing EFI Applications

** Prerequisites:

To develop x86 and x86_64 EFI applications, the following tools are needed:

- gcc-3.0 or newer (gcc 2.7.2 is NOT sufficient!)
  As of gnu-efi-3.0b, the Redhat 8.0 toolchain is known to work,
  but the Redhat 9.0 toolchain
is not currently supported.

- A version of "objcopy" that supports EFI applications. To
  check if your version includes EFI support, issue the
  command:

  objcopy --help

  Verify that the line "supported targets" contains the string
  "efi-app-ia32" and "efi-app-x86_64" and that the "-j" option
  accepts wildcards. The binutils release binutils-2.24
  supports Intel64 EFI and accepts wildcard section names.

- For debugging purposes, it's useful to have a version of
  "objdump" that supports EFI applications as well. This
  allows inspect and disassemble EFI binaries.

To develop IA-64 EFI applications, the following tools are needed:

- A version of gcc newer than July 30th 1999 (older versions
  had problems with generating position independent code).
  As of gnu-efi-3.0b, gcc-3.1 is known to work well.

- A version of "objcopy" that supports EFI applications. To
  check if your version includes EFI support, issue the
  command:

  objcopy --help

  Verify that
the line "supported targets" contains the string
  "efi-app-ia64" and that the "-j" option accepts wildcards.

- For debugging purposes, it's useful to have a version of
  "objdump" that supports EFI applications as well. This

allows inspect and disassemble EFI binaries.

** Directory Structure

This EFI development environment contains the following
subdirectories:

inc: This directory contains the EFI-related include files. The
files are taken from Intel's EFI source distribution, except
that various fixes were applied to make it compile with the
GNU toolchain.

lib: This directory contains the source code for Intel's EFI library.
Again, the files are taken from Intel's EFI source
distribution, with changes to make them compile with the GNU
toolchain.

gnuefi: This directory contains the glue necessary to convert ELF64
binaries to EFI binaries. Various runtime code bits, such as
a self-relocator are included as well. This code has been
contributed by the
Hewlett-Packard Company and is distributed
under the GNU GPL.

apps: This directory contains a few simple EFI test apps.

** Setup

It is necessary to edit the Makefile in the directory containing this
README file before EFI applications can be built. Specifically, you
should verify that macros CC, AS, LD, AR, RANLIB, and OBJCOPY point to
the appropriate compiler, assembler, linker, ar, and ranlib binaries,
respectively.

If you're working in a cross-development environment, be sure to set
macro ARCH to the desired target architecture ("ia32" for x86, "x86_64" for
x86_64 and "ia64" for IA-64). For convenience, this can also be done from
the make command line (e.g., "make ARCH=ia64").

** Building

To build the sample EFI applications provided in subdirectory "apps",
simply invoke "make" in the toplevel directory (the directory
containing this README file). This should build lib/libefi.a and
gnuefi/libgnuefi.a first and then all the EFI applications such as a
apps/t6.efi.

** Running

Just
 copy the EFI application (e.g., apps/t6.efi) to the EFI
filesystem, boot EFI, and then select "Invoke EFI application" to run
the application you want to test. Alternatively, you can invoke the
Intel-provided "nshell" application and then invoke your test binary
via the command line interface that "nshell" provides.

** Writing Your Own EFI Application

Suppose you have your own EFI application in a file called
"apps/myefiapp.c". To get this application built by the GNU EFI build
environment, simply add "myefiapp.efi" to macro TARGETS in
apps/Makefile. Once this is done, invoke "make" in the top level
directory. This should result in EFI application apps/myefiapp.efi,
ready for execution.

The GNU EFI build environment allows to write EFI applications as
described in Intel's EFI documentation, except for two differences:

- The EFI application's entry point is always called "efi_main". The
  declaration of this routine is:

   EFI_STATUS efi_main (EFI_HANDLE image,
 EFI_SYSTEM_TABLE *systab);

- UNICODE string literals must be written as W2U(L"Sample String")
  instead of just L"Sample String". The W2U() macro is defined in
  <efilib.h>. This header file also declares the function W2UCpy()
  which allows to convert a wide string into a UNICODE string and
  store the result in a programmer-supplied buffer.

- Calls to EFI services should be made via uefi_call_wrapper(). This
  ensures appropriate parameter passing for the architecture.

* Part 2: Inner Workings

WARNING: This part contains all the gory detail of how the GNU EFI
toolchain works. Normal users do not have to worry about such
details. Reading this part incurs a definite risk of inducing severe
headaches or other maladies.

The basic idea behind the GNU EFI build environment is to use the GNU

toolchain to build a normal ELF binary that, at the end, is converted
to an EFI binary. EFI binaries are really just PE32+ binaries. PE
stands for "Portable Executable" and is the object
 file format
Microsoft is using on its Windows platforms. PE is basically the COFF
object file format with an MS-DOS2.0 compatible header slapped on in
front of it. The "32" in PE32+ stands for 32 bits, meaning that PE32
is a 32-bit object file format. The plus in "PE32+" indicates that
this format has been hacked to allow loading a 4GB binary anywhere in
a 64-bit address space (unlike ELF64, however, this is not a full
64-bit object file format because the entire binary cannot span more
than 4GB of address space). EFI binaries are plain PE32+ binaries
except that the "subsystem id" differs from normal Windows binaries.
There are two flavors of EFI binaries: "applications" and "drivers"
and each has there own subsystem id and are identical otherwise. At
present, the GNU EFI build environment supports the building of EFI
applications only, though it would be trivial to generate drivers, as
the only difference is the subsystem id. For more details on PE32+,
see the spec at

 http://msdn.microsoft.com/library/specs/msdn_pecoff.htm.

In
 theory, converting a suitable ELF64 binary to PE32+ is easy and
could be accomplished with the "objcopy" utility by specifying option
--target=efi-app-ia32 (x86) or --target=efi-app-ia64 (IA-64). But
life never is that easy, so here some complicating factors:

(1) COFF sections are very different from ELF sections.

 ELF binaries distinguish between program headers and sections.
 The program headers describe the memory segments that need to
 be loaded/initialized, whereas the sections describe what
 constitutes those segments. In COFF (and therefore PE32+) no
 such distinction is made. Thus, COFF sections need to be page
 aligned and have a size that is a multiple of the page size
 (4KB for EFI), whereas ELF allows sections at arbitrary
 addresses and with arbitrary sizes.

(2) EFI binaries should be relocatable.

 Since EFI binaries are executed in physical mode, EFI cannot
 guarantee that a given binary can be loaded at
 its preferred
 address. EFI does _try_ to load a binary at it's preferred
 address, but if it can't do so, it will load it at another
 address and then relocate the binary using the contents of the
 .reloc section.

(3) On IA-64, the EFI entry point needs to point to a function
descriptor, not to the code address of the entry point.

(4) The EFI specification assumes that wide characters use UNICODE
encoding.

ANSI C does not specify the size or encoding that a wide
character uses. These choices are "implementation defined".
On most UNIX systems, the GNU toolchain uses a wchar_t that is
4 bytes in size. The encoding used for such characters is
(mostly) UCS4.

In the following sections, we address how the GNU EFI build
environment addresses each of these issues.

** (1) Accommodating COFF Sections

In order to satisfy the COFF constraint of page-sized and page-aligned
sections, the GNU EFI build environment uses the special linker script
in gnuefi/elf_$(ARCH)_efi.lds
where $(ARCH) is the target architecture
("ia32" for x86, "x86_64" for x86_64 and "ia64" for IA-64).
This script is set up to create only eight COFF section, each page aligned
and page sized.These eight sections are used to group together the much
greater number of sections that are typically present in ELF object files.
Specifically:

.hash (and/or .gnu.hash)
Collects the ELF .hash info (this section _must_ be the first
section in order to build a shared object file; the section is
not actually loaded or used at runtime).

GNU binutils provides a mechanism to generate different hash info
via --hash-style=<sysv|gnu|both> option. In this case output
shared object will contain .hash section, .gnu.hash section or
both. In order to generate correct output linker script preserves
both types of hash sections.

.text
Collects all sections containing executable code.

.data
Collects read-only and read-write data, literal string data,
global offset tables, the uninitialized data
segment (bss) and
various other sections containing data.

The reason read-only data is placed here instead of the in
.text is to make it possible to disassemble the .text section
without getting garbage due to read-only data. Besides, since
EFI binaries execute in physical mode, differences in page
protection do not matter.

The reason the uninitialized data is placed in this section is
that the EFI loader appears to be unable to handle sections
that are allocated but not loaded from the binary.

.dynamic, .dynsym, .rela, .rel, .reloc
These sections contains the dynamic information necessary to
self-relocate the binary (see below).

A couple of more points worth noting about the linker script:

o On IA-64, the global pointer symbol (__gp) needs to be placed such
that the _entire_ EFI binary can be addressed using the signed
22-bit offset that the "addl" instruction affords. Specifically,
this means that __gp should be placed at ImageBase + 0x200000.
Strictly
speaking, only a couple of symbols need to be addressable
in this fashion, so with some care it should be possible to build
binaries much larger than 4MB. To get a list of symbols that need
to be addressable in this fashion, grep the assembly files in
directory gnuefi for the string "@gprel".

o The link address (ImageBase) of the binary is (arbitrarily) set to
zero. This could be set to something larger to increase the chance
of EFI being able to load the binary without requiring relocation.
However, a start address of 0 makes debugging a wee bit easier
(great for those of us who can add, but not subtract... ;-).

o The relocation related sections (.dynamic, .rel, .rela, .reloc)
cannot be placed inside .data because some tools in the GNU
toolchain rely on the existence of these sections.

o Some sections in the ELF binary intentionally get dropped when
building the EFI binary. Particularly noteworthy are the dynamic
relocation sections for
the .plabel and .reloc sections. It would
be _wrong_ to include these sections in the EFI binary because it
would result in .reloc and .plabel being relocated twice (once by
the EFI loader and once by the self-relocator; see below for a
description of the latter). Specifically, only the sections
mentioned with the -j option in the final "objcopy" command are
retained in the EFI binary (see Make.rules).

** (2) Building Relocatable Binaries

ELF binaries are normally linked for a fixed load address and are thus
not relocatable. The only kind of ELF object that is relocatable are
shared objects ("shared libraries"). However, even those objects are
usually not completely position independent and therefore require
runtime relocation by the dynamic loader. For example, IA-64 binaries
normally require relocation of the global offset table.

The approach to building relocatable binaries in the GNU EFI build
environment is to:

(a) build an ELF shared object

(b) link
 it together with a self-relocator that takes care of
    applying the dynamic relocations that may be present in the
    ELF shared object

(c) convert the resulting image to an EFI binary

The self-relocator is of course architecture dependent. The x86
version can be found in gnuefi/reloc_ia32.c, the x86_64 version
can be found in gnuefi/reloc_x86_64.c and the IA-64 version can be
found in gnuefi/reloc_ia64.S.

The self-relocator operates as follows: the startup code invokes it
right after EFI has handed off control to the EFI binary at symbol
"_start". Upon activation, the self-relocator searches the .dynamic
section (whose starting address is given by symbol _DYNAMIC) for the
dynamic relocation information, which can be found in the DT_REL,
DT_RELSZ, and DT_RELENT entries of the dynamic table (DT_RELA,
DT_RELASZ, and DT_RELAENT in the case of rela relocations, as is the
case for IA-64). The dynamic relocation information points to the ELF
relocation table. Once this table is
 found, the self-relocator walks
through it, applying each relocation one by one. Since the EFI
binaries are fully resolved shared objects, only a subset of all
possible relocations need to be supported. Specifically, on x86 only
the R_386_RELATIVE relocation is needed. On IA-64, the relocations
R_IA64_DIR64LSB, R_IA64_REL64LSB, and R_IA64_FPTR64LSB are needed.
Note that the R_IA64_FPTR64LSB relocation requires access to the
dynamic symbol table. This is why the .dynsym section is included in
the EFI binary. Another complication is that this relocation requires
memory to hold the function descriptors (aka "procedure labels" or
"plabels"). Each function descriptor uses 16 bytes of memory. The

IA-64 self-relocator currently reserves a static memory area that can
hold 100 of these descriptors. If the self-relocator runs out of
space, it causes the EFI binary to fail with error code 5
(EFI_BUFFER_TOO_SMALL). When this happens, the manifest constant
MAX_FUNCTION_DESCRIPTORS in gnuefi/reloc_ia64.S
 should be increased
and the application recompiled. An easy way to count the number of
function descriptors required by an EFI application is to run the
command:

 objdump --dynamic-reloc example.so | fgrep FPTR64 | wc -l

assuming "example" is the name of the desired EFI application.

** (3) Creating the Function Descriptor for the IA-64 EFI Binaries

As mentioned above, the IA-64 PE32+ format assumes that the entry
point of the binary is a function descriptor. A function descriptors
consists of two double words: the first one is the code entry point
and the second is the global pointer that should be loaded before
calling the entry point. Since the ELF toolchain doesn't know how to
generate a function descriptor for the entry point, the startup code
in gnuefi/crt0-efi-ia64.S crafts one manually by with the code:

```
        .section .plabel, "a"
_start_plabel:
        data8   _start
        data8   __gp
```

this places the procedure label for entry point _start in
 a section
called ".plabel". Now, the only problem is that _start and __gp need
to be relocated _before_ EFI hands control over to the EFI binary.
Fortunately, PE32+ defines a section called ".reloc" that can achieve
this. Thus, in addition to manually crafting the function descriptor,
the startup code also crafts a ".reloc" section that has will cause
the EFI loader to relocate the function descriptor before handing over
control to the EFI binary (again, see the PECOFF spec mentioned above
for details).

A final question may be why .plabel and .reloc need to go in their own
COFF sections. The answer is simply: we need to be able to discard
the relocation entries that are generated for these sections. By
placing them in these sections, the relocations end up in sections
".rela.plabel" and ".rela.reloc" which makes it easy to filter them
out in the filter script. Also, the ".reloc" section needs to be in
its own section so that the objcopy program can recognize it and can

create the
correct directory entries in the PE32+ binary.

** (4) Convenient and Portable Generation of UNICODE String Literals

As of gnu-efi-3.0, we make use (and somewhat abuse) the gcc option
that forces wide characters (WCHAR_T) to use short integers (2 bytes)
instead of integers (4 bytes). This way we match the Unicode character
size. By abuse, we mean that we rely on the fact that the regular ASCII
characters are encoded the same way between (short) wide characters
and Unicode and basically only use the first byte. This allows us
to just use them interchangeably.

The gcc option to force short wide characters is : -fshort-wchar

1.209 python3-pycryptodome 3.14.1

1.209.1 Available under license :

Copyright and licensing of the Python Cryptography Toolkit ("PyCrypto"):
~~~~~~

Previously, the copyright and/or licensing status of the Python
Cryptography Toolkit ("PyCrypto") had been somewhat ambiguous. The
original intention of Andrew M. Kuchling and other contributors has
been to dedicate PyCrypto to the public domain, but that intention was
not necessarily made clear in the original disclaimer (see
LEGAL/copy/LICENSE.orig).

Additionally, some files within PyCrypto had specified their own
licenses that differed from the PyCrypto license itself. For example,
the original RIPEMD.c module simply had a copyright statement and
warranty disclaimer, without clearly specifying any license terms.
(An updated version on the author's website came with a license that
contained a GPL-incompatible advertising clause.)

To rectify this situation for PyCrypto 2.1, the following steps have
been taken:

1. Obtaining explicit permission
from the original contributors to
dedicate their contributions to the public domain if they have not
already done so. (See the "LEGAL/copy/stmts" directory for
contributors' statements.)

2. Replacing some modules with clearly-licensed code from other
sources (e.g. the DES and DES3 modules were replaced with new ones
based on Tom St. Denis's public-domain LibTomCrypt library.)

3. Replacing some modules with code written from scratch (e.g. the
RIPEMD and Blowfish modules were re-implemented from their
~~~~~~

respective algorithm specifications without reference to the old implementations).

4. Removing some modules altogether without replacing them.

To the best of our knowledge, with the exceptions noted below or within the files themselves, the files that constitute PyCrypto are in the public domain. Most are distributed with the following notice:

The contents of this file are dedicated to the public domain. To the extent that dedication to
the public domain is not available,
everyone is granted a worldwide, perpetual, royalty-free,
non-exclusive license to exercise all rights associated with the
contents of this file for any purpose whatsoever.
No rights are reserved.

RELEASE
The Linux man page maintainer proudly announces. . .

   man-pages-5.13.tar.gz - man pages for Linux

Differences from the previous manual pages release are listed in
the file "Changes".

For further information, visit http://www.kernel.org/doc/man-pages/

POSIX PAGES
This package used to contains a copy of the POSIX 1003.1-2003
man pages. The POSIX pages are now distributed in the separate
man-pages-posix package.

THE PAGES
These pages are most of the section 2, 3, 4, 5, 7 man pages
for Linux. A few pages are provided in sections 1 and 8 for commands
that are not documented in other packages, and there are a few pages
in sections 5 and 8 for the timezone utilities.

[The timezone pages were taken from
ftp://elsie.nci.nih.gov/pub/tzcode2001a.tar.gz.]
[The section 3 man pages for the db routines have been taken from
ftp://ftp.terra.net/pub/sleepycat/db.1.86.tar.gz.]
[The rpc man pages were taken from the 4.4BSD-Lite
CDROM.]

Here is a breakdown of what this distribution contains:

Section 1 = user commands (intro, plus a few other pages)
Section 2 = system calls
Section 3 = libc calls
Section 4 = devices (e.g., hd, sd)
Section 5 = file formats and configuration files (e.g., wtmp, /etc/passwd)
Section 6 = games (intro only)
Section 7 = overviews, conventions, macro packages, etc.
Section 8 = system administration (intro, plus a few other pages)

This package contains no, or very few, section 1, 6, and 8 man pages
because these should be distributed with the binaries they are written
for. Sometimes Section 9 is used for man pages describing parts of
the kernel.

Note that only Section 2 is rather complete, but Section 3 contains
several hundred man pages. If you want to write some man pages,
or suggest improvements to existing pages, please visit
http://www.kernel.org/doc/man-pages/ .

Copyright information:

These man
pages are distributed under a variety of copyright licenses.
Although these licenses permit free distribution of the nroff sources

contained in this package, commercial distribution may impose other
requirements (e.g., acknowledgement of copyright or inclusion of the
raw nroff sources with the commercial distribution).
If you distribute these man pages commercially, it is your
responsibility to figure out your obligations. (For many man pages,
these obligations require you to distribute nroff sources with any
pre-formatted man pages that you provide.) Each file that contains
nroff source for a man page also contains the author(s) name, email
address, and copyright notice.

 commit 57b65325fe34ec4c917bc4e555144b4a94d9e1f7'
.b'\\"'
.b'\\"'
.b'\\" commit ef1820f9be27b6ad158f433ab38002ab8131db4d'
.b'\\"'
.b'\\" The following appears to be rubbish.  It doesn\'t seem to'
.b'\\" be true according to the kernel source, and I can write'
.b'\\" a program that gets a terminal-generated SIGIO even though'
.b'\\" it is not the foreground process group of the terminal.'
.b'\\" -- MTK, 8 Apr 05'
.b'\\"'
.b'\\" If the file descriptor'
.b'\\" .I fd'
```

```
.b'\\" refers to a terminal device, then SIGIO'
.b'\\" signals are sent to the foreground process group of the terminal.'
.b'\\" The relevant place in the (2.6) kernel source is the'
.b'\\" \'switch\' in fs/fcntl.c::send_sigio_to_task() -- MTK, Apr 2005'
.b'\\" send_sigurg()/send_sigurg_to_task() bypasses'
.b'\\" kill_fasync()/send_sigio()/send_sigio_to_task()'
.b'\\" to directly call send_group_sig_info()'
.b'\\"\t-- MTK, Apr 2005 (kernel 2.6.11)'
.b'\\"'
.b'\\" The following was true only up until 2.6.11:'
.b'\\"'
.b'\\"
 Additionally, passing a nonzero value to'
.b'\\" .B F_SETSIG'
.b'\\" changes the signal recipient from a whole process to a specific thread'
.b'\\" within a process.'
.b'\\" See the description of'
.b'\\" .B F_SETOWN'
.b'\\" for more details.'
.b'\\" See fs/fcntl.c::send_sigio_to_task() (2.4/2.6) sources -- MTK, Apr 05'
.b'\\" The following became true in kernel 2.6.10:'
.b'\\" See the man-pages-2.09 Changelog for further info.'
.b'\\" The following does seem a poor API-design choice...'
.b'\\"'
.b'\\" One or more other seals are typically used with F_SEAL_WRITE'
.b'\\" because, given a file with the F_SEAL_WRITE seal set, then,'
.b'\\" while it would no longer be possible to (say) write zeros into'
.b'\\" the last 100 bytes of a file, it would still be possible'
.b'\\" to (say) shrink the file by 100 bytes using ftruncate(), and'
.b'\\" then increase the file size by 100 bytes, which would have'
.b'\\" the effect of replacing the last hundred bytes by zeros.'
.b'\\"'
.b'\\"'
.b'\\"
 .BR _BSD_SOURCE ,'
.b'\\" or'
.b'\\" .PP'
.b'\\" SVr4 documents additional EIO, ENOLINK and EOVERFLOW error conditions.'
.b'\\" FIXME . Once glibc adds support, add a note about FTM requirements'
.b'\\"'
.b'\\"'
.b'\\" e.g., Solaris 8 documents this field in fcntl(2), and Irix 6.5'
.b'\\" documents it in fcntl(5).  mtk, May 2007'
.b'\\" Also, FreeBSD documents it (Apr 2014).'
.b'\\"'
.b'\\" Neil Brown: With NFSv3 the failure mode is the reverse.  If'
.b'\\"     the server loses contact with a client then any lock stays in place'
.b'\\"     indefinitely ("why can\'t I read my mail"... I remember it well).'
```

```
.b'\\'"
.b'\\'"
.b'\\" Jeff Layton:'
.b'\\"     Note that this is not a firm timeout. The server runs a job'
.b'\\"     periodically to clean out expired stateful objects, and it\'s likely'
.b'\\"     that there is some time (maybe even up to another whole lease period)'
.b'\\"     between when the timeout expires and the job actually runs. If the'
.b'\\"     client gets a RENEW in there
 within that window, its lease will be'
.b'\\"     renewed and its state preserved.'
.b'\\'"

Richard
Kreckel <Richard.Kreckel@ginac.de>
Vasya Pupkin <ptushnik@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages
  Fabian Kreutz
    Many math pages had their synopses compressed, as per suggestion
    from Fabian Kreutz.

Various pages
  Fabian Kreutz / aeb
    Many minor content and formatting bug fixes were made to the math
    pages, following suggestions from Fabian Kreutz (who recently
    translated many of the 1.70 math pages into German) and
    Andries Brouwer.

Various pages
  mtk
    For consistency, all instances of "super-user" were changed
    to the more common "superuser".

Various pages
  Vasya Pupkin / mtk
    After a note from Vasya Pupkin, I added <errno.h> to the SYNOPSIS
    of several Section 2 pages using the _syscallN() macros.

    In addition:
      -- erroneous semicolons at the end of _syscallN() were removed
        on various pages.

      --
types such as "uint" in syscallN() declarations were changed
        to "unsigned int", etc.

-- various other minor breakages in the synopses were fixed.

The affected pages are:

getdents.2
gettid.2
llseek.2
mmap2.2
modify_ldt.2
pivot_root.2
quotactl.2
readdir.2
sysctl.2
syslog.2
tkill.2

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

bind.2
Florian Weimer
Added 'const' to declaration of 'my_addr' in prototype.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=239762.

fcntl.2
Martin Pool
Added O_NOATIME to list of flags that can be changed via F_SETFL.
mtk/aeb
Noted F_GETOWN bug after suggestion from aeb.
See also:
http://marc.theaimsgroup.com/?l=linux-kernel&m=108380640603164&w=2

getrlimit.2
mtk
Material on getrusage.2 has been separated out into its own page.
Rewrote discussion on RLIMIT_MEMLOCK to incorporate kernel
2.6.9 changes.
Added note on RLIMIT_CPU error in older kernels.
Added RLIMIT_SIGPENDING.
Also made a few other minor changes.

getrusage.2
mtk
This page is new(ish) -- it was created by splitting

getrlimit.2.

Repaired note on SIGCHLD behavior to note that the
POSIX non-conformance has been fixed in 2.6.9.

kill.2
Modified after suggestion from Emmanuel Colbus
Changed wording of sentence under NOTES describing
when signals can be sent to init(1).

mlock.2
munlock.2
mlockall.2
munlockall.2
These have been consolidated into a single mlock.2 page.
In the process, much duplication was eliminated
and new information was added about RLIMIT_MEMLOCK
and the changes
in memory locking in kernel 2.6.9,

mmap.2
mtk
Added cross-ref to setrlimit(2) concerning memory locking limits.
Eric Estievenart
Note that MAP_FIXED replaces existing mappings

msgctl.2
mtk
Substantial language and formatting clean-ups.
Added msqid_ds and ipc_perm structure definitions.

msgget.2
mtk
Substantial language and formatting clean-ups.
Added notes on /proc files.

msgop.2
mtk
Substantial language and formatting clean-ups.
Added notes on /proc files.

open.2
Martin Pool
Added O_NOATIME (new in Linux 2.6.8)
mtk
Reordered list of 'flags' description alphabetically

personality.2

2004-11-03 applied patch from Martin Schulze

semctl.2
mtk
Substantial language and formatting clean-ups.
Rewrote semun text.
Added semid_ds and ipc_perm structure definitions.

semget.2
mtk
Substantial language and formatting clean-ups.
Added
notes on /proc files.
Rewrote BUGS note about semget()'s failure to initialize
semaphore values.

semop.2
mtk
Substantial language and formatting clean-ups.
Added notes on /proc files.

shmctl.2
mtk
Substantial language and formatting clean-ups.
Updated shmid_ds structure definitions.
Added information on SHM_DEST and SHM_LOCKED flags.
Noted that CAP_IPC_LOCK is not required for SHM_UNLOCK
since kernel 2.6.9.
Added notes on 2.6.9 RLIMIT_MEMLOCK changes.
Added RLIMIT_SIGPENDING (new in Linux 2.6.8)

shmget.2
mtk
Substantial language and formatting clean-ups.
Added notes on /proc files.

shmop.2
mtk
Substantial language and formatting clean-ups.
Changed wording and placement of sentence regarding attachment
of segments marked for destruction.

sigaction.2
mtk
Added mention of SIGCONT under SA_NOCLDSTOP.
Added SA_NOCLDWAIT.
Updated discussion for POSIX.1-2001 and SIGCHLD and sa_flags.
Noted that CLD_CONTINUED is supported since Linux 2.6.9.

Added SI_TKILL (new in Linux 2.4.19).
Other minor changes.

signal.2
mtk
Removed text on ignoring SIGCHLD; replaced with pointer
to sigaction.2.

sigwaitinfo.2
After bug report from Andrey Kiselev
Fixed prototype: "timeout" --> "*timeout"
as per: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=222145

stat.2
Enrico Zini
Added text to clarify that S_IS*() macros should be applied to
st_mode field.
as per: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=249698

swapon.2
After Debian bug report from Anand Kumria
Added "no swap space signature" to EINVAL error.
mtk
Added EINVAL error for swapoff() ("not currently a swap area").
Added EBUSY error for swapon().
A few formatting fixes.

times.2
mtk
In Linux 2.6, the return value
of times changed; it is no
longer time since boot, but rather:

boot_time + 2^32 / HZ - 300

Repaired note on SIGCHLD behavior to note that the
POSIX non-conformance has been fixed in 2.6.9.
Some formatting fixes.

undocumented.2
After bug report from Johannes Berg
Changed
.TH UNIMPLEMENTED
to:
.TH UNDOCUMENTED
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=220741

wait.2

mtk
Added waitid(2).
Added WCONTINUED and WIFCONTINUED (new in 2.6.10).
Added text on SA_NOCLDSTOP.
Updated discussion of SA_NOCLDWAIT to reflect 2.6 behavior.
Much other text rewritten.

wait4.2
mtk
Rewrote this page, removing much duplicated information,
and replacing with pointers to wait.2.
Luis Javier Merino Morán / mtk
CONFORMING TO said "SVr4, POSIX". Changed to "4.3BSD"

waitid.2
mtk
New link to wait.2

assert.3

After bug report from Branden Robinson
The assert() failure message goes to stderr not stdout.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=284814

ctime.3
mtk
Noted that 0 in tm_mday is interpreted to mean the last day
of the preceding month.

getnameinfo.3
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=229618
getnameinfo() does not set errno, it returns a non-zero
value indicating the error.
mtk
added EAI_OVERFLOW error

killpg.3
mtk
Minor changes to SEE ALSO and CONFORMING TO.

lseek64.3
aeb
New page by Andries Brouwer

tzset.3
Richard Kreckel
Change "NULL" to "empty" when talking about the value of TZ.
http://sources.redhat.com/bugzilla/show_bug.cgi?id=601

printf.3
  After bug report from Jan Kuznik
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=205736
    Fixed bad realloc() use in snprintf() example

realpath.3
  mtk
    Added discussion
 of resolved_path == NULL.

random.4
  After bug report from John V. Belmonte
    Updated init and quit scripts to reflect kernel 2.4/2.6 reality
    (Scripts taken from drivers/char/random.c)
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=247779

proc.5
  mtk
    Updated description of /proc/loadavg to include
    nr_running(), nr_threads, last_pid.

    rtsig-max and rtsig-nr went away in 2.6.8

    updated statm, and fixed error in order of list

boot.7
  applied patch from Martin Schulze

capabilities.7
  mtk
    Added O_NOATIME for CAP_FOWNER

netdevice.7
  Karel Kulhavy and AEB
    Formatting fix after note from Karel Kulhavy and AEB, plus a
    few wording fixes.

signal.7
  mtk
    /proc/sys/kernel/rtsig-* were superseded by RLIMIT_SIGPENDING
    in kernel 2.6.8.

tcp.7
  mtk/aeb
    Updated details of interaction of TCP_CORK and TCP_NODELAY.

========== Changes in man-pages-2.01 ==========

Released:
 2004-12-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Carsten Hey <c.hey@web.de>
Johannes Berg <johannes@sipsolutions.de>
Joshua Kwan <joshk@triplehelix.org>
Marek Habersack <grendel@debian.org>
Martin Schulze <joey@infodrom.org>

Apologies if I missed anyone!

Global changes
---

accept.2
close.2
send.2
setsid.2
socket.2
closedir.3
initgroups.3
mkstemp.3
opendir.3
readdir.3
telldir.3
  Matthew Dempsky, mtk
    triggered by http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=283179
    The wording describing how errno is set was fixed up in these pages.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

sendfile.2

mtk
Adjusted descriptions of argument file types to be closer to
2.6 reality.
Wording and formatting changes.

ctan.3
ctanh.3
Tony Crawford
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=270817
Formulae on the pages should be T = S / C not T = C / S.

errno.3
Martin Schulze, mtk
Removed errno declaration from prototype, added notes
on historical need for this declaration.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=174175

aio_return.3
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=224953
Changed erroneous "aio_return(2)" to "aio_return(3)".

posix_openpt.3
mtk
New by mtk

ptsname.3
mtk
Added description of ptsname_r().
Added ERRORS.

ptsname_r.3
mtk
New link to ptsname.3.

shm_open.3
Matthew Gregan
add <fcntl.h> to synopsis
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=271243

strcasecmp.3
Marek
Habersack
.SH "CONFORMING TO"
-BSD 4.4
+BSD 4.4, SUSv3
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=234443

strfry.3

Joshua Kwan
Added _GNU_SOURCE to prototype
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=213538

strftime.3
Cartsen Hey
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=276248

Changed range for "%S" from 0..61 to 0..60.

SUSv3 says 0..60. I think the manual page probably says
0..61, because that's what SUSv2 said.
(Some other implementations' man pages also say 0..61 --
e.g., Solaris 8 & 9, Tru64 5.1B; FreeBSD 5.1 says 0..60.)

The glibc manual currently says 0..60.

Given that SUSv3 says 0..60, I've changed the
manual page to also say this:

-The second as a decimal number (range 00 to 61).
+The second as a decimal number (range 00 to 60).
+(The range is up to 60 to allow
for occasional leap seconds.)

sysconf.3
Johannes Berg
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=226974
-.BR POSIX2_FORT_RUN " - " _SC_2_FORT_DEV
+.BR POSIX2_FORT_DEV " - " _SC_2_FORT_DEV

system.3
Pedro Zorzenon
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=242638
Noted use of _XOPEN_SOURCE to get macros from <stdlib.h>
for wait(2).

mtk
Changed name of argument from 'string' to 'command' (like POSIX).

Noted that glibc does nowadays explicitly check for the existence
of the shell if 'command' is NULL, rather than the older behavior
of assuming the shell exists and always returning 1 if
'command' is NULL.

Other wording and formatting clean-ups.

undocumented.3

Remove some functions names that *are* documented.

========== Changes in man-pages-2.02 ==========

Released: 2005-04-14

Contributors

The following people
contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Michael Haardt <michael@moria.de>
Michael Mühlebach <michael@anduin.ch>
Mike Frysinger <vapier@gentoo.org>
Sasa Stevanovic <mg94c18@alas.matf.bg.ac.yu>
Serguei Leontiev <leo@sai.msu.ru>

Apologies if I missed anyone!

Global changes
---

ctime.3
tzselect.8
zdump.8
zic.8
  Martin (Joey) Schulze
    Removed SEE ALSO reference to nonexistent newctime(3).
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=236884

Typographical

or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

clone.2
  mtk
    Noted the PID caching behavior of NPTL's getpid()
    wrapper under BUGS.

    Added futex(2), set_thread_area(2), set_tid_address(2),
    tkill(2) under SEE ALSO.

epoll_ctl.2
epoll_create.2
  Marko Kohtala / mtk
    Improved various error descriptions.

epoll_wait.2
  David Lloyd / Mike Frysinger, Marko Kohtala
    Added EINTR to errors.

fcntl.2
  Jamie Lokier / mtk
    Improved discussion of F_SETOWN and F_SETSIG with respect to
    multi-threaded programs.
    Generally cleaned up the discussion of F_SETOWN.

    Updated CONFORMING TO to note that F_GETOWN and F_SETOWN are
    now in POSIX.

link.2
  mtk
    Noted discrepancy between Linux and POSIX.1 when oldpath
    is a symbolic link.
    See: http://bugs.linuxbase.org/show_bug.cgi?id=367
    and: http://www.opengroup.org/austin/mailarchives/ag/msg08152.html

   Michael Haardt / mtk
    Clarified EXDEV error description: it isn't possible to link
    across mount points, even if the mount points refer to the same
    file system.

mincore.2
  mtk, after note from Gordon Jin
    Updated ERRORS.

pipe.2
  As per message from Serguei Leontiev
    Removed SVr2, AT&T, and BSD from CONFORMING TO, since
    a pipe on those systems is actually bidirectional.
    (Pipes are implemented as STREAMS on the former, and
    sockets on the latter.)

posix_fadvise.2
  mtk
    Noted kernel version where posix_fadvise() appeared and
    noted bug in handling of 'len' in kernels < 2.6.6.

rename.2
  Michael Haardt
    Clarified EXDEV error description: it isn't possible to rename
    a file across mount points, even if the mount points refer to
    the same file system.

semop.2
  mtk
    Noted kernel version numbers for semtimedop().

setitimer.2
   Matthias Lang, mtk
    Noted MAX_SEC_IN_JIFFIES ceiling.
    Added note about treatment of out-of-range tv_usec values.

sigqueue.2
  Johan Walles, Martin (Joey) Schulze
    Added sigqueue.2 to SEE ALSO.

times.2
  mtk
    Added notes on non-standard behavior: Linux allows 'buf' to
    be NULL, but POSIX.1 doesn't specify this and it's non-portable.

uselib.2
  Andries Brouwer
    Improved DESCRIPTION; clarified distinction between
    EACCES and ENOEXEC.

bcopy.3
  Heikki Orsila
    bcopy() handles overlapping case, but memcpy() does not,
    so for consistency memmove() should be also mentioned.

getmntent_r.3
  Martin (Joey) Schulze

New link to man3/getmntent.3.

memcpy.3
Small wording change after suggestion from Sasa Stevanovic.

strcasestr.3
mtk
Created as link to strstr.3.

strftime.3
mtk
Noted that SUSv2 allowed a range of 00 to 61 for %S specifier.

strstr.3
mtk
Added description
of strcasestr().

random.4
aeb
Improved description of read from /dev/urandom.

st.4
Kai Makisara
Substantial updates.

man.7
Martin Schulze
Branden Robinson
Colin Watson
Mention the .URL macro more verbosely.

========== Changes in man-pages-2.03 ==========

Released: 2005-06-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Joey (Martin) Schulze <joey@infodrom.org>
Johannes Nicolai <johannes.nicolai@hpi.uni-potsdam.de>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Klaus Ethgen <Klaus@Ethgen.de>

Pavel Heimlich <tropikhajma@seznam.cz>
Ross Boylan <RossBoylan@stanfordalumni.org>
Vincent Fourmond <vincent.fourmond@9online.fr>

Apologies if I missed anyone!

Global changes
---

console.4
console_ioctl.4
mouse.4
tty.4
vcs.4
  Pavel Heimlich
    Change `ttys(4)' to `ttyS(4)'.

Typographical
 or grammatical errors have been corrected in several
places.

Changes to individual pages
---

clone.2
  mtk
    Substantially enhanced discussion of CLONE_THREAD.

    Added CLONE_SYSVSEM, CLONE_UNTRACED, CLONE_STOPPED.

    Other minor fixes.

execve.2
  aeb
    Noted effect of ptracing when execing a set-UID program.

fcntl.2
  Johannes Nicolai / mtk
    Noted F_SETOWN bug for socket file descriptor in Linux 2.4
    and earlier.

    Added text on permissions required to send signal to owner.

flock.2
  mtk
    Noted that lock conversions are not atomic.

getrusage.2

mtk
ru_nswap has never contained useful information.
Kernel 2.6.6 clarified that with a patch
("[PATCH] eliminate nswap and cnswap"). See also:
http://www.ussg.iu.edu/hypermail/linux/kernel/0404.1/0720.html

kill.2
mtk
Clarified wording of the 'pid == -1' case.

mount.2
mtk

Added MNT_EXPIRE, plus a few other tidy-ups.

sched_setaffinity.2
mtk
Added text to note that sched_setaffinity() will migrate the
affected process to one of the specified CPUs if necessary.

Added a NOTE to point out that the affinity mask is actually a
per-thread attribute that can be adjusted independently for
each thread in a thread group.

shmctl.2
mtk
Noted aberrant Linux behavior with respect to new attaches to a
segment that has already been marked for deletion.

Noted changes in permissions required for SHM_LOCK/SHM_UNLOCK.

wait.2
mtk
Noted that the __W* flags can't be used with waitid().

confstr.3
mtk
Added _CS_GNU_LIBC_VERSION and _CS_GNU_LIBPTHREAD_VERSION.

hosts.5
Ross Boylan / Martin Schulze
various changes as per
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=304242

proc.5
mtk
Minor changes to discussion of /proc/PID/stat signal fields.

Added 'rt_priority' and 'policy' to /proc/PID/stat.

capabilities.7
  mtk
    1,$s/inherited/inheritable/g

regex.7
  Vincent Fourmond / Joey (Martin) Schulze
    Removed discussion of `[[:<:]]' and `[[:>:]]' since they do
    not seem to be in the glibc implementation.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=295666

tzselect.8
  Joey (Martin) Schulze / Klaus Ethgen
    The default zoneinfo directory is now /usr/share/zoneinfo.
    (was: /usr/local/etc/zoneinfo)
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=267471

========== Changes in man-pages-2.04 ==========

Released: 2005-06-21

Thomas Hood <jdthood@yahoo.co.uk>
Vincent Lefevre <vincent@vinc17.org>

Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Various pages
  mtk
    For consistency across pages:

      1,$s/nonzero/non-zero/g

Typographical or grammatical errors have been corrected in several
places.

New pages
---

pthreads.7
  mtk
    An overview of the Linux implementations of POSIX threads.

Changes to individual pages

_exit.2
  mtk
    Various
 minor changes.

epoll_ctl.2
  Mike Furr
    BUGS: In kernels < 2.6.9, EPOLL_CTL_DEL required a non-NULL
    'event', even though this argument is ignored.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306517

flock.2
  mtk / Kevin Ryde
    Clarified semantics of relationship between flock() locks
    and open file entries and file descriptors.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=291121

getitimer.2
  Olivier Croquette, Thierry Excoffier
    Noted the existence of the short sleep bug (up to 1 jiffy).

getrlimit.2
  mtk
    RLIMIT_RSS only has affect "in 2.4.x", not "in 2.4 and later".

getrusage.2
  Geoff Clare
    Since Linux 2.6, the ru_nvcsw and ru_nivcsw fields are used.

nice.2
  mtk / Guido Trotter
    Rewrote description of return value.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=296183

open.2
  Walter Harms
    O_DIRECT needs _GNU_SOURCE.
  mtk
    O_ASYNC works
 for pipes and FIFOs in Linux 2.6.
    Various minor fixes.

atexit.3
  mtk
    Various minor changes.

exit.3
  mtk
    Various minor changes.

getopt.3
  mtk / Philipp Spitzer
    Fix description of return value.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=308359

hsearch.3
  mtk
    Changed (char *) to (void *) in example.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=313607

log1p.3
  Justin Pryzby
    Make log(3) SEE ALSO log1p(3),
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=309578

makecontext.3
  Tanaka Akira
    Fix description of RETURN VALUE for makecontext(),

as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=311800

on_exit.3
  mtk
    Various minor changes.

rand.3
  kabloom
    Small fix to a code example,
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=194842

realpath.3
  mtk / Thomas Hood
    When specifying resolved_path as NULL,
 realpath()
    will (still) only allocate up to PATH_MAX bytes.
    Plus other minor changes.
    See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=239424

rcmd.3
  Dave Love
    The required header file for these functions on Linux is <netdb.h>,
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=311680

scanf.3
  Olivier Guilyardi
    Arg for %p is a pointer to _a pointer to_ void,
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=263109

stdin.3
  Vincent Lefevre
    freopen() can change the descriptors associated with
    stdin/stdout/stderr, as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=295859

strerror.3
  Baurjan Ismagulov
    strerror_r(3) requires #define _XOPEN_SOURCE 600,
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=290880

sysconf.3
  Peter Cordes / mtk
    Fix typo: "_SC_2_DEV" should be "_SC_2_C_DEV".

proc.5
  mtk
    Added pointers under /proc/sys/net

to tcp.7 and ip.7.

ip.7
  mtk
    Various wording and formatting fixes.
    Reordered /proc/sys/net/ipv4/ip_* file descriptions alphabetically.

tcp.7
  Dieter Brueggemann / mtk
    Fixes to the discussion of SIOCATMARK and tcp_stdurg.
  mtk
    Various wording and formatting fixes.
    Incorporated some new /proc/sys/net/ipv4/tcp_* file descriptions
    from the 2.6.12 source file Documentation/networking/ip-sysctl.txt.

========== Changes in man-pages-2.05 ==========

Released: 2005-06-27

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

A Costa <agcosta@gis.net>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Bas Zoetekouw <bas@debian.org>
Dan Jacobson <jidanni@jidanni.org>
Delian Krustev <krustev@krustev.net>
Dora Anna Volgyesi <volgyesi@elte.hu>
Martin (Joey) Schulze <joey@infodrom.org>
Ove Kaaven <ovek@arcticnet.no>

Apologies if I missed
 anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places. (Special thanks to A Costa.)

Changes to individual pages

_exit.2
  mtk / aeb
    Reversed 2.04 introduction of the term "process termination
    function".

close.2
  mtk
    Clarified what type of lock close() affects.
    Minor formatting changes.

dup.2
  mtk
    Consistent use of terms "open file description",
    "file status flags", and "file descriptor flags".
    Removed mention of lock sharing -- it was not accurate.
    Minor formatting fixes.

fcntl.2
  mtk
    Consistent use of terms "open file description",
    "file status flags", and "file descriptor flags".
    Some rewriting of discussion of file descriptor flags
    Under F_DUPFD, replaced some text duplicated in dup.2
    with a cross ref to dup.2
    Minor wording and formatting fixes.

fpclassify.3
  mtk /
 Martin (Joey) Schulze / Bas Zoetekouw
    The return value of isinf() changed in glibc 2.02
    to differentiate positive and negative infinity.
    See: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=285765

getgid.2
getuid.2
  Delian Krustev
    Remove confusing text describing real and effective IDs.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=285852

getitimer.2
  mtk
    The short sleep bug (up to 1 jiffy) that was newly noted in
    man-pages-2.04 has just been fixed in 2.6.12.

getpriority.2
  mtk
    Changed range documented in main text from -20..20 to -20..19.
    Noted that the range is -20..20 on some systems.

open.2
  mtk / aeb
    Clarification of term "open file description" along with
    explanation of what information it maintains.
    Other wording improvements.
    Various minor wording changes.

atexit.3
  mtk / aeb
    Reversed 2.04 introduction of the term "process termination
     function".
  mtk
    Noted use of atexit() for establishing function to be invoked on
    shared library unload.
    Noted that atexit()-registered functions are not invoked on
    abnormal termination.
    Formatting fixes.

exit.3
  mtk / aeb
    Reversed 2.04 introduction of the term "process termination
    function".
  mtk
    Minor rewording and formatting changes.

getloadavg.3
  mtk
    Added #define _BSD_SOURCE to prototype.

log2.3
  Martin (Joey) Schulze
    Add ERANGE error.

readdir.3
  mtk
    Added definition of Linux dirent structure.
    Some formatting cleanups.

strtod.3
  Dora Anna Volgyesi / mtk
    strtold() and strtof() need _ISOC99_SOURCE or _XOPEN_SOURCE=600
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=246668

tdestroy.3
  mtk
    New link to tsearch.3.

tsearch.3
  mtk
    Added tdestroy to .TH line.

mem.4
  mtk
    Change "chown root:mem /dev/mem" to
 "chown root:kmem /dev/mem".

null.4
  mtk
    Change "chown root:mem /dev/null /dev/zero" to
    "chown root:root /dev/null /dev/zero".

vcs.4
  Dan Jacobson / Martin (Joey) Schulze
    Replaced "selection(1)" by "gpm(8)" under SEE ALSO
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=253515

signal.7
  Ove Kaaven
    SA_SIGACTION should be SA_SIGINFO
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=305369

urn.7
  mtk
    New link to uri.7

Mike Frysinger <vapier@gentoo.org>
Petter Reinholdtsen <pere@hungry.com>
Steven Murdoch <Steven.Murdoch@cl.cam.ac.uk>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Many uses of hyphens and dashes were corrected.

New pages
---

canonicalize_file_name.3
  Walter Harms / mtk

Removed Pages
---

sstk.2
  mtk
    AFAIK, this system call has never actually done anything (other
    than be a stub) on any Unix.

Changes to individual pages
---

accept.2
  mtk
    Various wording and formatting fixes.

bind.2
  mtk
    Minor formatting changes

clone.2
  mtk
    Various minor wording improvements; some formatting fixes

connect.2
  mtk
    Various wording and formatting
 fixes.

epoll_create.2
  Bhavesh P Davda
    s/positive/non-negative/   [for file descriptor]

getrlimit.2
  mtk
    Documented RLIMIT_MSGQUEUE limit.
    RLIMIT_RSS ceased to have any effect in 2.4 in kernel 2.4.30.
    (It already didn't have any effect in 2.2.x and 2.6.x.)
    s/MADVISE_WILLNEED/MADV_WILLNEED/

listen.2
  mtk
    Removed historic comment on BSD backlog ceiling.
    Minor wording and formatting changes.

semop.2
  mtk
    Added BUG: in some circumstances, a process that is
    waiting for a semaphore to become zero is not woken
    up when the value does actually reach zero.
    http://marc.theaimsgroup.com/?l=linux-kernel&m=110260821123863&w=2
    http://marc.theaimsgroup.com/?l=linux-kernel&m=110261701025794&w=2

socket.2
  mtk
    Various minor wording improvements

umask.2
  mtk
    Added mkdir(2) to discussion, made term "file mode creation
    mask" clearer.
    Various, mostly
 small, wording changes

errno.3
  Martin Pool
    Change description for ESTALE
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=237344

fgetgrent.3
getgrent.3
getgrent_r.3

David Lloyd
Added SEE ALSO putgrent(3)
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=211336

getgrent.3
getgrnam.3
getpwent.3
getpwnam.3
Lars Wirzenius / mtk
Replace mention of /etc/{passwd,group} by references to
"passwd/group database", and LDAP and NIS.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316117
mtk
Miscellaneous wording improvements
Consistent DESCRIPTION and ERRORS wording across these pages.

getnameinfo.3
mtk
Relocate misplaced text describing gai_strerror().

getnetent.3
Petter Reinholdtsen
s/endservent/endnetent/
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316517

getspnam.3
Lars Wirzenius / mtk
Replace mention of /etc/shadow by references
to
"shadow password database", and LDAP and NIS.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=316117
mtk, Claus Weber
Miscellaneous wording improvements
Consistent DESCRIPTION wording vis-a-vis getpwnam.3 etc.

hsearch.3
Frederik Deweerdt
Fix hsearch_r() prototype

scanf.3
Justin Pryzby / mtk
Fix description of RETURN VALUE
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=317037
mtk
various parts substantially rewritten; added description of
%n$ form; various text incorporated from the GNU C library
documentation ((C) The Free Software Foundation).

shm_open.3
  mtk
    Modified details of how user and group ownership of a new
    object are set.
    Various minor wording and formatting cleanups.

elf.5
  Mike Frysinger
    tweaked the short description to include definition of 'ELF'
    add ELFOSABI_NONE to the ELFOSABI_ list
    tweak/add
 more machines to EM_ list for ehdr->e_machine
    fix indenting to be consistent
    tweak the display of the ELF_ST_* macros
    document the Elf_Dyn structure

proc.5
  mtk
    Updated discussion of /proc/stat.
    Added text on the /proc/sys/fs/mqueue/* files.

ip.7
  Steven Murdoch
    Change protocol in UDP prototype.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182635

tcp.7
  Dov Murik
    The first sentence under NOTES about SO_KEEPALIVE and SIGPIPE
    makes no grammatical sense (and possibly also no technical sense).
    It has been removed.

========== Changes in man-pages-2.07 ==========

Released: 2005-07-19

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Mike Frysinger <vapier@gentoo.org>

Apologies if I missed anyone!

Global changes

Various
 pages
  mtk
    The terms "set-user-ID" and "set-group-ID" are now used
    consistently (no abbreviations) across all manual pages.

Various pages
  mtk
    Consistent use of "saved set-user-ID" and "saved set-group-ID"
    (no more "saved user ID", "saved effective UID",
    saved group ID", etc.)

Various pages
  mtk
    Global fixes in textual descriptions:

      uid --> UID
      gid --> GID
      pid --> PID
      id --> ID

Various pages
  mtk
    Consistent use of st_atime, st_ctime, st_mtime, with
    explanatory text, instead of atime/ctime/mtime.

Various pages
  mtk
    Classical BSD versions are now always named x.yBSD (formerly
    there was a mix of x.yBSD and BSD x.y).

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

setresuid.2
  mtk
    Some rewording.

stat.2
  Mike Frysinger
    Improve description

of st_dev and st_rdev.
  mtk
    Various wording and formatting improvements.

truncate.2
  mtk
    Some formatting fixes

Apologies if I missed anyone!

Global changes

Various pages

mtk
RFC references are now always written as "RFC\ nnn"
(not "RFC nnn" or "RFCnnn").

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

du.1
Mike Frysinger
To get an effect like "-h", BLOCKSIZE must start with "human",
not "HUMAN".

time.1
Mike Frysinger
s/standard output/standard error/

clone.2
Paul Brook / mtk
Fix small error in description of CLONE_PARENT_SETTID

connect.2
Heikki Orsila
Add EINTR error
See http://lkml.org/lkml/2005/7/12/254

getpriority.2
mtk
Expanded discussion of relationship between user and kernel
representations of the
nice value.

Added discussion of RLIMIT_NICE and a cross reference to
getrlimit.2 under the description of the EACCES error.

Noted 2.6.12 change in credentials checking for setpriority().

getrlimit.2
mtk
Added description of RLIMIT_RTPRIO

Added description of RLIMIT_NICE

mmap.2
mtk

Noted bug in MAP_POPULATE for kernels before 2.6.7.

mremap.2
mtk
Added _GNU_SOURCE to prototype.
Rewrote description of MREMAP_MAYMOVE.
Rewrote description of EAGAIN error.
Added discussion of resizing of memory locks.
Added entries to SEE ALSO.
Some formatting fixes.

msgctl.2
mtk
Added IPC_INFO, MSG_INFO, MSG_STAT descriptions.

nanosleep.2
Baurzhan Ismagulov
Add to prototype: define _POSIX_C_SOURCE 199309
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=314435

nice.2
mtk
Added sentence noting that range of the nice value is described

in getpriority.2.
Added cross-reference to setrlimit(2) for discussion on
RLIMIT_NICE.

outb.2
David N. Welton / Justin Pryzby / mtk
Clarified the order of value and port arguments;
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=263756

pause.2
mtk
Added SEE ALSO for sigsuspend.2
Some formatting fixes.

poll.2
Tommy Pettersson
nfds should be prototyped as nfds_t
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=322934

mtk
Some wording and formatting improvements.

prctl.2
mtk

Since kernel 2.6.13 PR_SET_DUMPABLE can also have the value 2.

rand.3
  Hrvoje Niksic / mtk
    Remove misleading text describing FreeBSD's sranddev() function.
    As per debian bug 328629

readv.2
  mtk / Walter harms
    Added LINUX NOTES on trickery performed by glibc when
    vector size exceeds IOV_MAX.

    Formatting clean-ups.

remap_file_pages.2
  mtk
    Added
 text to note that start and size are both rounded downward.

sched_setparam.2
  mtk
    Modified discussion of privileges; added pointer to
    sched_setscheduler.2 for a discussion of privileges and
    resource limits.

sched_setscheduler.2
  mtk
    Modified discussion of privileges; added discussion of RLIMIT_RTPRIO.

semctl.2
  mtk
    Added IPC_INFO, SEM_INFO, SEM_STAT descriptions.

shmctl.2
  mtk
    Added IPC_INFO, SHM_INFO, SHM_STAT descriptions.

sigaction.2
  mtk
    Split sigpending(), sigprocmask(), and sigsuspend() out
    into separate new pages.

    Other minor changes

  mtk
    NOTES: described SA_NODEFER / sa_mask bug which was present in
        all kernels up to and including 2.6.13.
    See http://marc.theaimsgroup.com/?l=linux-kernel&m=112360948603171&w=2

and http://marc.theaimsgroup.com/?l=linux-kernel&m=112362164911432&w=2
List: linux-kernel
Subject: Signal handling
possibly wrong
From: Bodo Stroesser
Date: 2005-08-09 17:44:06

signal.2
mtk
Updated SEE ALSO to reflect splitting of sigaction.2 into
sigaction.2, sigsuspend.2, sigpending.2, sigprocmask.2

sigpending.2
mtk
New page created by splitting out from sigaction.2
Changed CONFORMING TO.

sigprocmask.2
mtk
New page created by splitting out from sigaction.2
Added text on effect of NULL for 'set' argument.
Added text noting effect of ignoring SIGBUS, SIGFPE, SIGILL,
and SIGSEGV.
Noted that sigprocmask() can't be used in multithreaded process.
Fixed EINVAL error diagnostic.
Changed CONFORMING TO.

sigsuspend.2
mtk
New page created by splitting out from sigaction.2
Added NOTES on usage.
Added new text to DESCRIPTION.
Changed CONFORMING TO.

stat.2
Mike Frysinger
Improve st_blocks description.

carg.3
Ramiro
Aceves / aeb
Change:
One has carg(z) = atan(creal(z) / cimag(z))
to:
One has tan(carg(z)) = cimag(z) / creal(z)

As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=326720

cmsg.3
  mtk
    s/SOL_TCP/IPPROTO_TCP/   (POSIX standard name)

dlopen.3
  Alain Portal
    s/-nostartupfiles/-nostartfiles/

getaddrinfo.3
  mtk
    Nowadays (since 2.3.4) glibc only sets the first ai_canonname
    field if AI_CANONNAME was specified (the current behavior
    is all that SUSv3 requires).

    1,$s/PF_/AF_/g

    Added descriptions of AI_ALL, AI_ADDRCONFIG, AI_V4MAPPED,
    and AI_NUMERICSERV.

    Some wording and formatting fixes.

getpwnam.3
  Bernhard R. Link / mtk
    Add NOTES text describing relationship of pw_dir and HOME and
    pointing out that applications should preferentially inspect HOME.

inet.3
  Mike Frysinger
    Mention "little endian" and "big endian".

    Added note about octal and hex interpretation of
        numbers-and-dots notation.

rpc.3
  mtk / Ludovic Courtes
    Commented out references to rpc_secure(3) -- we don't currently
    have such a page in the man-pages set.
    In response to http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=325115

setenv.3
  mtk
    glibc 2.3.4 fixed the "name contains '='" bug.

strnlen.3
  Mike Frysinger
    Added "#define _GNU_SOURCE" to prototype.

initrd.4

Norbert Buchmuller / mtk
Added text noting that the use or real-root-dev for changing
the root device is obsolete, in favor of pivot root.
(However, the page still needs to be rewritten to actually
describe the pivot_root method...)
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=323621

proc.5
mtk
Improve text describing /proc/sys/fs/mqueue/* files.

Describe /proc/sys/fs/suid_dumpable (new in 2.6.13).

Added placeholder mention
of /proc/zoneinfo (new in 2.6.13).
More needs to be said about this file.

Repaired earlier cut and paste mistake which resulted
in part of the text of this page being duplicated.

utmp.5
Mike Frysinger
Added text on biarch details for ut_session and ut_tv.

capabilities.7
mtk
Added CAP_AUDIT_CONTROL and CAP_AUDIT_WRITE.

ip.7
mtk / Andrew Pimlott
Add a couple of words to make it clear that port is a 16-bit number.
Reformat long source lines (no text changed).

s/SOL_IP/IPPROTO_IP/ (POSIX standard name)

Hasso Tepper
Fix discussion of IPC_RECVTTL / IP_TTL.

signal.7
mtk
Updated SEE ALSO to reflect splitting of sigaction.2 into
sigaction.2, sigsuspend.2, sigpending.2, sigprocmask.2.

socket.7
mtk
Clarified details of use of SO_PEERCRED.

tcp.7

  mtk
    s/SOL_TCP/IPPROTO_TCP/   (POSIX standard name)
    s/SOL_IP/IPPROTO_IP/   (POSIX
standard name)

udp.7
  mtk
    Added description of UDP_CORK socket option.

    s/SOL_UDP/IPPROTO_UDP/   (POSIX standard name)
    s/SOL_IP/IPPROTO_IP/   (POSIX standard name)

Samuel Thibault <samuel.thibault@ens-lyon.org>
Tomas Pospisek <tpo_deb@sourcepole.ch>
Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes
---

ptsname.3
getpt.3
unlockpt.3
openpty.3
posix_openpt.3
grantpt.3
pts.4
tty_ioctl.4
  mtk
    Added SEE ALSO for new pty.7 page.

Typographical or grammatical errors have been corrected in several
places.

New pages
---

pty.7
  mtk
    Overview of Unix 98 and
 BSD pseudo-terminals.

Changes to individual pages
---

ldd.1
  mtk
    Remove "-V" option (fix from Fedora man-pages-2.07-7).

fcntl.2
  Peter Chubb / Trond Myklebust / mtk
    Since kernel 2.6.10, a read lease can only be placed on a
    file descriptor that is opened read-only.
    See the following LKML thread of Aug 2005
    ("fcntl(F GETLEASE) semantics??"):
    http://marc.theaimsgroup.com/?l=linux-kernel&m=112371777712197&w=2
    http://marc.theaimsgroup.com/?l=linux-kernel&m=112374818213000&w=2
    http://marc.theaimsgroup.com/?l=linux-kernel&m=112376335305284&w=2
    http://marc.theaimsgroup.com/?l=linux-kernel&m=112377294030092&w=2

mprotect.2
  mtk
    Add new text to ENOMEM error.

mremap.2
  mtk
    Added description of MREMAP_FIXED and 'new_address' argument
    under NOTES.
    Revised text of EINVAL error.

read.2
  Samuel Thibault / mtk
    read() can fail with EINVAL when using
 O_DIRECT
  mtk
    Added open(2) to SEE ALSO.

shmget.2
  mtk
    s/int/size_t/ for type of 'size' argument (fix from

Fedora man-pages-2.07-7).

write.2
Samuel Thibault / mtk
write() can fail with EINVAL when using O_DIRECT

atanh.3
mtk
Fix: s/acosh/atanh/ (fix from Fedora man-pages-2.07-7).

fopen.3
mtk
Improved "a+" description (fix from Fedora man-pages-2.07-7).

getrpcent.3
mtk
s/getrpcent/setrpcent/ (fix from Fedora man-pages-2.07-7).

stdio.3
mtk / Justin Pryzby
Removed references to fropen() and fwopen(), which are
BSDisms that don't appear in glibc.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=331174

strftime.3
mtk
Typo fix: %Ry ==> %Ey [SUSv3 mentions...] (fix from
Fedora man-pages-2.07-7).

nsswitch.conf.5
mtk
s/network/networks/ (fix from Fedora man-pages-2.07-7).

proc.5
mtk
Added description of /proc/sys/vm/legacy_va_layout.

socket.7
mtk
Update description of SO_RCVLOWAT and SO_SNDLOWAT.
(fix derived from Fedora man-pages-2.07-7).

========== Changes in man-pages-2.10 ==========

Released: 2005-10-19

Global changes

The changes in this release consist *solely* of formatting fixes, with
the aim bringing greater consistency to the manual pages according to
the following rules:

-- Function name references should *always* be followed by
  parentheses, "()" (possibly containing a manual page section
  number).

-- The parentheses following a function name should *not* be
  formatted. Thus, for example, instead of:

      .B name()

  one should write:

      .BR name ()

Much of the change was automated using two scripts:
add_parens_for_own_funcs.sh and unformat_parens.sh.
For the (possible) benefit of downstream manual page maintainers and
translators, I have placed these scripts in a new subdirectory 'scripts'.

NOTE THE FOLLOWING POINTS WELL:

--
 These scripts provide a computer-assisted solution to the above
  two goals. However, they are not perfect, and their output should
  be scanned by a human. (To see what changes the two scripts
  would make, without making them, use the "-n" command line option.)

-- The scripts do not fix all instances that violate the above rules:
  some manual fixes are required. Two further scripts are provided
  to help find remaining instances of function names without
  following "()": find_dots_no_parens.sh and find_slashes_no_parens.sh.

The following changes were made:

-- add_parens_for_own_funcs.sh was applied to the pages in Sections
  2 and 3.

-- unformat_parens.sh was applied to pages in Sections 2, 3, 4, and 7
  (the only sections where such changes were required).

-- further changes (not so very many) were performed by hand.
  (found places to fix with the assistance of find_dots_no_parens.sh
  and find_slashes_no_parens.sh).

========== Changes in man-pages-2.11
==========

Released: 2005-10-24

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain PORTAL <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Various pages
  mtk
    Most instances of the constant "NULL" are not formatted (bolded) in
    man pages, but a few are. For consistency, formatting on "NULL" has
    been removed where it occurred.

    Many minor formatting fixes were made.

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

getrlimit.2
  mtk
    Added EINVAL error for rlim_cur > rlim_max when calling setrlimit().

path_resolution.2
  mtk
    Repaired discussion of capabilities and file system UID, which
    mistakenly had involved exec() in the discussion.

prctl.2
  mtk
    Removed text saying there

is no library interface. There
    is nowadays.

mkfifo.3
  mtk
    Minor change to RETURN VALUE text.

sk98lin.4
  Alain Portal
    Formatting fixes.

capabilities.7
  mtk
    Minor changes.

========== Changes in man-pages-2.12 ==========

Released: 2005-10-31

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Akihiro MOTOKI <amotoki@dd.iij4u.or.jp>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Brian M. Carlson <sandals@crustytoothpaste.ath.cx>
herbert <herbert@gondor.apana.org.au>
Martin Landers <martin.landers@treibgut.net>
Michael Benedict <benedict@starbak.net>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

mlock.2
  mtk
    Reworded text around PAGESIZE, noting also that

sysconf(_SC_PAGESIZE)
can be used.

path_resolution.2
mtk / aeb
Removed words "as well" (added in 2.11) from the phrase
"and it gets these last five capabilities if its fsuid is 0 as well"
since there are (unusual) situations in which fsuid can be 0 while
the effective UID is not.

Reworked (cut down) discussion of capabilities, moving part of
it into capabilities.7

setresuid.2
mtk
Add text to note that setresuid() always modifies the file
system UID, and setresgid() likewise always modifies the file
system GID.

shmget.2
mtk
Added (brief) description of SHM_HUGETLB.

sigaltstack.2
mtk / Martin Landers
Noted that ss_sp is automatically aligned by the kernel.

byteorder.3
Brian M. Carlson / herbert
Change <netinet/in.h> to <arpa/inet.h> in prototype; add text
explaining that some systems need the former header.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=265244

capabilities.7
mtk
Reworked part of the discussion of exec() and capabilities.
Added sub-section "Effect of User ID Changes on Capabilities".
Reworked discussion of CAP_SYS_ADMIN and file-max.

========== Changes in man-pages-2.13 ==========

Released: 2005-11-03

This release consists entirely of formatting and typographical fixes.

Global changes

Typographical or grammatical errors have been corrected in several
places.

Various pages
  mtk
    Function and page cross references that were italicized were
    made bold (which is how the majority of function and page
    cross references were already done).

Various pages
  mtk
    Instances of things like "NULL-terminated string" were changed to
    "null-terminated string".

Various pages
  mtk
    Pathnames, structures, arguments, and <header-files> that were
    bold were changed to italics.

Various pages
  mtk
    Instances
 of the constant "NULL" that were bold-faced were made
    unformatted (which is how most instances of "NULL" were already
    formatted.)

========== Changes in man-pages-2.14 ==========

Released: 2005-11-17

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Angelo <ang3l0@katamail.com>
Avery Pennarun <apenwarr@nit.ca>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Martin (Joey) Schulze <joey@infodrom.org>
Stefan Brüns <stefan.bruens@rwth-aachen.de>
Volker Reichelt <reichelt@igpm.rwth-aachen.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

rexec.3
  mtk / Justin Pryzby
    This page is taken as is from the FreeBSD 5.4 distribution.
    (Not checked against Linux reality, but likely things are
    the same.)
    See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=336875

Changes
 to individual pages
---

arch_prctl.2
  mtk
    Updated discussion about lack of prototype in glibc.

execve.2
  mtk
    Improved description of E2BIG error: it relates to the sum
    of the bytes in both environment and argument list.

fcntl.2
  mtk
    Clarified parts of the discussion of file leases,
    noting effect of open(O_NONBLOCK), interruption
    by signal handler, or termination by signal in
    lease breaker. In response to
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=339037

stat.2
  mtk / Stefan Brüns
    Added LINUX NOTES describing nanosecond timestamps.

frexp.3
  Volker Reichelt / mtk
    Fixed to point out that frexp() returns a number whose
    absolute value is >= 0.5 and < 1. Amended the example
    program to demonstrate this.

open.2
  mtk / Avery Pennarun

Add EWOULDBLOCK error for file leases.

In response to
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=339037

putenv.3
mtk
Although the glibc implementation returns -1 on error (and some
other man pages (e.g., the BSDs) also document that value for
error returns), SUSv3 merely says "non-zero" (and this is
what manual pages on many implementations also say).

posix_memalign.3
mtk
Formerly, the page said that all systems declare memalign() in
<malloc.h>. In fact, many declare it in <stdlib.h>.

strtok.3
mtk
Almost a complete rewrite after Angelo pointed out
that the existing page was deficient.

sd.4
Martin Schulze
Remove SEE ALSO for nonexistent scsi.4.

proc.5
mtk
Updated discussion of /proc/sys/kernel/pid_max.

signal.7
mtk
Added pthreads.7 to SEE ALSO.

ld.so.8
mtk
Fix typo: s/LD_DEBUG_OUTPUT/LD_PROFILE_OUTPUT/

========== Changes in man-pages-2.15 ==========

Released:
2005-11-30

Contributors

The following people contributed notes, ideas, or patches that have

been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
James Vega <jamessan@debian.org>
Malcolm Scott <mas90@io.malc.org.uk>
Senthil Kumar <senthilkumar_sen@hotpop.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

sigvec.3 -- for details, see below.

sigset.3 -- for details, see below.

Changes to individual pages
---

kill.2
  mtk
    Added text describing the 2.6.[0-7] EPERM bug that occurred
    when sending signals to a process group.

sigaction.2
  mtk
    Noted that si_signo is unused on Linux.

sigpending.2
  mtk
    Added BUGS noting wrapper function problem that existed
    in glibc versions <= 2.2.1.

sigpause.2
  mtk
    Moved to section 3; see also sigpause.3 below.

sigsetops.3
   mtk
    Added a GLIBC NOTES section describing sigisemptyset(),
    sigandset(), and sigorset().

sigvec.2
sigblock.2
  mtk
    These pages have been deleted, and replaced by a new sigvec.3
    man page that more fully describes the BSD signal API.

siggetmask.2
sigmask.2
sigsetmask.2
  mtk
    These links to the now-deleted sigblock.2 have been also been
    deleted. They are replaced by corresponding links in Section 3:
    sigmask.3, sigsetmask.3, siggetmask.3.

sigvec.3
  mtk
    This new page is provides a fuller description of the
    BSD signal API than was provided in the now-deleted sigvec.2
    and sigblock.2.

sigblock.3
siggetmask.3
sigmask.3
sigsetmask.3
  mtk
    Created as links to sigvec.3.

sigpause.3
  mtk
    Moved here from Section 2.

    Some minor wording fixes; clarified System V origins of
    X/Open flavor of this function.

sigset.3
  mtk
    New page describing the System
 V signal API: sigset(), sighold(),
    sigrelse(), sigignore().

strftime.3
  James Vega
    Add further text clarifying that %+ specifier is not supported in
    glibc2.
  mtk
    Added GLIBC NOTES section describing optional 'flag' and 'width'
    components of conversion specifiers.
    Some wording changes to bring terminology closer to SUSv3.

Added an example program.

vm86old.2
  mtk / aeb
    Add as new link to vm86.2.

intro.7
  mtk
    Added a few words to reflect the fact that several of the section
    7 pages provide overviews of various topics.

signal.7
  mtk
    Added some SEE ALSO entries.

socket.7
  Senthil Kumar / mtk
    Added text noting that select()/poll() do not respect SO_RCVLOWAT.

udp.7
  Malcolm Scott
    s/tcp_socket/udp_socket/ in example
    Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=340927

========== Changes in man-pages-2.16 ==========

Released:
 2005-12-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alan Stern <stern@rowland.harvard.edu>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Urs Thuermann <urs@isnogud.escape.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

HOWTOHELP
  Urs Thuermann
    Added instructions for finding maintainer in Debian package.

poll.2
  mtk
    Added NOTES about INFTIM constant provided on some other
    implementations.

shmop.2
  Alan Stern
    The -1 error return of shmat() should be cast "(void *)".

strftime.3
  aeb
    Remove junk text (actually intended as source code comment
    in page).

ip.7
  Urs Thuermann
    Fix a typo: s/SOCK_RAW/SOCK_PACKET/

packet.7
  Urs Thuermann
    Clarification: s%SOCK_PACKET%PF_INET/SOCK_PACKET%

==========
 Changes in man-pages-2.17 ==========

Released: 2005-12-13

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Justin Pryzby <justinpryzby@users.sourceforge.net>
Michael Haardt <michael@moria.de>
Urs Thuermann <urs@isnogud.escape.de>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

fmemopen.3
  Walter Harms / mtk
    New documentation for the glibc-specific fmemopen() and
    open_memstream(). Based on glibc info page.

pipe.7
  mtk (with prompting and suggestions for improvements by
  Michael Haardt)
    New page providing overview of pipes and FIFOs.

Changes to individual pages

HOWTOHELP
  mtk
    Added notes on how to
 write example programs for manual pages.

fork.2
  mtk
    Added pointers to examples of fork() in wait.2 and pipe.2.

pipe.2
  mtk
    Added an example program.
    Added SEE ALSO for new pipe.7 page.

wait.2
  mtk
    Added example program demonstrating use of fork() and waitpid().

carg.3
  Justin Pryzby
    Delete line that should have been deleted when applying
    2.08 fix for this page.

getaddrinfo.3
  mtk
    Rearranged EAI_* list alphabetically.

inet.3
  mtk
    Added GLIBC NOTES describing feature test macros required
    to expose declaration of inet_aton().

open_memstream.3
  mtk
    New link to new fmemopen.3.

fifo.4
  mtk
    Added SEE ALSO for new pipe.7 page.

environ.5
  mtk
    Removed BROWSER, since it seems not in fact to be common.

socket.7
  Urs Thuermann
    Added documentation of SO_TIMESTAMP.

tcp.7
  mtk
    Noted 200 millisecond ceiling imposed on TCP_CORK.

udp.7
  mtk

   Rearranged options into something approximating alphabetical order.

========== Changes in man-pages-2.18 ==========

Released: 2005-12-15

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Justin Pryzby <justinpryzby@users.sf.net>
Karsten Sperling <karsten.sperling@stud.uni-karlsruhe.de>

Martin (Joey) Schulze <joey@infodrom.org>
Mike Frysinger <vapier@gentoo.org>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

bind.2
  mtk
    Added mention of AF_INET6 address family.
    Added discussion of sockaddr structure and an example in the
    Unix domain.

recv.2
  mtk
    Put 'flags' list in alphabetical order.

send.2
  mtk
    Added cross-reference from discussion
 of MSG_MORE to UDP_CORK
    in udp(7).

    Put 'flags' list in alphabetical order.

err.3
  mtk
    Added CONFORMING TO section noting that these are
    non-standard BSDisms.

errno.3
  Justin Pryzby
    Added SEE ALSO for err.3.
    As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867

gethostbyname.3
  Martin (Joey) Schulze / mtk
    Added references to nsswitch.conf(5); remove cross references

to resolv+(8).
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=308397

perror.3
Justin Pryzby
Added SEE ALSO for err.3 .
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867

resolver.3
mtk / Martin (Joey) Schulze
Remove cross references to resolv+(8); add cross references to
resolv.conf(5).
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=214892

Added SEE ALSO entry for resolver(5);
see http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=251122

strerror.3
mtk / Stefan Puiu
Rewrote and extended the discussion of the two flavors of
strerror_r(), and added some additional information on
strerror().
Justin Pryzby
Added SEE ALSO for err.3, as per
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=306867

elf.5
Mike Frysinger
Fix three typos in identifier names.

operator.7
Karsten Sperling
The + operator should be in the list of unary operators.

raw.7
mtk
Small wording changes around discussion of SO_BSDCOMPAT.
Fixed a couple of wording errors elsewhere.
Reformatted some long lines.

socket.7
mtk, after a note by Stefan Puiu
Updated discussion of SO_BSDCOMPAT.

Reformatted some long lines.

Noted the Linux-specific feature whereby setsockopt() doubles

the value given for SO_SNDBUF and SO_RCVBUF.

Noted kernel-imposed minimum values for SO_SNDBUF and SO_RCVBUF.

udp.7
mtk, after a note by
Stefan Puiu
Updated discussion of SO_BSDCOMPAT.

unix.7
mtk
Added new (UN)SUPPORTED FEATURES section in which it is noted
that Unix domain sockets do not support MSG_OOB or MSG_MORE.

Noted details of SO_SNBUF and SO_RCVBUF support for
Unix domain sockets.

========== Changes in man-pages-2.19 ==========

Released: 2005-12-23

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

HOWTOHELP
mtk
Minor changes.

bind.2
  Stefan Puiu / mtk
    Remove text under EINVAL error: "This may change in the
future:
    see linux/unix/sock.c for details." This behavior has been
    unchanged for a long time, and seems unlikely to change.

    Add EADDRINUSE to errors.

send.2
  aeb
    Add cmsg(3) to SEE ALSO.

fopen.3
  Walter Harms / mtk
    Added description of 'x' mode character (exclusive open).

pipe.7
  mtk / aeb
    Some wording changes to description of pipes.

========== Changes in man-pages-2.20 ==========

Released: 2006-01-03

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
----

sigaltstack.2
  mtk
    Added some text to explain the usual scenario in which
    sigaltstack() is employed.

getloadavg.3
  mtk
    Noted that this function is available since glibc 2.2.

strcpy.3
  mtk

s/nulls/null bytes/

capabilities.7
  mtk
    Noted that capability bounding set appeared with kernel 2.2.11.

arp.7
icmp.7
ip.7
ipv6.7
netdevice.7
packet.7
raw.7
rtnetlink.7
socket.7
tcp.7
unix.7
udp.7
  mtk
    The only changes to these pages have been for formatting:
      -- Structure definitions were changed to K&R style
      -- Some long source lines were broken to fit into ~70
        character lines.
    No changes were made to the content of these pages (yet...).

dsp56k.4 tty_ioctl.4
elf.5 proc.5 termcap.5
charsets.7 unix.7
  mtk
    Various pages use inconsistent terms for 'null byte' (which
    is the C99/SUSv3 term for the '\0' character).

    To rectify this the following changes were made in the above
    pages:

      Replace 'zero byte' with 'null byte'.
      Replace 'null character' with 'null byte'.
      Replace 'nulls' with 'null bytes'.
      Replace 'NUL-terminated' by 'null-terminated'.
      Replace 'NUL' by 'null byte'.
      Replace 'terminating NUL' by 'terminating null byte'.
      Replace 'final NUL' by 'terminating null byte'.
      Replace 'NUL character' by 'null byte'.

Various pages
  mtk
     Replace "SysV"/"SYSV" by "System V".

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
----

capget.2
  mtk
    Noted bug that could wrongly cause EPERM in unprivileged
    capset() with 'pid' field == getpid().

epoll_ctl.2
  mtk
    Noted that EPOLLONESHOT was added in 2.6.2.

gethostname.2

mtk
Added GLIBC NOTES describing operation of glibc's
gethostname() wrapper function.

mmap.2
mtk / Mike Frysinger
Clarify relationship between mmap2(2) and mmap64(3).
mtk
A few other small rewordings.

mmap64.3
Mike Frysinger
New link to mmap.2.

open.2
mtk
Added BUG noting that O_ASYNC can't be enabled via
open(): fcntl() must be used for this purpose.

recv.2
Stefan Puiu
Relocate misplaced discussion of MSG_DONTWAIT.

dlopen.3
mtk
Rewrote discussion of dlopen() 'flag' argument;
added descriptions
of RTLD_NOLOAD, RTLD_DELETE,
and RTLD_DEEPBIND.

Noted use of atexit() to register a function that is
automatically called when a library is unloaded.

fmemopen.3
mtk
Rewrote substantial parts of the page, and relicensed under GPL.

fseeko.3
Mike Frysinger
Add RETURN VALUE section.

getopt.3
mtk
Noted historical use of <stdio.h> to declare getopt().

qsort.3
mtk / Falk Hueffner
Clarify how strcmp() should be used as the 'compar'

function by providing an example.
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=348072

proc.5
mtk
Noted that /proc/mounts is pollable since kernel 2.6.15.

Documented /proc/PID/task.

Noted that the contents of /proc/PID/{cwd,exe,fd,root,task}
are not available if the main thread has terminated.

Senthil Kumar
Add pointer to random(4) for description of files under
/proc/sys/kernel/random.

udp.7
Stefan Puiu / mtk
Small rewording of discussion of SO_BSDCOMPAT
(add cross-ref to socket(7)).

========== Changes in man-pages-2.22 ==========

Released: 2006-02-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Stefan Puiu <stefanpuiuro@yahoo.com>
Thomas Hood <jdthood@yahoo.co.uk>
Thorsten Kukuk <kukuk@suse.de>
Walter Harms <walter.harms@informatik.uni-oldenburg.de>

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

mmap.2
  aeb / mtk
    Noted that portable applications should specify fd as -1
    when using MAP_ANONYMOUS.
    Some rewriting of description of MAP_ANONYMOUS.

rt_sigreturn.2
   Thorsten Kukuk
    New link to sigreturn.2.

rt_sigsuspend.2
  mtk
    New link to sigsuspend.2.

waitid.2
  mtk
    Noted that waitid() does not set infop->si_uid field on
    most other implementations.

getopt.3
  Walter harms / mtk
    Make clear that when calling getopt_long() and there are no
    short options, then 'optstring' should be "", not NULL.

openpty.3
  Thomas Hood / mtk
    In glibc 2.0.92, openpty() was modified to preferably open
    Unix 98 ptys instead of BSD ptys.

qsort.3
  mtk
    Small rewording under EXAMPLES.

strtol.3
strtoul.3
  Stefan Puiu
    s/string must begin/string may begin/

proc.5
  mtk
    Documented inotify files under /proc/sys/fs/inotify:
    max_queued_events, max_user_instances, and max_user_watches.

Matthias Andree <matthias.andree@gmx.de>
Robert Love <rlove@rlove.org>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Urs Thuermann <urs@isnogud.escape.de>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

inotify_init.2
inotify_add_watch.2
inotify_rm_watch.2
  Robert Love, with some additions by mtk.
    New pages describing the inotify API.

mbind.2
get_mempolicy.2
set_mempolicy.2
  Andi Kleen, with additional work by mtk
    New pages describing the NUMA memory allocation policy API.
    Drawn from the set at ftp://ftp.suse.com/pub/people/ak/numa.

rtc.4

Urs Thuermann, with additional work by mtk
New page describing the real-time clock driver.

inotify.7
mtk
Overview of the inotify API.

Changes to individual pages
---

clone.2
Andi Kleen
On x86, clone() should not be called through vsyscall,
but directly through "int $0x80".

fcntl.2
mtk
Small wording changes.

Added cross-ref to inotify.7 under the description of dnotify.

kill.2
mtk / Britton Leo Kerin
Small wording change under NOTES to clarify
what happens when a process sends a signal to itself.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=350236

mlock.2
mtk / Matthias Andree
Added BUGS txt on interaction between MCL_FUTURE and
RLIMIT_MEMLOCK.
See the following LKML thread:
http://marc.theaimsgroup.com/?l=linux-kernel&m=113801392825023&w=2
"Rationale for RLIMIT_MEMLOCK"

msgop.2
mtk / Samuel
Thibault
Rewrote declaration of 'msgp' to be "void *" in response
to http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=350884
Various other wording fixes.

open.2
mtk
Clarify distinction between "file creation flags" and
"file status flags".

read.2

Justin Pryzby
Add SEE ALSO for pread(2).
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351873

sched_setaffinity.2
mtk
Major rewrite.

select.2
mtk
Added return types to prototypes for FD_SET(), FD_CLR(),
FD_ZERO, and FD_ISSET().
Other minor wording changes.

read.2
mtk
Add SEE ALSO for pwrite(2).
(Analogous with read.2 change above.)

errno.3
Kurt Wall / mtk
Add Linux specific errors to this page.

localeconv.3
mtk
Added cross-ref to locale.7 for 'struct lconv' defn.
Other minor wording changes.
Martin (Joey) Schulze
Added SEE ALSO refs for nl_langinfo.3

As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351831

scanf.3
mtk / Justin Pryzby
Minor formatting & wording fixes.

setlocale.3
Martin (Joey) Schulze
Added SEE ALSO refs for nl_langinfo.3
As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351831

proc.5
mtk
Migrated description of inotify files to the new inotify.7 page.

ascii.7
Dan Jacobson / mtk
Add text describing characters 001 to 037.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=342173

locale.7
  mtk
    Minor wording and formatting changes.

========== Changes in man-pages-2.24 ==========

Released: 2006-02-17

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Joerg Habenicht <habenich@planetserver.com>
Luc Van Oostenryck <lkml@looxix.net>
Mike Frysinger <vapier@gentoo.org>
Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies
 if I missed anyone!

New pages
---

get_kernel_syms.2
create_module.2
delete_module.2
init_module.2
query_module.2
  FSF / mtk (with assistance of Luc Van Oostenryck)
    man-pages finally gets pages for these system calls, several
    of which are obsolete in Linux 2.6.
    Took the old GPLed pages dated 1996 and made a number of
    clean-ups and minor additions.

Global changes
---

various pages
  mtk
    Change "file name" to "filename"
    Change "path name" to "pathname"

stpncpy.3
strstr.3
strcmp.3
toupper.3
strlen.3
stpcpy.3
puts.3
strdup.3
strtok.3
isalpha.3
strspn.3
gets.3
strpbrk.3
  mtk after a suggestion from Samuel Thibault
    Added SEE ALSO pointers to wide character equivalent functions
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=351996

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

clone.2
  mtk

   Remove duplicate CLONE_STOPPED text.
    Commented out crufty text describing EINVAL error
    for the now obsolete CLONE_DETACHED flag.
    Under CLONE_SIGHAND, noted that 'flags' must also include
    CLONE_VM if CLONE_SIGHAND is specified.

fcntl.2
  mtk
    Under ERRORS: Separate out EAGAIN error for locking mmaped files.

inotify_add_watch.2
  mtk
    Minor wording fix.

msgop.2
  mtk
    Documented the EAGAIN error for msgrcv().

fnmatch.3
  Mike Frysinger / mtk

Expand explanation of FNM_PATHNAME.

lockf.3
  Joerg Habenicht / mtk
    Fix up discussion of EAGAIN/EACCESS errors.

New pages
---

mq_close.3
mq_getattr.3
mq_notify.3
mq_open.3
mq_receive.3
mq_send.3
mq_unlink.3
  mtk
    New pages describing POSIX message queue API.

posix_fallocate.3
  mtk, after a suggestion by James Peach
    New page describing posix_fallocate().

mq_overview.7
  mtk
    New page giving overview of the POSIX message queue API.

Changes to individual pages
---

lseek.2
  Michael Haardt
    Add a case to the EINVAL error text.
  mtk
    Various minor wording fixes
    Added SEE ALSO referring to new posix_fallocate.3.

posix_fadvise.2
  mtk
    Added "#define _XOPEN_SOURCE 600" to prototype.
    Added SEE ALSO referring to new posix_fallocate.3.

proc.5
  mtk
    Migrated information on POSIX message queues to new mqueue.7 page.

inotify.7
  Marten von Gagern
    Fix thinko: s/assuming a
 non-blocking/assuming a blocking/

Global changes
---

clone.2
getdents.2
gettid.2
llseek.2
mmap2.2
modify_ldt.2
pivot_root.2
quotactl.2
readdir.2
sysctl.2
syslog.2
tkill.2
  mtk, aeb, Steve Beattie
    Added comment in SYNOPSIS to note that syscall(2)
 may be
    preferable over _syscallN (see intro(2)).

Various minor formatting changes were done on a range of
pages in Section 7. (No content was changed.)

New pages
---

openat.2
  mtk
    New page describing openat(2), added in kernel 2.6.16,
    and some notes on rationale for the at*(2) system calls.

mbind.2
  Andi Kleen, Christoph Lameter, mtk
    Added MPOL_MF_MOVE and MPOL_MF_MOVE_ALL descriptions,
    from numactl-0.9.2 man page.
    Plus a few other smaller fixes.

fexecve.3
  mtk
    New page describing fexecve(3).

futimes.3
  mtk
    New page describing futimes(3).

Changes to individual pages
---

execve.2
  mtk
    Added SEE ALSO pointing to new fexecve.3.

intro.2
  mtk, aeb, Steve Beattie
    Added some notes on syscall(2) versus _syscall.

msgctl.2
msgget.2
msgop.2
  mtk
    Added SEE ALSO pointing to mq_overview.7.

open.2
  mtk
    Added SEE ALSO pointing to new
 openat.2.

    Split out part of the RETURN VALUE text into separate
    NOTES section.

    Modified wording referring to raw(8) to
    indicate that this interface is deprecated.

poll.2
  mtk
    Added discussion of ppoll(2), which is new in 2.6.16.

ppoll.2
  mtk
    New link to poll.2.

recvmsg.2
sendmsg.2
  mtk / Paul Brook
    Added text to note that although POSIX says msg_controllen
    should be socklen_t, glibc actually uses size_t.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=356502
    and the associated glibc bug report.
    http://sourceware.org/bugzilla/show_bug.cgi?id=2448
  mtk
    Various formatting fixes.

select.2

mtk
Updated to reflect the fact that pselect() has been implemented
in the kernel in 2.6.16; various other minor wording changes.

pselect() prototype needs "#define _XOPEN_SOURCE 600".

tempnam.3
Justin Pryzby
Clean up description of EEXIST error.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=357893

unlink.2
mtk
Added a little extra text to clarify EISDIR vs EPERM.

utime.2
mtk
Added new SEE ALSO entry pointing to new futimes.3 page.

exec.3
mtk
Added SEE ALSO pointing to new fexecve.3.

shm_unlink.3
mtk
New link to shm_open.3 (should have been made when page
was originally written).

swab.3
Walter Harms
Add needed "#define _XOPEN_SOURCE".

undocumented.3
mtk
Updated to remove a few function names that are now documented.

capabilities.7
mtk
Various changes to bring this page closer to
current kernel versions.

inotify.7
mtk
Noted that glibc 2.4 is required to get glibc support
for inotify.

mq_overview.7
mtk

Some rewording and added a few words about System V
message queues.

netlink.7
Hasso Tepper
Substantial updates to various parts of this page.
mtk, Alain Portal
Minor fixes

pthreads.7
mtk
Updated to reflect that the NPTL limitation that only the main
thread could call setsid() and setpgid() was removed in 2.6.16.

raw.7
Hasso Tepper
Removed text implying that only in kernel 2.2 does IP_HDRINCL
prevent datagrams from being fragmented.

socket.7
mtk
Documented SO_SNDBUFFORCE and SO_RCVBUFFORCE socket options,
new in 2.6.14.

Placed socket options in alphabetical order.

========== Changes in man-pages-2.27 ==========

Released: 2006-03-24

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Charles P. Wright <cwright@cs.sunysb.edu>
Christoph Lameter <clameter@sgi.com>
Chuck Ebbert <76306.1226@compuserve.com>
Daniel Jacobowitz <dan@debian.org>
Ingo Molnar <mingo@elet.hu>
Heiko Carstens <heiko.carstens@de.ibm.com>
Janak
Desai <janak@us.ibm.com>
Paolo (Blaisorblade) Giarrusso <blaisorblade@yahoo.it>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes
---

man7/*
  mtk
    Various minor formatting changes were done on a range of
    pages in Section 7. (No content was changed.)

New pages
---

unshare.2
  mtk, with reference to documentation by Janak Desai
    New page describing unshare(2), added in kernel 2.6.16.

Changes to individual pages
---

clone.2
fork.2
vfork.2
  mtk
    Added SEE ALSO pointing to new unshare.2.

mbind.2
  Christoph Lameter
    MPOL_MF_MOVE_ALL requires CAP_SYS_NICE not CAP_SYS_RESOURCE.

mremap.2
  mtk
    Clarified the description of MREMAP_FIXED and restructured
    the text to reflect the fact that this flag is exposed
    by glibc since version 2.4.

ptrace.2
  Chuck Ebbert, with assistance from Daniel Jacobowitz,
  Paolo (Blaisorblade) Giarrusso,
 and Charles P. Wright;
  after a suggestion from Heiko Carstens.
    Document the following ptrace requests:
      PTRACE_SETOPTIONS (2.4.6)
        plus associated flags:

PTRACE_O_TRACESYSGOOD (2.4.6)
PTRACE_O_TRACEFORK (2.5.46)
PTRACE_O_TRACEVFORK (2.5.46)
PTRACE_O_TRACECLONE (2.5.46)
PTRACE_O_TRACEEXEC (2.5.46)
PTRACE_O_TRACEVFORKDONE (2.5.60)
PTRACE_O_TRACEEXIT (2.5.60)
PTRACE_SETSIGINFO (2.3.99-pre6)
PTRACE_GETSIGINFO (2.3.99-pre6)
PTRACE_GETEVENTMSG (2.5.46)
PTRACE_SYSEMU (since Linux 2.6.14)
PTRACE_SYSEMU_SINGLESTEP (since Linux 2.6.14)

sched_get_priority_max.2
sched_setscheduler.2
sched_setparam.2
mtk, Ingo Molnar
Modified to document SCHED_BATCH policy, new in kernel 2.6.16.

Text describing SCHED_BATCH was added to sched_setscheduler.2,

and was drawn in part from Ingo Molnar's description in the
mail message containing the patch that implemented this policy.

Various other minor rewordings and formatting fixes.

proc.5
mtk, using text from Documentation/filesystems/proc.txt
Document /proc/sys/vm/drop_caches, new in kernel 2.6.16.
mtk, using information from ChangeLog-2.6.14.
Document /proc/PID/smaps, new in kernel 2.6.14.

capabilities.7
mtk
Noted affect of CAP_SYS_NICE for mbind(MPOL_MF_MOVE_ALL).

pthreads.7
mtk
Kernel 2.6.16 eliminated buggy behavior with respect to
the alternate signal stack.

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Aleksandr Blokhin <sass@altlinux.ru>
Greg Johnson <gjohnson@lanl.gov>

Apologies if I missed anyone!

New pages
----

sem_post.3
sem_getvalue.3
sem_close.3
sem_open.3
sem_destroy.3
sem_wait.3
sem_unlink.3
sem_init.3
sem_overview.7
  mtk
    New pages describing the POSIX semaphores API.

    These pages supersede and provide a superset of the information
    in the glibc (3thr) "semaphores(3)" manual page.

Changes to individual pages
----

ppoll.2
  Aleksandr Blokhin
    Fix broken link.

ptrace.2
  mtk
    Wrapped long lines (no content changes).

semctl.2
semget.2
semop.2
  mtk
    Add SEE ALSO pointing to the new sem_overview.7 page.

elf.5
  Greg Johnson

Removed SEE ALSO reference to nonexistent core(5).

========== Changes in man-pages-2.29 ==========

Released: 2006-04-06

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Michael Haardt <michael@moria.de>
Roberto Jimenoca <robertojimenoca@terra.es>
Stefan Puiu
<stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Global changes
---

getrlimit.2
prctl.2
sigaction.2
elf.5
signal.7
  mtk
    Added SEE ALSO entry referring to new core.5 page.

New pages
---

mkdirat.2
  mtk
    New page describing mkdirat(2), new in 2.6.16.

mknodat.2
  mtk
    New page describing mknodat(2), new in 2.6.16.

core.5
  mtk
    New page describing core dump files.

mkfifoat.3
  mtk
    New page describing mkfifoat(3).

Changes to individual pages
---

accept.2
getpeername.2
getsockname.2
  Michael Haardt / mtk
    Document EINVAL error for 'len' argument < 0.

fcntl.2
  mtk
    Expanded discussion of mandatory locking.

getrlimit.2
  mtk
    Added BUGS text on 2.6.x handling of RLIMIT_CPU limit
    of zero seconds. See
    http://marc.theaimsgroup.com/?l=linux-kernel&m=112256338703880&w=2

mkdir.2
  mtk
    Added SEE ALSO entry referring to new mkdirat.2.

mknod.2
   mtk
    Added SEE ALSO entry referring to new mknodat.2.

open.2
  mtk / Roberto Jimenoca
    Clarified discussion of file types affected by O_NONBLOCK.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=360243

openat.2
  mtk
    Rewrote NOTES describing rationale for openat().
    Various other minor changes.

recv.2
  Stefan Puiu
    Removed a misleading cross-ref to socket.2.

shmop.2
  mtk

Since 2.6.17-rc1, shmdt() gives the error EINVAL in a further
circumstance: if shmaddr is not aligned on a page boundary.

unshare.2
  mtk
Remove text saying that specifying invalid flags "is likely
to cause compatibility problems" since the kernel now
(2.6.17-rc1) contains an explicit check for invalid bits
with a consequent EINVAL error.

mkfifo.3
  mtk
Added SEE ALSO entry referring to new mkfifoat.3.

proc.5
  mtk
Information on core_pattern and core_uses_pid has
been
migrated to the new core.5 page.

ip.7
  Stefan Puiu
Removed paragraph referring to obsolete ipchains / ipfw(4).

sem_overview.7
  mtk
Add SEE ALSO entry referring to pthreads.7.

========== Changes in man-pages-2.30 ==========

Andre Lehovich <andrel@yahoo.com>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Karel Kulhavy <clock@twibright.com>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

New pages

---

linkat.2
  mtk
    New page describing linkat(), new in kernel 2.6.16

renameat.2
  mtk
    New page describing renameat(), new in kernel 2.6.16

symlinkat.2
  mtk
    New page describing symlinkat(), new in kernel 2.6.16

unlinkat.2
  mtk
    New page describing unlinkat(), new in kernel 2.6.16

Changes to individual pages
---

link.2
  mtk
    Added SEE ALSO entry pointing to new linkat.2 page.

openat.2
  mtk
    Added SEE ALSO entries pointing to new *at.2 pages.

rename.2
  mtk
    Added SEE ALSO entry pointing to new renameat.2 page.

rmdir.2
  mtk
    Added SEE ALSO entry pointing to new unlinkat.2 page.

symlink.2
  mtk
    Added SEE ALSO entry pointing to new symlinkat.2 page.

unlink.2
  mtk
    Added SEE ALSO entry pointing to new unlinkat.2 page.

termios.3
  mtk / Karel Kulhavy

Document the feature test macros required to expose various flags.

Karel Kulhavy

Clarify 'speed' argument for cfsetispeed() text.

Karel Kulhavy / mtk

Note that LOBLK is not implemented on Linux.

mtk

Clarify arguments for cfsetspeed().

Various formatting changes.

full.4

Andre Lehovich

Add a sentence describing the purpose of full(4).

core.5

aeb / mtk

Rework text describing circumstances in which
core dump files are not produced.

mtk / Stefan Puiu

A core dump of a multithreaded process always includes the
PID in the core filename.

mtk / Stefan Puiu

Eliminate some accidentally duplicated text.

========== Changes in man-pages-2.31 ==========

Released: 2006-05-02

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Joshua Kwan <joshk@triplehelix.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Karel Kulhavy <clock@twibright.com>
Mark Glines <mark@glines.org>
Martin (Joey) Schulze <joey@infodrom.org>
Nishanth Aravamudan <nacc@us.ibm.com>
Reuben Thomas <rrt@sc3d.org>
Ryan S. Arnold <rsa@us.ibm.com>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Page renamings

The following pages have been relocated into section 7, since
that is their more natural home. SEE ALSO references in various
other
 pages have been adjusted.

epoll.4
fifo.4
futex.4
complex.5
environ.5
    (many pages outside man-pages actually *expect*
    'environ' to be in Section 7.)

ipc.5
    renamed to svipc.7

".so" link files have been created to link the old file locations to the
new file locations. These links are added just to ensure that cross
references from any other (non-man-pages) pages will remain valid;
eventually these links will be removed.

New pages
---

fstatat.2
  mtk
    New page for fstatat(2), new in 2.6.16.

adjtime.3
  mtk
    New page for adjtime(3).

error.3
  Justin Pryzby / mtk
    New page describing error() and error_at_line()
    Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=186307

program_invocation_name.3
  mtk
    New page describing program_invocation_name and
    program_invocation_short_name variables.

sockatmark.3
  mtk
    New page for sockatmark(3).

ftm.7
  mtk
    New page describing feature
 test macros.

time.7
  mtk
    New page giving an overview of "time" on Linux systems.

Global changes
---

getgroups.2
wait4.2
chown.2
chdir.2
gettimeofday.2
initgroups.3
dirfd.3
  mtk
    Simplified wording around requirement for _BSD_SOURCE
    feature test macro.

times.2
time.2
gettimeofday.2
getitimer.2
nanosleep.2
ctime.3
rtc.4
  mtk
    Added SEE ALSO referring to new time.7.

err.3
errno.3
perror.3
strerror.3
  Justin Pryzby / mtk
    Add SEE ALSO referring to new error.3.

getdate.3
printf.3
scanf.3
  mtk
    Added SEE ALSO entry referring to setlocale.3.

Changes to individual pages
---

accept.2
  Mark Glines
    Remove mention of SOCK_RDM from this page, since this socket
    type does not support accept()ing connections.

adjtimex.2
  mtk
    Modified text referring to adjtime(); added SEE ALSO for new
    adjtime.3 page.

fsync.2
  mtk, after a note by Karel Kulhavy
    Rewrote
 most of the DESCRIPTION, as well as some other parts
    the page, to clarify use and operation of, and rationale for,
    fsync(2) and fdatasync(2).

getitimer.2
  mtk
    Updated discussion of maximum timer value to reflect the fact
    that the default jiffy is now 4 milliseconds.

    Added text to note that current incorrect behavior of
    normalizing tv_usec >= 1000000 will be repaired in a future
    kernel; applications should be fixed now.

gettimeofday.2
  Karel Kulhavy
    Point out more explicitly that 'tz' argument should
    normally be NULL.
  mtk
    Various other minor edits and formatting fixes.

mount.2
  mtk
    Since kernel 2.6.16, MS_NOATIME and MS_NODIRATIME are settable
    on a per-mount basis.
    Detail exactly which mount flags can be changed on MS_REMOUNT.

nanosleep.2
  mtk / Karel Kulhavy
    Clarify RETURN VALUE discussion.

openat.2

mtk
Add SEE ALSO reference pointing
to new fstatat.2.

program_invocation_short_name.3
mtk
New link to new program_invocation_name.3.

recv.2
mtk
Added SEE ALSO for new sockatmark.3.

rmdir.2
Joshua Kwan / Martin (Joey) Schulze / mtk
Correct wording of EBUSY case.
mtk
Add ".." case to ENOTEMPTY error

select.2
Karel Kulhavy
Note more clearly that fd_set arguments can be NULL.
mtk / Karel Kulhavy
Improve opening paragraph describing purpose of select().
mtk
Various other minor edits and formatting fixes.

semget.2
mtk / Nishanth Aravamudan
Add text to noting that the initial values of semaphores
in a new set are indeterminate.

shmget.2
mtk
Add text noting that contents of newly created segment are zero
values.

sigwaitinfo.2
mtk
Noted that all threads should block signal being waited for.

stat.2
Nishanth Aravamudan / mtk
Added NOTE that st_size is always returned as zero for
most
/proc files.
mtk
Add SEE ALSO reference pointing to new fstatat.2.

syscall.2
  Justin Pryzby / mtk
    Remove bogus BUGS text.

utime.2
  mtk
    Various minor changes.

confstr.3
  mtk
    Rewrote RETURN VALUE discussion.
    Updated CONFORMING TO.
    Removed BUGS.

ctanh.3
  Martin (Joey) Schulze / mtk
    Fix errors in DESCRIPTION.

ctime.3
  mtk
    The range of tm_sec is 0..60 (not 0..61).

error_at_line.3
error_message_count.3
error_on_per_line.3
error_print_progname.3
  mtk
    New links to new error.3.

fmemopen.3
  mtk / Ryan S. Arnold
    Add text noting that explicitly controlling output buffering
    may be useful to catch errors on output operations on an
    fmemopen() stream.

getline.3
  Justin Pryzby
    Add SEE ALSO pointing to getline.3.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=364772

strtod.3
strtoul.3
  mtk
    Describe correct handling of errno in
 order to
    distinguish error from success after the call.

    Added EXAMPLE section which points to strtol.3 which provides

an example of the use of the analogous strtol(3).

strtol.3
  mtk / Justin Pryzby
    Add an example program.
  mtk
    Describe correct handling or errno in order to
    distinguish error from success after the call.

tmpfile.3
  Reuben Thomas
    DESCRIPTION does not need to say "temporary file name"
    just "temporary file", since the name is in any case
    unavailable to the user.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=363518
  mtk
    In DESCRIPTION:
    Change /automatically deleted when the program terminates normally/
    to   /automatically deleted when the program terminates/
    since deletion occurs on both normal and abnormal termination.

ip.7
  Karel Kulhavy / mtk
    Various wording improvements and clarifications.

signal.7
  mtk / Ulrich Drepper
     Add text noting that a signal's disposition is process-wide,
    shared by all threads.
  mtk
    Add text on changing signal dispositions.
    Add text on "signal mask and pending signals".
    Other minor edits.

time.7
  mtk
    Added SEE ALSO for new adjtime.3.

ld.so.8
  Justin Pryzby
    Remove bogus duplicate line.

========== Changes in man-pages-2.32 ==========

Released: 2006-05-13

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Johannes Weiner <root@hnaz.ath.cx>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Karel Kulhavy <clock@twibright.com>
Paul Brook <paul@nowt.org>
Pavel Heimlich <tropikhajma@seznam.cz>

Apologies if I missed anyone!

New pages
---

faccessat.2
  mtk
    New page for faccessat(2), new in 2.6.16.

fchmodat.2
  mtk
    New page for fchmodat(2),
 new in 2.6.16.

fchownat.2
  mtk
    New page for fchownat(2), new in 2.6.16.

futimesat.2
  mtk
    New page for futimesat(2), new in 2.6.16.

Changes to individual pages
---

access.2
  mtk
    Add SEE ALSO reference pointing to new faccessat.2 page.

capget.2
  mtk
    Reworded to reflect that capabilities are per-thread.

chmod.2

mtk
Add SEE ALSO reference pointing to new fchmodat.2 page.

chown.2
mtk
Add SEE ALSO reference pointing to new fchownat.2 page.

mmap.2
mtk
Updated discussion of MAP_NORESERVE since it is no longer
restricted to MAP_PRIVATE mappings.
Add reference to discussion of /proc/sys/vm/overcommit_memory
in proc.5.

openat.2
mtk
Add SEE ALSO reference pointing to new faccessat.2, fchmodat.2,
fchownat.2, futimesat.2 pages.

shmget.2
mtk
Document SHM_NORESERVE flag, new in 2.6.15.

truncate.2
Paul Brook / mtk
Expand
text noting that ftruncate()/truncate() may fail if
asked to extend a file beyond its current length.
Add EPERM error.

utime.2
mtk
Add SEE ALSO reference pointing to new futimesat.2 page.

fopen.3
Justin Pryzby / mtk
Document 'm' (mmap) flag.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=365754
mtk
Document 'c' (notcancel) flag.

futimes.3
mtk
Add SEE ALSO reference pointing to new futimesat.2 page.

qsort.3
Johannes Weiner
Add missing "const" qualifies to cast in EXAMPLE.

mtk
Slight rewording of comments in EXAMPLE.

termios.3
Karel Kulhavy
Clarify meaning of IXANY.
Clarify relationship of MIN with VMIN and TIME with VTIME.
mtk
Noted that CIBAUD, OFDEL, and DELECHO are not implemented
on Linux.
Added explanatory paragraph for phrases "not in POSIX" and
"XSI".

capabilities.7
mtk
Reworded to reflect that capabilities
are per-thread.
Add ioprio_set() to list of operations permitted by
CAP_SYS_NICE.
Add ioprio_set() IOPRIO_CLASS_RT and IOPRIO_CLASS_IDLE
scheduling classes to list of operations permitted by
CAP_SYS_ADMIN.
Note effects of CAP_SYS_NICE for migrate_pages().

========== Changes in man-pages-2.33 ==========

Released: 2006-05-23

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Martin Osvald" <martin.osvald@gmail.com>
Stefan Puiu <stefanpuiuro@yahoo.com>

Apologies if I missed anyone!

Page renamings
---

ftm.7
mtk / Stefan Puiu

renamed to the more suggestive feature_test_macros.7

New pages
----

mq_getsetattr.2
  mtk
    New page briefly describing mq_getsetattr(2), the system
    call that underlies
 mq_setattr(3) and mq_getattr(3).

rpmatch.3
  Justin Pryzby / mtk
    New page for rpmatch(3).

Changes to individual pages
----

chmod.2
  mtk
    Remove mention of non-standard S_IREAD, S_IWRITE, S_IEXEC.
    POSIX does now document ELOOP.

open.2
  mtk
    Remove mention of non-standard S_IREAD, S_IWRITE, S_IEXEC.

mmap.2
  Justin Pryzby
    Add mincore(2) to SEE ALSO.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367401

msync.2
  Justin Pryzby
    Note that EINVAL can also be caused by
    flags == MS_SYNC | MS_ASYNC.

sched_setaffinity.2
  mtk
    Add CPU_ISSET, CPU_CLR, CPU_SET, CPU_ZERO to NAME section.

select.2
  mtk
    Various minor changes.

select_tut.2

mtk
Removed much material that is redundant with select.2.
Various other changes.

umask.2
mtk
Substantial rewrite of description of 'mask'.

CPU_ISSET.3
CPU_CLR.3
CPU_SET.3
CPU_ZERO.3
mtk

New links to sched_setaffinity.2

FD_CLR.3
FD_ISSET.3
FD_SET.3
FD_ZERO.3
mtk
New links to select.2.

fts.3
Justin Pryzby
Add SEE also referring to ftw.3.

ftw.3
Justin Pryzby
Add SEE also referring to fts.3.

getline.3
Justin Pryzby
Various minor clarifications.

mkstemp.3
mtk
Clarify that O_EXCL is an open(2) flag.

mq_open.3
Martin Osvald
Fix prototype declaration for 'attr'.

mq_notify.3
Martin Osvald
s/sigev_signal/sigev_signo/

mq_setattr.3

mtk
New link to mq_getattr.3.

mq_timedreceive.3
mtk
New link to mq_receive.3.

mq_timedsend.3
mtk
New link to mq_send.3.

setlocale.3
Justin Pryzby
Added SEE ALSO referring to rpmatch.3.

sigandset.3
sigisemptyset.3
sigorset.3
mtk
New links to sigsetops.3.

stdio.3
Justin Pryzby
Added SEE ALSO referring to unlocked_stdio.3
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367667

strchr.3
Justin Pryzby
Add description of strchrnul().

strchrnul.3
mtk
New link to strchr.3.

undocumented.3
Justin Pryzby / mtk
Updated to remove some functions that don't exist, and
therefore don't need to be documented.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367671

unlocked_stdio.3
Justin Pryzby
Added SEE ALSO referring to stdio.3
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=367667

mq_overview.7
mtk
Added section describing relationship between library

interfaces and system calls.
Added SEE ALSO referring to new mq_getsetattr.2.

feature_test_macros.7
Stefan Puiu
Fix typo: s/_POSIX_C_SOURCE/_POSIX_SOURCE/

========== Changes in man-pages-2.34 ==========

Released: 2006-06-20

Apologies if I missed anyone!

Global changes
---

tzselect.8
zdump.8
zic.8
mtk, Joey
Added header comment noting that these pages are in the public
domain.

bindresvport.3
getrpcent.3
getrpcport.3
rpc.3
xdr.3
rpc.5
  mtk, aeb, Joey
    Added following to top of these pages to clarify origin and
    license:
    .\" This page
 was taken from the 4.4BSD-Lite CDROM (BSD license)

New pages
----

ioprio_set.2
  Eduardo Madeira Fleury, with edits by mtk, and review by Jens Axboe
    New page for ioprio_get(2) and ioprio_set(2), new in 2.6.13.

offsetof.3
  Justin Pryzby / mtk
    New page describing offsetof() macro.

Changes to individual pages

_exit.2
  mtk
    Add SEE ALSO referring to exit_group.2.

acct.2
  mtk
    Add SEE ALSO referring to acct.5.

fcntl.2
  mtk
    Explicitly mention term "dnotify" in discussion of F_NOTIFY.

inotify_add_watch.2
  Aristeu Sergio Rozanski Filho / mtk
    s/<inotify.h>/<sys/inotify.h>/ in prototypes.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960
  mtk
    Renamed argument from 'path' to 'pathname'.
    Reword introductory paragraph to clarify that
    inotify_add_watch() may also modify an existing watch item.
  mtk

The EINVAL error can also occur if 'fd' is
not an inotify
file descriptor.
mtk
Moved BUGS section from this page to inotify.7.

inotify_init.2
Aristeu Sergio Rozanski Filho / mtk
s/<inotify.h>/<sys/inotify.h>/ in prototypes.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960

inotify_rm_watch.2
Aristeu Sergio Rozanski Filho / mtk
s/<inotify.h>/<sys/inotify.h>/ in prototypes.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369960
mtk
The EINVAL error can also occur if 'fd' is not an inotify
file descriptor.

ioprio_get.2
mtk
New link to new ioprio_set.2.

mmap.2
mtk
Add SEE ALSO referring to remap_file_pages.2.

mount.2
Kenichi Okuyama
s/MNT_FORCE/MNT_EXPIRE/ under EINVAL error.

mremap.2
Mike Frysinger
s/unsigned long flags/int flags/ in SYNOPSIS.

pipe.2
mtk
Add SEE ALSO referring to popen.3.

posix_fadvise.2
mtk
Add SEE ALSO referring to readahead.2.

read.2

mtk
SEE ALSO for readv should refer to Section 2, not 3.

readahead.2
  mtk
    Add SEE ALSO referring to posix_fadvise.2.

send.2
  Peter Eiserloh
    Fix missing arguments in statement about equivalent send()
    and sendto() calls.

setsid.2
  mtk
    Add SEE ALSO referring to tcgetsid.3.

shmctl.2
  mtk
    Minor wording change at start of DESCRIPTION.

stat.2
  mtk
    Add SEE ALSO referring to access.2.

statfs.2
  mtk
    Relocated "Note" about f_fsid.

write.2
  mtk
    SEE ALSO for writev should refer to Section 2, not 3.

__setfpucw.3
  mtk, Joey
    Added license statement (GPL) after consultation with
    Joerg Scheurich.

assert_perror.3
  Justin Pryzby
    Add #define _GNU_SOURCE to prototype

difftime.3
  Joey
    Added note about time_t representation on other systems.
    Added CONFORMING TO.

ftw.3
  Justin Pryzby / mtk
    A fairly major revision...
    Document FTW_ACTIONRETVAL;

include .SH "RETURN VALUE";
    Reorganized and rewrote much of the page
    Added an example program.

inet.3
  Marc Lehmann
    Fixed typo in NOTES.
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=370277

isalpha.3
  Joey
    Updated CONFORMING TO.

mktemp.3
  mtk
    Updated CONFORMING TO.

printf.3
  Walter Harms
    Add documentation of %m.

readdir.3
  mtk
    Added SEE ALSO referring to ftw.3.

re_comp.3
  mtk
    Note that these functions are obsolete in favor of regcomp(3).
  Justin Pryzby
    Add SEE ALSO referring to regcomp.3

scandir.3
  Mats Wichmann
    Reworded CONFORMING TO statement on scandir() and alphasort().

strchr.3
  Stefan Puiu
    Fix prototype for strchrnul().

strtoul.3
  Stefan Puiu
    Add text clarifying treatment of strings starting with
    minus sign.

tmpnam.3
  mtk, after comments by Justin Pryzby
    Add text noting the need to use open(O_EXCL).
  mtk

Clarify discussion of use of free(3).
Various other minor changes to text and formatting.

tmpfile.3
mtk
Updated CONFORMING TO.

tmpnam.3
mtk, after comments by Justin Pryzby
Add text noting the need to use open(O_EXCL).
Updated CONFORMING TO.

undocumented.3
mtk
Remove offsetof(), which is now documented.

null.4
mtk
Added SEE ALSO referring to full.4.

console_codes.4
Thomas Dickey
Various improvements and corrections.

epoll.7
mtk
Added CONFORMING TO section mentioning FreeBSD kqueue and
Solaris /dev/poll.

feature_test_macros.7
mtk
Added pointer to location of LFS specification.

futex.7
mtk, after suggestion by Joey.
Added license statement to page, after discussion with
original author, bert hubert.
mtk
Reformat long lines; no content changes.

inotify.7
mtk
'path' argument renamed to 'pathname'.
A few minor rewordings.
Added BUGS section describing a couple of bugs.

ip.7

mtk
Add SEE ALSO referring to byteorder.3.

man.7
Justin Pryzby
Add SEE ALSO referring to groff_man(7).
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=369253

========== Changes in man-pages-2.35 ==========

Released: 2006-07-06

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@suse.de>
Andrew Morton <akpm@osdl.org>
Bauke Jan Douma <bjdouma@xs4all.nl>
Davide Libenzi <davidel@xmailserver.org>
Denis Barbier <barbier@linuxfr.org>
Horacio Rodriguez Montero <Horacio.Rodriguez.Montero@galinter.com.ar>
Johan Lithander <johan.lithander@teligent.se>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Mike Frysinger <vapier@gentoo.org>
Stefan Puiu <stefanpuiuro@yahoo.com>
Thorsten Kukuk <kukuk@suse.de>

Apologies if I missed anyone!

Global
changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

sync_file_range.2
Andrew Morton / mtk
New page for sync_file_range(2), new in kernel 2.6.17.

Changes to individual pages
---

adjtime.3
  mtk
    Noted BUG that occurs if 'delta' is specified as NULL.
    See http://bugzilla.kernel.org/show_bug.cgi?id=6761

bind.2
  Stefan Puiu
    Add EADDRNOTAVAIL error.
  Stefan Puiu / mtk
    Make example code more complete.

epoll_ctl.2
  mtk / Davide Libenzi
    Added EPOLLRDHUP description.
  mtk
    Added SEE ALSO referring to poll.2.

poll.2
  mtk / Davide Libenzi
    Added POLLRDHUP description.
  mtk
    The correct header file is <poll.h>, not <sys/poll.h>.
    Rewrote and reformatted various other parts.

readlink.2
  mtk
    Nowadays, readlink() returns 'ssize_t', as required in
    POSIX.1-2001.

wavelan.4
  mtk

   Added license statement.

nscd.conf.5
  Thorsten Kukuk
    Add documentation for various new fields.

passwd.5
  Horacio Rodriguez Montero
    Add explanation of 'x' character in 'password' field.
  mtk
    The proper name of "*" is "asterisk" not "star".

tcp.7
  Johan Lithander
    Update RFC reference for ECN.
  Andi Kleen
    Add sentence on "low memory" limit for tcp_mem on 32-bit systems.

==================== Changes in man-pages-2.36 ====================

Released: 2006-07-11

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Jens Axboe <jans@suse.de>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Kyle McMartin <kyle@mcmartin.ca>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages

MAINTAINING
  mtk

  How to maintain man-pages.

TODO
  mtk
    Things that it would be nice to get done for man-pages one day.

scripts/FIXME_list.sh
  mtk
    This script, intended for use by manual page maintainers,
    displays the FIXMEs in the manual page source files.

Changes to individual pages

---

fdatasync.2
fsync.2
  mtk
    Added SEE ALSO referring to sync_file_range.2.

sendfile.2
  mtk / Jens Axboe
    Fix description of 'offset' argument to explain the case
    where 'offset' is NULL.

ferror.3
  Justin Pryzby
    Add SEE ALSO referring to fdopen.3.

intro.3
  mtk
    Removed information about Section 3 subsections -- it doesn't
    reflect current reality, and probably never has.

    Added SEE ALSO referring to intro.2.

tcp.7
  Kyle McMartin
    Correction: tcp_window_scaling is ENabled by default.

========== Changes in man-pages-2.37 ==========

Released: 2006-08-02

Contributors

The
 following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Dean Gaudet <dean@arctic.org>
Frank van Viegen <F.C.vanViegen@UTwente.nl>
Helmut Grohne <helmut@subdivi.de>
Ivana Varekova <varekova@redhat.com>
Thomas Huriaux <thomas.huriaux@gmail.com>
Ville Skyttä <ville.skytta@iki.fi>

Apologies if I missed anyone!

Global changes

Thomas Huriaux / mtk

    Various formatting problems found as a result of reviewing the
    following command were fixed.

    for a in $(wc -l man?/*.?| awk '$1 > 2 {print $2}' | grep -v total); do
      echo $a; groff -Tascii -wmac -mman $a > /dev/null;
    done 2>&1 | less

    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=378544

Typographical or grammatical errors have been corrected in several
places.

New pages
---

readlinkat.2
  mtk (after prompting from Ivana Varekova)
    New page for readlinkat(2),
 new in kernel 2.6.16.

Changes to individual pages
---

ldd.1
  Ville Skyttä
    Document "-u" option.

chdir.2
  mtk
    Noted effect of fork() and execve() on current working directory.

chroot.2
  mtk
    Noted effect of fork() and execve() on root directory.

epoll_ctl.2
  Frank van Viegen / mtk
    Fix description of EBADF error.

exevce.2
  mtk
    Add text noting that effective IDs are copied to

saved set-IDs during execve().
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=379297

getitimer.2
mtk
Noted effect of fork() and execve() on interval timers.

getrlimit.2
mtk
Noted effect of fork() and execve() on resource limits.

getpriority.2
mtk
Noted effect of fork() and execve().

inotify_add_watch.2
mtk
Some rewording; included text describing required file
permissions.

intro.2
mtk
Revised description of standards under CONFORMING
TO.

makecontext.3
Helmut Grohne / mtk
Point out that args following 'argc' are int.
mtk
Added an example program.
Various minor wording fixes.

mmap.2
mtk
Expand description of MAP_POPULATE.
mtk, after prompting by Dean Gaudet
Expand description MAP_NONBLOCK.
mtk
Various minor formatting fixes.

openat.2
mtk
Added SEE ALSO linking to readlinkat.2.

nanosleep.2
mtk
Noted buggy behavior in Linux 2.4 and earlier when
nanosleep() is restarted after receiving stop+SIGCONT signals.

nice.2
  mtk
    Very minor rewording.

readlink.2
  mtk
    Added SEE ALSO linking to readlinkat.2.

sched_setscheduler.2
  mtk
    Noted preservation of scheduling parameters across execve().

setpgid.2
  mtk
    Noted effect of fork() and execve() on process group ID.

setsid.2
  mtk
    Noted effect of fork() and execve() on session ID.

umask.2
  mtk
    Noted effect
 of fork() and execve() on umask.

atexit.3
  mtk
    Noted inheritance of registrations across fork().

capabilities.7
  mtk
    Added material on privileges required for move_pages().
    CLONE_NEWNS needs CAP_SYS_ADMIN.
    keyctl(KEYCTL_CHOWN) and keyctl(KEYCTL_SETPERM) require
    CAP_SYS_ADMIN.

========== Changes in man-pages-2.38 ==========

Released: 2006-08-03

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Most pages
  mtk
    There was a major reworking of the CONFORMING TO sections
    in most manual pages.

    * generally try to rationalize the names used for standards.
      The preferred names are now documented as the head words
      of the list in standards(7). For the future: there is
      probably no
need to talk about anything more than
      C89, C99, POSIX.1-2001 (or later), xBSD, and SVr4.
      (In particular, I've eliminated most references to XPG
      and SVID, replacing them with references to SUS or SVr4.)

    * eliminate discussion of errors that can occur on other
      systems. This information exists only patchily in the
      manual pages, is probably of limited use, is hard to maintain,
      and was in some cases simply wrong (and probably always was).

    * Tried to ensure that those interfaces specified in C99 or
      POSIX.1-2001 are marked as such in their manual pages.

intro.1
intro.2
intro.3
intro.4
intro.5
intro.7
feature_test_macros.7
  mtk
    Added SEE ALSO referring to new standards.7.

Various pages
  mtk
    Changed instances of "HP UX" to "HP-UX".

Various pages
  mtk
    Changed instances of "DG-UX to "DG/UX"

Typographical or grammatical errors have been corrected in several

places.

New pages
----

standards.7
   mtk
      Based on material taken from intro.2, but expanded to
      include discussion of many additional standards.

Changes to individual pages
----

bind.2
  mtk
     Minor wording change for ENOTSOCK error.

intro.2
  mtk
     Removed information on standards to new standards.7.

========== Changes in man-pages-2.39 ==========

Released: 2006-08-05

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

Apologies if I missed anyone!

Global changes

Various pages
  mtk
     Updated CONFORMING TO and/or standards references
     in various pages that were missed for 2.38.

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages

---

chdir.2
  mtk
    _XOPEN_SOURCE=500 also
 gets fchdir() prototype.

standards.7
  mtk
    Added a few more standards, and expand some explanations.

========== Changes in man-pages-2.40 ==========

Released: 2006-09-04

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@suse.de>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Christoph Hellwig <hch@lst.de>
Chuck Ebbert <76306.1226@compuserve.com>
Samuel Thibault <samuel.thibault@ens-lyon.org>
Toralf Förster <toralf.foerster@gmx.de>

Apologies if I missed anyone!

Global changes
---

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2

mtk (after a note by Alain Portal)
Make naming of 'pathname' argument consistent; various
minor rewordings.

Typographical or grammatical errors have been corrected in several
places.

Changes
to individual pages
---

clone.2
mtk
Reinstate text on CLONE_DETACHED, and add a few words.

execve.2
mtk
Added list of process attributes that are not preserved on exec().

fork.2
mtk, after a suggestion by Christoph Hellwig
Greatly expanded, to describe all attributes that differ
in parent and child.

linkat.2
mtk
Document AT_SYMLINK_FOLLOW (new in 2.6.18).

set_mempolicy.2
mtk / Andi Kleen
Memory policy is preserved across execve().

write.2
mtk / Alain Portal
SEE ALSO for writev should refer to Section 2, not 3.
(i.e., really make the change that was logged in 2.34)

getcwd.3
Samuel Thibault / mtk
Fix SYNOPSIS and CONFORMING TO text for getwd() and
get_current_dir().
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=381692

proc.5
Chuck Ebbert
Document /proc/PID/auxv.

capabilities.7

Alain Portal
Restore
text accidentally deleted in 2.39.

regex.7
mtk / Alain Portal
Change references to "1003.2" to "POSIX.2".

Apologies if I missed anyone!

Global changes

Typographical
or grammatical errors have been corrected in several
places.

New pages
---

splice.2
tee.2
vmsplice.2
  Jens Axboe / Michael Kerrisk
    See also:
      http://lwn.net/Articles/118760/
      http://lwn.net/Articles/178199/
      http://lwn.net/Articles/179492/
      http://kerneltrap.org/node/6505
      http://lwn.net/Articles/179434/

Changes to individual pages
---

ldd.1
  Stefan Puiu
    Note glibc version where "ldd -u" appeared.

execve.2
  mtk
    The PR_SET_NAME setting is not preserved across an execve().

fork.2
  mtk
    Mappings marked with madvise(MADV_DONTFORK) are not inherited
    by child.

getdtablesize.2
  mtk
    Noted that sysconf(_SC_OPEN_MAX) is preferred in portable
    applications.

getpagesize.2
  mtk
    Noted that sysconf(_SC_PAGE_SIZE) is preferred in portable
    applications.
    _SC_PAGE_SIZE is available on most systems.

madvise.2
  mtk
     Document MADV_REMOVE, new in 2.6.16.
    Document MADV_DONTFORK / MADV_DOFORK, new in 2.6.16.

mount.2
  mtk / Trond Myklebust
    MNT_FORCE can cause data loss.

mmap.2
  mtk
    Added note on Linux's old (pre-2.6.12) buggy treatment of
    length==0.
  Justin Pryzby / mtk
    Added some EINVAL errors.

mremap.2
  mtk
    Remove superfluous "#include <unistd.h>" from SYNOPSIS.

msync.2
  mtk
    Added EBUSY error for case where MS_INVALIDATE is applied to
    a locked region.

posix_fadvise.2
  Andrew Morton
    Since 2.6.18, POSIX_FADV_NOREUSE is a no-op.

prctl.2
  Marcel Holtmann / mtk
    Since kernel 2.6.18, setting 2 for PR_SET_DUMPABLE is no longer
    possible.
  Guillem Jover
    Updated Linux versions where the options where introduced.
    Added PR_SET_TIMING, PR_GET_TIMING, PR_SET_NAME, PR_GET_NAME,
    PR_SET_UNALIGN, PR_GET_UNALIGN, PR_SET_FPEMU, PR_GET_FPEMU,
    PR_SET_FPEXC, PR_GET_FPEXC.
   Michael Kerrisk
    Document PR_GET_ENDIAN and PR_SET_ENDIAN.

remap_file_pages.2
  mtk
    Add "#define _GNU_SOURCE" to SYNOPSIS.

sync_file_range.2
  mtk
    Noted that sync_file_range() appeared in kernel 2.6.17.

vfork.2
  mtk
    Noted interactions with fork handlers in multithreaded programs.

wait4.2
  mtk
    Added feature test macros to SYNOPSIS.

clog2.3
  mtk / aeb / Kevin Ryde
    Fix broken text in description.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386214

clog10.3
  Kevin Ryde
    Fix broken text in description.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386214

mq_receive.3
  Britton Leo Kerin
    Fix return type in SYNOPSIS; should be "ssize_t" not "mqd_t".
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=387551

qsort.2
  Hrvoje Niksic
    Fix wording referring to the use of strcmp() in 'compar'
    function.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=391402

sendfile.2
   mtk
    Added SEE ALSO referring to new splice.2 page.

termios.3
  mtk
    Documented IUTF8 (which was new in kernel 2.6.4).

tzset.3
  mtk
    Added some TZ examples.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=386087

proc.5
  mtk
    Added delayacct_blkio_ticks (new in 2.6.18) to /proc/PID/statm.

ip.7
  Stuart MacDonald / Andi Kleen
    Fix discussion for TCP error queue /IP_RECVERR on TCP.

pthreads.7
  mtk
    Noted effect of RLIMIT_STACK resource limit for NPTL.

socket.7
  Senthil Kumar

Place socket options in alphabetical order.

========== Changes in man-pages-2.42 ==========

Released: 2006-11-24

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andrew Morton <akpm@osdl.org>
Chuck Ebbert <76306.1226@compuserve.com>
Doug Goldstein <cardoe@gentoo.org>
Eduard Bloch
<blade@debian.org>
Evan Teran <eteran@alum.rit.edu>
Pavel Heimlich <tropikhajma@seznam.cz>
Petr Baudis <pasky@ucw.cz>
Randy Dunlap <rdunlap@xenotime.net>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

brk.2
  Evan Teran / mtk
    Add text describing behavior of the Linux brk() system call
    and point out that the glibc brk() wrapper provides different
    behavior.
  mtk
    Note that sbrk() is implemented as a library function in glibc
    that calls the brk() system call.

futex.2
  mtk

FUTEX_FD is scheduled for removal in June 2007.

getaddrinfo.3
getnameinfo.3
Ulrich Drepper, with edits by mtk
Add text describing Internationalized Domain Name
extensions.

open.2
mtk / Eduard Bloch
Fix description of O_LARGEFILE to mention required
feature test
macros.

ptrace.2
Chuck Ebbert
Since Linux 2.6.18, the PID of the new process is also available
for PTRACE_EVENT_VFORKDONE.

syslog.3
Doug Goldstein
Fix header file required for vsyslog() in SYNOPSIS.

wcwidth.3
Petr Baudis
Fix CONFORMING TO.

core.5
mtk
Linux 2.4.21 added core_pattern (which was already in 2.6).
Noted a few more reasons why a core dump file might not
be produced.

========== Changes in man-pages-2.43 ==========

Released: 2006-11-29

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <ak@suse.de>
David Brownell <david-b@pacbell.net>
Eduard Bloch <blade@debian.org>
Egmont Koblinger <egmont@uhulinux.hu>

Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes
to individual pages
---

ioperm.2
  mtk
    Clarify discussion of privilege requirements.
    Added ENOMEM to ERRORS.

open.2
  mtk / Eduard Bloch
    Clarify description of O_LARGEFILE.

crypt.3
  Egmont Koblinger
    Make description of MD5 output string less ambiguous.

strerror.3
  Reuben Thomas
    Add C99 to CONFORMING TO; see
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400634

rtc.4
  David Brownell

    Update the RTC man page to reflect the new RTC class framework:

    - Generalize ... it's not just for PC/AT style RTCs, and there
      may be more than one RTC per system.

    - Not all RTCs expose the same feature set as PC/AT ones; most
      of these ioctls will be rejected by some RTCs.

    - Be explicit about when {A,P}IE_{ON,OFF} calls are needed.

    - Describe the parameter to the get/set epoch request; correct

the description of the get/set
frequency parameter.

- Document RTC_WKALM_{RD,SET}, which don't need AIE_{ON,OFF} and
which support longer alarm periods.

- Hey, not all system clock implementations count timer irqs any
more now that the new RT-derived clock support is merging.

proc.5
mtk
s/fseek(3)/lseek(2)/ under /proc/PID/mem entry.

feature_test_macros.7
mtk / Eduard Bloch
The LFS spec is now at http://opengroup.org/platform/lfs.html

raw.7
udp.7
Andi Kleen
Describe the correct default for UDP/RAW path MTU discovery.

New pages
---

termio.7
  mtk, after a bit of prodding by Reuben Thomas
    A brief discussion of the old System V termio interface,
    with pointers to pages that will contain the information
    that the reader
 probably wants.

scripts/find_repeated_words.sh
  mtk
    Find consecutive duplicate words in a man page, some of
    which may be grammar errors.

Global changes

Various pages
  Justin Pryzby / mtk
    Add "#define _ATFILE_SOURCE" to SYNOPSIS in following pages:
      faccessat.2
      fchmodat.2
      fchownat.2
      fstatat.2
      futimesat.2
      linkat.2
      mkdirat.2
      mknodat.2
      openat.2
      readlinkat.2
      renameat.2
      symlinkat.2
      unlinkat.2

mkfifoat.3

Various pages
  mtk
    Various references to "getty" were changed to "mingetty", since
    that is the manual page more likely to be found on current systems.

Various pages
  mtk, after a suggestion by Reuben Thomas <rrt@sc3d.org>
    Updated various header pages to accurately reflect which functions
    are and are not part of C89. Also fixed/improved
 a few other
    CONFORMING TO entries.

Various pages
  mtk
    s/Unices/Unix systems/ on the 5 pages where it appears.

Various pages
  mtk
    Wrapped long source lines in the following files
      getsockopt.2
      mknodat.2
      io_setup.2
      select_tut.2
      select.2
      readlinkat.2
      io_cancel.2
      syslog.2
      wcsncat.3
      getipnodebyname.3
      cmsg.3
      wcpncpy.3
      wcsrtombs.3
      wcstok.3
      fgetwc.3
      wmemcmp.3
      wcsspn.3
      div.3
      modf.3
      stdio_ext.3
      ctermid.3
      des_crypt.3
      wcsncmp.3
      wmemchr.3
      wcsstr.3
      wmemcpy.3
      wprintf.3

wcsnrtombs.3
termios.3
erf.3
ceil.3
lround.3
nextafter.3
wcsncpy.3
wmemset.3

getw.3
console_ioctl.4
sk98lin.4
environ.7
unix.7
time.7

Various pages
mtk
Added a SEE ALSO reference for feature_test_macros(7) to all pages where a feature test macro appears in the SYNOPSIS.

Various pages
mtk
Added SEE ALSO entry pointing to time.7
alarm.2
nanosleep.2
ualarm.3
usleep.3

Various pages
Justin Pryzby / mtk
Fixed consecutive duplicate word typos on a number of pages.

Typographical or grammatical errors have been corrected in several places. (Special thanks to Nicolas François!)

Changes to individual pages
---

access.2
mtk
Since 2.6.20, access() honors the MS_NOEXEC mount flag.
Jorge Peixoto de Morais Neto / mtk
Improve ENOENT description.

clone.2
mtk

Added some detail to the prototype.
Added some notes on IA-64's clone2().

epoll_ctl.2
mtk

Add text to note that EPOLLRDHUP appeared in kernel 2.6.17.

faccessat.2
Justin Pryzby
Various fixes as per
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411177
* s/effective/real/ in description text.
* added <fcntl.h> to synopsis.
* various other changes.

getrlimit.2
mtk / Fedora downstream patches; thanks to Ivana Varekova
Added a few words to note that RLIMIT_NPROC is really a limit on
threads.

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
Fedora downstream patches; thanks to Ivana Varekova
s%linux/aio.h%libaio.h% in SYNOPSIS.
Changed return type from "long" to "int".

mbind.2
Samuel Thibault / mtk
Fix EINVAL description.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411777

mincore.2
Nick Piggin
Kernel 2.6.21 fixes several earlier bugs in mincore().
Nick Pollitt
Remove words "of a file" -- mincore() is describing

memory residence information, not properties of a file.
mtk
Rewrote various parts to make the page clearer.

mmap.2
mtk
Rewrote and reorganized various parts to be clearer.

Taken from Fedora downstream patches; thanks to Ivana Varekova
Removed text stating that mmap() never returns 0; that's
not true.

mount.2
mtk / Val Henson
Document MS_RELATIME, new in Linux 2.6.20.

open.2
Andre Majorel / mtk
On Linux, the error returned when opening a large file on a
32-bit system is actually EFBIG, not EOVERFLOW.

posix_fadvise.2
Pádraig Brady
Fix RETURN VALUE description: returns error number of failure.

rename.2
mtk / Timo Sirainen
Various improvements to DESCRIPTION.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=416012

semop.2
mtk
If sops contains multiple operations, then these are performed
in array order. All Unix systems that I know of do this,

and some Linux applications depend on this behavior. SUSv3
made no explicit statement here, but SUSv4 will explicitly
require this behavior.
Small rewording of explanation of "atomically".

signal.2
Nicolas François
Fix incorrect argument name in DESCRIPTION.
mtk
Small wording improvement.

socket.2
Nicolas François
Add reference to ipv6.7 page.

socketcall.2
Nicolas François
Fix .TH line.

splice.2
Benjamin Gilbert

Fix inconsistent argument names in SYNOPSIS and DESCRIPTION.

statvfs.2
  mtk
    Small wording clarification.

symlink.2
  mtk / Nicolas François
    Removed cryptic text under CONFORMING to referring to
    "open(2) and NFS". There is no relevant text in open.2 as
    far as I (mtk) can see.

time.2
  mtk / Reuben Thomas
    Remove sentence "gettimeofday() obsoleting time() on 4.3BSD".
    This information is old, and probably no longer relevant.
    See
 http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=403888

write.2
  mtk, after an idea from a downstream Fedora patch.
    Clarified discussion of /count == 0/ case.

ptrace.2
  Chuck Ebbert
    When the parent receives an event with PTRACE_EVENT_* set,
    the child is not in the normal signal delivery path. This
    means the parent cannot do ptrace(PTRACE_CONT) with a signal
    or ptrace(PTRACE_KILL). kill() with a SIGKILL signal can be
    used instead to kill the child process after receiving one
    of these messages.

sched_setaffinity.2
  mtk
    Fix glibc version number in description of 'cpusetsize' argument.

vfork.2
  mtk
    Stripped some excess/outdated text from the BUGS section.

basename.3
  mtk / Jorge Peixoto de Morais Neto
    Add text to clarify that the pointer returned by these
    functions may be into some part of 'path'.

dlopen.3
  Taken from Fedora downstream patches; thanks to Ivana Varekova
  + Carlo

Marcelo Arenas Belon
Add "#include <stdlib.h>" to example program.

fclose.3
mtk
Complete rewrite. The existing page was hard to read,
and the RETURN VALUE description seems to be wrong.

getopt.3
mtk
Added getopt() example program.
mtk
Add a few words to clarify the operation of the GNU-specific
double-colon feature, which allows options to have optional
arguments.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=352139

glob.3
Nicolas François
Fix PROTOTYPE.

inet_network.3
mtk, after an idea from a downstream Fedora patch.
Clarified description of inet_network().

log.3
Nicolas François
Fix .TH line.

log10.3
Nicolas François
Fix .TH line.

malloc.3
Nicolas François
Small rewording to mention calloc().

posix_openpt.3
Martín Ferrari
Fix return type in SYNOPSIS; as per
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400971
Needs _XOPEN_SOURCE == 600; as per
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=400975
Julien BLACHE
s/ptsname/posix_openpt/ in RETURN VALUE

re_comp.3
Taken from Fedora downstream patches; thanks to Ivana Varekova

Add "#define _REGEX_RE_COMP" to SYNOPSIS.

regex.3
  Nicolas François
    Fix .TH line.

termios.3
  mtk
    Added .SS headers to give some structure to this page; and a small
    amount of reordering.
  mtk
    Added a section on canonical and non-canonical mode.
  mtk
    Enhanced the discussion of "raw" mode for cfmakeraw().
  mtk
    Document CMSPAR.
  mtk
    Make description of PARODD a little clearer.
  Reuben Thomas
    Add SEE ALSO link to tty_ioctl.4
  mtk
    Add SEE ALSO link to console_ioctl.4

ualarm.3
  mtk
    Removed BSD prototype from synopsis.
    Various rewordings.

usleep.3
  mtk
    Removed BSD prototype from synopsis.
    Various rewordings.

termcap.5
   Taken from Fedora downstream patches; thanks to Ivana Varekova
    s/curses/ncurses/ under SEE ALSO

bootparam.7
  Taken from Fedora downstream patches; thanks to Ivana Varekova
    Documented "mem=nopentium".

feature_test_macros.7
  mtk
    The default treatment of _POSIX_C_SOURCE changed in glibc 2.4.
  mtk, after a suggestion by Justin Pryzby
    Added some text warning that the "__" macros that
    <features.h> defines internally should never be
    directly defined by programs.

mtk, based on notes by Jakub Jelinek
Document _FORTIFY_SOURCE
(See http://gcc.gnu.org/ml/gcc-patches/2004-09/msg02055.html)
mtk
Document _REENTRANT and _THREAD_SAFE.

mdoc.7
mtk / Nicolas François
Remove CONFIGURATION section, since this does not seem to be
true for Linux.

svipc.7
Nicolas François
Fix data types in associated data structures;
remove nonexistent semzcnt and semncnt
fields.

time.7
mtk
Since kernel 2.6.20, the software clock can also be 300 HZ.

========== Changes in man-pages-2.45 ==========

Released: 2007-04-05

Global changes

This release consists mainly of formatting fixes (to a large
number of pages) to achieve greater consistency across pages.
With the exception of the few individual changes noted below,
no changes were made to content.

Changes to individual pages
---

io_destroy.2
io_getevents.2
io_setup.2
io_cancel.2
io_submit.2
mtk
Clarified RETURN VALUE text

bindresvport.3
mtk
Rewrote prototype using modern C syntax.

========== Changes in man-pages-2.46 ==========

Released: 2007-04-06

Global changes

This release consists mainly of formatting fixes (to a large
number of pages) to achieve greater consistency across pages:

* Most instances of two or more consecutive blank lines in man
 page output were
 shrunk to a single line.
* A number of example programs were reformatted
 to more closely match K&R style.
* In various places (mainly code examples), the use of tabs was
 replaced by spaces

With the exception of the few individual changes noted below,
no changes were made to content.

Changes to individual pages
---

bdflush.2
  mtk
    Add <sys/kdaemon.h> header file to SYNOPSIS.

sched_rr_get_interval.2
  mtk
    Moved timespec definition from SYNOPSIS into description.

select_tut.2
  mtk
    Make SYNOPSIS match select.2.

========== Changes in man-pages-2.47 ==========

Released: 2007-05-04

Contributors

The following people contributed notes, ideas, or patches that have

been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
John Heffner <jheffner@psc.edu>

Apologies if I missed anyone!

Global changes

This release consists mainly of changes to source file
 layout
(wrapped long lines; stripped trailing white space; started new
sentences on new lines).

There is very little change to output formatting or content (see the
notes below).

Changes to individual pages
---

sched_rr_get_interval.2
  mtk
    Remove crufty statement that this system call is not implemented.
    The nice interval can be used to control the size of
    the round-robin quantum.
    Corrected .TH line.

ip.7
  John Heffner / mtk
    Document IP_PMTUDISC_PROBE, which will be in 2.6.22.

========== Changes in man-pages-2.48 ==========

Released: 2007-05-04

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Colin Watson <cjwatson@debian.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>

Apologies if I missed anyone!

Global changes

This release consists mainly of changes to source file layout
(wrapped
 long lines; stripped trailing white space; started new
sentences on new lines).

There is very little change to output formatting or content (see the
notes below).

Various pages
  mtk
    In various places where it occurred,
    s/nonnegative/non-negative/

Various pages
  mtk
    s/wide character/wide-character/ when used attributively.

Changes to individual pages
---

man.7
  Justin Pryzby / Colin Watson / mtk
    .SH doesn't require quotes.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=411303

========== Changes in man-pages-2.49 ==========

Released: 2007-05-20

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Akihiro MOTOKI <amotoki@dd.iij4u.or.jp>
Bruno Haible <bruno@clisp.org>
Justin Pryzby <justinpryzby@users.sourceforge.net>

Apologies if I missed anyone!

New pages
----

bsd_signal.3
   mtk
      Documentation of bsd_signal().

euidaccess.3
  mtk
      Manual page for euidaccess() and eaccess().

getsubopt.3
  mtk / Justin Pryzby
      Documentation of getsubopt().

sysv_signal.3
  mtk
      Documentation of sysv_signal().

New links
----

epoll_pwait.2
  mtk
      New link to epoll_wait.2.

eaccess.3
  mtk
      New link to new euidaccess.3,

sem_timedwait.3
  mtk
      New link to sem_wait.3.

sem_trywait.3
  mtk
      New link to sem_wait.3.

Global changes

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

access.3
  mtk
    Added SEE ALSO ref to new euidaccess.3 page.

epoll_wait.2
  mtk
    Added description of epoll_pwait(), new in kernel 2.6.19.

execve.2
  mtk
    Add text noting that Linux allows 'argv' and 'envp' to be
    NULL, but warning that this is non-standard and non-portable,
    and
 should be avoided in portable programs.
    Bug filed (http://bugzilla.kernel.org/show_bug.cgi?id=8408)
    to get this changed, but maybe that won't be done because it
    is an ABI change.
  mtk
    Added an example program.
  mtk
    Expanded the discussion of interpreter scripts and the
    'optional-arg' argument of an interpreter script.
    For further info, see
    http://homepages.cwi.nl/~aeb/std/hashexclam-1.html
    http://www.in-ulm.de/~mascheck/various/shebang/
  mtk
    Added text noting that FD_CLOEXEC causes record locks to be
    released.
  mtk
    Mention effect of MS_NOSUID mount(2) flag for set-user-ID
    programs.
  mtk
    Expanded description of handling of file descriptors during
    execve(), adding text to note that descriptors 0, 1, and 2
    may be treated specially.

faccessat.3
  mtk
    Added SEE ALSO ref to new euidaccess.3 page.

mmap.2
  mtk
    Place MAP_* flags list

in alphabetical order.

readv.2
  mtk
    A fairly substantial rewrite, which among other things
    fixes the problem reported by Kyle Sluder in
    http://bugzilla.kernel.org/show_bug.cgi?id=8399
    And added some example code.

sigaction.2
  mtk
    Added text referring to the discussion of async-signal-safe
    functions in signal(7).
    A few other minor formatting and wording changes.

signal.2
  mtk
    Moved the discussion of async-signal-safe functions to signal(7).
    Added text referring to the discussion of async-signal-safe
    functions in signal(7).
    Added SEE ALSO entries referring to new bsd_signal.3 and
    sysv_signal.3 pages.

copysign.3
  Bruno Haible
    Clarify discussion of negative zero.

getopt.3
  mtk
    Add SEE ALSO ref to new getsubopt.3.

iconv_open.3
  Bruno Haible
    Describe the glibc/libiconv //TRANSLIT and //IGNORE extensions
    for 'tocode'.

iswblank.3
  Bruno
 Haible
    Update CONFORMING TO; iswblank() is in POSIX.1-2001.

inotify.7
  mtk
    Definitions for IN_DONT_FOLLOW, IN_MASK_ADD, and IN_ONLYDIR
    were added to glibc in version 2.5.

signal.7
  mtk

Incorporated (and slightly modified) the text on
async-signal-safe functions that was formerly in signal(2).
Added SEE ALSO entries referring to new bsd_signal.3 and
sysv_signal.3 pages.

========== Changes in man-pages-2.50 ==========

Released: 2007-05-21

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andreas Halter <halter@google.com>
Laird Shaw <netocrat@dodo.com.au>
Mike Frysinger <vapier@gentoo.org>

Apologies if I missed anyone!

Removed pages (!)

Most Section 1 man pages are removed
  mtk (with help from Mike Frysinger, Laird Shaw, Andreas Halter)
    Once upon time Andries added a number of Section
1 manual pages
    to man-pages. However, since that time, those pages have not
    seen much maintenance, and are not in fact distributed in most
    distributions. Instead most distributions supply the
    coreutils versions of these pages, which are currently
    maintained. In addition, man-pages provides the 1p pages,
    which document the portable subset of functionality of these
    commands. Since the man1 pages are mostly unneeded, and
    out of date, I'm removing them. The following pages disappear:

      chgrp.1
      chmod.1
      chown.1
      cp.1
      dd.1
      df.1
      diff.1
      dir.1
      dircolors.1
      du.1

install.1
ln.1
ls.1
mkdir.1
mkfifo.1
mknod.1
mv.1
rm.1
rmdir.1
touch.1
vdir.1

The following Section 1 pages will
be kept:

intro.1
ldd.1
time.1

========== Changes in man-pages-2.51 ==========

Released: 2007-05-28

Global changes

Various pages
  mtk
    (Hopefully) all cross references outside a page now include a
    section number. This should permit better resulting output
    from a man2html-type conversion.

Various pages
  mtk
    Convert function formatting of the form "\fBname\fP()" to
    ".BR name ()".

Changes to individual pages
---

futimesat.2
  mtk
    s/futimes/futimesat/ in .SH NAME line.

msgop.2
  mtk

Put "msgrcv" and "msgsnd" in .SH NAME line.

mount.2
  mtk
Add "umount2" to .SH NAME line.

wait.2
  mtk
Add "waitid" to .SH NAME line.

getopt.3
  mtk
Add "getopt_long" and "getopt_long_only" in .SH NAME line.

sem_wait.3
  mtk
Add "sem_timedwait" and "sem_trywait" to .SH NAME line.

stdarg.3
  mtk
Add "va_start", "va_arg", "va_end", "va_copy" to .SH NAME line.

========== Changes in man-pages-2.52 ==========

Released: 2007-05-29

"A foolish consistency is the hobgoblin of little minds, adored by
little statesmen and philosophers and divines"

Ralph Waldo Emerson (1803-1882)

"But damn it, these man pages are a mess!"

Global changes

Most of the changes below are about bringing greater consistency
to manual pages, including reducing the wide range of .SH
Section headings.

Typographical or grammatical errors have been corrected in several
places.

Various pages
  mtk
Make 'manual' component of .TH line into the string

"Linux Programmer's Manual".
Reason: consistency.

Various pages
mtk
Changed date in .TH line into form YYYY-DD-MM.
Reason: consistency.

Various pages
mtk
Some .SH header lines were made into .SS lines. (One of the aims here is to
reduce the number of non-standard .SH lines.)

Various pages
mtk
Change title .SH sections named "NOTE" to "NOTES", in some cases also changing the location of the section within the page.
Reason: consistency.

Various pages
mtk
Commented out .SH AUTHOR sections; the right place for documentation authorship sections is usually comments at the top of the page source.

Various pages
mtk
Changed .SH HISTORY to .SH VERSIONS.
Reason: in many cases, HISTORY was being used to describe Linux/glibc version information, as was already done for VERSIONS sections in other pages.

Various pages
mtk
Removed HISTORY section, or moved it as a subsection or paragraphs under another section e.g., NOTES.
Reason: there are too many arbitrary section (.SH) names, and a HISTORY section never was consistently used across Linux manual pages.

Various pages
mtk
Moved
SEE ALSO section to be last section on the page
Reason: consistency -- and this is where SEE ALSO should be!

Various pages

mtk

Relocated GLIBC NOTES as subsection under NOTES

Reason: reduce number of arbitrary section (.SH) names.

Various pages

mtk

Relocated LINUX NOTES as subsection under NOTES

Reason: reduce number of arbitrary section (.SH) names.

Various pages

mtk

Renamed some "AVAILABILITY" sections to "VERSIONS".

Reason: consistency.

Various pages

mtk

Renamed some "DIAGNOSTICS" sections to "RETURN VALUE".

Reason: consistency.

getopt.3

tzselect.8

mtk

s/\.SH ENVIRONMENT VARIABLES/.SH ENVIRONMENT/

Reason: consistency.

intro.2

select.2

sysctl.2

bsearch.3

dlopen.3

envz_add.3

fmtmsg.3

getgrent_r.3

getgrouplist.3

getpwent_r.3

getutent.3

hsearch.3

rtime.3

strptime.3

tsearch.3

vcs.4

wordexp.3

mtk

s/return 0/exit(EXIT_FAILURE)/ in main() of function example

program.

Reason: consistency.

mprotect.2
select_tut.2
dlopen.3
getgrent_r.3
getopt.3
getpwent_r.3
hsearch.3
select_tut.2
tsearch.3
  mtk
    Use symbolic constants (EXIT_SUCCESS, EXIT_FAILURE) in calls
    to exit().
    Reason: consistency.

access.2
chown.2
lseek.2
open.2
read.2
utmp.5
  mtk
    Renamed RESTRICTIONS section to NOTES, or moved text in a
    RESTRICTIONS section under existing NOTES section.
    Reason: consistency, and reduce number of arbitrary section (.SH)
    names.

Changes to individual pages
----

capget.2
  mtk
    s/\.SH FURTHER INFORMATION/.SH NOTES/

dup.2
  mtk
    s/\.SH WARNING/.SH NOTES/

kill.2
  mtk
    Renamed LINUX HISTORY section to LINUX NOTES, and relocated
    within page.

select_tut.2
  mtk
    Relocated example program and made its .SH title "EXAMPLE".

sigaltstack.2

mtk
Move code example into its own EXAMPLE section.

sigreturn.2

mtk
s/\.SH WARNING/.SH NOTES/

setuid.2
mtk
s/\.SH "LINUX-SPECIFIC REMARKS"/.SH LINUX NOTES/

shmget.2
mtk
Remove section about effect of fork()/exec()/exit(); shmop.2
contains the same text, and it only needs to be said once.

shmop.2
mtk
Minor rewording under DESCRIPTION.

daemon.3
mtk
Minor wording and formatting changes.

encrypt.3
mtk
Removed statement that glibc unconditionally exposes declarations
of encrypt() and setkey(), since portable applications must
use <unistd.h> and define _XOPEN_SOURCE to obtain the declarations
of setkey() and encrypt(). Adjusted example program accordingly.

mkstemp.3
mtk
Slight rewording.

LDP.7
mtk
Minor wording and formatting changes.

man.7
mtk
Substantial rewrite, revising and extending the discussion
about desired conventions for writing pages.
There will be further updates to this page in the
next few
man-pages releases.

========== Changes in man-pages-2.53 ==========

Released: 2007-05-30

  "A foolish consistency is the hobgoblin of little minds, adored by
   little statesmen and philosophers and divines"

      Ralph Waldo Emerson (1803-1882)

  "But damn it, these man pages are a mess!"

Global changes

Many many pages
  mtk
    Reordered sections to be more consistent, in some cases renaming
    sections or shifting paragraphs between sections.

man7/*
  mtk
    In various pages in this section, .SH headings were
    converted to .SS.

========== Changes in man-pages-2.54 ==========

Released: 2007-06-07

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Emmanuel Mogenet <emogenet@google.com>
Michael Berg <michaeljberg@gmail.com>

Apologies if I missed anyone!

Global changes

Various

pages
  mtk
    Where there is an instruction in the SYNOPSIS about linking
    or compiling with a certain option, the option is now
    marked up in italics (e.g., "\fI-lm\fP").

Various pages
  mtk
    Added page numbers to page cross references.

A few pages
  mtk
    s/manpage/man page/, for consistency.

Typographical or grammatical errors have been corrected in several
places.

New pages
----

man-pages.7
  mtk
    A description of the conventions that should be followed
    when writing pages for the man-pages package.

Removed pages
----

man1/README
  mtk
    Already deleted most of the man1 pages previously, so
    this doesn't need to stay.

LDP.7
  mtk
    Removed this page since it is out of date, and the proper place
    to go for up-to-date information is http://www.tldp.org/

ksoftirq.9
  mtk
    Reason: this was the only Section 9 page, and it is old
    (Linux 2.4). The
man9 section never took off as an idea, and
    I see little point in keeping a Section 9 with just a single
    old page.

Changes to individual pages

HOWTOHELP
  mtk
    Moved some material out of here into new man-pages.7.

alloc_hugepages.2
  mtk
    Minor rewrites, eliminating some duplication, and removing
    some outdated text.

epoll_pwait.2
  Michael Berg
    Fix broken link path;
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=425570

fcntl.2
  mtk
    Remove misleading text about setting O_ASYNC when calling
    open(); one must use fcntl() F_SETFL for this task.

fdatasync.2
  mtk
    Converted outdated BUGS note about fdatasync() being
    equivalent to fsync() on Linux 2.2 into a NOTES note
    about this historical behavior.

futex.2
  mtk
    Small rewording to fix "fails with the error EWOULDBLOCK"
    rather than "returns EWOULDBLOCK".
    See Red Hat bug 172828.

mprotect.2
   mtk, after an observation by Emmanuel Mogenet
    A much improved example program.
  mtk
    Significant rewrites and additions to description.

mremap.2
  mtk
    Remove text about the nonexistent BSD mremap() -- too
    much information, in my opinion.

sched_yield.2
  mtk
    Added ERRORS section.

set_mempolicy.2
  mtk
    Moved text for "Versions and Library Support".

set_tid_address.2
  mtk
    Small rewording in RETURN VALUE section.

sigaction.2
  mtk
    Add EXAMPLE section with a pointer to example in mprotect.2.

sync_file_range.2
  mtk
    Fix return type in SYNOPSIS. Add RETURN VALUE section.

atexit.3
  mtk
    Small rearrangement of text under NOTES.

bindresvport.3
  mtk
    Rewrite and substantial additional text.

exec.3
  mtk
    Minor clarifications for text on execlp() and execvp(). Removed
    FILES section, since it provides no useful additional info.

fenv.3
  mtk

   Moved link instructions from NOTES to SYNOPSIS.
    Added feenableexcept, fedisableexcept, fegetexcept
    to .SH NAME list.

fputwc.3
  mtk
    Added 'putwc' to .SH NAME list.

gethostbyname.3
  mtk
    s/int/socklen_t/ for type of gethostbyaddr() 'len' argument,
    and add a few more words in NOTES about the type used here.

login.3
  mtk

Removed remark from NOTES about linking with -lutil; add
text on that point to SYNOPSIS.

openpty.3
mtk
Removed redundant remark from NOTES about linking with -lutil
since there is text on that point under SYNOPSIS.

sysconf.3
mtk
Added SEE ALSO referring to getconf(1).

unlocked_stdio.3
mtk
Revised .SH NAME section.

ascii.7
mtk
Minor rearrangement of order of text.

capabilities.7
mtk
s/exec()/execve(2)/ in various places.

complex.7
mtk
Changed "atan(1)" to "atan(1.0)" to prevent some versions of
man2html(1) from
mistaking that string as a page cross reference.

rtnetlink.7
mtk
Small restructuring to avoid 'cannot adjust line' from man(1).

ldconfig.8
mtk
Removed now very out-of-date sentence about need to link shared
libraries with -lc.

man.7
mtk
Various text was moved out of this page into the new man-pages.7.

mdoc.7
mtk
Added SEE ALSO referring to new man-pages.7.

mdoc.samples.7

mtk
A few changes, hopefully done right, to eliminate some
errors to stderr when rendering with man(1).

rtnetlink.7
mtk
Shorten a line in table so it fits in 80 columns.
Minor rewording under BUGS.

tzselect.8
mtk
Moved EXIT STATUS section.

========== Changes in man-pages-2.55 ==========

Released: 2007-06-10

Global changes
---

clone.2
getdents.2
gettid.2
ioprio_set.2
llseek.2
mmap2.2

modify_ldt.2
mq_getsetattr.2
pivot_root.2
quotactl.2
readdir.2
sysctl.2
syslog.2
tkill.2
  mtk, after a note by Mike Frysinger
      Updated to reflect the fact that the _syscallN() macros
      have gone away,

Several pages
  mtk
      Change reference to path_resolution.2 to path_resolution.7.

Typographical or grammatical errors have been corrected in several
places.

Moved pages
----

path_resolution.2 has been moved to section 7, thus path_resolution.7
  mtk
      Reason: this is an overview
 page, not one describing as
      a specific system call.

Changes to individual pages

MAINTAINING
  mtk, after a note from Xose Vazquez Perez
      Added pointer to Red Hat man-pages bugzilla.
  mtk
      Added a release philosophy note on separating out big
      formatting changes into their own release that contains minimal
      content changes.

accept.2
  mtk
      Add new EXAMPLE section with pointer to example in bind.2.

arch_prctl.2
  mtk
      Added RETURN VALUE section.

bind.2
  mtk
    Expand example program, and move it to new EXAMPLE section.
    Added text pointing to example in getaddrinfo.3.

cacheflush.2
  mtk
    Convert NOTES section to CONFORMING TO and note that
    this call is Linux-specific.
    Other minor rewordings.

connect.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

create_module.2
  mtk
    Add ENOSYS error.

fcntl.2
flock.2

  mtk
    Small rewrite of SEE ALSO text pointing to Documentation/* in
    kernel source.

get_kernel_syms.2
  mtk
    Added ERRORS heading
    Add ENOSYS error.

getdtablesize.2
  mtk
    Added an ERRORS section.

getsid.2
  mtk
    Added a RETURN VALUE section.

getpid.2
  mtk
    Added an ERRORS section (stating that the calls are
    always successful).

ioctl_list.2
  mtk
    Add SEE ALSO reference to ioctl.2.

listen.2
  mtk
    Add new EXAMPLE section with pointer to example in bind.2.

query_module.2
  Martin (Joey) Schulze
    Add ENOSYS error.

recv.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

sched_get_priority_max.2
sched_rr_get_interval.2
sched_setscheduler.2
sched_yield.2
  mtk
    Modified .TH line

send.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

set_tid_address.2
  mtk
    Added an ERRORS section (stating that the call is

    always successful).

signal.2
  mtk, after a note from Alexander Taboriskiy
    Strengthen warning against the use of signal().
    Added siginterrupt(3) to SEE ALSO list.
  mtk
    Rewrote various parts; added an ERRORS section.

socket.2
  mtk
    Added new EXAMPLE section pointing to example in getaddrinfo.3.

stat.2
  mtk
    Added EXAMPLE program.

syscall.2
  mtk
    Converted to -man format; some rewrites; added an EXAMPLE.

sysctl.2
  mtk
    Improved the example program.

getnameinfo.3
  mtk
    Add text pointing to example in getaddrinfo.3.

getaddrinfo.3
  mtk
    Add example programs.
    Add getnameinfo() to SEE ALSO list.

memmove.3
  mtk / Serge van den Boom
    Clarify discussion of what happens if 'src' and 'dest' overlap.

regex.3
  Justin Pryzby
    Add grep(1) to SEE ALSO list.

sigpause.3
  mtk after a note from Ulrich Drepper
    Clarify discussion of feature test macros that are needed
 to
    expose System V and BSD versions of this function in glibc.

undocumented.3
  mtk
    Removed some functions that have been documented.

wprintf.2
  Martin (Joey) Schulze
    Remove wscanf.3 from SEE ALSO list, since that page does not exist.

utmp.5
  Joey Hess
    Removed outdated note on xdm.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=418009
  Martin (Joey) Schulze
    Removed outdated note about Debian and libc5.

bootparam.7
  Martin (Joey) Schulze
    Fix order of commands listed under 'init='.

hier.7

Joey Hess
Add /media, remove /dos.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=418234

inotify.7
mtk
Added text describing what happens when the buffer given to
read(2) is too small to return information about the next event,
and noting the behavior change in 2.6.21.

man-pages.7
mtk
Added text to note that ERRORS list should be in alphabetical order.

mdoc.7
mdoc.samples.7
mtk
Added SEE ALSO reference to groff_mdoc(7).

unix.7
mtk
Added EXAMPLE section with pointer to bind.2 EXAMPLE.

ld.so.8
mtk
Simplify text describing --inhibit-rpath.
mtk, after a note by John Reiser
Describe use of $ORIGIN in rpath.

========== Changes in man-pages-2.56 ==========

Released: 2007-06-11

Global changes

Many pages
mtk
Removed version numbers in .TH lines.
Reason: these were only arbitrarily updated, and so impart no
useful information. Version information goes into a
VERSIONS section nowadays, and the date in the .TH line should
be updated to reflect the date of the last (significant)
change to the page.

Typographical or grammatical errors have been corrected in several
places.

========== Changes in man-pages-2.57 ==========

Released: 2007-06-17

Contributors

The following people
 contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed anyone!

Global changes

Many pages
  mtk
    Fix section numbers in page cross references.

Changes to individual pages
---

access.2
  mtk
    Minor wording fixes.
    Small clarification of description of 'mode'.

bind.2
  mtk
    Small reworking of EXAMPLE program.

exit_group.2
  mtk
    Minor wording fixes.

exit.3
  mtk
    Added more detail on exit handlers.
    Minor wording fixes.

ioctl.2

mtk
Remove SEE ALSO reference to nonexistent mt.4.

modify_ldt.2
Samuel Thibault / mtk
In Linux 2.6, the 'modify_ldt_ldt_s' structure was renamed
'user_desc'.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=378668
mtk
Include definition of 'user_desc' structure.
Minor rewordings.

mprotect.2
mtk
Small reworking of EXAMPLE program.

sigaction.2
mtk
Removed reference to nonexistent sigsend(2).

a64l.3
mtk
Remove SEE ALSO reference to nonexistent itoa.3.

dysize.3
mtk
Removed SEE ALSO reference to nonexistent time.3.

encrypt.3
mtk
Removed SEE ALSO reference to nonexistent fcrypt.3.

fmemopen.3
mtk
Small reworking of EXAMPLE program.

fpurge.3
mtk
Remove SEE ALSO reference to nonexistent fclean.3.

getutent.3
mtk
s/ttyname(0)/ttyname(STDIN_FILENO)/ in program example.

vcs.4
mtk
s/exit(1)/exit(EXIT_FAILURE)/

environ.7
  mtk
    Correct some section numbers in page cross references.

man-pages.7
  mtk
    Modify requirements for example programs a little.

uri.7
  mtk
    Wrapped long source lines.

========== Changes in man-pages-2.58 ==========

Released: 2007-06-24

setresuid.2
setfsgid.2
access.2
initgroups.3
euidaccess.3
tcgetpgrp.3
path_resolution.7
capabilities.7
unix.7
  mtk
    Add SEE ALSO link to new credentials.7.

New pages
----

credentials.7
  mtk
    An overview of Linux process identifiers (PIDs, PPIDs,
    PGIDS, SIDs, UIDs, GIDs).

Changes to individual pages
----

bind.2
  mtk
    Added some comments to example program.

getxattr.2
  mtk
    VERSIONS: In kernel since 2.4; glibc support since 2.3.

listen.2
  mtk
    Updated discussion of somaxconn limit.

listxattr.2
   mtk
    VERSIONS: In kernel since 2.4; glibc support since 2.3.

posix_fadvise.2
  mtk
    VERSIONS: Glibc support has been provided since version 2.2.

readahead.2
  mtk

Added VERSIONS section.

remap_file_pages.2
mtk
Updated VERSIONS section with text on glibc support.

removexattr.2
mtk
VERSIONS: In kernel since 2.4; glibc support since 2.3.

semop.2
mtk
Added VERSIONS section with info on semtimedop().

setxattr.2
mtk
VERSIONS: In kernel since 2.4; glibc support since 2.3.

dl_iterate_phdr.3
mtk
VERSIONS: Supported since glibc 2.2.4.

getloadavg.3
mtk
Added VERSIONS section.

posix_openpt.3
mtk
VERSIONS: Supported since glibc 2.2.1.

printf.3
mtk after a suggestion by Mike Frysinger
Add text to the introductory part of DESCRIPTION, about the
'size' argument of snprintf() and vsnprintf().

shm_open.3
mtk
Added VERSIONS section; rewrote
info about linking with -lrt.

strcat.3
Marc Boyer
Improve the discussion of strncat().

strcpy.3
Marc Boyer
Improve the discussion of strncpy().

proc.5
  mtk
    Added discussion of /proc/sys/net/core/somaxconn.

========== Changes in man-pages-2.59 ==========

Released: 2007-06-25

Global changes

Manual pages are now standardized on American spelling. See
http://en.wikipedia.org/wiki/American_and_British_English_spelling_differences
for more information on the differences. Formerly, different pages (and
sometimes even a single page!) employed American and British spelling
conventions; best to standardize on one spelling, and American English
is the standard in Computer Science.

Changes to individual pages
---

man-pages.7
  mtk
    Note that man-pages has now standardized on American spelling
    conventions.

execve.2
getxattr.2
listxattr.2
removexattr.2
setxattr.2
signal.2
syscall.2
aio_cancel.3
bindresvport.3
stdarg.3
charmap.5
bootparam.7
ipv6.7
man.7
path_resolution.7
uri.7
nscd.8
  mtk
    Corrected minor spelling/wording mistakes (i.e., changes
    independent of fixes for American spelling).

========== Changes in man-pages-2.60 ==========

Released: 2007-06-25

Global changes

Various pages
  mtk
    Wrapped lines in some files.

Various pages
  mtk
    Change "e.g. " to "e.g., ", or in some cases, "for example, ".

Various pages
  mtk
    Change "i.e. " to i.e., ", or in some cases, "that is, ".

Various pages
  mtk
    Removed AUTHORS section.

Typographical or grammatical errors have been corrected in several
places.

Changes to individual pages
---

vfork.2
  mtk
    s/w.r.t/with respect to/

man-pages.7
  mtk
    Strengthened warning against use of AUTHORS section.

Global changes

Various pages
  mtk
    substitute `\\0' by '\\0'.

Various pages
  mtk
    s/`'/ when the thing being quoted is a character.

accept.2
bind.2
connect.2
getsockopt.2
listen.2
socket.2
socketpair.2
  mtk after a note by Martin (Joey) Schulze
    Add NOTES paragraph noting that <sys/types.h> isn't required
 by
    POSIX.1-2001 or Linux, but was required on some implementations.

accept.2
getsockname.2
recv.2
vm86.2

send.2
getgrouplist.3
memmem.3
nsswitch.conf.5
putenv.3
wprintf.3
  mtk
    Replace form `...' with \fI...\fP where the enclosed string
    is a pathname, type name, or argument name.

A few files
  mtk
    s/process' /process's/

gets.3
qsort.3
getaddrinfo.3
rpc.3
ungetwc.3
wcsnrtombs.3
capabilities.7
  mtk
    Add section number to page cross references.

time.1
bind.2
pivot_root.2
sysctl.2
  mtk
    Reordered .SH sections.

full.4
mouse.4
random.4

bootparam.7
charsets.7
glob.7
mq_overview.7

unicode.7
uri.7
utf-8.7
  mtk
    Reformatted headings

New pages
---

backtrace.3
  mtk, with input from Justin Pryzby and Stefan Puiu
    Documents backtrace(), backtrace_symbols(), and
    backtrace_symbols_fd().

New
 links
---

backtrace_symbols.3
backtrace_symbols_fd.3
  mtk
    Links to backtrace.3.

__clone.2
  Stepan Kasal
    Link to clone.2.

Changes to individual pages

Makefile
  Serge van den Boom
    Fix setting of 'prefix' macro.

eval.1p
  Benno Schulenberg
    Fix bad text (concatenated line).

chdir.2
  mtk
    Fixed description of EACCES error.
    Added sentence defining "current working directory".
    Other minor wording changes.

cfree.3

mtk
Added SEE ALSO section.

clone.2
mtk
s/clone2/__clone2/.

fdatasync.2
mtk
Minor wording changes.

fork.2
Alain Portal
Fix small wording error.

gethostid.2
Stefan Puiu / mtk
Add NOTES on what happens if gethostid() can't open /etc/hostid.

idle.2
mtk
Made NOTES text into a VERSIONS section, since that's what it
really describes.

ioperm.2
mtk
Minor wording changes.

intro.2
mtk
Rewrite to reflect the fact that the _syscallN
macros are no longer available.

io_cancel.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_destroy.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_getevents.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_setup.2
mtk
Add "Link with -laio" to SYNOPSIS.

io_submit.2
  Ivana Varekova
    Fix include in SYNOPSIS.
  mtk
    Add "Link with -laio" to SYNOPSIS.

ipc.2
  mtk
    Add semtimedop() to SEE ALSO.
    Note that some architectures don't have ipc(2); instead
    real system calls are provided for shmctl(), semctl(), etc.

killpg.2
  mtk
    Minor wording changes.

listen.2
  mtk
    Added <sys/types.h> to SYNOPSIS.

sched_setscheduler.2
  mtk
    Add NOTES para about permissions required to call
    sched_setscheduler() on other systems.

select.2
  mtk
    Noted that 'timeout' can also be changed if select()
 is
    interrupted by a signal.

setup.2
  mtk
    Remove reference to _syscall0() macro.

shmop.2
  mtk
    Changed text for EINVAL error.

socketcall.2
  mtk
    Add recvmsg() and sendmsg() to SEE ALSO.
    Note that some architectures don't have socketcall(2); instead
    real system calls are provided for socket(), bind(), etc.

swapon.2
  Ivana Varekova / mtk

Update text for EPERM error describing the maximum number of
swap files. (From downstream Fedora patch.)

write.2
mtk
Added details about seekable files and file offset.
Noted that write() may write less than 'count' bytes, and
gave some examples of why this might occur.
Noted what happens if write() is interrupted by a signal.
Minor wording changes.

__setfpucw.3
mtk
Added a CONFORMING TO section; other minor edits.

confstr.3
mtk
Minor rewrites in code example.

ctime.3
Justin Pryzby
Make SEE ALSO
refer to timegm.3

daemon.3
mtk
Small wording change.

dl_iterate_phdr.3
Michael Gehring
Comment was missing closing "*/".

dlopen.3
mtk
Formatting changes, and minor rewordings.
mtk, after a note by Serge van den Boom
Add a comment explaining the need for the rather
strange cast of the return value of dlsym().

fpclassify.3
mtk
Add "isinf" to NAME section.

getgrouplist.3
mtk
Minor rewording.

getline.3

mtk
Minor rewording, and note that '*n* is ignored
if '*lineptr' is NULL.

malloc.3
Ivana Varekova / mtk
Update description of MALLOC_CHECK_ to include description
for value 3. (From downstream Fedora patch.)

netlink.3
mtk
Added a CONFORMING TO section; other minor edits.

openpty.3
mtk
Minor changes to SYNOPSIS.

program_invocation_name.3
mtk
Shortened page title to INVOCATION_NAME.

rtnetlink.3
mtk
Added a CONFORMING
TO section; other minor edits.

scanf.3
Florian Ernst
Fix duplicated word "the".
(Really fix http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=412467 !)

select_tut.3
mtk
Small wording change.

setnetgrent.3
mtk
Added a CONFORMING TO section.

sigpause.3
mtk
Added a CONFORMING TO section.

strftime.3
Just Pryzby
Small wording fix.
mtk
Note use of "gcc -Wno-format-y2k" to avoid the "`%c' yields only

last 2 digits of year in some locales" warning.

strstr.3
  mtk
    Add "strcasestr" to NAME section.

syslog.3
  mtk
    Small wording change.

termios.3
  mtk
    Reformat SYNOPSIS.
    Added a CONFORMING TO section.

timegm.3
  mtk
    Small wording changes.

ulimit.3
  mtk
    Remove erroneous text saying that glibc does not provide
    <ulimit.h>; it does.

initrd.4
  mtk
    Various reformattings.

core.5
  mtk
    Added a sentence noting why core
 dumps named "core.PID" were useful
    with LinuxThreads.

bootparam.7
  mtk
    Fix capitalization in .SS headings.

epoll.7
  mtk
    Language clean ups.

feature_test_macros.7
  mtk
    Added SEE ALSO section.

mq_overview.7

  mtk
    Reformatted headings; minor rewrites.

sem_overview.7
  mtk
    Reformatted headings; minor rewrites.

socket.7
  Loïc Minier <lool@dooz.org>
    Document argument type for SO_REUSEADDR.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=255881

uri.7
  mtk
    Wrap long line in SYNOPSIS.

ldconfig.8
  mtk
    Added SEE ALSO section.

========== Changes in man-pages-2.62 ==========

Released: 2007-07-09

This release consists solely of formatting fixes. There are no changes
to content.

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Stepan Kasal <kasal@ucw.cz>

Apologies if
 I missed anyone!

Global changes

Many many pages
  mtk
    Many many formatting fixes.

man[013]p/*

Stepan Kasal
Add section number to .TH line for POSIX pages in man[013]p.

========== Changes in man-pages-2.63 ==========

Released: 2007-07-16

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Arnd Bergmann <arndb@de.ibm.com>
Eduardo M. Fleury <efleury@br.ibm.com>
Ivana Varekova <varekova@redhat.com>
Justin Pryzby <justinpryzby@users.sourceforge.net>
Marc Boyer <marc.boyer@enseeiht.fr>
Martin (Joey) Schulze <joey@infodrom.org>
Martin Röhricht <martin@roehricht.info>
Patrick Mansfield <patmans@us.ibm.com>
Pierre Habouzit <madcoder@debian.org>
Stepan Kasal <kasal@ucw.cz>

Apologies if I missed anyone!

Global changes
---

gettimeofday.2
madvise.2
msgctl.2
select.2
semctl.2
shmctl.2
syslog.2
stat.2
a64l.3
printf.3
termios.3
xdr.3
sd.4
mtk
Minor wording changes.

obsolete.2
syscall.2
unimplemented.2
  mtk
    Added SEE ALSO reference to syscalls.2.

New pages
----

sgetmask.2
  mtk
    A real man page for sgetmask(2) and ssetmask(2).
    (This page replaces a previous link of the same name, which
    linked to signal.2.)

spu_create.2
  Arnd Bergmann with additional work by Eduardo M. Fleury and mtk
    Document the PowerPC SPU spu_create() system call.
    (Originally taken from the kernel source file
    Documentation/filesystems/spufs.txt.)

spu_run.2
  Arnd Bergmann with additional work by Eduardo M. Fleury and mtk
    Document the PowerPC SPU spu_run() system call.
    (Originally taken from the kernel source file
    Documentation/filesystems/spufs.txt.)

spufs.7
  Arnd Bergmann with additional work by Eduardo M. Fleury and mtk
    Document the PowerPC SPU file system.
    (Originally taken from the kernel source file
    Documentation/filesystems/spufs.txt.)

Removed
 Pages

__clone.2
  mtk
    This file was created by accident in 2.61, as a copy of clone.2.
    (it should have been a link to clone.2.)

obsolete.2
  mtk
    Details on this page are covered in syscalls.2 and in
    respective syscall man pages (stat.2, uname.2).

undocumented.2
  mtk
    This page is very out of date, and in any case difficult
    to maintain. Information about undocumented system calls
    is maintained in the HOWTOHELP file, and probably in other
    places soon.

killpg.3
  mtk
    This rather incomplete page seems unnecessary since there
    is a killpg.2.

New links
----

chown32.2
fchown32.2
getegid32.2
geteuid32.2
getgid32.2
getgroups32.2
getresgid32.2
getresuid32.2
getuid32.2
lchown32.2
setfsgid32.2
setfsuid32.2
setgid32.2
setgroups32.2
setregid32.2
setresgid32.2
setresuid32.2
setreuid32.2
setuid32.2
  mtk
    Added as link to corresponding page
 without "32".

fcntl64.2
fstat64.2
fstatat64.2
fstatfs64.2
ftruncate64.2
getdents64.2
lstat64.2
pread64.2

pwrite64.2
sendfile64.2
stat64.2
statfs64.2
truncate64.2
  mtk
    Added as link to corresponding page without "64".

__clone2.2
clone2.2
  mtk
    Links to clone.2.

ugetrlimit.2
  mtk
    Link to getrlimit.2.

mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2
  mtk
    Added as links to corresponding section 3 pages.

fadvise64.2
fadvise64_64.2
  mtk
    Links to posix_fadvise.2.

rt_sigaction.2
rt_sigpending.2
rt_sigprocmask.2
rt_sigtimedwait.2
  mtk
    Added as link to corresponding page without "rt_" prefix.

rt_sigqueueinfo.2
  mtk
    Link to sigqueue.2.

madvise1.2
tuxcall.2
vserver.2
  mtk / Ivana Varekova
    Link to unimplemented.2.

Changes to individual pages
---

access.2
  mtk
    Fairly substantial rewrites of various parts,
    and a few additions.

chmod.2

 mtk
    Update SYNOPSIS to reflect the fact that fchmod(2) needs
    either "#define _XOPEN_SOURCE 500" or "#define _BSD_SOURCE".

chown.2
  mtk
    Update SYNOPSIS to reflect the fact that fchmod(2) and lchown(2)
    need either "#define _XOPEN_SOURCE 500" or "#define _BSD_SOURCE".
    Added an example program.

killpg.2
  mtk
    Note that killpg() is actually a library function on Linux.

mmap.2
  mtk
    Added note that glibc mmap() wrapper nowadays invokes mmap2().

mmap2.2
  Ivana Varekova / mtk
    On most platforms the unit for 'offset' is 4096 bytes, not
    the system page size.
  mtk
    Rewrote NOTES to note that glibc mmap() wrapper nowadays
    invokes this system call.
  mtk
    Added an EXAMPLE program.

oldfstat.2
oldlstat.2
oldstat.2
  mtk
    Changed link to point to stat.2 (instead of obsolete.2).

olduname.2
oldolduname.2
  mtk
    Changed link to point to uname.2 (instead of obsolete.2).

sched_setaffinity.2
Martin Röhricht
Added _GNU_SOURCE to SYNOPSIS.

semctl.2
mtk
Remove reference discussion of ipc(2), since none of the
other System V IPC pages mention ipc(2).

semop.2
mtk
Add an example code segment.

shmctl.2
mtk
Add svipc(7) to SEE ALSO list.

sigaction.2
mtk
Reformatted tables as lists; other minor reformattings and
wording changes.

sigqueue.2
mtk
Added info on rt_sigqueueinfo(2).

sigwaitinfo.2
mtk
Noted that sigwaitinfo() is a library function implemented on
top of sigtimedwait().

ssetmask.2
mtk
Make this link point to new sgetmask.2 instead of signal.2.

stat.2
mtk
Add notes on the different system call interfaces that
have appeared over time.

syscalls.2
mtk
A fairly substantial rewrite of this page,
bringing it up to date with the current
kernel version, and listing all system calls
in

tabular form.

uname.2
  mtk
    Add notes on the different system call interfaces that
    have appeared over time.

unimplemented.2
  mtk
    Add vserver, madvise1 to NAME line.
    Removed SEE ALSO reference to obsolete.2.
  Ivana Varekova
    Add tuxcall to NAME line.

mktemp.3
  Patrick Mansfield
    Fix description of return value.

strcat.3
  Marc Boyer
    Minor fix to example program.

undocumented.3
  mtk
    Add section numbers to function names; remove some functions
    since they are documented.

proc.5
  mtk
    Update/correct text on /proc/malloc.
  mtk, after a note by Pierre Habouzit, and a few comments by Justin Pryzby
    Update description of /proc/PID/stat to match 2.6.21.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=417933

inotify.7
  mtk
    IN_DONT_FOLLOW and IN_ONLYDIR are only available from 2.6.15.

signal.7
  Stepan Kasal / mtk
    Note SIGRTMIN value depends on glibc.
   mtk
    Various rewrites and additions to the text in real-time signals.
    Add SEE ALSO reference to sgetmask.2.

svipc.7
  mtk
    Add ipc(2) to SEE ALSO.

      Added/updated feature test macro requirements for
      glibc; see feature_test_macros.7 for details.

Changes to individual pages
---

mq_notify.2
mq_open.2
mq_timedreceive.2
mq_timedsend.2
mq_unlink.2
  mtk
     Fix broken link

setpgid.2
  mtk
     Fairly substantial changes and corrections, including adding
     coverage of all of the interfaces that get/set PGIDs.

syscalls.2
  mtk / aeb
     Various rewordings; clear up some imprecisions.

lgamma.3
  mtk

 Added 'signgam' to SYNOPSIS and NAME line.

strerror.3

mtk
Note that the XPG version is provided since glibc 2.3.4.
The page formerly said that the GNU-specific version
is provided by default. That certainly isn't true
nowadays, since _POSIX_C_SOURCE is set to 200112L by
default, so that the XSI-compliant version is supplied
by default.

man-pages.7
mtk
Added note pointing to feature_test_macros.7 for a description
of how feature test macro requirements should be specified in
manual pages. Various other minor fixes and changes.

feature_test_macros.7
mtk
Added note about how feature test macros are specified
in manual pages.
Many other corrections, improvements, additions, and
details about differences across glibc versions.

Global changes

Typographical or grammatical errors have been corrected in several
places.

Various pages
  mtk
    Use 'glibc' consistently to refer to GNU C library.

Various pages
  mtk
    Order errors under ERRORS alphabetically.

Various pages
  Nicolas François
    Spelling and formatting fixes, as per
    http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=439560

intro.2
select.2
fmtmsg.3
getgrent_r.3
envz_add.3
rtime.3
strptime.3
wordexp.3
  Maxime Vaudequin
    Add "#include <stdlib.h>" (to declare exit(3)) to example program.

New pages

---

timeradd.3
  mtk
    Description of timeradd(), timersub(), timerclear(),
    timerisset(), timercmp() macros for operating on
    struct timeval.

Removed pages
---

fdatasync.2
  mtk
    Somehow, over time, material on fdatasync(2) crept into
    fsync.2, and fdatasync also got added to the NAME section
     of fsync.2. All of the material in fdatasync.2 that was
    not already in fsync.2 has now been moved there, and
    the former page has been removed.
    In place of the content there, is now a link to fsync.2.

New links
---

clock_getres.2
clock_gettime.2
clock_settime.2
  mtk
    Link to man3/clock_getres.3.

fdatasync.2
  mtk
    Link to fsync.2.

fdopendir.3
  mtk
    Link to opendir.3.

gethostbyaddr_r.3
  Mats Wichmann
    Link to gethostbyaddr.3.

timerclear.3
timercmp.3
timerisset.3
timersub.3
  mtk

Links to new timeradd.3.

Changes to individual pages

Makefile
  Mike Frysinger
    Make the install target of man-pages respect the standard
    "DESTDIR" variable as well as check the exit status of the
    install command so errors aren't ignored.

get_mempolicy.2
  Lee Schermerhorn
    changed the "policy" parameter to "mode" through out the
    descriptions
 in an attempt to promote the concept that the memory
    policy is a tuple consisting of a mode and optional set of nodes.

    added requirement to link '-lnuma' to synopsis

    rewrite portions of description for clarification.

    added all errors currently returned by sys call.

    removed cautionary note that use of MPOL_F_NODE|MPOL_F_ADDR
    is not supported. This is no longer true.

    added mmap(2) to SEE ALSO list.

getitimer.2
  mtk
    Since kernel 2.6.22, Linux setitimer() now conforms to POSIX.1,
    giving an EINVAL error for a non-canonical tv_usec value.

gettimeofday.2
  mtk
    Replace discussion of timer* macros with a pointer
    to new page timeradd.3.

ioctl_list.2
  Nicolas George
    Fixed argument type for BLKGETSIZE.

mbind.2
  Lee Schermerhorn

    changed the "policy" parameter to "mode" throughout the

descriptions in an attempt to promote the concept that the memory policy is
a tuple consisting of a mode and optional set of nodes.

rewrite portions of description for clarification.

clarify interaction of policy with mmap()'d files and shared memory regions, including SHM_HUGE regions.

defined how "empty set of nodes" specified and what this means for MPOL_PREFERRED.

mention what happens if local/target node contains no free memory.

clarify semantics of multiple nodes to BIND policy. Note: subject to change. We'll fix the man pages when/if this happens.

added all errors currently returned by sys call.

added mmap(2), shmget(2), shmat(2) to SEE ALSO list.

mmap.2
mprotect.2
François Diakhate
Add text noting that PROT_WRITE may (and on x86 does) imply PROT_READ.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=441387

nfsservctl.2
Aleksandr Koltsoff
Fix prototype.

oldfstat.2
oldlstat.2
oldstat.2
mtk
Fix broken link

prctl.2
mtk
Update arches/kernel versions for PR_SET_UNALAIGN / PR_GET_UNALIGN.

readahead.2
mtk
Removed SEE ALSO reference to nonexistent fadvise.2.

reboot.2
  mtk
    Place SYNOPSIS comments inside C comments (/* ... */).

sched_setaffinity.2
  Samuel Thibault
    Note what thread is affected if 'pid' is specified
    as 0, or as the value returned by getpid().

sched_setscheduler.2
  Carsten Emde
    Add text on real-time features of mainline Linux kernel.

select_tut.2
  mtk
    sync SYNOPSIS with select.2

set_mempolicy.2
  Lee Schermerhorn

    changed the "policy" parameter to "mode" throughout the
    descriptions in an attempt to promote the concept that the memory
    policy is a tuple consisting of a mode and optional set of nodes.

    added requirement to link '-lnuma' to synopsis

    rewrite portions of description for clarification.

     clarify interaction of policy with mmap()'d files.

      defined how "empty set of nodes" specified and what this
      means for MPOL_PREFERRED.

      mention what happens if local/target node contains no
      free memory.

      clarify semantics of multiple nodes to BIND policy.
      Note: subject to change. We'll fix the man pages when/if
          this happens.

    added all errors currently returned by sys call.

    added mmap(2) to SEE ALSO list.

sigaction.2
  mtk
    s/si_sign/si_errno/ in statement about which field is unused.

Ari Entlich
s/SIGILL/SIGCHLD/ for paragraph describing SIGCHLD.

stat.2
mtk
Improve text describing underlying system calls.

swapon.2
Michael Prokop
EINVAL also occurs if target path is on tmpfs or similar.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435885

sync.2
mtk
Incorporated material from now deleted fdatasync.2.

syscall.2
mtk
Small fix in example program.

uname.2
mtk
Improve text describing underlying system calls.

utime.2
Vincent Lefevre / mtk
Clarify utimes() behaviour when 'times' is NULL.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=431480
mtk
Other minor clarifications of description of utimes().

copysign.3
Vincent Lefevre
s/sign/sign bit/ to remove ambiguity in description.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435415

euidaccess.3
mtk
Changed NOTES to VERSIONS.

ffsl.3
mtk
Add ffsl and ffsll to NAME line.

fts.3
mtk
Removed statement that fts functions are expected to appear
soon in POSIX; it's years old and has not yet come to pass.

ftw.3
  mtk / Geoff Clare
    Fixes/improvements for example program.

getdate.3
  mtk
    Add getdate_r to NAME section.

getaddrinfo.3
  mtk / Geoff Clare
    Fixes/improvements for example
 program.

gethostbyaddr.3
  Mats Wichmann
    Add documentation for gethostbyaddr_r().
    Plus a few other small fixes.

gethostbyname.3
  mtk
    Add gethostbyname2, gethostbyname2_r, gethostbyname_r,
    gethostent_r to NAME line.

getmntent.3
  mtk
    Fix misnamed function references.

getopt.3
  Jon Burgess
    Fix small error in example program.

getrpcent.3
  mtk
    Add setrpcent and endrpcent to NAME line.

gsignal.3
  Aleksandr Koltsoff
    Fix gsignal() prototype.

hsearch.3
  mtk
    Add hcreate_r, hdestroy_r, hsearch_r to NAME line.

inet.3
  Maxime Bizon
    Correct definition of "struct in_addr".

isatty.3
  mtk
    Minor wording fix.

isgreater.3
  mtk
    Add islessequal to NAME line.

lgamma.3
  Vincent Lefevre
    Fix CONFORMING TO section.
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=417592

log1p.3
  mtk
    Add log1pf and log1pl to NAME line.

longjmp.3
  Paul Brook
 / mtk
    After a call to longjmp(), the values of modified, non-volatile
    variables in the function that called setjmp() are unspecified.

makecontext.3
  Aleksandr Koltsoff
    Fix makecontext() prototype.

malloc.3
  mtk / Tolga Dalman
    Explain what happens for malloc(0), or calloc() where one of the
    arguments is 0.
  mtk
    Added notes on malloc()'s use of sbrk() and mmap().
  mtk
    Add mmap(2), alloca(3) to SEE ALSO.

mq_close.3
mq_getattr.3
mq_notify.3
mq_open.3
mq_receive.3
mq_send.3
mq_unlink.3
  mtk
    Add "Link with -lrt." to SYNOPSIS.

opendir.3
  Ulrich Drepper; some edits and additional text by mtk

Document fdopendir().

readdir.3
mtk, after a note by Andi Kleen
Document DT_* constants for d_type.
Ulrich Drepper / mtk
Rework discussion of non-standard structure fields.

sem_wait.3
mtk
Minor improvements to example program.

syslog.3
mtk
Add vsyslog to NAME
section.

termios.3
Nicolas François
Fix XCASE feature test macro description.

wcsspn.3
Aleksandr Koltsoff
Add return type to prototype.

proc.5
mtk
Improve description of num_threads field under /proc/PID/stat.
Maxime Vaudequin
Fix path error (s%proc/sys%proc/sys/kernel%) in mentions of
/proc/sys/ostype, /proc/sys/osrelease and proc/sys/version.
Maxime Vaudequin
I noticed things to correct and to clarify in subsection
"/proc/filesystems" of proc.5:
- clarify filesystems listing: not only FS compiled
into the kernel, also FS kernel modules currently loaded
- add a reference to fs(5)
- add an explanation for FS marked with "nodev"
- s/mount(1)/mount(8)/, also corrected in section "SEE ALSO"
- clarify usage by mount: the current wording may lead to
think /proc/filesystems is always used by mount when no FS
is specified. So, usage of "may" which
IMHO is more
appropriate + additional explanations
In mount(8) we can see:

If no -t option is given, or if the auto type is
specified, mount will try to guess the desired type.

If mount was compiled with the blkid library, the
guessing is done by this library. Otherwise, mount
guesses itself by probing the superblock; if that
does not turn up anything that looks familiar,
mount will try to read the file /etc/filesystems,
or, if that does not exist, /proc/filesystems.
All of the filesystem types listed there will be
tried, except for those that are labeled "nodev"
(e.g., devpts, proc and nfs). If /etc/filesystems
ends in a line with a single * only, mount will
read /proc/filesystems afterwards.

Samuel Thibault

Since linux 2.6.11, /proc/stat has an eighth value
for cpu
lines: stolen time, which is the time spent in other operating
systems when running in a virtualized environment.

arp.7

Updated BUGS text referring to jiffies; refer to time.7 instead.

credentials.7

mtk

Add words to note that file system ID is Linux specific.

hier.7

Maxime Vaudequin

This is some corrections for hier.7:
- missing period for /media and /mnt
- /mnt description is not totally correct, it is true for some
distributions but in others /mnt is used as a temporary FS
mount point, as it is specified by FHS:
http://www.pathname.com/fhs/pub/fhs-2.3.html#MNTMOUNTPOINTFORATEMPORARILYMOUNT
- s/X-Windows/X-Window/ (3 occurrences)
- section "SEE ALSO": s/mount(1)/mount(8)/

man-pages.7

man.7

mdoc.7

mdoc.samples.7

mtk / Nicolas François

Nowadays tmac.XXX are called XXX.tmac.

pthreads.7

mtk

Update text about modern threading implementations

(NPTL vs LinuxThreads).

socket.7
  mtk, after a note by Andi Kleen
      Clarify that SO_SNDTIMEO and SO_RCVTIMEO only have effect for
      socket I/O calls; not for multiplexing system calls like
      select() and poll().

time.7
  mtk
      Add SEE ALSO reference to new timeradd.3.

========== Changes in man-pages-2.66 ==========

Released: 2007-10-01

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Amit K. Arora <aarora@linux.vnet.ibm.com>
David Chinner <dgc@sgi.com>
Fredrik Noring <noring@nocrew.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Maxime Vaudequin <maxime.vaudequin@gmail.com>
Ollie Wild <aaw@google.com>
Ulrich Drepper <drepper@redhat.com>

Apologies if I missed anyone!

Global changes

Typographical or grammatical errors have been corrected in several
places.

New pages
---

fallocate.2
  David Chinner, with some
 input from Amit Amora and mtk
      Describes the fallocate() system call, new in 2.6.23.

Changes to individual pages
---

close.2
  Fredrik Noring
    Add text cautioning about use of close() in
    multithreaded programs.

execve.2
  Ollie Wild / mtk
    Add text describing limit on total size of argv + envp,
    and changes that occurred with 2.6.23.
  mtk
    Add getopt(3) to SEE ALSO list.

open.2
  mtk, Acked by Ulrich Drepper
    Added description of O_CLOEXEC (new in 2.6.23) + other
    minor fixes for O_DIRECT.

recv.2
  mtk
    Added description of MSG_CMSG_CLOEXEC (new in 2.6.23).

sysctl.2
  mtk
    Strengthened the warning against using this system call
    and note that it may disappear in a future kernel version.

rpc.3
  Mats Wichmann
    Fix type definition for 'protocol' in prototypes of pmap_set()
    and pmap_getport().

========== Changes in man-pages-2.67 ==========

Released:
 2007-10-08

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Andrew Josey <a.josey@opengroup.org>
Maxime Vaudequin <maxime.vaudequin@gmail.com>

Apologies if I missed anyone!

Global changes
---

*.1p
*.3p
  mtk, after a note by Andi Kleen and consultation with Andrew Josey.
    Add a PROLOG section:
      This manual page is part of the POSIX Programmer's Manual.
      The Linux implementation of this interface may differ
      (consult the corresponding Linux manual page for details
      of Linux behavior), or the interface may not be implemented
      on Linux.

*.0p
*.1p
*.3p
  mtk
    Some formatting fixes, mostly to get rid of unwanted
    spaces before "," in formatted output.

*
/
  mtk
    Change all occurrences of my email address in man-pages source
    to
 my new gmail address.

Many many pages
  Maxime Vaudequin
    I noticed useless use of macros with alternating formatting
    (".IR" instead ".I" which suffices, ".BR" instead ".B", etc.)
    because there is only one element. For example in ldconfig.8:

      -.BR /sbin/ldconfig
      +.B /sbin/ldconfig

    This is not very important, it only makes the sources more tidy.
    To find these I used:

      egrep '^\.(B[RI]|R[IB]|I[RB]) ([^]+|\"[^\"]\+\")$'

And if you want to make these changes, you can use:

```
sed 's/^\(\.[BRI]\)[BRI]\( \([^ ]\+\|\"[^\"]\+\"\)\)$/\1\2/g'
```

Global changes
---

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
readlinkat.2
renameat.2

symlinkat.2
mkfifoat.3
  mtk, after http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=445436
    by Timo Juhani Lindfors
    Added <fcntl.h> to SYNOPSIS.

Typographical or grammatical errors have been corrected in several places.

New pages

_syscall.2
  mtk
    Created as a new page, by taking the content specific to
    the _syscall() macros from intro(2).

Changes to individual pages

README
   mtk
    Brought up to date.

man-pages-*-Announce
  mtk
    Brought the info in here up to date.

intro.1
  mtk
    Added intro paragraph about section, plus a paragraph
    about exit status values.
    Move "user intro" text to NOTES.

get_mempolicy.2
  mtk
    Reorder ERRORS sections alphabetically

intro.2
  mtk
    Pretty much a complete rewrite, covering some additional topics.
    Moved _syscallN() material to new _syscall(2) page.

mbind.2
  mtk
    Reorder ERRORS sections alphabetically

mmap.2
  Maxime Vaudequin
    Fix syntax error in example program.

prctl.2
  mtk
    Linux 2.6.22 added support on Alpha for PR_SET_UNALIGN.

ptrace.2
  Nicolas François / mtk
    s/PTRACE_POKEUSR/PTRACE_POKEUSER/
    s/PTRACE_PEEKUSR/PTRACE_PEEKUSER/

read.2
  mtk / Geoff Clare
    Add text describing timerfd EINVAL error for read(2).

set_mempolicy.2
  mtk
    Reorder ERRORS
 sections alphabetically

syscall.2
  mtk
    Added _syscall(2) and intro(2) to SEE ALSO section.

syscalls.2
  mtk
    Added fallocate(2); removed timerfd(2).

sysinfo.2
  mtk
    Removed reference to example in intro(2).

dlopen.3
  mtk
    Added "Link with -ldl." to SYNOPSIS.

getaddrinfo.3
  Ulrich Drepper / mtk
    Remove references to getipnodebyname.3 and getipnodebyaddr.3.

gethostbyname.3
  mtk / Ulrich Drepper
    Remove SEE ALSO references to getipnodebyname.3 and
    getipnodebyaddr.3.

  Pádraig Brady / mtk / Ulrich Drepper

Point out that the functions described on this page
are made obsolete by getaddrinfo(3) and getnameinfo(3).

getipnodebyname.3
mtk
Clarify that glibc does not implement these functions.

glob.3
Ulrich Drepper / mtk
Fix description of GLOB_ONLYDIR.
mtk
Added description of GLOB_TILDE_NOMATCH.
Expanded the description of various flags.
Various
wording fixes..

intro.3
mtk
Pretty much a complete rewrite, covering some additional topics.

posix_fallocate.3
mtk
Add SEE ALSO referring to fallocate.2.

rpc.3
Sam Varshavchik
Add some arg declarations to prototypes; fix typos.

setbuf.3
Mike Frysinger
Fix text in BUGS section.

sigset.3
mtk
The sigset() bugs were fixed in glibc 2.5.
See http://sourceware.org/bugzilla/show_bug.cgi?id=1951

intro.4
mtk
Minor rewrites.

st.4
Maxime Vaudequin
Various small corrections, formattings and modifications.

elf.5
Mike Frysinger
Document:

- new p_flag: PT_GNU_STACK
- new sections: .gnu.version .gnu.version_d .gnu.version_r
  .note.GNU-stack
- new structures: ElfN_Verdef ElfN_Verdaux ElfN_Verneed
  ElfN_Vernaux

intro.5
  mtk
    Minor rewrites.

proc.5
  Ivana Varekova / mtk
    Add text noting that since kernel 2.6.16, /proc/slabinfo is
    only available if CONFIG_SLAB is enabled.
  Maxime Vaudequin
    Update description of /proc/pci.
  Maxime Vaudequin
    Give italic formatting to file names in proc.5.
  mtk
    The display type of the /proc/PID/stat fields changed
    %lu to %u in Linux 2.6.22:
      flags
      rt_priority
      policy

slabinfo.5
  Ivana Varekova / mtk
    Add text noting that since kernel 2.6.16, /proc/slabinfo is
    only available if CONFIG_SLAB is enabled.

intro.6
  mtk
    Minor rewrites.

bootparam.7
  Maxime Vaudequin
    Update references to files in kernel "Documentation" directory.

intro.7
  mtk
    Minor rewrites.

ipv6.7
  Andrew McDonald
    Fix description of IPV6_ROUTER_ALERT option.

standards.7
  mtk

Note online location of C99 standard.

intro.8
  mtk
    Some rewrites, plus new paragraph on exit status values.

Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes
----

*.[013]p
  mtk
    Many whitespace clean-ups in formatted output.

mprotect.2
bind.2
mq_notify.3
makecontext.3
fmemopen.3
  David Härdeman / mtk

Rename error handling function in example program
(s/die/handle_error/).

Typographical or grammatical errors have been corrected in several places.

Removed
pages

HOWTOHELP
MAINTAINING
  mtk
    The content of these files is now available in HTML format.

New links
---

cfsetspeed.3
  mtk
    Link to termios.3.

Changes to individual pages
---

time.1
  Alain Portal
    Added "Linux User's Manual" to .TH line.

_syscall.2
  aeb / mtk
    Remove outdated text about pointer blocks for syscalls that have
    more than 5 arguments.

fcntl.2
  J. Bruce Fields
    Add warning that mandatory locking is unreliable.
  J. Bruce Fields
    Clarify details in description of file leases.
  J. Bruce Fields / mtk
    Minor wording edits.
  J. Bruce Fields
    Add F_GETLEASE under RETURN VALUE.

mmap.2
  mtk
    Handle errors using a custom handle_error() macro.

sched_setscheduler.2
  Mats Wichmann
    Add BUGS text noting that the return value from Linux
    sched_setschuler() does not conform to POSIX.

spu_create.2
  Jeremy Kerr
     Various updates and improvements.
  Luke Browning
    Refinement of text describing a "gang".
  mtk
    Minor edits.

spu_run.2
  Jeremy Kerr
    Various updates and improvements.
  mtk
    Minor edits.

err.3
  mtk
    Remove HISTORY section.

fopen.3
  Mike Frysinger
    Document 'e' (close-on-exec) option, new in glibc 2.7.

getloadavg.3
  Alain Portal / mtk
    Remove HISTORY section.

printf.3
  Andries E. Brouwer / mtk
    Fix the discussion of stdarg macros in the description of
    vprintf() description.

sem_wait.3
  mtk
    Handle errors using a custom handle_error() macro.

sigsetops.3
  Mats Wichmann
    Note that sigset_t objects must be initialized
    with sigemptyset() or sigfillset() before the other
    macros are employed.

termios.3

mtk, after a note by Alain Portal
Added cfsetspeed() to SYNOPSIS. Added text under CONFORMING TO
noting that cfsetspeed() is BSD specific.

ttyslot.3
Alain Portal
Various references to "getty" were changed to "mingetty", since
that is the manual page more likely to be found on current
systems. (Completes changes that were made in man-pages-2.44.)

initrd.4
mtk, after a note by Alain Portal
Move "Configuration" section to top of page (like other
section 4 pages) and make it a .SH section.

full.4
mtk
Re-ordered CONFIGURATION section to go before DESCRIPTION.

sk98lin.4
Maxime Vaudequin
Fix reference to kernel Documentation file.

elf.5
mtk
Renamed HISTORY section to NOTES, and removed BSD specific info.

proc.5
Maxime Vaudequin
Mention grub(8) in same sentence as lilo(8).
Maxime Vaudequin
Improve description of /proc/sys/abi and
/proc/sys/kernel/modprobe.

utmp.5
Alain Portal
Various references to "getty" were changed to "mingetty", since
that is the manual page more likely to be found
on current
systems. (Completes changes that were made in man-pages-2.44.)

iso_8859-2.7
Adam Borowski
Reverse the 2.68 change applied by mtk in response to
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=445085
that replaced "Sorbian" with "Serbian".
(Sorbian is a language of 50000 people in Brandenburg.)

man-pages.7
  mtk
    Added CONFIGURATION to list of "standard" section names.

spufs.7
  Jeremy Kerr
    Various updates and improvements.
  mtk
    Minor edits.

tcp.7
  Maxime Vaudequin
    Fix reference to kernel Documentation file.

========== Changes in man-pages-2.70 ==========

Released: 2007-12-06

Global changes

Many pages
  mtk
    Remove section numbers for page references where the
    reference refers to the page itself. (This stops man2html
    producing links from a page back to itself.)

Typographical or grammatical errors have been corrected
 in several places.

Changes to individual pages
---

get_mempolicy.2
  mtk
    Add CONFORMING TO section.

io_getevents.2
  mtk
    Remove redundant SEE ALSO entry.

mbind.2
  mtk
    Add CONFORMING TO section.

msgop.2
  mtk
    Remove redundant SEE ALSO entries.

sigprocmask.2
  mtk
    Remove redundant SEE ALSO entry.

splice.2
  mtk
    Remove redundant SEE ALSO entry.
    Add SEE ALSO referring to vmsplice(2).

csin.3
  mtk
    Remove redundant SEE ALSO entry.
    Add SEE ALSO referring to ccos(3).

gethostbyname.3
  mtk
    Add gethostbyaddr_r to NAME section.

rint.3
  mtk
    Remove redundant SEE ALSO entry.

sigsetops.3
  mtk
    Minor rewording.

epoll.7
  mtk
    Minor rewording.

========== Changes in man-pages-2.71 ==========

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated
 in changes in this release:

Alain Portal <aportal@univ-montp2.fr>

John Sigler <linux.kernel@free.fr>
Josh Triplett <josh@freedesktop.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Pascal MALAISE <malaise@magic.fr>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes
---

err.3
fts.3
getloadavg.3
queue.3
rcmd.3
rexec.3
stdin.3
elf.5
operator.7
  mtk
    Replaced the use of mdoc macros on these pages with man
    macros. The only pages in man-pages that still use
    mdoc macros are mdoc.7 and mdoc.samples.7.

Typographical or grammatical errors have been corrected in several places.

Deleted pages

TODO
  mtk
    This information is now on the website.

Changes to individual pages

Changes.old
  mtk
    Reformat various change log entries to use a consistent format.
    Expand Debian bug report numbers to be URLs.
    Other minor tidy-ups.

fcntl.2
  mtk

Document the F_DUPFD_CLOEXEC operation, which is
new in kernel 2.6.24.

listen.2
Josh Triplett
Fix incorrect path for somaxconn.

getpw.3
Alain PORTAL
Add ENOENT error to ERRORS.

sysconf.3
Mats Wichmann
Add documentation of _SC_NPROCESSORS_CONF and _SC_NPROCESSORS_ONLN.

tty.4
John Sigler
Add tty_ioctl(4) to SEE ALSO list.

regex.7
Pascal MALAISE <malaise@magic.fr>
Separate text on back references from that describing basic regexps,
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=379829.
mtk
Remove crufty text about word boundaries.

========== Changes in man-pages-2.72 ==========

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Bert Wesarg <bert.wesarg@googlemail.com>
Maxime
Vaudequin <maxime.vaudequin@gmail.com>
Rob Weryk <rjweryk@uwo.ca>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

Global changes

Various pages
  Alain PORTAL / mtk
    Format include files consistently (".I <.*\.h>").

Various pages
  Alain PORTAL / mtk
    Format pathname in italics (.I).

dbopen.3
mpool.3
recno.3
  Alain PORTAL
    Remove brackets ([]) around error names.

console.4
tty.4
ttyS.4
issue.5
ttytype.5
utmp.5
  mtk / Maxime Vaudequin
    Some systems have mingetty(8), others have agetty(8), so both
    should be mentioned when we are talking about getty-style programs.

Typographical or grammatical errors have been corrected in several places.

Renamed pages
---

filesystems.5
  mtk / Alain PORTAL
    Was previously fs.5

New links
---

argz.3
  Bert Wesarg / mtk
    Link to argz_add.3.

envz.3

Bert Wesarg / mtk
Link to envz_add.3.

fs.5
mtk / Alain PORTAL
Link to filesystems.5.

Changes to individual pages
---

readahead.2
Rob Weryk
Fix declaration of 'offset' in SYNOPSIS.

seteuid.2
mtk
s/SETGUID/SETEUID/ in .TH line.

__setfpucw.3
mtk
Fixed include files references / formatting.

abort.3
mtk, after a note by Alex Tuninga
A fairly significant rewrite to clarify operation of abort().

argz_add.3
Bert Wesarg / mtk
s/envz/envz_add/ in SEE ALSO.

basename.3
mtk
s/DIRNAME/BASENAME/ in .TH line, and swap function names
in NAME section.

envz_add.3
Bert Wesarg / mtk
s/argz/argz_add/ in SEE ALSO.

flockfile.3
mtk
s/LOCKFILE/FLOCKFILE/ in .TH line.

getgrent_r.3
mtk
s/GETGRENT/GETGRENT_R/ in .TH line.

stdio.3
  Sam Varshavchik
    Reformat function list at end of page as a proper table.

ttyslot.3
  Maxime Vaudequin
    Revert earlier s/getty/mingetty/. This page talks about
    historical
 behavior, and that means "getty(8)".

undocumented.3
  mtk
    Remove reference to "obstack stuff"; it's not clear what
    that is about.

console_ioctl.4
  mtk
    s/CONSOLE_IOCTLS/CONSOLE_IOCTL/ in .TH line.

proc.5
  mtk
    s/fs (5)/filesystems (5)/

man-pages.7
  mtk / Alain PORTAL
    Improve discussion of formatting of file names.

========== Changes in man-pages-2.73 ==========

Released: 2007-12-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Pádraig Brady <P@draigBrady.com>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

Global changes

Various pages
  Alain PORTAL
    Formatting fixes.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages
---

mknod.2
  mtk, after a report
 by Reuben Thomas
    Clarify use of mkfifo() versus mknod().
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455825

fgetgrent.3
  mtk
    Small rewording.

fgetpwent.3
  mtk
    Small rewording.

rcmd.3
  mtk
    Noted feature test macro requirements.
    BUGS: noted that iruserok() is not declared in glibc headers.

filesystems.5
  mtk
    Added Reiserfs, XFS, JFS to list of file systems.

========== Changes in man-pages-2.74 ==========

Sam Morris <sam@robots.org.uk>
Sam Varshavchik <mrsam@courier-mta.com>
Samuel Thibault <samuel.thibault@ens-lyon.org>

Apologies if I missed
anyone!

Global changes

Various pages
  Alain PORTAL
    Formatting fixes.

Various pages
  mtk / Alain Portal
    s/``..."/"..."/

Various pages
  mtk
    s/epoch/Epoch/

Various pages
  mtk
    Make the standard indent for code samples, shell session
    logs, etc. to be ".in +4n".

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

_syscall.2
  mtk
    Nowadays there is _syscall6() also.

chroot.2
  mtk
    Various minor formatting changes.

epoll_wait.2
  mtk
    Fix types in structs.

Formatting fixes.

mount.2
mtk, after a note by Sam Morris
Clarify that MS_NODIRATIME provides a subset of the
functionality provided by MS_NOATIME.

sched_setaffinity.2
mtk
Minor rearrangement of text.

select_tut.2
mtk
Fix (my) typos in argument names.
Formatting fixes.

spu_create.2
Jeremy
Kerr
We can use context FDs for the dirfd argument to the *at() syscalls.

times.2
mtk, after a note from David Brown and Andrew Morton
http://marc.info/?l=linux-kernel&m=119447727031225&w=2
Rework the text describing the return value to be closer
to the requirements of POSIX.1; move Linux details
to NOTES and add a warning not to rely on those details.
Add a warning about the -1 to -4095 bug which results
in a 41 second window where the glibc wrapper will wrongly
return -1 indicating an error.
mtk
Remove cruft HZ text.
Clarify text describing return value of clock(3).

getw.3
Mats Wichmann
CONFORMING TO: getw() and putw() were in SUSv2, but are not
in POSIX.1-2001.

hash.3
mtk / Alain Portal
Minor rewordings + formatting fixes.

st.4
Alain Portal / mtk
Many formatting fixes.
mtk
Place ERRORS in alphabetical order.

vcs.4
  Samuel Thibault
     Document VT_GETHIFONTMASK (new in 2.6.18) and add to example program;
     attribute/text characters are in the host byte order.
     as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=456437
  mtk
     Minor edits.

bootparam.7
  Alain PORTAL
     Formatting fixes.

inotify.7
  mtk
     Minor heading changes and reformattings.

man-pages.7
  mtk
     Note that code segments, structure definitions, shell session
     logs, should be indented by 4 spaces.

spufs.7
  Jeremy Kerr
     Add a little information about the differences to mbox.

Apologies if I missed anyone!

Global changes

Various pages
  mtk
    (Grammatical) hyphenation was fixed in many places.

epoll_wait.2
mbind.2
spu_run.2
ecvt.3
fmtmsg.3
getnameinfo.3
rtc.4
proc.5
charsets.7
ip.7
ipv6.7
raw.7
uri.7
  Justin Pryzby / mtk
    Fix incorrect usage of "a" and "an" before following vowel /
    consonant, by reviewing the output of the following scripts:

        for a in $(wc */*.? | awk '$1 > 10 {print $4}' | gv total); do
            echo $a
            MANWIDTH=4000 man -l $a 2>/dev/null |
                egrep '(^|)an [^aeiou][a-z]'
        done | less

        for a in $(wc */*.? | awk '$1 > 10 {print $4}' | gv total); do
            echo $a
            MANWIDTH=4000 man -l $a 2>/dev/null
|
                egrep '(^|)a [aeiou][a-z]'
        done| less

err.3
fts.3
queue.3
rcmd.3
rexec.3
stdin.3

elf.5
  mtk, after a note by Alain Portal
      Improve macros used in 2.71 to convert from "mdoc" to "man".

_exit.2
chroot.2
getgid.2
getpid.2
getrusage.2
getsid.2

    Various reformattings.

Various pages
  Alain Portal
    Formatting fixes.

mlock.2
mprotect.2
mpool.3
offsetof.3
  Alain Portal

Format SYNOPSIS in a manner consistent with other pages.

Various pages
  mtk / Alain Portal
    Format casts so that there is a non-breaking space after the
    type, and remove unnecessary parentheses around the casted value.
    Thus, for example, the following:

        .IR "(size_t) (\-1)" .

    becomes:

        .IR "(size_t)\ \-1" .

Various pages
  mtk / Alain Portal
    Replace "-" by "\-" where a real dash is required.

Various pages
  mtk
    Make the formatting of instances of '*varname' consistent, changing
    instances such as:

         .RI * varname

    to:

        .I *varname

pciconfig_read.2

getgrouplist.3
getttyent.3
key_setsecret.3
mtrace.3
tcgetpgrp.3
tcgetsid.3
ttyslot.3
tty_ioctl.4
  mtk
    Remove extraneous .sp macros.

fcntl.2
outb.2

send.2
syscalls.2
getopt.3
proc.5
man-pages.7
standards.7
tcp.7
  mtk
    Remove/replace extraneous .sp macros.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages

_syscall.2
  mtk
    Nowadays there are seven macros (see 2.74 change log also).

arch_prctl.2
  mtk, Acked by Andi Kleen
    Clarify interpretation of 'addr'; plus a few other minor edits
    and updates.

bind.2
  mtk
    Minor rewrites.

close.2
  mtk
    Clarify relationship between file descriptor
 and open file
    description.

connect.2
  mtk, Acked by Andi Kleen
    Since kernel 2.2, AF_UNSPEC for unconnecting a connected
    socket *is* supported.

execve.2
  Alain Portal
    Minor rewordings.

futimesat.2
  Alain Portal
    Remove duplicate "#include <fcntl.h>" from SYNOPSIS.

getgid.2
  mtk
    Add getresgid(2) and credentials(7) to SEE ALSO.

getpagesize.2
  mtk
    Small rewording.

getresuid.2
  mtk
    Rewrote various parts.

getuid.2
  mtk
    Add getresuid(2) and credentials(7) to SEE ALSO.

ioctl_list.2
  Alain Portal
    Use proper tables for layout, and various formatting fixes.
  mtk
    Various formatting fixes.

listen.2
  mtk
    Rewrote various parts.

mbind.2
  Andi Kleen / mtk / Alain Portal
    Modify explanation of EINVAL 'maxnode' error.

mmap.2
  mtk
    Add comma to clarify meaning of a sentence.

open.2
  mtk
    Clarify initial description of O_EXCL.
    Clarify
 description of behaviors of O_CREAT | O_EXCL
    for symbolic links.
    Clarify text describing use of lockfiles without O_EXCL.
  mtk, with input from Timo Sirainen and Trond Myklebust
    O_EXCL is supported on NFSv3 and later, with Linux 2.6 and later.

pipe.2
  mtk
    Rename 'filedes' argument 'pipefd'.

pivot_root.2
  mtk
    s/cwd/current working directory/

seteuid.2
  mtk
    Minor changes.

setpgid.2
  mtk
    Add credentials(7) to SEE ALSO, and updated copyright credits,
    to reflect my rewrite of a few months ago.

setsid.2
  mtk
    Add getsid(2) and credentials(7) to SEE ALSO.

spu_create.2
  Alain Portal / mtk; acked by Jeremy Kerr
    Minor formatting/wording changes.
  mtk
    Put EPERM in right alphabetical position in ERRORS list.

argz_add.3
  mtk
    Formatting fixes.

atexit.3
  mtk
    Minor changes to example program.

cerf.3
  mtk
    These functions are still not present as
 at glibc 2.7.

dbopen.3
  Alain Portal / mtk
    Various minor spelling and formatting fixes.

envz_add.3
  mtk
    Formatting fixes.

fexecve.3
  mtk
    Fix placement of feature test macro in SYNOPSIS.

fmax.3
fmin.3
  mtk
    Small rewording.

getline.3
  mtk
    Minor changes to example program.

getrpcent.3
getrpcport.3
  mtk
    Use modern C prototypes in SYNOPSIS.

getutent.3
  Alain Portal / mtk
    Formatting fixes.

mbsnrtowcs.3
mbsrtowcs.3
mbstowcs.3
  mtk
    Use .IP tags to create properly formatted lists.

rpc.3
  mtk
    Convert function declarations to use modern C prototypes.
    Add text and start of page describing header files
    and types required by functions.
    Reformat discussion of request under clnt_control().

xdr.3
  mtk
    Convert function declarations to use modern C prototypes.
    Remove crufty "int empty" from xdrrec_eof() description.

console_codes.4
  Phil Endecott

   Relocate misplaced line:
       "and if LF/NL (new line mode) is set also a carriage return;"
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=458338.

console_ioctl.4
  mtk
    Formatting fixes.

bootparam.7

mtk, after a note by Alan Portal
Fix reference to kernel documentation source file in the
"The Sound Driver" subsection.

man-pages.7
Alain Portal
Move CONFIGURATION description after SYNOPSIS description.
mtk / Alain Portal
Note that header files should be surrounded by angle brackets (<>).

posixoptions.7
mtk
Minor formatting and wording fixes.

rtnetlink.7
Andreas Henriksson
Fix description of RTM_F_EQUALIZE.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=458325.

signal.7
mtk
Minor formatting and wording fixes.

socket.7
mtk
Small rewording of discussion of O_ASYNC.

spufs.7
mtk / Jeremy Kerr / Alain Portal
s/SPE/SPU/

==========
Changes in man-pages-2.76 ==========

Released: 2008-01-14

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Carlo Marcelo Arenas Belon <carenas@sajinet.com.pe>
Jeremy Kerr <jk@ozlabs.org>
Sam Varshavchik <mrsam@courier-mta.com>

Trond Myklebust <trond.myklebust@fys.uio.no>

Apologies if I missed anyone!

Global changes
---

longjmp.3
printf.3
scanf.3
setbuf.3
setjmp.3
sk98lin.4
environ.7
  mtk
    Rework/remove use of ".ad" macros.

ioctl_list.2
mlock.2
mprotect.2
mremap.2
syslog.2
cfree.3
mpool.3
offsetof.3
rpc.3
stdin.3
  mtk
    Fix unbalanced quotes in formatting macros.

ftok.3
  mtk
    s/i-node/inode/, for consistency with other pages and POSIX.1-2001.

Typographical or grammatical errors have been corrected in several places.

Changes to individual pages
---

chown.2

 mtk
    Minor wording change.

dup.2
  mtk

Reordered text in DESCRIPTION and added some details for dup2().

open.2
  Trond Myklebust / mtk
    Minor fix to O_EXCL changes in previous release.

gettid.2
  mtk
    Rewrote DESCRIPTION; noted that thread ID is not the same
    thing as a POSIX thread ID.

pipe.2
  mtk
    Rewrote DESCRIPTION; minor additions to EXAMPLE text.

umask.2
  mtk
    A few rewrites and additions.

strptime.3
  Carlo Marcelo Arenas Belon / mtk
    Add "#define _XOPEN_SOURCE" to example program.

initrd.4
  mtk
    Use quotes more consistently in formatting macros.

random.4
  mtk, after a report by Daniel Kahn Gilmor
    Add 2.6 details for /proc/sys/kernel/random/poolsize.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=459232.

pthreads.7
  mtk
    Minor changes.

spufs.7
  mtk / Jeremy Kerr
    Define abbreviation "MSS".

========== Changes in man-pages-2.77 ==========

Released:
 2008-01-31

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Pavel Heimlich <tropikhajma@seznam.cz>
Phil Endecott <phil_vonar_endecott@chezphil.org>
Thomas Huriaux <thomas.huriaux@gmail.com>
Vincent Lefevre <vincent@vinc17.org>
WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

Global changes
---

stdarg.3
bootparam.7
  Thomas Huriaux
    Fix broken use of single quotes at start of line,
    as per: http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462636

Typographical or grammatical errors have been corrected in several places.

New pages
---

remove_COLOPHON.sh
  mtk
    Script to remove the COLOPHON section from the man pages provided
    as command-line arguments. This is useful to remove the COLOPHON
    sections from all of the man pages in two different release trees
    in order to do a "diff -ruN"
 to see the "real" differences
    between the trees.

Changes to individual pages
---

fcntl.2
  mtk
    Replace tables with .TP macros.

fork.2
  mtk
    Added discussion of directory streams.

Removed "#include <sys/types>" from SYNOPSIS.
Changed authorship notice.

futex.2
mtk
Add ENOSYS error to errors.
Phil Endecott
Explicitly describe return value in the event of an error.

inotify_add_watch.2
mtk
Minor wording changes.

splice.2
WANG Cong
Fix types for 2 and 4 arguments in splice prototype.

wait.2
Phil Endecott
Clarify description of return value for WNOHANG.

tkill.2
mtk
Rewrote DESCRIPTION; emphasized that tkill() is obsoleted by
tgkill().

alloca.3
mtk
Change description in NAME section.
Various rewrites and additions (including notes on longjmp() and
SIGSEGV).
mtk / Vincent Lefevre
Weaken warning
against use of alloca(), and
point out some cases where it can be useful;
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=461100.

bootparam.7
Pavel Heimlich
Remove junk line.

inotify.7
mtk
Replace tables with .TP macros.
s/MultiSource Synchronization/MultiSource Synchronization (MSS)/

========== Changes in man-pages-2.78 ==========

Released: 2008-02-15

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Davide Libenzi <davidel@xmailserver.org>
Greg Banks <gnb@melbourne.sgi.com>
Michael Tokarev <mjt@tls.msk.ru>
Phil Endecott <phil_vonar_endecott@chezphil.org>

Apologies if I missed anyone!

Global changes
---

sigaction.2
signal.2
sigwaitinfo.2
signal.7
  mtk
    Add SEE ALSO entry referring to new signalfd.2 page.

Typographical or grammatical errors have been corrected in several places.

New pages
---

eventfd.2
  mtk, with input and review from Davide Libenzi
    Documents the eventfd() system call, new in 2.6.22.

signalfd.2
  mtk, with input and review from Davide Libenzi
    Documents the signalfd() system call, new in 2.6.22.

Changes to individual pages
---

futex.2
  mtk / Phil Endecott
    Improve wording describing error returns.

open.2
  Greg Banks
    Greatly expand the detail on O_DIRECT.

reboot.2
  mtk / Michael Tokarev
    Fix RETURN VALUE description: in some cases reboot() does not
    return.
  mtk
    Rename the 'flag' argument to 'cmd', since that is more meaningful,
    and also what is used in the kernel source.
    Other minor wording changes.

New pages
---

timerfd_create.2
  mtk, with input and review from Davide Libenzi
    Documents the timerfd_create(), timerfd_settime(), and
    timerfd_gettime() system calls, which are new in 2.6.25.

New links
---

timerfd_gettime.2
timerfd_settime.2
  mtk
    Links to new timerfd_create.2 page.

eventfd_read.3
eventfd_write.3
   mtk
    Links to eventfd.2.

Changes to individual pages

Makefile
  aeb
    Remove code relating to man1/README, which no longer exists.

execve.2
  mtk
    Clarify detail of RLIMIT_STACK/4 limit for argv+environ.

getitimer.2
  mtk
    Added SEE ALSO entry referring to timerfd_create.2.

getrusage.2
  mtk
    Minor rewordings.

open.2
  Michael Haardt
    Move discussion of 'mode' argument under description of O_CREAT.

signalfd.2
  mtk
    Fix type for 'ssi_ptr' field.
    See http://sources.redhat.com/ml/libc-hacker/2008-01/msg00002.html.

syscalls.2
  mtk
    Add timerfd_create(), timerfd_settime(), and timerfd_gettime()
    to list.

syslog.2
  Jeremy Kerr
    Add info on command type 10.
    Add details on types 6, 7, 8, and 9.
    Minor grammar fix.
  mtk
    Update LOG_BUF_LEN details.
    Update RETURN VALUE section.
    Notes capability
 requirements under EPERM error.
    Minor fix to description of type==3 and type==4.
    Other minor edits.

ctime.3
  Walter Harms
    Note that POSIX requires localtime() to act as though tzset()
    was called, but localtime_r() does not have the same requirement.
    See also http://thread.gmane.org/gmane.comp.time.tz/2034/

getaddrinfo.3
  mtk
    Clarify discussion of NULL 'hints' argument; other minor rewrites.
  mtk / Sam Varshavchik
    Remove some duplicated text.

malloc.3
  Lasse Kärkkäinen / Mike Frysinger / mtk
    Clarify description of realloc() behavior for
    ((size == 0) && (ptr != NULL)).

posix_fallocate.3
  Samuel Thibault
    s/stdlib.h/fcntl.h/ in SYNOPSIS.

proc.5
  Fernando Luis Vázquez Cao
    Update /proc/[number]/cmdline description.

It used to be true that the command line arguments were
not accessible when the process had been swapped out.
In ancient kernels (circa
2.0.*) the problem was that the
kernel relied on get_phys_addr to access the user space buffer,
which stopped working as soon as the process was swapped out.
Recent kernels use get_user_pages for the same purpose and thus
they should not have that limitation.

epoll.7
Davide Libenzi / mtk
Clarify the somewhat unintuitive behavior that occurs if a file
descriptor in an epoll set is closed while other file descriptors
referring to the same underlying open file description remain
open.
See also http://thread.gmane.org/gmane.linux.kernel/596462/.
mtk
Clarify error that occurs if we add an epoll fd to its own set.
mtk
A few minor rewordings.
mtk, after a note by Chris Heath
Rework Q1/A1, describing what happens when adding the same
file descriptor twice to an epoll set, and when adding duplicate
file descriptors to the same epoll set.
Heikki Orsila / mtk / Davide
Libenzi
Clarify Q9/A9 to discuss packet/token-oriented files.
mtk, after comments by Davide Libenzi and Chris Heath
Added Q0/A0, making explicit that the key for items in an epoll
set is [file descriptor, open file description].
mtk, after a note by Ron Burk
Change A3, to note that when events are available,
the epoll file descriptor will indicate as being readable.
mtk
Add some further explanation to Q5/A5 about why an epoll file
descriptor cannot be passed across a Unix domain socket.

posixoptions.7
mtk
Add SEE ALSO entry for standards(7).

regex.7
mtk
Add grep(1) to SEE ALSO.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=348552.

standards.7
mtk

Add SEE ALSO entry for posixoptions(7).

time.7
mtk
Added SEE ALSO entry referring to timerfd_create.2.

========== Changes in man-pages-2.80 ==========

Released: 2008-06-05

Apologies if I missed anyone!

Global changes
---

bdflush.2
inotify_add_watch.2
mprotect.2
sigprocmask.2
ctime.3
getusershell.3
setbuf.3
st.4
ip.7
packet.7
  mtk
    Replace "(il)legal" by "(not) permitted" or "(in)valid".

read.2
utime.2
filesystems.5
packet.7
  mtk
    s/time stamp/timestamp/, for consistency with majority use
    in other pages, and in POSIX.1.

madvise.2
mbind.2
mincore.2
mmap.2
mmap2.2
msync.2
remap_file_pages.2
  mtk
    Change name of 'start' argument to 'addr' for consistency
    with:
      * other memory-related interfaces
      * POSIX specification (for those interfaces in POSIX)
      * Linux and glibc source code (in at least some cases)

Various
 pages
  mtk
    s/filesystem/file system/, for consistency with majority use
    in other pages, and in POSIX.1.

Various pages
  mtk
    s/zeroes/zeros/, for consistency with majority use
    in other pages, and in POSIX.1.

abs.3
proc.5
  mtk
    s/builtin/built-in/, for consistency with majority use
    in other pages, and in POSIX.1.

mknod.2
ftw.3
  mtk
    s/normal file/regular file/

Various pages
  mtk
    s/nonempty/non-empty/

Various pages
  mtk
    s/nonzero/non-zero/

Various pages
  mtk
    s/realtime/real-time/, for consistency with majority usage.

Various pages
  mtk
    s/command line/command-line/ when used attributively.

Various pages
  mtk
    Use "run time" when non-attributive, "run-time" when attributive.

Various pages
  mtk
    Various pages that I wrote carried a slightly modified version
    of the "verbatim" license. In the interests of minimizing
    license proliferation,
 I've reverted the modified form
    so that the license is exactly the same as on other pages
    carrying the verbatim license.

epoll_ctl.2
getitimer.2

getrlimit.2
unix.7
  mtk
    s/since kernel x.y.z/since Linux x.y.z/

wait.2
inotify.7
  mtk
    Reformat kernel version information for flags.

Typographical or grammatical errors have been corrected in several places.
(Special thanks to Nicolas François.)

New pages
---

random_r.3
  mtk, after a suggestion by aeb
    Documents random_r(3), srandom_r(3), initstate_r(3), and
    setstate_r(3), which are the reentrant equivalents of
    random(3), srandom(3), initstate(3), and setstate(3).

New links
---

lutimes.3
  mtk
    Link to futimes.3.

initstate_r.3
setstate_r.3
srandom_r.3
  mtk
    Links to random_r.3.

daylight.3
timezone.3
tzname.3
  mtk
    Links to tzset.3.

isnanf.3
isnanl.3
  mtk
    Links to finite.3.

encrypt_r.3
setkey_r.3
  mtk
    Links
 to encrypt.3.

Changes to individual pages
---

clone.2
  mtk
    Added note that CLONE_STOPPED (which no-one uses anyway) is
    now deprecated.

epoll_create.2
  mtk
    Add NOTES section pointing out that 'size' argument is unused
    since kernel 2.6.8.

epoll_ctl.2
  mtk
    Added portability note to BUGS text for EPOLL_CTL_DEL.

epoll_wait.2
  mtk
    If the 'sigmask' is NULL, then epoll_pwait() is equivalent
    to epoll_wait().

fork.2
  mtk
    NOTES: since glibc 2.3.3, the glibc NPTL fork() wrapper
    bypasses the fork() system call to invoke clone() with
    flags providing equivalent functionality.

futex.2
  mtk, after a note from Adrian Bunk
    FUTEX_FD has been removed, as of kernel 2.6.26.

futimesat.2
  mtk
    Note that this system call is made obsolete by utimensat(2).

getgroups.2
  Petter Reinholdtsen
    SEE ALSO: Add getgrouplist(3).
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=479284.

mtk
NGROUPS_MAX increased in kernel 2.6.4.
SEE ALSO: Add credentials(7).
mtk
Reformat DESCRIPTION and RETURN VALUE sections to be more
consistent with man-pages style.
Add some more detail to descriptions of system calls.
Clarified what happens if caller of getgroups() is a member of
more than 'size' supplementary groups.
ERRORS: Add ENOMEM.

getpriority.2
mtk, after a note from Ingo Molnar
Add text in NOTES about the punchier effect of nice values in
kernel 2.6.23 and later.
Add Documentation/scheduler/sched-nice-design.txt to SEE ALSO list.

gettid.2
mtk
Added VERSIONS section noting that this system call first
appeared in 2.4.11.

kill.2
Marty Leisner / mtk
Add text explicitly noting that sig==0 can be used to check for
the existence of a PID or PGID.
mtk
A few minor rewordings.

mbind.2
mtk
The location of the numactl package has changed.

mmap.2
mtk
Added some .SS headings to make structure of page a little
more obvious.
mtk, with input from Nick Piggin
MAP_POPULATE supports both file and anonymous mappings.
Since 2.6.23, MAP_POPULATE supports private mappings.
Since 2.6.23, MAP_NONBLOCK causes MAP_POPULATE to be a no-op.
mtk
NOTES: Added details on mapping address that is selected by
kernel when MAP_FIXED is / isn't specified.

mount.2
mtk
The MS_REMOUNT changes in 2.4 were at 2.4.10 (not 2.4).

mtk
Minor wording change.

msgctl.2
mtk
Clarify that "unused" fields in msginfo structure are
"unused within the kernel".
msginfo.msgpool is measured in kilobytes, not bytes.
Minor rewordings in comments for msginfo structure.

msgop.2
mtk
Various minor rewordings and restructurings for clarity.
mtk, after a note from Reuben Thomas
Remove "msgop" from NAME section.

mkdir.2
mtk
Clarify meaning of "BSD group semantics".
SEE ALSO: add chown(2).

mknod.2
mtk
SEE ALSO: add chown(2) and chmod(2).

mmap.2
mtk
SEE ALSO: add mprotect(2) and shmat(2).

mprotect.2
Hamaji Shinichiro
SYNOPSIS: s/size_t *len/size_t len/

open.2
mtk
Note that O_CLOEXEC should be in the next POSIX.1 revision.
mtk
More than just ext2 supports "mount -o bsdgroups" nowadays,
so make the discussion about group ownership of new files a bit
more generic.
mtk
SEE ALSO: add chown(2) and chmod(2).

poll.2
mtk
If the 'sigmask' is NULL, then ppoll() is equivalent to poll()
with respect to signal mask manipulations.

posix_fadvise.2
  mtk
    s/posix_madvise (2)/posix_madvise (3)/;
    (The referred-to page still doesn't exist yet, but hopefully
    will do sometime soon.)

ptrace.2
  Anoop, Acked by Roland
 McGrath.
    Re PTRACE_PEEKUSER: the offsets and data returned might not
    match with the definition of struct user.
    See also http://lkml.org/lkml/2008/5/8/375

recv.2
  Felix Kater / mtk
    Improve wording for EAGAIN error in discussion of MSG_DONTWAIT.

rmdir.2
  Martin Pitt
    POSIX.1 also allows EEXIST for the ENOTEMPTY error condition.
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=467552.

sched_setscheduler.2
  mtk, with input from Ingo Molnar
    Add description of SCHED_IDLE policy (new in 2.6.23).
    Tweak description of SCHED_BATCH.
    Minor rewordings.

select_tut.2
  Justin Pryzby
    Various wording clean-ups.

semctl.2
  mtk
    Clarify that "unused" fields in seminfo structure are
    "unused within the kernel".
    Minor rewordings in comments for seminfo structure.

semop.2
  Aurelien Gerome
    Small fix in example code.

setpgid.2
  mtk / Karsten Weiss
    Clarify description
 of setpgid() a little.

shmctl.2

mtk
Clarify that "unused" fields in shminfo structure are
"unused within the kernel".
Minor rewordings in comments for shminfo structure.

shmop.2
mtk, after a note from Reuben Thomas
Remove "shmop" from NAME section.

signalfd.2
mtk
Added BUGS text noting that before kernel 2.6.25, the ssi_int
and ssi_ptr fields are not set.
Added comments describing fields in signalfd_siginfo structure.
Update field names in example program (s/signo/ssi_signo/).
Various small fixes, and remove duplicated sentence.
Minor edits to structure definition.

sigqueue.2
mtk
Added some comments to code in NOTES.

stat.2
mtk
Minor wording change.

symlink.2
mtk
SEE ALSO: add lchown(2).

sync_file_range.2
mtk / Andrew Morton
Remove statement that (SYNC_FILE_RANGE_WAIT_BEFORE |
SYNC_FILE_RANGE_WRITE | SYNC_FILE_RANGE_WAIT_AFTER)
is
a traditional fdatasync(2) operation.
See https://bugzilla.mozilla.org/show_bug.cgi?id=421482
comments 129 to 131.

syscalls.2
mtk
This page is now up to date as at kernel 2.6.25.

syslog.2
mtk
Small tidy up of language relating to permissions/capabilities.

timerfd_create.2

mtk
Minor change to example program.
Minor wording change.

utime.2
Reuben Thomas
Remove unnecessary subheading for utimes().
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=477402.
mtk
Change description in NAME line ("or" is not correct: these calls
always change *both* timestamps).
CONFORMING TO: utimes() is in POSIX.1-2001.
mtk
Rename 'buf' argument of utime() to 'times' (like utimes()).
Clarify explanation of EACCES and EPERM errors.
Remove BUGS section, since it doesn't seem to add useful
information.
Clarified discussion of capabilities,
and noted that
CAP_DAC_OVERRIDE also has a role.
Other minor rewordings.

wait.2
mtk, after a note by Justin Pryzby
Add a sentence clarifying that even though the default disposition
of SIGCHLD is "ignore", explicitly setting the disposition to
SIG_IGN results in different treatment of zombies.

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
Kevin O'Gorman <kogorman@csc.calpoly.edu>
Add "Link with -lrt" to SYNOPSIS.

backtrace.3
Nicolas François
s/backtrace_symbols/backtrace_symbols_fd/ in one sentence.
mtk
Fix bogus reference to variable 'strings': should be:
"the array of pointers".

ctime.3
mtk
Add warning under NOTES that asctime(), ctime(), gmtime(), and

localtime() may each overwrite the static object returned by any
of the other calls.
Other minor edits.

dlopen.3
mtk
Add more detail to the description
of the fields in the
structure returned by dladdr().

fexecve.3
mtk
Clean up SYNOPSIS after work by cut-and-paste-Pete:
the necessary header file is <unistd.h> not <sys/time.h>!

futimes.3
mtk
Add documentation of lutimes(), which appeared in glibc 2.6.
mtk
Change description in NAME line ("or" is not correct: these calls
always change *both* timestamps).
CONFORMING TO: futimes() did not come from 4.2BSD. (It came from
FreeBSD; see the FreeBSD man page.)

getenv.3
mtk
Noted that caller must not modify returned value string.
Noted that getenv() is not reentrant: the buffer may be statically
allocated and overwritten by later calls to getenv(), putenv(),
setenv(), or unsetenv().
Other minor rewrites.

getgrent.3
Petter Reinholdtsen
SEE ALSO: Add getgrouplist(3).
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=479284.

gethostbyname.3
mtk
Add 'h_errno' to NAME list.

getopt.3
mtk
Add 'optarg', 'optind', 'opterr', and 'optopt' to NAME section.
Add subheading for getopt_long() and getopt_long_only()
description.

getpt.3

mtk
Point out that this function should be avoided in favor of
posix_openpt().
Add ERRORS section referring to open(2).

getsubopt.3
Daniel Burr
SYNOPSIS: Fix declaration of valuep.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=476672.

malloc.3
mtk
RETURN VALUE: Note circumstances in which successful malloc() and
calloc() can return NULL.

mq_open.3
mtk, after a note by Marty Leisner
Note that <fcntl.h> is needed for O_* constants and <sys/stat.h>
is needed for 'mode' constants.

opendir.3
mtk
Describe treatment of close-on-exec flag by opendir() and
fdopendir().

openpty.3
mtk
SEE ALSO: add ttyname(3).

raise.3
mtk / Timothy Baldwin

Clarify semantics of raise() when called from a multithreaded
program.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=476484.
mtk
Rewrites and additions to various parts of the page.

rand.3
Tolga Dalman / aeb / mtk
Remove outdated warning in NOTES; encourage the use of
random(3) instead.
Folkert van Heusden
Clarify wording describing range of values returned by rand().

random.3
aeb / mtk / Tolga Dalman
Recommend use or random_r(3) for multithreaded applications

that need independent, reproducible sequences of random numbers.

Move references to "The Art of Computer Programming" and
"Numerical Recipes", formerly in rand(3), to this page.

Add drand48(93) to SEE ALSO list.

regex.3
  Heikki Orsila
    Clarify description of 'rm_eo' field.

sem_open.3
  mtk, after a note by Marty Leisner
    Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is
     needed for 'mode' constants.

sem_post.3
  mtk
    Added pointer to example in sem_wait(3).

sem_close.3
sem_destroy.3
sem_getvalue.3
sem_init.3
sem_open.3
sem_post.3
sem_unlink.3
sem_wait.3
  mtk, after a note from Marty Leisner
    Add text to SYNOPSIS noting the need to link with "-lrt" or
    "-pthread".

setenv.3
  mtk
    setenv() copies 'name' and 'value' (contrast with putenv()).
    unsetenv() of a nonexistent variable does nothing and is
    considered successful.
    Noted that setenv() and unsetenv() need not be reentrant.

shm_open.3
  mtk, after a note by Marty Leisner
    Note that <fcntl.h> is needed for O_* constants and <sys/stat.h> is
    needed for 'mode' constants.

undocumented.3
  mtk
    initstate_r(3), setkey_r(3), setstate_r(3) are now documented.

utmp.5
  Nicolas François
    Small rewording.

resolv.conf.5
  Nicolas François
    gethostname() is in Section 2, not section 3.

ascii.7

 Stuart Brady
    Fix rendering of ' (backtick) and apostrophe (') in tables

charsets.7
  Nicolas François
    s/unicode.com/unicode.org/

credentials.7
  mtk
    NOTES: Pthreads requires that all threads share the same UIDs and
    GIDs. But the Linux kernel maintains separate UIDs and GIDs for
    every thread. NPTL does some work to ensure that credential
    changes by any thread are carried through to all POSIX threads in
    a process.
  mtk
    sysconf(_SC_NGROUPS_MAX) can be used to determine the number of
    supplementary groups that a process may belong to.
    Clarify that supplementary group IDs are specified in POSIX.1-2001.

epoll.7
  mtk, after a note from Sam Varshavchik
    For answer A2, change "not recommended" to "careful programming
    may be required".

inotify.7
  mtk
    Document SIGIO feature (new in 2.6.25) for inotify file descriptors.
  mtk
    Note that select()/poll()/epoll_wait() indicate
 a ready inotify
    file descriptor as readable.
  mtk
    Document IN_ATTRIB in a little more detail.

pthreads.7
  Justin Pryzby
    Grammar fix, plus fix typo in script.
  mtk

Add list of thread-safe functions.

standards.7
  mtk
    Add a section on the upcoming POSIX revision.

ld.so.8
  Justin Pryzby / mtk
    Various wording improvements.

========== Changes in man-pages-3.00 ==========

Released: 2008-06-12, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andries Brouwer <Andries.Brouwer@cwi.nl>
Stuart Brady <sdbrady@ntlworld.com>

Apologies if I missed anyone!

Global changes

The POSIX.1 man pages (sections 0p, 1p, 3p) have been moved out
of this package into the separate man-pages-posix package.
This made sense because those pages are seldom changed (only formatting
fixes, etc.) so that it
 was unnecessary to redistribute them with each
man-pages release.

console_codes.4
random.4
dir_colors.5
proc.5
glob.7
  Stuart Brady
    s/`/\`/ for backquotes used in command substitution, for
    proper rendering in UTF-8.

Various pages
  mtk, after a note from Stuart Brady
    Using /'x'/ to denote a character (string) renders poorly in
    UTF-8, where the two ' characters render as closing single
    quotes. On the other hand, using /`x'/ renders nicely on UTF-8,
    where proper opening and closing single quotes are produced by
    groff(1), but looks ugly when rendered in ASCII. Using the
    sequence /\\aqx\\aq/ produces a reasonable rendering ('\\aq'
    is a vertical "apostrophe quote") in both UTF-8 and ASCII.
    So that change is made in a number of pages.
    See also http://www.cl.cal.ac.uk/~mgk25/ucs/quotes.html.

Various pages
  mtk
    Replace form /`string'/ by /"string"/, since the former renders
    poorly
 in ASCII.

termios.3
console_codes.4
tty_ioctl.4
termcap.5
charsets.7
  mtk
    Control character names (^X) are written boldface, without
    quotes.

printf.3
scanf.3
proc.5
glob.7
regex.7
  mtk
    Various edits to try and bring some consistency to the use of
    quotes.

Changes to individual pages
----

tty_ioctl.4
  mtk
    Small rewordings in description of packet mode.

locale.7
  mtk
    Minor formatting fixes.

New and rewritten pages
---

acct.5
  mtk
     A complete rewrite of this page, now with much more detail.

hostname.7
  mtk
      A description of hostname resolution. Taken from FreeBSD 6.2,
     and lightly edited for man-pages style.

symlink.7
  mtk
     A description of symbolic links. Taken from FreeBSD 6.2, but
     heavily edited for Linux details, improved readability, and
     man-pages style.

Newly documented interfaces in existing pages
----

getrlimit.2
  mtk / Peter Zijlstra
     Add description of RLIMIT_RTTIME limit, new in 2.6.25.

mkstemp.3
  mtk
     Add description of mkostemp(), new in glibc 2.7.

core.5
  mtk, after a note by Petr Gajdos; review by Neil Horman
     Document core_pattern pipe syntax, which appeared in
     kernel 2.6.19.
     Add an example program demonstrating use of core_pattern
     pipe syntax.
  mtk
     Document /proc/PID/coredump_filter, new in kernel 2.6.23.
     Documentation was based on the text in
     Documentation/filesystems/proc.txt, plus testing, and

  checking the kernel source.

proc.5
  mtk
     Document /proc/PID/oom_score, which was new in kernel 2.6.11.
     This file displays the "badness" score of the process, which
     provides the basis for OOM-killer decisions.
  mtk
     Document /proc/PID/oom_adj, which was new in kernel 2.6.11.

This file influences the oom_score of a process.
mtk
Document /proc/PID/limits, which was new in 2.6.24.
This file displays a process's resource limits.
mtk
Document /proc/PID/fdinfo/*, which was new in 2.6.22.
These files display info about each descriptor opened by the
process: the current file offset, and the file access mode +
file status flags as set in open() or fcntl(F_SETFL).
mtk
Document /proc/PID/mountinfo, which was new in 2.6.26.
This file displays information about mount points.
Closely based on text from Documentation/filesystems/proc.txt.
mtk
Document /proc/PID/mountstats,
which was new in 2.6.17.
This file displays statistics about mount points.
mtk
Document /proc/PID/status.
Samuel Thibault / mtk, review by Laurent Vivier,
Christian Borntraeger, and Andrew P
Document guest (virtual CPU) time field in /proc/stat.
Document guest (virtual CPU) time fields in /proc/PID/stat.

sem_wait.3
proc.5
  mtk
    SEE ALSO: add time(7)

Typographical or grammatical errors have been corrected in several places.
(Special thanks to Nicolas François and Alain Portal.)

Changes to individual pages
---

acct.2
  mtk
    Add a few more words to DESCRIPTION.
    NOTES: Add pointer to acct(5).

alarm.2
   Alain Portal
    s/process/calling process/ so as to say that the alarm signal is
    delivered to the calling process.

brk.2
  Yao Zhao / mtk
    Clarify discussion of return value of sbrk().
  mtk
    DESCRIPTION: Add some sentences giving an overview of these
    interfaces.
    Add note recommending use of malloc(3).
    Change name of brk() argument to the simpler 'addr'.
    Add "(void *)" cast to "-1" for error return of sbrk().
    Removed some incorrect text about "brk(0)".
    Note that SUSv2 specified the return value of sbrk().
    Added a detail on the glibc brk() wrapper.
    Remove discussions of old standards (C89 and POSIX.1-1990);
    CONFORMING TO already discusses the situation with respect
    to more recent standards.

chmod.2
  mtk
    Clarify description of chmod() and fchmod().
    Add further detail on S_ISUID, S_ISGID, and S_ISVTX permissions.
    Reformat list of permissions
 bits.

chown.2
  mtk
    Describe rules governing ownership of new files (bsdgroups
    versus sysvgroups, and the effect of the parent directory's
    set-group-ID permission bit).

chroot.2
  Alain Portal
    Clarify description a little.
    s/changes the root directory/
      changes the root directory of the calling process/

execve.2
  mtk
    Fix text that warns against use of NULL argv and envp.
    Using a NULL envp does in fact seem to be portable (works
    on Solaris and FreeBSD), but the Linux semantics for a NULL
    argv certainly aren't consistent with other implementations.
    See http://bugzilla.kernel.org/show_bug.cgi?id=8408.

getdents.2
  mtk, after a note from George Spelvin
    Document d_type field, present since kernel 2.6.4.
    Other minor edits.

getitimer.2
  mtk
    Noted that POSIX.1 leaves interactions with alarm(), sleep(),
    and usleep() unspecified.
    Linux 2.6.16 removed the
 MAX_SEC_IN_JIFFIES ceiling on timer
    values.
    Other minor changes.

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  mtk, after a note by Masatake YAMOTO and input from Jeff Moyer
    Describe the unconventional error return provided by the
    wrapper function in libaio (and contrast with behavior if
    the system call is invoked via syscall(2)).
    See http://thread.gmane.org/gmane.linux.ltp/4445/
  Alain Portal / mtk
    Re-order ERRORS and SEE ALSO entries to be alphabetical.

io_getevents.2
  Alain Portal
    Small wording fix.

io_submit.2
  Jeff Moyer
    s/AIO request blocks/AIO control blocks/

mknod.2
  mtk
    Note that EEXIST applies, even if the pathname is a
    (possibly dangling) symbolic link.

nanosleep.2
  mtk, after a report from Stephane Chazelas
    Remove crufty discussion of HZ, and replace with a pointer
    to time(7).
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=485636
   mtk, after some discussions with Bart Van Assche and Roman Zippel
    NOTES: describe CLOCK_REALTIME versus CLOCK_NANOSLEEP
    See also http://thread.gmane.org/gmane.linux.kernel/696854/
    "nanosleep() uses CLOCK_MONOTONIC, should be CLOCK_REALTIME?"
  mtk
    Replace mentions of "process' by "thread".
    NOTES: describe case where clock_nanosleep() can be preferable.
    Some minor rewrites.

open.2
  mtk, after a note from Christoph Hellwig
    NOTES: Note that access mode flags are not single bits,
    and document the Linuxism "access mode 3".
    See also http://thread.gmane.org/gmane.linux.kernel/653123.

readdir.2
  mtk
    Minor wording fixes.

recv.2
  Alain Portal
    Add comment to 'ee_pad' field in structure definition.

sched_setscheduler.2
  mtk
    Add pointer to discussion of RLIMIT_RTTIME in getrlimit.2.
  mtk, after a note by Andrew Clayton
    Rewrote and restructured various parts
 of the page for greater
    clarity.
  mtk
    Add more detail to the rules that are applied when an
    unprivileged process with a non-zero RLIMIT_RTPRIO limit
    changes policy and priority.
    SEE ALSO: Add Documentation/scheduler/sched-rt-group.txt

sync_file_range.2
  Pavel Machek
    SYNC_FILE_RANGE_WRITE can block on writes greater than request
    queue size. For some background, see
    http://thread.gmane.org/gmane.linux.kernel/687713/focus=688340

syscalls.2
  mtk
    Added system call history back to version 1.2.
    Fix typo on kernel version for pivot_root().

syslog.2
  WANG Cong
    Document ENOSYS error, which can occur if kernel was built without
    CONFIG_PRINTK.

utime.2
  Nicolas François
    Clarify description of 'times' array for utimes().

adjtime.3
  mtk
    The longstanding bug that if delta was NULL, olddelta
    didn't return the outstanding clock adjustment, is now fixed

  (since glibc 2.8 + kernel 2.6.26).
    http://sourceware.org/bugzilla/show_bug?id=2449
    http://bugzilla.kernel.org/show_bug.cgi?id=6761

dprintf.3
  mtk
    Note that these functions are included in the next POSIX revision.
    Remove editorial discussion about what the functions should have
    been named.

ftime.3
  mtk
    Rewrote various pieces, and added some details.

getaddrinfo.3
  mtk
    Improve description or 'hints' and 'res' arguments.
    Add details on numeric strings that can be specified for 'node'.
    Other fairly major restructurings and rewrites to improve
    logical structure and clarity of the page.
    SEE ALSO: Add hostname(7).

gethostbyname.3
  mtk
    DESCRIPTION: Add reference to inet_addr(3) for dotted notation.
    SEE ALSO: add inet(3).
  mtk
    Added BUGS section noting that gethostbyname() does not
    recognize hexadecimal components in dotted address strings;
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482973

getmntent.3
   mtk, after Stuart Cunningham pointed out the typo
    Remove statement that LSB deprecates the functions
    "endmntent(), setmntent() [sic] and setmntent()".
    This doesn't seem to be true (I can't find mention of it
    being deprecated in any of the LSB specs). Rather, LSB simply
    doesn't specify these functions. (LSB 1.3 had a spec of
    setmntent(), but not getmntent() or endmntent(), and noted
    that having a spec of setmntent() was of little use without
    also having a spec of getmntent().)
    See also https://lists.linux-foundation.org/pipermail/lsb-discuss/2006-October/003078.html

getnameinfo.3
  Tolga Dalman
    Remove mention of sa_len field from example code.
    That field is a BSDism not present on Linux.
  mtk
    Various minor changes.

inet.3
  mtk / Stephane Chazelas
    inet_aton() is *not* in POSIX.1.
    Rewrote discussion
 of why inet_addr() is disfavored.
    SEE ALSO: Add getaddrinfo(3).
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482979.
  mtk, after a note by Stephane Chazelas
    Describe the various address forms supported by inet_aton().
  mtk
    Rewrite description of inet_network().
    Clarify discussion of inet_lnaof(), inet_netof(), and inet_makeaddr().
    Add discussion of Classful Addressing, noting that it is obsolete.
    Added an EXAMPLE program.
  mtk
    Relocate discussion of i386 byte order to NOTES.
    Note that inet_aton() returns an address in network byte order.
    SEE ALSO: Add byteorder(3) and getnameinfo(3).

inet_ntop.3
  mtk
    Remove unneeded header files from SYNOPSIS.
    SEE ALSO: Add inet(3) and getnameinfo(3).
    Make NAME line more precise.
    Move errors to an ERRORS section.
    Add EXAMPLE section pointing to inet_pton(3).

inet_pton.3
  mtk / Stephane Chazelas
    Remove
 statement that inet_pton() extends inet_ntoa();
    that's not really true, since inet_pton() doesn't support
    all of the string forms that are supported by inet_ntoa().
    SEE ALSO: Add getaddrinfo(3).
    as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=482987.
  mtk
    Describe IPv6 address formats.
    Describe dotted decimal format in more detail.
    Add an example program.
  mtk
    Remove unneeded header files from SYNOPSIS.

Make NAME line more precise.
Make description of return value more precise.
SEE ALSO: Add inet(3).

mkfifo.3
mtk
Note that EEXIST applies, even if the pathname is a
(possibly dangling) symbolic link.

mkstemp.3
mtk
Fix discussion of O_EXCL flag.
These functions may also fail for any of the errors described
in open(2).
Various other rewordings.

readdir.3
mtk
Document DT_LNK (symbolic link) for d_type field.

Reorder DT_ entries alphabetically.

remainder.3
mtk
Recommend against drem(), in favor of remainder().

scanf.3
mtk, after a note from Stephane Chazelas
Add an ERRORS section documenting at least some of the errors
that may occur for scanf().
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254.
mtk, after a note from Stephane Chazelas; review by Stephane Chazelas
Document the GNU 'a' modifier for dynamically allocating strings.
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=487254.
Document the GNU 'm' modifier for dynamically allocating strings.

strcat.3
Andreas Herrmann
s/strcat/strncat/ (a typo that changed the semantics in
DESCRIPTION).

strerror.3
mtk, after a note from Daniele Giacomini
Modify SYNOPSIS to show prototypes of both versions of strerror_r(),
and make other small clarifications of the description regarding
the two versions.

random.4

George Spelvin (taking time out from his busy Broadway schedule),
with some tweaks by Matt Mackall and mtk
Add a Usage subsection that recommends most users to use
/dev/urandom, and emphasizes parsimonious usage of
/dev/random.

locale.5
Petr Baudis <pasky@suse.cz>
LC_TIME: Describe first_weekday and first_workday.

proc.5
mtk
The various CPU time fields in /proc/stat and /proc/PID/stat
return time in clock ticks (USER_HZ, cputime_to_clock_t(),
sysconf(_SC_CLK_TCK)).
Updated, clarified and expanded the description several
fields in /proc/[number]/stat.
mtk
Clarified and expanded the description of /proc/[number]/fd.
mtk
Updated and clarified the description of /proc/[number]/statm.
mtk
Updated and clarified the description of /proc/sys/fs/dentry-state.
mtk
Many formatting, wording, and grammar fixes.

man-pages.7
mtk
Enhanced description
of VERSIONS section.

mq_overview.7
mtk
Note that Linux does not currently support ACLs for POSIX
message queues.

sem_overview.7
mtk
Note that Linux supports ACLs on POSIX named semaphores
since 2.6.19.

time.7
mtk, with some suggestions from Bart Van Assche and Thomas Gleixner
Added some details about where jiffies come into play.
Added section on high-resolution timers.
Mentioned a few other time-related interfaces at various
points in the page.
See http://thread.gmane.org/gmane.linux.kernel/697378.

unix.7
  mtk, after a note by Samuel Thibault
    Provide a clear description of the three types of address that
    can appear in the sockaddr_un structure: pathname, unnamed,
    and abstract.

========== Changes in man-pages-3.02 ==========

Released: 2008-07-02, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that
 have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Reuben Thomas <rrt@sc3d.org>
Sam Varshavchik <mrsam@courier-mta.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>
WANG Cong <xiyou.wangcong@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

clock_nanosleep.2
  mtk
    A description of the clock_nanosleep() system call,
    which was added in kernel 2.6.

getgrouplist.3
  mtk
    A near complete rewrite, including additional information and
    a new example program.

getutmp.3
  mtk
    Documents getutmp(3) and getutmpx(3).

gnu_get_libc_version.3

mtk
Documents gnu_get_libc_version(3) and gnu_get_libc_release(3).

sigwait.3
mtk
Documents sigwait(3).

shm_overview.7
mtk
An overview of the POSIX shared memory API.

Newly documented interfaces in existing pages
---

updwtmp.3
mtk
Document updwtmpx(3).

New links
---

getutmpx.3
mtk
Link to getutmp.3.

gnu_get_libc_release.3
mtk
Link to gnu_get_libc_version.3

updwtmpx.3
mtk
Link to updwtmp.3

utmpxname.3
mtk
Link to getutent.3.

utmpx.5
mtk
Link to utmp.5.

Global changes

Various pages

  mtk
    s/user name/username/

Various pages
  mtk
    s/host name/hostname/

Changes to individual pages
---

fchmodat.2
  Alain Portal
    SEE ALSO: add symlink.7. (3.01 changelog wrongly said this
    had been done.)

io_setup.2
  Alain Portal
    Remove superfluous text from RETURN VALUE.

mmap.2
  mtk
    SEE ALSO: Add mmap(2), shm_overview(7).

shmget.2
shmop.2
  mtk
    SEE ALSO: add shm_overview(7).

sigreturn.2
  mtk
    Added a bit more detail on what sigreturn() actually does.

signalfd.2
sigsuspend.2
  mtk
    SEE ALSO: Add
 sigwait(3).

sigwaitinfo.2
  mtk
    Describe behavior when multiple threads are blocked in
    sigwaitinfo()/sigtimedwait().
    SEE ALSO: Add sigwait(3).

dirfd.3
  mtk
    RETURN VALUE: describe return value on success.

Add an ERRORS section documenting POSIX.1-specified errors.

getaddrinfo.3
  mtk, after a note by Stephane Chazelas
    getaddrinfo() supports specifying IPv6 scope-IDs.

getlogin.3
  mtk
    ERRORS: add ENOTTY.
    SEE ALSO: add utmp(5).

getutent.3
  WANG Cong
    utmpname() does return a value.
  mtk
    Add paragraph to start of DESCRIPTION recommending
    use of POSIX.1 "utmpx" functions.
    CONFORMING TO: mention utmpxname().
    Add an ERRORS section.
    There are no utmpx equivalents of the _r reentrant functions.
    Clarify discussion of return values.
    Add pointer to definition of utmp structure in utmp(5).
    Clarify discussion of utmpx file on other systems (versus
     Linux situation).

getutent.3
  mtk
    SEE ALSO: add getutmp(3)

inet_pton.3
  Stephane Chazelas
    Fix error in description of IPv6 presentation format:
    s/x.x.x.x.x.x.x.x/x:x:x:x:x:x:x:x/.

setbuf.3
  Reuben Thomas / mtk
    Fix confused wording for return value of setvbuf().
    Fixes http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=488104.
  mtk
    Other minor rewordings.

shm_open.3
  mtk
    SEE ALSO: add shm_overview(7).

random.4
  mtk, after a note by Alain Portal
    Slight rewording to make life easier for non-native English

speakers.

utmp.5
  mtk
    Add discussion of POSIX.1 utmpx specification.
    Provide a little more detail on fields of utmp structure.
    Added comments to macros for ut_type field.
    Correct the description of the ut_id field.
  mtk
    Consolidate duplicated information about ut_tv and ut_session
    on biarch platforms.
  mtk
    Move some text from
 CONFORMING TO to NOTES.
    Removed some crufty text.
    SEE ALSO: add login(3), logout(3), logwtmp(3).
    UT_LINESIZE is 32 (not 12).
  mtk
    SEE ALSO: add getutmp(3)

man-pages.7
  mtk
    Enhanced the discussion of font conventions.

signal.7
  mtk
    Note that the delivery order of multiple pending standard
    signals is unspecified.
    SEE ALSO: Add sigwait(3).

========== Changes in man-pages-3.03 ==========

Released: 2008-07-08, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andi Kleen <ak@muc.de>
Hidetoshi Seto <seto.hidetoshi@jp.fujitsu.com>
Li Zefan <lizf@cn.fujitsu.com>
Paul Jackson <pj@sgi.com>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

getcpu.2
  Andi Kleen, with some text and edits
 by mtk
    Documents the getcpu(2) system call, introduced in Linux 2.6.19.

sched_getcpu.3
  mtk
    Documents sched_getcpu(3), a wrapper for getcpu(2), provided
    since glibc 2.6.

cpuset.7
  Paul Jackson, with review and editing by mtk, and comments by
  Hidetoshi Seto and Li Zefan
    A description of the cpuset file system, the mechanism introduced
    kernel 2.6.12 for confining processes to designated processors
    and nodes. (Becomes the fourth largest page in man-pages!)

Newly documented interfaces in existing pages
---

readdir.3
  mtk
    Add documentation of readdir_r().

New links
---

updwtmpx.3
  Alain Portal
    Link to updwtmp.3 (3.02 changelog wrongly said this had been done).

readdir_r.3
  mtk
    Link to readdir.3.

Global changes
---

get_mempolicy.2
mbind.2
sched_setaffinity.2
set_mempolicy.2
  mtk
    SEE ALSO: Add getcpu(2).

accept.2
close.2
connect.2
dup.2
epoll_wait.2
fcntl.2
flock.2
futex.2
msgop.2
poll.2
read.2
recv.2
select.2
semop.2
send.2
sigwaitinfo.2
spu_run.2
wait.2
write.2
aio_suspend.3
mq_receive.3
mq_send.3
scanf.3
sem_wait.3
usleep.3
inotify.7
   mtk
    ERRORS: Added reference to signal(7) in discussion of EINTR.

Various pages
  mtk
    Wrapped very long source lines.

Changes to individual pages
---

accept.2
  mtk
    Small wording change.

io_getevents.2
  mtk
    ERRORS: Add EINTR error.

open.2
  mtk
    ERRORS: Add EINTR error.

sigaction.2
  mtk
    Note circumstances in which each SA_* flag is meaningful.
  mtk
    Describe POSIX specification, and Linux semantics for
    SA_NOCLDWAIT when establishing a handler for SIGCHLD.
  mtk
    Add pointer under SA_RESTART to new text in signal(7)
    describing system call restarting.
  mtk
    Other minor edits.

truncate.2
  mtk
    ERRORS: Added EINTR error.

    A few minor rewordings.

wait.2
  mtk
    Remove statement that WUNTRACED and WCONTINUED only have effect
    if SA_NOCLDSTOP has not been set for SIGCHLD. That's not true.

errno.3
  mtk
    Add a pointer to signal(7) for further explanation of EINTR.

getgrouplist.3
  mtk
    SEE ALSO: Add passwd(5).

readdir.3
  mtk
    Remove <sys/types.h> from SYNOPSIS; POSIX.1-2001 does not
    require it.
    Some minor rewordings.

sleep.3
  mtk
    RETURN VALUE: explicitly mention interruption by signal handler.

SEE ALSO: add signal(7).

usleep.3
  mtk
    POSIX.1-2001 also only documents EINVAL.

group.5
  mtk
    SEE ALSO: Add getgrent(3), getgrnam(3).

passwd.5
  mtk
    SEE ALSO: Add getpwent(3), getpwnam(3).

proc.5
  mtk
    Add pointer to description of /proc/PID/cpuset in cpuset(7).

signal.7
  mtk
    Add a section describing system call restarting, and noting
    which system calls are affected
 by SA_RESTART, and which
    system calls are never restarted.
  mtk
    Describe the aberrant Linux behavior whereby a stop signal
    plus SIGCONT can interrupt some system calls, even if no
    signal handler has been established, and note the system
    calls that behave this way.
  mtk
    Note a few more architectures on which signal numbers are valid.
    SEE ALSO: added a number of pages.
  mtk
    Update async-signal-safe function list for POSIX.1-2004 (which
    adds sockatmark()).

========== Changes in man-pages-3.04 ==========

Released: 2008-07-15, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andrea Arcangeli <andrea@cpushare.com>
Andreas Mohr <andi@lisas.de>
Andrew Morgan <morgan@kernel.org>
Erik Bosman <ejbosman@cs.vu.nl>
John Brooks <aspecialj@gmail.com>
Nikanth
Karthikesan <knikanth@suse.de>
Pavel Heimlich <tropikhajma@seznam.cz>
Petr Gajdos <pgajdos@suse.cz>
Sam Varshavchik <mrsam@courier-mta.com>
Serge Hallyn <serue@us.ibm.com>
Sripathi Kodi <sripathik@in.ibm.com>
Vincent Lefevre <vincent@vinc17.org>

Apologies if I missed anyone!

Web site
---

licenses.html
  mtk
    A page describing the preferred licenses for new pages that
    are contributed to man-pages.

New and rewritten pages
---

utimensat.2
  mtk
    New page documenting the utimensat() system call, new in 2.6.22,
    and futimens() library function.

end.3
  mtk
    Documents etext, edata, and end symbols.

Newly documented interfaces in existing pages
---

memchr.3
  mtk
    Add description of rawmemchr().

proc.5

mtk
Document /proc/config.gz (new in kernel 2.6).
mtk, based on text from Documentation/vm/sysctl.txt
Document /proc/sys/vm/oom_kill_allocating_task
(new in Linux 2.6.24).
Document /proc/sys/vm/oom_dump_tasks
(new in Linux 2.6.25).
Document /proc/sys/vm/panic_on_oom
(new in Linux 2.6.18).

New links
---

edata.3
etext.3
mtk
Links to end.3.

futimens.3
mtk
Link to new utimensat.2.

getdate_err.3
mtk
Link to getdate.3.

h_errno.3
mtk
Link to gethostbyname.3.

optarg.3
opterr.3
optind.3
optopt.3
mtk
Links to getopt.3.

rawmemchr.3
mtk
Link to memchr.3.

sys_errlist.3
sys_nerr.3
mtk
Links to perror.3.

Global changes

Various pages
  mtk
    s/parameter/argument/ when talking about the things given
    to a function call, for consistency with majority usage.

Various pages
  mtk
    s/UNIX/Unix/, when not used as part of a trademark,
    for consistency with majority usage in pages.

Various pages
  mtk, after a note from Alain Portal
    Put SEE ALSO entries
 into alphabetical order.

Various pages
  mtk
    Remove period at end of SEE ALSO list.

Various pages
  mtk, after a note by Alain Portal
    Even when the CONFORMING TO section is just a list of standards,
    they should be terminated by a period.

getpriority.2
MB_LEN_MAX.3
MB_CUR_MAX.3
fwide.3
mblen.3
rtime.3
st.4
proc.5
bootparam.7
man-pages.7
utf-8.7
tcp.5
  mtk / Alain Portal
    Small wording fixes -- express <=, <, >=, > in words when in
    running text.

sched_setparam.2
sched_setscheduler.2
getgrent_r.3
hash.3
  mtk

Minor rewording w.r.t. use of the term "parameter".

Typographical or grammatical errors have been corrected in several
other places. (Many, many thanks to Alain Portal!)

Changes to individual pages
---

capget.2
  Andrew Morgan
    Update in line with addition of file capabilities and
    64-bit capability sets in kernel 2.6.2[45].

clock_nanosleep.2
  mtk
    Add "Link with -lrt"
 to SYNOPSIS.

getrusage.2
  Sripathi Kodi
    Document RUSAGE_THREAD, new in 2.6.26.
  mtk
    Improve description of RUSAGE_CHILDREN.
    Add pointer to /proc/PID/stat in proc(5).
    Other minor clean-ups.

ioprio_set.2
  Nikanth Karthikesan
    Since Linux 2.6.25, CAP_SYS_ADMIN is longer required to set
    a low priority (IOPRIO_CLASS_IDLE).

mount.2
  mtk
    Since Linux 2.6.26, MS_RDONLY honors bind mounts.

openat.2
  mtk
    SEE ALSO: add utimensat(3).

prctl.2
  Serge Hallyn, with some edits/input from mtk
    Document PR_CAPBSET_READ and PR_CAPBSET_DROP.
  Erik Bosman
    Document PR_GET_TSC and PR_SET_TSC.
  mtk, reviewed by Andrea Arcangeli
    Document PR_SET_SECCOMP and PR_GET_SECCOMP.
  mtk

PR_SET_KEEPCAPS and PR_GET_KEEPCAPS operate on a per-thread
setting, not a per-process setting.
mtk
Clarify fork(2) details for PR_SET_PDEATHSIG.
mtk
Add description of PR_SET_SECUREBITS
and PR_GET_SECUREBITS,
as well as pointer to further info in capabilities(7).
mtk
PR_GET_ENDIAN returns endianness info in location pointed to by
arg2 (not as function result, as was implied by previous text).
mtk
Expand description of PR_SET_NAME and PR_GET_NAME.
mtk
RETURN VALUE: bring up to date for various options.
mtk
Various improvements in ERRORS.
mtk
Note that PR_SET_TIMING setting of PR_TIMING_TIMESTAMP is not
currently implemented.
mtk
Minor changes:
* Clarify wording for PR_GET_UNALIGN, PR_GET_FPEMU, and
PR_GET_FPEXC.
* Some reformatting of kernel version information.
* Reorder PR_GET_ENDIAN and PR_SET_ENDIAN entries.

readlinkat.2
John Brooks / mtk
Fix and reword erroneous RETURN VALUE text.

recv.2
mtk
Noted which flags appeared in Linux 2.2.

sched_setaffinity.2
mtk, after a Fedora downstream patch

Update type used for cpusetsize argument in SYNOPSIS.

select.2
Andreas Mohr / mtk
Clarify "zero timeout" case.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=490868.

send.2
mtk
Noted which flags appeared in Linux 2.2.

sigaction.2
  mtk
    Document si_overrun and si_tid fields of siginfo structure.
    Add some text for si_trapno field.
    The si_errno field is *generally* unused.
  mtk
    Put descriptions of SA_* constants in alphabetical order.

signal.2
  mtk
    Rewrote and expanded portability discussion.
    NOTES: Show the raw prototype of signal() (without use of
    sighandler_t).

signalfd.2
  mtk
    Modify description of ssi_trapno field.

swapon.2
  mtk
    Fix two version number typos for MAX_SWAPFILES discussion:
    s/2.6.10/2.4.10/

utime.2
  mtk
     SEE ALSO: add utimensat(2), futimens(3).

dl_iterate_phdr.3
  Alain Portal
    SEE ALSO: Add elf(5).

crypt.3

 mtk, after a Fedora downstream patch
    Describe additional encryption algorithms.
    See also: https://bugzilla.redhat.com/show_bug.cgi?id=428280.

errno.3
  mtk
    Small rewrites in DESCRIPTION.

exec.3
  mtk, after a note from Alain Portal
    Small rewording.

exp10.3
  Alain Portal

SEE ALSO: Add log10(3).

exp2.3
  Alain Portal
    Add C99 to CONFORMING TO.

fgetgrent.3
  Alain Portal
    Add references to group(5).
  mtk
    Minor rewordings.
    SEE ALSO: add fopen(3).

fgetpwent.3
  Alain Portal
    Add reference to passwd(5).
  mtk
    Minor rewordings.
    SEE ALSO: add fopen(3).

frexp.3
  Alain Portal
    Add C99 to CONFORMING TO.

futimes.3
  mtk
     SEE ALSO: remove futimesat(2); add utimensat(2).

getopt.3
  mtk
    Add details on initial value of optind, and note that it can
    be reset (to 1) to restart scanning of an argument vector.
    Add a NOTES section describing the
 glibc-specific behavior
    when optind is reset to 0 (rather than 1).
    See http://groups.google.com/group/comp.unix.programmer/browse_thread/thread/be0d0b7a07a165fb
  mtk
    Note glibc extensions under CONFORMING TO.

getspnam.3
  mtk
    Improve comments on struct spwd.

getpw.3
  Alain Portal
    RETURN VALUE: note that errno is set on error.
  mtk
    Add EINVAL error.

insque.3
  mtk / Alain Portal
    Minor rewordings.

log.3
  Alain Portal
    Remove unnecessary sentence in ERRORS.

log10.3
  mtk
    SEE ALSO: Add exp10(3).

offsetof.3
  Alain Portal
    Small wording improvement.

pow.3
  Alain Portal
    Remove unnecessary sentence in ERRORS.

printf.3
  mtk / Alain Portal
    Many small formatting fixes.

proc.5
  mtk
    Remove redundant summary list of files in description of
    /proc/sys/kernel.
    Make kernel version for /proc/sys/kernel/panic_on_oops more precise.
    Make kernel
 version for /proc/sys/kernel/pid_max more precise.
    Add Documentation/sysctl/vm.txt to SEE ALSO.
    Other minor edits.

profil.3
  mtk / Alain Portal
     Small wording improvement.

rtime.3
  mtk, after a note by Alain Portal
    Clarify meaning of midnight on 1 Jan 1900/1970.
  mtk
    Remove netdate(1) and rdate(1) from SEE ALSO, since these pages
    don't seem to exist on Linux systems.

scanf.3
  Vincent Lefevre / mtk

Clarify treatment of initial white space by %% conversion
specification.
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=435648.
mtk
Many small formatting fixes.

stdin.3
Alain Portal
Rename CONSIDERATIONS section to NOTES, and relocate
to appropriate place on page.

tmpfile.3
mtk, after a note by Alain Portal
Prepend "POSIX.1-2001 specifies that: " to the sentence stating
that tmpfile() may write to stdout. (AFAICS, glibc's tmpfile()
does
not do this.)

ttyname.3
Alain Portal
Remove unnecessary sentence in ERRORS.

wcsdup.3
Alain Portal
Make wording more precise: the memory allocated by wcsdup(3)
should be freed with free(3).

wordexp.3
Alain Portal / mtk
Move example into proper EXAMPLE section.

tty_ioctl.4
mtk / Petr Gajdos
The features in the "Get and Set Window Size" subsection
require the inclusion of <sys/ioctl.h>.

capabilities.7
Serge Hallyn, plus a bit of work by mtk
Document file capabilities, per-process capability bounding set,
changed semantics for CAP_SETPCAP, and other changes in 2.6.2[45].
Add CAP_MAC_ADMIN, CAP_MAC_OVERRIDE, CAP_SETFCAP.
Various smaller fixes.
mtk, plus review by Serge Hallyn and Andrew Morgan
Add text detailing how CAP_SETPCAP (theoretically) permits -- on
pre-2.6.25 kernels, and 2.6.25 and later kernels with file
capabilities disabled -- a thread to change
the capability sets
of another thread.

Add section describing rules for programmatically adjusting
thread capability sets.
Add some words describing purpose of inheritable set.
Note existence of CONFIG_SECURITY_CAPABILITIES config option.
Describe rationale for capability bounding set.
Document securebits flags (new in 2.6.26).
Remove obsolete BUGS section.
SEE ALSO: Add getcap(8), setcap(8), and various libcap pages.

mtk

Add text noting that if we set the effective flag for one
file capability, then we must also set the effective flag for all
other capabilities where the permitted or inheritable bit is set.

mtk

Since Linux 2.6.25, CAP_SYS_ADMIN is no longer required for
ioprio_set() to set IOPRIO_CLASS_IDLE class.

mtk

Reword discussion of CAP_LINUX_IMMUTABLE to be file-system neutral.

man-pages.7

mtk

A list of standards in the CONFORMING TO
list should be
terminated by a period.
The list of pages in a SEE ALSO list should not be
terminated by a period.

tcp.7

mtk

Correct a detail for sysctl_tcp_adv_win_scale.
Formatting fixes.

========== Changes in man-pages-3.05 ==========

Released: 2008-07-23, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Brian M. Carlson <sandals@crustytoothpaste.ath.cx>
Fabian Kreutz <kreutz@dbs.uni-hannover.de>
Franck Jousseaume <franck.jousseaume@gmail.com>

Sam Varshavchik <mrsam@courier-mta.com>
Uli Schlacter <psychon@znc.in>

Apologies if I missed anyone!

New and rewritten pages
---

matherr.3
  mtk, with review by Andries Brouwer
    A description of the SVID-specified mechanism for reporting
    math exceptions.
     See http://thread.gmane.org/gmane.linux.man/266.

math_error.7
  mtk, with review and suggested input from Andries Brouwer
    A description of how math functions report errors.
    See http://thread.gmane.org/gmane.linux.man/249.

Global changes

Various pages
  mtk
    s/floating point/floating-point/ when used attributively.

Various pages
  mtk
    For consistency with majority usage:
    s/plus infinity/positive infinity/
    s/minus infinity/negative infinity/

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

brk.2
  mtk
    SEE ALSO: add end(3).

open.2
  Brian M. Carlson / mtk
    Remove ambiguity in description of support for O_EXCL on NFS.

As per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=491791.

prctl.2
  mtk
    Place options in some semblance of alphabetical order.
    (No content or formatting
 changes were made.)

cerf.3
  mtk
    Bump version number: these functions are still missing in
    glibc 2.8.

fenv.3
  mtk
    SEE ALSO: Add math_error(7).

INFINITY.3
  mtk
    SEE ALSO: Add math_error(7).

nan.3
  mtk
    Remove unneeded "Compile with" piece in SYNOPSIS.
    SEE ALSO: Add math_error(7).

rpc.3
  mtk / Franck Jousseaume
    Fix errors introduced into a few prototypes when converting
    function declarations to use modern C prototypes in man-pages-2.75.

ipv6.7
  mtk, after a report from Uli Schlacter
    Document the IPV6_V6ONLY flag.

========== Changes in man-pages-3.06 ==========

Released: 2008-08-05, Konolfingen

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andreas Jaeger <aj@novell.com>

Andries Brouwer <Andries.Brouwer@cwi.nl>
Fabian Kreutz <kreutz@dbs.uni-hannover.de>
Gernot Tenchio <g.tenchio@telco-tech.de>

New and rewritten pages
---

erfc.3
  mtk
    Created after removing the erfc() material from erf.3.
    Documents the complementary error function.

y0.3
  mtk
    Created after removing the y*() material from j0.3.
    Documents the Bessel functions of the second kind.
    Included ERRORS section; noted that an exception is not
    raised on underflow, see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6806;
    and errno is not set on overflow, see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6808;
    Included BUGS section noting that errno is incorrectly
    set for pole error; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6807.

scalbln.3
  mtk
    Created after removing the scalbln*() and scalbn*() material
    from scalb.3. Documents
 scalbln() and scalbn() functions.
    Included ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6803.

New and changed links

ynl.3
  mtk
    Changed these links to point to new y0.3 page.

Global changes

Various pages
  mtk
    s/floating point/floating-point/ when used attributively.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
---

crypt.3
  mtk
    Tweak discuss text describing support for Blowfish.

ctime.3
  mtk / Gernot Tenchio
    Added some words to make clear that the string returned by
    ctime() and asctime()
 is null-terminated.

math_error.7
  Sam Varshavchik
    Reverse order of SYNOPSIS and NAME sections.
  mtk

NOTES: Summarize the state of glibc support for exceptions
and errno for error reporting.

Changes to individual pages (math functions)

Almost all of the changes in this release relate to math man pages.
Very many changes were made to the math pages, including:

* Fixed feature test macros (FTMs). Often, the FTM requirements
for the "float" and "long double" versions of a math function are
different from the requirements for the "double" version. Each math
page now shows the correct FTM requirements for all three versions
of the function(s) it describes. This may have required either
a change to the existing FTM text (if the requirements for the
"double" function were already described), or the addition of an FTM
description to a SYNOPSIS where one was not previously present
(typically because
the "double" version of the function does not
require any FTMs to be defined).
* CONFORMING TO: in many cases, POSIX.1-2001 was not mentioned.
Where a function is specified in POSIX.1-2001, this is now noted.
Also, statements about what other standards a function conforms to
were generally clarified. (The wording about which functions conformed
to C99 was previously often done as an add on sentence; now it is made
part of the first sentence of the CONFORMING TO section, along with
POSIX.1-2001.)
* RETURN VALUE: in many cases, pages lacked descriptions of the return
value when the function arguments are special values such as +0, -0,
NaN (not-a-number), +infinity, -infinity, etc. This has been fixed.
I carried out tests on glibc 2.8 to ensure that all of these
functions match the RETURN VALUE descriptions (and the POSIX.1-2001
requirements).
* ERRORS: many pages lacked a clear (or indeed any) description of
how errno is set on error and what exception
is raised for each error.
This has been fixed. The ERRORS sections are now generally headed up
as per the POSIX.1 way of doing things, describing Pole / Range /
Domain errors, as applicable.
I carried out tests on glibc 2.8 to ensure that all of these
functions match the ERRORS descriptions. Deviations from POSIX.1-2001
requirements have been filed as glibc bug reports, and noted in the
man pages. (The pages now describe the situation for ERRORS as at glibc
2.8; I may eventually try and extend the text with descriptions of
changes in older versions of glibc.)
NOTE: one point that has not been covered in any page is the
circumstances that generate inexact (FE_INEXACT) exceptions.

(The details for these exceptions are not specified in POSIX.1-2001,
and I haven't gone looking for the standards that describe the details.)

acos.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.

   Rewrote ERRORS section.
    Updated CONFORMING TO.

acosh.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    Added RETURN VALUE section.
    Rewrote ERRORS section.
    Updated CONFORMING TO.

asin.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.
    Rewrote ERRORS section.
    Updated CONFORMING TO.

asinh.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    DESCRIPTION: Some rewording.
    RETURN VALUE: Added details for special argument cases.
    Added (null) ERRORS section.
    Updated CONFORMING TO.

atan.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    DESCRIPTION: Some rewording.
    RETURN VALUE: Added details for special argument cases.
    Added (null) ERRORS section.
    Updated CONFORMING TO.

atan2.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    DESCRIPTION:
 Some rewording.
    RETURN VALUE: Added details for special argument cases.
    Added (null) ERRORS section.

Updated CONFORMING TO.

atanh.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6759.

cbrt.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added (null) ERRORS section.
Updated CONFORMING TO.

ceil.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.
NOTES: Added some details.

copysign.3
mtk
Added RETURN
VALUE section.
Updated CONFORMING TO.

cos.3
mtk
SYNOPSIS: Added feature test macro requirements.
Rewrote RETURN VALUE section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780.
Updated CONFORMING TO.

cosh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

erf.3
  mtk
    Removed the erfc() material (there is now a new erfc page).
    Reason: the functions are logically separate; also their
    return values differ, and it would have been confusing
    to document them on the same page.
    SYNOPSIS: Fixed feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set; see
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6785.
    Updated CONFORMING TO.

exp.3
  mtk
     SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set; see
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6786.
    Updated CONFORMING TO.

exp10.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set for underflow;
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787.

exp2.3
  mtk
    Added RETURN VALUE and ERRORS sections.
    Updated CONFORMING TO.

expm1.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set for overflow;
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788.
    Updated CONFORMING TO.
    Added BUGS section, describing bogus underflow exception for -large,
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6778;
     and describing bogus invalid exception for certain +large,
    see http://sources.redhat.com/bugzilla/show_bug.cgi?id=6814.

fabs.3
  mtk
    SYNOPSIS: Added feature test macro requirements.

Added RETURN VALUE section.
Updated CONFORMING TO.

fdim.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6796.
Updated CONFORMING TO.

fenv.3
mtk
Make style of writing exception names consistent with other
pages and POSIX.1-2001.
Updated CONFORMING TO.

finite.3
mtk
SYNOPSIS: Fixed feature test macro requirements.

floor.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Enhanced.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section.
Updated CONFORMING TO.

fma.3
mtk
SYNOPSIS: Added feature test macro requirements.
DESCRIPTION: Some rewording.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3
fmin.3
mtk
NAME: Make description clearer
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
CONFORMING TO: Added POSIX.1-2001.
Added RETURN VALUE and ERRORS sections.

fmod.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.
    Rewrote ERRORS section; noted that errno is not always set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
    Updated CONFORMING TO.

fpclassify.3
  mtk
    Minor wording changes.
     CONFORMING TO: Added POSIX.1-2001.
    SEE ALSO: Add signbit(3).

frexp.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added details to RETURN VALUE section.
    Added (null) ERRORS section.
    CONFORMING TO: Added POSIX.1-2001.

gamma.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    Added (null) RETURN VALUE section referring to tgamma(3).
    Added (null) ERRORS section referring to tgamma(3).
    CONFORMING TO: Rewrote.

hypot.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    DESCRIPTION: note that calculation is done without causing
    undue overflow or underflow.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not always set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6795.
    Updated CONFORMING TO.

ilogb.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Rewrote RETURN VALUE
 section.
    Rewrote ERRORS section; noted that errno is not set, and in some
    cases an exception is not raised; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6794.
    CONFORMING TO: Added POSIX.1-2001.

isgreater.3
  mtk
    NAME: Make description clearer
    Improve the description of isunordered().
    Added RETURN VALUE and ERRORS sections.
    Formatting fixes.
    A few wording improvements.

j0.3
  mtk
    Removed material for the y*() functions to a separate y0.3 page.
    Reason: the return values and errors/exceptions differ, and it
    would have been confusing to document them on the same page.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6805.

ldexp.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE and ERRORS sections.
    Updated CONFORMING
 TO.

lgamma.3
  mtk
    Note that these functions are deprecated.
    SYNOPSIS: Fixed feature test macro requirements.
    Added RETURN VALUE and ERRORS sections referring to lgamma(3).
    Added BUGS section noting that pole error sets errno to EDOM,
    when it should be ERANGE instead; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6777.

log.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Rewrote ERRORS section.
    Updated CONFORMING TO.

log10.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    Added RETURN VALUE section.
    Rewrote ERRORS section.
    Updated CONFORMING TO.

log1p.3

mtk
SYNOPSIS: Fixed feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6792.
Updated CONFORMING
TO.

log2.3
mtk
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

logb.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added a little detail; some rewordings.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6793.
CONFORMING TO: Added POSIX.1-2001.

lrint.3
mtk
DESCRIPTION: some rewording.
RETURN VALUE: Added details for special argument cases.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6798.
CONFORMING TO: Added POSIX.1-2001.

lround.3
mtk
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6797.
CONFORMING TO: Added POSIX.1-2001.

modf.3
mtk
SYNOPSIS: Added feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Added (null) ERRORS section.
CONFORMING TO: Added POSIX.1-2001.

nan.3
mtk
Small wording changes.

CONFORMING TO: Added POSIX.1-2001.

nextafter.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
RETURN VALUE: Added details for special argument cases.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6799.
CONFORMING TO: Added POSIX.1-2001.

pow.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.
Added BUGS section noting that pole error sets errno to EDOM,
when it should be ERANGE instead; see also
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776.

remainder.3
mtk
SYNOPSIS: Fixed feature test macro requirements.
DESCRIPTION: added some details.
RETURN VALUE: Added details for special argument cases.
Rewrote ERRORS section; noted that errno is not always set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
Updated CONFORMING TO.
Added BUGS section noting that remainder(nan(""), 0)
wrongly causes a domain error; see
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6779

remquo.3
mtk
Added RETURN VALUE section.
Added ERRORS section; noted that errno is not set; see
also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6801.
Updated CONFORMING TO.

fmax.3
fmin.3
mtk
NAME: Make description clearer
SYNOPSIS: Added feature test macro requirements.
SYNOPSIS: Remove unneeded "Compile with" piece.
CONFORMING TO: Added POSIX.1-2001.

Added RETURN VALUE and ERRORS sections.

fmod.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    RETURN VALUE: Added details for special argument cases.
    Rewrote ERRORS section; noted that errno is not always set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783.
    Updated CONFORMING TO.

fpclassify.3
    CONFORMING TO: Added POSIX.1-2001.

rint.3
  mtk
    SYNOPSIS: Fixed feature test macro requirements.
    DESCRIPTION: added some details.
    RETURN VALUE: Added details for special argument cases.
    ERRORS: no errors can occur (previous text was misleading).
    CONFORMING TO: Added POSIX.1-2001.
    NOTES: point out that lrint() may be preferred in some cases.

round.3
  mtk
    DESCRIPTION: added some details.
    RETURN VALUE: Added details for special argument cases.
    ERRORS: no errors can occur (previous text was misleading).
    CONFORMING TO: Added POSIX.1-2001.
     NOTES: point out that lround() may be preferred in some cases.

scalb.3
  mtk
    Removed the scalbn() and scalbln() material to a separate
    scalbln.3 page. Reason: scalb() is obsolete; also the
    exception/error conditions differ somewhat, so that it
    would have been confusing to document them on the same page.
    SYNOPSIS: Fixed feature test macro requirements.
    DESCRIPTION: some rewrites and added details.
    Added RETURN VALUE section.
    Added ERRORS section; noted that errno is not set; see
    also http://sources.redhat.com/bugzilla/show_bug.cgi?id=6803
    and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6804.
    CONFORMING TO: Rewrote.

signbit.3
  mtk
    SYNOPSIS: Added feature test macro requirements.
    SYNOPSIS: Remove unneeded "Compile with" piece.

Added RETURN VALUE section.
Added (null) ERRORS section.
CONFORMING TO: Added POSIX.1-2001.

sin.3
mtk

SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781.
Updated CONFORMING TO.

sincos.3
mtk
DESCRIPTION: Added details for special argument cases.
Added (null) RETURN VALUE section.
Added ERRORS section.

sinh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Updated CONFORMING TO.

sqrt.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Rewrote ERRORS section.
Updated CONFORMING TO.

tan.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added ERRORS section.
Added ERRORS section; noted errno is not set:
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782.

Updated CONFORMING TO.

tanh.3
mtk
SYNOPSIS: Added feature test macro requirements.
Added RETURN VALUE section.
Added (null) ERRORS section.

Updated CONFORMING TO.

tgamma.3
  mtk
    Added RETURN VALUE section.
    Rewrote ERRORS section; noted that errno is not set /
    incorrectly set in some cases; see also
    http://sources.redhat.com/bugzilla/show_bug.cgi?id=6809
    and http://sources.redhat.com/bugzilla/show_bug.cgi?id=6810.
    CONFORMING TO: Added POSIX.1-2001.
    Added NOTES section to hold text explaining origin of tgamma().

trunc.3
  mtk
    RETURN VALUE: small rewording.
    CONFORMING TO: Added POSIX.1-2001.
    Added NOTES section explaining that result may be too large
    to store in an integer type.

========== Changes in man-pages-3.07 ==========

Released: 2008-08-12, Konolfingen

Contributors

The following people contributed notes, ideas, or
 patches that have
been incorporated in changes in this release:

Alain Portal <aportal@univ-montp2.fr>
Andries Brouwer <Andries.Brouwer@cwi.nl>
Christoph Lameter <cl@linux-foundation.org>
Cliff Wickman <cpw@sgi.com>
Fabian Kreutz <kreutz@dbs.uni-hannover.de>
Filippo Santovito <filippo.santovito@email.it>
Gerrit Renker <gerrit@erg.abdn.ac.uk>

Samuel Thibault <samuel.thibault@ens-lyon.org>
Sam Varshavchik <mrsam@courier-mta.com>
Soh Kam Yung <sohkamyung@gmail.com>
Stephane Chazelas <stephane_chazelas@yahoo.fr>

Pavel Heimlich <tropikhajma@seznam.cz>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages
---

move_pages.2
  Christoph Lameter, various edits and improvements by mtk
    Documentation of the move_pages() system call.
    This page was formerly
 part of the numactl package, but really
    belongs in man-pages (since it describes a kernel interface).

clock_getcpuclockid.3
  mtk
    New page documenting the clock_getcpuclockid() library function,
    available since glibc 2.2.

udplite.7
  Gerrit Renker
    Document the Linux implementation of the UDP-Lite protocol,
    new in Linux 2.6.20.

Newly documented interfaces in existing pages
---

proc.5
  Christoph Lameter, minor edits and improvements by mtk
    Documentation of the /proc/PID/numa_maps file.
    This material was formerly the numa_maps.5 page in the numactl
    package, but really belongs in man-pages (since it describes
    a kernel interface).

Global changes
---

nanosleep.2
inet_ntop.3
inet_pton.3
scanf.3
initrd.4
  mtk
    Fix mis-ordered (.SH) sections.

connect.2
socket.2
rtnetlink.3
arp.7
ddp.7
ip.7
ipv6.7
netlink.7
packet.7
raw.7
rtnetlink.7
socket.7
tcp.7
udp.7
unix.7
x25.7
   mtk
      s/PF_/AF_/ for socket family constants. Reasons: the AF_ and
      PF_ constants have always had the same values; there never has
      been a protocol family that had more than one address family,
      and POSIX.1-2001 only specifies the AF_* constants.

Typographical or grammatical errors have been corrected in several
other places.

Changes to individual pages
----

execve.2
  mtk
      The floating-point environment is reset to the default
      during an execve().

get_mempolicy.2
  Lee Schermerhorn
      Misc cleanup of get_mempolicy(2):
      + mention that any mode flags will be saved with mode.
        I don't bother to document mode flags here because we
        already have a pointer to set_mempolicy(2) for more info
        on memory policy. mode flags are discussed there.
      + remove some old, obsolete [IMO] NOTES and 'roff comments.
  Lee Schermerhorn
      Update the
 get_mempolicy(2) man page to add in the description of
      the MPOL_F_MEMS_ALLOWED flag, added in 2.6.23.
  mtk

Document additional EINVAL error that occurs is MPOL_F_MEMS_ALLOWED
is specified with either MPOL_F_ADDR or MPOL_F_NODE.

getitimer.2
mtk
CONFORMING TO: POSIX.1-2008 marks getitimer() and setitimer()
obsolete.

mbind.2
Lee Schermerhorn
Fix error conditions, now that the kernel silently ignores
nodes outside the task's cpuset, as long as one valid node
remains.

Now that cpuset man page exists, we can refer to it. Remove
stale comment regarding lack thereof.
Lee Schermerhorn
Add brief discussion of mode flags.
Lee Schermerhorn
Attempt to clarify discussion of MPOL_DEFAULT.
mtk
Fix URI reference for libnuma.

mprotect.2
mtk / Maxin John
Remove EFAULT from errors. Under ENOMEM error, note that
EFAULT was the error produced in some cases
for kernels before
2.4.19.

msgctl.2
mtk, after a note from Filippo Santovito
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

set_mempolicy.2
Lee Schermerhorn
Fix up the error return for nodemask containing nodes disallowed by
the process' current cpuset. Disallowed nodes are now silently ignored,
as long as the nodemask contains at least one node that is on-line,
allowed by the process' cpuset and has memory.

Now that we have a cpuset man page, we can refer to cpusets directly
in the man page text.

Lee Schermerhorn
Another attempt to rationalize description of MPOL_DEFAULT.

Since ~2.6.25, the system default memory policy is "local allocation".
MPOL_DEFAULT itself is a request to remove any non-default policy and
"fall back" to the surrounding context. Try to say that without delving
into implementation
details.

Lee Schermerhorn
Add discussion of mempolicy mode flags to set_mempolicy(2).
This adds another reason for EINVAL.

setpgid.2
mtk
CONFORMING TO: POSIX.1-2008 marks setpgrp() obsolete.

semctl.2
mtk, after a note from Filippo Santovito
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

shmctl.2
Filippo Santovito / mtk
In the ipc_perm structure definition, some fields were
incorrectly named: s/key/__key/ and s/seq/__seq/.

utime.2
mtk
CONFORMING TO: POSIX.1-2008 marks utime() obsolete.
CONFORMING TO: POSIX.1-2008 removes the POSIX.1-2001 LEGACY
marking of utimes(), so mention of this point has been
removed from the page.

vfork.2
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of vfork().

atan2.3
Fabian Kreutz
SEE ALSO Add carg(3).

bcmp.3
mtk
CONFORMING TO: POSIX.1-2008
removes the specification of bcmp().

bsd_signal.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification ofcw
bsd_signal().

bzero.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of bzero().

cexp2.3
  mtk
    AVAILABILITY: These functions are still not in glibc
    as at version 2.8.

clock_getres.3
  mtk
     SEE ALSO: Add clock_getcpuclockid(3).

clog2.3
  mtk
    AVAILABILITY: These functions are still not in glibc
    as at version 2.8.

ctime.3
  mtk
    POSIX.1-2008 marks asctime(), asctime_r(), ctime(), and ctime_r()
    as obsolete.

dprintf.3
  mtk
   CONFORMING TO: These functions are nowadays in POSIX.1-2008.

ecvt.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specifications of
    ecvt() and fcvt().

ftime.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of ftime().

ftw.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks ftw() as obsolete.

gcvt.3
   mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of gcvt().

getcwd.3
  Reuben Thomas / mtk
    Clarify description of getcwd() for buf==NULL case;

CONFORMING TO: According to POSIX.1, the behavior of getcwd()
is unspecified for the buf==NULL case.
mtk
Add an introductory paragraph giving an overview of what these
functions do.
Fix error in description of getwd(): it does not truncate the
pathname; rather, it gives an error if the pathname exceeds
PATH_MAX bytes.
Rewrote RETURN VALUE section.
Add EINVAL ENAMETOOLONG errors for getwd().
Various other clarifications and wording fixes.
CONFORMING TO: POSIX.1-2001 does not define any errors for
getwd().
CONFORMING TO: POSIX.1-2008 removes the specification of getwd().

gethostbyname.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of
gethostbyname(), gethostbyaddr(), and
h_errno.

gets.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of gets().

iconv.3
iconv_close.3
iconv_open.3
mtk
VERSIONS: These functions are available in glibc since version 2.1.

index.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of
index() and rindex().

isalpha.3
mtk
CONFORMING TO: POSIX.1-2008 marks isalpha() as obsolete.

makecontext.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specifications of
makecontext() and swapcontext().

memchr.3
mtk
VERSIONS: memrchr() since glibc 2.2; rawmemchr() since glibc 2.1.

mempcpy.3
  mtk
    VERSIONS: mempcpy() since glibc 2.1.

mktemp.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of mktemp().

opendir.3
  mtk
    CONFORMING TO: POSIX.1-2008 specifies fdopendir().

rand.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks rand_r() as obsolete.

siginterrupt.3
  mtk
    CONFORMING TO: POSIX.1-2008
 marks siginterrupt() as obsolete.

sigset.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks sighold(), sigignore(),
    sigpause(), sigrelse(), and sigset() as obsolete.

strchr.3
  mtk
    VERSIONS: strchrnul() since glibc 2.1.1.

tempnam.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks tempnam() as obsolete.

tmpnam.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks tmpnam() as obsolete.

toascii.3
  mtk
    CONFORMING TO: POSIX.1-2008 marks toascii() as obsolete.

ualarm.3
  mtk
    CONFORMING TO: POSIX.1-2008 removes the specification of ualarm().

ulimit.3

mtk
CONFORMING TO: POSIX.1-2008 marks ulimit() as obsolete.

usleep.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of usleep().

standards.7
mtk
Updated details for POSIX.1-2008, and noted that if
POSIX.1-2001 is listed in the CONFORMING TO section of a man
page, then the reader can assume that the interface is also
specified
in POSIX.1-2008, unless otherwise noted.

time.7
mtk
SEE ALSO: Add clock_getcpuclockid(3).

udp.7
mtk
SEE ALSO: add udplite(7).

Changes to individual pages (math functions)

Various changes here following on from the big update to the
math pages in the previous release. Test results going back
glibc 2.3.2 (so far) allowed updates to various pages to note
changes in historical behavior for error reporting by math
functions. Thanks to the following people for providing me
with test results on various distributions and glibc versions:
Alain Portal, Andries Brouwer, Fabian Kreutz, Heikki Orsila,
Khalil GHORBAL, Pavel Heimlich, Reuben Thomas, Samuel Thibault,
Soh Kam Yung, and Stephane Chazelas

cabs.3
cacos.3
cacosh.3
carg.3
casin.3
casinh.3
catan.3
catanh.3
ccos.3
ccosh.3
cexp.3

cimag.3
clog.3
clog10.3
conj.3
cpow.3
cproj.3
creal.3
csin.3
csinh.3
csqrt.3
ctan.3
ctanh.3
exp10.3
exp2.3
fdim.3
fenv.3
fma.3
fmax.3
fmin.3
log2.3
lrint.3
lround.3
nan.3
pow10.3
remquo.3
round.3
scalbln.3
sincos.3
tgamma.3
trunc.3
  mtk
    Added VERSIONS section noting that these functions first
    appeared in glibc in version 2.1.

cosh.3
  mtk
    BUGS: In glibc 2.3.4 and earlier, an FE_OVERFLOW exception is not
    raised when an overflow occurs.

fenv.3
  mtk / Fabian Kreuz
    Provide more detail in the description of rounding modes.
    Add text describing FLT_ROUNDS (formerly in fma.3).
    Add BUGS section pointing out the FLT_ROUNDS does not reflect
    changes by fesetround().

fma.3
  mtk

Remove text about FLT_ROUNDS, replacing with a cross-reference
to fenv(3).

fpclassify.3
mtk
CONFORMING TO: Note that the standards provide a weaker guarantee
for the return value of isinf().

log.3
mtk
BUGS: In glibc 2.5 and earlier, log(nan("")) produces a bogus
FE_INVALID exception.

lround.3
mtk
Add reference
to fenv(3) for discussion of current rounding mode.

nextafter.3
mtk
BUGS: In glibc 2.5 and earlier these functions do not raise an
FE_UNDERFLOW exception on underflow.

pow.3
mtk
BUGS: described buggy NaN return when x is negative and y is large.
See also: http://sources.redhat.com/bugzilla/show_bug.cgi?id=3866.
BUGS: Note the bogus FE_INVALID exception that occurred in glibc
2.3.2 and earlier on overflow and underflow.

remainder.3
mtk
Add reference to fenv(3) for discussion of current rounding mode.

round.3
mtk
Add reference to fenv(3) for discussion of current rounding mode.

scalb.3
mtk
CONFORMING TO: POSIX.1-2008 removes the specification of scalb().

tgamma.3
mtk
BUGS: In glibc 2.3.3, tgamma(+-0) produced a domain error
instead of a pole error.

y0.3

mtk
In glibc 2.3.2 and earlier, these functions do not raise an
FE_INVALID exception for a domain
error.

math_error.7
mtk
Rewrite introductory paragraph.
Point out that a NaN is commonly returned by functions that report
a domain error.

========== Changes in man-pages-3.08 ==========

Released: 2008-08-27, Zurich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Gerrit Renker <gerrit@erg.abdn.ac.uk>
Li Zefan <lizf@cn.fujitsu.com>
Mike Bianchi <MBianchi@foveal.com>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

getnetent_r.3
mtk
Documents getnetent_r(), getnetbyname_r(),
and getnetbyaddr_r(), the reentrant equivalents of
getnetent(), getnetbyname(), and getnetbyaddr().

getprotoent_r.3
mtk
Documents getprotoent_r(), getprotobyname_r(), and
getprotobynumber_r(),
the reentrant equivalents of
getprotoent(), getprotobyname(), and getprotobynumber().

getrpcent_r.3
  mtk
    Documents getrpcent_r(), getrpcbyname_r(), and
    getrpcbynumber_r(), the reentrant equivalents of
    getrpcent(), getrpcbyname(), and getrpcbynumber().

getservent_r.3
  mtk
    Documents getservent_r(), getservbyname_r(), and
    getservbyport_r(), the reentrant equivalents of
    getservent(), getservbyname(), and getservbyport().

numa.7
  mtk
    A new page giving overview details for the Linux NUMA interfaces.
    Incorporates some material from mbind.2, and the description
    of /proc/PID/numa_maps from proc.5.

Newly documented interfaces in existing pages
---

crypt.3
  mtk
    Add description of crypt_r().

New and changed links
---

crypt.3
  mtk
    New link to crypt.3.

getnetbyname_r.3
getnetbyaddr_r.3
  mtk

  New links to new getnetent_r.3.

getprotobyname_r.3
getprotobynumber_r.3
  mtk
    New links to new getprotoent_r.3.

getrpcbyname_r.3
getrpcbynumber_r.3

mtk
New links to new getrpcent_r.3.

getservbyname_r.3
getservbyport_r.3
mtk
New links to new getservent_r.3.

numa_maps.5
mtk
Link to new numa(7) page, which incorporates the
/proc/PID/numa_maps description.
As part of the numactl() package, the /proc/PID/numa_maps
documentation was in a numa_maps.5 page; this link
ensures that "man 5 numa_maps" still works.
(Eventually, we may want to remove this link.)

Global changes
---

get_mempolicy.2
mbind.2
move_pages.2
set_mempolicy.2
mtk
Add reference to numa(7) for information on library support.
Added a VERSIONS section.
SEE ALSO: Add numa(7).

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
mkdirat.2
mknodat.2
linkat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
mkfifoat.3
psignal.3
strsignal.3
mtk
These interfaces are specified in POSIX.1-2008.

Changes to individual pages
---

eventfd.2
  Vijay Kumar
    When an eventfd overflows, select() indicates the file as both
    readable and writable (not as having an exceptional condition).

fcntl.2
  mtk
    F_DUPFD_CLOEXEC is specified in POSIX.1-2008.

getrlimit.2
  mtk
    NOTES: Add text mentioning the shell 'ulimit' (or 'limit')
    built-in command for setting resource limits.

gettimeofday.2
  mtk
    CONFORMING TO: POSIX.1-2008 marks gettimeofday() as obsolete.

link.2
  mtk
    Note kernel version where Linux stopped following symbolic
    links in 'oldpath'; see also http://lwn.net/Articles/294667.
    POSIX.1-2008 makes it implementation-dependent whether or not
    'oldpath' is dereferenced if it is a symbolic link.
    Add a reference to linkat(2) for an interface that allows
    precise
 control of the treatment of symbolic links.

mbind.2
  mtk
    Remove material on library support and numactl; that material
    is now in numactl.7.

mmap.2
  mtk
    Add kernel version numbers for MAP_32BIT.
    Add some details on MAP_32BIT (see http://lwn.net/Articles/294642).

move_pages.2
  mtk
    Added VERSIONS (from kernel 2.6.18) and CONFORMING TO sections.

open.2
  mtk

O_CLOEXEC is specified in POSIX.1-2008.

socket.2
  mtk
    s/d/domain/ for name of argument.
    Add reference to socket(2) for further information on
    domain, type, and protocol arguments.

utimensat.2
  mtk
    CONFORMING TO: POSIX.1-2008 specifies utimensat() and futimens().

dirfd.3
  mtk
    CONFORMING TO: Add POSIX.1-2008; other minor changes.

exec.3
  mtk
    Small rewording: "s/returned/failed with/ [an error]".

fmemopen.3
  mtk
    Since glibc 2.7, it is possible to seek past the end of
    a stream created by open_memstream().
  Add a BUGS section
    describing the bug in earlier glibc versions.

gethostbyname.3
  mtk
    Clarify exactly which functions are obsoleted by getnameinfo()
    and getaddrinfo().

getnetent.3
  mtk
    Rephrase description in terms of a database, rather than a file.
    Note that each of the get*() functions opens a connection to
    the database if necessary.
    The database connection is held open between get*() calls if
    'stayopen' is non-zero (not necessarily 1).
    s/zero terminated list/NULL-terminated list/
  mtk
    In glibc 2.2, the type of the 'net' argument for getnetbyaddr()
    changed from 'long' to 'uint32_t'.
  mtk
    Note that the gethostbyaddr() 'net' argument is in host byte order.
  mtk
    RETURN VALUE: emphasize that returned pointer points to a
    statically allocated structure.

SEE ALSO: add getnetent_r.3.

getprotoent.3
mtk
Rephrase description in terms
of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getprotoent_r.3.

getrpcent.3
mtk
s/rpc/RPC/.
Rephrase description in terms of a database, rather than a file.
Note that each of the get*() functions opens a connection to
the database if necessary.
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getrpcent_r.3.

getservent.3
mtk
Rephrase description in terms of a database, rather than a file.
Note that
each of the get*() functions opens a connection to
the database if necessary.
The database connection is held open between get*() calls if
'stayopen' is non-zero (not necessarily 1).
s/zero terminated list/NULL-terminated list/
mtk
RETURN VALUE: emphasize that returned pointer points to a
statically allocated structure.
SEE ALSO: add getservent_r.3.

mkdtemp.3
mtk
CONFORMING TO: this function is specified in POSIX.1-2008.

mq_notify.3
Venkatesh Srinivas

s/sigev_notify_function/sigev_thread_function/
as per http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=494956.

realpath.3
mtk
Relocate text for resolved_path==NULL case to DESCRIPTION.
POSIX.1-2001 leaves the resolved_path==NULL case as
implementation-defined; POSIX.1-2008 specifies the behavior
described in this man page.

sem_init.3
mtk
POSIX.1-2008 rectifies the POSIX.1-2001 omission, specifying
that zero is returned by a successful sem_init() call.

core.5
Mike Bianchi / mtk
Make the page more helpful to non-programmers by referencing
the documentation of the shell's 'ulimit' command in the
discussion of RLIMIT_CORE and RLIMIT_FSIZE.
SEE ALSO: Add bash(1).
mtk
Note that a core dump file can be used in a debugger.

proc.5
mtk
Remove /proc/PID/numa_maps material (it is now in numa(7)).

cpuset.7
mtk
SEE ALSO: Add numa(7).

inotify.7
mtk / Li Zefan
Explain bug that occurred in coalescing identical events in
kernels before 2.6.25.
(See commit 1c17d18e3775485bf1e0ce79575eb637a94494a2
"A potential bug in inotify_user.c" in the 2.6.25 Changelog.)

pthreads.7
mtk
Update thread-safe functions list with changes in POSIX.1-2008.
SEE ALSO: add proc(5).

signal.7
mtk
Update list of async-signal-safe functions for POSIX.1-2008.

==========

Changes in man-pages-3.09 ==========

Released: 2008-09-10, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Bernd Eckenfels <be-mail2006@lina.inka.de>
Bruno Haible <bruno@clisp.org>
Carsten Emde <Carsten.Emde@osadl.org>
Christopher Head <chead@telus.net>

Joe Korty <joe.korty@ccur.com>
Marko Kreen <markokr@gmail.com>
Martin (Joey) Schulze <joey@infodrom.org>
Mats Wichmann <mats.d.wichmann@intel.com>
Michael Schurter <michael@susens-schurter.com>
Mike Bianchi <MBianchi@foveal.com>
Mike Frysinger <vapier@gentoo.org>
Sam Varshavchik <mrsam@courier-mta.com>
Suka <sukadev@us.ibm.com>
Timothy S. Nelson <wayland@wayland.id.au>
Tolga Dalman <tdalman@project-psi.org>
Török Edwin <edwintorok@gmail.com>

Apologies if I missed anyone!

New and rewritten pages

---

fopencookie.3

mtk

Document fopencookie(3), a library function that allows
custom implementation of a stdio stream.

networks.5

Martin (Joey) Schulze, with a few light edits by mtk

Documents the /etc/networks file.

Global changes

Various pages
  mtk
    s/time zone/timezone/ for consistency across pages and
    with POSIX.1.

kill.2
sigaction.2
sigpending.2
sigprocmask.2
sigsuspend.2
confstr.3
ctermid.3
ctime.3
ferror.3
flockfile.3
fopen.3
getaddrinfo.3
getgrnam.3
getnameinfo.3
getopt.3
getpwnam.3
longjmp.3
popen.3
rand.3
readdir.3
setjmp.3
sigsetops.3
sigwait.3
strtok.3
tzset.3
unlocked_stdio.3
  mtk
    Add/fix feature test macro requirements.

Changes to individual pages
---

fcntl.2
  mtk, after a note by Mike Bianchi
    More clearly and consistently describe whether
    or not the third argument to fcntl() is required,
    and what its type should be.
  mtk
    Move description of negative l_len

from NOTES, integrating
it into the discussion of file locking.
Minor rewrites of the text on file locking.

getrusage.2
Bernd Eckenfels
SEE ALSO: Add clock(3), clock_gettime(3).
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475

ioctl_list.2
mtk
Remove old sentence about where to send updates for this page.
Add more detail on mount options that prevent updates to atime.

sched_setscheduler.2
Carsten Emde
Update kernel version numbers relating to real-time support.

stat.2
H. Peter Anvin
Note that lstat() will generally not trigger automounter
action, whereas stat() will.

clock.3
Bernd Eckenfels
SEE ALSO: Add clock_gettime(3).
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=353475

clock_getres.3
Tolga Dalman / mtk
Add "Link with -lrt" to SYNOPSIS; remove now redundant
sentence mentioning librt from NOTES.

getdate.3
mtk
Rewrite
description of getdate_r() and integrate into main text
(rather than describing in NOTES).
Other parts rewritten for greater clarity.
Make it clearer in the main text that glibc does not implement %Z;
remove discussion of that point from NOTES.
Added an example program.

hsearch.3
mtk
Noted that table size as specified by 'nel' is immutable.
Described differences between hsearch() and hsearch_r().
Added missing pieces to RETURN VALUE.

Added a number of new entries under ERRORS.
NOTES: added some basic advice on sizing the hash table;
noted that when a table is destroyed, the caller is responsible
for freeing the buffers pointed to by 'key' and 'data' fields.
One of the BUGS was fixed in glibc 2.3.
Rewrote and clarified various other pieces.
Rename arguments for reentrant functions, using same name as
glibc headers: s/ret/retval/; s/tab/htab/.
mtk, after
a suggestion by Timothy S. Nelson
Integrate discussion of reentrant functions into main discussion
(rather than as a short paragraph at the end).

iconv.3
Bruno Haible
Describe "shift sequence" input.

ptsname.3
sukadev
Fix return type of ptsname_r() in SYNOPSIS.

readdir.3
H. Peter Anvin
s/stat(2)/lstat(2)/ when discussing d_type (since we
are talking about a case where we might be interested to
whether the file itself is a symbolic link).

sigsetops.3
Chris Head, signed-off-by: Mike Frysinger
Fix typo: s/sigdelset/sigorset/

proc.5
Mats Wichmann / mtk
s/\[number]/[pid]/ in file names for /proc/PID files.
And similar changes for task/[tid] sub-directories.
mtk / Mats Wichmann
In the description if /proc/[pid]/environ, remove reference to
lilo(8)/grub(8) since there seems to be nothing in those pages
that related to this /proc file.
Michael Schurter / mtk
Remove sentence wrongly saying that /proc/meminfo reports
info in bytes;
see http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=462969
mtk
Note that /proc/meminfo reports system-wide memory usage
statistics.
Joe Korty
Document new fields in /proc/interrupts that were added in

Linux 2.6.24.

unix.7
Marko Kreen
Since glibc 2.8, _GNU_SOURCE must be defined in order to get
the definition of the ucred structure from <sys/socket.h>.

========== Changes in man-pages-3.10 ==========

Released: 2008-09-23, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

André Goddard Rosa <andre.goddard@gmail.com>
George Spelvin <linux@horizon.com>
Pavel Heimlich <tropikhajma@seznam.cz>
Sam Varshavchik <mrsam@courier-mta.com>
John Reiser <jreiser@bitwagon.com>

Apologies if I missed anyone!

Global changes
---

closedir.3
dirfd.3
readdir.3
rewinddir.3
scandir.3
seekdir.3
telldir.3
mtk
Fix 'dir' argument name: should be 'dirp'.
POSIX.1-2008 and glibc call this argument 'dirp' (consistent
with the fact that it is a *pointer* to a DIR structure).

Changes to individual pages
---

clone.2

mtk, after a comment by John Reiser
Clarify text describing getpid() caching bug for clone() wrapper.
See also:
http://sourceware.org/bugzilla/show_bug.cgi?id=6910
https://bugzilla.redhat.com/show_bug.cgi?id=417521

getpid.2
mtk, after a comment by John Reiser
Describe getpid()'s PID caching and its consequences.

timerfd_create.2
Sam Varshavchik
s/it_interval/it_value/ when talking about TIMERFD_ABSTIME.

closedir.3
George Spelvin
Clarify closedir()'s treatment of underlying file descriptor.

tsearch.3
André Goddard Rosa
Fix memory leak in example program.

Add use of tdestroy to example program.
mtk
Add "#define _GNU_SOURCE" to example program.

protocols.5
mtk, after a note from Pavel Heimlich
Remove SEE ALSO references to nonexistent Guides to Yellow Pages

services.5
mtk
Remove some out-of-date bugs.
mtk, after a note from Pavel Heimlich
Remove SEE ALSO references to nonexistent Guides to Yellow Pages
and Bind/Hesiod docs.
mtk
Remove crufty text about use of comma instead of slash to separate
port and protocol.

========== Changes in man-pages-3.11 ==========

Nicolas François <nicolas.francois@centraliens.net>
Pavel Heimlich <tropikhajma@seznam.cz>
Ricardo Catalinas Jiménez <jimenezrick@gmail.com>
Sam Varshavchik <mrsam@courier-mta.com>

Apologies if I missed anyone!

New and rewritten pages
---

umount.2
  Michael Kerrisk
    Create a new page for umount() and umount2() by extracting
    existing material from mount.2 page.

New and changed links
---

umount2.2
  Michael Kerrisk
    Change link to point to new umount.2
      The umount2() material migrated from mount.2 to umount.2

Changes to individual pages
---

execve.2
  Michael Kerrisk
    _SC_ARG_MAX is no longer necessarily constant
      POSIX.1-2001 says that the values returned by sysconf()
      are constant for the life of the process.
      But the fact that, since Linux

2.6.23, ARG_MAX is settable
via RLIMIT_STACK means _SC_ARG_MAX is no longer constant,
since it can change at each execve().
Michael Kerrisk
Linux now imposes a floor on the ARG_MAX limit
Starting with Linux 2.6.23, the ARG_MAX limit became
settable via (1/4 of) RLIMIT_STACK. This broke ABI
compatibility if RLIMIT_STACK was set such that ARG_MAX
was < 32 pages. Document the fact that since 2.6.25
Linux imposes a floor on ARG_MAX, so that the old limit
of 32 pages is guaranteed.

For some background on the changes to ARG_MAX in
kernels 2.6.23 and 2.6.25, see:
http://sourceware.org/bugzilla/show_bug.cgi?id=5786
http://bugzilla.kernel.org/show_bug.cgi?id=10095
http://thread.gmane.org/gmane.linux.kernel/646709/focus=648101,
checked into 2.6.25 as
commit a64e715fc74b1a7dcc5944f848acc38b2c4d4ee2.

Also some reordering/rewording of the discussion of ARG_MAX.

fallocate.2
Michael Kerrisk
Note lack of glibc wrapper; caller must use syscall(2)
Glibc doesn't (and quite probably won't) include a
wrapper for this system call. Therefore, point out that
potential callers will need to use syscall(2), and rewrite
the RETURN VALUE text to show things as they would be if
syscall() is used.

Michael Kerrisk
Refer reader to posix_fallocate(3) for portable interface
Add a para to start of page that points out that this is the
low-level, Linux-specific API, and point the reader to
posix_fallocate(3) for the portable API.

getdents.2
readdir.3
Michael Kerrisk
d_type is currently only supported on ext[234]
As at kernel 2.6.27, only ext[234] support d_type.
On other file systems, d_type is always set to DT_UNKNOWN
(0).

getdents.2
Michael Kerrisk
Add an example program

Michael Kerrisk
comment out linux_dirent fields with varying location
The location of the fields after d_name varies according to
the size of d_name. We can't properly declare them in C;
therefore, put those fields inside a comment.
Michael Kerrisk
The DT_* constants are defined in <dirent.h>
Michael Kerrisk
Remove header files from SYNOPSIS
None of the header files provides what is needed.
Calls are made via syscall(2).
Michael Kerrisk
The programmer must define the linux_dirent structure
Point out that this structure is not defined in glibc headers.
Michael Kerrisk
s/dirent/linux_dirent/
The structure isn't currently defined in glibc headers,
and the kernel name of the structure is 'linux_dirent' (as
was already used in some, but not all, places in
this page).

getrlimit.2
Michael Kerrisk
Reword/relocate discussion of BSD's historical RLIMIT_OFILE
The old sentence sat on its own in an odd place, and anyway the
modern BSDs use the name RLIMIT_NOFILE.
Michael Kerrisk
Refer to execve(2) for RLIMIT_STACK's effect on ARG_MAX
Refer the reader to new text in execve(2) that describes how
(since Linux 2.6.23) RLIMIT_STACK determines the value of ARG_MAX.

getrusage.2
Michael Kerrisk
Rusage measures are preserved across execve(2)

mlock.2
Maxin John
Add EAGAIN error.

move_pages.2
Nicolas François
Make a detail of EPERM error more precise

mount.2
Michael Kerrisk
Add description of per-process namespaces
Describe per-process namespaces, including discussion
of clone() and unshare CLONE_NEWNS, and /proc/PID/mounts.

Michael Kerrisk
List a few other file systems that we may see in /proc/filesystems
Add some modern file systems to that list (xfs, jfs, ext3,
reiserfs).
Michael Kerrisk
Document MS_SILENT (and MS_VERBOSE)

mount.2
umount.2
Michael Kerrisk
Split umount*() out into a separate page
The length of this page means that it's becoming difficult
to parse which info is specific to mount() versus
umount()/umount2(), so split the umount material out into
its own page.

pause.2
Michael Kerrisk
Remove mention of words "library function"
This really is a system call.

readdir.2
Michael Kerrisk
The programmer must declare the old_linux_dirent structure
Glibc does not provide a definition of this structure.
Michael Kerrisk
s/dirent/old_linux_dirent/
Nowadays, this is the name of the structure in the
kernel sources.
Michael Kerrisk
Remove words "which may change"
These words
are slightly bogus: although the interface
is obsolete, for ABI-compatibility reasons, the kernel folk
should never be changing this interface.
Michael Kerrisk
Remove header files from SYNOPSIS
glibc doesn't provide any support for readdir(2),
so remove these header files (which otherwise suggest
that glibc does provide the required pieces).

recv.2
Nicolas François
Move kernel version number to first mention to MSG_ERRQUEUE.

semop.2
Kirill A. Shutemov
Fix typo in example

(The '&' before sop in the semop() call is unneeded.)

send.2
Michael Kerrisk
Make kernel version for MSG_CONFIRM more precise
s/2.3+ only/Since Linux 2.3.15/

sigaction.2
Michael Kerrisk
Refer reader to signal(7) for an overview of signals
Explain semantics of signal disposition during fork() and execve()
Refer to signal(7) for more details on signal mask.

sigaltstack.2
Michael Kerrisk
Explain inheritance of alternate signal stack across fork(2)

sigwaitinfo.2
Michael Kerrisk
Distinguish per-thread and process-wide signals
A sentence clarifying that pending signal set is union of
per-thread and process-wide pending signal sets.

Michael Kerrisk
These interfaces have per-thread semantics
The page was previously fuzzy about whether these interfaces
have process-wide or per-thread semantics. (E.g., now the
page states that the calling *thread* (not process) is suspended
until the signal is delivered.)

sigpending.2
Michael Kerrisk
Explain effect of fork() and execve() for pending signal set
Michael Kerrisk
Explain how thread's pending signal set is defined
The pending set is the union of per-thread pending signals
and process-wide pending signals.

sigprocmask.2
Michael Kerrisk

Explain effects of fork() and execve() for signal mask

splice.2
Michael Kerrisk
Note that SPLICE_F_MOVE is a no-op since kernel 2.6.21

syscall.2

Michael Kerrisk
Add more detail about wrapper functions
Add a few more details about work generally done by wrapper
functions. Note that syscall(2) performs the same steps.

tkill.2
Michael Kerrisk
EINVAL error can also occur for invalid TGID
The EINVAL error on an invalid TGID for tgkill() was
not documented; this change documents it.

utimensat.2
Michael Kerrisk
POSIX.1-2008 revision will likely affect FTMs for futimens()
Make it clear that the POSIX.1 revision that is likely
to affect the feature test macro requirements for futimens()
is POSIX.1-2008.
Nicolas François
Make various wordings a little more precise.
The times argument point to *an array of* structures, and the

man-page should say that consistently.

wait4.2
Michael Kerrisk
wait3() is a library function layered on wait4().
On Linux wait3() is a library function implemented on top
of wait4(). (Knowing this is useful when using strace(2),
for example.)

atan2.3
Nicolas François
Fix error in description of range or return value
In recent changes to the man page, mtk accidentally changed
the description of the return value range to -pi/2..pi/2;
the correct range is -pi..pi.

cmsg.3
Nicolas François
Add parentheses after macro names.

ctime.3
Michael Kerrisk
Clarify mktime()'s use of tm_isdst
Describe use of tm_isdst for input to mktime();
explain how mktime() modifies this field.
(This field is left unchanged in case of error.)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=500178
Michael Kerrisk
Clarify wording
for ctime_r() and asctime_r() to indicate that
the buffer must be at least 26 *bytes*.
Michael Kerrisk
Minor rewording of mktime() description.

floor.3
Nicolas François
floor.3: Fix error in description: s/smallest/largest/

hsearch.3
André Goddard Rosa
Call hdestroy() after using hash table created by hcreate(),
for the sake of completeness

mq_getattr.3
Michael Kerrisk
mq_getattr() and mq_setattr() are layered on mq_getsetattr(2)
mq_getattr() and mq_setattr() are library functions layered on
top of the mq_getsetattr(2) system call.
(This is useful info for users of strace(1).)

mq_receive.3
Michael Kerrisk
mq_send() is a library function layered on mq_timedreceive() syscall
This info is useful for users of strace(1).

mq_send.3
Michael Kerrisk
mq_send() is a library function layered on mq_timedsend() syscall
This info is useful for
users of strace(1).

nextafter.3
Nicolas François
Make description more precise: s/next/largest/

readdir.3
Michael Kerrisk
SEE ALSO: add getdents(2)
Because readdir() is implemented on top of getdents(2).

realpath.3
Michael Kerrisk
Clarify that returned pathname is NULL terminated
Also clarify that null-byte is included in PATH_MAX limit.

proc.5
  Michael Kerrisk
    Rewrite and simplify description of /proc/mounts
      Most of the relevant discussion is now under /proc/PID/mounts;
      all that needs to be here is a mention of the pre-2.4.19
      system-wide namespace situation, and a reference to the
      discussion under /proc/PID/mounts.
  Michael Kerrisk
    Add description of /proc/PID/mounts
      Largely cribbed from existing /proc/mounts discussion, which is
      about to be rewritten.

mq_overview.7
  Michael Kerrisk
    Add mq_notify() to list of lib. functions
 and syscalls in MQ API

signal.7
  Michael Kerrisk
    Improve description in NAME section
    Add mention of sigaltstack(2).
    Describe syscalls that synchronously wait for a signal,
    Give overview of syscalls that block until a signal is caught
    Add overview of interfaces for sending signals.

  Michael Kerrisk
    Describe semantics w.r.t. fork() and execve()
      Include text describing semantics of fork() and execve() for
      signal dispositions, signal mask, and pending signal set.

========== Changes in man-pages-3.12 ==========

Released: 2008-10-29, Bucaramanga

Apologies if I missed anyone!

New and rewritten pages
---

pthread_attr_init.3
  Michael Kerrisk
    New page for pthread_attr_init(3) and pthread_attr_destroy(3)

pthread_attr_setdetachstate.3
  Michael Kerrisk
    New page for pthread_attr_setdetachstate(3) and
    pthread_attr_getdetachstate(3)

pthread_attr_setguardsize.3
  Michael Kerrisk
    New page for pthread_attr_setguardsize(3) and
    pthread_attr_getguardsize(3)

pthread_attr_setscope.3
  Michael Kerrisk
    New page for pthread_attr_setscope(3) and pthread_attr_getscope(3)

pthread_attr_setstack.3
  Michael Kerrisk
    New page for pthread_attr_setstack(3) and pthread_attr_getstack(3)

pthread_attr_setstackaddr.3
  Michael Kerrisk
    New page for pthread_attr_setstackaddr(3)
 and
    pthread_attr_getstackaddr(3)

pthread_attr_setstacksize.3
  Michael Kerrisk
    New page for pthread_attr_setstacksize(3) and
    pthread_attr_getstacksize(3)

pthread_create.3

Michael Kerrisk
New page describing pthread_create(3)

pthread_detach.3
Michael Kerrisk
New page for pthread_detach(3)

pthread_equal.3
Michael Kerrisk
New page for pthread_equal(3)

pthread_exit.3
Michael Kerrisk
New page describing pthread_exit(3)

pthread_getattr_np.3
Michael Kerrisk
New page for pthread_getattr_np(3)

pthread_join.3
Michael Kerrisk
New page for pthread_join(3)

pthread_self.3
Michael Kerrisk
New page for pthread_self(3)

pthread_tryjoin_np.3
Michael Kerrisk
New page for pthread_tryjoin_np(3) and pthread_timedjoin_np(3)

Newly documented interfaces in existing pages
---

dup.2
Michael Kerrisk
Add description
of dup3()
dup3() was added in kernel 2.6.27.

epoll_create.2
Michael Kerrisk
Add description of new epoll_create1()
The new epoll_create1() system call appeared in Linux 2.6.27.

eventfd.2
Michael Kerrisk

Describe eventfd2() and EFD_NONBLOCK and EFD_CLOEXEC
Linux 2.6.27 added eventfd(), which supports a flags argument that eventfd() did not provide. The flags so far implemented are EFD_NONBLOCK and EFD_CLOEXEC,

inotify_init.2
Michael Kerrisk
Add description of inotify_init1()
The inotify_init1() system call was added in Linux 2.6.27.

pipe.2
Michael Kerrisk
Add description of new pipe2() syscall
pipe2() was added in 2.6.27. Describe the O_NONBLOCK and O_CLOEXEC flags.

signalfd.2
Michael Kerrisk
Describe signalfd4() and SFD_NONBLOCK and SFD_CLOEXEC
Linux 2.6.27 added signalfd4(), which supports a flags argument that signalfd() did not provide. The flags so far implemented are SFD_NONBLOCK and SFD_CLOEXEC.

New and changed links
---

dup3.2
Michael Kerrisk
New link to dup.2
dup.2 now contains the description of the new dup3() syscall.

epoll_create1.2
Michael Kerrisk
New link to epoll_create.2
epoll_create.2 now includes a description of the new epoll_create1() system call.

eventfd2.2
Michael Kerrisk
New link to eventfd.2
The eventfd.2 page has some details on the eventfd2() system call, which was new in Linux 2.6.27.

inotify_init1.2
Michael Kerrisk
New link to inotify_init.2
inotify_init.2 now includes a description of the new

inotify_init1() system call.

pipe2.2
Michael Kerrisk
New link to pipe.2
pipe(2) now contains a description of the new pipe2() syscall.

pthread_attr_destroy.3
Michael
Kerrisk
New link to new pthread_attr_init.3

pthread_attr_getdetachstate.3
Michael Kerrisk
New link to new pthread_attr_setdetachstate.3

pthread_attr_getguardsize.3
Michael Kerrisk
New link to new pthread_attr_setguardsize.3

pthread_attr_getscope.3
Michael Kerrisk
New link to new pthread_attr_setscope.3

pthread_attr_getstack.3
Michael Kerrisk
New link to new pthread_attr_setstack.3

pthread_attr_getstackaddr.3
Michael Kerrisk
New link to new pthread_attr_setstackaddr.3

pthread_attr_getstacksize.3
Michael Kerrisk
New link to new pthread_attr_setstacksize.3

pthread_timedjoin_np.3
Michael Kerrisk
New link to new pthread_tryjoin_np.3

signalfd4.2
Michael Kerrisk
New link to signalfd.2
signalfd.2 now includes text describing signalfd4() system call,
new in Linux 2.6.27.

Global changes

---

eventfd.2, getdents.2, mprotect.2, signalfd.2, timerfd_create.2,
wait.2,
 backtrace.3, clock_getcpuclockid.3, end.3, fmemopen.3,
fopencookie.3, getdate.3, getgrouplist.3, getprotoent_r.3,
getservent_r.3, gnu_get_libc_version.3, inet.3, inet_pton.3,
makecontext.3, matherr.3, offsetof.3, pthread_attr_init.3,
pthread_create.3, pthread_getattr_np.3, sem_wait.3, strtol.3, core.5
  Michael Kerrisk
    Add ".SS Program source" to EXAMPLE
      Add ".SS Program source" to clearly distinguish shell session and
      descriptive text from actual program code.

eventfd.2, execve.2, getdents.2, ioprio_set.2, mprotect.2,
signalfd.2, timerfd_create.2, wait.2, backtrace.3,
clock_getcpuclockid.3, end.3, fmemopen.3, fopencookie.3, frexp.3,
getdate.3, getgrouplist.3, getprotoent_r.3, getservent_r.3,
gnu_get_libc_version.3, inet.3, inet_pton.3, makecontext.3,
malloc.3, matherr.3, offsetof.3, pthread_attr_init.3,
pthread_create.3, pthread_getattr_np.3, sem_wait.3, strftime.3,
strtok.3, strtol.3, core.5, proc.5, cpuset.7, mq_overview.7
  Michael
 Kerrisk
    Format user input in shell sessions in boldface

frexp.3, strftime.3, strtok.3
  Michael Kerrisk
    Relocate shell session above example program
      Move the shell session text that demonstrates the use of
      the example program so that it precedes the actual
      example program. This makes the page consistent with the
      majority of other pages.

Changes to individual pages
---

epoll_create.2
  Michael Kerrisk
    Say more about unused epoll_create() 'size' arg
      Supply a little more explanation about why the 'size' argument
      of epoll_create() is nowadays ignored.

eventfd.2
  Michael Kerrisk
    Remove crufty text relating to flags argument
      Remove sentence saying that glibc adds a flags argument

to the syscall; that was only relevant for the older
eventfd() system call.
getdents.2
Christoph Hellwig
Fix text relating
to DT_UNKNOWN and 'd_type' support
Some file systems provide partial support for 'dt_type',
returning DT_UNKNOWN for cases they don't support.
Update the discussion of 'd_type' and DT_UNKNOWN to
support this.

getpeername.2, getsockname.2
Michael Kerrisk
SEE ALSO: add ip(7) and unix(7)

getsockopt.2
Michael Kerrisk
EINVAL can also occur if 'optval' is invalid
In some cases, EINVAL can occur if 'optval' is invalid.
Note this, and point reader to an example in ip(7).
In response to:
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092

inotify_init.2
pipe.2
timerfd_create.2
Michael Kerrisk
Clarify *_NONBLOCK description
Make it clear that the NONBLOCK flag sets an attribute in the new
open file description.

sched_yield.2
Michael Kerrisk
Rewrite description in terms of threads
The text formerly described the
operation of sched_yield() in
terms of processes. It should be in terms of threads.
Michael Kerrisk
Add NOTES text on appropriate use of sched_yield()
Strategic calls to sched_yield() can be used to improve
performance, but unnecessary use should be avoided.

sigaction.2
Michael Kerrisk
Clarify that sa_mask affects the *per-thread* signal mask
The page didn't previously clearly explain the scope of the
signal mask that is affected by sa_mask.

signalfd.2
  Michael Kerrisk
    Remove crufty text relating to flags argument
      Remove sentence saying that glibc adds a flags argument
      to the syscall; that was only relevant for the older
      signalfd() system call.

sigprocmask.2
  Michael Kerrisk
    Clarify that sigprocmask() operates on a per-thread mask
      The first sentence of the page was vague on the scope of the
      attribute changed by sigprocmask().
  Reword to make this
      clearer and add a sentence in NOTES to explicitly state that
      the signal mask is a per-thread attribute.

socket.2
  Michael Kerrisk
    Document SOCK_NONBLOCK and SOCK_CLOEXEC flags
      These flags, specified in the 'type' argument, are supported
      since Linux 2.6.27.

socketpair.2
  Michael Kerrisk
    Refer to socket(2) for SOCK_CLOEXEC and SOCK_NONBLOCK
      Refer the reader to socket(2) for a description of the SOCK_CLOEXEC
      and SOCK_NONBLOCK flags, which are supported by socketpair() since
      Linux 2.6.27.

syscalls.2
  Michael Kerrisk
    Add new 2.6.27 system calls
      Add pipe2(), dup3(), epoll_create1(), inotify_init1(),
      eventfd2(), signalfd4().

timerfd_create.2
  Michael Kerrisk
    Document timerfd_create() TFD_CLOEXEC and TFD_NONBLOCK
      TFD_CLOEXEC and TFD_NONBLOCK are supported since LInux 2.6.27.

vfork.2
  Michael Kerrisk
    Clarify meaning of "child releases the parent's memory"
      The man page was not explicit about how the memory used by
      the child is released back to the parent.

ctime.3
  Michael Kerrisk

ctime_r() and localtime_r() need not set 'timezone' and 'daylight'
The man page already noted that these functions need not set 'tzname', but things could be clearer: it tzset() is not called, then the other two variables also are not set.

Also, clarify that ctime() does set 'timezone' and 'daylight'.

dlopen.3
Michael Kerrisk
LD_LIBRARY_PATH is inspected once, at program start-up
Make it clear that LD_LIBRARY_PATH is inspected *once*, at program start-up. (Verified from source and by experiment.)

fmemopen.3
Michael Kerrisk
Document binary mode (mode 'b')
Glibc 2.9 adds support to fmemopen() for binary mode opens. Binary mode is specified
by inclusion of the letter 'b' in
the 'mode' argument.

getaddrinfo.3
Michael Kerrisk
Clarify error descriptions with some examples
Clarify the description of some errors by giving examples that produce the errors. (Text added for EAI_SERVICE and EAI_SOCKTYPE.)

Also, add an error case for EAI_BADFLAGS.

gethostbyname.3
Michael Kerrisk
Rationalize text on POSIX.1-2001 obsolete interfaces
POSIX.1 marks gethostbyname(), gethostbyaddr(), and 'h_errno' as obsolete. The man page explained this, but with some duplication. Remove the duplication, and otherwise tidy up discussion of this point.

popen.3
Michael Kerrisk
Change one-line description in NAME
s%process I/O%pipe stream to or from a process%
Michael Kerrisk
Document 'e' (close-on-exec) flag
glibc 2.9 implements the 'e' flag in 'type', which sets the

close-on-exec flag on the underlying file descriptor.

raise.3
  Michael Kerrisk
    SEE ALSO: add pthread_kill(3)

readdir.3
  Christoph Hellwig
    Fix text relating to DT_UNKNOWN and 'd_type' support
      (This mirrors the previous change to getdents.2)
      Some file systems provide partial support for 'dt_type',
      returning DT_UNKNOWN for cases they don't support.
      Update the discussion of 'd_type' and DT_UNKNOWN to
      support this.

strcpy.3
  Jason Spiro
    Strengthen warning about checking against buffer overruns
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=413940

tty_ioctl.4
  Michael Kerrisk
    Explain capability requirements for TIOCCONS
      Explain capability requirements for TIOCCONS, and describe
      changes in 2.6.10 relating to capabilities.
  Michael Kerrisk
    Explain capability requirements for various ioctls
      For TIOCSLCKTRMIOS, TIOCSCTTY,
 TIOCEXCL, explain the exact
      capability that is required (the text formerly just said "root"
      in each case).

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/threads-max
      Defines the system-wide limit on the number of threads (tasks).

utmp.5
  Pierre Cazenave
    It is just "other" who should not have write perms on utmp
      The page was vague before, saying that utmp should not be
      writable by any user. This isn't true: it can be, and
      typically is, writable by user and group.

epoll.7
  Michael Kerrisk
    Mention epoll_create1() as part of epoll API
      epoll_create1() was added in Linux 2.6.27, and extends the
      functionality of epoll_create().

inotify.7
  Michael Kerrisk
    Mention inotify_init1() in overview of API
      Discuss the new inotify_init1() system call in the overview of
      the inotify API.

ip.7
  Michael Kerrisk
    Detail EINVAL
 error for IP_ADD_MEMBERSHIP socket option
      In response to:
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=216092

iso_8859-7.7
  Lefteris Dimitroulakis
    Add Drachma, Euro, and Greek Ypogegrammeni
      Also, amend description of characters 0241 and 0242.

man-pages.7
  Michael Kerrisk
    Example shell sessions should have user input boldfaced

pthreads.7
  Michael Kerrisk
    Describe return value from pthreads functions
      Describe the usual success (0) and failure (non-zero) returns,
      and note that POSIX.1-2001 specifies that pthreads functions
      can never fail with the error EINTR.

signal.7
  Michael Kerrisk
    Timeouts make socket interfaces non-restartable
      If setsockopt() is used to set a timeout on a socket(),
      then the various socket interfaces are not automatically
      restarted, even if SA_RESTART is specified when
      establishing the signal handler.
  Analogous behavior occurs
      for the "stop signals" case.

socket.7
  Michael Kerrisk
    SEE ALSO: add unix(7)

ld.so.8
  Michael Kerrisk
    Document LD_USE_LOAD_BIAS
      Drawing heavily on Jakub Jelinek's description in
      http://sources.redhat.com/ml/libc-hacker/2003-11/msg00127.html

(Subject: [PATCH] Support LD_USE_LOAD_BIAS)
--inhibit-rpath is ignored for setuid/setgid ld.so
The --inhibit-rpath option is ignored if ld.so is setuid/setgid
(not if the executable is setuid/setgid).
Michael Kerrisk
Since glibc 2.4, setuid/setgid programs ignore LD_ORIGIN_PATH
Michael Kerrisk
Fix description of LD_PROFILE and LD_PROFILE_OUTPUT
Clarify that LD_PROFILE is pathname or a soname,
and identify name of profiling output file.
Fix description of LD_PROFILE_OUTPUT, which wasn't even close to
the truth. (But why did it remain unfixed for
so many years?)
Michael Kerrisk
Since glibc 2.3.4, setuid/setgid programs ignore LD_DYNAMIC_WEAK
Michael Kerrisk
Since version 2.3.5, setuid/setgid programs ignore LD_SHOW_AUXV
Michael Kerrisk
Reorder lists of LD_* environment variables alphabetically
Michael Kerrisk
Since glibc 2.3.4, setuid/setgid programs ignore LD_DEBUG

========== Changes in man-pages-3.13 ==========

Released: 2008-11-07, Bucaramanga

New and rewritten pages
---

pthread_attr_setaffinity_np.3
  Michael Kerrisk
    New page for pthread_attr_setaffinity_np(3) and
    pthread_attr_getaffinity_np(3)

pthread_attr_setschedparam.3
  Michael Kerrisk
    New page for pthread_attr_setschedparam(3) and
    pthread_attr_getschedparam(3)

pthread_attr_setschedpolicy.3
  Michael Kerrisk
    New page for pthread_attr_setschedpolicy(3) and
    pthread_attr_getschedpolicy(3)

pthread_setaffinity_np.3
  Michael Kerrisk
    New page for pthread_setaffinity_np(3) and pthread_getaffinity_np(3)

pthread_setschedparam.3
  Michael Kerrisk
    New page for pthread_setschedparam(3) and pthread_getschedparam(3)

pthread_setschedprio.3
  Michael Kerrisk
    New page for pthread_setschedprio(3)

New and changed links
---

pthread_attr_getaffinity_np.3
  Michael Kerrisk
    New link to new pthread_attr_setaffinity_np.3

pthread_attr_getschedparam.3
  Michael Kerrisk
    New link to
 new pthread_attr_setschedparam.3

pthread_attr_getschedpolicy.3
  Michael Kerrisk
    New link to new pthread_attr_setschedpolicy.3

pthread_getaffinity_np.3
  Michael Kerrisk
    New link to new pthread_setaffinity_np.3

pthread_getschedparam.3
  Michael Kerrisk
    New link to new pthread_setschedparam.3

Global changes
---

pthread_attr_setaffinity_np.3
pthread_getattr_np.3
pthread_setaffinity_np.3
pthread_tryjoin_np.3
  Michael Kerrisk
    Explain _np suffix
      Add text to CONFORMING TO explaining that the "_np"
      suffix is because these functions are non-portable.

Changes to individual pages
---

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add sched_getcpu(3)

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: Add pthread_setaffinity_np(3)

sched_setaffinity.2
  Michael Kerrisk
    Clarify EINVAL error for cpusetsize < kernel mask size
      For sched_setaffinity(), the
 EINVAL error that occurs
      if 'cpusetsize' is smaller than the kernel CPU set size only
      occurs with kernels before 2.6.9.

vfork.2
  Michael Kerrisk
    Child holds parent's memory until execve() or *termination*
      The page was phrased in a few places to describe the child as
      holding the parent's memory until the child does an execve(2)
      or an _exit(2). The latter case should really be the more
      general process termination (i.e., either _exit(2) or abnormal
      termination).

clock_getres.3

Michael Kerrisk
CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable
According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and
CLOCK_THREAD_CPUTIME_ID clocks should be settable, but
currently they are not.

pthread_attr_setstacksize.3
Michael Kerrisk, after a report by Karsten Weiss
EINVAL occurs on some systems if stacksize != page-size

On MacOS X at least, pthread_attr_setstacksize(3) can fail
with EINVAL if 'stacksize' is not a multiple of the system
page size. Best to mention this so as to aid people writing
portable programs.

pthread_create.3
Karsten Weiss
Fix bug in EXAMPLE program
The calloc() line should read like this instead:

tinfo = calloc(num_threads, sizeof(struct thread_info));

pthread_exit.3
Michael Kerrisk
BUGS: thread group with a dead leader and stop signals
Document the bug that can occur when a stop signal
is sent to a thread group whose leader has terminated.
http://thread.gmane.org/gmane.linux.kernel/611611
http://marc.info/?l=linux-kernel&m=122525468300823&w=2

resolver.3
Michael Kerrisk
Fix prototype of dn_expand()
The 4th argument is "char *", not "unsigned char *".
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708

epoll.7
Michael Kerrisk
Fix error handling after accept() in example code
Simply continuing after an error is in most cases wrong,
and can lead to infinite loops (e.g., for EMFILE).
So handle an error by terminating.
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202

epoll.7
Michael Kerrisk
Add error handling for epoll_wait() call in example code

epoll.7
  Michael Kerrisk
    Improve example code
      Fill in some gaps in example code (variable declarations,
      adding listening socket to epoll set).
      Give variables more meaningful names.
      Other minor changes.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504202

iso_8859-7.7
  Lefteris Dimitroulakis
    Add characters for Drachma and Greek Ypogegrammeni
      Lines for these two characters were added in the previous patch,
      but the actual characters were not included in
 the 4th column
      of the table. This fixes that.

pthreads.7
  Michael Kerrisk
    Add a section describing thread IDs
      In particular, note that in each pthreads function that takes
      a thread ID argument, that ID by definition refers to a thread
      in the same process as the caller.

Apologies if I missed anyone!

New and rewritten pages

CPU_SET.3
  Michael Kerrisk
    New page documenting CPU_* macros
      This page contains material moved out of sched_setscheduler(2).
      It overwrites a previously existing link file with the same name.
  Michael Kerrisk
    Add description of macros for dynamically allocated CPU sets
      Add descriptions of CPU_ALLOC(), CPU_ALLOC_SIZE(), CPU_FREE(),
      CPU_SET_S(), CPU_CLR_S(), CPU_ISSET_S(), CPU_ZERO_S(),
      CPU_COUNT_S(), CPU_AND_S(), CPU_OR_S(), CPU_XOR_S(), and
      CPU_EQUAL_S().
  Michael Kerrisk
    Add documentation of CPU_COUNT()
  Michael Kerrisk
    Add description
of CPU_AND(), CPU_OR, CPU_XOR(), and CPU_EQUAL()
      Plus a few other small clean-ups of the text
  Michael Kerrisk
    Various improvements in DESCRIPTION
      After review comments by Bert Wesarg:
      * Explain that cpu_set_t is a bitset, but should be considered
        opaque.
      * A CPU set can be duplicated with memset().
      * Size of a CPU set is rounded up to size of long.
      * CPU_SETSIZE is in bits, but the setsize argument is in bytes.
  Michael Kerrisk
    Document CPU_ALLOC()/CPU_ALLOC_SIZE() bug
      These macros return twice what they should because of thinko
      in glibc 2.8 and earlier. The bug is fixed for glibc 2.9.
      http://sourceware.org/bugzilla/show_bug.cgi?id=7029
  Michael Kerrisk
    NOTES: Discuss use of types in "prototypes" for these macros
      The SYNOPSIS shows types for arguments and return values, but
      these are really just suggestions:

since the interfaces are
        macros, the compiler won't catch all violations of
        the "type rules". Warn the reader of this.

pthread_attr_setinheritsched.3
  Michael Kerrisk
    New page for pthread_attr_setinheritsched(3) and
    pthread_attr_getinheritsched(3)

pthread_cancel.3
  Michael Kerrisk
    New page for pthread_cancel(3)

pthread_cleanup_push.3
  Michael Kerrisk
    New page for pthread_cleanup_push(3) and pthread_cleanup_pop(3)

pthread_setcancelstate.3
  Michael Kerrisk
    New page for pthread_setcancelstate(3) and pthread_setcanceltype(3)

pthread_testcancel.3
  Michael Kerrisk
    New page for pthread_testcancel(3)

Newly documented interfaces in existing pages
---

clone.2
  Jens Axboe
    Document CLONE_IO (new in Linux 2.6.25)
      Some text also by mtk.
  Michael Kerrisk
    Document CLONE_NEWNET
  Michael Kerrisk
    Document CLONE_NEWUTS (new
in Linux 2.6.19)
  Michael Kerrisk

Global changes
---

clone.2
mount.2
unshare.2
proc.5
path_resolution.7
  Michael Kerrisk
    Global fix: s/namespace/mount-point namespace/, as appropriate
      In recent times, a number of other namespace flags have been
      added to clone(2). As such, it is no longer clear to use
      the generic term "namespace" to refer to the particular
      namespace controlled by CLONE_NEWNS; instead, use the
      term "mount-point namespace".
  Michael Kerrisk
    Global fix: s/mount-point namespace/mount namespace/
      This is more consistent with the term "mounts namespace"
      used in the 2008 ACM SIGOPS paper, "Virtual servers
      and checkpoint/restart in mainstream Linux".
      (I avoided the "s", because using the plural strikes me
      as klunky English, and anyway we don't talk about
      the "PIDs namespace" or the "networks namespace", etc..)

connect.2
listen.2
send.2

pthread_attr_init.3
pthread_create.3
pthread_getattr_np.3
pthread_setaffinity_np.3
pthread_setschedparam.3
pthread_tryjoin_np.3
  Michael Kerrisk
    Use consistent error-handling function names
      Many older pages use a handle_error() macro to do simple
      error handling from system and library function calls.
      Switch these pages to do similar.

Changes to individual pages
----

time.1
  Michael Kerrisk
    Note that some shells have a 'time' built-in command

  Therefore, to access the functionality described on this page,
      it may be necessary to specify the full pathname.

clone.2
  Michael Kerrisk

Place list of CLONE_* flags in alphabetical order
(No content changes.)

fsync.2
Michael Kerrisk
Update feature test macro requirements for fsync()
Since glibc 2.8, the fsync() declaration is also exposed if
_POSIX_C_SOURCE >= 200112L

sched_setaffinity.2
Michael Kerrisk
Add note on system-imposed restrictions on CPUs actually used
After Loïc Domaigne's suggestion for pthread_setaffinity_np(3), add
similar text to this page noting that the system silently
limits the set of CPUs on which the process actually runs to
the set of CPUs physically present and the limits imposed by
cpuset(7).

sched_setaffinity.2
Michael Kerrisk
Removed discussion of CPU_* macros()
These macros are now moving
to a separate page.
Michael Kerrisk
Refer reader to pthread_setaffinity_np(3)
pthread_setaffinity_np() is preferable for setting
thread CPU affinity if using the POSIX threads API.

sysctl.2
Michael Kerrisk
Add prominent warning against using this system call
This was already stated under NOTES, but make it even more
prominent by adding a sentence at the start of the DESCRIPTION.

uname.2
Michael Kerrisk
Add C comments describing fields in utsname structure

atan2.3
Stefano Teso
Fix description of range of function value return
The range is not [-pi/2, pi/2], but [-pi, pi].

(mtk: This error was reported by Nicolas François, and
should have been fixed in 3.11, but somewhere along the way,
the fix got lost.)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=506299

bindresvport.3
  Michael Kerrisk
    Since glibc 2.8, EPFNOSUPPORT
 error is now EAFNOSUPPORT
      Glibc switched to using a POSIX-specified error code for
      this error case.

      http://bugs.linuxbase.org/show_bug.cgi?id=2375

clock_getres.3
  Michael Kerrisk
    CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID not settable
      According to POSIX.1-2001, the CLOCK_PROCESS_CPUTIME_ID and
      CLOCK_THREAD_CPUTIME_ID clocks should be settable, but
      currently they are not.

getgrnam.3
  Michael Kerrisk
    Clarify and add more detail in RETURN VALUE description
      The page was a bit fuzzy in describing the return values for
      various cases. In particular, it needed to be more explicit
      in describing what happens for the "not found" case.

      This is an analogous change to the change for
      getpwnam.3, made after Andreas Henriksson's report.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787
  Michael Kerrisk

  Rename arguments to getgrnam_r() and getgrgid_r()
      s/gbuf/grp/ and s/gbufp/result/, for consistency
      with POSIX.1 argument names.
  Michael Kerrisk
    Clarify RETURN VALUE description
      The page was a bit fuzzy in describing the return values for
      various cases. In particular, it needed to be more explicit
      in describing what happens for the "not found" case.

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504708

getpwnam.3
  Michael Kerrisk
    Rename arguments to getpwnam_r() and getpwuid_r()
      s/pwbuf/pwd/ and s/pwbufp/result/, for consistency
      with POSIX.1 argument names.
  Michael Kerrisk
    Clarify and add more detail in RETURN VALUE description
      The page was a bit fuzzy in describing the return values for
      various cases. In particular, it needed to be more explicit

in describing what happens for the "not found" case.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504787
Michael Kerrisk
Add an EXAMPLE program for getpwnam_r()

inet_ntop.3
Michael Kerrisk
Rename 'cnt' argument to 'size'
This is consistent with POSIX.1, and also a more sensible name.
Michael Kerrisk
Rework text describing 'size' argument
(After a suggestion by Vegard Nossum.)
Also made a few other small rewordings to in the initial
paragraph.

makecontext.3
Michael Kerrisk
Add text on use of pointer arguments to makecontext()
Passing pointer arguments to makecontext() is possible,
but only on some architectures, and with no guarantees
of portability.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=504699

pthread_attr_setaffinity_np.3
Michael Kerrisk
Various fixes after review by Loïc Domaigne
Reviewed-by: Loïc Domaigne

pthread_attr_setaffinity_np.3
pthread_setaffinity_np.3
Michael Kerrisk
Update to reflect new location of CPU_*() documentation
The CPU_*() macros are now documented in CPU_SET.3;
update to reflect that fact.
Michael Kerrisk
Remove redundant text relating to CPU sets
Information about CPU_SETSIZE can be found in CPU_SET.3, so
remove discussion of it here.

pthread_attr_setschedparam.3
pthread_setschedparam.3
Michael Kerrisk
Remove text saying that only sched_priority is required by POSIX.1
Loïc Domaigne points out that if a system implements
SCHED_SPORADIC (which Linux does not), then other
fields are also specified in sched_param. The simple

solution is just to remove that phrase from the man
page.

pthread_cancel.3
pthread_detach.3
pthread_join.3
pthread_setaffinity_np.3
Michael Kerrisk
Make text of ESRCH error consistent

pthread_setaffinity_np.3
Michael Kerrisk
Add
text to EINVAL error mentioning cpuset(7)
Michael Kerrisk
Various improvements after review by Loïc Domaigne
Various fix-ups after Loïc's review.

Reviewed-by: Loïc Domaigne

pthread_setschedparam.3
Michael Kerrisk
PTHREAD_INHERIT_SCHED is default for inherit scheduler attribute
In EXAMPLE, note that PTHREAD_INHERIT_SCHED is the default for
the inherit scheduler attribute.

syslog.3
Masanari Iida
LOG_KERN messages can't be generated from user processes
Masanari notes that this is an FAQ for logger(1) and that
Solaris and FreeBSD document this point in syslog(3).
The glibc info page also hides this comment in its source:

Internally, there is also LOG_KERN, but LOG_KERN == 0,
which means if you try to use it here, just selects default.

proc.5
Ivana Varekova
Fix reference to kernel source file
Use relative reference
to Documentation/mtrr.txt.

arp.7
Michael Kerrisk
Add kernel version numbers for /proc interfaces

cpuset.7
Michael Kerrisk

SEE ALSO: add CPU_SET(3)

epoll.7
Michael Kerrisk
Note glibc version that added epoll support

icmp.7
Michael Kerrisk
Add kernel version numbers to /proc file descriptions

inotify.7
Vegard Nossum
Fix description of max_user_watches
It seems that inotify(7) is wrong here:

"/proc/sys/fs/inotify/max_user_watches
This specifies a limit on the number of watches that can be
associated with each inotify instance."

On my system, the default value for this variable is 8192. But I
cannot create more than 8192 watches in total for the same UID
even when they are on different inotify instances. So I suggest
to rephrase this as: "This specifies an upper limit on the
number of watches that can be created
per real user ID."

ip.7
Michael Kerrisk
Reorder socket options alphabetically
Michael Kerrisk
Added kernel version numbers for IP_* socket options
Michael Kerrisk
Relocate kernel version information for IP_PMTUDISC_PROBE
Michael Kerrisk
Add kernel version numbers for /proc/sys/net/ipv4/ip_* files
Michael Kerrisk
Remove mention of kernel header from description of IP_RECVERR
Looks like glibc has had this definition since about version 2.1.
Michael Kerrisk
Relocate kernel version information for ip_mreqn structure
Michael Kerrisk
Relocate info about Linux-specific sockopts to NOTES
Also add some source comments about non-standard Linux-specific
options that are not yet documented.

netlink.7
Vegard Nossum
Fix incorrect variable names in example code

s/snl/sa/ * 2

pthreads.7
  Michael Kerrisk
    Add section on cancellation points
      This section includes a list of the functions that must and
      may be cancellation points.
  Michael Kerrisk
    Rework, and fix small error in, thread-safe function list
      Integrate the changes that occurred in POSIX.1-2008 into the
      main list (to be consistent with the list, elsewhere on this
      page, of functions that are cancellation points).

      Also, fix an error that said that strerror() was added to
      the list in POSIX.1-2008. It was strsignal() that was
      added. (strerror() was already in the list in POSIX.1-2001.)
  Michael Kerrisk
    Tweak text on sigpause() cancellation point
      In POSIX.1-2008, this function moves from the "must be"
      to the "may be" list.
  Michael Kerrisk
    Add ref to signal(7) for further info on use of real-time signals
      signal(7) provides some further details on the use of real-time
      signals by the two Linux threading
implementations.
  Michael Kerrisk
    SEE ALSO: add pthread_attr_init() and pthread_cancel()

tcp.7
  Michael Kerrisk
    Update description of tcp_rmem defaults for Linux 2.6
  Michael Kerrisk
    Add kernel version numbers for TCP_* socket options
      Note kernel version were each socket option first appeared.
  Michael Kerrisk
    The tcp_bic* proc files disappeared in Linux 2.6.13
  Michael Kerrisk
    tcp_vegas_cong_avoid disappeared in Linux 2.6.13
  Michael Kerrisk
    Add mention of RFC 4138 for 'tcp_frto' /proc file
  Michael Kerrisk
    Remove mention of /proc in VERSIONS
      This information is not indicated for each /proc interface
  Michael Kerrisk
    Clarify that tcp_mem measures in units of the system page size
  Michael Kerrisk
    Update tcp_frto description for 2.6.22 changes
      Linux 2.6.22 added a mode value 2 ("Enable SACK-enhanced

F-RTO if flow uses SACK").
Michael
Kerrisk
Fix alphabetical order in /proc file list
A few entries were slightly out of order.
Michael Kerrisk
Remove obsolete statement about /proc from VERSIONS
Much of the text has been updated to 2.6.27 or so,
so this statement no longer applies.
Michael Kerrisk
Add kernel version numbers for each /proc interface
Note kernel version where each /proc interface first appeared
Michael Kerrisk
tcp_westwood /proc file disappeared in Linux 2.6.13
Michael Kerrisk
Update description of tcp_wmem defaults for Linux 2.6

========== Changes in man-pages-3.15 ==========

Released: 2008-12-05, Bucaramanga

Apologies if I missed anyone!

New and rewritten pages

---

makedev.3
  Michael Kerrisk
    New page for makedev(), major(), and minor() macros

pthread_cleanup_push_defer_np.3
  Michael Kerrisk
    New page for pthread_cleanup_push_defer_np(3) and
    pthread_cleanup_pop_restore_np(3)

Newly documented interfaces in existing pages
---

accept.2
  Michael Kerrisk
    Document accept4() system call, new in Linux 2.6.28

fmemopen.3
  Petr Baudis
    Add description of open_wmemstream(3)

tcp.7
  Michael Kerrisk
    Document MSG_TRUNC flag for TCP sockets

New
 and changed links
---

accept4.2
  Michael Kerrisk
    New link to accept.2
      accept.2 now documents the new accept4() system call.

open_wmemstream.3
  Petr Baudis
    New link to fmemopen.3
      fmemopen.3 now documents open_wmemstream().
pthread_cleanup_pop_restore_np.3
  Michael Kerrisk
    New link to new pthread_cleanup_push_defer_np.3

Global changes
---

accept.2
listen.2
recv.2
getpeername.2
getsockname.2
shutdown.2
socketpair.2
  Michael Kerrisk
    Global fix: SEE ALSO: add socket(7)

capabilities.7
ip.7
  Michael Kerrisk
    Global fix: s/reserved port/privileged port/
      Some pages used one term, some pages the other term;
      make some consistency.

connect.2
getpeername.2
getsockname.2
  Michael Kerrisk
    Use consistent argument names
      Most other sockets pages are using the names 'addr'
      and 'addrlen'; make these pages do the same.

getpeername.2
getsockname.2
getsockopt.2
recv.2
send.2
shutdown.2
sockatmark.3
socket.7
udplite.7
   Michael Kerrisk
    SYNOPSIS: Rename socket file descriptor argument to 'sockfd'
      Many sockets man pages use the name 'sockfd' already.
      For consistency, changes the others to do so as well.

gnu_dev_major.3
gnu_dev_makedev.3
gnu_dev_minor.3
major.3
minor.3
  Michael Kerrisk
    New links to new makedev(3) page

Changes to individual pages

_exit.2
  Michael Kerrisk
    Since glibc 2.3, the exit() wrapper function invokes exit_group(2)
      This information is useful to users of strace(1).

accept.2
  Michael Kerrisk
    Clarify details when returned address is truncated
      If the returned address is truncated, the 'addrlen' argument
      indicates the actual size of the address, rather than a count
      of the number of bytes in the truncated buffer.

      Also clarify that
 if 'addr' argument is NULL, then 'addrlen'
      should is unused, and should also be NULL.
  Michael Kerrisk
    Reorder ERRORS list
      Some errors were listed under a separate "may" heading.
      There's probably no real need to do this; integrate
      those errors into the main list.

exit_group.2
  Michael Kerrisk
    Note that since glibc 2.3, exit(2) invokes exit_group()

futex.2
  Michael Kerrisk
    Mention that glibc provides no wrapper function for futex()

get_thread_area.2
  Michael Kerrisk
    Note that glibc provides no wrapper for this system call

getdomainname.2
  Michael Kerrisk
    Substantial rewrite
      Expand description of setdomainname() and getdomainname().
      Note that getdomainname() is implemented as a library function
      in glibc.
      Note limits on size of domain name.
      Reorganize ERRORS list.

gethostname.2

Michael Kerrisk
Various parts rewritten
Write a paragraph describing sethostname().

Clarify differences between glibc's gethostbyname() and
the kernel gethostbyname() system calls.

gethostname.2
Michael Kerrisk
Note that HOST_NAME_MAX is 64 on Linux
Also note that in pre-1.0 days, the limit on hostnames
was 8 bytes.

getpeername.2
Michael Kerrisk
Note that returned address may be truncated if buffer is too small

getsid.2
Michael Kerrisk
Simplified version information and moved to a new VERSIONS section

getsockname.2
Michael Kerrisk
Note that returned address is truncated if buffer is too small

mknod.2
Michael Kerrisk
Refer reader to makedev(3) to build a device ID

mmap.2
Michael Kerrisk
Loosen language around how 'addr' hint is interpreted
Mel Gorman reported that in Linux 2.6.27, 'addr' is rounded
down to a page boundary.

Before kernel 2.6.26,
if 'addr' was taken as a hint, it was
rounded up to the next page boundary. Since Linux 2.6.24,
it is rounded down. Therefore, loosen the description of
this point to say that the address is rounded to "a nearby
page boundary".

open.2
Michael Kerrisk
EFBIG error is now EOVERFLOW (since Linux 2.6.24)
When a 32-bit app opens a file whose size is too big to be
represented in 31-bits, POSIX.1 specifies the error EOVERFLOW.
Linux used to give EFBIG for this case, but 2.6.24 fixed this.

Also, add some text to describe the error scenario in
more detail.

pread.2
Michael Kerrisk
Note that glibc emulation for these calls uses lseek(2)
(This makes it clearer that the emulated calls are not atomic.)

recv.2
send.2
Michael Kerrisk
Make names of "address" and "address length" args more consistent
Make the names of these arguments
more consistent with other
sockets man pages.

recv.2
Michael Kerrisk
Clarify details when returned address is truncated
If the recvfrom() returned address is truncated, the 'fromlen'
argument indicates the actual size of the address, rather than
a count of the number of bytes in the truncated buffer.

Also clarify that the 'from' argument can be NULL, in which
case 'fromlen' should is unused, and should also be NULL.
Michael Kerrisk
Internet datagram and netlink sockets support MSG_TRUNC for recv(2)
Internet datagram (since Linux 2.4.27/2.6.8),
and netlink (since Linux 2.6.22) sockets support
the MSG_TRUNC flag for recv(2).

select.2
Michael Kerrisk
Rewrote text describing feature test macros requirement for pselect()

select_tut.2
Michael Kerrisk
Fix SHUT_FD* macros in example program
Add "do {} while (0)"

set_thread_area.2
Michael Kerrisk
Note that glibc provides no wrapper for this system call

setfsgid.2
setfsuid.2
Michael Kerrisk

Simplify version information and move to a VERSIONS section

setsid.2
Michael Kerrisk
Rework RETURN VALUE section; add an ERRORS section

setup.2
Michael Kerrisk
Relocate some CONFORMING TO text to VERSIONS and NOTES

stat.2
Michael Kerrisk
Document EOVERFLOW error
Michael Kerrisk
Refer reader to major() and minor() to decompose a device ID

syscalls.2
Michael Kerrisk
Fix version numbers for a few system calls
Some 2.6 system calls were wrongly mentioned as also being
backported into a 2.4.x kernel.

uname.2
Michael Kerrisk
DESCRIPTION: Point reader at NOTES for further info on field lengths

atan.3
Andries E. Brouwer
Fix return value description
The correct range for the return value is [-pi/2,pi/2].
(mtk's fix in
the last change to the return value text was
a botch-up of a (correct) suggestion by Nicolas François.)

atexit.3
Michael Kerrisk
atexit() and on_exit(3) register functions on the same list
Michael Kerrisk
Terminating registered function using longjmp() is undefined
According to POSIX.1, using longjmp() to terminate execution of
a function registered using atexit() produces undefined results.
Michael Kerrisk
Calling exit(3) more than once produces undefined results
If an exit handler itself calls exit(3), the results are
undefined (see the POSIX.1-2001 specification of exit(3)).
Michael Kerrisk
The same exit handler may be registered multiple times
Michael Kerrisk

Calling _exit(2) terminates processing of exit handlers
Michael Kerrisk
Terminating registered function using longjmp() is undefined
According to POSIX.1, using longjmp() to terminate
execution of
a function registered using atexit() produces undefined results.

bindresvport.3
Mats Wichmann
SYNOPSIS: s/**/*/ in prototype
Michael Kerrisk
Fix errors regarding port used, plus other rewrites
Glibc's bindresvport() takes no notice of sin->sin_port:
it always returns an arbitrary reserved port in the
anonymous range (512-1023). (Reported by Mats Wichmann.)

Also:
* Add EADDRINUSE and EACCES errors.
* Mention use of getsockname(2).
* Other minor rewrites and reorderings of the text.
* Explicitly note that glib's bindresvport() ignores
sin->sin_port.
* Change license There's now virtually no text remaining from
the 1.70 version of this page.

Reviewed-by: Mats Wichmann
Reviewed-by: Petr Baudis

dlopen.3
Petr Baudis
Describe confusing dladdr() behavior
dladdr()
will act unexpectedly if called from non-pic code on a
compile-time-generated function pointer.

fmemopen.3
Michael Kerrisk
Add VERSIONS section
Petr Baudis
SEE OPEN: Add fopencookie(3)
fopencookie(3) is used to implement fmemopen().

fopen.3
Petr Baudis
SEE ALSO: Add fmemopen(3) and fopencookie(3)

fopencookie.3
Petr Baudis

fopencookie() needs _GNU_SOURCE feature test macro

getaddrinfo.3
  Petr Baudis
    Document results ordering and /etc/gai.conf
      This patch documents the order of the getaddrinfo(3) results
      (RFC 3484), how should the application deal with that,
      mentions the extremely common cause of having multiple
      results per query (both IPv4 and IPv6 addresses available)
      and mentions /etc/gai.conf.

      (mtk: Minor tweaks, and note glibc version for /etc/gai.conf)

isatty.3
  Michael Kerrisk
    Complete rewrite of this page,
 with rather more detail

memmem.3
  Michael Kerrisk
    Remove sentence saying that libc 5.0.9 is still widely used
      That was a *long* time ago.

on_exit.3
  Michael Kerrisk
    Document handling of registrations on fork(2) and execve(2)
      Treatment in these cases is the same as for atexit(3).
  Michael Kerrisk
    Arg given to registered function is status from *last* call to exit()
      It's a subtle point, but if a registered function itself
      calls exit(3), then subsequent functions that were registered
      with on_exit(3) will see the exit status given to the more
      recent exit(3) call.
  Michael Kerrisk
    Note that same function may be registered multiple times

setlocale.3
locale.7
  Michael Kerrisk
    Clean up the description of LANGUAGE environment variable
      Clean up the $LANGUAGE description, by removing bogus comments
      from setlocale(3) and expanding the mention
 in locale(7).

      Maybe you will decide that a more detailed description
      should be left to the gettext(3) documentation, but I
      actually care about the invisible part of the patch more
      since the comments have put me off the track initially

($LANGUAGE has nothing to do with setlocale(3) and is
completely isolated to gettext, as obvious from the
glibc sources).

proc.5
Michael Kerrisk
/proc/stat: s/minor/disk_idx/ in description of /proc/stat
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=225619

capabilities.7
Drake Wilson
Various minor fixes as per Debian bug 471029
The relevant pieces of
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=471029 are:

- Delete duplicate subentry for KEYCTL_CHOWN/KEYCTL_SETPERM
operations in the CAP_SYS_ADMIN entry. (It feels like that
capability entry should be converted
to a list, but I've
left it in semicolon-delimited form for now.)

- Remove text about ENFILE from the text about the
/proc/sys/fs/file-max limit in the CAP_SYS_ADMIN entry, since
this is already described in the man pages for the relevant
ofile-creating system calls.

- Correct or clarify a few other bits of grammar and such;
see the diff file itself for details.

socket.7
Michael Kerrisk
SEE ALSO: add tcp(7) and udp(7)

tcp.7
Michael Kerrisk
Relocate out-of-band data discussion
Move to a new subsection entitled "Sockets API".
Michael Kerrisk
Note that MSG_PEEK can be used on out-of-band data

time.7
Michael Kerrisk
SEE ALSO: add clock_gettime(3)

unix.7
Michael Kerrisk
Unix domain sockets don't support the recv() MSG_TRUNC flag
Michael Kerrisk

Retitled subsection "(Un)supported features"
to "Sockets API"
This is consistent with the recent change in tcp(7).

========== Changes in man-pages-3.16 ==========

Released: 2009-01-13, Christchurch

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Colin Watson <cjwatson@ubuntu.com>
Florentin Duneau <fduneau@gmail.com>
Petr Baudis <pasky@suse.cz>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_getcpuclockid.3
Michael Kerrisk
New page documenting pthread_getcpuclockid(3)

libc.7
Michael Kerrisk
New page giving brief overview of C libraries on Linux

rtld-audit.7
Michael Kerrisk
New page documenting dynamic linker auditing API

Newly documented interfaces in existing pages
---

ld.so.8
Petr Baudis
Document LD_AUDIT
Petr Baudis
Document LD_POINTER_GUARD

New and
 changed links
---

gethostid.2
  Michael Kerrisk
    New link to new page location in Section 3

sethostid.2
  Michael Kerrisk
    Change link to point to new page location in Section 3

sethostid.3
  Michael Kerrisk
    New link to relocated page in Section 3

glibc.7
  Michael Kerrisk
    New link to new libc.7

Global changes
---

syscalls.2
feature_test_macros.7
standards.7
  Michael Kerrisk
    SEE ALSO: add libc(7)

dlopen.3
ld.so.8
  Michael Kerrisk
    SEE ALSO: add rtld-audit(7)

Changes to individual pages
---

gethostid.2
  Michael Kerrisk
    Move to Section 3
      The interfaces documented in this page are purely glibc.

syscalls.2
  Michael Kerrisk

Kernel 2.6.28 adds accept4()

clock_getres.3
Michael Kerrisk
SEE ALSO: Add pthread_getcpuclockid(3)

fmemopen.3
Michael Kerrisk
Fix VERSIONS information

gethostid.3
Michael Kerrisk

Before version 2.2, glibc stored the host ID in /var/adm/hostid
Also: rewrite some text describing the /etc/hostid file, so that
this location is referred to just once on the page.
Michael Kerrisk
RETURN VALUE: describe return value of sethostid()
Michael Kerrisk
Added BUGS section noting that ID can't be guaranteed to be unique
Michael Kerrisk
Added ERRORS section describing errors for sethostid()
Michael Kerrisk
Update section number to reflect relocation into Section 3

printf.3
Michael Kerrisk
Source and destination buffers may not overlap for *s*printf()
http://sourceware.org/bugzilla/show_bug.cgi?id=7075

Some existing code relies on techniques like the following to
append text to a buffer:

```
$ cat s.c
#include <stdio.h>
char buf[80] = "not ";
main()
{
   sprintf(buf,
"%sfail", buf);
puts(buf);
return 0;
}

$ cc s.c
$ ./a.out
not fail
```

However, the standards say the results are undefined if source
and destination buffers overlap, and with suitable compiler
options, recent changes can cause unexpected results:

```
$ cc -v 2>&1 | grep gcc
gcc version 4.3.1 20080507 (prerelease) [gcc-4_3-branch revision 135036] (SUSE Linux)
$ cc -D_FORTIFY_SOURCE -O2 s.c
$ ./a.out
fail
```

readdir.3
  Michael Kerrisk
    Rewrite text describing 'dirent' fields standardized in POSIX.1
  Michael Kerrisk
    Clarify text for return value/errno setting for end-of-stream case

nscd.8
  Petr Baudis
    Correct NOTES section on reloading configuration files
      It behaved this way at least since
      "Sun Oct 18 15:02:11 1998 +0000",
       some four months after including the nscd implementation
      in glibc. But there does seem to be a short window between
      glibc-2.1 and glibc-2.1.3 when nscd -i was not available,
      I don't think it's worth muddling the point of the page
      with that, though.

========== Changes in man-pages-3.17 ==========

Changes to individual pages
---

bind.2
  Michael Kerrisk
    SEE ALSO: Add getifaddrs(3)

epoll_create.2
  Michael Kerrisk
    Document EMFILE error
      This error is encountered when the limit imposed by
      /proc/sys/fs/epoll/max_user_instances is encountered.
  Michael Kerrisk
    Clarify distinction between epoll instance and epoll file descriptor
      Reword so that the notion of an epoll instance is made clear,
      and made distinct from the notion of an epoll file descriptor.
      Some other minor rewordings also.

epoll_ctl.2
  Michael Kerrisk
    Reordered parts of the text
  Michael Kerrisk
    Introduce notion of epoll instance
      Introduce notion of epoll instance as distinct from
      epoll file descriptor. Plus other wording clean-ups.
  Michael Kerrisk
    Document ENOSPC error (new in Linux 2.6.28)
      This error results when the limit imposed by
      /proc/sys/fs/epoll/max_user_watches is encountered.

epoll_wait.2
  Michael Kerrisk
    Introduce
 the notion of an epoll instance into text

getdents.2
  Michael Kerrisk
    Before kernel < 2.6.4, 'd_type' was effectively always DT_UNKNOWN

gethostid.2
  Michael Kerrisk
    Rename file (was misnamed gethostd.2 in previous release)

getsockname.2
  Michael Kerrisk
    SEE ALSO: Add getifaddrs(3)

signalfd.2
  Michael Kerrisk
    Fix description of fork() semantics
      The page text described the semantics of the initial
      implementation of signalfd(). These were changed early on,
      but the man page wasn't updated.

byteorder.3

Michael Kerrisk
SEE ALSO: add endian(3)

longjmp.3
Michael Kerrisk
Clarify wording re saving/restoring signal mask
Michael Kerrisk
siglongjmp() restores signal mask iff 'savesigs' was non-zero
Note that siglongjmp() restores signal mask if, and only
if, 'savesigs' argument of sigsetjmp() was non-zero. (Previous
text omitted the "and
only if".)

memccpy.3
Michael Kerrisk
Fix CONFORMING TO: s/C99/POSIX.1-2001/
Michael Kerrisk
If the memory areas overlap, the results are undefined

sethostid.3
Michael Kerrisk
Rename file (was misnamed sethostd.3 in previous release)

setjmp.3
Michael Kerrisk
Clarify wording re saving/restoring signal mask
Michael Kerrisk
Clarify when setjmp() provides BSD vs System V signal mask semantics

strsep.3
Michael Kerrisk
BUGS: explicitly list problems afflicting strsep()
Previously, the page said this function suffered the same
problems as strtok(), but in fact strsep() doesn't suffer
from all of the same problems as strtok(), so explicitly
list just the problems of strsep() in the strsep.3 page.

proc.5
Michael Kerrisk
Add pointer to epoll(7) for description of epoll /proc files

epoll.7
Michael Kerrisk
Various wording changes to improve clarity
and consistency

Global changes
---

clock_nanosleep.2
getrusage.2
timerfd_create.2
clock.3
clock_getcpuclockid.3
ftime.3
pthread_create.3
pthread_getcpuclockid.3
pthread_tryjoin_np.3
sem_wait.3
time.7
  Michael Kerrisk
    Global fix: Fix xrefs to clock_*.? pages to reflect move to section 2

clock_nanosleep.2
execve.2
fork.2
nanosleep.2
sigaction.2
timerfd_create.2
pthread_getcpuclockid.3
ualarm.3
usleep.3
pthreads.7
time.7
  Michael Kerrisk
    Global fix: s/(3)/(2)/ in section number xrefs for timer_*() API
      The POSIX timers API is implemented (mostly) within the kernel,
       so these interfaces are system calls. Although there are as yet
      no man pages, when they are added they should be in Section 2,
      not 3. Therefore fix those pages that currently refer to these
      interfaces as being in Section 3.

Changes to individual pages
---

capget.2
  Andi Kleen
    Add some details and relocate a paragraph
      While writing a little program using capset
      I found the capset manpage quite light on crucial
      details and I had to resort to RTFS.

      This patch improves the points I found unclear
      and also moves one misplaced paragraph around.

clock_getres.2
  Michael Kerrisk
    Move page from Section 3 to Section 2

eventfd.2
  Michael Kerrisk
    glibc eventfd() supports the use of eventfd2() since version 2.9

fork.2
  Michael Kerrisk
    SEE ALSO: add daemon(3)

getdents.2
  Michael Kerrisk
    Remove unneeded HAVE_D_TYPE
 from example program
      Since d_type will always just return DT_UNKNOWN before
      kernel 2.6.4, we don't need to use a conditional for
      determining whether we use this flag.

nanosleep.2
  Michael Kerrisk
    Relocated misplaced BUGS heading

select_tut.2
  Michael Kerrisk
    Clean up error checking in example program (no semantic changes)
  Michael Kerrisk
    Many parts tidied and rewritten
      Remove some redundant text, clarify various pieces,
      tidy example code, etc.
  Michael Kerrisk
    Bug fixes + rewrites in example program
      Sebastien pointed out that the first example program
      wrongly thinks it can count signals.
      Also, some further rewrites by mtk.

socket.2
  Michael Kerrisk
    BUGS: Remove discussion SOCK_UUCP
      As time goes on, this sentence becomes less a piece of humor,
      and more a puzzle.

stat.2
  Michael Kerrisk
    Note
 that open(O_NOATIME) also causes st_atime not to be updated

timerfd_create.2
  Michael Kerrisk
    Add BUGS noting that timerfd supports fewer clock types than
    timer_create()

btowc.3
  Michael Kerrisk
    SEE ALSO: add wctob(3)

clock_getcpuclockid.3
  Michael Kerrisk
    SEE ALSO: add pthread_getcpuclockid(3)

cos.3
  Michael Kerrisk
    SEE ALSO: add sincos(3)

fexecve.3
  Timo Sirainen
    Note that fexecve() depends on a mounted /proc
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514043
  Michael Kerrisk
    CONFORMING TO: note addition of fexecve() in POSIX.1-2008
  Michael Kerrisk
    'fd' must be opened read-only and refer to a file that is executable

fmemopen.3
  Michael Kerrisk
    CONFORMING TO: note that these functions are in POSIX.1-2008

getifaddrs.3
  Lucio Maciel
    Fix memory leak in example program
  Petr Baudis
    Various small fixes

getpwnam.3

Michael Kerrisk

SEE ALSO: add getspnam(3)

getumask.3
Michael Kerrisk
Updated glibc version number in NOTES

ilogb.3
Michael Kerrisk
SEE ALSO: add significand(3)

intro.3
Michael Kerrisk
SEE ALSO: add libc(7)

isalpha.3
Michael Kerrisk
Fix statement that isalpa() is obsolete; should be isascii()
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=512709
Michael Kerrisk
SEE ALSO: add toascii(3)

mq_notify.3
Michael Kerrisk
Add cross reference to pthread_attr_init(3)

pthread_attr_setaffinity_np.3
Michael Kerrisk
SYNOPSIS: Fix declaration of 'attr'

pthread_getcpuclockid.3
Michael Kerrisk
SYNOPSIS: fix type of 'thread'

qsort.3
Michael Kerrisk
EXAMPLE: remove unnecessary "#include <unistd.h>"

random.3
Michael Kerrisk
SEE ALSO: add random_r(3)

remainder.3
Michael Kerrisk
SEE ALSO: add div(3)

scandir.3

Michael Kerrisk
CONFORMING TO: alphasort() and scandir()
are added to POSIX.1-2008
Michael Kerrisk
CONFORMING TO: note that versionsort() was added to glibc in
version 2.1

sem_wait.3
Michael Kerrisk
SEE ALSO: add clock_gettime(2)

significand.3
Michael Kerrisk
Add CONFORMING TO noting that this function is unstandardized

sigwait.3
Michael Kerrisk
Add EXAMPLES section referring to pthread_sigmask(3)

sin.3
Michael Kerrisk
SEE ALSO: add sincos(3)

stpcpy.3
Michael Kerrisk
Add BUGS section noting the possibility of buffer overruns
Michael Kerrisk
Add missing pieces/fix various problems in example program
Michael Kerrisk
CONFORMING TO: stpcpy() is nowadays on the BSDs
Michael Kerrisk
SEE ALSO: add stpcpy.3

wcscasecmp.3
Michael Kerrisk
CONFORMING TO: note that this function is added in POSIX.1-2008

wcsdup.3
Michael Kerrisk
CONFORMING TO: note that this function was added in POSIX.1-2008

wcsncasecmp.3
Michael Kerrisk
CONFORMING TO: note that this function is added in POSIX.1-2008

wctob.3
Michael Kerrisk
SEE ALSO: add btowc(3)

proc.5
  Michael Kerrisk
    Remove mention of epoll/max_user_instances
      (Since this interface appeared in 2.6.28, and then
      disappeared in 2.6.29.)

ascii.7
  Michael Kerrisk
    Update SEE ALSO list to include pages added in 3.17
  Michael Kerrisk
    SEE ALSO: add recently added iso_8859-*(7) pages

epoll.7
  Michael Kerrisk
    remove documentation of /proc/sys/fs/epoll/max_user_instances
      This /proc interface appeared in 2.6.28. but will be
      removed in 2.6.29.

      Also, document change in default value of
      /proc/sys/fs/epoll/max_user_watches (was 1/32 of lowmem,
      now 1/25 of lowmem).

koi8-r.7
  Michael Kerrisk
    SEE ALSO: add koi8-u(7); remove crufty text

standards.7
  Michael Kerrisk
    Update to note that latest
 POSIX/SUS was ratified in 2008

time.7
  Michael Kerrisk
    SEE ALSO: add pthread_getcpuclockid(3)

timer_getoverrun.2
  Michael Kerrisk
    New page documenting timer_getoverrun(2)

timer_settime.2
  Michael Kerrisk
    New page documenting timer_settime(2) and timer_gettime(2)

New and changed links
---

timer_gettime.2
  Michael Kerrisk
    New link to new timer_settime.2

Global changes

Various pages
  Kir Kolyshkin
    Trivial punctuation fixes in SEE ALSO
      In SEE ALSO, when a few man pages are referenced, those

are divided by commas. Every reference is on a separate line, and all lines but the last one should end with comma. I spotted one place where there is no comma in between references, and mocked up an awk script to find similar places:

```
for f in man*/*; do
   awk '
      /^.SH ["]SEE ALSO["]/ {
         sa=1; print "== " FILENAME " =="; print; next
      }
      /^\.(PP|SH)/ {
         sa=0; no=0; next

}
      /^\.BR/ {
         if (sa==1) {
            print;
            if (no == 1)
               print "Missing comma in " FILENAME " +" FNR-1; no=0
         }
      }
      /^\.BR .*)$/ {
         if (sa==1)
            no=1;
         next
      }
      /\.\\"/ {next}
      /.*/ {
         if (sa==1) {
            print; next
         }
      }
   ' $f;
done | fgrep 'Missing comma'
```

This patch fixes all the places found by the above script.

Also, there is an extra dot at the end of uri.7 "SEE ALSO" section. Removed as per man-pages(7) recommendation.

Changes to individual pages
---

getitimer.2
clock_getcpuclockid.3
time.7

Michael Kerrisk
SEE ALSO: add timer_create(2)

getitimer.2
Michael Kerrisk
Rename arguments for consistency with other timer pages
Also some other minor wording improvements

splice.2
Mark Hills
ERRORS: Add EINVAL case for file opened O_APPEND
Target file cannot be opened in append (O_APPEND) mode

In kernels prior to v2.6.27 splice() to a file in
append mode is broken, and since that version it is
disallowed. It is possible this behaviour may change
in the future; see the kernel commit message
(efc968d450e013049a662d22727cf132618dcb2f) for more
information.

syscalls.2
Michael Kerrisk
Note that getpmsg(2) and putmsg(2) are unimplemented
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=514771

timerfd_create.2
Michael Kerrisk
ERRORS: add EFAULT

timerfd_create.2
Michael Kerrisk
Rename timerfd_settime() 'curr_value'
arg to 'old_value'
For consistency with related pages.

vm86.2
Parag Warudkar
CONFORMING TO: Add 32-bit specific
Note that this call is only on *32-bit* Intel

mq_open.3
Michael Kerrisk
ERRORS: add ENOENT error for name == "/"

mq_open.3
Michael Kerrisk
ERRORS: Add EACCES error for name containing > 1 slash

sem_open.3
  Michael Kerrisk
    ERRORS: add EINVAL error where name == "/"

sem_open.3
  Jens Thoms Toerring
    Add case of non-well-formed name to ENOENT

shm_open.3
  Michael Kerrisk
    Clarify rules for construction of shared memory object names

proc.5
  Michael Kerrisk
    Add description of /proc/sys/kernel/sysrq
      Reported by: Goerghe Cosorea <gheorghe.coserea@gmail.com>

proc.5
  Michael Kerrisk
    Put /proc/modules entry in correct alphabetical order

ascii.7
  Kir Kolyshkin
    Fix formatting of tables on second page to use monospaced font

mq_overview.7
   Michael Kerrisk
    Clarify construction rules for message queue object names

sem_overview.7
  Michael Kerrisk
    Clarify construction rules for semaphore object names
      See also
http://groups.google.com/group/comp.os.linux.development.apps/browse_thread/thread/b4a67caa765cb65f

========== Changes in man-pages-3.20 ==========

Released: 2009-03-31, Christchurch

Global changes
---

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
numa.7
  Michael
 Kerrisk
    Make source layout of 'Link with' text consistent with other pages
      No actual change to formatted output, but this makes the
      page sources more consistent for the purpose of grepping, etc.

mempcpy.3
signbit.3
significand.3
  Michael Kerrisk
    Global fix: acknowledge FSF in copyright
      These pages are heavily based on original material in
      glibc info pages, but the comments in the source of the pages
      did not acknowledge the FSF copyright on the original material.
      Fix that.

accept.2
read.2
recv.2
send.2
write.2
  Michael Kerrisk
    Fix discussion of EAGAIN/EWOULDBLOCK errors
      For a non-blocking socket, POSIX.1-2001/2008 allow either
      EAGAIN or EWOULDBLOCK to be returned in cases where a call
      would have blocked. Although these constants are defined
      with the same value on most Linux architectures (PA-RISC
      is the exception), POSIX.1
 does not require them to have
      the same value. Therefore, a portable application using
      the sockets API should test for both errors when checking
      this case.

      (NB POSIX.1 only mentions EWOULDBLOCK in the context of
      the sockets interfaces.)

      Change made after a note cross-posted on linux-arch@vger,

http://thread.gmane.org/gmane.linux.debian.ports.hppa/5615
and a suggestion for write(2) from Carlos O'Donell

basename.3

koi8-r.7
koi8-u.7
Michael Kerrisk
Add explicit character set encoding to first line of source
Nowadays mandb has
provision to understand a character set
encoding that is explicitly indicated in the first line
of the source. As pointed out by Colin Watson, including
such an explicit indication on pages encoded in anything
other than ISO 8859-1 or UTF-8 is useful for man-pages
that aren't shipped in UTF-8.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519209
and for some other background (responded to by Colin Watson
in the above report):
http://thread.gmane.org/gmane.comp.internationalization.linux/6040
("man page encoding", 5 Jul 2005)

Changes to individual pages

---

fallocate.2
  Michael Kerrisk
    VERSIONS: glibc support is provided since version 2.10

fcntl.2
  Michael Kerrisk
    Remove mention of EWOULDBLOCK from discussion of mandatory locking
      In the kernel, the error on encountering a mandatory lock is

    EAGAIN. Although EAGAIN and EWOULDBLOCK are the same on
      most Linux architectures, on some they are not, so don't
      mention EWOULDBLOCK as it is misleading. (Mea culpa.)

getcontext.2
  Michael Kerrisk
    Note that POSIX.1-2008 removes the specification of getcontext()

getitimer.2
  Michael Kerrisk
    Note that POSIX.1-2008 recommends POSIX timers API instead of this API

gettimeofday.2
  Michael Kerrisk
    Note that POSIX.1-2008 recommends clock_gettime() instead of this API

ptrace.2
  Michael Kerrisk
    Note use of 'data' for PTRACE_SYS{CALL,EMU} and PTRACE_*_SINGLESTEP
      These operations use the 'data' argument as a signal number,
      like PTRACE_CONT.

ptrace.2
  Mike Frysinger
    only reference <sys/user.h>
      The kernel no longer installs linux/user.h, so update
      references to sys/user.h.

recv.2
  Michael Kerrisk
    Add 'iovec' defn to defn of 'msghdr' structure

   The 'msghdr' structure includes a field of type 'iovec',
      so show the definition of that structure in this page.

rename.2
  Michael Kerrisk

Make ENOENT description consistent with POSIX.1-2008

timerfd_create.2
Michael Kerrisk
ERRORS: add EINVAL for invalid 'flags' for timer_settime()

truncate.2
Michael Kerrisk
SYNOPSIS: Fix description of feature test macro requirements
After a report by Arvid Norlander.

bcopy.3
Michael Kerrisk
Note that POSIX.1-2008 removes specification of bcopy()

bsd_signal.3
Michael Kerrisk
Note that POSIX.1-2008 recommends sigaction(2) instead of this API

ctime.3
Michael Kerrisk
Note that POSIX.1-2008 recommends strftime(3) instead of these functions

ecvt.3
Michael Kerrisk
Note that POSIX.1-2008 recommends sprintf(3) instead of these functions

gcvt.3
Michael Kerrisk
Note that POSIX.1-2008 recommends sprintf(3) instead of this function

getcwd.3
Michael Kerrisk
Note that getcwd() should be used instead of the obsolete getwd()

getgrent.3
Michael Kerrisk
Returned buffer may be statically allocated and overwritten by
later calls

gethostbyname.3
Michael Kerrisk
POSIX.1-2008 recommends getaddrinfo(3) and getnameinfo(3) instead

getnetent_r.3
Michael Kerrisk
Fix function name in text: s/getnetbynumber_r/getnetbyaddr_r/
The SYNOPSIS showed the right function name (getnetbyaddr_r),

but the text repeatedly used the wrong name (getnetbynumber_r).
Probably, this was a cut-and-paste error.

getpwent.3
Michael Kerrisk
Returned buffer may be statically allocated and overwritten by
later calls

index.3
Michael Kerrisk
Note that POSIX.1-2008 recommends strchr(3) and strrchr(3) instead

isalpha.3
Michael Kerrisk
Explain why POSIX.1-2008 marks isascii(3) obsolete

lockf.3
Nikanth Karthikesan

Update pointer to documentation in kernel source

makecontext.3
Michael Kerrisk
Note that POSIX.1-2008 recommends the use of POSIX threads instead

mq_notify.3
Michael Kerrisk
Document the POSIX.1-2008 optional EINVAL error
POSIX.1-2008 allows an optional EINVAL error if
notification==NULL and the caller is not currently
registered to receive notifications.

posix_fallocate.3
Michael Kerrisk
Clarify that EINVAL also occurs of 'len' *equals* zero
See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_fallocate.3
Michael Kerrisk
Document POSIX.1-2001 and POSIX.1-2008 specifications for EINVAL error
See http://bugzilla.kernel.org/show_bug.cgi?id=12919

posix_memalign.3
Michael Kerrisk
Document handling of size==0 case for posix_memalign()

pthread_exit.3
Michael Kerrisk

Fix error in DESCRIPTION: s/pthread_create/pthread_exit/

realpath.3
Michael Kerrisk
Rework resolved_path==NULL discussion w.r.t. POSIX.1-200[18]
Although the page already mentioned the resolved_path==NULL
feature, and that this feature was added in POSIX.1-2008, there
was still some crufty text in BUGS that hadn't been updated to
reflect the POSIX.1-2008 changes.

Also, some other minor wording and grammar fixes.

scalb.3
Michael Kerrisk
Note that POSIX.1-2008 recommends scalbln*(3) instead

seekdir.3
Michael Kerrisk
SYNOPSIS: Fix type of 'offset' argument: s/off_t/long/
And add a NOTES section pointing out that 'off_t'
was indeed used in glibc 2.1.1 and earlier.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230

sem_post.3
Michael Kerrisk
Document EOVERFLOW error

shm_open.3
Michael Kerrisk
Recast discussion on name length to exclude terminating NULL byte
Probably it's clearer to describe
the length of the IPC object
name as a count that excludes the null terminator.

siginterrupt.3
Michael Kerrisk
Note that POSIX.1-2008 recommends sigaction() instead

sigset.3
Michael Kerrisk
Note APIs that POSIX.1-2008 recommends instead of these obsolete APIs

strftime.3
Michael Kerrisk
Small fix to description of %G
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=516677

strftime.3

Michael Kerrisk
Add details on ISO 8601 week-based dates
ISO 8602 week-based dates are relevant for %G, %g, and %V,
and the existing details on these dates are a little thin.

strftime.3
Michael Kerrisk
Remove mention of year from ISO 8601 standard
The text mentioned the 1988 8601 standard, but there have
already been two revisions of the standard since then, so
simply remove mention of the year.

telldir.3
Michael Kerrisk
SYNOPSIS: Fix return type:
s/off_t/long/
And add a NOTES section pointing out that 'off_t'
was indeed used in glibc 2.1.1 and earlier.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=519230

timeradd.3
Michael Kerrisk
Note that on some systems, <=, >=, == don't work for timercmp()

timeradd.3
Michael Kerrisk
SYNOPSIS: Fix return types of timerisset() and timercmp()

toascii.3
Michael Kerrisk
Note why POSIX.1-2008 marks this function obsolete

console_ioctl.4
Alan Curry
Fix 'argp' type for KDGETLED description
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517485

group.5
Michael Kerrisk
Various minor rewordings and improvements

resolv.conf.5
Michael Kerrisk
Document 'ip6-bytestring' option

resolv.conf.5
Michael Kerrisk
Document 'edns0' option

resolv.conf.5
  Michael Kerrisk
    Document 'ip6-dotint' / 'no-ip6-dotint' option

resolv.conf.5
  Michael Kerrisk
     Note that maximum value of 'ndots' option is capped to 15

resolv.conf.5
  Michael Kerrisk
    Note that maximum value of 'timeout' option is capped to 30

hier.7
  Michael Kerrisk
    Add description of /srv
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=520904

ip.7
  Michael Kerrisk
    Fix type used to declare sin6_port
      The page should use the type specified by POSIX,
      rather than the (equivalent) type used in the kernel

ipv6.7
  Teddy Hogeborn
    Fix types used to declare sin6_family and sin6_port
      The page should use the types specified by POSIX,
      rather than the (equivalent) types used in the kernel.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=517074

mq_overview.7
  Michael Kerrisk
    Recast discussion on name length to exclude terminating NULL byte
      Probably it's clearer to describe the length of the IPC object
      name as a count that
 excludes the null terminator.

rtld-audit.7
  Michael Kerrisk
    Note that multiple libraries in LD_AUDIT doesn't work
      This is reportedly fixed in glibc 2.10.
      See http://sourceware.org/bugzilla/show_bug.cgi?id=9733

sem_overview.7
  Michael Kerrisk
    Fix discussion of length of semaphore names

Because of the "sem." prefix added by glibc to a semaphore
name, the limit on the length of the name (excluding the
terminating null byte) is 251 characters.

========== Changes in man-pages-3.21 ==========

Released: 2009-04-15, Los Gatos

Apologies if I missed anyone!

New and rewritten pages
---

pthread_setconcurrency.3
  Michael
 Kerrisk
      New page documenting pthread_setconcurrency(3) and
      pthread_getconcurrency(3)

pthread_yield.3
  Michael Kerrisk
      New page documenting pthread_yield(3)

New and changed links
---

pthread_getconcurrency.3
  Michael Kerrisk
      New link to new pthread_setconcurrency(3)

Changes to individual pages
---

initrd.4

Michael Kerrisk
Various minor wording improvements

initrd.4
Frank Dana
Add missing word in description

feature_test_macros.7
Michael Kerrisk
Update for glibc 2.10 changes to <features.h>
From glibc 2.10, <features.h> understands the values 200809
for _POSIX_C_SOURCE and 700 for _XOPEN_SOURCE, and makes
corresponding changes to defaults for other feature test macros.
Michael Kerrisk
Add an example program
This example program makes it possible to explore what
feature test macros are set depending
on the glibc version
and the macros that are explicitly set.

ldconfig.8
Michael Kerrisk
/etc/ld.so.conf also include libraries found in /lib and /usr/lib

Apologies if I missed anyone!

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Rewrite crufty text about number of args in older version of clone()
        Some bit rot had crept in regarding the discussion of the
        number of arguments in older versions of this syscall.
        Simplify the text to just say that Linux 2.4 and earlier
        didn't have ptid, tls, and ctid arguments.

        See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533868
  Michael Kerrisk
    Fix version number for CLONE_NEWIPC
      It's 2.6.19, not 2.4.19.
  Michael Kerrisk
    Fix errors in argument names in text (ptid, ctd)

execve.2
  Mike Frysinger
    Remove erroneous statement that
 pending signal set is cleared
    on execve(2).

fcntl.2
  Michael Kerrisk
    The kernel source file mandatory.txt is now mandatory-locking.txt
  Michael Kerrisk
    The Documentation/* files are now in Documentation/filesystems

flock.2
  Michael Kerrisk
    Remove unneeded reference to Documentation/mandatory.txt
      Mandatory locks are only implemented by fcntl() locking

Michael Kerrisk
The Documentation/* files are now in Documentation/filesystems

fork.2
Jeff Moyer
Document fork() behaviour for the Linux native AIO io_context
It was noted on lkml that the fork behaviour is documented
for the POSIX AIO calls, but not for the Linux native calls.
Here is a patch which adds a small blurb that folks will
hopefully find useful.

Upon fork(), the child process does not inherit the
io_context_t data structures returned by io_setup,
and thus cannot
submit further asynchronous I/O or
reap event completions for said contexts.

getdents.2
Michael Kerrisk
The d_type field is fully supported on Btrfs

mount.2
Michael Kerrisk
Document MS_STRICTATIME, update description of MS_RELATIME
Starting with Linux 2.6.30, the MS_RELATIME behavior became
the default, and MS_STRICTATIME is required to obtain the
traditional semantics.

poll.2
Michael Kerrisk
Remove EBADF error from ERRORS
As reported by Motohiro:

"man poll" describe this error code.

>ERRORS
> EBADF An invalid file descriptor was given in one of the sets.

but current kernel implementation ignore invalid file descriptor,
not return EBADF.
...

In the other hand, SUSv3 talk about

> POLLNVAL
> The specified fd value is invalid. This flag is only valid in the
> revents

member; it shall ignored in the events member.

and

> If the value of fd is less than 0, events shall be ignored, and
> ireevents shall be set to 0 in that entry on return from poll().

but, no desribe EBADF.
(see http://www.opengroup.org/onlinepubs/009695399/functions/poll.html)

So, I think the implementation is correct.

Why don't we remove EBADF description?

sigaction.2
  Michael Kerrisk
    Expand description of si_utime and si_stime fields of siginfo_t

stat.2
  Michael Kerrisk
    Improve wording of ENOTDIR error

syscalls.2
  Michael Kerrisk
    Add preadv() and pwritev(), new in kernel 2.6.30

wait.2
  Gokdeniz Karadag
    Document CLD_DUMPED and CLD_TRAPPED si_code values

daemon.3
  Michael Kerrisk
    Clarify discussion of 'noclose' and 'nochdir' arguments

ffs.3
  Petr Baudis
    SEE ALSO: add memchr(3)

fmemopen.3
  Petr Baudis
    Relocate BUGS
section to correct position
  Petr Baudis
    NOTES: there is no file descriptor associated with the returned stream
      Alexander Lamaison pointed out that this is not obvious
      from the documentation, citing an example with passing the
      FILE * handle to a function that tries to fstat() its
      fileno() in order to determine the buffer size.

Michael Kerrisk
CONFORMING TO: remove note that these functions are GNU extensions
That sentence is now redundant, since these functions
are added in POSIX.1-2008.

lockf.3
Michael Kerrisk
Clarify relationship between fcntl() and lockf() locking

memchr.3
Petr Baudis
SEE ALSO: add ffs(3)

readdir.3
Michael Kerrisk
The d_type field is fully supported on Btrfs

setjmp.3
Mike Frysinger
Fix typo and clarify RETURN description
The word "signal" was duplicated in NOTES, and the RETURN
section refers to
setjmp() and sigsetjmp(), and mentions
longjmp(), but not siglongjmp().

strcmp.3
Petr Baudis
SEE ALSO: add strverscmp(3)

strcpy.3
Mark Hills
SEE ALSO: Add strdup(3)

complex.7
Michael Kerrisk
Add missing header file for example program
Reimar Döffinger
Fix type used in example code
man complex (from release 3.18) contains the following code:
complex z = cexp(I * pi);
Reading the C99 standard, "complex" is not a valid type,
and several compilers (Intel ICC, ARM RVCT) will refuse to compile.
It should be
double complex z = cexp(I * pi); instead.

environ.7
Michael Kerrisk
Note that last element in environ array is NULL

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528628
  Michael Kerrisk
    Wording fixes

mq_overview.7
  Michael Kerrisk
    Note that mkdir and mount commands here need superuser privilege
  Michael Kerrisk

    Fix example showing contents of /dev/mqueue file

standards.7
  Michael Kerrisk
    Remove references to dated books
      Gallmeister and Lewine are rather old books. Probably,
      there are better books to consult nowadays, and anyway,
      this man page isn't intended to be a bibliography.

========== Changes in man-pages-3.23 ==========

Released: 2009-09-30, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Aaron Gardner <aaron.j.gardner@gmail.com>
Andrey Vihrov <vihrov@gmail.com>
Christoph Hellwig <hch@lst.de>
Georg Sauthoff <gsauthof@techfak.uni-bielefeld.de>
Leslie P. Polzer <sky@viridian-project.de>
Marc Lehmann <debian-reportbug@plan9.de>
Mark Hills <mark@pogo.org.uk>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Nicolas François <nicolas.francois@centraliens.net>
Serge Hallyn <serue@us.ibm.com>
Siward
 de Groot <siward@ziggo.nl>
rui rlex <rui.rlex@gmail.com>

Apologies if I missed anyone!

Changes to individual pages
---

execve.2
pipe.2
tee.2
fmemopen.3
mq_notify.3
qsort.3
  Michael Kerrisk
    Replace use of assert() by code that checks argc
      See http://bugzilla.kernel.org/show_bug.cgi?id=13569

      As noted by Andrey:
      The purpose of the assert macro, defined in <assert.h>,
      is to provide a tool to check for programming mistakes
      or program logic errors. However, the assert macro must
      never be used to perform checks for run time errors,
      since, with the NDEBUG macro defined, expressions within
      the assert macro invocations are not evaluated/checked
      for, resulting in behavior that was not originally intended.
      ...
      The pages affected in the core package are

      execve(2)
      pipe(2)
      tee(2)

    fmemopen(3)
      mq_notify(3)
      qsort(3)

getrusage.2
  Michael Kerrisk
    ru_inblock and ru_oublock are now implemented
      These fields of the rusage structure are filled in since
      Linux 2.6.22.

mmap.2
  Michael Kerrisk
    Add brief documentation of MAP_HUGETLB
      This flag is new in 2.6.32, and serves a similar
      purpose to the shmget() SHM_HUGETLB flag.

open.2
  Christoph Hellwig
    add some comments on O_SYNC and friends

poll.2
  Michael Kerrisk
    Clarify wording describing of 'nfds' argument.
      reported by: rui rlex <rui.rlex@gmail.com>

semctl.2
  Nicolas François
    Remove some redundant words

setpgid.2
  Michael Kerrisk
    Add an explanation of orphaned process groups

splice.2
tee.2
vmsplice.2
  Mark Hills
    Fix return type
      Since glibc 2.7, the return type for these functions
      is ssize_t (formerly it was long).

stat.2
  Nicolas
 François
    Fix small bug in example program
      Since it is a failure, EXIT_FAILURE looks more appropriate
      than EXIT_SUCCESS.

umount.2
  Michael Kerrisk
    glibc only exposes MNT_DETACH and MNT_EXPIRE since version 2.11
      See http://sourceware.org/bugzilla/show_bug.cgi?id=10092

exit.3
  Michael Kerrisk
    Add a pointer to explanation of orphaned process groups in setpgid(2)

fflush.3
  Michael Kerrisk
    fflush() discards buffered input

ffs.3
  Michael Kerrisk
    Clarify that ffsl() and ffsll() are GNU extensions

getaddrinfo.3
  Michael Kerrisk
    Note nonstandard assumed hints.ai_flags value when hints is NULL

When hints is NULL, glibc assumes hints.ai_flags is
AI_V4MAPPED|AI_ADDRCONFIG whereas POSIX says 0.
According to Ulrich Drepper, glibc's behavior is better.

getmntent.3
Mike Frysinger
setmntent() argument is 'filename' not 'fp'
The description
of setmntent() formerly used the wrong
argument name.

posix_fallocate.3
Nicolas François
Fix reference to POSIX.1-2008
The sentence mentions twice POSIX.1-2001.
I guess the second one should be POSIX.1-2008.
This should be checked in the standard.

setenv.3
Michael Kerrisk
Improve ERRORS section
Add ENOMEM error; improve EINVAL description. Also, make
RETURN VALUE section a little more accurate in its mention
of errno.

strftime.3
Nicolas François
Fix error in description: s/Monday/Thursday/

proc.5
Nicolas François
Fix page cross reference
max_user_watches is better explained in epoll(7) than inotify(7).

proc.5
Michael Kerrisk
dmesg is in section 1, not section 8

capabilities.7
Michael Kerrisk
FS UID manipulations affect CAP_LINUX_IMMUTABLE and CAP_MKNOD
Nowadays, file system UID manipulations also affect
CAP_LINUX_IMMUTABLE (since 2.6.3) and CAP_MKNOD (since 2.6.29).

capabilities.7
Michael Kerrisk
Fix version number for CAP_MKNOD in FS UID manipulations
A recent patch said "since 2.6.29". It should have

been "since 2.6.30".

capabilities.7
  Nicolas François
    Reword a bad sentence in description of capability bounding set.

mq_overview.7
  Michael Kerrisk
    Change documented ranges for msg_max and msgsize_max
      Linux 2.6.28 changed the permissible ranges for
      these /proc files.

tcp.7
udp.7
  Nicolas François
    Replace references to syctl interfaces with /proc

========== Changes in man-pages-3.24 ==========

New and rewritten pages
---

add_key.2
  David Howells
    New page documenting add_key(2)
      Taken from keyutils-1.1 package.

keyctl.2
  David Howells
    New page documenting keyctl(2)
      Taken from keyutils-1.1 package.

request_key.2
  David Howells
    New page documenting request_key(2)
      Taken from keyutils-1.1 package.

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/non-root/unprivileged/

Various pages
  Michael Kerrisk

Global fix: s/non-privileged/unprivileged/

Various pages
Michael Kerrisk
Global fix: /non-superuser/unprivileged user/

Various pages
Michael Kerrisk
s/non-/non/
The tendency in English, as prescribed in style guides like Chicago MoS, is toward removing hyphens after prefixes like "non-" etc.

Various pages
Michael Kerrisk
Global fix: s/re-/re/
The tendency in English, as prescribed in style guides like Chicago MoS, is toward removing hyphens after prefixes like "re-" etc.

Various pages
Michael Kerrisk
Global fix: s/multi-/multi/
The tendency in English, as prescribed in style guides like Chicago MoS, is toward removing hyphens after prefixes like "multi-" etc.

Various pages
Michael Kerrisk
Global fix: s/pre-/pre/
The tendency in English, as prescribed in style guides like Chicago MoS, is toward removing hyphens after prefixes like "pre-" etc.

Various pages
Michael Kerrisk
Global fix: s/sub-/sub/
The tendency in English, as prescribed in style guides like Chicago MoS, is toward removing hyphens after prefixes like "sub-" etc.

stime.2
time.2
utimensat.2
ctime.3
difftime.3
ftime.3
getspnam.3

mq_receive.3
mq_send.3
rtime.3
sem_wait.3
strftime.3
strptime.3
timeradd.3
rtc.4
core.5
proc.5
icmp.7
time.7
  Michael Witten
    Global fix: Consistently define the Epoch
      All definitions of the Epoch have been refactored to the following:

        1970-01-01 00:00:00 +0000 (UTC)

      That form is more consistent, logical, precise, and internationally
      recognizable than the other variants.

      Also, some wording has been altered as well.

spu_create.2
getopt.3
passwd.5
  Michael Kerrisk
    Global fix: s/non-existing/nonexistent/

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
symlinkat.2
unlinkat.2
utimensat.2
mkfifoat.3
  Michael Kerrisk
    Update feature test macro requirements
      Starting in glibc 2.10, defining _XOPEN_SOURCE >= 700,
      or _POSIX_C_SOURCE >= 200809 exposes the declarations

of
these functions.

Changes to individual pages
---

clock_getres.2
Michael Kerrisk
Update text on nonsetabble CLOCK_*_CPUTIME_ID clocks
SUSv3 permits, but does not require CLOCK_THREAD_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID to be settable.
See http://bugzilla.kernel.org/show_bug.cgi?id=11972.

execve.2
Colin Watson
Fix description of treatment of caught signals
Caught signals reset to their default on an execve() (not
to being ignored).

fcntl.2
Michael Kerrisk
s/F_OWNER_GID/F_OWNER_PGRP/
Peter Zijlstra took the name change I suggested.
Michael Kerrisk
Document F_[SG]ETOWN_EX; update details on F_SETOWN
Linux 2.6.32 adds F_SETOWN_EX and F_GETOWN_EX.
Linux 2.6.12 changed (broke) the former behavior of
F_SETOWN with respect to threads.

intro.2
intro.3
Michael Kerrisk
Make subsection
heading consistent with other intro.? pages
These pages used "Copyright Terms"; the other intro.? pages
used "Copyright Conditions". Make these pages like the others.

sendfile.2
Michael Kerrisk
Clarify behavior when 'offset' is NULL

seteuid.2
Michael Kerrisk
Note unstandardized behavior for effective ID
POSIX.1 doesn't require that the effective ID can be changed
to the same value it currently has (a no-op). The man page
should note this, since some other implementations

don't permit it.

setgid.2
  Michael Kerrisk
    Fix EPERM error description
      s/effective group ID/real group ID/
      This bug lived in man pages for 15 years before Jason
      spotted it! I checked back in Linux 1.0, and the behavior
      was as the fixed man page describes.

setreuid.2
  Michael Kerrisk
    Add more detail on POSIX.1 specification for these syscalls

setuid.2
   Michael Kerrisk
    Remove crufty statement that seteuid() is not in POSIX
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=569812

stime.2
strftime.3
tzset.3
zic.8
  Michael Witten
    GMT -> UTC (where appropriate)

sync_file_range.2
  Christoph Hellwig
    Add some big warnings re data integrity
      This system call is by design completely unsuitable for any data
      integrity operations. Make that very clear in the manpage.

CPU_SET.3
  Vlastimil Babka
    SYNOPSIS: Fix return types for CPU_COUNT_*()
      These functions return 'int' not void'.

confstr.3
  Michael Kerrisk
    Fix feature test macro requirements

daemon.3
  Michael Kerrisk
    Fix description of 'nochdir' argument.
      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819

gethostbyname.3
  Michael Kerrisk

Document feature test macro requirements for herror() and hstrerror()
Since glibc 2.8, one of _BSD_SOURCE,
_SVID_SOURCE,
or _GNU_SOURCE is required.

getline.3
Michael Kerrisk
Update to reflect that these functions were standardized in POSIX.1-2008

getnameinfo.3
Michael Kerrisk
Document feature test macros requirements for NI_MAXHOST and NI_MAXSERV
Since glibc 2.8, one of _BSD_SOURCE, _SVID_SOURCE, or _GNU_SOURCE
must be defined to obtain these definitions.

getopt.3
Jonathan Nieder
Fix feature test macro requirements

memchr.3
Michael Kerrisk
Add feature test macro requirements for memrchr()

nextafter.3
Michael Kerrisk
Fix notable error in DESCRIPTION.
"less than y" should be "less than x".

popen.3
Michael Kerrisk
Fix feature test macro requirements

pthread_attr_setdetachstate.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
Denis Barbier
Argument name is 'attr' not 'thread'
The function argument was misnamed in the DESCRIPTION
on these
three pages.

rtnetlink.3
Michael Kerrisk
Various fixes in example code
Edward reported a problem in the example code, where a variable
seems to be misnamed. Upon inspection, there seem to be a few
such instances, and this patch is my best guess at how things
should look.

sched_getcpu.3
  Michael Kerrisk
    Place correct header file in SYNOPSIS

sleep.3
  Bill O. Gallmeister
    sleep() puts calling *thread* to sleep (not calling *process*)

sleep.3
  Bill O. Gallmeister
    Add nanosleep(2) to SEE ALSO

strftime.3
  Michael Kerrisk
    %z is defined in SUSv3
      So, substitute "GNU" tag in man page by "SU".

strftime.3
  Michael Witten
    Move 822-compliant date format example to EXAMPLES section
      The RFC 822-compliant date format given in the description
      of `%z' is now moved to the `EXAMPLES' section (note: `EXAMPLE'
      has been
renamed `EXAMPLES').

      Furthermore, that format example is now actually
      RFC 822-compliant (using `%y' instead of `%Y') and has been
      qualified as being correct only when in the context of at least
      an English locale. Also, `%T' is used in place of `%H:%M:%S'.

      For completeness, an RFC 2822-compliant format example has been
      similarly added.

strftime.3
  Michael Witten
    Expand introductory text

strftime.3
  Michael Witten
    Clarification of %z specifier

string.3
  Mark Hills
    Add stpcpy() to this list of string functions

strptime.3
  Michael Kerrisk

Initialize tm structure in example program

undocumented.3
Michael Kerrisk
Remove pages now documented
By now, the following are documented:

fopencookie(3)
freeifaddrs(3)
rawmemchr(3)
readdir_r(3)
getutmp(3)
getutmpx(3)
utmpxname(3)

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=554819

group.5
Michael Kerrisk
s/passwd/password/
The page inconsistently used "passwd" and "password"
to refer to the same field.

capabilities.7
Michael Kerrisk
Update securebits discussion to use SECBIT_* flags

feature_test_macros.7
Michael Kerrisk
_POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE
Since glibc 2.10, _POSIX_C_SOURCE >= 200808 defines _ATFILE_SOURCE

path_resolution.7
Michael Kerrisk
Add readlink(2) to SEE ALSO
Michael Kerrisk
Fix NAME line
The poorly constructed part preceding "\-" causes apropos
not to be able to find the subject.

http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=558300

signal.7
Michael Kerrisk
Fix discussion of SIGUNUSED
Clarify that this signal really is synonymous with SIGSYS.
See http://bugzilla.kernel.org/show_bug.cgi?id=14449

Apologies if I missed anyone!

New and rewritten pages
---

migrate_pages.2
  Andi Kleen
    New page documenting migrate_pages(2).
      Andi's text based on the move_pages.2 page;
      additional edits by mtk.
      migrate_pages(2) was new in Linux 2.6.16.

quotactl.2
  Jan Kara
    Major updates

      Update the page to consolidate information from the
      outdated man-pages quotactl.2 page and the quotactl.2
      page in the "quota-tools" package. The page in "quota-tools"
      has now been dropped by Jan Kara, so that there is just one
      canonical quotactl.2 page (in pan-pages).
  Michael Kerrisk
      Various other pieces added to the page by mtk.

Newly documented interfaces in existing pages
---

fcntl.2
  Michael Kerrisk
    Document F_SETPIPE_SZ and F_GETPIPE_SZ
      These commands, new in kernel 2.6.35, set and get the capacity
      of pipes.

madvise.2
  Andi Kleen
    Document MADV_HWPOISON
  Michael Kerrisk
    Added documentation of MADV_MERGEABLE and MADV_UNMERGEABLE
      These flags (used for Kernel Samepage Merging, KSM)
      are new in 2.6.32.
  Andi Kleen

Document MADV_SOFT_OFFLINE
This operation was added in
Linux 2.6.33.

mmap.2
Michael Kerrisk
Document MAP_UNINITIALIZED flag
New in Linux 2.6.33.

prctl.2
Andi Kleen
Document the hwpoison prctls in 2.6.32

sched_setscheduler.2
Michael Kerrisk
Document SCHED_RESET_ON_FORK
New in Linux 2.6.32

umount.2
Michael Kerrisk
Document UMOUNT_NOFOLLOW
New in Linux 2.6.34.

mkstemp.3
Michael Kerrisk
Document mkstemps() and mkostemps()
These functions are new in glibc 2.11. They allow the template
string to include a suffix after the "XXXXXX" string.

proc.5
Michael Kerrisk
Document /proc/sys/vm/memory_failure_early_kill
New in 2.6.32. Description based on the text in
Documentation/sysctl/vm.txt.
Michael Kerrisk
Document /proc/sys/vm/memory_failure_recovery
New in Linux 2.6.32. Description based on the text in
Documentation/sysctl/vm.txt.
Michael Kerrisk

Document /proc/sys/fs/pipe-max-size

socket.7
Jan Engelhardt
Document SO_DOMAIN and SO_PROTOCOL
These read-only socket options were new in Linux 2.6.32.

New and changed links
---

fstatvfs.2
  Michael Kerrisk
    Adjust link to point to Section 3

fstatvfs.3
statvfs.2
  Michael Kerrisk
    New link to page relocated to Section 3

mkstemps.3
mkostemps.3
  Michael Kerrisk
    New links to mkstemp.3
      mkstemp.3 now describes mkstemps(3) and mkostemps(3).

timer_create.2
timer_delete.2
timer_getoverrun.2
timer_settime.2
getline.3
  Michael Kerrisk
    Add 'L' to constants in feature test macro specifications
      Be consistent with POSIX, which uses constants such as 200809L.

Global changes
---

open.2
sync_file_range.2
umount.2
  Michael Kerrisk
    Global fix: s/filesystem/file system/

Changes to individual pages
---

fcntl.2
  Michael Kerrisk
    Note
 that glibc 2.11 papers over the kernel F_GETOWN bug
      Since version 2.11, glibc works around the kernel limitation for
      process groups IDs < 4096 by implementing F_GETOWN via F_GETOWN_EX.

futex.2
  Michael Kerrisk
    Various fixes in SEE ALSO

getpriority.2
nice.2
  Francesco Cosoleto
    Move renice from section 8 to section 1

getrusage.2
  Mark Hills
    Add ru_maxrss
      See kernel commit 1f10206.
  Mark Hills
    Description of maintained fields
      These descriptions are taken from NetBSD 5.0's getrusage(2).
  Michael Kerrisk
    Enhanced description of various fields

mlock.2
  Michael Kerrisk
    /proc/PID/status VmLck shows how much memory a process has locked
      After a note from Tom Swigg, it seems sensible mention VmLck here.

mount.2
  Petr Uzel
    Fix incorrect path

move_pages.2
  Andi Kleen
    Clarify includes/libraries

mremap.2
  Michael Kerrisk
    Clarify existence
 of fifth argument.

msgctl.2
semctl.2
shmctl.2
  Francesco Cosoleto
    Move ipcs from section 8 to section 1

open.2
  Michael Kerrisk
    Remove ambiguity in text on NFS and O_EXCL.

poll.2

Michael Kerrisk
Fix discussion of ppoll() timeout argument
1. Rename ppoll)(_ argument to "timeout_ts" to distinguish it
from the poll() argument in the text.
2. More accurately describe the poll() call that is equivalent
to ppoll().

posix_fadvise.2
Michael Kerrisk
Add sync_file_range(2) under SEE ALSO

prctl.2
Michael Kerrisk
Correct PR_SET_KEEPCAPS description
The "keep capabilities" flag only affects the treatment of
permitted capabilities, not effective capabilities.
Also: other improvements to make the PR_SET_KEEPCAPS text clearer.

select_tut.2
Michael Kerrisk
Fix bug in example program

sigaction.2
Michael Kerrisk
Add TRAP_BRANCH
and TRAP_HWBKPT to si_code values for SIGTRAP
Michael Kerrisk
Rearrange text describing fields set by sigqueue(2)
Michael Kerrisk
Add details for signals sent by POSIX message queue notifications
Michael Kerrisk
Improve description of various siginfo_t fields
Michael Kerrisk
Add some details for SIGTRAP and si_trapno
Andi Kleen
Document hwpoison signal extensions

statfs.2
Michael Kerrisk
Bring statfs struct type declarations closer to glibc reality
Fang Wenqi
Add definition EXT4_SUPER_MAGIC = 0xEF53
Michael Kerrisk
Document f_frsize field.

statvfs.2
Michael Kerrisk
Move this page to section 3 (since it's a library call)

swapon.2
  Ivana Hutarova Varekova
    Note effect of CONFIG_MEMORY_FAILURE on MAX_SWAPFILES
      From 2.6.32, MAX_SWAPFILES is decreased by 1 if the kernel is
      built with CONFIG_MEMORY_FAILURE.

syscalls.2
  Michael Kerrisk

   Bring system call list up to date with Linux 2.6.33
  Michael Kerrisk
    Fix kernel version number for utimes()

cproj.3
  Michael Kerrisk
    Note fix for C99 conformance in glibc 2.12.

crypt.3
  Petr Baudis
    Correct note on key portion significance
      As Marcel Moreaux notes:

        The Linux manpage for crypt()[1] contains the following
        statement as the last sentence of the NOTES section:

          In the SHA implementation the entire key is significant
          (instead of only the first 8 bytes in MD5).

        It should probably say "DES" where it says "MD5" (and maybe
        "MD5/SHA" where it says "SHA"), because in MD5 password hashing,
        the entire key is significant, not just the first 8 bytes.

      This patch fixes the wording.

fmemopen.3
  Michael Kerrisk
    Bug fix in example program

ftw.3
  Michael Kerrisk
    Note that if 'fn' changes
 CWD, the results are undefined
  Michael Kerrisk
    Clarify description of fpath argument
      As reported by Pierre Habouzit, 'fpath' is not relative
      to 'dirpath'. It is either relative to the calling process's
      current working directory (if 'dirpath' was relative), or it

is absolute (if 'dirpath' was absolute).

getaddrinfo.3
  Christian Franke
    Fix a field name mixup: s/ai_family/ai_flags/

getline.3
  Robert Wohlrab
    Remove unneeded check before free()
      The manpage of getline shows an example with an extra NULL pointer
      check before it calls free. This is unneeded according to free(3):

        If ptr is NULL, no operation is performed.

      This patch removes the "if" check.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572508

log.3
log10.3
log2.3
  Jan Engelhardt
    Add cross-references to other-base logarithmic functions

opendir.3
  Petr Baudis
     Specify feature test macro requirements for fdopendir(3)
       Currently, there is no note on the fact that fdopendir() is
       POSIX.2008-only.

openpty.3
  Eric Blake
    Use const as appropriate
  Michael Kerrisk
    Note glibc version that added "const" to function arguments
  Michael Kerrisk
    Explicitly note that these functions are not in POSIX

resolver.3
  Michael Kerrisk
    Fix declaration of dn_comp() in SYNOPSIS
      Remove the second 'exp_dn' from the calling signature.

termios.3
  Michael Kerrisk
    Change NOFLSH text to speak of characters, not signals

core.5

Michael Kerrisk
Update description of coredump_filter
Kernel 2.6.24 added MMF_DUMP_ELF_HEADERS.
Kernel 2.6.28 added MMF_DUMP_HUGETLB_PRIVATE and
MMF_DUMP_HUGETLB_SHARED.

elf.5
Daisuke HATAYAMA
Document PN_XNUM extension
In linux-2.6.34-rc1, an ELF core extension was added; user-land
tools manipulating ELF core dump such as gdb and binutils has
already been modified before; so elf.5 needs to be modified
accordingly.

You can follow information on the ELF extension via the LKML post:
http://lkml.org/lkml/2010/1/3/103
Date Mon, 04 Jan 2010 10:06:07 +0900 (JST)
Subject ... elf coredump: Add extended numbering support

This Linux-specific extension was added in kernel 2.6.34.

Reviewed-by: Petr Baudis <pasky@suse.cz>

Michael Kerrisk
Remove EI_BRAND
As reported by Yuri Kozlov and confirmed by Mike Frysinger,
EI_BRAND is not in GABI
(http://www.sco.com/developers/gabi/latest/ch4.eheader.html)
It looks to be a BSDism
Michael Kerrisk
Remove words under '.note': "described below"
The existing text is broken, because there is
no '"Note Section" format' describe
below. Simplest
solution is to remove the words "described below".

filesystems.5
Jeff Barry
Add discussion of ntfs and ext4

proc.5
Michael Kerrisk
Simplify description of /proc/sys and /proc/sys/fs
In the description of these directories, there's no need
to list all the files and subdirectories that they contain;
that information is provided by the entries that follow.

services.5

Yuri Kozlov
Remove crufty reference to nonexistent BUGS section

capabilities.7
Michael Kerrisk
Document CAP_SYS_RESOURCE and F_SETPIPE_SZ
With CAP_SYS_RESOURCE, a process can increase pipe capacity above
/proc/sys/ps/pipe-max-size.
Michael Kerrisk
Add get_robust_list() info under CAP_SYS_PTRACE
Michael Kerrisk
Add MADV_HWPOISON under CAP_SYS_ADMIN

signal.7
Michael Kerrisk
Make a clearer statement about nonportable aspect of signal(2)
Make
a clearer statement that signal(2) is less portable for
establishing a signal handler.

socket.7
Michael Kerrisk
Use consistent language to describe read-only socket options

udp.7
Michael Kerrisk
Add FIONREAD warning.
Warn that FIONREAD can't distinguish case of a zero-length
datagram from the case where no datagrams are available.

    SYNOPSIS: Add reference to feature_test_macros(7)
      These pages specify feature test macros in the function
      prototypes. Add a reference to feature_test_macros(7),
      so that readers are pointed to the information that
      feature test macros must be defined before including
      any header file.

    Fix decimal values in encoding tables
      Octal and hexadecimal values are right, but there are some
      off-by one errors in decimal values. Correct values are
      printed by this command:

        perl -pi -e 'if (s/^([0-7]+)\t([0-9]+)\t([0-9a-fA-F]+)//)
          {printf "%03o\t%d\t%s", hex($3), hex($3), $3;};' man7/*.7

Changes to individual
 pages
----

capget.2
  Michael Kerrisk
    SYNOPSIS: Remove unneeded "undef _POSIX_SOURCE"

fcntl.2
  Michael Kerrisk
    Add feature test macro requirements for F_GETOWN and F_SETOWN

fcntl.2
  Michael Kerrisk
    Note feature test macro requirements for F_DUPFD_CLOEXEC

getrlimit.2
  Michael Kerrisk
    Document units for RLIMIT_RTTIME limit
      This limit is in microseconds

      http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=596492

lseek.2
  Michael Kerrisk
    Removed note about return type on ancient systems

mount.2
  Michael Kerrisk
    Definitions of various MS_* constants only appeared in glibc 2.12
      See http://sourceware.org/bugzilla/show_bug.cgi?id=11235

stat.2
  Michael Kerrisk
    Update information on nanosecond timestamp fields
      Update feature test macro requirements for exposing these fields.
      Note that these fields are specified in POSIX.1-2008.

timer_create.2
   Michael Kerrisk
    Factor out generic material that was moved to new sigevent(7) page

aio_fsync.3
  Michael Kerrisk
    Add reference to new sigevent(7) page

atanh.3
  Michael Kerrisk
    glibc 2.10 fixed pole error bug
      http://sourceware.org/bugzilla/show_bug.cgi?id=6759
      was resolved.

cerf.3
  Michael Kerrisk
    Make it clearer that this function is unimplemented

cos.3
  Michael Kerrisk
    errno is now correctly set to EDOM on a domain error
      http://sources.redhat.com/bugzilla/show_bug.cgi?id=6780
      was (silently) resolved.

expm1.3
  Michael Kerrisk

errno is now correctly set to ERANGE on a range error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6788
was (silently) resolved.

fmod.3
Michael Kerrisk
errno is now correctly set to EDOM for the x==inf domain error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6784

was (silently) resolved.

insque.3
Michael Kerrisk
Noted prev == NULL bug in glibc 2.4 and earlier
As noted by Remi Denis-Courmont, glibc nowadays allows
'prev' to be NULL, as required by POSIX for initializing
a linear list. But in glibc 2.4 and earlier, 'prev' could
not be NULL. Add a BUGS section noting this.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=551201
Michael Kerrisk
Added info on circular lists, and initializing circular lists
Michael Kerrisk
Added example program

lgamma.3
Michael Kerrisk
glibc 2.10 fixed pole error bug
http://sourceware.org/bugzilla/show_bug.cgi?id=6777
was (silently) resolved.

log2.3
Matthew Flaschen
log2() function does not conform to C89
log2(), log2f(), and log2l() do not conform to C89.
They are defined in C99. See http://flash-gordon.me.uk/ansi.c.txt
and
http://www.schweikhardt.net/identifiers.html

mq_notify.3
Michael Kerrisk
Factor out generic material that was moved to new sigevent(7) page

pow.3
Michael Kerrisk
errno is now correctly set to ERANGE on a pole error
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6776
was (silently) resolved.

pthread_kill_other_threads_np.3
  Michael Kerrisk
    CONFORMING TO: Note meaning of "_np" suffix

rand.3
  Michael Kerrisk
    Clarify description of range of returned value
  Michael Kerrisk
    Add an example program
  Michael Kerrisk
    Expand description of rand_r()

random.3
  W. Trevor King
    Update initstate() return value description to match glibc

readdir.3
  Michael Kerrisk
    Clarify that "positive error numbers" are listed in ERRORS

rexec.3
  Michael Kerrisk
    SYNOPSIS: Add header file and feature test macro requirements

sigpause.3
  Michael Kerrisk
    Correct discussion of
 when BSD vs SysV version is used in glibc

sin.3
  Michael Kerrisk
    errno is now correctly set to EDOM on a domain error
      http://sources.redhat.com/bugzilla/show_bug.cgi?id=6781
      was (silently) resolved.

tan.3
  Michael Kerrisk
    errno is now correctly set to EDOM on a domain error
      http://sources.redhat.com/bugzilla/show_bug.cgi?id=6782
      was (silently) resolved.

wcscasecmp.3
wcsncasecmp.3
wcsnlen.3
  Michael Kerrisk
    Added VERSIONS section

boot.7
  Yuri Kozlov
    Update list of major Linux distributions

feature_test_macros.7
  Michael Kerrisk
    Make text on required placement of macros more prominent
      Move the text that notes the requirement that feature test macros
      must be defined before including any header files to the top of
      the page, and highlight the text further, so that the reader will
      not miss this point.

pthreads.7
signal.7
  Michael Kerrisk
     Add SEE ALSO reference to new sigevent(7) page

tcp.7
  Michael Kerrisk
    Clarify header file details for SIOCINQ and SIOCOUTQ
      Also note synonymous FIONREAD and TIOCOUTQ.

========== Changes in man-pages-3.28 ==========

Released: 2010-10-04, Munich

New and rewritten pages

---

getaddrinfo_a.3
  Petr Baudis
    New page documenting getaddrinfo_a()
      The page also documents gai_suspend(), gai_cancel(),

 and gai_error().

aio.7
  Michael Kerrisk
    New page providing an overview of POSIX asynchronous I/O

Newly documented interfaces in existing pages
---

exec.3
  Michael Kerrisk
    Document execvpe()
      This function was added to glibc in version 2.11.
      Also various other small rewrites in the page.

New and changed links
---

gai_cancel.3
gai_error.3
gai_suspend.3
  Petr Baudis
    New links to new getaddrinfo_a.3 page

error_one_per_line.3
  Michael Kerrisk
     Fix misnamed link file (was error_on_per_line.3)

execvpe.3
  Michael Kerrisk
    New link to exec.3

sigstack.3
  Michael Kerrisk
    New link to sigaltstack.2
      No new programs should use sigstack(3). Point the user to the
      better sigaltstack(2), whose man page briefly mentions sigstack(3).

vlimit.3

Michael Kerrisk
New link to getrlimit.2
No new programs should
use vlimit(3). Point the user to the
better setrlimit(2), whose man page briefly mentions vlimit(3).

vtimes.3
Michael Kerrisk
New link to getrusage.2
No new programs should use vtimes(3). Point the user to the
better getrusage(2), whose man page briefly mentions vtimes(3).

Global changes

Various pages
Michael Kerrisk
Switch to American usage: "-wards" ==> "-ward"
American English uses "afterward" in preference to "afterwards",
and so on

Michael Kerrisk
Simplify feature test macro requirements

Changes to individual pages
---

getrlimit.2
Michael Kerrisk

Add mention of the ancient vlimit() function

getrusage.2
Michael Kerrisk
Add mention of the ancient vtimes()
function

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
Michael Kerrisk
SEE ALSO: add aio(7)

sched_setscheduler.2
Michael Kerrisk
ERRORS: note that NULL 'param' yields EINVAL

stat.2
Michael Kerrisk
Note feature test macro requirements for blkcnt_t and blksize_t

timer_create.2
Michael Kerrisk
Standardize on name 'sevp' for sigevent argument

truncate.2
Michael Kerrisk
Correct and simplify ftruncate() feature test macro requirements
The glibc 2.12 feature test macro requirements for ftruncate() are
buggy; see http://sourceware.org/bugzilla/show_bug.cgi?id=12037.
Corrected the requirements in the SYNOPSIS, and added a BUGS
section describing the problem in glibc 2.12.

aio_cancel.3
Michael Kerrisk
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008;
add VERSIONS section

aio_error.3
Michael Kerrisk
Wording improvements in RETURN VALUE
Add pointer to aio(7) for example program
Refer the reader to aio(7) for a description of the aiocb structure
CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_fsync.3
  Michael Kerrisk
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_read.3
  Michael Kerrisk
    Various minor rewordings and additions
    Add pointer to sigevent(7) for details of notification of I/O completion
    Add pointer to aio(7) for example program
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_return.3
  Michael Kerrisk
    Improve description in RETURN VALUE
    Add pointer to aio(7) for example program
    Refer the reader to aio(7) for a description of the
 aiocb structure
    CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_suspend.3
  Michael Kerrisk
    Various additions and rewordings.
      Give some arguments more meaningful names.
      More explicitly describe the 'nitems' argument.
      Explicitly note that return is immediate if an I/O operation
      has already completed.
      Note that aio_error(3) should be used to scan the aiocb list
      after a successful return.
      Add references to other relevant pages.
      Various other pieces rewritten.
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008; add VERSIONS section

aio_write.3
  Michael Kerrisk
    Add pointer to sigevent(7) for details of notification of I/O completion
    Various minor rewordings and additions
    Refer the reader to aio(7) for a description of the aiocb structure
    CONFORMING TO: Add POSIX.1-2008;
 add VERSIONS section

clearenv.3
  Michael Kerrisk
    Fix error in feature test macro requirements

dysize.3
  Michael Kerrisk
    Remove crufty statement about old SCO bug

exec.3
  Michael Kerrisk
    Add feature test macro requirements for execvpe()
    Rewrite description of PATH and mention _CS_PATH
    Note execvp() and execlp() behavior for filename containing a slash

getaddrinfo.3
  Michael Kerrisk
    Add SEE ALSO reference to new getaddrinfo_a.3 page

gethostbyname.3
  Michael Kerrisk
    Fix formatting of feature test macros

getw.3
  Michael Kerrisk
    Fix feature test macros

malloc.3
  Landijk
    Remove editorializing comments on memory overcommitting
      See https://bugzilla.kernel.org/show_bug.cgi?id=19332
  Michael Kerrisk
    Various minor reorganizations and wording fix-ups

mq_notify.3
  Michael Kerrisk
    Standardize on name 'sevp' for sigevent argument

nl_langinfo.3
  Michael Haardt
     Make it clear that nl_langinfo() interacts with setlocale()
    Add an example program

posix_openpt.3
  Michael Kerrisk
    Fix feature test macro requirements

rand.3
  Michael Kerrisk
    Remove duplicate #include in example program

strtok.3
  Petr Baudis

Add reference to strtok() example in getaddrinfo(3)

inotify.7
  Michael Kerrisk
    Added section noting limitations and caveats of inotify

sigevent.7
  Michael Kerrisk
    Add SEE ALSO reference to new getaddrinfo_a.3 page
    Add SEE ALSO referring to new aio(7) page

suffixes.7
  Michael Kerrisk
    Change explanation of ".rpm" to "RPM software package"

========== Changes in man-pages-3.29 ==========

Released: 2010-10-19, Detroit

Thomas Jarosch <thomas.jarosch@intra2net.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

subpage_prot.2

Michael Kerrisk
New page documenting the PowerPC-specific subpage_prot(2)

aio_init.3
Michael Kerrisk
New page documenting aio_init(3)

Newly documented interfaces in existing pages
---

posix_fadvise.2
Michael Kerrisk
Document the architecture-specific arm_fadvise64_64() system call
This ARM-specific system call fixes the argument ordering
for that architecture. Since Linux 2.6.14.

sync_file_range.2
Michael Kerrisk
Document the architecture-specific sync_file_range2() system call
As described in commit edd5cd4a9424f22b0fa08bef5e299d41befd5622,
the sync_file_range() argument order is broken for some
architectures (PowerPC, ARM, tile). The remedy was a different
system call using the right argument order on those architectures.

psignal.3
Guillem Jover
Document psiginfo()
psiginfo() was added to glibc in version 2.10.
Michael Kerrisk
Add details, VERSIONS, and BUGS for psiginfo()

ip.7
Balazs Scheidler
Document IP_RECVORIGDSTADDR
Document IP_TRANSPARENT
Michael Kerrisk
Document IP_FREEBIND
Text based on input from Lennart Poettering and Balazs Scheidler.
See https://bugzilla.kernel.org/show_bug.cgi?id=20082

New and changed links
---

arm_fadvise64_64.2
Michael Kerrisk
New link to posix_fadvise.2

arm_sync_file_range.2,
 sync_file_range2.2
  Michael Kerrisk
    New links to sync_file_range.2

arrm_fadvise.2
  Michael Kerrisk
    New link to posix_fadvise.2

psiginfo.3
  Guillem Jover
    New link to psignal.3

Global changes

Many pages
  Michael Kerrisk
    global fix: s/Unix/UNIX/
      The man pages were rather inconsistent in the use of "Unix"
      versus "UNIX". Let's go with the trademark usage.

Various pages
  Michael Kerrisk
    Global fix: s/pseudo-terminal/pseudoterminal/

grantpt.3, ptsname.3, unlockpt.3, pts.4
  Michael Kerrisk
    Global fix: s/pty/pseudoterminal/

recv.2, cmsg.3, unix.7
  Michael Kerrisk
    global fix: s/UNIX socket/UNIX domain socket/

fmtmsg.3, gethostbyname.3, termios.3
  Michael Kerrisk
    Global fix: s/Unixware/UnixWare/

Changes to individual pages
---

inotify_rm_watch.2
  Michael Kerrisk
    SYNOPSIS: fix type of 'wd' argument

posix_fadvise.2
  Michael Kerrisk
    Rewrite VERSIONS, noting that the system call is fadvise64()

syscalls.2
  Michael Kerrisk
    Add the PowerPC-specific subpage_prot() system call
    Add sync_file_range2()

truncate.2
  Michael Kerrisk
    Fix feature test macros

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
  Michael Kerrisk
    SEE ALSO: Add lio_listio(3)

gai_cancel.3
gai_error.3
gai_suspend.3
  Michael Kerrisk
    Make these into links
      In the previous release, these files were accidentally made copies
      of getaddrinfo_a.3, instead of being made as link files.

getifaddrs.3
  Thomas Jarosch
    Prevent possible NULL pointer access in example program

malloc.3
  Michael Kerrisk
    Emphasize that malloc() and realloc() do not initialize allocated memory

malloc_hook.3
  Ivana Varekova
    Warn that these functions are deprecated

strcpy.3
  Michael Kerrisk
    Formatting
 fixes in strncpy() example implementation code

ip.7
  Michael Kerrisk
    Reword NOTES on Linux-specific options

sigevent.7
  Michael Kerrisk
    SEE ALSO: Add aio_read(3), aio_write(3), and lio_listio(3)

unix.7
  Michael Kerrisk
    Document the autobind feature
  Michael Kerrisk
    Fix description of abstract socket names
      As reported by Lennart Poettering:
        The part about "abstract" sockets is misleading as it suggests
        that the sockaddr returned by getsockname() would necessarily
        have the size of sizeof(struct sockaddr), which however is not
        the case: getsockname() returns exactly the sockaddr size that
        was passed in on bind(). In particular, two sockets that are
        bound to the same sockaddr but different sizes are completely
        independent.
      See https://bugzilla.kernel.org/show_bug.cgi?id=19812
  Michael Kerrisk

  Fix description of "pathname" sockets
      As reported by Lennart Poettering:
        The part about "pathname" sockets suggests usage of
        sizeof(sa_family_t) + strlen(sun_path) + 1
        for calculating the sockaddr size. Due to alignment/padding
        this is probably not a good idea. Instead, one should use
        offsetof(struct sockaddr_un, sun_path) + strlen() + 1
        or something like that.
      See https://bugzilla.kernel.org/show_bug.cgi?id=19812

========== Changes in man-pages-3.30 ==========

Released: 2010-11-01, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Bernhard Walle <bernhard@bwalle.de>

David Prevot <davidp@altern.org>
Eric W. Biederman <ebiederm@xmission.com>
Florian Lehmann <flo.lehmann@googlemail.com>
Jan Engelhardt <jengelh@medozas.de>
Lucian
Adrian Grijincu <lucian.grijincu@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Paul Mackerras <paulus@samba.org>
Pádraig Brady <P@draigbrady.com>
Reuben Thomas <rrt@sc3d.org>
scarlettsp <scarlettsp@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

kexec_load.2
Andi Kleen
New page documenting kexec_load(2)
Michael Kerrisk
Add license
Michael Kerrisk
Incorporate fixes from Eric W. Biederman
Eric noted that a few instances of "virtual" should
be "physical" and noted:

> There is an expectation that at hand off from sys_kexec that
> virtual and physical addresses will be identity mapped. But
> this isn't the old Alpha booting convention where you have
> a virtual address and then you have to parse the page table
> to figure out where your kernel was actually loaded.

Michael
Kerrisk
Additions and edits by mtk
Various wording and layout improvements.
Fixed the name of a constant: s/KEXEC_ARCH_I386/KEXEC_ARCH_386/.
Added RETURN VALUE and ERRORS sections.
Added VERSIONS section
Note that CONFIG_KEXEC is needed
Removed details of using syscall; the reader can find them in
syscall(2).
Added some details for KEXEC_PRESERVE_CONTEXT.
Revised the text mentioning the kernel header, since it is
not yet exported, and it's not certain that it will be.

lio_listio.3
  Michael Kerrisk
    New page documenting lio_listio(3)

Newly documented interfaces in existing pages
---

reboot.2
  Andi Kleen
    Document LINUX_REBOOT_KEXEC
      Some fix-ups by Michael Kerrisk
  Michael Kerrisk
    Place 'cmd' values in alphabetical order.

unshare.2
  Michael Kerrisk
    Document
 CLONE_NEWIPC
  Michael Kerrisk
    Document CLONE_NEWNET
  Lucian Adrian Grijincu
    Improve description of CLONE_NEWNET
      CLONE_NEWNET creates a new network namespace from scratch.
      You don't have anything from the old network namespace in
      the new one. Even the loopback device is new.
  Michael Kerrisk
    Document CLONE_SYSVSEM
  Michael Kerrisk
    Document CLONE_NEWUTS
  Michael Kerrisk
    Relocate discussion of CAP_SYS_ADMIN to CLONE_NEWNS section
      And rewrite the EPERM description to be more general in
      preparation for the new flags to be documented.

Global changes

Various pages
  Michael Kerrisk
    Add reference to feature_test_macros(7)
      Some pages simply list feature test macro requirements in
      the form:

        #define #GNU_SOURCE
        #include <someheader.h>

For these pages, add a "See feature_test_macros(7)"
comment
on the "#define" line.

Various pages
Michael Kerrisk
SEE ALSO: Remove redundant reference to feature_test_macros(7)

Various pages
David Prevot
Use greater consistency in NAME line
(Remove definite article at start of descriptive clause.)

Various pages
Michael Kerrisk
SEE ALSO: Place entries in correct order

Various pages
Michael Kerrisk
ERRORS: Place entries in correct order

Various pages
Michael Kerrisk
Add section number to references to functions documented in other pages

Various pages
Michael Kerrisk
Remove redundant section number in page references
Remove section number in function references that are for
functions documented on this page.

armscii-8.7
iso_8859-3.7
iso_8859-4.7
iso_8859-5.7
iso_8859-6.7
iso_8859-10.7
iso_8859-11.7
iso_8859-13.7
iso_8859-14.7
koi8-u.7
David Prevot
Capitalize hexadecimal numbers

Changes to individual pages
---

access.2
Michael Kerrisk
Note use of faccessat(2) for checking symbolic link permissions
Michael Kerrisk
Give an example of a safer alternative to using access()

clone.2
Michael Kerrisk
Clarify when CLONE_NEWNET implementation was completed

faccessat.2
Michael Kerrisk
Note that faccessat() is racy

fcntl.2
Michael Kerrisk
RETURN VALUE: Improve description of F_GETFD and F_GETFL

inotify_add_watch.2
Michael Kerrisk
Document ENOENT error

mlock.2
Michael Kerrisk
Improve wording describing /proc/PID/status /VmLck field
Michael Kerrisk
shmctl() SHM_LOCKed memory is not included in VmLck

reboot.2
Michael Kerrisk
Place 'cmd' values in alphabetical order

subpage_prot.2
Michael Kerrisk
Change 1-line page description
Michael Kerrisk
Improvements after review by Paul Mackerras

timer_settime.3
Michael Kerrisk
Remove redundant
SEE ALSO reference

euidaccess.3
Michael Kerrisk
Note the use of faccessat(2) to operate on symbolic links
Michael Kerrisk
Note that the use of euidaccess() is racy

fenv.3
  Michael Kerrisk
    Clarify wording relating to glibc version

getgrent.3
getgrent_r.3
getgrnam.3
  Michael Kerrisk
    Refer reader for group(5) for more info on group structure

getopt.3
  Bernhard Walle
    Use constants in getopt_long() example
      The description of getopt_long() mentions the constants
      required_argument, no_argument and optional_argument.
      Use them in the example to make the code easier to understand.

getpw.3
  Michael Kerrisk
    Change comment describing pw_gecos

getpw.3
getpwent.3
getpwent_r.3
  Michael Kerrisk
    Refer reader to passwd(5) for more info on the passwd structure

getpwent.3
getpwnam.3
  Michael Kerrisk
    Note that pw_gecos is not in POSIX
      And change the comment describing
 this field

getpwent_r.3
  Michael Kerrisk
    Change comment describing pw_gecos

getpwnam.3
  Michael Kerrisk
    Some rewording and restructuring

sched_getcpu.3
  Michael Kerrisk
    Fix feature test macro requirements

strnlen.3

Michael Kerrisk
Fix feature test macro requirements

group.5
Michael Kerrisk
Various minor rewordings

hosts.5
protocols.5
spufs.7
termio.7
David Prevot
Remove definite article from NAME section
Please find inline another tiny patch in order to shrink the definite article from some other pages (found with "rgrep -i ' \\\- the' man*").

passwd.5
Michael Kerrisk
Various minor rewordings

proc.5
Michael Kerrisk
Add reference to mlock(2) for further info on /proc/PID/status VmLck

armscii-8.7
David Prevot
Write the character set name as ArmSCII

cp1251.7
David Prevot
Capitalize hexadecimal numbers

ip.7
David Prevot
Fix name of socket option: s/IP_TTL/IP_TRANSPARENT/
David Prevot
Place socket options in alphabetical order

koi8-r.7
David Prevot
Fix special character names
Comparing to koi8-u.7, I noticed some inconsistencies in special character names. After checking with the following Unicode related pages, please find inline (and gzipped attached, hopefully not messing with encoding), a patch in order to make it right, on an Unicode point of view.

http://www.unicode.org/charts/PDF/U2500.pdf
http://www.unicode.org/charts/PDF/U25A0.pdf
http://www.unicode.org/charts/PDF/U0080.pdf
http://www.unicode.org/charts/PDF/U1D400.pdf

David Prevot

Fix SEE ALSO reference and letter names

The koi8-r(7) (Russian Net Character Set) manual page refers
to iso-8859-7(7) manual page, which is the Latin/Greek one.
I guess it should
refer instead to the iso-8859-5(7)
(Latin/Cyrillic) one. This is addressed at the end of the patch.

It has also been spotted that letter names are different in
this manual page and in the Unicode related page [0], the
first part of the page address this.

0: http://www.unicode.org/charts/PDF/U0400.pdf

man-pages.7

Michael Kerrisk

Update example

The old example used the chmod(2) man page, but the
feature test macro requirements on that page had changed.
Update to use an example from a different page (acct(2),
whose feature test macro requirements are probably unlikely
to change in the future).

========== Changes in man-pages-3.31 ==========

Released: 2010-11-12, Munich

Contributors

The following people contributed notes, ideas, or patches that have
been incorporated in changes in this release:

Krzysztof elechowski <giecrilj@stegny.2a.pl>
Michael Kerrisk <mtk.manpages@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

getrlimit.2
  Michael Kerrisk
    Added documentation of prlimit()
      prlimit() is new in kernel 2.6.36.

inotify.7
  Michael Kerrisk
    Document IN_EXCL_UNLINK
      This flag was added in Linux 2.6.36.
      See kernel commit 8c1934c8d70b22ca8333b216aec6c7d09fdbd6a6.

New and changed links
---

prlimit.2
  Michael Kerrisk
    New link to getrlimit.2

Changes to individual pages
---

getrlimit.2
  Michael Kerrisk
    Remove unneeded text in DESCRIPTION

intro.2
  Michael Kerrisk
    Added various pages to SEE ALSO

kexec_load.2
  Michael Kerrisk
    Add kernel
 version where KEXEC_PRESERVE_CONTEXT first appeared
    Added kernel version number where KEXEC_ON_CRASH first appeared
    Fix copyright
      Make copyright in the name of Intel corporation
    VERSIONS: Fix version number
      kexec_load() was first implemented in 2.6.13, though the entry
      in the system call table was reserved starting in 2.6.7.

migrate_pages.2

Michael Kerrisk
SEE ALSO: Add reference to Documentation/vm/page_migration

sched_setaffinity.2
Michael Kerrisk
Add missing word "real" to "user ID"

syscalls.2
Michael Kerrisk
Fix kernel version number for kexec_load
kexec_load() was first implemented in 2.6.13, though the entry
in the system call table was reserved starting in 2.6.7.
Michael Kerrisk
Add prlimit() to list

intro.3
Michael Kerrisk
Added various pages to SEE ALSO

printf.3
Michael Kerrisk
Formatting fixes in example code

hostname.7
Michael Kerrisk
Small improvement to description of domains

New and rewritten pages
---

pthread_sigqueue.3
  Michael Kerrisk
    New page documenting pthread_sigqueue()
      pthread_sigqueue() is new in glibc 2.11 (requires a kernel with
      rt_tgsigqueinfo(), added in Linux 2.6.31).

Newly documented interfaces in existing pages
---

readv.2
  Michael Kerrisk
    Add documentation of preadv() and pwritev()
      The preadv() and pwritev() system calls were added in
      Linux 2.6.30.

New and changed links
---

preadv.2
  Michael Kerrisk
    New link to readv.2

pwritev.2
  Michael Kerrisk
    New link to readv.2

Changes to individual pages
---

chdir.2
  Michael Kerrisk
    Remove redundant and incorrect info on FTMs from NOTES

chown.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

clock_nanosleep.2
  Michael Kerrisk
    Clarify that clock_nanosleep() suspends the calling *thread*

epoll_create.2
   Michael Kerrisk
    Note that 'size' argument must be greater than 0
      See https://bugzilla.kernel.org/show_bug.cgi?id=23872
  Michael Kerrisk
    Added VERSIONS section

epoll_ctl.2
  Michael Kerrisk
    Added VERSIONS section

epoll_wait.2
  Michael Kerrisk
    Updated VERSIONS section

fcntl.2
  Michael Kerrisk
    Add notes on fcntl64()

fstatat.2
  Michael Kerrisk
    Add NOTES on fstatat64(), the name of the underlying system call

getdents.2
  Michael Kerrisk
    Added notes on getdents64()

getgid.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getgroups.2
  Michael Kerrisk
    Add NOTES explaining 32-bit system calls added in Linux 2.4

getpagesize.2
  Michael Kerrisk
    Improve description of getpagesize()
      Improve description of getpagesize() and relocate discussion

of sysconf(_SC_PAGESIZE).

In part inspired by
http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=537272

getresuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

getrlimit.2
Michael Kerrisk
Add example program for prlimit()

getuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

open.2
Ivana Hutarova Varekova
O_EXCL can be used without O_CREAT for block devices
Since Linux 2.6 there is a possibility to use O_EXCL without
O_CREAT. See patch: http://lkml.org/lkml/2003/8/10/221.

pread.2
Michael Kerrisk
Add notes on pread64() and pwrite64()
See https://bugzilla.kernel.org/show_bug.cgi?id=23072
Michael Kerrisk
SEE ALSO: add readv(3)

readv.2
Michael Kerrisk
Wording fix: readv() and writev() are system calls, not functions

sendfile.2
Michael Kerrisk
Add notes on sendfile64()

setfsgid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls
added in Linux 2.4

setfsuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setgid.2

Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setresuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setreuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

setuid.2
Michael Kerrisk
Add NOTES explaining 32-bit system calls added in Linux 2.4

sigqueue.2
pthreads.7
signal.7
Michael Kerrisk
SEE ALSO: Add pthread_sigqueue(3)

stat.2
Michael Kerrisk
Fix EOVERFLOW error description
2<<31 should read 1<<31 (which equals 2^31).

statfs.2
Michael Kerrisk
Add notes on statfs64() and fstatfs64()

swapon.2
Hugh Dickins
Document SWAP_FLAG_DISCARD and discarding of swap pages

truncate.2
Michael Kerrisk
Add notes on truncate64() and ftruncate64()

memcpy.3
Michael Kerrisk
Change "should not overlap" to "must not overlap"
glibc 2.12 changed things so that applications that use memcpy() on
overlapping regions will encounter problems. (The standards have
long said that the behaviors is undefined if the memory areas
overlap.)

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=603144
In reference of http://lwn.net/Articles/414467/

and http://article.gmane.org/gmane.comp.lib.glibc.alpha/15278

usleep.3
  Petr Uzel
    usleep() suspends calling thread, not process

core.5
  Michael Kerrisk
    Change single quote to double quote in shell session example
      The example section has a sample shell session containing:

      echo '|$PWD/core_pattern_pipe_test %p UID=%u GID=%g sig=%s'

      But $PWD won't be expanded in single quotes. It should be double
      quotes around the entire argument or some other form.

pthreads.7
   Michael Kerrisk
    Added description of async-cancel-safe functions

unix.7
  Michael Kerrisk
    Reworded the text of various errors
  Michael Kerrisk
    Added ENOENT error

========== Changes in man-pages-3.33 ==========

Released: 2011-09-16, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Akira Fujita <a-fujita@rs.jp.nec.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

sync.2
  Michael Kerrisk
    Added new syncfs() system call
      syncfs() was added in Linux 2.6.39.

New and changed links
---

syncfs.2
  Michael Kerrisk

New link for sync(2).

Global changes

Various pages
  Simon Paillard
    Global fix: properly escape minus sign

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Note that CLONE_STOPPED was removed in 2.6.38

execve.2
  Michael Kerrisk [Sebastian Geiger]
    Note that the first argv[] value should contain name of executable

fcntl.2
  Michael Kerrisk [Reuben Thomas]
    Note that F_GETFL also retrieves file access mode

getrlimit.2
  Michael Kerrisk [Ryan Mullen]
    Remove mention of kernel versions in discussion of RLIMIT_CPU
  Michael Kerrisk [Seonghun Lim]
    Fix example program and add _FILE_OFFSET_BITS requirement

mlock.2
  Michael Kerrisk [Brian M.
 Carlson]
    Clarify EINVAL error
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?625747
  Michael Kerrisk [Seonghun Lim]
    Simplify and correct text for EPERM error

mprotect.2
  Seonghun Lim
    Fix off-by-one error in a memory range
  Seonghun Lim
    Fix small bug in example program
      The description of the example program says that it makes the
      third page "read-only". Thus use PROT_READ instead of PROT_NONE.

open.2
  Folkert van Heusden
    Remove text describing O_CLOEXEC as Linux-specific
      O_CLOEXEC is specified in POSIX.1-2008, as noted
      elsewhere in the page.

readlink.2
  Michael Kerrisk [Dan Jacobson]
    SEE ALSO: Add readlink(1)

sendfile.2
  Akira Fujita
    Since 2.6.33, 'out_fd' can refer to any file type
      Linux kernel commit cc56f7de7f00d188c7c4da1e9861581853b9e92f
      meant sendfile(2) can work with any output file.
  Michael Kerrisk
    Shift
 text on falling back to read()/write() to NOTES
  Michael Kerrisk [Tolga Dalman]
    Remove mention of kernel version for 'in_fd' argument
  Tolga Dalman
    Add an explicit reference to splice(2)
      Unlike sendfile(), splice() can transfer data
      between a pair of sockets.

sigaction.2
  Michael Kerrisk [Tolga Dalman]
    Add a little info about ucontext_t

stat.2
  Michael Kerrisk [Jon Grant]
    Small rewording of ENAMETOOLONG error

sync.2
  Michael Kerrisk
    Some rewrites to description of sync()

syscalls.2
  Michael Kerrisk
    Added fanotify_init() and fanotify_mark() to syscall list
  Michael Kerrisk
    Added new 2.6.39 system calls
  Michael Kerrisk
    Updated for Linux 3.0 system calls
  Michael Kerrisk
    Update kernel version at head of syscall list
  Michael Kerrisk
    Update to mention 3.x kernel series

syslog.2
  Michael Kerrisk [Serge E. Hallyn]
    Update for kernel 2.6.37
 changes
      Document /proc/sys/kernel/dmesg_restrict.
      Document CAP_SYSLOG.

time.2
  Michael Kerrisk [Alexander Schuch]
    NOTES: Fix description of "Seconds since the Epoch"

timerfd_create.2
  Michael Kerrisk [Josh Triplett]
    Note behavior when timerfd_settime() old_value is NULL
    See http://bugs.debian.org/cgi-bin/bugreport.cgi?641513
  Tomislav Jonjic
    Fix small error in description of timerfd_settime()

truncate.2
  Seonghun Lim
    Remove redundant EINTR description

unlink.2
  Hendrik Jan Thomassen
    Improve EBUSY description

cacos.3
cacosh.3
catan.3
catanh.3
  Michael Kerrisk [Richard B. Kreckel, Andries Brouwer]
    Fix formula describing function
      The man pages for cacos(), cacosh(), catan(), catanh()
      contain incorrect formulae describing the functions.

cacos.3
  Michael Kerrisk
    Add example program

cacosh.3
  Michael Kerrisk
    Add example program

cacosh.3
casinh.3
catan.3
catanh.3

Michael Kerrisk
SEE ALSO: Add reference to inverse function

catan.3
Michael Kerrisk
Add example program

catanh.3
Michael Kerrisk
Add example program

ccos.3
ccosh.3
csin.3
csinh.3
ctan.3
ctanh.3
Michael Kerrisk
SEE ALSO Add reference to "arc" inverse function

cexp.3
Michael Kerrisk
SEE ALSO: add cexp(3)

clog.3
Michael Kerrisk
SEE ALSO: Add reference to clog(2)

crypt.3
Michael Kerrisk [Jan Engelhardt]
Fix header file and feature test macro requirements for crypt_r()

err.3
Seonghun Lim
Clean up description of error message source
In the second paragraph of DESCRIPTION section, one of the
sources of error messages is incorrect: the four functions obtain
error message only from errno, and "a code" is just relevant
with errc() and warnc(), which are not present on Linux.
see http://www.unix.com/man-page/freebsd/3/ERR/
.

Then, the third paragraph becomes a duplicate.

fflush.3
Regid Ichira
Fix wording error
See http://bugs.debian.org/cgi-bin/bugreport.cgi?614021

hsearch.3
  Seonghun Lim
    Update ERRORS section
      EINVAL can occur for hdestroy_r().
      EINVAL can't occur for hcreate().
      Other minor fixes.

lockf.3
  Michael Kerrisk [Mikel Ward]
    ERRORS: EBADF can also occur for nonwritable file descriptor
      As noted in the DESCRIPTION, the file descriptor must be writable
      in order to place a lock.

malloc.3
  Seonghun Lim
    Reorder prototypes in SYNOPSIS
      calloc() comes before realloc() in the other sections,
      so should do in SYNOPSIS, too.

mbstowcs.3
  Michael Kerrisk
    SEE ALSO: add reference to wcstombs(3)

memcmp.3
  Michael Kerrisk [Sebastian Unger]
    Clarify that comparison interprets bytes as "unsigned char"

realpath.3
  Michael
 Kerrisk [Seonghun Lim]
    Fix EINVAL error
      Since glibc 2.3, resolved_path can be non-NULL (with the
      semantics already documented in the page).

scandir(3)
  Mike Frysinger
    Add ENOENT/ENOTDIR errors

siginterrupt.3
  Michael Kerrisk [Luis Javier Merino]
    Remove misleading sentence about signal(2) and system call interruption

strlen.3
  Michael Kerrisk [Jon Grant]
    SEE ALSO: Add strnlen(3)

strnlen.3

Michael Kerrisk [Jon Grant]
CONFORMING TO: Note that strnlen() is in POSIX.1-2008

strtoul.3
Michael Kerrisk [Tolga Dalman]
Fix NOTES section constants

termios.3
Michael Kerrisk
Use "terminal special characters" consistently throughout page
Michael Kerrisk [Paul Evans]
Add documentation of _POSIX_VDISABLE
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=627841
Michael Kerrisk
Add a description of STATUS character
Michael Kerrisk
Added description
of SWTCH character
Michael Kerrisk
Add names of terminal special characters
Michael Kerrisk
List terminal special characters in alphabetical order

wcstombs.3
Michael Kerrisk
SEE ALSO: add mbstowcs(3)

console_codes.4
Petr Pisar
Add ESC [3 J
Linux 3.0 (commit f8df13e0a901fe55631fed66562369b4dba40f8b)
implements \E[3J to allow scrambling content of console
including scroll-back buffer
(http://thread.gmane.org/gmane.linux.kernel/1125792).

proc.5
Michael Kerrisk [Stan Sieler]
Add description of 'PPid' field of /proc/PID/status
Michael Kerrisk [Stan Sieler]
Add description of 'SigQ' field of /proc/PID/status

capabilities.7
Michael Kerrisk [Serge E. Hallyn]
Document CAP_SYSLOG and related changes in Linux 2.6.37
Michael Kerrisk
File capabilities are no longer optional
Starting with Linux 2.6.33, the CONFIG_SECURITY_FILE_CAPABILITIES

has been removed, and file capabilities are always part of the
kernel.

complex.7
  Michael Kerrisk
    Updated SEE ALSO list to include all complex math functions

ipv6.7
  Michael Kerrisk [Simon Cross]
    Fix description of address notation: "8 4-digit hexadecimal numbers"

signal.7
  Seonghun Lim
    Remove crufty repeated info about LinuxThreads

unix.7
  Michael Kerrisk
    Add pointer to cmsg(3) for an example of the use of SCM_RIGHTS

========== Changes in man-pages-3.34 ==========

Released: 2011-09-23, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Alan Curry <pacman@kosh.dhis.org>
Benjamin Poirier <benjamin.poirier@gmail.com>
Brian M. Carlson <sandals@crustytoothpaste.net>
David Howells <dhowells@redhat.com>
David Prévot <taffit@debian.org>
Denis
 Barbier <bouzim@gmail.com>
Doug Goldstein <cardoe@cardoe.com>
Eric Blake <eblake@redhat.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Neil Horman <nhorman@tuxdriver.com>
Paul Pluzhnikov <ppluzhnikov@google.com>
Reuben Thomas <rrt@sc3d.org>
Stefan Puiu <stefan.puiu@gmail.com>

Stephan Mueller <stephan.mueller@atsec.com>
Stephen Cameron <scameron@beardog.cce.hp.com>
Sunil Mushran <sunil.mushran@oracle.com>

Apologies if I missed anyone!

New and rewritten pages
---

rt_sigqueueinfo.2
  Michael Kerrisk [Stephan Mueller]
    New page for rt_sigqueueinfo(2) and rt_tgsigqueueinfo(2)
      This replaces the previous '.so' man page link file for
      rt_sigqueueinfo.2, which linked to this sigqueue() man page.

cciss.4
  Stephen M. Cameron
    New man page for cciss driver
      I obtained the information in this man page as a consequence
      of having worked on
 the cciss driver for the past several years,
      and having written considerable portions of it.
  Michael Kerrisk
    Copyedit by mtk

hpsa.4
  Stephen M. Cameron
    New man page for the hpsa driver
      I obtained the information in this man page as a consequence
      of being the main author of the hpsa driver.
  Michael Kerrisk
    Copyedits my mtk

Newly documented interfaces in existing pages
---

fstatat.2
  Michael Kerrisk [David Howells]
    Document AT_NO_AUTOMOUNT
      This flag was added in Linux 2.6.38.

lseek.2
  Michael Kerrisk [Eric Blake, Sunil Mushran]
    Document SEEK_HOLE and SEEK_DATA
      These flags, designed for discovering holes in a file,
      were added in Linux 3.1. Included comments from Eric

Blake and Sunil Mushran.

madvise.2
  Doug Goldstein
    Add MADV_HUGEPAGE and MADV_NOHUGEPAGE
      Document the MADV_HUGEPAGE
 and MADV_NOHUGEPAGE flags added to
      madvise() in Linux 2.6.38.

New and changed links
---

rt_tgsigqueueinfo.2
  Michael Kerrisk
    New link to new rt_sigqueueinfo.2 page

sigqueue.2
  Michael Kerrisk
    Create link to page that was relocated to section 3

Global changes

Various pages
  Michael Kerrisk
    Change reference to "sigqueue(2)" to "sigqueue(3)"

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    ERRORS: Add EPERM and ESPIPE errors

lseek.2
  Michael Kerrisk [Alan Curry, Reuben Thomas]
    Remove suspect note about 'whence' being incorrect English

prctl.2
  Paul Pluzhnikov
    PR_SET_DUMPABLE makes process non-ptrace-attachable

readlink.2
  Guillem Jover
    Document using st_size to allocate the buffer

Michael Kerrisk
Added copyright text + changelog note for Guillem Jover's patch

sched_setscheduler.2
Michael Kerrisk

Document 2.6.39 changes to rules governing changes from SCHED_IDLE policy
Since Linux 2.6.39, unprivileged processes under the
SCHED_IDLE policy can switch to another nonrealtime
policy if their nice value falls within the range
permitted by their RLIMIT_NICE limit.

tkill.2
Michael Kerrisk
SEE ALSO: Add rt_sigqueueinfo (2)

btowc.3, wctob.3
Michael Kerrisk [Brian M. Carlson]
Add pointers to better, thread-safe alternative functions
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=606899

fwide.3
Michael Kerrisk
Add _ISOC95_SOURCE to feature test macro requirements
Since glibc 2.12, _ISOC95_SOURCE can also be used to expose
prototype of this function.

index.3
Michael Kerrisk [Jon Grant]
Fix text mentioning terminating null

pthread_sigqueue.3
Michael Kerrisk
Replace explicit mention of rt_tgsigqueueinfo() with SEE ALSO reference

sigqueue.3
Michael Kerrisk
Move this page to section 3
Now that the underlying system call rt_sigqueueinfo(2) is
properly documented, move sigqueue() to Section 3, since
it is really a library function.
Michael Kerrisk
Update text in line with existence of new rt_sigqueueinfo.2 page

wcsnlen.3
Jon Grant
Improve description of 'maxlen' argument
It's worth clarifying 'maxlen' is in wide-char units, not bytes.

wprintf.3
  Michael Kerrisk
    Add _ISOC95_SOURCE to feature test macro requirements
      Since glibc 2.12, _ISOC95_SOURCE can also be used to expose
      prototype of these functions.

feature_test_macros.7
  Michael Kerrisk
    Document _ISOC95_SOURCE
      _ISOC95_SOURCE was added in glibc 2.12 as a means
      to expose C90 Amendment 1 definitions.

ip.7
  Benjamin Poirier [Neil Horman]
    Improve description of IP_MTU_DISCOVER

signal.7
  Michael Kerrisk
     SEE ALSO: Add rt_sigqueueinfo(2)

========== Changes in man-pages-3.35 ==========

Released: 2011-10-04, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
David Prévot <taffit@debian.org>
Denis Barbier <bouzim@gmail.com>
Eric W. Biederman <ebiederm@xmission.com>
Guillem Jover <guillem@hadrons.org>
Jon Grant <jg@jguk.org>
Kevin Lyda <kevin@ie.suberic.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Reuben Thomas <rrt@sc3d.org>

Apologies if I missed anyone!

New and rewritten pages
---

recvmmsg.2
  Andi Kleen, Michael Kerrisk
    New man page for recvmmsg(2)

setns.2
  Eric W. Biederman
    New manual page for setns(2)
  Michael Kerrisk
    Various improvements

Global changes

Various
 pages
  Michael Kerrisk
    Global fix: remove spaces around em-dash
      Normal English typographical convention is not to have
      spaces around em dashes.

Various pages
  Michael Kerrisk
    Global fix: s/null pointer/NULL pointer/

Various pages
  Michael Kerrisk
    Global fix: use ORing
      Use "ORing", not "OR'ing", nor an italic ".IR OR ing".

Various pages
  Michael Kerrisk
    Global fix: consistent use of "null wide character"
      Bring more consistency to the discussion of
      "[terminating] null wide character"
      by writing (at least in the initial use in a page)
      "[terminating] null wide character (L'\0')".

Various pages
  Michael Kerrisk
    Global fix: consistent use of "null byte"
      Bring more consistency to the discussion of
      "[terminating] null byte"
      by writing (at least in the initial use in a page)
      "[terminating] null

byte ('\0')".

mount.2, prctl.2
  Michael Kerrisk
    s/task/thread/ for consistency with other pages

Changes to individual pages
---

lseek.2
  Guillem Jover
    CONFORMING TO: Note other systems that have SEEK_HOLE+SEEK_DATA

recv.2
  Michael Kerrisk
    Add mention of recvmmsg(2)

recvmmsg.2
  Michael Kerrisk
    SEE ALSO: add sendmmsg(2)

send.2
  Michael Kerrisk
    CONFORMING TO: POSIX.1-2008 adds MSG_NOSIGNAL

sigwaitinfo.2
  Michael Kerrisk
    Note that attempts to wait for SIGKILL and SIGSTOP are silently ignored

stat.2
  Michael Kerrisk
    Note POSIX.1-2001 and POSIX.1-2008 requirements for lstat()
  Michael Kerrisk
    Regarding automounter action, add a reference to fstatat(2)
  Michael Kerrisk
    Clean up text describing which POSIX describes S_IF* constants

aio_cancel.3
  Michael Kerrisk [Jon Grant]
    Clarify meaning of "return status" and "error status"

gets.3
  Michael Kerrisk
     POSIX.1-2008 marks gets() obsolescent
       The page formerly erroneously stated that POSIX.1-2008
       removed the specification of this function.

mbsnrtowcs.3
  Michael Kerrisk
    CONFORMING TO: Add POSIX.1-2008
      This function is specified in the POSIX.1-2008 revision.

regex.3
  Michael Kerrisk [Reuben Thomas]
    Change "terminating null" to "terminating null byte"

stpcpy.3
stpncpy.3
  Mike Frysinger
    Note that these functions are in POSIX.1-2008
      Update the "CONFORMING TO" sections of these functions to
      note that they are now part of the POSIX.1-2008 standard.

stpncpy.3
  Michael Kerrisk
    Change "terminating null" to "terminating null byte"

strcpy.3
  Mike Frysinger
    SEE ALSO: Add stpncpy(3)

strdup.3
  Michael Kerrisk
    CONFORMING TO: strndup() is in POSIX.1-2008

wcpcpy.3
wcpncpy.3
wcsnlen.3
wcsnrtombs.3
  Michael Kerrisk
    CONFORMING TO: Add POSIX.1-2008

    These functions are specified in the POSIX.1-2008 revision.

proc.5
  Eric W. Biederman
    Document /proc/[pid]/ns/
  Michael Kerrisk
    Some edit's to Eric Biederman's /proc/[pid]/ns/ additions

capabilities.7
  Michael Kerrisk
    List setns(2) as an operation allowed by CAP_SYS_ADMIN

========== Changes in man-pages-3.36 ==========

Released: 2012-02-27, Christchurch

Vijay Rao <vijay@portuosus.com>
Walter Haidinger <walter.haidinger@gmx.at>
Walter Harms <wharms@bfs.de>
Yang Yang <wdscxsj@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

sendmmsg.2
  Michael Kerrisk [Stephan Mueller]
    New page for sendmmsg(2)
      Some pieces inspired by an initial attempt by Stephan Mueller.

Newly documented interfaces in existing pages
---

fallocate.2
  Lucian Adrian Grijincu
    Document FALLOC_FL_PUNCH_HOLE
      FALLOC_FL_PUNCH_HOLE was added in Linux 2.6.38,
      for punching holes in the allocated space in a file.

Changes
 to individual pages
---

dup.2
  Michael Kerrisk
    SYNOPSIS: Add "#include <fcntl.h>" for O_* constants

fallocate.2
  Michael Kerrisk
    Substantial restructuring of DESCRIPTION
      The addition of a second class of operation ("hole punching")
      to the man page made it clear that some significant restructuring
      is required. So I substantially reworked the page, including the
      preexisting material on the default "file allocation" operation.
  Michael Kerrisk [Josef Bacik]
    Add further details for FALLOC_FL_PUNCH_HOLE
  Michael Kerrisk
    ERRORS: Add EPERM error case for FALLOC_FL_PUNCH_HOLE

fork.2
  Michael Kerrisk
    NOTES: Describe clone() call equivalent to fork()

fsync.2
  Christoph Hellwig
    Various improvements
      - explain the situation with disk caches better
      - remove the duplicate fdatasync() explanation in the NOTES
        section
      - remove an incorrect note about fsync() generally requiring two
        writes
      - remove an obsolete ext2 example note
      - fsync() works on any file descriptor (doesn't need to be
        writable); correct the EBADF error code explanation
  Michael Kerrisk [Guillem Jover]
    Note that some systems require a writable file descriptor

An edited version of Guillem Jover's comments:
[While the file descriptor does not need to be writable on Linux]
that's not a safe portable assumption to make on POSIX in general
as that behavior is not specified and as such is
implementation-specific. Some Unix systems do actually fail on
read-only file descriptors, for example [HP-UX and AIX].

mount.2
Michael Kerrisk [Junjiro Okajima]
Removed erroneous statement about MS_RDONLY and bind mounts

open.2
Jessica McKellar
Fix grammar in O_DIRECT description

Some small grammar fixes to the O_DIRECT description.

pipe.2
Michael Kerrisk [Salvo Tomaselli]
SYNOPSIS: Add "#include <fcntl.h>" for O_* constants
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=659750

sched_rr_get_interval.2
Clemens Ladisch
Update notes on modifying quantum
Since Linux 2.6.24, it is no longer possible to
modify the SCHED_RR quantum using setpriority(2).
(Slight edits to Clemens' patch by mtk.)
Michael Kerrisk
Reordered various pieces of text
Michael Kerrisk
Reworded text of ESRCH error

send.2
Michael Kerrisk
Add mention of sendmmsg(2)

sync.2
Michael Kerrisk [Simone Piccardi]
PROTOTYPE: Fix return type of syncfs()

vfork.2
Michael Kerrisk [starlight]
Clarify what is duplicated in the child
Add some words to make it clear to the reader that vfork(),
like fork(), creates duplicates of process attributes
in the child.
Michael Kerrisk

Note clone() flags equivalent to vfork()
Michael Kerrisk [starlight, Mike Frysinger]
Add some notes on reasons why vfork() still exists
Michael Kerrisk [starlight]
Clarify that calling *thread* is suspended during vfork()
Michael Kerrisk
CONFORMING TO: Note that POSIX.1-2001 marked vfork() obsolete

gets.3
Michael Kerrisk
Document C11 and glibc 2.16 changes affecting gets()

pthread_sigmask.3
Michael Kerrisk [Pat Pannuto]
Fix comment that was inconsistent with code in example program

sem_wait.3
Walter Harms
EXAMPLE: Remove extraneous line of output from shell session

wcsnrtombs.3
wcsrtombs.3
wcstombs.3
Michael Kerrisk
Fix-ups for e9c23bc636426366d659809bc99cd84661e86464

core.5
Michael Kerrisk [Junjiro Okajima]
Document %E specifier for core_pattern

passwd.5
Michael Kerrisk [Walter Haidinger]
s/asterisk/asterisk
(*)/ to improve clarity
Michael Kerrisk
Correct note on passwd field value when shadowing is enabled
When password shadowing is enabled, the password field
contains an 'x' (not "*").

proc.5
Elie De Brauwer
Fix description of fourth field of /proc/loadavg
SIgned-off-by: Elie De Brauwer <eliedebrauwer@gmail.com>

resolv.conf.5
Michael Kerrisk [Slaven Rezic]
Describe syntax used for comments
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=656994

feature_test_macros.7
  Michael Kerrisk
    Document _ISOC11_SOURCE

inotify.7
  Michael Kerrisk [Yang Yang]
    Note that 'cookie' field is set to zero when unused

man.7
  Michael Kerrisk
    Various fixes for description of NAME section
      As noted by reporter:
      * The code sample given for the NAME section is incomplete because
        the actual content sample is not given.
      * Additionally, the description
 assumes that the item described is
        a command, which need not be the case.
      * The command makewhatis is not present on my system; the
        documented tool to create the whatis database is called mandb.
      * The description on .SH NAME in man(7) should either copy the
        relevant paragraph of lexgrog(1) or refer to it.

========== Changes in man-pages-3.37 ==========

Released: 2012-03-06, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes and ideas that have been
incorporated in changes in this release:

Denys Vlasenko <dvlasenk@redhat.com>
Mark R. Bannister <cambridge@users.sourceforge.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Oleg Nesterov <oleg@redhat.com>
Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages
---

getent.1
  Mark R. Bannister

   New page to document 'getent' binary provided by glibc

Changes to individual pages
----

bdflush.2
  Michael Kerrisk
    Note that bdflush() is deprecated, and does nothing

nfsservctl.2
  Michael Kerrisk
    Note that this system call was removed in Linux 3.1

ptrace.2
  Denys Vlasenko [Oleg Nesterov, Tejun Heo]
    add extended description of various ptrace quirks
      Changes include:

      s/parent/tracer/g, s/child/tracee/g - ptrace interface now
      is sufficiently cleaned up to not treat tracing process
      as parent.

      Deleted several outright false statements:
      - pid 1 can be traced
      - tracer is not shown as parent in ps output
      - PTRACE_ATTACH is not "the same behavior as if tracee had done
        a PTRACE_TRACEME": PTRACE_ATTACH delivers a SIGSTOP.
      - SIGSTOP _can_ be injected.
      - Removed mentions of SunOS and Solaris as irrelevant.
       - Added a few more known bugs.

      Added a large block of text in DESCRIPTION which doesn't focus
      on mechanical description of each flag and operation, but rather
      tries to describe a bigger picture. The targeted audience is
      a person which is reasonably knowledgeable in Unix but did not
      spend years working with ptrace, and thus may be unaware of its
      quirks. This text went through several iterations of review by
      Oleg Nesterov and Tejun Heo.
      This block of text intentionally uses as little markup as possible,
      otherwise future modifications to it will be very hard to make.
  Michael Kerrisk
    Global clean-up of page
      * Wording and formatting fixes to existing text and
        Denys Vlasenko's new text.

* Various technical amendments and improvements to
Denys Vlasenko's new text.
* Added FIXME for various problems
with the current text.
Michael Kerrisk
Integrated changes after further review from Denys Vlasenko

syscalls.2
Michael Kerrisk
Note that nfsservctl(2) was removed in Linux 3.1
Note that bdflush(2) is deprecated

capabilities.7
Michael Kerrisk
Add CAP_WAKE_ALARM
Michael Kerrisk
Add various operations under CAP_SYS_ADMIN
Add perf_event_open(2) to CAP_SYS_ADMIN
Add VM86_REQUEST_IRQ vm86(2) command to CAP_SYS_ADMIN
Update CAP_NET_ADMIN with notes from include/linux/capability.h
Add nfsservctl(2) to CAP_SYS_ADMIN
Michael Kerrisk
Add ioctl(FIBMAP) under CAP_SYS_RAWIO
Michael Kerrisk
Add virtual terminal ioctl()s under CAP_SYS_TTY_CONFIG
Michael Kerrisk
Update CAP_NET_RAW with notes from include/linux/capability.h
Michael Kerrisk
Add F_SETPIPE_SZ case to CAP_SYS_RESOURCE
Add POSIX messages queues queues_max case to CAP_SYS_RESOURCE
Update
CAP_SYS_RESOURCE with notes from include/linux/capability.h
Michael Kerrisk
SEE ALSO: Add libcap(3)

ld.so.8
Michael Kerrisk
Add --audit command-line option

Global formatting fix: balance .nf/.fi pairs

Various pages
Michael Kerrisk
Global fix: place sections in correct order

Various pages
Michael Kerrisk [Justin T Pryzby]
Global fix: Remove duplicated words
Remove instances of duplicate words found using Justin's
grep-fu:

```
for f in man?/*.[1-9]; do

    grep -HE ' ([[:alpha:]]{2,} +)\1' "$f" |
        grep -Evw '(proc|hugetlbfs|XXX*|root|long) *\1';
done | grep -E --colo ' ([[:alpha:]]{2,} +)\1'
```

Various pages
Michael Kerrisk
Correct order of SEE ALSO entries

Changes to individual pages
---

futimesat.2
Michael Kerrisk
PROTOTYPE: Correct header file and feature test macro requirements

keyctl.2
Bjarni Ingi Gislason
Strip trailing tabs from source line
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=664688

ptrace.2
Denys Vlasenko
Document PTRACE_GETEVENTMSG for PTRACE_EVENT_EXEC
Denys Vlasenko
Various fixes to recent updates of this page

symlinkat.2
Michael Kerrisk [Eric Blake]
PROTOTYPE: Correct header file

syscalls.2
Michael Kerrisk

Remove unimplemented system calls from main syscall list
The unimplemented system calls are in any case noted lower
down
in the page. Also: rearrange the text describing the unimplemented
system calls.
Michael Kerrisk
Note a few system calls that were removed in Linux 2.6
Michael Kerrisk
Add process_vm_readv(2) and process_vm_writev(2)

unlinkat.2
Michael Kerrisk [Eric Blake]
PROTOTYPE: Correct header file
Michael Kerrisk
PROTOTYPE: Add <fcntl.h> for AT_* constants

utimensat.2
Michael Kerrisk
PROTOTYPE: Add <fcntl.h> for AT_* constants

copysign.3
Michael Kerrisk [Tolga Dalman]
DESCRIPTION: Add a couple of examples

malloc.3
Michael Kerrisk
NOTES: Add a short discussion of arenas
Michael Kerrisk
Replace discussion of MALLOC_CHECK_ with pointer to mallopt(3)
Michael Kerrisk
SEE ALSO: Add mtrace(3)
SEE ALSO: add malloc_get_state(3)

posix_memalign.3
Michael Kerrisk
Rename memalign() argument
Rename "boundary" to "alignment" for consistency
with posix_memalign().
Michael Kerrisk
Improve discussion of feature test macros and header files for valloc(3)

rtnetlink.3
Kirill Brilliantov [Sergei Zhirikov]
Fix example code, rta_len assignment should use RTA_LENGTH()
See also http://bugs.debian.org/655088

scandir.3
Mark R Bannister

SEE ALSO: Add scandirat(3)

sigqueue.3
  Nix
    Remove rt_sigqueueinfo from TH line
      rt_sigqueueinfo() now has its own manual page, so should not
      be listed in the .TH line of this page.

tzset.3
  Peter Schiffer
    Correct description for Julian 'n' date format
      The Julian 'n' date format counts starting from 0, not 1.
  Michael Kerrisk
    Add some clarifying remarks to discussion of Julian day formats

packet.7
  Michael Kerrisk [Iain Fraser]
    Fix comment on 'sll_hatype' field

tcp.7
  Michael Kerrisk [Artyom Pervukhin]
    Correct RFC for TIME_WAIT assassination
 hazards

Apologies if I missed anyone!

New and rewritten pages
---

malloc_trim.3
  Michael Kerrisk
    New man page for malloc_trim(3)

malloc_usable_size.3
  Michael Kerrisk
    New man page for malloc_usable_size(3)

Newly documented interfaces in existing pages
---

prctl.2
  Cyrill Gorcunov
    Document PR_SET_MM (new in Linux 3.3)
  Michael Kerrisk
    Various edits and improvements to Cyrill's patch

Changes to individual pages
---

epoll_create.2
  Michael Kerrisk
    Rework discussion of 'size' argument
  Michael Kerrisk
    Add .SS for description of epoll_create1()

epoll_wait.2
  Michael Kerrisk [Armin Rigo]
    Another thread can add to epoll instance while epoll_wait is blocked
      See https://bugzilla.kernel.org/show_bug.cgi?id=43072
   Michael Kerrisk
    Clarify that epoll_pwait() blocks calling *thread*
    A few wording improvements

fchmodat.2
  Michael Kerrisk [Mike Frysinger]
    Note difference between glibc wrapper and underlying system call
      The wrapper function has a 'flags' argument (which currently
      serves no purpose), while the underlying system call does not.

fcntl.2
  Abhijith Das
    Explain behaviour of F_GETLEASE during lease break
  Michael Kerrisk [Eric Blake]
    Change type of arg from "long" to "int"
      Various fcntl(2) commands require an integral 'arg'.
      The man page said it must be "long" in all such cases.
      However, for the cases covered by POSIX, there is an
      explicit requirement that these arguments be "int".
      Update the man page to reflect. Probably, all of the
      other "long" cases (not specified in POSIX) should

 be "int", and this patch makes them so. Based on a
      note fromEric Blake, relating to F_DUPFD_CLOEXEC.

gettimeofday.2
  Michael Kerrisk
    Reorganize content
      The main change is to move the historical information about
      the 'tz_dsttime' to NOTES.
  Michael Kerrisk [Felix]
    Note that compiler issues warnings if 'tv' is NULL

mmap.2
  Michael Kerrisk [Kevin O'Gorman]
    Clarify that this system call should not be invoked directly
      See https://bugzilla.kernel.org/show_bug.cgi?id=42892
  Michael Kerrisk
    Clarify NOTES discussion of mmap() versus mmap2()

poll.2
  Michael Kerrisk [Michael Welsh Duggan]
    Document negative value in 'fd' field

Michael Kerrisk
Document semantics of passing zero in 'events' field

ptrace.2
Denys Vlasenko
Various fixes
For some reason, the PTRACE_TRACEME paragraph talks about some
general aspects of ptraced process behavior. It repeats
the
"tracee stops on every signal" information even though that was
already explained just a few paragraphs before. Then it describes
legacy SIGTRAP on execve().

This patch deletes the first part, and moves the second part up,
into the general ptrace description. It also adds
"If PTRACE_O_TRACEEXEC option is not in effect" to the description
of the legacy SIGTRAP on execve().

The patch also amends the part which says "For requests other
than PTRACE_KILL, the tracee must be stopped." - PTRACE_ATTACH
also doesn't require that.

sigaction.2
Michael Kerrisk [Andreas Jaeger,]
Clarify that the use of SI_SIGIO is for Linux 2.2 only
See also http://sourceware.org/bugzilla/show_bug.cgi?id=6745

sigprocmask.2
Mike Frysinger
ERRORS: add EFAULT

times.2
Michael Kerrisk [Simone Piccardi]
ERRORS: Add EFAULT

div.3
Michael
Kerrisk [Reuben Thomas]
CONFORMING TO: Add C99

fread.3
Regid Ichira
Clarify further that return value is number of items, not bytes
See also http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=665780

getaddrinfo.3
Michael Kerrisk [Jak]
Correct type of ai_addrlen field

malloc.3
  Michael Kerrisk
    SEE ALSO: add malloc_usable_size(3)
    SEE ALSO: Add malloc_trim(3)

mallopt.3
  Michael Kerrisk
    Fix text describing M_PERTURB and free()
    SEE ALSO: Add malloc_trim(3)

memchr.3
  Michael Kerrisk [Reuben Thomas]
    Remove mention of terminating null in description of rawmemchr()

perror.3
  Michael Kerrisk [Jesus Otero]
    Note that use of 'sys_errlist' is deprecated

rcmd.3
  Michael Kerrisk
    glibc eventually added a declaration of iruserok() in version 2.12

sysconf.3
  Michael Kerrisk [Ricardo Catalinas Jiménez]
    Add mention of _SC_SYMLOOP_MAX

nologin.5
  Michael Kerrisk [Tetsuo
 Handa]
    nologin must not only exist, but *be readable* to be effective

nsswitch.conf.5
  Mark R Bannister
    Significant rewrites and improvements
      This patch applies to nsswitch.conf.5 in man-pages-3.36.

      My changes almost completely rewrite large sections of the
      man page. They are needed to add clarity, correct grammar,
      reduce confusion, and bring up-to-date with the latest glibc.
      I have checked the man page against the nss source code in
      glibc 2.14.90.

      Historical notes are demoted to the footer.

      The rewrite makes the man page much clearer to
      understand, more authoratitive, and easier to read.
  Michael Kerrisk

Light edits to Mark Bannister's changes

capabilities.7
  Michael Kerrisk
    Add prctl(PR_SET_MM) to CAP_SYS_RESOURCE

epoll.7
  Michael Kerrisk
    Some minor clarifications at start of DESCRIPTION

netlink.7
  Jeff Mahoney
 [Petr Gajdos]
    Note cases where nonprivileged users can use netlink multicast groups
      See also https://bugzilla.novell.com/show_bug.cgi?id=754611

unix.7
  Michael Kerrisk [Tetsuo Handa]
    Add a detail on autobind feature

ld.so.8
  Jonathan Nieder [Reuben Thomas]
    Document effect of hwcaps on search path
      Wording by Aurelien Jarno from Debian glibc's r4701 (2011-06-04).

      Addresses http://bugs.debian.org/622385

Apologies if I missed anyone!

New and rewritten pages
---

process_vm_readv.2
  Mike Frysinger, Christopher Yeoh, Michael Kerrisk
    New page for process_vm_readv(2) and process_vm_writev(2)

mcheck.3
  Michael Kerrisk
    New man page for mcheck(3) and related functions
      Also describes mcheck_check_all(3), mcheck_pedantic(3),
      and mprobe(3)

Newly documented interfaces in existing pages
---

rcmd.3
   Michael Kerrisk
    Document "_af" variants of these functions
      Document rcmd_af(), rresvport_af(), iruserok_af(), ruserok_af().
      Also some restructuring and other clarifications.

rexec.3
  Michael Kerrisk
    Document rexec_af()

New and changed links
---

iruserok_af.3
rcmd_af.3
rresvport_af.3
ruserok_af.3
  Michael Kerrisk
    New links to rcmd.3

rexec_af.3
  Michael Kerrisk
    New link to rexec.3

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk
    Clarify difference between CLOCK_MONOTONIC and CLOCK_MONOTONIC_RAW
      Note interactions of these two clocks with discontinuous
      adjustments to the system time and NTP/adjtime(2).

fallocate.2
  Michael Kerrisk [John Sullivan]
    Fix description of ENOSYS and EOPNOTSUP errors
      As reported in https://bugzilla.redhat.com/show_bug.cgi?id=680214

fchmodat.2
   Michael Kerrisk [Mike Frysinger]
    Improve discussion of difference between wrapper and underlying syscall

gettimeofday.2
  Michael Kerrisk
    gettimeofday() is affected by discontinuous jumps in the system time
      Advise reader to use clock_gettime(2), if they need a
      monotonically increasing time source.
  Michael Kerrisk
    SEE ALSO: Add clock_gettime(2)

prctl.2
  Michael Kerrisk
    Add PR_TASK_PERF_EVENTS_DISABLE and PR_TASK_PERF_EVENTS_ENABLE
      Add some basic documentation of these operations, with a pointer to
      tools/perf/design.txt for more information.
  Michael Kerrisk [Marcel Holtmann]
    Amend details of PR_SET_PDEATHSIG

ptrace.2
  Michael Kerrisk [Mike Frysinger]

Note SPARC deviation with respect to get/set regs
SPARC reverses the use of 'addr' and 'data' for
PTRACE_GETREGS, PTRACE_GETFPREGS, PTRACE_SETREGS,
and PTRACE_SETFPREGS.

send.2

Stefan Puiu
Document EACCES error case for UDP

sigaction.2
Michael Kerrisk
Remove mention of raise(3) for SI_USER
For a long time now, glibc's raise(3) didn't yield SI_USER
for the signal receiver, so remove mention of raise(3)
here. The user can deduce the details, if needed, by looking
at the recently updated raise(3) page.

aio_cancel.3
Michael Kerrisk [Jon Grant]
Rewrite RETURN VALUE section to be clearer

aio_init.3
Michael Kerrisk [Jon Grant]
Remove extraneous "POSIX" from NAME section

btree.3
dbopen.3
hash.3
mpool.3
recno.3
Michael Kerrisk [Brian M. Carlson]
Note that glibc no longer provides these interfaces
glibc stopped providing these interfaces with v2.2.
Nowadays, the user that finds these pages probably wants
the libdb API, so note this in the page.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=337581

fopen.3
Michael Kerrisk
BUGS: Note limitation on number of flag characters parsed in 'mode'
Michael Kerrisk
Note that 'c' and 'e' flags are ignored for fdopen()
Determined from reading libio/iofdopen.c.
Michael Kerrisk
Document ",ccs=string" feature of 'mode' for fopen()/freopen()

getgrnam.3
  Michael Kerrisk [Ulrich Drepper]
    Fix discussion of _SC_GETGR_R_SIZE_MAX
      The value is not meant to be a maximum (as was specified in
      SUSv3) but an initial guess at the required size
      (as specified in SUSv4).

getpwnam.3
  Michael Kerrisk [Ulrich Drepper]
    Fix discussion of _SC_GETPW_R_SIZE_MAX
      The value is not meant to be a maximum (as was specified in
      SUSv3) but an initial guess at the required size
      (as specified in SUSv4).

malloc.3
mallopt.3
mtrace.3
  Michael Kerrisk
    SEE ALSO: add mcheck(3)

memchr.3
  Michael Kerrisk
    Clarify description, omitting
 mention of "strings" and "characters"
      The existing text slipped into talking about characters and
      strings, which could mislead readers into thing that, for
      example, searches for the byte '\0' are treated specially.
      Therefore, rewrite in terms of "bytes" and "memory areas".

      At the same time, make a few source file clean-ups.

mkstemp.3
  Michael Kerrisk
    Add "mkstemps" and "mkostemps" to NAME line

posix_openpt.3
  Michael Kerrisk [Vadim Mikhailov]
    Add some details on use of the slave pathname
      An explicit pointer to ptsname(3) is useful, as is a note
      of the fact that the slave device pathname exists only as
      long as the master device is held open.

raise.3
  Michael Kerrisk
    Add some notes on underlying system call that is used

rcmd.3
  Michael Kerrisk

Add some details of the rresvport() 'port' argument

resolver.3
Petr Baudis
Note that
many options are documented in resolv.conf(5)

scandir.3
Michael Kerrisk [Daniel J Blueman]
Improve EXAMPLE source code: s/0/NULL/ in scandir() call

strchr.3
James Hunt
Explain behavior when searching for '\0'

strerror.3
Eric Blake [Stefan Puiu]
Improve strerror_r() description
POSIX requires that perror() not modify the static storage
returned by strerror(). POSIX 2008 and C99 both require that
strerror() never return NULL (a strerror() that always
returns "" for all inputs is valid for C99, but not for POSIX).

http://sourceware.org/bugzilla/show_bug.cgi?id=12204
documents glibc's change to come into compliance with POSIX
regarding strerror_r() return value. The GNU strerror_r() use
of 'buf' was confusing - I ended up writing a test program that
proves that 'buf' is unused for valid 'errnum', but contains
truncated "unknown
message" for out-of-range 'errnum'.

See also http://austingroupbugs.net/view.php?id=382
Bernhard Walle
Correct description of error return for XSI strerror_r()
Michael Kerrisk [Eric Blake]
Note how to use 'errno' to detect errors when calling strerror()
Michael Kerrisk [Jon Grant]
Add an example of the kind of string returned by strerror()

resolv.conf.5
Petr Baudis
Document "single-request" option

inotify.7
Michael Kerrisk
Note buffer size that guarantees being able to read at least one event
James Hunt
Correct description of size of inotify_event structure

iso_8859-1.7
  Eugen Dedu
    Add "-" for SOFT HYPHEN
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=156154

netdevice.7
  Brian F. G. Bidulock
    Document some SIOC configuration ioctls
      This patch adds common but missing SIOC configuration ioctls to
      the netdevice.7 manual pages that are
 not documented anywhere
      else. SIOCSIFPFLAGS and SIOCGIFPFLAGS are linux-specific. Flag
      values come from Linux 2.6.25 kernel headers for sockios. The
      others are standard BSD ioctls that have always been implemented
      by Linux and were verified from inspecting netdevice.c kernel
      code.

socket.7
  Michael Kerrisk [Alexey Toptygin]
    Correct description of SO_BROADCAST

tcp.7
  lepton
    Correct description for TCP_MAXSEG on modern kernel

========== Changes in man-pages-3.41 ==========

Released: 2012-05-11, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro MOTOKI <amotoki@gmail.com>
Andries E. Brouwer <Andries.Brouwer@cwi.nl>
Angelo Borsotti <angelo.borsotti@gmail.com>
Bjarni Ingi Gislason <bjarniig@rhi.hi.is>

Ralph Corderoy <ralph@inputplus.co.uk>
Rich Felker <bugdal@aerifal.cx>
Simone Piccardi <piccardi@truelite.it>
Simon Paillard <spaillard@debian.org>
Stefan Puiu <stefan.puiu@gmail.com>
Stephen Hemminger <shemminger@vyatta.com>
Vincent Lefevre
<vincent@vinc17.net>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

get_robust_list.2
  Ivana Varekova [Michael Kerrisk]
    New page documenting get_robust_list(2) and set_robust_list(2)

mallinfo.3
  Michael Kerrisk [KOSAKI Motohiro, Paul Pluzhnikov]
    New page for mallinfo(3)

malloc_info.3
  Michael Kerrisk [Jakub Jelinek]
    New page for malloc_info(3)

malloc_stats.3
  Michael Kerrisk [KOSAKI Motohiro]

New man page for malloc_stats(3)

Newly documented interfaces in existing pages
---

madvise.2
  Jason Baron
    Document MADV_DONTDUMP and MADV_DODUMP

New and changed links
---

set_robust_list.2
  Michael Kerrisk
    New link to new get_robust_list.2 page

LIST_ENTRY.3
LIST_HEAD.3
LIST_INIT.3
LIST_INSERT_AFTER.3
LIST_INSERT_HEAD.3
LIST_REMOVE.3
TAILQ_ENTRY.3
TAILQ_HEAD.3
TAILQ_INIT.3
TAILQ_INSERT_AFTER.3
TAILQ_INSERT_HEAD.3
TAILQ_INSERT_TAIL.3
TAILQ_REMOVE.3
CIRCLEQ_ENTRY.3
CIRCLEQ_HEAD.3
CIRCLEQ_INIT.3
CIRCLEQ_INSERT_AFTER.3
CIRCLEQ_INSERT_BEFORE.3
CIRCLEQ_INSERT_HEAD.3
CIRCLEQ_INSERT_TAIL.3
CIRCLEQ_REMOVE.3
   Michael Kerrisk
    New link to queue.3
      The queue(3) page documents these macros, so it makes sense to
      have links for the names.

DES_FAILED.3
  Michael Kerrisk
    New link to des_crypt.3
      The des_crypt(3) page documents this macro, so it makes sense

to have a link for the name.

qsort_r.3
  Michael Kerrisk
    New link to qsort.3
      Overlooked to add this link in 3.38, when documentation of
      qsort_r() was added to the qsort.3 page.

Global changes
---

faccessat.2
fchmodat.2
fchownat.2
fstatat.2
futimesat.2
inotify_init.2
linkat.2
mkdirat.2
mknodat.2
openat.2
readlinkat.2
renameat.2
setns.2
splice.2
symlinkat.2
sync.2
tee.2
unlinkat.2
vmsplice.2
  Michael Kerrisk [Lauri Kasanen]
    Global fix: note glibc version that added library support

confstr.3
strcasecmp.3
strcat.3
strcmp.3
strcpy.3
strdup.3
strftime.3
strlen.3
strnlen.3
strpbrk.3
strspn.3
strtok.3
strxfrm.3
  Michael Kerrisk [Andries E. Brouwer]

Clarify that these functions operate on bytes, not (wide) characters
Change 'character(s)' to 'byte(s)' to make clear that these functions operate on bytes, not wide / UTF8 characters. (POSIX uses 'byte(s)' similarly, to make this point.)

icmp.7
ipv6.7
packet.7
raw.7
rtnetlink.7
unix.7
x25.7
Michael Kerrisk
Remove names of constants from NAME line
Some of the sockets/network protocol pages included names of the corresponding address family constants in the NAME line, but this wasn't done consistently across all pages, and probably it adds little value in those pages that did do this. So, remove these constants from those pages that have
them in the NAME
section.

Changes to individual pages
---

clock_getres.2
Michael Kerrisk [Josh Triplett]
Expand description of CLOCK_REALTIME
Make it clear that this clock may be discontinuous, and is affected my incremental NTP and clock-adjtime(2) adjustments.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=540872

epoll_wait.2
Michael Kerrisk
Clarify that 'timeout' is a *minimum* interval
Make it clear that 'timeout' is a minimum interval; the actual interval will be rounded up to the system clock granularity, and may overrun because of kernel scheduling delays.

execve.2
Michael Kerrisk
Rewording to deemphasize libc5 details

fork.2
Mike Frysinger
ERRORS: add ENOSYS

Can occur on, for example, non-MMU hardware.

getcpu.2
  Mike Frysinger
    Add RETURN VALUE and ERRORS sections
  Michael Kerrisk
     Refer reader to NOTES for more info about 'tcache'
  Michael Kerrisk
    DESCRIPTION: reword a sentence to be clearer

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Michael Kerrisk
    Rewrite to focus on system call API
      Rewrite to focus on the system call interface, adding
      some notes on the libaio wrapper differences.
      See the following mail:
      2012-05-07 "aio manuals", linux-man@vger
      http://thread.gmane.org/gmane.linux.man/1935/focus=2910

      Other minor rewrites.

mount.2
  Michael Kerrisk
    Comment out an old Linux libc detail

open.2
  Nick Piggin [KOSAKI Motohiro, Jan Kara, Hugh Dickins]
    Describe race of direct I/O and fork()
      Rework 04cd7f64, which didn't capture the details correctly.
      See the April/May 2012 linux-man@ mail thread "[PATCH]
      Describe race of direct read and fork for unaligned buffers"
      http://thread.gmane.org/gmane.linux.kernel.mm/77571

poll.2
   Michael Kerrisk
    Clarify that 'timeout' is a *minimum* interval
      Make it clear that 'timeout' is a minimum interval; the actual
      interval will be rounded up to the system clock granularity,
      and may overrun because of kernel scheduling delays.
  Michael Kerrisk
    Clarify discussion of wrapper function emulation
      Clarify that glibc (as well as old libc) provides emulation
      using select(2) on older kernels that don't have a poll()
      system call.

Michael Kerrisk
Make the meaning of a zero timeout explicit
Clarify that timeout==0 causes an immediate return, even if
no file descriptors are ready.

pread.2
Michael Kerrisk [Kasper Dupont]
BUGS: Note O_APPEND + pwrite() does the wrong thing
See https://bugzilla.kernel.org/show_bug.cgi?id=43178

recvmmsg.2
Michael Kerrisk
Clarify that 'timeout'
is a *minimum* interval
Make it clear that 'timeout' interval will be rounded up to the
system clock granularity, and may overrun because of kernel
scheduling delays.

select.2
Michael Kerrisk
Clarify that 'timeout' is a *minimum* interval
Make it clear that 'timeout' is a minimum interval; the actual
interval will be rounded up to the system clock granularity,
and may overrun because of kernel scheduling delays.
Michael Kerrisk
Expand description of the self-pipe trick
Michael Kerrisk
Add further details on pselect6() system call that underlies pselect()

semop.2
Michael Kerrisk
Clarify that 'timeout' of semtimedop() is a *minimum* interval
Make it clear that 'timeout' interval will be rounded up to the
system clock granularity, and may overrun because of kernel
scheduling delays.

signal.2
Michael Kerrisk
Note that 'sig_t'
requires _BSD_SOURCE
Also remove some old Linux libc details

sigwaitinfo.2
Michael Kerrisk
Clarify that 'timeout' of sigtimedwait() is a *minimum* interval
Make it clear that 'timeout' is a minimum interval; the actual
interval will be rounded up to the system clock granularity,
and may overrun because of kernel scheduling delays.

stat.2
  Bjarni Ingi Gislason
    Formatting fixes
      From "groff -ww" (or "man --warnings=w ..."):

        warning: around line 442: table wider than line width

      GNU man uses line length of 78.

      Use text blocks. Two spaces between sentences or better: start
      each sentence in a new line.

syscalls.2
  Bjarni Ingi Gislason
    Formatting fixes
      From "groff -ww ..." (or "man --warnings=w ..."):

        warning: around line 157: table wider than line width

      Have to use text blocks. Move some text
 to its correct column.
      Split text to two columns to avoid hyphenation.

sysinfo.2
  Michael Kerrisk
    Remove reference to obsolete libc5

syslog.2
  Michael Kerrisk
    Remove some details about obsolete Linux libc

aio_cancel.3
aio_error.3
aio_fsync.3
aio_read.3
aio_return.3
aio_suspend.3
aio_write.3
  Michael Kerrisk
    ERRORS: Add/update ENOSYS error

aio_cancel.3
  Michael Kerrisk
    Clarify what happens when a request isn't successfully canceled
  Michael Kerrisk
    Add pointers to aio(7) and sigevent(7)

dbopen.3
  Michael Kerrisk
    SYNOPSIS: Add header file <fcntl.h>
      Upstreamed from Debian, and consistent with FreeBSD
      dbopen(3) man page.

fmemopen.3
  Michael Kerrisk
    Note details of POSIX.1-2008 specification of 'b' in 'mode'
  Michael Kerrisk [Rich Felker]
    BUGS: fmemopen() doesn't correctly set file position in some cases
      If 'mode' is append, but 'size' does not cover
 a null byte
      in 'buf', then fmemopen() incorrectly sets the initial file
      position to -1, rather than the next byte after the end of
      the buffer.

      See http://sourceware.org/bugzilla/show_bug.cgi?id=13151
  Michael Kerrisk
    BUGS: fmemopen() incorrectly handles size==0 case
      If size is zero, fmemopen() fails, This is surprising behavior,
      and not specified in POSIX.1-2008.

      See http://sourceware.org/bugzilla/show_bug.cgi?id=11216

      Reported-by; Alex Shinn <alexshinn@gmail.com>
  Michael Kerrisk
    BUGS: Note silent ABI change for fmemopen() in glibc 2.9
  Michael Kerrisk [Rich Felker]
    BUGS: Append mode does not force writes to append
      Append mode correctly sets the initial offset but does
      not force subsequent writes to append at end of stream.

      See http://sourceware.org/bugzilla/show_bug.cgi?id=13152
  Michael Kerrisk [Eric Blake]

    BUGS: Note inconsistent treatment of 'b' in 'mode'
      fopen() permits, for example, both "w+b" and "wb+",
      but only the latter is meaningful to fmemopen().

      See http://sourceware.org/bugzilla/show_bug.cgi?id=12836

fopencookie.3
  Michael Kerrisk [Petr Baudis]
    Correct description of return for user-supplied 'write' function
      See http://sourceware.org/bugzilla/show_bug.cgi?id=2074

getaddrinfo.3

Jean-Michel Vourgère
Note that AI_ADDRCONFIG is not affected by loopback addresses
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=660479

iconv.3
Michael Kerrisk
Upstream useful NOTE from Debian
Warn the reader that the pointer arguments can't be
interpreted as C style strings. Also, note possible
alignment requirements for the referenced bytes sequences,
Michael Kerrisk
Write a better paragraph introducing iconv() and its arguments

isgreater.3

Michael Kerrisk [Vincent Lefevre]
Clarify that the arguments to these macros must be real-floating
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=609033

lio_listio.3
Michael Kerrisk
Clarify that async notification occurs when *all* I/Os complete

makedev.3
Michael Kerrisk
SYNOPSIS: Correct return types of major() and minor()
See https://bugzilla.redhat.com/show_bug.cgi?id=754188

Reported-by; Zdenek Kabelac <zkabelac@redhat.com>

malloc.3
Michael Kerrisk
SEE ALSO: Add malloc_info(3)

malloc_get_state.3
Michael Kerrisk
Fix wordos in function names in NAME line

mallopt.3
Michael Kerrisk
Fix example program
The example code was a version that was not consistent with
the shell output shown on the page.

Reported-bY: Simon Paillard <spaillard@debian.org>
Michael Kerrisk
Restore accidentally omitted line in shell session
Michael

Kerrisk
SEE ALSO: Add malloc_stats(3)

mmap64.3
Michael Kerrisk
Change target of link to mmap.2 (was mmap2.2)
Upstreamed from Red Hat / Fedora

realpath.3
Michael Kerrisk [Casper Dik]
Remove note about Solaris possibly returning a relative path

syslog.3
Michael Kerrisk [Ralph Corderoy]
Document behavior when 'ident' argument to openlog() is NULL
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/382096
Michael Kerrisk
Update CONFORMING TO for POSIX.1-2008
POSIX.1-2008 doesn't change any details, but make
that more explicit.

undocumented.3
Michael Kerrisk
Remove some functions that have been documented

sd.4
Michael Kerrisk
Remove reference to nonexistent scsi(4) page
Upstreamed from RedHat / Fedora

sk98lin.4
Michael Kerrisk [Stephen Hemminger]
Note that this driver was removed in 2.6.28
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/528020

passwd.5
Michael Kerrisk
Upstream pieces from Red Hat/Fedora
Note mention of empty password field.
Add description of "*NP*" in password field.
Michael Kerrisk
Various minor fixes and improvements

proc.5
Michael Kerrisk
Note that CAP_SYS_ADMIN processes can override file-max
Upstreamed from red Hat / Fedora
Michael Kerrisk

Document /proc/[pid]/cgroup
Upstreamed from Red Hat / Fedora

resolv.conf.5
Michael Kerrisk
Take a Debian improvement into upstream

tzfile.5
Michael Kerrisk
Mention timezone directories in DESCRIPTION
Note that timezone files are usually in /usr/lib/zoneinfo
or /usr/share/zoneinfo.
Michael Kerrisk
Drop SYNOPSIS
The SYNOPSIS doesn't correspond to a user-visible file.
Michael Kerrisk
SEE ALSO: Add pointer to glibc source file timezone/tzfile.h
Michael Kerrisk
SEE ALSO: add tzset(3) and tzselect(8)

ascii.7
Bjarni Ingi Gislason
Indent for "troff" makes table too wide
Fix following from "groff -t -ww ...":

warning: around line 53: table wider than line width

Extra indent for "troff" makes the table look misplaced
(default "ps" output).

cp1251.7
Bjarni Ingi Gislason
table too wide
From "nroff -ww -t ...":

warning: around line 44: table wider than line width

Columns are made narrower (column gutter decreased).

ipv6.7
Stefan Puiu
Add ENODEV error for bind() to link-local IPv6 address

signal.7
Michael Kerrisk [Simone Piccardi]
Clarify that SIGLOST is unused
Michael Kerrisk
Comment out crufty BUGS text on SIGLOST

It must be a very long time since the statement there
about SIGLOST was true. (The text seems to date back to
1996.)
Michael Kerrisk
Update architectures for tables of signal numbers

utf-8.7
Brian M. Carlson
Two clarifications
This patch clarifies that 0xc0 and 0xc1 are not valid in any UTF-8
encoding[0], and it also references RFC 3629 instead of RFC 2279.

[0] In order to have 0xc0, you'd have to have a two-byte encoding
with all the data bits zero in the first byte (and thus only six
bits of data), which would be an ASCII character encoded in the
non-shortest form. Similarly with 0xc1.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=538641

ldconfig.8
nscd.8
Michael Kerrisk
Remove path prefix from NAME line
Command names shown in NAME are normally just the basename,
not the full pathname of the command.

========== Changes in man-pages-3.42 ==========

Released: 2012-08-14, Konolfingen

Ulrich Drepper <drepper@gmail.com>
<socketpair@gmail.com>

Apologies if I missed anyone!

Global changes

Various pages
Sami Kerola
Global fix: use UR macro where applicable
The syntax .UR http://example.com paired with .UE will create
links which one can interact, if the pager allows that. One
way to see the effect is ask the man(1) command to use browser
display, e.g.:

man -H man7/uri.7

("\:" is optional groff syntax to permit hyphenless line breaks.)

Changes to individual pages
---

ldd.1
Michael Kerrisk
Add security note on untrusted executables
See also http://www.catonmat.net/blog/ldd-arbitrary-code-execution/
and

http://tldp.org/HOWTO/Program-Library-HOWTO/shared-libraries.html

clone.2
Michael Kerrisk
Rewrite discussion of sys_clone

futex.2

Consolidate error descriptions to ERRORS
Michael Kerrisk
Various wording fix-ups
Michael Kerrisk
Fix description of EINVAL error
The current text seems incorrect. Replace with a more general description.

getdents.2
select_tut.2
atof.3
atoi.3
pthread_create.3
pthread_sigmask.3
rtime.3
setbuf.3
tsearch.3
netlink.7
Michael Kerrisk [Jan Engelhardt]
Remove unneeded casts

get_robust_list.2
get_thread_area.2
getcpu.2
getdents.2
gettid.2
io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
ioprio_set.2
kexec_load.2
llseek.2
modify_ldt.2
mq_getsetattr.2
pivot_root.2
readdir.2
rt_sigqueueinfo.2
set_thread_area.2

sgetmask.2
spu_create.2
spu_run.2
subpage_prot.2
sysctl.2
tkill.2
  Michael Kerrisk
    Add note to SYNOPSIS that there is no glibc wrapper for system call
      Reduce the chance that the reader
 may be misled into thinking
      that there is a wrapper function for this system call by noting
      explicitly in the SYNOPSIS that there is no glibc wrapper and
      pointing the reader to NOTES for further details.

ioprio_set.2
  Colin McCabe
    Clarify the multithreaded behavior of ioprio_set(2)
  Michael Kerrisk [, Kalle Olavi Niemitalo]
    Document who==0 for IOPRIO_WHO_PROCESS and IOPRIO_WHO_PGRP
      For IOPRIO_WHO_PROCESS, who==0 means operate on the caller.
      For IOPRIO_WHO_PGRP, who==0 means operate on the caller's
      process group.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=652443

migrate_pages.2
  Michael Kerrisk [Christoph Lameter, JoonSoo Kim]
    Fix description of return value

mount.2
  Michael Kerrisk
    For MS_REMOUNT, source is ignored

mprotect.2
  Michael Kerrisk [Rasmus Villemoes]
    'addr' argument is not const
      As reported by Rasmus:

        Both my system's man-pages (3.22) and the latest online
        (3.41) show:

          int mprotect(const void *addr, size_t len, int prot);

        as the prototype for mprotect(2). However, POSIX [1] and the
        actual sys/mman.h (on all the systems I checked) do not have
        the const qualifier on the first argument.

msgctl.2

semctl.2
shmctl.2
svipc.7
  Michael Kerrisk
    Don't mention that ipc_perm is defined in <sys/ipc.h>
      There's no need to mention that the 'ipc_perm' structure
      is defined in <sys/ipc.h>. That's an implementation detail,
      and furthermore <sys/ipc.h> is itself included by the other
      System V IPC header files. The current text might lead the
      reader to conclude that they must include <sys/ipc.h>, which
      is not the case (it is required neither on Linux, nor by the
      standards).

msgctl.2
msgget.2
msgop.2
semctl.2
semget.2
semop.2
shmctl.2
shmget.2
   Michael Kerrisk
    NOTES: <sys/types.h> and <sys/ipc.h> aren't strictly needed
      Add text to NOTES to say that the <sys/types.h> and <sys/ipc.h>
      header files aren't required by Linux or the standards, but may
      be needed for portability to old systems.

ptrace.2
  Denys Vlasenko
    Explain WNOHANG behavior and EINTR bug
      I didn't like the "SIGKILL operates similarly, with exceptions"
      phrase (if it's different, then it's not "similar", right?),
      and now I got around to changing it. Now it says simply:
      "SIGKILL does not generate signal-delivery-stop and therefore
      the tracer can't suppress it."

      Replaced "why WNOHANG is not reliable" example with a more
      realistic one (the one which actually inspired to add this
      information to man page in the first place): we got
      ESRCH - process is gone! - but waitpid(WNOHANG)
 can still
      confusingly return 0 "no processes to wait for".

      Replaced "This means that unneeded trailing arguments may
      be omitted" part with a much better recommendation
      to never do that and to supply zero arguments instead.
      (The part about "undocumentedness" of gcc behavior was bogus,
      btw - deleted).

Expanded BUGS section with the explanation and an example
of visible strace behavior on the buggy syscalls which
exit with EINTR on ptrace attach. I hope this will lead
to people submitting better bug reports to lkml about
such syscalls.

seteuid.2
Michael Kerrisk
Note glibc version where setegid() implementation changed
In glibc 2.2/2.3, setegid() switched from setregid() to setresgid().

set_tid_address.2
Michael Kerrisk
Rename 'ctid' argument for consistency with clone(2) page
Michael Kerrisk
Some
rewordings and minor clarifications

sigwaitinfo.2
Michael Kerrisk [Daniel Zingaro]
Some wording clarifications
Mainly rewording things like "is delivered" to "becomes pending",
which is more accurate terminology.

syscall.2
Michael Kerrisk
Add some more details to the description of syscall(2)
And add another example of using syscall() to the program example.

syscalls.2
Michael Kerrisk
Add kcmp(2)
Michael Kerrisk
Move discussion of set_zone_reclaim(2) out of main table
This system call was never visible to user space, so it makes
sense to move it out of the main table of system calls into
the notes below the table.

getifaddrs.3
Michael Kerrisk [Adrian Dabrowski]
Note that ifa_addr and ifa_netmask can be NULL

readdir.3
Michael Kerrisk [Jan Engelhardt]
Handle -1 error from pathconf() in example code snippet
Improve the example

demonstrating allocation of a buffer
for readdir_r() to handle -1 error return from pathconf().
Otherwise, naive readers may think that pathconf() return
value can be used without checking.

realpath.3
Shawn Landden
Use past tense with ancient history (libc4, libc5)

regex.3
Michael Kerrisk
Correct SEE ALSO reference to glibc manual "regex" section

rtime.3
Michael Kerrisk [Jan Engelhardt]
Fix broken pointer cast in example code

sem_close.3
sem_destroy.3
sem_getvalue.3
sem_init.3
sem_open.3
sem_post.3
sem_unlink.3
sem_wait.3
sem_overview.7
Michael Kerrisk
Note that "cc -pthread" is required; "-lrt" no longer works
See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/874418

sigwait.3
Michael Kerrisk
Reword "is delivered" to "becomes pending"

strcat.3
Michael Kerrisk
Add some text to emphasize the dangers of buffer overruns
Michael Kerrisk
NOTES:
Add discussion of strlcat()

strcpy.3
Michael Kerrisk
Note that info is lost when strncpy() doesn't null terminate
Michael Kerrisk
Add some text to emphasize possibility of buffer runs with strcpy()
Michael Kerrisk
NOTES: Add a discussion of strlcpy()

Inspired by https://lwn.net/Articles/506530/
Michael Kerrisk
Fix description of the null-byte padding performed by strncpy()

tsearch.3
Michael Kerrisk
NOTES: remove redundant discussion of unorthodox use of term "postorder"
This point is already covered at greater length in the main
text of the page (See the piece "More commonly, ...").
Michael Kerrisk
Clarify use for first argument to the twalk() 'action' function
There's a number of details in POSIX that are omitted in
the current version of this page.
Michael Kerrisk
Some wording fixes

core.5
Michael Kerrisk
Note effect of madvise(2)
MADV_DONTDUMP flag

capabilities.7
Michael Kerrisk
Document CAP_BLOCK_SUSPEND

glob.7
Bjarni Ingi Gislason
Change 8 bit characters to 7 bit representation
Fixes rendering errors for accented 'a' characters.
Michael Kerrisk [Aaron Peschel]
Update bash(1) command used to obtain classical globbing behavior
The man page formerly noted the bash(1) v1 command to do this.

iso_8859-1.7
Bjarni Ingi Gislason
Explanation of SOFT HYPHEN and the code for it
<groff: iso_8859-2.7>:89: warning: can't find special character `shc'

This is the only "iso_8859-*.7" file that has this (now)
undefined character. The code in column four in "iso_8859-1.7" is
"0x2D" ("HYPHEN, MINUS SIGN" or "HYPHEN-MINUS") instead of "0xAD".
See Debian bug 156154 (or package "manpages").

There should be an explanation for this graphic character and the
code should
be 0xAD in iso_8859-1.7 (as in all others), even
though "[gn]roff" does not display a "HYPHEN" in that position of
the table.

The line with "SOFT HYPHEN" gets a footnote and a short
explanation.

mdoc.7
Bjarni Ingi Gislason
Fixing a warning and a table
Fis warning from "groff -ww ..." (or "man --warnings=w ..."):

<groff: mdoc.7>:294: warning:
tab character in unquoted macro argument

In one table the distance between columns is too small in the
"ps" output. (Bug in the groff "doc.tmac" macro?)

mdoc.samples.7
Bjarni Ingi Gislason
Fix warnings from [ng]roff, corrections
From "man -ww ..." (groff -ww ...):

<standard input>:541: warning:
tab character in unquoted macro argument
[+3 similar warnings]
<standard input>:813: warning: macro `Pu' not defined
Usage:
.Rv -std in sections 2 and 3 only (#1669)
mdoc warning: A .Bl directive has no matching .El (#1821)

String "Pu" defined as a row of punctuation characters.
".Bl" and ".El" fixed.
Some arguments, that start with a period or are the name of a
macro, protected with "\&".
Variable name for macro ".Rv" corrected.

netdevice.7
Bjarni Ingi Gislason
Line in table too long
Fix warning from "man ..." ("nroff -ww ..."):

nroff: netdevice.7: warning: around line 98:
table wider than line width

Fix: No right adjustment in text blocks in tables.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673873

netlink.7
Bjarni Ingi Gislason

Line in table is too long
Fix warning from "man ..." ("nroff -ww ..."):

nroff: netlink.7: warning: around line 195:
table wider than line width

Horizontal line incorporated into table.
No right adjustment of text blocks in tables.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=673875
Simon Paillard [Herbert Xu]
Change description of "*_pid" fields to "Port ID"
As reported by Herbert Xu, these should not be considered as PIDs.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=383296

rtnetlink.7
Bjarni Ingi Gislason
Line in table too long
Fix warning from "man ..." ("nroff -ww ..."):

nroff: rtnetlink.7: warning: around line 415:
table wider than line width

Column gutter reduced to fit line length.
Right adjustment in text blocks removed in tables.
Some header made centered in tables.
One table put on same page.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674051

socket.7
Martin H
Document SO_MARK socket option

Commit 4a19ec5800fc3bb64e2d87c4d9fdd9e636086fe0 in Jan 2008 added
the new SO_MARK socket option.

This patch is based on text from the commit message.

See https://bugzilla.kernel.org/show_bug.cgi?id=16461.

svipc.7
Michael Kerrisk
SYNOPSIS: Remove include of <sys/types.h> and <sys/ipc.h>
Including <sys/types.h> and <sys/ipc.h> isn't needed on Linux
and isn't really relevant for the explanation on this page.

========== Changes in man-pages-3.43 ==========

Released: 2012-10-05, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adrian Bunk <bunk@kernel.org>
Anatoli Klassen <anatoli@aksoft.net>
Andreas Schwab <schwab@linux-m68k.org>
Bjarni Ingi Gislason <bjarniig@rhi.hi.is>
David Prévot <taffit@debian.org>
Eric Dumazet <edumazet@google.com>
Florian
 Weimer <fweimer@redhat.com>
Frédéric Brière <fbriere@fbriere.net>
Fredrik Arnerup <arnerup@kth.se>
Guillem Jover <guillem@hadrons.org>
Jan Engelhardt <jengelh@inai.de>
Michael Kerrisk <mtk.manpages@gmail.com>

Stephane Fillod <fillods@users.sf.net>
Trevor Woerner <twoerner@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

getenv.3
  Michael Kerrisk [Florian Weimer, Andreas Schwab]
    Document secure_getenv(3)

New and changed links
---

phys.2
  Michael Kerrisk

New link to unimplemented.2

secure_getenv.3
  Michael Kerrisk
    New link to getenv.3

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/-/\\-/ when real hyphen is required (e.g., in code)

Various pages
  David Prévot [Michael Kerrisk]
    Global fix: Various consistency
 fixes for SEE ALSO

Various pages
  Michael Kerrisk
    Global fix: use "Linux kernel source" consistently
      Rather than "kernel source".

Various pages
  Michael Kerrisk
    Global fix: disable justification and hyphenation in SEE ALSO
      For a better visual result, disable justification and hyphenation
      in SEE ALSO where page names are long.

syscalls.2
uname.2
boot.7
  Michael Kerrisk
    Global fix: s/OS/operating system/

Changes to individual pages
---

epoll_wait.2
  Michael Kerrisk [Fredrik Arnerup]
    Describe timeout limitation in kernels < 2.6.37
      As reported by Fredrik (and as far as I can tell the problem
      went back to 2.6.0):

      The timeout argument has an upper limit. Any values above that
      limit are treated the same as -1, i.e. to wait indefinitely.

The limit is given by:

#define EP_MAX_MSTIMEO min(1000ULL * MAX_SCHEDULE_TIMEOUT
/ HZ, \
(LONG_MAX - 999ULL) / HZ)

That is, the limit depends on the size of a long and the timer
frequency. Assuming the long is never smaller than 32 bits
and HZ never larger than 1000, the worst case is 35 minutes.
I think this should be mentioned under "BUGS".

Although this is likely to be fixed in the future
(http://lkml.org/lkml/2010/8/8/144), the problem exists in
at least 2.6.14 - 2.6.35. I don't know if select(2) and poll(2)
are affected.

https://bugzilla.kernel.org/show_bug.cgi?id=20762
Michael Kerrisk
Add pointer to select(2) for discussion of close in another thread

getitimer.2
Michael Kerrisk [Trevor Woerner]
Note Linux's odd handling of the new_value==NULL case
Michael Kerrisk [Trevor Woerner]
Fix types used to declare fields in timeval struct

keyctl.2
David Prévot
Reorder SEE ALSO,
without .br

poll.2
Michael Kerrisk
Add pointer to select(2) for discussion of close in another thread

select.2
Michael Kerrisk [Stephane Fillod]
Note behavior if monitored file descriptor is closed in another thread
Executive summary: a sane application can't rely on any
particular behavior if another thread closes a file descriptor
being monitored by select().

See https://bugzilla.kernel.org/show_bug.cgi?id=40852
Michael Kerrisk
Clarify equivalent pselect() code in terms of threads
s/sigprogmask/pthread_sigmask/

semop.2

Michael Kerrisk
Recast discussion of blocking behavior in terms of threads
semop() blocks the calling thread, not the process.
Michael Kerrisk
SEE ALSO: Add clone(2)
Give reader a clue about CLONE_SYSVSEM.

shutdown.2
Michael Kerrisk [Eric Dumazet]
Document EINVAL error (and associated bug)
Eric
Dumazet noted that EINVAL was not documented. Some further
digging shows that it's also not diagnosed consistently.
See https://bugzilla.kernel.org/show_bug.cgi?id=47111.

sigaction.2
Michael Kerrisk
Tweak SA_RESETHAND description

timer_settime.2
Michael Kerrisk
Small rewording around discussion of pointer arguments

wait4.2
Adrian Bunk
Note that these functions are nonstandard and recommend alternatives
Some edits to Adrian's patch by mtk.
Michael Kerrisk
CONFORMING TO: Note SUS details for wait3()

gnu_get_libc_version.3
Michael Kerrisk
Remove unneeded "#define _GNU_SOURCE" from SYNOPSIS

pthread_kill.3
pthread_sigqueue.3
Michael Kerrisk
Remove wording "another"
Writing "another thread" in these pages implies that these
functions can't be used to send a signal to the calling thread
itself, which is of course untrue.

sigvec.3
Michael
Kerrisk
Add "int" arg to sv_handler definition in sigvec structure
Michael Kerrisk
Fix small error in discussion of blocking of signals

The signal that causes the handler to be invoked is blocked,
but saying "by default" implies that this can be changed via
the API. It cannot. (One needs sigaction(2) for that.)

syslog.3
Simon Josefsson
Remove (apparently bogus) text claiming LOG_AUTH is deprecated
LOG_AUTH is in POSIX, and widely available. There
seems to be no basis to the claim it is deprecated.

Quoting Simon:
I cannot find any other source that claim LOG_AUTH is
deprecated in any way. LOG_AUTH is distinct from
LOG_AUTHPRIV. The GNU C Library manual only documents
LOG_AUTH. The header files contains both without any
comment. Common systems like Debian appear to refer to
both auth and
authpriv facilities in syslog configurations.
Popular daemons appear to use both facilities.
Both facilities are discussed in several RFCs.

See https://bugzilla.kernel.org/show_bug.cgi?id=46091

ttyname.3
Michael Kerrisk
SEE ALSO: Add ctermid(3)

proc.5
Michael Kerrisk
Clarify header file related to 'flags' field of /proc/PID/stat
Michael Kerrisk [Frédéric Brière]
Update description of 'starttime' field of /proc/PID/stat
The unit of measurement changed from jiffies to clock ticks in
Linux 2.6.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=675891
Michael Kerrisk
Document /proc/sys/kernel/kptr_restrict
Michael Kerrisk [Kees Cook]
Document /proc/sys/fs/protected_symlinks
Based on text in Documentation/sysctl/fs.txt by Kees Cook
Michael Kerrisk [Kees Cook]
Document /proc/sys/fs/protected_hardlinks
Based
on text in Documentation/sysctl/fs.txt by Kees Cook

capabilities.7
Michael Kerrisk

Document interaction of CAP_SYSLOG and /proc/sys/kernel/kptr_restrict

ip.7
  Michael Kerrisk
    SEE ALSO: Add ipv6(7)
    SEE ALSO: Add icmp(7)

man-pages.7
  Michael Kerrisk
    Add some advice about disabling hyphenation in SEE ALSO

ld.so.8
  Michael Kerrisk
    Describe interpretation of slashes in dependency strings
  Michael Kerrisk
    Repeat note that LD_LIBRARY_PATH is ignored in privileged programs
      This point is already noted when discussing search order for
      libraries, but it's worth repeating under the specific discussion
      of LD_LIBRARY_PATH further down the page.
  Michael Kerrisk
    Add some details for LD_PRELOAD
    Note that LD_PRELOAD list separator can be space or colon

========== Changes in man-pages-3.44 ==========

Released: 2012-11-07, Barcelona

Contributors

The
 following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Bert Hubert <bert.hubert@netherlabs.nl>
David Prévot <taffit@debian.org>
James Youngman <jay@gnu.org>
Kees Cook <keescook@chromium.org>
Lars Wirzenius <liw@iki.fi>
Lucas De Marchi <lucas.de.marchi@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Rusty Russell <rusty@rustcorp.com.au>
Simon Paillard <spaillard@debian.org>
Thomas Habets <thomas@habets.se>

Apologies if I missed anyone!

New and rewritten pages
---

delete_module.2
  Michael Kerrisk
    Rewrite to Linux 2.6+ reality
  Michael Kerrisk
    Change license and copyright
      There is now nothing left of the original FSF-copyrighted
      page. So, change the copyright and license.
  Michael Kerrisk [Lucas De Marchi, Rusty Russell]
    Substantial reorganization after comments from Rusty Russell

      Rusty notes that O_NONBLOCK is almost always used in
      practice. Therefore, it would be better to reorganize
      the page to consider that "the default".

init_module.2
  Michael Kerrisk
    Rewrite to Linux 2.6+ reality
  Michael Kerrisk
    Change copyright and license
      Little of the original page now remains. Change
      copyright and license
  Michael Kerrisk [Rusty Russell]
    Changes after review comments from Rusty Russell
  Kees Cook
    Add various pieces describing Linux 2.6+ behavior
      Pieces take from, or inspired by, a patch sent by Kees.

getauxval.3
  Michael Kerrisk
    Document getauxval() function added in glibc 2.16

Global changes

Various pages
  Michael Kerrisk
    Global fix: Use consistent capitalization in NAME section
      The line(s) in the NAME section should only use capitals
      where English usage dictates that. Otherwise, use

lowercase throughout.

Various pages
  Michael Kerrisk
    Global fix: "userspace" ==> "user space" or "user-space"
      Existing pages variously use "userspace or "user space".
      But, "userspace" is not quite an English word.
      So change "userspace" to "user space" or, when used
      attributively, "user-space".

Changes to individual pages
---

clock_getres.2
clock_nanosleep.2
  Michael Kerrisk
    Linking with -lrt is no longer needed from glibc 2.17 onward

create_module.2
  Michael Kerrisk
    Note that this system call is present only in kernels before 2.6
  Michael Kerrisk
    Note that ENOSYS probably indicates kernel 2.6+

execve.2
  Michael Kerrisk
    Document treatment of PR_SET_PDEATHSIG on execve()
  Michael Kerrisk
    Document treatment of SECBIT_KEEP_CAPS securebits flag on execve()

fork.2
  Michael Kerrisk
    Note treatment of default timer slack value on fork()

getdomainname.2
   Simon Paillard [Lars Wirzenius]
    Point out that these calls relate to NIS, not DNS
      See http://bugs.debian.org/295635

get_kernel_syms.2
  Michael Kerrisk
    Note that this system call is present only in kernels before 2.6

ipc.2
  Michael Kerrisk
    Update note on architectures that don't have ipc()
      Replace mention of ia64 with x86-64 and ARM.

link.2
  Michael Kerrisk
    Add EPERM error triggered by /proc/sys/fs/protected_hardlink

prctl.2
  Michael Kerrisk
    Mention Documentation/prctl/no_new_privs.txt for PR_SET_NO_NEW_PRIVS
  Kees Cook
    update seccomp sections for mode 2 (BPF)
      This adds a short summary of the arguments used
      for "mode 2" (BPF) seccomp.
  Michael Kerrisk
    Small improvements to PR_SET_SECCOMP discussion
      Note type of 'arg3' for SECCOMP_MODE_FILTER.
      Add pointer to Documentation/prctl/seccomp_filter.txt.
  Michael Kerrisk
     Note 'seccomp' semantics with respect to fork(), execve(), and prctl()
  Michael Kerrisk
    Document PR_SET_TIMERSLACK and PR_GET_TIMERSLACK
  Michael Kerrisk
    Reword PR_SET_NAME and PR_GET_NAME in terms of threads
      Plus tfix
  Kees Cook
    document PR_SET_NO_NEW_PRIVS, PR_GET_NO_NEW_PRIVS
      This adds a short description of the no_new_privs bit,
      as described in Documentation/prctl/no_new_privs.txt.

ptrace.2
  Michael Kerrisk
    Clarify that some operations are not present on all architectures
      PTRACE_GETREGS, PTRACE_SETGREFS, PTRACE_GETFPREGS,
      and PTRACE_GETSPREGS are not present on all architectures.
      PTRACE_SYSEMU and PTRACE_SYSEMU_SINGLESTEP are present only
      on x86.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=122383

query_module.2
  Michael Kerrisk
    Add a few words clarifying reference to /sys/module
  Michael Kerrisk
    Note that
 this system call is present only in kernels before 2.6
  Michael Kerrisk
    Note that ENOSYS probably indicates kernel 2.6+
  Michael Kerrisk
    SEE ALSO: Add modinfo(8) and lsinfo(8)

Michael Kerrisk
Move some information in NOTES to VERSIONS

socketcall.2
Michael Kerrisk
Update note on architectures that don't have socketcall()
Replace mention of ia64 with x86-64 and ARM.

times.2
Thomas Habets
Recommend clock_gettime(2) as alternative to times(2)

clock_getcpuclockid.3
Michael Kerrisk
Linking with -lrt is no longer needed from glibc 2.17 onward

fts.3
Simon Paillard [James Youngman]
Improve description of physical vs. logical tree walking
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=633505

getenv.3
Michael Kerrisk
SEE ALSO: add getauxval(3)

proc.5
Michael Kerrisk
Document /proc/meminfo
Info mostly taken from Documentation/filesystems/proc.txt
and Documentation/vm/hugetlbpage.txt.
Michael Kerrisk
Default for /proc/sys/fs/protected_{hardlinks,symlinks} is now 0
The default setting of 1 in/proc/sys/fs/protected_hardlinks
and /proc/sys/fs/protected_symlinks caused one too many
breakages for Linus's taste, so commit 561ec64ae67e changed
the default for both files to 0.
Note system call error yielded by /proc/sys/fs/protected_symlinks
Note that violating 'protected_symlinks' restrictions
causes system calls to fail with the error EACCES.
Michael Kerrisk
Since Linux 2.6.27, /proc/sys/kernel/modprobe depends on CONFIG_MODULES

ipv6.7
Bert Hubert
Document IPV6_RECVPKTINFO

man-pages.7
Michael Kerrisk

Note rules for capitalization in NAME section

time.7
Michael Kerrisk
Add a subsection on timer slack

ld.so.8
Michael Kerrisk
SEE ALSO: add getauxval(3)

==========
Changes in man-pages-3.45 ==========

Released: 2012-12-21, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Cyril Hrubis <chrubis@suse.cz>
David Prévot <taffit@debian.org>
Elie De Brauwer <eliedebrauwer@gmail.com>
Eric Dumazet <eric.dumazet@gmail.com>

Rens van der Heijden <rens.vanderheijden@uni-ulm.de>
Simon Paillard <spaillard@debian.org>
Thierry Vignaud <thierry.vignaud@gmail.com>
Trevor Woerner <twoerner@gmail.com>
YOSHIFUJI Hideaki <yoshfuji@linux-ipv6.org>

Apologies
if I missed anyone!

New and rewritten pages
---

s390_runtime_instr.2
  Jan Glauber
    New page for s390-specific s390_runtime_instr(2)

if_nameindex.3
  YOSHIFUJI Hideaki
    Document if_nameindex(3) and if_freenameindex(3)
  Michael Kerrisk
    Edits, improvements and corrections to Hideaki's page
  Michael Kerrisk
    Add an example program

if_nametoindex.3
  YOSHIFUJI Hideaki
    New page documenting if_nametoindex(3) and if_indextoname(3)

New and changed links
---

if_freenameindex.3
  Michael Kerrisk
    New link to if_nameindex.3

if_indextoname.3
  Michael Kerrisk
    New link to if_nametoindex.3

Global changes
---

sysconf.3
cciss.4
  Michael Kerrisk
    Global fix: s/runtime/run time/

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Since 2.6.30, CLONE_NEWIPC also supports POSIX message queues

delete_module.2
  Michael Kerrisk
    Small rewording of description of effect of O_TRUNC

getrlimit.2
  Michael Kerrisk [Trevor Woerner]
    Document Linux's nonstandard treatment or RLIMIT_CPU soft limit
      Upon encountering the RLIMIT_CPU soft limit when a SIGXCPU handler
      has been installed, Linux invokes the signal handler *and* raises
      the soft limit by one second. This behavior repeats until the
      limit is encountered. No other implementation that I tested
      (Solaris 10, FreeBSD 9.0, OpenBSD 5.0) does this, and it seems
      unlikely to be POSIX-conformant. The (Linux-specific)
      RLIMIT_RTTIME soft limit exhibits similar behavior.
  Michael Kerrisk
    Point reader at discussion of /proc/[pid]/limits in proc(5)

io_getevents.2
  Michael Kerrisk
    io_getevents() may cause segfault when called with invalid ctx_id
      For reference see: http://marc.info/?l=linux-aio&m=130089887002435&w=2

recv.2
  Michael
 Kerrisk [Eric Dumazet]
    UNIX domain sockets support MSG_TRUNC since 3.4

sendmmsg.2
  Elie De Brauwer
    Add example program for sendmmsg()

stat.2
  Simon Paillard
    Clarify description of EOVERFLOW error
      The EOVERFLOW error is not only for st_size, but also
      inode and block size fields. See glibc source file
      sysdeps/unix/sysv/linux/xstatconv.c and kernel source
      file fs/stat.c. Also, fix bit/byte confusion
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604928

syscalls.2
  Michael Kerrisk
    Update various references to "i386" to "x86"
  Michael Kerrisk
    Add s390_runtime_instr(2)

sysctl.2
  Michael Kerrisk

Mention CONFIG_SYSCTL_SYSCALL
Michael Kerrisk
Calls to sysctl() log warnings to the kernel log since 2.6.24

syslog.2
Michael Kerrisk
Substantially reorganize discussion of commands
Make the layout of the discussion of the commands

more readable.
Michael Kerrisk
Add kernel symbolic 'type' names
Michael Kerrisk
Clarify SYSLOG_ACTION_SIZE_UNREAD semantics
SYSLOG_ACTION_SIZE_UNREAD returns the number of bytes
available for reading via SYSLOG_ACTION_READ.
Michael Kerrisk
Clarify where SYSLOG_ACTION_READ_ALL places data it reads
Michael Kerrisk
Clarify semantics of SYSLOG_ACTION_CLEAR
The SYSLOG_ACTION_CLEAR command (5) does not really clear
the ring buffer; rather it affects the semantics of what
is returned by commands 3 (SYSLOG_ACTION_READ_ALL) and
4 (SYSLOG_ACTION_READ_CLEAR).
Michael Kerrisk
Clarify discussion of privileges for commands 3 and 10
Michael Kerrisk
Add mention of CONFIG_LOG_BUF_SHIFT

wait.2
Michael Kerrisk
BUGS: Document odd waitid() behavior when 'infop' is NULL

getifaddrs.3
Michael Kerrisk [Julien Cristau]
Update description
of ifa_data to Linux 2.6+ reality
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778

memcmp.3
Michael Kerrisk [Jon Grant]
Enhance RETURN VALUE text and remove redundant text from DESCRIPTION
Note that sign of result equals sign of difference between
first two bytes that differ (treated as "unsigned char")."

mkstemp.3
Michael Kerrisk [Florian Weimer]
Deemphasize discussion of mode 066 in glibc 2.0.6

Glibc 2.0.6 is now so ld that the discussion of details
of that version can be deemphasized placing just under
NOTES.

See https://bugzilla.kernel.org/show_bug.cgi?id=51811

strcmp.3
  Michael Kerrisk [Jon Grant]
    Enhance RETURN VALUE text and remove redundant text from DESCRIPTION
      Note that sign of result equals sign of difference between
      first two bytes that differ (treated as "unsigned char")."

ttyname.3
  Michael Kerrisk

  Fix confused text in ERRORS
      The existing text suggested that the ERRORS applied
      only for ttyname_r(). However, 2 of the 3 errors
      can occur for ttyname().

undocumented.3
  Michael Kerrisk
    Remove some now documented functions

proc.5
  Michael Kerrisk [Jim Paris]
    Correct description of SwapFree in /proc/meminfo
  Michael Kerrisk
    Note change of /proc/[pid]/limits file permissions in 2.6.36

resolv.conf.5
  Simon Paillard
    Document IPv6 format for nameserver
      See: http://bugs.debian.org/610036

capabilities.7
  Michael Kerrisk [Rens van der Heijden]
    Correct URL for POSIX.1e draft

ipv6.7
  Gao Feng
    Add description of getsockopt() for IPV6_MTU
      In IPv4,IP_MTU is only supported by getsockopt.
      In IPv6, we can use IPV6_MTU to set socket's MTU,
      but the return value of getsockopt() is the path MTU.

rtnetlink.7
  Michael Kerrisk [Julien Cristau]

Update description of IFLA_STATS to Linux 2.6+ reality
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=526778

socket.7
Michael Kerrisk [YOSHIFUJI Hideaki]
Document 'sockaddr' and 'sockaddr_storage' types
Andi Kleen
Explain effect of SO_SNDTIMEO for connect()
When SO_SNDTIMEO is set before connect(), then connect()
may return EWOULDBLOCK when the timeout fires.

========== Changes in man-pages-3.46 ==========

Released: 2013-01-27, Canberra

Shawn Landden <shawnlandden@gmail.com>
Simon Paillard <spaillard@debian.org>

Starlight <starlight.2013q1@binnacle.cx>
Theodore Ts'o <tytso@mit.edu>
Wolfgang Rohdewald <wolfgang@rohdewald.de>
Zsbán Ambrus <ambrus@math.bme.hu>

Apologies if I missed anyone!

New and rewritten pages
---

kcmp.2
  Cyrill Gorcunov, Michael Kerrisk
    New page for kcmp(2)

Newly documented interfaces in existing pages
---

init_module.2
  Michael Kerrisk [Kees Cook, Rusty Russell, Lucas De Marchi]
    Document finit_module(2)
  Rusty Russell [Lucas De Marchi, Kees Cook]
    Document finit_module() 'flags' argument
      Document MODULE_INIT_IGNORE_MODVERSIONS and
      MODULE_INIT_IGNORE_VERMAGIC. (Some edits by mtk.)

New and changed links
---

finit_module.2
  Michael Kerrisk
    New link to init_module.2

__after_morecore_hook.3
__free_hook.3
__malloc_initialize_hook.3
__memalign_hook.3
__realloc_hook.3
  Michael Kerrisk
    New link to malloc_hook.3

Global changes

Various pages

Michael Kerrisk
Global fix: s/tty/terminal/

Changes to individual pages
---

clone.2
Michael Kerrisk
Add kernel versions for various CLONE_* constants
Michael Kerrisk
CLONE_NEWIPC governs mechanisms that don't have filesystem pathnames
Michael Kerrisk
CLONE_NEWIPC doesn't mount the POSIX
MQ file system
Michael Kerrisk
Add an example program (CLONE_NEWUTS)
Michael Kerrisk
Some reworking of CLONE_NEWIPC text
No substantial content changes.
Michael Kerrisk
SEE ALSO: add kcmp(2)
SEE ALSO: add setns(2)

fallocate.2
Michael Kerrisk
FALLOC_FL_* flags are defined in glibc only since 2.18

getxattr.2
removexattr.2
setxattr.2
Michael Kerrisk [Andrew Perepechko,]
Note that ENOATTR is a synonym for ENODATA
Various people have pointed out that strace(1) shows ENODATA
for the case where the named attribute does not exist, or
the process has no access to this attribute. ENODATA
and ENOATTR are in fact defined as synonyms. Point this out
in the man page, so that people understand the strace(1) info.

See https://bugzilla.kernel.org/show_bug.cgi?id=51871

getxattr.2
listxattr.2
removexattr.2
setxattr.2
Michael Kerrisk
Put

errors under ERRORS section
        The errno values on these pages were listed in a nonstandard
        way under the RETURN VALUE section. Put them in ERRORS sections.

init_module.2
  Michael Kerrisk [Rusty Russell]
    ERRORS: Add errors for module signatures (EBADMSG, ENOKEY)

link.2
mkdir.2
mknod.2
open.2
rename.2
symlink.2
write.2
mkfifo.3
  Mark Hills
    Document EDQUOT error
      The return error EDQUOT is not documented in open(2), write(2),
      symlink(2) etc.

      Whether inodes or disk blocks are required for each function
      is something I based on received wisdom and BSD documentation,
      rather than tracing the code to the kernel. For symlink(2)
      this certainly depends on the file system type.

listxattr.2
  Michael Kerrisk [Theodore Ts'o]
    Fix RETURN VALUE description
      On success, 0 may be returned, so change wording from
      "positive number" to "nonnegative number".

outb.2
   Michael Kerrisk
    Add SYNOPSIS

prctl.2
  Kees Cook
    Document PR_SET_PTRACER
      Document the Yama LSM's prctl handler that allows processes to
      declare ptrace restriction exception relationships via
      PR_SET_PTRACER.
  Michael Kerrisk
    Make it explicit that PR_SET_PTRACER replaces previous setting
      The attribute is a scalar, not a list.
  Shawn Landden
    Document EINVAL error for PR_SET_PTRACER
  Michael Kerrisk

Document PR_GET_TID_ADDRESS

ptrace.2
Michael Kerrisk
Document PTRACE_O_EXITKILL
Michael Kerrisk
Place PTRACE_SETOPTIONS list in alphabetical order

query_module.2
Michael Kerrisk
Must be called using syscall(2)
Yes, the call is way obsolete, but add this info
for completeness.

recvmmsg.2
Elie De Brauwer
Add/correct kernel version info for recvmmsg() and MSG_WAITFORNONE
This patch isolates the since/version
related fixes as requested.
This change introduces the following delta:
* The page states it was added in 2.6.32 but it is only added
2.6.33 (ref: http://kernelnewbies.org/Linux_2_6_33)
* The MSG_WAITFORONE flag was in turn only added in 2.6.34
(ref: http://kernelnewbies.org/Linux_2_6_34)
Elie De Brauwer
Add an example program

setns.2
Michael Kerrisk
Add example program

sigaction.2
Michael Kerrisk [Zsbán Ambrus]
Note feature test macro requirements for 'siginfo_t'
See https://bugzilla.kernel.org/show_bug.cgi?id=52931

syscalls.2
Michael Kerrisk
Add kern_features(2)
Michael Kerrisk
Add utrap_install(2)
Sparc-specific, present since ancient times
Michael Kerrisk
Add finit_module(2)

sysctl.2
Michael Kerrisk [Garrett Cooper]
ERRORS: EACCES as a synonym for EPRM

See https://bugzilla.kernel.org/show_bug.cgi?id=46731
and http://thread.gmane.org/gmane.linux.ltp/11413/focus=957635
From: Garrett Cooper <yanegomi <at> gmail.com>
Subject: Re: [LTP] [PATCH] sysctl03: sysctl returns EACCES after 2.6.33-rc1
Newsgroups: gmane.linux.kernel, gmane.linux.ltp
Date: 2010-03-04 18:35:33 GMT

unshare.2
Michael Kerrisk
Update NOTES on unimplemented flags
Michael Kerrisk
Fix text problems in description of CLONE_FS
Michael Kerrisk
SEE ALSO: add kcmp(2)
SEE ALSO: add setns(2)
Michael Kerrisk
Reorder CLONE_NEWUTS entry in list

difftime.3
Michael Kerrisk [Michal Gorny]
Remove crufty text about 'time_t' on "other systems"
Back in 2006, some text came in via Debian patches that seems
crufty. Remove it.

See https://bugzilla.kernel.org/show_bug.cgi?id=46731

getaddrinfo.3
getnameinfo.3
Michael Kerrisk [Peter Budny]
Fix some confused references to function names
See https://bugzilla.kernel.org/show_bug.cgi?id=52741

getspnam.3
Michael Kerrisk [Wolfgang Rohdewald]
ERRORS: Add EACCES
See https://bugzilla.kernel.org/show_bug.cgi?id=52681

__setfpucw.3
Michael Kerrisk
Add proper page cross refs for alternate functions

core.5
proc.5
Kees Cook
Clarify suid_dumpable versus core_pattern
In Linux 3.6, additional requirements were placed on core_pattern
when suid_dumpable is set to 2. Document this and include commit
references.

Justin Lebar
statm's "shared" field refers to pages backed by files
I noticed that statm's "shared" field doesn't match the sum of
all the "shared" entries in smaps [1].

The kernel docs explain that statm's "shared" field is "number of
pages that are shared (i.e. backed by a file)" [2]. smaps appears
to
call a page shared if it's mapped by at least two processes,
which explains this discrepancy.

I'm not a kernel hacker, but it appears to me they do mean "i.e."
and not "e.g." in the statm description: In
fs/proc/task_mmu.c::task_statm, I see

*shared = get_mm_counter(mm, MM_FILEPAGES);

Here's a patch which updates the man page to match the (hopefully
correct) kernel docs.

[1] https://bugzilla.mozilla.org/show_bug.cgi?id=807181
[2]
http://git.kernel.org/?p=linux/kernel/git/torvalds/linux.git;a=blob;f=Documentation/filesystems/proc.txt;h=a1793d67
0cd01bd374eddf54ffdfc768504291ff;hb=HEAD

proc.5
Kees Cook
Put /proc/sys/kernel/hotplug in alphabetical order
Kees Cook
Document /proc/sys/kernel/dmesg_restrict
Kees Cook
Linux 3.4 changed permissions needed to change kptr_restrict
Michael Kerrisk [Samuel Thibault, Simon Paillard]
Add
field numbers for /proc/PID/stat
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Add numbering to /proc/stat "cpu" fields
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Michael Kerrisk
Reorganize text describing /proc/stat "cpu" fields
Michael Kerrisk
Rewording of suid_dumpable text after comments from Kees Cook
Michael Kerrisk [Samuel Thibault, Simon Paillard]
Add field numbers for /proc/[pid]/statm
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=553413
Michael Kerrisk
Document /proc/stat "cpu" "nice_guest" field
Info taken from commit ce0e7b28fb75cb003cfc8d0238613aaf1c55e797

Michael Kerrisk [Peter Lekeynstein]
Document /prod/[pid]/oom_score_adj
Text taken directly from Documentation/filesystems/proc.txt,
with some light editing.

See https://bugzilla.kernel.org/show_bug.cgi?id=50421

shells.5
Michael
Kerrisk
Add /etc/bash to list of example shells

ttytype.5
Michael Kerrisk
Add proper xref for termcap and terminfo pages

capabilities.7
Michael Kerrisk
Add kcmp(2) under CAP_SYS_PTRACE

man-pages.7
Michael Kerrisk
Update description of Section 7

========== Changes in man-pages-3.47 ==========

Released: 2013-02-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Lennart Poettering <lennart@poettering.net>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Radek Pazdera <rpazdera@redhat.com>
Reuben Thomas <rrt@sc3d.org>
Shawn Landden <shawnlandden@gmail.com>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vweaver1@eecs.utk.edu>

Apologies
 if I missed anyone!

New and rewritten pages
----

perf_event_open.2
  Vincent Weaver
    New page documenting perf_event_open(2)

pthread_setname_np.3
  Chandan Apsangi, Michael Kerrisk
    New page for pthread_setname_np(3) and pthread_getname_np(3)

sln.8
  Michael Kerrisk [Peter Schiffer]
    New page documenting the 'sln' command provided by glibc
      Inspired by a Red Hat downstream page, but with rather
      more detail.

Newly documented interfaces in existing pages
----

prctl.2
  Michael Kerrisk [Shawn Landden, Lennart Poettering]
    Document PR_SET_CHILD_SUBREAPER and PR_GET_CHILD_SUBREAPER

ip.7
  Radek Pazdera
    Add source-specific multicast sockopts
      This patch adds documentation of several source-specific multicast
      socket options that were added to kernel with implementation
      of IGMPv3 in 2.5.68.

      The
 following socket options were added:
        IP_ADD_SOURCE_MEMBERSHIP
        IP_DROP_SOURCE_MEMBERSHIP
        IP_BLOCK_SOURCE
        IP_UNBLOCK_SOURCE
        IP_MSFILTER

Pages moved across sections
----

getcontext.3
  Michael Kerrisk
    This page really belongs in Section 3 (moved from Section 2)

getdtablesize.3
  Michael Kerrisk
    Move from Section 2

New and changed links
---

getcontext.2
  Michael Kerrisk
    Make link to page moved into Section 3

getdtablesize.2
  Michael Kerrisk
    Link to renamed getdtablesize.3

setcontext.2
  Michael Kerrisk
    Modify link to point to Section 3

pthread_getname_np.3
  Michael Kerrisk
    New link to new pthread_setname_np.3

setcontext.3
  Michael Kerrisk
    Link to getcontext page renamed into Section 3

Changes to individual pages
---

fallocate.2
  Michael Kerrisk
    SEE ALSO: add
 fallocate(1)

flock.2
  Michael Kerrisk
    SEE ALSO: add flock(1)

fork.2
  Michael Kerrisk

SEE ALSO: add exit(2)

getpriority.2
Michael Kerrisk
BUGS: note that nice value is per-thread on Linux

getrlimit.2
Michael Kerrisk
SEE ALSO: add prlimit(1)

gettid.2
Michael Kerrisk
SEE ALSO: add various system calls that use thread IDs

ioprio_set.2
Michael Kerrisk
SEE ALSO: add ionice(1)

sched_setaffinity.2
Michael Kerrisk
SEE ALSO: add taskset(1)

sched_setparam.2
Michael Kerrisk
Scheduling policy and parameters are per-thread on Linux
Direct the reader to the discussion in sched_setscheduler(2).

sched_setscheduler.2
Michael Kerrisk
Scheduling policy and parameters are per-thread on Linux
Michael Kerrisk
SEE ALSO: add chrt(1)

setsid.2
Michael Kerrisk
SEE ALSO: add setsid(1)

shmop.2
Michael Kerrisk [Peter Schiffer]
ERRORS: Add EIDRM

Taken from Red Hat downstream patch

sigaction.2
makecontext.3
Michael Kerrisk
Change getcontext/setcontext page ref to Section 3

signal.2
  Michael Kerrisk [Reuben Thomas]
    Clarify System V vs BSD semantics for signal()

syscalls.2
  Michael Kerrisk
    The list on this page is not just syscalls common to all platforms
  Michael Kerrisk
    Add perfctr(2)
    Add ppc_rtas(2)
  Michael Kerrisk
    Add kernel version number of utrap_install(2)

unimplemented.2
  Michael Kerrisk [Peter Schiffer]
    Remove mention of kernel version number in DESCRIPTION

inet.3
  Michael Kerrisk [Peter Schiffer]
    Fix error in EXAMPLE using inet_aton()
      See https://bugzilla.redhat.com/show_bug.cgi?id=837090
      Patch taken from Red Hat downstream.

posix_fallocate.3
  Michael Kerrisk
    SEE ALSO: add fallocate(1)

regex.3
  Reuben Thomas
    Clarify details of matching
      The first is that it's far from
 clear that the end points of the
      complete string match are stored in the zero'th element of the
      regmatch_t array; secondly, the phrase "next largest substring
      match" is positively misleading, implying some sort of size
      ordering, whereas in fact they are ordered according to their
      appearance in the regex pattern.

scanf.3
  Michael Kerrisk
    Clarify meaning of "string conversions" for 'm' modifier
  Mike Frysinger
    Update %a vs %m documentation
      POSIX.1-2008 adopted the 'm' flag for dynamic allocation. Update
      page to cover it and relegate the glibc-specific 'a' flag to
      NOTES.

strtol.3

Michael Kerrisk [Peter Schiffer]
Replace some bogus text about "thousands separator"
See https://bugzilla.redhat.com/show_bug.cgi?id=652870

sysconf.3
Michael Kerrisk [Peter Schiffer]
Use "_SC_PAGESIZE" consistently on page
s/_SC_PAGE_SIZE/_SC_PAGESIZE/
in one instance.
From Red Hat downstream patch.

nscd.conf.5
Peter Schiffer
Add max-db-size and auto-propagate descriptions, default values, + misc
* added missing valid services (services and netgroup)
* added many default values for options
* reordered options according to the nscd.conf file
(logical order)
* added 2 missing options: max-db-size and auto-propagate

nsswitch.conf.5
Peter Schiffer
Mention initgroups db

proc.5
Michael Kerrisk
Document /proc/profile
Michael Kerrisk [Peter Schiffer]
Update /proc/sys/fs/file-nr to include Linux 2.6 details
Michael Kerrisk
Clarify relationship between file-max and file-nr
The third value in /proc/sys/fs/file-nr is the same as
the value in /proc/sys/fs/file-max.
Michael Kerrisk
Note message written to kernel log when file-max limit is hit
Info
from Documentation/sysctl/fs.txt.
Michael Kerrisk
Mention lscpu(1) under discussion of /proc/cpuinfo

resolv.conf.5
Michael Kerrisk [Peter Schiffer]
Document "single-request-reopen" option
Taken from Red Hat downstream patch

See https://bugzilla.redhat.com/show_bug.cgi?id=717770
See http://thread.gmane.org/gmane.linux.man/3161

utmp.5
  Michael Kerrisk
    SEE ALSO: add utmpdump(1)

cpuset.7
  Simon Paillard
    Add missing 'cpuset.' prefix for some flags
      See kernel commit e21a05cb408bb9f244f11a0813d4b355dad0822e

svipc.7
  Michael Kerrisk
    SEE ALSO: add ipcmk(1), ipcrm(1), ipcs(1)

termio.7
  Michael Kerrisk
    SEE ALSO: add reset(1), setterm(1), stty(1), tty(4)

ld.so.8
  Michael Kerrisk [Peter Schiffer]
    LD_VERBOSE does not work with ld.so --list and --verify
      From Red Hat downstream patch

      See https://bugzilla.redhat.com/show_bug.cgi?id=532629
  Michael
 Kerrisk
    SEE ALSO: add sln(8)

zdump.8
  Michael Kerrisk [Peter Schiffer]
    Bring up to date with zdump --help
      Patch taken from Red Hat downstream.

========== Changes in man-pages-3.48 ==========

Released: 2013-03-05, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andrey Vagin <avagin@openvz.org>
Aristeu Rozanski <aris@ruivo.org>
Colin Walters <walters@verbum.org>

Cyril Hrubis <chrubis@suse.cz>
Cyrill Gorcunov <gorcunov@openvz.org>
Daniel P. Berrange <berrange@redhat.com>
David Prévot <taffit@debian.org>
D. Barbier <bouzim@gmail.com>
Denys Vlasenko <vda.linux@googlemail.com>
Flavio Leitner <fbl@redhat.com>
Graham Gower <graham.gower@gmail.com>

Kai Kunschke <kai@kunfoo.org>
Marcela Maslanova <mmaslano@redhat.com>
Marc Lehmann <debian-reportbug@plan9.de>
Marshel
 Abraham <Marshel.Abraham@in.bosch.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nathan Stratton Treadway <kernelbugs@nathanst.com>
Pavel Emelyanov <xemul@parallels.com>
Peter Schiffer <pschiffe@redhat.com>
Simon Heimberg <simohe@besonet.ch>
Simon Paillard <spaillard@debian.org>
Török Edwin <edwintorok@gmail.com>
Ulrich Drepper <drepper@redhat.com>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
----

getunwind.2
  Marcela Maslanova
    New page documenting getunwind(2)
      Taken from Red Hat downstream man pages set
  Michael Kerrisk
    Much rewriting
      Some text taken from arch/ia64/kernel/unwind.c.

perfmonctl.2
  Ivana Varekova
    New page documenting IA-64-specific perfmonctl(2)
      Taken from Red Hat downstream man pages
  Michael Kerrisk
    Rework discussion of PFM_CREATE_CONTEXT
    Add VERSIONS and CONFORMING TO
    Note that there
 is no glibc wrapper
    Remove PFM_CREATE_EVTSETS, PFM_DELETE_EVTSETS, PFM_GETINFO_EVTSETS

These don't exist, and it appears they never have.
Fix argument types for PFM_WRITE_PMCS, PFM_WRITE_PMDS, PFM_READ_PMDS
The types that were being used don't exist!
Briefly document PFM_GET_FEATURES, PFM_DEBUG, PFM_GET_PMC_RESET_VAL

gai.conf.5
Ulrich Drepper
New page documenting gai.conf
Taken from Red Hat downstream pages

nss.5
Ulrich Drepper
New page describing nss.conf

Newly documented interfaces in existing pages
---

clock_getres.2
Cyril Hrubis
Document CLOCK_REALTIME_COARSE and CLOCK_MONOTONIC_COARSE
Cyril Hrubis
Document CLOCK_BOOTTIME
Michael Kerrisk
Some improvements to CLOCK_BOOTTIME description

ptrace.2
Denys Vlasenko
Document PTRACE_GETREGSET, PTRACE_SETREGSET, PTRACE_SEIZE, and friends
Document PTRACE_GETREGSET,
PTRACE_SETREGSET,
PTRACE_SEIZE, PTRACE_INTERRUPT, and PTRACE_LISTEN.

New and changed links
---

fattach.2
fdetach.2
getmsg.2
isastream.2
putmsg.2
Michael Kerrisk [Peter Schiffer]
New link to unimplemented.2
Taken from Red Hat downstream.

See https://bugzilla.redhat.com/show_bug.cgi?id=436407

Global changes

Many pages
  Michael Kerrisk
    Global fix: remove unneeded double quotes in .SH headings

Many pages
  Michael Kerrisk
    Global fix: remove unneeded double quotes in .SS headings

Many pages
  Michael Kerrisk
    Global fix: use consistent capitalization in .SS headings
      Capitalization in .SS sections across pages (and sometimes even
      within a single page) is wildly inconsistent. Make it consistent.
      Capitalize first word in heading, but otherwise use lower case,
      except where English usage (e.g., proper nouns) or programming
       language requirements (e.g., identifier names) dictate otherwise.

Many pages
  Michael Kerrisk [Denys Vlasenko]
    Remove double blank lines in output

Various pages
  Michael Kerrisk
    Fix order of SH sections

Changes to individual pages
---

accept.2
  Michael Kerrisk
    NAME: Add "accept4"

access.2
  Colin Walters
    Note that access() may also fail for FUSE
      Since in some cases (e.g. libguestfs's guestmount) it also has the
      semantics where files can appear owned by root, but are actually
      mutable by the user, despite what one might infer from the Unix
      permissions.

getpeername.2
  Michael Kerrisk [Kai Kunschke]
    Clarify semantics of getpeername() for datagram sockets

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=674034

getuid.2
  Michael Kerrisk
    Remove duplicate section heading

mmap.2
  Cyril Hrubis
    Add note
 about partial page in BUGS section
      This adds a note about Linux behavior with partial page at the end
      of the object. The problem here is that a page that contains only
      part of a file (because the file size is not multiple of PAGE_SIZE)
      stays in page cache even after the mapping is unmapped and the file
      is closed. So if some process dirties such page, other mappings
      will see the changes rather than zeroes.
  Michael Kerrisk [Török Edwin]
    Some 'flags' values require a feature test macro to be defined
      Add text to NOTES noting that some MAP_* constants are
      defined only if a suitable feature test macro is defined.
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=542601
  Cyril Hrubis
    Document EOVERFLOW error

open.2
  Michael Kerrisk
    Clarify list of file creation flags
      POSIX.1-2008 TC1 clarified this, so that O_CLOEXEC,
      O_DIRECTORY,
 and O_NOFOLLOW are also in this list.

prctl.2
  Cyrill Gorcunov
    Add some details for PR_GET_TID_ADDRESS

read.2
  Michael Kerrisk [Zack Weinberg]
    Clarify interaction of count==0 and error checking
      POSIX deliberately leaves this case open, so the man
      page should be less specific about what happens.

      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=533232
  Michael Kerrisk [Marc Lehmann]
    Remove crufty text about O_NONBLOCK on files
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=700529
  Michael Kerrisk
    Clarify details for seekable files

unimplemented.2
  Michael Kerrisk [Peter Schiffer]
    Add various STREAMS interfaces to NAME
      Taken from Red Hat downstream.

      See https://bugzilla.redhat.com/show_bug.cgi?id=436407

cexp2.3
  Michael Kerrisk
    Still does not exist in glibc 2.17

exit.3
  Michael Kerrisk
    Note that a call to execve()
 clears exit handler registrations

getaddrinfo.3
  Michael Kerrisk
    SEE ALSO: Add gai.conf(5)

malloc_trim.3
  Michael Kerrisk
    Remove duplicate section title

printf.3
  Marshel Abraham [Graham Gower, Graham Gower]
    Fix error handling in example code
      See https://bugzilla.kernel.org/show_bug.cgi?id=23282

pthread_yield.3
  Michael Kerrisk [Aristeu Rozanski]
    Add _GNU_SOURCE feature test macro to SYNOPSIS

resolver.3
resolv.conf.5
  Michael Kerrisk [Nathan Stratton Treadway, Simon Heimberg]
    RES_DEBUG is only available if glibc is compiled with debug support
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=692136
      and https://bugzilla.kernel.org/show_bug.cgi?id=43061

strtol.3
  Michael Kerrisk [Peter Schiffer]
    Remove crufty text from previous fix

core.5
  Michael Kerrisk
    Document CONFIG_COREDUMP

capabilities.7
  Andrey Vagin
    Nonexistent bits are no longer shown as set
 in /proc/PID/status Cap*

inotify.7
  Michael Kerrisk
    A monitoring process can't easily distinguish events triggered by itself

ip.7
  Flavio Leitner [Peter Schiffer]
    Improve explanation about calling listen() or connect()

man-pages.7
  Michael Kerrisk
    Describe rules for capitalization in .SS headings

rtnetlink.7
  Pavel Emelyanov
    Add info about ability to create links with given index
      Since kernel v3.7 the RTM_NEWLINK message now accepts nonzero
      values in ifi_index field. Mention this fact in the respective
      rtnetlink.7 section.

socket.7
  Pavel Emelyanov
    SO_BINDTODEVICE is now readable
      SO_BINDTODEVICE is readable since kernel 3.8.

========== Changes in man-pages-3.49 ==========

Released: 2013-03-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have
 been
incorporated in changes in this release:

Michael Kerrisk <mtk.manpages@gmail.com>

Global changes

The goal of the changes below to consistently format copyright
and license information in the comments in the page source
at the top of each page. This allows for easy scripting to
extract that information. Following these changes the comments
the top of the page source should now consistently have the form:

```
.\" <copyright info, possibly spread over several lines>
.\"
.\" %%%LICENSE_START(<license-type>)
.\" <license text>
.\" %%%LICENSE_END
.\" <other comments>
```

Note that the 'license-type' is merely descriptive. Its purpose is
to simplify scripting for the purpose of gathering statistics on
types of licenses used in man-pages. It is NOT a statement about
the actual licensing of the page; that license is contain INSIDE the
LICENSE_START...LICENSE_END clause.

All pages
  Michael Kerrisk
    Add a LICENSE_START()...LICENSE_END clause
 in source at
    top of each page that encapsulates the license text.
  Michael Kerrisk
    Put copyright info at top of page, followed by blank line and LICENSE

Various pages
  Michael Kerrisk
     Update info in source comments on where to get a copy of the GPL

Various pages
  Michael Kerrisk
    Remove "Hey Emacs" comment in page source
      Only certain pages have this; there is no consistency, so
      remove it from all pages
  Michael Kerrisk
    Remove "-*- nroff -*-" comment at top of source

========== Changes in man-pages-3.50 ==========

Add version information for all (other) syscalls
Michael Kerrisk
Add perfmonctl(2)

futimes.3
Michael Kerrisk [Jonathan Nieder]
ERRORS: Add ENOSYS for lutimes()
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=620746

getpass.3
Michael Kerrisk [Erik Saule]
Suggest use of the ECHO flag as an alternative
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=644261

realpath.3
Michael Kerrisk
Document GNU extensions for EACCES and ENOENT errors

stdarg.3
Michael Kerrisk [Friedrich Delgado Friedrichs]
Describe va_copy()
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=575077

termios.3
Michael Kerrisk [Bernhard Kuemel]
Mention that noncanonical mode
does not do input processing
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=643854

random.4
Elie De Brauwer
Document write and document the ioctl interface of /dev/random
The update consists out of two parts:
- a minor thing which just documents what happens if a write to
/dev/(u)random is performed, which is used in the example
script but not explicitly mentioned.
- the other (biggest) part is the documentation of the ioctl()
interface which /dev/(u)random exposes. This ioctl() lives in
drivers/char/random.c and the primitives can be found in
include/linux/random.h

One comment remains, there used to be an RNDGETPOOL ioctl() which
disappeared in v2.6.9. I found two patches on the net:
- http://www.kernel.org/pub/linux/kernel/people/akpm/patches/2.6/2.6.8.1/2.6.8.1-mm4/broken-out/dev-random-remove-rndgetpool-ioctl.patch
- https://lkml.org/lkml/2004/3/25/168

But as far as I can tell the first one got applied but the 2nd

one seems more correct. The result is that even today one can
still find traces of the RNDGETPOOL ioctl() in the header files.
Is this there for historical reasons or because it might break
userspace, even though using it will just give an EINVAL.

bootparam.7
Jose Luis Domingo Lopez
Document 'rootfstype' option
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=182014

capabilities.7
Michael Kerrisk
Add various pieces under CAP_SYS_RAWIO
Info obtained by grepping the kernel source.
Michael Kerrisk
Add CAP_SYS_RESOURCE /proc/PID/oom_score_adj case

netlink.7
Andrey Vagin
Add a note about broadcast messages to multiple groups

socket.7
Michael Kerrisk [Florian Weimer]
Define _GNU_SOURCE to obtain the definition of 'struct
ucred'
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=572210

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

sched_rr_get_interval.2
  Michael Kerrisk
    Document /proc/sys/kernel/sched_rr_timeslice_ms

proc.5
  Pavel Emelyanov
    Document /proc/[pid]/map_files directory
      This directory was added in Linux v3.3 and provides info about
      files being mmap-ed in a way very similar to how /proc/[pid]/fd
      works.

      v2: Added examples of how links look like and noted dependency
      on kernel config option CONFIG_CHECKPOINT_RESTORE.
  Michael Kerrisk
    Document /proc/sys/kernel/shm_rmid_forced

capabilities.7
  Michael Kerrisk
    Document /proc/sys/kernel/cap_last_cap

Global changes

Various pages
  Michael Kerrisk
    Global

fix: fix placement of word "only"

Various pages
  Simon Paillard
    License headers: consistent format

Various pages
  Michael Kerrisk
    Global fix: s/since kernel/since Linux/

Various System V IPC pages in Section 2
  Michael Kerrisk
    Add "System V" to .TH line and text
      Make it clear that these pages relate to System V IPC,
      not POSIX IPC.

Changes to individual pages
---

access.2
  Michael Kerrisk [The Wanderer]
    Clarify RETURN VALUE for F_OK
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=705293

alarm.2
  Michael Kerrisk
    Correct the description of behavior when 'seconds' is 0

clone.2
  Michael Kerrisk [Peter Schiffer]
    Add prototype for syscall to SYNOPSIS
      And further clarify the distinction between the system call
      and the wrapper function in the introductory text.
  Michael Kerrisk
    Update feature test macro requirements
       The requirements quietly changed in glibc 2.14

      See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749
  Michael Kerrisk [Mike Frysinger]
    Clarify differences between clone2() syscall and wrapper function
  Michael Kerrisk [Mike Frysinger]
    Note those architectures where the sys_clone argument order differs
  Michael Kerrisk [Mike Frysinger]
    Add short subsection noting that blackfin, m68k, and sparc are different
  Michael Kerrisk
    Move clone2() text to subsection in description
      The description of ia64 clone2() should follow the discussion

of the raw system call interface.
  Michael Kerrisk
    Change subhead for ia64 discussion

getcpu.2
  Michael Kerrisk
    Recommend that 'tcache' should be specified as NULL nowadays

io_cancel.2
  Jeff Moyer, Michael Kerrisk [Cyril Hrubis]
    Improve description

io_destroy.2
  Jeff Moyer
    Improve description
      The
 description was rather vague, citing a "list of I/O contexts"
      and stating that it "can" cancel outstanding requests. This
      update makes things more concrete so that the reader knows exactly
      what's going on.

io_getevents.2
  Jeff Moyer
    The 'timeout' argument is not updated
      I looked back through the kernel code, and the timeout was
      never updated in any case. I've submitted a patch upstream
      to change the comment above io_getevents.

io_setup.2
  Jeff Moyer
    Clarify nr_events
      nr_events is technically the number of completion events that can
      be stored in the completion ring. The wording of the man page:
      "capable of receiving at least nr_events" seems dubious to me,
      only because I worry that folks might interpret that to mean
      'nr_events' total, instead of 'nr_events' concurrently.

      Further, I've added information on where to find
 the per-user
      limit on 'nr_events', /proc/sys/fs/aio-max-nr. Let me know if
      you think that is not relevant.

listxattr.2
  Michael Kerrisk
    Explain use of 'size' argument

lseek.2
  Michael Kerrisk [Andreas Jaeger]

_GNU_SOURCE must be defined to get SEEK_DATA and SEEK_HOLE definitions
See http://sourceware.org/bugzilla/show_bug.cgi?id=15312

mmap.2
Michael Kerrisk
Add pointers to relevant /proc files described in proc(5)

posix_fadvise.2
pread.2
readahead.2
sync_file_range.2
truncate.2
Michael Kerrisk
Refer to syscall(2) for ABI semantics on certain 32-bit architectures
Also: in sync_file_range.2 and posix_fadvise.2 remove description
of conventional calling signature as flawed, and in
posix_fadvise.2, de-emphasize focus on ARM, and rather phrase
as a more general discussion of certain architectures.

readdir.2
Michael Kerrisk
readdir(2) doesn't
exist on x86-64

semop.2
Michael Kerrisk
Clarify the discussion of 'semadj'

shmctl.2
Michael Kerrisk
Refer to proc(5) for description of /proc/sys/kernel/shm_rmid_forced

syscall.2
Changhee Han
Add notes that caution users when passing arguments to syscall()
For example, passing 'long long' on ARM-32 requires special
treatment.
Mike Frysinger [Michael Kerrisk]
Document the exact calling convention for architecture system calls
Mike Frysinger [Kyle McMartin]
Add PA-RISC details under calling conventions
Michael Kerrisk [Mike Frysinger]
Refine discussion of ARM and other ABIs

syscalls.2
Michael Kerrisk
Update kernel version number at start of list

umask.2
  Michael Kerrisk
    SEE ALSO: add acl(5)

unshare.2
  Michael Kerrisk
    Update feature test macro requirements
      The requirements quietly changed in glibc 2.14

      See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

fopencookie.3
  Michael Kerrisk [Ralph Loader]
    Correct definition of cookie_io_functions_t

pthread_setname_np.3
  Andrew Clayton
    The thread argument is passed in by value

readir.3
seekdir.3
telldir.3
  Michael Kerrisk
    Eliminate the implication that these functions deal with "offsets"
      The directory position dealt with by the readdir() and
      friends is not a simple file offset in modern file systems.
      Typically, it is some kind of cookie value. Add text and
      make other changes to these pages to eliminate the
      implication that this is an offset, and warn the reader
      that directory positions should be treated strictly as
      opaque values.

      In the process, rename the 'offset' argument of seekdir(3)
      to 'loc', and add some text to readdir(3) to note that
      the 'd_off' field is the same value returned by telldir(3)
       at the current directory position.

      See also https://lwn.net/Articles/544298/

scalb.3
  Mark H Weaver
    Fix prototypes for scalbf() and scalbl()

sched_getcpu.3
  Michael Kerrisk
    Update feature test macro requirements
      The requirements quietly changed in glibc 2.14

See also http://www.sourceware.org/bugzilla/show_bug.cgi?id=4749

ualarm.3
  Michael Kerrisk [Nicolas Hillegeer]
    Add note on the behavior when 'usecs' is zero
      POSIX.1-2001 does not specify the behavior in this case
      and no other system that I checked documented the behavior.
      Probably, most or all systems do what Linux does in this
      case: cancel any pending alarm, just as alarm(0) does.
      Add that info in NOTES.

elf.5
  Mike Frysinger
    Add byte positions for all EI_xxx fields
      When describing e_ident, most of the EI_xxx defines mention the
      exact byte number.
 This is useful when manually hacking an ELF
      with a hex editor. However, the last few fields don't do this,
      which means you have to count things up yourself.
      Add a single word to each so you don't have to do that.

proc.5
  Michael Kerrisk
    Refer to sched_rr_get_interval(2) for info on sched_rr_timeslice_ms
      Since Linux 3.9, /proc/sys/kernel/sched_rr_timeslice_ms can
      be used to change the SCHED_RR quantum.
  Michael Kerrisk
    SEE ALSO: Add sysctl(8)
  Krzysztof Konopko
    Simplify the example of printing out environ
      The binutils package contains a very handy utility to
      print out null-byte delimited strings from a file. This
      can replace a rather complex expression with cat(1)
      provided as an example for printing out /proc/[pid]/environ.
  Michael Kerrisk
    Update /proc/PID/maps example
      Update to 64-bit example that includes "[heap]", "[stack],
       and "[vdso]"
  Michael Kerrisk
    Formatting fixes for /proc/PID/maps
  Mike Frysinger
    Document the "pathname" field of /proc/PID/maps
  Michael Kerrisk
    Add reference to capabilities(7) for /proc/sys/kernel/cap_last_cap
  Michael Kerrisk
    /proc/PID/maps: add a reference to mmap(2)

ip.7

Radek Pazdera
Document IP_MULTICAST_ALL
This commit adds documentation for the IP_MULTICAST_ALL socket option.

The option was added to the Linux kernel in 2.6.31:

Author Nivedita Singhvi <niv@us.ibm.com>
Commit f771bef98004d9d141b085d987a77d06669d4f4f

The description is based on a previous one [3] posted by the original author of the code -- Nivedita, but it is slightly re-worded.

I tested it myself and it works as described.

References:
[1] http://lxr.free-electrons.com/source/net/ipv4/ip_sockglue.c#L972
[2] http://lxr.free-electrons.com/source/net/ipv4/igmp.c#L2267
[3] http://patchwork.ozlabs.org/patch/28902/

units.7
Brian M. Carlson
units should use an actual µ
The units(7) man page uses an ASCII u in place of the actual Greek letter mu. Since we're in the twenty-first century, with UTF-8-compatible terminals and terminal emulators, we should use the actual letter µ instead of an ASCII approximation.

See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=704787

========== Changes in man-pages-3.52 ==========

Released: 2013-07-04, Christchurch

Simon Paillard <spaillard@debian.org>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

perf_event_open.2
Vince Weaver
Add
PERF_IOC_FLAG_GROUP documentation
The perf_event_open() ENABLE/DISABLE/RESET ioctls can take an
argument, PERF_IOC_FLAG_GROUP. This wasn't documented at all
until about a year ago (despite the support being there from
the beginning) so I missed this when initially writing
the man page.

socket.7
Pavel Emelyanov, Michael Kerrisk
Document SO_PEEK_OFF option
Since Linux 3.4 there appeared an ability to specify the
offset in bytes from which the data will be MSG_PEEK-ed.
Describe this socket option in the socket(7) page, where
all the other socket options are described.

Global changes

Various pages
  Michael Kerrisk
    Convert inline formatting (\fX...\fP) to dot-directive formatting

readdir.2
asprintf.
getline.3
getlogin.3
pthread_setname_np.3
readdir.3
strerror.3
  Michael Kerrisk [Jon Grant]
    Clarify that terminating null byte is
 '\0'

Changes to individual pages
---

execve.2
  Peter LaDow
    Add envp to the Linux notes about NULL pointers
      During the review of static analysis results, we discovered a
      functional, but non-portable, use of execve(). For example:

        char *cmd[] = { "/path/to/some/file", NULL };
        execve(cmd[0], cmd, NULL);

      The call succeeds. Yet, the static analysis tool (rightly)
      pointed out that envp could be dereferenced. But digging into
      glibc and the kernel, it appears that like argv, envp when NULL
      is treated as if it were an empty list.

      So, to clear things up, I'm submitting this patch to update the
      man page to indicate that envp is treated like argv.

fallocate.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

io_setup.2
  Cyril Hrubis [Jeff Moyer]
    Clarify the nr_events parameter

Currently the io_setup.2 man page describes what the kernel really
does, i.e., that the resulting context may be able to hold more
than the 'nr_event's operations because the memory allocated in
kernel is rounded to be multiple of page size.

It is better not to expose this implementation detail and
simply state that the resulting context is suitable for
'nr_events' operations.

perf_event_open.2
Vince Weaver
Clarify the perf_event_open() wakeup_events/wakeup_watermark fields
Clarify the perf_event_open() wakeup_events/wakeup_watermark
fields a bit, based on info from kernel commit cfeb1d90a1b1.
Vince Weaver
Update to match the Linux 3.10 release
This patch updates the perf_event_open() documentation to include
new interfaces added in the 3.10 kernel.

It also documents a few [To be documented] instances left over
from
the 3.7 kernel.
Vince Weaver
Small correction to description of 'flags' argument

prctl.2
Michael Kerrisk
Note equivalents of PR_SET_NAME
pthread_setname_np() and pthread_getname_np() and
/proc/self/task/TID/comm provide access to the same
attribute.

pread.2
Michael Kerrisk [ ]
pread() and pwrite() are especially useful in multithreaded applications

recv.2
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

semctl.2
Michael Kerrisk [Simone Piccardi]
'sem_nsems' is 'unsigned long' since Linux 2.4

shmget.2
Michael Kerrisk
Rewrite RETURN VALUE and mention that 'errno' is set on error

sigaction.2
  Michael Kerrisk [Brian Norris]
    RETURN VALUE: mention that 'errno' is set on error

signal.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

sigpending.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno'
 is set on error

sigprocmask.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

sigsuspend.2
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

syscall.2
  Mike Frysinger
    Document s390/s390x calling convention

a64l.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function l64a() is not thread safe.

abs.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions abs(), labs(), llabs() and imaxabs() are
      thread-safe.

aio_error.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_error() is thread safe.

aio_return.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_return() is thread safe.

alloca.3
  Adrian Bunk

Correct information on getting non-inlined version with gcc+glibc
- remove the incorrect information
that -fno-builtin would help
- add -std=c11 to the list of strict options
- emphasize more that both the gcc option and not including
alloca.h are needed
- add the #ifdef from the glibc alloca.h to make the situation
clearer

bindresvport.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
Before glibc 2.17, bindresvport() is not thread-safe.
Since glibc 2.17, it is thread-safe, the patch can refer to URL:
http://sourceware.org/git/?p=glibc.git;a=commit;h=f6da27e53695ad1cc0e2a9490358decbbfdff5e5

canonicalize_file_name.3
Michael Kerrisk
Put CONFORMING TO section in right location

catgets.3
Michael Kerrisk [Jon Grant]
Clarify that null byte is '\0'

ceil.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ceil(), ceilf() and ceill() are thread safe.

cimag.3
Peng Haitao
ATTRIBUTES:
Note functions that are thread-safe
The functions cimag(), cimagf() and cimagl() are thread safe.

clock_getcpuclockid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function clock_getcpuclockid() is thread safe.

conj.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions conj(), conjf() and conjl() are thread safe.

crypt.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe

The function crypt() is not thread safe.

ctermid.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function ctermid() is thread safe with exceptions.

dirfd.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

drand48.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions drand48(), erand48(), lrand48(), nrand48(),
mrand48(), jrand48(),
srand48(), seed48() and lcong48() are
not thread safe.

ecvt.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions ecvt() and fcvt() return a string located in a
static buffer which is overwritten by the next call to the
functions, so they are not thread-safe.

encrypt.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions encrypt() and setkey() are not thread safe.

ether_aton.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions ether_aton() and ether_ntoa() are not thread safe.

fcloseall.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function fcloseall() is not thread safe.

ferror.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ferror(), clearerr(), feof() and fileno() are
thread safe.

fgetgrent.3

Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

fgetpwent.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

fgetwc.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

fmtmsg.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
Before glibc 2.16, fmtmsg() is not thread-safe.
Since glibc 2.16, it is thread-safe, the patch can refer to URL:
http://sourceware.org/git/?p=glibc.git;a=commit;h=7724defcf8873116fe4efab256596861eef21a94

fputwc.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getdate.3
Peng Haitao
ATTRIBUTES: Note functions that are and aren't thread-safe

getgrent.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function getgrent() is not thread safe.

getgrnam.3
Peng Haitao
ATTRIBUTES: Note functions that are and aren't
thread-safe

getline.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getlogin.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function getlogin() is not thread safe.
The function cuserid() is thread-safe with exceptions.
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

getpass.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe

getpwent.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function getpwent() is not thread safe.

getpwnam.3
  Peng Haitao
    ATTRIBUTES: Note functions that are and aren't thread-safe

getspnam.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

getttyent.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe

getusershell.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The
 functions getusershell(), setusershell() and endusershell()
      are not thread safe.

getutent.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

hsearch.3
  Michael Kerrisk
    RETURN VALUE: mention that 'errno' is set on error

hsearch.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions hsearch(), hcreate() and hdestroy() are not
      thread-safe.

localeconv.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The function localeconv() returns a pointer to a structure which
      might be overwritten by subsequent calls to localeconv() or by
      calls to setlocale(), so it is not thread-safe.

Peng Haitao
Add RETURN VALUE section

malloc_info.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

mblen.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The
function mblen() is not thread safe.

mbrlen.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function mbrlen() is thread safe with exceptions.

mbrtowc.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function mbrtowc() is thread safe with exceptions.

mktemp.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

modf.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions modf(), modff() and modfl() are thread safe.

popen.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

pthread_attr_setinheritsched.3
Michael Kerrisk
Note the scheduling attributes affected by this function

pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_attr_setscope.3
Michael Kerrisk [Manuel Traut, Siddhesh Poyarekar]
The inherit-scheduler attribute must be set
to PTHREAD_EXPLICIT_SCHED
In order for the attributes set by these functions to have
an effect, the caller must use pthread_attr_setinheritsched(3)

to set the inherit-scheduler attribute of the attributes object
to PTHREAD_EXPLICIT_SCHED.

ptsname.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function ptsname() is not thread safe.

putenv.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

putpwent.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

qecvt.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions qecvt() and qfcvt() are not thread-safe.

random.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error
Michael Kerrisk
Add EINVAL error for setstate()
Michael Kerrisk
BUGS: initstate() does not return NULL on error
http://sourceware.org/bugzilla/show_bug.cgi?id=15380

random_r.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

readdir.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The data returned by readdir() may be overwritten by subsequent
calls to readdir() for the same directory stream, so it is not
thread-safe.

re_comp.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions re_comp() and re_exec() are not thread safe.

rexec.3
Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe
The functions rexec() and rexec_af() are not thread safe.

round.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions round(), roundf() and roundl() are thread safe.

scalbln.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions scalbn(), scalbnf(),
scalbnl(), scalbln(),
scalblnf() and scalblnl() are thread safe.

scandir.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

siginterrupt.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

signbit.3
Peng Haitao
ATTRIBUTES: Note macro that is thread-safe
The macro signbit() is thread safe.

sigsetops.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

stdio_ext.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions __fbufsize(), __fpending(), __fpurge() and
__fsetlocking() are not thread safe.

strdup.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

strerror.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function strerror() is not thread safe.

strftime.3

Michael Kerrisk
Clarify details of return value
Michael
Kerrisk
BUGS: 'errno' is not set if the result string would exceed 'max' bytes

strtok.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function strtok() is not thread safe.
Michael Kerrisk [Georg Sauthoff]
Add more detail on the operation of strtok()
Add a number of missing details on the operation of strtok()

tempnam.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

timegm.3
Jérémie Galarneau
copy the string returned by getenv()
The example of a portable version of timegm() uses the string returned by getenv() after calling setenv() on the same environment variable. The tz string may be invalid as per getenv.3:

"The string pointed to by the return value of getenv() may be statically allocated, and can be modified by a subsequent call to getenv(), putenv(3), setenv(3), or unsetenv(3)."

tmpnam.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function tmpnam() is thread safe with exceptions.

trunc.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions trunc(), truncf() and truncl() are thread safe.

ttyname.3
Michael Kerrisk
ATTRIBUTES: Note functions that are and aren't thread-safe

ttyslot.3
Michael Kerrisk

ATTRIBUTES: Note functions that are not thread-safe

usleep.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

wcsdup.3
Michael Kerrisk
RETURN VALUE: mention that 'errno' is set on error

core.5
Michael Kerrisk
Implicitly adding the PID to a core filename was dropped in 2.6.27

proc.5
Michael Kerrisk
Document /proc/[pid]/fd/ anon_inode symlinks
Mike Frysinger
Document /proc/[pid]/fd/ symlinks a bit more

Describe the type:[inode] syntax used in this dir

bootparam.7
Michael Kerrisk [Dan Jacobson]
Remove outdated text on LILO and LoadLin
Strike the discussion of LILO and LoadLin, which
are long obsolete, and make a brief mention of GRUB.
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=604019
Regid
Remove mention of the deprecated rdev(8)
The deprecated rdev(8) command was removed from util-linux in 2010.
See https://git.kernel.org/?p=utils/util-linux/util-
linux.git;a=commit;h=a3e40c14651fccf18e7954f081e601389baefe3fO
Andrea Remondini
Document the 'resume' boot parameter

inotify.7
Michael Kerrisk [Jon Grant]
Clarify that null byte is '\0'

iso_8859-2.7
Eric S. Raymond
Remove incorrect reference to nonexistent groff glyph \[shc]
The reference incorrectly attempted to duplicate an
actual soft hyphen (hex 0xad) just before it in the
file.

man-pages.7

Peng Haitao
Add description of "ATTRIBUTES"
"ATTRIBUTES" section can mention thread safety,
cancellation safety, and async-cancel-safety.

socket.7
Michael Kerrisk
Note that 'optval' for socket options is an 'int' in most cases

tcp.7
Michael Kerrisk
Note that 'optval' for socket options is an 'int' in most cases

udp.7
Michael Kerrisk
Note that 'optval' for socket options is an 'int' in most cases

========== Changes in man-pages-3.53 ==========

Released: 2013-07-31, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Peng Haitao <penght@cn.fujitsu.com>
Peter Schiffer <pschiffe@redhat.com>
Simon Paillard <spaillard@debian.org>
Vince Weaver <vincent.weaver@maine.edu>

Apologies if I missed anyone!

New and rewritten pages
---

restart_syscall.2
  Michael Kerrisk
    New page for restart_syscall(2) system call

Newly documented interfaces in existing pages
---

fchownat.2
  Michael Kerrisk
    Document AT_EMPTY_PATH

fstatat.2
  Michael Kerrisk
    Document AT_EMPTY_PATH

linkat.2
  Michael Kerrisk
    Document AT_EMPTY_PATH

open.2
  Michael Kerrisk [Al Viro]
    Document O_PATH
      See also https://bugzilla.redhat.com/show_bug.cgi?id=885740

Changes to individual pages
---

clock_nanosleep.2
futex.2
nanosleep.2
poll.2
sigaction.2
sigreturn.2
signal.7
   Michael Kerrisk
    SEE ALSO: add restart_syscall(2)

open.2
  Michael Kerrisk [Geoffrey Thomas]
    Remove warning that O_DIRECTORY is only for use with opendir(3)

O_DIRECTORY can also be used with, for example, O_PATH.

perf_event_open.2
Vince Weaver
Improve PERF_SAMPLE_BRANCH_STACK documentation
Vince Weaver
Fix indentation of the MMAP layout section
The indentation of the MMAP layout section wasn't quite right.
I think this improves things but I admit I'm not an expert at the
low-level indentation directives.
Vince Weaver
Update PERF_IOC_FLAG_GROUP info
It turns out PERF_IOC_FLAG_GROUP was broken from 75f937f24bd9
(in Linux 2.6.31, the initial perf_event release) until
724b6daa1 (Linux 3.4).

I've done some extensive kernel source code digging plus

running tests of various kernels and I hope the info
presented is accurate now.

(Patch edited somewhat by mtk.)
Vince Weaver
Improve sysfs files documentation
This improves the documentation of the various
perf_event_open()-related sysfs files.

ptrace.2
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
If SEIZE was used, initial auto-attach stop is EVENT_STOP
For every PTRACE_O_TRACEfoo option, mention that old-style SIGSTOP
is replaced by PTRACE_EVENT_STOP if PTRACE_SEIZE attach was used.

Mention the same thing again in the description of
PTRACE_EVENT_STOP.
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
Mention that PTRACE_PEEK* libc API and kernel API are different
Denys Vlasenko [Oleg Nesterov, Dmitry V. Levin]
Clarify PTRACE_INTERRUPT, PTRACE_LISTEN, and group-stop behavior

readlink.2
Michael Kerrisk
Document use of empty
'pathname' argument
Michael Kerrisk
Change error check in example program from "< 0" to "== -1"
Chuck Coffing
Fix possible race condition in readlink.2 example

I noticed that the example in the readlink.2 man pages does error checking for a race condition that would cause the value of the symbolic link to get larger. However, it doesn't handle the opposite case, in which the value gets shorter. (The NULL terminator is always set at the old, longer offset.) This could cause the program to operate on uninitialized data.

setpgid.2
Michael Kerrisk [Graud]
s/SIGTSTP/SIGTTIN/ when discussing reads from terminal
See https://bugzilla.kernel.org/show_bug.cgi?id=60504

clog2.3
Michael Kerrisk
Note that these functions are still not present in glibc 2.17

dirfd.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function
dirfd() is thread safe.

div.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions div(), ldiv(), lldiv() and imaxdiv() are thread safe.

fabs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fabs(), fabsf() and fabsl() are thread safe.

fdim.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fdim(), fdimf() and fdiml() are thread safe.

fflush.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function fflush() is thread safe.

finite.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions finite(), finitef(), finitel(), isinf(), isinff(), isinfl(), isnan(), isnanf() and isnanl() are thread safe.

flockfile.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions flockfile(), ftrylockfile() and funlockfile()
 are
      thread safe.

floor.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions floor(), floorf() and floorl() are thread safe.

resolv.conf.5
  Simon Paillard
    Explain how to set empty domain
      See http://bugs.debian.org/463575

capabilities.7
  Michael Kerrisk
    Add open_by_handle_at(2) under CAP_DAC_READ_SEARCH

inotify.7
  Michael Kerrisk [Felix Schulte]
    Clarify description of IN_MOVED_FROM and IN_MOVED_TO

man-pages.7
  Michael Kerrisk
    DESCRIPTION should note versions for new interface features or behavior

udp.7
  Benjamin Poirier
    Add missing #include directive
      Using the UDP_CORK socket option documented in udp.7 requires
      including <netinet/udp.h>.

ld.so.8
  Michael Kerrisk
    Rework rpath token expansion text
  Michael Kerrisk
    Describe $PLATFORM rpath token
  Michael Kerrisk
    Describe $LIB rpath token

  Michael Kerrisk
    Document LD_BIND_NOT
  Michael Kerrisk [Simon Paillard]
    Add reference to pthreads(7) in discussion of LD_ASSUME_KERNEL

Newly documented interfaces in existing pages
---

ioctl_list.2
  Zsbán Ambrus
    Document FAT_IOCTL_GET_ATTRIBUTES
      The attached patch adds four ioctls from linux/msdos_fs.h to the
      ioctl_list(2) manpage.

      The ioctl FAT_IOCTL_GET_ATTRIBUTES
 reads FAT attributes of a
      file a mounted vfat file system. I tested this on Linux
      2.6.33, an example script can be found at
      http://www.perlmonks.com/?node_id=832623

Global changes

Various pages
  Michael Kerrisk
    Global fix: s/file system/filesystem/
      Notwithstanding 24d01c530c5a3f75217543d02bf6712395e5f90c,
      "filesystem" is the form used by the great majority of man pages
      outside the man-pages project and in a number of other sources,
      so let's go with that.

Changes to individual pages
---

access.2
  J. Bruce Fields
    Fix outdated NFS information
      Note that NFS versions since version 3 support an "access" call
      so that the client doesn't have to guess permissions or ID
      mapping on its own.

      (See RFC 1813 sections 1.7 and 3.3.4.)

adjtimex.2
  Michael Kerrisk
    SEE ALSO: Add adjtimex(8)

clock_getres.2
  Michael Kerrisk [Rodrigo Campos]
    Note circumstances in which "SMP" note applies.
  Michael Kerrisk
    Add kernel version for CLOCK_*_CPUTIME_ID
      CLOCK_PROCESS_CPUTIME_ID and CLOCK_THREAD_CPUTIME_ID
      appeared in 2.6.12.
  Michael Kerrisk
    Add VERSIONS section

futex.2
  Michael Kerrisk
    The 'timeout' can be rounded upwards by clock granularity and also overrun

kill.2
  Michael Kerrisk
    Small improvements to text on historical rules for permissions

nfsservctl.2
  Michael Kerrisk
    Note commands that were only in Linux 2.4.x and earlier

open.2
  Robert Harris
    Add mmap(2) to list of calls that fail when given an O_PATH descriptor
  Doug Goldstein
    Add EINVAL to errors list
      EINVAL can be returned by open(2) when the underlying filesystem
      doesn't support O_DIRECT. It is documented in the NOTES section
      but this patch adds it to the list
of possible errors.

perf_event_open.2
  Vince Weaver
    PERF_SAMPLE_BRANCH_STACK updates
      This started out as just adding the new perf_event_open features
      from Linux 3.11 (which was the addition of transactional memory
      defines for PERF_SAMPLE_BRANCH_STACK samples) but turned into a
      general cleanup of the PERF_SAMPLE_BRANCH_STACK documentation.

      The main clarification is that at least one of the non-privilege
      values must be set or else perf_event_open() will return an EINVAL
      error.
  Michael Kerrisk
    Reorder text describing fields of 'perf_event_header' structure
      Place the fields with the shorter descriptions first, to make the
      information easier to read.

poll.2
  Michael Kerrisk
    Clarify wording of 'timeout' as a "minimum" interval

sched_setaffinity.2
  Michael Kerrisk [Christos Tsopokis]
    Clarify that these system calls affect a per-thread
 attribute

sched_setparam.2
  Michael Kerrisk
    Clarify that this system call applies to threads (not processes)

sched_setscheduler.2
  Michael Kerrisk
    Clarify that this system call applies to threads (not processes)

select.2
  Michael Kerrisk [G.raud]
    Clarify wording of 'timeout' as a "minimum" interval

setfsgid.2
  Michael Kerrisk [Oleg Nesterov]
    Clarify description of return value
      More clearly describe the weirdness in the return value of this
      system call, and note the problems it creates in BUGS
  Michael Kerrisk
    Correct header file in SYNOPSIS
  Michael Kerrisk
    Refer to setfsuid(2) for an explanation of why setfsgid() is obsolete
  Michael Kerrisk
    Wording improvements

setfsuid.2
  Michael Kerrisk [Oleg Nesterov]
    Clarify description of return value
      More clearly describe the weirdness in the return value of this
      system call, and note the problems it creates
 in BUGS
  Michael Kerrisk [Chen Gang]
    Clarify historical details and note that setfsuid() is obsolete
  Michael Kerrisk
    Wording improvements
  Michael Kerrisk
    Correct header file in SYNOPSIS

sigwaitinfo.2

Michael Kerrisk
Clarify wording of 'timeout' as a "minimum" interval

syscall.2
Johan Erlandsson
Add missing argument in example
Johan Erlandsson
Correct registers for arm/EABI
Registers was off by one.

Reference:
http://www.arm.linux.org.uk/developer/patches/viewpatch.php?id=3105/4

See also:
http://peterdn.com/post/e28098Hello-World!e28099-in-ARM-assembly.aspx
https://wiki.debian.org/ArmEabiPort
http://en.wikipedia.org/wiki/Calling_convention#ARM

wait.2
Michael Kerrisk [Hannes Landeholm]
Add details on the fifth argument provided by raw waitid() system call
See https://bugzilla.kernel.org/show_bug.cgi?id=60744

clock.3
Michael Kerrisk
clock() switched from using times(2) to clock_gettime() in glibc 2.18

drand48_r.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions drand48_r(), erand48_r(), lrand48_r(),
nrand48_r(), mrand48_r(), jrand48_r(), srand48_r(), seed48_r(),
and lcong48_r() are thread safe.

fma.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fma(), fmaf() and fmal() are thread safe.

fmax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fmax(), fmaxf() and fmaxl() are thread safe.

fmin.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fmin(), fminf() and fminl() are thread safe.

fpclassify.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions fpclassify(), isfinite(), isnormal(), isnan(), and
       isinf() are thread safe.

frexp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions frexp(), frexpf() and frexpl() are thread safe.

gethostbyname.3
  Michael Kerrisk [Jon Grant]
    gai_strerror() is the modern replacement for herror() and hstrerror()
  Michael Kerrisk
    Update feature test macro requirements for herror() and hstrerror()
  Michael Kerrisk
    Add feature test macro requirements for h_errno

ilogb.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions ilogb(), ilogbf() and ilogbl() are thread safe.

ldexp.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions ldexp(), ldexpf() and ldexpl() are thread safe.

lrint.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions lrint(), lrintf(), lrintl(), llrint(), llrintf(),
      and llrintl() are thread safe.

lround.3
   Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions lround(), lroundf(), lroundl(), llround(),
      llroundf() and llroundl() are thread safe.

lseek64.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function lseek64() is thread safe.

mbsinit.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function mbsinit() is thread safe.

nextafter.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions nextafter(), nextafterf(), nextafterl(),
nexttoward(), nexttowardf() and nexttowardl() are thread safe.

posix_memalign.3
Michael Kerrisk [Will Newton]
'errno" is indeterminate after a call to posix_memalign()
Michael Kerrisk [Will Newton]
Clarify wording on "return value" when size==0

printf.3
Christopher Hall
Correctly describe the meaning of a negative precision
The printf(3) manpage says that a negative precision is taken to
be zero, whereas printf(3p) says that a negative precision is
taken as if the precision were omitted. glibc agrees with the
latter (POSIX) specification.

Test code:

```
printf("%f\n",42.0);      // "42.000000"
printf("%.*f\n",0,42.0);  // "42"
printf("%.*f\n",-1,42.0); // "42.000000"
```

This patch corrects the explanation to match what actually happens.

rewinddir.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function rewinddir() is thread safe.

rint.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions nearbyint(), nearbyintf(), nearbyintl(), rint(),
rintf() and rintl() are thread safe.

seekdir.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function seekdir() is

thread safe.

telldir.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function telldir() is thread safe.

wctomb.3
  Peng Haitao
    ATTRIBUTES: Note function that is not thread-safe
      The function wctomb() is not thread safe.

wavelan.4
  Michael Kerrisk [Elie De Brauwer]
    This driver disappeared in 2.56.35

dir_colors.5
  Michael Kerrisk [Stas]
    Add various synonyms
      See http://bugs.debian.org/553477
  Simon Paillard [Stas]
    Add keywords SUID, SGID, STICKY, STICKY_OTHER_WRITABLE, OTHER_WRITABLE
      See http://bugs.debian.org/553477
      See ls.c and dircolors.c in coreutils

proc.5
  Peter Schiffer
    Document /proc/[pid]/io file
      Attempt to document fields in the /proc/[pid]/io file, based on
      the Documentation/filesystems/proc.txt. The text will probably
      need some grammar corrections.
  Michael Kerrisk [Marko Myllynen]
    /proc/sys/fs/inode-max
 went away in Linux 2.4
      Also, the 'preshrink' field in /proc/sys/fs/inode-state became
      a dummy value in Linux 2.4.

      See https://bugzilla.kernel.org/show_bug.cgi?id=60836
  Michael Kerrisk [A. Costa]
    Note block size used by /proc/partitions
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=666972
  Michael Kerrisk
    Add rationale on drop_caches and note that it can hurt performance
      See also http://lwn.net/Articles/562211/

bootparam.7
  Michael Kerrisk [Eugen Dedu]
    Remove "lilo" entries from SEE ALSO

See http://bugs.debian.org/604019

inotify.7
Michael Kerrisk
SEE ALSO: add inotifywait(1) and inotifywatch(1)

ip.7
Simon Paillard
IP_MULTICAST_IF setsockopt recognizes struct mreq (compatibility)
Kernel added compatibility only recently in
3a084ddb4bf299a6e898a9a07c89f3917f0713f7
See: http://bugs.debian.org/607979

standards.7
Michael Kerrisk
Add mention of SUSv4-TC1 (POSIX.1-2013)

========== Changes in man-pages-3.55 ==========

Released: 2013-12-12, Christchurch

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alfred Agrell <alfred@agrell.info>
Andreas Sandberg <andreas.sandberg@it.uu.se>
Christoph Hellwig <hch@infradead.org>
David Gibson <david@gibson.dropbear.id.au>

janh <a0vhv@t-online.de>

Apologies if I missed anyone!

Global changes
---

assert.3
assert_perror.3
rexec.3
rpc.3
  Michael Kerrisk [Jon Grant]
    Reword a sentence to use more gender-neutral language

Changes to individual pages
---

execve.2
  Michael Kerrisk
    'arg...' for interpreter scripts starts with argv[1]

fallocate.2
  Christoph Hellwig
    Clarify the zeroing behavior
      fallocate() zeroes only space that did not previously contain
      data, but leaves existing data untouched.

futex.2
  Rodrigo Campos
    Fix link to Rusty's futex example library
      When I asked to webmaster@kernel.org, Konstantin Ryabitsev
      answered that the ".nl." is "an obsolete scheme and really

      should be changed to just ftp.kernel.org".

getgroups.2
  Michael Kerrisk
    Note that NGROUPS_MAX is defined in <limits.h>
  Michael Kerrisk
    Clarify that sysconf(_SC_NGROUPS_MAX) is a run-time technique
  Michael Kerrisk

Document /proc/sys/kernel/ngroups_max

ioctl.2
Michael Kerrisk [KOSAKI Motohiro, David Gibson]
'request' argument is typed as 'unsigned long' in glibc
See https://bugzilla.kernel.org/show_bug.cgi?id=42705

perf_event_open.2
Vince Weaver
Linux 3.12 rdpmc/mmap
It turns out that the perf_event mmap page rdpmc/time setting was
broken, dating back to the introduction of the feature. Due
to a mistake with a bitfield, two different values mapped to
the same feature bit.

A new somewhat backwards compatible interface was introduced
in Linux 3.12. A much longer report on the issue can be found
here:
https://lwn.net/Articles/567894/
Vince Weaver
Linux 3.12 adds PERF_SAMPLE_IDENTIFIER
A new PERF_SAMPLE_IDENTIFIER sample type was added in Linux 3.12.
Vince Weaver
E2BIG documentation
The following documents the E2BIG error return for
perf_event_open().

I actually ran into this error the hard way and it took me
half a day to figure out why my ->size value was changing.
Vince Weaver
Linux 3.12 adds PERF_EVENT_IOC_ID
A new perf_event related ioctl, PERF_EVENT_IOC_ID, was added
in Linux 3.12.
Vince Weaver
PERF_COUNT_SW_DUMMY support
Support for the PERF_COUNT_SW_DUMMY event type was added in
Linux 3.12.
Vince Weaver [Andreas Sandberg]
PERF_EVENT_IOC_PERIOD update
The PERF_EVENT_IOC_PERIOD ioctl was broken until 2.6.36,
and it turns out that the ARM architecture has some
differing behavior too.

pipe.2
Trevor Bramwell
Fix error in example program

poll.2

Michael Kerrisk [Paolo Bonzini]
Clarify meaning of events==0
events==0 does not mean that revents is always returned as
zero. The "output only" events (POLLHUP, POLLERR, POLLNVAL)
can still be returned.

See https://bugzilla.kernel.org/show_bug.cgi?id=61911

readlink.2
Michael Kerrisk [Yuanhang Zheng]
Fix typo in error message in example program

recv.2
Michael Kerrisk
Remove out-of-date statement that UNIX domain does not support MSG_TRUNC
Should have removed that sentence as part of
commit a25601b48b822eb1882ae336574b8d062a17e564

sched_get_priority_max.2
Michael Kerrisk
Add SCHED_IDLE to discussion

send.2
Michael Kerrisk
RETURN VALUE: these calls return number of bytes (not characters) sent

setreuid.2
Michael Kerrisk
Small clarification to description of when saved
set-user-ID is set

sigpending.2
Michael Kerrisk
Note treatment of signals that are blocked *and* ignored

stat.2
Michael Kerrisk
Note filesystem support for nanosecond timestamps
Add some detail on which native filesystems do and don't
support nanosecond timestamps.
Michael Kerrisk
Cosmetic reworking of timestamp discussion in NOTES
Michael Kerrisk [Yang Yang]
Update discussion of nanosecond timestamps
The existing text describes the timestamp fields as 'time_t'
and delegates discussion of nanosecond timestamps under NOTES.
Nanosecond timestamps have been around for a while now,
and are in POSIX.1-2008, so reverse the orientation of the

discussion, putting the nanosecond fields into DESCRIPTION
and detailing the historical situation under NOTES.

symlink.2
Michael Kerrisk
Further fine tuning of argument names
Follow-up
to f2ae6dde0c68448bec986d12fe32268a2c98bfd9
See https://sourceware.org/bugzilla/show_bug.cgi?id=16073
Michael Kerrisk [Fabrice Bauzac]
Give arguments of symlink() more meaningful names

adjtime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function adjtime() is thread safe.

alloca.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function alloca() is thread safe.

asinh.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions asinh(), asinhf() and asinhl() are thread safe.

atan.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions atan(), atanf() and atanl() are thread safe.

atof.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function atof() is thread safe with exceptions.

atoi.3
Peng Haitao
ATTRIBUTES: Note functions that
are thread safe with exceptions
The functions atoi(), atol() and atoll() are thread safe with
exceptions.

bcmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function bcmp() is thread safe.

bcopy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bcopy() is thread safe.

bsd_signal.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bsd_signal() is thread safe.

bzero.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function bzero() is thread safe.

cbrt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cbrt(), cbrtf() and cbrtl() are thread safe.

copysign.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions copysign(), copysignf() and copysignl() are thread
      safe.

cos.3
  Peng Haitao
     ATTRIBUTES: Note functions that are thread-safe
      The functions cos(), cosf() and cosl() are thread safe.

cproj.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cproj(), cprojf() and cprojl() are thread safe.

creal.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions creal(), crealf() and creall() are thread safe.

daemon.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function daemon() is thread safe.

des_crypt.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ecb_crypt(), cbc_crypt() and des_setparity() are thread safe.

difftime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function difftime() is thread safe.

dysize.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function dysize()
is thread safe.

erf.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions erf(), erff() and erfl() are thread safe.

erfc.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions erfc(), erfcf() and erfcl() are thread safe.

euidaccess.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions euidaccess() and eaccess() are thread safe.

expm1.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions expm1(), expm1f() and expm1l() are thread safe.

fexecve.3
Michael Kerrisk
POSIX.1-2008 specifies fexecve()
Michael Kerrisk
Explain the use and rationale of fexecve()

ftime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function ftime() is thread safe.

ftok.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function
ftok() is thread safe.

ftw.3
Michael Kerrisk
nftw() visits directories with FTW_D if FTW_DEPTH was not specified
Michael Kerrisk
Explain probable cause of FTW_NS

futimes.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions futimes() and lutimes() are thread safe.

getaddrinfo.3
Michael Kerrisk
Explain one use case for AI_ADDRCONFIG
Michael Kerrisk
Highlight difference in ai_flags when hints==NULL
NOTES already described how glibc differs from POSIX.
Add a pointer to that text from the point in DESCRIPTION
where hints==NULL is discussed.

kcmp.3
Shawn Landden
Reword slightly awkward section

malloc.3
Greg Price
Scale back promises of alignment
It's not true that the return value is suitably aligned for "any
variable"; for example, it's unsuitable for a variable like
float *x __attribute__ ((__vector_size__
(32)));
which requires 32-byte alignment. Types like this are defined in
<avxintrin.h>, and with 16-byte alignment in <emmintrin.h> and
<xmmintrin.h>, so the application programmer need not even know
that a vector_size attribute has been applied.

On an x86 architecture, a program that loads from or stores to a
pointer with this type derived from malloc can crash because GCC
generates an aligned load/store, like MOVDQA.

The C99 standard (TC3, as of N1256) does say the return value is
suitably aligned for "any type of object". The C11 standard (as
of N1570) revises this to any type with "fundamental alignment",

which means an alignment "supported by the implementation in all
contexts", which I suppose tautologically includes aligning
malloc/realloc return values.

The actual behavior of current glibc malloc
is to align to the
greater of 2 * sizeof(size_t) and __alignof__ (long double),
which may be one bit greater than this commit promises.

mq_receive.3
Michael Kerrisk [janh]
msg_len must be greater than *or equal to* mq_msgsize
See https://bugzilla.kernel.org/show_bug.cgi?id=64571

setenv.3
Michael Kerrisk
Clarify that setenv() returns success in the overwrite==0 case

sigsetops.3
Michael Kerrisk [Robert P. J. Day]
Add 'const' to sigisemptyset(), sigorset(), sigandset() declarations
Michael Kerrisk
Rework text describing sigisemptyset(), sigorset(), and sigandset()

statvfs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions statvfs() and fstatvfs() are thread safe.

stdarg.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The macros va_start(), va_arg(), va_end() and va_copy() are
thread safe.

termios.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tcgetattr(), tcsetattr(), tcsendbreak(),
tcdrain(), tcflush(), tcflow(), cfmakeraw(), cfgetispeed(),
cfgetospeed(), cfsetispeed(), cfsetospeed() and cfsetspeed()
are thread safe.

ungetwc.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function ungetwc() is thread safe.

unlockpt.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function unlockpt() is thread safe.

usleep.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function usleep() is thread safe.

wcpcpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcpcpy() is thread safe.

wcscasecmp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function wcscasecmp() is thread safe with exceptions.

wcscat.3
   Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcscat() is thread safe.

wcschr.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcschr() is thread safe.

wcscmp.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcscmp() is thread safe.

wcscpy.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcscpy() is thread safe.

wcscspn.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wcscspn() is thread safe.

wcslen.3
  Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function wcslen() is thread safe.

wcsncasecmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcsncasecmp() is thread safe with exceptions.

wcsncat.3
Peng Haitao
ATTRIBUTES:
Note function that is thread-safe
The function wcsncat() is thread safe.

wcsncmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsncmp() is thread safe.

wcsncpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsncpy() is thread safe.

wcsnlen.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsnlen() is thread safe.

wcspbrk.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcspbrk() is thread safe.

wcsrchr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsrchr() is thread safe.

wcsspn.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsspn() is thread safe.

wcsstr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcsstr() is

thread safe.

wcstoimax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions wcstoimax() and wcstoumax() are thread safe with exceptions.

wcstok.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcstok() is thread safe.

wcswidth.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcswidth() is thread safe with exceptions.

wctrans.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wctrans() is thread safe with exceptions.

wctype.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wctype() is thread safe with exceptions.

wcwidth.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function wcwidth() is thread safe with exceptions.

wmemchr.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemchr() is thread safe.

wmemcmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemcmp() is thread safe.

wmemcpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wmemcpy() is thread safe.

wmemmove.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wmemmove() is thread safe.

wmemset.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function wmemset() is thread safe.

tty_ioctl.4
  Michael Kerrisk [Liu Jiaming]
    Note that 'arg' should be 0 in the usual case when using TIOCSCTTY
  Michael Kerrisk
    Rework text on root to discuss just in terms of capabilities

proc.5
  Michael Kerrisk
    Document /proc/sys/kernel/ngroups_max

capabilities.7
  Michael Kerrisk
    Fix 2 version
 numbers under "Effect of user ID changes on capabilities"

feature_test_macros.7
  Michael Kerrisk
    Add _ISOC11_SOURCE to example program

tcp.7
  Michael Kerrisk
    Fix (nontrivial) wordo in discussion of MSG_TRUNC
      s/MSG_PEEK/MSG_TRUNC/

ld.so.8
  Michael Kerrisk [Alfred Agrell]
    Fix crufty wording in one sentence

========== Changes in man-pages-3.56 ==========

Released: 2014-01-11, Christchurch

Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

fgetc.3
gets.3

David Malcolm
Split gets(3) to isolate unsafe gets(3) to a page on its own
Currently man3/gets.3 documents various safe I/O functions, along
with the toxic "gets" function.

At the risk of being melodramatic, this strikes me as akin to
storing rat poison in a food cabinet, in the same style of
packaging as the food, but with a post-it note on it saying
"see warnings below".

I think such "never use this" functions should be quarantined
into their own manpages, rather than listing them alongside
sane functions.

The attached patch does this for "gets", moving the documentation
of the good functions from man3/gets.3 into man3/fgetc.3,
updating the SO links in the relevant functions to point at the
latter.

It then rewrites man3/gets.3 to spell out that "gets" is toxic
and should never be
used (with a link to CWE-242 for good
measure).
Michael Kerrisk [Andre Majorel]
Tweaks to David Malcolm's patch

vdso.7
Mike Frysinger
New page documenting the vDSO mapped into each process by the kernel

Newly documented interfaces in existing pages
---

reboot.2
Elie De Brauwer
Document LINUX_REBOOT_SW_SUSPEND

New and changed links
---

fgets.3
getc.3
getchar.3
ungetc.3
Michael Kerrisk
Adjust links to gets(3) to point to fgetc(3)

Global changes

Various pages
  Michael Kerrisk
    Global fix of "NULL pointer"
      Change "NULL pointer" to "NULL" or null pointer".
      POSIX uses the term "null pointer", not "NULL pointer".

Various pages
  Michael Kerrisk
    Stylistic changes to code example
      For ease of reading, don't embed assignments inside if().

Various pages
  Michael Kerrisk
    Replace uses of
 "i.e.," in main text with "that is" or similar
      Usual man-pages style is to use "i.e." only within
      parenthetical expressions.

Various pages
  Michael Kerrisk
    Replace uses of "e.g." in main text with "for example" or similar
        Usual man-pages style is to use "e.g." only within
        parenthetical expressions.

Various pages
  Michael Kerrisk
    Add "Program source" subheading under EXAMPLE

Various pages
  Michael Kerrisk
    Add "static" to global variables and functions in example program

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk [Nadav Har'El]
    Improve description of CLOCK_PROCESS_CPUTIME_ID
      See https://bugzilla.kernel.org/show_bug.cgi?id=67291

close.2
  Michael Kerrisk [P?draig Brady]

Note that errors from close() should be used only for diagnosis
In particular, retrying after EINTR is a bad idea.

See http://austingroupbugs.net/view.php?id=529

See http://thread.gmane.org/gmane.comp.lib.glibc.alpha/37702
Subject: [RFC][BZ #14627] Make linux close errno to EINPROGRESS
when interrupted in signal.

execve.2
Michael Kerrisk [Marco Dione]
Add further cases to EFAULT error
See https://sourceware.org/bugzilla/show_bug.cgi?id=16402

perf_event_open.2
Vince Weaver [Sudhanshu Goswami]
Clarify issues with the disabled bit
Clarify the perf_event_open behavior with respect to the disabled
bit and creating event groups.
Vince Weaver [Sudhanshu Goswami]
Clarify issues with the exclusive bit
Warn that using the perf_event_open "exclusive" bit, while
it might seem like a good idea, might lead to all 0 results
in some common usage cases.

reboot.2
Elie De Brauwer
Mention RB_POWER_OFF
The manpage did not mention RB_POWER_OFF which
is the glibc
symbolic name for LINUX_REBOOT_CMD_POWER_OFF.

$ cd /usr/include
$ cat x86_64-linux-gnu/sys/reboot.h | grep POWER_OFF
define RB_POWER_OFF 0x4321fedc
Elie De Brauwer
Add "Linux" to kernel version numbers
Michael Kerrisk
Add RB_SW_SUSPEND synonym
Michael Kerrisk
Add RB_KEXEC synonym

setpgid.2
Michael Kerrisk [Joseph S. Myers]
BSD getpgrp() and setpgrp() go away in glibc 2.19

socket.2
Michael Kerrisk [Dongsheng Song]

Remove crufty statement that AF_INET does not support SOCK_SEQPACKET
Linux AF_INET supports SOCK_SEQPACKET via SCTP.

syscall.2
Mike Frysinger
Fix ia64 registers
The original list of registers was created by confusing strace source code--this is for parsing legacy 32-bit code (which is dead and no one cares). Update the list to reflect native ia64 syscall interface.

syscall.2
syscalls.2
getauxval.3
Mike Frysinger
Add references to new vdso(7) page

utimensat.2
Michael Kerrisk
Small wording improvement for times!=NULL case

dlopen.3
Michael Kerrisk [Mike Frysinger]
Update remarks on cast needed when assigning dlsym() return value
POSIX.1-2013 eases life when casting the dlsym() return value to a function pointer
Michael Kerrisk [Stephen Kell]
Fix description of dli_sname
See https://sourceware.org/bugzilla/show_bug.cgi?id=16262

getline.3
Michael Kerrisk [Luke Hutchison]
Correct description of how '*n' is used when '*lineptr' == NULL
See https://sourceware.org/bugzilla/show_bug.cgi?id=5468
Michael Kerrisk
Remove SEE ALSO reference to unsafe gets(3)

mcheck.3
Simon Paillard [Raphael Geissert]
typo in compiler flag
See http://bugs.debian.org/732464

mkstemp.3
Michael Kerrisk [Janne Blomqvist]
Better
describe 'flags' that can be specified for mkostemp()

printf.3

Michael Kerrisk [Arif Zaman]
Fix memory leak in snprintf() example
See http://stackoverflow.com/questions/19933479/snprintf-man-page-example-memory-leak

pthread_kill.3
Michael Kerrisk [Mathieu Desnoyers]
POSIX.1-2008 removes ESRCH
POSIX.1-2001 mistakenly documented an ESRCH error, and
POSIX.1-2008 removes this error. Glibc does return
this error in cases where it can determine that a thread ID
is invalid, but equally, the use of an invalid thread ID
can cause a segmentation fault.

puts.3
Michael Kerrisk
SEE ALSO: replace reference to gets(3) with fgets(3)

scanf.3
Michael Kerrisk [Ondej Bílka]
Improve discussion of obsolete 'a' dynamic allocation modifier

setjmp.3
Michael Kerrisk [Joseph S. Myers]
BSD setjmp() semantics go away in glibc 2.19

sigpause.3
Michael Kerrisk [Joseph
S. Myers]
BSD sigpause() goes away in glibc 2.19
Michael Kerrisk
Correct feature text macro requirements
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sigpause() is thread safe.

sigqueue.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sigqueue() is thread safe.

sigwait.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sigwait() is thread safe.

sin.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe

The functions sin(), sinf() and sinl() are thread safe.

sincos.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sincos(), sincosf() and sincosl() are thread safe.

string.3
  Moritz 'Morty' Strübe
    Add short description of the functions
      It is helpful to have a short description about what the different
      functions
 in string.h do.
  Michael Kerrisk
    Fixes and enhancements to Moritz Strübe's patch

strptime.3
  Michael Kerrisk [Mathieu Malaterre, Simon Paillard]
    Add number ranges to comments in 'tm' structure
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729570
  Michael Kerrisk
    Point to ctime(3) for more details on 'tm' structure
  Michael Kerrisk
    Some rewording and reorganization

strsep.3
  Michael Kerrisk
    Clarify description
      The use of "symbols" in the existing description is confusing;
      it's "bytes". Other fixes as well.

strspn.3
  Michael Kerrisk [Mathieu Malaterre]
    Improve description in NAME
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=723659

strstr.3
  Michael Kerrisk
    Clarify RETURN VALUE: s/substring/located substring/

sysv_signal.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sysv_signal() is thread
 safe.

tan.3
  Peng Haitao

ATTRIBUTES: Note functions that are thread-safe
The functions tan(), tanf() and tanl() are thread safe.

tanh.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tanh(), tanhf() and tanhl() are thread safe.

toascii.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function toascii() is thread safe.

toupper.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions toupper() and tolower() are thread safe with exceptions.

towctrans.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function towctrans() is thread safe.

towlower.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function towlower() is thread safe with exceptions.

towupper.3
Peng Haitao
ATTRIBUTES: Note function that is
thread safe with exceptions
The function towupper() is thread safe with exceptions.

ualarm.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function ualarm() is thread safe.

wcpncpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function wcpncpy() is thread safe.

proc.5
Michael Kerrisk [Sworddragon2]
Fix formula for CommitLimit under /proc/meminfo

See https://bugzilla.kernel.org/show_bug.cgi?id=60991

credentials.7
  Michael Kerrisk
    List APIs that operate on process groups
  Michael Kerrisk
    Add details on controlling terminal and foreground/background jobs

feature_test_macros.7
  Michael Kerrisk
    Document _DEFAULT_SOURCE
  Michael Kerrisk [Joseph S. Myers]
    From glibc 2.19, _BSD_SOURCE no longer causes __FAVOR_BSD
      Starting with glibc 2.19, _BSD_SOURCE no longer causes BSD
      definitions to be favored in cases
 where standards conflict.

libc.7
  Mike Frysinger
    SEE ALSO: add various entries

man-pages.7
  Michael Kerrisk [Mike Frysinger]
    Add STYLE GUIDE section
      Incorporate some of the existing material in the page
      into the STYLE GUIDE, and add a lot more material, mainly
      drawn from the "Global changes" sections in the release
      changelogs.
  Michael Kerrisk
    Add historical note on reason for use of American spelling
  Michael Kerrisk [Mike Frysinger]
    Various improvements to style guide

packet.7
  Willem de Bruijn [Daniel Borkmann]
    Document fanout, ring, and auxiliary options
      This patch adds descriptions of the common packet socket options
        PACKET_AUXDATA, PACKET_FANOUT, PACKET_RX_RING, PACKET_STATISTICS,
        PACKET_TX_RING
      and the ring-specific options
        PACKET_LOSS, PACKET_RESERVE, PACKET_TIMESTAMP, PACKET_VERSION
  Michael Kerrisk
     Add kernel version numbers for PACKET_VERSION and PACKET_TIMESTAMP

ld.so.8
  Michael Kerrisk [Matthias Klose]
    Default output file for D_DEBUG is stderr not stdout
      See https://sourceware.org/bugzilla/show_bug.cgi?id=6874

========== Changes in man-pages-3.57 ==========

Released: 2014-01-24, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andi Kleen <andi@firstfloor.org>
Andre Majorel <aym-xunil@teaser.fr>
Andrey Vagin <avagin@openvz.org>
Andy Lutomirski <luto@amacapital.net>
Axel Beckert <abe@debian.org>

Simon Paillard <spaillard@debian.org>
Thomas Posch <man-pages@online.posch.name>
Tilman Schmidt <tilman@imap.cc>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>
  <socketpair@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

msgop.2

Michael Kerrisk
Document MSG_COPY

open.2
Michael Kerrisk, Andy Lutomirski
Document O_TMPFILE
O_TMPFILE is new in Linux 3.11

perf_event_open.2
Vince Weaver [Andi Kleen]
PERF_SAMPLE_TRANSACTION support in Linux 3.13
The following patch adds descriptions of the new perf_event_open.2
PERF_SAMPLE_TRANSACTION sample type as added in Linux 3.13.

The descriptions
are based on information provided by Andi Kleen,
both in the e-mail

[PATCH 1/6] perf, core: Add generic transaction flags v5

sent to the linux-kernel list as well as an e-mail

[PATCH] Document transaction flags in perf_event_open manpage

sent to the linux-man list.

The implementation is based heavily on the Intel Haswell
processor. Documentation can be found at this page:
http://software.intel.com/en-us/blogs/2013/05/03/intelr-transactional-synchronization-extensions-intelr-tsx-profiling-with-linux-0
as well as in section 18.11.5.1 of volume 3 of the
Intel 64 and IA-32 Architecture Software Developer's Manual.

ptrace.2
Andrey Vagin
Add description for PTRACE_PEEKSIGINFO
Retrieve signals without removing them from a queue.
Andrey Vagin
Add description for PTRACE_GETSIGMASK and PTRACE_SETSIGMASK
These two
commands allow to examine and change mask of blocked
signals.

socket.7
Eliezer Tamir
Add description for SO_BUSY_POLL
Add description for the SO_BUSY_POLL socket option.

tcp.7
  Michael Kerrisk [Jerry Chu]
    Document TCP_USER_TIMEOUT
      Text slightly adapted from Jerry Chu's (excellent) commit
      message (commit dca43c75e7e545694a9dd6288553f55c53e2a3a3).
  Michael Kerrisk
    Document TCP_CONGESTION

Global changes

Various pages
  Michael Kerrisk
    Reword to avoid use of "etc."

Various pages
  Peng Haitao [Andre Majorel]
    Make wording around thread-safety and setlocale() more precise

getdate.3
strptime.3
locale.5
  Michael Kerrisk
    Replace "weekday" with less ambiguous language
      Notwithstanding POSIX's use of the term "weekday", in everyday
      English, "weekday" is commonly understood to mean a day in the
      set [Monday..Friday] (vs one of the
 "weekend" days).

Changes to individual pages
---

epoll_wait.2
  Michael Kerrisk [Jonas Jonsson]
    Clarify wording of EINTR error
      See https://bugzilla.kernel.org/show_bug.cgi?id=66571

faccessat.2
  Michael Kerrisk
    Note that the system call takes only three arguments

fallocate.2
  Michael Kerrisk
    Note filesystems that support FALLOC_FL_PUNCH_HOLE operation

fcntl.2

Michael Kerrisk
BUGS: The O_SYNC and O_DSYNC flags are not modifiable using F_SETFL
Michael Kerrisk
Add subsections under BUGS
There's several bugs listed. It's helpful to mark
them separately.
Michael Kerrisk
POSIX.1 specifies F_SETOWN and F_GETOWN for sockets/SIGURG

getrlimit.2
Michael Kerrisk [ ]
Note that rlim_cur can be set lower than current resource consumption

getsockopt.2
Michael Kerrisk
SEE ALSO: add ip(7) and udp(7)

keyctl.2
Michael Kerrisk
SEE ALSO: mention Documentation/security/keys.txt

linkat.2
Michael Kerrisk
Add ENOENT for O_TMPFILE created with O_EXCL
Michael Kerrisk
ERRORS: Add EINVAL

lseek.2
Michael Kerrisk
Note which filesystems support SEEK_HOLE/SEEK_DATA

msgop.2
Michael Kerrisk
Note that MSG_EXCEPT is Linux-specific

open.2
Michael Kerrisk
Update CONFORMING TO
Add POSIX.1-2008. Add mention of O_TMPFILE.
Update text on various flags that were added in POSIX.1-2008, and
whose definitions can, since glibc 2.12, be obtained by suitably
defining _POSIX_C_SOURCE or _XOPEN_SOURCE
Michael Kerrisk
Add pointer in description to BUGS, for O_ASYNC limitation
Michael Kerrisk
Remove crufty duplicate text on modifying file status flags

ptrace.2

Michael Kerrisk
Add details to descriptions of PTRACE_GETSIGMASK and PTRACE_SETSIGMASK

select.2
Michael Kerrisk [Marc Lehmann]
RETURN VALUE: Fix discussion of treatment of file descriptor sets
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=574370

syscalls.2
Michael Kerrisk
Remove madvise1() from main list
madvise1() is one of the system calls that was never
implemented, and listed toward the bottom of the page.

timer_create.2
Michael Kerrisk
Add pointer to proc(5) for info on /proc/[pid]/timers

unlinkat.2
Michael Kerrisk [Mike Frysinger:]
ERRORS: Add EISDIR
See https://bugzilla.kernel.org/show_bug.cgi?id=29702

ferror.3
Michael Kerrisk
clearerr(), feof(), and ferror() are also POSIX-conformant
Michael Kerrisk [Reuben Thomas]
CONFORMING TO: add fileno()

gets.3
Ian Abbott
SEE ALSO: add fgets(3)

mq_receive.3
mq_send.3
Michael Kerrisk [Simone Piccardi]
SYNOPSIS: s/unsigned/unsigned int/

printf.3
Michael Kerrisk
Small reorganization of text in EXAMPLE

rand.3
Michael Kerrisk
s/unsigned/unsigned int/ in example

stpcpy.3
Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function stpcpy() is thread safe.

stpncpy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function stpncpy() is thread safe.

strcat.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions strcat() and strncat() are thread safe.

strchr.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions strchr(), strrchr() and strchrnul() are thread safe.

strcmp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions strcmp() and strncmp() are thread safe.

strftime.3
Brandon Edens
Change "week day" to "day of week"
See https://bugzilla.kernel.org/show_bug.cgi?id=68861

strstr.3
Peng Haitao
ATTRIBUTES: Note function that
is thread safe with exceptions
The function strstr() is thread safe.
The function strcasestr() is thread safe with exceptions.

strtod.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtod(), strtof() and strtold() are thread safe
with exceptions.

strtoimax.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtoimax() and strtoumax() are thread safe with
exceptions.

strtol.3

Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtol(), strtoll() and strtoq() are thread safe
with exceptions.

tcgetpgrp.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions tcgetpgrp() and tcsetpgrp() are thread safe.

tcgetsid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe

The function tcgetsid() is thread safe.

core.5
Bernhard Walle
Mention that %E exists since Linux 3.0
'%E' in the 'core_pattern' has been introduced in kernel commit
57cc083ad9e1bfeeb4a0ee831e7bb008c8865bf0 which was included in
version 3.0. Add that information to the manual page.

filesystems.5
Michael Kerrisk [Axel Beckert]
Add reference to proc(5) for more details on /proc/filesystems
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=735590

locale.5
Michael Kerrisk
SEE ALSO: add locale(7)

proc.5
Michael Kerrisk
Document /proc/[pid]/timers
Michael Kerrisk
Update discussion of wchan
Remove crufty reference to /etc/psdatabase in /proc/PID/stat.
Add /proc/PID/wchan.

See https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/737452

environ.7
Michael Kerrisk [Gioele Barabucci]
Correct reference to locale(7) (not locale(5))
locale(7) is the right place for details of the LC_*
environment variables.

See http://bugs.debian.org/638186
Michael Kerrisk
Improve references for discussion of locale environment variables
Michael Kerrisk
SEE ALSO: add catopen(3)
Michael Kerrisk
SEE ALSO: add locale(5)

man-pages.7
Michael Kerrisk
Prefer "usable" over "useable"

netdevice.7
Tilman Schmidt
Document SIOCGIFCONF case ifc_req==NULL
Add the missing description of the possibility to call SIOCGIFCONF
with ifc_req==NULL to determine the needed buffer size, as
described in
http://lkml.indiana.edu/hypermail/linux/kernel/0110.1/0506.html
and verified against source files net/core/dev_ioctl.c and
net/ipv4/devinet.c in the current kernel git tree.
This functionality has been present since the beginning of the 2.6
series. It's about time
it gets documented.

While I'm at it, also generally clarify the section on
SIOCGIFCONF.

standards.7
Michael Kerrisk
Enhance description of V7
Michael Kerrisk
Add C11

tcp.7
Michael Kerrisk
Describe format of tcp_*_congestion_control /proc files
Describe format of tcp_allowed_congestion_control and
tcp_available_congestion_control.

========== Changes in man-pages-3.58 ==========

Released: 2014-02-11, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>
Daniel Borkmann <dborkman@redhat.com>
David Prévot <taffit@debian.org>
Fabrice Bauzac <libnoon@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Network Nut <sillystack@gmail.com>

Yuri Kozlov <yuray@komyakino.ru>
  <socketpair@gmail.com>
 <ayjj_8109@qq.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

pipe.2
  Michael Kerrisk
    Document the pipe2() O_DIRECT flag added in Linux 3.4

packet.7
  Daniel Borkmann
    Document PACKET_QDISC_BYPASS
      New in Linux 3.14.

Global changes

Various pages
  Simon Paillard
    Formatting fix: add space between function and () if BR or IR
      Detected through the regex:
        git grep -P '^\.(BR|IR) [\w]*\([\d]*\)$'

Various pages

  Simon Paillard
    Formatting fix: add space between word and punctuation if BR or IR
      Detected through the regex:
        git grep -P '^\.(BR|IR) [^]*[,\.]$'

       Could probably be extended to match more cases and fix in perl.

Various pages
  Michael Kerrisk
    Use Oxford comma

gettid.2
restart_syscall.2
passwd.5
socket.7
  Michael Kerrisk
    Fix order of SEE ALSO entries

Changes to individual pages
----

epoll_wait.2
  Michael Kerrisk [Network Nut]
    Remove word "minimum" from the description of 'timeout'

epoll_wait.2
poll.2
select.2
  Michael Kerrisk
    Go into more detail on timeout and when call will cease blocking

getxattr.2
listxattr.2
removexattr.2
setxattr.2
  Michael Kerrisk [Fabrice Bauzac]
    Correct header file is <sys/xattr.h> (not <xattr/xattr.h>)
      See https://bugzilla.kernel.org/show_bug.cgi?id=70141

msgctl.2
  Cyril Hrubis
    Add note about ignored arg to IPC_RMID

prctl.2
  Michael Kerrisk [ ]
    PR_SET_PDEATHSIG value is preserved across execve(2)

recv.2
  Michael Kerrisk
    Rework and reorganize the
 text in various parts of the page.
    Isolate details specific to recv() vs recvfrom() vs recvmsg()
      Place details specific to each system call under a
      separate subheading.
    Rework discussion of 'src_addr' and 'addrlen' for recvfrom()
    Add description of 'buf' and 'len' in recvfrom() section
    'addrlen' should be 0 (*not* NULL) when 'src_addr' is NULL
    Improve text describing recvfrom() call that is equivalent to recv()
  Michael Kerrisk []
    Describe the various cases where the return value can be 0

shmctl.2
  Michael Kerrisk
    Note that 'buf' is ignored for IPC_RMID

symlinkat.2
  Michael Kerrisk
    Make argument names consistent with symlink(2) page

isalpha.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions isalnum(), isalpha(), isascii(), isblank(),
      iscntrl(), isdigit(), isgraph(), islower(), isprint(),
      ispunct(), isspace(),
 isupper() and isxdigit() are thread safe.

isatty.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function isatty() is thread safe.

isgreater.3
  Peng Haitao
    ATTRIBUTES: Note macros that are thread-safe
      The macros isgreater(), isgreaterequal(), isless(),
      islessequal(), islessgreater() and isunordered() are thread safe.

iswalnum.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function iswalnum() is thread safe with exceptions.

iswalpha.3
  Peng Haitao

ATTRIBUTES: Note function that is thread safe with exceptions
The function iswalpha() is thread safe with exceptions.

iswblank.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswblank() is thread safe with exceptions.

iswcntrl.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions

The function iswcntrl() is thread safe with exceptions.

lockf.3
Michael Kerrisk [Simone Piccardi]
Fix incorrect argument mentioned under EINVAL error

pthread_kill.3
Michael Kerrisk
Add feature test macro requirements

pthread_sigmask.3
Michael Kerrisk
Add feature test macro requirements

strtoul.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions strtoul(), strtoull() and strtouq() are thread safe
with exceptions.

nscd.conf.5
Peter Schiffer
Add note about default values

proc.5
Michael Kerrisk
SEE ALSO: Add some further kernel Documentation/sysctl files

man-pages.7
Michael Kerrisk
ATTRIBUTES sections come after VERSIONS
Peng Haitao has consistently ordered the ATTRIBUTES after
VERSIONS, so adjust the text in man-pages.7

vdso.7
Michael Kerrisk

Add words "virtual dynamic shared object" in DESCRIPTION

Apologies if I missed anyone!

Global changes

Various pages
  Peter Schiffer, Michael Kerrisk [Weizhou Pan]
    Convert pages containing non-ASCII in source code comments to use UTF-8
      Done using a slightly modified version of Peter Schiffer's
      convert_to_utf_8.sh script. The script was modified so as *not*
      a "coding:" marker to the groff source. For now, we'll only put
      that marker on pages that contain non-ASCII characters in the
      rendered text.

      See https://bugzilla.kernel.org/show_bug.cgi?id=60807

New and rewritten pages

A note from Christoph Hellwig prompted me to perform a task that has
been queued for a while: merging the text of the man pages for the
*at([23]) ("directory file descriptor") APIs into their corresponding
traditional pages. When the *at([23]) pages were originally written
(mostly in 2006), the APIs were not part of POSIX and (in most cases)
were not available on other systems. So, it made some sense to wall
them off into their own separate pages. Eight years later, with the
APIs now all in POSIX (except scandirat()), it is much more sensible
to document the newer APIs alongside their traditional counterparts,
so that the newer APIs are not "hidden", and the reader can more
easily see the differences between the APIs.

Thus, the text of 14 pairs of pages has been merged, and the "merged
from" pages have been converted to links to the "merged to" pages.
Along
the way, a few other fixes were made to the pages, as noted
below.

One page that did not undergo such a change was utimensat(2), which
is different enough from utime(2) that it warrants a separate page.
Unlike the other *at() pages, the utimensat(2) page was also already
self-contained, rather than defining itself in terms of differences
from utime(2) as the other *at() pages did.

access.2
Michael Kerrisk

Merge text from faccessat(2)
Michael Kerrisk
Remove faccessat() race warning
That point is already covered in existing text in this page.
Michael Kerrisk
access() also conforms to POSIX.1-2008

chmod.2
Michael Kerrisk
Merge text from fchmodat(2)
Michael Kerrisk
Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others used 'pathname')
Michael Kerrisk
CONFORMING TO: chmod() and fchmod() are also in POSIX.1-2008

chown.2
Michael Kerrisk
Merge text
of fchownat(2)
Michael Kerrisk
AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE
Michael Kerrisk
Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others used 'pathname')
Michael Kerrisk
Remove sentence that fchownat() is present on Solaris
That point was only really relevant before fchownat() was
standardized in POSIX.1.2008.
Michael Kerrisk
CONFORMING TO: chown(), fchown(), lchown() are in POSIX.1-2008

link.2
Michael Kerrisk
Merge text of linkat(2)
Michael Kerrisk
CONFORMING TO: link() is in POSIX.1-2008
Michael Kerrisk
AT_EMPTY_PATH is Linux-specific and requires _GNU_SOURCE

mkdir.2
Michael Kerrisk
Merge text of mkdirat(2)
Michael Kerrisk
CONFORMING TO: mkdir() is in POSIX.1-2008

mknod.2
Michael Kerrisk

Merge text of mknodat(2)
Michael Kerrisk
CONFORMING TO: mknod(2) is in POSIX.1-2008

open.2
Michael Kerrisk
Merge text from openat(2)
Michael Kerrisk
Remove sentence that openat() is present on Solaris
That point was only really relevant before openat() was
standardized in POSIX.1.2008.

readlink.2
Michael Kerrisk
Merge text of readlinkat(2)
Michael Kerrisk
CONFORMING TO: readlink() is in POSIX.1-2008.
Michael Kerrisk
Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others used 'pathname')

rename.2
Michael Kerrisk
Merge text of renameat(2)
Michael Kerrisk
CONFORMING TO: rename(2) is in POSIX.1-2008

stat.2
Michael Kerrisk
Merge text from fstatat(2)
Michael Kerrisk
AT_EMPTY_PATH and AT_NO_AUTOMOUNT are Linux-specific
These flags require _GNU_SOURCE.
Michael Kerrisk
Use argument name 'pathname' throughout page
(Some APIs were using 'path' while others
used 'pathname')
Michael Kerrisk
Remove sentence that fstatat() is present on Solaris
That point was only really relevant before fstatat() was
standardized in POSIX.1.2008.
Michael Kerrisk
CONFORMING TO: stat(), fstat(), lstat() are specified in POSIX.1-2008

symlink.2
Michael Kerrisk
Merge text of symlinkat(2)
Michael Kerrisk

CONFORMING TO: symlink() is in POSIX.1-2008

unlink.2
Michael Kerrisk
Merge text of unlinkat(2)
Michael Kerrisk
Remove sentence that unlinkat() is present on Solaris
That point was only really relevant before unlinkat() was
standardized in POSIX.1.2008.
Michael Kerrisk
CONFORMING TO: unlink() is in POSIX.1-2008

mkfifo.3
Michael Kerrisk
Merge text of mkfifoat(3)
Michael Kerrisk
CONFORMING TO: mkfifo() is in POSIX.1-2008

scandir.3
Michael Kerrisk
Merge text of scandirat(3)
Michael Kerrisk

Update feature test macro requirements
The FTM requirements changed in glibc 2.10.
Michael Kerrisk
Remove libc4/libc5 note under CONFORMING TO
No-one much cares about Linux libc these days.
Michael Kerrisk
Put detail about alphasort under a NOTES heading
This text was under CONFORMING TO, which made no sense.
Michael Kerrisk
Rework CONFORMING TO text

Newly documented interfaces in existing pages
---

prctl.2
Kir Kolyshkin
Document PR_SET_MM options in Linux 3.5
Some of the PR_SET_MM options were merged to vanilla kernel
later, and appeared in Linux 3.5. Those are:

- PR_SET_MM_ARG_START
- PR_SET_MM_ARG_END
- PR_SET_MM_ENV_START
- PR_SET_MM_ENV_END

- PR_SET_MM_AUXV
- PR_SET_MM_EXE_FILE

socket.7
  Neil Horman
    Document the SO_RXQ_OVFL
 socket option
  Michael Kerrisk
    Add kernel version number for SO_RXQ_OVFL

New and changed links
---

faccessat.2
  Michael Kerrisk
    Convert to link to access.2

fchmodat.2
  Michael Kerrisk
    Convert to link to chmod.2

fchownat.2
  Michael Kerrisk
    Convert to link to chown.2

fstatat.2
  Michael Kerrisk
    Convert to link to stat.2

linkat.2
  Michael Kerrisk
    Convert to link to link.2

mkdirat.2
  Michael Kerrisk
    Convert to link to mkdir.2

mknodat.2
  Michael Kerrisk
    Convert to link to mknod.2

openat.2
  Michael Kerrisk
    Convert to link to open.2

readlinkat.2
  Michael Kerrisk

Convert to link to symlink.2

renameat.2
Michael Kerrisk
Convert to link rename.2

symlinkat.2
Michael Kerrisk
Convert to link to symlink.2

unlinkat.2
Michael Kerrisk
Convert to link to unlink.2

mkfifoat.3
Michael Kerrisk
Convert to link to mkfifo.3

scandirat.3
Michael Kerrisk
Convert to link to scandir.3

Changes to individual pages
---

alarm.2
Michael Kerrisk
Note semantics of alarm with respect to fork() and execve()

fcntl.2
Michael Kerrisk
Warn that F_GETLK info may already be out of date when the call returns

intro.2
Michael Kerrisk
Describe policy on documenting differences between syscall and glibc API

mmap2.2
Michael Kerrisk
Reword note on glibc mmap() wrapper invocation of mmap2()
Michael Kerrisk
This system call does not exist on x86-64

msgctl.2
Michael Kerrisk
ERRORS: add EPERM for unprivileged attempt to set msg_qbytes > MSGMNB

prctl.2
  Michael Kerrisk [Xiawei Chen]
    Clarify that PR_GET_TIMERSLACK is returned as the function result
  Michael Kerrisk
    Clarify that PR_GET_SECCOMP is returned as function result
  Michael Kerrisk
    Clarify that PR_GET_NO_NEW_PRIVS is returned as function
 result

ptrace.2
  Michael Kerrisk [Andrew Hunter]
    Make it clearer that glibc and syscall APIs differ for PTRACE_PEEK*
      Thanks to Denys Vlasenko's additions in 78686915aed6bd12
      this page does note that the glibc API for PTRACE_PEEK*
      differs from the raw syscall interface. But, as the report
      at https://bugzilla.kernel.org/show_bug.cgi?id=70801 shows,
      this information could be more obvious. This patch makes its so.

sgetmask.2
  Michael Kerrisk
    Note that these system calls don't exist on x86-64

swapon.2
  Michael Kerrisk
    Split EINVAL cases into separate entries under ERRORS
  Michael Kerrisk
    Add EINVAL error for invalid flags to swapon()

syscalls.2
  Michael Kerrisk
    SEE ALSO: add intro(2)

umount.2
  Michael Kerrisk
    Split EINVAL cases into separate items
  Michael Kerrisk
    ERRORS: Add EINVAL case that was new in 2.6.34

utime.2
  Michael Kerrisk

   Add note that modern applications probably want utimensat(2) etc.

crypt.3
  Michael Kerrisk [KOSAKI Motohiro]
    ERRORS: Add EINVAL and EPERM errors
      See https://bugzilla.kernel.org/show_bug.cgi?id=69771

getifaddrs.3
  Michael Kerrisk
    Enhance example program
      Print statistics for AF_PACKET interfaces.
      Add missing feature test macro definition.
      Reformat output.

iswctype.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function iswctype() is thread safe.

sem_post.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_post() is thread safe.

sem_unlink.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function sem_unlink() is thread safe.

sem_wait.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions sem_wait(), sem_trywait() and sem_timedwait() are
       thread safe.

setbuf.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions setbuf(), setbuffer(), setlinebuf() and setvbuf()
      are thread safe.

strlen.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strlen() is thread safe.

strnlen.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strnlen() is thread safe.

strpbrk.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strpbrk() is thread safe.

strsep.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function strsep() is thread safe.

swab.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function swab() is thread safe.

resolv.conf.5
  Carlos O'Donell
    DESCRIPTION: mention that the data is trusted
      In a recent discussion about DNSSEC it
 was brought to my
      attention that not all system administrators may understand
      that the information in /etc/resolv.conf is fully trusted.
      The resolver implementation in glibc treats /etc/resolv.conf
      as a fully trusted source of DNS information and passes on
      the AD-bit for DNSSEC as trusted.

      This patch adds a clarifying sentence to make it absolutely
      clear that indeed this source of information is trusted.

ascii.7
  Michael Kerrisk [Sulaiman Mustafa]
    Fix rendering of single quote (decimal character 39)
  Michael Kerrisk
    SEE ALSO: add utf-8(7)
  Michael Kerrisk [Duncan de Wet]
    Remove mention of ISO 8859-1 as being the default encoding on Linux

packet.7
  Neil Horman
    Document PACKET_FANOUT_QM fanout mode
  Michael Kerrisk
    Add kernel version for PACKET_FANOUT_QM
  Daniel Borkmann
    Improve PACKET_QDISC_BYPASS description

socket.7
  Michael Kerrisk
     Add kernel version number for SO_BUSY_POLL

========== Changes in man-pages-3.62 ==========

in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>
Joseph S. Myers <joseph@codesourcery.com>
Marius Gaubas <marius@livejournalinc.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peng Haitao <penght@cn.fujitsu.com>
Rick Stanley <rstanley@rsiny.com>
Simon Paillard <spaillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages
---

locale.1
  Michael Kerrisk [review from Mike Frysinger]
    New page describing locale(1)

Newly documented interfaces in existing pages
---

locale.5
  Michael Kerrisk
    Document LC_ADDRESS
  Michael
 Kerrisk
    Document LC_IDENTIFICATION
  Michael Kerrisk
    Document LC_MEASUREMENT
  Michael Kerrisk
    Document LC_NAME
  Michael Kerrisk
    Document LC_PAPER
  Michael Kerrisk
    Document LC_TELEPHONE

Removed Pages
---

sync.8
  Michael Kerrisk [Christoph Hellwig, Pádraig Brady]
    Sometime in the 20th century (before my watch), a sync(8)
    page into man-pages. It documents the sync command from
    "fileutils", which long ago become coreutils, and the
    piece under NOTES note some behavior of sync(2)
    that ceased to be true many years ago. The man-pages
    project generally focuses on only Linux kernel and
    (g)libc interfaces, so this sync(8) page doesn't really
    belong. Furthermore, coreutils has a sync(1) page which
    covers the same command. After discussions on the
    coreutils list, I've decided to retire this page from
    man-pages.

Changes to individual pages
---

clone.2
   Michael Kerrisk
     Note that CLONE_THREAD also in effect requires CLONE_VM

stat.2
  Michael Kerrisk [Marius Gaubas]
    Warn the reader that the 'stat' structure definition is not precise
      Padding fields aren't shown, and the order of fields varies
      somewhat across architectures.

gethostbyname.3
  Michael Kerrisk
    Remove redundant FTM requirements
      _GNU_SOURCE implies _SVID_SOURCE and _BSD_SOURCE, so

        _BSD_SOURCE || _SVID_SOURCE || _GNU_SOURCE

      is the same as

        _BSD_SOURCE || _SVID_SOURCE

getutmp.3
  Michael Kerrisk
    SEE ALSO: add utmpdump(1)

log1p.3
  Peng Haitao

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memccpy() is thread safe.

memchr.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions memchr(), memrchr() and rawmemchr() are thread safe.

mktemp.3
Michael Kerrisk
Make warning not to use this function more prominent

qecvt.3
Michael Kerrisk [Joseph S. Myers]
Recommend snprintf(3) not sprintf(3)

raise.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function raise() is thread safe.

remove.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function remove() is thread safe.

sem_destroy.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sem_destroy() is thread safe.

sem_getvalue.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sem_getvalue()
is thread safe.

sem_init.3

Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sem_init() is thread safe.

sockatmark.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sockatmark() is thread safe.

strcpy.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions strcpy() and strncpy() are thread safe.
Michael Kerrisk [Rick Stanley]
Fix a bug, and improve discussion of forcing termination with strncpy()

strspn.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions strspn() and strcspn() are thread safe.

tempnam.3
Michael Kerrisk
Make warning not to use this function more prominent

tmpnam.3
Michael Kerrisk
Recommend use mkstemp(3) or tmpfile(3) instead

locale.5
Michael Kerrisk
Add intro section that lists all of the LC categories
Michael Kerrisk

'p_cs_precedes' is for *positive* values
Michael Kerrisk
Clarify 'p_sign_posn' and 'n_sign_posn'; simplify 'n_sign_posn'
Add initial sentence for 'p_sign_posn' and 'n_sign_posn'.
Remove repeated list for 'n_sign_posn'.
Michael Kerrisk
Document LC_MESSAGES 'yesstr' and 'nostr'
Michael Kerrisk
Clarify LC_MONETARY 'n_cs_precedes'
Michael Kerrisk
LC_MONETARY: Document 'int_p_sign_posn' and 'int_n_sign_posn'
Michael Kerrisk
Clarify/rework 'p_cs_precedes' and 'n_cs_precedes'
Michael Kerrisk

LC_MONETARY: document 'int_p_sep_by_space' and 'int_n_sep_by_space'
Michael Kerrisk
Remove crufty reference to POSIX.2
Michael Kerrisk
LC_MONETARY: document 'int_p_cs_precedes' and 'int_n_cs_precedes'
Michael Kerrisk
Clarify/simplify 'n_sep_by_space'
Michael Kerrisk
LC_TIME: document 'cal_direction' and 'date_fmt'
Michael Kerrisk
Clarify 'p_sep_by_space'

feature_test_macros.7
Michael Kerrisk
_BSD_SOURCE and _SVID_SOURCE are deprecated in glibc 2.20
Michael Kerrisk
_GNU_SOURCE implicitly defines other macros
Saying that _GNU_SOURCE has the "effects of" other macros is not
quite precise.
Michael Kerrisk
Reword glibc version for _ISOC95_SOURCE
Michael Kerrisk
_ISOC99_SOURCE also exposes C95 definitions
Michael Kerrisk
_ISOC11_SOURCE implies the effects of _ISOC99_SOURCE
Michael Kerrisk
Note version number for _POSIX_C_SOURCE >= 200112L implies C99/C95
_POSIX_C_SOURCE >= 200112L causes C95 definitions to be
exposed only since glibc 2.12 and C99 definitions only
since 2.10.
Michael Kerrisk
_XOPEN_SOURCE may implicitly define _POSIX_SOURCE and _POSIX_C_SOURCE
Michael Kerrisk
Reword glibc version for _ISOC99_SOURCE
Michael Kerrisk
Rework discussion of _ISOC99_SOURCE
Michael
Kerrisk
Improve discussion of _DEFAULT_SOURCE
Michael Kerrisk
_POSIX_C_SOURCE >= 200112L implies C95 and C95 features

Apologies if I missed anyone!

New and rewritten pages
---

duplocale.3
  Michael Kerrisk
    New page documenting duplocale(3)

newlocale.3
  Michael Kerrisk [Mike Frysinger]
    New page documenting newlocale(3) and freelocale(3)

towlower.3
  Michael Kerrisk
    Largely rewrite description of towlower() to be simpler and clearer

towupper.3
  Michael Kerrisk
    Largely rewrite description of towupper() to be simpler and clearer

uselocale.3
  Michael Kerrisk
    New page documenting uselocale(3)

Newly documented interfaces in existing pages
---

open.2
  Michael Kerrisk
    Document O_DSYNC and rewrite discussion of O_SYNC

isalpha.3
  Michael Kerrisk
    Document the "_l" locale APIs
      The GNU C library v2.3 added some locale APIs, most of which
      were later specified in POSIX.1-2008, namely:

          isalnum_l()
          isalpha_l()
          isblank_l()
          iscntrl_l()
          isdigit_l()

    isgraph_l()
          islower_l()
          isprint_l()
          ispunct_l()
          isspace_l()
          isupper_l()
          isxdigit_l()
          isascii_l()

      Also update and correct various pieces in CONFORMING TO
      (and remove a few crufty old pieces there).

strerror.3
  Michael Kerrisk
    Document strerror_l()

toupper.3
  Michael Kerrisk
    Document toupper_l() and tolower_l()

towlower.3
  Michael Kerrisk
    Document towlower_l()

towupper.3
  Michael Kerrisk
    Document towupper_l()

proc.5

Michael Kerrisk
Document /proc/sys/kernel/random/uuid

locale.7
Michael Kerrisk
Document LC_ADDRESS
Document LC_IDENTIFICATION
Document LC_MEASUREMENT
Document LC_NAME
Document LC_PAPER
Document LC_TELEPHONE

New and changed links
---

freelocale.3
Michael Kerrisk
New link
to new newlocale.3 page

isalnum_l.3
isascii_l.3
isblank_l.3
iscntrl_l.3
isdigit_l.3
isgraph_l.3
islower_l.3
isprint_l.3
ispunct_l.3
isspace_l.3
isupper_l.3
isxdigit_l.3
Michael Kerrisk
New links to isalpha.3

tolower_l.3
toupper_l.3
Michael Kerrisk
New links to toupper.3

towlower_l.3
Michael Kerrisk
New link to towlower.3

towupper_l.3
Michael Kerrisk
New link to towupper.3

Global changes

Various pages
  Michael Kerrisk
    Global change: "upper case" ==> "uppercase", "lower case" ==> lowercase"

Changes to individual pages
---

mount.2
  Michael Kerrisk
    SEE ALSO: add blkid(1)

msgop.2
  Michael Kerrisk
    Document two MSG_COPY failure modes
      Since Linux 3.14, the kernel now diagnoses two errors
      when using msgrcv() MSG_COPY:
      * MSG_COPY must be specified with IPC_NOWAIT
      * MSG_COPY can't be specified with MSG_EXCEPT

open.2

 Michael Kerrisk
    Organize some material under additional subheadings in NOTES
      There's an amorphous mass of material under NOTES. Structure
      it with some subheadings, and do a little reorganizing.
  Michael Kerrisk
    Add other system calls and functions that are like openat()
      fanotify_mark(2), name_to_handle_at(2), and scandirat(3) have a
      directory file descriptor argument for the same reason as openat().
      Also: reword the rationale for the *at() functions somewhat.
  Michael Kerrisk
    Clarify ELOOP error interaction with O_PATH

readahead.2
  Phillip Susi [Corrado Zoccolo, Gregory P. Smith, Zhu Yanhai, Michael Kerrisk, Christoph Hellwig]
    Don't claim the call blocks until all data has been read
      The readahead(2) man page was claiming that the call blocks until
      all data has been read into the cache. This is incorrect.

      See https://bugzilla.kernel.org/show_bug.cgi?id=54271

stat.2

Michael Kerrisk
SEE ALSO: add ls(1) and stat(1)

fts.3
Christoph Hellwig [Michael Kerrisk]
The fts(3) API does not work with LFS builds
As pointed out during a recent discussion on libc-hacker the
fts(3) APIs can't be used with large file offsets:

https://sourceware.org/bugzilla/show_bug.cgi?id=15838

mbrtowc.3
mbsnrtowcs.3
mbsrtowcs.3
mbtowc.3
Michael Kerrisk
Add entries in SEE ALSO
Mainly inspired by the POSIX pages.

mbsinit.3
Michael Kerrisk
SEE ALSO: add mbrlen(3), mbrtowc(3), and wcrtomb(3)

mbsrtowcs.3
wcsrtombs.3
Michael Kerrisk
SEE ALSO: add mbsinit(3)

mbstowcs.3
Michael Kerrisk [Stefan Puiu]
Add example program
And add some SEE ALSO entries

memcmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memcmp() is thread safe.

memcpy.3
Peng Haitao
ATTRIBUTES: Note
function that is thread-safe
The function memcpy() is thread safe.

memfrob.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function memfrob() is thread safe.

memmem.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memmem() is thread safe.

memmove.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memmove() is thread safe.

mempcpy.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions mempcpy() and wmempcpy() are thread safe.

memset.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function memset() is thread safe.

strerror.3
  Michael Kerrisk
    CONFORMING TO: strerror() and strerror_r() are in POSIX.1-2008
  Michael Kerrisk
    Add SS heading for strerror_r()

toupper.3
  Michael Kerrisk
    Rewrite to more explicitly bring locales into
 the discussion
  Michael Kerrisk
    Retitle BUGS section to NOTES
      These are not really bugs, just background info.

wcrtomb.3
wcsnrtombs.3
wcsrtombs.3
wcstombs.3
wctomb.3
  Michael Kerrisk
    SEE ALSO: add various entries
      Mainly inspired by POSIX

core.5
  Mike Frysinger [Michael Kerrisk]
    Document core_pattern %d specifier
    Document %P core_pattern specifier

Michael Kerrisk
Rearrange core_pattern specifiers alphabetically

locale.5
Michael Kerrisk
SEE ALSO: add newlocale(3) + duplocale(3)

feature_test_macros.7
Michael Kerrisk [Joseph S. Myers]
Remove mention of bogus _ISOC95_SOURCE macro
The _ISOC95_SOURCE macro is defined in <features.h>, but it
does nothing. So remove discussion of it, and move some of
the discussion of C95 under the _ISOC99_SOURCE subhead.
Michael Kerrisk [Carlos O'Donell]
Add packaging note for _BSD_SOURCE/_SVID_SOURCE/_DEFAULT_SOURCE
To compile warning-free across glibc < 2.20 and glibc >= 2.20
code may been to define both _DEFAULT_SOURCE and either
_BSD_SOURCE or _SVID_SOURCE.
Michael Kerrisk
Reword description of C90

locale.7
Michael Kerrisk
Add subsection on POSIX.1-2008 (originally GNU) extensions to locale API
Michael Kerrisk
Remove reference to LI18NUX2000
LI18NUX2000 is difficult to even find these days, and in any case
this page does not document gettext(), so notes about gettext()
in the CONFORMING TO section here make no sense.
Michael Kerrisk
SEE ALSO: add mbstowcs(3) and wcstombs(3)
SEE ALSO: add newlocale(3) + duplocale(3)

man-pages.7
Michael Kerrisk
Add preferred term "superblock"
Michael Kerrisk
Add preferred terms "uppercase" and "lowercase"

========== Changes in man-pages-3.64 ==========

Released: 2014-04-06,
Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Abhay Sachan <sachan.abhay@gmail.com>
Alexey Samsonov <samsonov@google.com>
Andrey Vagin <avagin@openvz.org>
Aneesh Kumar K.V <aneesh.kumar@linux.vnet.ibm.com>
Christoph Hellwig <hch@infradead.org>
David Prévot <taffit@debian.org>
Eric Dumazet <edumazet@google.com>
Eric W. Biederman <ebiederm@xmission.com>
Jan Kara <jack@suse.cz>
Kir Kolyshkin <kir@openvz.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Peter Hurley <peter@hurleysoftware.com>
Petr Gajdos <pgajdos@suse.cz>
Robert P. J. Day <rpjday@crashcourse.ca>
Vince Weaver <vincent.weaver@maine.edu>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

open_by_handle_at.2
  Michael Kerrisk [Mike Frysinger, Neil Brown, Aneesh Kumar K.V,
  Christoph Hellwig]
    New page describing name_to_handle_at(2) and open_by_handle_at(2)

inotify.7
  Michael Kerrisk
    Rewrite introductory section
    Reorganize "Limitations and caveats" subsection
  Michael Kerrisk
    Further describe the race when adding a watch to a new subtree
  Michael Kerrisk
    Directory renames may invalidate multiple paths cached by application
  Michael Kerrisk
    Add paragraph on cache consistency checking
  Michael Kerrisk

Mention cache rebuilding to handle overflow events
Michael Kerrisk
Moving an object to another filesystem generates IN_DELETE_SELF
Michael Kerrisk [Jan Kara]
Add text on dealing with rename() events
Michael Kerrisk
Note rationale and consequences of event coalescing
Michael Kerrisk [Eric W. Biederman]
Inotify doesn't work for remote and pseudo filesystems
Michael Kerrisk
Add some examples of events generated by various system calls
Michael Kerrisk
BUGS: IN_ONESHOT does now cause IN_IGNORED when the watch is dropped
A silent change as a result of the fanotify work in kernel 2.6.36.
Michael Kerrisk
Note that IN_DELETE_SELF will be followed by IN_IGNORED
Michael Kerrisk
Note that IN_UNMOUNT will be followed by an IN_IGNORED event
Michael Kerrisk
Inotify does not report events for mmap(2) and msync(2)
Michael Kerrisk
Add examples of syscalls that trigger IN_ATTRIB
Michael Kerrisk
Add some examples of syscalls that trigger IN_MODIFY
Michael Kerrisk
execve(2) also generates IN_ACCESS
Michael Kerrisk
Add examples of syscalls that trigger IN_CREATE

Newly documented interfaces in existing pages
---

perf_event_open.2
Vince Weaver [Michael Kerrisk]
Document the PERF_FLAG_FD_CLOEXEC flag

The Linux 3.14 release adds support for the PERF_FLAG_FD_CLOEXEC
flag.

feature_test_macros.7
Michael Kerrisk
Document _LARGEFILE_SOURCE

tcp.7
Michael Kerrisk [Eric Dumazet]
Document /proc/sys/net/ipv4/tcp_autocorking
Text heavily based on Documentation/networking/ip-sysctl.txt

New and changed links
---

name_to_handle_at.2
  Michael Kerrisk
    New link to new open_by_handle_at(2) page

Global changes
---

fmemopen.3
getaddrinfo.3
mq_notify.3
offsetof.3
aio.7
  Michael Kerrisk
    Print size_t/ssize_t values using %z printf() modifier
      There are fewer and fewer systems these days that don't
      support the %z specifier mandated in C99. So replace the
      use of %ld/%lu + (long) cast with %zd/%zu.

Changes to individual pages
---

bdflush.2
fsync.2
sync.2
  Kir Kolyshkin
    SEE ALSO: remove update(8) reference
      Remove
 reference to update(8) man page, since there is no such
      page. This is an ancient BSD leftover I believe.

chown.2
  Michael Kerrisk
    Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

getxattr.2
  Abhay Sachan
    Fix RETURN VALUE description
      A EA can have length zero.

inotify_add_watch.2
  Michael Kerrisk

ERRORS: add ENAMETOOLONG

inotify_init.2
Michael Kerrisk
Add pointer to inotify(7)

link.2
Michael Kerrisk
When AT_EMPTY_PATH is specified, 'olddirfd' must not refer to a
directory

mmap.2
Andrey Vagin
The file descriptor for a file mapping must be readable
There is no difference between MAP_SHARED and MAP_PRIVATE.

open.2
Michael Kerrisk
SEE ALSO: add open_by_name_at(2)

perf_event_open.2
Vince Weaver
Document PERF_EVENT_IOC_PERIOD behavior change
Linux 3.14 (in commit bad7192b842c83e580747ca57104dd51fe08c223)
changes
the perf_event PERF_EVENT_IOC_PERIOD ioctl() behavior
on all architectures to update immediately, to match the behavior
found on ARM.

stat.2
Michael Kerrisk
Note that 'dirfd' can be AT_FDCWD when AT_EMPTY_PATH is used

syscalls.2
Michael Kerrisk
Add sched_getattr() and sched_setattr()
And update kernel version to 3.14

abort.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function abort() is thread safe.

confstr.3
Michael Kerrisk
SEE ALSO: add getconf(1), fpathconf(3), sysconf(3), pathconf(3)

exit.3

Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function exit() is not thread safe.

fenv.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions feclearexcept(), fegetexceptflag(), feraiseexcept(),
fesetexceptflag(), fetestexcept(), fegetround(), fesetround(),
fegetenv(),
feholdexcept(), fesetenv(), feupdateenv(),
feenableexcept(), fedisableexcept() and fegetexcept() are thread
safe.

fpathconf.3
Michael Kerrisk
SEE ALSO: add confstr(3)

fseek.3
Michael Kerrisk [Petr Gajdos]
Document EINVAL error for negative file offset

fseeko.3
Michael Kerrisk
Add feature test macro requirements

fts.3
Michael Kerrisk [Mike Frysinger]
Remove mention of "32-bit systems" in BUGS

fwide.3
wprintf.3
Michael Kerrisk [Robert P. J. Day]
Remove mention of bogus _ISOC95_SOURCE feature test macro

getline.3
Alexey Samsonov
Caller should free the allocated buffer even if getline() failed
Relevant discussion in glibc bugzilla:
https://sourceware.org/bugzilla/show_bug.cgi?id=5666

getloadavg.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getloadavg() is thread safe.

getpt.3
Peng Haitao

ATTRIBUTES:
Note function that is thread-safe
The function getpt() is thread safe.

if_nametoindex.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions if_nametoindex() and if_indextoname() are thread safe.

index.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions index() and rindex() are thread safe.

mkfifo.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mkfifo() and mkfifoat() are thread safe.

netlink.3
Michael Kerrisk
SEE ALSO: make the reference for libnetlink the libnetlink(3) man page

random.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions random(), srandom(), initstate() and setstate()
are thread safe.

random_r.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions random_r(), srandom_r(), initstate_r() and
setstate_r() are thread safe.

sigvec.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sigvec(), sigblock(), sigsetmask() and
siggetmask() are thread safe.

The macro sigmask() is thread safe.

sysconf.3
Michael Kerrisk
SEE ALSO: add confstr(3)

termios.3

Michael Kerrisk [Peter Hurley]
Fix error in discussion of MIN > 0, TIME == 0 noncanonical mode
As reported by Peter Hurley, for the MIN > 0, TIME == 0 case:

read() may unblock when MIN bytes are available but return
up to the 'count' parameter if more input arrives in between
waking and copying into the user buffer.
...
read() may also _not_ return until MIN bytes have been
received, even if 'count' bytes have been received.
Michael Kerrisk
Add a note on interaction of O_NONBLOCK with noncanonical MIN/TIME
POSIX leaves the behavior open.
Michael Kerrisk
Clarify termination conditions for MIN > 0, TIME > 0
Michael Kerrisk
Clarify behavior if data is available before noncanonical read()
Michael Kerrisk
Add descriptive titles to noncanonical read() cases

symlink.7
Michael Kerrisk
Add subsection on opening a symbolic link with O_PATH
Michael Kerrisk
name_to_handle_at(2) and open_by_handle_at(2) optionally follow symlinks
Michael Kerrisk
Mention use of readlink(2) to read contents of a symlink

========== Changes in man-pages-3.65 ==========

Released: 2014-04-20, Munich

Apologies if I missed anyone!

New and rewritten pages
---

inet_net_pton.3
  Michael Kerrisk
    New page describing inet_net_pton(3) and inet_net_ntop(3)

Newly documented interfaces in existing pages
---

fallocate.2
  Michael Kerrisk, Namjae Jeon [Christoph Hellwig, Dave Chinner]
    Document FALLOC_FL_COLLAPSE_RANGE

prctl.2
   Michael Kerrisk [Alex Thorlton]
    Document PR_SET_THP_DISABLE and PR_GET_THP_DISABLE

proc.5
  Michael Kerrisk
    Document /proc/[pid]/stack
  Michael Kerrisk
    Document /proc/[pid]/clear_refs

New and changed links
---

inet_net_ntop.3
  Michael Kerrisk

New link to new inet_net_pton.3

Changes to individual pages
---

fcntl.2
  Michael Kerrisk
    Note the race when O_CLOEXEC is used at same time as fork()+execve()

madvise.2
  Michael Kerrisk
    SEE ALSO: see prctl(2)
      Because of PR_SET_THP_DISABLE.

mlock.2
  Michael Kerrisk
    Describe treatment of MCL_FUTURE during fork(2) and execve(2)

msync.2
  Michael Kerrisk [Richard Hansen, Greg Troxel]
    Warn that one of MS_SYNC or MS_ASYNC is required

open.2
  Michael Kerrisk
    Add more detail on the race that O_CLOEXEC is designed to avoid
  Michael Kerrisk [Matthew Dempsky]
    Remove
 crufty text stating that O_DIRECTORY is Linux-specific
  Michael Kerrisk
    Note which filesystems support O_TMPFILE

perf_event_open.2
  Vince Weaver [Michael Kerrisk]
    Clarify EACCES and EPERM errors
      Clarify the reasons for EACCES and EPERM errors.
  Vince Weaver [Michael Kerrisk]
    Make the ERRORS section more comprehensive.
      Determined both by code inspection and by writing a large
      number of test programs.

personality.2
  Michael Kerrisk
    Available execution domains are listed in <sys/personality.h>
  Michael Kerrisk
    Fix discussion of return value

prctl.2

Michael Kerrisk
ERRORS: document EINVAL for PR_GET_NO_NEW_PRIVS
ERRORS: document EINVAL for PR_SET_PDEATHSIG
ERRORS: document EINVAL for PR_SET_TIMING
ERRORS: document EINVAL for PR_SET_DUMPABLE
ERRORS: document EINVAL for PR_SET_NO_NEW_PRIVS

shmget.2
Michael Kerrisk
Rewrite description of SHMMNI
default value
Michael Kerrisk
Note default value of SHMMAX
Note default value for SHMALL

byteorder.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions htonl(), htons(), ntohl() and ntohs() are thread safe.

fexecve.3
Michael Kerrisk [Steven Stewart-Gallus]
If 'fd' is a close-on-exec file descriptor for a script, fexecve() fails
See https://bugzilla.kernel.org/show_bug.cgi?id=74481

ffs.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions ffs(), ffsl() and ffsll() are thread safe.

getauxval.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getauxval() is thread safe.

getcontext.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getcontext() and setcontext() are thread safe.

getsubopt.3
Peng Haitao
ATTRIBUTES: Note function that
is thread-safe
The function getsubopt() is thread safe.

getutmp.3

Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getutmp() and getutmpx() are thread safe.

inet.3
Michael Kerrisk
Note success and error return for inet_aton()

inet.3
Michael Kerrisk [Craig McQueen]
The form 'a.b' if is suitable for Class A addresses (not class C)
Michael Kerrisk
SEE ALSO: add inet_net_pton(3)

makecontext.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions makecontext() and swapcontext() are thread safe.

pthread_attr_setdetachstate.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setdetachstate() and
pthread_attr_getdetachstate() are thread safe.

pthread_attr_setguardsize.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setguardsize()
and
pthread_attr_getguardsize() are thread safe.

sigsetops.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions sigemptyset(), sigfillset(), sigaddset(),
sigdelset(), sigismember(), sigisemptyset(), sigorset() and
sigandset() are thread safe.

proc.5
Petr Gajdos
Improve /proc/[pid]/smaps entries description
Michael Kerrisk
/proc/PID/smaps is present only if CONFIG_PROC_PAGE_MONITOR
Michael Kerrisk
Note kernel version for /proc/sys/kernel/{shmall,shmmax}
Michael Kerrisk
Note kernel version for /proc/sys/kernel/{msgmax,msgmnb}

capabilities.7
  Michael Kerrisk
    SEE ALSO: add capsh(1)

libc.7
  Michael Kerrisk
    Add musl libc

Yuri Kozlov <yuray@komyakino.ru>

Apologies
if I missed anyone!

New and rewritten pages
---

fanotify_init.2
  Heinrich Schuchardt, Michael Kerrisk
    New page documenting fanotify_init(2)

fanotify_mark.2
  Heinrich Schuchardt, Michael Kerrisk
    New page documenting fanotify_mark(2)

sched_setscheduler.2
  Michael Kerrisk
    Page rewritten
      Stripped out the general scheduling material, which
      moved to sched(7), and rewrote much of the remainder.
      Changed copyright and license since pretty much all
      of the content was or is written by mtk.

fanotify.7
  Heinrich Schuchardt, Michael Kerrisk
    New page providing overview of the fanotify API

sched.7
  Michael Kerrisk
    New page providing an overview of the scheduling APIs
      Most of this content derives from sched_setscheduler(2). In
      preparation for adding a sched_setattr(2) page, it makes
      sense to isolate out this general content to
a separate
      page that is referred to by the other scheduling pages.

Newly documented interfaces in existing pages
---

fallocate.2
  Lukas Czerner [Michael Kerrisk]
    Document FALLOC_FL_ZERO_RANGE
      FALLOC_FL_ZERO_RANGE was added in Linux 3.14,
      for zeroing ranges in the allocated space in a file.

rename.2
  Miklos Szeredi [Michael Kerrisk]

Document renameat2() system call added in Linux 3.15

shmop.2
Michael Kerrisk
Document SHM_EXEC

Changes to individual pages
---

flock.2
Michael Kerrisk
Employ term "open file description" in DESCRIPTION
And include reference to open(2) for an explanation of the term.

getpriority.2
Michael Kerrisk
SEE ALSO: add sched(7)

getsockopt.2
Carsten Andrich
SEE ALSO: add packet(7)

link.2
Michael Kerrisk [Steven Stewart-Gallus]
Document ENOENT error for linkat()
See https://bugzilla.kernel.org/show_bug.cgi?id=73301

msgget.2
Michael Kerrisk
Reword EEXIST error

msgop.2
Michael Kerrisk
Note capability required to raise MQ size beyond MSGMNB

msync.2
Michael Kerrisk [Heinrich Schuchardt]
s/flushes... back to disk/flushes... back to filesystem/

nice.2
Michael Kerrisk
SEE ALSO: add sched(7)

open.2
Peter Schiffer
Update note on alignment of user buffer and file offset for O_DIRECT
The sentence in open(2) man page in notes for O_DIRECT flag:

"Under Linux 2.6, alignment to 512-byte boundaries suffices."

is not universally correct. The alignment is a property of the
storage, for example, 4k-sector drives with no 512 byte sector
emulation will be unable to perform 512-byte direct I/O.
Michael Kerrisk
Note some of the various synonyms for "open file description"
Michael Kerrisk
Remove repetitious
text on use of fcntl() to change file status flags

open_by_handle_at.2
Michael Kerrisk
Mention FreeBSD analogs

posix_fadvise.2
Michael Kerrisk [Eric Siegerman]
Fix wording error under "Architecture-specific variants"
See https://bugzilla.kernel.org/show_bug.cgi?id=75431

process_vm_readv.2
Michael Kerrisk [Stijn Hinterding]
Add feature test macro requirements
The _GNU_SOURCE FTM must be defined.

read.2
Michael Kerrisk
BUGS: detail nonatomicity bug with respect to file offset updates
This bug was fixed in Linux 3.14, with commit
9c225f2655e36a470c4f58dbbc99244c5fc7f2d4
See also http://thread.gmane.org/gmane.linux.kernel/1649458

sched_get_priority_max.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_rr_get_interval.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_setaffinity.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_setparam.2
Michael Kerrisk
Small changes consistent with migration of content to sched(7)

sched_yield.2
  Michael Kerrisk
    Small changes consistent with migration of content to sched(7)

semget.2
  Michael Kerrisk
    Consolidate discussion on noninitialization of semaphores
      The fact that semget() does not initialize the semaphores
      in a new set was covered in two places (in DESCRIPTION
      and BUGS). Consolidate these into one place (in NOTES)
      and also point out that POSIX.1-2008 says that a future
      version of the standard may require an implementation to
      initialize the semaphores to 0.
  Michael Kerrisk
    Clarify SEMMNS versus SEMMSL*SEMMNI
  Michael Kerrisk
    Rework EINVAL text a little
  Michael Kerrisk
    Clarify wording for EEXIST error

shmget.2
  Manfred Spraul
     Clarify SHMALL
      The default for SHMALL is a limit of 8 GB, regardless of
      PAGE_SIZE. The current documentation does not mention that
      and is therefore more difficult to understand than necessary.
  Manfred Spraul
    Correct math error
      2097152 is 2^21, not 2^20.
  Michael Kerrisk
    Reword EEXIST error
  Michael Kerrisk
    Clarify one of the EINVAL cases
  Michael Kerrisk
    Note that SHM_NORESERVE is a Linux extension
  Michael Kerrisk [Simon Paillard]
    Fix kernel version numbers in discussion of SHMALL
  Michael Kerrisk
    Rework EINVAL text
  Michael Kerrisk
    Move and rework discussion of mode bits
  Michael Kerrisk
    Reword description of O_EXCL

shmop.2
  Michael Kerrisk
    Move fork(2), execve(2), _exit(2) discussion to NOTES

Michael Kerrisk
Add subheads for shmat() and shmdt()
Michael Kerrisk
Rework discussion of SHM_RDONLY and SHM_REMAP
into list format
Michael Kerrisk
Structure the attach cases as a list

sigaction.2
Alan Curry
Fix bad cross reference (times(2) not time(2))
The system call that reports child CPU usage is times(2),
not time(2).

symlink.2
Michael Kerrisk [Steven Stewart-Gallus]
Document ENOENT error for symlinkat()
See https://bugzilla.kernel.org/show_bug.cgi?id=73301

syscalls.2
Michael Kerrisk
Add renameat2()
And bump kernel version.

write.2
Michael Kerrisk
BUGS: detail nonatomicity bug with respect to file offset updates
This bug was fixed in Linux 3.14, with commit
9c225f2655e36a470c4f58dbbc99244c5fc7f2d4
See also http://thread.gmane.org/gmane.linux.kernel/1649458

pthread_attr_setinheritsched.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setinheritsched() and
pthread_attr_getinheritsched()
are thread safe.

pthread_attr_setschedparam.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setschedparam() and
pthread_attr_getschedparam() are thread safe.

pthread_attr_setschedpolicy.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setschedpolicy() and

pthread_attr_getschedpolicy() are thread safe.

pthread_attr_setscope.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setscope() and pthread_attr_getscope()
      are thread safe.

pthread_attr_setstack.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setstack() and pthread_attr_getstack()
      are thread safe.

sched_getcpu.3
  Michael Kerrisk
    SEE ALSO: add sched(7)

termios.3
  Michael Kerrisk [Yuri Kozlov]
     Rework intro text for 'c_oflag'
  Michael Kerrisk
    OFDEL is in POSIX.1-2001, so remove "(Not in POSIX)" text

proc.5
  Jan Moskyto Matejka [Randy Dunlap]
    Improve description of /proc/stat 'intr' field
      The sum at the beginning of line "intr" includes also
      unnumbered interrupts.

packet.7
  Carsten Andrich [Neil Horman]
    Improve sockopt documentation for packet sockets
  Carsten Andrich [Willem de Bruijn]
    PACKET_LOSS has inverse meaning
  Stefan Puiu [Daniel Borkmann, Carsten Andrich]
    Status in PACKET_RX_RING is actually a bit mask
  Michael Kerrisk [Carsten Andrich]
    SEE ALSO: add /tools/testing/selftests/net/psock_tpacket.c

========== Changes in man-pages-3.67 ==========

Released: 2014-05-21, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated
 in changes in this release:

Andy Lutomirski <luto@amacapital.net>
Aurelien Jarno <aurelien@aurel32.net>
Bill Allombert <ballombe@debian.org>
Christoph Hellwig <hch@infradead.org>
Davidlohr Bueso <davidlohr@hp.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Ingo Schwarze <schwarze@usta.de>
Jan Kara <jack@suse.cz>
Jon Grant <jg@jguk.org>
Juri Lelli <juri.lelli@gmail.com>
Lucas De Marchi <lucas.demarchi@profusion.mobi>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Peter Zijlstra <peterz@infradead.org>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Sam Varshavchik <mrsam@courier-mta.com>
Simon Paillard <spaillard@debian.org>
Steven Stewart-Gallus <sstewartgallus00@mylangara.bc.ca>
Török Edwin <edwin@etorok.net>
William Morriss <wjmelements@gmail.com>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
----

sched_setattr.2
  Michael Kerrisk, Peter Zijlstra [Juri Lelli]
    New page describing sched_setattr(2)
 and sched_getattr(2)

system.3
  Michael Kerrisk
    Rewrote large parts of the page and added a number of details

Newly documented interfaces in existing pages
---

sched.7

Peter Zijlstra, Michael Kerrisk [Juri Lelli]
Document SCHED_DEADLINE

New and changed links
---

renameat2.2
Michael Kerrisk
New link to rename.2

sched_getattr.2
Michael Kerrisk
New link to new sched_setattr

Changes to individual pages
---

bind.2
Michael Kerrisk
ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

chown.2
Michael Kerrisk
NOTES: Add some subheadings

connect.2
Michael Kerrisk [William Morriss]
ERRORS: Add EADDRNOTAVAIL for ephemeral port range exhaustion
Verified from testing and the kernel source.
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=745775
Michael Kerrisk
Remove mention
of ip_local_port_range under EAGAIN error

create_module.2
delete_module.2
init_module.2
query_module.2
Michael Kerrisk [Lucas De Marchi]
Clarify glibc header file declaration/ABI wrapper details
create_module(), delete_module(), init_module(), and
query_module() are not declared in header files, but
through an accident of history glibc provides an ABI
for them that it continues to maintain, for
compatibility reasons.

execve.2

Michael Kerrisk [Steven Stewart-Gallus]
Note SIGKILL case when execve() fails beyond the point of no return
Michael Kerrisk
NOTES: Add a subheading and reorder paragraphs

fanotify_init.2
Heinrich Schuchardt [Michael Kerrisk]
Document range of permitted flags for event_f_flags
With a new patch included in the mm tree, event_f_flags is
checked for allowable values.

fcntl.2
Michael Kerrisk
Add "file locking" subheading
under NOTES

fork.2
Michael Kerrisk
ERRORS: SCHED_DEADLINE tasks can fail with EAGAIN
SCHED_DEADLINE tasks can fail with EAGAIN unless the
reset-on-fork flag is set.

futex.2
Michael Kerrisk
Note that there is no glibc wrapper

getpriority.2
Rasmus Villemoes
Fix prototypes for getpriority() and setpriority()
The who argument has type id_t (which happens to be u32 on linux).

get_robust_list.2
Rasmus Villemoes
Add <sys/types.h> to synopsis of get_robust_list()
If one were to implement wrappers for [gs]et_robust_list() using the
given prototypes, one would also have to include sys/types.h to get
a definition of size_t.

getrusage.2
Michael Kerrisk [Bill Allombert]
_GNU_SOURCE must be defined to obtain RUSAGE_THREAD definition
See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=746569

link.2
open.2
Andy Lutomirski [Michael Kerrisk]
Update AT_EMPTY_PATH and O_PATH documentation

listen.2
  Michael Kerrisk
    ERRORS: Add EADDRINUSE for ephemeral port range exhaustion

mbind.2
  Rasmus Villemoes
    Fix prototype for mbind(2)
      The nmask argument is const. The return type in numaif.h is long.
      (Well, at least <numaif.h> says nmask is const. The current kernel
      does not define it as a const argument, but sys_mbind() only
      passes it to get_nodes(), which does treat it as const.)

msgop.2
  Davidlohr Bueso [Michael Kerrisk]
    Enhance description of "full queue" criteria

poll.2
  Rasmus Villemoes
    Add <signal.h> to synopsis for ppoll()
      One needs to #include <signal.h> to get the definition of the
      type (sigset_t) of the mask argument to ppoll().

readlink.2
  Rasmus Villemoes
    Fix return type of readlinkat()

recv.2
  Michael Kerrisk
    Clarify details of msg_name and msg_namelen fields

recvmmsg.2

 Michael Kerrisk
    Describe timeout bug
      See https://bugzilla.kernel.org/show_bug.cgi?id=75371
      and http://thread.gmane.org/gmane.linux.man/5677

remap_file_pages.2
  Andy Lutomirski [Christoph Hellwig, Andy Lutomirski]
    remap_file_pages() has no benefit for real files
      Linux commit 3ee6dafc677a68e461a7ddafc94a580ebab80735 caused
      remap_file_pages to be emulated when used on real file.

sched_get_priority_max.2
  Michael Kerrisk
    'policy' can also be SCHED_DEADLINE

sched_setaffinity.2

Rasmus Villemoes
Fix prototype for sched_setaffinity()
The mask argument is const.

sched_setparam.2
Michael Kerrisk
ERRORS: mark errors that apply just for sched_setparam()
Michael Kerrisk
ERRORS: Add EINVAL for invalid arguments
Michael Kerrisk
SEE ALSO: add sched_setattr(2)

sched_setscheduler.2
Michael Kerrisk
ERRORS: mark errors that apply just to sched_setscheduler()
Michael Kerrisk
ERRORS: add EINVAL case for pid < 0
Michael Kerrisk
ERRORS: separate out EINVAL cases

semget.2
Michael Kerrisk
NOTES: Add subheadings and reorder paragraphs

semop.2
Rasmus Villemoes
Fix prototypes for semop() and semtimedop()
The nsops arguments have type size_t, not unsigned, and the
timeout argument of semtimedop() is const.
Michael Kerrisk
NOTES: Add a subheading

send.2
Michael Kerrisk
Add details on various 'msghdr' fields
Michael Kerrisk
ERRORS: Add EAGAIN for ephemeral port range exhaustion
Michael Kerrisk
Add some subheadings under DESCRIPTION

shmget.2
Michael Kerrisk
NOTES: Add a subheading

stat.2
Michael Kerrisk [Aurelien Jarno]
Describe feature test macro requirements for file type test macros
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728240

Michael Kerrisk
Update FTM requirements
for lstat()
Michael Kerrisk
Split discussion of 'st_mode' fields into type and permissions
Michael Kerrisk
Move text on S_I*() macros to follow text on S_I* macros
That ordering is more logical

stime.2
Rasmus Villemoes
Fix prototype for stime()
The argument is const, both according to the actual header files and
according to <http://www.sco.com/developers/devspecs/vol1a.pdf>.

syscall.2
Rasmus Villemoes
Fix prototype for syscall()
The first argument and the return value of syscall() has type long,
not int.

getopt.3
Michael Kerrisk
EXAMPLE: Add subheadings to distinguish the two example programs

malloc.3
Michael Kerrisk
Reword text referring to mallopt(3)
Linux libc is no longer "recent"; drop mention of it.

pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_setaffinity_np.3
pthread_setschedparam.3
pthread_setschedprio.3
pthread_yield.3
pthreads.7
Michael Kerrisk
Change references to "sched_setscheduler(2)" to "sched(7)"
Change consistent with the fact that the scheduling overview
page is now sched(7) not sched_setscheduler(2).

pthread_attr_setstackaddr.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_attr_setstackaddr() and
pthread_attr_getstackaddr() are thread safe.

pthread_attr_setstacksize.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_attr_setstacksize() and
      pthread_attr_getstacksize() are thread safe.

pthread_kill.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_kill() is thread safe.

pthread_kill_other_threads_np.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_kill_other_threads_np()
 is thread safe.

pthread_self.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_self() is thread safe.

pthread_setcancelstate.3
  Michael Kerrisk
    Add paragraph breaks to "Asynchronous cancelability" subsection

pthread_setcancelstate.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_setcancelstate() and
      pthread_setcanceltype() are thread safe.
  Michael Kerrisk
    NOTES: Add some subheadings

pthread_setschedparam.3
  Peng Haitao
    ATTRIBUTES: Note functions that are thread-safe
      The functions pthread_setschedparam() and pthread_getschedparam()
      are thread safe.

pthread_setschedprio.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread-safe
      The function pthread_setschedprio() is thread safe.

pthread_sigmask.3
  Peng Haitao

ATTRIBUTES: Note function that is thread-safe
The function pthread_sigmask() is thread safe.

pthread_sigqueue.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_sigqueue() is thread safe.

pthread_testcancel.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_testcancel() is thread safe.

pthread_yield.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_yield() is thread safe.

remquo.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions remquo(), remquof() and remquol() are thread safe.

rtime.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function rtime() is thread safe.

sched_getcpu.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function sched_getcpu() is thread safe.

stpcpy.3
Ingo Schwarze
Note some history of
stpcpy()
Quoting Ingo:
I just noticed that the stpcpy(3) manual contains a speculation
that appears to be untrue on closer investigation: That function
did not originate in MS DOS, but in Lattice C on AmigaDOS.

Here is a patch against the git master HEAD to fix that, and add
some more historical information. To provide some background and
allow you to more easily verify the correctness of the patch, i'm
appending my mail to <misc@openbsd.org>, where i'm giving some
more details about the history and pointing to some primary
sources. That mail also contains the (similar, but shorter)

patch i just committed to the OpenBSD manual page.

strcasecmp.3
  Michael Kerrisk [Aurelien Jarno, Török Edwin]
    Explain why strcasecmp()+strncasecmp() are also declared in <string.h>
      See http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=729436

strcpy.3
   Michael Kerrisk
    NOTES: Add a subheading

fd.4
  Michael Kerrisk [Sam Varshavchik]
    Fix floppy disk device names
      The naming convention shown in the page was ancient.
      Now, the page is consistent with Documentation/devices.txt
      (where it is noted that "The use of the capital letters
      D, H and E for the 3.5" models have been deprecated, since
      the drive type is insignificant for these devices"

proc.5
  Michael Kerrisk
    Document /proc/timer_stats
  Michael Kerrisk
    (Briefly) document /proc/timer_list
  Michael Kerrisk
    Add /proc/sys/kernel/{sched_rt_period_us,sched_rt_runtime_us}
      Reference sched(7) for an explanation of these two files

capabilities.7
  Michael Kerrisk
    Mention sched_setattr(2) under CAP_SYS_NICE

cpuset.7
  Michael Kerrisk
    SEE ALSO: add sched(7)

credentials.7
  Michael Kerrisk
    Mention sched_getattr() as a place where credentials
 are checked

fanotify.7
  Heinrich Schuchardt [Jan Kara]
    BUGS: error events can be lost when reading from fanotify FD
  Michael Kerrisk [Heinrich Schuchardt]
    Fix description of FAN_EVENT_NEXT()
      FAN_EVENT_NEXT() does not update 'meta'; rather, it returns a

pointer to the next metadata structure. In addition, generally
rework the description to be a bit clearer and more detailed.
Heinrich Schuchardt
Document FAN_EVENT_METADATA_LEN

ip.7
Michael Kerrisk
Note cases where an ephemeral port is used
Michael Kerrisk
Remove BUGS text on glibc failing to declare in_pktinfo
Michael Kerrisk
Clarify 'ip_local_port_range' and mention the term "ephemeral ports"
Michael Kerrisk
Note some more details about assignment of ephemeral ports
Michael Kerrisk
BUGS: ephemeral port range exhaustion is diagnosed inconsistently
Different system calls use different 'errno'
values to diagnose
exhaustion of the ephemeral port range.

sched.7
Michael Kerrisk
Document sched_rt_period_us and sched_rt_runtime_us /proc files
And rework and relocate the text on dealing with runaway
real-time processes.
Michael Kerrisk
Mention sched_setattr(2) in list of APIs that can change policies
Michael Kerrisk
sched_setattr(2) can also be used to set 'nice' value
Michael Kerrisk
Remove mention of sched_setscheduler() when talking about sched_priority
There are nowadays multiple ways to set sched_priority (and
in fact there always were, since we also had sched_setparam(2)).
Michael Kerrisk
SEE ALSO: Add Documentation/scheduler/sched-design-CFS.txt
Michael Kerrisk
Don't mention sched_setscheduler(2) in discussions of setting policies
In a couple of places, sched_setscheduler(2) is mentioned as the
way of setting policies.
But now there is sched_setattr(2) as
well, rewrite the text in a more generic way.
Michael Kerrisk
Rework summary text describing sched_setattr(2) and sched_getattr(2)
Note that these APIs are a superset of sched_setscheduler(2)
and sched_getscheduler(2).
Michael Kerrisk
Remove crufty text relating to sched_setscheduler()
All of the removed text is in sched_setscheduler(2) and

should have been trimmed from this page.
Michael Kerrisk
SEE ALSO: Mention more files in Documentation/scheduler/ directory

========== Changes in man-pages-3.68 ==========

Released: 2014-05-28, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alastair McKinstry <mckinstry@computer.org>
Carsten Grohmann <carstengrohmann@gmx.de>
Colin
Williams <colinwilliams1968@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Lars Wirzenius <liw@iki.fi>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Richard Braakman <richard.braakman@jollamobile.com>
Simon Paillard <spaillard@debian.org>

Apologies if I missed anyone!

New and rewritten pages
---

localedef.1
Marko Myllynen, Richard Braakman, Alastair McKinstry, Lars Wirzenius
New page for localedef(1)
Add new page based on Debian localedef(1) page.

New and changed links
---

procfs.5
New link to proc.5
Since the term "procfs" is widely used, it seems reasonable to have

a link from that name to proc(5).

Changes to individual pages
---

locale.1
  Marko Myllynen
    Provide a step-by-step example of how to use a custom locale
  Marko Myllynen
    Use
 LC_TELEPHONE instead of LC_MESSAGES in the example
      yesstr/nostr in LC_MESSAGES are planned to be changed at some
      point [1], so it's better to provide an example which won't
      be obsoleted by that change.

      [1] https://sourceware.org/bugzilla/show_bug.cgi?id=16975

adjtimex.2
  Michael Kerrisk
    Add feature test macro requirements

clone.2
  Michael Kerrisk
    ERRORS: add cross-reference to fork(2) for explanation of EAGAIN

fork.2
  Michael Kerrisk
    ERRORS: add pid_max and threads-max to EAGAIN
      And rewrite text to be the same as pthread_create(3).

getrlimit.2
  Michael Kerrisk
    RLIMIT_NPROC is not enforced if CAP_SYS_ADMIN or CAP_SYS_RESOURCE

remap_file_pages.2
  Rasmus Villemoes
    Fix prototype
      The pgoff argument has type size_t, not ssize_t (and in the
      kernel it is unsigned long).

set_mempolicy.2
  Rasmus Villemoes
    Fix prototype for set_mempolicy(2)
       The nodemask argument is const. The return type in numaif.h is long.

swapon.2
  Rasmus Villemoes

Remove header from synopsis
The <asm/page.h> header is not readily available, and the comment seems to indicate that it is for getting PAGE_SIZE. But it is never mentioned why one would need to know that, and it is in any case better obtained using sysconf(), provided by <unistd.h>.

a64l.3
Rasmus Villemoes
Fix prototype for a64l()
The argument is const, both according to POSIX and the glibc headers.

adjtime.3
Rasmus Villemoes
Add required header
The prototype for adjtime(3) is declared in <sys/time.h>.

argz_add.3
Rasmus Villemoes
Fix prototypes
Update the prototypes of argz_{delete,extract,next} to agree with glibc headers and manual.

bstring.3
Rasmus Villemoes
Fix prototypes
The length parameter n
has type size_t in bcmp(), bcopy() and
bzero().

envz_add.3
Rasmus Villemoes
Fix prototypes
The envz_len parameters for envz_entry() and envz_get() are not passed by reference.

fpathconf.3
Rasmus Villemoes
Fix prototype
The path argument to pathconf() is const.

fseek.3
Rasmus Villemoes
Fix prototype
The pos argument to fsetpos() is const.

gcvt.3
Rasmus Villemoes

Fix prototype
The ndigit parameter to gcvt() has type int.

getaddrinfo_a.3
Rasmus Villemoes
Fix prototype
The pointer arguments to gai_suspend() are const.

getauxval.3
Rasmus Villemoes
Fix permissions
There doesn't seem to be any reason for getauxval.3 to be executable...

getnameinfo.3
Rasmus Villemoes
Fix prototype
The hostlen and servlen parameters have type socklen_t. (The types changed in glibc 2.2)
Michael
Kerrisk
Note types of 'hostlen'; and 'servlen' in glibc < 2.2

getrpcent.3
Rasmus Villemoes
Fix prototype
The argument to getrpcbyname() is const.

getrpcport.3
Rasmus Villemoes
Add #include and fix prototype
The prototype for getrpcport() is obtained by #include'ing <rpc/rpc.h>. Also, update its prototype.

getspnam.3
Rasmus Villemoes
Fix prototype
The struct spwd argument to putspent() is const.

getutent.3
Rasmus Villemoes
Fix prototypes
The arguments to getutid(), getutline(), and pututline() are const.

inet.3
Rasmus Villemoes
Fix prototype

The parameters to inet_makeaddr have type in_addr_t.

inet_net_pton.3
  Rasmus Villemoes
    srcfix, cfix
      Use a consistent style throughout the man-pages.

key_setsecret.3
  Rasmus Villemoes
    Fix prototypes
      Remove const qualifiers from arguments to key_decryptsession,
       key_encryptsession, and key_setsecret.

makecontext.3
  Rasmus Villemoes
    Fix prototype
      The second argument to swapcontext() is const.

makedev.3
  Rasmus Villemoes
    Fix prototype
      gnu_dev_makedev, and hence its trivial macro wrapper makedev, takes
      two unsigned int parameters; this is consistent with it being the
      inverse of (gnu_dev_)major/minor, which return unsigned int.

malloc_trim.3
  Rasmus Villemoes
    Fix prototype
      As mentioned further down, malloc_trim returns an integer.

mq_getattr.3
  Rasmus Villemoes
    Fix prototype
      The newattr parameter to mq_setattr is const.

newlocale.3
  Marko Myllynen
    List all available category masks
  Michael Kerrisk
    Add LC_ALL_MASK description

nl_langinfo.3
  Marko Myllynen
    Expand the example code a bit
      Better illustrate querying elements from different categories.

perror.3

Rasmus Villemoes
Fix declaration
The elements of the array sys_errlist are also const.

pthread_attr_setaffinity_np.3
pthread_attr_setdetachstate.3
pthread_attr_setguardsize.3
pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
pthread_attr_setschedpolicy.3
pthread_attr_setscope.3
pthread_attr_setstack.3
pthread_attr_setstackaddr.3
pthread_attr_setstacksize.3
Rasmus Villemoes
Constify parameters
Each of the pthread_attr_get* functions extract some piece of information from a pthread_attr_t, which is passed by const reference. Add the const keyword to the prototypes of these functions.

pthread_cleanup_push_defer_np.3
Michael Kerrisk [Rasmus Villemoes]
Add feature test macro requirements

pthread_create.3
Michael Kerrisk [Carsten Grohmann]
Add pid_max limit to EAGAIN error cases

pthread_equal.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe

The function pthread_equal() is thread safe.

pthread_exit.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_exit() is thread safe.

pthread_getcpuclockid.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function pthread_getcpuclockid() is thread safe.

pthread_setaffinity_np.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe

The functions pthread_setaffinity_np() and
pthread_getaffinity_np() are thread safe.

pthread_setconcurrency.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions pthread_setconcurrency() and
pthread_getconcurrency() are thread safe.

pthread_setname_np.3
Rasmus Villemoes
Fix prototype
The name parameter of pthread_getname_np is an output parameter and
hence not const.

pthread_setschedparam.3
Rasmus Villemoes
Fix
prototypes
Add return type for pthread_{s,g}etschedparam.

pthread_setschedprio.3
Rasmus Villemoes
Fix prototype
Add return type for pthread_setschedprio.

pthread_sigqueue.3
Rasmus Villemoes
Add missing #include <signal.h>

rcmd.3
Rasmus Villemoes
Fix prototypes
Unlike the BSDs, the second argument of rcmd() and rcmd_af() has
type unsigned short.
The first argument of iruserok_af() has type const void*.

re_comp.3
Rasmus Villemoes
Fix prototypes
re_comp and re_exec take const char* arguments.

resolver.3
Rasmus Villemoes
Fix prototypes and extern-declaration
Fix const- and signedness of various char* parameters.

Also, there is no "struct state", but _res is a struct

__res_state. (Actually, _res is errno-like in that it is really a
macro expanding to (*__res_state()).)

rexec.3
Rasmus Villemoes

Fix prototypes
The user, passwd and cmd arguments to rexec and rexec_af are all
const.

rtime.3
Rasmus Villemoes
Replace header
The header <rpc/des_crypt.h> does not provide rtime();
<rpc/auth_des.h> does, as is also implied in both the NOTES and
EXAMPLE sections.

scandir.3
Rasmus Villemoes
Fix prototypes
The alphasort and versionsort functions take arguments of type
const struct dirent **, not const void *.

setlocale.3
Michael Kerrisk [Marko Myllynen]
Simplify locale category listing and add GNU-specific locale categories
Some information that was here will move to locale(7).
Marko Myllynen
Remove now obsolete NOTES section

setnetgrent.3
Rasmus Villemoes
Fix prototype
The buflen argument to getnetgrent_r has type size_t.

sigvec.3
Rasmus Villemoes
Fix prototype
The vec argument to sigvec is const.

tsearch.3
Rasmus Villemoes
Fix prototype
The rootp argument to tfind is "void * const *",
not "const void **".

core.5
Michael Kerrisk

Core dump files are nowadays core.pid by default

locale.5
Marko Myllynen
Document mon_grouping and grouping properly
Michael Kerrisk
Note default value for 'first_workday'
Michael Kerrisk [Marko Myllynen]
Add brief descriptions of collating-element and collating-symbol
Marko Myllynen
t_fmt_ampm is needed only for locales that employ AM/PM convention
Michael Kerrisk [Marko Myllynen]
Remove crufty reference to /usr/lib/nls/src
That file is nowhere to be found
Marko Myllynen
Clarify LC_TIME/am_pm and LC_NAME keywords usage
am_pm should be defined only if AM/PM convention is used to signal
applications they should not try to print them when using them in
unwanted.

Same
for all LC_NAME keywords expect for name_fmt which should be
always defined.
Marko Myllynen
Clarify lang_term / lang_lib
As noted by Keld Simonsen in the lib-locales@sourceware mailing
list:

https://sourceware.org/ml/libc-locales/2014-q2/msg00008.html
From: Keld Simonsen <keld at rap dot rap dot dk>
To: Marko Myllynen <myllynen at redhat dot com>
Date: Tue, 29 Apr 2014 17:02:09 +0200

lang_term reflects ISO 639-2/T (terminology) codes, while
lang_lib reflects ISO 639-2/B (bibliographic) codes.
lang_term is preferred over lang_lib codes for locale names.
There are 20 specific ISO 639-2/B codes.
Marko Myllynen
Correct the FILES section

proc.5
Michael Kerrisk
'pid_max' is a system-wide limit on number of threads and processes
Since PIDs > /proc/sys/kernel/pid_max are not allocated,
this
file thus also imposes a system-wide limit on the number of
threads and processes.

capabilities.7
  Michael Kerrisk
    CAP_SYS_ADMIN allows overriding RLIMIT_NPROC
  Michael Kerrisk
    CAP_SYS_PTRACE allows process_vm_readv(2) and process_vm_writev(2)

charsets.7
  Michael Kerrisk [Marko Myllynen]
    Remove crufty statement that Romanian may be switching to ISO 8859-16
  Michael Kerrisk
    Remove ancient paragraph on charsets supported in glibc 2.3.2
      That test is rather ancient, and probably of little use.

fanotify.7
  Heinrich Schuchardt
    Fix to example program: fanotify read() should use aligned buffer

inotify.7
  Heinrich Schuchardt
    Add example program
      This example of the usage of the inotify API shows the
      usage of inotify_init1(2) and inotify_add_watch(2) as well
      as polling and reading from the inotify file descriptor.
  Heinrich Schuchardt
    munmap()
 does not generate inotify events

locale.7
  Marko Myllynen [Michael Kerrisk]
    Document the LOCPATH environment variable
  Michael Kerrisk
    Add further details on various categories

========== Changes in man-pages-3.69 ==========

Released: 2014-06-14, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Cyril Hrubis <chrubis@suse.cz>

Jan Chaloupka <jchaloup@redhat.com>
Jeff Layton <jlayton@poochiereds.net>
Kirill A. Shutemov <kirill.shutemov@linux.intel.com>
KOSAKI Motohiro <kosaki.motohiro@jp.fujitsu.com>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
NeilBrown <neilb@suse.de>
Peng Haitao <penght@cn.fujitsu.com>
Petr Gajdos <pgajdos@suse.cz>
Qian Lei <qianl.fnst@cn.fujitsu.com>
Rasmus Villemoes <rv@rasmusvillemoes.dk>
Vasiliy Kulikov <segoon@openwall.com>
Walter
Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>

Apologies if I missed anyone!

New and rewritten pages
---

iconv.1
  Marko Myllynen [Michael Kerrisk]
    New page for the iconv(1) command

iconvconfig.8
  Marko Myllynen
    New page for iconvconfig(8)

Newly documented interfaces in existing pages
---

fcntl.2
  Jeff Layton, Michael Kerrisk
    Document open file description locks
      As provided by the fcntl() operations F_OFD_SETLK,
      F_OFD_SETLKW, and F_OFD_GETLK

Changes to individual pages
---

locale.1
  Marko Myllynen
    Add FILES section, add charmap(5) reference
  Marko Myllynen

Align with recent charmap(5) / repertoiremap(5) changes

execve.2
Michael Kerrisk [NeilBrown]
Before kernel 2.6.0, RLIMIT_NPROC had no effect for set*uid()
Michael Kerrisk [Vasiliy Kulikov]
RLIMIT_NPROC is checked
only if preceded by set*uid()
Michael Kerrisk [Vasiliy Kulikov, NeilBrown, KOSAKI Motohiro]
Document EAGAIN error
See also https://bugzilla.kernel.org/show_bug.cgi?id=42704

fcntl.2
Michael Kerrisk
Detail the limitations of traditional (process-associated) locks
Michael Kerrisk [Jeff Layton]
Describe how to check whether the kernel supports a particular command
Michael Kerrisk
ERRORS: add EINVAL for invalid 'cmd'
Michael Kerrisk
Add para introducing advisory locks and noting existence of OFD locks
Michael Kerrisk [Jeff Layton]
Add notes on F_SETLKW deadlock detection and its limitations
Michael Kerrisk
Add an explicit note that mandatory locking is not in POSIX
Michael Kerrisk
Rewrite introductory paragraphs on mandatory locking
Make the structure more logical, and also explicitly mention
OFD locks.
Michael Kerrisk [Jeff Layton]
Reword discussion
of mandatory lock bug a little
Jeff Layton confirmed that the bug remains even in modern kernels.
Michael Kerrisk
Explain POSIX background to EACCES/EAGAIN error for F_GETLK
Michael Kerrisk
Add NOTES subhead for record locking and NFS
Michael Kerrisk [NeilBrown]
Note treatment of locks when an NFS client loses contact with the server
Michael Kerrisk [Jeff Layton]
nfsv4leasetime controls the "contact lost" interval for NFSv4

flock.2
Michael Kerrisk
In some modern BSDs, fcntl() and flock() locks do interact
So, reword and extend the discussion of this topic in NOTES.
Michael Kerrisk
Move NOTES text describing implementation of flock()

Michael Kerrisk [NeilBrown]
Add more details on NFS, including Linux 2.6.37 changes
Also: move NOTES text describing interaction of fcntl()
and flock() locks.

fork.2
Michael Kerrisk
Add notes on inheritance
of flock() and OFD locks across fork()

lseek.2
Michael Kerrisk
Add reference to open(2) for discussion of file descriptors and OFDs

open.2
Michael Kerrisk
Rework and extend the discussion of open file descriptions

open_by_handle_at.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

recvmmsg.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

remap_file_pages.2
Michael Kerrisk [Kirill A. Shutemov]
Note that remap_file_pages() is deprecated

sendmmsg.2
Rasmus Villemoes
Add reference to feature_test_macros(7)

seteuid.2
Michael Kerrisk
seteuid() and setegid() are implemented as library functions
Michael Kerrisk
Error checking should always be performed, even when caller is UID 0

setresuid.2
Michael Kerrisk
Document EAGAIN error that can occur after kernel alloc_uid() failure
Michael Kerrisk
Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer
occurs
Michael Kerrisk
Correct the description of the EAGAIN error

Michael Kerrisk
Error checking should always be performed, even when caller is UID 0

setreuid.2
Michael Kerrisk
Document EAGAIN error that can occur after kernel alloc_uid() failure
Michael Kerrisk
Error checking should always be performed, even when caller is UID 0
Michael Kerrisk
Add EAGAIN error for hitting RLIMIT_NPROC limit
Michael Kerrisk
Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

setuid.2
Michael Kerrisk
Document EAGAIN error that can occur after kernel alloc_uid() failure
Michael Kerrisk
Correct the description of the EAGAIN error
Michael Kerrisk
Error checking should always be performed, even when caller is UID 0
Michael Kerrisk
Since Linux 3.1, the EAGAIN case for RLIMIT_NPROC no longer occurs

statfs.2
Cyril Hrubis
Update MAGIC constants

Most of the updates are taken from /usr/include/linux/magic.h,
some were found by grepping the Linux source code.
Cyril Hrubis [Michael Kerrisk]
fstatfs(2) was broken on file descriptors from pipe(2)

syscalls.2
Michael Kerrisk
Note that remap_file_pages() is deprecated

basename.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions basename() and dirname() are thread safe.

catgets.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function catgets() is thread safe.

getdate.3
Rasmus Villemoes

Use blank definition of _GNU_SOURCE in example program

getdirentries.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getdirentries() is thread safe.

getdtablesize.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function getdtablesize() is thread safe.

iconv.3
Qian Lei
[Peng Haitao]
ATTRIBUTES: Note function that is thread-safe
The function iconv() is thread safe.
Michael Kerrisk
SEE ALSO: add iconvconfig(8)

lockf.3
Qian Lei [Peng Haitao]
ATTRIBUTES: Note function that is thread-safe
The function lockf() is thread safe.

malloc_get_state.3
Rasmus Villemoes
SYNOPSIS: use correct header
The nonstandard functions malloc_set_state() and
malloc_get_state() are provided by <malloc.h> not <stdlib.h>.

malloc_usable_size.3
Qian Lei
ATTRIBUTES: Note function that is thread-safe
The function malloc_usable_size() is thread safe.

matherr.3
Qian Lei [Peng Haitao]
ATTRIBUTES: Note function that is thread-safe
The function matherr() is thread safe.

mkdtemp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function mkdtemp() is thread safe.

mkstemp.3
Peng Haitao

ATTRIBUTES:
Note functions that are thread-safe
The functions mkstemp(), mkostemp(), mkstemps() and mkostemps()
are thread safe.

mq_close.3
Qian Lei
ATTRIBUTES: Note function that is thread-safe
The function mq_close() is thread safe.

mq_getattr.3
Qian Lei
ATTRIBUTES: Note function that is thread-safe
The functions mq_getattr() and mq_setattr() are thread safe.

mq_open.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function mq_open() is thread safe.

mq_receive.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mq_receive() and mq_timedreceive() are thread safe.

mq_send.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions mq_send() and mq_timedsend() are thread safe.

mq_unlink.3
Qian Lei
ATTRIBUTES: Note function that is thread-safe
The function mq_unlink() is thread
safe.

posix_fallocate.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function posix_fallocate() is thread safe.

posix_openpt.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function posix_openpt() is thread safe.

siginterrupt.3
Peng Haitao

ATTRIBUTES: Note function that is not thread-safe
The function siginterrupt() is not thread safe.

system.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function system() is thread safe.

charmap.5
Marko Myllynen
Update to match current glibc
charmap(5) was outdated, bring it to closer to reality by fixing
syntax descriptions to match current glibc code and practices,
adding missing options, removing obsolete comments and references,
and removing now incorrect examples.

locale.5
Marko Myllynen
Clarify AM/PM settings a bit

localedef(1) complains if really undefined, should be empty instead.
Also: add some SEE ALSO references.
Marko Myllynen
Document glibc conventions regarding days and week
Based on existing practice and glibc community wiki page at
https://sourceware.org/glibc/wiki/Locales

proc.5
Michael Kerrisk [Jan Chaloupka, Walter Harms]
Add a brief description of /proc/fs

repertoiremap.5
Marko Myllynen
New page for repertoiremap(5)
Rather obsolete feature but localedef(1) refers to repertoiremaps.

bootparam.7
Petr Gajdos
Describe 'rootflags' and 'rootdelay' kernel parameters
Patch based on text from Documentation/kernel-parameters.txt

charsets.7
Marko Myllynen
Update to reflect past developments
Rewrite the introduction to make Unicode's prominence more obvious.
Reformulate parts of the text to reflect current Unicode world.
Minor clarification

for ASCII/ISO sections, some other minor fixes.
  Marko Myllynen
    List CJK encodings in the order of C, J, K

environ.7
  Michael Kerrisk
    SEE ALSO: add env(1), printenv(1), ld.so(8)

locale.7
  Marko Myllynen
    Add some SEE ALSO references

man-pages.7
  Michael Kerrisk
    Note that .TH 'date' field is nowadays automatically updated by scripts

signal.7
  Michael Kerrisk
    Describe EINTR semantics for recvmmsg(2)
  Michael Kerrisk
    Clarify text describing EINTR semantics for socket interfaces

unicode.7
  Marko Myllynen
    Update to reflect past developments
      The unicode(7) page will look more modern with few small changes:

      - drop old BUGS section, editors cope with UTF-8 ok these days,
        and perhaps the state-of-the-art is better described elsewhere
        anyway than in a man page
      - drop old suggestion about avoiding combined characters
      - refer to LANANA
for Linux zone, add registry file reference
      - drop a reference to an inactive/dead mailing list
      - update some reference URLs

utf-8.7
  Marko Myllynen
    Drop an old comment about UTF-8 replacing ISO 8859
      And add locale(1) under SEE ALSO.

========== Changes in man-pages-3.70 ==========

Released: 2014-07-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Florian Weimer <fweimer@redhat.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Nadav Har'El <nyh@math.technion.ac.il>
NeilBrown <neilb@suse.de>
Rich Felker <dalias@libc.org>
Robert P. J. Day <rpjday@crashcourse.ca>
Simon Paillard <spaillard@debian.org>
Tomi
 Salminen <tlsalmin@gmail.com>
Walter Harms <wharms@bfs.de>
Yuri Kozlov <yuray@komyakino.ru>
 <kirillnow@gmail.com>

Apologies if I missed anyone!

New and rewritten pages
---

sprof.1
  Michael Kerrisk [Marko Myllynen]
    New page for the glibc sprof(1) command

Newly documented interfaces in existing pages
---

epoll_ctl.2
  NeilBrown
    Document EPOLLWAKEUP

epoll.7
  NeilBrown
    Document EPOLLWAKEUP

Changes to individual pages
---

iconv.1
iconvconfig.8
  Marko Myllynen
    Clarify gconv file terminology a bit

ldd.1
  Michael Kerrisk
    SEE ALSO: add sprof(1)

connect.2
  Michael Kerrisk
    ERRORS: add EPROTOTYPE
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=708394

dup.2
  Michael Kerrisk [Rich Felker]
    Fix erroneous discussion regarding closing 'newfd' before calling dup2()
      And propose a workaround
 if the caller cares about catching
      close() time errors.

      See http://stackoverflow.com/questions/23440216/race-condition-when-using-
dup2#comment36888604_23444465
      and http://austingroupbugs.net/view.php?id=411
  Michael Kerrisk
    Rework and enhance discussion of dup2()
      In particular, note that dup2() performs the steps of closing
      and reusing 'newfd' atomically.
  Michael Kerrisk
    Add subhead for dup3()

epoll_ctl.2
  Michael Kerrisk
    BUGS: EPOLLWAKEUP is silently ignored without CAP_BLOCK_SUSPEND
      If the caller does not have CAP_BLOCK_SUSPEND, then EPOLLWAKEUP
      is silently ignored.

fcntl.2
  Michael Kerrisk [Tomi Salminen]
    The return value for F_SETPIPE_SZ is the pipe capacity
  Michael Kerrisk
    ERRORS: Document ENOTDIR error for F_NOTIFY
  Michael Kerrisk
    Use proper page cross-references in F_NOTIFY discussion
  Michael Kerrisk
    Suggest the

use of real-time signals with F_NOTIFY

getitimer.2
  Michael Kerrisk
    Rewrite a few pieces to clarify some details

inotify_add_watch.2
  Michael Kerrisk
    Clarify that the target of a watch is an i-node
      The target of a watch is an i-node, not a pathname. Clarify
      the text to prevent the reader possibly misunderstanding
      that establishing watches by two different links to the same
      file might create different watch descriptors.

open.2
  Michael Kerrisk []
    O_CLOEXEC is also one the flags not ignored when O_PATH is specified

pipe.2
  Elie De Brauwer
    PIPE_BUF is defined in limits.h
      To make use of PIPE_BUF in an application one should include
      <limits.h>. Adding a reference to this inclusion.

poll.2
  Michael Kerrisk [Nadav Har'El]
    The negate-fd-to-ignore technique does not work for file descriptor 0
      See https://bugzilla.kernel.org/show_bug.cgi?id=79411

set_tid_address.2
   Michael Kerrisk [Rich Felker]
    Use "thread" rather than "process" in DESCRIPTION
  Michael Kerrisk
    SEE ALSO: add gettid(2)

shmop.2
  Michael Kerrisk
    Explain SHMLBA in much more detail

splice.2
  Michael Kerrisk
    Document EAGAIN error
      See https://bugzilla.kernel.org/show_bug.cgi?id=48641

syscalls.2
  Carlos O'Donell
    Add prlimit64(2)
      While trying to reconcile the new features in glibc with the

documented entries in the linux kernel man pages I noticed that
glibc exports prlimit64 for use by 32-bit applications (as does
the linux kernel), but that prlimit64 was not defined in the
syscalls list or in the prlimit-related page.

This is not the complete fix for this, but I don't have the time
to explain why and when prlimit64 should be used (or how it should
be used safely). Therefore I'm just patching the syscalls.2
list
to show that prlimit64 exists and was added in 2.6.36 (verified
with git by checking out the tags before and after).

syslog.2
Michael Kerrisk
Rework introductory paragraph
Michael Kerrisk [Robert P. J. Day]
Rework text describing loglevels
The kernel header file mentioned in the discussion of the KERN_*
constants has morphed and is no longer exported inside glibc.
And the definitions of the constants themselves changed subtly
with kernel commit 04d2c8c83d0e3ac5f78aeede51babb3236200112.
So, rewrite the description of the constants to be a bit more
abstract.
Michael Kerrisk
Rewrite parts of the page, and import /proc/sys/kernel/printk
* Move /proc/sys/kernel/printk from proc(5) to this page,
and correct various details in the discussion of that file.
* Rewrite and correct various other details on the page.
* Clean out some crufty text.
* Miscellaneous minor fixes.
Michael Kerrisk
Update SYSLOG_ACTION_CONSOLE_OFF + SYSLOG_ACTION_CONSOLE_ON description
Details changed in Linux 2.6.32

tee.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

vmsplice.2
Michael Kerrisk
Document EAGAIN error
See https://bugzilla.kernel.org/show_bug.cgi?id=48641

ether_aton.3
Michael Kerrisk
Make description of ether_line() bug a little more informative

mallopt.3
  Michael Kerrisk [Florian Weimer]
    MALLOC_MMAP_THRESHOLD_ and MALLOC_MMAP_MAX_ *do* work in setgid programs
      My testing on this point was bogus, overlooking details of
      strace(1)'s behavior with setuid programs.

      See https://sourceware.org/bugzilla/show_bug.cgi?id=12155

printf.3
  Michael Kerrisk [Rich Felker]
    Remove libc4 and libc5 details

    Rich Felker noted that "scare text" in the man page warned about
      the use of snprintf() on libc, and that some people had cited
      this as a reason not to use snprintf(). Linux libc is now
      ancient history, so there is no real need to keep that text.
      But, while we're at it, we may as well clear out all of the
      other ancient libc4 and libc5 pieces in the page. They are
      nowadays more clutter than help.
  Michael Kerrisk
    SUSv3 and later agree with C99 for the snprintf() return value
      Determined by inspection of the SUSv3 and SUSv4 specifications.
  Michael Kerrisk
    Remove some old text about glibc 2.0 changes
      We probably don't now need such ancient info.
  Michael Kerrisk
    Update references to standards for C and S conversion specifiers

profil.3
  Michael Kerrisk
    SEE ALSO: add sprof(1)

charmap.5
  Marko Myllynen
    Various minor updates and improvements
      - more precise title
      - extend description a bit
      - document previously omitted WIDTH_DEFAULT
  Marko Myllynen
    Remove accidental ISO C compliance reference
      glibc refers in locale/programs/charmap.c to ISO C 99 section
      7.17.(2) and ISO C 99 section 5.2.1.(3) that if a character map
      is not ASCII compatible then the locale using it is not ISO C
      compliant. This does not state anything about the character set
      itself.

proc.5
  Michael Kerrisk

Replace /proc/sys/kernel/printk discussion with reference to syslog(2)
It makes more sense to have the /proc/sys/kernel/printk with
the related material in syslog(2).
Michael Kerrisk
Rewrite /proc/sys/kernel/printk description

inotify.7
Michael Kerrisk
Clarify which events are generated for watched directories
Really, with respect to watched directories, events fall into

three classes (not two, as was shown):

* Events that can be generated only for the watched directory.
* Events that can be generated only for objects that are inside
the watched directory.
* Events that can be generated both for the watched directory
and for objects inside the directory.

So, mark these three classes more clearly in the list of inotify
events.
Heinrich Schuchardt [Michael Kerrisk]
BUGS: Note possible bug triggered by watch descriptor reuse
Watch descriptor IDs are returned by inotify_add_watch().
When calling inotify_rm_watch() an IN_IGNORED is placed on the
inotify queue pointing to the ID of the removed watch.

inotify_add_watch() should not return a watch descriptor ID for
which events are still on the queue but should return an
unused ID.

Unfortunately, the existing Kernel
code does not provide such a
guarantee.

Actually, in rare cases watch descriptor IDs are returned by
inotify_add_watch() for which events are still on the inotify
queue.

See https://bugzilla.kernel.org/show_bug.cgi?id=77111
Michael Kerrisk
Add further detail to the watch descriptor reuse bug
As well as inotify_rm_watch(), file deletion and unmounting a
filesystem can also cause a watch descriptor to be deleted.
Michael Kerrisk
The watch descriptor reuse bug may be hard to hit in practice
Explain the circumstances in detail, indicating that the
bug may be very unlikely to occur in practice.

Michael Kerrisk
Clarify description of IN_EXCL_UNLINK
Clarify the text a little, in particular making it clearer
that the target of a watch is an i-node (not a pathname).
Michael Kerrisk
Clarify IN_ONESHOT explanation

Make it clearer that the target of monitoring is an i-node,
not a pathname.
Michael Kerrisk
Make comment on 'mask' field more accurate

libc.7
Michael Kerrisk
Clarify man-pages policy on documenting C libraries other than glibc
Michael Kerrisk
Use absolute dates in discussion of libc vs glibc

pipe.7
Elie De Brauwer
Add reference that the pipe capacity can be changed
In fcntl(2) F_SETPIPE_SZ, F_GETPIPE_SZ and
/proc/sys/fs/pipe-max-size are defined, however
pipe(7) still defines the pipe capacity as being
a static entity. Adding a reference to fcntl(2).
Michael Kerrisk [Walter Harms]
Clarify that since 2.6.35, 65535 bytes is the default pipe capacity

ld.so.8
Michael Kerrisk
Clarify that LD_PROFILE can specify just a single shared object
Michael Kerrisk
Clarify that LD_PROFILE output is appended to target file
The LD_PROFILE
output is appended to any existing
contents of the target file.
Michael Kerrisk
SEE ALSO: add sprof(1)

========== Changes in man-pages-3.71 ==========

Released: 2014-08-17, Chicago

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Adrian Bunk <bunk@kernel.org>
Damir Nedzibovic <d.nedzibovic@anoxtech.com>

Apologies if I missed anyone!

New and rewritten pages
---

group_member.3
  Michael Kerrisk
    New page documenting group_member(3)

isfdtype.3
  Michael Kerrisk
    New page documenting isfdtype(3)

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    Document new comm_exec flag
      Linux 3.16 (more specifically, commit 82b897782d10fcc4)
      added support for differentiating between process renames

caused by exec versus those caused by other methods.
  Vince Weaver
    Document new mmap2 record type
      Linux 3.16 (more specifically, commit a5a5ba72843dd05f9)
      enabled the enhanced mmap2 record support.
      The interface was added in Linux 3.12 but disabled until
      Linux 3.16.
  Vince Weaver

 Document PERF_SAMPLE_BRANCH_COND
      Linux 3.16 (more specifically, commit bac52139f0b7ab31330)
      adds support for gathering PERF_SAMPLE_BRANCH_COND
      conditional branch values when doing PERF_SAMPLE_BRANCH_STACK
      sampling.

proc.5
  Michael Kerrisk
    Document /proc/PID/comm
  Michael Kerrisk
    Document /proc/PID/pagemap
  Michael Kerrisk
    Document /proc/PID/personality
  Michael Kerrisk
    Document /proc/PID/syscall
  Michael Kerrisk
    Document /proc/kpagecount
  Michael Kerrisk
    Document /proc/kpageflags
  Michael Kerrisk
    Document /proc/sys/vm/overcommit_kbytes

capabilities.7
  Michael Kerrisk
    Add CAP_AUDIT_READ
      CAP_AUDIT_READ is new in Linux 3.16.

access.2
  Michael Kerrisk
    Glibc falls back to using access() on kernels that lack faccessat()

bdflush.2
fsync.2
sync.2
proc.5
  Adrian Bunk
    Change "sync(1)" to "sync(8)"

bind.2
  Michael Kerrisk [Ryan Hammonds]
    Correct EINVAL
 error description
      As pointed out by Ryan:

        My application is trying to bind an IPv4 UDP socket to an

address. I've found that passing an invalid address length
to bind() causes bind to return EINVAL. According to the
bind(2) manpage, this should only occur when using unix
domain sockets (which I am not).

chmod.2
  Michael Kerrisk
    Glibc falls back to chmod() on kernels that don't support fchmodat()
  Michael Kerrisk
    Glibc falls back to chown()/lchown() on kernels that lack fchownat()

epoll_wait.2
  Michael Kerrisk
    NOTES: describe raw epoll_pwait() system call differences

getgroups.2
  Michael Kerrisk
    SEE ALSO: add group_member(3)

getpriority.2
  Michael Kerrisk
    Enhance discussion of kernel nice range versus user-space nice range
  Michael Kerrisk
    Move text describing nice range on other systems

getrlimit.2
  Michael Kerrisk

  Add cross reference to core(5) in discussion of RLIMIT_CORE
  Michael Kerrisk
    Describe the "large" resource limit bug on 32-bit platforms
      See https://bugzilla.kernel.org/show_bug.cgi?id=5042.
  Michael Kerrisk
    Glibc's setrlimit() and getrlimit() are implemented using prlimit()

kexec_load.2
  Michael Kerrisk
    Note limit of 16 for 'nr_segments'
  Michael Kerrisk
    Clarify the 'flags' bits that contain the architecture
  Michael Kerrisk
    Add KEXEC_ARCH_68K to list of architectures for 'flags'
  Michael Kerrisk
    Reword description of 'flags' a little

link.2
  Michael Kerrisk
    Glibc falls back to link() on kernels that lack linkat()

Unless 'flags' contains AT_SYMLINK_FOLLOW.

mkdir.2
Michael Kerrisk
Glibc falls back to mkdir() on kernels that don't support mkdirat()

perf_event_open.2
Vince Weaver
Clarify PERF_SAMPLE_STACK_USER usage
This clarifies the PERF_SAMPLE_STACK_USER
section.
I found these issue while implementing some code that uses
the option. The important change is fixing the name of the
sample_stack_user parameter, the rest is just some wording
fixes and minor clarifications.
Vince Weaver
Clarify PERF_SAMPLE_DATA_SRC usage
When checking the fields in the PERF_SAMPLE_DATA_SRC type samples
you need to shift the masks before doing the compare.

Although the value you are checking (perf_mem_data_src) is
specified as a bitfield so this might all fall apart if trying
to access the field in a cross-endian way. The Power people
were working on this issue, not sure if they resolved it.

poll.2
Michael Kerrisk
Describe fifth argument (sigsetsize) of raw ppoll() system call

process_vm_readv.2
Michael Kerrisk [Ville Ylenius]
Fix typo in example program

readlink.2
Michael Kerrisk

Glibc falls back to readlink() on kernels that lack readlinkat()

recv.2
Michael Kerrisk
'addrlen' should be NULL (not 0) if we don't need sender address

rename.2
Michael Kerrisk
Glibc falls back to rename() when the kernel doesn't have renameat()

sigwaitinfo.2
Michael Kerrisk

The raw sigtimedwait() system call has a fifth argument

symlink.2
Michael Kerrisk
Glibc falls back to symlink() on kernels that lack symlinkat()

sysinfo.2
Michael Kerrisk
Add VERSIONS section

unlink.2
Michael Kerrisk
Glibc falls back to unlink() or rmdir() on kernels that lack unlinkat()

atoi.3
Michael Kerrisk
Downgrade discussion of atoq()
Remove most references to atoq() in this page, since this function was present only in Linux libc (not glibc).

cerf.3
cexp2.3
clog2.3
Michael Kerrisk
Update version number on "Not yet in glibc" sentence

fgetgrent.3
getgrent.3
getgrent_r.3
getgrnam.3
Michael Kerrisk [Rob Landley]
Clarify that 'gr_mem' is a NULL-terminated array of pointers

fseeko.3
Michael Kerrisk
Add VERSIONS section

ftw.3
Michael Kerrisk
Add VERSIONS section

getauxval.3
Michael Kerrisk
Document ENOENT error
And add an entry to BUGS explaining the ambiguity that was present before the addition of this error.

getgrouplist.3

Michael Kerrisk
SEE ALSO: add group_member(3)

getline.3
Rahul Bedarkar
Close opened file at end of example program

memmem.3
Michael Kerrisk
Rewrite text of glibc 2.0 bug

printf.3
Michael Kerrisk [Jakub Wilk]
Clarify details of the %n conversion specifier
See http://bugs.debian.org/756602
Michael Kerrisk [Jakub Wilk]
Note use of 'j', 'z', and 't' length modifiers for '%n'
See http://bugs.debian.org/756602
Michael Kerrisk
Update with some SUSv3 details

setbuf.3
Michael
Kerrisk
Remove ancient Linux libc and 4.x BSD details

strstr.3
Michael Kerrisk
Remove discussion of Linux libc bugs
Linux libc is old enough that we needn't care any longer.

strtod.3
Michael Kerrisk
Explain NAN(n-char-sequence)

strtod.3
Michael Kerrisk
SEE ALSO: add nan(3), nanf(3), NANL(3)

updwtmp.3
Michael Kerrisk
Replace AVAILABILITY section with note to link logwtmp() using -lutil
Linux libc details are no longer needed these days.

core.5
Rahul Bedarkar
Close opened file in example program

proc.5
  Michael Kerrisk
    Fix kernel version numbers for /proc/PID/stat fields

proc.5
  Jan Chaloupka
    Add missing proc stats fields
      Adding missing proc stats fields from
      https://www.kernel.org/doc/Documentation/filesystems/proc.txt
  Michael Kerrisk [Simon Paillard]
    Remove crufty text under 'timer_stats'
  Michael Kerrisk
    Update /proc/PID/stat
 'state' field documentation
  Michael Kerrisk
    Improve description of /proc/PID/stat fields added in Linux 3.3 and 3.5
  Michael Kerrisk
    Refer to getauxval(3) in discussion of /proc/PID/auxv
  Michael Kerrisk
    Rework formatting of /proc/PID/stat list
      Make the field numbers more prominent.
  Michael Kerrisk
    Note that /proc/PID/cmdline is read-only
  Michael Kerrisk
    Rework discussion of CommitLimit and /proc/sys/vm/overcommit_memory
  Michael Kerrisk
    Improve discussion of /proc/sys/vm/overcommit_ratio

charsets.7
  David Prévot [Marko Myllynen]
    Tidy up list
      Remove German from main list, to be consistent with earlier
      removal of Dutch and French (in commit a8ed5f7430e0d1).

inotify.7
  Michael Kerrisk
    Note that IN_ONLY_DIR can be used to avoid races
  Michael Kerrisk
    Note that insertion of IN_MOVED_FROM+IN_MOVED_TO pair is not atomic
  Michael Kerrisk
     Mention use of timeout when reading IN_MOVED_TO after IN_MOVED_FROM

man-pages.7
  Michael Kerrisk
    Add description of "C library/kernel ABI differences" subsection
  Michael Kerrisk
    Rework text describing sections (stylistic improvements)

vdso.7
  Mike Frysinger
    Add new i386 vdso symbols in Linux 3.15
  Michael Kerrisk
    Note kernel version that exports new i386 symbols (Linux 3.15)

========== Changes in man-pages-3.72 ==========

Released: 2014-09-07, Mountain View

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Christian von Roques <roques@mti.ag>
Holger Hans Peter Freyther <holger@moiji-mobile.com>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Peter Schiffer <pschiffe@redhat.com>
Rusty Russell <rusty@rustcorp.com.au>
Sorin
 Dumitru <sdumitru@ixiacom.com>

Apologies if I missed anyone!

New and rewritten pages
---

memusage.1
  Peter Schiffer, Michael Kerrisk [Jan Chaloupka]
    New page for glibc memusage(1) command

memusagestat.1
  Peter Schiffer [Jan Chaloupka, Michael Kerrisk]
    New page for glibc memusagestat(1) command

mtrace.1
  Peter Schiffer [Jan Chaloupka]
    New page describing the glibc mtrace(1) command

Changes to individual pages
---

connect.2
  Michael Haardt
    Note that a new socket should be used if connect() fails

fcntl.2
  Michael Kerrisk
    One must define _GNU_SOURCE to get the F_OFD_* definitions

poll.2, select.2
  Rusty Russell
    Fix erroneous description of "available for write".
      POSIX says: "POLLOUT Normal data may be written without
      blocking.". This "may" is misleading, see the POSIX
      write page:

        Write requests
 to a pipe or FIFO shall be handled in the
        same way as a regular file with the following exceptions:
        ...
        If the O_NONBLOCK flag is clear, a write request may cause
        the thread to block, but on normal completion it shall
        return nbyte.
        ...
        When attempting to write to a file descriptor (other than a
        pipe or FIFO) that supports non-blocking writes and cannot
        accept the data immediately:

        If the O_NONBLOCK flag is clear, write() shall block the
        calling thread until the data can be accepted.

        If the O_NONBLOCK flag is set, write() shall not block the
        thread. If some data can be written without blocking the
        thread, write() shall write what it can and return the
        number of bytes written. Otherwise, it shall return -1 and
        set errno to [EAGAIN].

       The net result is that write() of more than 1 byte on a
      socket, pipe or FIFO which is "ready" may block: write()
      (unlike read!) will attempt to write the entire buffer and
      only return a short write under exceptional circumstances.

      Indeed, this is the behaviour we see in Linux:

      https://github.com/rustyrussell/ccan/commit/897626152d12d7fd13a8feb36989eb5c8c1f3485
      https://plus.google.com/103188246877163594460/posts/BkTGTMHDFgZ

errno.3
  Michael Kerrisk
    SEE ALSO: add errno(1)

rtnetlink.3
  Holger Hans Peter Freyther
    Fix parameters for the send() call in the example

inotify.7
  Michael Kerrisk
    IN_OPEN and IN_CLOSE_NOWRITE can also occur for directories
  Michael Kerrisk
    IN_CLOSE_WRITE occurs only for files (not monitored directory)
  Michael Kerrisk
    IN_MODIFY is generated for files only (not monitored directories)
  Michael Kerrisk
    IN_ACCESS
 occurs only for files inside directories
      IN_ACCESS does not occur for monitored directory.

packet.7
  Sorin Dumitru
    Fix include file
      It looks like most of the socket options from this man pages
      are not defined in <netpacket/packet.h>. They are defined in
      <linux/if_packet.h> so we should include that one.

========== Changes in man-pages-3.73 ==========

  Michael Kerrisk
    Add more detail on the meaning of CLONE_SYSVSEM

flock.2
  Michael Kerrisk [J. Bruce Fields]
    Don't mention "classical BSD"
 in discussion of fcntl()/flock interaction
      The noninteraction of flock(2) and fcntl(2) locks does
      not seem to be classical BSD semantics (at least, checking
      the 4.4BSD sources suggest that the lock types do interact,
      although there have been other systems also where fcntl()
      and flock() locks do not interact). So, fix the text
      discussing "classical BSD" lock semantics.

getunwind.2
  Michael Kerrisk [Yuri Kozlov]
    Fix description of return value
      s/size of unwind table/size of the unwind data/

mount.2
  Eric W. Biederman
    Clarify use of 'mountflags' and 'data' for MS_REMOUNT

reboot.2
  Michael Kerrisk [Justin Cormack, Eric W. Biederman]
    Document effect of reboot() inside PID namespaces

semop.2
  Michael Kerrisk
    Refer to clone(2) for semantics of CLONE_SYSVSEM and semadj lists

seteuid.2
setgid.2
setresuid.2
setreuid.2
setuid.2
  Michael Kerrisk
    EINVAL
 can occur if UID/GID is not valid in caller's user namespace

setns.2
  Michael Kerrisk [Eric W. Biederman]
    Clarify capabilities required for reassociating with a mount namespace
  Michael Kerrisk
    Specify kernel version on each CLONE_NEW* flag
      And remove text on flags from VERSIONS.

unshare.2
  Michael Kerrisk
    Add an example program
  Michael Kerrisk
    Clarify semantics of CLONE_SYSVSEM
  Michael Kerrisk
    CLONE_SYSVSEM does not require CAP_SYS_ADMIN
  Michael Kerrisk
    Note flags implied by CLONE_THREAD and CLONE_VM

clock.3
  Michael Kerrisk [Vincent Lefevre]
    The implementation uses clock_gettime() was to improve *accuracy*
      (The man page text mistakenly used the word "precision".)

drand48.3
  Michael Kerrisk [Lorenzo Beretta]
    Remove crufty text about SVID 3 marking drand48() obsolete
      See http://bugs.debian.org/758293

proc.5
  Michael Kerrisk
    Move /proc/[pid]/mounts
 text to namespaces.7
  Michael Kerrisk
    Move /proc/[pid]/mountstats text to namespaces.7

capabilities.7
  Michael Kerrisk
    Refer reader to user_namespaces(7) for a discussion of capabilities
  Michael Kerrisk

Document CAP_SETUID and CAP_SETGID for user namespace mappings
Michael Kerrisk
setns() needs CAP_SYS_ADMIN in the *target* namespace
Michael Kerrisk
Since Linux 3.8, user namespaces no longer require CAP_SYS_ADMIN

mq_overview.7
Michael Kerrisk
Refer to namespaces(7) for info on POSIX MQs and IPC namespaces

svipc.7
Michael Kerrisk
Refer to namespaces(7) for info on System V IPC and IPC namespaces

========== Changes in man-pages-3.74 ==========

Apologies if I missed anyone!

New and rewritten pages
---

pldd.1
  Michael Kerrisk
    New page for pldd(1) command added to glibc in version 2.15

cp1252.7
  Marko Myllynen
    New page documenting CP 1252
      CP 1252 is probably one of the most used Windows Code Pages so
      let's add a page for it
 alongside with the already provided
      CP 1251 page.

      Table generated from /usr/share/i18n/charmaps/CP1252.

Newly documented interfaces in existing pages
---

mq_overview.7
  Michael Kerrisk
    Document /proc/sys/fs/mqueue/msgsize_default
  Michael Kerrisk
    Document /proc/sys/fs/mqueue/msg_default

Changes to individual pages
---

ldd.1
  Michael Kerrisk
    SEE ALSO: add pldd(1)

execve.2
  Michael Kerrisk [C. Alex North-Keys]
    Remove unneeded ".sh" extension in interpreter script example
      See https://bugzilla.kernel.org/show_bug.cgi?id=84701

fanotify_init.2
  Heinrich Schuchardt
    BUGS: O_CLOEXEC is ignored
  Michael Kerrisk [Heinrich Schuchardt]
    The 'event_f_flags' failure to check invalid flags was fixed in 3.15

fanotify_mark.2
  Michael Kerrisk
    Note that various bugs were fixed in Linux 3.16

getrlimit.2
  Michael Kerrisk
 [Doug Ledford]
    Since Linux 3.5, the accounting formula for RLIMIT_MSGQUEUE has changed

open.2
  Michael Kerrisk [Shriramana Sharma]
    Fix number and formula in description of EOVERFLOW error

readlink.2
  Michael Kerrisk [Ben Hutchings]
    Fix description of readlinkat() with empty 'pathname'
  Michael Kerrisk
    SEE ALSO: add realpath(3)

sched_setattr.2
sched_setscheduler.2
  Michael Kerrisk
    SEE ALSO: add chrt(1)

shmget.2
  Manfred Spraul [Michael Kerrisk, Davidlohr Bueso]
    Update for increase of SHMALL and SHMMAX
      The default values of SHMALL and SHMMAX have been increased.

syscalls.2
  Michael Kerrisk
    Add 3 new system calls added in Linux 3.17

vmsplice.2
  Cyril Hrubis
    vmsplice() does not fail when nr_segs==0
      This nr_segs==0 case is no-op; the call succeeds and no
      EINVAL error is returned.

dlopen.2
  Michael Kerrisk
    SEE ALSO: add pldd(1)

fseeko.3
  Michael
 Kerrisk [Thomas Mack]
    _FILE_OFFSET_BITS must be defined before including any header file

getgrent.3
  Carlos O'Donell
    Add ENOENT and EAGAIN to error list

mq_getattr.3
  Michael Kerrisk
    Add an example program
      The example program can be used to discover the default
      'mq_maxmsg' and 'mq_msgsize' values used to create a queue with
      a mq_open(3) call in which 'attr' is NULL.

mq_open.3
  Michael Kerrisk
    Two /proc files control the defaults for the attrp==NULL case
      Refer the reader to the discussion in mq_overview(7) for a
      discussion of these files, which exist since Linux 3.5.

realpath.3
  Michael Kerrisk
    SEE ALSO: add realpath(1)

proc.5
  Elie De Brauwer
    Document /proc/buddyinfo
      This patch adds a short description about the contents of
      /proc/buddyinfo and how this file can be used to assist
      in checking for memory fragmentation issues.
   Michael Kerrisk
    Mention pmap(1) in discussion of /proc/PID/smaps

armscii-8.7
  Marko Myllynen
    Charset pages unification, minor cleanups

ascii.7
  Marko Myllynen
    Charset pages unification, minor cleanups
      This and [the related *.7] patches will provide unification of
      charset pages, minor cleanups, and some unifying cosmetic
      changes. References are adjusted so that all pages include
      a reference to charsets(7), which contains a description of
      these sets, stray comments are removed, some obsolete
      statements (like ISO 8859-1 being the de-facto ASCII
      replacement) are removed, and some minor reformatting
      to minimize diff's between the pages are done.

      The actual substance, the character tables, remain unchanged.

This series changes the following pages (under man7): ascii, armscii, cp1251, koi8-r, koi8-u, and all of iso_8859-*.

cp1251.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-10.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-11.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-13.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-14.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-15.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-16.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-1.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-2.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-3.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-4.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-5.7

Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-6.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-7.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-8.7
Marko Myllynen
Charset pages unification, minor cleanups

iso_8859-9.7
Marko Myllynen
Charset pages unification, minor cleanups

koi8-r.7
Marko Myllynen
Charset pages unification, minor cleanups
- remove stray comments, streamline description
(charsets(7) and Wikipedia provide more detailed
and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

koi8-u.7
Marko Myllynen
Charset pages unification, minor cleanups
- remove stray comments, streamline description
(charsets(7) and Wikipedia provide more detailed
and up-to-date description)
- list differences between koi8-r.7 vs koi8-u.7

mq_overview.7
Michael Kerrisk
Update queues_max
details for Linux 3.14
And in general rework the text a little.
Michael Kerrisk
Update discussion of HARD_MSGMAX
The limit has changed in 2.6.33 and then again in 3.5.
Michael Kerrisk [Arto Bendiken]
Update details for 'queues_max' limit
Things changed in Linux 3.5.
See https://bugs.launchpad.net/bugs/1155695
Michael Kerrisk

Update details on defaults and ceiling for 'msgsize_max' limit
Michael Kerrisk
Rework discussion of HARD_MSGMAX
Michael Kerrisk [Davidlohr Bueso]
Various fixes after review from Davidlohr Bueso

sched.7
Michael Kerrisk
SEE ALSO: add taskset(1)

ld.so.8
Michael Kerrisk
SEE ALSO: add pldd(1)
Michael Kerrisk
SEE ALSO: add dlopen(3)
Michael Kerrisk
SEE ALSO: add ld(1)

========== Changes in man-pages-3.75 ==========

Released: 2014-10-15, Düsseldorf

Contributors

The following
people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Jonny Grant <jg@jguk.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Robert Schweikert <rjschwei@suse.com>
Tetsuo Handa <penguin-kernel@i-love.sakura.ne.jp>
Walter Harms <wharms@bfs.de>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_rwlockattr_setkind_np.3
Robert Schweikert [Michael Kerrisk]
New page documenting pthread_rwlockattr_[sg]etkind_np(3)

Documents pthread_rwlockattr_setkind_np(3) and
pthread_rwlockattr_getkind_np(3).

New and changed links
---

pthread_rwlockattr_getkind_np.3
  Robert Schweikert
    New link to pthread_rwlockattr_setkind_np(3)

Changes to individual pages
---

readlink.2
  Michael Kerrisk [Jonny Grant]
    Add free() call to example program

readv.2
  Michael Kerrisk
    The raw preadv() and pwritev() syscalls split 'offset' into 2 arguments

signal.7
  Michael Kerrisk
    pthread_mutex_lock() and pthread_cond_wait() are restartable
      pthread_mutex_lock(, pthread_cond_wait(), and related APIs are
      automatically restarted if interrupted by a signal handler.

unix.7
  Michael Kerrisk [Carlos O'Donell, David Miller, Tetsuo Handa]
    Various additions and rewordings
      Notable changes:
      * Clarify some details for pathname sockets.
      * Add some advice on portably coding with pathname sockets.
      * Note the "buggy" behavior for pathname sockets when
        the supplied pathname is 108 bytes (after a report by
        Tetsuo Handa).

========== Changes in man-pages-3.76 ==========

Released: 2014-12-31, Munich

New and rewritten pages

---

adjtimex.2
  Laurent Georget
    Add fields in struct timex description
      This patch updates the man page with the new fields added in
      struct timex since last edition of the man page.
  Laurent Georget [Michael Kerrisk]
    Document ADJ_TAI
  Michael Kerrisk
    Improve description of ADJ_OFFSET_SINGLESHOT
  Michael Kerrisk
    Add brief documentation of ADJ_MICRO and ADJ_NANO
  Michael Kerrisk
    Reformat return value list
      And remove
 numeric values, since they're not needed
  Michael Kerrisk
    Other 'modes' bits are ignored on ADJ_OFFSET_*
      Other bits in 'modes' are ignored if modes contains
      ADJ_OFFSET_SINGLESHOT or ADJ_OFFSET_SS_READ.
  Michael Kerrisk
    Add nanosecond details
      Fixes https://bugzilla.kernel.org/show_bug.cgi?id=61171.
  Michael Kerrisk
    Document ADJ_OFFSET_SS_READ
  Michael Kerrisk
    Reformat 'times' flags as list
      And remove numeric values, since they're not needed.
  Michael Kerrisk
    Note effect of ADJ_NANO for ADJ_SETOFFSET
  Michael Kerrisk
    Add comment noting that timex structure contains padding bytes
  Michael Kerrisk
    Add more details to description of 'tai' field
  Michael Kerrisk
    Note meaning of "PLL" abbreviation
  Michael Kerrisk
    Clarify which 'timex' field is used by each 'modes' bit
  Michael Kerrisk
    Document timex 'status' bits
  Michael Kerrisk
     Clarify treatment of other 'modes' bits for ADJ_OFFSET_*
  Michael Kerrisk
    Update RFC number: RFC 5905 obsoletes RFC 1305
  Michael Kerrisk
    Briefly document ADJ_SETOFFSET
  Michael Kerrisk

Note PPS (pulse per second) fields in timex structure

sigreturn.2
  Michael Kerrisk
    Add (a lot) more detail on the signal trampoline
      And rewrite much of the page.

Newly documented interfaces in existing pages
---

proc.5
  Bernhard Walle
    Document /proc/thread-self
      /proc/thread-self has been introduced in Linux 3.17 with
      commit 0097875bd41528922fb3bb5f348c53f17e00e2fd.
  Sven Hoexter [Michael Kerrisk, Kamezawa Hiroyuki]
    Document "VmSwap" field of /proc/[pid]/status
  Florian Westphal
    Document /proc/net/netfilter/nfnetlink_queue

Changes to individual pages
---

localedef.1
  Marko Myllynen
    Mention default path
 for compiled files

clock_nanosleep.2
  Michael Kerrisk
    Note that 'clock_id' can also be a CPU clock ID

epoll_ctl.2
  Michael Kerrisk
    Regular files and directories can't be monitored with epoll_ctl()

ioctl.2
  Heinrich Schuchardt
    Rename 'd' argument to 'fd' in text
      In most other manpages file descriptors are called 'fd'.
      This patches renames attribute 'd' to 'fd'.

madvise.2
  Michael Kerrisk
    VERSIONS: Support for madvise() is now configurable
      Support for this system call now depends on the

CONFIG_ADVISE_SYSCALLS configuration option.

open.2
Michael Kerrisk
Enhance rationale discussion for openat() and friends

posix_fadvise.2
Mel Gorman
Document the behavior of partial page discard requests
It is not obvious from the interface that "partial page discard"
requests are ignored. It should be spelled out.
Michael Kerrisk [Weijie Yang]
ERRORS:
Since 2.6.16, the kernel correctly deals with the ESPIPE case
Michael Kerrisk
Support for fadvise64() is now configurable
Support for this system call now depends on the
CONFIG_ADVISE_SYSCALLS configuration option.

prctl.2
Andreas Schwab
Correct description of null-termination in PR_GET_NAME and PR_SET_NAME
The size of the process name has always been at most 16 byte
including the null terminator. This also means that the
name returned by PR_GET_NAME is always null-terminated.
Michael Kerrisk
PR_SET_NAME silently truncates strings that exceed 16 bytes

restart_syscall.2
Michael Kerrisk
Add some text explaining why restart_syscall() exists

sched_setaffinity.2
Michael Kerrisk
NOTES: Add paragraph on how to discover set of CPUs available on system
Michael Kerrisk
SEE ALSO: add nproc(1) and lscpu(1)

select.2
Michael Kerrisk
SEE ALSO: add
restart_syscall(2)

semop.2
Michael Kerrisk
Add note that interrupted semtimedop() returns 'timeout' unchanged
Michael Kerrisk
Remove information about semtimedop() EAGAIN that is repeated elsewhere

Michael Kerrisk
Add subsection head for semtimedop()

setsid.2
Michael Kerrisk
Rewrite some pieces and add some details
Among other changes, add an explanation of why setsid() can't be called from a process group leader

sgetmask.2
Michael Kerrisk
Since 3.16, support for these system calls is configurable
Support for these calls is now dependent on the setting of the CONFIG_SGETMASK_SYSCALL option.

sigaction.2
Michael Kerrisk
Document SA_RESTORER
Michael Kerrisk
Add some detail on the sa_restorer field
Michael Kerrisk
SEE ALSO: add sigreturn(2)

splice.2
Michael Kerrisk
Reformat description of 'fd_in' and 'off_in' to improve readability

syscall.2
Michael Kerrisk
SEE ALSO: add errno(3)

syscalls.2
Michael Kerrisk
SEE ALSO: add errno(3)
Michael Kerrisk
3.19 adds execveat()
Michael Kerrisk
Add bpf(2) to list

tee.2
Michael Kerrisk
Add shell session demonstrating use of the example program

tkill.2
Michael Kerrisk [Rich Felker]
Remove bogus text saying tgid==-1 makes tgkill() equivalent to tkill()

abort.3

Michael Kerrisk
Note that SIGABRT is raised as though raise(3) is called
Also note that abort() is POSIX.1-2008 compliant.

cmsg.3
David Wragg
Ensure buf is suitably aligned in sending example
Inspection of the definition of CMSG_FIRSTHDR (both in glibc and
the suggested definition in RFC3542) shows that it yields the
msg_control field. So when sending, the pointer placed in
msg_control should be suitably aligned as a struct cmsghdr.
In the sending example,
buf was declared as a bare char array,
and so is not necessarily suitably aligned.

The solution here involves placing buf inside a union, and is
based on the sockets/scm_rights_send.c sample from The Linux
Programming Interface "dist" source code collection.

exp10.3
Michael Kerrisk
Before glibc 2.19, exp() did not give ERANGE error on underflow
http://sources.redhat.com/bugzilla/show_bug.cgi?id=6787

ftw.3
Michael Kerrisk
FTW_CHDIR has no effect on the 'fpath' argument passed to fn()

getopt.3
Michael Kerrisk [Jonny Grant]
Ensure that 'nsecs' is used

ilogb.3
Michael Kerrisk [Will Newton]
Since glibc 2.16, ilogb() does correctly diagnose domain errors

memcmp.3
Michael Haardt
Document return value for n==0 case
Michael Haardt
Warn against use of memcmp() for comparing security-critical data

mq_open.3
Michael Kerrisk
Document the O_CLOEXEC
flag
Michael Kerrisk
Place 'flags' constants in alphabetical order

pow.3
  Manuel López-Ibáñez
    Add note on performance characteristics of pow()

pthread_setschedparam.3
  Simon Newton
    Fix logic error in example program
      The example program will crash if -A is used, since 'attr'
      is uninitialized.

        $ ./a.out -A
        *** Error in `./a.out': free(): invalid pointer: 0xb779c3c4 ***
        Aborted (core dumped)

    Small fixes to example program

sigvec.3
  Michael Kerrisk
    Starting with version 2.21, glibc no longer exports sigvec()

sysconf.3
  Josh Triplett
    Document _SC_NGROUPS_MAX
      Already documented in getgroups(2), but not in sysconf(3).

termios.3
  Michael Kerrisk
    SEE ALSO: add tset(1)

tgamma.3
  Michael Kerrisk
    Since glibc 2.18, errno is correctly set to EDOM when (x == -infinity))

wordexp.3
  Carlos O'Donell
    Make
 it clear that WRDE_NOCMD prevents command substitution
      The use of WRDE_NOCMD prevents command substitution. If the flag
      WRDE_NOCMD is set then no command substitution shall occur and
      the error WRDE_CMDSUB will be returned if such substitution is
      requested when processing the words.

      The manual page as-is makes it seem like the command substitution
      occurs, and an error is returned *after* the substitution.
      This patch clarifies that.

locale.5

Marko Myllynen
Describe the formats of values
locale(5) describes what a locale should define but doesn't
spell out how (in what format). The patch attempts to address
this, it also has few trivial additional enhancements.

* Reference to locale(7) for category descriptions.
* Clarify first_workday in NOTES a bit.
* Add upstream BZ reference for two missing LC_ADDRESS fields.
Marko
Myllynen
Fix miscoded character

resolv.conf.5
Jan Chaloupka
Add missing no-tld-query option
Based on commit [1], the no-tld-query option exists for
resolv.conf configuration file. Description of this option
is provided in [2]. This patch just copies this option
into resolv.conf.5 man page. Plus changes 'a' member
into 'an' before 'unqualified name as if it ...'
on the third line of [2]. Based on [3], this option
was added in glibc 2.14 as solving [4] bug.

[1] https://sourceware.org/git/?p=glibc.git;a=commitdiff;h=f87dfb1f11c01f2ccdc40d81e134cd06b32e28e8
[2] http://www.daemon-systems.org/man/resolv.conf.5.html man page.
[3]
https://sourceware.org/git/?p=glibc.git;a=blob;f=NEWS;h=952f32af17e7fb49c4c1a305de673a13075bfaf5;hb=f87df
b1f11c01f2ccdc40d81e134cd06b32e28e8
[4] https://sourceware.org/bugzilla/show_bug.cgi?id=12734

credentials.7
Josh Triplett
Cross-reference getgroups(2)
Since credentials.7 discusses supplementary GIDs, it should
reference getgroups(2).

fanotify.7
Heinrich Schuchardt
Allow relative paths in example
The current example code requires passing an absolute
path to the mount to be watched.

By passing AT_FDCWD to fanotify_mark it can use both
absolute and relative paths.
Heinrich Schuchardt
fallocate(2) creates no events
fallocate(2) should create FAN_MODIFY events but does not.

Heinrich Schuchardt [Michael Kerrisk]
fanotify notifies only events generated on the same mount
Unfortunately, fanotify does not inform listeners for all paths
under which a touched filesystem object is visible, but only the
listener using the same path as the process touching the
filesystem object.
Heinrich Schuchardt
Update BUGS
to note bugs still not fixed in 3.17
I bumped the Linux version number in the BUGS section to 3.17.

inotify.7
Heinrich Schuchardt
fallocate(2) does not trigger inotify events
Calling fallocate(2) does not result in inotify events.

locale.7
Marko Myllynen
Improve LOCPATH description
LOCPATH is ignored by privileged programs.

Add locale archive references.

Add FILES section.

man-pages.7
Michael Kerrisk [Laurent Georget]
Clarify that SEE ALSO entries may refer to pages from other projects

signal.7
Michael Kerrisk
Mention other "slow devices"
Reads from eventfd(2), signalfd(2), timerfd(2), inotify(7),
and fanotify(7) file descriptors are also slow operations
that are restartable.
Michael Kerrisk
Fix SO_RECVTIMEO/ SO_SENDTIMEO confusion in text
Michael Kerrisk
Since Linux 3.8, reads on inotify(7) file descriptors are
restartable
Michael Kerrisk
inotify(7) reads no longer show the odd EINTR error after SIGCONT
Since kernel 3.7, reads from inotify(7) file descriptors no longer
show the (Linux oddity) behavior of failing with EINTR when the
process resumes after a stop signal + SIGCONT.
Michael Kerrisk
SEE ALSO: add sigreturn(2)

unix.7
  Michael Kerrisk [Scott Harvey]
    Fix buglet in code snippet in BUGS section

ld.so.8
  Carlos O'Donell
    Add --inhibit-cache option
      The dynamic loader has 6 options, only 5 are documented.
      This patch documents the sixth option i.e. `--inhibit-cache`.
  Jonathan Wakely [Siddhesh Poyarekar]
    Correct documentation of $ORIGIN
      As noted by Siddhesh:

        The ld.so man page says:

          $ORIGIN (or equivalently ${ORIGIN})
            This expands to the directory containing the
            application executable.
 Thus, an application located
            in somedir/app could be compiled with

        This is incorrect since it expands to the directory containing
        the DSO and not the application executable. This seems like
        deliberate behaviour in dl-object.c, so it needs to be fixed in
        the man page.

      See http://stackoverflow.com/questions/26280738/what-is-the-equivalent-of-loader-path-for-rpath-specification-on-linux/26281226#26281226

========== Changes in man-pages-3.77 ==========

Released: 2015-01-10, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexandre Bique <bique.alexandre@gmail.com>
Andre Majorel <aym-xunil@teaser.fr>
Andy Lutomirski <luto@amacapital.net>
Daniel Borkmann <dborkman@redhat.com>

Dave
 Hansen <dave.hansen@intel.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Ignat Loskutov <ignat.loskutov@gmail.com>
Jeff Epler <jepler@unpythonic.net>
Jérôme Pouiller <jezz@sysmic.org>
Kees Cook <keescook@chromium.org>
Laurent Georget <laurent.georget@supelec.fr>
Masanari Iida <standby24x7@gmail.com>
Michael Haardt <michael@moria.de>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Richard Cochran <richardcochran@gmail.com>
Stephan Mueller <stephan.mueller@atsec.com>
Troy Davis <troy@yort.com>
Vince Weaver <vincent.weaver@maine.edu>
Will Drewry <wad@chromium.org>

Apologies if I missed anyone!

New and rewritten pages
---

seccomp.2
  Kees Cook, Michael Kerrisk, Will Drewry [Andy Lutomirski]
    New page documenting seccomp(2)
      Combines documentation from prctl, in-kernel seccomp_filter.txt
      and dropper.c, along with details specific to the new system
 call.

Newly documented interfaces in existing pages
---

netlink.7
  Stephan Mueller [Michael Kerrisk]
    Add NETLINK_CRYPTO

Changes to individual pages
---

adjtimex.2
  Laurent Georget [Richard Cochran, Jeff Epler]
    Clarify the 'ppm scaling' used in struct timex
      This patch makes explicit and clarifies the unit used for

the fields "freq", "ppsfreq" and "stabil" in struct timex.
Michael Kerrisk [Masanari Iida]
Note that TIME_ERROR is the modern synonym for TIME_BAD

perf_event_open.2
Vince Weaver
Clarify the PERF_FLAG_FD_* flags
This change clarifies the behavior of the PERF_FLAG_FD_OUTPUT and
PERF_FLAG_FD_NO_GROUP flags to perf_event_open(), and removes
the related FIXME comments.

While writing tests to validate the behavior of these flags I
discovered that PERF_FLAG_FD_OUTPUT has been broken
since the
2.6.35 kernel release.

prctl.2
Dave Hansen [Michael Kerrisk]
Add description of Intel MPX calls
The 3.19 kernel will have support for Intel MPX, including
a pair of new prctl() calls (PR_MPX_ENABLE_MANAGEMENT and
PR_MPX_DISABLE_MANAGEMENT) for enabling and disabling the
kernel's management of the "bounds tables". Add a
descriptions of the interface.
Michael Kerrisk
Add mention of seccomp(2) under PR_SET_SECCOMP
Michael Kerrisk
Suggest /proc/PID/status "Seccomp" as alternative to PR_GET_SECCOMP
Michael Kerrisk
SIGKILL can also occur PR_GET_SECCOMP in SECCOMP_MODE_FILTER mode
Kees Cook [Andy Lutomirski]
Document SECCOMP_MODE_FILTER vs EFAULT
This notes the distinction made between EINVAL and EFAULT when
attempting to use SECCOMP_MODE_FILTER with PR_SET_SECCOMP.

setns.2
pid_namespaces.7
Mike Frysinger
Elaborate
discussion of the PID namespace descendant limitation
The setns(2) man page already mentions that CLONE_NEWPID may only
be used with descendant namespaces, but this nuance could be
listed in a few more places so it is not missed.

shmget.2
Michael Kerrisk [Akihiro Motoki]
Make wording of SHMALL description a little clearer

sigaction.2
  Michael Kerrisk
    Add siginfo_t fields for SECCOMP_RET_TRAP

memchr.3
strstr.3
  Alexandre Bique
    Reference memmem(3) in SEE ALSO section

memcmp.3
  Michael Kerrisk [Michael Haardt]
    NOTES: add some detail on avoiding memcmp() of cryptographic data
      Wording largely based on comments from Michael Haardt.

pthread_tryjoin_np.3
  Jérôme Pouiller [Michael Kerrisk]
    Document EINVAL error for pthread_timedjoin_np()

mem.4
  Elie De Brauwer
    /dev/kmem depends on CONFIG_DEVKMEM
  Elie De Brauwer
    Correct /dev/port group in example

   mem.4 mentions that group for /dev/port should be set to 'mem'
      However, all other files (/dev/mem and /dev/kmem) use the kmem
      group in their examples and on my system /dev/port belongs to
      kmem. Hence the 'mem' group was probably a typo:
  Elie De Brauwer
    Add CONFIG_STRICT_DEVMEM
      Since 2.6.26 the CONFIG_NONPROMISC_DEVMEM options limits the
      physical addresses which can be accessed through /dev/mem.

random.4
  Heinrich Schuchardt
    Describe handling of O_NONBLOCK
      /dev/random and /dev/urandom treat O_NONBLOCK differently.
      This should be described in the manpage.
  Heinrich Schuchardt
    Mention PRNG used by urandom
      /dev/urandom uses a pseudo-random number generator to replace
      missing entropy.

proc.5
  Michael Kerrisk
    Document "Seccomp" field of /proc/PID/status

epoll.7

Michael Kerrisk [Ignat Loskutov]
Use epoll_create1() rather than
epoll_create() in the code example
epoll_create1() is more or less the preferred API for new
applications, since it allows for some flags and avoids the
misdesigned epoll_create() argument, and so it seems sensible
to use that in the example, rather than epoll_create().

tcp.7
Troy Davis
Clarify tcp_tw_recycle on Internet-facing hosts
Clarify that tcp_tw_recycle will break communication with many
general-purpose remote Internet hosts (namely, remote NAT devices)
even when the Linux device itself is not behind NAT.

========== Changes in man-pages-3.78 ==========

Released: 2015-01-22, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Alexey Ishchuk <aishchuk@linux.vnet.ibm.com>
Carlos
O'Donell <carlos@redhat.com>
Christian Seiler <christian@iwakd.de>
Daniel J Blueman <daniel@quora.org>
David Drysdale <drysdale@google.com>
David Herrmann <dh.herrmann@gmail.com>
Elie De Brauwer <eliedebrauwer@gmail.com>
Elliot Hughes <enh@google.com>
Jessica McKellar <jessica.mckellar@gmail.com>
Kees Cook <keescook@chromium.org>
Michael Hayes <mike@aiinc.ca>
Michael Kerrisk <mtk.manpages@gmail.com>
Rich Felker <dalias@aerifal.cx>
Vince Weaver <vincent.weaver@maine.edu>

Apologies if I missed anyone!

New and rewritten pages
---

execveat.2
  David Drysdale, Michael Kerrisk [Rich Felker]
    New page for execveat(2)

memfd_create.2
  Michael Kerrisk, David Herrmann
    New page for memfd_create() system call
      Including notes about file sealing

s390_pci_mmio_write.2
  Alexey Ishchuk
    New page for s390 s390_pci_mmio_write() and s390_pci_mmio_read()
      New manual page for the new PCI MMIO memory access system

      calls, s390_pci_mmio_write() and s390_pci_mmio_read(),
      added for the s390 platform.

Newly documented interfaces in existing pages
---

fcntl.2
  David Herrmann [Michael Kerrisk]
    Document F_ADD_SEALS and F_GET_SEALS commands

proc.5
  Elie De Brauwer
    Document /proc/sys/vm/compact_memory
  Michael Kerrisk
    Document /proc/sys/fs/nr_open

New and changed links
---

s390_pci_mmio_read.2
  Michael Kerrisk
    New link to new s390_pci_mmio_write(2) page

Changes to individual pages
---

dup.2
  Michael Kerrisk

Add reference to RLIMIT_NOFILE for EMFILE error
Michael Kerrisk
Add reference to RLIMIT_NOFILE for EBADF error on 'newfd'.

execve.2
fexecve.3
Michael Kerrisk
SEE ALSO: add execveat(2)

fallocate.2
mmap.2
open.2
truncate.2
write.2
Michael Kerrisk
ERRORS: add EPERM for operation denied by file seal

fcntl.2
Michael Kerrisk
ERRORS: add EBUSY case for F_SETPIPE_SZ
Michael Kerrisk
Add reference to RLIMIT_NOFILE for F_DUPFD EINVAL error on 'arg'.
Michael Kerrisk
ERRORS: add open file description lock error cases

getrlimit.2
Michael Kerrisk
Update text on RLIMIT_NOFILE ceiling to refer to /proc/sys/fs/file-max

mbind.2
Michael Kerrisk [Daniel J Blueman]
Clarify EFAULT text

mmap.2
shmget.2
shm_open.3
Michael Kerrisk
SEE ALSO: add memfd_create(2)

open.2
Michael Kerrisk
Refer to RLIMIT_NOFILE for explanation of EMFILE error
Michael Kerrisk
Add execveat(2) in system call list under "Rationale for openat()"

perf_event_open.2
Vince Weaver
Clarify description of overflow events

Update the perf_event_open manpage to be more consistent when
discussing overflow events. It merges the discussion of
poll-type notifications with those generated by SIGIO
signal handlers.
This addresses the remaining FIXMEs is the document.
Vince Weaver
Remove inaccurate paragraph describing attr.config
Remove an inaccurate paragraph about values in the attr.config
field. This information was never true in any released kernel;
it somehow snuck into the manpage because it is still described
this way in tools/perf/design.txt in the kernel source tree.
Michael Kerrisk
Correct the kernel version number for PERF_COUNT_HW_CACHE_NODE
Michael Kerrisk
Add some kernel version numbers to various fields and constants

ptrace.2
sigaction.2
seccomp.2
Kees Cook
Ptrace and siginfo details
While writing some additional seccomp tests, I realized
PTRACE_EVENT_SECCOMP wasn't documented yet. Fixed this, and added
additional notes related to ptrace events SIGTRAP details.

readv.2
Michael Kerrisk
Update details
on glibc readv()/writev() wrapper behavior
And add a historical detail about Linux 2.0.

select.2
Michael Kerrisk
Mention RLIMIT_NOFILE as a possible cause of EINVAL error

syscall.2
Kees Cook
Add arm64 and mips
Add mips and arm64 to tables, along with some further
details on these architectures,

syscalls.2
Michael Kerrisk
Add s390_pci_mmio_read(2) and s390_pci_mmio_write(2)
Michael Kerrisk
Note kernel() version that introduced get_kernel_syms()
Note kernel version that introduced ppc_rtas()
Note kernel version that introduced create_module()

Note kernel version that added setup()
Michael Kerrisk
Remove some details for sync_file_range2()
Make the table a bit simpler. The details can anyway be
found in the system call man page.

utimensat.2
Michael Kerrisk [Elliot Hughes]
If both tv_sec fields are UTIME_OMIT, the file need not
exist
As noted by Elliot, if both tv_sec fields are UTIME_OMIT,
utimensat() will return success even if the file does not exist.

errno.3
Michael Kerrisk
The RLIMIT_NOFILE resource limit is a common cause of EMFILE

exec.3
Michael Kerrisk
SEE ALSO: add execveat(2)

fclose.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument
Harmonize all the manual pages to use "stream" for FILE*
instead of randomly using "fp" or "stream." Choosing something
and being consistent helps users scan the man pages quickly
and understand what they are looking at.

fexecve.3
Michael Kerrisk
Rewrite the script+close-on-exec problem as a BUG
Also, add one or two details about this scenario.
Michael Kerrisk
The natural idiom when using fexecve() is to use the close-on-exec flag

fmemopen.3
Michael Kerrisk
Consistency fix: use "stream"
as name for "FILE *" argument

fopencookie.3
Michael Kerrisk
Consistency fix: use "stream" as name for "FILE *" argument

getgrent_r.3
Carlos O'Donell
Consistency fix: use "stream" as name for "FILE *" argument

getline.3
  Michael Kerrisk
    Consistency fix: use "stream" as name for "FILE *" argument

getmntent.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

getpw.3
  Michael Kerrisk [Carlos O'Donell]
    Describe return value when 'uid' is not found

getpwent_r.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

getspnam.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

malloc_info.3
  Carlos O'Donell
    Consistency fix: use "stream" as name for "FILE *" argument

posix_fallocate.3
  Michael Kerrisk
    Note that posix_fallocate() is implemented using fallocate(2)

putgrent.3
  Carlos O'Donell
    Consistency
 fix: use "stream" as name for "FILE *" argument
      Harmonize all the manual pages to use "stream" for FILE*
      instead of randomly using "fp" or "stream." Choosing something
      and being consistent helps users scan the man pages quickly
      and understand what they are looking at.

locale.5
  Akihiro Motoki
    Correct variable name

proc.5
  Michael Kerrisk
    Remove bogus statement about NR_OPEN being a ceiling for file-max

========== Changes in man-pages-3.79 ==========

Released: 2015-02-01, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Akihiro Motoki <amotoki@gmail.com>
Heinrich Schuchardt <xypron.glpk@gmx.de>
J William Piggott <elseifthen@gmx.com>
Masanari Iida <standby24x7@gmail.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Scot Doyle <lkml14@scotdoyle.com>
Sergey
 V. Zubkov <cubbi@cubbi.com>
Stephan Mueller <stephan.mueller@atsec.com>
Vince Weaver <vincent.weaver@maine.edu>
Vivek Goyal <vgoyal@redhat.com>

Apologies if I missed anyone!

New and rewritten pages
---

getrandom.2
  Heinrich Schuchardt, Theodore T'so, Michael Kerrisk
    New page documenting getrandom(2)
      Kernel 3.17 introduces a new system call getrandom(2).

kexec_load.2
  Vivek Goyal, Michael Kerrisk
    Add documentation of kexec_file_load(2)
  Michael Kerrisk, Vivek Goyal
    Rewrite and extend documentation of kexec_load().

New and changed links
---

kexec_file_load.2
  Michael Kerrisk
    New link to kexec_load.2

Changes to individual pages
---

personality.2
  Michael Kerrisk
    SEE ALSO: add setarch(8)

prctl.2
  Michael Kerrisk
    Unused arguments of PR_MPX_(EN,DIS}ABLE_MANAGEMENT must be zero

reboot.2
  Michael Kerrisk
    SEE ALSO:
 add kexec_load(2)

socket.2
  Stephan Mueller
    document AF_ALG
      Add a reference to the AF_ALG protocol accessible via socket(2).

fflush.3
  Michael Kerrisk [Sergey V. Zubkov]
    Clarify that flushing of input streams occurs only for seekable files
      See https://bugzilla.kernel.org/show_bug.cgi?id=91931
  Michael Kerrisk [Sergey V. Zubkov]
    POSIX.1-2008 specifies the behavior when flushing input streams
      POSIX.1-2001 did not have a specification for input streams,
      but POSIX.1-2008 added one.

getopt.3
  Michael Kerrisk
    SEE ALSO: add getopt(1)

random.3
  Heinrich Schuchardt
    SEE ALSO: add getrandom(2)

termios.3
  Michael Kerrisk
    SEE ALSO: add reset(1), setterm(1), tput(1)

tzset.3
  J William Piggott
    Document behavior when TZ filespec omits the colon
      If the TZ filespec omits the leading colon, glibc will parse
      it for any valid format, i.e., it will

still work.
  J William Piggott
    Add description for posixrules file
  J William Piggott
    Correct system timezone file path
  J William Piggott
    There are only two TZ formats
      tzset(3) currently states that there are three TZ formats. The
      first two it lists are actually variations of the POSIX-style
      TZ format, of which there are at least five variations.

      This patch corrects this to match the POSIX specification of
      TZ having only two formats.
  J William Piggott
    Filespec omitted incorrect
      Paragraph three of the DESCRIPTION section says
      that when TZ is set, but empty, then UTC is used.

      Later it says if the TZ filespec is omitted then the file
      /usr/share/zoneinfo/localtime is used. This is incorrect,
      it will use UTC in that case as well.
  J William Piggott
    Fix incorrect TZ string representation
      The TZ string
representation indicates that the start/end
      rules are required; this is incorrect.
  J William Piggott
    Add ENVIRONMENT section + other rearrangements
      FILES section was overly verbose and included
      environment variables. Added ENVIRONMENT section,
      removing ENV VARS from the FILES section.

random.4
  Heinrich Schuchardt
    SEE ALSO: add getrandom(2)

passwd.5
  Michael Kerrisk
    SEE ALSO: add chfn(1), chsh(1)

capabilities.7
  Michael Kerrisk
    SEE ALSO: add setpriv(1)

signal.7
  Michael Kerrisk
    Add getrandom(2) to list of restartable system calls
  Michael Kerrisk

Add F_OFD_SETLKW to list of restartable operations

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_fat.2
  Heinrich Schuchardt [Michael Kerrisk]
    New man page for the ioctl(2) FAT API
      The ioctl(2) system call may be used to retrieve information about
      the FAT file system and to set file attributes.

madvise.2
  Michael Kerrisk
     Summary: this page has been significantly reorganised and rewritten
  Michael Kerrisk
    Recast discussion of 'advice' into two groups of values
      madvise() is one of those system calls that has congealed over
      time, as has the man page. It's helpful to split the discussion
      of 'advice' into those
 flags into two groups:

      * Those flags that are (1) widespread across implementations;
        (2) have counterparts in posix_madvise(3); and (3) were present
        in the initial Linux madvise implementation.
      * The rest, which are values that (1) may not have counterparts
        in other implementations; (2) have no counterparts in
        posix_madvise(3); and (3) were added to Linux in more recent
        times.
  Michael Kerrisk
    Explicitly list the five flags provided by posix_fadvise()
      Over time, bit rot has afflicted this page. Since the original
      text was written many new Linux-specific flags have been added.
      So, now it's better to explicitly list the flags that
      correspond to the POSIX analog of madvise().
  Jan Chaloupka [Hugh Dickins, Michael Kerrisk]
    Starting with Linux 3.5, more file systems support MADV_REMOVE
  Michael Kerrisk
    Split EINVAL
 error into separate cases
  Michael Kerrisk
    Explain MADV_REMOVE in terms of file hole punching
  Michael Kerrisk

MADV_REMOVE can be applied only to shared writable mappings
Michael Kerrisk
MADV_REMOVE cannot be applied to locked or Huge TLB pages
Michael Kerrisk [Vlastimil Babka]
Clarify that MADV_DONTNEED has effect on pages only if it succeeds
Michael Kerrisk [Vlastimil Babka]
Clarifications for MADV_DONTNEED
Michael Kerrisk [Michal Hocko]
Improve MADV_DONTNEED description
Michael Kerrisk
MADV_DONTNEED cannot be applied to Huge TLB or locked pages
Michael Kerrisk [Vlastimil Babka]
Remove mention of "shared pages" as a cause of EINVAL for MADV_DONTNEED
Michael Kerrisk [Vlastimil Babka]
Note Huge TLB as a cause of EINVAL for MADV_DONTNEED
Michael Kerrisk [Minchan Kim]
Add mention of VM_PFNMAP in discussion of MADV_DONTNEED and MADV_REMOVE
Michael Kerrisk

Drop sentence saying that kernel may ignore 'advice'
The sentence creates misunderstandings, and does not really
add information.
Michael Kerrisk
Note that some Linux-specific 'advice' change memory-access semantics
Michael Kerrisk
NOTES: Remove crufty text about "command" versus "advice"
The point made in this fairly ancient text is more or less evident
from the DESCRIPTION, and it's not clear what "standard" is being
referred to.
Michael Kerrisk
Mention POSIX.1-2008 addition of POSIX_MADV_NOREUSE
Michael Kerrisk
Remove "POSIX.1b" from CONFORMING TO
Michael Kerrisk
Move mention of posix_fadvise() from CONFORMING TO to SEE ALSO
Michael Kerrisk
ERRORS: add EPERM error case for MADV_HWPOISON
Michael Kerrisk
Note that madvise() is nonstandard, but widespread

Newly documented interfaces in existing pages
---

proc.5
Michael Kerrisk
(Briefly) document /proc/PID/attr/socketcreate
Michael Kerrisk

(Briefly) document /proc/PID/attr/keycreate
Michael Kerrisk [Stephen Smalley]
Document /proc/PID/attr/{current,exec,fscreate,prev}
Heavily based on Stephen Smalley's text in
https://lwn.net/Articles/28222/
From: Stephen Smalley <sds@epoch.ncsc.mil>
To: LKML and others
Subject: [RFC][PATCH] Process Attribute API for Security Modules
Date: 08 Apr 2003 16:17:52 -0400
Michael Kerrisk
Document /proc/sys/kernel/auto_msgmni

socket.7
David Wilson [Michael Kerrisk]
Document SO_REUSEPORT socket option

New and changed links
---

get_thread_area.2
Andy Lutomirski
Make get_thread_area.2 a link to rewritten set_thread_area.2 page

Changes to individual pages
---

time.1
Michael Kerrisk
Make option argument formatting consistent with other pages

access.2
Denys Vlasenko
Explain how access() check treats capabilities
We have users who are terribly confused why their binaries
with CAP_DAC_OVERRIDE capability see EACCESS from access() calls,
but are able to read the file.

The reason is access() isn't the "can I read/write/execute this
file?" question, it is the "(assuming that I'm a setuid binary,)
can *the user who invoked me* read/write/execute this file?"
question.

That's why it uses real UIDs as documented, and why it ignores
capabilities when capability-endorsed binaries are run by non-root
(this patch adds this information).

To make users more likely to notice this less-known detail,
the patch expands the explanation with rationale for this logic
into a separate paragraph.

arch_prctl.2
set_thread_area.2
get_thread_area.2
Andy Lutomirski
Improve TLS documentation
The documentation for set_thread_area was very vague. This
improves it, accounts for recent kernel changes, and merges
it with get_thread_area.2.

get_thread_area.2 now becomes a link.

While I'm at it, clarify the related arch_prctl.2 man page.

cacheflush.2
Ralf Baechle
Update some portability details and bugs
Michael Kerrisk
Refer reader to BUGS in discussion of EINVAL error

capget.2
Michael Kerrisk
Document V3 capabilities constants
Michael Kerrisk
Rewrite discussion of kernel versions that support file capabilities
File capabilities ceased to be optional in Linux 2.6.33.

clone.2
Peng Haitao
Fix description of CLONE_PARENT_SETTID
CLONE_PARENT_SETTID only stores child thread ID in parent memory.

clone.2
execve.2
Kevin Easton
Document interaction
of execve(2) with CLONE_FILES
This patch the fact that a successful execve(2) in a process that
is sharing a file descriptor table results in unsharing the table.

I discovered this through testing and verified it by source
inspection - there is a call to unshare_files() early in
do_execve_common().

fcntl.2

Michael Kerrisk [Jeff Layton]
Clarify cases of conflict between traditional record and OFD locks
Verified by experiment on Linux 3.15 and 3.19rc4.

fork.2
Michal Hocko
EAGAIN is not reported when task allocation fails
I am not sure why we have:

"EAGAIN fork() cannot allocate sufficient memory to copy
the parent's page tables and allocate a task structure
or the child."

The text seems to be there from the time when man-pages
were moved to git so there is no history for it.

And it doesn't
reflect reality: the kernel reports both
dup_task_struct and dup_mm failures as ENOMEM to the
userspace. This seems to be the case from early 2.x times
so let's simply remove this part.
Heinrich Schuchardt
Child and parent run in separate memory spaces
fork.2 should clearly point out that child and parent
process run in separate memory spaces.
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

getpid.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

getxattr.2
Michael Kerrisk
Various rewordings plus one or two details clarified
Michael Kerrisk
Add pointer to example in listxattr(2)

killpg.2
Michael Kerrisk
NOTES: add "C library/kernel ABI differences" subheading

listxattr.2
Heinrich Schuchardt
Provide example program
Michael Kerrisk
Reword discussion of size==0 case
Michael

Kerrisk
    Add note on handling increases in sizes of keys or values
  Michael Kerrisk
    Remove mention of which filesystems implement ACLs
      Such a list will only become outdated (as it already was).

migrate_pages.2
  Jan Stancek
    Document EFAULT and EINVAL errors
      I encountered these errors while writing testcase for migrate_pages
      syscall for LTP (Linux test project).

      I checked stable kernel tree 3.5 to see which paths return these.
      Both can be returned from get_nodes(), which is called from:
      SYSCALL_DEFINE4(migrate_pages, pid_t, pid, unsigned long, maxnode,
                const unsigned long __user *, old_nodes,
                const unsigned long __user *, new_nodes)

      The testcase does following:
      EFAULT
      a) old_nodes/new_nodes is area mmaped with PROT_NONE
      b) old_nodes/new_nodes is area not mmapped in process address

        space, -1 or area that has been just munmmaped

      EINVAL
      a) maxnodes overflows kernel limit
      b) new_nodes contain node, which has no memory or does not exist
        or is not returned for get_mempolicy(MPOL_F_MEMS_ALLOWED).

modify_ldt.2
  Andy Lutomirski
    Overhaul the documentation
      This clarifies the behavior and documents all four functions.
  Andy Lutomirski
    Clarify the lm bit's behavior
      The lm bit should never have existed in the first place. Sigh.

mprotect.2
  Mark Seaborn
    Mention effect of READ_IMPLIES_EXEC personality flag
      I puzzled over mprotect()'s effect on /proc/*/maps for a while
      yesterday -- it was setting "x" without PROT_EXEC being specified.
      Here is a patch to add some explanation.

msgget.2
  Michael Kerrisk
    Add details of MSGMNI default value

msgop.2
  Michael Kerrisk
    Clarify wording of MSGMAX and MSGMNB
 limits

perf_event_open.2
  Vince Weaver
    Clarify PERF_EVENT_IOC_REFRESH behavior
      Currently the PERF_EVENT_IOC_REFRESH ioctl, when applied to a group
      leader, will refresh all children. Also if a refresh value of 0
      is chosen then the refresh becomes infinite (never runs out).
      Back in 2011 PAPI was relying on these behaviors but I was told
      that both were unsupported and subject to being removed at any time.
      (See https://lkml.org/lkml/2011/5/24/337)
      However the behavior has not been changed.

      This patch updates the manpage to still list the behavior as
      unsupported, but removes the inaccurate description of it
      only being a problem with 2.6 kernels.

prctl.2
  Michael Kerrisk [Bill McConnaughey]
    Mention file capabilities in discussion of PR_SET_DUMPABLE
  Michael Kerrisk
    Greatly expand discussion of "dumpable" flag
      In particular,
 detail the interactions with
      /proc/sys/fs/suid_dumpable.
  Michael Kerrisk
    Reorder paragraphs describing PR_SET_DUMPABLE
  Michael Kerrisk
    Mention SUID_DUMP_DISABLE and SUID_DUMP_USER under PR_SET_DUMPABLE
  Michael Kerrisk
    Executing a file with capabilities also resets the parent death signal

ptrace.2
  James Hunt
    Explain behaviour should ptrace tracer call execve(2)
      This behaviour was verified by reading the kernel source and
      confirming the behaviour using a test program.
  Denys Vlasenko
    Add information on PTRACE_SEIZE versus PTRACE_ATTACH differences
      Extend description of PTRACE_SEIZE with the short summary of its
      differences from PTRACE_ATTACH.

      The following paragraph:

PTRACE_EVENT_STOP
Stop induced by PTRACE_INTERRUPT command, or group-stop, or ini-
tial ptrace-stop when a new child is attached (only if attached
using PTRACE_SEIZE), or PTRACE_EVENT_STOP if PTRACE_SEIZE was used.

has an editing error (the part after last comma makes no sense).
Removing it.

Mention that legacy post-execve SIGTRAP is disabled by PTRACE_SEIZE.

sched_setattr.2
Michael Kerrisk [Christophe Blaess]
SYNOPSIS: remove 'const' from 'attr' sched_getattr() argument

semget.2
Michael Kerrisk
Note default value for SEMMNI and SEMMSL

semop.2
Michael Kerrisk
Note defaults for SEMOPM and warn against increasing > 1000

sendfile.2
Eric Wong
Caution against modifying sent pages

setxattr.2
Michael Kerrisk
ERRORS: add ENOTSUP for invalid namespace prefix
Michael Kerrisk
Remove redundant text under ENOTSUP error
Michael Kerrisk
Note that zero-length attribute values are permitted
Michael Kerrisk
Rework text describing 'flags' argument

stat.2
Michael Kerrisk
NOTES:
add "C library/kernel ABI differences" subheading

statfs.2
Michael Kerrisk [Jan Chaloupka]
Document the 'f_flags' field added in Linux 2.6.36
Michael Kerrisk
Clarify that 'statfs' structure has some padding bytes
The number of padding bytes has changed over time, as some
bytes are used, so describe this aspect of the structure

less explicitly.
  Tao Ma
    Add OCFS2_SUPER_MAGIC
  Michael Kerrisk
    Use __fsword_t in statfs structure definition
      This more closely matches modern glibc reality.
  Michael Kerrisk
    Add a note on the __fsword_t type
  Michael Kerrisk
    Document 'f_spare' more vaguely

wait.2
  Michael Kerrisk
    Note that waitpid() is a wrapper for wait4()
  Michael Kerrisk
    Note that wait() is a library function implemented via wait4()

wait4.2
  Michael Kerrisk
    NOTES: add "C library/kernel ABI differences" subheading

encrypt.3
  Rob Somers
     Improve code example
      I (and some others) found that the original example code
      did not seem to work as advertised. The new code (used by
      permission of the original author, Jens Thoms Toerring)
      was found on comp.os.linux.development.

mktemp.3
  Luke Faraone
    DESCRIPTION reference to BUGS corrected
      mktemp(3)'s DESCRIPTION referenced NOTES, but no such
      section exists. Corrected to refer to BUGS.

pthread_attr_setschedparam.3
  Tobias Herzke
    Describe EINVAL in ERRORS

resolver.3
host.conf.5
  Simon Paillard
    host.conf 'order' option deprecated, replaced by nsswitch.conf(5)
      http://www.sourceware.org/bugzilla/show_bug.cgi?id=2389
      http://repo.or.cz/w/glibc.git/commit/b9c65d0902e5890c4f025b574725154032f8120a

      Reported at http://bugs.debian.org/270368,
      http://bugs.debian.org/396633, and http://bugs.debian.org/344233.

statvfs.3
  Michael
 Kerrisk
    Document missing 'f_flag' bit values
      And reorganize information relating to which flags are in
      POSIX.1.
  Michael Kerrisk [Jan Chaloupka]
    statvfs() now populates 'f_flag' from statfs()'s f_flag field
      These changes came with glibc 2.13, and the kernel's addition of
      a 'f_flags' field in Linux 2.6.36.

syslog.3
  Michael Kerrisk [Doug Goldstein]
    Remove unneeded <stdarg.h>
      vsyslog() does not need this.

tzset.3
  J William Piggott
    Add offset format
      tzset.3 does not illustrate the POSIX offset format.
      Specifically, there is no indication in the manual
      what the optional components of it are.

random.4
  Michael Kerrisk
    Note maximum number of bytes returned by read(2) on /dev/random
  Michael Kerrisk [Mathieu Malaterre]
    Since Linux 3.16, reads from /dev/urandom return at most 32 MB
      See https://bugs.debian.org/775328
 and
      https://bugzilla.kernel.org/show_bug.cgi?id=80981#c9

core.5
  Michael Kerrisk [Bill McConnaughey]
    Executing a file that has capabilities also prevents core dumps
  Michael Kerrisk
    Document "%i" and "%I" core_pattern specifiers

intro.5
  Michael Kerrisk
    Remove words "and protocols"
      There are no protocol descriptions in Section 5. Protocols are
      in Section 7.

proc.5
  Michael Kerrisk
    Add reference to prctl(2) in discussion of /proc/sys/fs/suid_dumpable

And note that /proc/sys/fs/suid_dumpable defines the
value assigned to the process "dumpable" flag in certain
circumstances.
Michael Kerrisk
Note that CAP_SYS_ADMIN is required to list /proc/PID/map_files
This might however change in the future; see the Jan 2015 LKML thread:

Re: [RFC][PATCH v2] procfs: Always expose /proc/<pid>/map_files/

and make it readable

resolv.conf.5
Michael Kerrisk
SEE ALSO: add nsswitch.conf(5)

capabilities.7
Michael Kerrisk
Mention SECBIT_KEEP_CAPS as an alternative to prctl() PR_SET_KEEPCAPS
Chris Mayo
NOTES: add last kernel versions for obsolete options
The CONFIG_SECURITY_CAPABILITIES option was removed by
commit 5915eb53861c5776cfec33ca4fcc1fd20d66dd27

The CONFIG_SECURITY_FILE_CAPABILITIES option removed in
Linux 2.6.33 as already mentioned in DESCRIPTION.

pthreads.7
Michael Kerrisk
SEE ALSO: add fork(2)

unix.7
Jan Chaloupka
Mention SOCK_STREAM socket for ioctl_type of ioctl()
from https://bugzilla.redhat.com/show_bug.cgi?id=1110401.

unix.7 is not clear about socket type of ioctl_type argument of
ioctl() function. The description of SIOCINQ is applicable only
for SOCK_STREAM socket. For SOCK_DGRAM, udp(7) man page gives

correct description of SIOCINQ

ldconfig.8
Michael Kerrisk
Place options in alphabetical order
Michael Kerrisk
Note glibc version number for '-l' option
Michael Kerrisk
Document -c/--format option

Michael Kerrisk
Add long form of some options
Michael Kerrisk [Patrick Horgan]
ld.so.conf uses only newlines as delimiters
mtk: confirmed by reading source of parse_conf() in
elf/ldconfig.c.
Michael Kerrisk
Document -V/--version option
Michael Kerrisk
Document -i/--ignore-aux-cache option

ld.so.8
Michael Kerrisk
Relocate "Hardware capabilities" to be a subsection under notes
This is more consistent with standard man-pages headings
and layout.
Michael Kerrisk
(Briefly) document LD_TRACE_PRELINKING
Michael Kerrisk
Remove duplicate description of LD_BIND_NOT

========== Changes in man-pages-3.81 ==========

Released:
2015-03-02, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alexandre Oliva <aoliva@redhat.com>
Carlos O'Donell <carlos@redhat.com>
Ma Shimiao <mashimiao.fnst@cn.fujitsu.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Peng Haitao <penght@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

attributes.7

Alexandre Oliva, Michael Kerrisk [Carlos O'Donell]
New page describing POSIX safety concepts

Global changes

Many pages
Peng Haitao, Michael Kerrisk
Reformat existing thread-safety information to use a
tabular format, rather than plain text.

Changes to individual pages
---

mmap.2
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function mmap() and munmap() are
thread safe.

a64l.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

acos.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function acos(), acosf() and acosl() are thread safe.

acosh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function acosh(), acoshf() and acoshl() are thread safe.

addseverity.3
Ma Shimiao
ATTRIBUTES: Note function is thread-safe
The function addseverity() is thread safe.

aio_cancel.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function aio_cancel() is thread safe.

aio_fsync.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_fsync() is thread safe.

aio_read.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_read() is thread safe.

aio_suspend.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_suspend() is thread safe.

aio_write.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function aio_write() is thread safe.

argz_add.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe

asin.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function asin(), asinf() and asinl() are thread safe.

assert.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its marking matches glibc marking.

assert_perror.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      Its marking matches glibc marking.

atan2.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function atan2(), atan2f() and atan2l() are thread safe.

atanh.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function atanh(), atanhf() and atanhl() are thread safe.

backtrace.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The markings match glibc markings.

btowc.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe
      The function btowc() in glibc is thread safe.
      Its marking matches glibc marking.

cabs.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function cabs(), cabsf() and cabsl() are thread safe.

cacos.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function cacos(), cacosf() and cacosl() are thread safe.

cacosh.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cacosh(), cacoshf() and cacoshl() in glibc are
      thread safe. Its markings match glibc markings.

canonicalize_file_name.3
  Ma Shimiao
     ATTRIBUTES: Note function that is thread-safe
      The functions canonicalize_file_name() in glibc is thread safe.
      Its marking matches glibc marking.

carg.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The function carg(), cargf() and cargl() are thread safe.

casin.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The functions casin(), casinf() and casinl() are thread safe.
      Their markings match glibc markings.

casinh.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe

The functions casinh(), casinhf() and casinhl() in glibc are
thread safe. Its markings match glibc markings.

catan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions catan(), catanf() and catanl() are thread safe.
Their markings match glibc markings.

catanh.3
Ma Shimiao
ATTRIBUTES: Note functions
that are thread-safe
The functions catanh(), catanhf() and catanhl() in glibc are
thread safe. Its markings match glibc markings.

catopen.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions catopen() and catclose() are thread safe.

cfree.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function cfree() in glibc is thread safe.
Its marking matches glibc marking.

clog10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions clog10(), clog10f() and clog10l() in glibc are
thread safe. Its markings match glibc markings.

clog.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function clog(), clogf() and clogl() are thread safe.

closedir.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function closedir() in glibc is thread safe.
Its marking matches glibc marking.

confstr.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The function confstr() is thread safe.

cosh.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cosh(), coshf() and coshl() in glibc are thread safe.
      Its markings match glibc markings.

cpow.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe
      The functions cpow(), cpowf() and cpowl() in glibc are thread safe.
      Its markings match glibc markings.

crypt.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

ctermid.3
  Ma Shimiao
    Modify thread-safety information
      According to the change of source code, ctermid's level has been
      changed from MT-Unsafe to MT-Safe. After modifying,
 the marking
      matches the glibc marking.

drand48.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

drand48_r.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

ecvt.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be same as glibc manual.

ecvt_r.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

encrypt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

envz_add.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

exec.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions execl(), execlp(), execle(), execv(), execvp() and execvpe() are thread safe.

exit.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

exp10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

exp2.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function exp2(), exp2f() and exp2l() are thread safe.

exp.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function exp(), expf() and expl() are thread safe.

fclose.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe

The function fclose() is thread safe.
Its marking matches glibc marking.

fcloseall.3

Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

fgetc.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fgetwc.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fgetws.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fmod.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function fmod(), fmodf() and fmodl() are thread safe.

fnmatch.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function fnmatch() is thread safe with exceptions.

fopen.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

fopencookie.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fread.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fread() and fwrite() are thread safe.

gamma.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe

The functions gamma(), gammaf() and gammal() are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getcontext.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getcwd.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getcwd(), getwd() and get_current_dir_name() are thread safe.

getdate.3

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getenv.3

Peng Haitao

ATTRIBUTES: Note functions that are thread-safe

The functions getenv() and secure_getenv() are thread safe.

getfsent.3

Peng Haitao

ATTRIBUTES: Note functions that are not thread-safe

The functions setfsent(), getfsent(), endfsent(), getfsspec() and getfsfile() are not thread safe.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getgrent.3

Ma Shimiao

ATTRIBUTES: Note function that is thread-safe

Its marking matches glibc marking.

Ma Shimiao

Modify thread-safety information

As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

getgrnam.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getgrouplist.3
  Peng Haitao
    ATTRIBUTES: Note function that is thread safe with exceptions
      The function getgrouplist() is thread safe with exceptions.

getlogin.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getopt.3
  Peng Haitao
    ATTRIBUTES: Note functions that are not thread-safe
      The functions getopt(), getopt_long() and getopt_long_only() are
       not thread safe.
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpass.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpwent.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

getpwnam.3
  Ma Shimiao
    Modify thread-safety information
      As annotation in glibc manual is more detailed, change the
      thread-safety information to be the same as glibc manual.

gets.3
  Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

getw.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions getw() and putw() are thread safe.

gnu_get_libc_version.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions gnu_get_libc_version() and gnu_get_libc_release()
are thread safe.

hsearch.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

iconv.3
Peng Haitao
Modify thread-safety information

inet.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions inet_aton() and inet_addr() are thread safe with
exceptions.
The functions inet_network(), inet_ntoa(), inet_makeaddr(),
inet_lnaof() and inet_netof() are thread safe.
Modify thread-safety information
After researching and talking,
we think inet_network() and
inet_ntoa() should be marked with locale.
After changing, the markings match glbc markings.

inet_pton.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function inet_pton() is thread safe with exceptions.

iswdigit.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswdigit() is thread safe with exceptions.

iswgraph.3

Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswgraph() is thread safe with exceptions.

iswlower.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswlower() is thread safe with exceptions.

iswprint.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswprint() is thread safe with exceptions.

iswpunct.3
Peng
Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswpunct() is thread safe with exceptions.

iswspace.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswspace() is thread safe with exceptions.

iswupper.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswupper() is thread safe with exceptions.

iswxdigit.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function iswxdigit() is thread safe with exceptions.

j0.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function j0(), j1f() jnl() and so on are thread safe.

lio_listio.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

log10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

The function log10(), log10f() and log10l() are thread safe.

log2.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function log2(), log2f() and log2l() are thread safe.

log.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function log(), logf() and logl() are thread safe.

makecontext.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

makedev.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The macros makedev(), major() and minor() are thread safe.

malloc.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function malloc(), free(), calloc() and realloc() are
thread safe.

mblen.3
Ma Shimiao
Modify thread-safety information
As annotation in
glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

mbstowcs.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

mbtowc.3
Peng Haitao
ATTRIBUTES: Note function that is not thread-safe
The function mbtowc() is not thread safe.
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the

thread-safety information to be the same as glibc manual.

mktemp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function mktemp() is thread safe.

mtrace.3
Peng Haitao
ATTRIBUTES: Note functions that are not thread-safe
The functions mtrace() and muntrace() are not thread safe.

nan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

nl_langinfo.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function nl_langinfo() is thread safe with exceptions.

opendir.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

pow10.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function pow10(), pow10f() and pow10l() are thread safe.

pow.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function pow(), powf() and powl() are thread safe.

pthread_setcancelstate.3
Michael Kerrisk
Add async-signal-safety information

ptsname.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

putenv.3

Ma Shimiao
ATTRIBUTES: Note function that is thread-unsafe
The function putenv() is
thread unsafe.

puts.3
Peng Haitao
ATTRIBUTES: Note functions that are thread-safe
The functions fputc(), fputs(), putc(), putchar() and puts() are
thread safe.

putwchar.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

qecvt.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be same as glibc manual.

rand.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The functions rand(), rand_r() and srand() are thread safe.

random_r.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

readdir.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more
detailed, change the
thread-safety information to be same as glibc manual.

realpath.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

regex.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions

The functions regcomp() and regexec() are thread safe with exceptions.
The functions regerror() and regfree() are thread safe.

remainder.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

scalb.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function scalb(), scalbf() and scalbl() are thread safe.

setenv.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-unsafe
The function setenv() and unsetenv() are thread unsafe.

siginterrupt.3
Ma Shimiao
Modify thread-safety information
As annotation
in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

sigset.3
Peng Haitao
ATTRIBUTES: Note macros that are thread-safe
The functions sigset(), sighold(), sigrelse() and sigignore() are thread safe.

sinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function sinh(), sinhf() and sinhl() are thread safe.

sqrt.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The function sqrt(), sqrtf() and sqrtl() are thread safe.

stdarg.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

stdio_ext.3
Ma Shimiao
Modify thread-safety information
Change the thread safety information to be the same as glibc.

strcasecmp.3
Peng Haitao
ATTRIBUTES:
Note functions that are thread safe with exceptions
The functions strcasecmp() and strncasecmp() are thread safe with exceptions.

strerror.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

strfmon.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

strfry.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function strfry() is thread safe.

strftime.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function strftime() is thread safe with exceptions.

strptime.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function strptime() is thread safe with exceptions.

strtok.3
Ma Shimiao
Modify thread-safety
information
As annotation in glibc manual is more detailed, change the thread-safety information to be the same as glibc manual.

strverscmp.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe

The function strverscmp() is thread safe.

strxfrm.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

syslog.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions openlog() and closelog() are thread safe.
The functions syslog() and vsyslog() are thread safe with exceptions.

tempnam.3
Peng Haitao
ATTRIBUTES: Note function that is thread-safe
The function tempnam() is thread safe.

termios.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the thread-safety information to
be the same as glibc manual.
Ma Shimiao
Modify thread-safety information
As this is man page for Linux, we don't need thread safety information for bsd

tgamma.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions tgamma(), tgammaf() and tgammal() in glibc are thread safe. Its markings match glibc markings.

timegm.3
Peng Haitao
ATTRIBUTES: Note functions that are thread safe with exceptions
The functions timelocal() and timegm() are thread safe with exceptions.

tmpfile.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its markings match glibc markings.

tmpnam.3

Peng Haitao
Modify thread-safety information
When the argument s is NULL, tmpnam() should be MT-Unsafe.

toupper.3
Ma Shimiao
Modify thread-safety information
After researching and talking, we think toupper() and tolower()
should not be marked with locale.
After changing, the markings match glbc markings.

tsearch.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The functions' markings match glibc markings.

ttyname.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be same as glibc manual.

tzset.3
Peng Haitao
ATTRIBUTES: Note function that is thread safe with exceptions
The function tzset() is thread safe with exceptions.

wcsdup.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
Its marking matches glibc marking.

wctomb.3
Ma Shimiao
Modify thread-safety information
As annotation in glibc manual is more detailed, change the
thread-safety information to be the same as glibc manual.

y0.3
Ma Shimiao
ATTRIBUTES: Note functions
that are thread-safe
The function y0(), y1f() ynl() and so on are thread safe.

Apologies if I missed anyone!

New
 and rewritten pages
---

nptl.7
  Michael Kerrisk
    New page with details of the NPTL POSIX threads implementation

Newly documented interfaces in existing pages
---

user_namespaces.7
  Eric W. Biederman [Michael Kerrisk]
    Document /proc/[pid]/setgroups

Changes to individual pages
---

intro.1
  Stéphane Aulery
    Prompt is not % but $
  Stéphane Aulery
    Various improvements
      - Add reference to other common shells dash(1), ksh(1)
      - Add a reference to stdout(3)
      - Separate cp and mv descriptions
      - Add examples of special cases of cd
      - Add su(1) and shutdown(8) references for section Logout
        and poweroff
      - Move Control-D to section Logout and poweroff
      - Fix some little formatting errors
  Stéphane Aulery

Add cross references cited
Stéphane Aulery

Order SEE ALSO section

clone.2
Josh Triplett
Document that clone() silently ignores CLONE_PID and CLONE_STOPPED
Normally, system calls return EINVAL for flags they don't support.
Explicitly document that clone does *not* produce an error for
these two obsolete flags.
Michael Kerrisk
Small rewording of explanation of clone() wrt threads
Clone has so many effects that it's an oversimplification to say
that the *main* use of clone is to create a thread. (In fact,
the use of clone() to create new processes may well be more
common, since glibc's fork() is a wrapper that calls clone().)

getgroups.2
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread
attribute. NPTL uses a signal-based mechanism to ensure that
when one thread changes its
credentials, all other threads change
credentials to the same values. By this means, the NPTL
implementation conforms to the POSIX requirement that the threads
in a process share credentials.
Michael Kerrisk
ERRORS: add EPERM for the case where /proc/PID/setgroups is "deny"
Michael Kerrisk
Note capability associated with EPERM error for setgroups(2)
Michael Kerrisk
Refer reader to user_namespaces(7) for discussion of /proc/PID/setgroups
The discussion of /proc/PID/setgroups has moved from
proc(5) to user_namespaces(7).

getpid.2
Michael Kerrisk
Note that getppid() returns 0 if parent is in different PID namespace

getsockopt.2
Konstantin Shemyak
Note RETURN VALUE details when netfilter is involved

ioctl_list.2
Heinrich Schuchardt
SEE ALSO ioctl_fat.2

Add FAT_IOCTL_GET_VOLUME_ID
SEE ALSO ioctl_fat.2
Heinrich Schuchardt

include/linux/ext2_fs.h
Include linux/ext2_fs.h does not contain any ioctl definitions anymore.

Request codes EXT2_IOC* have been replaced by FS_IOC* in linux/fs.h.

Some definitions of FS_IOC_* use long* but the actual code expects int* (see fs/ext2/ioctl.c).

msgop.2
Bill Pemberton
Remove EAGAIN as msgrcv() errno
The list of errnos for msgrcv() lists both EAGAIN and ENOMSG as the errno for no message available with the IPC_NOWAIT flag. ENOMSG is the errno that will be set.
Bill Pemberton
Add an example program

open.2
Michael Kerrisk [Jason Vas Dias]
Mention blocking semantics for FIFO opens
See https://bugzilla.kernel.org/show_bug.cgi?id=95191

seccomp.2
Jann Horn [Kees Cook, Mikael Pettersson, Andy Lutomirski]
Add note about alarm(2) not being sufficient to limit runtime
Jann Horn
Explain blacklisting
problems, expand example
Michael Kerrisk [Kees Cook]
Add mention of libseccomp

setgid.2
Michael Kerrisk
Clarify that setgid() changes all GIDs when caller has CAP_SETGID
Michael Kerrisk [Shawn Landden]
Add discussion of NPTL credential-changing mechanism
At the kernel level, credentials (UIDs and GIDs) are a per-thread attribute. NPTL uses a signal-based mechanism to ensure that when one thread changes its credentials, all other threads change credentials to the same values. By this means, the NPTL implementation conforms to the POSIX requirement that the threads in a process share credentials.

setresuid.2
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread
 changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.

setreuid.2
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.
  Michael Kerrisk
    SEE ALSO: add credentials(7)

setuid.2
  Michael Kerrisk
    Clarify that setuid() changes all UIDs when caller has CAP_SETUID
  Michael Kerrisk [Shawn Landden]
    Add discussion of NPTL
 credential-changing mechanism
      At the kernel level, credentials (UIDs and GIDs) are a per-thread
      attribute. NPTL uses a signal-based mechanism to ensure that
      when one thread changes its credentials, all other threads change
      credentials to the same values. By this means, the NPTL
      implementation conforms to the POSIX requirement that the threads
      in a process share credentials.

sigaction.2
  Michael Kerrisk
    Add discussion of rt_sigaction(2)
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc wrapper gives an EINVAL error on attempts to change the
      disposition of either of the two real-time signals used by NPTL.

sigpending.2
  Michael Kerrisk
    Add discussion of rt_sigpending(2)

sigprocmask.2
  Michael Kerrisk
    Add discussion of rt_sigprocmask(2)
  Michael Kerrisk
    Note treatment of signals used internally by NPTL

    The glibc wrapper silently ignores attempts to block the two
      real-time signals used by NPTL.

sigreturn.2
  Michael Kerrisk
    Add discussion of rt_sigreturn(2)

sigsuspend.2
  Michael Kerrisk
    Add discussion of rt_sigsuspend(2)

sigwaitinfo.2
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc wrappers silently ignore attempts to wait for
      signals used by NPTL.
  Michael Kerrisk
    Add discussion of rt_sigtimedwait(2)

socket.2
  Heinrich Schuchardt
    SEE ALSO close(2)
      The description mentions close(2). Hence it should also be
      referenced in the SEE ALSO section.

syscall.2
  Jann Horn
    Add x32 ABI

umount.2
  Eric W. Biederman
    Document the effect of shared subtrees on umount(2)
  Eric W. Biederman
    Correct the description of MNT_DETACH
      I recently realized that I had been reasoning improperly about
      what umount(MNT_DETACH)
 did based on an insufficient description
      in the umount.2 man page, that matched my intuition but not the
      implementation.

      When there are no submounts, MNT_DETACH is essentially harmless to

applications. Where there are submounts, MNT_DETACH changes what
is visible to applications using the detach directories.
Michael Kerrisk
Move "shared mount + umount" text to a subsection in NOTES

aio_return.3
Stéphane Aulery
Document the return value on error
Reported by Alexander Holler <holler@ahsoftware.de>

clock.3
Stéphane Aulery
CLOCKS_PER_SEC = 1000000 is required by XSI, not POSIX
Debian Bug #728213 reported by Tanaka Akira <akr@fsij.org>

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=728213

dlopen.3
Michael Kerrisk
Amend error in description of dlclose() behavior
The current text says that unloading depends on
whether
the reference count falls to zero *and no other libraries
are using symbols in this library*. That latter text has
been there since man-pages-1.29, but it seems rather dubious.
How could the implementation know whether other libraries
are still using symbols in this library? Furthermore, no
other implementation's man page mentions this point.
Seems best to drop this point.
Michael Kerrisk
Add some details for RTLD_DEFAULT
Michael Kerrisk
Add some details on RTLD_NEXT and preloading
Michael Kerrisk
RTLD_NEXT works for symbols generally, not just functions
The common use case is for functions, but RTLD_NEXT
also applies to variable symbols.
Michael Kerrisk
dlclose() recursively closes dependent libraries
Note that dlclose() recursively closes dependent libraries
that were loaded by dlopen()
Michael
Kerrisk
Rename second dlopen() argument from "flag" to "flags"
This is more consistent with other such arguments
Michael Kerrisk
Reformat text on RTLD_DEFAULT and RTLD_NEXT

fmemopen.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fpathconf.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

fputwc.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

fputws.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

fseek.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

fseeko.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

gcvt.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

getline.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

getwchar.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

hypot.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

The markings match glibc markings.

iconv_open.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

if_nameindex.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The markings match glibc markings.

initgroups.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The markings match glibc markings.

mq_open.3
Torvald Riegel
Add EINVAL error case for invalid name
This behavior is implementation-defined
by POSIX. If the name
doesn't start with a '/', glibc returns EINVAL without attempting
the syscall.

popen.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

pthread_kill.3
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc pthread_kill() function gives an error on attempts
to send either of the real-time signals used by NPTL.

pthread_sigmask.3
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc implementation silently ignores attempts to block the two
real-time signals used by NPTL.

pthread_sigqueue.3
Michael Kerrisk
Note treatment of signals used internally by NPTL
The glibc pthread_sigqueue() function gives an error on attempts
to send either of the real-time signals used by NPTL.

resolver.3
  Stéphane Aulery [Jakub Wilk]
    Document missing options used by _res structure indicate defaults
      Missing options: RES_INSECURE1, RES_INSECURE2, RES_NOALIASES,
      USE_INET6, ROTATE, NOCHECKNAME, RES_KEEPTSIG, BLAST, USEBSTRING,
      NOIP6DOTINT, USE_EDNS0, SNGLKUP, SNGLKUPREOP, RES_USE_DNSSEC,
      NOTLDQUERY, DEFAULT

      Written from the glibc source and resolv.conf.5.

      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=527136
  Stéphane Aulery
    RES_IGNTC is implemented

rint.3
  Matt Turner
    Document that halfway cases are rounded to even
      Per IEEE-754 rounding rules.

      The round(3) page describes the behavior of rint and nearbyint
      in the halfway cases by saying:

        These functions round x to the nearest integer, but round
        halfway cases away from zero [...], instead of to the
        nearest even integer like rint(3)

sigqueue.3
  Michael Kerrisk
    NOTES:
 add "C library/kernel ABI differences" subheading
  Michael Kerrisk
    Clarify version info (mention rt_sigqueueinfo())

sigsetops.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc sigfillset() function excludes the two real-time
      signals used by NPTL.

sigwait.3
  Michael Kerrisk
    Note treatment of signals used internally by NPTL
      The glibc sigwait() silently ignore attempts to wait for
      signals used by NPTL.

strcoll.3
  Ma Shimiao
    ATTRIBUTES: Note function that is thread-safe

The markings match glibc markings.

strdup.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
The marking matches glibc marking.

tzset.3
J William Piggott
Add 'std' quoting information

ulimit.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

wcstombs.3
Ma Shimiao

ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

wctob.3
Ma Shimiao
ATTRIBUTES: Note function that is thread-safe
The marking matches glibc marking.

xdr.3
Taisuke Yamada
Clarified incompatibility and correct usage of XDR API
See http://bugs.debian.org/628099

console_codes.4
Scot Doyle
Add Console Private CSI sequence 15
An undocumented escape sequence in drivers/tty/vt/vt.c brings the
previously accessed virtual terminal to the foreground.
mtk: Patch misattributed to Taisuke Yamada in Git commit
because of a muck up on my part.
Michael Kerrisk
Add kernel version number for CSI sequence 15

random.4
Michael Kerrisk
Fix permissions shown for the devices
These days, the devices are RW for everyone.

filesystems.5

Michael Kerrisk
Remove dubious claim about comparative performance of ext2
Perhaps it was the best filesystem performance-wise in
the 20th century, when that text was written. That probably
ceased to be true quite a long time ago, though.
Stéphane Aulery
Add cross references for ext filesystems
Stéphane Aulery
Specifies the scope of this list and its limits.

host.conf.5
hosts.5
resolv.conf.5
Stéphane Aulery [Paul E Condon]
Cross references of these pages.
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=298259

host.conf.5
Stéphane Aulery
Rework discussion of nospoof, spoofalert, spoof and RESOLV_SPOOF_CHECK
The keywords and environment variables "nospoof", "spoofalert",
"spoof" and RESOLV_SPOOF_CHECK were added to glibc 2.0.7 but
never implemented

Move descriptions to historical section and reorder it for clarity

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=773443

hosts.5
Stéphane
Aulery [Vincent Lefevre]
Mention 127.0.1.1 for FQDN and IPv6 examples
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=562890

proc.5
Taisuke Yamada
Document /proc/PID/status VmPin field
See https://bugs.launchpad.net/bugs/1071746
Michael Kerrisk
Document (the obsolete) /proc/PID/seccomp
Michael Kerrisk
Replace description of 'uid_map' with a reference to user_namespaces(7)
All of the information in proc(5) was also present in
user_namespaces(7), but the latter was more detailed
and up to date.
Taisuke Yamada
Fix SELinux /proc/pid/attr/current example
Since the /proc/pid/attr API was added to the kernel, there

have been a couple of changes to the SELinux handling of
/proc/pid/attr/current. Fix the SELinux /proc/pid/attr/current
example text to reflect these changes and note which kernel
versions first included
the changes.

securetty.5
Stéphane Aulery [Nicolas FRANCOIS]
Note that the pam_securetty module also uses this file
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=528015

This patch is a modified version of the one proposed without
parts specific to Debian.

boot.7
Michael Witten
Copy edit
While a lot of the changes are issues of presentation,
there are also issues of grammar and punctuation.
Michael Witten
Mention `systemd(1)' and its related `bootup(7)'
It's important that the reader receive contemporary information.

credentials.7
Michael Kerrisk
SEE ALSO: add pthreads(7)
Michael Kerrisk
Add reference to nptl(7)

feature_test_macros.7
Michael Kerrisk
Update discussion of _FORTIFY_SOURCE
Since the initial implementation a lot more checks were added.
Describe all the checks would be too verbose (and would
soon
fall out of date as more checks are added). So instead, describe
the kinds of checks that are done more generally.
Also a few other minor edits to the text.

hier.7
Stéphane Aulery
First patch of a series to achieve compliance with FHS 2.3
Stéphane Aulery
SGML and XML directories are separated in FHS 2.3
Stéphane Aulery
Add missing directories defined by FHS 2.3
Stéphane Aulery
Identify which directories are optional

Stéphane Aulery
Document /initrd, /lost+found and /sys
Ubuntu Bug #70094 reported by Brian Beck
https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/70094
Stéphane Aulery
Explain YP, which is not obvious

ipv6.7
Stéphane Aulery [David Madore]
SOL_IPV6 and other SOL_* options socket are not portable
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=472447

man-pages.7
Michael Kerrisk [Bill Pemberton]

Add indent(1) command that produces desired formatting for example code
Stéphane Aulery
Improve description of sections in accordance with intro pages

packet.7
Michael Kerrisk
Rework description of fanout algorithms as list
Michael Kerrisk
Remove mention of needing UID 0 to create packet socket
The existing text makes no sense. The check is based
purely on a capability check. (Kernel function
net/packet/af_packet.c::packet_create()
Michael Kerrisk
Remove text about ancient glibc not defining SOL_PACKET
This was fixed in glibc 2.1.1, which is a long while ago.
And in any case, there is nothing special about this case;
it's just one of those times when glibc lags.
Michael Kerrisk
Rework description of 'sockaddr_ll' fields as a list
Michael Kerrisk
Various minor edits

pthreads.7
Michael Kerrisk
Add references to nptl(7)

raw.7
Michael Kerrisk
Rephrase "Linux 2.2" language to "Linux 2.2 or later"
The man page was written in the LInux 2.2 timeframe, and
some phrasing was not future-proof.

signal.7

Michael Kerrisk
Note when Linux added realtime signals
Michael Kerrisk
Correct the range of realtime signals
Michael Kerrisk
Summarize 2.2 system call changes that resulted from larger signal sets
Michael Kerrisk
SEE ALSO: add nptl(7)

tcp.7
Peter Adkins
Document removal of TCP_SYNQ_HSIZE
Looking over the man page for 'tcp' I came across a reference to
tuning the 'TCP_SYNQ_HSIZE' parameter when increasing
'tcp_max_syn_backlog' above 1024. However, this static sizing was
removed back in Linux 2.6.20 in favor of dynamic scaling - as
part of commit 72a3effaf633bcae9034b7e176bdbd78d64a71db.

user_namespaces.7
Eric W. Biederman
Update the documentation to
reflect the fixes for negative groups
Files with access permissions such as rwx---rwx give fewer
permissions to their group then they do to everyone else. Which
means dropping groups with setgroups(0, NULL) actually grants a
process privileges.

The unprivileged setting of gid_map turned out not to be safe
after this change. Privileged setting of gid_map can be
interpreted as meaning yes it is ok to drop groups. [Eric
additionally noted: Setting of gid_map with privilege has been
clarified to mean that dropping groups is ok. This allows
existing programs that set gid_map with privilege to work
without changes. That is, newgidmap(1) continues to work
unchanged.]

To prevent this problem and future problems, user namespaces were
changed in such a way as to guarantee a user can not obtain
credentials without
privilege that they could not obtain without
the help of user namespaces.

This meant testing the effective user ID and not the filesystem
user ID, as setresuid(2) and setregid(2) allow setting any process
UID or GID (except the supplementary groups) to the effective ID.

Furthermore, to preserve in some form the useful applications
that have been setting gid_map without privilege, the file

/proc/[pid]/setgroups was added to allow disabling setgroups(2).
With setgroups(2) permanently disabled in a user namespace, it
again becomes safe to allow writes to gid_map without privilege.
Michael Kerrisk
Rework some text describing permission rules for updating map files
No (intentional) change to the facts, but this restructuring
should make the meaning easier to grasp.
Michael Kerrisk
Update kernel version associated with 5-line limit for
map files
As at Linux 3.18, the limit is still five lines, so mention the
more recent kernel version in the text.
Michael Kerrisk [Alban Crequy]
Handle /proc/PID/setgroups in the example program
Michael Kerrisk
Rework text describing restrictions on updating /proc/PID/setgroups
No (intentional) changes to factual description, but the
restructured text is hopefully easier to grasp.
Michael Kerrisk
Explain why the /proc/PID/setgroups file was added

ldconfig.8
Michael Kerrisk
Note use of /lib64 and /usr/lib64 on some 64-bit architectures

ld.so.8
Michael Kerrisk
Note the use of /lib64 and /usr/lib64 on some 64-bit architectures

========== Changes in man-pages-3.83 ==========

Released: 2015-04-19, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have
been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

posix_madvise.3
  Michael Kerrisk
    New page documenting posix_madvise(3)

ftw.3
  Michael Kerrisk
    Reorganize the page to give primacy to nftw()
      nftw() is the better API, and POSIX.1-2008 marks ftw() obsolete.

Newly documented interfaces in existing pages
---

getdents.2
  Michael Kerrisk [Dima Tisnek]

Document getdents64()
See https://bugzilla.kernel.org/show_bug.cgi?id=14795

mount.2
Michael Kerrisk, Theodore Ts'o [Eric Sandeen, Andreas Dilger,
Omar Sandoval, Darrick J. Wong]
Document MS_LAZYTIME

proc.5
Michael Kerrisk
Document /proc/sys/kernel/randomize_va_space
Michael Kerrisk
Document /proc/PID/fdinfo epoll format
Michael
Kerrisk
Describe /proc/PID/fdinfo eventfd format
Michael Kerrisk
Document /proc/PID/fdinfo signalfd format

New and changed links
---

newfstatat.2
Michael Kerrisk
New link to fstatat64.2

prlimit64.2
Michael Kerrisk
New link to getrlimit.2

Global changes

Various section 3 math pages
Michael Kerrisk
Note that these functions are also in POSIX.1-2001 and POSIX.1-2008

Changes to individual pages
---

getent.1
Robin H. Johnson
Document options
The options to getent are now documented, after being around for
nearly a decade without changes.

Michael Kerrisk
Document help and version options

fallocate.2
Michael Kerrisk
Fix kernel version number for FALLOC_FL_ZERO_RANGE
FALLOC_FL_ZERO_RANGE was added in 3.15, not 3.14.
Michael Kerrisk
Note that SMB3 added FALLOC_FL_ZERO_RANGE support in Linux
3.17

getrlimit.2
Michael Kerrisk
Note that the underlying system call for prlimit() is prlimit64()
Michael Kerrisk
Remove "_FILE_OFFSET_BITS == 64" from prlimit() FTM requirements
"_FILE_OFFSET_BITS == 64" is not needed to get the prlimit()
declaration.

ioctl_list.2
Nikos Mavrogiannopoulos
SIOCADDRT accepts in6_rtmsg in INET6 protocol
Heinrich Schuchardt
TFD_IOC_SET_TICKS
timerfd_create.2 mentions TFD_IOC_SET_TICKS. We should add it to
ioctl_list.2, too.

llseek.2
Michael Kerrisk
Advise reader to use lseek(2) instead
Michael Kerrisk
llseek() exists on 32-bit platforms to support seeking to large offsets

madvise.2
David Rientjes
Specify MADV_REMOVE returns EINVAL for hugetlbfs
madvise(2) actually returns with error EINVAL for MADV_REMOVE
when used for hugetlb VMAs, not EOPNOTSUPP, and this has been
the case since MADV_REMOVE
was introduced in commit f6b3ec238d12
("madvise(MADV_REMOVE): remove pages from tmpfs shm backing
store"). Specify the exact behavior.
Michael Kerrisk
SEE ALSO: add posix_madvise(2)

poll.2
Michael Kerrisk [Andreas Baak]
SEE ALSO: add epoll(7)

posix_fadvise.2
  Michael Kerrisk
    Add "C library/kernel ABI differences" subsection

pread.2
  Michael Kerrisk
    Add "C library/kernel ABI differences" subsection

seccomp.2
  Michael Kerrisk [Pierre Chifflier, Kees Cook]
    Note that seccomp_data is read-only

stat.2
  Michael Kerrisk
    Add some details on various "stat" versions
      Three versions of "stat" appeared on 32-bit systems,
      dealing with structures of different (increasing) sizes.
      Explain some of the details, and also note that the
      situation is simpler on modern 64-bit architectures.
  Michael Kerrisk
    Add mention of newfstatat()

 The underlying system call for fstatat() is newfstatat()
      on some architectures.

symlink.2
  Michael Kerrisk [Jonny Grant]
    ERRORS: add linkpath=="" case for ENOENT

syscalls.2
  Michael Kerrisk
    Remove prlimit()
      There really is only the prlimit64() system call.
  Michael Kerrisk
    Add some details about the "multiple versions of system calls"
      The multiple-system-call-version phenomenon is particularly a
      feature of older 32-bit platforms. Hint at that fact in the text.

timerfd_create.2
  Cyrill Gorcunov [Michael Kerrisk]
    Document TFD_IOC_SET_TICKS ioctl() operation
  Michael Kerrisk
    Add some details to C library/kernel ABI differences

unshare.2
  Michael Kerrisk [Fabien Pichot]
    Remove mention of "System V" from discussion of CLONE_NEWIPC

These days, CLONE_NEWIPC also affects POSIX message queues.

asprintf.3
Zeng Linggang
ATTRIBUTES: Note functions that
are thread-safe

carg.3
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ccos.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ccosh.3
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

cexp.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

clock.3

ATTRIBUTES: Note functions that is thread-safe

clog.3
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

csin.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

csinh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions
calculate

csqrt.3
Ma Shimiao

ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Simplify description of what these functions calculate

ctan.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ctanh.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Add introductory sentence explaining what these functions calculate

ctime.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

exec.3
Michael Kerrisk
SYNOPSIS: Clarify calling signature for execl() and execlp()
Michael Kerrisk [Andreas Baak]
Correct prototype for execle()
Make the prototype shown into correct C.

ftw.3
Michael Kerrisk [Felix Sedlmeier]
ftw() and nftw() differ for the non-stat-able symlink case
The POSIX specification of ftw() says
that an un-stat-able
symlink may yield either FTW_NS or FTW_SL. The specification
of nftw() does not carry this statement.
Michael Kerrisk
CONFORMING TO: add POSIX.1-2008
Michael Kerrisk
Update POSIX version references in NOTES

getcwd.3
Jann Horn [Michael Kerrisk]
Note behavior for unreachable current working directory
Michael Kerrisk
Add ENOMEM error

gethostbyname.3
Michael Kerrisk [Jonny Grant]
Clarify that NO_ADDRESS and NO_DATA are synonyms

Michael Kerrisk
Add some detail for NO_DATA
Text consistent with POSIX and FreeBSD's gethostbyname() man page.
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

getnetent.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

get_nprocs_conf.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

getutent.3
Zeng Linggang
ATTRIBUTES: Note functions that
aren't thread-safe

glob.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

insque.3
Ma Shimiao
ATTRIBUTES: Note functions that are thread-safe

login.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

lseek64.3
Michael Kerrisk
Clarify details with respect to 32-bit and 64-bit systems

malloc.3
Michael Kerrisk
Add ENOMEM error

mbsnrtowcs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

mbsrtowcs.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

mq_notify.3

Michael Kerrisk
Add "C library/kernel ABI differences" subsection

mq_open.3
Michael Kerrisk [Fabien Pichot]
NOTES: explain differences from the underlying system call
The check for the slash at the start of a pathname is done in glibc

openpty.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

perror.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

posix_memalign.3
Zeng Linggang
ATTRIBUTES: Note functions that aren't thread-safe

printf.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe
Walter Harms [Michael Kerrisk]
Simplify the example code

qsort.3
Michael Kerrisk [Rob Landley]
alphasort() and versionsort() are not suitable for 'compar'
In glibc 2.10, the prototypes of alphasort() and versionsort()
were changed so that the arguments switched from 'const void *' to
'const struct dirent **', to match the POSIX.1-2008 specification
of alphasort(). As such, compiler warnings will result if
these functions are used as the arguments of qsort().

warning: passing argument 4 of 'qsort' from incompatible
pointer type
expected '__compar_fn_t' but argument is of type
'int (*)(const struct dirent
**, const struct dirent **)'

Therefore, remove the ancient NOTES text suggesting that
alphasort() and versionsort() can be used as suitable
'compar' arguments for qsort().

realpath.3
Michael Kerrisk [Jon Grant]
Add ENOMEM error

scandir.3
  Michael Kerrisk
    glibc 2.10 changed the argument types for alphasort() and versionsort()
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

scanf.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

setnetgrent.3
  Zeng Linggang
    ATTRIBUTES: Note functions that aren't thread-safe

significand.3
  Ma Shimiao
    ATTRIBUTES: Note functions that are thread-safe

strcasecmp.3
  Michael Kerrisk [Jonny Grant]
    Clarify that strcasecmp() does a byte-wise comparison
  Michael Kerrisk
    CONFORMING TO: add POSIX.1-2008

unlocked_stdio.3
  Zeng Linggang
    ATTRIBUTES: Note functions that aren't thread-safe

updwtmp.3
   Zeng Linggang
    ATTRIBUTES: Note functions that aren't thread-safe

wcrtomb.3
  Zeng Linggang
    ATTRIBUTES: Note function that isn't thread-safe

wcsnrtombs.3
  Zeng Linggang
    ATTRIBUTES: Note function that isn't thread-safe

wcsrtombs.3
  Zeng Linggang
    ATTRIBUTES: Note function that isn't thread-safe

wordexp.3
  Zeng Linggang
    ATTRIBUTES: Note functions that aren't thread-safe

wprintf.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

proc.5
  Michael Kerrisk
    Describe "mnt_id" field of /proc/PID/fdinfo
  Michael Kerrisk
    Note that abstract sockets are included in /proc/net/unix
  Michael Kerrisk
    Update description /proc/sys/unix 'Type' field
      The existing text was very crufty. UNIX domain sockets
      support more than SOCK_STREAM for a _very_ long time now.
  Michael Kerrisk
    Add some detail to /proc/PID/timers
  Michael Kerrisk [Vlastimil Babka]

    Enhance discussion of /proc/PID/status 'VmSwap' field

epoll.7
  Michael Kerrisk
    SEE ALSO: add poll(2) and select(2)

icmp.7
  YOSHIFUJI Hideaki/
    Document net.ipv4.ping_group_range knob

nptl.7
  Michael Kerrisk
    Add reference to timer_create(2)

New and rewritten pages
---

get_phys_pages.3
  William Woodruff
    Document get_phys_pages() and get_avphys_pages()

loop.4
  Urs Thuermann, Michael Kerrisk
    New page documenting the loop device

xattr.7

 Andreas Gruenbacher
    Import attr(5) man page from the 'attr' project
      After discussions with Andreas Gruenbacher, it makes sense to
      move this page into man-pages, since it mostly relates to
      kernel details. Since this is an overview page,
      we'll move it to Section 7.
  Michael Kerrisk
     Rename page
      "xattr" is a more meaningful name than "attr" (it resonates
      with the names of the system calls), so as long as we are
      moving the page to a new section, we'll change the name as well,
      and retain an acl(5) link so that old references remain valid.

Newly documented interfaces in existing pages
---

mmap.2
  Michael Kerrisk [Andi Kleen]
    Document MAP_HUGE_2MB, MAP_HUGE_1GB, and MAP_HUGE_SHIFT

shmget.2
  Michael Kerrisk [Andi Kleen]
    Document SHM_HUGE_2MB, SHM_HUGE_1GB, and SHM_HUGE_SHIFT

resolver.3
  Michael Kerrisk [Jonathan
 Nieder]
    Add descriptions of some other resolver functions
      Add res_ninit(), res_nquery(), res_nsearch(),
      and res_nquerydomain(), res_nmkquery(), res_nsend().

tty_ioctl.4
  Frédéric Maria [Stephane Fillod, Andreas Heiduk]
    Document TIOCMIWAIT and TIOCGICOUNT
  Michael Kerrisk
    Document TIOCGEXCL
  Michael Kerrisk
    Document TIOGCPKT
  Michael Kerrisk
    Document TIOCSPTLCK
  Michael Kerrisk
    Document TIOCGPTLCK

New and changed links

CMSG_DATA.3
  Michael Kerrisk
    New link to cmsg(3)

CMSG_LEN.3
  Michael Kerrisk
    New link to cmsg(3)

dprintf.3
  Michael Kerrisk
    Convert to a link to printf.3

get_avphys_pages.3
  William Woodruff
    New link to new get_phys_pages.3 page

res_ninit.3
res_nmkquery.3
res_nquery.3
res_nquerydomain.3
res_nsearch.3
res_nsend.3
  Michael Kerrisk
    New links to resolver(3) man page

loop-control.4
  Michael Kerrisk
    New link to loop.4

attr.5
  Michael Kerrisk
    New link to xattr(7)

Global changes
---

chown.2
execve.2
prctl.2
truncate.2
proc.5
capabilities.7
ld.so.8
  Michael Kerrisk
    Tighter wording: 'mode bit' rather than 'permission bit'
      For sticky, set-UID, and set-GID mode bits (as used in POSIX).

Changes to individual pages
---

add_key.2
keyctl.2
request_key.2
  Michael Kerrisk
    SEE ALSO: add keyrings(7)

add_key.2
request_key.2
  Michael Kerrisk
    SEE ALSO: add keyctl(3)

epoll_ctl.2
  Michael Kerrisk
    After EPOLLHUP, EOF will be seen only after all data has been consumed

epoll_wait.2
  Michael Kerrisk
    Clarify that signal mask treatment in epoll_pwait() is per-thread
      s/sigprocmask()/pthread_sigmask()/

fcntl.2

Michael Kerrisk [Vegard Nossum]
Note an F_SETSIG corner case

get_mempolicy.2, set_mempolicy
Brice Goglin
Policy is per thread, not
per process

getxattr.2
listxattr.2
removexattr.2
setxattr.2
capabilities.7
Michael Kerrisk
Adjust "attr(5)" references to "xattr(7)"

ioctl.2
Michael Kerrisk
SEE ALSO: add console_ioctl(2) and tty_ioctl(2)

listxattr.2
xattr.7
Michael Kerrisk
Describe listxattr(2) E2BIG error and document it as a BUG

mkdir.2
Michael Kerrisk
Wording fixes + point reader at stat(2) for explanation of file mode
Michael Kerrisk [Andreas Grünbacher]
Further tweaks to text on S_ISVTX and 'mode' argument

mknod.2
Michael Kerrisk
Rewordings + point reader at stat(2) for details of mode bits

mmap.2
Michael Kerrisk
Remove text that implies that munmap() syncs MAP_SHARED mapping to file
The existing text in this page:

MAP_SHARED Share this mapping. Updates to the mapping
are visible to other processes that map this
file, and are
carried through to the underly
ing file. The file may not actually be
updated until msync(2) or munmap() is called.

implies that munmap() will sync the mapping to the underlying

file. POSIX doesn't require this, and some light reading of the
code and some light testing (fsync() after munmap() of a large
file) also indicates that Linux doesn't do this.

msync.2
Michael Kerrisk
Rework text of DESCRIPTION
Rewrite the text somewhat, for easier comprehension.
No (intentional) changes to factual content

nfsservctl.2
Michael Kerrisk [J. Bruce Fields]
Note that nfsservctl() was replaced by files in nfsd filesystem

open.2
Michael Kerrisk [Andreas Gruenbacher]
open() honors the S_ISVTX, S_ISUID, and S_ISGID bits in 'mode'
Michael Kerrisk
Tighten wording: use 'mode bit' rather than 'permission bit'
Michael
Kerrisk [NeilBrown]
BUGS: O_CREAT | O_DIRECTORY succeeds if pathname does not exist

poll.2
Michael Kerrisk [Ian Pilcher]
Clarify that signal mask treatment in ppoll() is per-thread
s/sigprocmask()/pthread_sigmask()/
Michael Kerrisk [Sam Varshavchik]
After POLLHUP, EOF will be seen only after all data has been consumed
Michael Kerrisk
Make it clearer which bits are ignored in 'events'

prctl.2
Michael Kerrisk [David Wilcox, Filipe Brandenburger]
Note that "parent" for purposes of PR_SET_DEATHSIG is a *thread*
See https://bugzilla.kernel.org/show_bug.cgi?id=43300

sendfile.2
Michael Kerrisk [Jason Newton]
Note that sendfile does not support O_APPEND for 'out_fd'
See https://bugzilla.kernel.org/show_bug.cgi?id=82841
Michael Kerrisk [Gregor Jasny]
RETURN VALUE: note the possibility of "short sends"
See https://bugzilla.kernel.org/show_bug.cgi?id=97491
Michael Kerrisk [Askar Safin]
Clarify text on 'out_fd' and regular files in Linux 2.4
See https://bugzilla.kernel.org/show_bug.cgi?id=86001

shutdown.2
  Michael Kerrisk [Stéphane Aulery]
    BUGS: UNIX domain sockets now detect invalid 'how' values
      Bug fixed in Linux 3.7.
      See https://bugzilla.kernel.org/show_bug.cgi?id=47111

sigaction.2
  Michael Kerrisk
    Refer the reader to fcntl(2) F_SETSIG for further details on si_fd

stat.2
  Jann Horn
    Add note about stat() being racy
  Andreas Gruenbacher
    Improve description of some mode constants
  Michael Kerrisk [Andreas Grünbacher]
    Remove excessive leading zeros on some constants
  Michael Kerrisk
    Add text on POSIX terms "file mode bits" and "file permission bits"
      Recent changes to various pages employ this distinction.
  Michael Kerrisk
    Tighten wording: use 'mode bit' rather than 'permission bit'
      According
 to POSIX, the 9 UGO*RWX bits are permissions, and
      'mode' is used to refer to collectively to those bits plus sticky,
      set-UID, and set_GID bits.

syslog.2
  Michael Kerrisk
    SEE ALSO: add dmesg(1)

umask.2
open.2
mknod.2
mkdir.2
  Andreas Gruenbacher
    Explain what default ACLs do
      Explain the effect that default ACLs have (instead of the umask)
      in umask.2. Mention that default ACLs can have an affect in
      open.2, mknod.2, and mkdir.2.

unshare.2
  Michael Kerrisk [Florian Weimer]
    Give the reader a hint that unshare() works on processes or threads
      See https://bugzilla.kernel.org/show_bug.cgi?id=59281

atexit.3
  Zeng Linggang

ATTRIBUTES: Note function that is thread-safe

bsearch.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

cmsg.3
Michael Kerrisk [Christopher Head]
Fix error in SCM_RIGHTS code sample
Remove erroneous second
initialization of msg.msg_controllen
in the example code for SCM_RIGHTS.
See https://bugzilla.kernel.org/show_bug.cgi?id=15952

CPU_SET.3
Chris Metcalf
Clarify language about "available" cpus
The CPU_SET.3 man page uses the adjective "available" when
explaining what the argument to CPU_SET() means. This is
confusing, since "available" isn't well-defined. The kernel
has a set of adjectives (possible, present, online, and active)
that qualify cpus, but normally none of these are what the
cpu_set_t bit index means: it's just "which cpu", using the
kernel's internal numbering system, even if that cpu isn't
possible or present.

This change removes the word "available" and adds a sentence
warning that cpu sets may not be contiguous due to dynamic
cpu hotplug, etc.

err.3

on_exit.3
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

printf.3
  Michael Kerrisk [Egmont Koblinger]
    Merge dprintf() and vdprintf() discussion into this page
  Michael Kerrisk
    SEE ALSO: add puts(3)
  Michael Kerrisk
    Move return value discussion to proper RETURN VALUE section

putpwent.3

Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

qsort.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

regex.3
Michael Kerrisk [Laurence Gonsalves]
Fix error in description of 'cflags'
'cflags' is a bit mask of *zero* (not one) or more flags.

resolver.3
Stéphane Aulery
Add info about RES_INSECURE1 and RES_INSECURE2 option in debug mode

scanf.3
Joern Heissler
Improve description of %n specifier

setjmp.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

setlocale.3
Zeng Linggang
ATTRIBUTES: Note function that isn't thread-safe

sysconf.3
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

undocumented.3
William Woodruff
Remove documented functions

tty_ioctl.4
  Michael Kerrisk [Denis Du]
    Fix error in code example

proc.5
  Michael Kerrisk [Cameron Norman, Vasiliy Kulikov]
    Document /proc mount options
      Document the 'hidepid' and 'gid' mount options that were added in
      Linux 3.3. See https://bugzilla.kernel.org/show_bug.cgi?id=90641
      Based on text by Vasiliy Kulikov in
      Documentation/filesystems/proc.txt.
  Michael Kerrisk [Kirill A. Shutemov]
    Improve
 description of /proc/PID/status
  Guillem Jover
    Document /proc/PID/exe behaviour on unlinked pathnames
  Michael Kerrisk [Weijie Yang]
    Document /proc/PID/status VmPMD

resolv.conf.5
  Stéphane Aulery [Thomas Hood]
    Document use-vc option added to glibc 2.14
      Fix Ubuntu bug #1110781:
      https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/1110781
  Stéphane Aulery [Thomas Hood]
    Document RES_SNGLKUPREOP
      Fix Ubuntu bug #1110781:
      https://bugs.launchpad.net/ubuntu/+source/manpages/+bug/1110781

tzfile.5
  Sam Varshavchik
    Add various details on version 2 format

aio.7
  Michael Kerrisk
    Add details and update URL for OLS 2003 paper on AIO

bootparam.7
  Michael Kerrisk [Alain Kalker]
    Update discussion of 'debug' option
      See https://bugzilla.kernel.org/show_bug.cgi?id=97161
  Michael Kerrisk
    Summary of multiple changes: remove cruft from this page.

      Much of the detail on hardware specifics in this page dates
      from the 20th century. (The last major update to this page was in
      man-pages-1.14!) It's hugely out of date now (many of these
      devices disappeared from the kernel years ago.) So, I've taken

a large scythe to the page to remove anything that looks
seriously dated. In the process, the page has shrunk to less
than 50% of its previous size.
Michael Kerrisk
Remove "buff=" details
This seems to have gone away in Linux 2.2.
Michael Kerrisk
Remove crufty "Mouse drivers" options
Michael Kerrisk
Remove crufty "General non-device-specific boot arguments" options
Michael Kerrisk
Remove crufty "Hard disks" options
Michael Kerrisk
Remove crufty "mem=" details
Michael Kerrisk
Remove crufty details on IBM MCA bus devices
Michael Kerrisk
Remove 'swap=" details

This seems to have gone away in Linux 2.2,
Michael Kerrisk
Remove crufty floppy disk driver options
In the specific case of floppy drives: the drivers still
exist, but it's been a while since most of saw these devices
in the wild. So, just refer the reader to the kernel source
file for details. (The detail in this man page was after all
originally drawn from that file.)
Remove crufty "ISDN drivers" options
Michael Kerrisk
Remove crufty "line printer driver" options
Michael Kerrisk
Remove crufty "Serial port drivers" options
Michael Kerrisk
Remove crufty reference to CONFIG_BUGi386
That option disappeared in Linux 2.4.
Michael Kerrisk
Remove crufty text
"bootsetups array" dates from Linux 2.0.
Michael Kerrisk
Remove crufty "Video hardware" options
Michael Kerrisk
Remove crufty SCSI device driver options

fanotify.7
Michael Kerrisk [Heinrich Schuchardt]
Since Linux 3.19, fallocate(2) generates FAN_MODIFY events

inotify.7

Michael Kerrisk [Heinrich Schuchardt]
Since Linux 3.19, fallocate(2) generates IN_MODIFY events

ip.7
Michael Kerrisk
Explain how IP_ADD_MEMBERSHIP determines its argument type
Michael Kerrisk [Jiri Pirko, Magnus REFTEL]
Clarify details of the IP_MULTICAST_IF socket option
Michael Kerrisk [Advait Dixi]
Remove dubious text that says that SO_PRIORITY sets IP TOS
See https://bugzilla.kernel.org/show_bug.cgi?id=35852
Michael Kerrisk
Relocate misplaced text describing ENOPROTOOPT error

packet.7
Graham Shaw
Add sll_protocol to list of required fields for outbound packets

pthreads.7
Michael Kerrisk [KOSAKI Motohiro]
Using thread IDs whose lifetime has expired gives undefined behavior
See https://bugzilla.kernel.org/show_bug.cgi?id=53061

raw.7
Michael Kerrisk
[Tetsuo Handa]
For incoming datagrams, sin_port is set to zero
Michael Kerrisk
Mention sendto(), recvfrom(), and so on when discussing address format
This gives the reader a little context for the following
discussion of 'sin_port'.
Michael Kerrisk
Remove crufty reference to <netinet/in.h>
Michael Kerrisk
Replace reference to RFC 1700 with pointer to IANA protocol number list

signal.7
Michael Kerrisk [Steinar H. Gunderson]
Clarify that I/O operations on disks are not interrupted by signals
See https://bugzilla.kernel.org/show_bug.cgi?id=97721

unix.7
Michael Kerrisk [Christophe Lohr]
Remove mention of UNIX_PATH_MAX
This kernel constant is not exposed to user space.
Michael Kerrisk
Note the 108 bytes for sun_path is how things are done on Linux
And refer the reader to NOTES for discussion of portability.

xattr.7
  Michael Kerrisk

 Document EA limits for Btrfs
  Michael Kerrisk
    Document VFS-imposed limits on EAs
      VFS imposes a 255-byte limit on EA names, and a 64kB limit on
      EA values.
  Michael Kerrisk
    The ext[234] block limitation applies to sum of all EAs
      It is not a per-EA limit.
  Michael Kerrisk
    Clarify permissions required to work with 'user' EAs
  Michael Kerrisk
    ext2 and ext3 no longer need mounting with 'user_xattr' for user EAs
  Michael Kerrisk
    Add various relevant pages to SEE ALSO
  Michael Kerrisk
    Add CONFORMING TO section
  Michael Kerrisk
    Modify headings to man-pages norms
  Michael Kerrisk
    Btrfs also supports extended attributes
  Michael Kerrisk
    File capabilities are implemented using *security* attributes
      Not *system* attributes
  Michael Kerrisk
    Describe limit on EA values for JFS, XFS, and Reiserfs
  Michael Kerrisk
    Explicitly mention some
 of the xattr system calls in DESCRIPTION
      Naming the system calls helps to orient the reader

nscd.8
  Michael Kerrisk
    Add mention of 'services' and 'netgroup' databases
      This makes the page consistent with nscd.conf(5).

========== Changes in man-pages-4.01 ==========

Released: 2015-07-23, Munich

Apologies if I missed anyone!

New and rewritten pages
---

bpf.2
  Alexei Starovoitov, Michael Kerrisk [Daniel Borkmann]
    New page documenting bpf(2)

__ppc_get_timebase.3
  Tulio Magno Quites Machado Filho
    New page documenting __ppc_get_timebase() and __ppc_get_timebase_freq()
      Glibc 2.16 was released with a new function for the Power
      architecture that can read its Time Base Register.
      Glibc 2.17 adds a function to read the frequency at which the Time
      Base Register of Power processors is updated.

queue.3
  Michael Kerrisk [David Leppik, Doug Klima]
    Reimport from latest FreeBSD page
      Long ago,
 Doug Klima noted that many macros were not
      documented in the queue(3) page. Fix by reimporting from
      latest [1] FreeBSD man page.

      [1] Revision 263142, Modified Fri Mar 14 03:07:51 2014 UTC

      This also fixes https://sourceware.org/bugzilla/show_bug.cgi?id=1506

      This time, I'll learn from past mistakes and not convert
      from 'mdoc' to 'man' macros.
  Michael Kerrisk
    Use subsections in DESCRIPTION
  Michael Kerrisk
    Remove SEE ALSO reference to nonexistent tree(3)
  Michael Kerrisk
    Use real hyphens in code samples
  Michael Kerrisk
    Comment out text for functions not in glibc
  Michael Kerrisk
    Replace HISTORY with CONFORMING TO

Newly documented interfaces in existing pages
---

rename.2
  Michael Kerrisk [Miklos Szeredi]
    Document RENAME_WHITEOUT
      Heavily based on text by Miklos Szeredi.

Global changes

Various pages
  Michael Kerrisk [Andries E. Brouwer]
    Remove "ABI" from "C library/kernel ABI differences" subheadings
      The "ABI" doesn't really convey anything significant in
      the title. These subsections are about describing differences
      between the kernel and (g)libc interfaces.

Changes to individual pages
---

intro.1
  Michael Kerrisk [Andries E. Brouwer]
    Drop intro paragraph on '$?' shell variable
      As Andries notes, this piece of text is rather out of place in
      a page that was intended to provide a tutorial introduction for
      beginners logging in on a Linux system.

locale.1
  Marko Myllynen
    A minor output format clarification
      A minor clarification for the locale output format which was
      brought up at
      https://sourceware.org/bugzilla/show_bug.cgi?id=18516.

      For reference, see
      https://sourceware.org/bugzilla/show_bug.cgi?id=18516
      http://pubs.opengroup.org/onlinepubs/9699919799/utilities/locale.html

Add CONFORMING TO section

capget.2
  Julian Orth
    Clarify that hdrp->pid==0 is equivalent gettid() not getpid()

chroot.2
  Jann Horn
    chroot() is not intended for security; document attack
      It is unfortunate that this discourages this use of chroot(2)
      without pointing out alternative solutions - for example,
      OpenSSH and vsftpd both still rely on chroot(2) for security.

      Bind mounts should theoretically be usable as a replacement, but
      currently, they have a similar problem (CVE-2015-2925) that hasn't
      been fixed in ~6 months, so I'd rather not add it to the manpage
      as a solution before a fix lands.

clock_getres.2
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

eventfd.2
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

execve.2
  Michael Kerrisk
    Elaborate on envp/argv
 as NULL behavior

_exit.2
  Michael Kerrisk
    Open stdio frames are not flushed, temporary files are deleted
      Many years ago, text was added to the page saying that it is
      implementation-dependent whether stdio streams are flushed and
      whether temporary are removed. In part, this change appears to
      be because POSIX.1-2001 added text related to this point.
      However, that seems to have been an error in POSIX, and the
      text was subsequently removed for POSIX.1-2008. See
      https://collaboration.opengroup.org/austin/interps/documents/9984/AI-085.txt
      Austin Group Interpretation reference 1003.1-2001 #085

fallocate.2
  Namjae Jeon [Michael Kerrisk]
    Document FALLOC_FL_INSERT_RANGE
  Michael Kerrisk

Since Linux 4.2, ext4 supports FALLOC_FL_INSERT_RANGE

fcntl.2
Michael Kerrisk
OFD locks are proposed for inclusion in the next POSIX revision

getrlimit.2
Zeng
Linggang
ATTRIBUTES: Note functions that are thread-safe

getrusage.2
Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

gettid.2
Michael Kerrisk
Note that for a thread group leader, gettid() == getpid()

iopl.2
Michael Kerrisk
Remove some historical libc5 and glibc 1 details
These details are ancient, and long ago ceased to be relevant.

ioprio_set.2
Michael Kerrisk [Jens Axboe]
Document meaning of ioprio==0

mlock.2
Michael Kerrisk [Mehdi Aqadjani Memar]
Document another ENOMEM error case
ENOMEM can occur if locking/unlocking in the middle of a region
would increase the number of VMAs beyond the system limit (64k).

mmap.2
Michal Hocko [Eric B Munson]
Clarify MAP_POPULATE
David Rientjes has noticed that MAP_POPULATE wording might promise
much more than the kernel actually provides and intends to provide.
The primary usage
of the flag is to pre-fault the range. There is
no guarantee that no major faults will happen later on. The pages
might have been reclaimed by the time the process tries to access
them.
Michal Hocko [Eric B Munson]
Clarify MAP_LOCKED semantics
MAP_LOCKED had a subtly different semantic from mmap(2)+mlock(2)
since it has been introduced.

mlock(2) fails if the memory range cannot get populated to
guarantee that no future major faults will happen on the range.
mmap(MAP_LOCKED) on the other hand silently succeeds even if
the range was populated only partially.

Fixing this subtle difference in the kernel is rather awkward
because the memory population happens after mm locks have been
dropped and so the cleanup before returning failure (munlock)
could operate on something else than the originally mapped area.

E.g. speculative userspace page fault handler catching SEGV and
doing mmap(fault_addr, MAP_FIXED|MAP_LOCKED) might discard portion
of a racing mmap and lead to lost data. Although it is not clear
whether such a usage would be valid, mmap page doesn't explicitly
describe requirements for threaded applications so we cannot
exclude this possibility.

This patch makes the semantic of MAP_LOCKED explicit and suggests
using mmap + mlock as the only way to guarantee no later major
page faults.
Michael Kerrisk
ERRORS: point out that ENOMEM can occur even for munmap()

mprotect.2
Michael Kerrisk
Note ENOMEM error that can occur when we reach limit on maximum VMAs

open.2
read.2
write.2
Michael Kerrisk [Mike Hayward]
Clarify that O_NONBLOCK is a no-op for regular files and block devices

perf_event_open.2
Vince Weaver [Joerg Roedel]
Exclude_host/exclude_guest
clarification
This patch relates to the exclude_host and exclude_guest bits added
by the following commit:

exclude_host, exclude_guest; Linux 3.2
commit a240f76165e6255384d4bdb8139895fac7988799
Author: Joerg Roedel <joerg.roedel@amd.com>
Date: Wed Oct 5 14:01:16 2011 +0200

perf, core: Introduce attrs to count in either host or guest mode

The updated manpage text clarifies that the "exclude_host" and
"exclude_guest" perf_event_open() attr bits only apply in the
context of a KVM environment and are currently x86 only.
Vince Weaver
Document PERF_SAMPLE_REGS_INTR
This patch relates to the addition of PERF_SAMPLE_REGS_INTR
support added in the following commit:

perf_sample_regs_intr; Linux 3.19
commit 60e2364e60e86e81bc6377f49779779e6120977f

Author: Stephane Eranian <eranian@google.com>

perf: Add ability to sample machine state on interrupt

The primary difference between PERF_SAMPLE_REGS_INTR and the
existing PERF_SAMPLE_REGS_USER is that the new support will
return kernel register values. Also if precise_ip is
set higher than 0 then the PEBS register state will be returned
rather than the saved interrupt state.

This patch incorporates feedback from Stephane Eranian and
Andi Kleen.

prctl.2
seccomp.2
Michael Kerrisk
Clarify that SECCOMP_SET_MODE_STRICT disallows exit_group(2)
These days, glibc implements _exit() as a wrapper around
exit_group(2). (When seccomp was originally introduced, this was
not the case.) Give the reader a clue that, despite what glibc is
doing, what SECCOMP_SET_MODE_STRICT permits is the true _exit(2)
system call,
and not exit_group(2).

pread.2
read.2
readv.2
sendfile.2
write.2
Michael Kerrisk
Clarify that Linux limits transfers to a maximum of 0x7ffff000 bytes
See https://bugs.debian.org/629994 and
https://bugs.debian.org/630029.

pread.2
Michael Kerrisk
Rewrite RETURN VALUE section

(Also drop the text on pwrite() returning zero; that seems bogus.)

ptrace.2
  Michael Kerrisk [Vegard Nossum]
    PTRACE_O_TRACEEXIT clarification

readv.2
  Michael Kerrisk
    Remove BUGS heading
      The text on mixing I/O syscalls and stdio is a general point
      of behavior. It's not a bug as such.

recv.2
send.2
  Michael Kerrisk
    Explain some subtleties of MSG_DONTWAIT versus O_NONBLOCK

rename.2
  Michael Kerrisk
  Michael Kerrisk
    Note that RENAME_NOREPLACE can't be employed with RENAME_EXCHANGE

sched_setaffinity.2
  Michael Kerrisk
    Add an example program
  Michael Kerrisk [Florian Weimer]
     Explain how to deal with 1024-CPU limitation of glibc's cpu_set_t type
  Michael Kerrisk
    Mention the use of the 'isolcpus' kernel boot option

sched_setattr.2
  Julian Orth
    Remove a const attribute
      The attr argument of sched_setattr was documented as const but the
      kernel will modify the size field of this struct if it contains an
      invalid value. See the documentation of the size field for details.

seccomp.2
  Michael Kerrisk
    SEE ALSO: add bpf(2)

send.2
  Michael Kerrisk
    Expand on subtleties of MSG_NOSIGNAL versus ignoring SIGPIPE

sigaltstack.2
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

socket.2
  Stephan Mueller
    Update documentation reference for AF_ALG

truncate.2
  Michael Kerrisk
    ERRORS: ftruncate() can fail if the file descriptor is not writable

utimensat.2
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

  After research, We think utimensat() and futimens() are thread-safe.
      But, there are not markings of utimensat() and futimens() in glibc
      document.

clearenv.3
  Zeng Linggang
    ATTRIBUTES: Note function that is not thread-safe

  Michael Kerrisk
    (Briefly) document AT_HWCAP2

getgrent_r.3
  Zeng Linggang
    ATTRIBUTES: Note functions that are/aren't thread-safe

gethostbyname.3
  Michael Kerrisk [Laszlo Ersek]
    Remove mention of IPv6 addresses, which are not supported
      As reported by Laszlo Ersek:

        gethostbyname(3) fails to resolve the IPv6 address "::1",
        but the manual page says: "If name is an IPv4 or IPv6 address,
        no lookup is performed and gethostbyname() simply copies name
        into the h_name field [...]".

        Debian bug report:
        http://bugs.debian.org/cgi-bin/bugreport.cgi?bug=455762

        glibc bug
report:
        http://sourceware.org/bugzilla/show_bug.cgi?id=5479

        SUSv3 link for gethostbyname(3):
        http://www.opengroup.org/onlinepubs/000095399/functions/gethostbyname.html

        It seems that the glibc behavior is conformant, and the manual
        page is in error.

setlocale.3
Marko Myllynen
Update CONFORMING TO
http://pubs.opengroup.org/onlinepubs/9699919799/functions/setlocale.html

setlocale.3
Marko Myllynen
Tweak C/POSIX locale portability description
As discussed earlier, the current description might be a little
bit too stringent, let's avoid the issue by describing the
portability aspect on a slightly higher level.

References:

http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap06.html
http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap07.html

shm_open.3
Zeng Linggang

ATTRIBUTES: Note functions that are thread-safe

strfmon.3
Marko Myllynen
Document strfmon_l(3)
Describe strfmon_l(3).

http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html
Marko Myllynen
Fix CONFORMING TO
AFAICS strfmon(3) is now defined in POSIX and the glibc
implementation is as specified there.

http://pubs.opengroup.org/onlinepubs/9699919799/functions/strfmon.html
Marko Myllynen
Rewrite the example
I think the example is more accurate when we use the exact
locale names and also the Euro sign where appropriate.

xcrypt.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

xdr.3
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

console_codes.4
Scot Doyle [Pavel
Machek, Michael Kerrisk]
Add CSI sequence for cursor blink interval
Add a Console Private CSI sequence to specify the current
console's cursor blink interval. The interval is specified
as a number of milliseconds until the next cursor display
state toggle, from 50 to 65535.

null.4
Michael Kerrisk
Note that reads from /dev/zero are interruptible since Linux 2.6.31

core.5
Michael Kerrisk
Mention 'coredump_filter' boot option

host.conf.5
Michael Kerrisk
Wording fix: s/resolv+/the resolver library/
The term "resolv+" seems to be historical cruft.

hosts.equiv.5
  Carlos O'Donell
    Fix format, clarify IdM needs, and provide examples.
      In some recent work with a Red Hat customer I had the opportunity
      to discuss the fine nuances of the ruserok() function and related
      API which are used to implement rlogin and rsh.

      It came to my
 attention after working with QE on some automated
      internal testing that there were no good examples in the hosts.equiv
      manual page showing how the format was supposed to work for this
      file and for ~/.rhosts, worse the "format" line showed that there
      should be spaces between arguments when that would clearly lead
      to incorrect behaviour. In addition some things that the format
      allows you to write are just wrong like "-host -user" which makes
      no sense since the host is already rejected, and should be written
      as "host -user" instead. I added notes in the example to make it
      clear that "-host -user" is invalid.

      I fixed three things:

      (a) The format line.
      - Either +, or [-]hostname, or +@netgrp or -@netgrp.
      - Either +, or [-]username, or +@netgrp or -@netgrp.
      - You must specify something in the hostname portion so remove

      optional brackets.

      (b) Clarify language around credentials
      - If the host is not trusted you must provide credentials to
        the login system and that could be anything really and it
        depends on your configuration e.g. PAM or whatever IdM you have.

      (c) Provide real-world examples
      - Provide several real world examples and some corner case
        examples for how you would write something. Hopefully others
        can add examples as they see fit.
  Michael Kerrisk [Carlos O'Donell, Arjun Shankar]
    Improve explanation in EXAMPLE

locale.5
  Marko Myllynen
    Document map to_inpunct, map to_outpunct
      See e.g. fa_IR for reference.
  Marko Myllynen
    Document class in LC_CTYPE
      See e.g. the locale zh_CN and

http://en.cppreference.com/w/cpp/string/wide/towctrans
http://en.cppreference.com/w/cpp/string/wide/wctrans
Marko Myllynen
Add iconv(1) reference
Marko Myllynen
Document character transliteration
See e.g. da_DK for reference.

(Not sure should we actually provide an example here?)
Marko Myllynen
Document era keywords
This patch completes the LC_TIME section - since these era
keywords are so tightly coupled, I'm providing them as a
single patch.

Based on
http://pubs.opengroup.org/onlinepubs/009695399/basedefs/xbd_chap07.html
http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf
Marko Myllynen
Document default_missing
Marko Myllynen
Document outdigit and alt_digits
See e.g. fa_IR for reference.
Marko Myllynen
Refer to locale(7) more prominently
It's probably a good idea to refer to locale(7) so that a reader
can check what a category is about before describing them in
detail.
Marko Myllynen
Document charclass and charconv
See e.g. the locales ja_JP and ko_KR and

http://en.cppreference.com/w/cpp/string/wide/towctrans
http://en.cppreference.com/w/cpp/string/wide/wctrans
Marko Myllynen
Copy is not exclusive in LC_CTYPE and LC_COLLATE
See e.g. da_DK for reference.
Marko Myllynen
Remove the FIXME for timezone
The timezone of LC_TIME is not in POSIX, only 6 (out of ~300)
glibc locales define it, the glibc code comment below from
glibc.git/programs/ld-time.c seems to suggest it's not a good
idea, and there's been a proposal in upstream [1] to remove the
existing timezone definitions from glibc locales so I think
it's actually better to leave this one undocumented:

/* XXX We don't perform any tests on the timezone value since this is

simply useless, stupid $&$!@... */

1) https://sourceware.org/ml/libc-alpha/2015-06/msg00098.html

Move the remaining LC_COLLATE FIXMEs together while at it.

Marko Myllynen

Fix country_isbn format

Both plain numbers and Unicode code points are used in glibc locales but checking the code reveals that country_isbn is handled like the rest of its category expect for country_num which was clarified earlier.

Marko Myllynen

Sort according to the standard

Sort the options so that those defined in POSIX are listed first, then followed by those defined in ISO/IEC TR 14652 in the order of common convention in many widely used glibc locales.

Actual descriptions are unchanged.

http://pubs.opengroup.org/onlinepubs/9699919799/basedefs/V1_chap07.html

Marko Myllynen

Refer to strftime(3) where appropriate

The relationship between the locale time format syntax and strftime()
cannot be considered as obvious.

Marko Myllynen

Document map "totitle"

See e.g. locales/i18n for reference.

Michael Kerrisk [Marko Myllynen]

Remove BUGS section saying man page is not complete

To some degree, this is true of many pages. And anyway, this page is much better after recent work by Marko.

proc.5

Michael Kerrisk

List /proc/vmstat fields

Michael Kerrisk

Tweak /proc/vmstat text

Michael Kerrisk

Add /proc/crypto entry with a pointer to further information

Michael Kerrisk [Kees Cook]

Document /proc/sys/kernel/sysctl_writes_strict

Based on text in Documentation/sysctl/kernel.txt.

Michael Kerrisk

Move misordered /proc/[pid]/timers entry

Michael Kerrisk

Refer to bpf(2) for explanation of /proc/sys/net/core/bpf_jit_enable

repertoiremap.5
  Marko Myllynen
    Symbolic names AKA mnemonics
      A long time ago in glibc, repertoire
 maps were used (but they
      were removed already in 2000), those mapping files were named
      as mnemonics, so "mnemonic" is a term that would almost
      certainly come up if somebody studies glibc side (perhaps even
      the related standards like ISO 9945 [which I don't have access
      to]) so I thought it's worth to mention to term in the man page
      to make sure we're talking about the same thing, otherwise
      someone might wonder is that something different or not.

      IOW, symbolic names and mnemonics are often used interchangeably,
      let's mention the other often used term in the page, too.

capabilities.7
  Michael Kerrisk
    CAP_SYS_ADMIN allows calling bpf(2)

locale.7
  Marko Myllynen
    LC_CTYPE determines transliteration rules on glibc systems

packet.7
   [Cortland Setlow]
    Fix description of binding a packet socket to an interface

pty.7
  NeilBrown [Peter Hurley]
     Clarify asynchronous nature of PTY I/O
      A PTY is not like a pipe - there may be delayed between data
      being written at one end and it being available at the other.

      This became particularly apparent after
          commit f95499c3030f
        ("n_tty: Don't wait for buffer work in read() loop")
      in Linux 3.12

      See also the mail thread at https://lkml.org/lkml/2015/5/1/35
        Date   Mon, 04 May 2015 12:32:04 -0400
        From   Peter Hurley <>
        Subject Re: [PATCH bisected regression] input_available_p()
                sometimes says 'no' when it should say 'yes'

rtld-audit.7
  Ben Woodard
    Use correct printf() specifier for pointer types

In the example code you used %x rather than %p in the example
code for an audit library. The problem is that it truncates the
pointers on 64b platforms. So you get something
like:

la_symbind64(): symname = strrchr sym->st_value = 0x7f4b8a3f8960
ndx = 222 flags = 0x0 refcook = 8b53e5c8 defcook = 8b537e30

rather than:

la_symbind64(): symname = fclose sym->st_value = 0x7fa452dd49b0
ndx = 1135 flags = 0x0 refcook = 0x7fa453f395c8 defcook = 0x7fa453f32e30

This has bitten me a handful of times when playing around with
audit test libraries to investigate its behavior.

sched.7
Michael Kerrisk
Remove ancient, wildly optimistic prediction about future of RT patches
It seems the patches were not merged by 2.6.30...

socket.7
Michael Kerrisk
SEE ALSO: add bpf(2)

vdso.7
Nathan Lynch [Mike Frysinger]
Update for ARM
The 32-bit ARM architecture in Linux has gained a vDSO as of the
4.1 release. (I was the primary author.)

Document the symbols exported by the ARM VDSO.

Accepted kernel submission:
http://lists.infradead.org/pipermail/linux-arm-kernel/2015-March/332573.html

========== Changes in man-pages-4.02 ==========

Released: 2015-08-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Carlos O'Donell <carlos@redhat.com>
Daniel Borkmann <daniel@iogearbox.net>
David Rientjes <rientjes@google.com>
Dilyan Palauzov <dilyan.palauzov@aegee.org>
Gabriel F. T. Gomes <gftg@linux.vnet.ibm.com>
Gleb Fotengauer-Malinovskiy <glebfm@altlinux.org>
Goswin von Brederlow <goswin-v-b@web.de>
Heinrich Schuchardt <xypron.glpk@gmx.de>
Jonathan David Amery <jdamery@ysolde.ucam.org>
Michael Kerrisk <mtk.manpages@gmail.com>
Mike Frysinger <vapier@gentoo.org>
Mike Kravetz <mike.kravetz@oracle.com>
Nicholas Miell <nmiell@gmail.com>
Nikola Forró <nforro@redhat.com>
Sam Varshavchik <mrsam@courier-mta.com>
Yaarit
 <yaarit@gmail.com>
Zeng Linggang <zenglg.jy@cn.fujitsu.com>

Apologies if I missed anyone!

New and rewritten pages
---

dladdr.3
  Michael Kerrisk
    New page documenting dladdr() and dladdr1()
      Relocate/rewrite dladdr() text formerly contained in dlopen(3).

      Add documentation of dladdr1().
  Zeng Linggang
    ATTRIBUTES: Note functions that are thread-safe

dlerror.3
  Michael Kerrisk
    Migrate dlerror(3) to new separate man page
  Michael Kerrisk
    Note that the returned message may be in a statically allocated buffer
  Michael Kerrisk
    Note that the returned string does not include a trailing newline
  Zeng Linggang
    ATTRIBUTES: Note function that is thread-safe

dlinfo.3
  Michael Kerrisk
    New page describing dlinfo(3)

Zeng Linggang
ATTRIBUTES: Note function that is thread-safe

dlopen.3
Michael Kerrisk
This page was substantially rewritten and
enhanced. Notably:
* the dladdr(), dlsym, dlvsym(), and dlerror() content were moved
to separate new pages;
* documentation for dlmopen was added;
* and other changes as noted below.
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe
Michael Kerrisk
Move atexit() discussion under "Initialization and Finalization"
Michael Kerrisk
Move discussion of _init() and _fini() to NOTES
Michael Kerrisk
Rework the discussion of initialization and finalization functions
Deemphasize the obsolete _init/_fini and give more prominence
to gcc constructors/destructors.
Michael Kerrisk
dlclose() will unload the object when all references have been released
Michael Kerrisk
EXAMPLE: Remove mention of "-rdynamic"
That option isn't needed for compiling and running this program.
Michael Kerrisk
Remove reference to ld.so info page
The command
"info ld.so" simply shows the man page...
Michael Kerrisk
Add VERSIONS section
Michael Kerrisk
Reorganize conformance information for 'flags'

dlsysm.3
Michael Kerrisk
Move dlsym() and dlvsym() content to new separate page
Zeng Linggang
ATTRIBUTES: Note functions that are thread-safe

Newly documented interfaces in existing pages
---

dlopen.3
Michael Kerrisk, Carlos O'Donell
Document dlmopen(3)

nl_langinfo.3
  Sam Varshavchik, Michael Kerrisk
    Add documentation for nl_langinfo_l(3)

__ppc_set_ppr_med.3
  Gabriel F. T. Gomes
    Document PPC functions providing access to PPR
      GNU C Library 2.18 adds functions (__ppc_set_ppr_low(3),
      __ppc_set_ppr_med(3), __ppc_set_ppr_med_low(3)) that provide
      access to the Program Priority Register (PPR).

__ppc_yield.3
  Gabriel F. T. Gomes
    Document PPC performance-hint functions

      GNU C Library 2.18 adds functions __ppc_yield(3), __ppc_mdoio(3),
      and __ppc_mdoom(3) that can be used provide a hint that
      performance could be improved if shared resources are released
      for use by other processors.

New and changed links
---

dladdr1.3
  Michael Kerrisk
    New link to (new) dladdr(3) page

dlmopen.3
  Michael Kerrisk
    New link to dlopen.3

dlvsym.3
  Michael Kerrisk
    Adjust link to point to new self-contained dlsym(3) page

nl_langinfo_l.3
  Michael Kerrisk
    New link to nl_langinfo.3

__ppc_mdoio.3
  Gabriel F. T. Gomes
    New link to __ppc_yield.3

__ppc_mdoom.3
  Gabriel F. T. Gomes
    New link to __ppc_yield.3

__ppc_set_ppr_low.3
  Gabriel F. T. Gomes
    New link to __ppc_set_ppr_med.3

__ppc_set_ppr_med_low.3
  Gabriel F. T. Gomes
    New link to __ppc_set_ppr_med.3

Global changes

Very many pages
  Michael Kerrisk
    Update
 CONFORMING TO section to reflect POSIX.1-2001 and POSIX.1-2008
    details. (By now, I believe all pages should be up to date with
    respect to appropriately mentioning POSIX.1-2001 and POSIX.1-2008.)

ldd.1
sprof.1
execve.2
dlopen.3
ld.so.8
  Michael Kerrisk
    Prefer "shared object" over "shared library"
      The man pages variously use "shared library" or "shared object".
      Try to more consistently use one term ("shared object"), while
      also pointing out on a few pages that the terms are synonymous.

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Add mention of POSIX.1-2008 regarding EAGAIN vs EWOULDBLOCK

bpf.2
  Daniel Borkmann
    Various updates/follow-ups to address some fixmes
      A couple of follow-ups to the bpf(2) man-page, besides others:

       * Description of map data types
       * Explanation on eBPF tail calls and program arrays
       *

Paragraph on tc holding ref of the eBPF program in the kernel
* Updated ASCII image with tc ingress and egress invocations
* __sync_fetch_and_add() and example usage mentioned on arrays
* minor reword on the licensing and other minor fixups

execve.2
Michael Kerrisk
Reword text on POSIX and #!

io_getevents.2
Michael Kerrisk
Note return value on interruption by a signal handler
Michael Kerrisk
Clarify details of return value for timeout-expired case
Michael Kerrisk
Clarify and extend discussion of 'timeout' argument

mmap.2
Michael Kerrisk
Note that 'length' need not be a page-size multiple for munmap()
Michael Kerrisk [David Rientjes, David Rientjes, Mike Kravetz]
Describe mmap()/munmap() argument requirements for huge-page mappings
Michael Kerrisk
Move discussion of timestamps to NOTES
A straight move; no changes to the content.
This content
is better placed in NOTES.

seccomp.2
Michael Kerrisk
SEE ALSO: mention libseccomp pages
SEE ALSO: add scmp_sys_resolver(1)

sigaction.2
Michael Kerrisk
Correct the list of flags that were added in POSIX.1-2001

socketpair.2
Michael Kerrisk [Goswin von Brederlow]
Clarify use of SOCK_* flags in 'type' argument
See http://bugs.debian.org/794217

atexit.3
Michael Kerrisk
SEE ALSO: add dlopen(3)

clock_getcpuclockid.3
Michael Kerrisk

Improve wording of EPERM error
It's imprecise to say that this is an "optional" error
in POSIX.1.

dl_iterate_phdr.3
Michael Kerrisk
Note that 'size' allows callback() to discover structure extensions
Michael Kerrisk
SEE ALSO: add dladdr(3)
Michael Kerrisk
CONFORMING TO: note that this function appears on some other systems

fseeko.3
Michael Kerrisk
Remove crufty NOTES section
This ancient System
V detail is unneeded.

getutent.3
Michael Kerrisk
Mention POSIX.1-2008 for the "utmpx" functions

iconv_close.3
iconv_open.3
Michael Kerrisk
CONFORMING TO: change "UNIX98" to "SUSv2"

malloc.3
Michael Kerrisk
Change "UNIX 98" to "SUSv2"

mktemp.3
Gleb Fotengauer-Malinovskiy
Reference mkdtemp(3) in addition to mkstemp(3)
Mention mkdtemp(3) as another secure alternative to mktemp(3).

See also https://sourceware.org/bugzilla/show_bug.cgi?id=2898.

mq_receive.3
mq_send.3
Michael Kerrisk
Clarify discussion of 'timeout'
In particular, remove the word 'ceiling', which falsely
suggests that the call might return prematurely.

nl_langinfo.3
Michael Kerrisk
Explicitly describe the return value on success

Michael Kerrisk
POSIX specifies that the caller may not modify the returned string
Michael Kerrisk
Enhance RETURN VALUE description
Note
some further cases where returned string may be
invalidated or overwritten.

perror.3
Michael Kerrisk
Reformat CONFORMING to information
Michael Kerrisk
Note that 'sys_errlist' and 'sys_nerr' are not in POSIX.1

posix_openpt.3
Michael Kerrisk
Reword text regarding systems that don't have posix_openpt()

printf.3
Michael Kerrisk
CONFORMING TO: update details for dprintf() and vdprintf()

setlogmask.3
Michael Kerrisk
Remove useless statement in CONFORMING TO
Saying that the description in PSOX.1-2001 is flawed,
without saying what the fla is, is not helpful.
(And no, I don't know what the flaw is.)

shm_open.3
Michael Kerrisk
Add POSIX.1-2008 details regarding group ID of new shared memory object

strfmon.3
Michael Kerrisk
Fix erroneous CONFORMING to
strfmon() is in POSIX.1.

fanotify.7
Heinrich Schuchardt
Clarify effects of file moves
If files or directories are moved to other mounts, the inode is
deleted. Fanotify marks are lost.

mq_overview.7
Michael Kerrisk
Remove unneeded CONFORMING TO section

nptl.7
  Michael Kerrisk [Nicholas Miell]
    Note that i386 and x86-64 binaries can't share mutexes

sched.7
  Nikola Forró
    Fix descriptions of sched_get_priority_max() / sched_get_priority_min()

sem_overview.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

shm_overview.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

sigevent.7
  Michael Kerrisk
    Remove unneeded CONFORMING TO section

symlink.7
  Michael Kerrisk
    Update with POSIX.1-2008 details for link(2)

ld.so.8
  Michael Kerrisk [Jonathan David Amery]
    Items in LD_LIBRARY_PATH can also be delimited by semicolons
      See http://bugs.debian.org/794559.

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

perf_event_open.2
  Vince Weaver
    4.1 adds AUX sample support
  Vince Weaver
    4.1 data_offset and data_size fields
  Vince Weaver

[Alexander Shishkin]
Document aux_{head,tail,offset,size} support
Vince Weaver
4.0 update rdpmc documentation
Vince Weaver
4.1 adds PERF_RECORD_ITRACE_START
Vince Weaver
Document 4.1 clockid support
Vince Weaver [Steven Rostedt, Masami Hiramatsu]
4.1 PERF_EVENT_IOC_SET_BPF support
Vince Weaver
4.1 adds AUX_FLAG_OVERWRITE support
Vince Weaver
4.1 PERF_SAMPLE_BRANCH_CALL_STACK
Vince Weaver
4.1 adds aux_watermark
Vince Weaver
Add possibility of EBUSY error

prctl.2
Andy Lutomirski [Kees Cook, Serge Hallyn]
Document operations for ambient capabilities
Michael Kerrisk
Rework PR_CAP_AMBIENT text
Note that arg4 and arg5 must be zero for CAP_AMBIENT
RETURN VALUE: Add PR_CAP_AMBIENT + PR_CAP_AMBIENT_IS_SET case
ERRORS: document PR_CAP_AMBIENT error cases

__ppc_set_ppr_med.3
Gabriel F. T. Gomes
Document PPC functions providing
access to PPR
GNU C Library commit 1747fcda4902a3b46183d93fb16ed9b436b2608b
extends the priorities that can be set to the Program Priority
Register (PPR), with the functions: __ppc_set_ppr_very_low(3)
and __ppc_set_ppr_med_high(3).

capabilities.7
Andy Lutomirski [Kees Cook, Serge Hallyn]
Document ambient capabilities
Michael Kerrisk
Various additions and reworkings for ambient capability text

New and changed links

__ppc_set_ppr_med_high.3

Gabriel F. T. Gomes
New link to __ppc_set_ppr_med.3

__ppc_set_ppr_very_low.3
Gabriel F. T. Gomes
New link to __ppc_set_ppr_med.3

Changes to individual pages
---

mremap.2
Eric B Munson [Michal Hocko]
Add note about mremap() with locked areas
When mremap() is used to move or expand a mapping that is locked
with mlock() or equivalent it will attempt to populate the new
area. However, like mmap(MAP_LOCKED), mremap() will not fail if
the area cannot be populated. Also like mmap(MAP_LOCKED) this
might come as a surprise to users and should be noted.
open.2
Michael Kerrisk [David Drysdale]
Remove accidental mention of O_TTY_INIT
An earlier edit mentioned O_TTY_INIT as a file creation flag.
That's true, according POSIX, but Linux does not implement
this flag, so remove mention of it.

pipe.2
Michael Kerrisk
SEE ALSO: add splice(2)

prctl.2
Michael Kerrisk
Reorder options alphabetically
Employ a pseudo-alphabetical order, ordering options after removal
of any "PR_", "PR_SET_", or "PR_GET" prefix.
Michael Kerrisk
Fix alphabetical misplacements in ERRORS

ptrace.2
Tycho Andersen
Document PTRACE_O_SUSPEND_SECCOMP flag
Michael Kerrisk
Document /proc/sys/kernel/yama/ptrace_scope
Michael Kerrisk
Note that PTRACE_ATTACH cannot be applied to nondumpable processes
Michael Kerrisk
SEE ALSO: add prctl(2)

reboot.2
  Casper Ti. Vector
    1-argument reboot() is also provided by alternative libc

seccomp.2
  Michael Kerrisk
    Describe use of 'instruction_pointer' data field
  Michael Kerrisk [Kees Cook]
    Note why all filters in a set are executed even after SECCOMP_RET_KILL

signalfd.2
  Michael Kerrisk
    Describe semantics with respect to SCM_RIGHTS

syscalls.2
  Michael Kerrisk
    Add mlock(2)
  Michael Kerrisk
    Add userfaultfd()

daemon.3
  Michael Kerrisk [Johannes Stüttgen]
    Note that daemon() is buggy with respect to controlling tty acquisition

dirfd.3
  Jonathan Wakely
    Remove outdated NOTES
      As stated in the SYNOPSIS, since glibc 2.10 this function is also
      declared by the relevant X/Open and POSIX macros.

dlopen.3
  Michael Kerrisk
    Make it more explicit
 that LD_BIND_NOW overrides RTLD_LAZY
  Michael Kerrisk [Florian Weimer]
    Correct the pathname used in EXAMPLE
      Quoting Florian:

        This does not work because libm.so can be a linker script:

            handle = dlopen("libm.so", RTLD_LAZY);

        The proper way to do this is to include <gnu/lib-names.h>
        and use LIBM_SO.

      See https://bugzilla.kernel.org/show_bug.cgi?id=108821
  Michael Kerrisk
    Include a shell session showing build/run in EXAMPLE

Michael Kerrisk
Change arguments to main() to "void" in EXAMPLE

fgetgrent.3
Zeng Linggang
ATTRIBUTES: Note function that is not thread-safe

fgetpwent.3
Zeng Linggang
ATTRIBUTES: Note function that is not thread-safe

getauxval.3
Michael Kerrisk
Add some details for AT_SECURE

getspnam.3
Zeng Linggang
ATTRIBUTES: Note functions that are/aren't thread-safe

mallinfo.3
Zeng Linggang
ATTRIBUTES: Note function that is not thread-safe

mallopt.3
Carlos O'Donell
Document M_ARENA_TEST and M_ARENA_MAX

posix_fallocate.3
Michael Kerrisk
Clarify text relating to MT-safety
Carlos O'Donell
Mention glibc emulation caveats

termios.3
Olivier TARTROU
Add missing details on behaviour of PARMRK
For a serial terminal, with a specific configuration, input bytes
with value 0377 are passed to the program as two bytes, 0377 0377.

tty_ioctl.4
Michael Kerrisk [Peter Hurley]
Note that TIOCTTYGSTRUCT went away in Linux 2.5.67

core.5
Ross Zwisler
Add info about DAX coredump filtering flags
Kernel 4.4 added two new core dump filtering flags,
MMF_DUMP_DAX_PRIVATE and MMF_DUMP_DAX_SHARED.

These flags allow us to explicitly filter DAX mappings.
This is desirable because DAX mappings, like hugetlb
mappings, have the potential to
be very large.

nsswitch.conf.5
Nikola Forró
Add list of files being read when "files" service is used
This is not mentioned anywhere. Users can assume that the file
being read is something like /etc/$DATABASE, but that's not
always the case. It's better to explicitly specify which
file is read for each respective database. The list of
files was acquired from glibc source code.

proc.5
Heinrich Schuchardt [Michael Kerrisk]
Add details for threads-max
Add detail information for threads-max.
The checks for minimum and maximum values exist since kernel 4.1.
https://lkml.org/lkml/2015/3/15/96
Heinrich Schuchardt
/proc/sys: Describe whitespace characters
Michael Kerrisk
Document 'CapAmb' in /proc/PID/status
Michael Kerrisk
Add reference to ptrace(2) for /proc/sys/kernel/yama/ptrace_scope

aio.7
Michael Kerrisk [Meikun Wang]

Add missing include file, <fcntl.h>, to example program

mq_overview.7
Michael Kerrisk [Arto Bendiken]
Document QSIZE bug that appeared in 3.5 and was fixed in 4.2

path_resolution.7
Michael Kerrisk
Clarify recursive resolution of symlinks and note limits

pipe.7
Michael Kerrisk
SEE ALSO: add splice(2)

rtld-audit.7
Namhyung Kim
Fix (typo) error in la_pltenter() description

s/la_pltenter()/la_pltexit()/

la_pltenter() is called regardless of the value of
framesizep but la_pltexit() is called only if la_pltenter()
returns with non-zero framesizep set. I spent long time to
figure out why la_pltexit() is not called at all.

signal.7
Michael Kerrisk [Michael Hocko]
Note async-signal-safe functions added by POSIX.1-2008 TC1

tcp.7
Daniel Borkmann [Michael Kerrisk]
Improve paragraphs on tcp_ecn and add tcp_ecn_fallback bullet
Improve description
of tcp_ecn, fix the RFC number and it's
not a boolean anymore since long time, and add a description
for tcp_ecn_fallback.

See also kernel doc under Documentation/networking/ip-sysctl.txt
on tcp_ecn and tcp_ecn_fallback.

ld.so.8
Michael Kerrisk
LD_POINTER_GUARD has been removed in glibc 2.23
Michael Kerrisk
Describe secure-execution mode
Michael Kerrisk [Maria Guseva]
Replace mentions of set-UID/set-GID programs with secure-execution mode
Inspired by a patch from Maria Guseva.
Maria Guseva [Silvan Jegen]
LD_DEBUG is effective in secure-execution mode if /etc/suid-debug exists

========== Changes in man-pages-4.04 ==========

Released: 2015-12-29, Munich

inotify_init.2
   Michael Kerrisk
    ERRORS: add an EMFILE error case

personality.2
  Dmitry V. Levin
    Note kernel and glibc versions that introduced this system call

poll.2
  Richard Voigt
    timeout_ts is a pointer, so use -> not . for member access
  Michael Kerrisk
    Shorten name of timeout argument for ppoll()
      The name is overly long, and does not hint at the fact
      that this argument is a pointer. Fix this by renaming:
      s/timeout_ts/tmo_p/

sendfile.2
  Laurent Georget
    Document more ERRORS

sigreturn.2
  Michael Kerrisk
    SEE ALSO: add vdso(7)

socketcall.2
  Michael Kerrisk
    Since Linux 4.3, x86-32 provides direct system calls for the sockets API

time.2
  Zack Weinberg
    Explain why the glibc time() wrapper never sets 'errno'
  Michael Kerrisk [H.J. Lu]
    Where time() is provided by vDSO, an invalid address may give SIGSEGV
  Michael Kerrisk [Paul Eggert]
    Describe EOVERFLOW details
   Michael Kerrisk
    SEE ALSO: add vdso(7)
  Michael Kerrisk
    Rename 't' argument to 'tloc'

dlerror.3
  Michael Kerrisk [Jonny Grant]
    Clarify that the string returned by dlerror() is null terminated

dlopen.3
  Michael Kerrisk
    Include a shell session showing build/run in EXAMPLE
  Michael Kerrisk
    Change arguments to main() to "void" in EXAMPLE

drand48.3
  Michael Kerrisk [Vincent Lefevre]
    Correct descriptions of ranges returned by these functions
      See http://bugs.debian.org/803459

errno.3
  Michael Kerrisk
    Note probable cause of ENFILE error

fnmatch.3
  Pádraig Brady
    Describe the FNM_EXTMATCH flag and pattern syntax

iconv.3
  Andries E. Brouwer
    NOTES: describe correct usage for flushing partially buffered input

random_r.3

Michael Kerrisk [Archie Cobbs]
Clarify need to use initstate_r()

tzset.3
Carlos O'Donell
Clarify "daylight" and remove erroneous note

random.4
Michael Kerrisk [Tom Gundersen]
Rework example scripts to assume 'poolsize' unit is bits, not bytes
Michael Kerrisk [Walter Harms]
Use modern command substitution syntax in shell session log

proc.5
Michael Kerrisk
Reaching /proc/sys/fs/file-max limit normally produces an ENFILE error

futex.7
Heinrich Schuchardt
SEE ALSO updates
Michael Kerrisk
Note some other locking primitives that are built with futexes
Heinrich Schuchardt
NPTL, avoid abbreviation
Michael Kerrisk
Note that a futex is 4 bytes on all platforms

vdso.7
Michael Kerrisk
Add note on strace(1) and vDSO

ld.so.8
H.J. Lu [Michael Kerrisk]
Document LD_PREFER_MAP_32BIT_EXEC
Michael Kerrisk
Clarify setting of LD_BIND_NOT
Michael Kerrisk
Clarify setting of LD_DYNAMIC_WEAK
Michael Kerrisk
Clarify setting of LD_TRACE_PRELINKING
Michael Kerrisk
Clarify some details
for LD_SHOW_AUXV

Zefram <zefram@fysh.org>

Apologies if I missed anyone!

New and rewritten pages
---

copy_file_range.2
Anna Schumaker [Darrick J. Wong, Christoph Hellwig, Michael Kerrisk]
New page documenting copy_file_range()
copy_file_range() is a new system call for copying ranges of data
completely in the kernel. This gives filesystems an opportunity to
implement some kind of "copy acceleration", such as reflinks or
server-side-copy (in the case of NFS).

personality.2
  Michael Kerrisk
    This page has been greatly expanded, to add descriptions of
    personality domains.

fmemopen.3
  Michael Kerrisk [Adhemerval Zanella]
    Significant reworking of this page:
    * Rework discussion of the (obsolete) binary mode
    * Split open_memstream(3) description into a separate page.
    * Note various fmemopen() bugs that were fixed in glibc 2.22
    * Greatly expand description of 'mode' argument
    * Rework description of 'buf' and 'len' arguments
    * Expand discussion
 of "current position" for fmemopen() stream

ntp_gettime.3
  Michael Kerrisk
    New page describing ntp_gettime(3) and ntp_gettimex(3)

open_memstream.3
  Michael Kerrisk
    New page created by split of fmemopen(3).
    At the same time, add and rework a few details in the text.

posix_spawn.3
  Bill O. Gallmeister, Michael Kerrisk
    New man page documenting posix_spawn(3) and posix_spawnp(3)

readdir.3
  Michael Kerrisk [Florian Weimer]
    Split readdir_r() content into separate page
      As suggested by Florian Weimer:

        It may make sense to move this documentation to a separate
        manual page, specific to readdir_r. This will keep the
        readdir() documentation nice and crisp. Most programmers
        will never have to consult all these details.
  Michael Kerrisk
    Near complete restructuring of the page and add some further details
  Michael Kerrisk [Florian Weimer, Rich Felker,
 Paul Eggert]
    Add a lot more detail on portable use of the 'd_name' field

readdir_r.3
  Michael Kerrisk [Florian Weimer]
    New page created after split of readdir(3).
  Michael Kerrisk [Florian Weimer]

Explain why readdir_r() is deprecated and readdir() is preferred
Michael Kerrisk [Florian Weimer]
Remove misleading code example using pathconf()

lirc.4
Alec Leamas
New page documenting lirc device driver

Newly documented interfaces in existing pages
---

adjtimex.2
Michael Kerrisk
Document ntp_adjtime(3)

epoll_ctl.2
Michael Kerrisk [Jason Baron]
Document EPOLLEXCLUSIVE

madvise.2
Minchan Kim [Michael Kerrisk]
Document MADV_FREE
Document the MADV_FREE flag added to madvise() in Linux 4.5.

proc.5
Michael Kerrisk
Document CmaTotal and CmaFree fields of /proc/meminfo
Michael Kerrisk
Document additional /proc/meminfo
fields
Document DirectMap4k, DirectMap4M, DirectMap2M, DirectMap1G
Michael Kerrisk
Document MemAvailable /proc/meminfo field
Michael Kerrisk
Document inotify /proc/PID/fdinfo entries
Michael Kerrisk
Document fanotify /proc/PID/fdinfo entries
Michael Kerrisk
Add some kernel version numbers for /proc/PID/fdinfo entries
Michael Kerrisk [Patrick Donnelly]
/proc/PID/fdinfo displays the setting of the close-on-exec flag
Note also the pre-3.1 bug in the display of this info.

socket.7
Craig Gallek [Michael Kerrisk, Vincent Bernat]
Document some BPF-related socket options
Document the behavior and the first kernel version for each of the

following socket options:

SO_ATTACH_FILTER
SO_ATTACH_BPF
SO_ATTACH_REUSEPORT_CBPF
SO_ATTACH_REUSEPORT_EBPF
SO_DETACH_FILTER
SO_DETACH_BPF

SO_LOCK_FILTER

New and changed links
---

isalpha_l.3
  Michael Kerrisk
    New link to isalpha.3

longjmp.3
  Michael Kerrisk
    Replace page with link to setjmp(3), which now incorporates longjmp()

ntp_adjtime.3
  Michael Kerrisk
    New link to adjtimex(2)

ntp_gettimex.3
  Michael Kerrisk
    New link to ntp_gettime.3

open_wmemstream.3
  Michael Kerrisk
    Update link to point to new open_memstream(2) page

posix_spawnp.3
  Michael Kerrisk
    New link to new posix_spawn.3 page

siglongjmp.3
  Michael Kerrisk
    Rewire link to point to setjmp(3)

strerror_l.3
  Michael Kerrisk
    New link to strerror.3
      Fix missing link

Global changes

Various pages
  Michael Kerrisk
    Update FTM requirements (_DEFAULT_SOURCE)
  Michael Kerrisk
    Update feature test macro requirements
      Update to use _DEFAULT_SOURCE, and also changes brought by
      glibc
commit 266865c0e7b79d4196e2cc393693463f03c90bd8.

Various pages
  Michael Kerrisk
    Simplify FTM requirements
      Looking at <features.h> (or feature_test_macros(7)), one can
      see that when _XOPEN_SOURCE is defined with the value 700
      (or greater), then _POSIX_C_SOURCE is defined with the value
      200809L (or greater). Therefore, terms in the man pages such as

          _XOPEN_SOURCE\ >=\ 700 || _POSIX_C_SOURCE\ >=\ 200809L

      can be simplified to:

          _POSIX_C_SOURCE\ >=\ 200809L

Various pages
  Michael Kerrisk
    Simplify FTM requirements
      Looking at <features.h> (or feature_test_macros(7)), one can
      see that when _XOPEN_SOURCE is defined with the value 600
      (or greater), then _POSIX_C_SOURCE is defined with the value
      200112L (or greater). Therefore, terms in the man pages such as

          _XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L

       can be simplified to:

          _POSIX_C_SOURCE\ >=\ 200112L

Various pages
  Michael Kerrisk
    Simplify FTM requirements
      _XOPEN_SOURCE implies _POSIX_C_SOURCE >=2, so simplify FTM
      requirements in various pages.

Various pages

Michael Kerrisk
Remove "or 'cc -std=c99'" from SYNOPSIS
Under the FTM requirements all of these pages document the
requirement for _ISOC99_SOURCE. And feature_test_macros(7) now
documents that "cc -std=c99" produces the same effect as defining
_ISOC99_SOURCE. So, all of these pages don't additionally need
to specify "or 'cc -std=c99'" under the FTM requirements
in the SYNOPSIS. Removing that redundant text also simplifies
the SYNOPSIS a little.

Various pages
Michael Kerrisk
Simplify FTM requirements
Looking at <features.h> (or feature_test_macros(7)), one can
see that when _XOPEN_SOURCE
is defined with the value 600
(or greater), then _POSIX_C_SOURCE is defined with the value
200112L (or greater). Therefore, terms in the man pages such as

_XOPEN_SOURCE\ >=\ 600 || _POSIX_C_SOURCE\ >=\ 200112L

can be simplified to:

_POSIX_C_SOURCE\ >=\ 200112L

Various pages
Michael Kerrisk
Remove references to _XOPEN_SOURCE_EXTENDED in SYNOPSIS
_XOPEN_SOURCE_EXTENDED is obsolete (it existed in SUSv1, but not
subsequent standards). _XOPEN_SOURCE >= 500 produces the same
effects as (_XOPEN_SOURCE && _XOPEN_SOURCE_EXTENDED). Modifying
the SYNOPSIS of various ages that contain:

_XOPEN_SOURCE\ >=\ 500 ||
_XOPEN_SOURCE\ &&\ _XOPEN_SOURCE_EXTENDED

to just:

_XOPEN_SOURCE\ >=\ 500

This has the following benefits:

a) Simplifying the SYNOPSIS by removing ancient

historical information.

b) Preventing users from being misled into using
_XOPEN_SOURCE_EXTENDED in new source code.

Various pages
  Michael Kerrisk
    Remove mention of the obsolete _POSIX_SOURCE macro from SYNOPSIS
      _POSIX_SOURCE was a POSIX.1-1990 creation that was soon made
      obsolete by _POSIX_C_SOURCE. Retaining mention of it
      in the feature test macro requirements section of the
      SYNOPSIS doesn't contain important information, and may
      mislead readers into actually trying to use this macro.
      A few mentions of it are maintained in a some pages where
      defining _POSIX_SOURCE inhibits some behavior.

Various sockets-related pages
  Michael Kerrisk [Carlos O'Donell]
    Use consistent argument/variable names for socket addresses and lengths
      As noted by Carlos, there's quite a bit of inconsistency across
      pages. Use 'addr' and 'addrlen' consistently
 in variables and
      function arguments.

Various pages
  Michael Kerrisk
    Wording fix: "current file offset" ==> "file offset"
      "File offset" is the preferred POSIX terminology.

Various pages
  Michael Kerrisk
    Word "descriptor" more precisely
      Use either "file descriptor" or "message queue descriptor".

Various pages
  Michael Kerrisk
    ERRORS: add reference to signal(7) in description of EINTR

Changes to individual pages
----

locale.1
  Marko Myllynen
    Add "locale -c charmap" as an example
      Addresses https://bugzilla.kernel.org/show_bug.cgi?id=104511.

localedef.1
  Marko Myllynen
    Add hint on purpose of --no-archive
      Indicate why using --no-archive might be a good idea. The issue
      is that if you create a custom locale with localedef(1) and put

it to the locale archive then during the next glibc upgrade the
locale archive
is updated as well and your custom locale is gone.)

accept.2
Michael Kerrisk
ERRORS: improve description for EBADF

adjtimex.2
Michael Kerrisk [John Stultz]
Various improvements after feedback from John Stultz
Michael Kerrisk
Remove FTM requirements
It seems that adjtimex() never needed _BSD_SOURCE (and my
earlier commit 5918743bc8b02b was simply a blunder).
Michael Kerrisk
Split EINVAL error cases
Michael Kerrisk
Note treatment of out-of-range buf.offset
Michael Kerrisk
Don't refer reader to adjtime(3)
Probably, it's not wise to suggest adjtime(3) as the more
portable API. Rather, ntp_adjtime(3) should be used.
Michael Kerrisk [Naresh Kamboju]
Update details of buf.offset EINVAL error
Michael Kerrisk
SEE ALSO: add ntp_gettime(3)
Michael Kerrisk
Improve description of some PPS timex fields
Michael Kerrisk
Add ATTRIBUTES
section
William Preston [Petr Gajdos]
Update a detail in adjtimex return value description
Michael Kerrisk
Note range constraints and clamping for ADJ_FREQUENCY

bdflush.2
Michael Kerrisk
Note that glibc support for this system call went away in version 2.23

bind.2
Michael Kerrisk
Improve description of ENOENT error

bpf.2
Michael Kerrisk
Document close-on-exec semantics

The close-on-exec file descriptor flag is automatically enabled
for FDs returned by bpf().

chmod.2
Michael Kerrisk
Clarify terminology (file mode versus file permission bits)

chown.2
Michael Kerrisk
ERRORS: improve EBADF description

clone.2
unshare.2
Michael Kerrisk
Remove mention of _BSD_SOURCE and _SVID_SOURCE
The right way to expose declarations for these Linux-specific
system calls was always _GNU_SOURCE. Mentioning the historical
use of _BSD_SOURCE
and _SVID_SOURCE just clouds the issue.

connect.2
Michael Kerrisk
ERRORS: improve EBADF description

create_module.2
Michael Kerrisk
Glibc 2.23 removed last vestiges of support for this system call

delete_module.2
Michael Kerrisk
Glibc 2.23 removed last vestiges of support for this system call

epoll_ctl.2
Michael Kerrisk
Document ELOOP error for circular monitoring loops

eventfd.2
Michael Kerrisk
Note that eventfd info is available in /proc/PID/fdinfo

execve.2
Michael Kerrisk [Krzysztof Adamski]
Add EPERM error for capabilities check of capability-dumb binaries
Michael Kerrisk
Add reference to ld-linux.so(8)
Michael Kerrisk
SEE ALSO: add system(3)

fanotify_init.2
  Michael Kerrisk
    Note kernel version that allowed O_CLOEXEC for event_f_flags

fcntl.2
flock.2
  Michael Kerrisk
    SEE ALSO: add lslocks(8)

fcntl.2
  Michael Kerrisk [Jason Vas Dias]
    Rework description
 of F_SETOWN
      As suggested by Jason, make it clearer that I/O signalling
      requires the use of both F_SETOWN and O_ASYNC. While we're at,
      make a few other cleanups to the text.
  Michael Kerrisk
    Remove mention of _BSD_SOURCE to get definition of F_SETOWN/F_GETOWN
      This usage went away in glibc 2.20, and the simplest remedy
      is just to omit mention of it.

futex.2
  Michael Kerrisk
    FUTEX_CLOCK_REALTIME can now be used with FUTEX_WAIT

get_kernel_syms.2
  Michael Kerrisk
    Note that glibc does not support this system call

init_module.2
  Michael Kerrisk
    Glibc 2.23 removed last vestiges of support for this system call

ioctl_list.2
  Heinrich Schuchardt
    Include uapi/linux/wireless.h
      Add the list of wireless IOCTLs.
  Heinrich Schuchardt
    Path to sockios.h
      sockios.h is now in include/uapi
  Heinrich Schuchardt
    Add reference to netdevice.7
       netdevice.7 describes most of the IOCTLs of sockios.h
  Heinrich Schuchardt
    Transfer structure (wireless.h IOCTLs)
      The sole parameter to be passed to the wireless.h IOCTLs is
      of type struct iwreq *.

ioperm.2
  Michael Kerrisk [Alex Henrie]
    ioperm.2: Permissions are inherited across fork(2)
      See https://bugzilla.kernel.org/show_bug.cgi?id=99911

iopl.2
  Michael Kerrisk [Alex Henrie]
    Permissions are not inherited across fork(2) or preserved on execve(2)
      See https://bugzilla.kernel.org/show_bug.cgi?id=99901

lseek.2
  Michael Kerrisk
    FUSE now supports SEEK_HOLE and SEEK_DATA
  Michael Kerrisk
    NFS supports SEEK_HOLE and SEEK_DATA

  Michael Kerrisk
    SEE ALSO: add open(2)

madvise.2
  Michael Kerrisk
    Clarify MADV_HWPOISON wording to say that it applies to a page range

mknod.2
  Michael Kerrisk
    SEE ALSO: add mknod(1)

mount.2
  Michael Kerrisk
     SEE ALSO: add findmnt(8)

open.2
  Michael Kerrisk
    NOTES: mention existence of proc/PID/fd and /proc/PID/fdinfo
  Mark Post [Petr Gajdos]
    O_TMPFILE support is now provided bt Btrfs

pipe.2
  Michael Kerrisk [Eric Blake]
    Note treatment of 'pipefd' on error

poll.2
  Michael Kerrisk [Josh Triplett]
    Document spurious EAGAIN error that can occur on other systems
      Light reworking of text proposed by Josh Triplett.

readlink.2
  Michael Kerrisk

Clarify EINVAL error description

recv.2
Heinrich Schuchardt
Equivalence to read()
Describe the recv(2)-read(2) and the recvfrom(2)-recv(2)
equivalences for zero-valued arguments.
Michael Kerrisk
MSG_WAITALL has no effect for datagram sockets

recv.2
cmsg.3
Nikola Forró
Fix type of cmsg_len member of cmsghdr structure
The type shown for cmsg_len member of cmsghdr structure is socklen_t,
but the actual
type used by glibc and the kernel is size_t.
The information was obtained from glibc source code:
http://bit.ly/21m1RMp
Michael Kerrisk
Note that cmsg_len is typed as socklen_t in POSIX.1

sched_setaffinity.2
Michael Kerrisk [Florian Weimer, Florian Weimer]
Warn that CPU_ALLOC() may allocate a slightly CPU set than requested
Michael Kerrisk [Florian Weimer]
Add reference to CPU_ALLOC(3)

sched_setattr.2
Michael Kerrisk [Akihiro Suda]
EPERM depends on affinity mask of target thread, not calling thread

select.2
Michael Kerrisk [Josh Triplett]
Document spurious EAGAIN error that can occur on other systems
Light reworking of text proposed by Josh Triplett.
Nikos Mavrogiannopoulos
Mention the 'fd_set' size limitation early and refer to poll(2)
Change this because of the serious limitation of select()
imposing a limit on the range of file descriptors that
can
be monitored. This is currently mentioned too late in the
documentation (in the NOTES section). The man page should
warn early and refer to poll(2) as soon as possible.
Michael Kerrisk
Add details on the glibc fixed-size fd_set limitation
No modern application should use select() on Linux.

select_tut.2
  Michael Kerrisk
    Some readability fixes to example program
  Michael Kerrisk
    Better variable names in example program
  Michael Kerrisk
    Simplify 'if' logic in example program
  Michael Kerrisk
    Use correct type (socklen_t) for addrlen

semctl.2
  Michael Kerrisk [Davidlohr Bueso, Manfred Spraul, Philip Semanchuk]
    NOTES: note when 'sempid' is set on various implementations
      See https://bugzilla.kernel.org/show_bug.cgi?id=112271 and
      http://thread.gmane.org/gmane.linux.kernel/2162754/
        Subject: [PATCH] Don't set sempid in semctl syscall.
         Date: 2016-02-26 12:21:38 GMT

semop.2
  Michael Kerrisk
    Tweak comment describing 'sempid'

sendfile.2
  Askar Safin
    Fix incorrect description in text referring to splice(2)
  Michael Kerrisk
    SEE ALSO: add copy_file_range(2)

setpgid.2
  Michael Kerrisk
    Correct/simplify FTM requirements for BSD setpgrp() and getpgrp()

signalfd.2
  Michael Kerrisk
    Note that signalfd info is available in /proc/PID/fdinfo

sigprocmask.2
  Michael Kerrisk [Mike Frysinger]
    Explicitly refer the reader to sigsetops(3)
      This man page did not make it obvious which functions
      should be used for manipulating signals sets, nor where
      those functions were documented.

socketpair.2
  Michael Kerrisk [Eric Blake]
    Note treatment of 'sv' on error

splice.2
  Askar Safin
    Improve description of 0 return value.
      See https://bugzilla.kernel.org/show_bug.cgi?id=90911

statfs.2

 Michael Kerrisk [Jakub Wilk]
    Use consistent case for hex constants

sync.2
  Christoph Hellwig
    Clarify description and document the Linux data integrity guarantees

syscall.2
  Mike Frysinger
    Add more architectures and improve error documentation
      Move the error register documentation into the main table rather
      than listing them in sentences after the fact.

      Add sparc error return details.

      Add details for alpha/arc/m68k/microblaze/nios2/powerpc/superh/
      tile/xtensa.

syscalls.2
  Michael Kerrisk
    Add copy_file_range(2)

times.2
  Kondo, Naoya
    Fix an incorrect description in NOTES
      The text has an incorrect description in NOTES, it says
      that (2^32/HZ) - 300 is about 429 million. It is correct
      only if HZ=10 which does not look common today. So just
      removing "(i.e., about 429 million)" is good enough.

truncate.2
  Michael Kerrisk

    SEE ALSO: add truncate(1)

uselib.2
  Michael Kerrisk
    Mention CONFIG_USELIB
  Michael Kerrisk
    Note that glibc does not support this (obsolete) system call

wait.2
wait4.2
  Michael Kerrisk
    Rename the "status" argument to "wstatus"
      The fact that exit(3)/_exit(2) has an argument called
      "status" and the same name is used in the arguments to the
      wait*() calls can a little too easily lead the user into
      thinking that the two arguments hold the same information,
      when of course they don't. So, use a different name
      for the argument of the wait*() functions, to reduce
      the chances of such confusion.

backtrace.3
  Michael Kerrisk [Martin Gebert]
    Small fixes to example program

clearenv.3
  Michael Kerrisk [Matt Zimmerman]
    Clarify the use and effect of clearenv()
      See http://bugs.debian.org/679323
  Michael Kerrisk
    Variables can be added to
 the environment after calling clearenv()

clog10.3
  Michael Kerrisk
    Show an alternative equivalence for clog10()
  Michael Kerrisk
    Update CONFORMING TO
      Fix grammar error and add C11.

dl_iterate_phdr.3
  Michael Kerrisk [Paul Pluzhnikov]
    Describe 'struct dl_phdr_info' fields added in glibc 2.4
      See https://bugzilla.kernel.org/show_bug.cgi?id=103011
  Michael Kerrisk [Simon Que]
    Note that first object visited by 'callback' is the main program
      See https://bugzilla.kernel.org/show_bug.cgi?id=94141

errno.3
  Michael Kerrisk
    Add some explanation of ENOENT error

exec.3
  Michael Kerrisk
    SEE ALSO: add system(3)

exp.3

Michael Kerrisk [Joachim Wuttke]
SEE ALSO: add expm1(3)

fopen.3
Michael Kerrisk
SEE ALSO: add open_memstream(3)

fts.3
Michael Kerrisk
BUGS: glibc-2.23 now has LFS support for the fts functions

gamma.3
Michael Kerrisk [Alan Cox]

gamma() was documented in SVID 2

getaddrinfo.3
Michael Kerrisk [Andreas Schwab, Orion Poplawski]
Update FTM requirements for glibc 2.22
Since glibc 2.22 getaddrinfo() etc. are only declared for
POSIX.1-2001 or later.

getcwd.3
Michael Kerrisk
SEE ALSO: add pwd(1)

opendir.3
Michael Kerrisk
Help the reader by explicitly mentioning the use of readdir(3)

perror.3
Michael Kerrisk
Suggest use of strerror(3) in place of deprecated 'sys_errlist'

posix_fallocate.3
Jérémie Galarneau
ERRORS: add EINTR
The glibc implementation of posix_fallocate(), which calls
fallocate(), may be interrupted. The fallocate() emulation
also makes use of pread()/pwrite(), which may also be
interrupted.

posix_memalign.3
Michael Kerrisk [Eric Blake]
Note posix_memalign()'s treatment of 'memptr' on error

pthread_setaffinity_np.3
Michael Kerrisk

SEE ALSO: add
CPU_SET(3)

queue.3
Dr. Tobias Quathamer
Remove double CONFORMING TO section

rcmd.3
Nikola Forró
Add missing condition concerning .rhosts file
The list of conditions determining if iruserok() and ruserok()
functions automatically fail is incomplete. According to glibc
source code, the functions also fail if the .rhosts file
is hard linked anywhere.

setbuf.3
Michael Kerrisk
SEE ALSO: add stdbuf(1)

setjmp.3
Michael Kerrisk
Rewrite and merge longjmp()/siglongjmp() discussion into this page
The discussion of nonlocal gotos is much easier to read if
setjmp() and longjmp() are discussed in the same page. While
we're at it, rework almost the entire text and add several
more details.
Michael Kerrisk
Note the interactions of longjmp() and non-async-signal-safe functions
POSIX.1-2008 TC2 adds explicit text on this point.

See http://austingroupbugs.net/view.php?id=516#c1195
Michael Kerrisk
Explain why nonlocal gotos make code harder to maintain
Michael Kerrisk
Reword warning on longjmp() to function that has already returned
Michael Kerrisk
Remove reference to obsolete _XOPEN_SOURCE_EXTENDED

sleep.3
Michael Kerrisk
SEE ALSO: add sleep(1)

strftime.3
Michael Kerrisk [Jeremy Harris]
Note which 'tm' fields are used to calculate each output string
See https://bugzilla.redhat.com/show_bug.cgi?id=1162218

strlen.3

Michael Kerrisk [Alan Aversa]
CONFORMING TO: add C11

system.3
Michael Kerrisk
SEE ALSO: add execve(2)

termios.3
Dr. Tobias Quathamer
Document line length in canonical mode
See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/tree/drivers/tty/n_tty.c#n1673
See https://bugs.debian.org/797479
Michael Kerrisk
SEE ALSO: add tty(1)

Michael Kerrisk [Peter Hurley]
Further improvements to recent tweaks of canonical mode 4096 char limit

timegm.3
Michael Kerrisk [Stephen Hurd, Mats Wichmann]
Remove sample implementation of timegm()
Stephen and Mats both question the wisdom of showing a portable
non-thread-safe implementation of timegm(), and I find it
hard to disagree. So, remove this code.

See https://bugzilla.kernel.org/show_bug.cgi?id=103701
Michael Kerrisk
Expand DESCRIPTION a little

st4.4
Dr. Tobias Quathamer
Remove spurious copyright section

tty_ioctl.4
Michael Kerrisk
SEE ALSO: add ldattach(1)

elf.5
Michael Kerrisk [Gabriel Corona, Mike Frysinger]
Fix description of STV_PROTECTED
Michael Kerrisk
Improve description of STV_DEFAULT
Michael Kerrisk
Improve description of STV_HIDDEN
Chris Pick
Remove erroneous, duplicate SHN_* section
Michael Kerrisk

[Chris Pick]
Reword discussion of range values a little

gai.conf.5
Michael Kerrisk
Add VERSIONS section

group.5
Michael Kerrisk
SEE ALSO: add groups(2)
SEE ALSO: add gpasswd(1)
SEE ALSO: add sg(1)
SE ALSO: add gshadow(5)
SEE ALSO: add chgrp(1)

locale.5
Marko Myllynen [Mike Frysinger]
tel + fax are deprecated

nsswitch.conf.5
Nikola Forró
Update NSS compatibility mode description

utmp.5
Michael Kerrisk
SEE ALSO: add lslogins(1)

aio.7
Andreas Gruenbacher
Improve example
When aio_sigevent.sigev_notify is set to SIGEV_SIGNAL, signal handlers called for asynchronous I/O operations will have si->si_code set to SI_ASYNCIO. Check to make sure that si->si_value.sival_ptr is defined.

capabilities.7
Michael Kerrisk
Explain safety check for capability-dumb binaries
Michael Kerrisk
SEE ALSO: add sg(1), su(1)
SEE ALSO: add id(1), group(5), passwd(5)

credentials.7
Michael Kerrisk
SEE ALSO: add groups(2)

environ.7
Michael Kerrisk

Describe the Bourne "NAME=value command" syntax
Michael Kerrisk
Add some details describing hos shell's environment is initialized
Michael Kerrisk
Note that child of fork(2) inherits copy of parent's environment
Michael Kerrisk
SEE ALSO: add pam_env(3)

epoll.7
Michael Kerrisk
Mention that epoll info is available via /proc/PID/fdinfo

fanotify.7
Michael Kerrisk
Refer reader to proc(5) for info on /proc/PID/fdinfo fanotify entries

feature_test_macros.7
Michael Kerrisk
Add a summary of some FTM key points
Michael Kerrisk
Give an early hint about some macros being defined by default
Michael Kerrisk
Clarify relation between _XOPEN_SOURCE >=500 and _XOPEN_SOURCE_EXTENDED
Emphasize that defining _XOPEN_SOURCE >=500 produces same

effects as defining _XOPEN_SOURCE_EXTENDED.
Michael Kerrisk
Note that man pages don't mention _XOPEN_SOURCE_EXTENDED
As per previous commit, mention of _XOPEN_SOURCE_EXTENDED
has generally been removed from the man pages.
Michael Kerrisk
Note effects of "cc -std=c99" and "cc -std=c11"
Michael Kerrisk
Clarify some _ISOC99_SOURCE / _DEFAULT_SOURCE details
Michael Kerrisk
Clarify that _XOPEN_SOURCE_EXTENDED is obsolete
Since SUSv2, _XOPEN_SOURCE_EXTENDED is no longer specified
in the standard.

inotify.7
Michael Kerrisk
Refer reader to proc(5) for info on /proc/PID/fdinfo inotify entries

ip.7
Eric Dumazet
Document IP_BIND_ADDRESS_NO_PORT socket option

mq_overview.7
  Michael Kerrisk
    Note that the close-on-exec flag is automatically set on MQ descriptors

namespaces.7
  Michael Kerrisk
    SEE ALSO: add lsns(1)
      lsns(1) was recently
 added in util-linux, probably to appear
      in next release (2.28?).

pipe.7
  Michael Kerrisk [Jason Vas Dias]
    Clarify that I/O signalling requires use of both F_SETOWN and O_ASYNC
  Michael Kerrisk
    SEE ALSO: add mkfifo(1)

signal.7
  Michael Kerrisk
    Note the interactions of longjmp() and non-async-signal-safe functions
      See http://austingroupbugs.net/view.php?id=516#c1195.

socket.7
  Michael Kerrisk
    SEE ALSO: add pcap(3)
    SEE ALSO: add wireshark(1) and tcpdump(8)

standards.7
  Michael Kerrisk
    Add POSIX.1-2008 TC2 (POSIX.1-2016)

svipc.7
  Michael Kerrisk
    Tweak description of 'sempid'
  Michael Kerrisk
    SEE ALSO: add lsipc(1)

symlink.7
  Michael Kerrisk [Zefram]
    Some "magic" symlinks have permissions other than 0777
      See https://bugs.debian.org/743525

time.7
  Michael Kerrisk
    SEE ALSO: add timeout(1)
    SEE ALSO: add ntp_adjtime(3) and ntp_gettime(3)

unicode.7

Dr. Tobias Quathamer
Document private use areas
See https://bugs.debian.org/285444

unix.7
Heinrich Schuchardt
Add example
A complete example demonstrating the usage of sockets for local
interprocess communication is added.
Michael Kerrisk
Introduce term "sequenced-packet" for SOCK_SEQPACKET
Michael Kerrisk
Some wording improvements

========== Changes in man-pages-4.06 ==========

Released: 2016-05-09, Oslo

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Zubair Lutfullah Kakakhel <Zubair.Kakakhel@imgtec.com>

Apologies if I missed anyone!

New and rewritten pages
---

cgroups.7
  Serge Hallyn, Michael Kerrisk
    New page documenting cgroups

cgroup_namespaces.7
  Michael Kerrisk [Serge Hallyn]
    New page describing cgroup namespaces

Newly documented interfaces in existing pages
---

clone.2
  Michael Kerrisk
    Document CLONE_NEWCGROUP

readv.2
  Christoph Hellwig
    Document preadv2() and pwritev2()
setns.2
   Michael Kerrisk
    Document CLONE_NEWCGROUP

unshare.2
  Michael Kerrisk
    Document CLONE_NEWCGROUP

Changes to individual pages
---

clock_getres.2
  Michael Kerrisk [Rasmus Villemoes]
    Note that coarse clocks need architecture and VDSO support

clone.2
fork.2
  Nikola Forró
    Document ERESTARTNOINTR error code

clone.2

Michael Kerrisk [Colin Ian King]
ERRORS: add EINVAL for improperly aligned 'child_stack' value

execve.2
Michael Kerrisk [Valery Reznic]
Since Linux 2.6.28, recursive script interpretation is supported

fcntl.2
Michael Kerrisk
Note that mandatory locking is now governed by a configuration option

fsync.2
Michael Kerrisk [Georg Sauthoff]
Give some examples of files where sync can fail with EINVAL

getrlimit.2
Michael Kerrisk
SEE ALSO: add cgroups(7)

ioctl_fat.2
Heinrich Schuchardt
Use %04x to print volume ID
Leading zeroes
should be used when display a FAT volume ID.

ioprio_set.2
Michael Kerrisk
SEE ALSO: add cgroups(7)

lseek.2
Michael Kerrisk
Note that 'off_t' is an integer data type defined by POSIX

memfd_create.2
Michael Kerrisk
Note that memfd_create() does not have a glibc wrapper

mount.2
Michael Kerrisk
MS_MANDLOCK requires CAP_SYS_ADMIN (since Linux 4.5)

quotactl.2
Michael Kerrisk
Document Q_GETNEXTQUOTA and Q_XGETNEXTQUOTA
Michael Kerrisk
Rework/reorder ERRORS list
Make into a single alphabetically ordered list
Michael Kerrisk

Note kernel version that removed Q_GETSTATS

Michael Kerrisk

Add kernel version for G_GETINFO, Q_SETINFO, and Q_GETFMT

readv.2

Michael Kerrisk

Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

semctl.2

Michael Kerrisk

From kernel 4.6, Linux now updates 'sempid' on SETALL operations

sigaction.2

Michael Kerrisk

Document SEGV_BNDERR

Michael Kerrisk

Document SEGV_PKUERR

syscalls.2

Michael Kerrisk

Add preadv2() and pwritev2()

write.2

Michael Kerrisk

Clarify that 'size_t' and 'ssize_t' are integer types specified in POSIX

makedev.3

Mike Frysinger

Use <sys/sysmacros.h> in SYNOPSIS

Defining these functions via <sys/types.h> causes problems for some folk. As noted by Zack Wein:

> libstdc++ force-enables _GNU_SOURCE, which means people writing in C++ _can't_ avoid these nonstandard macros by using a strict conformance mode.

Since glibc has basically always used <sys/sysmacros.h>, update the docs to have people include that instead.

Michael Kerrisk

NOTES: mention that <sys/types.h> may also define these macros

popen.3

Nikola Forró

RETURN VALUE: describe successful case

Reference:
http://pubs.opengroup.org/onlinepubs/9699919799/functions/popen.html
http://pubs.opengroup.org/onlinepubs/9699919799/functions/pclose.html

strtod.3
  Michael Kerrisk [Ed Avis]
    Improve a detail in RETURN VALUE

core.5
  Michael Kerrisk
    Document /proc/sys/kernel/core_pipe_limit

locale.5
  Marko Myllynen
    Adjust LC_IDENTIFICATION / abbreviation
      Tiny tweak to locale.5 based on ISO/IEC TR 14652:

      http://www.open-std.org/jtc1/SC22/WG20/docs/n972-14652ft.pdf
  Marko Myllynen
    Update LC_ADDRESS after glibc change
      This patch updates locale.5 to match the recent glibc change
      in commit a837257199ffab76237385b830cc7b6179fc2f18
  Marko Myllynen
    Complete LC_COLLATE
      Here's the first attempt to (almost) complete the locale.5 manual
      page by documenting all (but perhaps one) of the missing
      LC_COLLATE keywords.
  Mike Frysinger
    country_car: Add a better description

nsswitch.conf.5
   Marko Myllynen
    Document group merging
      Document the recently merged glibc group merge support.
      Glibc commit ced8f8933673f4efda1d666d26a1a949602035ed
      https://sourceware.org/glibc/wiki/Proposals/GroupMerging

proc.5
  Michael Kerrisk
    Move /proc/PID/cgroup discussion to cgroups(7) page
  Michael Kerrisk
    Add some background on why /proc/PID/mountinfo was added
  Michael Kerrisk
    Improve description of /proc/PID/mountinfo 'root' field
  Michael Kerrisk
    Add pointer to cgroups(7) for documentation of /proc/cgroups
  Michael Kerrisk
    Add reference to core(5) for info on /proc/sys/kernel/core_pipe_limit

cpuset.7
  Michael Kerrisk

SEE ALSO: add cgroups(7)

ip.7
Benjamin Poirier
Fix incorrect sockopt name
"IP_LEAVE_GROUP" does not exist. It was perhaps a confusion with
MCAST_LEAVE_GROUP. Change the text to IP_DROP_MEMBERSHIP which has

the same function as MCAST_LEAVE_GROUP and is documented in the
ip.7 man page.

Reference:
Linux kernel net/ipv4/ip_sockglue.c do_ip_setsockopt()

namespaces.7
Michael Kerrisk
SEE ALSO: add cgroups(7), cgroup_namespaces(7)

vdso.7
Zubair Lutfullah Kakakhel [Mike Frysinger]
Update for MIPS
Document the symbols exported by the MIPS VDSO.
VDSO support was added from kernel 4.4 onwards.

See https://git.kernel.org/cgit/linux/kernel/git/torvalds/linux.git/log/arch/mips/vdso
Michael Kerrisk [Rasmus Villemoes]
The __kernel_clock_* interfaces don't support *_COARSE clocks on PowerPC

ld.so.8
Michael Kerrisk [Alon Bar-Lev]
Document use of $ORIGIN, $LIB, and $PLATFORM in environment variables
These strings are meaningful in LD_LIBRARY_PATH and LD_PRELOAD.

========== Changes in man-pages-4.07 ==========

Released: 2016-07-17, Ulm

New and rewritten
pages
---

ioctl_fideduperange.2
  Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
    New page documenting the FIDEDUPERANGE ioctl
      Document the FIDEDUPERANGE ioctl, formerly known as
      BTRFS_IOC_EXTENT_SAME.

ioctl_ficlonerange.2
  Darrick J. Wong [Christoph Hellwig, Michael Kerrisk]
    New page documenting FICLONE and FICLONERANGE ioctls
      Document the FICLONE and FICLONERANGE ioctls, formerly known as
      the BTRFS_IOC_CLONE and BTRFS_IOC_CLONE_RANGE ioctls.

nextup.3
  Michael Kerrisk
    New page documenting nextup(), nextdown(), and related functions

mount_namespaces.7
  Michael Kerrisk [Michael Kerrisk]
    New page describing mount namespaces

Newly documented interfaces in existing pages
---

mount.2
  Michael Kerrisk
    Document flags used to set propagation type
      Document MS_SHARED, MS_PRIVATE, MS_SLAVE, and MS_UNBINDABLE.
   Michael Kerrisk
    Document the MS_REC flag

ptrace.2
  Michael Kerrisk [Kees Cook, Jann Horn, Eric W. Biederman, Stephen Smalley]
    Document ptrace access modes

proc.5
  Michael Kerrisk
    Document /proc/[pid]/timerslack_ns
  Michael Kerrisk

Document /proc/PID/status 'Ngid' field
Michael Kerrisk
Document /proc/PID/status fields: 'NStgid', 'NSpid', 'NSpgid', 'NSsid'
Michael Kerrisk
Document /proc/PID/status 'Umask' field

New and changed links
---

preadv2.2
pwritev2.2
Michael Kerrisk
New links to readv(2)

nextdown.3
nextdownf.3
nextdownl.3
nextupf.3
nextupl.3
Michael Kerrisk
New links to nextup(3)

Changes to individual pages
---

ldd.1
Michael Kerrisk
Add a little more detail on why ldd is unsafe with untrusted executables
Michael Kerrisk
Add more detail on the output of ldd

localedef.1
Marko Myllynen
Drop --old-style
description
The glibc upstream decided to drop localedef(1) --old-style
option [1] altogether, I think we can do the same with
localedef(1), the option hasn't done anything in over 16
years and I doubt anyone uses it.

add_key.2
Mitch Walker
Empty payloads are not allowed in user-defined keys

chroot.2
Michael Kerrisk

SEE ALSO: add pivot_root(2)

clone.2
Michael Kerrisk
Add reference to mount_namespaces(7) under CLONE_NEWNS description

fork.2
Michael Kerrisk
Add ENOMEM error for PID namespace where "init" has died

futex.2
Michael Kerrisk
Correct an ENOSYS error description
Since Linux 4.5, FUTEX_CLOCK_REALTIME is allowed with FUTEX_WAIT.
Michael Kerrisk [Darren Hart]
Remove crufty text about FUTEX_WAIT_BITSET interpretation of timeout
Since Linux 4.5, FUTEX_WAIT also understands
FUTEX_CLOCK_REALTIME.
Michael Kerrisk [Thomas
Gleixner]
Explain how to get equivalent of FUTEX_WAIT with an absolute timeout
Michael Kerrisk
Describe FUTEX_BITSET_MATCH_ANY
Describe FUTEX_BITSET_MATCH_ANY and FUTEX_WAIT and FUTEX_WAKE
equivalences.
Michael Kerrisk
Note that at least one bit must be set in mask for BITSET operations
At least one bit must be set in the 'val3' mask supplied for the
FUTEX_WAIT_BITSET and FUTEX_WAKE_BITSET operations.
Michael Kerrisk [Thomas Gleixner, Darren Hart]
Fix descriptions of various timeouts
Michael Kerrisk
Clarify clock default and choices for FUTEX_WAIT

getitimer.2
Michael Kerrisk
Substantial rewrites to various parts of the page
Michael Kerrisk [Tom Callaway]
Change license to note that page may be modified
The page as originally written carried text that said the page may
be freely distributed but made no statement about modification.
In the 20+ years since it was first written, the page has in fact
seen repeated, sometimes substantial, modifications, and only a
small portion of the original text remains. One could I suppose
rewrite the last few pieces that remain from the original,
but as the largest contributor to the pages existing text,
I'm just going to relicense it to explicitly note that
modification is permitted. (I presume the failure by the

original author to grant permission to modify was simply an
oversight; certainly, the large number of people who have
changed the page have taken that to be the case.)

See also https://bugzilla.kernel.org/show_bug.cgi?id=118311

get_mempolicy.2
  Michael Kerrisk [Jörn Engel]
    Correct rounding to 'maxnodes' (bits, not bytes)
  Michael Kerrisk [Jörn Engel]
    Fix prototype for get_mempolicy()
      In numaif.h, 'addr'
 is typed as 'void *'

getpriority.2
  Michael Kerrisk
    Make discussion of RLIMIT_NICE more prominent
      The discussion of RLIMIT_NICE was hidden under the EPERM error,
      where it was difficult to find. Place some relevant text in
      DESCRIPTION.
  Michael Kerrisk
    Note that getpriority()/setpriority deal with same attribute as nice(2)
  Michael Kerrisk [Robin Kuzmin]
    Clarify equivalence between lower nice value and higher priority

get_robust_list.2
  Michael Kerrisk
    get_robust_list() is governed by PTRACE_MODE_READ_REALCREDS

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_fideduperange(2) and ioctl_ficlonerange(2)

kcmp.2
  Michael Kerrisk
    kcmp() is governed by PTRACE_MODE_READ_REALCREDS
  Shawn Landden
    Note about SECURITY_YAMA
kill.2
  Michael Kerrisk [John Wiersba]
    Clarify the meaning if sig==0

lookup_dcookie.2
  Michael Kerrisk
    SEE ALSO: add oprofile(1)

mmap.2

Michael Kerrisk [Rahul Bedarkar]
EXAMPLE: for completeness, add munmap() and close() calls

mount.2
Michael Kerrisk
Restructure discussion of 'mountflags' into functional groups
The existing text makes no differentiation between different
"classes" of mount flags. However, certain flags such as
MS_REMOUNT, MS_BIND, MS_MOVE, etc. determine the general
type of operation that mount() performs. Furthermore, the
choice of which class of operation to perform is performed in
a certain order, and that order is significant if multiple
flags are specified. Restructure and extend the text to
reflect these details.
Michael Kerrisk
Relocate text on multimounting and mount stacking to NOTES
The text was somewhat out of place in its previous location;
NOTES is a better location.
Michael Kerrisk
Remove version numbers attached to flags
that are modifiable on remount
This information was simply bogus. Mea culpa.
Michael Kerrisk
Refer reader to mount_namespaces(7) for details on propagation types
Michael Kerrisk
SEE ALSO: s/namespaces(7)/mount_namespaces(7)/
Omar Sandoval
MS_BIND still ignores mountflags
This is clear from the do_mount() function in the kernel as of v4.6.
Michael Kerrisk
Note the default treatment of ATIME flags during MS_REMOUNT
The behavior changed in Linux 3.17.
Michael Kerrisk
Clarify that MS_MOVE ignores remaining bits in 'mountflags'
Michael Kerrisk
Note kernel version that added MS_MOVE
Michael Kerrisk
MS_NOSUID also disables file capabilities
Michael Kerrisk
Relocate/demote/rework text on MS_MGC_VAL
The use of this constant has not been needed for 15 years now.
Michael Kerrisk
Clarify that 'source' and 'target' are pathnames, and can refer
to files
Michael Kerrisk
Update example list of filesystem types
Put more modern examples in; remove many older examples.
Michael Kerrisk

MS_LAZYTIME and MS_RELATIME can be changed on remount
Michael Kerrisk
Explicitly note that MS_DIRSYNC setting cannot be changed on remount
Michael Kerrisk
Move text describing 'data' argument higher up in page
In preparation for other reworking.
Michael Kerrisk
Since Linux 2.6.26, bind mounts can be made read-only

open.2
Eric Biggers
Refer to correct functions in description of O_TMPFILE

pciconfig_read.2
Michael Kerrisk [Tom Callaway]
Change license to note that page may be modified
Niki Rahimi, the author of this page, has agreed that it's okay
to change the license to note that the page can be modified.

See https://bugzilla.kernel.org/show_bug.cgi?id=118311

perf_event_open.2
Michael Kerrisk

If pid > 0, the operation is governed by PTRACE_MODE_READ_REALCREDS
Jann Horn
Document new perf_event_paranoid default
Keno Fischer [Vince Weaver]
Add a note that dyn_size is omitted if size == 0
The perf_output_sample_ustack in kernel/events/core.c only writes
a single 64 bit word if it can't dump the user registers. From the
current version of the man page, I would have expected two 64 bit
words (one for size, one for dyn_size). Change the man page to
make this behavior explicit.

prctl.2
Michael Kerrisk
Some wording improvements in timer slack description
Michael Kerrisk
Refer reader to discussion of /proc/[pid]/timerslack_ns
Under discussion of PR_SET_TIMERSLACK, refer the reader to
the /proc/[pid]/timerslack_ns file, documented in proc(5).

process_vm_readv.2
Michael Kerrisk
Rephrase permission rules in terms of a ptrace access mode check

ptrace.2

Michael Kerrisk [Jann Horn]
Update Yama ptrace_scope documentation
Reframe the discussion in terms of PTRACE_MODE_ATTACH checks,
and make a few other minor tweaks and additions.
Michael Kerrisk, Jann Horn
Note that user namespaces can be used to bypass Yama protections
Michael Kerrisk
Note that PTRACE_SEIZE is subject to a ptrace access mode check
Michael Kerrisk
Rephrase PTRACE_ATTACH permissions in terms of ptrace access mode check

quotactl.2
Michael Kerrisk [Jacob Willoughby]
'dqb_curspace' is in bytes, not blocks
This error appears to have been injected into glibc
when copying some headers from BSD.

See https://bugs.debian.org/825548

recv.2
Michael Kerrisk [Tom Gundersen]
With pending 0-length datagram read() and recv() with flags == 0 differ

setfsgid.2
setfsuid.2
Jann Horn [Michael Kerrisk]
Fix note about errors from
the syscall wrapper
See sysdeps/unix/sysv/linux/i386/setfsuid.c in glibc-2.2.1.
(This code is not present in modern glibc anymore.)
Michael Kerrisk
Move glibc wrapper notes to "C library/kernel differences" subsection

sysinfo.2
Michael Kerrisk
Rewrite and update various pieces

umask.2
Michael Kerrisk
NOTES: Mention /proc/PID/status 'Umask' field

umount.2
Michael Kerrisk
SEE ALSO: add mount_namespaces(7)

unshare.2
Michael Kerrisk
Add reference to mount_namespaces(7) under CLONE_NEWNS description

utimensat.2
  Michael Kerrisk [Rob Landley]
    Note that the glibc wrapper disallows pathname==NULL

wait.2
  Michael Kerrisk
    Since Linux 4.7, __WALL is implied if child being ptraced
  Michael Kerrisk
    waitid() now (since Linux 4.7) also supports __WNOTHREAD/__WCLONE/__WALL

assert.3
  Nikos Mavrogiannopoulos
    Improved description
      Removed text referring to text
 not being helpful to users. Provide
      the error text instead to allow the reader to determine whether it
      is helpful. Recommend against using NDEBUG for programs to
      exhibit deterministic behavior. Moved description ahead of
      recommendations.
  Michael Kerrisk
    Clarify details of message printed by assert()

fmax.3
fmin.3
  Michael Kerrisk
    SEE ALSO: add fdim(3)

getauxval.3
  Cownie, James H
    Correct AT_HWCAP result description

inet_pton.3
  Stefan Puiu
    Mention byte order

malloc_hook.3
  Michael Kerrisk
    glibc 2.24 removes __malloc_initialize_hook

memmem.3
  Michael Kerrisk [Shawn Landden]
    Note that memmem() is present on some other systems

mkdtemp.3
mktemp.3
  Michael Kerrisk
    SEE ALSO: add mktemp(1)

printf.3
  Michael Kerrisk [Shawn Landden]
    Note support in other C libraries for %m and %n

strcasecmp.3
  Michael Kerrisk [Ori Avtalion]
    Make details
 of strncasecmp() comparison clearer

strcat.3
  Michael Kerrisk
    Add a program that shows the performance characteristics of strcat()
      In honor of Joel Spolksy's visit to Munich, let's start educating
      Schlemiel The Painter.

strtoul.3
  Michael Kerrisk
    SEE ALSO: add a64l(3)

strxfrm.3
  Michael Kerrisk [Florian Weimer]
    Remove NOTES section
      strxfrm() and strncpy() are not precisely equivalent in the
      POSIX locale, so this NOTES section was not really correct.

      See https://bugzilla.kernel.org/show_bug.cgi?id=104221

console_codes.4
console_ioctl.4
tty.4
vcs.4
charsets.7
  Marko Myllynen
    Remove console(4) references
      0f9e647 removed the obsolete console(4) page but we still have few
      references to it. The patch below removes them or converts to refs
      to console_ioctl(4) where appropriate.

console_ioctl.4
  Michael Kerrisk [Chris Gassib]
    The argument
 to KDGETMODE is an 'int'

lirc.4
  Alec Leamas
    Update after upstreamed lirc.h, bugfixes.

st.4
  Kai Mäkisara
    Fix description of read() when block is larger than request
  Kai Mäkisara
    Update MTMKPART for kernels >= 4.6
      Update the description of the MTMKPART operation of MTIOCTOP to match
      the changes in kernel version 4.6.

charmap.5
  Marko Myllynen
    Clarify keyword syntax
      Updates charmap(5) to match the syntax all the glibc
      charmap files are using currently.

elf.5
  Michael Kerrisk
    SEE ALSO: add readelf(1)

locale.5
  Marko Myllynen
    Document missing keywords, minor updates
  Marko Myllynen
    Clarify keyword syntax
  Marko Myllynen
    Adjust conformance

proc.5
namespaces.7
  Michael Kerrisk
    Move /proc/PID/mounts information to proc(5)
      There was partial duplication, and some extra information
      in namespaces(7). Move everything
 to proc(5).

proc.5
  Michael Kerrisk
    /proc/PID/fd/* are governed by PTRACE_MODE_READ_FSCREDS
      Permission to dereference/readlink /proc/PID/fd/* symlinks is
      governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
  Michael Kerrisk
    /proc/PID/timerslack_ns is governed by PTRACE_MODE_ATTACH_FSCREDS
      Permission to access /proc/PID/timerslack_ns is governed by
      a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
  Michael Kerrisk
    Document /proc/PID/{maps,mem,pagemap} access mode checks
      Permission to access /proc/PID/{maps,pagemap} is governed by a
      PTRACE_MODE_READ_FSCREDS ptrace access mode check.

Permission to access /proc/PID/mem is governed by a
PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
Michael Kerrisk
Note /proc/PID/stat fields that are governed by PTRACE_MODE_READ_FSCREDS
Michael Kerrisk
/proc/PID/{cwd,exe,root} are
governed by PTRACE_MODE_READ_FSCREDS
Permission to dereference/readlink /proc/PID/{cwd,exe,root} is
governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/io is governed by PTRACE_MODE_READ_FSCREDS
Permission to access /proc/PID/io is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/{personality,stack,syscall} are governed by PTRACE_MODE_ATTACH_FSCREDS
Permission to access /proc/PID/{personality,stack,syscall} is
governed by a PTRACE_MODE_ATTACH_FSCREDS ptrace access mode check.
Michael Kerrisk
/proc/PID/{auxv,environ,wchan} are governed by PTRACE_MODE_READ_FSCREDS
Permission to access /proc/PID/{auxv,environ,wchan} is governed by
a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
Michael Kerrisk
Move shared subtree /proc/PID/mountinfo fields to mount_namespaces(7)
Move information on shared subtree fields in /proc/PID/mountinfo
to mount_namespaces(7).
Michael Kerrisk ["Yuming Ma()"]
Note that /proc/net is now virtualized per network namespace
Michael Kerrisk
Add references to mount_namespaces(7)

repertoiremap.5
Marko Myllynen
Clarify keyword syntax

utmp.5
Michael Kerrisk
SEE ALSO: add logname(1)

capabilities.7
Michael Kerrisk [Andy Lutomirski]
Note on SECURE_NO_CAP_AMBIENT_RAISE for capabilities-only environment
Michael Kerrisk
Add a detail on use of securebits

cgroup_namespaces.7
Michael Kerrisk
SEE ALSO: add namespaces(7)

cgroups.7
  Michael Kerrisk
    ERRORS: add mount(2) EBUSY error

cp1251.7
cp1252.7
iso_8859-1.7
iso_8859-15.7
iso_8859-5.7
koi8-r.7
koi8-u.7
  Marko Myllynen
    Add some charset references
      Add some references to related charsets here and there.

credentials.7
  Michael Kerrisk

   SEE ALSO: add runuser(1)
    SEE ALSO: add newgrp(1)
    SEE ALSO: add sudo(8)

feature_test_macros.7
  Michael Kerrisk
    Emphasize that applications should not directly include <features.h>

man-pages.7
  Michael Kerrisk
    Clarify which sections man-pages provides man pages for
  Michael Kerrisk [Josh Triplett]
    Add a few more details on formatting conventions
      Add some more details for Section 1 and 8 formatting.
      Separate out formatting discussion into commands, functions,
      and "general".

namespaces.7
  Michael Kerrisk
    /proc/PID/ns/* are governed by PTRACE_MODE_READ_FSCREDS
      Permission to dereference/readlink /proc/PID/ns/* symlinks is
      governed by a PTRACE_MODE_READ_FSCREDS ptrace access mode check.
  Michael Kerrisk
    Nowadays, file changes in /proc/PID/mounts are notified differently
      Exceptional condition for select(), (E)POLLPRI for (e)poll
  Michael Kerrisk
     Remove /proc/PID/mountstats description
      This is a duplicate of information in proc(5).
  Michael Kerrisk
    Refer to new mount_namespaces(7) for information on mount namespaces

netlink.7
  Andrey Vagin
    Describe netlink socket options
  Michael Kerrisk
    Rework version information
      (No changes in technical details.)

pid_namespaces.7
  Michael Kerrisk
    SEE ALSO: add namespaces(7)

unix.7
  Michael Kerrisk
    Move discussion on pathname socket permissions to DESCRIPTION
  Michael Kerrisk
    Expand discussion of socket permissions
  Michael Kerrisk
    Fix statement about permissions needed to connect to a UNIX domain socket
      Read permission is not required (verified by experiment).
  Michael Kerrisk
    Clarify ownership and permissions assigned during socket creation
  Michael Kerrisk [Carsten Grohmann]
    Update text on socket permissions on other systems
      At least
 some of the modern BSDs seem to check for write
      permission on a socket. (I tested OpenBSD 5.9.) On Solaris 10,
      some light testing suggested that write permission is still
      not checked on that system.
  Michael Kerrisk
    Note that umask / permissions have no effect for abstract sockets
  W. Trevor King
    Fix example code: 'ret' check after accept populates 'data_socket'
  Michael Kerrisk
    Move some abstract socket details to a separate subsection
  Michael Kerrisk
    Note that abstract sockets automatically disappear when FDs are closed

user_namespaces.7
  Michael Kerrisk [Micha Zegan]
    Clarify meaning of privilege in a user namespace
      Having privilege in a user NS only allows privileged
      operations on resources governed by that user NS. Many
      privileged operations relate to resources that have no
      association with any namespace type, and only processes

   with privilege in the initial user NS can perform those
      operations.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk [Micha Zegan]
List the mount operations permitted by CAP_SYS_ADMIN
List the mount operations permitted by CAP_SYS_ADMIN in a
noninitial userns.

See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk [Micha Zegan]
CAP_SYS_ADMIN allows mounting cgroup filesystems
See https://bugzilla.kernel.org/show_bug.cgi?id=120671
Michael Kerrisk
Clarify details of CAP_SYS_ADMIN and cgroup v1 mounts
With respect to cgroups version 1, CAP_SYS_ADMIN in the user
namespace allows only *named* hierarchies to be mounted (and
not hierarchies that have a controller).
Michael Kerrisk
Clarify CAP_SYS_ADMIN details for mounting FS_USERNS_MOUNT filesystems
Michael Kerrisk
Correct user namespace
rules for mounting /proc
Michael Kerrisk
Describe a concrete example of capability checking
Add a concrete example of how the kernel checks capabilities in
an associated user namespace when a process attempts a privileged
operation.
Michael Kerrisk
Correct kernel version where XFS added support for user namespaces
Linux 3.12, not 3.11.
Michael Kerrisk
SEE ALSO: add ptrace(2)
SEE ALSO: add cgroup_namespaces(7)

utf-8.7:
Shawn Landden
Include RFC 3629 and clarify endianness which is left ambiguous
The endianness is suggested by the order the bytes are displayed,
but the text is ambiguous.

========== Changes in man-pages-4.08 ==========

Released: 2016-10-08, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated
in changes in this release:

Arnaud Gaillard <arnaud.mgaillard@gmail.com>
Bill Pemberton <wfp5p@worldbroken.com>
Carlos O'Donell <carlos@redhat.com>
Christoph Hellwig <hch@lst.de>
David Turner <novalis@novalis.org>

Apologies if I missed anyone!

New and rewritten pages
---

quotactl.2
  Eugene Syromyatnikov [Michael Kerrisk]
    Updated information regarding disk quota flags
      Added information regarding DQF_SYS_FILE flag; updated definition
      of V1_DQF_RSQUASH, which has been defined privately and defined
      publicly as DQF_ROOT_SQUASH.
  Eugene Syromyatnikov
    Updated information regarding XFS-specific quotactl subcommands
      Added information regarding
 structure definitions used for
      XFS-specific subcommands, updated flag constants, added
      information regarding ignored syscall arguments, added notes on
      usage of kernel UAPI header.
  Eugene Syromyatnikov
    Additions regarding project quotas
      Added information regarding presence of project quotas.

bswap.3
  Michael Kerrisk
    New page documenting bswap_16(), bswap_32(), and bswap_64()

cgroups.7
  Michael Kerrisk
    Substantial rewrites, additions, and corrections.

Newly documented interfaces in existing pages
---

readv.2
  Michael Kerrisk
    Document the pwritev2() RWF_SYNC and RWF_DSYNC flags

proc.5
  Michael Kerrisk
    Document /proc/PID/seccomp
  Jann Horn
    Document /proc/[pid]/task/[tid]/children
      Document the /proc/[pid]/task/[tid]/children interface from
      CRIU, and more importantly, document why it's usually not

   a good interface.

New and changed links
---

bswap_16.3
bswap_32.3
bswap_64.3
    New link to new bswap.3

Global changes

Various pages
  Michael Kerrisk
    Fix section ordering
      Various pages had sections in an order different from
      that prescribed in man-pages(7).

Various pages
  Michael Kerrisk [Mike Frysinger]
    Consistently use /proc/[pid] (not /proc/PID)

Various pages
  Michael Kerrisk
    Fix order of SEE ALSO entries
      Entries should be ordered first by section, and then alphabetically
      within the section.

Various pages
  Michael Kerrisk
    Order ERRORS alphabetically

Various pages
  Michael Kerrisk
    Remove section number from page self reference
      Fix places where pages refer to the function that they describe
      and include a section number in that reference. Such references
      cause some HTML-rendering tools to create self-references
in the
      page.

A few pages
  Michael Kerrisk
    Eliminate groff "cannot adjust line" warnings

Changes to individual pages

---

pldd.1
  Michael Kerrisk [Carlos O'Donell]
    Note gdb(1) command that can be used as a replacement for pldd
      Taken from Carlos O'Donnell's suggestion in
      https://sourceware.org/bugzilla/show_bug.cgi?id=18035#c2
  Michael Kerrisk
    BUGS: pldd has not worked since glibc 2.19

accept.2
  Michael Kerrisk
    Mention epoll(7) alongside poll()/select()
  Michael Kerrisk
    Demote discussion of DECNet to NOTES
      DECNet ceased to be important long ago...

adjtimex.2
  Nikola Forró
    Fix kernel version references

chroot.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SYS_CHROOT

clone.2
  Keno Fischer [Josh Triplett]
    Adjust syscall prototype and expand CLONE_SETTLS description
  Michael Kerrisk [Josh Triplett,
 Josh Triplett]
    Document raw syscall interfaces on various other architectures
  Michael Kerrisk
    Change types for 'ptid' and 'ctid' in syscall prototypes
      These types changed from 'void *' to 'int *' back in Linux 3.8.
  Michael Kerrisk
    EINVAL is generated by glibc wrapper for NULL 'fn' or 'child_stack'
      Clarify that this error is produced by the wrapper function, not
      the underlying system call. In particular, the point is that the
      raw system call can accommodate a NULL pointer for 'child_stack'.
  Michael Kerrisk [Elliott Hughes]
    Make the implications of CLONE_FILES more explicit
      If CLONE_FILES is not set, the duplicated FDs nevertheless share
      file offset and status flags via the open file description.
  Michael Kerrisk
    Mention kcmp() under notes

close.2
  Michael Kerrisk

Add mention of the close-on-exec flag
Michael Kerrisk
Clarify discussion
noting that close() does not flush buffer cache

epoll_wait.2
Mike Crowe
Clarify that the timeout is measured against CLOCK_MONOTONIC

execve.2
Michael Kerrisk
Mention use of 'environ' to access environment list
Michael Kerrisk
Note that real UID, real GID, and supplementary GIDs are unchanged

fanotify_init.2
Heinrich Schuchardt
Update BUGS information

fcntl.2
Michael Kerrisk
Note an important detail of F_SETOWN permission rules for signals
F_SETOWN records the caller's credentials at the time of
the fcntl() call, and it is these saved credentials that
are used for subsequent permission checks.
Michael Kerrisk
Make the description of the effect of close-on-exec a little clearer
Michael Kerrisk
Clarify that F_GETFD and F_GETFL return flags via the function result

fork.2
Michael Kerrisk
PID of new process also does not match any existing session ID

fsync.2
Michael Kerrisk
SEE ALSO: add pwritev(2)
Since Linux 4.7, pwritev() has flags related to I/O
integrity completion.

getdomainname.2
Michael Kerrisk
Note user namespace requirements for CAP_SYS_ADMIN

getgroups.2
Michael Kerrisk
Note user namespace requirements for CAP_SETGID

gethostname.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SYS_ADMIN

getrlimit.2
  Michael Kerrisk
    Note user namespace semantics for CAP_SYS_RESOURCE

getsid.2
  Michael Kerrisk
    Rework description to be somewhat clearer
  Michael Kerrisk
    Correct the definition of "session ID"

getunwind.2
  Michael Kerrisk
    Simplify text referring to vdso(7)
      The detail given here is redundant, since this info is also
      in vdso(7).

kcmp.2
  Michael Kerrisk
    Add an example program

kill.2
  Michael Kerrisk
    Note the user namespace requirement for CAP_KILL

killpg.2
   Michael Kerrisk
    Refer reader to kill(2) for signal permission rules

mlock.2
  Sebastian Andrzej Siewior
    Document that fork() after mlock() may be a bad idea in a RT process

mmap.2
  Jann Horn
    Describe treatment of 'offset' for MAP_ANONYMOUS
  Michael Kerrisk [Siward de Groot]
    Small improvement to description of MAP_SHARED
      See https://sourceware.org/bugzilla/show_bug.cgi?id=6887

msgctl.2
msgget.2
msgop.2
semctl.2
semget.2

semop.2
shmctl.2
shmget.2
shmop.2
  Michael Kerrisk
    Note the user namespace requirements for CAP_IPC_OWNER

open.2
  Michael Kerrisk
    Clarify user namespace capability requirements for O_NOATIME
  Michael Kerrisk
    NOTES: kcmp() can be used to test if two FDs refer to the same OFD
  Michael Kerrisk
    F2FS support for O_TMPFILE was added in Linux 3.16
  Michael Kerrisk
    Clarify the rules about how the group ID of a new file is determined

prctl.2
  Michael Kerrisk

    Refer to proc(5) for effects of dumpability on ownership of /proc/PID/*
  Michael Kerrisk
    ERRORS: Add EACCES error for PR_SET_SECCOMP-SECCOMP_MODE_FILTER
  Michael Kerrisk
    Simplify list of cases where "dumpable" attribute is reset
  Michael Kerrisk
    Note user namespace requirements for PR_CAPBSET_DROP CAP_SETPCAP

readlink.2
  Michael Kerrisk [Ursache Vladimir]
    Make example program handle links that report a size of zero
      Some "magic" symlinks created by the kernel (e.g., those under
      /proc and /sys) report 'st_size' as zero. Modify the example
      program to handle that possibility.
  Michael Kerrisk
    Emphasize that truncation of returned buffer generates no error

readv.2
  Michael Kerrisk [Christoph Hellwig]
    Clarify that RWF_DSYNC and RWF_SYNC apply only to data being written
  Michael Kerrisk
    Add preadv2() and pwritev2() to NAME line

reboot.2
  Michael Kerrisk
    Note user
 namespace requirements around CAP_SYS_BOOT

rename.2
  Michael Kerrisk [Tim Savannah]
    Clarify that ERRORS may cause rename to fail (not to be nonatomic)

sched_setaffinity.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SYS_NICE

seccomp.2
  Michael Kerrisk
    CAP_SYS_ADMIN is required only in caller's user namespace

select_tut.2
  Peter Wu
    Fix various issues in example program

seteuid.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETUID and CAP_SETGID

setgid.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETGID

setpgid.2
  Michael Kerrisk
    Add a reference to credentials(7)

setpgid.2
setsid.2
  Michael Kerrisk
    Relocate some text on sessions and sessions leaders
      Some text that was in setpgid(2) is better placed in setsid(2).

setresuid.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETUID

setreuid.2
  Michael Kerrisk

   Note user namespace requirements for CAP_SETUID and CAP_SETGID

setsid.2
  Michael Kerrisk
    Refer to credentials(7) for details for details on controlling terminal
      Refer to credentials(7) for details of how a session obtains
      a controlling terminal.

set_thread_area.2
  Michael Kerrisk
    Add get_thread_area() to NAME

setuid.2
  Michael Kerrisk
    Note user namespace requirements for CAP_SETUID

sigprocmask.2
  Keno Fischer
    Expand/clarify libc/kernel sigset_t difference

stat.2
  Michael Kerrisk [Ursache Vladimir, Mats Wichmann]
    Improve discussion of 'st_size' for /proc and /sys files
  Michael Kerrisk
    _BSD_SOURCE and _SVID_SOURCE no longer expose nanosecond timestamps

umask.2
  Michael Kerrisk
    Provide a rationale for the existence of /proc/PID/status 'Umask' field

wait.2
  Michael Kerrisk
    Remove erroneous statement that waitpid() is implemented via wait4()
      There is a fallback
 to wait4(), but only if the kernel does
      not provide a waitpid() system call.

bindresvport.3
rcmd.3
ip.7
  Michael Kerrisk
    Note user namespace requirements for CAP_NET_BIND_SERVICE

byteorder.3
  Michael Kerrisk
    SEE ALSO: add bswap(3)

dlopen.3
  Michael Kerrisk
    dlmopen() is still broken in glibc 2.24

endian.3
  Michael Kerrisk
    SEE ALSO: add bswap(3)

ffs.3
  Michael Kerrisk [Stefan Tauner]
    Correct feature test macro requirements

fmemopen.3
  Michael Kerrisk [Rich Felker]
    Remove bogus suggestion to use setbuffer()

getlogin.3
  Michael Kerrisk
    Update feature test macro requirements for cuserid()

getumask.3
  Michael Kerrisk
    Note that getumask() is still unavailable in glibc 2.24
  Michael Kerrisk
    Point to umask(2) for a thread-safe way to discover process's umask

mkstemp.3
  Quentin Rameau
    Fix _POSIX_C_SOURCE value for mkstemp()
      The correct _POSIX_C_SOURCE
 value has always been 200809L,
      not 200112L.

pthread_join.3
  Michael Kerrisk [Mats Wichmann]
    Note that the caller might do clean up after joining with a thread
  Michael Kerrisk []
    Clarify use of 'retval' pointer

resolver.3
  Ray Bellis
    Correct arguments to res_ninit(res_state statep)

strverscmp.3
  Michael Kerrisk
    Add an example program

wcstombs.3
  Michael Kerrisk [Igor Liferenko]
    wcsrtombs() does not provide thread-safe interface to same functionality
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360

core.5
  Mike Frysinger [Michael Kerrisk]
    Add more details for output paths and the crash handler
      People sometimes assume that the crash handler runs in the same

context as the crashing process. They would be incorrect :).

proc.5
  Mike Frysinger
    Clarify the root symlink and mount namespaces
      If the target process is in a different
 mount namespace, the root
      symlink actually shows that view of the filesystem.
  Michael Kerrisk [Mike Frysinger]
    Expand discussion of /proc/[pid]/root
      Add a shell example showing that /proc/[pid]/root is more
      than a symlink. Based on an example provided by Mike Frysinger
      in an earlier commit message.
  Michael Kerrisk
    Explain rules determining ownership of /proc/PID/* files
      Describe the effect of the "dumpable" attribute on ownership
      of /proc/PID files.
  Michael Kerrisk
    Note effect of 'suid_dumpable' on ownership of /proc/PID files
  Michael Kerrisk
    Refer to ptrace(2) for info on effect of suid_dumpable on ptraceability
  Michael Kerrisk
    Add reference to core(5) in discussion of 'suid_dumpable'
  Michael Kerrisk
    Note that 'suid_dumpable' mode 1 is insecure
  Michael Kerrisk
    Document /proc/meminfo '+ShmemHugePages' and 'ShmemPmdMapped' fields

  Michael Kerrisk
    Document /proc/PID/status 'RssAnon', 'RssFile', and 'RssShmem' fields
  Michael Kerrisk
    Document /proc/PID/status 'HugetlbPages' field
  Michael Kerrisk [Zefram]
    Clarify that /proc/PID/statm 'shared' field counts *resident* pages
      See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=741360
  Michael Kerrisk
    Add reference to umask(2) in discussion of /proc/PID/status 'Umask'
  Michael Kerrisk
    Clarify user namespace requirements for /proc/sys/fs/protected_hardlinks
  Michael Kerrisk
    Note changes to config option governing /proc/[pid]/task/[tid]/children
  Michael Kerrisk
    Clarify description of /proc/PID/statm 'lib' and 'dt' fields
      These fields are always zero since Linux 2.6.
  Namhyung Kim [Petr Cermak]
    Add description of CLEAR_REFS_MM_HIWATER_RSS
  Michael Kerrisk
    Update example VM values in /proc/PID/status

capabilities.7
  Michael Kerrisk
    Add
 note about nosuid to file capabilities section
  Michael Kerrisk
    SEE ALSO: add proc(5)
  Michael Kerrisk
    SEE ALSO: add setsid(2) and setpgid(2)

glob.7
  Michael Kerrisk [Arnaud Gaillard]
    Clarify that syntactically incorrect patterns are left unchanged

packet.7
  Michael Kerrisk
    Clarify user namespace requirements for CAP_NET_RAW

pipe.7
  Michael Kerrisk [Patrick McLean]
    Document FIONREAD

raw.7
  Michael Kerrisk
    Clarify user namespace requirements for CAP_NET_RAW
      Also remove mention of UID 0 as a method or creating
      a raw socket. As far as I can tell from reading the
      kernel source (net/ipv4/af_inet.c), this is not true.

socket.7
  Michael Kerrisk
    SIOCSPGRP: refer to fcntl(2) F_SETOWN for correct permission rules
      The permission rules described for SIOCCPGRP are wrong. Rather
      than repeat the rules here, just refer the reader to fcntl(2),
      where
 the rules are described for F_SETOWN.

unix.7
  Michael Kerrisk [Laurent Georget, Ivan Kharpalev]
    Remove mention of recvmsg() from discussion of EPIPE error
      See https://bugzilla.kernel.org/show_bug.cgi?id=137351

ld.so.8
  Michael Kerrisk
    Expand description of LD_DEBUG
      Provide a list of the categories, and note that multiple
      categories can be specified.
  Michael Kerrisk

Add glibc version for LD_USE_LOAD_BIAS
Michael Kerrisk
Clarify text describing whether secure-mode programs preload libraries
Michael Kerrisk
Remove discussion of environment variables understood by libc5
libc5 disappeared long ago, so cease cluttering up this page
with those ancient details. Thus, remove discussion of the
following environment variables: LD_AOUT_LIBRARY_PATH,
LD_AOUT_PRELOAD, LD_KEEPDIR, LD_NOWARN, and LDD_ARGV0.
Michael Kerrisk
Remove text with ancient
libc4 and Linux libc details
Michael Kerrisk
Remove mention of "ELF only"
Drawing a distinction between ELF-only features versus a,out
ceased to be relevant long ago, so cluttering the page
with "ELF-only" serves no purpose.

========== Changes in man-pages-4.09 ==========

Released: 2016-12-12, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Wang Long <long.wanglong@huawei.com>
Willy Tarreau <w@1wt.eu>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

pkey_alloc.2
  Dave Hansen [Michael Kerrisk]
    New page documenting pkey_alloc(2) and pkey_free(2)

pthread_getattr_default_np.3
  Michael Kerrisk
    New page documenting pthread_getattr_default_np(3) and pthread_setattr_default_np(3)

strfromd.3
  Wainer dos Santos Moschetta
    New page documenting strfromd(3), strfromf(3), and strfroml(3)
      The ISO/IEC TS 18661-1 specifies the strfrom() class

of functions that convert a float-point value to string.

fuse.4
  Keno Fischer [Michael Kerrisk]
    New page describing /dev/fuse
      This is my writeup of a basic description of /dev/fuse after
      playing with it for a few hours today. It is of course
 woefully
      incomplete, and since I neither have a use case nor am working
      on this code, I will not be in a position to expand it in the
      near future. However, I'm hoping this could still serve as a
      handy reference for others looking at this interface.

      [mtk: Notwithstanding the incompleteness of this page,
      it's a good base for future extension.]

tmpfs.5
  Michael Kerrisk
    New page documenting the tmpfs filesystem

pkeys.7
  Dave Hansen [Michael Kerrisk]
    New page with overview of Memory Protection Keys

random.7
  Michael Kerrisk [Theodore Ts'o, Nikos Mavrogiannopoulos, Laurent Georget]
    New page providing an overview of interfaces for obtaining randomness
      Contains material extracted from getrandom(2) and random(4),
      as well as new material.

sock_diag.7
  Pavel Emelyanov, Dmitry V. Levin
    New page documenting NETLINK_SOCK_DIAG interface

close.2
getpriority.2
nice.2
timer_create.2
timerfd_create.2
random.4
elf.5
proc.5
sched.7
   Various authors
    These pages also saw substantial updates, as described under
    "Changes to individual pages".

Newly documented interfaces in existing pages
---

mmap.2
  Michael Kerrisk
    Add (much) more detail on MAP_GROWSDOWN

mprotect.2
  Dave Hansen
    Document the new pkey_mprotect() system call
  Eugene Syromyatnikov
    Document PROT_SEM, PROT_SAO, PROT_GROWSUP, and PROT_GROWSDOWN

prctl.2
  Eugene Syromyatnikov
    Document PR_SET_FP_MODE and PR_GET_FP_MODE

perf_event_open.2
  Vince Weaver
    PERF_RECORD_SWITCH support
      Linux 4.3 introduced two new record types for recording context
      switches: PERF_RECORD_SWITCH and PERF_RECORD_SWITCH_CPU_WIDE.
  Vince Weaver
    Add PERF_SAMPLE_BRANCH_CALL branch sample type
  Vince Weaver
    PERF_SAMPLE_BRANCH_IND_JUMP branch_sample_type
       Linux 4.2 added a new branch_sample_type: PERF_SAMPLE_BRANCH_IND_JUMP
  Vince Weaver
    Document PERF_RECORD_MISC_PROC_MAP_PARSE_TIMEOUT
  Vince Weaver
    Document sample_max_stack and /proc/sys/kernel/perf_event_max_stack
      Linux 4.8 added a new sample_max_stack parameter, as well as
      /proc/sys/kernel/perf_event_max_stack which limits it and a new
      EOVERFLOW error return.
  Dave Hansen
    PERF_RECORD_LOST_SAMPLES record type
      Linux 4.2 added a new record type: PERF_RECORD_LOST_SAMPLES
      It is generated when hardware samples (currently only Intel PEBS)
      are lost.

ptrace.2
  Michael Kerrisk
    Document PTRACE_SECCOMP_GET_FILTER
  Michael Kerrisk
    Document PTRACE_GET_THREAD_AREA and PTRACE_SET_THREAD_AREA

namespaces.7
  Michael Kerrisk [Eric W. Biederman]

Document the NS_GET_USERNS and NS_GET_PARENT ioctl() operations

sched.7
  Michael Kerrisk [Mike Galbraith]
    Document the autogroup feature
      Includes documenting autogroup nice value
  Michael Kerrisk
    Autogrouping breaks traditional semantics of nice in many cases
      When autogrouping is enabled (the default in many distros)
      there are many traditional use cases where the nice value
      ceases to have any effect.
  Michael Kerrisk
    Add a subsection on nice value and group scheduling

New and changed links
---

killpg.2
  Michael Kerrisk
    New link to relocated killpg(3) page

pkey_free.2
  Michael Kerrisk
    New link to new pkey_alloc(2) page

pkey_mprotect.2
  Michael Kerrisk
    New link to mprotect(2)

pthread_setattr_default_np.3
  Michael Kerrisk
    New link to new pthread_getattr_default_np.3

strfromf.3
  Wainer dos Santos Moschetta
    New link to strfromd(3)

strfroml.3
  Wainer dos Santos Moschetta
    New link to strfromd(3)

Global changes

Various

pages
  Michael Kerrisk
    Remove ancient libc4 and libc5 details
      It's nearly 20 years now since Linux libc went away.
      Remove some ancient details from the pages.

Various pages
  Michael Kerrisk
    Add cross references to new tmpfs(5) page

Various pages
  Michael Kerrisk
    Change section number from 2 to 3 in killpg() references

Changes to individual pages
---

accept.2
  Michael Kerrisk
    Remove editorializing comments about 'socklen_t'
  Michael Kerrisk
    Simplify the discussion of 'socklen_t'
      We don't really need to list the old OSes in this discussion.

adjtimex.2
clock_getres.2
gettimeofday.2
  Michael Kerrisk
    SEE ALSO: add hwclock(8)

bind.2
connect.2
getpeername.2
getsockname.2
getsockopt.2
  Michael Kerrisk
    Replace discussion of 'socklen_t' with reference to accept(2)
      The discussion of 'socklen_t' editorializes and is repeated

   across several pages. Replace it with a reference to accept(2),
      where some details about this type are provided.

chmod.2
  Michael Kerrisk
    SEE ALSO: add chmod(1)

chown.2

Michael Kerrisk
SEE ALSO: add chgrp(1) and chown(1)

chroot.2
Michael Kerrisk
SEE ALSO: add chroot(1)

clone.2
Michael Kerrisk
The CLONE_*_SETTID operations store TID before return to user space
CLONE_PARENT_SETTID and CLONE_CHILD_SETTID store the new
TID before clone() returns to user space

close.2
Michael Kerrisk [Daniel Wagner]
Rework and greatly extend discussion of error handling
Further clarify that an error return should be used only
for diagnostic or remedial purposes.
Michael Kerrisk
Other UNIX implementations also close the FD, even if reporting an error
Looking at some historical source code suggests
that the "close() always closes regardless of error
return"
behavior has a long history, predating even POSIX.1-1990.
Michael Kerrisk
Note that future POSIX plans to require that the FD is closed on error
See http://austingroupbugs.net/view.php?id=529#c1200.
Michael Kerrisk
Clarify the variation in EINTR behavior per POSIX and other systems

fallocate.2
Darrick J. Wong
Document behavior with shared blocks
Note that FALLOC_FL_UNSHARE may use CoW to unshare blocks to
guarantee that a disk write won't fail with ENOSPC.

fanotify_mark.2
Heinrich Schuchardt
Mention FAN_Q_OVERFLOW
To receive overflow events it is necessary to set this bit
in fanotify_mark().

fcntl.2
Michael Kerrisk
F_GETPIPE_SZ allocates next power-of-2 multiple of requested size
Add some detail about current implementation, since this helps
the user understand the effect of the user pipe limits added in
Linux

4.5 (described in pipe(7)).
  Michael Kerrisk
    Add EPERM that occurs for F_SETPIPE_SZ when user pipe limit is reached

fideduperange.2
  Darrick J. Wong [Omar Sandoval]
    Fix the discussion of maximum sizes
      Fix the discussion of the limitations on the dest_count and
      src_length parameters to the fideduperange ioctl() to reflect
      what's actually in the kernel.

fsync.2
  Michael Kerrisk
    SEE ALSO: add fileno(3)
      fileno(3) is useful if one is combining fflush(3)/fclose(3)
      and fsync(2).
  Michael Kerrisk
    SEE ALSO: add fflush(3)

getgroups.2
  Andrew Clayton
    FTM requirements fix for setgroups(2)

gethostname.2
  Michael Kerrisk
    SEE ALSO: add hostname(1)

get_mempolicy.2
  Michael Kerrisk
    Note that 'addr' must be NULL when 'flags' is 0

getpriority.2
  Michael Kerrisk
    Warn that autogrouping voids the effect of 'nice' in many cases
      Refer the reader
 to sched(7) for the details.
  Michael Kerrisk
    Expand discussion of getpriority() return value
  Michael Kerrisk
    The nice value supplied to setpriority() is clamped
      Note that the nice value supplied to setpriority() is clamped
      to the permitted range.
  Michael Kerrisk
    Improve description of setpriority() return value

getpriority.2
sched.7
  Michael Kerrisk

Move nice value details from getpriority(2) to sched(7)
Centralizing these details in sched(7) is more logical.

getrandom.2
random.4
Michael Kerrisk
Consolidate and improve discussion on usage of randomness
Currently, recommendations on how to consume randomness are
spread across both getrandom(2) and random(4) and the general
opinion seems to be that the text in getrandom(2) does a
somewhat better job. Consolidate the discussion to a single
page (getrandom(2)) and address some of the
concerns
expressed about the existing text in random(4).
[Some of this text ultimately made its way into the new
random(7) page.]

getrandom.2
Michael Kerrisk
Remove material incorporated into random(7)
Michael Kerrisk
Note advantages of fact that getrandom() doesn't use file descriptors
Michael Kerrisk
Clarify that getrandom() is not "reading" from /dev/{random,urandom}

getrlimit.2
Michael Kerrisk
Refer to sched(7) in discussion of RLIMIT_RTPRIO and RLIMIT_RTTIME
Michael Kerrisk
Describe the range of the RLIMIT_NICE limit
Michael Kerrisk
Refer to sched(7) in the discussion of RLIMIT_NICE
Michael Kerrisk
SEE ALSO: add credentials(7)

ioctl_ficlonerange.2
ioctl_fideduperange.2
Darrick J. Wong
Clarify the behavior of the FIDEDUPERANGE ioctl

kill.2
Michael Kerrisk
SEE ALSO: add kill(1)

mbind.2
Michael Kerrisk [Christoph Lameter]

Memory policy is a per-thread attribute, not a per-process attribute

mbind.2
set_mempolicy.2
Piotr Kwapulinski [Christoph Lameter, Michael Kerrisk]
Add MPOL_LOCAL NUMA memory policy documentation

mount.2
Michael Kerrisk
SEE ALSO: add mountpoint(1)

mprotect.2
Michael Kerrisk
CONFORMING TO: note that pkey_mprotect() is Linux-specific

nice.2
Michael Kerrisk
Warn that autogrouping voids the effect of 'nice' in many cases
Michael Kerrisk
CONFORMING TO: Remove an ancient SVr4 detail on errno values
Michael Kerrisk
Rework discussion of nice() return value and standards conformance
Make the text a little clearer. In particular, clarify that the
raw system call (still) returns 0 on success.
Michael Kerrisk
Clarify the range of the nice value, and note that it is clamped
Michael Kerrisk
Add mention of RLIMIT_NICE
Michael Kerrisk
Move discussion of handling the
-1 success return to RETURN VALUE
This detail was rather hidden in NOTES. Also, rework the text
a little.
Michael Kerrisk
Clarify that nice() changes the nice value of the calling *thread*
Michael Kerrisk
Add "C library/kernel differences" subsection heading
Michael Kerrisk
Add reference to sched(7) for further details on the nice value

open.2
Michael Kerrisk
ubifs supports O_TMPFILE starting with Linux 4.9
Michael Kerrisk
Document ENOMEM that occurs when opening FIFO because of pipe hard limit

perf_event_open.2
Vince Weaver

Add cycles field in LBR records
Linux 4.3 added a cycles field to the PERF_SAMPLE_BRANCH_STACK
last branch records.
Vince Weaver
Update time_shift sample code
Linux 4.3 improved the accuracy of the clock/ns conversion routines.
Michael Kerrisk
Clarify the use of signals for capturing overflow events

pipe.2
Michael Kerrisk
Add ENFILE error for user pipe hard limit reached

prctl.2
Eugene Syromyatnikov
Some additional details regarding the PR_GET_UNALIGNED operation
Eugene Syromyatnikov
Note the output buffer size for PR_GET_TID_ADDRESS operation on x32/n32
Michael Kerrisk
Remove numeric definitions of PR_FP_MODE_FR and PR_FP_MODE_FRE bits

ptrace.2
Keno Fischer
Document the behavior of PTRACE_SYSEMU stops
Keno Fischer
Expand documentation PTRACE_EVENT_SECCOMP traps
In Linux 4.8, the order of PTRACE_EVENT_SECCOMP and
syscall-entry-stops was reversed. Document both behaviors and
their interaction with the various forms of restart.

quotactl.2
Eugene Syromyatnikov
Describe Q_XQUOTASYNC, which is present but no-op in recent kernels

reboot.2
Wang Long
Note errors for invalid commands inside a PID namespace

sched_setattr.2
Michael Kerrisk
Fix cross reference
for further info on the nice value
The information moved from getpriority(2) to sched(7).

sched_setscheduler.2
Michael Kerrisk [Daniel Berrange]
Mention SCHED_DEADLINE
Give the reader a clue that there is another policy

available that can't be set via sched_setscheduler(2).

seccomp.2
  Jann Horn
    Document changed interaction with ptrace
      Before kernel 4.8, the seccomp check will not be run again
      after the tracer is notified. Fixed in kernel 4.9.
  Michael Kerrisk
    NOTES: mention ptrace(PTRACE_SECCOMP_GET_FILTER) to dump seccomp filters

set_mempolicy.2
  Michael Kerrisk
    Reformat list of modes

setsid.2
  Michael Kerrisk
    Improve wording of text on calling setsid() after fork()+_exit()
  Michael Kerrisk
    SEE ALSO: add sched(7)
      List sched(7), because setsid(2) is part of the machinery
      of autogrouping.

sigaction.2
  Dave Hansen

 Further documentation of SEGV_PKUERR

signalfd.2
  Michael Kerrisk
    Document ssi_addr_lsb field of signalfd_siginfo

symlink.2
  Michael Kerrisk
    SEE ALSO: add namei(1)

sync_file_range.2
  Michael Kerrisk
    Fix description for ESPIPE error
      A file descriptor can't refer to a symbolic link.

syscalls.2
  Michael Kerrisk
    Add pkey_alloc(), pkey_free(), and pkey_mprotect()
      New system calls in Linux 4.9.
  Michael Kerrisk
    Add ppc_swapcontext(2)

timer_create.2

Michael Kerrisk
Document CLOCK_BOOTTIME
Michael Kerrisk
Document CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

timerfd_create.2
Michael Kerrisk
Document CLOCK_BOOTTIME, CLOCK_REALTIME_ALARM, and CLOCK_BOOTTIME_ALARM
Michael Kerrisk
Document TFD_TIMER_CANCEL_ON_SET
Michael Kerrisk
Rework discussion on relative and absolute timers

unlink.2
Michael Kerrisk
SEE ALSO: add unlink(2)

utime.2
utimensat.2
Michael Kerrisk
SEE ALSO: add touch(1)

wait.2
Michael Kerrisk
On some architectures, waitpid() is a wrapper that calls wait4().

atof.3
Wainer dos Santos Moschetta
SEE ALSO: add strfromd(3)

ctime.3
Michael Kerrisk
Add ERRORS section
Michael Kerrisk
RETURN VALUE: describe return values more explicitly

errno.3
Michael Kerrisk [Igor Liferenko]
Add glibc error text for EILSEQ

fclose.3
fflush.3
Michael Kerrisk
SEE ALSO: add fileno(2)

getlogin.3
Michael Kerrisk
Remove deprecated _REENTRANT from FTM requirements for getlogin_r()

Michael Kerrisk
SEE ALSO: add logname(1)

isalpha.3
Michael Kerrisk
Note circumstances where 'c' must be cast to 'unsigned char'

killpg.3
Michael Kerrisk
Move killpg.2 from section to section 3

mallopt.3
Michael Kerrisk [Siddhesh Poyarekar]
Document 0 as default value of M_ARENA_MAX and explain its meaning
Michael
Kerrisk
Improve description of M_ARENA_TEST
Michael Kerrisk
Document default value for M_ARENA_TEST
Michael Kerrisk
Note default value of M_PERTURB

mbsnrtowcs.3
Michael Kerrisk [Igor Liferenko]
Note behavior of mbsnrtowcs() for an incomplete character
Note the behavior of mbsnrtowcs() when an incomplete character
is found at end of the input buffer.

mbstowcs.3
wcstombs.3
Michael Kerrisk [Igor Liferenko]
Improve language relating to "initial state"
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=839705

mbstowcs.3
Michael Kerrisk [Igor Liferenko]
Add missing include to example program
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=845172

mq_close.3
Michael Kerrisk
DESCRIPTION: add reference to mq_notify(3)

mq_open.3
Eugene Syromyatnikov
Clarification regarding usage of mq_flags attribute in mq_open()

mq_receive.3

mq_send.3
  Eugene Syromyatnikov
    Clarification regarding reasons behind EBADF

printf.3
  Wainer dos Santos Moschetta
    SEE ALSO: add strfromd(3)

pthread_attr_init.3
  Michael Kerrisk
    SEE ALSO: add pthread_setattr_default_np(3)

pthread_create.3
  Michael Kerrisk
    SEE ALSO: add pthread_setattr_default_np(3)

ptsname.3
  Michael Kerrisk
    Note that ptsname_r() is proposed for future inclusion in POSIX.1
  Michael Kerrisk
    CONFORMING TO:: clarify that only ptsname() is standardized (so far)

remainder.3
  Michael Kerrisk
    Note fix to remainder(nan(""), 0) handling
      The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6779
      has been fixed in glibc 2.15.
  Michael Kerrisk
    Document fixes for EDOM handling for range errors
      The bug http://sources.redhat.com/bugzilla/show_bug.cgi?id=6783
      was fixed in glibc 2.15.

setjmp.3
  Michael Kerrisk
    _BSD_SOURCE must be *explicitly*
 defined to get BSD setjmp() semantics

strtod.3
  Wainer dos Santos Moschetta
    SEE ALSO: add strfromd(3)

tgamma.3
  Michael Kerrisk
    Document fixes to give ERANGE for underflow range error
      The bug https://www.sourceware.org/bugzilla/show_bug.cgi?id=6810
      was fixed in glibc 2.19.

timegm.3

Michael Kerrisk
Add ERRORS section
Michael Kerrisk [Vincent Lefevre]
Add RETURN VALUE section

tmpnam.3
Michael Kerrisk
Properly document tmpnam_r(3)

toupper.3
Michael Kerrisk
Note circumstances where 'c' must be cast to 'unsigned char'

ttyname.3
Michael Kerrisk
SEE ALSO: add tty(1)

console_ioctl.4
Michael Kerrisk
Add brief descriptive text for KDGKBMODE modes
Miroslav Koskar
Add K_OFF keyboard mode

random.4
Michael Kerrisk
Add reference to new random(7) page
Michael Kerrisk
Rework formatting of /proc interfaces
Make the information
easier to parse by formatting the file
descriptions as hanging lists. No significant content changes.
Nikos Mavrogiannopoulos [Laurent Georget]
Provide a more accurate description of /dev/urandom
This documents the "property" of /dev/urandom of being able to
serve numbers prior to pool being initialized, and removes any
suggested usages of /dev/random which are disputable
(i.e., one-time pad). Document the fact /dev/random is only
suitable for applications which can afford indeterminate delays
since very few applications can do so. Smooth the alarming
language about a theoretical attack, and mention that its
security depends on the cryptographic primitives used by the
kernel, as well as the total entropy gathered.
Michael Kerrisk [Laurent Georget, Theodore Ts'o]
Improve discussion of /dev/urandom, blocking reads, and signals
The
text currently states that O_NONBLOCK has no effect for
/dev/urandom, which is true. It also says that reads from
/dev/urandom are nonblocking. This is at the least confusing.

If one attempts large reads (say 10MB) from /dev/urandom
there is an appreciable delay, and interruption by a signal
handler will result in a short read. Amend the text to
reflect this.

elf.5
Mike Frysinger
Add subsection headers at major points
The current pages dumps all the content into one big DESCRIPTION
with no real visual break up between logically independent
sections. Add some subsection headers to make it easier to
read and scan.
Mike Frysinger
Document notes
Document the Elf{32,64}_Nhdr structure, the sections/segments that
contain notes, and how to interpret them. I've been lazy and only
included the GNU extensions here,
especially as others are not
defined in the elf.h header file as shipped by glibc.

filesystems.5
Michael Kerrisk
SEE ALSO: add fuse(4)

proc.5
Dave Hansen
Describe new ProtectionKey 'smaps' field
Michael Kerrisk
Add example ProtectionKey output for 'smaps' file
Michael Kerrisk
Add pointers to sched(7) for autogroup files
sched(7) describes /proc/sys/kernel/sched_autogroup_enabled
and /proc/PID/autogroup.
Michael Kerrisk
Add /proc/sys/fs/pipe-user-pages-{hard,soft} entries
Michael Kerrisk
Improve description of the KernelPageSize and MMUPageSize 'smaps' fields
Michael Kerrisk
Rework 'smaps' ProtectionKey text and add some details
Michael Kerrisk
Mention lslocks(8) in discussion of /proc/locks
Michael Kerrisk
Describe Shmem field of /proc/meminfo
Michael Kerrisk
Rework 'smaps' VmFlags text, and add kernel version and example output

proc.5
pipe.7

Michael Kerrisk
Move /proc/sys/fs/pipe-max-size content from proc(5) to pipe(7)

resolv.conf.5
Carlos O'Donell [Florian Weimer]
Timeout does not map to resolver API calls

utmp.5
Michael Kerrisk
SEE ALSO: add users(1)

capabilities.7
Michael Kerrisk
CAP_SYS_ADMIN governs ptrace(2) PTRACE_SECCOMP_GET_FILTER
Michael Kerrisk
CAP_SYS_ADMIN allows privileged ioctl() operations on /dev/random

cgroups.7
Michael Kerrisk
Add details on 'cpu' CFS bandwidth control

credentials.7
Michael Kerrisk
SEE ALSO: add setpriv(1)
Michael Kerrisk
SEE ALSO: add shadow(5)

feature_test_macros.7
Michael Kerrisk [Zack Weinberg]
Note that _REENTRANT and _THREAD_SAFE are now deprecated
Michael Kerrisk
Note that "cc -pthread" defines _REENTRANT

inotify.7
Michael Kerrisk
Note a subtlety of event generation when monitoring a directory

libc.7
Michael Kerrisk

Add a note on why glibc 2.x uses the soname libc.so.6
Michael Kerrisk
Add a few historical details on Linux libc4 and libc5
Just for historical interest. Details taken from
http://www.linux-m68k.org/faq/glibcinfo.html.

mdoc.7
Michael Kerrisk

Add a cross-reference to groff_mdoc(7)

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add user_namespaces(7)

mount_namespaces.7
user_namespaces.7
Michael Kerrisk
Migrate subsection on mount restrictions to mount_namespaces(7)
This section material in the user_namespaces(7) page was written
before the creation of the mount_namespaces(7) manual page.
Nowadays, this material properly belongs in the newer page.

netlink.7
Dmitry V. Levin
Document NETLINK_INET_DIAG rename to NETLINK_SOCK_DIAG
Dmitry V. Levin
Add references to sock_diag(7)

pid_namespaces.7
Michael Kerrisk
Refer to namespaces(7) for information
about NS_GET_PARENT

pipe.7
Michael Kerrisk, Vegard Nossum [Vegard Nossum]
Document /proc files controlling memory usage by pipes
Document /proc/sys/fs/pipe-max-size and
/proc/sys/fs/pipe-user-pages-{soft,hard}.
Michael Kerrisk
Document pre-Linux 4.9 bugs in pipe limit checking

sched.7
Michael Kerrisk
Add a new introductory paragraph describing the nice value
Michael Kerrisk
Add more precise details on CFS's treatment of the nice value
Michael Kerrisk
Mention RLIMIT_NICE in the discussion of the nice value
Michael Kerrisk
NOTES: mention cgroups CPU controller
Michael Kerrisk
Add introductory sentence mentioning CFS scheduler
Michael Kerrisk
Add nice(2), getpriority(2), and setpriority(2) to API list
Michael Kerrisk
Make it clearer that SCHED_OTHER is always scheduled below real-time

Michael Kerrisk
Give the page a more generic NAME

The page isn't just about APIs.

standards.7
Michael Kerrisk
POSIX.1-2016 (POSIX.1-2008 TC2) has now been released

symlink.7
Michael Kerrisk
SEE ALSO: add namei(1)

uri.7
Jakub Wilk
Use "example.com" as example domain

user_namespaces.7
Michael Kerrisk
Add reference to namespaces(7) for NS_GET_USERNS operation
Michael Kerrisk
Add reference to namespaces(7) for NS_GET_PARENT operation

========== Changes in man-pages-4.10 ==========

Released: 2017-03-13, Paris

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

add_key.2
  Michael Kerrisk [Eugene Syromyatnikov, David Howells]
    Major improvements and additions
      The page has doubled in length.

ioctl_iflags.2
  Michael Kerrisk
    New page describing inode flags and ioctl() operations

ioctl_ns.2
  Michael Kerrisk
    New page created by splitting ioctl(2) operations out of namespaces(7)

keyctl.2
  Michael Kerrisk, Eugene Syromyatnikov [David Howells, Mat Martineau]
    A vast number of additions and improvements
      The
page has gone from somewhat over 100 lines to well over
      1000 lines and now more or less documents the complete interface
      provided by this system call.

getentropy.3
  Michael Kerrisk
    New page documenting getentropy(3)
      getentropy(3) is added to glibc in version 2.25.

keyrings.7
  David Howells
    New page (written by David Howells) adopted from keyutils
      Since this page documents kernel-user-space interfaces,
      it makes sense to have it as part of man-pages, rather
      than the keyutils package.
  Michael Kerrisk [Eugene Syromyatnikov, David Howells]
    Very many additions and improvements
  Michael Kerrisk
    Document /proc/keys
  Michael Kerrisk
    Document /proc/sys/kernel/keys/persistent_keyring_expiry
  Michael Kerrisk
    Document /proc/key-users
  Michael Kerrisk
    Document /proc/sys/kernel/keys/gc_delay
  Michael Kerrisk
    Document /proc files that define
key quotas

persistent-keyring.7
  Michael Kerrisk
    New page (written by David Howells) adopted from keyutils
      Since this page documents kernel-user-space interfaces,
      it makes sense to have it as part of man-pages, rather
      than the keyutils package.
  Michael Kerrisk
    Various clean-ups and additions

process-keyring.7

Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various additions and improvements

request_key.2
Michael Kerrisk, Eugene Syromyatnikov [David Howells]
Very many additions and improvements
The page is now three times its former length.

session-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since
this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various reworking and additions

signal-safety.7
Michael Kerrisk
New page created by migrating the signal-safety discussion from
signal(7). Along the way some more details got added.
Michael Kerrisk [KASAKI Motohiro]
Note async-signal-safety problems caused by pthread_atfork()
See https://bugzilla.kernel.org/show_bug.cgi?id=25292
Michael Kerrisk [KASAKI Motohiro]
Note glibc deviations from POSIX requirements
See https://bugzilla.kernel.org/show_bug.cgi?id=25292

thread-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various rewordings and additions

user-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather

than the keyutils package.
Michael Kerrisk
Various reworking and improvements

user-session-keyring.7
Michael Kerrisk
New page (written by David Howells) adopted from keyutils
Since this page documents kernel-user-space interfaces,
it makes sense to have it as part of man-pages, rather
than the keyutils package.
Michael Kerrisk
Various rewordings and additions

Newly documented interfaces in existing pages
---

bzero.3
Michael Kerrisk
Document explicit_bzero() (new in glibc 2.25)
Also, reword the description of bzero somewhat.

proc.5
Michael
Kerrisk
Document /proc/sys/vm/user_reserve_kbytes
Michael Kerrisk
Document /proc/sys/vm/admin_reserve_kbytes
Michael Kerrisk
Document /proc/sys/fs/mount-max
Michael Kerrisk
Document /proc/PID/status 'NoNewPrivs' field

New and changed links
---

explicit_bzero.3
Michael Kerrisk
New link to bzero.3

Changes to individual pages
---

chmod.2
Michael Kerrisk
ERRORS: add EPERM error for immutable/append-only file

chown.2
  Michael Kerrisk
    ERRORS: add EPERM error for immutable/append-only file

chroot.2
  Michael Kerrisk
    SEE ALSO: add switch_root(8)

clock_getres.2
  Michael Kerrisk
    Note POSIX.1 requirements re relative time services and CLOCK_REALTIME

clone.2
  Michael Kerrisk
    clone() does not execute fork handlers

execve.2
  Michael Kerrisk
    Rework text describing when effective IDs aren't transformed by execve()
  Michael
 Kerrisk
    File capabilities can be ignored for the same reasons as set-UID/set-GID
  Michael Kerrisk
    The 'no_new_privs' bit inhibits transformations of the effective IDs

fork.2
  Michael Kerrisk
    cgroup PIDs controller may also be trigger for EAGAIN error

fsync.2
  Michael Kerrisk
    SEE ALSO: add posix_fadvise(2)

getrandom.2
  Michael Kerrisk
    Remove getentropy(3) details and defer to new getentropy(3) page
  Michael Kerrisk
    Starting with glibc 2.25, getrandom() is now declared in <sys/random.h>
  Michael Kerrisk
    glibc support was added in version 2.25

getrlimit.2
  Michael Kerrisk
    Document role of RLIMIT_NOFILE for FD passing over UNIX sockets

getxattr.2
listxattr.2

Andreas Gruenbacher
Document E2BIG errors

inotify_add_watch.2
Michael Kerrisk
Note "inode" as a synonym for "filesystem object"
Consistent with clarifications just made in inotify(7).

ioctl.2
Michael Kerrisk
SEE ALSO: add ioctl_ns(2), ioctl_iflags(2)

ioctl_fat.2
Brian Masney
Correctly reference volume ID instead of volume label

kcmp.2
Michael Kerrisk
Mention the clone(2) flags relating to various kcmp() 'type' values
Michael Kerrisk
KCMP_FILE: note reasons why FDs may refer to same open file description

link.2
Michael Kerrisk
When using linkat() AT_EMPTY_PATH, 'olddirfd' must not be a directory
Michael Kerrisk
ERRORS: add EPERM for immutable/append-only files
Michael Kerrisk
Note limits where EMLINK is encountered on ext4 and Btrfs

listxattr.2
Michael Kerrisk
Eliminate extra E2BIG error text
Andreas' patch added a second description of E2BIG that
was (mostly) more detailed than the existing text. Combine
the two texts.

lseek.2
Michael Kerrisk
O_APPEND overrides the effect of lseek() when doing file writes
Michael Kerrisk
Remove ancient
info about whence values and return values on old systems
Michael Kerrisk
Remove slightly bogus advice about race conditions
The page already (by now) contains a reference to open(2)
for a discussion of open file descriptions. Leave it at that,
since the reader can then deduce how things work.

madvise.2
  Michael Kerrisk
    Note that madvise() is generally about improving performance

mbind.2
  Krzysztof Kulakowski [Michael Kerrisk]
    Update MPOL_BIND description
      The behavior of MPOL_BIND changed in Linux 2.6.26.

mincore.2
  Michael Kerrisk
    SEE ALSO: add madvise(2), posix_fadvise(2), posix_madvise(3)

mlock.2
  Michael Kerrisk
    Note pre-4.9 bug in RLIMIT_MEMLOCK accounting for overlapping locks
  Michael Kerrisk
    SEE ALSO: add mincore(2)

mmap.2
  Michael Kerrisk
    mincore(2) can be used to discover which pages of a mapping are resident

mount.2
  Michael Kerrisk [Rob
 Landley]
    Refer to mount_namespaces(7) for details of default propagation type

nanosleep.2
  Michael Kerrisk
    Describe "creeping sleep" problem
      nanosleep() has a problem if used in a program that catches
      signals and those signals are delivered at a very high rate.
      Describe the problem, and note that clock_nanosleep(2)
      provides a solution.
  Michael Kerrisk
    BUGS: explicitly note that the Linux 2.4 bug was fixed in Linux 2.6

open.2
  Michael Kerrisk
    Make it clear that O_APPEND implies atomicity
  Michael Kerrisk
    Clarify distinction between file creation flags and file status flags
  Michael Kerrisk
    Note ambiguity of ELOOP error when using O_NOFOLLOW
  Michael Kerrisk
    Restructure O_NOFOLLOW text for easier parsing

Michael Kerrisk
Clarify that O_NOFOLLOW is now in POSIX

poll.2
select.2
Nicolas Biscos
Add a reference to the sigset discussion in sigprocmask(2)
A little while back, I added a note to sigprocmask.2 that discussed the difference between the libc's and the kernel's sigset_t structures. I added that note, because I saw this being done wrong in a tool tracing system calls (causing subtle bugs). As it turns out, the same bugs existed for ppoll and pselect, for the same reason. I'm hoping by adding the reference here, future writers of similar tools will find that discussion and not make the same mistake.

posix_fadvise.2
Michael Kerrisk
Mention /proc/sys/vm/drop_caches
It may be helpful for the reader of this page to know about /proc/sys/vm/drop_caches.
Michael Kerrisk
Reorganize some text
Details for various flags were hidden under NOTES.
Move them to DESCRIPTION, to make the details more obvious.
Michael Kerrisk
One can use open(2)
+ mmap(2) + mincore(2) as a 'fincore'
Note that open(2) + mmap(2) + mincore(2) can be used to get a view of which pages of a file are currently cached.
Michael Kerrisk [Maik Zumstrull]
Note that POSIX_FADV_DONTNEED *may* try to write back dirty pages
Michael Kerrisk
SEE ALSO: mincore(2)

prctl.2
Michael Kerrisk
Clarify that the ambient capability set is per-thread
Keno Fischer
Be more precise in what causes dumpable to reset
Michael Kerrisk
The no_new_privs setting is per-thread (not per-process)
Michael Kerrisk
Mention /proc/PID/status 'NoNewPrivs' field
Michael Kerrisk
Add reference to seccomp(2) in discussion of PR_SET_NO_NEW_PRIVS

ptrace.2
  Omar Sandoval
    Clarify description of PTRACE_O_EXITKILL

read.2
  Michael Kerrisk [Kai NODA]
    Rework text in DESCRIPTION that talks about limits for 'count'
      See https://bugzilla.kernel.org/show_bug.cgi?id=86061
   Michael Kerrisk [Steven Luo]
    Remove crufty text about EINTR and partial read
      Remove bogus text saying that POSIX permits partial read
      to return -1/EINTR on interrupt by a signal handler.
      That statement already ceased to be true in SUSv1 (1995)!

      See https://bugzilla.kernel.org/show_bug.cgi?id=193111

readv.2
  Michael Kerrisk
    Remove generic advice about mixing stdio and syscalls on same file
      There is nothing specific to readv()/writev() about this advice.

recv.2
  Michael Kerrisk [Vincent Bernat]
    Remove duplicate paragraph
      man-pages-1.34 included changes that duplicated an existing
      paragraph. Remove that duplicate.
  Michael Kerrisk
    SEE ALSO: add ip(7), ipv6(7), tcp(7), udp(7), unix(7)

remap_file_pages.2
  Michael Kerrisk
    remap_file_pages() has been replaced by a slower in-kernel emulation

send.2
  Michael Kerrisk
    SEE ALSO: add ipv6(7),
 socket(7), unix(7)

setxattr.2
  Michael Kerrisk
    ERRORS: add EPERM for immutable/append-only files

signalfd.2
  Michael Kerrisk
    signalfd() doesn't play well with helper programs spawned by libraries
      See https://lwn.net/Articles/415684/.
  Michael Kerrisk
    signalfd can't be used to receive synchronously generated signals

Signals such as the SIGSEGV that results from an invalid
memory access can be caught only with a handler.

stat.2
Michael Kerrisk
EXAMPLE: extend program to also show ID of the containing device
Michael Kerrisk
NOTES: mention fstatat() AT_NO_AUTOMOUNT in discussion of automounting

statfs.2
Namhyung Kim
Add more filesystem types
Add missing magic numbers from /usr/include/linux/magic.h

syscall.2
Mike Frysinger
Add endian details with 64-bit splitting
Architectures that split 64-bit values across register pairs
usually
do so according to their C ABI calling convention (which
means endianness). Add some notes to that effect, and change the
readahead example to show a little endian example (since that is
way more common than big endian).

Also start a new list of syscalls that this issue does not apply
to.
Mike Frysinger
Note parisc handling of aligned register pairs
While parisc would normally have the same behavior as ARM/PowerPC,
they decide to write shim syscall stubs to unpack/realign rather
than expose the padding to userspace.

tkill.2
Jann Horn
Document EAGAIN error for real-time signals

truncate.2
Michael Kerrisk
Note use of ftruncate() for POSIX shared memory objects

unlink.2
Michael Kerrisk
ERRORS: add EPERM error for immutable/read-only files

vfork.2
Michael Kerrisk
Explain why the child should not call exit(3)
Michael Kerrisk

Another reason to use vfork() is to avoid overcommitting memory
Michael Kerrisk
Note some caveats re the use of vfork()
Inspired by Rich Felker's post at http://ewontfix.com/7/.
See also https://sourceware.org/bugzilla/show_bug.cgi?id=14749 and
See also https://sourceware.org/bugzilla/show_bug.cgi?id=14750.
Michael Kerrisk
SEE ALSO: add _exit(2)

write.2
Michael Kerrisk [Kai NODA]
Alert the reader that there is a limit on 'count'
See https://bugzilla.kernel.org/show_bug.cgi?id=86061

aio_suspend.3
Michael Kerrisk
Note that the glibc implementation is not async-signal-safe
See https://sourceware.org/bugzilla/show_bug.cgi?id=13172

backtrace.3
Michael Kerrisk
SEE ALSO: add addr2line(1) and gdb(1)

bcmp.3
bcopy.3
bzero.3
memccpy.3
memchr.3
memcmp.3
memcpy.3
memfrob.3
memmem.3
memmove.3
memset.3
Michael Kerrisk
SEE ALSO: add bstring(3)

exec.3
Michael
Kerrisk
execl() and execle() were not async-signal-safe before glibc 2.24

fopen.3
Michael Kerrisk [Helmut Eller]
Describe freopen() behavior for NULL pathname argument
See https://bugzilla.kernel.org/show_bug.cgi?id=191261
Michael Kerrisk
Note the open(2) flags that correspond to the 'mode' argument

Michael Kerrisk
Change argument name: 'path' to 'pathname'
For consistency with open(2).
Michael Kerrisk
Add subsection headings for each function

fts.3
Michael Kerrisk
Use better argument name for fts_children() and fts_set()
Michael Kerrisk
Fix minor error in FTSENT structure definition
Michael Kerrisk
Improve explanation of 'fts_errno'
Michael Kerrisk
Give a hint that there are further fields in the FTSENT structure
Michael Kerrisk
Clarify meaning of zero as 'instr' value for fts_set()

ftw.3
Michael Kerrisk
Correctly handle use
of stat info for FTW_NS in example program
Michael Kerrisk
Clarify that stat buffer is undefined for FTW_NS

getline.3
Michael Kerrisk
EXAMPLE: better error handling
Michael Kerrisk [Kent Fredic]
EXAMPLE: handle null bytes in input
Jann Horn
Document ENOMEM error case
see the error handling in libio/iogetdelim.c
Michael Kerrisk
EXAMPLE: specify file to be opened as command-line argument
Michael Kerrisk
Use better variable name in example program

getmntent.3
Michael Kerrisk [Anders Thulin]
Prefer '\\' as the escape to get a backslash
See https://bugzilla.kernel.org/show_bug.cgi?id=191611

getopt.3
Michael Kerrisk
Reword discussion of error handling and reporting
The existing description was hard to understand. Break
it into a bullet list that separates out the details

in a manner that is easier to parse.
Michael Kerrisk

Correct details of use of <stdio.h> to get getopt() declaration
Michael Kerrisk [John Wiersba]
Remove some redundant text

mq_open.3
Michael Kerrisk [Adam Martindale]
Include definition of the 'mq_attr' structure in this man page
Make the reader's life a little easier by saving them from
having to refer to mq_getattr(3).

mq_send.3
Michael Kerrisk [Adam Martindale]
Refer to mq_overview(7) for details on range of message priority

__ppc_set_ppr_med.3
Wainer dos Santos Moschetta
Note need for _ARCH_PWR8 macro
The _ARCH_PWR8 macro must be defined to get the
__ppc_set_ppr_very_low() and __ppc_set_ppr_med_high()
definitions.

printf.3
Michael Kerrisk
Document nonstandard 'Z' modifier
Michael Kerrisk
Document 'q' length modifier
Michael Kerrisk [Erik Roland van der Meer]
Fix a small bug in example code
Move the second call to va_end(ap)
to above the if-block that
precedes it, so that the va_list 'ap' will be cleaned up in
all cases.
Michael Kerrisk [Nadav Har'El]
As a nonstandard extension, GNU treats 'll' and 'L' as synonyms
See https://bugzilla.kernel.org/show_bug.cgi?id=190341.
Michael Kerrisk
Add references to setlocale(3) in discussions of locales
Michael Kerrisk
SEE ALSO: remove bogus self reference (dprintf(3))

random.3
Michael Kerrisk
Relocate information of "optimal" value of initstate() 'n' argument
The information was a bit hidden in NOTES.

random_r.3
  Michael Kerrisk [Jan Ziak]
    'buf.state' must be initialized to NULL before calling initstate_r()
      See https://bugzilla.kernel.org/show_bug.cgi?id=192801.
  Michael Kerrisk
    Add some usage notes for setstate_r()
  Michael Kerrisk
    Note that 'buf' records a pointer to 'statebuf'
      See https://sourceware.org/bugzilla/show_bug.cgi?id=3662.
  Michael Kerrisk
    Add BUGS section pointing out the weirdness of the initstate_r() API

resolver.3
  Michael Kerrisk
    RES_AAONLY, RES_PRIMARY, RES_NOCHECKNAME, RES_KEEPTSIG are deprecated
      These options were never implemented; since glibc 2.25, they
      are deprecated.
  Michael Kerrisk
    The RES_NOIP6DOTINT is removed in glibc 2.25
  Michael Kerrisk
    Note that RES_BLAST was unimplemented and is now deprecated
  Michael Kerrisk
    RES_USE_INET6 is deprecated since glibc 2.25
  Michael Kerrisk
    RES_USEBSTRING was removed in glibc 2.25

resolver.3
resolv.conf.5
  Michael Kerrisk
    Note that RES_USEBSTRING defaults to off

scandir.3
  Michael Kerrisk [Ian Jackson]
    Fix errors in example program
      See http://bugs.debian.org/848231.
  Michael Kerrisk
    Improve logic of the example program

scanf.3
  Michael Kerrisk
    Document the quote (') modifier
 for decimal conversions

sem_post.3
setjmp.3
  Michael Kerrisk
    SEE ALSO: add signal-safety(7)

sem_wait.3
  Michael Kerrisk [Fabjan Sukalia]
    Remove statement that SA_RESTART does not cause restarting
      This has not been true since Linux 2.6.22. The description
      of EINTR maintains a reference to signal(7), which explains
      the historical details.

      See https://bugzilla.kernel.org/show_bug.cgi?id=192071

sleep.3
  Michael Kerrisk [Mike Frysiner]
    Note that sleep() is implemented via nanosleep(2)
      See https://bugzilla.kernel.org/show_bug.cgi?id=73371.
  Michael Kerrisk [Mike Frysinger]
    Note that sleep() sleeps for a real-time number of seconds
      See https://bugzilla.kernel.org/show_bug.cgi?id=73371.
  Michael Kerrisk
    Convert BUGS text to "Portability notes" subsection
      The existing text is not a bug, as such.
  Michael Kerrisk
    DESCRIPTION: minor reworking

strerror.3
   Heinrich Schuchardt
    Indicate reasonable buffer size for strerror_r() and strerror_l()
      Add a hint which buffer size is needed for
      strerror_r() and strerror_l().

strverscmp.3
  Michael Kerrisk [Vivenzio Pagliari]
    Fix comparison error in example program

system.3
  Michael Kerrisk
    In the glibc implementation, fork handlers are not executed by system()

random.4
  Michael Kerrisk [Jon Jensen]
    Note that entropy_avail will be a number in the range 0..4096

core.5
  Michael Kerrisk
    Clarify that dumping program's initial CWD is root directory
  Michael Kerrisk
    The target of core dump piping can also be a script

filesystems.5
  Michael Kerrisk

SEE ALSO: add btrfs(5), nfs(5), tmpfs(5)

intro.5
Michael Kerrisk
Document the reality that by now Section 5 also covers filesystems
There are by now, from various filesystem projects, various
pages in Section
5 that document different filesystems.
Change intro(5) to reflect that.

Documented after following: http://bugs.debian.org/847998

proc.5
Mike Frysinger [Michael Kerrisk]
Clarify /proc/pid/environ behavior
/proc/pid/environ reflects process environment at
start of program execution; it is set at time of execve(2)
Michael Kerrisk
Add reference to slabinfo(5) in discussion of /proc/meminfo 'Slab' field
Michael Kerrisk
Add entries for "keys" files that refer reader to keyrings(7)
Michael Kerrisk
Remove duplicate /proc/[pid]/seccomp entry
Michael Kerrisk
Mention other system calls that create 'anon_inode' file descriptors
Mention a few other system calls that create file descriptors
that display an 'anon_inode' symlink in /proc/PID/fd
Michael Kerrisk
Add some detail on overcommit_memory value 1
Michael Kerrisk
Add reference to vdso(7)
in discussion of /proc/PID/maps

resolv.conf.5
Michael Kerrisk
ip6-bytestring was removed in glibc 2.25
Michael Kerrisk
The ipc-dotint and no-ip6-dotint options were removed in glibc 2.25
Michael Kerrisk
The 'inet6' option is deprecated since glibc 2.25

slabinfo.5
Michael Kerrisk
SEE ALSO: add slabtop(1)

capabilities.7
Michael Kerrisk [Casey Schaufler]
Add subsection with notes to kernel developers

Provide some notes to kernel developers considering how to choose
which capability should govern a new kernel feature.
Michael Kerrisk
Further enhance the recommendation against new uses of CAP_SYS_ADMIN
Michael Kerrisk
Explicitly point from CAP_SYS_ADMIN to "Notes for kernel developers"
Michael Kerrisk
Add another case for CAP_DAC_READ_SEARCH
Michael Kerrisk
Refer to execve(2) for the reasons that file capabilities may be ignored
Michael Kerrisk
Document a new use of CAP_SYS_RESOURCE
Michael Kerrisk
Add some more operations governed by CAP_SYS_ADMIN
Michael Kerrisk
Adjust references to chattr(1) to point to ioctl_iflags(2)

environ.7
Michael Kerrisk
Mention prctl(2) PR_SET_MM_ENV_START and PR_SET_MM_ENV_END operations

inotify.7
Michael Kerrisk
Point out that inotify monitoring is inode based

ip.7
Michael Kerrisk
SEE ALSO: add ip(8)

man.7
uri.7
Jakub Wilk
Use "www.kernel.org" in example URLs
Apparently www.kernelnotes.org is now a spam site.

mount_namespaces.7
Michael Kerrisk [Rob Landley]
Rework the discussion of defaults for mount propagation types
Add rather more detail. In particular, note the cases where the
default propagation type is MS_PRIVATE vs MS_SHARED.

namespaces.7
Michael Kerrisk
EXAMPLE: fix an error in shell session
Michael Kerrisk
EXAMPLE: rename the example
program
Use a more generic name, since this program may be expanded

in various ways in the future.
Michael Kerrisk
SEE ALSO: add ip-netns(8)
Michael Kerrisk
Remove content split out into ioctl_ns(2)

netlink.7
Michael Kerrisk
NETLINK_IP6_FW went away in Linux 3.5
Michael Kerrisk
NETLINK_W1 went away in Linux 2.6.18
Michael Kerrisk
Add NETLINK_SCSITRANSPORT to list
Michael Kerrisk
Add NETLINK_RDMA to list
Michael Kerrisk
NETLINK_FIREWALL was removed in Linux 3.5
Michael Kerrisk
NETLINK_NFLOG was removed in Linux 3.17
Jakub Wilk
Update libnl homepage URL
The original URL is 404.

pid_namespaces.7
user_namespaces.7
Michael Kerrisk
Adjust references to namespaces(7) to ioctl_ns(2)

pid_namespaces.7
Keno Fischer
CLONE_SIGHAND|CLONE_VM|CLONE_NEWPID is no longer disallowed

pipe.7
Michael Kerrisk
Since Linux 4.9,
pipe-max-size is ceiling for the default pipe capacity
Michael Kerrisk
Clarify that default pipe capacity is 16 pages
The statement that the default pipe capacity is 65536 bytes
is accurate only on systems where the page size is 4096B.
See the use of PIPE_DEF_BUFFERS in the kernel source.

random.7
Michael Kerrisk
Mention getentropy(3)
Michael Kerrisk
SEE ALSO: add getentropy(3)
Michael Kerrisk

SEE ALSO: add getauxval(3)
A small hint to the reader that some random bytes arrive
in the auxiliary vector.

signal.7
Michael Kerrisk
SIGSYS: add reference to seccomp(2)
Michael Kerrisk
Change description of SIGSYS to "Bad system call"
This is the more typical definition.
Michael Kerrisk
SIGPIPE: add reference to pipe(7)
Michael Kerrisk
SIGXFSZ: add reference to setrlimit(2)
Michael Kerrisk
Add a name for SIGEMT
Michael
Kerrisk
SIGXCPU: add reference to setrlimit(2)
Michael Kerrisk
Migrated signal-safety discussion to new signal-safety(7) page

unix.7
Michael Kerrisk [Sergey Polovko]
Since Linux 3.4, UNIX domain sockets support MSG_TRUNC
This was correctly noted in recv(2), but the unix(7) page
was not correspondingly updated for the Linux 3.4 change.
Michael Kerrisk [Willy Tarreau]
Document ETOOMANYREFS for SCM_RIGHTS send exceeding RLIMIT_NOFILE limit

user_namespaces.7
Michael Kerrisk
Change page cross reference: keyctl(2) ==> keyrings(7)

ld.so.8
Michael Kerrisk
LD_BIND_NOT has effect only for function symbols
Michael Kerrisk
Describe use of LD_DEBUG with LD_BIND_NOT
Michael Kerrisk
In secure mode, LD_AUDIT restricts the libraries that it will load
Michael Kerrisk
LD_AUDIT understands $ORIGIN, $LIB, and $PLATFORM

========== Changes in man-pages-4.11

==========

Released: 2017-05-03, Baden, Switzerland

Contributors

The following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_userfaultfd.2
  Michael Kerrisk, Mike Rapoport
    New page describing ioctl(2) operations for userfaultfd

statx.2
  David Howells, Michael Kerrisk [Andreas Dilger]
    New page describing statx(2) system call added in Linux 4.11

userfaultfd.2
  Mike Rapoport, Michael Kerrisk [Andrea Arcangeli]
    New page describing userfaultfd(2) system call.

pthread_atfork.3
   Michael Kerrisk
    New page describing pthread_atfork(3)

slabinfo.5
  Michael Kerrisk
    Rewrite to try to bring the content close to current reality
      There's still gaps to fill in, but the existing page
      was in any case hugely out of date.

inode.7
  Michael Kerrisk
    New page with information about inodes
      David Howells provided a statx(2) page that duplicated much of
      the information from stat(2). Avoid such duplication
      by moving the common information in stat(2) and statx(2)
      to a new page.

Renamed pages
---

ioctl_console.2
  Michael Kerrisk
    Renamed from console_ioctl.4
      Most ioctl() man pages are in section 2, so move this one there
      for consistency.
  Michael Kerrisk
    Note type of 'argp' for a various operations

For some commands, there was no clear statement about the type
of the 'argp' argument.

ioctl_tty.2
Michael Kerrisk
Renamed from tty_ioctl(4)
All other ioctl(2) pages are in section 2. Make this
page consistent.
Michael Kerrisk
Packet mode state change events give POLLPRI events for poll(2)

Newly documented interfaces in existing pages
---

ioctl_ns.2
Michael Kerrisk
Document the NS_GET_NSTYPE operation added in Linux 4.11
Michael Kerrisk
Document the NS_GET_OWNER_UID operation added in Linux 4.11

proc.5
Michael Kerrisk
Document /proc/sys/kernel/sched_child_runs_first

namespaces.7
Michael Kerrisk
Document the /proc/sys/user/* files added in Linux 4.9

socket.7
Francois Saint-Jacques, Michael Kerrisk
Document SO_INCOMING_CPU

New and changed links
---

console_ioctl.4
Michael Kerrisk
Link for old name of ioctl_console(2) page

tty_ioctl.4
Michael Kerrisk
Link for old name of ioctl_tty(2)
page

Global changes

Various pages
  Michael Kerrisk
    Change page cross-references from tty_ioctl(4) to ioctl_tty(2)
  Michael Kerrisk
    Change page cross-references for console_ioctl(4) to ioctl_console(2)

Changes to individual pages
---

alarm.2
  Michael Kerrisk
    SEE ALSO: add timer_create(2) and timerfd_create(2)

chmod.2
fsync.2
mkdir.2
mknod.2
open.2
truncate.2
umask.2
utime.2
utimensat.2
  Michael Kerrisk
    Add/replace references to inode(7)

clone.2
  Michael Kerrisk
    CLONE_NEWCGROUP by an unprivileged process also causes an EPERM error

clone.2
unshare.2
  Michael Kerrisk
    Exceeding one of the limits in /proc/sys/user/* can cause ENOSPC
  Michael Kerrisk
    CLONE_NEWPID yields ENOSPC if nesting limit of PID namespaces is reached
  Michael Kerrisk
    Exceeding the maximum nested user namespace limit now gives ENOSPC
      Formerly, if the limit of 32 nested
 user namespaces was exceeded,
      the error EUSERS resulted. Starting with Linux 4.9, the error
      is ENOSPC.

epoll_ctl.2
  Michael Kerrisk
    Defer to poll(2) for an explanation of EPOLLIN

Michael Kerrisk [Nicolas Biscos]
EPOLLERR is also set on write end of a pipe when the read end is closed
Michael Kerrisk [Nicolas Biscos]
Give the reader a clue that the 'events' field can be zero
'events' specified as zero still allows EPOLLHUP and
EPOLLERR to be reported.

_exit.2
Michael Kerrisk
On exit, child processes may be inherited by a "subreaper"
It is no longer necessarily true that orphaned processes
are inherited by PID 1.
Michael Kerrisk
Only the least significant byte of exit status is passed to the parent

fcntl.2
Michael Kerrisk
Mention memfd_create() in the discussion of file seals
Give the reader a clue about what kinds of objects can
be employed with file seals.
Michael Kerrisk
File seals are not generally applicable to tmpfs(5) files
As far as I can see, file seals can be applied only to
memfd_create(2) file descriptors. This was checked by experiment
and by reading mm/shmem.c::shmem_get_inode((), where one finds
the following line that applies to all new shmem files:

```
info->seals = F_SEAL_SEAL;
```

Only in the code of the memfd_create() system call is this
setting reversed (in mm/shmem.c::memfd_create):

```
if (flags & MFD_ALLOW_SEALING)
    info->seals &= ~F_SEAL_SEAL;
```

fork.2
Michael Kerrisk
SEE ALSO: add pthread_atfork(3)

getdents.2
open.2
stat.2
statx.2
Michael Kerrisk
SEE ALSO: add inode(7)

getdtablesize.2
attr.5

Alexander Miller
Move .so directive to first line
Improves compatibility with the man
and other dumb tools
that process man page files.

getpid.2
Michael Kerrisk
Mention init(1) and "subreapers" in discussion of parent PID

ioctl_list.2
Cyril Hrubis [Arnd Bergmann]
BLKRASET/BLKRAGET take unsigned long

ioctl_ns.2
Michael Kerrisk
ERRORS: document ENOTTY

kexec_load.2
sched_setaffinity.2
bootparam.7
Michael Kerrisk
Documentation/kernel-parameters.txt is now in Documentation/admin-guide/

lseek.2
Michael Kerrisk
SEE ALSO: add fallocate(2)
Both of these pages discuss file holes.

mincore.2
Michael Kerrisk
SEE ALSO: add fincore(1)

mmap.2
Michael Kerrisk
Remove ancient reference to flags that appear on some other systems
MAP_AUTOGROW, MAP_AUTORESRV, MAP_COPY, and MAP_LOCAL may have
appeared on some systems many years ago, but the discussion here
mentions no details and the systems and flags probably ceased to
be relevant
long ago. So, remove this text.
Michael Kerrisk
SEE ALSO: add userfaultfd(2)

open.2
Michael Kerrisk
Add statx() to list of "at" calls in rationale discussion

poll.2
  Michael Kerrisk
    Expand discussion of POLLPRI
  Michael Kerrisk [Nicolas Biscos]
    POLLERR is also set on write end of a pipe when the read end is closed

posix_fadvise.2
  Michael Kerrisk
    SEE ALSO: add fincore(1)

prctl.2
  Mike Frysinger
    PR_SET_MM: Refine CONFIG_CHECKPOINT_RESTORE requirement
      The Linux 3.10 release dropped the c/r requirement and opened it
      up to all users.
  Mike Frysinger
    PR_SET_MM: Document new PR_SET_MM_MAP{,_SIZE} helpers
  Mike Frysinger
    PR_SET_MM: Document arg4/arg5 zero behavior
      The kernel will immediately reject calls where arg4/arg5 are not
      zero. See kernel/sys.c:prctl_set_mm().
  Michael Kerrisk
    Explain rationale for use of subreaper processes
  Michael
 Kerrisk
    Note semantics of child_subreaper setting on fork() and exec()
  Michael Kerrisk
    Improve description of PR_SET_CHILD_SUBREAPER

rename.2
  Michael Kerrisk [Georg Sauthoff]
    Note that there is no glibc wrapper for renameat2()

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add get_nprocs(3)

select.2
  Michael Kerrisk [Matthew Wilcox, Carlos O'Donell]
    Linux select() is buggy wrt POSIX in its check for EBADF errors
  Michael Kerrisk
    Show correspondence between select() and poll() readiness notifications
  Michael Kerrisk
    Give a hint that sets must be reinitialized if using select() in a loop
  Michael Kerrisk
    Refer to POLLPRI in poll(2) for info on exceptional conditions
  Michael Kerrisk
    Move mislocated text describing the self-pipe text from BUGS to NOTES

sigaction.2
  Michael Kerrisk
    Show the prototype of an SA_SIGINFO signal handler

signalfd.2
  Michael Kerrisk

 SIGKILL and SIGSTOP are silently ignored in 'mask'

sigprocmask.2
  Dmitry V. Levin
    Do not specify an exact value of rt_sigprocmask's 4th argument
      As sizeof(kernel_sigset_t) is not the same for all architectures,
      it would be better not to mention any numbers as its value.
  Michael Kerrisk
    'set' and 'oldset' can both be NULL

sigwaitinfo.2
  Michael Kerrisk
    sigwaitinfo() can't be used to accept synchronous signals

socketcall.2
  Mike Frysinger
    Document call argument

stat.2
  Michael Kerrisk
    Remove information migrated to inode(7) page
  Michael Kerrisk
    Restructure field descriptions as a hanging list
  Michael Kerrisk
    Remove "Other systems" subsection
      These details about other systems were added in 1999,
      and were probably of limited use then, and even less today.
      However, they do clutter the page, so remove them.
  Michael Kerrisk
    DESCRIPTION: add
 list entries for 'st_uid' and 'st_gid'
  Michael Kerrisk
    Add some subsection headings to ease readability
  David Howells
    ERRORS: correct description of ENOENT
  Michael Kerrisk
    Give 'struct stat' argument a more meaningful name ('statbuf')
  Marcin lusarz
    Tweak description of AT_EMPTY_PATH
      Currently it says when dirfd is AT_FDCWD it can be something

other than directory, which doesn't make much sense. Just swap
the order of sentences.
Michael Kerrisk
Add slightly expanded description of 'st_ino' field
Michael Kerrisk
DESCRIPTION: add a list entry for 'st_ino'
Michael Kerrisk
DESCRIPTION: add a list entry for 'st_nlinks' field

syscalls.2
Michael Kerrisk
Add membarrier(2)
Michael Kerrisk
Fix kernel version for userfaultfd(2)
Michael Kerrisk
Linux 4.11 added statx()
Michael Kerrisk
Include deprecated getunwind(2) in list

wait.2
Michael Kerrisk
Orphaned children may be adopted by a "subreaper", rather by than PD 1

bzero.3
Michael Kerrisk [Zack Weinberg]
Add correct header file for explicit_bzero()

cfree.3
Michael Kerrisk
cfree() is removed from glibc in version 2.26

exit.3
Michael Kerrisk
Improve discussion of zombie processes

getentropy.3
Nikos Mavrogiannopoulos [Michael Kerrisk, Florian Weimer]
Correct header file
Michael Kerrisk [Frank Theile]
SYNOPSIS: add missing return type for getentropy() declaration

grantpt.3
Michael Kerrisk
Tell a more nuanced story about what grantpt() does or does not do

insque.3
Michael Kerrisk
SEE ALSO: add queue(3)

queue.3
  Michael Kerrisk
    SEE ALSO: add insque(3)

shm_open.3
  Michael Kerrisk
    Clarify that POSIX shared memory uses tmpfs(5)

syslog.3
  Michael Kerrisk [Ian Abbott, Walter Harms]
    Reorganize page text for easier parsing and better
 readability
  Michael Kerrisk
    Various rewordings and improvements
  Michael Kerrisk
    Note default value for 'facility' when calling openlog()
  Michael Kerrisk
    SEE ALSO: add journalctl(1)

ttyname.3
  Dmitry V. Levin
    Document ENODEV error code
  Christian Brauner
    NOTES: warn about a confusing case that may occur with mount namespaces

wcsdup.3
  Jan Heberer
    RETURN VALUE: fix error in return value description
      Return value for failure was accidentally changed from NULL to
      -1 in man-pages commit 572acb41c48b6b8e690d50edff367d8b8b01702a.

elf.5
  Michael Kerrisk
    SEE ALSO: add elfedit(1), nm(1), size(1), strings(1), and strip(1)

nsswitch.conf.5
  Florian Weimer
    Mention sudoers
      It turns out that sudo drops things into nsswitch.conf, too.

proc.5
  Michael Kerrisk
    Refer to namespaces(7) for discussion of /proc/sys/user/* files
  Michael Kerrisk
    Simplify /proc/slabinfo
 entry
      Don't repeat (out-of-date) info from slabinfo(5); just defer to

that page.

tmpfs.5
Michael Kerrisk
tmpfs supports extended attributes, but not 'user' extended attributes

environ.7
Jakub Wilk
Fix name of function that honors TMPDIR
tempnam() takes the TMPDIR environment variable into account, unlike tmpnam(), which always creates pathnames within /tmp.

hostname.7
Marko Myllynen
Use lower case for hostname example
Marko Myllynen
Use generic names in examples
Marko Myllynen
Describe accepted characters for hostname

inotify.7
Michael Kerrisk [Nicolas Iooss]
Mounting a filesystem on top of a monitored directory causes no event

man-pages.7
Michael Kerrisk
Note preferred approach for 'duplicate' errors

pid_namespaces.7
Michael Kerrisk
The maximum nesting depth for PID namespaces is 32

user_namespaces.7
Stephan Bergmann
Fixes to example
While toying around with the userns_child_exec example program on the user_namespaces(7) man page, I noticed two things:

* In the EXAMPLE section, we need to mount the new /proc before looking at /proc/$$/status, otherwise the latter will print information about the outer namespace's PID 1 (i.e., the real init). So the two paragraphs need to be swapped.

* In the program source, make sure to close pipe_fd[0] in the child before exec'ing.

pthreads.7
Michael Kerrisk

SEE ALSO: add pthread_rwlockattr_setkind_np(3)

pty.7
  Michael Kerrisk
    Mention a couple of other applications of pseudoterminals

sem_overview.7
  Michael Kerrisk
    SEE ALSO: add shm_overview(7)

signal.7
  Michael Kerrisk
    SEE ALSO: add sigreturn(2)

tcp.7
  Michael Kerrisk
    Note indications for OOB data given by select(2) and poll(2)
  Chema Gonzalez
     tcp_abc was removed in 3.9

xattr.7
  Michael Kerrisk
    SEE ALSO: add ioctl_iflags(2)
       People sometimes confuse xattrs and inode flags. Provide a link
       to the page that describes inode flags to give them a tip.

ld.so.8
  Michael Kerrisk
    Mention quoting when using "Rpath tokens" in LD_AUDIT and LD_PRELOAD
  Michael Kerrisk
    Expand description of /etc/ld.so.preload
  Michael Kerrisk
    Mention ldconfig(8) in discussion of /etc/ld.so.cache

zdump.8
  Jakub Wilk
    Add OPTIONS section heading

========== Changes in man-pages-4.12 ==========

Released: 2017-07-13, London

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Alex Henrie <alexhenrie24@gmail.com>

sulit <sulitsrc@foxmail.com>

 <hiroki.ishii@miraclelinux.com>

Apologies if I missed anyone!

New and rewritten pages
----

ioctl_getfsmap.2
  Darrick J. Wong
    Document the GETFSMAP ioctl
      Document the new GETFSMAP ioctl that returns the physical layout of a

(disk-based) filesystem.

Newly documented interfaces in existing pages
---

namespaces.7
  Kirill Tkhai [Michael Kerrisk]
    Document the /proc/[pid]/ns/pid_for_children file

Changes to individual pages
---

ldd.1
  Michael Kerrisk
    'objdump -p prog | grep NEEDED' doesn't give quite same info as 'ldd'

chmod.2
  Michael Kerrisk
    Put fchmod() feature test macro requirements in a more readable format
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirements changes for fchmod()

chown.2
  Michael Kerrisk
    When file owner or group is changed, file capabilities are cleared
  Michael Kerrisk
     Changes to file owner by root also clear set-UID and set-GID bits

clone.2
  Michael Kerrisk
    Update BUGS to reflect fact that PID caching was removed in glibc 2.25

epoll_wait.2
  Michael Kerrisk
    Clarify semantics of returned 'data' field
      The returned 'data' is the 'data' most recently set via
      epoll_ctl().

get_mempolicy.2
  Michael Kerrisk [Nadav Har'El, Andi Kleen]
    SYNOPSIS: fix return type of get_mempolicy()
      See https://bugzilla.kernel.org/show_bug.cgi?id=97051

getpid.2
  Carlos O'Donell, Michael Kerrisk
    Note that PID caching is removed as of glibc 2.25

Since glibc 2.25 the PID cache is removed.

Rationale given in the release notes:
https://sourceware.org/glibc/wiki/Release/2.25#pid_cache_removal

ioctl.2
  Michael Kerrisk
    SEE ALSO: add ioctl_getfsmap(2)

ioctl_getfsmap.2
  Michael Kerrisk
    Fix ordering of sections
  Michael Kerrisk

   Add VERSIONS section
  Michael Kerrisk
    ERRORS: order alphabetically

madvise.2
  Michael Kerrisk
    Remove bogus text re POSIX_MADV_NOREUSE
      There is a POSIX_FADV_NOREUSE for posix_fadvise(),
      but no POSIX_MADV_NOREUSE for any API in POSIX.

membarrier.2
  Michael Kerrisk
    Add ENOSYS error for 'nohz_full' CPU setting

mount.2
  NeilBrown
    Revise description of MS_REMOUNT | MS_BIND
      MS_REMOUNT|MS_BIND affects all per-mount-point
      flag. MS_RDONLY is only special because it,
      uniquely, is both a per-mount-point flag *and* a
      per-filesystem flag.

      So the sections of per-mount-point flags and
      MS_REMOUNT can usefully be clarified.

open.2
  Michael Kerrisk
    Note some further advantages of the *at() APIs

pipe.2
  Michael Kerrisk
    SEE ALSO: add tee(2) and vmsplice(2)

readv.2

Michael Kerrisk
glibc 2.26 adds library support for preadv2()
and pwritev2()

sched_setaffinity.2
Michael Kerrisk
Mention cpuset cgroups as a cause of EINVAL error

seccomp.2
Mike Frysinger
Expand SECCOMP_RET_KILL documentation

sigaction.2
Michael Kerrisk
Note feature test macro requirements for 'si_code' constants
Michael Kerrisk
Add a subheading for the description of 'si_code'
Michael Kerrisk
TRAP_BRANCH and TRAP_HWBKPT are present only on IA64

sigaltstack.2
Michael Kerrisk
Note that specifying SS_ONSTACK in ss.ss_flags decreases portability
In the Illumos source (which presumably mirrors its Solaris
ancestry), there is this check in the sigaltstack()
implementation:

```
if (ss.ss_flags & ~SS_DISABLE)
    return (set_errno(EINVAL));
```

And in the FreeBSD source we find similar:

```
if ((ss->ss_flags & ~SS_DISABLE) != 0)

    return (EINVAL);
```

Michael Kerrisk
Note buggy addition of ss.ss_flags==SS_ONSTACK
Note buggy addition of ss.ss_flags==SS_ONSTACK as a synonym
for ss_flags==0. No other implementation does this, AFAIK.
And it was not needed :-(.
Michael Kerrisk
Specifying 'ss' returns the current settings without changing them
Michael Kerrisk
Give 'oss' argument a more meaningful name: 'old_ss'
Michael Kerrisk
Some minor reworking of the text
Michael Kerrisk
ERRORS: update description of EINVAL error

splice.2
tee.2
vmsplice.2
  Michael Kerrisk
    SEE ALSO: add pipe(7)

splice.2
  Michael Kerrisk
    ERRORS: split EINVAL error cases
  Michael Kerrisk
    ERRORS: add EINVAL for case where both descriptors refer to same pipe

timer_create.2
  Michael Kerrisk
    Document the CONFIG_POSIX_TIMERS option added in Linux 4.10

wait.2
  Michael Kerrisk
    Note glibc 2.26 changes
 to feature test macro requirements for waitid()

acosh.3
asinh.3
atanh.3
  Alex Henrie
    Remove C89 designation.
      See https://bugzilla.kernel.org/show_bug.cgi?id=196319

bsd_signal.3
  Michael Kerrisk
    Note feature test macro requirements changes for glibc 2.26

dl_iterate_phdr.3
  Michael Kerrisk
    dl_iterate_phdr() shows the order in which objects were loaded
      dl_iterate_phdr() tells us not just which objects are
      loaded, but also the order in which they are loaded
      (the "link-map order"). Since the order is relevant for
      understanding symbol resolution, give the reader this clue.
  Michael Kerrisk
    Expand the code example, and show sample output
  Michael Kerrisk
    List values for the 'p_type' field

dlsym.3
  Michael Kerrisk
    _GNU_SOURCE is needed to get RTLD_DEFAULT and RTLD_NEXT definitions

flockfile.3
  Michael Kerrisk
    Note glibc 2.24 feature test macro requirement
 changes

fpathconf.3
  Michael Kerrisk
    Rework RETURN VALUE description to add more detail
  Michael Kerrisk
    Add an errors section
  Michael Kerrisk
    Largely rewrite the description of _PC_CHOWN_RESTRICTED
  Michael Kerrisk
    Rewrite description of _PC_PIPE_BUF
      The existing description was not accurate, and lacked details.

ftw.3
  Michael Kerrisk
    BUGS: document a probable glibc regression in FTW_SLN case
      See https://bugzilla.redhat.com/show_bug.cgi?id=1422736
      and http://austingroupbugs.net/view.php?id=1121.

getaddrinfo.3
  Quentin Rameau
    Fix _POSIX_C_SOURCE value for getaddrinfo()
      The correct _POSIX_C_SOURCE value is 200112L, not 201112L in features.h.

getcontext.3
  Carlos O'Donell
    Exemplar structure should use 'ucontext_t'.

getgrent.3
  Michael Kerrisk
    Note glibc 2.22 changes for feature test macro requirements

grantpt.3
ptsname.3
unlockpt.3
  Ferdinand
 Thiessen [Michael Kerrisk]
    Update feature test macro-requirements for glibc 2.24

if_nametoindex.3
  Douglas Caetano dos Santos
    Add ENODEV error for if_nametoindex()

malloc.3

Michael Kerrisk
Document the reallocarray() added in glibc 2.26

nl_langinfo.3
Michael Kerrisk
Note feature test macro requirements for nl_langinfo_l()

posix_madvise.3
Dr. Tobias Quathamer
Remove paragraph about POSIX_FADV_NOREUSE
POSIX_FADV_NOREUSE is documented for posix_fadvise, and a
corresponding POSIX_MADV_NOREUSE flag is not specified by POSIX.
See https://bugs.debian.org/865699

ptsname.3
Michael Kerrisk [Arjun Shankar]
Since glibc 2.26, ptsname_r() no longer gives EINVAL for buf==NULL

rand.3
Michael Kerrisk
Note glibc 2.24 feature test macro requirement changes for rand_r()

resolver.3
Michael Kerrisk
Add basic notes on 'op' argument of res_nmkquery() and res_mkquery()

sigpause.3
Michael Kerrisk
Note glibc 2.26 changes to feature test macro requirements

sigwait.3
Michael Kerrisk
Note glibc 2.26 feature test macro changes

strtol.3
Heinrich Schuchardt
Mention 0X prefix
The prefix 0x may be capitalized as 0X.

See ISO/IEC 9899:1999.

sysconf.3
Michael Kerrisk [Pavel Tikhomirov]
Rework RETURN VALUE description to add more detail
Make the discussion clearer, and add a few details.
Also, fix the problem report from Pavel Tikhomirov
who noted that the man page falsely said that errno
is not changed on a successful return.

Addresses https://bugzilla.kernel.org/show_bug.cgi?id=195955
Michael Kerrisk
Add ERRORS section

ttyslot.3
Michael Kerrisk
Fix error in feature test macro requirements
Michael Kerrisk
Note feature test macro requirements changes in glibc 2.24
Michael Kerrisk
Clarify
details of use of <stdlib.h> file

unlocked_stdio.3
Michael Kerrisk
Note glibc 2.24 feature test macro requirement changes

elf.5
Michael Kerrisk
SEE ALSO: add dl_iterate_phdr(3)

nsswitch.conf.5
DJ Delorie
Clarify group merge rules
This minor patch clarifies when merging is not done,
and how duplicate entries are merged.

proc.5
Michael Kerrisk
Document that 'iowait' field of /proc/stat is unreliable
Text taken from Chao Fan's kernel commit 9c240d757658a3ae996.

slabinfo.5
Michael Kerrisk [Jorge Nerin]
SEE ALSO: add some references to relevant kernel source files

tmpfs.5
Michael Kerrisk
SEE ALSO: add memfd_create(2), mmap(2), shm_open(3)

capabilities.7
Michael Kerrisk
Clarify the effect on process capabilities when UID 0 does execve(2)
Michael Kerrisk
Note effect on capabilities when a process with UID != 0 does execve(2)
Michael Kerrisk [David

Lewis]
Fix reversed descriptions of CAP_MAC_OVERRIDE and CAP_MAC_ADMIN
Michael Kerrisk
SEE ALSO: add filecap(8), netcap(8), pscap(8)

cgroup_namespaces.7
Michael Kerrisk
Add some further explanation of the example shell session
Michael Kerrisk
Fix a bug in shell session example

inode.7
Michael Kerrisk
Note glibc 2.24 feature test macro changes for S_IFSOCK and S_ISSOCK()

man.7
G. Branden Robinson
Undocument "URL" macro in man(7) in favor .UR+.UE

pid_namespaces.7
Michael Kerrisk
Mention /proc/[pid]/ns/pid_for_children

pipe.7
Michael Kerrisk
SEE ALSO: add tee(2) and vmsplice(2)

sigevent.7
Michael Kerrisk
Mention signal.h header file

signal.7
Michael Kerrisk [lilydjwg]
Since Linux 3.8, read(2) on an inotify FD is restartable with SA_RESTART
See https://bugzilla.kernel.org/show_bug.cgi?id=195711
Michael Kerrisk
read() from an inotify FD is no
longer interrupted by a stop signal
(Change was in Linux 3.8.)

tcp.7
Michael Kerrisk
Document value '2' for tcp_timestamps
Since Linux 4.10, the value '2' is meaningful for tcp_timestamps
Ruben Kerkhof
Change default value of tcp_frto
The default changed in c96fd3d461fa495400df24be3b3b66f0e0b152f9
(Linux 2.6.24).

ld.so.8
  Michael Kerrisk
    Greatly expand the explanation of LD_DYNAMIC_WEAK
  Carlos O'Donell
    Expand DT_RUNPATH details.
      ld.so.8: Expand DT_RUNPATH details.

      Every 3 years we get asked why DT_RUNPATH doesn't work like DT_RPATH.
      The most recent question was here:
      https://www.sourceware.org/ml/libc-help/2017-06/msg00013.html

      We need to expand the description of DT_RUNPATH to cover this
      situation and explain that the DT_RUNPATH entries apply only to the
      immediate DT_NEEDED, not that of another, say dlopen'd
child object.
  Michael Kerrisk
    Since glibc 2.2.5, LD_PROFILE is ignored in secure-execution mode
  Michael Kerrisk
    Make notes on secure-execute mode more prominent
      Place each note on secure-execution mode in a separate
      paragraph, to make it more obvious.
  Michael Kerrisk
    Note that libraries in standard directories are not normally set-UID
      In secure mode, LD_PRELOAD loads only libraries from standard
      directories that are marked set-UID. Note that it is unusual for
      a library to be marked in this way.
  Michael Kerrisk
    SEE ALSO: add elf(5)
  Michael Kerrisk
    Note version where secure-execution started ignoring LD_USE_LOAD_BIAS
  Michael Kerrisk
    Correct glibc version that ignores LD_SHOW_AUXV in secure-execution mode
      Ignored since 2.3.4 (not 2.3.5).
  Michael Kerrisk
    Rewrite LD_DEBUG_OUTPUT description and note that .PID is appended

==========
Changes in man-pages-4.13 ==========

Released: 2017-09-15, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets

in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Aleksa Sarai <asarai@suse.de>
Alex Henrie <alexhenrie24@gmail.com>
Benjamin Peterson <bp@benjamin.pe>
Bjarni Ingi Gislason <bjarniig@rhi.hi.is>
Cyrill Gorcunov <gorcunov@openvz.org>

<niya3@mail.ru>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_mutex_consistent.3
  Yubin Ruan, Michael Kerrisk
    New page documenting pthread_mutex_consistent(3)

pthread_mutexattr_getpshared.3
  Michael Kerrisk
    New page for pthread_mutexattr_getpshared(3) and pthread_mutexattr_setpshared(3)

pthread_mutexattr_init.3
  Michael Kerrisk
    New page for pthread_mutexattr_init(3) and pthread_mutexattr_destroy(3)

pthread_mutexattr_setrobust.3
  Yubin Ruan, Michael Kerrisk
    New page for pthread_mutexattr_setrobust(3) and pthread_mutexattr_getrobust(3)

sysfs.5
  Michael Kerrisk [Mark Wielaard]
    New page documenting the sysfs filesystem
      Just a skeleton page so far, but perhaps it will be filled out
      over time.

Newly documented interfaces in existing pages
---

fcntl.2
  Jens Axboe, Michael Kerrisk
    Describe the set/get write hints commands that are added in Linux 4.13
      Document F_GET_RW_HINT, F_SET_RW_HINT, F_GET_FILE_RW_HINT, and
      F_SET_FILE_RW_HINT.

ioctl_tty.2
  Aleksa Sarai, Michael Kerrisk
    Add TIOCGPTPEER documentation

kcmp.2
  Cyrill Gorcunov
    Add KCMP_EPOLL_TFD description

keyctl.2
  Eugene Syromyatnikov
    Document the KEYCTL_RESTRICT_KEYRING operation
  Eugene Syromyatnikov [Stephan Müller]

Document the ability to provide KDF parameters in KEYCTL_DH_COMPUTE

New and changed links
---

pthread_mutexattr_destroy.3
  Michael Kerrisk
    New link to new pthread_mutexattr_init.3 page

pthread_mutexattr_getrobust.3
pthread_mutexattr_getrobust_np.3
pthread_mutexattr_setrobust_np.3
  Michael Kerrisk
    New links to new pthread_mutexattr_setrobust.3 page

pthread_mutexattr_setpshared.3
  Michael Kerrisk
    New link to new pthread_mutexattr_getpshared.3 page

Global changes

Various pages
  Michael Kerrisk
    Use .EX/.EE for EXAMPLE programs

Various pages
  Michael Kerrisk
    Use consistent markup for code snippets
      Change .nf/.fi to .EX/.EE

Various pages
  Michael Kerrisk
    Use
 consistent markup for code snippets
      The preferred form is

          .PP/.IP
          .in +4n
          .EX
          <code>
          .EE
          .in
          .PP/.IP

Various pages

Michael Kerrisk
Formatting fix: replace blank lines with .PP/.IP
Blank lines shouldn't generally appear in *roff source (other
than in code examples), since they create large vertical
spaces between text blocks.

Various pages
Michael Kerrisk [Bjarni Ingi Gislason]
Add a non-breaking space between a number and a unit (prefix)
Based on a patch by Bjarni Ingi Gislason.

Various pages
Michael Kerrisk [Bjarni Ingi Gislason]
Use en-dash for ranges
Based on a patch by Bjarni Ingi Gislason.

A few pages
Michael Kerrisk
Fix misordering of sections
Michael Kerrisk
Fix order of SEE ALSO entries

Changes to individual pages
---

ldd.1
Michael Kerrisk
Add more detail on ldd security implications, noting glibc 2.27 changes

add_key.2
backtrace.3
syslog.3
Michael Kerrisk
Fix misordered SEE ALSO entries

add_key.2
request_key.2
keyrings.7
Eugene Syromyatnikov
Update Linux documentation pointers

chown.2
Michael Kerrisk
Update kernel version in note on support for grpid/nogrpid mount options
There has been no change since Linux 2.6.25, so update the
kernel version to 4.12.

execve.2
  Michael Kerrisk
    SEE ALSO: add get_robust_list(2)

getrandom.2
  Michael Kerrisk [Fabio Scotoni]
    SYNOPSIS: make return type of getrandom() 'ssize_t'
      This accords with glibc headers and the Linux kernel source.

getrlimit.2
  Thiago Jung Bauermann
    Mention unit used by RLIMIT_CORE and RLIMIT_FSIZE
  Michael Kerrisk
    Note that RLIMIT_AS and RLIMIT_DATA are rounded down to system page size
  Michael Kerrisk
     Mention unit for RLIMIT_DATA

getrlimit.2
mmap.2
malloc.3
  Jonas Grabber
    RLIMIT_DATA affects mmap(2) since Linux 4.7

get_robust_list.2
  Michael Kerrisk
    Detail the operation of robust futex lists
  Michael Kerrisk
    Since Linux 2.6.28, robust futex lists also have an effect for execve(2)
  Michael Kerrisk
    Clarify that "thread ID" means "kernel thread ID"
  Michael Kerrisk
    SEE ALSO: add pthread_mutexattr_setrobust(3)

ioctl_getfsmap.2
  Darrick J. Wong
    Correct semantics of FMR_OF_LAST flag

ioctl_userfaultfd.2
  Mike Rapoport
    Document replacement of ENOSPC with ESRCH
  Mike Rapoport
    Update uffdio_api.features description
      There is no requirement that uffdio_api.features must be zero
      for newer kernels. This field actually defines what features
      space would like to enable.

io_submit.2
  Sage Weil

Acknowledge possibility of short return
Note
that the return value may be a value less than 'nr'
if not all iocbs were queued at once.

ipc.2
Michael Kerrisk
SEE ALSO: add svipc(7)

keyctl.2
Eugene Syromyatnikov
mention keyctl_dh_compute(3) and keyctl_dh_compute_alloc (3)
These functions have been added in keyutils 1.5.10
Eugene Syromyatnikov
Mention ENOMEM in ERRORS
Eugene Syromyatnikov
Update kernel documentation path reference

move_pages.2
Otto Ebeling [Michael Kerrisk]
Note permission changes that occurred in Linux 4.13

mprotect.2
Michael Kerrisk [Shrikant Giridhar]
Add warning about the use of printf() in the example code

open.2
NeilBrown
Improve O_PATH documentation
- fstatfs is now permitted.
- ioctl isn't, and is worth listing explicitly
- O_PATH allows an automount point to be opened with
triggering the mount.

prctl.2
seccomp.2
Eugene Syromyatnikov

Update pointer to in-kernel seccomp documentation

prctl.2
ptrace.2
Eugene Syromyatnikov
Update pointer to in-kernel Yama documentation

prctl.2
Eugene Syromyatnikov
Update pointer to in-kernel no_new_privs flag documentation

readlink.2
  Michael Kerrisk [Jason Noakes]
    Fix an off-by-one error in example code

seccomp.2
  Kees Cook
    Clarify SECCOMP_RET_KILL kills tasks not processes

select_tut.2
  Michael Kerrisk [Sergey Z.]
    Clarify an ambiguity with respect to select() and EAGAIN
      See https://bugzilla.kernel.org/show_bug.cgi?id=196345

set_tid_address.2
  Elliott Hughes
    Note that there's no glibc wrapper for set_tid_address()

socket.2
  Michael Kerrisk [Yubin Ruan]
    socket() uses the lowest available file descriptor

_syscall.2
  Michael Kerrisk
    Remove redundant comment from EXAMPLE
      A discussion of the nroff source of the manual
      page isn't very useful...

sysfs.2
   Michael Kerrisk
    Add a pointer to sysfs(5) to help possibly confused readers
  Michael Kerrisk
    Make it clearer near the start of the page that sysfs(2) is obsolete

timer_create.2
  Michael Kerrisk
    Strengthen the warning about use of printf() in the example program
  Michael Kerrisk
    Update cross reference: signal(7) should be signal-safety(7)

umount.2
  NeilBrown
    Revise MNT_FORCE description
      MNT_FORCE does not allow a busy filesystem to be unmounted. Only
      MNT_DETACH allows that. MNT_FORCE only tries to abort pending
      transactions, in the hope that might help umount not to block,

      Also, other filesystems than NFS support MNT_FORCE.

unshare.2
  Eugene Syromyatnikov
    Update pointer to in-kernel unshare documentation

wait.2
  Michael Kerrisk [ ]
    POSIX.1-2008 TC1 clarifies treatment of 'si_pid' for waitid() WNOHANG

cmsg.3
  Sukadev Bhattiprolu
    Add
 a scatter/gather buffer to sample code
  Michael Kerrisk
    Reorganize the text somewhat (no content changes)

crypt.3
  Konstantin Shemyak [Michael Kerrisk]
    Add description of previously undocumented 'rounds' parameter
  Konstantin Shemyak
    Encryption isn't done with SHA-xxx, but with a function based on SHA-xxx
  Konstantin Shemyak
    Clarify that ending of the salt string with '$' is optional

exit.3
  Michael Kerrisk
    Mention the prctl(2) PR_SET_PDEATHSIG operation
  Michael Kerrisk
    SEE ALSO: add get_robust_list(2)
  Michael Kerrisk
    Add a heading to delimit discussion of signals sent to other processes

exp2.3
  Alex Henrie
    Remove C89 designation

log1p.3
  Alex Henrie
    Document fixes to give EDOM or ERANGE on error

matherr.3
  Michael Kerrisk
    Note that glibc 2.27 removes the 'matherr' mechanism
  Michael Kerrisk
    Remove crufty feature test macro requirements

pow10.3
  Michael

Kerrisk
Note that pow10() is now obsolete in favor of exp10()
Also, the pow10() functions are no longer supported by glibc, starting with version 2.27.

sincos.3
Michael Kerrisk
Note that sincos() is intended to be more efficient than sin() + cos()

cciss.4
hpsa.4
Eugene Syromyatnikov [Don Brace, Meelis Roos]
Mention cciss removal in Linux 4.14
During the Linux 4.13 development cycle, the cciss driver has been removed in favor of the hpsa driver, which has been amended with some legacy board support.

initrd.4
proc.5
bootparam.7
Eugene Syromyatnikov
Update pointer to in-kernel initrd documentation

initrd.4
Eugene Syromyatnikov
Update pointer to in-kernel root over NFS documentation

intro.4
Michael Kerrisk
SEE ALSO: add mknod(1) and mknod(2)

host.conf.5
Michael Kerrisk
Add cross-reference to hosts(5)

locale.5
Marko Myllynen
Refer
to existing locales for encoding details
Since I don't think it would make sense to try to have different explanation for each glibc version on the locale(5) man page, I'm proposing that we apply the below patch so that we refer to existing locale definition files in general and not spell out the exact format or any certain locale as a definitive guideline.

nologin.5
Michael Kerrisk
Add a sentence explaining why nologin is useful

proc.5
  Eugene Syromyatnikov
    Document removal of htab-reclaim sysctl file
      This PPC-specific sysctl option has been removed in Linux 2.4.9.2,
      according to historic Linux repository commit log.
  Eugene Syromyatnikov
    Add description for cpuN lines in /proc/stat
  Eugene Syromyatnikov
    Add description for softirq line in /proc/stat
  Eugene Syromyatnikov
    Document removal of timer_stats file
  Michael Kerrisk
    Note Linux
 4.9 changes to privileges for /proc/[pid]/timerslack_ns
  Michael Kerrisk
    Show command used to mount /proc
  Michael Kerrisk
    Explicitly note in intro that some /proc files are writable
  Eugene Syromyatnikov
    Update pointer to in-kernel SysRq documentation
  Michael Kerrisk
    SEE ALSO: add sysfs(5)
  Eugene Syromyatnikov
    Update pointer to in-kernel security keys documentation
  Benjamin Peterson
    Fix path to binfmt_misc docs
  Eugene Syromyatnikov
    Update pointer to in-kernel MTRR documentation
  Eugene Syromyatnikov
    Update reference to kernel's crypto API documentation

tzfile.5
  Paul Eggert
    Sync from tzdb upstream
      This makes tzfile.5 a copy of the tzdb version, except that the
      tzdb version's first line is replaced by man-pages boilerplate.
      The new version documents version 3 format, among other things.
      Also, it removes the "Summary of the timezone information
 file
      format" section, which should no longer be needed due to
      improvements in the part of the man page.

capabilities.7
  Michael Kerrisk
    Note semantics for a program that is set-UID-root and has capabilities
      Note semantics for a program that is both set-user-ID-root and has
      file capabilities.

Michael Kerrisk [Dennis Knorr]
Note that a set-UID-root program may have an empty file capability set

cgroups.7
Michael Kerrisk
SEE ALSO: systemd-cgls(1)

cpuset.7
Eugene Syromyatnikov
Update pointer to in-kernel cpusets documentation

keyrings.7
Eugene Syromyatnikov
Document description restriction for logon keys
"logon" type has additional check that enforces colon-separated
prefix in key descriptions.
Eugene Syromyatnikov
Add pointers to kernel's documentation
Mostly because of asymmetric-keys.txt, which is outside
security/keys
for some reason.

man-pages.7
Michael Kerrisk
Expand the guidance on formatting code snippets

netlink.7
David Wilder
Change buffer size in example code about reading netlink message
Michael Kerrisk [Rick Jones]
Add a comment on 8192 buffer size in example code

pthreads.7
Michael Kerrisk
SEE ALSO: add pthread_mutexattr_destroy(3) and pthread_mutexattr_init(3)

signal.7
Michael Kerrisk
Since glibc 2.26, SIGUNUSED is no longer defined

tcp.7
Vincent Bernat
tcp_tw_recycle is removed from Linux 4.12
And it is completely broken.

unicode.7
Eugene Syromyatnikov
Update pointer to in-kernel Unicode terminal support documentation

========== Changes in man-pages-4.14 ==========

Released: 2017-11-27, Paris

Contributors

  <dilyan.palauzov@aegee.org>

Apologies if I missed anyone!

New and rewritten pages
---

pthread_spin_init.3

Michael Kerrisk [Peter Zijlstra, Thomas Gleixner, Zack Weinberg,
Florian Weimer]
New page describing pthread_spin_init(3) and pthread_spin_destroy(3)

pthread_spin_lock.3

Michael Kerrisk [Carlos O'Donell]
New page describing functions that lock and unlock spin locks
Add a page describing pthread_spin_lock(3), pthread_spin_unlock(3),
and pthread_spin_trylock(3).

smartpqi.4
Don Brace [Michael Kerrisk, G. Branden Robinson]
Document the smartpqi SCSI driver

veth.4
Tomáš Pospíšek, Eric Biederman, Michael Kerrisk
New page documenting veth virtual ethernet devices
Based on a page from Tomáš Pospíšek, with some clean-ups by mtk.

Removed pages
---

infnan.3:
Michael Kerrisk
This function was in libc4 and libc5, but never part
of glibc. It ceased to be relevant nearly 20 years
ago. Time to remove the man page.

Newly documented interfaces in existing pages
---

ioctl_userfaultfd.2
userfaultfd.2
Prakash Sangappa [Andrea Arcangeli, Mike Rapoport]
Add description for UFFD_FEATURE_SIGBUS

madvise.2
Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]
Document MADV_WIPEONFORK and MADV_KEEPONFORK
Michael Kerrisk
Note fork() and execve() semantics for wipe-on-fork setting

membarrier.2
Mathieu Desnoyers
Update membarrier manpage for 4.14

Add documentation for these new membarrier() commands:
MEMBARRIER_CMD_PRIVATE_EXPEDITED
MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED

memfd_create.2
Mike Kravetz
Add description of MFD_HUGETLB (hugetlbfs) support
hugetlbfs support for memfd_create() was recently merged by Linus
and should be in the Linux 4.14 release. To request hugetlbfs
support a new memfd_create() flag (MFD_HUGETLB) was added.

readv.2
Christoph Hellwig
Document RWF_NOWAIT added in Linux 4.14

seccomp.2
Tyler Hicks
Document the SECCOMP_GET_ACTION_AVAIL operation added in Linux 4.14
Tyler Hicks
Document the SECCOMP_FILTER_FLAG_LOG
flag added in Linux 4.14
Tyler Hicks
Document the SECCOMP_RET_LOG action added In Linux 4.14
Michael Kerrisk [Kees Cook]
Add description of SECCOMP_RET_KILL_PROCESS
Michael Kerrisk
Add SECCOMP_RET_KILL_THREAD description and rework SECCOMP_RET_KILL text
Michael Kerrisk
Document the seccomp audit logging feature added in Linux 4.14

seccomp.2
proc.5
Tyler Hicks
Document the seccomp /proc interfaces added in Linux 4.14
Document the seccomp /proc interfaces in Linux 4.14:
/proc/sys/kernel/seccomp/actions_avail and
/proc/sys/kernel/seccomp/actions_logged.

sigaltstack.2
Michael Kerrisk [Stas Sergeev]
Document the SS_AUTODISARM flag added in Linux 4.7

proc.5
Michael Kerrisk
Document /proc/locks
Oliver Ebert
Document /proc/kpagecgroup
Oliver Ebert

Add KPF_BALLOON, KPF_ZERO_PAGE, and KPF_IDLE for /proc/kpageflags

pid_namespaces.7
Michael Kerrisk
Document /proc/sys/kernel/ns_last_pid

New and changed links
---

pthread_spin_destroy.3
Michael Kerrisk
New link to new pthread_spin_init.3 page

pthread_spin_trylock.3
pthread_spin_unlock.3
Michael Kerrisk
New links to new pthread_spin_lock.3 page

Global changes

Various pages
Michael Kerrisk
Consistently use "x86-64", not "x86_64"
When referring to the architecture, consistently use "x86-64",
not "x86_64". Hitherto, there was a mixture of usages, with
"x86-64" predominant.

Various pages
G. Branden Robinson
Replace incorrect uses of Latin abbreviation "cf.".
People seem to be using "cf." ("conferre"), which means "compare",
to mean "see" instead, for which the Latin abbreviation would be
"q.v." ("quod vide" -> "which see").

In some cases "cf." might actually be the correct term but it's
still not clear what specific aspects of a function/system call
one is supposed to be comparing.

Changes to individual pages
---

capget.2
Michael Kerrisk

Clarify discussion of kernels that have no VFS capability support

clock_getres.2
Michael Kerrisk
clock_gettime() may be implemented in the vDSO

clone.2
Michael Kerrisk
Warn that the clone() wrapper modifies child_stack in the parent
Michael Kerrisk
Rework the discussion of the historical CLONE_PID for clarity
Michael Kerrisk
Add NOTES heading
Michael Kerrisk
Add a reference to new veth(4) page
Michael Kerrisk
Eliminate some redundant phrasing in discussion of "fn()"
Michael Kerrisk
Combine redundant paragraphs describing child_stack==NULL
Michael Kerrisk
Note that child_stack can be NULL when using the raw system call
Michael Kerrisk
Remove a redundant paragraph

connect.2
Michael Kerrisk
Clarify that ECONNREFUSED is for stream sockets

fcntl.2
Michael Kerrisk [Jens Axboe]
Inode read-write hints persist only until the filesystem is unmounted

flock.2
Michael Kerrisk
Move NFS details to a headed subsection
Michael Kerrisk [Petr Uzel]
Placing an exclusive lock over NFS requires the file is open for writing

fork.2
Rik van Riel [Colm MacCárthaigh, Michael Kerrisk]
Document effect of MADV_WIPEONFORK

fork.2
getsid.2
setpgid.2
setsid.2
Ahmad Fatoum
Include <sys/types.h> in SYNOPSIS to obtain declaration of pid_t

fsync.2
  Craig Ringer
    ERRORS: add ENOSPC

getcpu.2
  Michael Kerrisk
    getcpu() may have an implementation in the vDSO

getpid.2
  Michael Kerrisk
    Mention that PID == TGID, and note contrast with TID
  Michael Kerrisk
    SEE ALSO: add gettid(2)

getrandom.2
  Michael Kerrisk [Fabio Scotoni]
    ERRORS: add ENOSYS

getrlimit.2
   Michael Kerrisk [Scott Vokes]
    Make it clear RLIMIT_NPROC is a limit on current number of processes
      https://twitter.com/silentbicycle/status/893849097903505409

gettid.2
  Michael Kerrisk
    SEE ALSO: add getpid(2)

gettimeofday.2
  Michael Kerrisk
    Note that gettimeofday() may be implemented in the vDSO

ioctl_userfaultfd.2
  Michael Kerrisk
    Rework version information for feature bits

io_submit.2
  Goldwyn Rodrigues
    Add iocb details to io_submit
      Add more information about the iocb structure. Explains the
      fields of the I/O control block structure which is passed to the
      io_submit() call.
  Michael Kerrisk
    Add cross-reference to io_getevents(2)
  Michael Kerrisk
    Cross reference pwritev(2) in discussion of RWF_SYNC and RWF_DSYNC

membarrier.2

Mathieu Desnoyers
Update example to take TSO into account
The existing example given specifically states that
it focus on
x86 (TSO memory model), but gives a read-read vs write-write
ordering example, even though this scenario does not require
explicit barriers on TSO.

So either we change the example architecture to a weakly-ordered
architecture, or we change the example to a scenario requiring
barriers on x86.

Let's stay on x86, but provide a Dekker as example instead.
Mathieu Desnoyers
Adapt the MEMBARRIER_CMD_SHARED return value documentation to
reflect that it now returns -EINVAL when issued on a system
configured for nohz_full.

memfd_create.2
Michael Kerrisk
Note the limit for size of 'name'

mkdir.2
Michael Kerrisk [Raghavendra D Prabhu]
ERRORS: document EINVAL error for invalid filename

mmap.2
Michael Kerrisk
Add explicit text noting that 'length' must be greater than 0
Currently, this detail is hidden in ERRORS.
Make it clear in
the main text.
Michael Kerrisk
SEE ALSO: add ftruncate(2)

mremap.2
Mike Kravetz [Florian Weimer, Jann Horn]
Add description of old_size == 0 functionality
Since at least the 2.6 time frame, mremap() would create a new
mapping of the same pages if 'old_size == 0'. It would also leave
the original mapping. This was used to create a 'duplicate
mapping'.

A recent change was made to mremap() so that an attempt to create a
duplicate a private mapping will fail.
Michael Kerrisk [Michal Hocko, Mike Kravetz]
BUGS: describe older behavior for old_size==0 on private mappings
Explain the older behavior, and why it changed. This is a

follow-up to Mike Kravetz's patch documenting the behavior
for old_size==0 with shared mappings.
Michael Kerrisk
Reformat EINVAL errors as a list

open.2
Michael Kerrisk

By contrast with O_RDONLY, no file permissions are required for O_PATH
Note one of the significant advantages of O_PATH: many of the
operations applied to O_PATH file descriptors don't require
read permission, so there's no reason why the open() itself
should require read permission.
Michael Kerrisk
Note use of O_PATH to provide O_EXEC functionality
Michael Kerrisk
Mention O_PATH file descriptor use with fexecve(3)
Michael Kerrisk
ERRORS: document EINVAL error for invalid filename
Michael Kerrisk
Clarify that O_TMPFILE creates a *regular* file
Michael Kerrisk
Make it explicit that O_CREAT creates a regular file
Michael Kerrisk
Since glibc 2.26, the open() wrapper always uses the openat() syscall
Michael Kerrisk
Change pathname used in discussion of rationale for openat()
/path/to/file is a little confusing as a pathname
Michael Kerrisk
Make the purpose of open() a little clearer at the start of the page

open_by_handle_at.2
NeilBrown
Clarifications needed due to NFS reexport
NeilBrown [Lennart Poettering]
Clarify MAX_HANDLE_SZ
As hinted in the kernel source, MAX_HANDLE_SZ is a hint
rather than a promise.

pipe.2
Michael Kerrisk [Marin H.]
Since Linux 4.5, fcntl() can be used to set O_DIRECT for a pipe
See https://bugzilla.kernel.org/show_bug.cgi?id=197917

pivot_root.2
Michael Kerrisk
SEE ALSO: add switch_root(8)

pkey_alloc.2
  Breno Leitao
    Fix argument order
      Currently pkey_alloc() syscall has two arguments, and the very
      first argument is still not supported and should be set to zero.
      The second argument is the one that should specify the
      page access rights.

ptrace.2
  Michael Kerrisk
    SEE ALSO: add ltrace(1)

reboot.2
  Michael Kerrisk [Micha Zegan]
     Fix bogus description of reboot() from non-initial PID namespace
      The current text was confused (mea culpa). No signal is sent to
      the init() process. Rather, depending on the 'cmd' given to
      reboot(), the 'group_exit_code' value will set to either SIGHUP or
      SIGINT, with the effect that one of those signals is reported to
      wait() in the parent process.

      See https://bugzilla.kernel.org/show_bug.cgi?id=195899
  Michael Kerrisk
    SEE ALSO: remove reboot(8) (synonym for halt(8)); add shutdown(8)
  Michael Kerrisk
    SEE ALSO: add systemctl(1), systemd(1)

recvmmsg.2
sendmmsg.2
  Elliot Hughes
    Type fixes in SYNOPSIS
      [mtk: The raw system calls use "unsigned int", but the glibc
      wrappers have "int" for the 'flags' argument.]

sched_setaffinity.2
  Michael Kerrisk
    SEE ALSO: add numactl(8)

sched_yield.2
  Michael Kerrisk [Peter Zijlstra]
    sched_yield()
 is intended for use with real-time scheduling policies

seccomp.2
  Michael Kerrisk [Adhemerval Zanella, Florian Weimer, Kees Cook]
    Add some Caveats regarding the use of seccomp filters
  Michael Kerrisk
    Document the "default" filter return action

The kernel defaults to either SECCOMP_RET_KILL_PROCESS
or SECCOMP_RET_KILL_THREAD for unrecognized filter
return action values.
Michael Kerrisk [Kees Cook]
Change SECCOMP_RET_ACTION to SECCOMP_RET_ACTION_FULL
In Linux 4.14, the action component of the return value
switched from being 15 bits to being 16 bits. A new macro,
SECCOMP_RET_ACTION_FULL, that masks the 16 bits was added,
to replace the older SECCOMP_RET_ACTION.
Michael Kerrisk
Explicitly note that other threads survive SECCOMP_RET_KILL_THREAD
Michael Kerrisk
SEE ALSO: add strace(1)

send.2
Grégory Vander Schueren
Add EALREADY to ERRORS

setns.2
Michael Kerrisk
SEE ALSO: add nsenter(1)

shmop.2
Yubin Ruan
Note that return value of shmat() is page-aligned

sigaction.2
Michael Kerrisk
Rework discussion of SA_SIGINFO handler arguments
Expand and rework the text a little, in particular adding
a reference to sigreturn(2) as a source of further
information about the ucontext argument.
Michael Kerrisk
Mention that libc sets the act.sa_restorer field

sigaltstack.2
Michael Kerrisk [Walter Harms]
Reword BUGS text to be a little clearer
Michael Kerrisk
Add explicit error handling to example code
Michael Kerrisk
Add use of sigaction() to example code

sigreturn.2
Michael Kerrisk
Make it a little clearer that a stack frame is created by the kernel
Michael Kerrisk
glibc has a simple wrapper for sigreturn() that returns ENOSYS

splice.2
  Michael Kerrisk
    Since Linux 2.6.31,'fd_in'
 and 'fd_out' may both refer to pipes

stat.2
  Michael Kerrisk [Richard Knutsson]
    Use lstat() instead of stat()
      It's more logical to use lstat() in the example code,
      since one can then experiment with symbolic links, and
      also the S_IFLNK case can also occur.
  NeilBrown
    Correct AT_NO_AUTOMOUNT text and general revisions
      Expand on the relationship between fstatat() and the other three
      functions, and improve the description of AT_NO_AUTOMOUNT.
      Specifically, both stat() and lstat() act the same way with
      respect to automounts, and that behavior matches fstatat() with
      the AT_NO_AUTOMOUNT flag.

statfs.2
  Michael Kerrisk
    Add some comments noting filesystems that are no longer current
  Michael Kerrisk
    Add comments describing a few filesystem types

time.2
  Michael Kerrisk
    Note that time() may be implemented in the vDSO
  Michael Kerrisk
  [Victor Porton]
    Language fix-up: clarify that "tasks" means "work"
      See https://bugzilla.kernel.org/show_bug.cgi?id=197183

userfaultfd.2
  Mike Rapoport
    BUGS: document spurious UFFD_EVENT_FORK

write.2
fsync.2
close.2
  NeilBrown [Jeff Layton]
    Update description of error codes
      Since 4.13, errors from writeback are more reliably reported
      to all file descriptors that might be relevant.

      Add notes to this effect, and also add detail about ENOSPC and
      EDQUOT which can be delayed in a similar many to EIO - for NFS

in particular.

abort.3
Michael Kerrisk
Starting with glibc 2.27, abort() does not attempt to flush streams
Michael Kerrisk
SEE ALSO: add assert(3)

backtrace_symbols_fd(3)
Stefan Puiu [Walter Harms]
backtrace_symbols_fd() can trigger a call to malloc()

daemon.3
Michael Kerrisk
SEE ALSO: add daemon(7), logrotate(8)

errno.3
Michael
Kerrisk
Note use of errno(1) to look up error names and numbers
Michael Kerrisk
Update error list for POSIX.1-2008
POSIX.1-2008 specified a couple of new errors not present in
POSIX.1-2001.
Michael Kerrisk [Walter Harms]
Note the use of perror(3) and strerror(3)
Michael Kerrisk
Recast the advice against manually declaring 'errno'
Recast the advice against manually declaring 'errno' to
a more modern perspective. It's 13 years since the original
text was added, and even then it was describing old behavior.
Cast the description to be about behavior further away in
time, and note more clearly that manual declaration will
cause problems with modern C libraries.
Michael Kerrisk
Add some missing errors
Michael Kerrisk
Error numbers are positive values (rather than nonzero values)
POSIX.1-2008 noted the explicitly
the change (to align with
the C standards) that error numbers are positive, rather
than nonzero.
Michael Kerrisk
Reorganize the text and add some subheadings
Restructure the text and add some subheadings for better
readability. No (intentional) content changes.
Michael Kerrisk [Wesley Aptekar-Cassels]
Note that error numbers vary somewhat across architectures

Added after a patch from Wesley Aptekar-Cassels that proposed
to add error numbers to the text.
Michael Kerrisk
Note the <errno.h> also provides the symbolic error names
Michael Kerrisk [Walter Harms]
Explicitly note that error numbers vary also across UNIX systems

exec.3
Michael Kerrisk
glibc 2.24 dropped CWD from the default path
Document the glibc 2.24 change that dropped CWD from the default
search path employed by execlp(), execvp() and execvpe() when
PATH
is not defined.

fexecve.3
Michael Kerrisk
O_PATH file descriptors are also usable with fexecve()
Cristian Rodríguez
fexecve() is now implemented with execveat(2), where available
Michael Kerrisk
Add some detail on the glibc implementation of fexecve() via execveat(2)

ffs.3
Michael Kerrisk
glibc 2.27 relaxes the FTM requirements for ffsl() and ffsll()

get_nprocs_conf.3
Michael Kerrisk
SEE ALSO: add nproc(1)

lround.3
Michael Kerrisk [David Eckardt]
Clarify that lround() rounds *halfway cases" away from zero
See https://bugzilla.kernel.org/show_bug.cgi?id=194601

makedev.3
Adrian Bunk
glibc has deprecated exposing the definitions via <sys/types.h>

mallinfo.3
Jakub Wilk
Fix the example
Remove reference to non-standard "tlpi_hdr.h" and replace calls to
functions that were declared in this header.

malloc.3
Michael Kerrisk

SEE ALSO: add valgrind(1)

popen.3
Michael Kerrisk
Add a cross reference to Caveats in system(3)
All of the same risks regarding system() also apply to popen().

pthread_detach.3
Michael Kerrisk [Rahul Bedarkar]
Improve sentence describing freeing of resources on process termination
As reported by Rahul, the existing sentence could be read as
meaning that resources of joined and terminated detached
threads are freed only at process termination. Eliminate
that possible misreading.

pthread_yield.3
Michael Kerrisk [Peter Zijlstra]
pthread_yield() is intended for use with real-time scheduling policies

setlocale.3
Michael Kerrisk [Kištof Želechovski]
The standards do not specify all of the locale categories

sockatmark.3
Seonghun Lim
Fix cruft in code example

stdio.3
Michael Kerrisk
Use proper section cross references in function list
Michael Kerrisk
Remove crufty
reference to pc(1)

sysconf.3
Michael Kerrisk
Mention get_nprocs_conf(3)
Mention get_nprocs_conf(3) in discussion of _SC_NPROCESSORS_CONF
and _SC_NPROCESSORS_ONLN.

system.3
Michael Kerrisk [Bastien Roucaries]
Create a "Caveats" subsection to hold warnings about the use of system()
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=882222
Michael Kerrisk [Bastien Roucaries]
Mention PATH explicitly in discussion of system() and set-UID programs
Michael Kerrisk [Bastien Roucaries]
Note that user input for system() should be carefully sanitized

Michael Kerrisk
Mention file capabilities in discussion of privileged programs
Michael Kerrisk
Correctly note which shell Debian uses as (noninteractive) /bin/sh

core.5
Michael Kerrisk
Add some notes on systemd and core dumps
Michael Kerrisk
Dumps are not produced if core_pattern is empty and core_uses_pid is 0

Michael Kerrisk [Per Böhlin]
RLIMIT_CORE is not enforced when piping core dump to a program
Michael Kerrisk
SEE ALSO: add systemd-coredump(8)
Michael Kerrisk
SEE ALSO: add coredumpctl(1)

filesystems.5
Michael Kerrisk [Jonny Grant]
Replace crufty URL reference for 'smb' with up-to-date URL
Michael Kerrisk [Jonny Grant]
Refer to VFAT as an extended FAT (not DOS) filesystem

proc.5
Michael Kerrisk [Miklos Szered, Ram Pai]
Correct the description of the parent mount ID for /proc/PID/mountinfo
Oliver Ebert
Add mmap-exclusive bit for /proc/[pid]/pagemap
Marcus Folkesson
Update description of /proc/<pid>/oom_score
Lucas Werkmeister
Clarify permissions in /proc/[pid]/fd/
Michael Kerrisk
Add reference to pid_namespaces(7) for /proc/sys/kernel/ns_last_pid

shells.5
Michael Kerrisk
SEE ALSO: add pam_shells(8)

sysfs.5
Michael Kerrisk
Add a brief explanation
of /sys/kernel
Michael Kerrisk
Add a brief description of /sys/class/net
Michael Kerrisk
Add a brief description of /sys/kernel/mm

Michael Kerrisk
Add brief description of /sys/kernel/debug/tracing
Michael Kerrisk
Add a description of /sys/kernel/mm/hugepages

arp.7
Michael Kerrisk
SEE ALSO: add arpd(8)

capabilities.7
Michael Kerrisk
Add a reference to xattr(7) in the discussion of extended attributes
Michael Kerrisk
SEE ALSO: add captest(8)

epoll.7
Michael Kerrisk
Note existence of kcmp() KCMP_EPOLL_TFD operation

fifo.7
Michael Kerrisk
Refer reader to pipe(7) for details of I/O semantics of FIFOs

hier.7
Michael Kerrisk
SEE ALSO: add file-hierarchy(7)

icmp.7
Michael Kerrisk
SEE ALSO: add rdisc(8)

man-pages.7
Michael Kerrisk
Note that "x86-64" is generally preferred over "x86_64"
G. Branden Robinson
Add a use case for real
minus character

namespaces.7
Michael Kerrisk
Add a reference to new veth(4) page
Michael Kerrisk
EXAMPLE: refer also to example in clone(2)

pid_namespaces.7
Michael Kerrisk
SEE ALSO: add reboot(2)
Add because reboot(2) has special semantics for non-initial

PID namespaces.

pthreads.7
  Michael Kerrisk
    SEE ALSO: add pthread_spin_init(3) and pthread_spin_lock(3)

socket.7
  Michael Kerrisk [Petr Malat, Tobias Klausmann]
    Correct the description of SO_RXQ_OVFL

standards.7
  Michael Kerrisk
    SEE ALSO: add getconf(1), confstr(3), pathconf(3), sysconf(3)

user_namespaces.7
  Christian Brauner [Michael Kerrisk]
    Document new 340 line idmap limit

ld.so.8
  Michael Kerrisk [Yubin Ruan]
    Simplify language around conferring capabilities
      The statement "conferring permitted or effective capabilities"
      to the process is somewhat redundant. Binaries with capabilities
       confer capabilities only to those process capability sets, so it's
      simpler to just say "confers capabilities to the process".

========== Changes in man-pages-4.15 ==========

Released: 2018-02-02, Palo Alto

QingFeng Hao <haoqf@linux.vnet.ibm.com>
Ricardo Biehl Pasquali <pasqualirb@gmail.com>
roblabla <man-pages@roblab.la>
Roman Gushchin <guro@fb.com>
Shawn Landden <slandden@gmail.com>
Stefan Hajnoczi <stefanha@redhat.com>
Stefan Raspl <raspl@linux.vnet.ibm.com>
Tejun Heo <tj@kernel.org>

Apologies if I missed anyone!

New and rewritten pages
----

s390_sthyi.2
  QingFeng Hao [Michael Kerrisk]
    New page for s390-specific s390_sthyi(2)

network_namespaces.7
  Michael Kerrisk
    New page describing network namespaces
      Based on content moved from namespaces(7)

vsock.7
  Stefan Hajnoczi [Jorgen Hansen, Michael Kerrisk]
    Document the VSOCK socket address family

Newly documented interfaces in existing pages
---

cgroups.7
  Michael Kerrisk [Tejun Heo]
     Document cgroups v2 "thread mode"
  Michael Kerrisk [Tejun Heo]
    Document cgroup v2 delegation via the 'nsdelegate' mount option
  Michael Kerrisk

Document the cgroup.max.depth and cgroup.max.descendants files
Michael Kerrisk
Document 'release_agent' mount option
Michael Kerrisk [Roman Gushchin]
Document /sys/kernel/cgroup/delegate
Michael Kerrisk [Roman Gushchin]
Document /sys/kernel/cgroup/features
Michael Kerrisk [Roman Gushchin]
Document cgroups v2 cgroup.stat file

Global changes

Various pages
G. Branden Robinson
Standardize on "nonzero"
Also add this term to the style guide in man-pages(7).

Changes to individual pages
---

bpf.2
Nikolay Borisov
Sync list of supported map types with 4.14 kernel

copy_file_range.2
Michael Kerrisk
Library support was added in glibc 2.27
Shawn Landden
glibc provides a
user-space emulation where the system call is absent
Florian Weimer
EFBIG errors are possible, similar to write(2)
Michael Kerrisk
ERRORS: add EISDIR
Michael Kerrisk
Order ERRORS alphabetically
Michael Kerrisk
Add comment to code example explaining use of syscall(2)

fcntl.2
read.2
write.2
NeilBrown
Document "Lost locks" as cause for EIO.
If an advisory lock is lost, then read/write requests on any

affected file descriptor can return EIO - for NFSv4 at least.

memfd_create.2
  Michael Kerrisk
    glibc support for memfd_create() was added in version 2.27

mlock.2
  Michael Kerrisk
    Make details for MLOCK_ONFAULT a little more explicit
  Michael Kerrisk
    glibc support for mlock2() is added in version 2.27

mmap.2
  John Hubbard [Michael Hocko]
    MAP_FIXED is no longer discouraged
      MAP_FIXED has been widely used for a very long time, yet the man
      page
 still claims that "the use of this option is discouraged".
  John Hubbard
    MAP_FIXED updated documentation
        -- Expand the documentation to discuss the hazards in
          enough detail to allow avoiding them.

        -- Mention the upcoming MAP_FIXED_SAFE flag.

        -- Enhance the alignment requirement slightly.

mount.2
  Keno Fischer [Michael Kerrisk]
    Add EINVAL error condition when MS_BINDing MNT_LOCKED submounts

mprotect.2
pkey_alloc.2
  Michael Kerrisk
    Glibc support for memory protection keys was added in version 2.27

perf_event_open.2
  Michael Kerrisk
    SEE ALSO: add perf(1)

pkey_alloc.2
  Michael Kerrisk
    Clarify description of pkey_alloc() 'flags' argument

prctl.2
  Michael Kerrisk
    Defer to capabilities(7) for discussion of the "keep capabilities" flag

recvmmsg.2
sendmmsg.2
  Nikola Forró
    Point out that error handling is unreliable

seccomp.2
  Michael Kerrisk
     Clarify that SECCOMP_RET_TRAP SIGSYS signal is thread-directed

syscalls.2
  Michael Kerrisk
    Add s390-specific s390_sthyi(2) to syscall list

unshare.2
  Michael Kerrisk
    Clarify that EUSERS occurred only until kernel 4.8

errno.3
  Michael Kerrisk
    'errno -s' can be used to search for errors by string in description
  Michael Kerrisk
    Add Linux error text corresponding to ENOMEM

fgetpwent.3
  Michael Kerrisk
    Add missing ATTRIBUTES preamble

fts.3
  Michael Kerrisk [Pradeep Kumar]
    fts_pathlen = strlen(fts_path) + strlen(fts_name)

fuse.4
  Michael Kerrisk
    Places errors in alphabetical order (no content changes)

veth.4
  Michael Kerrisk
    Add network_namespaces(7)

sysfs.5
  Michael Kerrisk
    Refer to cgroups(7) for information about files in /sys/kernel/cgroup

capabilities.7
  Michael Kerrisk
    Note which capability sets are affected by SECBIT_NO_SETUID_FIXUP
      Note explicitly

that SECBIT_NO_SETUID_FIXUP is relevant for
the permitted, effective, and ambient capability sets.
Michael Kerrisk
Deemphasize the ancient prctl(2) PR_SET_KEEPCAPS command
The modern approach is SECBITS_KEEP_CAPS.
Michael Kerrisk
Clarify effect of CAP_SETFCAP
Make it clear that CAP_SETFCAP allows setting arbitrary
capabilities on a file.
Michael Kerrisk
Clarify which capability sets are effected by SECBIT_KEEP_CAPS
This flag has relevance only for the process permitted and
effective sets.
Michael Kerrisk
Rephrase CAP_SETPCAP description
* Mention kernel versions.
* Place current kernel behavior first
Michael Kerrisk
SECBIT_KEEP_CAPS is ignored if SECBIT_NO_SETUID_FIXUP is set
Michael Kerrisk
Ambient set is also cleared when UIDs are set to nonzero value

cgroups.7
Michael Kerrisk
Add a more complete description
of cgroup v1 named hierarchies
Michael Kerrisk
Add a section on unmounting cgroup v1 filesystems
Michael Kerrisk
Add subsection describing cgroups v2 subtree delegation
Michael Kerrisk
Mention ENOENT error that can occur when writing to subtree_control file
Michael Kerrisk
Add list of currently available version 2 controllers
Nikolay Borisov
Add information about RDMA controller
Michael Kerrisk
Rewrite the description of cgroup v2 subtree control
Michael Kerrisk [Tejun Heo]
Note Linux 4.11 changes to cgroup v2 delegation containment rules
Michael Kerrisk
systemd(1) nowadays automatically mounts the cgroup2 filesystem
Michael Kerrisk
Clarify that cgroup.controllers is read-only
Michael Kerrisk
Elaborate a little on problems of splitting threads across cgroups in v1
Michael Kerrisk [Tejun Heo]
Tweak the description of delegation of cgroup.subtree_control

ip.7
  Ricardo Biehl Pasquali
    INADDR_* values cannot be assigned directly to 's_addr'
  Michael Kerrisk
    s/INADDR_ANY/INADDR_LOOPBACK/ in discussion of htonl()
      INADDR_LOOPBACK is a better example, since it is not
      byte-order neutral.

namespaces.7
network_namespaces.7
  Michael Kerrisk
    Move content from namespaces(7) to network_namespaces(7)

pid_namespaces.7
  Michael Kerrisk
    SEE ALSO: add mount_namespaces(7)

sched.7
  Michael Kerrisk [Andrea Parri]
    Correctly describe effect of priority changes for RT threads
      The placement of a thread in the run queue for its new
      priority depends on the direction of movement in priority.
      (This appears to contradict POSIX, except in the case of
      pthread_setschedprio().)

user_namespaces.7
  Michael Kerrisk
    Mention NS_GET_OWNER_UID ioctl() operation

========== Changes in man-pages-4.16 ==========

Tomi Salminen <tsalminen@forcepoint.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

membarrier.2
  Mathieu Desnoyers [Michael Kerrisk]
    Document new membarrier commands introduced in Linux 4.16
      Document the following membarrier commands introduced in
      Linux 4.16:

          MEMBARRIER_CMD_GLOBAL_EXPEDITED
            (the old enum label MEMBARRIER_CMD_SHARED is now an
            alias to preserve header backward compatibility)
          MEMBARRIER_CMD_REGISTER_GLOBAL_EXPEDITED
          MEMBARRIER_CMD_PRIVATE_EXPEDITED_SYNC_CORE
          MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_SYNC_CORE

mmap.2

Jan Kara [Ross Zwisler, Michael Kerrisk]
Add description of MAP_SHARED_VALIDATE and MAP_SYNC
Michal Hocko [John Hubbard, Michael Kerrisk, Jann Horn]
Document new MAP_FIXED_NOREPLACE flag
4.17+ kernels offer a new MAP_FIXED_NOREPLACE flag which allows
the caller to atomically probe for a given address range.

readv.2
io_submit.2
Jürg Billeter
Document RWF_APPEND added in Linux 4.16

capabilities.7
Michael Kerrisk
Describe file capability versioning
Michael Kerrisk [Serge E. Hallyn]
Document namespaced-file capabilities
[There's still more work to be done on this new text]

Changes to individual pages
---

bpf.2
Michael Kerrisk
Update list of architectures that support JITed eBPF
And note kernel version numbers where support is added.
Michael Kerrisk
Kernel 4.15 added CONFIG_BPF_JIT_ALWAYS_ON

This causes the JIT compiler to be always on and
forces bpf_jit_enable to 1.

execve.2
Michael Kerrisk
Note that describing execve as "executing a new process" is misleading
This misdescription is so common that it's worth calling it out
explicitly.
Michael Kerrisk
More explicitly describe effect of execve() in the opening paragraph

fallocate.2
Michael Kerrisk
Since Linux 4.16, Btrfs supports FALLOC_FL_ZERO_RANGE

getrlimit.2
Michael Kerrisk
CAP_SYS_RESOURCE capability is required in *initial user namespace*

io_submit.2
  Michael Kerrisk
    Add kernel version numbers for various 'aio_rw_flags' flags
  Michael Kerrisk
    Place 'aio_rw_flags' in alphabetical order

mmap.2
  Jann Horn
    MAP_FIXED is okay if the address range has been reserved
      Clarify that MAP_FIXED is appropriate if the specified address
      range has been reserved using an existing mapping,
 but shouldn't
      be used otherwise.
  Michael Kerrisk
    Move the text on MAP_FIXED to NOTES
      This text has become rather long, making it somewhat
      unwieldy in the discussion of the mmap() flags. Therefore,
      move it to NOTES, with a pointer in DESCRIPTION referring
      the reader to NOTES.
  Michael Kerrisk [Heinrich Schuchardt]
    Clarify that when addr==NULL, address chosen by kernel is page-aligned
  Michael Kerrisk
    Add a little historical detail on the obsolete MAP_DENYWRITE

mount.2
  Michael Kerrisk
    ERRORS: add EBUSY for the case of trying to stack same mount twice
  Michael Kerrisk
    Remove a couple of obsolete EBUSY errors
      As far as I can tell, these EBUSY errors disappeared
      with the addition of stackable mounts in Linux 2.4.

msgget.2
semget.2
shmget.2
  Michael Kerrisk
    The purpose of "flags" == 0 is to obtain ID of an existing IPC object

  This was implied in these pages, but the meaning of "flags" == 0
      could be more explicit, as indicated by questions such as
      https://stackoverflow.com/questions/49833569/flag-value-of-semget-function

open.2
  Jann Horn
    Document more -ETXTBSY conditions
  Jakub Wilk
    Add missing argument for snprintf() in example code

perf_event_open.2
  Song Liu
    Add type kprobe and uprobe
      Two new types kprobe and uprobe are being added to
      perf_event_open(), which allow creating kprobe or
      uprobe with perf_event_open. This patch adds
      information about these types.

ptrace.2
  Jann Horn
    Copy retval info for SECCOMP_GET_FILTER to right section
      The "RETURN VALUE" section made a claim that was incorrect for
      PTRACE_SECCOMP_GET_FILTER. Explicitly describe the behavior of
      PTRACE_SECCOMP_GET_FILTER in the "RETURN VALUE" section (as
      usual), but leave the
 now duplicate description in the section
      describing PTRACE_SECCOMP_GET_FILTER, since the
      PTRACE_SECCOMP_GET_FILTER section would otherwise probably become
      harder to understand.

readv.2
  Michael Kerrisk
    Remove redundant sentence

seccomp.2
  Michael Kerrisk
    Note that execve() may change syscall numbers during life of process
      On a multiarch/multi-ABI platform such as modern x86, each
      architecture/ABI (x86-64, x32, i386)has its own syscall numbers,
      which means a seccomp() filter may see different syscall numbers
      over the life of the process if that process uses execve() to
      execute programs that has a different architectures/ABIs.
  Michael Kerrisk
    Note which architectures support seccomp BPF
  Michael Kerrisk
    In EXAMPLE, clearly note that x32 syscalls are >= X32_SYSCALL_BIT

shutdown.2
  Carsten Grohmann
    SEE ALSO: add close(2)

syscall.2
  Adam
 Borowski
    Add riscv

wait.2

Michael Kerrisk [Robin Kuzmin]
wait() and waitpid() block the calling thread (not process)

wait4.2
Michael Kerrisk [Martin Mares]
Soften the warning against the use of wait3()/wait4()
These functions are nonstandard, but there is no replacement.

See https://bugzilla.kernel.org/show_bug.cgi?id=199215

crypt.3
encrypt.3
Carlos O'Donell [Michael Kerrisk]
Add notes about _XOPEN_CRYPT
The distribution may choose not to support _XOPEN_CRYPT in the case that the distribution has transitioned from glibc crypt to libxcrypt.

fseek.3
Michael Kerrisk [Andy Owen]
ERRORS: EBADF should be ESPIPE
Michael Kerrisk
Improve EPIPE error text

getcwd.3
Carlos O'Donell
Mention that "(unreachable)" is no longer returned for glibc >= 2.27.

makedev.3
Michael Kerrisk
Since glibc 2.28, <sys/types.h> no longer defines these macros

pthread_create.3
Frederic Brault
Note default thread stack size for several architectures

tsearch.3
Jann Horn
Clarify items vs nodes
The manpage claimed that tsearch() returns a pointer to a data item. This is incorrect; tsearch() returns a pointer to the corresponding tree node, which can also be interpreted as a pointer to a pointer to the data item.

Since this API is quite unintuitive, also add a clarifying sentence.
Jann Horn
tdelete() can return dangling pointers

POSIX says that deleting the root node must cause tdelete() to
return some unspecified non-NULL pointer. Glibc implements it by
returning a dangling pointer to the (freed) root node.
Therefore, explicitly note that tdelete() may return bad pointers
that must not be accessed.

elf.5
Michael Kerrisk
SEE ALSO: add patchelf(1)

filesystems.5
Michael Kerrisk
Add an entry for tmpfs(5)

group.5
Michael Kerrisk
SEE ALSO: add vigr(8)

passwd.5
Michael Kerrisk
SEE ALSO: add vipw(8)

sysfs.5
Michael Kerrisk
Add brief note on /sys/fs/smackfs

tmpfs.5
Mike Frysinger
Document current mount options
Some of this content is moved from the mount(8) man page.
Style was based on proc(5) sections.
Michael Kerrisk
Remove reference to mount(8) for discussion of mount options
The mount options are now described in this page.
Michael Kerrisk
SEE ALSO: add Documentation/vm/transhuge.txt
Michael Kerrisk
Reformat 'huge' and 'mpol' mount option values as lists
Michael Kerrisk
Describe 'mpol' mount options
Based on text from Documentation/filesystems/tmpfs.txt.
Michael Kerrisk
Document 'huge' mount options
Based on text from Documentation/vm/transhuge.txt.
Michael Kerrisk
SEE ALSO: add set_mempolicy(2)
Michael Kerrisk
Document mpol=local mount option

capabilities.7
  Michael Kerrisk
    Remove redundant mention of PTRACE_SECCOMP_GET_FILTER

cgroups.7
  Michael Kerrisk
    cgroup.events transitions generate POLLERR as well as POLLPRI

mount_namespaces.7
  Michael Kerrisk
    Note another case where shared "peer groups" are formed

namespaces.7
  Michael Kerrisk [Konstantin Khlebnikov]
    Mention that device ID should also be checked when comparing NS symlinks
      When comparing two namespaces symlinks to see if they refer to
      the same namespace, both the inode number and the device ID
      should be compared. This point was already made clear in
      ioctl_ns(2), but was missing from this page.
  Michael Kerrisk
    Note an idiosyncrasy of /proc/[pid]/ns/pid_for_children
      /proc/[pid]/ns/pid_for_children has a value only after first
      child is
 created in PID namespace. Verified by experiment.

network_namespaces.7
  Michael Kerrisk
    Network namespaces isolate the UNIX domain abstract socket namespace
  Michael Kerrisk
    Add cross reference to unix(7)
      For further information on UNIX domain abstract sockets.

posixoptions.7
  Carlos O'Donell
    Expand XSI Options groups
      We define in detail the X/Open System Interfaces i.e. _XOPEN_UNIX
      and all of the X/Open System Interfaces (XSI) Options Groups.

      The XSI options groups include encryption, realtime, advanced
      realtime, realtime threads, advanced realtime threads, tracing,
      streams, and legacy interfaces.
  Michael Kerrisk
    Use a more consistent, less cluttered layout for option lists
  Michael Kerrisk
    Make function lists more consistent and less cluttered
      Use more consistent layout for lists of functions, and
      remove punctuation from the lists

to make them less cluttered.

socket.7
  Michael Kerrisk [Tomi Salminen]
    Fix error in SO_INCOMING_CPU code snippet
      The last argument is passed by value, not reference.

time.7
  Michael Kerrisk [Enrique Garcia]
    Mention clock_gettime()/clock_settime() rather than [gs]ettimeofday()
      gettimeofday() is declared obsolete by POSIX. Mention instead
      the modern APIs for working with the realtime clock.

      See https://bugzilla.kernel.org/show_bug.cgi?id=199049

unix.7
  Michael Kerrisk [Rusty Russell]
    ERRORS: add EBADF for sending closed file descriptor with SCM_RIGHTS

vdso.7
  Michael Kerrisk
    VDSO symbols (system calls) are not visible to seccomp(2) filters

xattr.7
  Michael Kerrisk
    SEE ALSO: add selinux(8)

ld.so.8
  Mike Frysinger
    Make lack of separator escaping explicit
      Make it clear that the delimiters in LD_PRELOAD, LD_LIBRARY_PATH,
      and LD_AUDIT cannot be escaped
 so people don't try various methods
      (such as \:) to workaround it.
  Michael Kerrisk
    Remove unneeded mention of PATH in discussion of LD_LIBRARY_PATH
      This brief sentence doesn't add value to the text.

========== Changes in man-pages-5.00 ==========

Released: 2019-03-06, Munich

Contributors

Apologies if I missed anyone!

New and rewritten pages

---

s390_guarded_storage.2
  Eugene Syromyatnikov
    New page documenting s390_guarded_storage(2) s390-specific system call

address_families.7
  Michael Kerrisk [Eugene Syromyatnikov]
    New page that contains details of socket address families
      There is too much detail in socket(2). Move most of it into
      a new page instead.

bpf-helpers.7
  Michael
 Kerrisk [Daniel Borkmann, Quentin Monnet]
    Add new man page for eBPF helper functions
      (autogenerated from kernel source files)

Removed Pages
---

mdoc.7
mdoc.samples.7
  Michael Kerrisk [Ingo Schwarze]
    Remove mdoc(7) and mdoc.samples(7)
      groff_mdoc(7) from the groff project provides a better
      equivalent of mdoc.samples(7) and the 'mandoc' project
      provides a better mdoc(7). And nowadays, there are virtually
      no pages in "man-pages" that use mdoc markup.

Newly documented interfaces in existing pages
---

fanotify_init.2
fanotify.7
  nixiaoming [Amir Goldstein, Michael Kerrisk]
    Document FAN_REPORT_TID
      fanotify_init.2: add new flag FAN_REPORT_TID
      fanotify.7: update description of member pid in
        struct fanotify_event_metadata
  Amir Goldstein
    Document FAN_MARK_FILESYSTEM
      Monitor fanotify
 events on the entire filesystem.
  Matthew Bobrowski [Amir Goldstein]
    Document FAN_OPEN_EXEC and FAN_OPEN_EXEC_PERM

io_submit.2
  Adam Manzanares
    Document IOCB_FLAG_IOPRIO

msgctl.2
semctl.2
shmctl.2
  Davidlohr Bueso [Joe Lawrence, Michael Kerrisk]
    Document STAT_ANY commands

prctl.2
  Konrad Rzeszutek Wilk [Michael Kerrisk]
    Document PR_SET_SPECULATION_CTRL and PR_GET_SPECULATION_CTRL

sched_setattr.2
  Claudio Scordino [Michael Kerrisk]
    Document SCHED_FLAG_DL_OVERRUN and SCHED_FLAG_RECLAIM

socket.2
  Tobias Klauser
    Document AF_XDP
      Document AF_XDP added in Linux 4.18.

inotify.7
  Henry Wilson
    Document IN_MASK_CREATE

unix.7
  Michael Kerrisk
    Document SO_PASSSEC
  Michael Kerrisk
    Document SCM_SECURITY ancillary data

New and changed links
----

reallocarray.3
  Michael Kerrisk
    New link to malloc(3)

precedence.7
  Josh Triplett
    Add as a redirect
 to operator.7

Global changes

Various pages
  Michael Kerrisk [G. Branden Robinson]
    Use '\e' rather than '\\' to get a backslash

Various pages
  Michael Kerrisk [Bjarni Ingi Gislason, G. Branden Robinson]
    Use zerowidth space in appropriate locations

Various pages
  Michael Kerrisk
    Clarify the distinction between "file descriptor" and "file description"

Various pages
  Mike Rapoport
    Update paths for in-kernel memory management documentation files

A few pages
  Michael Kerrisk
    Change references to '2.6.0-test*' series kernels to just '2.6.0'

Changes to individual pages
---

iconv.1
  Marko Myllynen
    SEE ALSO: add uconv(1)

localedef.1
  Howard Johnson
    Note that -f and -c, are reversed from what you might expect

time.1
  Michael Kerrisk [Johannes Altmanninger]
    Document the -q/--quiet option
  Jakub Wilk
    Update bug reporting address

bpf.2
  Tobias
 Klauser
    Update JIT support list for Linux 4.18
      JIT support for x86-32 was during the Linux 4.18 release cycle.
      Also correct the entry for MIPS (only MIPS64 is supported).
  Oded Elisha

Fix bug in example
Quentin Monnet
SEE ALSO: add bpf-helpers(7)

capget.2
Michael Kerrisk
Remove crufty sentence suggesting use of deprecated functions
Remove crufty sentence suggesting use of deprecated capsetp(3) and capgetp(3); the manual page for those functions has long (at least as far back as 2007) noted that they are deprecated.
Michael Kerrisk
Remove first paragraph, which repeats details from capabilities(7)

chroot.2
Michael Kerrisk
Mention /proc/[pid]/root

clock_getres.2
Michael Kerrisk [Jens Thoms Toerring]
CLOCK_MONOTONIC_RAW does not count while the system is suspended
Michael Kerrisk [Jens Thoms Toerring]
On Linux CLOCK_MONOTONIC counts
time that the system has run since boot
Michael Kerrisk [Jens Thoms Toerring]
CLOCK_MONOTONIC does not count while the system is suspended
Michael Kerrisk
ERRORS: add EINVAL error for noncanonical clock_settime() value

clone.2
Michael Kerrisk
Rework discussion of threads and signals
The discussion is phrased in terms of signals sent using kill(2), but applies equally to a signal sent by the kernel.
Jann Horn
Pending CLONE_NEWPID prevents thread creation
Michael Kerrisk
Clarify the discussion of threads and signals
And explicitly introduce the terms "process-directed" and "thread-directed" signals.
Eugene Syromyatnikov
Add information about clone and clone2 on IA-64
Michael Kerrisk
ERRORS: EINVAL occurs with CLONE_NEWUSER if !CONFIG_USER_NS

connect.2
Benjamin Peterson
Document error semantics of nonblocking UNIX domain sockets

epoll_ctl.2
  Michael Kerrisk
    Use the term "interest list" consistently

epoll_wait.2
  Michael Kerrisk
    Clarify the behavior when epoll_wait()-ing on an empty interest list
  Michael Kerrisk
    Note that epoll_wait() round robins through the set of ready descriptors

eventfd.2
  Michael Kerrisk
    Move text noting that eventfd() creates a FD earlier in the page

fcntl.2
  Michael Kerrisk
    Actual pipe capacity may in practice be less than nominal capacity
      The number of bytes that can be written to the pipe may be less
      (sometimes substantially less) than the nominal capacity.
  Eugene Syromyatnikov
    Mention that l_sysid is not used even if present
  Michael Kerrisk
    Briefly explain the meaning of the 'l_sysid' field in 'struct flock'

futex.2
  Benjamin Peterson
    Make the example use C11 atomics rather than GCC builtins

getcpu.2
  Tobias Klauser [Michael Kerrisk]
    getcpu() now has a glibc wrapper;
 remove mention of syscall(2)
      The glibc wrapper was added in glibc 2.29, release on 1 Feb 2019.

getgid.2
getpid.2
getuid.2
pipe.2
syscall.2
  Eugene Syromiatnikov [Michael Kerrisk]
    Describe 2nd return value peculiarity
      Some architectures (ab)use second return value register for
      additional return value in some system calls. Let's describe this.

getgroups.2
  Michael Kerrisk
    Note that a process can drop all groups with: setgroups(0, NULL)

getrlimit.2
  Eugene Syromyatnikov
    Note that setrlimit(RLIMIT_CPU) doesn't fail
  Michael Kerrisk
    Resource limits are process-wide attributes shared by all threads
      This was already noted in pthreads(7), but bears repeating here.
  Eugene Syromyatnikov
    Correct information about large limits on 32-bit architectures

gettid.2
  Michael Kerrisk
    Glibc provides a wrapper since version 2.30

gettimeofday.2
  Michael Kerrisk
    ERRORS: add EINVAL
 for noncanonical 'tv' argument to settimeofday()

gettimeofday.2
clock_getres.2
  Michael Kerrisk [Jens Thoms Toerring]
    ERRORS: EINVAL can occur if new real time is less than monotonic clock

getxattr.2
removexattr.2
setxattr.2
  Michael Kerrisk [Andreas Gruenbacher, Enrico Scholz]
    ERRORS: replace ENOATTR with ENODATA
      See also https://bugzilla.kernel.org/show_bug.cgi?id=201995

inotify_add_watch.2
  Paul Millar
    Add IN_ONLYDIR based error
  Henry Wilson
    Note errors that can occur for IN_MASK_CREATE

io_submit.2
  Jeff Moyer
    Fix the description of aio_data
      aio_data is not a kernel-internal field.

madvise.2
  Michal Hocko [Niklas Hambüchen]
    MADV_FREE clarify swapless behavior

memfd_create.2
  Marc-André Lureau
    Update hugetlb file-sealing support

Lucas De Marchi
Fix header for memfd_create()
Joseph C. Sible
_GNU_SOURCE is required

mmap.2
Elliott Hughes

Explicitly state that the fd can be closed
Jann Horn [Michal Hocko, William Kucharski]
Fix description of treatment of the hint
The current manpage reads as if the kernel will always pick a free
space close to the requested address, but that's not the case.

mount.2
Michael Kerrisk
Clearly distinguish per-mount-point vs per-superblock mount flags
Michael Kerrisk
MS_SILENT is ignored when changing propagation type
Michael Kerrisk
Attempts to change MS_SILENT setting during remount are silently ignored
Michael Kerrisk [Harry Mallon]
Document EROFS for read-only filesystems
See https://bugzilla.kernel.org/show_bug.cgi?id=200649
Michael Kerrisk
Clarify that per-superblock flags are shared during remount
Michael Kerrisk
Remove crufty sentence about MS_BIND + MS_REMOUNT
Michael Kerrisk
Mention /proc/PID/mountinfo
Many people are unaware of the /proc/PID/mountinfo
file. Provide
a helpful clue here.
Michael Kerrisk
Mandatory locking also now requires CONFIG_MANDATORY_FILE_LOCKING
Michael Kerrisk [Simone Piccardi]
Add MS_STRICTATIME to list of flags that can be used in remount
Michael Kerrisk
EACCES: note some reasons why a filesystem may be read-only
Michael Kerrisk
SEE ALSO: add ioctl_iflags(2)

msgop.2
Michael Kerrisk
Correct the capability description for msgsnd() EACCESS error

nfsservctl.2
Michael Kerrisk

Add VERSIONS section noting that this system call no longer exists

open.2
Lucas Werkmeister
Document ENXIO for sockets
Michael Kerrisk
Clarify a special use case of O_NONBLOCK for devices
Eugene Syromiatnikov
Mention presence of unused O_RSYNC definition
O_RSYNC is defined in <asm/fcntl.h> on HP PA-RISC, but is not used anyway.
Eugene Syromiatnikov
Document FASYNC usage
in Linux UAPI headers
Andrew Price
Remove O_DIRECT-related quotation
Remove a section that adds no benefit to the discussion of O_DIRECT.
Michael Kerrisk [Robin Kuzmin]
Clarify that O_NONBLOCK has no effect on poll/epoll/select

perf_event_open.2
Vince Weaver [Wang Nan]
Document the PERF_EVENT_IOC_PAUSE_OUTPUT ioctl
The PERF_EVENT_IOC_PAUSE_OUTPUT ioctl was introduced in Linux 4.7.
Vince Weaver
Fix wording in multiplexing description
Vince Weaver
Clarify exclude_idle
Vince Weaver
Document the PERF_EVENT_IOC_QUERY_BPF ioctl
Vince Weaver
Document the PERF_EVENT_IOC_MODIFY_ATTRIBUTES ioctl
Vince Weaver
Fix prctl behavior description

pivot_root.2
Elvira Khabirova
Explain the initramfs case and point to switch_root(8)
Joseph Sible [Joseph C. Sible]
Document EINVAL if root is rootfs

pkey_alloc.2
Michael Kerrisk [Szabolcs Nagy]
Switch
to glibc prototype in SYNOPSIS

poll.2
Michael Kerrisk

Note that poll() and ppoll() are not affected by O_NONBLOCK

posix_fadvise.2
  Eugene Syromyatnikov
    Describe the difference between fadvise64/fadvise64_64

prctl.2
  Benjamin Peterson
    PR_SET_MM_EXE_FILE may now be used as many times as desired
  Michael Kerrisk
    Add some further historical details on PR_SET_MM_EXE_FILE
  Michael Kerrisk [Jann Horn]
    Explain the circumstances in which the parent-death signal is sent
  Michael Kerrisk
    Rework the PR_SET_PDEATHSIG description a little, for easier readability
  Michael Kerrisk
    Add additional info on PR_SET_PDEATHSIG
      The signal is process directed and the siginfo_t->si_pid
      filed contains the PID of the terminating parent.
  Michael Kerrisk
    Note libcap(3) APIs for operating on ambient capability set
      (However, the libcap APIs do not yet seem to have
      manual pages...)
   Michael Kerrisk
    Mention libcap APIs for operating on capability bounding set

ptrace.2
  Dmitry V. Levin
    Do not say that PTRACE_O_TRACESYSGOOD may not work
  Jann Horn
    BUGS: ptrace() may set errno to zero

readdir.2
  Eugene Syromyatnikov
    Fix struct old_linux_dirent in accordance with current definition

readv.2
  Xiao Yang [Florian Weimer]
    Fix wrong errno for an unknown flag

rename.2
  Michael Kerrisk
    glibc 2.28 adds library support for renameat2()
  Tobias Klauser
    Add feature test macro for renameat2()
      The glibc wrapper for renameat2() was added in glibc 2.28 and
      requires _GNU_SOURCE.
  Eugene Syromiatnikov

Some additional notes regarding RENAME_WHITEOUT
Lucas Werkmeister [Michael Kerrisk]
Add kernel versions for RENAME_NOREPLACE support
Michael Kerrisk
Rework list of supported filesystems for RENAME_NOREPLACE
Tobias Klauser
renameat2()
now has a glibc wrapper; remove mention of syscall(2)

s390_runtime_instr.2
Eugene Syromyatnikov
Add a note about runtime_instr.h availability

s390_sthyi.2
Eugene Syromyatnikov [Heiko Carstens]
Some minor additions

sched_setattr.2
Michael Kerrisk
Add a bit more detail for SCHED_DEADLINE

sched_setparam.2
Michael Kerrisk
Clarify that scheduling parameters are per-thread (not per-process)

seccomp.2
Michael Kerrisk
(Briefly) document SECCOMP_FILTER_FLAG_SPEC_ALLOW
Michael Kerrisk
SEE ALSO: add bpfc(1)

select.2
Michael Kerrisk
BUGS: the use of value-result arguments is a design bug
Michael Kerrisk [Robin Kuzmin]
Note that select() and pselect() are not affected by O_NONBLOCK

select_tut.2
Michael Kerrisk [Antonio Chirizzi]
Diagnose inet_aton() errors with simple fprintf() (not perror())

setgid.2
Michael Kerrisk
Clarify EPERM capability requirements with respect
to user namespaces

setns.2
Michael Kerrisk

When joining a user namespace, it must be a descendant user namespace
Michael Kerrisk
Note capability requirements for changing PID namespace
Note capability requirements for changing network, IPC, or UTS namespace
Note capability requirements for changing cgroup namespace
Michael Kerrisk
Some text restructuring and reordering

set_thread_area.2
Eugene Syromyatnikov
Mention related prctl() requests in SEE ALSO
Eugene Syromyatnikov
Mention that get_thread_area() is also Linux-specific
Eugene Syromyatnikov
Describe set_thread_area()/get_thread_area() on m68k/MIPS

setuid.2
Michael Kerrisk
Clarify EPERM capability requirements with respect to user namespaces

sigaction.2
Eugene Syromyatnikov [Michael Kerrisk]
Describe obsolete usage of struct sigcontext as signal handler argument

sigsuspend.2
Michael Kerrisk
Clarify that
sigsuspend() suspends the calling *thread*

socket.2
Michael Kerrisk
Remove references to external docs
This information is all in the new address_families(7)
Michael Kerrisk
Add cross reference to address_families(7)
Eugene Syromyatnikov
Reinstate AF_VSOCK mention
Michael Kerrisk
Simplify list of address families
Remove many of the details that are in address_families(7)
Nikola Forró
Remove notes concerning AF_ALG and AF_XDP
All address families are now documented in address_families.7.
Michael Kerrisk
Remove some more obscure protocols from address family list
The list of address families in this page is still
overwhelmingly long. So let's shorten it.
The removed entries are all in address_families(7).

Michael Kerrisk
Remove a few obsolete protocols
Documentation for these remains in address_families(7)

socketpair.2
Eugene Syromyatnikov
Note that AF_TIPC also supports socketpair(2)
Introduced by Linux commit v4.12-rc1~64^3~304^2~1.

stat.2
Michael Kerrisk [Alessandro Vesely]
ERRORS: ENOENT can occur where a path component is a dangling symlink
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=909789
Benjamin Peterson
SEE ALSO: add statx(2)

statx.2
Tobias Klauser [Michael Kerrisk]
statx() now has a glibc wrapper; remove mention of syscall(2)

syscall.2
Eugene Syromyatnikov [Michael Kerrisk]
Elaborate x32 ABI specifics
snyh
Fix wrong retval register number in alpha architecture
Helge Deller
parisc needs care with syscall parameters
Michael Kerrisk
Rework table to render within 80 columns

syscalls.2
Eugene Syromyatnikov
Change example of a thin syscall wrapper to chdir()
As truncate(3) should dispatch between truncate/truncate64,
as noted
later in the page.
Eugene Syromyatnikov [Michael Kerrisk]
Update syscall table
Added: arc_gettls, arc_settls, arc_usr_cmpxchg, arch_prctl,
atomic_barrier, atomic_cmpxchg_32, bfin_spinlock, breakpoint,
clone2, cmpxchg, cmpxchg_badaddr, dma_memcpy, execv, get_tls,
getdomainname, getdtablesize, gethostname, getxgid, getxpid,
getxuid, metag_get_tls, metag_set_fpu_flags,metag_set_tls,
metag_set_global_bit, newfstatat, old_adjtimex, oldumount,
or1k_atomic, pread, pwrite, riscv_flush_icache,
sched_get_affinity, sched_set_affinity, set_tls, setaltroot,
sethae, setpgrp, spill, sram_alloc, sram_free, swapcontext,
switch_endian, sys_debug_setcontext, syscall, sysmips, timerfd,

usr26, usr32, xtensa.

Uncommented: memory_ordering

Renamed: ppc_rtas to rtas (__NR_rtas), ppc_swapcontext to swapcontext (__NR_swapcontext).

Eugene Syromyatnikov
Note about s390x and old_mmap

Michael Kerrisk
Add s390_guarded_storage(2)

Michael Kerrisk
Update syscall list for Linux 4.18

Eugene Syromyatnikov
Note that not all architectures return errno negated

Helge Deller
parisc Linux does not any longer emulate HP-UX

Michael Kerrisk
Comment out details of a few system calls that only ever briefly existed

unshare.2

Michael Kerrisk [Shawn Landden]
Same EINVAL errors as for clone(2) can also occur with unshare(2)

Tycho Andersen
Note EINVAL when unsharing pid ns twice
The kernel doesn't allow unsharing a pid NS if it has previously been unshared.

ustat.2

Michael Kerrisk
Starting with version 2.28, glibc no longer provides a wrapper function

vmsplice.2

Andrei Vagin
Note that vmsplice can splice pages from pipe to memory

wait.2

Michael Kerrisk
Add some cross references
to core(5)

write.2

Michael Kerrisk [Nadav Har'El]
RETURN VALUE: clarify details of partial write and
https://bugzilla.kernel.org/show_bug.cgi?id=197961

Goldwyn Rodrigues
Add details on partial direct I/O writes

alloca.3

Michael Kerrisk [Robin Kuzmin]
Prevent any misunderstanding about when allocated memory is released

bsd_signal.3
Xiao Yang
Fix the wrong version of _POSIX_C_SOURCE

bstring.3
Michael Kerrisk [Emil Fihlman]
Correct argument list for memmem() prototype

cmsg.3
Michael Kerrisk
Explain zero-initialization requirement for CMSG_NXTHDR()
Michael Kerrisk
Remove out of place mention of MSG_CTRUNC
This detail is covered in recvmsg(2), and now also in unix(7).
Michael Kerrisk
Note that CMSG_FIRSTHDR can return NULL
Michael Kerrisk
Remove unnecessary 'fdptr' intermediate variable in example code

des_crypt.3
encrypt.3
Michael Kerrisk

The functions described in these pages are removed in glibc 2.28

dlsym.3
Michael Kerrisk
Describe a case where a symbol value may be NULL

errno.3
Michael Kerrisk [Robert P. J. Day]
Mention that errno(1) is part of the 'moreutils' package

exec.3
Michael Kerrisk [Eugene Syromyatnikov]
Note that SPARC provides an execv() system call

exit.3
Mike Frysinger
Note wider sysexits.h availability

ferror.3
Elliot Hughes
Warn about closing the result of fileno()

fnmatch.3
  Elliott Hughes
    Clarify "shell wildcard pattern"

getaddrinfo.3
  Michael Kerrisk [Eric Sanchis]
    Fix off-by-one error in example client program

getcwd.3
  Michael Kerrisk
    Rework text on use of getcwd() system call
      Make it clear that all of the library functions described on this
      page will use the getcwd() system call if it is present.
  Michael Kerrisk
    Add details on the getcwd() syscall and how it
 used by libc functions
  Michael Kerrisk
    Reorder the text describing "(unreachable)" being returned by getcwd()

getmntent.3
  Elliot Hughes
    Clarify that endmntent() should be used rather than fclose()

isatty.3
  Michael Kerrisk [Jakub Wilk]
    Most non-tty files nowadays result in the error ENOTTY
      Historically, at least FIFOs and pipes yielded the error EINVAL.

lockf.3
  Ian Turner
    ERRORS: add EINTR

malloc.3
  Michael Kerrisk
    Add reference to glibc MallocInternals wiki
  Michael Kerrisk
    Note that calloc() detects overflow when multiplying its arguments
  Michael Kerrisk
    Since glibc 2.29, reallocarray() is exposed by defining _DEFAULT_SOURCE
      Info gleaned from glibc NEWS file.

pthread_attr_init.3
  Michael Kerrisk [Göran Häggsjö, Jakub Wilk]
    Use correct printf() specifier for "size_t" in example program

pthread_rwlockattr_setkind_np.3
  Carlos O'Donell
    Remove bug notes

pthread_setname_np.3
Jakub Wilk
Explain _np suffix
Add text to CONFORMING TO explaining that the "_np"
suffix is because these functions are non-portable.

putenv.3
Michael Kerrisk
Note a glibc extension: putenv("NAME") removes an environment variable

resolver.3
Michael Becker
Add documentation of res_nclose()

strcmp.3
Heinrich Schuchardt
Clarify that strcmp() is not locale aware

strcpy.3
Matthew Kilgore
Fix example code for strncpy, which could pass an incorrect length
Michael Kerrisk [Frank Theile]
Use "destination" consistently (instead of "target" sometimes)

strfry.3
Keith Thompson
Remove incorrect reference to rand(3)

string.3
strlen.3
strnlen.3
Michael Kerrisk [Jakub Wilk]
Use 'bytes' not 'characters'
This is in line with POSIX terminology.

system.3
Michael Kerrisk [Jonny Grant]
Use '(char *) NULL' rather than '(char *) 0'
Michael
Kerrisk
Note that system() can fail for the same reasons as fork(2)
Arkadiusz Drabczyk
Mention that 'errno' is set on error

termios.3
Eugene Syromyatnikov
Note an XTABS alpha issue

trunc.3
  Michael Kerrisk [Eric Benton, G. Branden Robinson]
    Make the description a little clearer
  Michael Kerrisk
    Emphasize that the return value is a floating-point number

xcrypt.3
  Jason A. Donenfeld
    Warn folks not to use these functions

lirc.4
  Sean Young
    Fix broken link
  Sean Young
    Document error returns more explicitly
  Sean Young
    lirc.h include file is in /usr/include/linux/lirc.h
  Sean Young [Alec Leamas, Mauro Carvalho Chehab]
    Remove ioctls and feature bits which were never implemented
  Sean Young
    Unsupported ioctl() operations always return ENOTTY
  Sean Young
    LIRC_MODE_LIRCCODE has been replaced by LIRC_MODE_SCANCODE
  Sean Young
    Document remaining
 ioctl (LIRC_GET_REC_TIMEOUT)
      Now all ioctls are documented.
  Sean Young
    Timeout reports are enabled by default
  Sean Young
    Some devices are send only
  Sean Young
    Update SEE ALSO
  Sean Young
    LIRC_CAN_SET_REC_DUTY_CYCLE_RANGE was never supported
      No driver ever supported such a thing.
  Michael Kerrisk
    Clarify the description LIRC_SET_REC_TIMEOUT

tty.4
  Michael Witten
    Add `vcs(4)' and `pty(7)' to the `SEE ALSO' section

vcs.4
  Mattias Engdegård [Michael Witten]
    Fix broken example code

core.5
  Michael Kerrisk
    Add cross reference to vdso(7) where "virtual DSO" is mentioned

filesystems.5
  Eugene Syromyatnikov
    Mention sysfs(2)

host.conf.5
  Nikola Forró
    Clarify glibc versions in which spoof options were removed

proc.5
  Michael Kerrisk [Philip Dumont]
    Document /proc/[tid]
      See also https://bugzilla.kernel.org/show_bug.cgi?id=201441
   Michael Kerrisk
    Add an overview section describing the groups of files under /proc
  Keno Fischer [Robert O'Callahan]
    Correct description of NStgid
  Lucas Werkmeister
    Document fdinfo format for timerfd
  Stephan Knauss
    Mention /proc/uptime includes time spent in suspend
  Michael Kerrisk
    Reword /proc/PID/fdinfo timerfd field descriptions as a hanging list
  Michael Kerrisk
    SEE ALSO: add htop(1) and pstree(1)
      fs/proc/uptime.c:uptime_proc_show() fetches time using
      ktime_get_boottime which includes the time spent in suspend.
  Michael Kerrisk
    Document /proc/PID/status CoreDumping field
  Michael Kerrisk
    Mention choom(1) in discussion of /proc/[pid]/oom_score_adj
  Michael Kerrisk
    Add a few details on /proc/PID/fdinfo timerfd
  Michael Kerrisk
    Document /proc/meminfo KReclaimable field
  Michael Kerrisk
    Explain how to determine top-most mount in /proc/PID/mountinfo
      Explain how to determine the top-most mount at a particular
      location by inspecting /proc/PID/mountinfo.
  Michael Kerrisk [Jakub Wilk]
    Remove bogus suggestion to use cat(1) to read files containing '\0'
  Michael Kerrisk
    Refer to mount(2) for explanation of mount vs superblock options
  Michael Kerrisk
    Fix description of /proc/PID/* ownership to account for user namespaces

Elvira Khabirova
Describe ambiguities in /proc/<pid>/maps
Michael Kerrisk [Nick Gregory]
Since Linux 4.5, "stack:" is no longer shown in /proc/PID/maps
Nikola Forró
Document /proc/[pid]/status Speculation_Store_Bypass field
Alan Jenkins
Vmalloc information is no longer calculated (Linux 4.4)
Michael Kerrisk [Alexander E. Patrakov, Jakub Wilk, Michael Kerrisk]
Use 'tr '\000' '\n' to display contents of /proc/PID/environ
Michael Kerrisk
Setting dumpable to 1 reverts ownership of /proc/PID/*
to effective IDs
Michael Kerrisk
Document /proc/meminfo LazyFree field
Michael Kerrisk
Fix kernel source pathname for soft-dirty documentation
Michael Kerrisk
/proc/[pid]/status VmPMD field was removed in Linux 4.15

resolv.conf.5
Nikola Forró
Document no-reload (RES_NPRELOAD) option

tzfile.5
Paul Eggert
Sync from tzdb upstream

capabilities.7
Michael Kerrisk
Fix some imprecisions in discussion of namespaced file capabilities
The file UID does not come into play when creating a v3
security.capability extended attribute.
Michael Kerrisk
Note that v3 security.attributes are transparently created/retrieved
Michael Kerrisk
Improve the discussion of when file capabilities are ignored
The text stated that the execve() capability transitions are not
performed for the same reasons that setuid and setgid mode bits
may be ignored (as
described in execve(2)). But, that's not quite
correct: rather, the file capability sets are treated as empty
for the purpose of the capability transition calculations.
Michael Kerrisk
Rework bounding set as per-thread set in transformation rules
Michael Kerrisk
Substantially rework "Capabilities and execution of programs by root"
Rework for improved clarity, and also to include missing details

on the case where (1) the binary that is being executed has
capabilities attached and (2) the real user ID of the process is
not 0 (root) and (3) the effective user ID of the process is 0
(root).
Marcus Gelderie
Add details about SECBIT_KEEP_CAPS
The description of SECBIT_KEEP_CAPS is misleading about the
effects on the effective capabilities of a process during a
switch to nonzero UIDs. The effective set is cleared based on
the
effective UID switching to a nonzero value, even if
SECBIT_KEEP_CAPS is set. However, with this bit set, the
effective and permitted sets are not cleared if the real and
saved set-user-ID are set to nonzero values.
Marcus Gelderie
Mention header for SECBIT constants
Mention that the named constants (SECBIT_KEEP_CAPS and others)
are available only if the linux/securebits.h user-space header
is included.
Michael Kerrisk
Add text introducing bounding set along with other capability sets
Michael Kerrisk [Allison Randal]
Update URL for location of POSIX.1e draft standard
Michael Kerrisk
CAP_SYS_CHROOT allows use of setns() to change the mount namespace
Michael Kerrisk [Pierre Chifflier]
Ambient capabilities do not trigger secure-execution mode
Michael Kerrisk
Add a subsection on per-user-namespace "set-user-ID-root" programs
Michael Kerrisk
Rework discussion of exec and UID 0, correcting a couple of details
Clarify the "Capabilities and execution of programs by root"
section, and correct a couple of details:
* If a process with rUID == 0 && eUID != 0 does an exec,
the process will nevertheless gain effective capabilities
if the file effective bit is set.
* Set-UID-root programs only confer a full set of capabilities
if the binary does not also have attached capabilities.
Michael Kerrisk
Update URL for libcap tarballs
The previous location does not seem to be getting updated.
(For example, at the time of this commit, libcap-2.26
had been out for two months, but was not present at
http://www.kernel.org/pub/linux/libs/security/linux-privs.
Michael Kerrisk
Clarify which capability sets capset(2) and capget(2) apply to
capset(2) and capget(2) apply

operate only on the permitted,
        effective, and inheritable process capability sets.
  Michael Kerrisk
    Correct the description of SECBIT_KEEP_CAPS
  Michael Kerrisk
    Add background details on capability transformations during execve(2)
      Add background details on ambient and bounding set when
      discussing capability transformations during execve(2).
  Michael Kerrisk
    Document the 'no_file_caps' kernel command-line option

cgroup_namespaces.7
  Michael Kerrisk [Troy Engel]
    Clarify the example by making an implied detail more explicit.
      See https://bugzilla.kernel.org/show_bug.cgi?id=201047

cgroups.7
  Michael Kerrisk
    Add more detail on v2 'cpu' controller and realtime threads
      Explicitly note the scheduling policies that are relevant for the
      v2 'cpu' controller.
  Michael Kerrisk
    Document the use of 'cgroup_no_v1=named' to disable v1 named hierarchies

  This feature was added in Linux 5.0.
  Michael Kerrisk [Mike Weilgart]
    Complete partial sentence re kernel boot options and 'nsdelegate'
      https://bugzilla.kernel.org/show_bug.cgi?id=201029
  Michael Kerrisk
    Reframe the text on delegation to include more details about cgroups v1
  Michael Kerrisk [Leah Hanson]
    Rework discussion of writing to cgroup.type file
      In particular, it is possible to write "threaded" to a
      cgroup.type file if the current type is "domain threaded".
      Previously, the text had implied that this was not possible.
  Michael Kerrisk [Balbir Singh, Marcus Gelderie]
    Soften the discussion about delegation in cgroups v1
      Balbir pointed out that v1 delegation was not an accidental
      feature.

epoll.7
  Michael Kerrisk
    Introduce the terms "interest list" and "ready list"
  Michael Kerrisk
    Consistently use the term "interest list" rather than "epoll
 set"
  Michael Kerrisk
    Reformat Q&A list

Michael Kerrisk
Note that edge-triggered notification wakes up only one waiter
Note a useful performance benefit of EPOLLET: ensuring that
only one of multiple waiters (in epoll_wait()) is woken
up when a file descriptor becomes ready.
Michael Kerrisk
Expand the discussion of the implications of file descriptor duplication
In particular, note that it may be difficult for an application
to know about the existence of duplicate file descriptors.

feature_test_macros.7
Michael Kerrisk [Andreas Westfeld]
Add more detail on why FTMs must be defined before including any header

inotify.7
Michael Kerrisk [Paul Millar]
Note ENOTDIR error that can occur for IN_ONLYDIR
Note ENOTDIR error that occurs when requesting a watch on a
nondirectory with IN_ONLYDIR.

ip.7
Bert Hubert
IP_RECVTTL error fixed

I need to get the TTL of UDP datagrams from userspace, so I set
the IP_RECVTTL socket option. And as promised by ip.7, I then get
IP_TTL messages from recvfrom. However, unlike what the manpage
promises, the TTL field gets passed as a 32 bit integer.

man.7
Michael Kerrisk
SEE ALSO: remove mdoc.samples(7)

mount_namespaces.7
Michael Kerrisk
SEE ALSO: add findmnt(8)

namespaces.7
Michael Kerrisk
List factors that may pin a namespace into existence
Various factors may pin a namespace into existence, even when it
has no member processes.
Michael Kerrisk [Tycho Kirchner]
Briefly explain why CAP_SYS_ADMIN is needed to create nonuser namespaces
Michael Kerrisk
Mention ioctl(2) in discussion of namespaces APIs
Michael Kerrisk
SEE ALSO: add pam_namespace(8)

pid_namespaces.7
  Michael Kerrisk
    Clarify the semantics for the adoption of orphaned
 processes
      Because of setns() semantics, the parent of a process may reside
      in the outer PID namespace. If that parent terminates, then the
      child is adopted by the "init" in the outer PID namespace (rather
      than the "init" of the PID namespace of the child).
  Michael Kerrisk
    Note a detail of /proc/PID/ns/pid_for_children behavior
      After clone(CLONE_NEWPID), /proc/PID/ns/pid_for_children is empty
      until the first child is created. Verified by experiment.
  Michael Kerrisk
    Note that a process can do unshare(CLONE_NEWPID) only once

sched.7
  Michael Kerrisk [Eugene Syromyatnikov]
    In the kernel source SCHED_OTHER is actually called SCHED_NORMAL
  Michael Kerrisk
    SEE ALSO: add ps(1) and top(1)
  Michael Kerrisk
    SEE ALSO: add chcpu(1), lscpu(1)

signal.7
  Michael Kerrisk [Robin Kuzmin]
    Clarify that sigsuspend() and pause() suspend the calling *thread*
  Helge
 Deller
    Add signal numbers for parisc
  Michael Kerrisk
    Unify signal lists into a signal table that embeds standards info
      Having the signals listed in three different tables reduces
      readability, and would require more table splits if future
      standards specify other signals.
  Michael Kerrisk
    Reorder the architectures in the signal number lists
      x86 and ARM are the most common architectures, but currently
      are in the second subfield in the signal number lists.
      Instead, swap that info with subfield 1, so the most
      common architectures are first in the list.
  Michael Kerrisk
    Place signal numbers in a separate table
      The current tables of signal information are unwieldy,
      as they try to cram in too much information.
  Michael Kerrisk
    Insert standards info into tables
  Michael Kerrisk

SEE ALSO: add clone(2)

socket.7
  Michael Kerrisk
    Refer reader to unix(7) for information on SO_PASSSEC
  Michael Kerrisk
    SEE ALSO: add address_families(7)

socket.7
unix.7
  Michael Kerrisk
    Move text describing SO_PEERCRED from socket(7) to unix(7)
      This is, AFAIK, an option specific to UNIX domain sockets, so
      place it in unix(7).

tcp.7
udp.7
  Michael Kerrisk
    Add a reference to socket(7) noting existence of further socket options

unix.7
  Michael Kerrisk
    Enhance the description of SCM_RIGHTS
      The existing description is rather thin. More can be said.
  Michael Kerrisk
    There is a limit on the size of the file descriptor array for SCM_RIGHTS
      The limit is defined in the kernel as SCM_MAX_FD (253).
  Michael Kerrisk
    Rework SO_PEERCRED text for greater clarity
  Michael Kerrisk [Felipe Gasper]
    Clarify SO_PASSCRED behavior
  Michael Kerrisk
    Explicitly note that SO_PASSCRED provides SCM_CREDENTIALS
 messages
  Michael Kerrisk
    If the buffer to receive SCM_RIGHTS FDs is too small, FDs are closed
  Michael Kerrisk
    One must send at least one byte of real data with ancillary data
  Michael Kerrisk
    Ancillary data forms a barrier when receiving on a stream socket
  Michael Kerrisk
    When sending ancillary data, only one item of each type may be sent
  Michael Kerrisk
    Improve wording describing socket option argument/return values
  Michael Kerrisk
    Clarify treatment of incoming ancillary data if 'msg_control' is NULL
  Michael Kerrisk
    Note behavior if buffer to receive ancillary data is too small

Michael Kerrisk
Fix a minor imprecision in description of SCM_CREDENTIALS
Michael Kerrisk
Refer reader to socket(7) for information about SO_PEEK_OFF

user_namespaces.7
Michael Kerrisk
Rework terminology describing ownership of nonuser namespaces
Prefer the word "owns" rather than
"associated with" when
describing the relationship between user namespaces and non-user
namespaces. The existing text used a mix of the two terms, with
"associated with" being predominant, but to my ear, describing the
relationship as "ownership" is more comprehensible.

vdso.7
Helge Deller
Fix parisc gateway page description

ld.so.8
Michael Kerrisk [Florian Weimer, David Newall]
Document the --preload command-line option added in glibc 2.30
Michael Kerrisk
Note delimiters for 'list' in --audit and --inhibit-rpath
Michael Kerrisk
Place OPTIONS in alphabetical order
Michael Kerrisk
LD_PRELOAD-ed objects are added to link map in left-to-right order

zdump.8
Paul Eggert
Sync from tzdb upstream

zic.8
Paul Eggert
Sync from tzdb upstream

========== Changes in man-pages-5.01 ==========

Released: 2019-05-09, Munich

Contributors

The

following people contributed patches/fixes or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Wladimir
Mutel <muwlgr@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

tsearch.3
  Florian Weimer [Michael Kerrisk]
    Document the twalk_r() function added in glibc 2.30

New and changed links
---

twalk_r.3
  Michael Kerrisk
    New link to twalk(3) page

Changes to individual pages

---

accept.2
  Michael Kerrisk
    Note that 'addrlen' is left unchanged in the event of an error
      See http://austingroupbugs.net/view.php?id=836.

bpf.2
  Michael Kerrisk
    Update kernel version info for JIT compiler

clone.2
  Michael Kerrisk [Jakub Nowak]
    CLONE_CHILD_SETTID has effect before clone() returns *in the child*
      CLONE_CHILD_SETTID may not have had effect by the time clone()
      returns in the parent, which could be relevant if the
      CLONE_VM flag is employed. The relevant kernel code is in
       schedule_tail(), which is called in ret_from_fork()
      in the child.

      See https://bugzilla.kernel.org/show_bug.cgi?id=203105

execve.2
exec.3
  Michael Kerrisk [Dr. Jürgen Sauermann]
    Consistently use the term 'pathname' (not 'path')

execve.2
  Michael Kerrisk
    Note that stack+environ size is also limited to 3/4 of _STK_LIM
      In fs/exec.c::prepare_arg_pages(), we have:

          limit = _STK_LIM / 4 * 3;
          limit = min(limit, bprm->rlim_stack.rlim_cur / 4);
  Michael Kerrisk [Dr. Jürgen Sauermann]
    SEE ALSO: refer to exec(3) (rather than execl(3))

pipe.2
  Michael Kerrisk
    Note that 'pipefd' is left unchanged in the event of an error
      See http://austingroupbugs.net/view.php?id=467.

sched_setaffinity.2
  Michael Kerrisk [Brice Goglin]
    Correct details of return value of sched_getaffinity() syscall

setfsgid.2
  Michael Kerrisk

Rewrite for improved
clarity and defer to setfsuid() for details
Rewrite for improved clarity and defer to setfsuid(2) for the
rationale of the fsGID rather than repeating the same details
in this page.

setfsuid.2
Michael Kerrisk
Rewrite for improved clarity and to hint history more explicitly
The current text reads somewhat clumsily. Rewrite it to introduce
the eUID and fsUID in parallel, and more clearly hint at the
historical rationale for the fsUID, which is detailed lower in
the page.

socketpair.2
Michael Kerrisk
Clarify that 'sv' is left unchanged in the event of an error
See also http://austingroupbugs.net/view.php?id=483.

splice.2
Slavomir Kaslev
EAGAIN can occur when called on nonblocking file descriptors

syscalls.2
Michael Kerrisk [Andreas Korb]
Remove crufty text about i386 syscall dispatch table
The removed text long ago ceased to be
accurate. Nowadays, the
dispatch table is autogenerated when building the kernel (via
the kernel makefile, arch/x86/entry/syscalls/Makefile).

tee.2
Slavomir Kaslev
EAGAIN can occur when called on nonblocking file descriptors

fopen.3
Elliot Hughes
Explain BSD vs glibc "a+" difference
Where is the initial read position for an "a+" stream?

POSIX leaves this unspecified. Most BSD man pages are silent, and
MacOS has the ambiguous "The stream is positioned at the end of
the file", not differentiating between reads and writes other than
to say that fseek(3) does not affect writes. glibc's documentation
explicitly specifies that the initial read position is the
beginning of the file.

mallinfo.3

Elliott Hughes
Further discourage use of mallinfo()
The BUGS section already explains why you need to be cautious
about using mallinfo,
but given the number of bug reports we see
on Android, it seems not many people are reading that far. Call it
out up front.

malloc_trim.3
Carlos O'Donell
Update trimming information
Since glibc 2.8, commit 68631c8eb92, the malloc_trim function has
iterated over all arenas and free'd back to the OS all page runs
that were free. This allows an application to call malloc_trim to
consolidate fragmented chunks and free back any pages it can to
potentially reduce RSS usage.

posix_memalign.3
Elliot Hughes
Some functions set errno
True of bionic, glibc, and musl. (I didn't check elsewhere.)

resolver.3
Michael Kerrisk [Wladimir Mutel]
Mention that some functions set 'h_errno'

stdarg.3
Michael Kerrisk [Vincent Lefevre]
Remove the NOTES section describing the ancient varargs macros
stdarg.h is now 30 years old, and gcc long ago (2004)
ceased to
implement <varargs.h>. There seems little value in keeping this
text.

See https://bugzilla.kernel.org/show_bug.cgi?id=202907
Michael Kerrisk [Egmont Koblinger]
Add a note that "..." in function signature means a variadic function
Egmont suggested adding this, because the string "..." appears
at several other points in the page, but just to indicate that
some text is omitted from example code.

strerror.3
Jakub Wilk
Don't discuss buffer size for strerror_l()
Unlike strerror_r(), strerror_l() doesn't take buffer length as an
argument.

strtol.3

strtoul.3
  Jakub Wilk
    SEE ALSO: add strtoimax(3), strtoumax(3)

sysconf.3
  Michael Kerrisk [Hugues Evrard]
    Clearly note that _SC_PAGESIZE and _SC_PAGE_SIZE are synonyms

tsearch.3
  Florian Weimer
    Do not use const arguments in twalk() callback
      The const specifier is not
 part of the prototype (it only applies
      to the implementation), so showing it here confuses the reader.
  Michael Kerrisk
    SYNOPSIS: add missing definition of 'VISIT' type
  Michael Kerrisk
    Reformat twalk() and twalk_r() prototypes for easier readability

console_codes.4
  Jakub Wilk
    Document that \e[1;n] and \e[2;n] support 16 colors
      Source: setterm_command() in drivers/tty/vt/vt.c

elf.5
  Michael Kerrisk [Keegan Saunders]
    A data segment does not have PF_X

proc.5
  Michael Witten [Anisse Astier]
    Add missing Inode field to /proc/net/unix

hostname.7
  Florian Weimer
    HOSTALIASES/search path processing is DNS-specific
      Other NSS modules do not necessarily honor these settings.

inode.7
  Michael Kerrisk
    Note that timestamp fields measure time starting at the Epoch
  Michael Kerrisk
    Timestamp fields are structures that include a nanosecond component
  Michael Kerrisk

    Add references to execve(2) to describe set-UID/set-GID behaviors

========== Changes in man-pages-5.02 ==========

Released: 2019-08-02, Munich

Tomas Skäre <tomas.skare@gmail.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

fanotify.7

fanotify_init.2
fanotify_mark.2
  Matthew Bobrowski [Amir Goldstein, Jan Kara]
    Document FAN_REPORT_FID and directory modification events

vdso.7
  Tobias Klauser [Palmer Dabbelt]
    Document vDSO for RISCV

Renamed pages
---

sysvipc.7
  svipc(7) is renamed to sysvipc(7).
    The name sysvipc is a bit more natural, and is the name used in
    /proc/sysvipc.

New and
 changed links
---

svipc.7
  Michael Kerrisk
    Add old name of sysvipc(7) page as a link

Global changes

Various pages
  Michael Kerrisk
    Change reference to svipc(7) to sysvipc(7)

Changes to individual pages
---

pldd.1
  G. Branden Robinson [Michael Kerrisk]
    Document glibc's unbreakage of tool
      After a longstanding breakage, pldd now works again (glibc 2.30).

bpf.2
  Michael Kerrisk
    Correct kernel version for JIT support on s390

chdir.2
  Michael Kerrisk

Add ENOTDIR error for fchdir()

execve.2
Michael Kerrisk [Eugene Syromyatnikov]
Since Linux 5.1, the limit on the #! line is 255 chars (rather than 127)
Shawn Landden [Michael Kerrisk]
Add more detail about Shebangs
Michael Kerrisk
Linux is not alone in ignoring the set-UID and set-GID bits for scripts

mount.2
Michael Kerrisk
ERRORS: Add a couple of EINVAL errors
for MS_MOVE
Michael Kerrisk
SEE ALSO: add chroot(2) and pivot_root(2)

mprotect.2
Mark Wielaard
pkey_mprotect() acts like mprotect() if pkey is set to -1, not 0

mprotect.2
pkey_alloc.2
Mark Wielaard [Florian Weimer]
_GNU_SOURCE is required for the pkey functions.

pivot_root.2
Michael Kerrisk
ERRORS: EINVAL occurs if 'new_root' or its parent has shared propagation
Michael Kerrisk
'new_root' must be a mount point
It appears that 'new_root' may not have needed to be a mount
point on ancient kernels, but already in Linux 2.4.5 this changed.
Michael Kerrisk
'put_old' can't be a mount point with MS_SHARED propagation
Michael Kerrisk
SEE ALSO: add mount(2)

poll.2
Michael Kerrisk [Alan Stern]
Note that poll() equivalent code for ppoll() is not quite equivalent

prctl.2
Yang Xu [Cyrill Gorcunov]
Correct some details for PR_SET_TIMERSLACK

setxattr.2
Finn

O'Leary [Michael Kerrisk]
Add ERANGE to 'ERRORS' section

tkill.2
Michael Kerrisk
glibc 2.30 provides a wrapper for tgkill()

dlopen.3
Michael Kerrisk
Clarify the rules for symbol resolution in a dlopen'ed object
The existing text wrongly implied that symbol look up first
occurred in the object and then in main, and did not mention
whether dependencies of main where used for symbol resolution.
Michael Kerrisk
Clarify when an executable's symbols can be used for symbol resolution
The --export-dynamic linker option is not the only way that main's
global symbols may end up in the dynamic symbol table and thus be
used to satisfy symbol reference in a shared object. A symbol
may also be placed into the dynamic symbol table if ld(1)
notices a dependency in another object during the static link.
Michael Kerrisk
An object opened with RTLD_LOCAL
can be promoted to RTLD_GLOBAL
Michael Kerrisk
Note that symbol use might keep a dlclose'd object in memory
Michael Kerrisk
On dlclose(), destructors are called when reference count falls to 0
Michael Kerrisk
Make it clear that RTLD_NODELETE also affects global variables
Michael Kerrisk
Clarify that constructors are called only when library is first loaded

exec.3
Matthew Kenigsberg
Explain function groupings
I've found the exec man page quite difficult to read when trying
to find the behavior for a specific function. Since the names of
the functions are inline and the order of the descriptions isn't
clear, it's hard to find which paragraphs apply to each function.
I thought it would be much easier to read if the grouping based on
letters is stated.

getutent.3
Michael Kerrisk [Thorsten Glaser]
Fix missing include file in EXAMPLE

See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=932382

on_exit.3
  Michael Kerrisk [Sami Kerola]
    Stack variables may be out of scope when exit handler is invoked

strcat.3
  Michael Kerrisk [Eric Sanchis]
    Fix off-by-one error in example code

cpuid.4
  Michael Kerrisk
    SEE ALSO: add cpuid(1)

elf.5
  Michael Kerrisk
    SEE ALSO: add ld.so(8)

proc.5
  Michael Kerrisk
    Correct description of /proc/PID/status 'ShdPnd' and 'SigPnd' fields
      These fields are signal masks, not counters.
  Michael Kerrisk
    Clarify that various mask fields in /proc/PID/status are in hexadecimal

capabilities.7
  Michael Kerrisk
    Add a note about using strace on binaries that have capabilities
  Michael Kerrisk
    Add pivot_root(2) to CAP_SYS_ADMIN list
  Michael Kerrisk
    CAP_FOWNER also allows modifying user xattrs on sticky directories

cgroup_namespaces.7
  Michael Kerrisk
    Some wording fixes to improve
 clarity
  Michael Kerrisk
    In the example shell session, give second shell a different prompt

credentials.7
  Michael Kerrisk
    Note that /proc/PID/status shows a process's credentials
  Michael Kerrisk
    SEE ALSO: add tcgetsid(3)

fanotify.7
  Matthew Bobrowski
    Reword FAN_REPORT_FID data structure inclusion semantics
  Michael Kerrisk

Clarify logic in ESTALE check
Michael Kerrisk
Reorder text in EXAMPLE
Michael Kerrisk
Reformat program output to fit in 80 columns

mount_namespaces.7
Michael Kerrisk
Clarify implications for other NS if mount point is removed in one NS
If a mount point is deleted or renamed or removed in one mount namespace, this will cause an object that is mounted at that location in another mount namespace to be unmounted (as verified by experiment). This was implied by the existing text, but it is better to make this detail
explicit.
Michael Kerrisk
SEE ALSO: add pivot_root(2), pivot_root(8)

namespaces.7
Michael Kerrisk
Note initial values of hostname and domainname in a new UTS namespace

sched.7
Michael Kerrisk
SEE ALSO: add pthread_getschedparam(3)

signal.7
Michal Sekletar [Oleg Nesterov, Michael Kerrisk]
Clarify that siginfo_t isn't changed on coalescing
Michael Kerrisk
Various fields in /proc/PID/status show signal-related information
Michael Kerrisk
Add subsection on queuing and delivery semantics for standard signals

socket.7
Michael Kerrisk
select()/poll()/epoll honor SO_RCVLOWAT since Linux 2.6.28

unix.7
Michael Kerrisk
Note SCM_RIGHTS interaction with RLIMIT_NOFILE
If the file descriptors received in SCM_RIGHTS would cause the process to its exceed RLIMIT_NOFILE limit, the excess FDs are discarded.

user_namespaces.7
Michael Kerrisk
Describe the effect

of file-related capabilities inside user namespaces
  Michael Kerrisk
    Describe how kernel treats UIDs/GIDs when a process accesses files

vdso.7
  Tobias Klauser
    Mention removal of Blackfin port in Linux 4.17

ld.so.8
  Michael Kerrisk [Matthias Hertel]
    Note some further details of secure-execution mode
      Note some further details of the treatment of environment
      variables in secure execution mode. In particular (as noted by
      Matthias Hertel), note that ignored environment variables are also
      stripped from the environment. Furthermore, there are some other
      variables, not used by the dynamic linker itself, that are also
      treated in this way (see the glibc source file
      sysdeps/generic/unsecvars.h).

Apologies if I missed anyone!

New and rewritten pages
---

pidfd_open.2
Michael Kerrisk [Christian Brauner, Florian Weimer,
Daniel Colascione]
New page documenting pidfd_open(2)

pidfd_send_signal.2
Michael Kerrisk [Florian Weimer, Christian Brauner]
New page documenting pidfd_send_signal(2)

pivot_root.2

Michael Kerrisk [Eric W. Biederman, Reid Priedhorsky, Philipp Wendler]
This page has been completely rewritten, adding a lot of missing details (including the use of pivot_root(".", ".")) and an example program. In addition, the text prevaricating on whether or not pivot_root() might change the root and current working directories has been eliminated, and replaced with a simple description of the behavior of the system call, which has not changed for 19 years, and will not change in the future. Many longstanding errors in the old version of the page have also been corrected.

ipc_namespaces.7
Michael Kerrisk
New page with content migrated from namespaces(7)

uts_namespaces.7
Michael Kerrisk

New page with content migrated from namespaces(7)

Newly documented interfaces in existing pages
---

clone.2
Christian Brauner, Michael Kerrisk
Document CLONE_PIDFD
Add an entry for CLONE_PIDFD. This flag is available starting with kernel 5.2. If specified, a process file descriptor ("pidfd") referring to the child process will be returned in the ptid argument.

fanotify_mark.2
Jakub Wilk
Document FAN_MOVE_SELF

ptrace.2
Dmitry V. Levin [Michael Kerrisk]
Document PTRACE_GET_SYSCALL_INFO

regex.3
Rob Landley
Document REG_STARTEND

New and changed links
---

res_nclose.3

Michael Kerrisk
Add NEW link to resolver.3

Global changes

Various pages
Michael Kerrisk
SEE ALSO: correct list order

Various pages
Michael Kerrisk
Remove section number from references to function in its own page

Various pages
Michael Kerrisk
ERRORS: correct alphabetical order

Changes to individual pages
---

localedef.1
Marko Myllynen
Describe recently added options
Describe few recently added options (present in glibc-2.29).

clone.2
Michael Kerrisk
SEE ALSO: add pidfd_open(2)

copy_file_range.2
Amir Goldstein [Dave Chinner]
Kernel v5.3 updates

fanotify_mark.2
Jakub Wilk
Add kernel version numbers for some FAN_* constants

getdomainname.2
Michael Kerrisk
Add mention of UTS namespaces

gethostname.2
Michael Kerrisk [Jakub Wilk]
Mention UTS namespaces

io_submit.2
  Matti Moell [Matti Möll]
    Fix kernel version numbers for 'aio_rw_flags' flags

kill.2
  Michael Kerrisk
    SEE ALSO: add pidfd_send_signal(2)

mmap.2
  Nikola Forró
    Fix EINVAL conditions
      Since introduction of MAP_SHARED_VALIDATE, in case flags contain
      both
 MAP_PRIVATE and MAP_SHARED, mmap() doesn't fail with EINVAL,
      it succeeds.

      The reason for that is that MAP_SHARED_VALIDATE is in fact equal
      to MAP_PRIVATE | MAP_SHARED.

mount.2
  Michael Kerrisk [Reid Priedhorsky]
    Describe the concept of "parent mounts"
  Michael Kerrisk
    NOTES: add subsection heading for /proc/[pid]/{mounts,mountinfo}
  Michael Kerrisk
    Rework the text on mount namespaces a little
      Eliminate the term "Per-process namespaces" and add a reference
      to mount_namespaces(7).

move_pages.2
  Yang Xu [Michael Kerrisk]
    Mark E2BIG as deprecated
      E2BIG was removed in 2.6.29, we should mark it as deprecated.

perf_event_open.2
  Michael Kerrisk [Alexey Budankov]
    SEE ALSO: add Documentation/admin-guide/perf-security.rst

prctl.2
  Michael Kerrisk
    Clarify that PR_GET_SPECULATION_CTRL returns value as function result
  Michael Kerrisk
    Clarify
 that PR_MCE_KILL_GET returns value via function result
  Michael Kerrisk
    Clarify that PR_GET_FP_MODE returns value as function result
  Michael Kerrisk

RETURN VALUE: add some missing entries
Note success return for PR_GET_SPECULATION_CTRL and PR_GET_FP_MODE.

rt_sigqueueinfo.2
Michael Kerrisk
Note that 'si_code' can't be specified as SI_KERNEL
Michael Kerrisk
The rules for 'si_code' don't apply when sending a signal to oneself
The restriction on what values may be specified in 'si_code'
apply only when sending a signal to a process other than the
caller itself.
Michael Kerrisk
Rename 'uinfo' argument to 'info'
This is more consistent with the naming in other pages
that refer to a 'siginfo_t' structure.
Michael Kerrisk
SEE ALSO: add pidfd_send_signal(2)

sched_setaffinity.2
Michael Kerrisk
RETURN VALUE: sched_getaffinity() syscall differs
from the wrapper

setns.2
Mike Frysinger
Fix CLONE_NEWNS restriction info

sigaction.2
Michael Kerrisk
SEE ALSO: add pidfd_send_signal(2)

signalfd.2
Andrew Clayton, Michael Kerrisk
Note about interactions with epoll & fork

statx.2
Michael Kerrisk [Simone Piccardi]
Clarify details of a case where an invalid 'mask' value may be rejected

syscall.2
Shawn Anastasio
Add information for powerpc64
Michael Kerrisk [Adam Borowski, Florin Blanaru]
Update name of syscall instruction for riscv

syscalls.2
Michael Kerrisk
Add fsconfig(), fsmount(), fsopen(), fspick(), move_mount(), open_tree()

Michael Kerrisk [(), Michael(), Kerrisk(),]
Add new syscalls in 5.1
Add io_uring_enter(), io_uring_register(), io_uring_setup(), and
pidfd_send_signal().
Michael Kerrisk
Add clone3() and pidfd_open()

uname.2
Michael Kerrisk
Replace reference to namespaces(7)
with reference to uts_namespaces(7)

errno.3
Rasmus Villemoes
Add some comments on EAGAIN/EWOULDBLOCK and EDEADLK/EDEADLOCK

fexecve.3
Michael Kerrisk [Simone Piccardi]
ENOSYS occurs only if the kernel provides no execveat() syscall
Michael Kerrisk [Simone Piccardi]
ERRORS: add ENOENT

getauxval.3
Raphael Moreira Zinsly
Add new cache geometry entries

printf.3
Vincent Lefevre
Add detail on the first digit with the %e format

pthread_setcancelstate.3
pthreads.7
signal-safety.7
Carlos O'Donell
Describe issues with cancellation points in signal handlers

strtok.3
Michael Kerrisk [eponymous alias]
Correct description of use of 'saveptr' argument in strtok_r()
Michael Kerrisk [eponymous alias]
The caller should not modify 'saveptr' between strtok_r() calls
Michael Kerrisk
Add portability note for strtok_r() '*saveptr' value
On some implementations, '*saveptr' must be
NULL on first call
to strtok_r().

smartpqi.4

Murthy Bhat [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
Add sysfs entries
Gilbert Wu [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
Add module param expose ld first
Dave Carroll [Don Brace, Kevin Barnett, Matt Perricone, Scott Benesh]
Add module param to hide vsep

core.5
Paul Wise
Explain the new situation with argument splitting
Things changed in Linux v5.3-rc3 commit 315c69261dd3 from
splitting after template expansion to splitting beforehand.

resolv.conf.5
Nikola Forró
Update information about search list
Since glibc 2.26, the number of domains in the search list is
no longer limited.

man-pages.7
Michael Kerrisk
Relocate and enhance the text on semantic newlines
Michael Kerrisk [Paul Wise]
Paragraphs should not be separated by blank lines

mount_namespaces.7
Michael
Kerrisk
Explain how a namespace's mount point list is initialized
Provide a more detailed explanation of the initialization of
the mount point list in a new mount namespace.
Michael Kerrisk [Eric W. Biederman]
Clarify description of "less privileged" mount namespaces
Michael Kerrisk
SEE ALSO: refer to example in pivot_root(2)
Michael Kerrisk [Eric W. Biederman]
It may be desirable to disable propagation after creating a namespace
After creating a new mount namespace, it may be desirable to
disable mount propagation. Give the reader a more explicit
hint about this.

mq_overview.7
sysvipc.7
Michael Kerrisk
Adjust references to namespaces(7) to ipc_namespaces(7)

namespaces.7
Michael Kerrisk

Remove content migrated to new ipc_namespaces(7) page
Michael Kerrisk
Remove content migrated to uts_namespaces(7)
Michael Kerrisk
Include manual
page references in the summary table of namespace types
Make the page more compact by removing the stub subsections that
list the manual pages for the namespace types. And while we're
here, add an explanation of the table columns.

operator.7
Michael Kerrisk [Rick Stanley]
Prefix and postfix ++/-- have different precedences
Harbison and Steele also agree on this.

signal.7
Michael Kerrisk
Enhance the text on process-directed and thread-directed signals
clone(2) has a good description of these concepts; borrow
from it liberally.
Michael Kerrisk
SEE ALSO: add pidfd_send_signal(2)

user_namespaces.7
Michael Kerrisk
Improve explanation of meaning of ownership of nonuser namespaces

========== Changes in man-pages-5.04 ==========

Released: 2019-11-19, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets
in
the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Andrew Price <anprice@redhat.com>
Christian Brauner <christian.brauner@ubuntu.com>
Florian Weimer <fweimer@redhat.com>
Jakub Wilk <jwilk@jwilk.net>
Jan Kara <jack@suse.cz>
Jann Horn <jannh@google.com>
Kenigbolo Meya Stephen <kenigbol@ut.ee>

Marko Myllynen <myllynen@redhat.com>
Michael Kerrisk <mtk.manpages@gmail.com>
Mikael Magnusson <mikachu@gmail.com>
Robert Edmonds <edmonds@debian.org>
Silviu Popescu <silviupopescu1990@gmail.com>
Torin Carey <torin@tcarey.uk>
Witold Baryluk <witold.baryluk@gmail.com>
Yang Xu <xuyang2018.jy@cn.fujitsu.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

clone.2
  Michael Kerrisk [Christian Brauner, Jakub Wilk]
    Document clone3()

wait.2
  Michael Kerrisk
    Add P_PIDFD for waiting on a child referred to by a PID file descriptor

bpf-helpers.7
   Michael Kerrisk
    Refresh against kernel v5.4-rc7

New and changed links
---

clone3.2
  Michael Kerrisk
    New link to clone(2)

Changes to individual pages
---

clone.2
  Michael Kerrisk
    Rename arguments for consistency with clone3()
      Make the names of the clone() arguments the same as the fields
      in the clone3() 'args' struct:

          ctid   ==> child_pid
          ptid   ==> parent_tid
          newtls   ==> tld

child_stack ==> stack
Michael Kerrisk
Consistently order paragraphs for CLONE_NEW* flags
Sometimes the descriptions of these flags mentioned the
corresponding section 7 namespace manual page and then the
required capabilities, and sometimes the order was the was
the reverse. Make it consistent.
Michael Kerrisk [Christian Brauner, Jann Horn]
EXAMPLE: Allocate child's
stack using mmap(2) rather than malloc(3)
Christian Brauner suggested mmap(MAP_STACK), rather than
malloc(), as the canonical way of allocating a stack for the
child of clone(), and Jann Horn noted some reasons why
(MAP_STACK exists elsewhere, and mmap() returns a page-aligned
block of memory, which is useful if we want to set up a guard
page at the end of the stack).
Michael Kerrisk [Christian Brauner]
Tidy up the description of CLONE_DETACHED
The obsolete CLONE_DETACHED flag has never been properly
documented, but now the discussion CLONE_PIDFD also requires
mention of CLONE_DETACHED. So, properly document CLONE_DETACHED,
and mention its interactions with CLONE_PIDFD.
Michael Kerrisk [Christian Brauner]
Give the introductory paragraph a new coat of paint
Change the text in the introductory paragraph (which was written

20 years ago) to reflect the fact that clone*() does more things
nowadays.
Michael Kerrisk
Remove wording that suggests CLONE_NEW* flags are for containers
These flags are used for implementing many other interesting
things by now.
Michael Kerrisk
Remove various details that are already covered in namespaces pages
Remove details of UTS, IPC, and network namespaces that are
already covered in the corresponding namespaces pages in section 7.

clone.2
proc.5
Michael Kerrisk
Adjust references to namespaces(7)
Adjust references to namespaces(7) to be references to pages
describing specific namespace types.

fallocate.2
Andrew Price
Add gfs2 to the list of punch hole-capable filesystems

ioctl_iflags.2
  Michael Kerrisk [Robert Edmonds]
    Emphasize that FS_IOC_GETFLAGS and FS_IOC_SETFLAGS argument is 'int *'

ioctl_list.2
  Michael Kerrisk

   Add reference to ioctl(2) SEE ALSO section
      The referenced section lists various pages that document ioctls.

mmap.2
  Michael Kerrisk
    Note that MAP_STACK exists on some other systems
  Michael Kerrisk
    Some rewording of the description of MAP_STACK
      Reword a little to allow for the fact that there are now
      two reasons to consider using this flag.

pidfd_open.2
  Michael Kerrisk
    Note the waitid() use case for PID file descriptors
  Michael Kerrisk
    Add a subsection header "Use cases for PID file descriptors"
  Michael Kerrisk
    Make it a little more explicit the CLONE_PIDFD returns a PID FD

pivot_root.2
  Michael Kerrisk
    EXAMPLE: allocate stack using mmap() MAP_STACK rather than malloc()

quotactl.2
  Yang Xu [Jan Kara]
    Add some details about Q_QUOTAON

seccomp.2
cgroups.7
  Michael Kerrisk
    Switch to "considerate language"

select.2
  Michael Kerrisk
    POLLIN_SET/POLLOUT_SET/POLLEX_SET
 are now defined in terms of EPOLL*
      Since kernel commit a9a08845e9acbd224e4ee466f5c1275ed50054e8, the
      equivalence between select() and poll()/epoll is defined in terms
      of the EPOLL* constants, rather than the POLL* constants.

wait.2

Michael Kerrisk
waitid() can be used to wait on children in same process group as caller
Since Linux 5.4, idtype == P_PGID && id == 0 can be used to wait
on children in same process group as caller.
Michael Kerrisk
Clarify semantics of waitpid(0, ...)
As noted in kernel commit 821cc7b0b205c0df64cce59aacc330af251fa8f7,
threads create an ambiguity: what if the calling process's PGID
is changed by another thread while waitpid(0, ...) is blocked?
So, clarify that waitpid(0, ...) means wait for children whose
PGID matches the caller's PGID at the time of the call to
waitpid().

getauxval.3
Michael Kerrisk [Witold Baryluk]
Clarify that AT_BASE_PLATFORM and AT_EXECFN return pointers to strings
See https://bugs.debian.org/cgi-bin/bugreport.cgi?bug=942207

resolv.conf.5
Florian Weimer
Attempt clarify domain/search interaction
The domain directive is historic at this point; it should not
be used.

netdevice.7
Michael Kerrisk [Silviu Popescu]
Small wording fix in description of SIOCGIFCONF
SIOCGIFCONF returns "network layer" addresses (not "transport
layer").

uts_namespaces.7
Michael Kerrisk
Add a little more detail on scope of UTS namespaces

========== Changes in man-pages-5.05 ==========

Released: 2020-02-09, Munich

Yu Jian Wu <yujian.wu1@gmail.com>

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

clone.2
  Adrian Reber [Christian Brauner, Michael Kerrisk]
    Add clone3() set_tid information
  Michael Kerrisk
    Document CLONE_CLEAR_SIGHAND

fcntl.2
  Joel Fernandes [Michael Kerrisk]
    Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

memfd_create.2
  Joel Fernandes
    Update manpage with new memfd F_SEAL_FUTURE_WRITE seal

loop.4
   Yang Xu
    Document LOOP_SET_BLOCK_SIZE
  Yang Xu
    Document LOOP_SET_DIRECT_IO

proc.5
  Michael Kerrisk
    Document /proc/sys/vm/unprivileged_userfaultfd

Changes to individual pages
---

capget.2
  Michael Kerrisk [Yang Xu]
    Add missing details in EPERM error for setting inheritable capabilities

clone.2
  Michael Kerrisk
    Note that CLONE_THREAD causes similar behavior to CLONE_PARENT
      The introductory paragraphs note that "the calling process" is
      normally synonymous with the "the parent process", except in the
      case of CLONE_PARENT. The same is also true of CLONE_THREAD.
  Christian Brauner [Michael Kerrisk]
    Mention that CLONE_PARENT is off-limits for inits
  Michael Kerrisk [Colin Ian King]
    Add old EINVAL error for AArch64
  Michael Kerrisk
    ERRORS: add EINVAL for use of CLONE_PARENT by an init process

futex.2
  Ponnuvel Palaniyappan

Fix
a bug in the example

listen.2
Michael Kerrisk [Peter Gajdos]
The 'somaxconn' default value has increased to 4096

modify_ldt.2
set_thread_area.2
Andy Lutomirski [Markus T Metzger]
Fix type of base_addr

move_pages.2
John Hubbard [Michal Hocko]
Remove ENOENT from the list of possible return values

open.2
Adam Borowski
No need for /proc to make an O_TMPFILE file permanent
In the example snippet, we already have the fd, thus there's no need to refer to the file by name. And, /proc/ might be not mounted or not accessible.
Michael Kerrisk [Joseph C. Sible]
In O_TMPFILE example, describe alternative linkat() call
This was already shown in an earlier version of the page, but Adam Borowski's patch replaced it with an alternative. Probably, it is better to show both possibilities.

perf_event_open.2
Daniel Colascione
Mention EINTR for perf_event_open

ptrace.2
Denys Vlasenko
PTRACE_EVENT_STOP does not always report SIGTRAP

quotactl.2
Michael Kerrisk
Don't show numeric values of Q_XQUOTAON XFS_QUOTA_?DQ_* flags
The programmer should not need to care about the numeric values, and their inclusion is verbosity.
Yang Xu [Michael Kerrisk]
Add EINVAL error of Q_XQUOTARM operation

stime.2
Michael Kerrisk
Note that stime() is deprecated

syscall.2
  Petr Vorel [Cyril Hrubis]
    Update feature test macro requirements

sysctl.2
  Michael Kerrisk
    This system call was removed in Linux 5.5; adjust the page accordingly

userfaultfd.2
  Yang Xu [Michael Kerrisk]
    Add EPERM error

cmsg.3
  Rich Felker
    Clarify alignment issues and correct method of accessing CMSG_DATA()
      From an email by Rich Felker:

      It came to my attention while reviewing possible breakage with
      move to 64-bit time_t that some applications
 are dereferencing
      data in socket control messages (particularly SCM_TIMESTAMP*)
      in-place as the message type, rather than memcpy'ing it to
      appropriate storage. This necessarily does not work and is not
      supportable if the message contains data with greater alignment
      requirement than the header. In particular, on 32-bit archs,
      cmsghdr has size 12 and alignment 4, but struct timeval and
      timespec may have alignment requirement 8.
  Michael Kerrisk [Rich Felker]
    Modify CMSG_DATA() example to use memcpy()
      See previous patch to this page for rationale

exit.3
  Benjamin Peterson [Mike Frysinger]
    Use hex for the status mask

ftime.3
  Michael Kerrisk
    Note that this function is deprecated

getpt.3
  Samuel Thibault
    Remove mention of O_NOCTTY
      The glibc implementation of getpt has actually never been setting

malloc.3
  Vegard Nossum

Clarify realloc() return value
Petr Vorel
Remove duplicate _GNU_SOURCE

console_codes.4
Adam Borowski
Document \e[90m to 97, 100 to 107
Adam Borowski
\e[21m is now underline
Since 65d9982d7e523a1a8e7c9af012da0d166f72fc56 (4.17), it follows
xterm rather than common sense and consistency, being the only
command 1..9 where N+20 doesn't undo what N did. As libvte
0.51.90 got changed the same way, this behaviour will probably
stay.
Adam Borowski
Update \e[38m and \e[48m
Supported since cec5b2a97a11ade56a701e83044d0a2a984c67b4 (3.16).

cgroups.7
Michael Kerrisk
The v2 freezer controller was added in Linux 5.2
Michael Kerrisk
Split discussion of cgroups.events file and v2 release notification
In preparation for adding a description of the "frozen" key.
Michael Kerrisk
Describe the cgroup.events "frozen" key
Michael Kerrisk
Improve the discussion of the advantages of v2 release notification

inotify.7
Nick Shipp
Merge late perror() into fprintf() in example code

netlink.7
Antonin Décimo
Fix alignment issue in example

packet.7
kevin sztern [Michael Kerrisk]
Add missing tpacket_auxdata field (tp_vlan_tpid)

rtnetlink.7
Antonin Décimo
ifa_index is an unsigned int

tcp.7
Michael Kerrisk
tcp_low_latency is ignored since Linux 4.14

unix.7
  Michael Kerrisk
    The PID sent with SCM_CREDENTIALS must match an existing process

vsock.7
  Mikhail Golubev [Michael Kerrisk]
    Add missing structure element
      The structure 'struct sockaddr_vm' has additional element
      'unsigned char svm_zero[]' since version v3.9-rc1.

ldconfig.8
  DJ Delorie
    Document file filter and symlink pattern expectations

========== Changes in man-pages-5.06 ==========

Released: 2020-04-11, Munich

Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

openat2.2
  Aleksa Sarai [Michael Kerrisk]
    Document new openat2(2) syscall

pidfd_getfd.2
  Michael Kerrisk [Christian Brauner]
    New manual page documenting the pidfd_getfd() system call

select.2
  Michael Kerrisk
    Rewrite DESCRIPTION
      Improve structure and readability, at the same time incorporating
      text and details that were formerly in select_tut(2). Also
      move a few details in other parts of the page into DESCRIPTION.
  Michael Kerrisk
    Consolidate the discussion of pselect into a headed subsection
  Michael Kerrisk
    Consolidate historical glibc pselect() details under one subhead
  Michael Kerrisk
    Consolidate info on usleep() emulation in one place

Michael Kerrisk
Place the discussion of the self-pipe technique in a headed subsection
Michael Kerrisk
Note that FD_SET() and FD_CLR() do not return errors
Michael Kerrisk
Remove details of historical #include requirements
The POSIX situation has been the norm for a long time now,
and including ancient details overcomplicates the page.
Michael Kerrisk
Remove some ancient information about pre-POSIX types for 'timeout'

select_tut.2
Michael Kerrisk
Eliminate duplication of info across select_tut.2 and select2
There was a lot of a duplication of info in SYNOPSIS, DESCRIPTION
RETURN VALUE, and SEE ALSO. Move all of the info to one place:
the select(2) page.

sysvipc.7
Michael Kerrisk
Rewrite this page as just a summary of the System V IPC APIs
All of the other details in this page have by now been moved into
the relevant *ctl(2) pages.

time_namespaces.7
Michael Kerrisk [Andrei Vagin, Dmitry Safonov, Thomas Gleixner]
New page documenting time namespaces

Newly documented interfaces in existing pages
---

arch_prctl.2
Keno Fischer
Add ARCH_SET_CPUID subcommand

clock_getres.2
Benjamin Peterson
Document CLOCK_TAI
Michael Kerrisk
Add CLOCK_REALTIME_ALARM and CLOCK_BOOTTIME_ALARM

prctl.2
Mike Christie [Michal Hocko, Michael Kerrisk, Bart Van
Assche]
Document PR_SETIO_FLUSHER/GET_IO_FLUSHER

setns.2

Michael Kerrisk
Document CLONE_NEWTIME

statx.2
Eric Biggers
Document STATX_ATTR_VERITY

unshare.2
Michael Kerrisk
Document CLONE_NEWTIME

socket.7
Ricardo Biehl Pasquali, Michael Kerrisk
Add description of SO_SELECT_ERR_QUEUE
Alejandro Colomar [Michael Kerrisk]
Document SO_TIMESTAMPNS

Global changes

Various pages
Michael Kerrisk
Remove a few mentions of the ancient "Linux libc"

Various pages
Michael Kerrisk
Global formatting fix: disfavor nonstandard .TP indents
In many cases, these don't improve readability, and (when stacked)
they sometimes have the side effect of sometimes forcing text
to be justified within a narrow column range.

Various pages
Michael Kerrisk [Christian Brauner]
Fix clumsy wording around "nonnegative file descriptors"

Changes to individual pages
---

clock_getres.2
Helge Deller [Michael Kerrisk]
Consecutive calls for CLOCK_MONOTONIC may return same value
Consecutive calls to clock_gettime(CLOCK_MONOTONIC) are guaranteed
to return MONOTONIC values, which means that they either return
the *SAME* time value like the last call, or a later (higher) time
value.
Eric Rannaud

Dynamic POSIX clock devices can return other errors
Michael Kerrisk
Improve description of CPU-time clocks
Michael Kerrisk
Add an example program
Michael Kerrisk
CLOCK_REALTIME_COARSE is not settable
Michael Kerrisk
Note that CPU-time clocks are not settable.
Explicitly note that CLOCK_PROCESS_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID are not settable.
Michael Kerrisk
Clarify that CLOCK_TAI is nonsettable
Michael Kerrisk
Clarify that CLOCK_MONOTONIC is system-wide
Michael
Kerrisk
ERRORS: add EINVAL for attempt to set a nonsettable clock
Michael Kerrisk
Move text in BUGS to NOTES
The fact that CLOCK_PROCESS_CPUTIME_ID and
CLOCK_PROCESS_CPUTIME_ID are not settable isn't a bug,
since POSIX does allow the possibility that these clocks
are not settable.
Michael Kerrisk
SEE ALSO: add time_namespaces(7)

clock_nanosleep.2
Michael Kerrisk
clock_nanosleep() can also sleep against CLOCK_TAI
Michael Kerrisk
clock_nanosleep() also supports CLOCK_BOOTTIME
Presumably (and from a quick glance at the source code)
since Linux 2.6.39, when CLOCK_BOOTTIME was introduced.

clock_nanosleep.2
timer_create.2
timerfd_create.2
Michael Kerrisk
Add various missing errors
Mostly verified by testing and reading the code.

There is unfortunately quite a bit of inconsistency across API~s:

clock_gettime clock_settime clock_nanosleep timer_create timerfd_create

CLOCK_BOOTTIME y n (EINVAL) y y y

CLOCK_BOOTTIME_ALARM y n (EINVAL) y [1] y [1] y [1]
CLOCK_MONOTONIC y n (EINVAL) y y y
CLOCK_MONOTONIC_COARSE y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_MONOTONIC_RAW y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_REALTIME y y y y y
CLOCK_REALTIME_ALARM y n (EINVAL) y [1] y [1] y [1]
CLOCK_REALTIME_COARSE y n (EINVAL) n (ENOTSUP) n (ENOTSUP) n (EINVAL)
CLOCK_TAI y n (EINVAL) y y n (EINVAL)
CLOCK_PROCESS_CPUTIME_ID
y n (EINVAL) y y n (EINVAL)
CLOCK_THREAD_CPUTIME_ID y n (EINVAL) n (EINVAL [2]) y n (EINVAL)
pthread_getcpuclockid() y n (EINVAL) y y n (EINVAL)

[1] The caller must have CAP_WAKE_ALARM, or the error EPERM results.

[2] This error is generated in the glibc wrapper.

connect.2
Michael Kerrisk [Eric Dumazet]
Update the details on AF_UNSPEC
Update the details on AF_UNSPEC and circumstances in which
socket can be reconnected.

dup.2
Michael Kerrisk
SEE ALSO: add pidfd_getfd(2)

epoll_ctl.2
Michael Kerrisk
Various minor additions and clarifications

epoll_wait.2
Michael Kerrisk
A few minor additions and rewrites

execve.2
Michael Kerrisk
Add a subhead for the discussion of effect on process attributes
Michael Kerrisk
Explicitly note
that argv[argc] == NULL in the new program
Michael Kerrisk
ERRORS: ENOENT does not occur for missing shared libraries
See http://sourceware.org/bugzilla/show_bug.cgi?id=12241.

_exit.2
Michael Kerrisk
Clarify that raw _exit() system call terminates only the calling thread

inotify_add_watch.2
  Michael Kerrisk
    EXAMPLE: add reference to example in inotify(7)

io_submit.2
  Julia Suvorova
    Add IOCB_CMD_POLL opcode

lseek.2
  Michael Kerrisk [Matthew Wilcox]
    ERRORS: ENXIO can also occur SEEK_DATA in middle of hole at end of file

madvise.2
  Michael Kerrisk [Andrea Arcangeli]
    Incorporate some (ancient) comments about MADV_HUGEPAGE
      Back in 2011, a mail from Andrea Arcangeli noted some details
      that I never got round to incorporating into the manual page.

mmap.2
  Michael Kerrisk
    Add a subhead for the 'flags' argument
  Michael Kerrisk
    Move some text hidden at the end of
 DESCRIPTION to NOTES

msgctl.2
  Michael Kerrisk
    Add information on permission bits (based on sysvipc(7) text)
  Michael Kerrisk
    Copy information on 'msqid_ds' fields from sysvipc(7)

open.2
  Michael Kerrisk
    Clarify that O_NOFOLLOW is relevant (only) for basename of 'pathname'
  Aleksa Sarai
    Add references to new openat2(2) page
  Michael Kerrisk
    Note EINVAL error for invalid character in basename of 'pathname'

pidfd_open.2
  Michael Kerrisk
    Mention pidfd_getfd(2)

poll.2
  Michael Kerrisk
    Add an example program
  Michael Kerrisk

Mention epoll(7) in the introductory paragraph
Michael Kerrisk
Improve description of EFAULT error
Michael Kerrisk
Fix description of ENOMEM error

select_tut.2
Michael Kerrisk
Adjust header file includes in example
Employ <sys/select.h>, rather than the historical header files.

semctl.2
Michael Kerrisk
Copy information
on 'semid_ds' fields from sysvipc(7)
Michael Kerrisk
Add a reference to the example in shmop(2)
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)

semget.2
Michael Kerrisk
EXAMPLE: add an example program

semop.2
Michael Kerrisk
Add a reference to the semop(2) example in shmop(2)

shmctl.2
Michael Kerrisk
Add information on permission bits (based on sysvipc(7) text)
Michael Kerrisk
Note that execute permission is not needed for shmat() SHM_EXEC
Michael Kerrisk
Copy information on 'shmid_ds' fields from sysvipc(7)
Michael Kerrisk
Some small improvements to the description of the 'shmid_ds' structure

shmget.2
Michael Kerrisk
Add a reference to the example in shmop(2)

shmop.2
Michael Kerrisk
EXAMPLE: add a pair of example programs
Add example programs demonstrating usage of shmget(2), shmat(2),
semget(2), semctl(2),

and semop(2).

sigaction.2
signal.7
  Zack Weinberg
    Document kernel bugs in delivery of signals from CPU exceptions

stat.2
  Michael Kerrisk
    Clarify definitions of timestamp fields
      In particular, make it clear that atime and mtime relate to the
      file *data*.

syscalls.2
  Michael Kerrisk
    Add new Linux 5.6 system calls
  Michael Kerrisk
    Note that the 5.x series followed 4.20

timer_create.2
  Michael Kerrisk
    timer_create(2) also supports CLOCK_TAI
  Michael Kerrisk
    Mention clock_getres(2) for further details on the various clocks

timerfd_create.2
  Michael Kerrisk [Thomas Gleixner]
    Note a case where timerfd_settime() can fail with ECANCELED
  Michael Kerrisk [devi R.K, Thomas Gleixner]
    Negative changes to CLOCK_REALTIME may cause read() to return 0
  Michael Kerrisk
    Rework text for EINVAL for invalid clock ID
  Michael Kerrisk
    Refer reader to clock_getres(2) for
 further details on the clocks

unshare.2
  Michael Kerrisk
    Add CLONE_NEWCGROUP and CLONE_NEWTIME to example program

exit.3
  Michael Kerrisk [Walter Harms]
    Small improvement to the discussion of 'status' argument

ftok.3
  Michael Kerrisk
    EXAMPLE: add a reference to the example in semget(2)

getifaddrs.3
  Michael Kerrisk [Michael Galassi]
    EXAMPLE: remove unneeded loop variable

nl_langinfo.3
  Eugene Syromyatnikov
    Document era-related locale elements
  Eugene Syromyatnikov
    Add information about AM/PM time format locale elements
  Eugene Syromyatnikov
    Mention the respective strftime(3) conversion specifications

sem_init.3
  Michael Kerrisk
    Add references to example code in shm_open(3) and sem_wait(3)

sem_post.3
  Michael Kerrisk
    Add a reference to code example code in shm_open(3)

shm_open.3
  Michael Kerrisk
    EXAMPLE: add some example programs

strcmp.3
  Michael Kerrisk

  Add an example program
  Michael Kerrisk [Andrew Micallef, Walter Harms]
    Rework text describing return value to be clearer
  Michael Kerrisk
    Note that the comparison is done using unsigned char
  Michael Kerrisk
    SEE ALSO: add ascii(7)

strftime.3
  Eugene Syromyatnikov [Michael Kerrisk]
    Refer to the relevant nl_langinfo(3) items
  Eugene Syromyatnikov
    Expand %E and %O description
  Eugene Syromyatnikov
    Consistently document fall-back format string

proc.5
  Mike Frysinger
    Clarify /proc/[pid]/cmdline mutability

cgroups.7

Michael Kerrisk
Update list of cgroups v2 controllers
Update the list of cgroups v2 controllers (several controllers were missing).
Michael Kerrisk
Add a subsection on cgroup v2 mount options and include 'nsdelegate'
Michael Kerrisk
Document the cgroups v2 'memory_localevents' mount option
Michael Kerrisk
SEE ALSO: add Documentation/admin-guide/cgroup-v2.rst

namespaces.7
Michael Kerrisk
Add time namespaces information
Michael Kerrisk
Eliminate some superfluous info from display of /proc/PID/ns links

path_resolution.7
Aleksa Sarai
Update to mention openat2(2) features

socket.7
Michael Kerrisk
Note SCM message types for SO_TIMESTAMP and SO_TIMESTAMPNS

tcp.7
Michael Kerrisk
SEE ALSO: mention Documentation/networking/ip-sysctl.txt

time.7
Michael Kerrisk
Add small subsection on clocks and time namespaces

unix.7
Heinrich Schuchardt
Correct example

vsock.7
Stefano Garzarella [Jorgen Hansen, Stefan Hajnoczi]
Add VMADDR_CID_LOCAL description

========== Changes in man-pages-5.07 ==========

Released: 2020-06-09, Munich

Contributors

The following people contributed patches/fixes or (noted in brackets in the changelog below) reports, notes, and ideas that have been incorporated
in changes in this release:

Apologies if I missed anyone!

New and rewritten pages
---

ioctl_fslabel.2
  Eric Sandeen
    New page documenting filesystem get/set label ioctl(2) operations

Removed pages
---

ioctl_list.2
  Michael Kerrisk [Heinrich Schuchardt, Eugene Syromyatnikov]
    This page was first added more than 20 years ago. Since
    that time it has seen hardly any update, and is by now
    very much out of date, as reported by Heinrich Schuchardt
    and confirmed by Eugene Syromyatnikov.

    As Heinrich says:

      Man-pages like netdevices.7 or ioctl_fat.2 are what is
      needed to help a user who does not want to read through the
      kernel code.

      If ioctl_list.2 has not been reasonably maintained since
      Linux 1.3.27 and hence is not a reliable source of
      information, shouldn't it be dropped?

    My answer is, yes (but
 let's move a little info into ioctl(2)).

Newly documented interfaces in existing pages
---

adjtimex.2
  Arnd Bergmann [Richard Cochran, Michael Kerrisk]
    Document clock_adjtime(2)

clock_getres.2
  Richard Cochran [Michael Kerrisk]
    Explain dynamic clocks

clone.2
  Christian Brauner, Michael Kerrisk
    Document the clone3() CLONE_INTO_CGROUP flag

mremap.2

Brian Geffon, Michael Kerrisk [Lokesh Gidra]
Document MREMAP_DONTUNMAP

open.2
Joseph C. Sible [Michael Kerrisk]
Document fs.protected_fifos and fs.protected_regular

prctl.2
Dave Martin
Add PR_SPEC_INDIRECT_BRANCH for SPECULATION_CTRL prctls
Dave Martin
Add PR_SPEC_DISABLE_NOEXEC for SPECULATION_CTRL prctls
Dave Martin
Add PR_PAC_RESET_KEYS (arm64)

ptrace.2
Joseph C. Sible
Document PTRACE_SET_SYSCALL

proc.5
Michael Kerrisk
Document /proc/sys/fs/protected_regular
Michael
Kerrisk
Document /proc/sys/fs/protected_fifos
Michael Kerrisk
Document /proc/sys/fs/aio-max-nr and /proc/sys/fs/aio-nr

New and changed links
---

clock_adjtime.2
Arnd Bergmann
New link to adjtimex(2)

Global changes

Various pages
Michael Kerrisk
Retitle EXAMPLE section heading to EXAMPLES
EXAMPLES appears to be the wider majority usage across various
projects' manual pages, and is also what is used in the POSIX
manual pages.

Various pages
Michael Kerrisk

Correct bogus POSIX.1 standards names
POSIX.1-2003 ==> POSIX.1-2001 TC1
POSIX.1-2004 ==> POSIX.1-2001 TC2
POSIX.1-2013 ==> POSIX.1-2008 TC1
POSIX.1-2016 ==> POSIX.1-2008 TC2

Various pages
Michael Kerrisk
Add section number in page cross-reference.

Various pages
Kir Kolyshkin
Add missing commas in SEE ALSO

Various pages
Michael Kerrisk
Remove AVAILABILITY section heading
In the few pages where this heading (which is "nonstandard" within
man-pages) is used, it always immediately follows CONFORMING TO
and generally contains information related to standards. Remove
the section heading, thus incorporating AVAILABILITY into
CONFORMING TO.

Various pages
Michael Kerrisk
Remove section number in page self-references

Various pages
Michael Kerrisk
Put SEE ALSO entries in alphabetical order

Various pages
Michael Kerrisk
Place SH sections in standard order
Fix various pages that deviated from the norm described in
man-pages(7).

Various "aio" pages
Michael Kerrisk [Andi Kleen, Jeff Moyer]
Change uses of aio_context_t to io_context_t

Changes to individual pages
---

bpf.2
Peter Wu
Update enum bpf_map_type and enum bpf_prog_type

Richard Palethorpe
Change note on unprivileged access
The kernel now allows calls to bpf() without CAP_SYS_ADMIN
under some circumstances.

clone.2
Michael Kerrisk
Add kernel version numbers for clone_args fields
Michael Kerrisk
Combine separate NOTES sections

close.2
Michael Kerrisk [Lukas Czerner, Peter Schiffer, Thierry Lelegard]
Note behavior when close() happens in a parallel thread
If one thread is blocked in an I/O system call on a file descriptor
that is closed in another thread, then the blocking system call
does not return immediately, but rather when the I/O operation
completes. This surprises some people, but is longstanding
behavior.

connect.2
Stefan Puiu
Can return EACCES because of SELinux

execve.2
Michael Kerrisk [Eric Hopper]
Changes to the "dumpable" flag may change ownership of /proc/PID files
Michael Kerrisk
Improve/correct
discussion of changes to dumpable flag during execve(2)
The details were not quite accurate. Defer to prctl(2)
for the more complete picture.
Nikola Forró
Clarify signal sent to the process on late failure
Michael Kerrisk
SEE ALSO: add capabilities(7)

fanotify_init.2
Amir Goldstein [Matthew Bobrowski]
Move out of place entry FAN_REPORT_FID
It was inserted in the middle of the FAN_CLASS_ multi flags bit
and broke the multi flag documentation.
Michael Kerrisk [Alexander Morozov, Amir Goldstein, Jan Kara]
Remove mention of FAN_Q_OVERFLOW as an input value in 'mask'
See https://bugzilla.kernel.org/show_bug.cgi?id=198569.
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Clarification about FAN_EVENT_ON_CHILD and new events
Amir Goldstein [Jan Kara, Matthew Bobrowski]

Clarification about FAN_MARK_MOUNT and FAN_REPORT_FID

getdents.2
Petr Vorel [Michael Kerrisk]
Mention glibc support for getdents64()
Support was added in glibc 2.30.
Chris Lamb
Correct linux_dirent definition in example code
It is "unsigned long" earlier up in the file

gettid.2
Michael Kerrisk [Joseph C. Sible]
Document header file and feature test macro requirements for gettid()

ioctl.2
Michael Kerrisk
SEE ALSO: add ioctl_fslabel(2)
Michael Kerrisk
Remove mentions of ioctl_list(2)
Michael Kerrisk
Move subsection on "ioctl structure" from ioctl_list(2) to ioctl(2)

io_setup.2
Michael Kerrisk
Tweak description of /proc/sys/fs/aio-max-nr

mbind.2
Li Xinhai [Michael Kerrisk]
Remove note about MPOL_MF_STRICT been ignored

mmap.2
Michael Kerrisk [Heinrich Schuchardt]
Don't mark MAP_ANON as deprecated

move_pages.2
Yang Shi [Michal Hocko]
Returning positive value is a new error case

mremap.2
Michael Kerrisk
Remove mention of "Segmentation fault" in EFAULT text
"Segmentation fault" (SIGSEGV) is not exactly the same thing as EFAULT.
Michael Kerrisk
Reorder some paragraphs in NOTES
Michael Kerrisk

Move a paragraph from DESCRIPTION to NOTES

msgctl.2
Michael Kerrisk
Correct description of 'msg_ctime' field
Verified by inspecting kernel source.

nfsservctl.2
Michael Kerrisk
SEE ALSO: add nfsd(7)

open.2
Michael Kerrisk
Some '*at' APIs have functionality that isn't in conventional APIs
Note that another reason to use the *at() APIs is to access
'flags' functionality that is not available in the corresponding
conventional APIs.
Michael Kerrisk
Add a few more APIs to list in "Rationale for openat()..."
There have been a few more dirfd APIs added in recent times.
Michael Kerrisk
Explain ways in which a 'directory file descriptor' can be
obtained
Michael Kerrisk
Add openat2() to list of APIs that take a 'dirfd' argument

openat2.2
Michael Kerrisk [Aleksa Sarai]
Various changes after feedback from Aleksa Sarai

poll.2
Michael Kerrisk
Add license to example program

prctl.2
Dave Martin
Sort prctls into alphabetical order
Dave Martin
Clarify that prctl can apply to threads
The current synopsis for prctl(2) misleadingly claims that prctl
operates on a process. Rather, some (in fact, most) prctls operate
Dave Martin [Dave Hansen]
Document removal of Intel MPX prctls
Dave Martin
Fix mis-description of thread ID values in procfs
Dave Martin
Work around bogus constant "maxsig" in PR_SET_PDEATHSIG
Michael Kerrisk

Add reference to proc(5) for /proc/self/task/[tid]/comm
Dave Martin [Michael Kerrisk]
Add health warning
Dave Martin
Clarify the unsupported hardware case of EINVAL

rename.2
Michael Kerrisk
SEE ALSO: add rename(1)

s390_runtime_instr.2
Heiko Carstens [Eugene Syromyatnikov, Michael Kerrisk]
Document signum argument behavior change
Document that the signum argument is ignored in newer kernels, but that user space should pass a valid real-time signal number for backwards compatibility.

semctl.2
Michael Kerrisk [Manfred Spraul]
Correct description of sem_ctime field

semget.2
Michael Kerrisk
Add license to example program

shmctl.2
Michael Kerrisk
Correct 'shm_ctime' description

shmop.2
Michael Kerrisk
Add license to example programs

statfs.2
Michael Kerrisk [David Adam]
Add SMB2 constant to filesystem types list

syscall.2
Dave Martin [Will Deacon]
arm64: Fix syscall number register size
Dave Martin [Russell King]
arm: Use real register names for arm/OABI

sysfs.2
Michael Kerrisk
SEE
ALSO: add proc(5) and sysfs(5)

utimensat.2
  Goldwyn Rodrigues
    Immutable flag returns EPERM
      Linux kernel commit 337684a1746f "fs: return EPERM on immutable
      inode" changed the return value of the utimensat(2) from -EACCES
      to -EPERM in case of an immutable flag.

wait4.2
  Michael Kerrisk
    Update wait3() feature test macro requirements for changes in glibc 2.26

cexp2.3
  Michael Kerrisk
    Still not present in glibc 2.31

cmsg.3
  Michael Kerrisk
    CONFORMING TO: note which CMSG_* APIs are in current and upcoming POSIX

dirfd.3
  Michael Kerrisk
    SEE ALSO: add openat(2)

dlsym.3
  Alexander Monakov
    Extend discussion of NULL symbol values
      Avoid implying that use of IFUNC is the only way to produce a
      symbol with NULL value. Give more scenarios how a symbol may get
      NULL value, but explain that in those scenarios dlsym() will fail
      with Glibc's ld.so due
 to an implementation inconsistency.

err.3
  Michael Kerrisk
    EXAMPLES: use EXIT_FAILURE rather than 1 as exit status

expm1.3
  Michael Kerrisk
    The expm1() bogus underflow floating-point exception has been fixed
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6778
  Michael Kerrisk
    The bogus invalid floating-point exception bug has been fixed
      https://www.sourceware.org/bugzilla/show_bug.cgi?id=6814.

fdim.3
  Michael Kerrisk
    BUGS: these functions did not set errno on some architectures
      https://www.sourceware.org/bugzilla/show_bug.cgi?id=6796

ftw.3
  Michael Kerrisk
    glibc eventually fixed a regression in FTW_SLN behavior
      For details, see:
      https://bugzilla.redhat.com/show_bug.cgi?id=1422736
      http://austingroupbugs.net/view.php?id=1121
      https://bugzilla.redhat.com/show_bug.cgi?id=1422736

getauxval.3
  YunQiang Su
    MIPS, AT_BASE_PLATFORM passes
 ISA level

getdtablesize.3
  Michael Kerrisk
    Remove redundant statement that getdtablesize() is a library function

malloc.3
  Michael Kerrisk
    Add 'reallocarray' in NAME
  Michael Kerrisk
    Add VERSIONS section noting when reallocarray() was added to glibc

newlocale.3
  Michael Kerrisk [Piotr Caban]
    Fix a valgrind issue in example program
      See https://bugzilla.kernel.org/show_bug.cgi?id=202977.

nextafter.3
  Michael Kerrisk
    Since glibc 2.23, these functions do set errno
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6799.

posix_spawn.3
  Olivier Gayot [Adhemerval Zanella]
    Clarify by using name of steps rather than syscalls
  Olivier Gayot [Adhemerval Zanella]
    Document implementation using clone() since glibc 2.24
  Olivier Gayot [Adhemerval Zanella]
    Document POSIX_SPAWN_USEVFORK
      Added a few lines about POSIX_SPAWN_USEVFORK so that it appears

 clearly that since glibc 2.24, the flag has no effect.
  Olivier Gayot [Adhemerval Zanella]
    Document the POSIX_SPAWN_SETSID attribute

pow.3

Michael Kerrisk
BUGS: pow() performance problem for some (rare) inputs has been fixed
See https://sourceware.org/bugzilla/show_bug.cgi?id=13932
Michael Kerrisk
Several bugs in glibc's pow() implementation were fixed in glibc 2.16
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=3866.
Michael Kerrisk
Add a subheading to mark off historical bugs that are now fixed

printf.3
Tobias Stoeckmann
Prevent signed integer overflow in example

ptsname.3
Bruno Haible
Fix description of failure behaviour of ptsname_r()

random.3
John Marshall
Change "RAND_MAX" tp "2^31-1"

scalb.3
Michael Kerrisk
These functions now correctly set errno for the EDOM and ERANGE cases
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803
and https://www.sourceware.org/bugzilla/show_bug.cgi?id=6804

scalbln.3
Michael Kerrisk
These functions now correctly set errno for the ERANGE case
See https://www.sourceware.org/bugzilla/show_bug.cgi?id=6803

scanf.3
Michael Kerrisk [Jürgen Sauermann]
Clarify that 'x' specifier allows a 0x/0X prefix in input string

sem_getvalue.3
Michael Kerrisk [Andrea Galbusera]
Note that glibc's sem_getvalue() doesn't return EINVAL errors
See https://bugzilla.kernel.org/show_bug.cgi?id=204273

setlogmask.3
Michael Kerrisk
Note that LOG_UPTO() is included in the next POSIX release

shm_open.3
Michael Kerrisk
Add license to example programs

sincos.3
  Michael Kerrisk
    The glibc implementation does now give EDOM for a domain error
      See https://www.sourceware.org/bugzilla/show_bug.cgi?id=15467

stdarg.3
  Michael Kerrisk
    SEE ALSO: add vprintf(3), vscanf(3), vsyslog(3)

strcmp.3
   Michael Kerrisk
    Add license to example programs

strftime.3
  Urs Thuermann
    ISO week number can be 52, add example

y0.3
  Michael Kerrisk
    These functions now correctly diagnose a pole error
      https://sourceware.org/bugzilla/show_bug.cgi?id=6807
  Michael Kerrisk
    errno is now correctly set to ERANGE on underflow
      https://www.sourceware.org/bugzilla/show_bug.cgi?id=6808

loop.4
  Michael Kerrisk [Vlad]
    'lo_flags' is nowadays "r/w"
      See https://bugzilla.kernel.org/show_bug.cgi?id=203417

veth.4
  Devin J. Pohly
    Add a more direct example
      iproute2 allows you to specify the netns for either side of a veth
      interface at creation time. Add an example of this to veth(4) so
      it doesn't sound like you have to move the interfaces in a
      separate step.

core.5
  Michael Kerrisk [Jonny Grant]
    Mention 'sysctl -w' as a way of changing core_pattern
 setting
  Michael Kerrisk [Jonny Grant]
    Note that not dumping core of an unreadable binary is a security measure
  Michael Kerrisk [Jonny Grant]
    Explain that core_pattern %e is process/thread 'comm' value
      The 'comm' value is typically the same as the (possibly

truncated) executable name, but may be something different.

filesystems.5
  Michael Kerrisk
    SEE ALSO: add sysfs(5) and xfs(5)

locale.5
  Michael Kerrisk [Helge Kreutzmann]
    Improve description of 'first_weekday'

proc.5
  Michael Kerrisk
    Note kernel version for /proc/PID/smaps VmFlags "wf" flag
  Michael Kerrisk
    Add "um" and "uw" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk
    Add "mp" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk
    Note kernel version that removed /proc/PID/smaps VmFlags "nl" flag
  Ian Rogers
    Add "wf" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk
    Note kernel version for /proc/PID/smaps
 VmFlags "dd" flag
  Michael Kerrisk
    Add "sf" to VmFlags in /proc/[pid]/smaps
  Michael Kerrisk [Kirill A. Shutemov]
    Remove "mp" under VmFlags in /proc/[pid]/smaps
  Michael Kerrisk [Eric Hopper]
    Alert the reader that UID/GID changes can reset the "dumpable" attribute
  Keno Fischer
    Fix an outdated note about map_files
      The restriction to CAP_SYS_ADMIN was removed from map_files in 2015.
  Michael Kerrisk [Helge Kreutzmann]
    Better explanation of some /proc/ide fields
  Michael Kerrisk
    TASK_COMM_LEN limit includes the terminating '\0'
      Clarify this detail in the discussion of /proc/[pid]/comm.
  Michael Kerrisk
    Add a detail to /proc/[pid]/comm
      Note the connection to the "%e" specifier in
      /proc/sys/kernel/core_pattern.

securetty.5
  Michael Kerrisk [Helge Kreutzmann]
    Improve wording of .SH one-line description

tzfile.5

Michael Kerrisk
Sync
to 2020a tzdb release
From https://www.iana.org/time-zones, version 2020a.
Michael Kerrisk
Explain UT abbreviation

ascii.7
Michael Kerrisk [Helge Kreutzmann]
SEE ALSO: fix sort order in entries

bpf-helpers.7
Michael Kerrisk
Resync against kernel 5.7

cgroups.7
Marcus Gelderie
Mention cgroup.sane_behavior file
The cgroup.sane_behavior file returns the hard-coded value "0" and
is kept for legacy purposes. Mention this in the man-page.
Michael Kerrisk
Note the existence of the clone3() CLONE_INTO_CGROUP flag

credentials.7
Michael Kerrisk
Alert reader that UID/GID changes can affect process capabilities
Michael Kerrisk
Changes to process UIDs/GIDs can effect the "dumpable" attribute
Michael Kerrisk
Add a list of the APIs that change a process's credentials

fanotify.7
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Fix fanotify_fid.c example
Michael Kerrisk
Wrap some long lines in example program

fanotify.7
fanotify_mark.2
Amir Goldstein [Matthew Bobrowski]
Clarify FAN_ONDIR in output mask
FAN_ONDIR was an input only flag before introducing
FAN_REPORT_FID. Since the introduction of FAN_REPORT_FID, it can
also be in output mask.

hier.7
Thomas Piekarski [Gary Perkins]
Updating from FHS 2.3 to 3.0

See https://bugzilla.kernel.org/show_bug.cgi?id=206693

inotify.7
  Michael Kerrisk [Jason Etherton]
    Add missing #include in example program

ip.7
  Michael Kerrisk [Martin Doucha]
    Note a few more valid 'protocol' values
      See https://bugzilla.kernel.org/show_bug.cgi?id=204981
  Michael Kerrisk
    SEE ALSO: add netdevice(7)

man-pages.7
  Michael Kerrisk
    Rename EXAMPLE to EXAMPLES
  Michael Kerrisk
    Describe COPYRIGHT section
      man-pages doesn't use COPYRIGHT sections in manual pages,
 but
      various projects do. Make some recommendations about placement
      of the section.
  Michael Kerrisk
    Add REPORTING BUGS section
      man-pages doesn't have a REPORTING BUGS section in manual pages,
      but many other projects do. Make some recommendations about
      placement of that section.
  Michael Kerrisk
    Mention AUTHORS in summary section list
      Although man-pages doesn't use AUTHORS sections, many projects do
      use an AUTHORS section in their manual pages, so mention it in
      man-pages to suggest some guidance on the position at which
      to place that section.

mount_namespaces.7
  Michael Kerrisk
    SEE ALSO: add mount(8), umount(8)

namespaces.7
  Michael Kerrisk
    Document /proc/sys/user/max_time_namespaces

netlink.7
  Michael Kerrisk [Idan Katz]
    Update path for NETLINK_CONNECTOR docs in kernel source tree
  Michael Kerrisk [Fabien Siron]
     Note that NETLINK_SOCK_DIAG is preferred over NETLINK_INET_DIAG

pid_namespaces.7
  Michael Kerrisk
    Note that /proc/sys/kernel/ns_last_pid is virtualized per PID NS
  Michael Kerrisk
    Correct capability requirements for write to /proc/sys/kernel/ns_last_pid
      CAP_SYS_ADMIN is needed in the user NS that owns the PID NS.

rtnetlink.7
  Jan Moskyto Matejka [Michael Kerrisk]
    Add missing RTA_* attributes

standards.7
  Michael Kerrisk [Geoff Clare]
    Add some more standards
      Add: SUSv4 2016 edition, POSIX.1-2017, and SUSv4 2018 edition
  Michael Kerrisk
    Remove mention of bogus "POSIX" names
      The terms POSIX.1-{2003,2004,2013,2016} were inventions of
      my imagination, as confirmed by consulting Geoff Clare of
      The Open Group. Remove these names.

symlink.7
  Michael Kerrisk
    Describe differences in the treatment of symlinks in the dirname
      Describe differences in
 the treatment of symlinks in the dirname
      part of pathname.

tcp.7
  Michael Kerrisk [vrafaeli@msn.com]
    Update info on tcp_syn_retries default value
      See https://bugzilla.kernel.org/show_bug.cgi?id=202885.

user_namespaces.7
  Michael Kerrisk [Léo Stefanesco]
    Clarify that "system time" means "calendar time"

xattr.7
  Achilles Gaikwad
    Add attr(1) as relevant page to SEE ALSO

ldconfig.8
  Florian Weimer
    Mention new default for --format in glibc 2.32

zdump.8
  Michael Kerrisk [Marco Curreli, Paul Eggert]
    Update to latest upstream tz release

Look under "Latest version", which is 2020a.

========== Changes in man-pages-5.08 ==========

Released: 2020-08-13, Munich

victorm007@yahoo.com

Apologies if I missed anyone!

Newly documented interfaces in existing pages
---

prctl.2
  Dave Martin
    Add SVE prctls (arm64)
      Add documentation for the PR_SVE_SET_VL and PR_SVE_GET_VL
      prctls added in Linux 4.15 for arm64.
  Dave Martin [Catalin Marinas]
    Add tagged address ABI control prctls (arm64)
      Add documentation for the PR_SET_TAGGED_ADDR_CTRL and
      PR_GET_TAGGED_ADDR_CTRL prctls added in Linux 5.4 for arm64.

setns.2
  Michael Kerrisk
    Document the use of PID file descriptors with setns()
      Starting with Linux 5.8, setns() can take a PID file descriptor as
      an argument, and move the caller
 into or more of the namespaces of
      the thread referred to by that descriptor.

capabilities.7
  Michael Kerrisk
    Document CAP_BPF
  Michael Kerrisk
    Add CAP_PERFMON

symlink.7
  Aleksa Sarai
    Document magic links more completely

Global changes

A few pages
  Michael Kerrisk
    Use \` rather than `
      \` produces better rendering in PDF.

Various pages
  Michael Kerrisk [Geoff Clare]

Use "\(ti" instead of "~"
A naked tilde ("~") renders poorly in PDF. Instead use "\(ti",
which renders better in a PDF, and produces the same glyph
when rendering on a terminal.

Various pages
Michael Kerrisk [Geoff Clare]
Use "\(ha" rather than "^" in code
This renders better in PDF.

Various pages
Mike Frysinger
Drop "coding: UTF-8" header
This header is used inconsistently -- man pages are UTF-8 encoded
but not setting this marker.
It's only respected by the man-db
package, and seems a bit anachronistic at this point when UTF-8
is the standard default nowadays.

Various pages
Mike Frysinger
Trim leading blank comment line
Very few pages do this, so trim them.

Various pages
Mike Frysinger
Use standard .\" comment style
The \" comment produces blank lines. Use the .\" that the vast
majority of the codebase uses instead.

Various pages
Mike Frysinger [G. Branden Robinson]
Various pages: Drop t comment header
Historically, a comment of the following form at the top of a
manual page was used to indicate too man(1) that the use of tbl(1)
was required in order to process tables:

'\" t

However, at least as far back as 2001 (according to Branden),
man-db's man(1) automatically uses tbl(1) as needed, rendering
this comment unnecessary.
And indeed many existing pages in
man-pages that have tables don't have this comment at the top of
the file. So, drop the comment from those files where it is
present.

Changes to individual pages
---

ioctl_tty.2
  Michael Kerrisk
    Fix a confusing wording error in description of TIOCSPTLCK

iopl.2
  Thomas Piekarski [victorm007@yahoo.com]
    Updating description of permissions and disabling interrupts
      Update description of permissions for port-mapped I/O set
      per-thread and not per-process. Mention that iopl() can not
      disable interrupts since Linux 5.5 anymore and is in general
      deprecated and only provided for legacy X servers.

      See https://bugzilla.kernel.org/show_bug.cgi?id=205317

keyctl.2
  Oleksandr Kravchuk
    Declare auth_key to fix a compilation error in example code

lseek.2
  Andrew Price
    List gfs2 support for SEEK_HOLE/SEEK_DATA

mount.2
   Michael Kerrisk
    ERRORS: add EINVAL for bind mount of mount namespace inode

open.2
  Michael Kerrisk
    Say a bit more about what happens when 'mode' is wrongly omitted

pidfd_open.2
  Michael Kerrisk
    Add the setns(2) use case for PID file descriptors
  Michael Kerrisk
    Close the pidfd in EXAMPLE
      Close the PID file descriptor in the example program, to hint to
      the reader that like every other kind of file descriptor, a PID FD
      should be closed.

prctl.2
  Michael Kerrisk
    The parent death signal is cleared on some credential changes
      See kernel/cred.c::commit_creds() in the Linux 5.6 source code.

seccomp.2

Andy Lutomirski
Improve x32 and nr truncation notes

send.2
recv.2
Alyssa Ross
Add msg_iovlen POSIX note
msg_iovlen is incorrectly typed (according to POSIX) in addition
to msg_controllen, but unlike msg_controllen, this wasn't
mentioned for msg_iovlen.

setns.2
Michael Kerrisk
EXAMPLE: use O_CLOEXEC when opening namespace file descriptor
Michael Kerrisk
It is possible to setns() to the caller's current PID namespace
The page currently incorrectly says that 'fd' must refer to
a descendant PID namespace. However, 'fd' can also refer to
the caller's current PID namespace. Verified by experiment,
and also comments in kernel/pid_namespace.c (Linux 5.8-rc1).

sync.2
Jeff Layton
syncfs() now returns errors if writeback fails
A patch has been merged for v5.8 that changes how syncfs() reports
errors. Change the sync() manpage accordingly.

syscalls.2
Michael Kerrisk
Add faccessat2(), added in Linux 5.8

sysctl.2
Michael Kerrisk
glibc removed support for sysctl() starting in version 2.32

atoi.3
Arkadiusz Drabczyk
Explain disadvantages of atoi()
Michael Kerrisk
Relocate BUGS section
Michael Kerrisk
Add NOTES section explaining 0 return value on error
And note that this is not specified by POSIX.

fread.3
Arkadiusz Drabczyk
Add example
Arkadiusz Drabczyk

Explain that file position is moved after calling fread()/fwrite()
Corresponding manpage on FreeBSD already contains that
information.

getpt.3
posix_openpt.3
pts.4
Michael Kerrisk
Use the term "pseudoterminal multiplexor device" for /dev/ptmx
Let's use some consistent terminology for this device.

posix_memalign.3
Bruno Haible
Clarify how to free the result of posix_memalign

pthread_rwlockattr_setkind_np.3
Carlos O'Donell [Kumar Kartikeya Dwivedi]
Clarify a PTHREAD_RWLOCK_PREFER_WRITER_NP detail

queue.3
Alejandro Colomar
Remove wrong code from example
Alejandro Colomar
Comment out text for functions not in glibc (related: 6559169cac)

pts.4
Michael Kerrisk
Remove NOTES on BSD pseudoterminals
This information is already covered better in pty(7). No need to
mention it again here.

hosts.5
Thomas Bartelsmeier
Clarify capability for IPv6 outside of examples
Resolves https://bugzilla.kernel.org/show_bug.cgi?id=208279

proc.5
Jakub Wilk
Use "pwd -P" for printing cwd
"/bin/pwd" happens to work with the GNU coreutils implementation,
which has -P as the default, contrary to POSIX requirements.

Use "pwd -P" instead, which is shorter, easier to type, and should
work everywhere.
Arkadiusz Drabczyk
Inform that comm in /proc/pid/{stat,status} might also be truncated
pgrep for example searches for a process name in /proc/pid/status

resolv.conf.5
  Michael Kerrisk [Helge Kreutzmann]
    Clarify that ip6-bytestring was removed in 2.25

capabilities.7
  Dan Kenigsberg
    Clarify
 that CAP_SYS_NICE relates to *lowering* the nice value
  Saikiran Madugula
    CAP_SYS_RESOURCE: add two more items for POSIX message queues
      CAP_SYS_RESOURCE also allows overriding /proc/sys/fs/mqueue/msg_max
      and /proc/sys/fs/mqueue/msgsize_max.
  Michael Kerrisk [Dan Kenigsberg]
    Clarify wording around increasing process nice value
  Michael Kerrisk
    SEE ALSO: add getpcaps(8)

cgroups.7
cpuset.7
  Sven Hoexter
    Update kernel cgroup documentation references
      cgroups-v1/v2 documentation got moved to the "admin-guide" subfolder
      and converted from .txt files to .rst

ip.7
  Michael Kerrisk [Stephen Hemminger]
    Remove mention of ipfw(4) which was in long obsolete ipchains project

man-pages.7
  Michael Kerrisk
    Add some notes on generating optimal glyphs
      Getting nice renderings of ^ ` and ~ requires special
      steps in the page source.

pty.7
  Michael Kerrisk

   Explicitly mention CONFIG_LEGACY_PTYS
      Explicitly mention CONFIG_LEGACY_PTYS, and note that it is disabled
      by default since Linux 2.6.30.
  Michael Kerrisk
    Relocate a paragraph to NOTES

standards.7
  Michael Kerrisk
    Add an entry for POSIX.1-1988
  Michael Kerrisk [Geoff Clare]
    Correct various details in the explanation of XPG/POSIX/SUS

ld.so.8
  Florian Weimer [Michael Kerrisk]
    List more places in which dynamic string tokens are expanded
      This happens for more than just DT_RPATH/DT_RUNPATH.
  Arkadiusz Drabczyk
    Explain that empty entry in LD_LIBRARY_PATH means cwd

zic.8
  Michael Kerrisk
    Sync to 2020a tzdb release
      From https://www.iana.org/time-zones, version 2020a.

Apologies if I missed anyone!

New and rewritten pages
---

circleq.3
  Alejandro Colomar
    New page with 'circleq' content extracted from queue(3)

list.3
  Alejandro Colomar
    New page with 'list' content extracted from queue(3)

pthread_attr_setsigmask_np.3
  Michael Kerrisk
    New page for pthread_attr_setsigmask_np() + pthread_attr_getsigmask_np()

     Add a page documenting the pthread_attr_setsigmask_np(3) and
       pthread_attr_getsigmask_np(3) functions added in glibc 2.32.

slist.3
  Alejandro Colomar
    New page with 'slist' content extracted from queue(3)

stailq.3
  Alejandro Colomar
    New page with 'stailq' content extracted from queue(3)

tailq.3
  Alejandro Colomar
    New page with 'tailq' content extracted from queue(3)

system_data_types.7
  Alejandro Colomar, Michael Kerrisk
    A new page documenting a wide range of system data types.

kernel_lockdown.7
  David Howells, Heinrich Schuchardt [Michael Kerrisk]
    New page documenting the Kernel Lockdown feature

queue.7
  Alejandro Colomar
    Create summary page for 'queue' APIs
      The former queue(3) page was rather unwieldy, as it attempted to
      describe too many APIs. After splitting that content out into a
      number of smaller pages (circleq.3, list.3, slist.3, stailq.3,
      and
 tailq.3) move the much-reduced queue(3) page, which is now
      essentially a summary of those APIs, from Section 3 to Section 7.

Newly documented interfaces in existing pages
---

fanotify_init.2
fanotify.7
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Document FAN_REPORT_DIR_FID

fanotify_init.2
fanotify.7
  Amir Goldstein [Jan Kara, Matthew Bobrowski]
    Document FAN_REPORT_NAME

statx.2
  Ira Weiny
    Add STATX_ATTR_DAX

strerror.3
  Michael Kerrisk
    Document strerrorname_np() and strerrordesc_np()
      strerrorname_np() and strerrordesc_np() were added in glibc 2.32.

strsignal.3
  Michael Kerrisk
    Document sigabbrev_np() and sigdescr_np().
      sigabbrev_np() and sigdescr_np() were added in glibc 2.32.

loop.4
  Yang Xu
    Document LOOP_CONFIGURE ioctl
  Yang Xu
    Document LO_FLAGS_DIRECT_IO flag

capabilities.7
  Michael Kerrisk
    Document the CAP_CHECKPOINT_RESTORE
 capability added in Linux 5.9

ip.7
  Stephen Smalley [Paul Moore]
    Document IP_PASSSEC for UDP sockets

ip.7
socket.7
  Stephen Smalley
    Document SO_PEERSEC for AF_INET sockets
  Sridhar Samudrala
    Document SO_INCOMING_NAPI_ID

socket.7
unix.7
  Stephen Smalley [Serge Hallyn, Simon McVittie]
    Add initial description for SO_PEERSEC

Global changes

Various pages
  Alejandro Colomar
      Use ``sizeof`` consistently through all the examples in the
      following way:

      - Use the name of the variable instead of its type as argument for
        ``sizeof``.

Various pages
  Alejandro Colomar
    Use sizeof() to get buffer size (instead of hardcoding macro name)

Various pages
  Michael Kerrisk
    Use \(aq instead of ' inside monospace fonts
      Use \(aq to get an unslanted single quote inside monospace code
      blocks. Using a simple ' results in a slanted quote inside PDFs.

Various pages
  Michael Kerrisk, Alejandro Colomar
    Use C99 style to declare loop counter
 variables
      Rather than:

          sometype x;

          for (x = ...; ...)

      use

          for (sometype x = ...; ...)

This brings the declaration and use closer together (thus aiding readability) and also clearly indicates the scope of the loop counter variable.

Various pages
  Alejandro Colomar
    Switch printf() casts to use [u]intmax_t + %ju / %jd
      Let's move to the 21st century. Instead of casting system data types to long/long long/etc. in printf() calls, instead cast to intmax_t or uintmax_t, the largest available signed/unsigned integer types.

Various pages
  Alejandro Colomar
    Omit 'int' keyword for 'short', 'long' and 'long long' types

Various pages
  Alejandro Colomar
    Remove unneeded casts

Various pages
  Alejandro Colomar
    In printf(): s/0x%/%#/ except when followed by X instead of x
      Use printf()'s
'#' flag character to prepend the string "0x".

      However, when the number is printed in uppercase, and the prefix is in lowercase, the string "0x" needs to be manually written.

Various pages
  Michael Kerrisk
    Use C99-style declarations for readability
      Rather than writing things such as:

        struct sometype *x;
        ...
        x = malloc(sizeof(*x));

      let's use C99 style so that the type info is in the same line as the allocation:

        struct sometype *x = malloc(sizeof(*x));

Various pages
  Alejandro Colomar
    Cast to 'unsigned long' rather than 'long' when printing with "%lx"

stdarg.3

Alejandro Colomar
Declare variables with different types in different lines
In particular, don's mix a variable and a pointer declaration
on the same line: TYPE x, *p;

Changes to individual pages
---

memusage.1
Michael Kerrisk
EXAMPLES: remove doubled calculations
The same calculations are repeated in malloc() and printf() calls.
For better readability, do the calculations once.
Michael Kerrisk
Use %zu rather than %zd when printing 'size_t' values

clock_getres.2
Alejandro Colomar
EXAMPLES: use 'const' when appropriate
Alejandro Colomar [Jakub Wilk]
Cast 'time_t' to 'int' for printf() and fix the length modifiers
Michael Kerrisk [Tony May]
Fix type and variable name in dynamic clock code example

clone.2
Michael Kerrisk
CAP_CHECKPOINT_RESTORE can now be used to employ 'set_tid'

epoll_ctl.2
Michael Kerrisk
epoll instances can be nested to a maximum depth of 5
This limit appears to be an off-by-one count against
EP_MAX_NESTS (4).
Michael Kerrisk
Move some version info from CONFORMING TO to VERSIONS

eventfd.2
Alejandro Colomar
Use 'PRIxN' macros when printing
C99 fixed-width integer types

futex.2
Alejandro Colomar
Use appropriate types

getdents.2
Alejandro Colomar

SYNOPSIS: add missing header and feature test macro

intro.2
intro.3
credentials.7
feature_test_macros.7
standards.7
Michael Kerrisk
SEE ALSO: add system_data_types(7)

ioctl_ns.2
stat.2
Alejandro Colomar [Konstantin Bukin]
Fix signedness of printf specifiers

membarrier.2
Alejandro Colomar
Note that glibc does not provide a wrapper

mprotect.2
Alejandro Colomar
Use "%p" rather than casting to 'long' when printing pointer values

mq_getsetattr.2
Alejandro Colomar
Use 'const' when appropriate

msgop.2
Yang Xu
Add restriction on ENOSYS error

open.2
Michael Kerrisk [henrik@optoscale.no]
ERRORS: add EBUSY

openat.2
Alejandro Colomar
SYNOPSIS: return long
The Linux kernel uses long as the return type for this syscall.
As glibc provides
no wrapper, use the same type the kernel uses.

open_by_handle_at.2
Alejandro Colomar
Use "%u" rather than "%d" when printing 'unsigned int' values

perf_event_open.2
Alexey Budankov

Update the man page with CAP_PERFMON related information

recv.2
send.2
Michael Kerrisk
Add cross references to pages with further info about ancillary data

sched_getattr.2
Aleksa Sarai
Update to include changed size semantics

seccomp.2
Michael Kerrisk [Jann Horn]
Warn reader that SECCOMP_RET_TRACE can be overridden
Highlight to the reader that if another filter returns a
higher-precedence action value, then the ptracer will not
be notified.
Michael Kerrisk [Rich Felker]
Warn against the use of SECCOMP_RET_KILL_THREAD
Killing a thread with SECCOMP_RET_KILL_THREAD is very likely
to leave the rest of the process in a broken state.
Michael Kerrisk [Rich Felker]

EXAMPLES: use SECCOMP_RET_KILL_PROCESS rather than SECCOMP_RET_KILL
Alejandro Colomar
Use ARRAY_SIZE() macro instead of raw sizeof division

setns.2
Michael Kerrisk
Correct the version for time namespace support

sigaction.2
Michael Kerrisk [Alejandro Colomar]
Use correct POSIX type for siginfo_t.si_value

syscalls.2
Michael Kerrisk
Move system calls from discontinued ports out of main syscall list
Various ports that had their own indigenous system calls have
been discontinued. Remove those system calls (none of which had
manual pages!) to a separate part of the page, to avoid
cluttering the main list of system calls.
Michael Kerrisk
Add close_range (Linux 5.9)

timerfd_create.2
Alejandro Colomar
Use 'PRIxN' macros when printing C99 fixed-width integer types

userfaultfd.2
  Michael Kerrisk
    Use a better type (uint64_t) for 'len' in EXAMPLES
  Alejandro
Colomar
    Use 'PRIx64' rather than "%llx" when printing 64-bit fixed-width types

argz_add.3
envz_add.3
  Michael Kerrisk [Jonny Grant]
    Point out that 'error_t' is an integer type

bsearch.3
  Alejandro Colomar
    Fix intermediate type and remove unneeded casts

bswap.3
  Jakub Wilk
    Use strtoull() for parsing 64-bit numbers

dlopen.3
  Michael Kerrisk
    Clarify DT_RUNPATH/DT_RPATH details
      It is the DT_RUNPATH/DT_RPATH of the calling object (not the
      executable) that is relevant for the library search. Verified
      by experiment.

errno.3
  Michael Kerrisk [Alejandro Colomar]
    Note that the pthreads APIs do not set errno

fopencookie.3
  Alejandro Colomar
    printf()'s .* expects an int; cast accordingly
  Alejandro Colomar
    Fix bugs in example

fread.3
  Alejandro Colomar
    Move ARRAY_SIZE logic into macro

freeaddrinfo.3
  Marko Hrastovec
    Fix memory leaks in freeaddrinfo()
examples

getline.3

Alejandro Colomar
Use %zd rather than %zu when printing 'ssize_t' values

lseek64.3
Michael Kerrisk
Since glibc 2.28. the 'llseek' symbol is no longer available

mallinfo.3
Michael Kerrisk
The 'usmblks' field is nowadays always 0

offsetof.3
Alejandro Colomar
Use "%zu" rather than "%zd" when printing 'size_t' values

perror.3
Michael Kerrisk
sys_errlist and sys_nerr are no longer exposed by <stdio.h>
The change came with the release of glibc 2.32.

posix_fallocate.3
Érico Rolim
Add EOPNOTSUPP error code.

psignal.3
strsignal.3
Michael Kerrisk
Consolidate information on 'sys_siglist' in one page (strsignal(3))

pthread_attr_init.3
Michael Kerrisk
SEE ALSO: add pthread_attr_init(3)

pthread_attr_init.3
pthread_create.3
pthread_getattr_np.3
Michael Kerrisk
Use correct type (size_t) for some variables

pthread_getattr_np.3
Alejandro Colomar
Use "%zu" and "%zx" when printing 'size_t' values

pthread_sigmask.3
Michael Kerrisk
SEE ALSO: add pthread_attr_setsigmask_np(3)

qsort.3

Alejandro Colomar
Fix casts
Alejandro Colomar
SYNOPSIS: move code from queue.3 to stailq.3

regex.3
Alejandro Colomar
Add example program
Alejandro Colomar
Remove unnecessary include

strsignal.3
Michael Kerrisk [Hauke Fath]
Note that starting with v2.32, glibc no longer exports 'sys_siglist'
Michael Kerrisk
Further addition on version range for sys_siglist
Michael Kerrisk
Note that 'sys_siglist' is nonstandard

strtod.3
Jonathan Wakely
Fix return value for underflow

strtol.3
Alejandro Colomar
EXAMPLES: simplify errno checking
Alejandro Colomar
EXAMPLES: as the default base, use special value 0
Alejandro Colomar
EXAMPLES: delimit output string using ""

tsearch.3
Alejandro Colomar
Simplify
type usage and remove unneeded casts
Alejandro Colomar
Use size_t for malloc() argument

loop.4
Yang Xu
Add some details about lo_flags

core.5
Alejandro Colomar
Use adequate type

locale.5
Florian Weimer

Decimal points, thousands separators must be one character

proc.5
Michael Kerrisk
Update capability requirements for accessing /proc/[pid]/map_files
Jann Horn [Mark Mossberg]
Document inaccurate RSS due to SPLIT_RSS_COUNTING
Michael Kerrisk
Note "open file description" as (better) synonym for "file handle"

resolv.5
Florian Weimer
Document the trust-ad option

aio.7
Alejandro Colomar
Use perror() directly

bpf-helpers.7
Michael Kerrisk [Jakub Wilk]
Resync with current kernel source

capabilities.7
Michael Kerrisk
Under CAP_SYS_ADMIN, group "sub-capabilities" together
CAP_BPF, CAP_PERFMON, and CAP_CHECKPOINT_RESTORE have all been

added to split out the power of CAP_SYS_ADMIN into weaker pieces.
Group all of these capabilities together in the list under
CAP_SYS_ADMIN, to make it clear that there is a pattern to these
capabilities.
Michael Kerrisk
CAP_SYS_ADMIN implies CAP_CHECKPOINT_RESTORE
But the latter, weaker capability is preferred.
Michael Kerrisk
Add kernel doc reference for CAP_PERFMON

fanotify.7
Alejandro Colomar
Pass array to read(2) directly instead of a pointer to it

fanotify.7
fanotify_mark.2
Amir Goldstein [Jan Kara, Matthew Bobrowski]
Generalize documentation of FAN_REPORT_FID

feature_test_macros.7
Jakub Wilk

Update list of macros that inhibit default definitions

man.7
  Michael Kerrisk [G. Branden Robinson]
    Clarify that alternating typeface macros print arguments without spaces

man-pages.7
  Michael Kerrisk
    Add some more requests re code examples
  Michael Kerrisk
     Soften the statement that ideal programs should be short

namespaces.7
  Michael Kerrisk
    A 'time_for_children' symlink can also pin a namespace

pid_namespaces.7
  Michael Kerrisk
    Update capability requirements for /proc/sys/kernel/ns_last_pid

pthreads.7
  Michael Kerrisk
    Explicitly note that pthreads APIs return an errno-style value on error

rtld-audit.7
  Florian Weimer [Carlos O'Donell]
    Clarify la_version handshake
      Returning its argument without further checks is almost always
      wrong for la_version.
  Alejandro Colomar
    Use "%u" rather than "%d" when printing 'unsigned int' values

sigevent.7
  Michael Kerrisk
    Note that 'sigev_notify_thread_id' is Linux-specific

socket.7
  Michael Kerrisk
    SEE ALSO: add ipv6(7)

========== Changes in man-pages-5.10 ==========

Released: 2020-12-21, Munich

Contributors

The following people contributed patches/fixes
 or (noted in brackets
in the changelog below) reports, notes, and ideas that have been
incorporated in changes in this release:

Apologies if I missed
 anyone!

Newly documented interfaces in existing pages
---

access.2
  Michael Kerrisk
    Document faccessat2()
      faccessat2() was added in Linux 5.8 and enables a fix to
      longstanding bugs in the faccessat() wrapper function.

membarrier.2
  Peter Oskolkov [Alejandro Colomar]
    Update for Linux 5.10
      Linux kernel commit 2a36ab717e8fe678d98f81c14a0b124712719840
      (part of 5.10 release) changed sys_membarrier prototype/parameters

and added two new commands [MEMBARRIER_CMD_PRIVATE_EXPEDITED_RSEQ
and MEMBARRIER_CMD_REGISTER_PRIVATE_EXPEDITED_RSEQ].

mount.2
statfs.2
Ross Zwisler
Add NOSYMFOLLOW flags to mount(2) and statfs(2)

New and changed links
---

faccessat2.2
Michael Kerrisk
New link to access.2

CIRCLEQ_EMPTY.3
CIRCLEQ_FIRST.3
CIRCLEQ_FOREACH.3
CIRCLEQ_FOREACH_REVERSE.3
CIRCLEQ_HEAD_INITIALIZER.3
CIRCLEQ_LAST.3
CIRCLEQ_LOOP_NEXT.3
CIRCLEQ_LOOP_PREV.3
CIRCLEQ_NEXT.3
CIRCLEQ_PREV.3
Michael Kerrisk
Add missing links to circleq.3

pthread_attr_getsigmask_np.3
Michael Kerrisk
New link to pthread_attr_setsigmask_np.3

Global changes

Various pages
Alejandro Colomar
Use Oxford comma

Changes to individual pages
---

access.2
Michael Kerrisk
BUGS: note that faccessat() wrapper function emulation ignores ACLs

bpf.2
  Michael Kerrisk
    Place EXAMPLES section in correct location

cacheflush.2
  Alejandro Colomar
    Document Architecture-specific variants
  Alejandro Colomar [Heinrich Schuchardt]
    Document __builtin___clear_cache() as a more portable alternative

chroot.2
memfd_create.2
tailq.3
  Michael Kerrisk [Alejandro Colomar]
    Fix unbalanced .nf/.fi

clock_getres.2
  Michael Kerrisk
    Place ERRORS in alphabetical order

clone.2
sigaltstack.2
  Michael Kerrisk
    clone(CLONE_VM)
 disables the alternate signal stack

getrlimit.2
  Michael Kerrisk
    State more precisely the range of kernel versions that had RLIMIT_LOCKS

getrusage.2
  Michael Kerrisk
    Note that the 'vtimes' symbol exists only up to glibc 2.32

io_cancel.2
io_destroy.2
io_getevents.2
io_setup.2
io_submit.2
  Alejandro Colomar
    SYNOPSIS: s/io_context_t/aio_context_t/
      Linux uses aio_context_t for these syscalls,
      and it's the type provided by <linux/aio_abi.h>.
      Use it in the SYNOPSIS.

      libaio uses 'io_context_t', but that difference is already noted
      in NOTES.

io_setup.2
  Alejandro Colomar
    SYNOPSIS: return long

link.2
  Mathias Rav
    ERRORS: add ENOENT when target is deleted
      Linux kernel commit aae8a97d3ec30788790d1720b71d76fd8eb44b73 (part
      of kernel release v2.6.39) added a check to disallow creating a
      hard link to an unlinked file.

llseek.2

 Michael Kerrisk
    Note size of 'loff_t' type
  Michael Kerrisk
    Point the reader to lseek64(3) for info about llseek(3)
  Michael Kerrisk
    Some mild rewriting to ease reading of the info in this page

mmap.2
  Michael Kerrisk
    Clarify SIGBUS text and treatment of partial page at end of a mapping

msgctl.2
  Michael Kerrisk
    Make comments in 'msqid_ds' definition more compact
  Michael Kerrisk
    Place list of field descriptions in same order as structure definition
  Michael Kerrisk
    Use field name "msg_cbytes" rather than "__msg_cbytes"
  Michael Kerrisk
    Add description of 'msg_cbytes' field

openat.2
  Colin Ian King
    Fix include path, should be linux/openat2.h

perf_event_open.2
  Namhyung Kim [Alejandro Colomar]
    Update man page with recent kernel changes
  Alejandro Colomar
    Assign calculated value explicitly to 'config'

restart_syscall.2
  Alejandro Colomar
    SYNOPSIS: Fix restart_syscall()

return type

set_tid_address.2
  Alejandro Colomar
    SYNOPSIS: Fix set_tid_address() return type

shmctl.2
  Michael Kerrisk
    Place list of field descriptions in same order as structure definition

sigaction.2
  Michael Kerrisk
    Clarify description of SA_NODEFER
      Clarify description of SA_NODEFER, and note interaction with
      act.sa_mask.
  Michael Kerrisk
    Add a cross-reference to signal(7) for further info on 'ucontext_t'

sigaltstack.2
  Michael Kerrisk
    Clarify that the alternate signal stack is per-thread
      Clarify that the alternate signal stack is per-thread (rather
      than process-wide).

spu_create.2
  Michael Kerrisk
    Add kernel version numbers for SPU_CREATE_AFFINITY_SPU/_MEM
  Michael Kerrisk
    Relocate paragraph on 'mode' argument
  Michael Kerrisk [Alejandro Colomar]
    Clarify that spu_create() now has 4 arguments but once had only 3

subpage_prot.2
   Alejandro Colomar
    SYNOPSIS: Fix return type: s/long/int/

syscalls.2
  Michael Kerrisk
    Add process_madvise()
  Michael Kerrisk
    Note that sysctl() was removed in Linux 5.5

timer_getoverrun.2
  Michael Kerrisk
    timer_getoverrun() now clamps the overrun count to DELAYTIMER_MAX
      See https://bugzilla.kernel.org/show_bug.cgi?id=12665.

uselib.2

posix_memalign.3
profil.3
rtime.3
  Michael Kerrisk
    Remove some text about libc/libc5
      With this change, there remain almost no vestiges of information
      about the long defunct Linux libc.

errno.3
  Michael Kerrisk
    Note another possible cause of the EMFILE error

getcontext.3
  Michael Kerrisk
    Mention SA_SIGINFO flag when talking about 3-argument signal handler
  Michael Kerrisk
    SEE ALSO: add signal(7)

list.3
  Michael Kerrisk
    NAME: remove LIST_PREV, which is not documented in this page

lseek64.3
  Michael Kerrisk
    Remove
 section numbers from interface list
  Michael Kerrisk
    Remove sentence saying lseek64() is an alias for llseek()
  Michael Kerrisk
    NOTES: describe the origin of lseek64() in LFS

nextafter.3
  Michael Kerrisk
    Remove duplicate "BUGS" section heading

pthread_tryjoin_np.3
  Michael Kerrisk [Mike Crowe]
    Note that pthread_timedjoin_np() uses CLOCK_REALTIME, but there's a bug

rcmd.3
  Michael Kerrisk
    SEE ALSO: remove intro(2)

strnlen.3
  Michael Kerrisk [Heinrich Schuchardt]
    Fix a small inconsistency in the text

elf.5

Michael Kerrisk
SEE ALSO: add objcopy(1)

filesystems.5
Ahelenia Ziemiaska [Alejandro Colomar]
Fix link to user space tooling for ncpfs
Ahelenia Ziemiaska [Alejandro Colomar]
Note ncpfs removal from kernel

attributes.7
Michael Kerrisk
SEE ALSO: add signal-safety(7)

fanotify.7
Amir Goldstein [Jan Kara]
Fix outdated description

kernel_lockdown.7
Michael Kerrisk
Remove unneeded quotes

packet.7
Baruch Siach [Alejandro Colomar]
Update references to kernel documentation

pthreads.7
Michael Kerrisk
Rephrase function list in terms of POSIX rather than SUS
The list was using an inconsistent mixture of "POSIX" and "SUS".

signal.7
Michael Kerrisk [Heinrich Schuchardt, Dave Martin]
Add some details on the execution of signal handlers
Add a "big picture" of what happens when a signal handler
is invoked.
Michael Kerrisk
Add pidfd_send_signal() to list of APIs for sending signals
Michael Kerrisk
Mention 'ucontext_t' in the discussion of signal handler execution
Michael Kerrisk
SEE ALSO: add swapcontext(3)

signal-safety.7
Michael Kerrisk
Note async-signal-safety details for errno

standards.7
Michael Kerrisk

Add URL for POSIX.1-2008/SUSv4
Michael Kerrisk
Add LFS (Large File Summit)
Michael Kerrisk [Rob Landley]
Fix some URLs for locations of the standards
Michael Kerrisk
Relocate the discussion on POSIX manual pages

tcp.7
Alejandro Colomar [Philip Rowlands]
tcp_syncookies: It is now an integer [0, 2]
Since Linux kernel 3.12, tcp_syncookies can have the value 2,
which sends out cookies unconditionally.

========== Changes in man-pages-5.11 ==========

Released: 2021-03-21, Munich

Yang Xu <xuyang2018.jy@cn.fujitsu.com>
Zack Weinberg <zackw@panix.com>

Apologies if I missed anyone!

New and rewritten pages
---

close_range.2
  Stephen Kitt, Michael Kerrisk [Christian Brauner]
    New page documenting close_range(2)

process_madvise.2
  Suren Baghdasaryan, Minchan Kim [Michal Hocko, Alejandro Colomar,
  Michael Kerrisk]
    Document process_madvise(2)

fileno.3
  Michael Kerrisk
    Split fileno(3) content out of ferror(3) into new page
      fileno(3) differs from the other functions in various ways.
      For example, it is governed by different standards,
      and can set 'errno'. Conversely, the other functions
      are about examining the status of a stream, while
      fileno(3) simply obtains the underlying file descriptor.

Furthermore, splitting this function out allows
for some cleaner upcoming changes in ferror(3).

Newly documented interfaces in existing pages
---

epoll_wait.2
  Willem de Bruijn [Dmitry V. Levin]
    Add documentation of epoll_pwait2()
      Expand the epoll_wait() page with epoll_pwait2(), an epoll_wait()
      variant that takes a struct timespec to enable nanosecond
      resolution timeout.

fanotify_init.2
fanotify.7
  Jan Kara [Steve Grubb]
    Document FAN_AUDIT flag and FAN_ENABLE_AUDIT

madvise.2
  Michael Kerrisk
    Add descriptions of MADV_COLD and MADV_PAGEOUT
      Taken from process_madvise(2).

openat2.2
  Jens Axboe
    Add RESOLVE_CACHED

prctl.2
  Gabriel Krisman Bertazi
    Document Syscall User Dispatch

mallinfo.3
  Michael Kerrisk
    Document mallinfo2() and note that mallinfo() is deprecated
      Document the mallinfo2() function
 added in glibc 2.33.
    Update example program to use mallinfo2()

system_data_types.7
  Alejandro Colomar
    Add off64_t to system_data_types(7)

ld.so.8
  Michael Kerrisk
    Document the --argv0 option added in glibc 2.33

New and changed links
---

epoll_pwait2.2
  Dmitry V. Levin
    New link to epoll_wait(2)

mallinfo2.3
  Michael Kerrisk
    New link to mallinfo(3)

off64_t.3
  Alejandro Colomar
    New link to system_data_types(7)

Global changes

Various pages
  Alejandro Colomar
    SYNOPSIS: Use 'restrict' in prototypes
      This change has been completed for *all* relevant pages
      (around 135 pages in total).

Various pages
  Alejandro Colomar [Zack Weinberg]
    Remove unused <sys/types.h>
      The manual pages are already inconsistent in which headers need
      to be included. Right now, not all of the types used by a
      function have their required
header included in the SYNOPSIS.

      If we were to add the headers required by all of the types used by
      functions, the SYNOPSIS would grow too much. Not only it would
      grow too much, but the information there would be less precise.

      Having system_data_types(7) document each type with all the
      information about required includes is much more precise, and the
      info is centralized so that it's much easier to maintain.

      So let's document only the include required for the function
      prototype, and also the ones required for the macros needed to
      call the function.

      <sys/types.h> only defines types, not functions or constants, so
      it doesn't belong to man[23] (function) pages at all.

I ignore if some old systems had headers that required you to
include <sys/types.h> *before* them (incomplete headers), but if
so, those implementations
would be broken, and those headers
should probably provide some kind of warning. I hope this is not
the case.

[mtk: Already in 2001, POSIX.1 removed the requirement to
include <sys/types.h> for many APIs, so this patch seems
well past due.]

A few pages
Alejandro Colomar
Add notes about missing glibc wrappers

_exit.2
abort.3
err.3
exit.3
pthread_exit.3
setjmp.3
Alejandro Colomar
SYNOPSIS: Use 'noreturn' in prototypes
Use standard C11 'noreturn' in these manual page for
functions that do not return.

Various pages
Ganimedes Colomar [Alejandro Colomar]
Normalize SYNOPSIS notes about nonexistent glibc wrappers
To easily distinguish documentation about glibc wrappers from
documentation about kernel syscalls, let's have a normalized
'Note' in the SYNOPSIS, and a further explanation in the page body
(NOTES in most of them),
as already happened in many (but not all)
of the manual pages for syscalls without a wrapper. Furthermore,
let's normalize the messages, following membarrier.2 (because it's
already quite extended), so that it's easy to use grep to find
those pages.
Normalize NOTES about nonexistent glibc wrappers
This commit normalizes texts under sections other than SYNOPSIS
(most of them in NOTES).

Global changes (formatting fixes and minor edits)

Various pages
Michael Kerrisk

ERRORS: remove redundant statement that 'errno' is set
This is implied in every other manual page. There is no need to
state it explicitly in these pages.

Various pages
Michael Kerrisk
Use periods more consistently inside code comments
In general, complete sentences in free-standing comments
should be terminated by periods.

A
few pages
Michael Kerrisk
Better table formatting
In particular, allow for rendering in widths different from
(especially less than) 80 columns.

Various pages
Michael Kerrisk
Consistency fix-up in FTMs
Generally, place '||' at start of a line, rather than the end of
the previous line.

Rationale: this placement clearly indicates that each piece
is an alternative.

Various pages
Michael Kerrisk [Alejandro Colomar]
Bring more whitespace consistency in SYNOPSIS
The use of vertical white space in the SYNOPSIS sections
is rather inconsistent. Make it more consistent, subject to the
following heuristics:

* Prefer no blank lines between function signatures by default.
* Where many functions are defined in the SYNOPSIS, add blank
lines where needed to improve readability, possibly by using

blank lines to separate logical groups of functions.

Various pages
Alejandro Colomar
Consistently use 'unsigned int'
Most pages use 'unsigned int' (and the kernel too).
Make them all do so.

Various pages
Michael Kerrisk
Various improvements in wording in RETURN VALUE

Various pages
  Michael Kerrisk
    s/Glibc versions </Glibc </ in Feature Test Macro discussions
      Use a more compact notation that will render less wide
      on the terminal.

Various pages
  Michael Kerrisk
    Standardize wording around setting of 'errno' on error
      In the RETURN VALUE sections, a number of different wordings
      are used in to describe the fact that 'errno' is set on error.
      There's no reason for the difference in wordings, since the same
      thing is being described in each case. Switch to a standard
      wording that is the same as FreeBSD and similar to the wording

 used in POSIX.1.

      In this change, "to indicate the cause of the error"
      is changed to "to indicate the error".

Various pages
  Michael Kerrisk
    Add missing .nf/.fi in FTM info

Various pages
  Michael Kerrisk
    Simplify mark-up for Feature Test Macro requirements
      Different source styles are used in different pages to achieve the
      same formatted output, and in some cases the source mark-up is a
      rather convoluted combination of .RS/.RE/.TP/.PD macros. Simplify
      this greatly, and unify all of the pages to use more or less the
      same source code style. This makes the source code rather easier
      to read, and may simplify future scripted global changes.

      The feature test macro info is currently bracketed by .nf/.fi
      pairs. This is not strictly necessary (i.e., it makes no
      difference to the rendered output), but for the moment we keep
      these
 "brackets" in case they may be replaced with something else.

Various pages
  Michael Kerrisk
    Use real minus signs in pathnames

Various pages
  Michael Kerrisk
    Standardize wording around setting of 'errno' on error

In the RETURN VALUE sections, a number of different wordings
are used in to describe the fact that 'errno' is set on error.
There's no reason for the difference in wordings, since the same
thing is being described in each case. Switch to a standard
wording that is the same as FreeBSD and similar to the wording
used in POSIX.1.

In this change, reword various cases saying that 'errno' is set
"appropriately" to "is set to indicate the error".

Various pages
Michael Kerrisk
Improve formatting in ATTRIBUTES
Make the formatting more consistent inside the tables in the
ATTRIBUTES sections. Make the source code more uniform; in

particular, eliminate the use of custom tweaks using
'lbwNN'/'lwNN' and .br macros. In addition, ensure that
hyphenation and text justification do not occur inside the tables.

Various pages
Michael Kerrisk
Use .nf/.fi in SYNOPSIS
The majority of pages use .nf/.fi in SYNOPSIS, but there are
still many that don't and use .br to achieve newlines. Fix many
of those. This brings greater consistency to the pages, which
eases editing and may ease future scripted edits to the pages.

Various pages
Michael Kerrisk
Standardize wording around setting of 'errno' on error
In the RETURN VALUE sections, a number of different wordings
are used in to describe the fact that 'errno' is set on error.
There's no reason for the difference in wordings, since the same
thing is being described in each case. Switch to a standard
wording that is the
same as FreeBSD and similar to the wording
used in POSIX.1.

In this change, miscellaneous descriptions of the setting
of 'errno' are reworded to the norm of "is set to indicate
the error".

Various pages
Michael Kerrisk
Use "\-" to generate real minus in circumstances where appropriate
Use \- for math formulas, pathnames, manual page cross references,
etc.

Various pages
  Michael Kerrisk
    Inside code blocks (.EX/.EE) use \- to get real minus signs
      A real minus can be cut and pasted...

Various pages
  Alejandro Colomar
    Remove explicit blank lines, replacing them with .PP when appropriate

Various pages
  Michael Kerrisk
    Use internally consistent continuation indents in SYNOPSIS
      In the SYNOPSIS, a long function prototype may need to be
      continued over to the next line. The continuation line is
      indented according to the following
rules:

        1. If there is a single such prototype that needs to be continued,
          then align the continuation line so that when the page is
          rendered on a fixed-width font device (e.g., on an xterm) the
          continuation line starts just below the start of the argument
          list in the line above. (Exception: the indentation may be
          adjusted if necessary to prevent a very long continuation line
          or a further continuation line where the function prototype is
          very long.)

          Thus:

            int tcsetattr(int fd, int optional_actions,
                    const struct termios *termios_p);

        2. But, where multiple functions in the SYNOPSIS require
          continuation lines, and the function names have different
          lengths, then align all continuation lines to start in the
          same column. This provides a nicer rendering
in PDF output
          (because the SYNOPSIS uses a variable width font where
          spaces render narrower than most characters).

          Thus:

            int getopt(int argc, char * const argv[],
                    const char *optstring);
            int getopt_long(int argc, char * const argv[],
                    const char *optstring,
                    const struct option *longopts, int *longindex);

Various pages
  Michael Kerrisk
    Standardize wording around setting of 'errno' on error
      In the RETURN VALUE sections, a number of different wordings
      are used in to describe the fact that 'errno' is set on error.
      There's no reason for the difference in wordings, since the same
      thing is being described in each case. Switch to a standard
      wording that is the same as FreeBSD and similar to the wording
      used in POSIX.1.

      In
 this change, fix some instances stating that 'errno' is set
      "appropriately" to instead say "to indicate the error".

Various System V IPC pages
  Michael Kerrisk
    Improve wording describing RETURN VALUE and setting of 'errno'

Changes to individual pages
---

alloc_hugepages.2
  Michael Kerrisk
    CONFORMING TO: reword to reflect that these system calls are long gone

cacheflush.2
  Alejandro Colomar
    Update SYNOPSIS for glibc wrapper
      Glibc uses 'void *' instead of 'char *'.
      And the prototype is declared in <sys/cachectl.h>.

clone.2
  Valentin Kettner
    Fix types in clone_args
      A file descriptor is an int so it should be stored through an int
      pointer while parent_tid should have the same type as child_tid
      which is pid_t pointer.

close.2
  Michael Kerrisk
    SEE ALSO: add close_range(2)

copy_file_range.2
  Alejandro Colomar
    Document glibc
 wrapper instead of kernel syscall
      Glibc uses 'off64_t' instead of 'loff_t'.

delete_module.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      The Linux kernel uses 'unsigned int' instead of 'int' for the
      'flags' parameter. As glibc provides no wrapper, use the same
      type the kernel uses.

epoll_create.2
  Michael Kerrisk
    CONFORMING TO: mention that epoll_create1() is Linux-specific

epoll_wait.2
  Michael Kerrisk
    CONFORMING TO: mention that epoll_pwait() is Linux-specific

execve.2
  Palmer Dabbelt
    Correct the versions of Linux that don't have ARG_MAX argv/envp size

execveat.2
  Alejandro Colomar
    Fix prototype
      It's been 6 years since execveat(2) was added to the kernel,
      and there's still no glibc wrapper. Let's document the kernel
      syscall prototype.

getcpu.2
  Michael Kerrisk [Alejandro Colomar]
    Rewrite page to describe glibc wrapper
 function
      Since glibc 2.29, there is a wrapper for getcpu(2).
      The wrapper has only 2 arguments, omitting the unused
      third system call argument. Rework the manual page
      to reflect this.

getgid.2
getuid.2
  Michael Kerrisk
    Note that these interfaces never modify 'errno'
      See https://www.austingroupbugs.net/view.php?id=511
      and the POSIX.1-2008 specifications of the interfaces.

gethostname.2
  Michael Kerrisk
    Update FTM requirements for gethostname()

getpagesize.2

getdtablesize.3
  Michael Kerrisk
    Update/correct FTM requirements

getrusage.2
  Michael Kerrisk
    Starting in 2.33, glibc no longer provides vtimes()

ioctl_tty.2
  Michael Kerrisk
    Reformat argument type information
      The current mark-up renders poorly. To resolve this, move
      the type information into a separate line.

ipc.2
  Alejandro Colomar
    Fix prototype parameter types

kcmp.2
   Michael Kerrisk
    Since Linux 5.12, kcmp() availability is unconditional
      kcmp() is no longer dependent on CONFIG_CHECKPOINT_RESTORE.

keyctl.2
  Alejandro Colomar
    SYNOPSIS: Fix prototype parameter types
      The Linux kernel uses 'unsigned long'.
      There's no reason to use the typedef '__kernel_ulong_t'.

lookup_dcookie.2
  Alejandro Colomar
    Use standard types: u64 -> uint64_t

madvise.2
  Michael Kerrisk
    SEE ALSO: add process_madvise(2)

mlock.2
  Alejandro Colomar
    mlock2(): Fix prototype parameter types
      The documented prototype for mlock2() was a mix of the
      glibc wrapper prototype and the kernel syscall prototype.
      Let's document the glibc wrapper prototype, which is shown below.
  Michael Kerrisk
    CONFORMING TO: note more explicitly which APIs are in the standards

mmap2.2
  Alejandro Colomar

Fix prototype parameter types
There are many
slightly different prototypes for this syscall,
but none of them is like the documented one.
Of all the different prototypes,
let's document the asm-generic one.

mount.2
Michael Kerrisk
Note that the 'data' argument can be NULL

move_pages.2
Alejandro Colomar
Add notes about missing glibc wrappers

open.2
rename.2
Alyssa Ross
Refer to tmpfs rather than shmem
If I'm understanding correctly, tmpfs is a filesystem built on
shmem, so I think it's more correct (and probably much more
widely understandable) to refer to tmpfs here.

pciconfig_read.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
Use the glibc prototypes instead of the kernel ones.
Exception: use 'int' instead of 'enum'.

pidfd_open.2
Michael Kerrisk
Note the process_madvise(2) use case for PID file descriptors

readlink.2
Michael Kerrisk [Jonny Grant]
Emphasize that the returned buffer is not null-terminated

s390_pci_mmio_write.2
Alejandro Colomar
SYNOPSIS: Add 'const' qualifier
s390_pci_mmio_write() uses 'const void *' instead of 'void *'.

sched_setattr.2
Alejandro Colomar
Add note about missing glibc wrappers

semctl.2
Yang Xu [Alejandro Colomar, Manfred Spraul]

Correct SEM_STAT_ANY description

socketcall.2
Alejandro Colomar
Add note about missing glibc wrapper

splice.2
Alejandro Colomar
Use 'off64_t' instead of 'loff_t'
The kernel syscall uses 'loff_t', but the glibc wrapper uses 'off64_t'.
Let's document the wrapper prototype, as in other pages.

spu_create.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter type
The 'flags' parameter of spu_create() uses 'unsigned int'.

spu_run.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
The 2nd and 3rd parameters of spu_run()
use 'uint32_t *'.

stat.2
Jonathan Wakely [Alejandro Colomar]
Remove <unistd.h> from SYNOPSIS
There seems to be no reason <unistd.h> is shown here, so remove it.
Michael Kerrisk
Move the obsolete _BSD_SOURCE FTM to the end of the FTM info

syscall.2
Peter H. Froehlich
Update superh syscall convention

syscalls.2
Michael Kerrisk
Add epoll_pwait2()

tkill.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter types
All but the last parameters of t[g]kill() use 'pid_t',
both in the kernel and glibc.

vmsplice.2
Alejandro Colomar
SYNOPSIS: Fix prototype parameter type
The 3rd parameter of vmsplice() uses 'size_t' in glibc.

bstring.3
  Michael Kerrisk
    SEE ALSO: add string(3)

circleq.3
list.3
slist.3
stailq.3
tailq.3
  Alejandro Colomar
    Improve readability, especially in SYNOPSIS

circleq.3
  Alejandro Colomar
    Fix CIRCLEQ_LOOP_*() return
 type

crypt.3
  Michael Kerrisk
    Reformat FTM info (in preparation for next patch)
  Michael Kerrisk
    Update crypt() FTM requirements to note glibc 2.28 changes

ecvt.3
gcvt.3
  Michael Kerrisk
    Update FTM requirements

error.3
  Michael Kerrisk [Alejandro Colomar, Walter Harms]
    Clarify the meaning of 'status==0' for error(3)

ferror.3
  Michael Kerrisk
    Remove fileno(3) content that was migrated to new fileno(3) page
  Michael Kerrisk
    Add a RETURN VALUE section
  Michael Kerrisk
    POSIX.1-2008: these functions won't change 'errno' if 'stream' is valid
      See https://www.austingroupbugs.net/view.php?id=401.

fread.3
  Alessandro Bono
    EXAMPLES: swap size and nmemb params
      It works both ways, but this one feels more right. We are reading
      four elements sizeof(*buffer) bytes each.

fseeko.3
  Michael Kerrisk
    Move info about obsolete FTM from SYNOPSIS to NOTES
      This
 makes the SYNOPSIS more consistent with other pages.

ftime.3
  Michael Kerrisk
    glibc 2.33 has removed ftime()

ftw.3
  Alejandro Colomar
    SYNOPSIS: Remove duplicate header

gethostbyname.3
  Michael Kerrisk
    Move mention of <sys/socket.h> from SYNOPSIS to DESCRIPTION
      The functions are all declared in <netdb.h>. <sys/socket.h> is only
      needed for the AF_* constants.

gethostid.3
  Michael Kerrisk
    Update FTM requirements for gethostid()

get_phys_pages.3
  Alejandro Colomar [Jakub Wilk]
    glibc gets the info from sysinfo(2) since 2.23

grantpt.3
ptsname.3
unlockpt.3
  Michael Kerrisk
    Remove mention of _XOPEN_SOURCE_EXTENDED FTM
      This rather ancient FTM is not mentioned in other pages for
      reasons discussed in feature_test_macros(7). Remove this FTM
      from the three pages where it does appear.

malloc.3
  Alejandro Colomar [Johannes Pfister]
    Document that realloc(p,
 0) is specific to glibc and nonportable

malloc_hook.3
  Alejandro Colomar
    SYNOPSIS: Use 'volatile' in prototypes

malloc_trim.3
  Dmitry Vorobev

Remove mention of free() call
'malloc_trim' was and is never called from the 'free' function.

pthread_create.3
Michael Kerrisk [Paran Lee]
Fix undeclared variable error in example program
Michael Kerrisk
Fix a signedness error in the example code

puts.3
Michael Kerrisk
Reorder functions more logically (group related functions together)

qecvt.3
Michael Kerrisk
Update feature test macro requirements

setbuf.3
Michael Kerrisk
POSIX doesn't require errno to be unchanged after successful setbuf()
See https://www.austingroupbugs.net/view.php?id=397#c799

setlocale.3
Michael Kerrisk [Alejandro Colomar, Bruno Haible]
Restructure a particularly difficult sentence

simpleq.3
stailq.3
queue.7
SIMPLEQ_*.3
Alejandro Colomar

Document SIMPLEQ_*() as an alias to STAILQ_*() macros

strerror.3
Alejandro Colomar
strerrorname_np() and strerrordesc_np() first appeared on glibc 2.32

string.3
Michael Kerrisk
SEE ALSO: add bstring(3)

system.3
Alejandro Colomar [Ciprian Dorin Craciun]
Document bug and workaround when the command name starts with a hyphen

environ.7
Bastien Roucariès

Reorder the text
Move the text describing how to set environment variable before
the list(s) of variables in order to improve readability.
Bastien Roucariès
Document convention of string in environ
Document the name=value system and that nul byte is forbidden.
Bastien Roucariès
Document that HOME, LOGNAME, SHELL, USER are set at login time
and point to the su(1) manual page.
Bastien Roucariès
Add see also ld.so(8) for LD_ variables
Michael Kerrisk [Bastien Roucariès]
Improve the description
of PATH
Add more details of how PATH is used, and mention the legacy
use of an empty prefix.
Bastien Roucariès [Alejandro Colomar, Bastien Roucaries, Vincent Lefevre]
Document valid values of pathnames for SHELL, PAGER and EDITOR/VISUAL
Michael Kerrisk [Bastien Roucariès]
Note the default if PAGER is not defined
Michael Kerrisk
Be a little more precise when discussing 'exec'
Say "execve(2)" instead of "exec(3)", and note that this step
starts a new program (not a new process!).
Michael Kerrisk [Bastien Roucariès]
Relocate and reword the mention of _GNU_SOURCE

man-pages.7
Michael Kerrisk
Document "acknowledgement" as the preferred spelling
Michael Kerrisk
Add some notes on comments in example code
Michael Kerrisk
Add a FORMATTING AND WORDING CONVENTIONS section
In man-pages-5.11, a large number of pages were edited to achieve

greater consistency in the SYNOPSIS, RETURN VALUE and ATTRIBUTES
sections. To avoid future inconsistencies, try to capture some of
the preferred conventions in text in man-pages(7).
Michael Kerrisk
Note some rationale for the use of real minus signs

netdevice.7
Pali Rohár [Alejandro Colomar]
Update documentation for SIOCGIFADDR SIOCSIFADDR SIOCDIFADDR

netlink.7
Pali Rohár [Alejandro Colomar]

Fix minimal Linux version for NETLINK_CAP_ACK
NETLINK_CAP_ACK option was introduced in commit 0a6a3a23ea6e which first appeared in Linux version 4.3 and not 4.2.
Pali Rohár [Alejandro Colomar]
Remove IPv4 from description
rtnetlink is not only used for IPv4
Philipp Schuster
Clarify details of netlink error responses
Make it clear that netlink error responses (i.e., messages with type NLMSG_ERROR (0x2)), can be longer than sizeof(struct nlmsgerr).
In certain circumstances, the payload can be longer.

shm_overview.7
Michael Kerrisk
SEE ALSO: add memfd_create(2)

sock_diag.7
Pali Rohár [Alejandro Colomar]
Fix recvmsg() usage in the example

tcp.7
Enke Chen
Documentation revision for TCP_USER_TIMEOUT

uri.7
Michael Kerrisk
Note that 'logical' quoting is the norm in Europe

========== Changes in man-pages-5.12 ==========

Released: 2021-06-20, Christchurch

Global changes

Many pages
  Alejandro Colomar
    SYNOPSIS: Use syscall(SYS_...); for system calls without a wrapper

Many pages
  Alejandro Colomar
    SYNOPSIS: Document why each header is required

Many pages
  Alejandro Colomar
    SYNOPSIS: Remove unused includes

Various pages
  Alejandro Colomar
    Add note about the use of syscall(2)

Various pages
  Alejandro Colomar
    SYNOPSIS: Miscellaneous fixes to includes

A few pages
  Alejandro Colomar
    SYNOPSIS: Add missing 'const'

Changes to individual pages
---

dup.2
  Michael Kerrisk
    Rewrite the description of dup() somewhat
      As can be seen by any number of StackOverflow questions, people
      persistently misunderstand what dup() does, and the existing manual
      page text, which talks of "copying" a file descriptor doesn't help.
       Rewrite the text a little to try to prevent some of these
      misunderstandings, in particular noting at the start that dup()
      allocates a new file descriptor.
  Michael Kerrisk
    Clarify what silent closing means
  Alejandro Colomar
    SYNOPSIS: Use consistent comments through pages

epoll_wait.2
  Alejandro Colomar
    Move misplaced subsection to NOTES from BUGS

execveat.2
  Michael Kerrisk
    Library support has been added in glibc 2.34

_exit.2
  Michael Kerrisk
    Add a little more detail on the raw _exit() system cal

exit_group.2
  Alejandro Colomar
    Use 'noreturn' in prototypes

flock.2
  Aurelien Aptel [Alejandro Colomar]
    Add CIFS details
      CIFS flock() locks behave differently than the standard.
      Give an overview of those differences.

ioperm.2
  Alejandro Colomar
    Remove obvious comment

memfd_create.2
mmap.2
shmget.2
  Michael Kerrisk [Yang Xu]

 Document the EPERM error for huge page allocations
      This error can occur if the caller is does not have CAP_IPC_LOCK
      and is not a member of the sysctl_hugetlb_shm_group.

mmap.2
  Bruce Merry
    Clarify that MAP_POPULATE is best-effort

mount.2
  Topi Miettinen
    Document SELinux use of MS_NOSUID mount flag

open.2
  Alejandro Colomar [Walter Harms]
    Fix bug in linkat(2) call example
      AT_EMPTY_PATH works with empty strings (""), but not with NULL
      (or at least it's not obvious).
  Michael Kerrisk
    Make it clearer that an FD is an index into the process's FD table
      Sometimes people are confused, thinking a file descriptor is just a
      number....

perfmonctl.2
  Michael Kerrisk
    This system call was removed in Linux 5.10

pipe.2
  Alejandro Colomar
    SYNOPSIS: Fix incorrect prototype
  Michael Kerrisk
    Rearrange SYNOPSIS so that minority version pipe() is at end

ptrace.2
   Dmitry V. Levin [Alejandro Colomar, Mathieu Desnoyers]
    Mention PTRACE_GET_SYSCALL_INFO in RETURN VALUE section

seccomp.2
  Michael Kerrisk
    Reorder list of SECCOMP_SET_MODE_FILTER flags alphabetically

(No content changes.)
Michael Kerrisk
SEE ALSO: add seccomp_unotify(2)

select.2
Michael Kerrisk
Strengthen the warning regarding the low value of FD_SETSIZE
All modern code should avoid select(2) in favor of poll(2)
or epoll(7).
Michael Kerrisk
Relocate sentence about the fd_set value-result arguments to BUGS

syscalls.2
Michael Kerrisk
perfmonctl(2) was removed in Linux 5.10

bswap.3
Alejandro Colomar
bswap_*() are implemented using functions
Even though it's true that they are macros,
it's transparent to the user.

The user will see their results casted to unsigned types
after the conversion due to the underlying
functions,
so it's better to document these as the underlying functions,
specifying the types.

cmsg.3
unix.7
Michael Kerrisk
Refer to seccomp_unotify(2) for an example of SCM_RIGHTS usage

cpow.3
Alejandro Colomar
Use 'complex' after the type consistently

ctime.3
Michael Kerrisk [Katsuhiro Numata]
Restore documentation of 'tm_gmtoff' field

errno.3
Alejandro Colomar [Florian Weimer, Mark Kettenis]
Fix ENODATA text
ENODATA is an XSI STREAMS extension (not base POSIX).

exec.3
Josh Triplett [Alejandro Colomar]

Clarify that execvpe() uses PATH from the caller, not envp
Josh Triplett [Alejandro Colomar]
Fix description of 'e' variants
The envp argument specifies the environment of the new process
image, not "the environment of the caller".

fflush.3
Alejandro Colomar
SEE ALSO: Add fpurge(3)

getline.3
[Ahelenia Ziemiaska, Alejandro
Colomar]
!*lineptr is sufficient
No implementation or spec requires *n to be 0 to allocate
a new buffer.

getopt.3
James O. D. Hunt [Alejandro Colomar]
Clarify behaviour

printf.3
Utkarsh Singh [Alejandro Colomar]
Add overall structure of format string

pthread_attr_setinheritsched.3
pthread_attr_setschedparam.3
Alejandro Colomar
SYNOPSIS: Use 'restrict' in prototypes

pthread_mutexattr_setrobust.3
Michael Kerrisk
Note that the *_np() APIs are deprecated since glibc 2.34
Alejandro Colomar
SYNOPSIS: Remove incorrect 'const'

pthread_mutex_consistent.3
Michael Kerrisk
Note that pthread_mutexattr_setrobust() is now deprecated

pthread_yield.3
Michael Kerrisk
Note that this function is deprecated since glibc 2.34

rpc.3
Alejandro Colomar
SYNOPSIS: Fix prototypes (misc.)

scanf.3
  Alyssa Ross [Alejandro Colomar]
    Clarify that %n supports type modifiers

xdr.3
   Alejandro Colomar
    SYNOPSIS: Fix prototype types
      Use the same types glibc uses, and add a missing 'const'.

capabilities.7
  Michael Kerrisk
    CAP_IPC_LOCK also governs memory allocation using huge pages

environ.7
  Josh Triplett [Alejandro Colomar]
    Remove obsolete admonishment of the GZIP environment variable

kernel_lockdown.7
  dann frazier [Alejandro Colomar]
    Remove description of lifting via SysRq (not upstream)
      The patch that implemented lockdown lifting via SysRq ended up
      getting dropped[*] before the feature was merged upstream. Having
      the feature documented but unsupported has caused some confusion
      for our users.

mount_namespaces.7
namespaces.7
  Michael Kerrisk
    Relocate reference to pam_namespace(8) from namespaces.7 to
    mount_namespaces.7.

signal.7
  Michael Kerrisk
    Add reference to seccomp_unotify(2)
      The seccomp user-space notification
 feature can cause changes in
      the semantics of SA_RESTART with respect to system calls that
      would never normally be restarted. Point the reader to the page
      that provide further details.

vsock.7
  Alyssa Ross
    ioctls are on /dev/vsock, not sockets

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of,

the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this
License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You

meet the following conditions:

(a) You must give any other recipients of the Work or
Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work,
excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding
those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions

for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the
content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct,
indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer,
and charge a fee for, acceptance of support, warranty, indemnity,
or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only
on Your own behalf and on Your sole responsibility, not on behalf
of any other Contributor, and only if You agree to indemnify,
defend, and hold each Contributor harmless for any liability
incurred by, or claims asserted against, such Contributor by reason
of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]"
replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate

comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.
