2. You may modify your copy or copies of the Program or any portion of it, and copy and distribute such modifications under the terms of Paragraph 1 above, provided that you also do the following:

   a) cause the modified files to carry prominent notices stating that you changed the files and the date of any change; and

   b) cause the whole of any work that you distribute or publish, that in whole or in part contains the Program or any part thereof, either with or without modifications, to be licensed at no charge to all third parties under the terms of this General Public License (except that you may choose to grant warranty protection to some or all third parties, at your option).

   c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the simplest and most usual way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this General Public License.

   d) You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

Mere aggregation of another independent work with the Program (or its derivative) on a volume of a storage or distribution medium does not bring
the other work under the scope of these terms.

3. You may copy and distribute the Program (or a portion or derivative of it, under Paragraph 2) in object code or executable form under the terms of Paragraphs 1 and 2 above provided that you also do one of the following:

   a) accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Paragraphs 1 and 2 above; or,

   b) accompany it with a written offer, valid for at least three years, to give any third party free (except for a nominal charge for the cost of distribution) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

   c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

Source code for a work means the preferred form of the work for making modifications to it. For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs, or for standard header files or definitions files that accompany that operating system.

4. You may not copy, modify, sublicense, distribute or transfer the Program except as expressly provided under this General Public License. Any attempt otherwise to copy, modify, sublicense, distribute or transfer the Program is void, and will automatically terminate your rights to use the Program under this License. However, parties who have received copies, or rights to use copies, from you under this General Public License will not have their licenses terminated so long as such parties remain in full compliance.

5. By copying, distributing or modifying the Program (or any work based on the Program) you indicate your acceptance of this license to do so, and all its terms and conditions.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.
7. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of the license which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the license, you may choose any version ever published by the Free Software Foundation.

8. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

9. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

10. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to humanity, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 1, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) 19xx name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
program 'Gnomovision' (a program to direct compilers to make passes at assemblers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

That's all there is to it!

This is free software, licensed under:

The Artistic License 1.0

The Artistic License

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

- “Package” refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.
- “Standard Version” refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder.
- “Copyright Holder” is whoever is named in the copyright or copyrights for the package.
- “You” is you, if you're thinking about copying or distributing this Package.
- “Reasonable copying fee” is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)
- “Freely Available” means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the
2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

   a) place your modifications in the Public Domain or otherwise make them Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as ftp.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

   b) use the modified Package only within your corporation or organization.

   c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

   d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

   a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

   b) accompany the distribution with the machine-readable source of the Package with your modifications.

   c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executables non-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

   d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a
larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this Package.

7. C or perl subroutines supplied by you and linked into this Package shall not be considered part of this Package.

8. The name of the Copyright Holder may not be used to endorse or promote products derived from this software without specific prior written permission.

9. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The license agreements of most software companies try to keep users at the mercy of those companies. By contrast, our General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. The
General Public License applies to the Free Software Foundation's software and to any other program whose authors commit to using it. You can use it for your programs, too.

When we speak of free software, we are referring to freedom, not price. Specifically, the General Public License is designed to make sure that you have the freedom to give away or sell copies of free software, that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of a such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must tell them their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License Agreement applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any work containing the Program or a portion of it, either verbatim or with modifications. Each licensee is addressed as "you".

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and
appropriately publish on each copy an appropriate copyright notice and
disclaimer of warranty; keep intact all the notices that refer to this
General Public License and to the absence of any warranty; and give any
other recipients of the Program a copy of this General Public License
along with the Program. You may charge a fee for the physical act of
transferring a copy.

2. You may modify your copy or copies of the Program or any portion of
it, and copy and distribute such modifications under the terms of Paragraph
1 above, provided that you also do the following:

a) cause the modified files to carry prominent notices stating that
you changed the files and the date of any change; and

b) cause the whole of any work that you distribute or publish, that
in whole or in part contains the Program or any part thereof, either
with or without modifications, to be licensed at no charge to all
third parties under the terms of this General Public License (except
that you may choose to grant warranty protection to some or all
third parties, at your option).

c) If the modified program normally reads commands interactively when
run, you must cause it, when started running for such interactive use
in the simplest and most usual way, to print or display an
announcement including an appropriate copyright notice and a notice
that there is no warranty (or else, saying that you provide a
warranty) and that users may redistribute the program under these
conditions, and telling the user how to view a copy of this General
Public License.

d) You may charge a fee for the physical act of transferring a
copy, and you may at your option offer warranty protection in
exchange for a fee.

Mere aggregation of another independent work with the Program (or its
derivative) on a volume of a storage or distribution medium does not bring
the other work under the scope of these terms.

3. You may copy and distribute the Program (or a portion or derivative of
it, under Paragraph 2) in object code or executable form under the terms of
Paragraphs 1 and 2 above provided that you also do one of the following:

a) accompany it with the complete corresponding machine-readable
source code, which must be distributed under the terms of
Paragraphs 1 and 2 above; or,

b) accompany it with a written offer, valid for at least three
years, to give any third party free (except for a nominal charge
for the cost of distribution) a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Paragraphs 1 and 2 above; or,

c) accompany it with the information you received as to where the corresponding source code may be obtained. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form alone.)

Source code for a work means the preferred form of the work for making modifications to it. For an executable file, complete source code means all the source code for all modules it contains; but, as a special exception, it need not include source code for modules which are standard libraries that accompany the operating system on which the executable file runs, or for standard header files or definitions files that accompany that operating system.

4. You may not copy, modify, sublicense, distribute or transfer the Program except as expressly provided under this General Public License. Any attempt otherwise to copy, modify, sublicense, distribute or transfer the Program is void, and will automatically terminate your rights to use the Program under this License. However, parties who have received copies, or rights to use copies, from you under this General Public License will not have their licenses terminated so long as such parties remain in full compliance.

5. By copying, distributing or modifying the Program (or any work based on the Program) you indicate your acceptance of this license to do so, and all its terms and conditions.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein.

7. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of the license which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the license, you may choose any version ever published by the Free Software Foundation.
8. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

9. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

10. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to humanity, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>
This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 1, or (at your option)
any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston MA 02110-1301 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) 19xx name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it
under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the
appropriate parts of the General Public License. Of course, the
commands you use may be called something other than `show w' and `show
c'; they could even be mouse-clicks or menu items--whatever suits your
program.

You should also get your employer (if you work as a programmer) or your
school, if any, to sign a "copyright disclaimer" for the program, if
necessary. Here a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the
program `Gnomovision' (a program to direct compilers to make passes
at assemblers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

That's all there is to it!

--- The Artistic License 1.0 ---

This software is copyright (c) 2005 - 2011 Adam Kennedy.
This is free software, licensed under:

The Artistic License 1.0

The Artistic License

Preamble

The intent of this document is to state the conditions under which a Package may be copied, such that the Copyright Holder maintains some semblance of artistic control over the development of the package, while giving the users of the package the right to use and distribute the Package in a more-or-less customary fashion, plus the right to make reasonable modifications.

Definitions:

- "Package" refers to the collection of files distributed by the Copyright Holder, and derivatives of that collection of files created through textual modification.
- "Standard Version" refers to such a Package if it has not been modified, or has been modified in accordance with the wishes of the Copyright Holder.
- "Copyright Holder" is whoever is named in the copyright or copyrights for the package.
- "You" is you, if you're thinking about copying or distributing this Package.
- "Reasonable copying fee" is whatever you can justify on the basis of media cost, duplication charges, time of people involved, and so on. (You will not be required to justify it to the Copyright Holder, but only to the computing community at large as a market that must bear the fee.)
- "Freely Available" means that no fee is charged for the item itself, though there may be fees involved in handling the item. It also means that recipients of the item may redistribute it under the same conditions they received it.

1. You may make and give away verbatim copies of the source form of the Standard Version of this Package without restriction, provided that you duplicate all of the original copyright notices and associated disclaimers.

2. You may apply bug fixes, portability fixes and other modifications derived from the Public Domain or from the Copyright Holder. A Package modified in such a way shall still be considered the Standard Version.

3. You may otherwise modify your copy of this Package in any way, provided that you insert a prominent notice in each changed file stating how and when you changed that file, and provided that you do at least ONE of the following:

   a) place your modifications in the Public Domain or otherwise make them
Freely Available, such as by posting said modifications to Usenet or an equivalent medium, or placing the modifications on a major archive site such as ftp.uu.net, or by allowing the Copyright Holder to include your modifications in the Standard Version of the Package.

b) use the modified Package only within your corporation or organization.

c) rename any non-standard executables so the names do not conflict with standard executables, which must also be provided, and provide a separate manual page for each non-standard executable that clearly documents how it differs from the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

4. You may distribute the programs of this Package in object code or executable form, provided that you do at least ONE of the following:

a) distribute a Standard Version of the executables and library files, together with instructions (in the manual page or equivalent) on where to get the Standard Version.

b) accompany the distribution with the machine-readable source of the Package with your modifications.

c) accompany any non-standard executables with their corresponding Standard Version executables, giving the non-standard executables non-standard names, and clearly documenting the differences in manual pages (or equivalent), together with instructions on where to get the Standard Version.

d) make other distribution arrangements with the Copyright Holder.

5. You may charge a reasonable copying fee for any distribution of this Package. You may charge any fee you choose for support of this Package. You may not charge a fee for this Package itself. However, you may distribute this Package in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution provided that you do not advertise this Package as a product of your own.

6. The scripts and library files supplied as input to or produced as output from the programs of this Package do not automatically fall under the copyright of this Package, but belong to whomever generated them, and may be sold commercially, and may be aggregated with this Package.

7. C or perl subroutines supplied by you and linked into this Package shall not be considered part of this Package.

8. The name of the Copyright Holder may not be used to endorse or promote
products derived from this software without specific prior written permission.

9. THIS PACKAGE IS PROVIDED "AS IS" AND WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, WITHOUT LIMITATION, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

The End

GNU GENERAL PUBLIC LICENSE

Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.,
51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA

Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by the GNU Lesser General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below,
refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification"). Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

   a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

   b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

   c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)
These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

   a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

   b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

   c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include
anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.
If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.
11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.
You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.
```

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

The Apache Software Foundation (http://www.apache.org/).

Apache License
Version 2.0, January 2004
TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
copyright license to reproduce, prepare Derivative Works of,
publicly display, publicly perform, sublicense, and distribute the
Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
   Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
   stating that You changed the files; and
(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

:Copyright: This document has been placed in the public domain.

Most of the files included in this project have been placed in the public domain.
public domain, and therefore have no license requirements and no restrictions on copying or usage; see the ‘Public Domain Dedication’ below. There are a few exceptions, listed below. Files in the Sandbox are not distributed with Docutils releases and may have different license terms.

Public Domain Dedication
========================

The persons who have associated their work with this project (the "Dedicator": David Goodger and the many contributors to the Docutils project) hereby dedicate the entire copyright, less the exceptions, listed below, in the work of authorship known as "Docutils" identified below (the "Work") to the public domain.

The primary repository for the Work is the Internet World Wide Web site <http://docutils.sourceforge.net/>. The Work consists of the files within the "docutils" module of the Docutils project Subversion repository (Internet host docutils.svn.sourceforge.net, filesystem path /svnroot/docutils), whose Internet web interface is located at <http://docutils.svn.sourceforge.net/viewvc/docutils/>. Files dedicated to the public domain may be identified by the inclusion, near the beginning of each file, of a declaration of the form:

Copyright: This document/module/DTD/stylesheet/file/etc. has been placed in the public domain.

Dedicator makes this dedication for the benefit of the public at large and to the detriment of Dedicator's heirs and successors. Dedicator intends this dedication to be an overt act of relinquishment in perpetuity of all present and future rights under copyright law, whether vested or contingent, in the Work. Dedicator understands that such relinquishment of all rights includes the relinquishment of all rights to enforce (by lawsuit or otherwise) those copyrights in the Work.

Dedicator recognizes that, once placed in the public domain, the Work may be freely reproduced, distributed, transmitted, used, modified, built upon, or otherwise exploited by anyone for any purpose, commercial or non-commercial, and in any way, including by methods that have not yet been invented or conceived.

(This dedication is derived from the text of the `Creative Commons Public Domain Dedication`. [#]_)

.. [#] Creative Commons has `retired this legal tool`__ and does not recommend that it be applied to works: This tool is based on United
States law and may not be applicable outside the US. For dedicating new works to the public domain, Creative Commons recommend the replacement Public Domain Dedication CC0 (CC zero, "No Rights Reserved"). So does the Free Software Foundation in its license-list.

GNU GENERAL PUBLIC LICENSE

Version 3, 29 June 2007

Copyright (C) 2007 Free Software Foundation, Inc. <http://fsf.org/>

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The GNU General Public License is a free, copyleft license for software and other kinds of works.

The licenses for most software and other practical works are designed to take away your freedom to share and change the works. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change all versions of a program--to make sure it remains free software for all its users. We, the Free Software Foundation, use the GNU General Public License for most of our software; it applies also to any other work released this way by its authors. You can apply it to your programs, too.
When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for them if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs, and that you know you can do these things.

To protect your rights, we need to prevent others from denying you these rights or asking you to surrender the rights. Therefore, you have certain responsibilities if you distribute copies of the software, or if you modify it: responsibilities to respect the freedom of others.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must pass on to the recipients the same freedoms that you received. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

Developers that use the GNU GPL protect your rights with two steps: (1) assert copyright on the software, and (2) offer you this License giving you legal permission to copy, distribute and/or modify it.

For the developers' and authors' protection, the GPL clearly explains that there is no warranty for this free software. For both users' and authors' sake, the GPL requires that modified versions be marked as changed, so that their problems will not be attributed erroneously to authors of previous versions.

Some devices are designed to deny users access to install or run modified versions of the software inside them, although the manufacturer can do so. This is fundamentally incompatible with the aim of protecting users' freedom to change the software. The systematic pattern of such abuse occurs in the area of products for individuals to use, which is precisely where it is most unacceptable. Therefore, we have designed this version of the GPL to prohibit the practice for those products. If such problems arise substantially in other domains, we stand ready to extend this provision to those domains in future versions of the GPL, as needed to protect the freedom of users.

Finally, every program is threatened constantly by software patents. States should not allow patents to restrict development and use of software on general-purpose computers, but in those that do, we wish to avoid the special danger that patents applied to a free program could make it effectively proprietary. To prevent this, the GPL assures that patents cannot be used to render the program non-free.

The precise terms and conditions for copying, distribution and
0. Definitions.

"This License" refers to version 3 of the GNU General Public License.

"Copyright" also means copyright-like laws that apply to other kinds of works, such as semiconductor masks.

"The Program" refers to any copyrightable work licensed under this License. Each licensee is addressed as "you". "Licensees" and "recipients" may be individuals or organizations.

To "modify" a work means to copy from or adapt all or part of the work in a fashion requiring copyright permission, other than the making of an exact copy. The resulting work is called a "modified version" of the earlier work or a work "based on" the earlier work.

A "covered work" means either the unmodified Program or a work based on the Program.

To "propagate" a work means to do anything with it that, without permission, would make you directly or secondarily liable for infringement under applicable copyright law, except executing it on a computer or modifying a private copy. Propagation includes copying, distribution (with or without modification), making available to the public, and in some countries other activities as well.

To "convey" a work means any kind of propagation that enables other parties to make or receive copies. Mere interaction with a user through a computer network, with no transfer of a copy, is not conveying.

An interactive user interface displays "Appropriate Legal Notices" to the extent that it includes a convenient and prominently visible feature that (1) displays an appropriate copyright notice, and (2) tells the user that there is no warranty for the work (except to the extent that warranties are provided), that licensees may convey the work under this License, and how to view a copy of this License. If the interface presents a list of user commands or options, such as a menu, a prominent item in the list meets this criterion.

The "source code" for a work means the preferred form of the work for making modifications to it. "Object code" means any non-source form of a work.
A "Standard Interface" means an interface that either is an official standard defined by a recognized standards body, or, in the case of interfaces specified for a particular programming language, one that is widely used among developers working in that language.

The "System Libraries" of an executable work include anything, other than the work as a whole, that (a) is included in the normal form of packaging a Major Component, but which is not part of that Major Component, and (b) serves only to enable use of the work with that Major Component, or to implement a Standard Interface for which an implementation is available to the public in source code form. A "Major Component", in this context, means a major essential component (kernel, window system, and so on) of the specific operating system (if any) on which the executable work runs, or a compiler used to produce the work, or an object code interpreter used to run it.

The "Corresponding Source" for a work in object code form means all the source code needed to generate, install, and (for an executable work) run the object code and to modify the work, including scripts to control those activities. However, it does not include the work's System Libraries, or general-purpose tools or generally available free programs which are used unmodified in performing those activities but which are not part of the work. For example, Corresponding Source includes interface definition files associated with source files for the work, and the source code for shared libraries and dynamically linked subprograms that the work is specifically designed to require, such as by intimate data communication or control flow between those subprograms and other parts of the work.

The Corresponding Source need not include anything that users can regenerate automatically from other parts of the Corresponding Source.

The Corresponding Source for a work in source code form is that same work.

2. Basic Permissions.

All rights granted under this License are granted for the term of copyright on the Program, and are irrevocable provided the stated conditions are met. This License explicitly affirms your unlimited permission to run the unmodified Program. The output from running a covered work is covered by this License only if the output, given its content, constitutes a covered work. This License acknowledges your rights of fair use or other equivalent, as provided by copyright law.

You may make, run and propagate covered works that you do not
convey, without conditions so long as your license otherwise remains in force. You may convey covered works to others for the sole purpose of having them make modifications exclusively for you, or provide you with facilities for running those works, provided that you comply with the terms of this License in conveying all material for which you do not control copyright. Those thus making or running the covered works for you must do so exclusively on your behalf, under your direction and control, on terms that prohibit them from making any copies of your copyrighted material outside their relationship with you.

Conveying under any other circumstances is permitted solely under the conditions stated below. Sublicensing is not allowed; section 10 makes it unnecessary.

3. Protecting Users' Legal Rights From Anti-Circumvention Law.

No covered work shall be deemed part of an effective technological measure under any applicable law fulfilling obligations under article 11 of the WIPO copyright treaty adopted on 20 December 1996, or similar laws prohibiting or restricting circumvention of such measures.

When you convey a covered work, you waive any legal power to forbid circumvention of technological measures to the extent such circumvention is effected by exercising rights under this License with respect to the covered work, and you disclaim any intention to limit operation or modification of the work as a means of enforcing, against the work's users, your or third parties' legal rights to forbid circumvention of technological measures.

You may convey verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice; keep intact all notices stating that this License and any non-permissive terms added in accord with section 7 apply to the code; keep intact all notices of the absence of any warranty; and give all recipients a copy of this License along with the Program.

You may charge any price or no price for each copy that you convey, and you may offer support or warranty protection for a fee.

5. Conveying Modified Source Versions.

You may convey a work based on the Program, or the modifications to produce it from the Program, in the form of source code under the terms of section 4, provided that you also meet all of these conditions:
a) The work must carry prominent notices stating that you modified it, and giving a relevant date.

b) The work must carry prominent notices stating that it is released under this License and any conditions added under section 7. This requirement modifies the requirement in section 4 to "keep intact all notices".

c) You must license the entire work, as a whole, under this License to anyone who comes into possession of a copy. This License will therefore apply, along with any applicable section 7 additional terms, to the whole of the work, and all its parts, regardless of how they are packaged. This License gives no permission to license the work in any other way, but it does not invalidate such permission if you have separately received it.

d) If the work has interactive user interfaces, each must display Appropriate Legal Notices; however, if the Program has interactive interfaces that do not display Appropriate Legal Notices, your work need not make them do so.

A compilation of a covered work with other separate and independent works, which are not by their nature extensions of the covered work, and which are not combined with it such as to form a larger program, in or on a volume of a storage or distribution medium, is called an "aggregate" if the compilation and its resulting copyright are not used to limit the access or legal rights of the compilation's users beyond what the individual works permit. Inclusion of a covered work in an aggregate does not cause this License to apply to the other parts of the aggregate.

6. Conveying Non-Source Forms.

You may convey a covered work in object code form under the terms of sections 4 and 5, provided that you also convey the machine-readable Corresponding Source under the terms of this License, in one of these ways:

a) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by the Corresponding Source fixed on a durable physical medium customarily used for software interchange.

b) Convey the object code in, or embodied in, a physical product (including a physical distribution medium), accompanied by a written offer, valid for at least three years and valid for as long as you offer spare parts or customer support for that product
model, to give anyone who possesses the object code either (1) a copy of the Corresponding Source for all the software in the product that is covered by this License, on a durable physical medium customarily used for software interchange, for a price no more than your reasonable cost of physically performing this conveying of source, or (2) access to copy the Corresponding Source from a network server at no charge.

c) Convey individual copies of the object code with a copy of the written offer to provide the Corresponding Source. This alternative is allowed only occasionally and noncommercially, and only if you received the object code with such an offer, in accord with subsection 6b.

d) Convey the object code by offering access from a designated place (gratis or for a charge), and offer equivalent access to the Corresponding Source in the same way through the same place at no further charge. You need not require recipients to copy the Corresponding Source along with the object code. If the place to copy the object code is a network server, the Corresponding Source may be on a different server (operated by you or a third party) that supports equivalent copying facilities, provided you maintain clear directions next to the object code saying where to find the Corresponding Source. Regardless of what server hosts the Corresponding Source, you remain obligated to ensure that it is available for as long as needed to satisfy these requirements.

e) Convey the object code using peer-to-peer transmission, provided you inform other peers where the object code and Corresponding Source of the work are being offered to the general public at no charge under subsection 6d.

A separable portion of the object code, whose source code is excluded from the Corresponding Source as a System Library, need not be included in conveying the object code work.

A "User Product" is either (1) a "consumer product", which means any tangible personal property which is normally used for personal, family, or household purposes, or (2) anything designed or sold for incorporation into a dwelling. In determining whether a product is a consumer product, doubtful cases shall be resolved in favor of coverage. For a particular product received by a particular user, "normally used" refers to a typical or common use of that class of product, regardless of the status of the particular user or of the way in which the particular user actually uses, or expects or is expected to use, the product. A product is a consumer product regardless of whether the product has substantial commercial, industrial or non-consumer uses, unless such uses represent the only significant mode of use of the product.
"Installation Information" for a User Product means any methods, procedures, authorization keys, or other information required to install and execute modified versions of a covered work in that User Product from a modified version of its Corresponding Source. The information must suffice to ensure that the continued functioning of the modified object code is in no case prevented or interfered with solely because modification has been made.

If you convey an object code work under this section in, or with, or specifically for use in, a User Product, and the conveying occurs as part of a transaction in which the right of possession and use of the User Product is transferred to the recipient in perpetuity or for a fixed term (regardless of how the transaction is characterized), the Corresponding Source conveyed under this section must be accompanied by the Installation Information. But this requirement does not apply if neither you nor any third party retains the ability to install modified object code on the User Product (for example, the work has been installed in ROM).

The requirement to provide Installation Information does not include a requirement to continue to provide support service, warranty, or updates for a work that has been modified or installed by the recipient, or for the User Product in which it has been modified or installed. Access to a network may be denied when the modification itself materially and adversely affects the operation of the network or violates the rules and protocols for communication across the network.

Corresponding Source conveyed, and Installation Information provided, in accord with this section must be in a format that is publicly documented (and with an implementation available to the public in source code form), and must require no special password or key for unpacking, reading or copying.

7. Additional Terms.

"Additional permissions" are terms that supplement the terms of this License by making exceptions from one or more of its conditions. Additional permissions that are applicable to the entire Program shall be treated as though they were included in this License, to the extent that they are valid under applicable law. If additional permissions apply only to part of the Program, that part may be used separately under those permissions, but the entire Program remains governed by this License without regard to the additional permissions.

When you convey a copy of a covered work, you may at your option remove any additional permissions from that copy, or from any part of it. (Additional permissions may be written to require their own
removal in certain cases when you modify the work.) You may place additional permissions on material, added by you to a covered work, for which you have or can give appropriate copyright permission.

Notwithstanding any other provision of this License, for material you add to a covered work, you may (if authorized by the copyright holders of that material) supplement the terms of this License with terms:

a) Disclaiming warranty or limiting liability differently from the terms of sections 15 and 16 of this License; or

b) Requiring preservation of specified reasonable legal notices or author attributions in that material or in the Appropriate Legal Notices displayed by works containing it; or

c) Prohibiting misrepresentation of the origin of that material, or requiring that modified versions of such material be marked in reasonable ways as different from the original version; or

d) Limiting the use for publicity purposes of names of licensors or authors of the material; or

e) Declining to grant rights under trademark law for use of some trade names, trademarks, or service marks; or

f) Requiring indemnification of licensors and authors of that material by anyone who conveys the material (or modified versions of it) with contractual assumptions of liability to the recipient, for any liability that these contractual assumptions directly impose on those licensors and authors.

All other non-permissive additional terms are considered “further restrictions” within the meaning of section 10. If the Program as you received it, or any part of it, contains a notice stating that it is governed by this License along with a term that is a further restriction, you may remove that term. If a license document contains a further restriction but permits relicensing or conveying under this License, you may add to a covered work material governed by the terms of that license document, provided that the further restriction does not survive such relicensing or conveying.

If you add terms to a covered work in accord with this section, you must place, in the relevant source files, a statement of the additional terms that apply to those files, or a notice indicating where to find the applicable terms.

Additional terms, permissive or non-permissive, may be stated in the form of a separately written license, or stated as exceptions;
the above requirements apply either way.

8. Termination.

You may not propagate or modify a covered work except as expressly provided under this License. Any attempt otherwise to propagate or modify it is void, and will automatically terminate your rights under this License (including any patent licenses granted under the third paragraph of section 11).

However, if you cease all violation of this License, then your license from a particular copyright holder is reinstated (a) provisionally, unless and until the copyright holder explicitly and finally terminates your license, and (b) permanently, if the copyright holder fails to notify you of the violation by some reasonable means prior to 60 days after the cessation.

Moreover, your license from a particular copyright holder is reinstated permanently if the copyright holder notifies you of the violation by some reasonable means, this is the first time you have received notice of violation of this License (for any work) from that copyright holder, and you cure the violation prior to 30 days after your receipt of the notice.

Termination of your rights under this section does not terminate the licenses of parties who have received copies or rights from you under this License. If your rights have been terminated and not permanently reinstated, you do not qualify to receive new licenses for the same material under section 10.

You are not required to accept this License in order to receive or run a copy of the Program. Ancillary propagation of a covered work occurring solely as a consequence of using peer-to-peer transmission to receive a copy likewise does not require acceptance. However, nothing other than this License grants you permission to propagate or modify any covered work. These actions infringe copyright if you do not accept this License. Therefore, by modifying or propagating a covered work, you indicate your acceptance of this License to do so.

10. Automatic Licensing of Downstream Recipients.

Each time you convey a covered work, the recipient automatically receives a license from the original licensors, to run, modify and propagate that work, subject to this License. You are not responsible for enforcing compliance by third parties with this License.
An "entity transaction" is a transaction transferring control of an organization, or substantially all assets of one, or subdividing an organization, or merging organizations. If propagation of a covered work results from an entity transaction, each party to that transaction who receives a copy of the work also receives whatever licenses to the work the party’s predecessor in interest had or could give under the previous paragraph, plus a right to possession of the Corresponding Source of the work from the predecessor in interest, if the predecessor has it or can get it with reasonable efforts.

You may not impose any further restrictions on the exercise of the rights granted or affirmed under this License. For example, you may not impose a license fee, royalty, or other charge for exercise of rights granted under this License, and you may not initiate litigation (including a cross-claim or counterclaim in a lawsuit) alleging that any patent claim is infringed by making, using, selling, offering for sale, or importing the Program or any portion of it.

11. Patents.

A "contributor" is a copyright holder who authorizes use under this License of the Program or a work on which the Program is based. The work thus licensed is called the contributor's "contributor version".

A contributor's "essential patent claims" are all patent claims owned or controlled by the contributor, whether already acquired or hereafter acquired, that would be infringed by some manner, permitted by this License, of making, using, or selling its contributor version, but do not include claims that would be infringed only as a consequence of further modification of the contributor version. For purposes of this definition, "control" includes the right to grant patent sublicenses in a manner consistent with the requirements of this License.

Each contributor grants you a non-exclusive, worldwide, royalty-free patent license under the contributor's essential patent claims, to make, use, sell, offer for sale, import and otherwise run, modify and propagate the contents of its contributor version.

In the following three paragraphs, a "patent license" is any express agreement or commitment, however denominated, not to enforce a patent (such as an express permission to practice a patent or covenant not to sue for patent infringement). To "grant" such a patent license to a party means to make such an agreement or commitment not to enforce a patent against the party.

If you convey a covered work, knowingly relying on a patent license, and the Corresponding Source of the work is not available for anyone
to copy, free of charge and under the terms of this License, through a publicly available network server or other readily accessible means, then you must either (1) cause the Corresponding Source to be so available, or (2) arrange to deprive yourself of the benefit of the patent license for this particular work, or (3) arrange, in a manner consistent with the requirements of this License, to extend the patent license to downstream recipients. "Knowingly relying" means you have actual knowledge that, but for the patent license, your conveying the covered work in a country, or your recipient's use of the covered work in a country, would infringe one or more identifiable patents in that country that you have reason to believe are valid.

If, pursuant to or in connection with a single transaction or arrangement, you convey, or propagate by procuring conveyance of, a covered work, and grant a patent license to some of the parties receiving the covered work authorizing them to use, propagate, modify or convey a specific copy of the covered work, then the patent license you grant is automatically extended to all recipients of the covered work and works based on it.

A patent license is "discriminatory" if it does not include within the scope of its coverage, prohibits the exercise of, or is conditioned on the non-exercise of one or more of the rights that are specifically granted under this License. You may not convey a covered work if you are a party to an arrangement with a third party that is in the business of distributing software, under which you make payment to the third party based on the extent of your activity of conveying the work, and under which the third party grants, to any of the parties who would receive the covered work from you, a discriminatory patent license (a) in connection with copies of the covered work conveyed by you (or copies made from those copies), or (b) primarily for and in connection with specific products or compilations that contain the covered work, unless you entered into that arrangement, or that patent license was granted, prior to 28 March 2007.

Nothing in this License shall be construed as excluding or limiting any implied license or other defenses to infringement that may otherwise be available to you under applicable patent law.

If conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot convey a covered work so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not convey it at all. For example, if you agree to terms that obligate you to collect a royalty for further conveying from those to whom you convey
the Program, the only way you could satisfy both those terms and this License would be to refrain entirely from conveying the Program.

13. Use with the GNU Affero General Public License.

Notwithstanding any other provision of this License, you have permission to link or combine any covered work with a work licensed under version 3 of the GNU Affero General Public License into a single combined work, and to convey the resulting work. The terms of this License will continue to apply to the part which is the covered work, but the special requirements of the GNU Affero General Public License, section 13, concerning interaction through a network will apply to the combination as such.

14. Revised Versions of this License.

The Free Software Foundation may publish revised and/or new versions of the GNU General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies that a certain numbered version of the GNU General Public License "or any later version" applies to it, you have the option of following the terms and conditions either of that numbered version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of the GNU General Public License, you may choose any version ever published by the Free Software Foundation.

If the Program specifies that a proxy can decide which future versions of the GNU General Public License can be used, that proxy's public statement of acceptance of a version permanently authorizes you to choose that version for the Program.

Later license versions may give you additional or different permissions. However, no additional obligations are imposed on any author or copyright holder as a result of your choosing to follow a later version.

15. Disclaimer of Warranty.

THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM...
IS WITH YOU.  SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

16. Limitation of Liability.

IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MODIFIES AND/OR CONVEYS THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

17. Interpretation of Sections 15 and 16.

If the disclaimer of warranty and limitation of liability provided above cannot be given local legal effect according to their terms, reviewing courts shall apply local law that most closely approximates an absolute waiver of all civil liability in connection with the Program, unless a warranty or assumption of liability accompanies a copy of the Program in return for a fee.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively state the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year> <name of author>

This program is free software: you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation, either version 3 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program. If not, see <http://www.gnu.org/licenses/>.

Also add information on how to contact you by electronic and paper mail.

If the program does terminal interaction, make it output a short notice like this when it starts in an interactive mode:

<program> Copyright (C) <year> <name of author>
This program comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, your program's commands might be different; for a GUI interface, you would use an "about box".

You should also get your employer (if you work as a programmer) or school, if any, to sign a "copyright disclaimer" for the program, if necessary.
For more information on this, and how to apply and follow the GNU GPL, see <http://www.gnu.org/licenses/>.

The GNU General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License. But first, please read <http://www.gnu.org/philosophy/why-not-lgpl.html>.

A. HISTORY OF THE SOFTWARE
================================

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI) in the Netherlands as a successor of a language called ABC. Guido is Python's principal author, although it includes many contributions from others. The last version released from CWI was Python 1.2. In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI) in Reston, Virginia where he released several versions of the software. Python 1.6 was the last of the versions released by CNRI. In 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. Python 2.0 was the first and only release from BeOpen.com.

Following the release of Python 1.6, and after Guido van Rossum left CNRI to work with commercial software developers, it became clear that the ability to use Python with software available under the GNU Public...
License (GPL) was very desirable. CNRI and the Free Software Foundation (FSF) interacted to develop enabling wording changes to the Python license. Python 1.6.1 is essentially the same as Python 1.6, with a few minor bug fixes, and with a different license that enables later versions to be GPL-compatible. Python 2.1 is a derivative work of Python 1.6.1, as well as of Python 2.0.

After Python 2.0 was released by BeOpen.com, Guido van Rossum and the other PythonLabs developers joined Digital Creations. All intellectual property added from this point on, starting with Python 2.1 and its alpha and beta releases, is owned by the Python Software Foundation (PSF), a non-profit modeled after the Apache Software Foundation. See http://www.python.org/psf/ for more information about the PSF.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

PSF LICENSE AGREEMENT

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 2.1.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, PSF hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 2.1.1 alone or in any derivative version, provided, however, that PSF's License Agreement and PSF's notice of copyright, i.e., "Copyright (c) 2001 Python Software Foundation; All Rights Reserved" are retained in Python 2.1.1 alone or in any derivative version prepared by Licensee.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 2.1.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 2.1.1.

4. PSF is making Python 2.1.1 available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND
DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 2.1.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 2.1.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 2.1.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python 2.1.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM TERMS AND CONDITIONS FOR PYTHON 2.0
----------------------------------------------
BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.

3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.
4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at http://www.pythonlabs.com/logos.html may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI OPEN SOURCE GPL-COMPATIBLE LICENSE AGREEMENT
-------------------------------------------------

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This
Agreement may also be obtained from a proxy server on the Internet using the following URL: http://hdl.handle.net/1895.22/1013”.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the
Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and
You must cause any modified files to carry prominent notices stating that You changed the files; and
You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and where such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an
addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).
"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate.
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

---------------------------------------------

This program is linked with and uses Microsoft Distributable Code, copyrighted by Microsoft Corporation. The Microsoft Distributable Code is embedded in each .exe, .dll and .pyd file as a result of running the code through a linker.

If you further distribute programs that include the Microsoft Distributable Code, you must comply with the restrictions on distribution specified by Microsoft. In particular, you must require distributors and external end users to agree to terms that protect the Microsoft Distributable Code at least as much as Microsoft's own requirements for the Distributable Code. See Microsoft's documentation (included in its developer tools and on its website at microsoft.com) for specific details.

Redistribution of the Windows binary build of the Python interpreter complies with this agreement, provided that you do not:

- alter any copyright, trademark or patent notice in Microsoft's Distributable Code;

- use Microsoft's trademarks in your programs' names or in a way that suggests your programs come from or are endorsed by Microsoft;

- distribute Microsoft's Distributable Code to run on a platform other than Microsoft operating systems, run-time technologies or application platforms; or

- include Microsoft Distributable Code in malicious, deceptive or unlawful programs.

These restrictions apply only to the Microsoft Distributable Code as defined above, not to Python itself or any programs running on the Python interpreter. The redistribution of the Python interpreter and libraries is governed by the Python Software License included with this file, or by other licenses as marked.

This license applies to the bootstrapper application that is embedded within the installer. It has no impact on the licensing for the rest of the installer or Python itself, as no code covered by this license exists in any other part of the product.

---

Microsoft Reciprocal License (MS-RL)

This license governs use of the accompanying software. If you use the software, you accept this license. If you do not accept the license, do not use the software.

1. Definitions
The terms "reproduce," "reproduction," "derivative works," and "distribution" have the same meaning here as under U.S. copyright law.
A "contribution" is the original software, or any additions or changes to the software.
A "contributor" is any person that distributes its contribution under this license.
"Licensed patents" are a contributor's patent claims that read directly on its contribution.

2. Grant of Rights
(A) Copyright Grant- Subject to the terms of this license, including the license conditions and limitations in section 3, each contributor grants you a non-exclusive, worldwide, royalty-free copyright license to reproduce its contribution, prepare derivative works of its contribution, and distribute its contribution or any derivative works that you create.
(B) Patent Grant- Subject to the terms of this license, including the license conditions and limitations in section 3, each contributor grants you a non-exclusive, worldwide, royalty-free license under its licensed patents to make, have made, use, sell, offer for sale, import, and/or otherwise dispose of its contribution in the software or derivative works of the contribution in the software.

3. Conditions and Limitations
(A) Reciprocal Grants- For any file you distribute that contains code from the software (in source code or binary format), you must provide recipients the source code to that file along with a copy of this license, which license will
govern that file. You may license other files that are entirely your own work and do not contain code from the software under any terms you choose.

(B) No Trademark License- This license does not grant you rights to use any contributors’ name, logo, or trademarks.

(C) If you bring a patent claim against any contributor over patents that you claim are infringed by the software, your patent license from such contributor to the software ends automatically.

(D) If you distribute any portion of the software, you must retain all copyright, patent, trademark, and attribution notices that are present in the software.

(E) If you distribute any portion of the software in source code form, you may do so only under this license by including a complete copy of this license with your distribution. If you distribute any portion of the software in compiled or object code form, you may only do so under a license that complies with this license.

(F) The software is licensed “as-is.” You bear the risk of using it. The contributors give no express warranties, guarantees or conditions. You may have additional consumer rights under your local laws which this license cannot change. To the extent permitted under your local laws, the contributors exclude the implied warranties of merchantability, fitness for a particular purpose and non-infringement.

A. HISTORY OF THE SOFTWARE

Python was created in the early 1990s by Guido van Rossum at Stichting Mathematisch Centrum (CWI, see http://www.cwi.nl) in the Netherlands as a successor of a language called ABC. Guido remains Python’s principal author, although it includes many contributions from others.

In 1995, Guido continued his work on Python at the Corporation for National Research Initiatives (CNRI, see http://www.cnri.reston.va.us) in Reston, Virginia where he released several versions of the software.

In May 2000, Guido and the Python core development team moved to BeOpen.com to form the BeOpen PythonLabs team. In October of the same year, the PythonLabs team moved to Digital Creations, which became Zope Corporation. In 2001, the Python Software Foundation (PSF, see https://www.python.org/psf/) was formed, a non-profit organization created specifically to own Python-related Intellectual Property. Zope Corporation was a sponsoring member of the PSF.

All Python releases are Open Source (see http://www.opensource.org for the Open Source Definition). Historically, most, but not all, Python releases have also been GPL-compatible; the table below summarizes the various releases.

<table>
<thead>
<tr>
<th>Release</th>
<th>Derived from</th>
<th>Year</th>
<th>Owner</th>
<th>GPL-compatible?</th>
</tr>
</thead>
<tbody>
<tr>
<td>0.9.0 thru 1.2</td>
<td>1991-1995</td>
<td>CWI</td>

<td></td>
</tr>
<tr>
<td>1.3 thru 1.5.2</td>
<td>1.2</td>
<td>1995-1999</td>
<td>CNRI</td>
<td>yes</td>
</tr>
<tr>
<td>1.6</td>
<td>1.5.2</td>
<td>2000</td>
<td>CNRI</td>
<td>no</td>
</tr>
<tr>
<td>2.0</td>
<td>1.6</td>
<td>2000</td>
<td>BeOpen.com</td>
<td>no</td>
</tr>
</tbody>
</table>
Footnotes:

(1) GPL-compatible doesn't mean that we're distributing Python under the GPL. All Python licenses, unlike the GPL, let you distribute a modified version without making your changes open source. The GPL-compatible licenses make it possible to combine Python with other software that is released under the GPL; the others don't.

(2) According to Richard Stallman, 1.6.1 is not GPL-compatible, because its license has a choice of law clause. According to CNRI, however, Stallman's lawyer has told CNRI's lawyer that 1.6.1 is "not incompatible" with the GPL.

Thanks to the many outside volunteers who have worked under Guido's direction to make these releases possible.

B. TERMS AND CONDITIONS FOR ACCESSING OR OTHERWISE USING PYTHON

PYTHON SOFTWARE FOUNDATION LICENSE VERSION 2

1. This LICENSE AGREEMENT is between the Python Software Foundation ("PSF"), and the Individual or Organization ("Licensee") accessing and otherwise using this software ("Python") in source or binary form and its associated documentation.

3. In the event Licensee prepares a derivative work that is based on or incorporates Python or any part thereof, and wants to make
the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python.

4. PSF is making Python available to Licensee on an "AS IS" basis. PSF MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, PSF MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. PSF SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between PSF and Licensee. This License Agreement does not grant permission to use PSF trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.

8. By copying, installing or otherwise using Python, Licensee agrees to be bound by the terms and conditions of this License Agreement.

BEOPEN.COM LICENSE AGREEMENT FOR PYTHON 2.0
-------------------------------------------

BEOPEN PYTHON OPEN SOURCE LICENSE AGREEMENT VERSION 1

1. This LICENSE AGREEMENT is between BeOpen.com ("BeOpen"), having an office at 160 Saratoga Avenue, Santa Clara, CA 95051, and the Individual or Organization ("Licensee") accessing and otherwise using this software in source or binary form and its associated documentation ("the Software").

2. Subject to the terms and conditions of this BeOpen Python License Agreement, BeOpen hereby grants Licensee a non-exclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use the Software alone or in any derivative version, provided, however, that the BeOpen Python License is retained in the Software, alone or in any derivative version prepared by Licensee.
3. BeOpen is making the Software available to Licensee on an "AS IS" basis. BEOPEN MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, BEOPEN MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF THE SOFTWARE WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

4. BEOPEN SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF THE SOFTWARE FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF USING, MODIFYING OR DISTRIBUTING THE SOFTWARE, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

5. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

6. This License Agreement shall be governed by and interpreted in all respects by the law of the State of California, excluding conflict of law provisions. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between BeOpen and Licensee. This License Agreement does not grant permission to use BeOpen trademarks or trade names in a trademark sense to endorse or promote products or services of Licensee, or any third party. As an exception, the "BeOpen Python" logos available at http://www.pythonlabs.com/logos.html may be used according to the permissions granted on that web page.

7. By copying, installing or otherwise using the software, Licensee agrees to be bound by the terms and conditions of this License Agreement.

CNRI LICENSE AGREEMENT FOR PYTHON 1.6.1
---------------------------------------

1. This LICENSE AGREEMENT is between the Corporation for National Research Initiatives, having an office at 1895 Preston White Drive, Reston, VA 20191 ("CNRI"), and the Individual or Organization ("Licensee") accessing and otherwise using Python 1.6.1 software in source or binary form and its associated documentation.

2. Subject to the terms and conditions of this License Agreement, CNRI hereby grants Licensee a nonexclusive, royalty-free, world-wide license to reproduce, analyze, test, perform and/or display publicly, prepare derivative works, distribute, and otherwise use Python 1.6.1 alone or in any derivative version, provided, however, that CNRI's License Agreement and CNRI's notice of copyright, i.e., "Copyright (c) 1995-2001 Corporation for National Research Initiatives; All Rights
Reserved" are retained in Python 1.6.1 alone or in any derivative version prepared by Licensee. Alternately, in lieu of CNRI's License Agreement, Licensee may substitute the following text (omitting the quotes): "Python 1.6.1 is made available subject to the terms and conditions in CNRI's License Agreement. This Agreement together with Python 1.6.1 may be located on the Internet using the following unique, persistent identifier (known as a handle): 1895.22/1013. This Agreement may also be obtained from a proxy server on the Internet using the following URL: http://hdl.handle.net/1895.22/1013".

3. In the event Licensee prepares a derivative work that is based on or incorporates Python 1.6.1 or any part thereof, and wants to make the derivative work available to others as provided herein, then Licensee hereby agrees to include in any such work a brief summary of the changes made to Python 1.6.1.

4. CNRI is making Python 1.6.1 available to Licensee on an "AS IS" basis. CNRI MAKES NO REPRESENTATIONS OR WARRANTIES, EXPRESS OR IMPLIED. BY WAY OF EXAMPLE, BUT NOT LIMITATION, CNRI MAKES NO AND DISCLAIMS ANY REPRESENTATION OR WARRANTY OF MERCHANTABILITY OR FITNESS FOR ANY PARTICULAR PURPOSE OR THAT THE USE OF PYTHON 1.6.1 WILL NOT INFRINGE ANY THIRD PARTY RIGHTS.

5. CNRI SHALL NOT BE LIABLE TO LICENSEE OR ANY OTHER USERS OF PYTHON 1.6.1 FOR ANY INCIDENTAL, SPECIAL, OR CONSEQUENTIAL DAMAGES OR LOSS AS A RESULT OF MODIFYING, DISTRIBUTING, OR OTHERWISE USING PYTHON 1.6.1, OR ANY DERIVATIVE THEREOF, EVEN IF ADVISED OF THE POSSIBILITY THEREOF.

6. This License Agreement will automatically terminate upon a material breach of its terms and conditions.

7. This License Agreement shall be governed by the federal intellectual property law of the United States, including without limitation the federal copyright law, and, to the extent such U.S. federal law does not apply, by the law of the Commonwealth of Virginia, excluding Virginia's conflict of law provisions. Notwithstanding the foregoing, with regard to derivative works based on Python 1.6.1 that incorporate non-separable material that was previously distributed under the GNU General Public License (GPL), the law of the Commonwealth of Virginia shall govern this License Agreement only as to issues arising under or with respect to Paragraphs 4, 5, and 7 of this License Agreement. Nothing in this License Agreement shall be deemed to create any relationship of agency, partnership, or joint venture between CNRI and Licensee. This License Agreement does not grant permission to use CNRI trademarks or trade name in a trademark sense to endorse or promote products or services of Licensee, or any third party.
8. By clicking on the "ACCEPT" button where indicated, or by copying, installing or otherwise using Python 1.6.1, Licensee agrees to be bound by the terms and conditions of this License Agreement.

ACCEPT

CWI LICENSE AGREEMENT FOR PYTHON 0.9.0 THROUGH 1.2

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the
editorial revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
copyright license to reproduce, prepare Derivative Works of,
publicly display, publicly perform, sublicense, and distribute the
Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of
this License, each Contributor hereby grants to You a perpetual,
worldwide, non-exclusive, no-charge, royalty-free, irrevocable
(except as stated in this section) patent license to make, have made,
use, offer to sell, sell, import, and otherwise transfer the Work,
where such license applies only to those patent claims licensable
by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s)
with the Work to which such Contribution(s) was submitted. If You
institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work
or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
   Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
   stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
   that You distribute, all copyright, patent, trademark, and
   attribution notices from the Source form of the Work,
   excluding those notices that do not pertain to any part of
   the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
   distribution, then any Derivative Works that You distribute must
   include a readable copy of the attribution notices contained
   within such NOTICE file, excluding those notices that do not
   pertain to any part of the Derivative Works, in at least one
   of the following places: within a NOTICE text file distributed
   as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of Your accepting any such warranty or additional liability.
APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

1. Definitions.

1.1. Contributor. means each individual or entity that creates or contributes to the creation of Modifications.

1.2. Contributor Version. means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. Covered Software. means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. Executable. means the Covered Software in any form other than Source Code.

1.5. Initial Developer. means the individual or entity that first makes Original Software available under this License.

1.6. Larger Work. means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. License. means this document.

1.8. Licensable. means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. Modifications. means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;
B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. Original Software. means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. Patent Claims. means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. Source Code. means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. You. (or Your.) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, You includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, control means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the
Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted:
(1) for code that You delete from the Original Software, or (2) for
infringements caused by: (i) the modification of the Original
Software, or (ii) the combination of the Original Software with
other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third
party intellectual property claims, each Contributor hereby grants You a
world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark)
Licensable by Contributor to use, reproduce, modify, display,
perform, sublicense and distribute the Modifications created by such
Contributor (or portions thereof), either on an unmodified basis,
with other Modifications, as Covered Software and/or as part of a
Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of
Modifications made by that Contributor either alone and/or in
combination with its Contributor Version (or portions of such
combination), to make, use, sell, offer for sale, have made, and/or
otherwise dispose of: (1) Modifications made by that Contributor (or
portions thereof); and (2) the combination of Modifications made by
that Contributor with its Contributor Version (or portions of such
combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on
the date Contributor first distributes or otherwise makes the
Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted:
(1) for any code that Contributor has deleted from the Contributor
Version; (2) for infringements caused by: (i) third party
modifications of Contributor Version, or (ii) the combination of
Modifications made by that Contributor with other software (except
as part of the Contributor Version) or other devices; or (3) under
Patent Claims infringed by Covered Software in the absence of
Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.
Any Covered Software that You distribute or otherwise make available in
Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.
The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.
You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.
You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.
You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.
You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.
Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.
You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.
When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN „AS IS„ BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED
6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as Participant) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY’S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.
8. U.S. GOVERNMENT END USERS.

The Covered Software is a commercial item, as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of commercial computer software. As that term is defined at 48 C.F.R. 252.227-7014(a)(1) and commercial computer software documentation. as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys, fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State
of California (excluding conflict-of-law provisions). Any litigation relating
to this License shall be subject to the jurisdiction of the Federal Courts of
the Northern District of California and the state courts of the State of
California, with venue lying in Santa Clara County, California.

1.1358.1 Available under license:

==============================
Authlib - Terms and conditions
==============================

1. **Preamble**: 

This Agreement governs the relationship between "YOU" (hereinafter: Licensee) and Hsiaoming Yang (hereinafter: Licensor). This Agreement sets the terms, rights, restrictions and obligations on using Authlib (hereinafter: The Software) created and owned by Licensor, as detailed herein

2. **License Grant**: 

Licensor hereby grants Licensee a Personal, Non-assignable & non-transferable, Commercial, Royalty free, Including the rights to create but not distribute derivative works, Non-exclusive license, all with accordance with the terms set forth and other legal restrictions set forth in 3rd party software used while running Software.

2.1. **Limited**: Licensee may use Software for the purpose of:

2.1.1. Running Software on Licensees Website[s] and Server[s];
2.1.2. Modify Software to suit Licensees needs and specifications.

2.2. **Non Assignable & Non-Transferable**: Licensee may not assign or transfer
his rights and duties under this license.

2.3. **Commercial, Royalty Free**: Licensee may use Software for any purpose, including paid-services, without any royalties

2.4. **Including the Right to Create Derivative Works**: Licensee may create derivative works based on Software, including amending Softwares source code, modifying it, integrating it into a larger work or removing portions of Software, as long as no distribution of the derivative works is made

3. **Term & Termination**: The Term of this license shall be until terminated. Licensor may terminate this Agreement, including Licensees license in the case where Licensee:

3.1. became insolvent or otherwise entered into any liquidation process;
3.2. exported The Software to any jurisdiction where licensor may not enforce his rights under this agreements in;
3.3. Licensee was in breach of any of this license's terms and conditions and such breach was not cured, immediately upon notification;
3.4. Licensee in breach of any of the terms of clause 2 to this license;
3.5. Licensee otherwise entered into any arrangement which caused Licensor to be unable to enforce his rights under this License.

4. **Payment**: In consideration of the License granted under clause 2, Licensee shall pay Licensor a fee, via Credit-Card, PayPal or any other mean which Licensor may deem adequate. Failure to perform payment shall construe as material breach of this Agreement.

5. **Upgrades, Updates and Fixes**:

Licensor may provide Licensee, from time to time, with Upgrades, Updates or Fixes, as detailed herein and according to his sole discretion. Licensee hereby warrants to keep The Software up-to-date and install all relevant updates and fixes. Licensor shall provide any update or Fix free of charge; however, nothing in this Agreement shall require Licensor to provide Updates or Fixes.

5.1. **Upgrades**: for the purpose of this license, an Upgrade shall be a material amendment in The Software, which contains new features and or major performance improvements and shall be marked as a new version number. For example, The Software under version 1.X.X, an upgrade shall commence under number 2.0.0.
5.2. **Updates**: for the purpose of this license, an update shall be a minor amendment in The Software, which may contain new features or minor improvements and shall be marked as a new sub-version number. For
example, The Software under version 1.1.X, an upgrade shall commence under number 1.2.0.

5.3. **Fix**: for the purpose of this license, a fix shall be a minor amendment in The Software, intended to remove bugs or alter minor features which impair the The Software's functionality. A fix shall be marked as a new sub-sub-version number. For example, Software under version 1.1.1, an upgrade shall commence under number 1.1.2.

6. **Support**:

Software is provided under an AS-IS basis and without any support, updates or maintenance. Nothing in this Agreement shall require Licensor to provide Licensee with support or fixes to any bug, failure, mis-performance or other defect in The Software.

6.1. **Bug Notification**: Licensee may provide Licensor of details regarding any bug, defect or failure in The Software promptly and with no delay from such event; Licensee shall comply with Licensor's request for information regarding bugs, defects or failures and furnish him with information, screenshots and try to reproduce such bugs, defects or failures.

6.2. **Feature Request**: Licensee may request additional features in Software, provided, however, that
   (i) Licensee shall waive any claim or right in such feature should feature be developed by Licensor;
   (ii) Licensee shall be prohibited from developing the feature, or disclose such feature request, or feature, to any 3rd party directly competing with Licensor or any 3rd party which may be, following the development of such feature, in direct competition with Licensor;
   (iii) Licensee warrants that feature does not infringe any 3rd party patent, trademark, trade-secret or any other intellectual property right; and
   (iv) Licensee developed, envisioned or created the feature solely by himself.

7. **Liability**: 

To the extent permitted under Law, The Software is provided under an AS-IS basis. Licensor shall never, and without any limit, be liable for any damage, cost, expense or any other payment incurred by Licensee as a result of Software's actions, failure, bugs and/or any other interaction between The Software and Licensees end-equipment, computers, other software or any 3rd party, end-equipment, computer or services. Moreover, Licensor shall never be liable for any defect in source code written by Licensee when relying on The Software or using The Software's source code.

8. **Warranty**: 

8.1. **Intellectual Property**: Licensor hereby warrants that The Software does not violate or infringe any 3rd party claims in regards to intellectual property, patents and/or trademarks and that to the best
of its knowledge no legal action has been taken against it for any infringement or violation of any 3rd party intellectual property rights.

8.2. **No-Warranty**: The Software is provided without any warranty; Licensor hereby disclaims any warranty that The Software shall be error free, without defects or code which may cause damage to Licensees computers or to Licensee, and that Software shall be functional. Licensee shall be solely liable to any damage, defect or loss incurred as a result of operating software and undertake the risks contained in running The Software on Licenses Server[s] and Website[s].

8.3. **Prior Inspection**: Licensee hereby states that he inspected The Software thoroughly and found it satisfactory and adequate to his needs, that it does not interfere with his regular operation and that it does meet the standards and scope of his computer systems and architecture. Licensee found that The Software interacts with his development, website and server environment and that it does not infringe any of End User License Agreement of any software Licensee may use in performing his services. Licensee hereby waives any claims regarding The Software's incompatibility, performance, results and features, and warrants that he inspected the The Software.

9. **No Refunds**: 

Licensee warrants that he inspected The Software according to above clauses and that it is adequate to his needs. Accordingly, as The Software is intangible goods, Licensee shall not be, ever, entitled to any refund, rebate, compensation or restitution for any reason whatsoever, even if The Software contains material flaws.

10. **Indemnification**: 

Licensee hereby warrants to hold Licensor harmless and indemnify Licensor for any lawsuit brought against it in regards to Licensees use of The Software in means that violate, breach or otherwise circumvent this license, Licensor's intellectual property rights or Licensor's title in The Software. Licensor shall promptly notify Licensee in case of such legal action and request Licensees consent prior to any settlement in relation to such lawsuit or claim.

11. **Governing Law, Jurisdiction**: 

Licensee hereby agrees not to initiate class-action lawsuits against Licensor in relation to this license and to compensate Licensor for any legal fees, cost or attorney fees should any claim brought by Licensee against Licensor be denied, in part or in full.

Apache License
Version 2.0, January 2004
http://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the
editorial revisions, annotations, elaborations, or other modifications
represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain
separable from, or merely link (or bind by name) to the interfaces of,
the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including
the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally
submitted to Licensor for inclusion in the Work by the copyright owner
or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent
to the Licensor or its representatives, including but not limited to
communication on electronic mailing lists, source code control systems,
and issue tracking systems that are managed by, or on behalf of, the
Licensor for the purpose of discussing and improving the Work, but
excluding communication that is conspicuously marked or otherwise
designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity
on behalf of whom a Contribution has been received by Licensor and
subsequently incorporated within the Work.
2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

   (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

   (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

   (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

   (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct
or contributory patent infringement, then any patent licenses
granted to You under this License for that Work shall terminate
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the
Work or Derivative Works thereof in any medium, with or without
modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or
    Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices
    stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works
    that You distribute, all copyright, patent, trademark, and
    attribution notices from the Source form of the Work,
    excluding those notices that do not pertain to any part of
    the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following
boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

----------------------------------
ANTLR 2 License

ANTLR 2 License

We reserve no legal rights to the ANTLR--it is fully in the public domain. An individual or company may do whatever they wish with source code distributed with ANTLR or the code generated by ANTLR, including the incorporation of ANTLR, or its output, into commercial software.

We encourage users to develop software with ANTLR. However, we do ask that credit is given to us for developing ANTLR. By "credit", we mean that if you use ANTLR or incorporate any source code into one of your programs (commercial product, research project, or otherwise) that you acknowledge this fact somewhere in the documentation, research report, etc... If you like ANTLR and have developed a nice tool with the output, please mention that you developed it using ANTLR. In addition, we ask that the headers remain intact in our source code. As long as these guidelines are kept, we expect to continue enhancing this system and expect to make other tools available as they are completed.

   TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.
"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a
cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a “NOTICE” text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.
To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted"
means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and
attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of
the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its
distribution, then any Derivative Works that You distribute must
include a readable copy of the attribution notices contained
within such NOTICE file, excluding those notices that do not
pertain to any part of the Derivative Works, in at least one
of the following places: within a NOTICE text file distributed
as part of the Derivative Works; within the Source form or
documentation, if provided along with the Derivative Works; or,
within a display generated by the Derivative Works, if and
wherever such third-party notices normally appear. The contents
of the NOTICE file are for informational purposes only and
do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTicular PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
675 Mass Ave, Cambridge, MA 02139, USA
Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain
that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and
distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections
1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.
6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.
9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs
If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy  <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.
This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.
2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

   You must give any other recipients of the Work or Derivative Works a copy of this License; and

   You must cause any modified files to carry prominent notices stating that You changed the files; and

   You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

   If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

   You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and
reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.
"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of,
publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution
notices within Derivative Works that You distribute, alongside
or as an addendum to the NOTICE text from the Work, provided
that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and
may provide additional or different license terms and conditions
for use, reproduction, or distribution of Your modifications, or
for any such Derivative Works as a whole, provided Your use,
reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise,
any Contribution intentionally submitted for inclusion in the Work
by You to the Licensor shall be under the terms and conditions of
this License, without any additional terms or conditions.
Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade
names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the
origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or
agreed to in writing, Licensor provides the Work (and each
Contributor provides its Contributions) on an "AS IS" BASIS,
WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or
implied, including, without limitation, any warranties or conditions
of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the
appropriateness of using or redistributing the Work and assume any
risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,
whether in tort (including negligence), contract, or otherwise,
unless required by applicable law (such as deliberate and grossly
negligent acts) or agreed to in writing, shall any Contributor be
liable to You for damages, including any direct, indirect, special,
incidental, or consequential damages of any character arising as a
result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill,
work stoppage, computer failure or malfunction, or any and all
other commercial damages or losses), even if such Contributor
has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing
the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

 * The following example shows a class constructor that specifies a custom provider of a dependency using the parameter decorator.
 * @param {**} * Parameter decorator on a dependency parameter of a class constructor. * that specifies a custom provider of the dependency.
 */
the provider.

```typescript
* <code-example path="core/di/ts/metadata_spec.ts" region="InjectWithoutDecorator">*  
</code-example>* @see [\'Dependency Injection Guide\'][guide/dependency-injection]* * Type of the Inject metadata. * @publicApi *
*foreach interface Inject { A [DI token](guide/glossary#di-token) that maps to the dependency to be injected.* * An* token: any; any* new(token: any): Inject; void* ** * Type of the Optional metadata. * @publicApi *
*foreach interface OptionalDecoraror { * Parameter decorator to be used on constructor parameters, * which marks the parameter as being an optional dependency.* * The DI framework provides null if the dependency is not found.* Can be used together with other decorators that modify how dependency injection operates.* * @usageNotes *
* @publicApi *
* The following code allows the possibility of a null result:* * <code-example path="core/di/ts/metadata_spec.ts" region="Optional">
* </code-example>* @see [\'Dependency Injection Guide\'][guide/dependency-injection].* * Type of the `SkipSelf` decorator / constructor function.* * The `SkipSelf` decorator / constructor function is used to start dependency resolution from the local injector.* * which tells the DI framework to start dependency resolution from the local injector.* * Resolution works upward through the injector hierarchy, so the children of this class must configure their own providers or be prepared for a null result.* * In the following example, the dependency can be resolved* * by the local injector when instantiating the class itself, but not when instantiating a child.* * The following example shows how resolution works upward through the injector hierarchy, so the local injector is not checked for a provider.* * In the following example, the dependency can be resolved when instantiating a child, but not when instantiating the class itself.* * For an extended example, see [\'Dependency Injection Guide\'][guide/dependency-injection-in-action#skip].* * Type of the `Host` decorator / constructor function.* * Parameter decorator to be used on constructor parameters, * which tells the DI framework to start dependency resolution from the parent injector.* * Resolution works upward through the injector hierarchy, so the local injector is not checked for a provider.* * The following shows use with the `Optional` decorator, and allows for a null result.* * For an extended example, see [\'Dependency Injection Guide\'][guide/dependency-injection-in-action#optional].* * For a directive that designates a host-element attribute whose value is injected as a constant string literal.* * Suppose we have an `input` element and want to know its `type`.* * The following example uses
the decorator to inject the string literal `text` in a directive.

```typescript
@Attribute
new(name: string): any;
```

```typescript
AttributeDecorator
makeParamDecorator('Attribute', (attributeName?: string) => (
  (attributeName));

```

```typescript
getClosureSafeProperty<T>(objWithPropertyToExtract: T): string {
  for (let key in objWithPropertyToExtract)
  if (objWithPropertyToExtract[key] == getClosureSafeProperty as any) {
    return key;
  }
  throw Error('Could not find renamed property on target object.');
}
```

```typescript
fillProperties(target: {
  [key: string]: string
}, source: {
  [key: string]: string
}) {
  for (const key in source) {
    if (source.hasOwnProperty(key) && !target.hasOwnProperty(key)) {
      target[key] = source[key];
    }
  }
}
```

```typescript
class InjectableDef<T> {
  @ProvidedIn
  providedIn:InjectorType<any>|'root'|'platform'|'any'|null;

  @Token
  token: unknown;

  @Factory
  factory: (t?: Type<any>) => T;

  @Value
  value: T|undefined;
}
```

```typescript

/**
 * This function checks to see if the `ngDevMode` has been set. If yes,
 * then we honor it, otherwise we default to dev mode with additional checks. If * 
 * The idea is that unless we are doing production build where we explicitly
 * set `ngDevMode == false` we should be helping the developer by providing
 * as much early warning and errors as possible.
 * * `defineComponent` is guaranteed
 * to have been called before any component template functions
 * (and thus Ivy instructions), so a single
 * initialization there is sufficient to ensure ngDevMode $n * is defined for the entire instruction set.
 * * When checking `ngDevMode` on toplevel, always init it before referencing it
 * (e.g. `((typeof ngDevMode === 'undefined' || ngDevMode) && initNgDevMode())`), otherwise you can't * 
 * 'ReferenceError' like in
 * https://github.com/angular/angular/issues/31595.
 * * Details on possible values for 'ngDevMode' can be found
 * on its docstring.
 * * NOTE:
 * - changes to the `ngDevMode` name must be synced with `compiler-cli/src/tooling.ts`.
 * *export function initNgDevMode(): boolean {
 * // The below checks are to ensure that
 * calling `initNgDevMode` multiple times does not
 * reset the counters.
 * // If the `ngDevMode` is not an object,
 * then it means we have not created the perf counters.
 * // Yet, if (typeof ngDevMode !== 'undefined' ||
 * ngDevMode) { if (typeof ngDevMode !== 'object') {
 * ngDevModeResetPerfCounters();
 * return

  [CONTEXT]:

  /** An optional Module Injector to be used as fall back after Element Injectors are consulted. */
  [INJECTOR]: Injector|null;

  /** Factory to be used for creating Renderer. */
  [RENDERER.Factory]: RendererFactory3/null;

  /** Reference to the first LView or LContainer beneath this LView. */
  [HIERARCHY]: LView|null;

  /** Necessary to store this so views can..."}
traverse through their nested views\n* to remove listeners and call onDestroy callbacks.\n* /\n[CHILD_HEAD]: LView|LContainer|null;\n*/\n*\n* The last LView or LContainer beneath this LView in the hierarchy.\n* \n* The tail allows us to quickly add a new state to the end of the view list\n* without having to propagate starting from the first.child.\n* \n* [CHILD_TAIL]: LView|LContainer|null;\n*/\n*\n* View where this view's template was declared.\n* \n* Only applicable for dynamically created views. Will be null for inline/component views.\n* \n* The template for a dynamically created view may be declared in a different view than\n* it is inserted. We already track the \"insertion view\" (view where the template was\n* inserted) in LView[PARENT], but we also need access to the \"declaration view\"\n* (view where the template was declared). Otherwise, we wouldn't be able\n* to call the\n* view's template function with the proper contexts. Context should be inherited from\n* the declaration view tree, not the insertion view tree.\n* \n* Example (AppComponent template):\n* \n* <ng-template #foo></ng-template>   <-- declared here -->\n* \n* <some-comp [tpl]=\"foo\"></some-comp>  <--\n* Inserted inside this component -->\n* \n* The <ng-template> above is declared in the AppComponent template,\n* but it will be passed into\n* SomeComp and inserted there. In this case, the declaration view would be the\n* AppComponent,\n* but the insertion view would be SomeComp. When we are removing views, we would want\n* to\n* traverse through the insertion view to clean up listeners. When we are calling the\n* template function\n* during change detection, we need the declaration view to get inherited\n* context.\n* \n[DECLARATION_VIEW]: LView|null;\n*/\n* Points to the declaration component view, used to track\n* transplanted `LView`s.\n* \n* See: `DECLARATION_VIEW` which points to the actual `LView` where it was\n* declared, whereas\n* `DECLARATION_COMPONENT_VIEW` points to the component which may not be same\n* as\n* `DECLARATION_VIEW`.\n* \n* Example:\n* \n* <\#VIEW #myComp>
* \n*   <div *ngIf="true">
* \n*     <ng-template #myTmpl>...</ng-template>
* \n*   </div>
* \n* </#VIEW>\n* \n* The reason for this is that all embedded views are always check-always whereas the component\n* view can be\n* check-always or on-push. When we have a transplanted view it is important to\n* determine if we have\n* transplanted a view from check-always declaration to on-push insertion\n* point. In such a case the transplanted\n* view needs to be added to the `LContainer` in the\n* declared `LView` and CD during the declared view CD (in\n* addition to the CD at the insertion\n* point.) (Any transplanted views which are intra Component are of no interest\n* because the CD\n* strategy of declaration and insertion will always be the same, because it is the same\n* component.\n* \n* Queries already track moved views in `LView[DECLARATION_LCONTAINER]` and\n* `LContainer[Moved_VIEWS]`. However the queries also track `LView`s which moved within the same\n* component `LView`. Transplanted views are a subset of moved views, and we use\n* `DECLARATION_COMPONENT_VIEW` to differentiate them. As in this example.\n* \n* Example showing\n* intra component `LView` movement.\n* \n* <\#VIEW #myComp>
* \n*   <div *ngIf="true">\n* \n*     <ng-template #myTmpl>...</ng-template>\n* \n*   </div>
* \n* </#VIEW>\n* \n* The \"thenBlock\" and \"elseBlock\" is moved but not transplanted.\n* \n* Example\n* showing inter component `LView` movement (transplanted view).\n* \n* <\#VIEW #myComp>
* \n*   <ng-template #myTmpl>...</ng-template>
* \n*   <insertion-component [template]=\"myTmpl\">\n* \n* </insertion-component>
* \n* In the above example `myTmpl` is passed into a different component. If\n* `insertion-component\n* instantiates `myTmpl` and `insertion-component` is on-push then the `LContainer` needs\n* to\n* marked as containing transplanted views and those views need to be CD as part of the\n* declaration\n* CD.\n* \n* When change detection runs, it iterates over `[]MOVED_VIEWS` and CDs any child `LView`\n* where\n* the `DECLARATION_COMPONENT_VIEW` of the current component and the child `LView` does\n* not match\n* (it has been transplanted across components.)\n* \n* Note:\n* `DECLARATION_COMPONENT_VIEW` points to itself if the LView is a component view (the\n* simplest / most common case).\n* \n* see also:\n* \n* - https://hackmd.io/@mhevery/r1UJsV9H write up of the problem\n* \n* - `LContainer[HAS_TRANPLANTED_VIEWS]` which marks which `LContainer` has
transplanted views.

- `LContainer[TRANSPLANT_HEAD]` and `LContainer[TRANSPLANT_TAIL]`
storage for transplanted views. A declaration point of embedded views (ones instantiated based on the content of `\*a` `<ng-template>`), null for other types of views. We need to track all embedded views created from a given declaration point so we can prepare them in a proper order (query matches are ordered based on their declaration point and not the insertion point). `DECLARATION_COMPONENT_VIEW`:

- `LView[DECLARATION_LCONTAINER]` similar problem for queries similar problem for queries
- `LContainer[MOVED_VIEWS]` similar problem for queries

change on.* detected. (see: `LView[DECLARATION_COMPONENT_VIEW]`).
* * An * This flag, once set, is
* never unset for the `LContainer`. This means that when unset we can skip a lot of work in
`refreshEmbeddedViews`. But when set we still need to verify if * that the `MOVED_VIEWS` are transplanted and
on-push.
* * An export const HAS_TRANSPLOANTED_VIEWS = 2; null /*n * PARENT, NEXT, TRANSPLANTED_VIEWS_TO_REFRESH are indices 3, 4, and 5
As we already have these constants in LView, we don't need to re-create them.
T_HOST is index 6/*n We already have this constants in LView, we don't need to re-create it.
* export const NATIVE = 7; * export const VIEW_REFS = 8; /*n export const
MOVED_VIEWS = 9; /*n /**n * Size of LContainer's header. Represents the index after which all views in the
* container will be inserted. We need to keep a record of current views so we know
* which views are already in
the DOM (and don't need to be re-added) and so we can * remove views from the DOM when they are no longer required.

*
export const CONTAINER_HEADER_OFFSET = 10;

*

This is an array so that its structure is closer to LView. This helps * when traversing the view tree (which is a mix of containers and components * views), so we can jump to viewOrContainer[NEXT] in the same way regardless *

of type.

*

export interface LContainer extends Array<any> *

*

The host element of this LContainer. * * *

This could be an LView if this container is on a component node. * * In that case, the component LView is its HOST. * * *

This is a type field which allows us to differentiate `LContainer` from `StylingContext` in an * * efficient way. The value is always set to `true` * * [TYPE]; * * *

Flag to signify that this `LContainer` may have transplanted views which need to be change * * detected. (see:

`LView[DECLARATION_COMPONENT_VIEW]`). * * *

This flag, once set, is never unset for the `LContainer`. * * *

[HAS_TRANSPLANTED_VIEWS]: boolean; * * *

Access to the parent view is necessary so we can propagate back * * up from inside a container to parent[NEXT]. * * *

[PARENT]: LView; * * *

This allows us to jump from a container to a sibling container or component * * view with the same parent, so we can remove listeners efficiently.

*

[NEXT]: LView|LContainer|null; * * *

The number of direct transplanted views which need a refresh or have descendants themselves

* * that need a refresh but have not marked their ancestors themselves

* * that need a refresh. This tells us that during * * change detection we should still descend to find those children to refresh, even if the parents * * aren't `Dirty` / `CheckAlways`.

*

[TRANSPLANTED_VIEWS_TO_REFRESH]: number; * * *

* * A collection of views created based on the underlying `<ng-template>` element but inserted into

* * a different `LContainer`. We need to track views created from a given declaration point since

* * queries collect matches from the embedded view declaration point and

  }
}

/**
 * A hashtable of changes represented by `SimpleChange` objects stored
at the declared
property name they belong to on a Directive or Component. This is
the type passed to the ngOnChanges
hook of a DirectiveDef<T> object.

### SimpleChange

```typescript
export class SimpleChange {
  constructor(public previousValue: any, public currentValue: any, public firstChange: boolean) {}
}

/**
 * Check
whether the new value is the first value assigned.
*/
isFirstChange(): boolean {
  return this.firstChange;
}
```
```typescript

/**
 * The NgOnChangesFeature decorates a component with support for the ngOnChanges
* lifecycle hook, so it should be included in any component that implements
* that hook.
* If the component or directive uses inheritance, the
* NgOnChangesFeature MUST be included as a feature AFTER
* @link [InheritDefinitionFeature]. otherwise
* inherited properties will not be propagated to the ngOnChanges lifecycle hook.
* Example usage:
```
```typescript
export function NgOnChangesFeature<T>() {
  return NgOnChangesFeatureImpl<T>();
}

export function NgOnChangesFeatureImpl<T>(definition: DirectiveDef<T>) {
  if (definition.type.prototype.ngOnChanges) {
    definition.setInput = ngOnChangesSetInput;
  }
  return
}

const simpleChangesStore = getSimpleChangesStore(this);

export interface LContext {
  lView: LView;
  nodeIndex: number;
  native: RNode;
  component: {}|null|undefined;
  directives: any|null|undefined;
  context: any
}

export const SVG_NAMESPACE = 'http://www.w3.org/2000/svg';
export const MATH_ML_NAMESPACE = 'http://www.w3.org/1998/MathML/';
```

This is a synthetic lifecycle hook which gets inserted into `TView.preOrderHooks` to simulate
`ngOnChanges`.

This option ensures that the ngOnChanges lifecycle hook will be inherited from superclasses (in InheritDefinitionFeature).

This is a synthetic lifecycle hook which gets inserted into `TView.preOrderHooks` to simulate
`ngOnChanges`.

The hook reads the `NgSimpleChangesStore` data from the component instance and if changes are null * found it invokes `ngOnChanges` on the component instance.

Because this function gets inserted into `TView.preOrderHooks`, it is guaranteed to be called with component instance.

The data structure which is monkey-patched on the component instance and used by

`ngOnChanges` life-cycle hook to track previous input values.

  previousOrParentTreeNode: TNode;

  selectedIndex: number;

  bindingIndex: number;

  lastViewData retrieved by nextContext()!

  building nextContext() and reference() calls!

  Store the element depth count.

  are the only places where the patch data could change, this way we will save on number of places where the

  creating elements.

  The root index from which pure function

  instructions should calculate their binding

  indices. In component views, this is TView.b bindingStartIndex.

  context, this is the TView.expandoStartIndex + any dirs/hostVars before the given dir.

  Current index of a View or Content Query which needs to be processed

  We iterate over the list of Queries and increment current query index at every step.

  When host binding is executing this points to the directive index.

  TView.data[currentDirectiveIndex] is `DirectiveDef`

  * TView[currentDirectiveIndex]` is directive instance.

  * All implicit instruction state is stored here.

  It is useful to have a single object where all of the state is stored as a mental model

  (rather it being spread across many different variables.)
an intermediate object with properties.

```typescript
interface InstructionState {
  lFrame: LFrame;
  bindingsEnabled: boolean;
  checkNoChangesMode: boolean;
  elementDepthCount: number;
  elementDepthCount++;  // top level variables should not be exported for performance reasons
  previousOrParentTNode: TNode;
  contextViewData: View;
  currentViewState: View;
  checkNoChangesMode: boolean;
```

```typescript
createLFrame(null);  // When template contains 'ngNonBindable' then we need to prevent the runtime from matching directives on children of that element. Example:

```html
<my-comp my-directive>
</my-comp>
<div ngNonBindable>
  <my-comp my-directive>
    Should not match component / directive because we are in ngNonBindable.
  </my-comp>
</div>
```

```typescript
/**
 * Executing hooks requires complex logic as we need to deal with
 * 2 constraints. In *must be executed once and only once, across many change detection cycles.
 * This must be true even if some hooks throw, or if some
 * recursively trigger a change detection cycle.
 * To solve that, it is required to track the state of the execution of
 * these init hooks.
 * This is done by storing and maintaining flags in the view:
 * see `HookData` for details about the data structure.
 * They can be seen as a cursor in the following structure:
 * `[onInit1, onInit2, afterContentInit1, afterViewInit1, afterViewInit2, afterViewInit3]`]
 * Are they are stored as flags in `LView[FLAGS]`.
 * Pre-order hooks can be executed in batches, because of the select execution.
 * To be
able to pause and resume their execution, we also need some state about the hook's array\n * that is being processed\n * - the index of the next hook to be executed\n * - the number of init hooks already found in the processed part of the array\n * They are are stored as flags in LView[PREORDER_HOOK_FLAGS].\n \n *\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*\n\n*

inline hidden classes this is OK.

* Single factory: Only `resolving` and `factory` is defined.

* *`providers` factory: `componentProviders` is a number and `index = -1.`

* `viewProviders` factory: `componentProviders` is a number and `index` points to `providers`.

`export class NodeInjectorFactory { /*\n * The inject implementation to be activated when using the factory. 

 * null\n */\n
 * Mark that the token can see other Tokens declared in `viewProviders` on the same node.

 * *\n * Marker set to true during factory invocation to see if we get into recursive loop.

 * Recursive loop causes an error to be displayed.

 * *\n * `resolving` = false;\n */\n
 * This is needed because when multiple components and directives declare the `multi` provider\n * they have to be concatenated in the correct order.

 * *\n * Example:

 * If we have a component and directive active an a single element as declared here:\n
   * *\n   * `component`: provides: [ { provide: String, useValue: 'component',\n   * multi: true } ],\n
   * `viewProviders`: [ { provide: String, useValue: 'component',\n   * multi: true } ];\n
   * *\n
   * The way to think about it is that the `viewProviders` have been inserted after the component\n * but before the directives, which is why we need to know how many `multi`s have been declared by\n * the component.\n
   * *\n   * Component:` provides: [ { provide: String, useValue: 'component',\n   * multi: true } ],\n
   * `viewProviders`: [ { provide: String, useValue: 'component',\n   * multi: true } ];\n
   * *\n
   * We have to return `['all']` in case of content injection, but `['all',\n   * 'viewOnly']` in case of view injection. We further have to make sure that the shared instances (in our case\n * `['all']`) are the same exact instance in both the content as well as the view injection. (We\n * have to make sure that we don't double instantiate.) For this reason the `viewProviders`\n * `Factory` has a pointer to the shadowed `providers` factory so that it can instantiate the\n * `providers` (`['all']`) and then extend it with `viewProviders` (`['all'] + ['viewOnly']` =\n * `['all', 'viewOnly']`).\n
 * *\n
 * Factory to invoke in order to create a new instance.\n
 * *\n
 * Number of `multi` providers which belong to the component.\n
 * *\n
 * This hack is necessary so we don't erroneously get a circular dependency\n * failure based on types.\n
 * const\n
 * unusedValueExportToPlacateAjd = 1;\n

/**
 * Defines if the call to `inject` should include `viewProviders` in its resolution.
 * This is set to true when we try to instantiate a component. This value is reset in
 * `getNodeInjectable` to a value which matches the declaration location of the token about to be
 * instantiated. This is done so that if we are injecting a token which was declared outside of
 * `viewProviders` we don't accidentally pull `viewProviders` in.
 * Example:
 * ```
 * @Injectable()
 * class MyService {
 *   constructor(public value: String) {}
 * }
 *
 * @Component({
 *   providers: [
 *     MyService
 *   ]
 *   viewProviders: [
 *     {provide: String, value: 'providers'}
 *   ]
 * })
 * class MyComponent {
 *   constructor(myService: MyService, value: String) {
 *     // We expect that Component can see into `viewProviders`.
 *     expect(value).toEqual('providers');
 *     // `MyService` was not declared in `viewProviders` hence it can't see it.
 *     expect(myService.value).toEqual('providers');
 *   }
 * }
 *
 * ```

  /**
   * A pattern that recognizes a commonly useful subset of URLs that are safe.
   * This regular expression matches a subset of URLs that will not cause script
   * execution if used in URL context
   * (comment from here on and regex
   * copied from Soy's EscapingConventions):
   * (1) Either an allowed protocol (http, https, mailto or ftp).
   * (2) or no protocol.  A protocol must be followed by a colon. The below
   *     allows that by allowing colons only after
   *     a hash (#) must be in the fragment.
   *     Otherwise, a colon after a double solidus (//) must be in the authority
   * (before port).
   * (3) A protocol must be followed by a colon. The below
   *     allows that by allowing colons only after
   *     one of the characters [/?#].
   * A colon after a hash (#) must be in the fragment.
   * Otherwise, a colon after a (?) must be in a query.
   * Otherwise, a colon after a single solidus (/) must be in a path.
   * Otherwise, a colon after a double solidus (/) must be in the authority
   * (before port).
   * The pattern disallows &, used in
   * HTML entity declarations before a URL that will not cause script
   * execution if used in URL context
   * within a HTML document. Specifically, this
   * regular expression matches a subset of URLs that will not cause script
   * execution if used in URL context
   * within a HTML document. Specifically, this
   * regular expression matches a subset of URLs that will not cause script
   * execution if used in URL context

```
processing.

- Parsed ngProjectAs selectors.
- `export type TAttributes = (string|AttributeMarker|CssSelector[]|null)[]` * Attributes that are associated with a view. Includes: * - Attribute arrays.
- `export type TConstants = (TAttributes|string|null)[]` * Binding data (flyweight) for a particular node that is shared between all templates of a specific type.
- `if property is: * - PropertyAliases: that property's data was generated and this is it
  * - Null: that property's data was already generated and nothing was found.
- `* - Undefined: that property's data has not yet been generated
  * see: https://en.wikipedia.org/wiki/Flyweight_pattern for more on the Flyweight pattern` * Binding interface TNode
- `* The type of the TNode. See TNodeType;` * Index of the TNode in TView.data and corresponding native element in LView.
- `* This is necessary to get from any TNode to its corresponding native element when * traversing the node tree.
- * If index is -1, this is a dynamically created container node or embedded view node.
- * An index: number;` * The index of the closest injector in this node's LView.
- `* If the index === -1, there is no injector on this node or any ancestor node in this view.
- * If the index !== -1, it is the index of this node's injector OR the index of a parent injector in the same view.
- We pass the parent injector index down the node tree of a view so it's * possible to find the parent injector without walking a potentially deep node tree. Injector
- * indices are not set across view boundaries because there could be multiple component hosts.
- * If tNode.injectorIndex === tNode.parent.injectorIndex, then the index belongs to a parent
- * injector.
- * An injectorIndex: number;` * Stores starting index of the directives.
- `* An directiveStart: number;` * Stores final exclusive index of the directives.
- `* An directiveEnd: number;` * Stores the last directive which had a styling instruction.
- `* Initial value of this is '-1' which means that no 'hostBindings' styling instruction has * executed. As 'hostBindings' instructions execute they set the value to the index of the last 'DirectiveDef' which contained the last 'hostBindings' styling instruction.
- * Valid values are: * - '-1' No 'hostBindings' instruction has executed,
- * - 'directiveStart <= directiveStylingLast < directiveEnd': Points to the 'DirectiveDef' of the
- * last styling instruction which executed in the 'hostBindings'.
- * * Data is needed so that styling instructions know which static styling data needs to be * collected from the 'DirectiveDef.hostAttrs'. A styling instruction needs to collect all data
- * since last styling instruction.
- * An directiveStylingLast: number;` * Stores indexes of property bindings. This field is only set in the ngDevMode and holds indexes
- * of property bindings so TestBed can get bound property metadata for a given node.
- * An propertyBindings: number[]|null;` * Stores if Node isComponent, isProjected, hasContentQuery, hasClassInput and
- * hasStyleInput etc.
- * An flags: TNodeFlags;` * This number stores two values using its bits:
- * - the index of the first provider on that node (first 16 bits)
- * - the count of view providers from the component on this node (last 16 bits)
- `* // TODO(misko): break this into actual vars.
- * providerIndexes:
- * TNodeProviderIndexes;` * Tag name associated with this node.
- `* An tagName: string|null;` * Attributes associated with an element. We need to store attributes to support various use-cases
- * (attribute injection, content projection with selectors, directives matching).
- * Attributes are stored statically because reading them from the DOM would be way too slow for
- * content projection and queries.
- * Since attrs will always be calculated first, they will never need to be marked undefined by
- * other instructions.
- * For regular attributes a name of an attribute and its value alternate in the array. * e.g. ['role', 'checkbox']
- * This array can contain flags that will indicate 'special attributes' (attributes with
- * namespaces, attributes extracted from bindings and outputs).
- `* An attr: TAttributes|null;` * Same as 'TNode.attrs' but contains merged data across all directive host bindings.
- `* We need to keep 'attrs' as unmerged so that it can be used for attribute selectors.
- * We merge attrs here so that it can be used in a performant way for initial rendering.
- * The 'attrs' are merged in first pass in following order:
- * - Component's 'hostAttrs' * - Directives' 'hostAttrs'
- * - Template 'TNode.attrs' associated with the current 'TNode'.
- * An mergedAttrs:
- `TAttributes|null;` * A set of local names under which a given element is exported in a template and
- * visible to queries. An entry in this array can be created for different reasons:
- * - an element itself is referenced, ex.: `<div #foo>`
- * - a component is referenced, ex.: `<my-cmpt #foo>`
- * - a directive is referenced, ex.: `<my-cmpt #foo="directiveExportAs"></div>`
- * A given element might have different local names and those
names can be associated in a directive. We store local names at even indexes while odd indexes are reserved for directive index in a view (or `-1` if there is no associated directive). Some examples:

- `<div #foo>` => `['foo', -1]`
- `<my-cmpt #foo>` => `['foo', myCmptIdx]`
- `<my-cmpt #foo #bar="#directiveExportAs">` => `['foo', myCmptIdx, 'bar', directiveIdx]`
- `<div #foo #bar="#directiveExportAs">` => `['foo', -1, 'bar', directiveIdx]`
- `An localNames: {string|number}[]]null;`
The field will be populated if and when: * This is a collection of all `style` static values for an element (including from host).

/**
 * Function that checks whether a given TNode
 * matches tag-based selector and has a valid type.
 * Matching can be performed in 2 modes: projection mode
 * (when we project nodes) and regular
 * directive matching mode:
 * - in the "directive matching" mode we do not take TContainer's tagName into account if it
 *   is different from NG_TEMPLATE_SELECTOR (value different from NG_TEMPLATE_SELECTOR indicates that
 *   a tag name was extracted from * syntax so we would match the same directive twice);
 * - in the "projection" mode, we use a tag name potentially extracted from the
 *   * syntax processing
 *   (applicable to TNodeType.Container only).
 * @param tNode current TNode
 * @param currentSelector The selector to try matching
 * @param isProjectionMode if `true` we are matching for content projection, otherwise we are
 *   doing directive matching.
 * @returns true if node matches the selector.

  // We must set the selected index *after* running the hooks, because hooks may have side-effects
  // that cause other template functions to run, thus updating the selected index, which is global
  // state. If we run `selectIndex` *before* we run the hooks, in some cases the selected index
  // will be altered by the time we leave the `advance` instruction.
  setSelectedIndex(lView, index + 1, checkNoChangesMode);
}
```
the `resolution function` when looking for a value needs to first look at the binding value, and than at

@Directive({
  host: {
    class: 'DIR',
    `[class.dynamic]`: 'exp' // classProp('dynamic', ctx.exp)
  }
})

In the above case the linked list will contain one item: `null` * `null` // assume binding location:

10 for `classProp('dynamic', ctx.exp)` * `null` * tData[10] = cTStylingStatic[5] * : "dynamic", // This is the wrapped value of `cTStylingKey` * `null` * `true`, // This is the default static value of directive binding:`null` *

* tData[10 + 1] = 0; // We don't have prev/next.`null` * `undefined`; // assume `ctx.exp` is

`undefined`* `null` * `undefined`[10 + 1] = `undefined`; // Just normalized `tView[10][null]` * `null` * So when the function is resolving styling value, it first needs to look into the linked list (* there is none) and then into the static

`cTStylingStatic` too see if there is a default value for `null` * `dynamic` (there is not). Therefore it is safe to remove it.

If setting `true` case:

```typescript
  lView[10] = true; // assume `ctx.exp` is `true`
  lView[10 + 1] = true; // Just normalized `lView[10]`
```
```typescript

This code snippet is from an open-source project used in Secure Network Analytics (Stealthwatch) 7.4.0. It appears to be part of a larger Angular codebase and involves functions for handling component matching, directive trees, and component host flags. The functions handle various aspects of component initialization, including creating component views, handling local names, and managing component flags and indexes.
`Open Source Used In Secure Network Analytics (Stealthwatch) 7.4.0`

```
views and containers to remove listeners and call onDestroy callbacks.

### Notes

- Because it's used for onDestroy calls, it needs to be bottom-up.
- Must process containers instead of their views to avoid splicing when views are destroyed and re-added.
- Using a while loop because it's faster than recursion.
- Destroy only called on movement to sibling or movement to parent (laterally or up).

#### Call onDestroy callbacks.

1. Notes:
   - Because it's used for onDestroy calls, it needs to be bottom-up.
   - Must process containers instead of their views to avoid splicing when views are destroyed and re-added.
   - Using a while loop because it's faster than recursion.
   - Destroy only called on movement to sibling or movement to parent (laterally or up).

#### Destroy

- const rootView = LView

#### OnDestroy calls

- The destroy method is called on movement to sibling or movement to parent (laterally or up).
- It needs to be bottom-up and trigger onDestroy calls.
- Containers and views are processed bottom-up to avoid splicing.
- The method uses a while loop to ensure efficiency.

#### Function Details

- `destroyViewTree` function destroys a view tree recursively.
- It traverses views and containers to remove listeners and call onDestroy callbacks.
- The method is called bottom-up to prevent splicing.
- It processes containers instead of views to avoid issues with view re-addition.
- The function uses a while loop for efficiency.
- It is called on movement to side or up, not on movement to children.

```javascript
export function destroyViewTree(rootView: LView): void {
  let lViewOrLContainer = rootView

  // If the view has no children, we can clean it up and return early.
  if (!lViewOrLContainer) {
    return;
  }

  while (lViewOrLContainer) {
    let next:

    if (isLView(lViewOrLContainer)) {
      // If LView, traverse down to child.
      next = lViewOrLContainer[CONTAINER_HEADER_OFFSET];
    } else {
      // If LContainer, traverse down to its first LView.
      const firstView:

      next = lViewOrLContainer[CONTAINER_HEADER_OFFSET];
    }

    if (!next) {
      // Only clean up view when moving to the side or up, as destroy hooks should be called in order from the bottom up.
      while (lViewOrLContainer && !lViewOrLContainer[NEXT] && lViewOrLContainer !== rootView) {
        isLView(lViewOrLContainer) && cleanUpView(lViewOrLContainer[TVIEW], lViewOrLContainer);
        lViewOrLContainer = getParentState(lViewOrLContainer, rootView);
      }
    }
  }
}
```

#### Insert View

- The insertView function inserts a view into a container.
- It adds the view to the container's array of active views in the correct position.
- It also adds the view's elements to the DOM if the container is not a root node of another view.

```javascript
export function insertView(tView: TView, lView: LView, lContainer: LContainer, index: number) {
  const indexInContainer = CONTAINER_HEADER_OFFSET + index;

  if (index > 0) {
    lContainer[indexInContainer - 1][NEXT] = lView;
  }
  if (index < lContainer.length - CONTAINER_HEADER_OFFSET) {
    lView[NEXT] = lContainer[indexInContainer];
  } else {
    lContainer.push(lView);
  }
}
```

#### Track Moved View

- The function tracks views created from the declaration container (TemplateRef) and inserted into a different LContainer.

```javascript
function trackMovedView(declarationContainer: LContainer, lView: LView) {
  // At this point the declaration-container is not same as insertion-container; this means that the view is a transplanted view. Mark the declared LView as having transplanted views so that those views can participate in CD.
  declarationContainer[HAS_TRANSPLANTED_VIEWS] = true;
}
```
A projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection; a projected view should belong to a non-empty projected views collection;

Getting a render parent for a node.

```javascript
    function getRenderParent(tView: TView, tNode: TNode, currentView: LView): RElement|null {
      // Skip over element and ICU containers as those are represented by a comment node
      // and can't be used as a render parent.
      let parentTNode = tNode.parent;
      while (parentTNode != null &&
          (parentTNode.type === TNodeType.ElementContainer ||
          parentTNode.type === TNodeType.IcuContainer)) {
        tNode = parentTNode;
        parentTNode = tNode.parent;
      }

      const hostTNode = currentView[T_HOST];
      if (hostTNode) {
        // We are inserting a root element of an embedded view We might delay insertion of
```

---

This example shows how to handle onDestroy hooks in a ProceduralRenderer. It demonstrates the importance of marking LViews as destroyed to prevent infinite loops and the need to call onDestroy hooks on destroyed views. The code also illustrates the use of listeners and subscriptions in a component context, ensuring proper cleanup and unsubscription. The example covers scenarios where a view is inserted into a container and then detached, ensuring that all necessary cleanup is performed for both the view and its context.

---

### Notes

1. **Removing on destroy**: The local renderer is destroyed as cleanup time when handling onDestroy hooks. This ensures that an onDestroy hook runs arbitrary user code, including its own `viewRef.destroy()` (or similar), and that the LView is marked as destroyed before executing the onDestroy hooks. This prevents infinite loops and aligns with ViewEngine behavior, resembling the `afterDestroy` behavior.

2. **Marking as destroyed before onDestroy hooks**: To avoid an infinite loop, an onDestroy hook executes arbitrary user code that could include its own `viewRef.destroy()`. If we don't mark the LView as destroyed before the hooks, this code could lead to an infinite loop. This also aligns with the ViewEngine behavior and means that the onDestroy hook is more of an "afterDestroy" hook.

3. **Clean up time for embedded views**: For component views, the local renderer is destroyed during clean up time.

4. **Listening and unsubscribing**: Listeners and subscriptions from output subscriptions are removed and unsubscribed from onDestroy hooks. This involves iterating over cleanup arrays, checking for DOM listeners, and unregistering them.

5. **Context and cleanup**: Clean up time includes context cleanup for component views, ensuring that custom elements are properly handled and cleaned up.
children
  // for a given view if it is disconnected. This might happen for 2 main reasons:
  // - view is not inserted into any container(view was created but not inserted yet)
  // - view is inserted into a container but the container itself is not inserted into the DOM
  // (container might be part of projection or child of a view that is not inserted yet).
  // In other words we can insert children of a given view if this view was inserted into a
  // container and the container itself has its render parent determined.
  return getContainerRenderParent(hostTNode as TViewNode, currentView);
}

  } else {
    // We are inserting a root element of the component view into the component host element and
    // it should always be eager:

import {injectChangeDetectorRef as
render3InjectChangeDetectorRef} from `../render3/view_engine_compatibility`. Base class that provides change detection functionality. A change-detection tree collects all views that are to be checked for changes. Use the methods to add and remove views from the tree, initiate change-detection, and explicitly mark views as _dirty_, meaning that they have changed and need to be re-rendered. @see [Using change detection hooks](guide/lifecycle-hooks#using-change-detection-hooks) @see [Defining custom change detection](guide/lifecycle-hooks#defining-custom-change-detection) The following examples demonstrate how to modify default change-detection behavior to perform explicit change detection when needed. `###` Use `markForCheck()` with `CheckOnce` strategy. The following example sets the `OnPush` change-detection strategy for a component. `###` Detach change detector to limit how often check occurs. The following example defines a component with a large list of read-only data that is expected to change constantly, many times per second. To improve performance, we want to check and update the list less often than the changes actually occur. To do that, we detach the component's change detector and perform an explicit local check every five seconds. `###` Reattaching a detached component. The following example creates a component displaying live data. The component detaches its change detector from the main change detector tree when the `live` property is set to false, and reattaches it when the property becomes true. `###` Use in development mode to verify that running change detection doesn't introduce other changes. `###` Checks the change detector and its children, and throws if any changes are detected. Views are attached to the tree by default. Views are attached to the tree by default. resolveReflectiveProviders) from `./reflective_provider`; Threshold for the dynamic version

const UNDEFINED = {};\n\n/** A ReflectiveDependency injection container used for instantiating objects and resolving dependencies. */\n\nconst \n\nAn `Injector` is a replacement for a `new` operator, which can automatically resolve the constructor dependencies. In typical use, application code asks for the dependencies in the constructor and they are resolved by the `Injector`.\n
The following example creates an `Injector` configured to create `Engine` and `Car`.\n
```typescript\n\n\nconst class Engine {\n  \n* @constructor(public engine:Engine) \n* \n\nvar injector = ReflectiveInjector.resolveAndCreate([\n  \n  \n  \n\n});\n\n\nconst \n\n\n\n\n** A resolution is a process of flattening multiple nested arrays and converting individual providers into an array of `ResolvedReflectiveProvider`s.\n
```typescript\n\n\n```typescript\n\n```typescript\n\n\n```typescript\n\n\n```typescript\n\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n```typescript\n\n`
This API is the recommended way to construct injectors in performance-sensitive parts.

```typescript
class ParentProvider {}

class ChildProvider {}

var parentProviders = ReflectiveInjector.resolve([ParentProvider]);
var childProviders = ReflectiveInjector.resolve([ChildProvider]);

var parent = ReflectiveInjector.fromResolvedProviders(parentProviders);
var child = parent.createChildFromResolved(childProviders);

expect(child.get(ParentProvider)).toBeInstanceOf(ParentProvider);
expect(child.get(ChildProvider)).toBeInstanceOf(ChildProvider);
```

The created object does not get cached by the injector.

```typescript
@Injectable()
class Engine {
  constructor(public engine: Engine) {}
}

@Injectable()
class Car {
  constructor(public engine: Engine) {}
}

var injector = ReflectiveInjector.resolveAndCreate([Engine]);
var car = injector.resolveAndInstantiate(Car);
```

The created object does not get cached by the injector.

```typescript
class ParentProvider {
  abstract createChildFromResolved(providers: ResolvedReflectiveProvider[]): ReflectiveInjector;
}
```

Resolves a provider and instantiates an object using a resolved provider in the context of the injector.

```typescript
class ChildProvider {
  abstract resolveAndInstantiate(provider: Provider): any;
}
```

Resolves a provider and instantiates an object in the context of the injector.

```typescript

/**
 * A DI token that you can use to create a virtual [provider](guide/glossary#provider)
 * that will populate the `entryComponents` field of components and NgModules
 * based on its `useValue` property value.
 * All components that are referenced in the `useValue` value (either directly
 * or in a nested array or map) are added to the `entryComponents` property.
 * The following example shows how the router can populate the `entryComponents`
 * field of an NgModule based on a router configuration that refers to
 * to components.
 *
 * ```typescript
 * // helper function inside the router
 * function provideRoutes(routes) {
 *   return [...
 *     {provide: ROUTES, useValue: routes},
 *     {provide: ANALYZE_FOR_ENTRY_COMPONENTS, useValue: routes, multi: true}
 *   ];
 * }
 *
 * // user code
 * let routes = [...
 *   {path: '/root', component: RootComp},
 *   {path: '/teams', component: TeamsComp}
 * ];
 *
 * @NgModule(
 *   providers: [provideRoutes(routes)]
 * )
 * class ModuleWithRoutes {}
 * ```
 *
 * @publicApi
 * @deprecated Since 9.0.0. With Ivy, this property is no longer necessary.
 */
export const ANALYZE_FOR_ENTRY_COMPONENTS = new InjectionToken<any>('AnalyzeForEntryComponents');

/**
 * Type of the `Attribute` decorator / constructor function.
 *
 * @publicApi
 */
export interface AttributeDecorator {
  /**
   * Specifies that a constant attribute value should be injected.
   *
   * The directive can inject constant string literals of host element
   * attributes.
   *
   * @usageNotes
   *
   * Suppose we have an `<input>` element and want to know its `type`.
   *
   * ```html
   * <input type="text">
   * ```
   *
   * A decorator can inject string literal `text` as in the
   * following example:
   *
   * ```typescript
   * @publicApi
   * @<attributeMetadata>
   * ```
   *
   * @publicApi
   */
  (name: string): any;
  new(name: string): Attribute;
}

/**
 * Type of the `Attribute` metadata.
 *
 * @publicApi
 */
export interface Attribute {
  /**
   * The name of the attribute to be injected
   * into the constructor.
   */
  attributeName?: string;
}

/**
 * Type of the `Query` metadata.
 *
 * @publicApi
 */
export interface Query {
  descendants: boolean;
  first: boolean;
  read: any;
  isViewQuery: boolean;
  selector: any;
  static?: boolean;
}

/**
 * Base class for query metadata.
 *
 * @see `ContentChildren`.
 * @see `ContentChild`.
 * @see `ViewChildren`.
 * @see `ViewChild`.
 *
 * @publicApi
 */
export abstract class Query {}

/**
 * Type of the `ContentChildren` decorator / constructor function.
 *
 * @see `ContentChildren`.
 * @publicApi
 */
export interface ContentChildrenDecorator {
  /**
   * Parameter decorator that configures a content query.
   *
   * Use to get the `QueryList` of elements or directives from the content
   * DOM.
   *
   * Any time a child element is added, removed, or moved, the query list will
   * be updated, and the changes observable of the query list will emit a
   * new value.
   *
   * Content queries are set before the `ngAfterContentInit` callback is called.
   *
   * Does not retrieve elements or directives that are in
   * other components' templates,
   * since a component's template is always a black box to its ancestors.
   *
   * **Metadata Properties**:
   *
   * * **selector** - The directive type or the name used for querying.
   * * **descendants** - True to include all descendants, otherwise include
   * only direct children.
   * * **read** - Used to read a different token from the queried elements.
   *
   * @usageNotes
   *
   * Here is a simple demonstration of how the `ContentChildren` decorator can be used.
   *
   * ```typescript
   * @example
core/di/ts/contentChildren/content_children_howto.ts region='HowTo'
   * ```
   *
   * @Annotation
   */

template

@param decls The number of nodes, local refs, and pipes for this template.
@param vars The number of bindings for this template.
@param tagName The name of the container element, if applicable.
@param attrsIndex The index of template attributes in the 'consts' array.
@param localRefs The index of local references in the 'consts' array.
@param localRefExtractor A function which extracts local-refs values from the template.

Defaults to the current element associated with the local-ref.

 * }

 Open Source Used In Secure Network Analytics (Stealthwatch) 7.4.0 7600
There might be cases where multiple directives on the same element try to register an event handler for the same event. In this situation we want to avoid registration of several native listeners as each registration would be intercepted by NgZone and trigger change detection. This would mean that a single user action would result in several change detections being invoked. To avoid this situation we want to have only one call to native handler function (coalesce other handler functions on top of the first native handler function). Let existingListener = null; Please note that the coalescing described here doesn’t happen for events specifying an alternative target (ex. (document:click)) - this is to keep backward compatibility with the view engine. Also, we don’t have to search for existing listeners is there are no directives matching on a given node as we can’t register multiple event handlers for the same event. A template (this would mean having duplicate attributes) if (!eventTargetResolver && isTNodeDirectiveHost) { existingListener = findExistingListener(tView, lView, eventName, tNode.index); } if (existingListener !== null) { Attach a new listener to coalesced listeners list, maintaining the order in which listeners are registered. For performance reasons, we keep a reference to the last listener in that list (in ‘ngLastListenerFn’ field), so we can avoid going through the entire set each time we need to add a new listener. const lastListenerFn = (any)existingListener).__ngLastListenerFn__; existingListener; lastListenerFn.__ngNextListenerFn__ = listenerFn; (any)existingListener).__ngLastListenerFn__ = listenerFn; processOutputs = false; } else { The first argument of ‘listen’ function in Procedural Renderer is either a target name (as a string) in case of global target (window, document, body) or element reference (in all other cases) in listenerFn = wrapListener(tNode, lView, listenerFn, false /* preventDefault */); const cleanupFn = renderer.listen(resolved.name || target, eventName, listenerFn); ngDevMode && ngDevMode.rendererAddEventListener++; tCleanup.push(eventName, idxOrTargetGetter, cleanupFn, lCleanupIndex, lCleanupIndex + 1); } else { listenerFn = wrapListener(tNode, lView, listenerFn, true /* preventDefault */); tCleanup.push(eventName, lCleanupIndex, lCleanupIndex + 1); } }

The constructor for `DirectionalOutputDecorator` ngDevMode && !isObservable(output)) { throw new Error(’@Output $’[{minifiedName}] not initialized in ’});

executeListenerWithErrorHandling(lView, lListenerFn, e); return listenerFn(e) !== false;

executeListenerWithErrorHandling(lView, lListenerFn, e); return listenerFn(e) !== false;

The function `executeListenerWithErrorHandling` is defined and called as follows:

```typescript
function executeListenerWithErrorHandling(lView: LView, lListenerFn: (e?: any) => any, e: any): boolean {
  try {
    return listenerFn(e) !== false;
  } catch (error) {
    handleError(lView, error);
    return false;
  }
}
```

This function is responsible for executing the event listener and catching any errors that might occur. If an error is caught, it handles it by calling the `handleError` function and returns `false` to indicate that the event handler should not be executed again.

The `handleError` function is defined as follows:

```typescript
function handleError(lView: LView, error: any) {
  let tView, lListenerFn = null;
  return listenerFn(e) !== false;
}
```

This function handles errors by catching them and returning `false` to indicate that the event handler should not be executed again.

The code snippet also includes a function `wrapListener` which wraps an event listener with a function that marks ancestors dirty and prevents default behavior.

```typescript
function wrapListener(tNode: TNode, lView: LView, listenerFn: (e?: any) => any, wrapWithPreventDefault: boolean) {
  // Note: We are performing most of the work in the listener function itself // to optimize listener registration.
  return function wrapListenerIn_markDirtyAndPreventDefault(e: any) { // Ivy uses ‘Function’ as a special token
```
that allows us to unwrap the function
// so that it can be invoked programmatically by
'debugNode.triggerEventHandler'

if (e === Function) {
  return listenerFn;
}

if (e === Function) {
  return listenerFn;
}

// In order to be
// backwards compatible with View Engine, events on component host nodes
// must also mark the component
// view itself dirty (i.e. the view that it owns).

const startView = tNode.flags & TNodeFlags.isComponentHost ?
  getComponentViewByIndex(tNode.index, IView) : IView;

// See interfaces/view.ts for more on

if ([(IView[FLAGS] & LViewFlags.ManualOnPush) === 0]) {
  if (markViewDirty(startView);
        let result = executeListenerWithErrorHandler(IView, listenerFn, e);
}

// A just-invoked listener function might have coalesced listeners so we need to check for
// their presence and
// invoke as needed.

let nextListenerFn =
  (<any>wrapListenerIn_markDirtyAndPreventDefault()).__ngNextListenerFn__;

while (nextListenerFn) {
  // We should prevent default if any of the listeners explicitly return false
  result =
    executeListenerWithErrorHandling(lView, nextListenerFn, e) && result;
  nextListenerFn =
    (<any>nextListenerFn).__ngNextListenerFn__;
}

if (wrapWithPreventDefault && result === false) {
  e.preventDefault();
  e.returnValue = false;
}

return result;
};
forms: parsed (by a compiler) and text.

* un-parsed form:

* The parsed form is needed for efficient matching of a node against a given CSS selector.

* The un-parsed, textual form is needed for support of the ngProjectAs attribute.

* Having a CSS selector in 2 different formats is not ideal, but alternatives have even more drawbacks.

* - having only a textual form would require runtime parsing of CSS selectors;

* - we can't have only a parsed as we can't re-construct textual form from it (as entered by an * template author).

* @param projectionSlots? A collection of projection slots. A projection slot can be based on a parsed CSS selectors or set to the wildcard selector ("*") in order to match all nodes which do not match any selector. If not specified, a single wildcard selector projection slot will be defined.

* @codeGenApi

```typescript
export function projectionDef(projectionSlots?: ProjectionSlots): void {
  const componentNode =

  // If no explicit projection slots are defined, fall back to a single projection slot with the wildcard selector.
  if (!componentNode.projection) {
    const numProjectionSlots = projectionSlots ? projectionSlots.length : 1;
    const projectionHeads: (TNode|null)[] = componentNode.projection = newArray(numProjectionSlots, null! as TNode);
    const tails: (TNode|null)[] = projectionHeads.slice();

    let componentChild: TNode|null =
        componentNode.child;

    while (componentChild !== null) {
      const slotIndex =
          projectionSlots ?

      if (slotIndex !== null) {
        if (tails[slotIndex]) {
          tails[slotIndex]!.projectionNext = componentChild;
        } else {
          projectionHeads[slotIndex] = componentChild;
        }
        tails[slotIndex] = componentChild;
      }

      componentChild = componentChild.next;
    }
  }
}
```

*/

```typescript
let delayProjection = false;
export function setDelayProjection(value: boolean) {
  delayProjection = value;
}
```

```typescript
/**
 * Inserts previously re-distributed projected nodes. This instruction must be preceded by a call to the projectionDef instruction.

 * @param nodeIndex
 * @param selectorIndex:
 *   - 0 when the selector is `*` (or unspecified as this is the default value),
 *   - 1 based index of the selector from the `{@link projectionDef}`

 * @codeGenApi
 */
export function projection(
    nodeIndex: number, selectorIndex: number = 0, attrs?: TAttributes): void {
  const lView = getLView();
  const tView = getTView();
  const tProjectionNode =
      getOrCreateTNode(tView, lView[T_HOST], nodeIndex, TNodeType.Projection, null, attrs || null);

  // We might need to delay the projection of nodes if they are in the middle of an i18n block
  if (!delayProjection) {
    // re-distribution of projectable nodes is stored on a component's view level
    applyProjection(tView, lView, tProjectionNode);
  }
}

/**
 * NOTE: The word `styling` is used interchangeably as style or class styling.
 *
 * This file contains code to link styling instructions together so that they can be replayed in
 * priority order. The file exists because Ivy styling instruction execution order does not match
 * that of the priority order. The purpose of this code is to create a linked list so that the
 * instructions can be traversed in priority order when computing the styling.

 * Assume we are dealing with the following code:

 ```
 @Component({
 * template: `\n * <my-cmp [style]="\n * \n * [color: 
 * \n * @HostBinding('style') style = ...;
 *     styleMap({color: '#001'});
 *     styleProp('color', '#002');
 *   }
 * }
 * ```
 *
 * Notice that the bindings are inserted in the order of execution, but the `TView.data` allows
 * us to traverse them in the order of priority. The `TView.data` contains code to link styling
 * instructions together so that they can be replayed in priority order.
 *
 * To do so we keep a linked list of all of the bindings which pertain to
 * concatenation list which is `#002`. `@Component`:

 ```
 @Directive({
 * selector: `\n * ```
 *
 * The correct priority order of concatenation is:
 *
 * ```
 * // Template: (ExampleComponent)
 *     styleMap({color: '#001'});
 *     styleProp('color', '#002');
 * ```
 *
 * The Order of instruction execution is:
 *
 * ```
 * // Template: (ExampleComponent)
 *     styleMap({color: '#001'});
 *     styleProp('color', '#002');
 * ```
 *
 * Notice that the bindings are inserted in the order of execution, but the `TView.data` allows
 * us to traverse them in the order of priority. The `TView.data` contains code to link styling
 * instructions together so that they can be replayed in priority order. The file exists
 * because Ivy styling instruction execution order does not match that of the priority order.
 * The purpose of this code is to create a linked list so that the bindings can be traversed in
 * priority order when computing the styling. The above data structure allows us to re-concatenate
 * the styling no matter which data binding

 * On illustrative purposes only.

documentation in `tnode_linked_list_spec.ts` for working example.

```typescript
// Insert new `tStyleValue` at `TData` and link existing style bindings such that we maintain linked list of styles and compute
// the duplicate flag.

* Note: this function is executed during `firstUpdatePass` only to populate the `TView.data`.

* The function works by keeping track of `tStylingRange` which contains two pointers pointing to the head/tail of the template portion of the styles.
* if `isHost == false` (we are template) then insertion is at tail of `TStylingRange`.
* if `isHost == true` (we are host binding) then insertion is at head of `TStylingRange`.

```
```typescript
isClassBinding;

if (isClassBinding) {
  tNode.classBindings = tNode.classBindings.concat(tBindings);
  tNode.classBindings.sort((a, b) => a - b);
} else {
  tNode.styleBindings = tNode.styleBindings.concat(tBindings);

/**
 * Update style bindings using an object literal on an element.
 *
 * This instruction is
meant to apply styling via the `\[style\]=\"exp\"` template bindings. When styles are applied to the element they will then be updated with respect to any styles/classes set via `\[styleProp\]`. If any styles are set to falsy then they will be removed from the element. Note that the styling instruction will not be applied until `stylingApply` is called. Any missing styles (that have already been applied to the element beforehand) will be removed (unset) from the element's styling. This code is pulled out to a separate function so that it can be tree shaken away if it is not needed. It is only referenced from `\classMap\` and `\styleMap\`. Any styles that are set to falsy then they will be removed from the element. This instruction is meant to apply styling via the `\[class\]=\"exp\"` template bindings. When classes are applied to the element they will then be updated with respect to any styles/classes set via `\classProp\`. If any missing classes (that have already been applied to the element beforehand) will be removed (unset) from the element's list of CSS classes.

```typescript
/**

This means that some of\n // the statics may have moved from the residual to the `stylingKey` and so we have to\n // compute.\n // - If `undefined` this is the first time we are running;\n residual = collectResidual(tData, tNode, isClassBased);\n }\n if (residual !== undefined) {\n isClassBased ? (tNode.residualClasses = residual) : (tNode.residualStyles = residual);\n return stylingKey;\n }\n }

/**\n * Retrieve the `TStylingKey` for the template styling instruction.\n * This is needed since `hostBinding` styling\n instructions are of lower priority than that of the template.\n * However, they execute after the template styling instructions.\n * This means that they get inserted in front of the template\n * styling instructions and a new `hostBinding` styling instruction is\n * executed it means that it may need to steal static fields\n * from the template instruction. This\n */

```typescript
function getTemplateHeadTStylingKey(tData: TData, tNode: TNode, isClassBased: boolean): TStylingKey | undefined {\n const bindings = isClassBased ? tNode.classBindings : tNode.styleBindings;\n let residual = tNode.residualClasses ? tNode.residualClasses : tNode.residualStyles;\n if (getTStylingRangeNext(bindings) === 0) {\n // There does not seem to be a styling instruction in the `template`.\n return undefined;\n }\n return tData[getTStylingRangePrev(bindings)] as TStylingKey;\n}

/**\n * Update the `TStylingKey` of the first template instruction in `TNode`.\n * Logically `hostBindings` styling instructions are\n * of lower priority than that of the template.\n * However, they execute after the template styling instructions.\n * This means that they get inserted in front of the template\n * styling instructions.\n */

```
@Directive({
  @host: {
    @style: 'width: 100px',
    @style.color: 'dirExp',
  },
  @class: MyDir
})

@Pipe({
  @Host: {
    @style: 'width: 100px',
    @style.color: 'dirExp',
  },
  @PipeOptions: [
    { @style: 'width: 100px',
    @style.color: 'dirExp',
  },
  ]
})

class MyPipe {
  constructor() {
    console.log('Pipe initialized.');
  }
}

```typescript

// This code snippet demonstrates the implementation of a directive
// in Angular, specifically for styling.

@Directive(
  @host: {
    @style: 'width: 100px',
    @style.color: 'dirExp',
  },
  @class: MyDir
)

@Pipe(
  @Host: {
    @style: 'width: 100px',
    @style.color: 'dirExp',
  },
  @PipeOptions: [
    { @style: 'width: 100px',
    @style.color: 'dirExp',
  },
  ]
)

class MyPipe {
  constructor() {
    console.log('Pipe initialized.');
  }
}
```

The reason for this is that the template instruction does not know if there are styling instructions and must assume that there are none and must collect all of the static styling.

When `@[style.color] = dirExp`, we need to insert a new data into the linked list.

```
let stylings = [
  ['', 'color', 'width', '100px'],  // newly inserted
  ['', 'color', 'color', 'red', 'width', '100px'],  // this is wrong
  ['', 'color', 'width', '100px'],
```
```

  index = isPrevDirection ? getTStylingRangePrev(tRange) : getTStylingRangeNext(tRange);
}

In firstUpdatePass the styling instructions create a linked list of styling.

On subsequent passes it is possible for a styling instruction to try to read a binding
which
has not yet executed. In that case we will find

'NO_CHANGE' and we should assume that we have 'undefined' (or empty array in case of styling-map instruction) instead.

This allows the resolution to apply the value (which may later be overwritten when the binding actually executes.)

let valueAtLVIndex = lView[index + 1];

if (valueAtLVIndex === NO_CHANGE) {
  // In firstUpdatePass the styling instructions create a linked list of styling.
  // On subsequent passes it is possible for a styling instruction to try to read a binding
  // which has not yet executed. In that case we will find 'NO_CHANGE' and we should assume that
  // we have 'undefined' (or empty array in case of styling-map instruction) instead.

  valueAtLVIndex = isStylingMap ? EMPTY_ARRAY : undefined;
}

let currentValue = isStylingMap ? keyValueArrayGet(valueAtLVIndex, prop) : key === prop ? valueAtLVIndex : undefined;

if (containsStatics && !isStylingValuePresent(currentValue)) {
  currentValue = keyValueArrayGet(rawKey as KeyValueArray<any>, prop);
}

if (isStylingValuePresent(currentValue)) {
  value = currentValue;
  if (isPrevDirection) {
    return value;
  }
}

let residual = isClassBased ? tNode.residualClasses : tNode.residualStyles;

if (residual != null) {
  value = keyValueArrayGet(residual!, prop);
}

return value;

Determines if the binding value should be used (or if the value is 'undefined' and hence priority resolution should be used.)

Current test is 'undefined' value is considered non-binding. That is 'undefined' says I don't have an opinion as to what this binding should be and you should consult other bindings by priority to determine the valid value.

This is extracted into a single function so that we have a single place to control this. The return value is 'undefined' unless

Normalizes and/or adds a suffix to the value.

No suffix is added if the value is not a string or if the value is already a string.

Stringified value is obtained by calling

'stringify(unwrapSafeValue(value));'

return value;

If the 'tNode' has input shadow:

Tests if the 'tNode' has input shadow.

An input shadow is when a directive steals (shadows) the input by using '@Input(style)' or '@Input(class)' and it's not in the class-based 'true' if 'class' (false) if 'style'.

/**
 * Takes an array of @link KeyValueDifferFactory and returns a provider used to extend the
 * inherited @link KeyValueDiffer instance with the provided factories and return a new @link
 * KeyValueDiffer instance.
 * @usageNotes
 * Example
 * The following example shows how to extend an existing list of factories, which will only be applied to the injector for this component and its children.
 * This step is all that's required to make a new @link KeyValueDiffer available.
 * @Component( {
 *   viewProviders: [KeyValueDifferFactory]
 * })
 * @static extend(factories: KeyValueDifferFactory[]): StaticProvider {
 *   return {
 *     provide: KeyValueDiffers,
 *     useFactory: (parent: KeyValueDiffer) => {
 *       if (!parent) {
 *         throw new Error('Cannot find a differ supporting object');
 *       }
 *       return KeyValueDiffers.extend(iterableDiffers, factories);
 *     },
 *     deps: [KeyValueDifferFactory, new SkipSelf(), new Optional()]
 *   };
 * }

  find(kv: any): KeyValueDifferFactory {
    const factory = this.factories.find(f => f.supports(kv));
    if (factory) {
      return factory;
    }
    throw new Error('Cannot find a differ supporting object');
  }
}

  called during a pre-order traversal of the view tree (that is calling the
  parent hooks before the child hooks) these events are sent in using an/ // post-order traversal of the tree (children
  before parents). This changes the/ // meaning of initIndex in the view state. For ngOnInit, initIndex tracks the
  expected nodeIndex which a ngOnInit should be called. When sending an/ // ngAfterContentInit and ngAfterViewInit it is the expected count of an/ // ngAfterContentInit or ngAfterViewInit methods that have been called. This/ // ensure
  that despite being called recursively or after picking up after an/ // exception, the ngAfterContentInit or 
ngAfterViewInit will be called on the/ // correct nodes. Consider for example, the following (where E is an 
element/ and D is a directive)/ Tree: 

<table>
<thead>
<tr>
<th>Pre-order index</th>
<th>Post-order index</th>
</tr>
</thead>
<tbody>
<tr>
<td>E1</td>
<td>0</td>
</tr>
<tr>
<td>1</td>
<td>D3 2</td>
</tr>
<tr>
<td>0</td>
<td>E4 3</td>
</tr>
<tr>
<td>E5 4</td>
<td>4</td>
</tr>
<tr>
<td>E6 5</td>
<td>2</td>
</tr>
<tr>
<td>E7 6</td>
<td>3</td>
</tr>
</tbody>
</table>
| As can be seen, the post-order index has an unclear relationship to the/ // pre-order index (postOrderIndex === preOrderIndex - parentCount +/ // childCount). Since number of calls to 
ngAfterContentInit and ngAfterViewInit/ are stable (will be the same for the same view regardless of exceptions
or\n// recursion) we just need to count them which will roughly correspond to the\n// post-order index (it skips\n// elements and directives that do not have an lifecycle hooks)\n//. For example, if an exception is raised in the\n// E6.onAfterViewInit() the initIndex is left at 3 (by shouldCallLifecycleInitHook() which set it to initIndex + 1)\n//. When checkAndUpdateView() is called again D3, E2 and E6 will not have their\n// ngAfterViewInit() called but,\n// starting with E7, the rest of the view will begin getting\n// the view called until a check and pass is complete.\n// This algorithm also handles recursion. Consider if E4\'s\n// ngAfterViewInit() indirectly calls E1\'s\n// ChangeDetectorRef.detectChanges(). The expected\n// initIndex is set to 6, the recursive checkAndUpdateView()\n// starts walk again.\n// D3, E2, E6, E7, E5 and E4 are skipped,\n// ngAfterViewInit() is called on E1.\n// When the recursion returns the initIndex will be 7 so E1 is skipped as it\n// has already been called in the recursively called\n// checkAnUpdateView().\n\nexport function callLifecycleHooksChildrenFirst(view: ViewData, lifecycles: NodeFlags)\n{\n  if (!(view.def.nodeFlags & lifecycles)) {\n    return;\n  }\n  const nodes = view.def.nodes;\n  let initIndex = 0;\n  for (let i = 0; i < nodes.length; i++) {\n    const nodeDef = nodes[i];\n    let parent = nodeDef.parent;\n    if (!parent && nodeDef.flags & lifecycles) {\n      // matching root node (e.g. a pipe)\n      callProviderLifecycles(view, i, nodeDef.flags & lifecycles, initIndex++);\n    }\n    if ((nodeDef.childFlags & lifecycles) === 0) {\n      // no child\n      i += nodeDef.childCount;\n    }\n    while (parent && (parent.flags & NodeFlags.TypeElement) && i === parent.nodeIndex + parent.childCount) {\n      // last child of an element\n      if (parent.directChildFlags & lifecycles) {\n        initIndex = callElementProvidersLifecycles(view, parent, lifecycles, initIndex);\n      }\n    }\n  }\n}\n

/**
 * Retrieves the plural function used by ICU expressions to determine the plural case to use in
 * a given locale.
 * @param locale The code of the locale whose plural function we want.
 * @returns The plural function for the given locale.
 */
export function findLocalePluralCase(locale: string): (value: number) => number {
  const data = findLocaleData(locale);
  return data[LocaleDataIndex.PluralCase];
}
```

The code snippet above is part of a larger source file related to the Stealthwatch 7.4.0 release of Open Source Used In Secure Network Analytics. It involves TypeScript code for managing locale data and handling plural cases for ICU expressions, which are essential for internationalization and localization in applications.

When the parent ICU is changing it must clean up child ICUs as well. For this reason it needs to know which child ICUs to run clean up for as well. In the above example this would be the Array of Arrays which first array represents the case, and second array represents the child ICUs to clean up. There may be more than one child ICUs per case. A list of case values which the current ICU will try to match. The last value is `other` cases: any. A set of OpCodes to apply in order to build up the DOM render tree for the ICU create: I18nMutateOpCodes[]. A set of OpCodes to apply in order to destroy the DOM render tree for the ICU remove: I18nMutateOpCodes[]. A set of OpCodes to apply in order to update the DOM render tree for the ICU bindings:

```ts
[
  [], // `=`0` has no sub ICUs
  [1], // `other` has one subICU at `1`st index
]
```

There may be more than one child ICUs per case.

```ts
[
  ,   // `=`0` has no sub ICUs
  [1],  // `other` has one subICU at `1`st index.
]
```
changeMask;
    // Reset changeMask & maskBit to default for the next update cycle

      // timing) of this call is critical to ensure this works correctly (modules get registered when expected)
      // without bloating bundles (modules are registered when otherwise not referenced).
      // In View Engine, registration occurs in the .ngfactory.js file as a side effect. This has
      // several practical consequences:
      // - If an .ngfactory file is not imported, the module won't be registered (and can be) // tree shaken).
      // - In Ivy, things are a bit different. .ngfactory files still exist for compatibility, but are not a required API to use - there are other ways to obtain an NgModuleFactory for a
      //   NgModule. Thus, relying on a side effect in the .ngfactory file is not sufficient. Instead,
      //   the side effect of registration is added here, in the constructor of NgModuleFactory,
      //   ensuring no matter how a factory
is created, the module is registered correctly. 
 // An alternative would be to include the registration side effect inline following the actual
 // NgModule definition. This also has the correct timing, but breaks tree
shaking - modules 
 // will be registered and retained even if they’re otherwise never referenced.

}
@usageNotes

Extends

[RxJS `Subject`](https://rxjs.dev/api/index/class/Subject)

In the following example, a component defines two output properties
that create event emitters. When the title is clicked, the emitter
emits an open or close event to toggle the current visibility state.

```html
@Output() open: EventEmitter<any> = new EventEmitter();
@Output() close: EventEmitter<any> = new EventEmitter();
```

Emits an event containing a given value.

```html
constructor(isAsync: boolean = false) {
  super();
  this.__isAsync = isAsync;
}
```

`emit` method.

```html
emit(value: any) {
  super.next(value);
}
```

Registers handlers for events emitted by this instance.

```html
subscribe(generatorOrNext?: any, error?: any, complete?: any): Subscription {
  ...
}
```

This extends Subject as a class.

```html
class EventEmitter_ extends Subject<any> {
  __isAsync: boolean;  // tslint:disable-line
  constructor(isAsync: boolean = false) {
    super();
    this.__isAsync = isAsync;
  }
  ...
}
```

## Example

```html
<zippy open="onOpen($event)" (close)="onClose($event)"></zippy>
```

- `open` argument passed to the output handler
- `close` argument passed to the output handler
- `@observable` annotations
- `@output` decorator
- `@Input` decorator
- `@Output` decorator
- `@Subscribe` decorator
- `@EventEmitter` decorator
- `@Component` decorator
- `@NgModule` decorator
```typescript
@ViewChildren(Item) items:QueryList<Item>; @ViewChildren(VirtualScroll) virtualScroll:QueryList<VirtualScroll>; @ViewChildren(VirtualItem) virtualItem:QueryList<VirtualItem>; @ViewChildren(Scroll) scroll:QueryList<Scroll>; @ViewChildren(ScrollWheel) scrollWheel:QueryList<ScrollWheel>; @ViewChildren(ScrollWheelEventTarget) scrollWheelEventTarget:QueryList<ScrollWheelEventTarget>; @ViewChildren(ScrollWheelEventTarget) scrollWheelEventTarget2:QueryList<ScrollWheelEventTarget>;

view is created). A method called when a given query should match any nodes past this point. A method called when processing the templateEnd instruction - this is mostly useful to determine if a given content query should match any views created based on TemplateRef or ViewContainerRef etc.; A method that iterates over all the TQueries in a given TView and calls the corresponding `getByIndex` on each and every TQuery. A proxy method that iterates over all the TQueries in a given TView and calls the corresponding `elementStart` on each and every TQuery. A method that iterates over all the TQueries in a given TView and calls the corresponding `elementEnd` on each and every TQuery. A proxy method that iterates over all the TQueries in a given TView and calls the corresponding `template` on each and every TQuery.

### LQueries Interface

An interface that represents query-related information specific to a view instance. Most notably:

- Materialized query matches
- A pointer to a QueryList where materialized query results should be reported
- An export interface LQuery<T>

Most of the methods on this interface are simple proxy methods to the corresponding functionality on TQuery.

### LQuery<T> Interface

An interface that represents query-related information specific to a view instance. Most notably:

- Materialized query matches
- A pointer to a QueryList where materialized query results should be reported
- An export interface LQuery<T>

### TQueries Interface

An interface that represents a collection of individual TQuery objects tracked in a given view. Most of the methods on this interface are simple proxy methods to the corresponding functionality on TQuery.

### TQuery Interface

A container for a single query match, containing information about the matching node and the result of the query.

### TQueryPart Interface

A container for a single query part, containing information about a specific query within a larger query result.

### TNode Interface

A container for a single node, containing information about the node and its properties.

### TView Interface

A container for a single view, containing information about the view and its properties.

### TContainerNode Interface

A container for a single container node, containing information about the container node and its properties.

### TComponent Interface

A container for a single component, containing information about the component and its properties.

### TComponentContainer Interface

A container for a single component container, containing information about the component container and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.

### TViewRef Interface

A reference to a single view, containing information about the view and its properties.

### TContainerRef Interface

A reference to a single container node, containing information about the container node and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.

### TComponentContainerRef Interface

A reference to a single component container, containing information about the component container and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.

### TComponentContainerRef Interface

A reference to a single component container, containing information about the component container and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.

### TComponentContainerRef Interface

A reference to a single component container, containing information about the component container and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.

### TComponentContainerRef Interface

A reference to a single component container, containing information about the component container and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.

### TComponentContainerRef Interface

A reference to a single component container, containing information about the component container and its properties.

### TComponentRef Interface

A reference to a single component, containing information about the component and its properties.
A method called when an embedded view is inserted into a container. As a result all impacted `LQuery` objects (and associated `QueryList`) are marked as dirty.

A method called when an embedded view is detached from a container. As a result all impacted `LQuery` objects (and associated `QueryList`) are marked as dirty.

inputs?: string[]; /* *\n * Enumerates the set of event-bound output properties.
 * When an output property emits an event, an event handler attached to that event
 * in the template is triggered. *\n * The `outputs` property defines a set of `directiveProperty` to `bindingProperty` configuration.
 * The `directiveProperty` specifies the component property that emits events.
 * The `bindingProperty` specifies the DOM property the event handler is attached to.
 * `@Component({ select: 'child-dir', outputs: [ 'bankNameChange' ] })` is a template: `<input

On the other hand, `OutputsConfig` is a property of a directive or a component, which controls how outputs are handled.

```typescript
/**
 * Configures the [injector](guide/glossary#injector) of this
 * directive or component with a [token](guide/glossary#di-token) that maps to a [provider](guide/glossary#provider) of a
dependency.
 */
```

The `exports` property is used to export a component as a module.

```typescript
/**
 * When present, this directive/component is ignored by the AOT
 * compiler. It remains in distributed code, and the JIT compiler attempts to compile it
 * at run time, in the
 * browser.
 * To ensure the correct behavior, the app must import `@angular/compiler`.
 * @jit
 */
```

The `NgModule` is the main component of an Angular app.

```typescript
/**
 * Component decorator interface
 */
```

The `NgModule` is the main component of an Angular app.

```typescript
/**
 * Type of the Directive metadata.
 */
```

The `NgModule` is the main component of an Angular app.

```typescript
/**
 * Decorator that marks a class as an Angular component and provides configuration
 * metadata that determines how the component should be processed.
 * instantiated, and used at runtime.
 * Components are the most basic UI building block of an
 * Angular app.
 * An Angular app contains a tree of Angular components.
 * Angular components are a subset of directives, always associated with a template.
 * Unlike other directives, only one component can be
 * instantiated for a given element in a
 * template.
 * A component must belong to an NgModule in order for it to be available
 * to another component or application. To make it a member of an NgModule,
 * list it in

Open Source Used In Secure Network Analytics (Stealthwatch) 7.4.0 7724
the `declarations` field of the `NgModule` metadata.

* Note that, in addition to these options for configuring a directive, you can control a component's runtime behavior by implementing life-cycle hooks. For more information, see the guide [Life-cycle Hooks](guide/lifecycle-hooks) guide.

* Note that, in addition to these options for configuring a directive, you can control a component's runtime behavior by implementing life-cycle hooks. For more information, see the guide [Life-cycle Hooks](guide/lifecycle-hooks) guide.

* @usageNotes

### Setting component inputs

* The following example creates a component with two data-bound properties specified by the `inputs` value.

* @example core/ts/metadata/directives.ts region='component-input'

### Setting component outputs

* The following example shows two event emitters that emit on an interval. One emits an output every second, while the other emits every five seconds.

* @example core/ts/metadata/directives.ts region='component-output-interval'

### Injecting a class with a view provider

```ts
  @Directive({
    selector: 'needs-greeter'
  })
  class NeedsGreeter {
    greeter: Greeter;

    constructor(greeter: Greeter) {
      this.greeter = greeter;
    }

    greet(name: string) {
      return 'Hello ' + name + '!
    }
  }

  @Component({
    selector: 'greet',
    viewProviders: [
      NeedsGreeter
    ],
    template: `<needs-greeter>
      {{ greet('John') }}
    </needs-greeter>`
  })
  class HelloWorld {
  }
```

### Preserving whitespace

Removing whitespace can greatly reduce AOT-generated code size and speed up view creation. As of Angular 6, the default for `preserveWhitespaces` is false (whitespace is removed).

* To change the default setting for all components in your application, set `preserveWhitespaces` option of the AOT compiler.

* By default, the AOT compiler removes whitespace characters as follows:

  * Trims all whitespaces at the beginning and the end of a template.

  * Removes whitespace-only text nodes. For example,

    ```html
    <button>Action 1</button>  <button>Action 2</button>
    ```

    becomes:

    ```html
    <button>Action 1</button><button>Action 2</button>
    ```

  * Replaces a series of whitespace characters in text nodes with a single space.

    ```html
    &nbsp;&nbsp;&nbsp;&nbsp;some text
    ```

    becomes:

    ```html
    &nbsp;&nbsp;&nbsp;&nbsp;some text
    ```

* Does NOT alter text nodes inside HTML tags such as `<pre>` or `<textarea>`, where whitespace characters are significant.

* Note that these transformations can influence DOM nodes layout, although impact

* should be minimal.

* You can override the default behavior to preserve whitespace characters in certain fragments of a template. For example, you can exclude an entire DOM sub-tree by using the `ngPreserveWhitespaces` attribute.

```html
  <div ngPreserveWhitespaces>
    whitespaces are preserved here
    <span> and here </span>
  </div>
```

* You can force a single space to be preserved in a text node by using `&nbsp;`.

```html
  &nbsp;&nbsp;&nbsp;&nbsp;some text
```

* @Annotation

The `NgModule` metadata in the `@NgModule` decorator.

* Specifies a component's metadata.

```ts
export interface NgModule {
  /**
   * The relative path or URL of the module that contains the component.
   */
  moduleId?: string;
```
absolute URL of a template file for an Angular component. * If provided, do not supply an inline template using
`template`. * An inline template for an Angular component. If provided, do not supply a template file using
`templateUrl`. * One or more relative paths or absolute URLs for files containing CSS stylesheets to use
* in this component. * One or more animation `trigger()` calls, containing `*state()` and `transition()`
definitions. * See the [Animations guide](guide/animations) and animations API documentation. * One or more animation
`options`: * An encapsulation policy for the template and CSS styles. One of:

entryComponents?: Array<Type<any>|any[]>;
property is used for input binding.

The following example creates a component with two input properties, one of which is given a special binding name:

```typescript
@Component({
  selector: 'bank-account',
  template: `
    Bank Name: {{bankName}}
    Account Id: {{id}}
  `})
class BankAccount {
  // This property is bound using its original name.
  @Input() bankName: string;
  // this property value is bound to a different property name when this component is instantiated in a template.
  @Input('account-id') id: string;
}

@Component({
  selector: 'app',
  template: `
    <bank-account bankName="RBC" account-id="4747"></bank-account>
  `})
class App {}
```

@see [Input and Output properties](guide/inputs-outputs)

---

```
/**
 * Type of metadata for an 'Input' property.
 * @publicApi
 */
export interface Input {
  /**
   * The name of the DOM property to which the input property is bound.
   */
  bindingPropertyName?: string;
}

/**
 * @Annotation
 * @publicApi
 */
export const Input: InputDecorator = makePropDecorator('Input', (bindingPropertyName?: string) => ({bindingPropertyName}));

/**
 * Type of the 'Output' decorator / constructor function.
 *
 * The DOM property bound to the output property is automatically updated during change detection.
 * You can supply a name to use in templates when the component is instantiated, that maps to the name of the bound property. By default, the original name is used for output binding.
 * The DOM property to which the output property is bound is set in the prototype.
 * This property is not bound, and is not automatically updated by Angular.
 * normalizedBankName: string;
 * @Component({
 *   selector: 'app',
 *   template: '<bank-account bankName="RBC" account-id="4747"></bank-account>'
 * })
 * class App {
 *   @Input('account-id') id: string;
 * }

@Input('account-id') id: string;

@see [Input and Output properties](guide/inputs-outputs)

---

```
```
that attaches a click listener to a button and counts clicks.

```ts
@Directive({selector: 'button[Counting]'})
class CountClicks {
  @HostListener('click', ['$event.target'])
  onClick(btn) {
    console.log('button', btn, 'number of clicks:', this.numberOfClicks++)
  }
}
```

The following example registers another DOM event handler that listens for
key-press events.

```ts
import { HostListener, Component } from '@angular/core';

@Component({
  selector: 'app',
  template: `<h1>Hello, you have pressed keys {{counter}} number of
  times!</h1> Press any key to increment the counter.
  <button (click)="resetCounter()">Reset
  Counter</button>`
})
class AppComponent {
  counter = 0;
  @HostListener('window:keydown', ['$event'])
  handleKeyDown(event: KeyboardEvent) {
    this.counter++;
  }
  resetCounter() {
    this.counter = 0;
  }
}
```

@Annotation
@publicApi
*/

```ts
export let HostListener:
    HostListenerDecorator =
        makePropDecorator('HostListener', (eventName?: string, args?: string[]) =>
            {eventName, args}));

// render3CompileComponent, render3CompileDirective, render3CompilePipe,
// render3CompileNgModule, etc.
```
[providers](guide/glossary#provider) *Definition*). Usage without a generic type is deprecated.*

```typescript
@see [Deprecations](guide/deprecations#modulewithproviders-type-without-a-generic)
*/
export interface ModuleWithProviders<T> {
  ngModule: Type<T>;
  providers?: Provider[];
}

/**
 * Type of the NgModule decorator / constructor function.
 *
 * @usageNotes
 * Dependencies whose providers are listed here become available for injection into any component, directive, pipe or service that is a child of this injector.
 * The NgModule used for bootstrapping uses the root injector, and can provide dependencies to any part of the app.
 * A lazy-loaded module has its own injector, typically a child of the app root injector.
 * Lazy-loaded services are scoped to the lazy-loaded module's injector.
 * If a lazy-loaded module also provides the `UserService`, any component creating a within that module's context (such as by router navigation) gets the local instance of the service, not the instance in the root injector.
 *
 * Components in external modules continue to receive the instance provided by their injectors.
 *
 * The following example defines a class that is injected into the Hello World NgModule:
 *
```typescript
class Greeter {
  greet(name: string) {
    return 'Hello ' + name + '!
  }
}

@NgModule({
  providers: [Greeter]
})
class HelloWorld {
  greeter: Greeter;
  constructor(greeter: Greeter) {
    this.greeter = greeter;
  }
}
```
```

Components and directives are private by default. If this ModuleA does not export `UserService`, then only the components within this NgModule can use `UserService`.

```typescript
@NgModule({
  imports: [CommonModule]
})
class MainModule {
  ...
}
```

Angular automatically adds components in the module's bootstrap and route definitions into the `entryComponents` list.
Use this option to add components that are bootstrapped using one of the imperative techniques, such as `ViewContainerRef.createComponent()`.

The set of components that are bootstrapped when this module is bootstrapped. The components listed here are automatically added to `entryComponents`.

The set of schemas that declare elements to be allowed in the NgModule.

Elements and properties that are neither Angular components nor directives must be declared in a schema.

Allowed value are `NO_ERRORS_SCHEMA` and `CUSTOM_ELEMENTS_SCHEMA`.

@security When using one of `NO_ERRORS_SCHEMA` or `CUSTOM_ELEMENTS_SCHEMA` you must ensure that allowed elements and properties securely escape inputs.

A name or path that uniquely identifies this NgModule in `getModuleFactory`.

If left `undefined`, the NgModule is not registered with in `getModuleFactory`.

When present, this module is ignored by the AOT compiler.

It remains in distributed code, and the JIT compiler attempts to compile it at run time, in the browser.

To ensure the correct behavior, the app must import `@angular/compiler`.

@deprecated Since 9.0.0. With Ivy, this property is no longer necessary.

Use this option to add components that are bootstrapped using one of the imperative techniques, such as `ViewContainerRef.createComponent()`. The components listed here are automatically added to `entryComponents`.

/**
 * A [DI token](guide/glossary#di-token "DI token definition") that provides a set of callbacks to be called for
every component that is bootstrapped.

Each callback must take a `ComponentRef` instance and return nothing.

```typescript
@ComponentRef => void
```

`APP_BOOTSTRAP_LISTENER` in new InjectionToken<Arrayциально<ComponentRef<any>>>() =>
void>(appBootstrapListener);`\n
A [DI token](guide/glossary#di-token \"DI token definition\") that indicates the root directory of\nthe application\n
```typescript
@export
```

Use of this source code is governed by an MIT-style license that can be found in the LICENSE file at https://angular.io/license

```typescript
import { Injectable } from './di';

@Injectable()
export class Console {
  log(message: string): void {
    // tslint:disable-next-line:no-console
    console.log(message);
  }

  // Note: for reporting errors use 'DOM.logError(' as it is platform specific
  warn(message: string): void {
    // tslint:disable-next-line:no-console
    console.warn(message);
  }
}
```

```typescript
import { LOCALE_ID } from '@angular/core';
import {
  platformBrowserDynamic } from '@angular/platform-browser-dynamic';
import { AppModule } from './app/app.module';

platformBrowserDynamic().bootstrapModule(AppModule, {
  providers: 
  [{provide: LOCALE_ID, useValue: 'en-US'}]
});
```

### Example

```typescript
import { TRANSLATIONS_FORMAT } from '@angular/core';
import { platformBrowserDynamic } from '@angular/platform-browser-dynamic';
import { AppModule } from './app/app.module';

platformBrowserDynamic().bootstrapModule(AppModule, {
  providers: 
  [{provide: TRANSLATIONS_FORMAT, useValue: 'xlf'}]
});
```

Use this enum at bootstrap as an option of `bootstrapModule` to define the strategy when building the translation file.
case of missing translations:

- Error: throw if you have missing translations.
- Warning (default): show a warning in the console and/or shell.
- Ignore: do nothing.

See the [i18n guide](https://angular.io/guide/i18n#missing-translation) for more information.

* @usageNotes

* ### Example

```typescript
import { MissingTranslationStrategy } from '@angular/core';
import { platformBrowserDynamic } from '@angular/platform-browser-dynamic';

is not optimal, because we're walking similar trees multiple times. ViewEngine could do it more efficiently, because all the insertions go through Renderer2, however that's not the case in Ivy. This approach is being used because: 1. Matching the ViewEngine behavior would mean potentially introducing a dependency from Renderer2 to Ivy which could bring Ivy code into ViewEngine. 2. We would have to make Renderer3 "know" about debug nodes. 3. It allows us to capture nodes that were inserted directly via the DOM. nativeNode & _queryNativeNodeDescendants(nativeNode, predicate, matches, elementsOnly);

```

flush it if needed.

When the TestBed is reset, it clears the JIT module compilation queue, cancelling any in-progress module compilation. This creates a potential hazard - the very first time the TestBed is initialized (or if it's reset without being initialized), there may be pending compilations of modules declared in global scope. These compilations should be finished.

To ensure that globally declared modules have their components scoped properly, this function is called whenever TestBed is initialized or reset. The _first_ time that this happens, prior to any other operations, the scoping queue is flushed.

/**
 * Used to resolve resource URLs on `@Component` when used with JIT compilation.
 *
 * Example:
 * ```
 * @Component({
 *   selector: 'my-comp',
 *   templateUrl: 'my-comp.html', // This requires asynchronous resolution
 * })
 * class MyComponent{
 * }
 *
 * // Calling `renderComponent` will fail because `renderComponent` is a synchronous process and `MyComponent`’s
 * `@Component.templateUrl` needs to be resolved asynchronously.
 * Calling `resolveComponentResources()` will resolve `@Component.templateUrl` into the
 * `@Component.template`, which allows `renderComponent` to proceed in a synchronous manner.
 * Use browser’s `fetch()` function as the default resource resolution strategy.
 * `resolveComponentResources(fetch).then(() => {
 *  // After resolution all URLs have been converted into `template` strings.
 *  renderComponent(MyComponent);
 * })`;
 *
 * NOTE: In AOT the resolution happens during compilation, and so there should be no need to call this method outside JIT mode.
 * In this example, the `@Component.templateUrl` URL string needs to be asynchronously resolved and then processed.

/**
 * Creates a token that can be used in a DI Provider.
 *
 * Use an `InjectionToken` whenever the type you are injecting is not reified (does not have a runtime representation) such as when injecting an interface, callable type, array or parameterized type.
 *
 * `InjectionToken` is parameterized on `T` which is the type of object which will be returned by the `Injector` as a result of the injection.
 *
 * When creating an `InjectionToken`, you can optionally specify a factory function which returns a (possibly by creating) a default value of the parameterized type `T`. This set up the `InjectionToken` using this factory as a provider as if it was defined explicitly in the application's root injector. If the factory function, which takes zero arguments, needs to inject dependencies, it can do so using the `inject` function. See below for an example.
 * Additionally, if a `factory` is specified you can also specify the `providedIn` option, which
 * overrides the above behavior and marks the token as belonging to a particular `@NgModule`. As mentioned above, `@NgModule` is the default value for `providedIn`.
 *
 * Plain InjectionToken
 * @example core/di/ts/injector_spec.ts
 *
 * Tree-shakable InjectionToken
 * @example core/di/shakable_ts/injector_spec.ts
 */

NOTE: it is assumed that `Array.isArray` and `typeof` operations are very efficient.

For efficiency reasons we often put several different data types (`RNode`, `LView`, `LContainer`) in same location in `LView`. This is because we don't want to pre-allocate space for it because the storage is sparse. This file contains utilities for dealing with such data types.

How do we know what is stored at a given location in `LView`.

- `Array.isArray(value) === false` => `RNode` (The normal storage value)
- `Array.isArray(value) === true`

For example to create the renderer or to do sanitization.

Tell ivy what the `document` is for this platform.

It is only necessary to call this if the current platform is not a browser.

For example to create the renderer or to do sanitization.

Tell ivy what the `document` is for this platform.

Angular does this for us in each of the standard platforms (`Browser`, `Server`, and `WebWorker`) by calling `setDocument()` when providing the `DOCUMENT` token.

Tell ivy what the `document` is for this platform.

The solution is to define `getDocument()` and `setDocument()` top-level functions for Ivy.

Wherever Ivy needs the global document, it calls `getDocument()` instead.

When running Ivy outside of a browser environment, it is necessary to call `setDocument()` to tell Ivy what the global `document` is.

Angular does this for us in each of the standard platforms (`Browser`, `Server`, and `WebWorker`) by calling `setDocument()` when providing the `DOCUMENT` token.

Tell Ivy what the `document` is for this platform.

It is only necessary to call this if the current platform is not a browser.

We've got a parent which is an element in the current view. We just need to verify if the parent

```javascript
var parentTNode = tNode.parent;
```
element is not a component. Component's content nodes are not inserted immediately
because they will be projected, and so doing insert at this point would be wasteful.
Since the projection would then move it to its final destination. Note that we can't
make this assumption when using the Shadow DOM,
because the native projection placeholders
have to be in place as elements are being inserted.

}
The following example defines a component with a large list of readonly data. Imagine the data changes constantly, many times per second. For performance reasons, we want to check and update the list every five seconds. We can do that by detaching the component's change detector and doing a local check every five seconds.

```typescript
class LiveData {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    // in a real application the returned data will be different every time
    get data() { return [1,2,3,4,5]; }
  }
}
```

```typescript
@Component({
  selector: 'live-data',
  inputs: ['live'],
  template: 'Data: {{dataProvider.data}}'
})
```

```typescript
DataProvider {
  data = 1;
  get data() { return [1,2,3,4,5]; }
}
```

```typescript
class GiantList {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    // in a real application the returned data will be different every time
    get data() { return [1,2,3,4,5]; }
  }
}
```

```typescript
@Component({
  selector: 'giant-list',
  template: `<li *ngFor="let d of dataProvider.data">Data {{d}}</li>`
})
```

```typescript
class App {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    ref.detach();
  }
}
```

```typescript
class GiantList {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    // in a real application the returned data will be different every time
    get data() { return [1,2,3,4,5]; }
  }
}
```

```typescript
@Component({
  selector: 'giant-list',
  providers: [DataProvider],
  template: `<li *ngFor="let d of dataProvider.data">Data {{d}}</li>`
})
```

```typescript
App {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    ref.detach();
  }
}
```

```typescript
class GiantList {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    // in a real application the returned data will be different every time
    get data() { return [1,2,3,4,5]; }
  }
}
```

```typescript
AppComponent {
  live = true;
  get data() { return [1,2,3,4,5]; }
}
```

```typescript
DataProvider {
  data = 1;
  get data() { return [1,2,3,4,5]; }
}
```

```typescript
class GiantList {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    // in a real application the returned data will be different every time
    get data() { return [1,2,3,4,5]; }
  }
}
```

```typescript
@Component({
  selector: 'giant-list',
  providers: [DataProvider],
  template: `<li *ngFor="let d of dataProvider.data">Data {{d}}</li>`
})
```

```typescript
App {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    ref.detach();
  }
}
```

```typescript
class GiantList {
  constructor(private ref: ChangeDetectorRef, private dataProvider: DataProvider) {
    // in a real application the returned data will be different every time
    get data() { return [1,2,3,4,5]; }
  }
}
```

```typescript
AppComponent {
  live = true;
  get data() { return [1,2,3,4,5]; }
}
```

```typescript
DataProvider {
  data = 1;
  get data() { return [1,2,3,4,5]; }
}
```

 * A change-detection tree collects all views that are to be checked for changes.
 * Use the methods to add and remove views from the tree, initiate change-detection,
 * and explicitly mark views as _dirty_, meaning that they have changed and need to be re-rendered.
 *
 * @see [Using change detection hooks](guide/lifecycle-hooks#using-change-detection-hooks)
 * @see [Defining custom change detection](guide/lifecycle-hooks#defining-custom-change-detection)
 *
 * @usageNotes
 *
 * The following examples demonstrate how to modify default change-detection behavior to perform explicit detection when needed.
 *
 * ### Use `markForCheck()` with `CheckOnce` strategy
 *
 * The following example defines a component with a large list of read-only data that is expected to change constantly, many times per second.
 * To improve performance, we want to check and update the list less often than the changes actually occur. To do that, we detach the component's change detector and perform an explicit local check every five seconds.
 *
 * ### Detach change detector to limit how often check occurs
 *
 * The following example creates a component displaying live data.
 * The component detaches its change detector from the main change detector tree when the `live` property is set to false, and reattaches it when the property becomes true.
 *
 * ### Reattaching a detached component
 *
 * The following example creates a component displaying live data.
 * The component detaches its change detector from the main change detector tree when the `live` property is set to false, and reattaches it when the property becomes true.

designed to ensure that an * synthetic host listener (e.g. `@HostListener("@foo.start")`) properly gets rendered * in the component's renderer. Normally all host listeners are evaluated with the * parent component's renderer, but, in the case of animation @triggers, they need * to be evaluated with the sub component's renderer (because that's where the * animation triggers are defined). * Do not use this instruction as a replacement for * 'listener'. This instruction * only exists to ensure compatibility with the ViewEngine's host binding behavior.

* parameter eventTargetResolver Function that returns global target information in case this listener * should be attached to a global object like window, document or body * function syntheticHostListener(eventTargetResolver, * listenerFn, useCapture, eventTargetResolver) * function findExistingListener(tView, lView, eventName, * tNode) find the matching event name on the same node but it might not have been * registered yet, so we must explicitly verify entries in the LView cleanup data

* listenerInternal(tView, lView, renderer, tNode, eventName, * listenerFn, useCapture, eventTargetResolver) * listenerInternal(tView, lView, renderer, tNode, eventName, * listenerFn, useCapture, eventTargetResolver) * function listenerInternal(tView, lView, renderer, tNode, eventName, * listenerFn, useCapture, eventTargetResolver) * function listenerInternal(tView, lView, renderer, tNode, eventName, * listenerFn, useCapture, eventTargetResolver)
one native event handler in presence of multiple handler functions, we just register a first handler
function as a native event listener and then chain (coalesce) other handler functions on top of the first
native handler function. var existingListener = null; Please note that the coalescing
described here doesn't happen for events specifying an alternative target (ex. (document:click)) - this is
to keep backward compatibility with the view engine. Also, we don't have to search for existing listeners is there are no directives // matching on a given node as we can't register multiple event handlers for the same event in a template (this would mean having duplicate attributes). if (!eventTargetResolver && isTNodeDirectiveHost) {
    existingListener = findExistingListener(ViewController, lView, eventName, tNode.index);
} else if (existingListener != null) {
    // Attach a new listener to coalesced listeners list, maintaining the order in which listeners are registered. For performance reasons, we keep a reference to the last // listener in that list (in _ngLastListenerFn_ field), so we can avoid going through the entire set each time we need to add a new listener.

    var lastListenerFn = existingListener._ngLastListenerFn_ || existingListener;

```ts
function propertyInterpolate8(propName, prefix, v0, i0, v1, i1, v2, i2, v3, i3, v4, i4, v5, i5, v6, i6, suffix, sanitizer) {
  var lView = getLView();
  var interpolatedValue = interpolation8(lView, prefix, v0, i0, v1, i1, v2, i2, v3, i3, v4, i4, v5, i5, v6, suffix);
  if (interpolatedValue !== NO_CHANGE) {
    var tView = getTView();
    var tNode = getSelectedTNode();
    elementPropertyInternal(tView, tNode, lView, propName, interpolatedValue, lView[RENDERER], sanitizer, false);
    ngDevMode &&
    storePropertyBindingMetadata(tView.data, tNode, propName, getBindingIndex() - 8, prefix, i0, i1, i2, i3, i4, i5, suffix);
  }
  return propertyInterpolate8;
}
```
The `TView.data` also stores prev/next duplicate bit. The duplicate bit if true says there either is a binding with the same name or there is a map (which may contain the name). This information is useful in knowing if other bindings with higher priority need to be searched for overwrites. *Note: See 'should support example in 'tnode_linked_list.ts' documentation' in 'tnode_linked_list_spec.ts' for working example.*

The correct priority order of concatenation is:

```
// Template: (ExampleComponent)
styleMap({color: '#001'});  // Binding index: 12
styleProp('color', '#002');  // Binding index: 10
// MyComponent
styleMap({color: '#003'});  // Binding index: 20
styleProp('color', '#004');  // Binding index: 22
// Style2Directive
styleMap({color: '#005'});  // Binding index: 24
styleProp('color', '#006');  // Binding index: 26
// ExampleComponent
```

**Example**

```
MyComponent
 // Style1Directive
styleMap({color: '#007'});  // Binding index: 28
styleProp('color', '#008');  // Binding index: 30
// Template:
(ExampleComponent)
```

By doing so we keep a linked list of all of the bindings which pertain to this element. *Notice that the bindings are inserted in the order of execution, but the 'TView.data' allows us to traverse them in the order of priority.*

```
// Template: (ExampleComponent)
styleMap({color: '#001'});  // Binding index: 10
styleProp('color', '#002');  // Binding index: 12
// MyComponent
styleMap({color: '#003'});  // Binding index: 20
styleProp('color', '#004');  // Binding index: 22
// Style2Directive
styleMap({color: '#005'});  // Binding index: 24
styleProp('color', '#006');  // Binding index: 26
// ExampleComponent
styleMap({color: '#007'});  // Binding index: 28
styleProp('color', '#008');  // Binding index: 30
```

---

*The above data structure allows us to re-concatenate the styling no matter which data binding changes.*

---

*Note: in addition to keeping track of next/previous index the 'TView.data' also stores prev/next duplicate bit. The duplicate bit if true says there either is a binding with the same name or there is a map (which may contain the name). This information is useful in knowing if other bindings with higher priority need to be searched for overwrites. *Note: See 'should support example in 'tnode_linked_list.ts' documentation' in 'tnode_linked_list_spec.ts' for working example.*

    function stringParser(stylingKey, value)
should fall back if the value is `undefined`. When value is being applied at a location, related values need to be consulted. If there is a higher priority binding, we should be using that one instead. For example `<div [style]='{color:exp1}' [style.color]='exp2'>` change to `exp1` requires that we check `exp2` to see if it is set to value other than `undefined`. If there is a lower priority binding and we are changing to `undefined` For example `<div [style]='{color:exp1}' [style.color]='exp2'>` change to `exp1` requires that we check `exp1` (and static values) and use that as new value. *NOTE: The styling stores two values. 1. The raw value which came from the application is stored at `index + 1` location. (This value is used for dirty checking). 2. The normalized value is stored at `index + 1` location. *param tData 'TData' used for traversing the priority. *param tNode 'TNode' to use for resolving static styling. Also controls search direction. *param tNode 'TNode' search next and quit as soon as `isStylingValuePresent(value)` is true. If no value found consult `tNode.residualStyle`/`tNode.residualClass` for default value. *param lView 'LView' used for retrieving the actual values. *param prop Property which we are interested in. *param index Starting index in the linked list of styling bindings where the search should start. *param isClassBased true if `class` is `false` if `style`). function findStylingValue(tData, tNode, lView, prop, index, isClassBased) { // 'TNode' to use for resolving static styling. Also controls search direction. // 'TNode' search next and quit as soon as `isStylingValuePresent(value)` is true. // If no value found consult `tNode.residualStyle`/`tNode.residualClass` for default value. // 'null` search prev and go all the way to end. Return last value where `isStylingValuePresent(value)` is true. *param lView 'LView' used for retrieving the actual values. *param prop Property which we are interested in. *param index Starting index in the linked list of styling bindings where the search should start. *param isClassBased true if `class` is `false` if `style`). function findStylingValue(tData, tNode, lView, prop, index, isClassBased) { // 'TNode' to use for resolving static styling.
