/**
 * Decrypted plaintext data. This value may not be returned if the customer master key is not available or if you
* didn't have permission to use it.
* </p>
*<p>
* The AWS SDK for Java performs a Base64 encoding on this field before sending this request to the AWS
service.
* Users of the SDK should not perform Base64 encoding on this field.
* </p>
* Warning: ByteBuffer's returned by the SDK are mutable. Changes to the content or position of the byte buffer
will
* be seen by all objects that have a reference to this object. It is recommended to call ByteBuffer.duplicate() or
* ByteBuffer.asReadOnlyBuffer() before using or reading from the buffer. This behavior will be changed in a
future
* major version of the SDK.
* </p>
*
* @param plaintext

* you didn't have permission to use it.
*/
/**
 * Decrypted plaintext data. This value may not be returned if the customer master key is not available or if you
* didn't have permission to use it.
* </p>
* 
* { @code ByteBuffer}'s are stateful. Calling their { @code get} methods changes their { @code position}. We
recommend
* using { @link java.nio.ByteBuffer#asReadOnlyBuffer()} to create a read-only view of the buffer with an
independent
* { @code position}, and calling { @code get} methods on this rather than directly on the returned { @code
ByteBuffer}. 
* Doing so will ensure that anyone else using the { @code ByteBuffer} will not be affected by changes to the
* {@code position}.
* </p>
* @return Decrypted plaintext data. This value may not be returned if the customer master key is not available or
* if you didn't have permission to use it.

/**
* <p>
* Specifies a decision made by the decider. A decision can be one of these types:
* </p>
* <ul>
* <li>
* <p>
* <code>CancelTimer</code> – Cancels a previously started timer and records a <code>TimerCanceled</code> event in the
* history.
* </p>
* </li>
* <li>
* <p>
* <code>CancelWorkflowExecution</code> – Closes the workflow execution and records a
* <code>WorkflowExecutionCanceled</code> event in the history.
* </p>
* </li>
* <li>
* <p>
* <code>CompleteWorkflowExecution</code> – Closes the workflow execution and records a
* <code>WorkflowExecutionCompleted</code> event in the history.
* </p>
* </li>
* <li>
* <p>
* <code>ContinueAsNewWorkflowExecution</code> – Closes the workflow execution and starts a new workflow
* execution of
* the same type using the same workflow ID and a unique run Id. A
* <code>WorkflowExecutionContinuedAsNew</code> event is
* recorded in the history.
* </p>
* </li>
* <li>
* <p>
* <code>FailWorkflowExecution</code> – Closes the workflow execution and records a
* <code>WorkflowExecutionFailed</code> event in the history.
* </p>
* </li>
* </ul>
* <code>RecordMarker</code> – Records a <code>MarkerRecorded</code> event in the history. Markers can be used for adding custom information in the history for instance to let deciders know that they don't need to look at the history beyond the marker event.

* <code>RequestCancelActivityTask</code> – Attempts to cancel a previously scheduled activity task. If the activity task was scheduled but has not been assigned to a worker, then it is canceled. If the activity task was already assigned to a worker, then the worker is informed that cancellation has been requested in the response to RequestActivityTaskHeartbeat.

* <code>RequestCancelExternalWorkflowExecution</code> – Requests that a request be made to cancel the specified external workflow execution and records a <code>RequestCancelExternalWorkflowExecutionInitiated</code> event in the history.

* <code>ScheduleActivityTask</code> – Schedules an activity task.

* <code>SignalExternalWorkflowExecution</code> – Requests a signal to be delivered to the specified external workflow execution and records a <code>SignalExternalWorkflowExecutionInitiated</code> event in the history.

* <code>StartChildWorkflowExecution</code> – Requests that a child workflow execution be started and records a <code>StartChildWorkflowExecutionInitiated</code> event in the history. The child workflow execution is a separate workflow execution with its own history.

* <code>StartTimer</code> – Starts a timer for this workflow execution and records a <code>TimerStarted</code> event in the
* The ordering of decisions should follow a logical flow. Some decisions might not make sense in the current context of
* the workflow execution and therefore fails.
* A limit on your account was reached.
* The decision lacks sufficient permissions.
* One of the following events might be added to the history to indicate an error. The event attribute's
  * <code>cause</code> parameter indicates the cause. If <code>cause</code> is set to
  * <code>OPERATION_NOT_PERMITTED</code>, the decision failed because it lacked sufficient permissions.
  For details and
  * example IAM policies, see <a href="http://docs.aws.amazon.com/amazonswf/latest/developerguide/swf-dev-
Using IAM to Manage Access to Amazon SWF Workflows in the *Amazon SWF Developer Guide*. *

- <code>ScheduleActivityTaskFailed</code> – A <code>ScheduleActivityTask</code> decision failed. This could happen if the activity type specified in the decision isn't registered, is in a deprecated state, or the decision isn't properly configured.

- <code>RequestCancelActivityTaskFailed</code> – A <code>RequestCancelActivityTask</code> decision failed. This could happen if there is no open activity task with the specified activityId.

- <code>StartTimerFailed</code> – A <code>StartTimer</code> decision failed. This could happen if there is another open timer with the same timerId.

- <code>CancelTimerFailed</code> – A <code>CancelTimer</code> decision failed. This could happen if there is no open timer with the specified timerId.

- <code>StartChildWorkflowExecutionFailed</code> – A <code>StartChildWorkflowExecution</code> decision failed. This could happen if the workflow type specified isn't registered, is deprecated, or the decision isn't properly configured.

- <code>SignalExternalWorkflowExecutionFailed</code> – A <code>SignalExternalWorkflowExecution</code> decision failed. This could happen if the <code>workflowID</code> specified in the decision was incorrect.
* <li>
<code>RequestCancelExternalWorkflowExecutionFailed</code> – A decision failed. This could happen if the <code>workflowID</code> specified in the decision was incorrect.
</li>
* <li>
<code>CancelWorkflowExecutionFailed</code> – A <code>CancelWorkflowExecution</code> decision failed. This could happen if there is an unhandled decision task pending in the workflow execution.
</li>
* <li>
<code>CompleteWorkflowExecutionFailed</code> – A <code>CompleteWorkflowExecution</code> decision failed. This could happen if there is an unhandled decision task pending in the workflow execution.
</li>
* <li>
<code>ContinueAsNewWorkflowExecutionFailed</code> – A <code>ContinueAsNewWorkflowExecution</code> decision failed. This could happen if there is an unhandled decision task pending in the workflow execution or the ContinueAsNewWorkflowExecution decision was not configured correctly.
</li>
* <li>
<code>FailWorkflowExecutionFailed</code> – A <code>FailWorkflowExecution</code> decision failed. This could happen if there is an unhandled decision task pending in the workflow execution.
</li>
* </ul>

* The preceding error events might occur due to an error in the decider logic, which might put the workflow execution in an unstable state. The cause field in the event structure for the error event indicates the cause of the error.
* </p>
* <p>
* A workflow execution may be closed by the decider by returning one of the following decisions when completing a decision task: <code>CompleteWorkflowExecution</code>, <code>FailWorkflowExecution</code>, <code>CancelWorkflowExecution</code> and <code>ContinueAsNewWorkflowExecution</code>. An
* <code>UnhandledDecision</code> fault is returned if a workflow closing decision is specified and a signal or activity
* event had been added to the history while the decision task was being performed by the decider. Unlike the above
* situations which are logic issues, this fault is always possible because of race conditions in a distributed system.
* The right action here is to call <a>RespondDecisionTaskCompleted</a> without any decisions. This would result in
* another decision task with these new events included in the history. The decider should handle the new events and may
* decide to close the workflow execution.

* </p>
* </note>
* </p>
* <b>How to Code a Decision</b>
* </p>
* You code a decision by first setting the decision type field to one of the above decision values, and then set the
* corresponding attributes field shown below:
* </p>
* </ul>
* <li>
* <p>
* <code> <a>ScheduleActivityTaskDecisionAttributes</a> </code>
* </p>
* </li>
* <li>
* <p>
* <code> <a>RequestCancelActivityTaskDecisionAttributes</a> </code>
* </p>
* </li>
* <li>
* <p>
* <code> <a>CompleteWorkflowExecutionDecisionAttributes</a> </code>
* </p>
* </li>
* <li>
* <p>
* <code> <a>FailWorkflowExecutionDecisionAttributes</a> </code>
* </p>
* </li>
* <li>
* <p>
* <code> <a>CancelWorkflowExecutionDecisionAttributes</a> </code>
* </p>
* </li>
* <li>
* <p>
* <code> <a>ContinueAsNewWorkflowExecutionDecisionAttributes</a> </code>
* </p>
* </li>
* </ul>
* </li>
* </ul>

 */
/**
 * <p>
 * Used by deciders to tell the service that the &lt;a&gt;DecisionTask&lt;/a&gt; identified by the &lt;code&gt;taskToken&lt;/code&gt;
has
  * successfully completed. The <code>decisions</code> argument specifies the list of decisions made while
processing
  * the task.
  * </p>
  * <p>
  * A <code>DecisionTaskCompleted</code> event is added to the workflow history. The
<code>executionContext</code>
  * specified is attached to the event in the workflow execution history.
  * </p>
  * <p>
  * <b>Access Control</b>
  * </p>
  * <p>
  * If an IAM policy grants permission to use <code>RespondDecisionTaskCompleted</code>, it can express
permissions
  * for the list of decisions in the <code>decisions</code> parameter. Each of the decisions has one or more
* parameters, much like a regular API call. To allow for policies to be as readable as possible, you can express
* permissions on decisions as if they were actual API calls, including applying conditions to some parameters.
For
  * more information, see <a href="http://docs.aws.amazon.com/amazonswf/latest/developerguide/swf-dev-
iam.html">Using
* IAM to Manage Access to Amazon SWF Workflows</a> in the <i>Amazon SWF Developer Guide</i>.
  * </p>
  * @param respondDecisionTaskCompletedRequest
  *        Input data for a TaskCompleted response to a decision task.
  * @throws UnknownResourceException
  *         Returned when the named resource cannot be found with in the scope of this operation (region or domain).
  *         This could happen if the named resource was never created or is no longer available for this operation.
  * @throws OperationNotPermittedException
  *         Returned when the caller doesn't have sufficient permissions to invoke the action.
  * @sample AmazonSimpleWorkflow.RespondDecisionTaskCompleted
  * @see <a href="http://docs.aws.amazon.com/goto/WebAPI/swf-2012-01-25/RespondDecisionTaskCompleted"
*      target="_top">AWS API Documentation</a>

/**
* Synchronous client for accessing Amazon S3.
*
* <h1>Appendix: Amazon S3 client-side encryption meta information</h1>
*
* <h2>Introduction</h2>
* 
* This appendix summarizes the current crypto related meta information
* associated with an S3 object encrypted using SDK client-side encryption. In
* SDK's terminology, these meta information are classified as "user metadata".
* In general, the meta information is just a map of key/value pairs. Physically
* they are persisted either as metadata of the encrypted S3 object, or as a
* separate S3 object called an "instruction file" (which is just a JSON file in
* plaintext.) For all references to the Cipher Algorithm Names, Modes, and Padding,
* such as <code>AES/CBC/PKCS5Padding</code>, please refer to Oracle's <a
* href="http://docs.oracle.com/javase/7/docs/technotes/guides/security/StandardNames.html">
* Java™ Cryptography Architecture Standard Algorithm Name Documentation</a>
* for more details.
*
* <h2>S3 metadata vs instruction file</h2>
* 
* Note when a key/value pair is stored as "user metadata" as part of the S3
* metadata, the SDK always adds an additional prefix of <b>x-amz-meta-</b> to
* the key name. In contrast, the SDK doesn't add any prefix when the key names
* are stored in an instruction file. (The reason has to do with how the http
* headers are handled.)
For example, `<b>x-amz-key</b>` would get stored as `<b>x-amz-meta-x-amz-key</b>` in S3 metadata. In contrast, `<b>x-amz-key</b>` would simply be stored as is (ie without the prefix) in an instruction file.

All the keys described below are considered "user metadata" by the SDK.

<h2>S3 v1 crypto meta information (supported by all SDK's)</h2>

For non-KMS client side encryption, this v1 crypto meta information is used to support the "Encryption Only" crypto mode (which involves the use of <code>AES/CBC/PKCS5Padding</code> for content encryption, and <code>AES/ECB</code> for encrypting the one-time randomly generated data key). For KMS client-side encryption, the v2 crypto meta information is used.

<table>
<thead>
<tr>
<th>Key</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>x-amz-key</td>
<td>Content encrypting key (cek) in encrypted form, base64 encoded. The cek is randomly generated per S3 object, and is always an AES 256-bit key. The corresponding cipher is always &quot;AES/CBC/PKCS5Padding&quot;.</td>
</tr>
<tr>
<td>x-amz-iv</td>
<td>Randomly generated IV (per S3 object), base64 encoded</td>
</tr>
<tr>
<td>x-amz-matdesc</td>
<td>Customer provided material description in JSON (UTF8) format. Used to identify the client-side master key (ie used to encrypt/unwrap the generated content encrypting key).</td>
</tr>
<tr>
<td>x-amz-unencrypted-content-length</td>
<td>Unencrypted content length (optional but should be specified whenever possible).</td>
</tr>
</tbody>
</table>

<h2>S3 v2 crypto meta information (currently supported by the Java SDK)</h2>

This v2 crypto meta information is used to support both authenticated encryption (which involves the use of <code>AES/GCM/NoPadding</code> for content encryption, and key wrapping for the one-time randomly generated data key), and KMS client-side encryption (which can either be encryption-only or...
* authenticated encryption.)

<table>
<thead>
<tr>
<th>key</th>
<th>description</th>
</tr>
</thead>
<tbody>
<tr>
<td>x-amz-key-v2</td>
<td>CEK in key wrapped form. This is necessary so that the S3 encryption</td>
</tr>
<tr>
<td></td>
<td>client that doesn't recognize the v2 format will not mistakenly decrypt S3</td>
</tr>
<tr>
<td></td>
<td>object encrypted in v2 format.</td>
</tr>
<tr>
<td>x-amz-iv</td>
<td>Randomly generated IV (per S3 object), base64 encoded. (Same as v1.)</td>
</tr>
<tr>
<td>x-amz-matdesc</td>
<td>Customer provided material description in JSON format. (Same as v1). Used</td>
</tr>
<tr>
<td></td>
<td>to identify the client-side master key.</td>
</tr>
<tr>
<td></td>
<td>For KMS client side encryption, the KMS Customer Master Key ID is stored</td>
</tr>
<tr>
<td></td>
<td>as part of the material description, &lt;b&gt;x-amz-matdesc&lt;/b&gt;, under the key-name</td>
</tr>
<tr>
<td></td>
<td>&lt;code&gt;&quot;kms_cmk_id&quot;&lt;/code&gt;.</td>
</tr>
<tr>
<td>x-amz-unencrypted-content-length</td>
<td>Unencrypted content length. (optional but should be specified whenever possible. Same as v1.)</td>
</tr>
<tr>
<td>x-amz-wrap-alg</td>
<td>Key wrapping algorithm used.</td>
</tr>
<tr>
<td></td>
<td>Supported values:</td>
</tr>
<tr>
<td></td>
<td>&lt;code&gt;&quot;AESWrap&quot;, &quot;RSA/ECB/OAEPWithSHA-256AndMGF1Padding&quot;, &quot;kms&quot;&lt;/code&gt;</td>
</tr>
<tr>
<td></td>
<td>No standard key wrapping is used if this meta information is absent</td>
</tr>
<tr>
<td></td>
<td>Always set to &lt;b&gt;&quot;kms&quot;&lt;/b&gt; if KMS is used for client-side encryption</td>
</tr>
<tr>
<td>x-amz-cek-alg</td>
<td>Content encryption algorithm used.</td>
</tr>
</tbody>
</table>
* Supported values:
  * "AES/GCM/NoPadding", "AES/CBC/PKCS5Padding"
  * Default to "AES/CBC/PKCS5Padding" if this key is absent.

* <ul>
  * <li>Only applicable if AEAD is in use. This meta information is absent otherwise, or if KMS is in use.</li>
  * Supported value: "128"

* <table>
  * <tr>
    * <td><b>x-amz-tag-len</b></td>
    * <td>Tag length (in bits) when AEAD is in use.</td>
  * </tr>
  * <tr>

@return The customer master key that Amazon SES should use to encrypt your emails before saving them to the Amazon S3 bucket. You can use the default master key or a custom master key you created in AWS KMS as follows:

- To use the default master key, provide an ARN in the form of
  ```
  ```
  For example, if your AWS account ID is 123456789012 and you want to use the default master key in the US West (Oregon) region, the ARN of the default master key would be
  ```
  ```
  If you use the default master key, you don’t need to perform any extra steps to give Amazon SES permission to use the key.

- To use a custom master key you created in AWS KMS, provide the ARN of the master key and ensure that you add a statement to your key’s policy to give Amazon SES permission to use it. For more information about giving permissions, see the Amazon SES Developer Guide.

For more information about key policies, see the AWS KMS Developer Guide. If you do not specify a master key, Amazon SES will not encrypt your emails.

Your mail is encrypted by Amazon SES using the Amazon S3 encryption client before the mail is submitted to Amazon S3 for storage. It is not encrypted using Amazon S3 server-side encryption. This means that you must use the Amazon S3 encryption client to decrypt the email after retrieving it from Amazon S3, as the service has no access to use your AWS KMS keys for decryption. This encryption client is currently

/**
 * Adds an external destination to your Amazon Kinesis Analytics application.
 *
 * If you want Amazon Kinesis Analytics to deliver data from an in-application stream within your application to an
 * external destination (such as an Amazon Kinesis stream or a Firehose delivery stream), you add the relevant
 * configuration to your application using this operation. You can configure one or more outputs for your
 * application. Each output configuration maps an in-application stream and an external destination.
 *
 * You can use one of the output configurations to deliver data from your in-application error stream to an external
 * destination so that you can analyze the errors. For conceptual information, see <a href="http://docs.aws.amazon.com/kinesisanalytics/latest/dev/how-it-works-output.html">Understanding Application Output (Destination)</a>.
 */
Note that any configuration update, including adding a streaming source using this operation, results in a new version of the application. You can use the `<a href="/ describesApplication">DescribeApplication</a>` operation to find the current application version.

For the limits on the number of application inputs and outputs you can configure, see `<a href="http://docs.aws.amazon.com/kinesisanalytics/latest/dev/limits.html">Limits</a>`.

This operation requires permissions to perform the `<code>kinesisanalytics: AddApplicationOutput</code>` action.

```
* @param addApplicationOutputRequest
* @return Result of the AddApplicationOutput operation returned by the service.
* @throws ResourceNotFoundException
          Specified application can't be found.
* @throws ResourceInUseException
          Application is not available for this operation.
* @throws InvalidArgumentException
          Specified input parameter value is invalid.
* @throws ConcurrentModificationException
          Exception thrown as a result of concurrent modification to an application. For example, two individuals attempting to edit the same application at the same time.
* @sample AmazonKinesisAnalytics/AddApplicationOutput
* @see <a href="http://docs.aws.amazon.com/goto/WebAPI/kinesisanalytics-2015-08-14/AddApplicationOutput" target="_top">AWS API Documentation</a>
*/

1.188 logstash-filter-mutate 3.1.6

1.188.1 Available under license:

Elasticsearch
Copyright 2012-2015 Elasticsearch

This product includes software developed by The Apache Software Foundation (http://www.apache.org/).
The following is a list of people who have contributed ideas, code, bug reports, or in general have helped logstash along its way.

Contributors:
* Andrew Rowson (growse)
* Avishai Ish-Shalom (avishai-ish-shalom)
* Christian S. (squiddle)
* Colin Surprenant (colinsurprenant)
* Danny Berger (dpb587)
* Ehtesh Choudhury (shurane)
* Guillaume ZITTA (gza)
* John E. Vincent (lusis)
* Jonathan Van Eenwyk (jdve)
* Jordan Sissel (jordansissel)
* Kesavan Rengarajan (cosmok)
* Kurt Hurtado (kurtado)
* Laust Rud Jacobsen (rud)
* Nick Ethier (nickethier)
* Pete Fritchman (fetep)
* Philippe Weber (wiibaa)
* Pier-Hugues Pellerin (ph)
* Ralph Meijer (ralphm)
* Richard Pijnenburg (electrical)
* Suyog Rao (suyograo)
* Tal Levy (talevy)
* piavlo
Note: If you’ve sent us patches, bug reports, or otherwise contributed to Logstash, and you aren’t on the list above and want to be, please let us know and we’ll make sure you’re here. Contributions from folks like you are what make open source awesome.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.
"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.
"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."
"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not
pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special,
incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

We're still working out the best way to present contributors and trying to be as accurate as possible. The list below is generated with the following command listed below in an attempt to capture all contributions which have gone into .NET Core SDK 1.0. Where multiple email addresses were returned for a single person, the counts were aggregated with the email address reported the most commits.

```bash
```
```
git shortlog -sne --no-merges --until release/1.1.0@{2017-02-25}
```
```
```
When you navigate to a contributors commit page, the results are not filtered by release so more commits than are listed below will be shown.

### .NET Core Tools (SDK)

## Contributions to .NET 5.0

.NET 5 is an amazing milestone enabled, in part, by a wonderfully engaged community. This page is an attempt to acknowledge the efforts of many folks across the breadth of the ecosystem. We're working to get better at recognizing the your contributions so please, let us know if something is incorrect or missing.

**Thank you!!!**

# Contributions to .NET Core 2.0 Preview 2

We're still working out the best way to present contributors and trying to be as accurate as possible. The list below is generated with the following command listed below in an attempt to capture all contributions which have gone into .NET Core 2.0 Preview 2. Where multiple email addresses were returned for a single person, the counts were aggregated with the email address reported the most commits.

```bash
   ***bash
   git shortlog -sne --no-merges --since release/2.0.0@{2017-05-05} --until release/2.0.0@{2017-06-07}

   When you navigate to a contributors commit page, the results are not filtered by release so more commits than are listed below will be shown.

   * [CLI](#cli)
   * [CoreCLR](#coreclr)
   * [CoreFX](#corefx)
   * [WCF](#wcf)

* Tarek Mahmoud Sayed
  (2)[](https://github.com/dotnet/wcf/commits/release/2.0.0?author=tarekms@microsoft.com)
We're still working out the best way to present contributors and trying to be as accurate as possible. The list below is generated with the following command against each repo. The release qualifier is different from the example in some cases. Also, where multiple email addresses were returned for a single person, the counts were aggregated with the email address reported the most commits.

```bash
git shortlog -sne --no-merges --since {2016-05-20} --until {2016-11-08}
```

When you navigate to a contributors commit page, the results are not filtered by release so more commits than are listed below will be shown.

### CLI

- [Eric Erhardt (54)](https://github.com/dotnet/cli/commits/rel/1.0.0-preview2.1?author=eric.erhardt@microsoft.com)
- [Livar Cunha (45)](https://github.com/dotnet/cli/commits/rel/1.0.0-preview2.1?author=livar@live.com)

# Contributions to .NET Core 2.1

The list below is generated with the following command listed below in an attempt to capture all contributions which have gone into .NET Core 2.1.

```
bash
git shortlog -sne --no-merges --since 2017-11-16 --until 2018-05-15
```

When you navigate to a contributors commit page, the results are not filtered by release so more commits than are listed below will be shown.

* [CLI](#cli)
* [CoreCLR](#coreclr)
* [CoreFX](#corefx)
* [WCF](#wcf)

## CLI

- [Livar Cunha (78)](https://github.com/dotnet/cli/commits/release/2.1.3xx?author=livar@live.com)

* [Zhenlan Wang (1)](https://github.com/dotnet/wcf/commits/release/2.1.0?author=zhenlwa@microsoft.com)

# Contributions to .NET Core 2.0 Preview 1

We're still working out the best way to present contributors and trying to be as accurate as possible. The list below is generated with the following command listed below in an attempt to capture all contributions which have gone into .NET Core 2.0 Preview 1. Where multiple email addresses were returned for a single person, the counts were aggregated with the email address reported the most commits.

```bash
   git shortlog -sne --no-merges --since release/2.0.0@{2016-10-03} --until release/2.0.0@{2017-05-05} --
   committer="dotnet-bot" --invert-grep
```

When you navigate to a contributors commit page, the results are not filtered by release so more commits than are listed below will be shown.

* [CLI](#cli)
* [CoreCLR](#coreclr)
* [CoreFX](#corefx)
* [WCF](#wcf)

## CLI

* [Livar Cunha (227)](https://github.com/dotnet/cli/commits/release/2.0.0?author=livar@live.com)

# License information for .NET on Windows

The Windows distribution of .NET 5.0 and later releases contains files that are provided under multiple licenses.

This information is provided to help you understand the license terms that apply to your use. By using any or all of these files you agree to their associated license terms.

The following binaries are licensed with the [Windows SDK License](https://docs.microsoft.com/legal/windows-sdk/license):

* api-ms-\*\*\* (used by .NET runtime)
* ucrtbase.dll (used by .NET runtime)
* D3DCompiler_47_cor3.dll (used by WPF)

The following binaries are licensed with the [.NET Library License](https://dotnet.microsoft.com/en/dotnet_library_license.htm)

* PresentationNative_cor3.dll (used by WPF)
* wpfgfx_cor3.dll (used by WPF)

The following binaries are licensed with the [Visual Studio 2019 License](https://visualstudio.microsoft.com/license-terms/mlt031619/) (not as a "trial"):

* vcruntime140_cor3.dll (used by WPF)
* Microsoft.DiaSymReader.Native.\{x86|amd64|arm|arm64\}.dll (used by .NET SDK)

All other binaries and files are licensed with the [MIT license](https://github.com/dotnet/core/blob/main/LICENSE.TXT)

This document is provided for informative purposes only, and is not itself a license.

#
# Name:          Adobe Glyph List
# Table version: 1.2
# Date:          22 Oct 1998
#
# Description:
#
#  The Adobe Glyph List (AGL) list relates Unicode values (UVs) to glyph
#  names, and should be used only as described in the document "Unicode and
#  Glyph Names," at
#  The glyph name to UV relation is one to many. 12 glyph names are mapped to
#  two UVs each; each UV has a separate entry. All other glyph names are
#  mapped to one UV each.
#
#  The Unicode Standard version 2.1 is used for all UVs outside of the Private
#  Use area, except for 4 entries (see Revision History for 1.2 below).
#
#  There are 1051 entries in this list, 171 of which are in the Corporate Use
#  subarea (CUS). Refer to the document "Unicode Corporate Use Subarea as used
#  by Adobe Systems," at
#  http://partners.adobe.com/asn/developer/typeforum/corporateuse.txt
#  for compatibility decompositions for these characters, and to the document
#  "Unicode and Glyph Names" for more information the CUS.
#
# Format: Semicolon-delimited fields:
#
#  (1) Standard UV or CUS UV. (4 uppercase hexadecimal digits)
#
#  (2) Glyph name. (upper- and lowercase letters, digits)
#
#  (3) Character names: Unicode character names for standard UVs, and
# descriptive names for CUS UVs. (uppercase letters, hyphen, space)
#
# (4) [optional] Comment. A comment of "Duplicate" indicates one of two
# UVs of a double-mapping. It is the UV that may be given a uni<code>
# override, or the UV that is in the CUS, as described in the document
# "Unicode and Glyph Names."
#
# The entries are sorted by glyph name in increasing ASCII order; entries
# with the same glyph name are sorted in decreasing priority order.
#
# Lines starting with "#" are comments; blank lines should be ignored.
#
# Revision History:
#
# 1.2 [22 Oct 1998]
#
# Some Central European glyph names were remapped and the glyph "dotlessj"
# was added. Some entries in the table below have not changed but are
# included to provide a complete context for other glyphs that have been
# remapped or double-mapped. "-" means that the entry for that UV does not
# exist in the AGL.
#
# The characters at U+1E9E/F in AGL 1.1, LATIN CAPITAL/SMALL LETTER S WITH
# COMMA BELOW, which are proposed new characters (see (b) in the notes for
# AGL 1.1 below), have since been reassigned by the Unicode Standard to new
# proposed values of U+0218/9. These characters, as well as U+021A/B, LATIN
# CAPITAL/SMALL LETTER T WITH COMMA BELOW, are not in the Unicode Standard
# 2.1.
#
# Entries with the same glyph name are now sorted in decreasing priority
# order instead of in increasing UV order.
#
# 1.1 [24 Nov 1997]
#
# a. The "Euro" glyph's UV assignment is changed from U+20A0 (EURO-CURRENCY

---

Open Source Used in IMI IMI-CONNECT-Binaries 6972
SIGN) to U+20AC (EURO SIGN). While U+20AC is not defined in the Unicode Standard 2.0, it has been accepted by the Unicode Technical Committee for the next version of the Standard; it has not yet passed the ISO approval process as of 7 November '97.

b. Glyphs "Scedilla" and "scedilla", which were assigned in the Corporate Use Subarea in AGL 1.0, are now additionally mapped to U+1E9E and U+1E9F respectively. These two UVs share the same Unicode approval status as the Euro glyph (see a. above).

c. The "fraction" glyph is now additionally mapped to U+2215, to match Windows Glyph List 4.

d. The descriptive name for glyph "onefitted", in the Corporate Use subarea, is changed from "TABULAR DIGIT ONE" to "PROPORTIONAL DIGIT ONE".

iTextSharp is a port of the iText open source Java library for PDF generation written entirely in C# for the .NET platform. This repository contains the source code of the last version of the library released under the Mozilla Public License and the LGPL, before the project moved to the AGPL. You can use this version if you need a free PDF library for use in closed-source projects.

NuGet package
-------------

A compiled binary of iTextSharp 4.1.6 is provided by the `iTextSharp-LGPL` NuGet package. To install it, run the following command in the Package Manager Console:

```shell
Install-Package iTextSharp-LGPL
```

Updates and bug fixes
---------------------

This repository is frozen to iTextSharp version 4.1.6 and will *not* be updated.

For more recent versions (available under AGPL and commercial licenses), please refer to:

- [Corporate homepage of iText](http://itextpdf.com/)
- [Official GitHub repository "itext/iTextSharp"](https://github.com/itext/itextsharp)
