* * * Fields which exist on either directive or\ncomponent definitions, and need to be copied from\n* parent to child classes by the `CopyDefinitionFeature` \n
Open Source Used In Secure Network Analytics (Stealthwatch) 7.4.0 8305
```javascript
/*
 * The child class should use the providers of its parent.
 */

/*
 * Fields which exist only on component definitions, and need to be copied
 * classes by the `CopyDefinitionFeature`.
 */

/*
 * The type here allows any field of `ComponentDef` which is not also a property of `DirectiveDef`.
 */

/*
 * * The `CopyDefinitionFeature` then copies any needed fields from the parent class' definition,
 * including things like the component template function.
 */

/*
 * @param definition The definition of a child class which inherits from a parent class with its
 * own definition.
 */

/*
 * @codeGenApi
 */

/*
 * Resolves the providers which are defined in the DirectiveDef.
 */

/*
 * When inserting the tokens and the factories in their respective arrays, we
 * can assume that this method is called first for the component (if any), and then for other directives on the
 * same.
 */

/*
 * A consequence, the providers are always processed in that order:
 */

/*
 * 1) The view
 * 2) The providers of the component
 * 3) The providers of the other directives
 */

/*
 * This matches the structure of the injectables arrays of a view (for each node).
 */

/*
 * So the tokens and the factories can be pushed at the end of the arrays, except
 * in one case for multi-providers:
 */

/*
 * @param def the directive definition
 */

/*
 * @param providers: Array of `providers`.
 * @param viewProviders: Array of `viewProviders`.
 */
```

    var binding = def.bindings[bindingIdx];
    var propName = binding.name;
    // Note: This is still safe with Closure Compiler as
    // the user passed in the property name as an object has to `providerDef`.
    // So Closure Compiler will have renamed the property correctly already.
    var propData = providerData.data[propName] = value;
    if (def.flags & 524288 /* OnChanges */) {
        changes = changes || {};
        var oldValue = WrappedValue.unwrap(view.oldValues[def.bindingIndex + bindingIdx]);
        var binding_1 = def.bindings[bindingIdx];
        var propName = binding.name;
        // This function calls the
        SimpleChange(oldValue, value, (view.state & 2 /* FirstCheck */) !== 0)
ngAfterContentCheck, ngAfterContentInit, ngAfterViewInit, and ngDoCheck lifecycle hooks (depending on the node) called during a pre-order traversal of the view tree (that is calling the parent hooks before the child hooks) these events are sent in using a post-order traversal of the tree (children before parents). This changes the meaning of initIndex in the view state. For ngOnDestroy, initIndex tracks the expected nodeId which a ngOnDestroy should be called. When sending stream should call ngAfterContentInit and ngAfterViewInit it is the expected count of

ngAfterContentInit or ngAfterViewInit methods that have been called. This ensures that despite being called recursively or after picking up after an exception, the ngAfterContentInit or ngAfterViewInit will be called on the node after correct hooks. For example, the following (Consider for example, the example where E is an element) and D is a directive)

Tree:  

<table>
<thead>
<tr>
<th>pre-order index</th>
<th>post-order index</th>
</tr>
</thead>
<tbody>
<tr>
<td>E1</td>
<td>0</td>
</tr>
<tr>
<td>E2</td>
<td>1</td>
</tr>
<tr>
<td>D3</td>
<td>2</td>
</tr>
<tr>
<td>E4</td>
<td>3</td>
</tr>
<tr>
<td>E5</td>
<td>4</td>
</tr>
<tr>
<td>D5</td>
<td>5</td>
</tr>
<tr>
<td>E6</td>
<td>6</td>
</tr>
<tr>
<td>2</td>
<td>0</td>
</tr>
</tbody>
</table>

As can be seen, the post-order index has an unclear relationship to the pre-order index (postOrderIndex !== preOrderIndex - parentCount + childCount). Since number of calls to ngAfterContentInit and ngAfterViewInit is not always (will be the same for the same view regardless of exceptions or recursion) we just need to count them which will roughly correspond to the post-order index (it skips elements and directives that do not have lifecycle hooks).

For example, if an exception is raised in the E6.onAfterViewInit() the initIndex is left at 3 (by shouldCallLifecycleInitHook()) which set it to 0 on initIndex + 1. When checkAndUpdateView() is called again D3, E2 and E6 will not have their

ngAfterViewInit called but, starting with E7, the rest of the view will begin getting ngAfterViewInit called until a check and pass is complete. This algorithm also handles recursion. Consider if E4's ngAfterViewInit indirectly calls E1's ChangeDetectorRef.detectChanges(). The expected initIndex is set to 6, the recursive checkAndUpdateView() starts next again. / D3, E2, E6, E7, E5 and E4 are skipped, ngAfterViewInit is called on E1. When the recursion returns the initIndex will be 7 so E1 is skipped as it has already been called in the recursively called checkAndUpdateView().

/**
 * Keep track of the compilation depth to avoid reentrancy issues during
 * JIT compilation. This
 * matters in the following scenario: a module is still pending in the
 * queue, resulting in ‘A’ and ‘B’ to be patched with the NgModule scope. As the compilation of
 * ‘A’ is still in progress, this would introduce a circular dependency on its compilation. To avoid
 * this issue, the module scope queue is only flushed for compilations at the depth 0, to ensure
 * all compilations have finished.
 * 
 * Consider a component ‘A’ that extends component ‘B’, both declared in module ‘M’. During
 * the compilation of ‘A’ the definition of ‘B’ is requested to capture the inheritance chain,
 * potentially triggering compilation of ‘B’. If this nested compilation were to
 * trigger
 * `flushModuleScopingQueueAsMuchAsPossible` it may happen that module ‘M’ is still pending in
 * the
 * queue, resulting in ‘A’ and ‘B’ to be patched with the NgModule scope. As the compilation of
 * ‘A’ is still in progress, this would introduce a circular dependency on its compilation. To avoid
 * this issue, the module scope queue is only flushed for compilations at the depth 0, to ensure
 * all compilations have finished.
 */

/**
 * Decorator that binds a DOM event to a host listener and supplies configuration
metadata.
 * Angular invokes the supplied handler method when the host element emits the specified event,
and updates the bound element with the result.
 * If the handler method returns false, applies
\'preventDefault\' on the bound event.
 * The following example declares a directive that attaches a click listener to a button and counts clicks.
 * @Directive({ selector: 'button[clicking]' })
 * class CountClicks {
 * numberOfClicks = 0;
 *
 * @HostListener('click', [\'Event.target\'])
 * onCountClick(btn) {
 * console.log('button', btn, 'number of clicks:',
this.numberOfClicks);
}

// Example regis
```typescript
import '@angular/core';

@Component({
  selector: 'app',
  template: `<h1>Hello, you have pressed keys {{counter}} number of times!</h1> Press any key to increment the counter.
  <button (click)="resetCounter()">Reset Counter</button>
})
class AppComponent {
  counter = 0;
  @HostListener('window:keydown', ['$event'])
  handleKeyDown(event: KeyboardEvent) {
    this.counter++;
  }
  resetCounter() {
    this.counter = 0;
  }
}
```
null
```
/**
 * Provide this token to set the default currency code your application uses
 * It is used for i18n extraction, by i18n pipes (DatePipe, I18nPluralPipe, CurrencyPipe, and return nothing.
 *
 * `(componentRef: ComponentRef) => void`
 *
 * @publicApi
 */
```

Note: for reporting errors use `DOM.logError()` as it is platform specific.

```
return function (message) {
    console.log(message);
}();
```

Refer to the [i18n guide](https://angular.io/guide/i18n#setting-up-locale) for more information.

has no relation to locale currency. Defaults to USD if not configured. * See the [i18n guide](guide/i18n#setting-up-locale) for more information. * * div class="alert is-helpful">

**Deprecation notice:**

The default currency code is currently always `USD` but this is deprecated from v9. * * * In v10 the default currency code will be taken from the current locale. * If you need the previous behavior then set it by creating a `DEFAULT_CURRENCY_CODE` provider in your application `NgModule`:

```typescript
import { platformBrowserDynamic } from '@angular/platform-browser-dynamic';

var DEFAULT_CURRENCY_CODE = new InjectionToken('DefaultCurrencyCode');

@NgModule({
  providers: [
    {provide: DEFAULT_CURRENCY_CODE, useValue: 'USD'}
  ]
})
```

**In v10 the default currency code will be taken from the current locale.** Use this token at bootstrap to provide the content of your translation file (`xb`, `xlf` or `xlf2`) when you want to translate your application in another language. * * See the [i18n guide](guide/i18n#merge) for more information. * * var TRANSLATIONS = new InjectionToken('Translations');

```typescript
import { TRANSLATIONS } from '@angular/core';

platformBrowserDynamic().bootstrapModule(AppModule, {
  providers: [
    {provide: TRANSLATIONS, useValue: 'EUR'}
  ]
});
```

**In v10 the default currency code will be taken from the current locale.** Use this token at bootstrap to set the format of your `TRANSLATIONS_FORMAT`:

```typescript
import { TRANSLATIONS_FORMAT } from '@angular/core';

platformBrowserDynamic().bootstrapModule(AppModule, {
  providers: [
    {provide: TRANSLATIONS_FORMAT, useValue: 'xlf'}
  ]
});
```

**In v10 the default currency code will be taken from the current locale.**

An update callback to ' +

whenStable(). Is "zone.js/dist/task-tracking.js" loaded?');

If this.callback returns true doneCb will not be invoked

and no further updates will be issued.

The callback to invoke when Angular is stable or the timeout expires

whether comes first. @ param timeout Optional. The maximum
time to wait for Angular to become stable. If not specified, whenStable() will wait forever.

@ param updateCb Optional. If specified, this callback will be invoked whenever the set of pending
macros are updated, without waiting for Angular to become stable. If no update is made, the callback

will not be invoked.

The callback returned by whenStable() will be called when Angular is stable.

The callback will be invoked when Angular is stable or the timeout expires.

If the timeout is reached before that happens, the callback returns a list of the macro
tasks that were pending, otherwise null.

* @param doneCb The callback to invoke when Angular is stable.

Waits for the application to be stable with a timeout. If the timeout is reached before that

happens, the callback receives a list of the macro tasks that were pending, otherwise null.

* @param doneCb The callback to invoke when Angular is stable.

The callback will be invoked whenever the set of pending macros are updated, without waiting for
Angular to become stable. If no update is made, the callback will not be invoked.

And no further updates will be issued.

The callback returned by whenStable() will be called when Angular is stable.

The callback will be invoked when Angular is stable or the timeout expires.

If the timeout is reached before that happens, the callback returns a list of the macro
tasks that were pending, otherwise null.

* @param doneCb The callback to invoke when Angular is stable.

Waits for the application to be stable with a timeout. If the timeout is reached before that

happens, the callback receives a list of the macro tasks that were pending, otherwise null.

* @param doneCb The callback to invoke when Angular is stable.

The callback will be invoked whenever the set of pending macros are updated, without waiting for
Angular to become stable. If no update is made, the callback will not be invoked.

And no further updates will be issued.

The callback returned by whenStable() will be called when Angular is stable.

The callback will be invoked when Angular is stable or the timeout expires.

If the timeout is reached before that happens, the callback returns a list of the macro
tasks that were pending, otherwise null.

* @param doneCb The callback to invoke when Angular is stable.

Waits for the application to be stable with a timeout. If the timeout is reached before that

happens, the callback receives a list of the macro tasks that were pending, otherwise null.

* @param doneCb The callback to invoke when Angular is stable.

The callback will be invoked whenever the set of pending macros are updated, without waiting for
Angular to become stable. If no update is made, the callback will not be invoked.

And no further updates will be issued.

     * @platform
     *
     * Note two important points about `isStable`, demonstrated in the
     * examples below:
     * - the application will never be stable if you start any kind
     *   of recurrent asynchronous
     * task when the application starts
     * - for example for a polling process, started with a `\_setInterval`, a
     *   `\_setTimeout` or using RxJS operators like `\_interval`
     *   - the `isStable` Observable runs outside of the
     *     Angular zone
     *   - Let's imagine that you start a recurrent task
     *     (here incrementing a counter, using
     *     RxJS `\_interval`), and at the same time subscribe to `isStable`
     *     - and the trace "\_App is stable now" will never get
     *     logged.
     *   - If you want to execute something when the app is stable,
     *     you have to wait for the
     *     application to be stable before starting your polling process.
     *   - in this example, `isStable` will never emit `true`
     *     and the trace "\_App is stable now" will never get
     *     logged.
     * @param {module} module - the module to bootstrap.
     * @returns {Promise} A promise to wait for.
     * @platform
     * @example
     * ```

through `Renderer2`, however that's not the case in Ivy. This approach is being used because:

1. Matching the ViewEngine behavior would mean potentially introducing a dependency from `Renderer2` to Ivy which could bring Ivy code into ViewEngine.
2. We would have to make `Renderer3` "know about debug nodes.

3. It allows us to capture nodes that were inserted directly via the DOM.

```javascript
nativeNode && _queryNativeNodeDescendants(nativeNode, predicate, matches, elementsOnly);
```

injection of other types if necessary. * Optionally, a `providedIn` parameter specifies that the given type belongs to a particular `InjectorDef`, `NgModule`, or a special scope (e.g. `root`). A value of `null` indicates that the injectable does not belong to any scope. * Specifies that the given type belongs to a particular `InjectorDef` such as `NgModule`. * - `root` the root injector * - `any` all injectors. * - `null`, does not belong to any injector. Must be explicitly listed in the injector's `@providers`. * - `root` the root injector

* Optionally, a `providedIn` parameter specifies that the given type belongs to a particular `InjectorDef`, `NgModule`, or a special scope (e.g. `root`). A value of `null` indicates that the injectable does not belong to any scope. * The token to which this definition belongs. * - `null` does not belong to any injector. Must be explicitly listed in the injector's `@providers`. * - `root` the root injector

* In a case of no explicit injector, a location where the instance of the injectable is stored. * - `null` value: `undefined` * - `null` value

Information about the providers to be included in an `Injector` as well as how the given type * which carries the information should be created by the DI system. * An `InjectorDef` can import other types which have `InjectorDef`s, forming a deep nested structure of providers with a defined priority (identically to how `NgModule`s also have an import/dependency structure).

* - `null`, does not belong to any injector. Must be explicitly listed in the injector's `@providers`. * - `any` all injectors.

Factory method to execute to create an instance of the injectable. * - `null` value

In a case of no explicit injector, a location where the instance of the injectable is stored.

* - `null` value: `undefined` * - `null` value

Information about the providers to be included in an `Injector` as well as how the given type

* - `null` value

Information about the providers to be included in an `Injector` as well as how the given type

* - `null` value

Information about the providers to be included in an `Injector` as well as how the given type
`factory` function to create the type must be provided. If that factory function needs to inject arguments, it can use the `inject` function.

A provider must either have a factory or point to a type which has a `prov` static property (the type must be an `InjectableType`). An optional array of imports of other `InjectorType`s or `InjectorTypeWithModule`'s
whose providers will also be added to the injector. Locally provided types will override providers from imports.

The function `Object.hasOwnProperty` is not sufficient to distinguish this case because in older browsers (e.g. IE10) static property inheritance is implemented by copying the properties.

Instead, the definition’s ‘token’ is compared to the ‘type’, and if they don’t match then the property was not defined directly on the type itself, and was likely inherited. The definition is only returned if the ‘type’ matches the ‘def.token’.

Read the injectable def (‘prov’) for ‘type’ in a way which is immune to accidentally reading inherited value.

The function `getInheritedInjectableDef` reads the `prov` from one of its ancestors.

Get the name of a type, accounting for some cross-browser differences.

The function `getTypeName` converts the function to a string and parses its name out that way via a regex.

```typescript
getClosureSafeProperty);\n
// We need to keep these around so we can read off old defs if new defs are unavailable
export const NG_INJECTABLE_DEF = getClosureSafeProperty({ngInjectableDef:
  getClosureSafeProperty});

// We need to keep these around so we can read off old defs if new defs are unavailable
export const NG_INJECTOR_DEF = getClosureSafeProperty({ngInjectorDef:
  getClosureSafeProperty});

injected

factory function such as one defined for an
* `InjectionToken`. Throws an error if not called from such a
case. Within such a factory function, using this function to request injection of a dependency
* is faster
and more type-safe than providing an additional array of dependencies
* (as has been common with `useFactory` providers).

* `param` The injection token for the dependency to be injected.
* `param` flags Optional
flags that control how injection is executed.
* `param` The flags correspond to injection strategies that can be specified
with
* parameter decorators `@Host`, `@Self`, `@SkipSelf`, and `@Optional`.
* `param` returns True if injection is successful, null otherwise.

* `param` @usageNotes
* `param` Example
* `param` { @example core/di/ts/injector_spec.ts

region="ShakableInjectionToken"}
* `param` @publicApi
* `param` exports const inject = inject;

* `param` * Injects `root` tokens in limp mode.

* `param` If no injector exists, we can still inject tree-shakable providers which have `providedIn`
set to `"root"`. This is known as the limp mode injection. In such case the value is stored in the

   */

  //...
LView of a component.

* *n If null, this is the root view of an application (root component is in this view).
* *n [T_HOST]: TViewNode|TElementNode|null
* *n * When a view is destroyed, listeners need to be released and outputs need to be unsubscribed. This context array stores both listener functions wrapped within their context and output subscription instances for a particular view.
* *n * These change per LView instance, so they cannot be stored on TView. Instead, TView.cleanup saves an index to the necessary context in this array.
* *n // TODO: flatten into LView[] in [CLEANUP]: any[]|null
* *n * - For dynamic views, this is the context with which to render the template (e.g. `NgForContext`), or `{}` if not defined explicitly.
* *n * - For root view of the root component the context contains change detection data.
* *n * - For non-root components, the context is the component instance.
* *n * - For inline views, the context is null.
* *n [CONTEXT]:

[]RootContext|null
* *n * An optional Module Injector to be used as fall back after Element Injectors are consulted.
* *n * The template for a dynamically created view may be declared in a different view than *n it is inserted. We already track the `view where the template was inserted` in LView[PARENT], but we also need access to the `view where the template was declared`. Otherwise, we wouldn't be able to call the view's template function with the proper contexts. Context should be inherited from the declaration view tree, not the view that inserted the template.
* *n * Example (AppComponent template):
* *n <ng-template #foo></ng-template>       <-- declared here -->
* *n <some-comp [tpl]="foo"></some-comp>    <-- inserted inside this component
* *n * The `<ng-template>` above is declared in the AppComponent template, but it will be passed into the `<some-comp>` and inserted there. In this case, the declaration view would be the AppComponent.  
* *n * but the insertion view would be SomeComp. When we are removing views, we would want to traverse through the insertion view to clean up listeners. When we are calling the view's template function during change detection, we need the declaration view to get inherited context.
* *n [DECLARATION_VIEW]: LView|null
* *n * Points to the declaration component view, used to track transplanted `LView` s.
* *n * See: DECLARATION_COMPONENT_VIEW which points to the actual `LView` where it was declared, whereas
* *n * DECLARATION_COMPONENT_VIEW points to the component which may not be same as
* *n * Example:
* *n <div *ngIf="true">...
* *n * In the above case `DECLARATION_VIEW` for `myTpl` points to the `LView` of `ngIf` whereas
* *n * DECLARATION_COMPONENT_VIEW points to `LView` of the `myComp` which owns the template.
* *n * The reason for this is that all embedded views are always check-always whereas the component view can be check-always or on-push. When we have a transplanted view it is important to determine if we have transplanted a view from check-always declaration to on-push insertion point. In such a case the transplanted view needs to be added to the `LContainer` in the `LView` and CD during the declared view CD (in addition to the CD at the insertion point.) (Any transplanted views which are intra Component are of no interest because the CD strategy of declaration and insertion will always be the same, because it is the same Component.)
* *n * Queries already track moved views in `LView[DECLARATION_LCONTAINER]` and
* *n * `LContainer[MOVED_VIEWS]`. However the queries also track `LView` s which moved within the same component `LView`. Transplanted views are a subset of moved views, and we use
* *n * DECLARATION_COMPONENT_VIEW to differentiate them. As in this example:
* *n * Example showing intra component `LView` movement.
* *n * Example showing intra component `LView` movement.
thenBlock else elseBlock"></div>
   *   <ng-template #thenBlock>Content to render when condition is true.</ng-
template>
   *   <ng-template #elseBlock>Content to render when condition is false.</ng-
template>
   *
   * The `thenBlock` and `elseBlock` is moved but not transplanted.
   *
   * Example showing inter component 'LView' movement (transplanted view).
   *
   * In the above example `myTmpl` is passed into a different component. If
   * `insertion-component` * instantiates `myTmpl` and `insertion-component` is on-push then the 'LContainer' needs
   * to be marked as containing transplanted views and those views need to be CD as part of the LView * declaration CD.
   *
   * When change detection runs, it iterates over [MOVED_VIEWS] and CD any child 'LView's
   *
   * where the 'DECLARATION_COMPONENT_VIEW' of the current component and the child 'LView' does not match
   * (it has been transplanted across components.)
   *
   * Note:
   *
   * [DECLARATION_COMPONENT_VIEW] points to itself if the LView is a component view (the LView is
   * simplest / most common case).
   *
   * More flags for this view. See PreOrderHookFlags for more info.
   *
   * [PREORDER_HOOK_FLAGS]: PreOrderHookFlags;
   *
   * The number of direct transplanted views which need a refresh or have descendants themselves
   * that need a refresh but have not marked their ancestors as Dirty.
   * This tells us that during change detection we should still descend to find those children to refresh, even if the parents
   * are not "Dirty" / CheckAlways.
   *
   * [TRANSPLANTED_VIEWS_TO_REFRESH]:
   *
   * This must be stored in the view rather than using `data` as a marker so that we can properly support embedded
   * views. Otherwise, when exiting a child view `* back into the parent view, `data` will be defined and
   * 'creationMode' will be improperly reported as false. Whether or not the view is in creationMode,
   * * This must be stored in the view rather than using `data` as a marker so that
   * we can properly support embedded views.
   * Wherever, when exiting a child view we * back into the parent view, `data` will be defined and
   * 'creationMode' will be improperly reported as false. * CreationMode = 0b00000001000, * Whether or not this LView is on its first processing pass.
   *
   * An LView instance is considered to be on its first pass until it has completed one creation mode run and one update mode run. At this * time, the flag is turned off.
   *
   * FirstLViewPass = 0b00000001000, * Whether this view has default change detection strategy (checks always) or onPush *
   * CheckAlways = 0b00000010000, * Whether or not manual change detection is turned on for onPush components.
   *
   * This is a special mode that only marks components dirty in two cases:
   *
   * 1) There has been a change to an @Input property
   * 2) `markDirty()` has been called manually by the user
   *
   * Note that in this mode, the firing of events does NOT mark components dirty automatically.
   *
   * Manual mode is turned off by default for backwards compatibility, as events automatically mark OnPush components dirty in View Engine.
   *
   * TODO: Add a public API to ChangeDetectionStrategy to turn this mode on.
   *
   * ManualOnPush = 0b00000010000, * Whether or not this view is currently dirty (needing check)
   *
   * Dirty = 0b00000100000, * Whether or not this view is currently attached to change detection tree.
   *
   * Attached = 0b00000100000, * Whether or not this view is destroyed.
   *
   * Destroyed = 0b00000010000, * Whether or not this view is the root view
   *
   * IsRoot = 0b00000010000, * Whether this moved LView was needed to be refreshed at the insertion location because the LView's declaration was dirty.
   *
   * RefreshTransplantedView = 0b00000010000, * Index of the current init phase on last 21 bits
IndexWithinInitPhaseShift = 11,
IndexWithinInitPhaseReset = 0b0011111111111,

* Odd indices: Hook function

* In * viewHooks: HookData

*/* * Array of ngAfterViewChecked hooks that should be executed for this view in

* update mode.

* In * Even indices: Directive index

* Odd indices: Hook function

* In * viewCheckHooks: HookData

*/* * Array of ngOnDestroy hooks that should be executed when this view is destroyed.

* In * Even indices: Directive index

* Odd indices: Hook function

* In * destroyHooks: DestroyHookData

*/* * When a view is destroyed, listeners need to be released and outputs need to be unsubscribed. This cleanup array stores both listener data (in chunks of 4) and output data (in chunks of 2) for a particular view. Combining the arrays

* saves on memory (70 bytes per array) and on a few bytes of code size (for two

* separate for loops).

* In * If it's a native DOM listener or output subscription being stored:

* 1st index is: event name

* = tView.cleanup[i+0]

* 2nd index is: index of native element or a function that retrieves global target (window,

* document or body) reference based on the native element:

* `typeof idxOrTargetGetter === 'function': global target getter function

* `typeof idxOrTargetGetter === 'number': index of native element

* 3rd index is: index of listener function

* `listener = tView[CLEANUP][i+2][0]`

* 4th index is: useCaptureOrIndex = tView.cleanup[i+3][0]

* `typeof useCaptureOrIndex === 'boolean': useCapture boolean

* `typeof useCaptureOrIndex === 'number':

* `useCaptureOrIndex >= 0` removeListener = LView[CLEANUP][useCaptureOrIndex]

* `useCaptureOrIndex < 0` subscription = LView[CLEANUP][useCaptureOrIndex]

* In * If it's an output subscription or query list

* destroy hook:

* 1st index is: output unsubscribe function / query list destroy function

* 2nd index is: index of
function context in LView.cleanupInstances()

`tView.cleanup[i+0].call(lView[CLEANUP][i+1])`

* A list of element indices for child components that will need to be * refreshed when the current view has finished its check. These indices have * already been adjusted for the HEADER_OFFSET.

* `*/*` components:

number[*/*] = */* * A collection of queries tracked in a given view.

* `*/*` queries: TQueries[*/*]

* An array of indices pointing to directives with content queries alongside with the * corresponding query index. Each entry in this array is a tuple of: * - index of the first content query index declared by a given directive; * - index of a directive. We are storing those indexes so we can refresh content queries as part of a view refresh process. *

* `*/*` contentQueries: number[*/*] * Set of schemas that declare elements to be allowed inside the view.

* `*/*` schemas: SchemaMetadata[*/*] * Array of constants for the view. Includes attribute arrays, local definition arrays etc.

* `*/*` Used for directive matching, attribute bindings, local definitions and more. * `*/*` consts: TConstants[*/*] * Indicates that there was an error before we managed to complete the first create pass of the view. This means that the view is likely corrupted and we should try to recover it. * `*/*` incompleteFirstPass: boolean[*/*] * Export const enum RootContextFlags

`Empty = 0b00, DetectChanges = 0b01, FlushPlayers = 0b10` * RootContext contains information which is shared for all components which * were bootstrapped with [@link renderComponent].

* `*/*` interface RootContext

`*/*` A function used for scheduling change detection in the future. Usually * this is `requestAnimationFrame`. * `*/*` scheduler: (workFn: () => void) => void[*/*] * A promise which is resolved when all components are considered clean (not dirty).

* `*/*` This promise is overwitten every time a first call to [@link markDirty] is invoked.

* `*/*` clean: Promise<null>[*/*] * RootComponents - The components that were instantiated by the call to.

* `*/*` playerHandler: PlayerHandler[*/*] * What render-related operations to run once a scheduler has been set.

* `*/*` flags: RootContextFlags[*/*] * Single hook callback function. * `*/*` type HookFn = () => void[*/*] * A promise which is resolved when all components are considered clean (not dirty).

* `*/*` notify that a hook. E.g. the callback that * needs to invoke the index at which to find its context.

* `*/*` type HookEntry = number|HookFn[*/*] * Array of hooks that should be executed for a view and their directive indices.

* `*/*` For each node of the view, the following data is stored:

* `*/*` Node index (optional)

* `*/*` A series of number/function pairs where:

* `*/*` even indices are directive indices

* `*/*` odd indices are hook functions

* `*/*` Special cases:

* `*/*` a negative directive index flags an init hook (ngOnInit, ngAfterContentInit, ngAfterViewInit)

* `*/*` Array of destroy hooks that should be executed for a view and their directive indices.

* `*/*` The array is set up as a series of number/function or number/(number|function)[*/*] * Even indices represent the context with which hooks should be called.

* `*/*` Odd indices are the hook functions themselves. If a value at an odd index is an array, * it represents the destroy hooks of a `multi` provider where:

* `*/*` Even indices represent the index of the provider for which we've registered a destroy hook.

* `*/*` inside of the `multi` provider array.

* `*/*` Odd indices are the destroy hook functions.

* `*/*` For example:

* `*/*` LView: `[0, 1, 2, ASerice, 4, [BSerice, CSerice, DSerice]]` * `*/*` destroyHooks: `[3, ASerice.ngOnDestroy, 5, [0, BSerice.ngOnDestroy, 2, DSerice.ngOnDestroy]]`

* `*/*` In the example above `ASerice` is a type provider with an `ngOnDestroy`, whereas `BSerice`, `CSerice` and `DSerice` are part of a `multi` provider where only `BSerice` and `DSerice` have an `ngOnDestroy` hook.

* `*/*` Static data that corresponds to the instance-specific data array on an LView.

* `*/*` Each node's static data is stored in tData at the same index that it's stored in the data array. Any nodes that do not have static data store a null value in * * `*/*` Id: Data to avoid a sparse array.

* `*/*` Each pipe's definition is stored here at the same index as its pipe instance in * the data array.

* `*/*` Each host property's name is stored here at the same index as its value in the * data array.

* `*/*` Each property binding name is stored here at the same index as its value in the * data array. If the binding is an interpolation, the static string values are stored parallel to the dynamic values. Example:

* `*/*` id:='prefix {{ v0 }} a {{ v1 }} b {{ v2 }}' suffix

* `*/*` LView

* `*/*` TView.data

* `*/*` Injector bloom filters are also stored here.

}

Note: This hack is necessary so we don't erroneously get a circular dependency.
For efficiency reasons we often put several different data types (RNode, LView, LContainer) in same location in LView. This is because we don't want to pre-allocate space for it when because the storage is sparse. This file contains utilities for dealing with such data types. *NOTE* How do we know what is stored at a given location in LView?

- `Array.isArray(value) === false` => RNode (The normal storage value)
- `Array.isArray(value) === true` => then the value[0] represents the wrapped value. *NOTE* `typeof value[TYPE] === 'object'` => LView
- `typeof value[TYPE] === true` => LContainer

NOTE: it is assumed that Array.isArray and typeof operations are very efficient.

---

```javascript
/**
 * @param value wrapped value of RNode, LView, LContainer
 */

/**
 * Executing hooks requires complex logic as we need to deal with 2 constraints.
 *
 * 1. Init hooks (ngOnInit, ngAfterContentInit, ngAfterViewInit) must all be executed once and
 * only * once, across many change detection cycles. This must be true even if some hooks throw, or if
 * some recursively trigger a change detection cycle. * To solve that, it is required to track the state of the execution of
 * these init hooks. * This is done by storing and maintaining flags in the view: the (@link InitPhaseState), * and the
 * index within that phase. This can be seen as a cursor in the following structure: * the form of
 * the nodes that were * executed once. This is a light version of executeInitAndCheckPreOrderHooks where we can skip read
 * write of the init-hooks related flags. * @param lView The LView where hooks are defined * @param hooks
 * Hooks to be run * @param nodeId 3 cases depending on the value: * - undefined: all hooks from the array
 * should be executed (post-order case) * - null: execute hooks only from the saved index until the end of the array
 * (pre-order case, when flushing the remaining hooks) * - number: execute hooks only from the saved index
 * until node index exclusive (pre-order case), when executing select(number) * * execution of
 * executeCheckHooks(lView: View, hooks: HookData, nodeId?: number|null) {
 * callHooks(lView, hooks, InitPhaseState.InitPhaseCompleted, nodeId); * * executes post-order init and check hooks (one of
 * AfterViewInit, AfterViewChecked), * * given a view where there are * pending init hooks to be executed. * * @param lView The LView where hooks are defined * @param hooks
 * Hooks to be run * @param initPhase A phase for which hooks should be run * @param nodeId 3 cases depending on the value: * - undefined: all hooks from the array should be executed (post-order case) * - null: execute hooks only from the saved index until the end of the array
 * (pre-order case, when flushing the remaining hooks) * - number: execute hooks only from the saved index until that node index exclusive (pre-order case), when executing select(number) * * execution of
 * executeInitAndCheckHooks(lView: View, hooks: HookData, initPhase?: number|null) {
 * callHooks(lView, hooks, initPhaseState, nodeId?): number|null) {
 * assertNotEqual(lView.initPhase, InitPhaseState.InitPhaseCompleted) * * your pre-order hooks should not be called more than once); * if (!lView[FLAGS] & LViewFlags.InitPhaseStateMask) === initPhase) {
 * callHooks(lView, hooks, initPhase, nodeId); * * executes incrementInitPhaseFlags(lView: View, initPhase: InitPhaseState): void {
 * ngDevMode & assertNotEqual(lView.initPhase, InitPhaseState.InitPhaseCompleted) * * Hook hooks should not be incremented after all init hooks have been run.); * let flags = lView[FLAGS]; * if ((flags & LViewFlags.InitPhaseStateMask) === initPhase) {
 * flags &= ~LViewFlags.IndexWithinInitPhaseReset; * flags += LViewFlags.InitPhaseStateIncrementer; * lView[FLAGS] = flags; * * calls lifecycle hooks with * their contexts, skipping init hooks if it's not * the first LView pass * * @param currentView The current
 * view * @param arr The array in which the hooks are found * @param initPhaseState the current state of the init phase
 * * @param currentNodeId 3 cases depending on the value: * - undefined: all hooks from the array
 * should be executed (post-order case) * - null: execute hooks only from the saved index until the end of the array
 * (pre-order case, when flushing the remaining hooks) * * number: execute hooks only from the saved index

/**
 * Defines if the call to `inject` should include `viewProviders` in its resolution.
 * This is set to true when we try to instantiate a component. This value is
 * reset in `getNodeInjectable` to a value which matches the declaration location of the token about to be instantiated. This is done so that if we are injecting a token which was declared outside of `viewProviders` we don't accidentally pull `viewProviders` in. For example:

```javascript
class MyService {
  constructor(public value: String) {}
}

class MyComponent {
  constructor(myService: MyService, value: String) {
    expect(value).toEqual('viewProviders');
    expect(myService.value).toEqual('providers');
  }
}
```

This is set to true when we try to instantiate a component. This value is reset in `getNodeInjectable` to a value which matches the declaration location of the token about to be instantiated. This is done so that if we are injecting a token which was declared outside of `viewProviders` we don't accidentally pull `viewProviders` in. For example:

```javascript
class MyService {
  constructor(public value: String) {}
}

class MyComponent {
  constructor(myService: MyService, value: String) {
    expect(value).toEqual('viewProviders');
    expect(myService.value).toEqual('providers');
  }
}
```

```javascript
let includeViewProviders = true;

export function setIncludeViewProviders(v: boolean): boolean {
  const oldValue = includeViewProviders;
  includeViewProviders = v;
  return oldValue;
}
```

```javascript
const BLOOM_SIZE = 256;
const BLOOM_MASK = BLOOM_SIZE - 1;

/** Counter used to generate unique IDs for directives. */

Inject static attribute value into directive constructor.

```
constructor(@Attribute('title') title: string) { ... }
```

This method is used with `factory` functions which are generated as part of `@defineDirective` or `@defineComponent`. The method retrieves the static value of an attribute. (Dynamic attributes are not supported since they are not resolved at the time of injection and can change over time.)

```
ngDevMode &&
```

```
assertNodeOfPossibleTypes(tNode, [TNodeType.Container, TNodeType.Element, TNodeType.ElementContainer])

ngDevMode && assertDefined(tNode, 'expecting tNode');
```

```
if (attrNameToInject === 'class') {
  return tNode.classes;
}
```

```
if (attrNameToInject === 'style') {
  return tNode.styles;
}
```

```
const attrs = tNode.attrs;
```

```
while (i < attrsLength) {
  const value = attrs[i];

  // If we hit a `Bindings` or `Template` marker then we are done.
  if (isNameOnlyAttributeMarker(value)) break;

  // Skip namespaced attributes

/**
 * A pattern that recognizes a commonly useful subset of URLs that are safe.\n* This regular expression matches a subset of URLs that will not cause script\n* execution if used in URL context within a HTML document. Specifically, this\* regular expression matches if (comment from here on and regex\n* compiled from Soy's EscapingConventions):\n* (1) Either an allowed protocol (http, https or ftp).\n* (2) or no protocol. A protocol must be followed by a colon. The below allows\* that by allowing colons only after one of the characters [/?#].\n* A colon after a hash (#) must be in the fragment.\n* Otherwise, a colon after a (?) must be in a query.\n* Otherwise, a colon after a single solidus (/) must be in a path.\n* Otherwise, a colon after a double solidus (//) must be in the authority.\n* The pattern disallows &, used in HTML entity declarations before one of the characters in [/?#]. This disallows HTML entities used in the\* protocol name, which should never happen, e.g. "h&l116:tp" for "http".\n* It also disallows HTML entities in the first path part of a relative path,\* e.g. "\floo\lt\bar\baz". Our existing escaping functions should not\* produce this. More importantly, it disallows masking of a colon, e.g. \"javascript&\$58:..\".\n* This regular expression was taken from the Closure sanitization library.\n* @const SAFE_URL_PATTERN = /^(?:(?:https?|mailto|ftp):|[^&:/?#]*(?:[/?#]|$))/gi;\n* A pattern that matches safe srcset values\n* @const SAFE_SRCSET_PATTERN = /^(?:(?:https?|file):|[^&:/?#]*(?:[/?#]|$))/gi;\n* A pattern that matches safe data URLs. Only matches image, video and audio types.\n* @const DATA_URL_PATTERN = /^(?:image\/(?:bmp|gif|jpeg|jpg|png|tiff|webp)|video\/(?:mpeg|mp4|ogg|webm)|audio\/(?:mp3|ogg|opus);base64,a-z0-9+\/=)*$/i;\n* function _sanitizeUrl(url: string): string {

Open Source Used In Secure Network Analytics (Stealthwatch) 7.4.0 8485
TNodeProviderIndexes

/** The name associated with this node. */

* tagName: string

/** Attributes associated with an element. We need to store attributes to support various use-cases */

* (attribute injection, content projection with selectors, directives matching).

* Attributes are stored statically because reading them from the DOM would be too slow for

* content projection and queries.

* Since attr will always be calculated first, they will never need to be marked undefined by

* other instructions.

* For regular attributes a name of an attribute and its value alternate in the array.

* e.g. ['role', 'checkbox']

* This array can contain flags that will indicate 'special attributes' (attributes within

* namespaces, attributes extracted from bindings and outputs).

* TAttributes

* Same as `TNode.attrs` but contains merged data across all directive host bindings.

* We need to keep 'attrs' as unmerged so that it can be used for attribute selectors.

* We merge attributes here so that it can be used in a performant way for initial rendering.

* The 'attrs' are merged in first pass in following order:

* - Component's `hostAttrs`

* - Directives' `hostAttr`

* - Template `TNode.attrs` associated with the current `TView`.

* The mergedAttrs:

* A set of local names under which a given element is exported in a template and

* visible to queries. An entry in this array can be created for different reasons:

* - an element itself is referenced, ex.: `<div #foo>`

* - a component is referenced, ex.: `<my-cmpt #foo>`

* - a directive is referenced, ex.: `<!--my-cmpt #foo=.directiveExportAs-->`

* A given element might have different local names and those names can be associated

* with a directive. We store local names at even indexes while odd indexes are

* reserved

* for directive index in a view (or '-1' if there is no associated directive).

* Some examples:

* `<!--my-cmpt #foo=.directiveExportAs-->` => `["foo", -1, null]

* `<my-cmpt #foo>` => `["foo", myCmptIdx]

* `<div #foo>` => `["foo", -1]

* `<div #foo="directiveExportAs">` => `["foo", myCmptIdx, "bar", directiveIdx]

* From div to an LContainer with inline views, the container will need to store separate static data for each of its view blocks (`TView[]`). Otherwise, nodes in inline views with the same index as nodes in their parent views will overwrite each other, as they are in the same template.

* Each index in this array corresponds to the static data for a certain view. So if you had V(0) and V(1) in a container, you might have:

* [[tagName: 'div', attrs: ...], null], // V(0) TView

* [[tagName: 'button', attrs ...], null] // V(1) TView

* If this TNode corresponds to an LContainer with a template (e.g. structural directive), the template's TView will be stored here.

* The TView or TViews attached to this node.

* If this TNode corresponds to an LContainer with inline views, the container will need to store separate static data for each of its view blocks (`TView[]`). Otherwise, nodes in inline views with the same index as nodes in their parent views will overwrite each other, as they are in the same template.

* Each index in this array corresponds to the static data for a certain view. So if you had V(0) and V(1) in a container, you might have:

* [[tagName: 'div', attrs: ...], null], // V(0) TView

* [[tagName: 'button', attrs ...], null] // V(1) TView

* If this TNode corresponds to an LContainer with a template (e.g. structural directive), the template's TView will be stored here.

* The TView or TViews attached to this node.

* If this TNode corresponds to an LContainer with inline views, the container will need to store separate static data for each of its view blocks (`TView[]`). Otherwise, nodes in inline views with the same index as nodes in their parent views will overwrite each other, as they are in the same template.
If the `projection` stores the content nodes which are to be projected.

- The nodes represent categories defined by the selector. For example:

  ```html
  <div class="SOME_CLASS" />
  ```

  Imagine:
  ```html
  <div style="color: highest;" my-dir>
  ```
  @Directive({
  host: {
    style: "width:200px;" }
  })
  ```

  In the above case:
  ```html
  * - 'color: lowest' is stored with `styleProp('color', ctx.exp)`;
  ```
  instruction
  ```html
  * - 'color: highest' is the residual and is stored here:
  ```
  * - 'undefined': not initialized;
  ```
  initialized but 'styles' is 'null'

  A collection of all `style` static values for an element excluding host sources.

  - There are one or more initial `style`'s on an element (e.g. 
  ```html
  <div style="width:200px;">"
  ```
  Must be stored separately from

* found in the LICENSE file at https://angular.io/license
* \n* import { KeyValueArray } from './util/array-utils';
* assertNumberInRange} from './util/assert';
* Value stored in the `TData` which is needed to re-concatenate
* the styling.\n * See: 'TStylingKeyPrimitive' and 'TStylingStatic' \n
* The primitive portion (`TStylingStatic` removed) of the value
* stored in the `TData` which isn't needed to re-concatenate the styling.\n * - `string`: Stores the property name.
* Used with `styleProp`/`classProp` instruction.\n * - `null`: Represents map, so there is no name. Used with
* `styleMap`/`classMap`.\n* `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n* `/\n* export type TStylingKeyPrimitive = string|null|false|\n* Store the static values for the styling binding.\n * The `TStylingStatic` is just `KeyValueArray` where key `\"\"` (\n* stored at location 0) contains the\n * `TStylingKey` (stored at location 1). In other words this wraps the
* `TStylingKey` such that the\n * `\"\"` contains the wrapped value.\n * When instructions are resolving styling they may need to look forward or backwards in the linked\n * list to resolve the value. For this reason we have to make sure that he linked list also contains\n * the static values. However the list only has space for one item per
* styling instruction. For this\n * reason we store the static values here as part of the `TStylingKey`. This means that the\n * resolution function when looking for a value needs to first look at the binding value, and then\n * at `TStylingKey` (if it exists).\n * Imagine we have:\n * <div class=\"TEMPLATE\" my-dir>\n * @Directive(\n *   { host: { class: 'DIR', \n *     [class.dynamic]: 'exp' // classProp('dynamic', ctx.exp);\n *   }\n * )\n * </div>
 * tData[10] = <TStylingStatic>
* `{ 
*   '': 'dynamic', // This is the wrapped value of `TStylingKey`\n *   'DIR': true, // This is the default static value of directive binding.\n *   // in front of the template in the case of coming across additional styling
* instruction in the template\n * - in front of the template in the case of coming across additional instruction in the\n * - `hostBindings`.\n * Store the previous and next index into the `TData` where the\n * template\n * bindings can be found.\n * NODE: *duplicate* false implies that it is statically known that this binding will not collide\n * with other bindings and therefore there is no need to check other bindings. For example the\n * bindings in `<div [style.color]=\"exp\" [style.width]=\"exp\">` will never collide and will have\n * their bits set accordingly. Previous duplicate means that we may need to check previous if the\n * current binding is `null`. Next duplicate means that we may need to check
* next bindings if the\n * current binding is not `null`.\n * NOTE: `0` has special significance and represents `null` as
* in no additional pointer.\n * `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n * - `null`: Represents map, so there is no name. Used with
* `styleMap`/`classMap`.\n * - `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n * - `null`: Represents map, so there is no name. Used with
* `styleMap`/`classMap`.\n * - `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n * - `null`: Represents map, so there is no name. Used with
* `styleMap`/`classMap`.\n * - `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n * - `null`: Represents map, so there is no name. Used with
* `styleMap`/`classMap`.\n * - `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n * - `null`: Represents map, so there is no name. Used with
* `styleMap`/`classMap`.\n * - `false`: Represents an ignore case. This happens when `styleProp`/`classProp`
* instruction\n * is combined with directive which shadows its input `@Input('class')`. That way the binding\n * should not participate in the styling resolution.\n * - `null`: Represents map, so there is no name. Used with

Because some root nodes of the view may be containers, we sometimes need to propagate deeply into the nested containers to remove all elements in the `view` from which elements should be added or removed. Whether or not elements should be added (if false, removing) is determined by the `insertMode` parameter.

```typescript
export function addRemoveViewFromContainer(
    tView: TView, lView: LView, insertMode: true, beforeNode: RNode|null): void;
export function addRemoveViewFromContainer(
    tView: TView, lView: LView, insertMode: false,
    beforeNode: null): void;
export function addRemoveViewFromContainer(
    tView: TView, lView: LView, insertMode: boolean, beforeNode: RNode|null): void {
  const renderParent = getContainerRenderParent(tView.node as TViewNode, lView);
  ngDevMode && assertNodeType(tView.node as TNode, TNodeType.View);
  if (renderParent) {
    const renderer = lView[RENDERER];
    applyView(tView, lView, renderer, action, renderParent, beforeNode);
  }
}
```

```typescript
/**
 * Detach a `LView` from the DOM by detaching its nodes.
 *
 * @param tView The `TView` of the `LView` to be detached
 * @param lView the `LView` to be detached.
 */
export function renderDetachView(tView: TView, lView: LView) {
  applyView(tView, lView, lView[RENDERER], WalkTNodeTreeAction.Detach, null, null);
}
```

```typescript
/**
 * Traverses down and up the tree of views and containers to remove listeners and
 * call onDestroy callbacks.
 *
 * Notes:
 *  - Because it's used for onDestroy calls, it needs to be bottom-up.
 *  - Must process containers instead of their views to avoid splicing
 *  - Using a while loop because it's faster than recursion
 *  - Destroy only called on movement to sibling or movement to parent (laterally or up)

/**
 * Removes
a native node itself using a given renderer. To remove the node we are looking up its parent from the native tree as not all platforms / browsers support the equivalent of node.remove().

```javascript
export function nativeRemoveNode(renderer: Renderer3, rNode: RNode, isHostElement?: boolean): void {
  const nativeParent = nativeParentNode(renderer, rNode);
  if (nativeParent) {
    nativeRemoveChild(renderer, nativeParent, rNode, isHostElement);
  }
}
```

A flag indicating if a node to be removed is a host of a component.

```javascript
/**
 * Performs the operation of 'action' on the node. Typically this involves inserting or removing
 * nodes on the LView or projection boundary.
 */
  const tNodeType = tNode.type;
  if (isProjection) {
    if (action === WalkTNodeTreeAction.Create) {
      rawSlotValue && attachPatchData(unwrapRNode(rawSlotValue), lView);
      tNode.flags |= TNodeFlags.isProjected;
    }
  }
  if ((tNode.flags & TNodeFlags.isDetached) !== TNodeFlags.isDetached) {
    applyNodes(renderer, action, tNode.child, lView, renderParent, beforeNode, false);
    applyToElementOrContainer(action, renderer, renderParent, rawSlotValue, beforeNode);
  } else if (tNodeType === TNodeType.IcuContainer) {
    applyProjectionRecursive(renderer, action, lView, tNode as TProjectionNode, renderParent, beforeNode);
  } else if (tNodeType === TNodeType.Element) {
    applyToElementOrContainer(action, renderer, renderParent, rawSlotValue, beforeNode);
  }
}
```

Things get more complicated with containers and projections. That is because coming across:

- Container: implies that we have to insert/remove/destroy the views of that container as well

- Projection: implies that we have to insert/remove/destroy the nodes of the projection.

The complication is that the nodes we are projecting can themselves have Containers

or OtherProjections:

As you can see this is a very recursive problem. Yes recursion is not most efficient but the code is complicated enough that trying to implement with recursion becomes unmaintainable.

```javascript
/**
 * `applyView` performs operation on the view as specified in `action` (insert, detach, destroy)
 * Inserting a view without projection or containers at top level is simple. Just iterate over the root nodes of the View, and for each node perform the 'action'. Things get more complicated with containers and projections. That is because coming across:
 * - Container: implies that we have to insert/remove/destroy the views of that container as well
 * - Projection: implies that we have to insert/remove/destroy the nodes of the projection.
 */
```
`applyProjectionRecursive` performs operation on the projection specified by `action` (insert, detach, destroy).
* Inserting a projection requires us to locate the projected nodes from the parent component. The complication is that those nodes themselves could be re-projected from their parent component.
* Inserting a projection requires us to locate the projected nodes from the parent component. The complication is that those nodes themselves could be re-projected from their parent component.

```javascript
function applyProjectionRecursive(
    renderer: Renderer3, action: WalkTNodeTreeAction,
    lView: LView,

/**
 * Base class that provides change detection functionality.
 * A change-detection tree collects all views that are to be checked for changes. Use the methods to add
 * and remove views from the tree, initiate change-detection, and explicitly mark views as _dirty_, meaning that they have changed and need to be re-rendered. The using change detection hooks are
 * change-detection-hooks

 * Use this method to ensure that a component is checked even if these triggers have not occurred. When inputs have
 * changed or events have fired in the view. Call this method to ensure that a component is checked even if these triggers have not occurred. When inputs have changed or events have fired in the view.

 * Detects a detached component. The following example creates a component displaying live data. The component detaches its change detector from the main change detector tree when the `live` property is set to false, and reattaches it when the property becomes true.

 * When a view uses the ChangeDetectionStrategy#OnPush change detection strategy, explicitly marks the view as changed so that it can be checked again. Components are normally marked as dirty (in need of rerendering) when inputs have changed or events have fired in the view. Call this method to ensure that a component is checked even if these triggers have not occurred. Use in combination with `detectChanges()` to implement local change detection checks.

 * Detached views are not checked during change detection runs until they are re-attached, even if they are marked as dirty. Use in combination with `detectChanges()` to implement local change detection checks.

 * Checks this view and its children. Use in combination with change detection hooks to ensure that a view is checked even if its triggers have not occurred. When inputs have changed or events have fired in the view.

 * Detaches views not checked during change detection runs until they are re-attached, even if they are marked as dirty. Use in combination with `detectChanges()` to implement local change detection checks.

 * Checks this view and its children.
which extend from other classes

* and inherit a constructor.

```ts
class [A-Za-

\*\d_]* extends [^\*]+ {\[\s\S\]*}\n
* (\S*super(\[\.,\./\]arguments))\n
* **\n
* Determine whether a stringified type is a class which delegates its constructor

* to its parent. This is not trivial since compiled code can actually contain a constructor function

* even if the original source code did not. For instance, when the child class contains

* an initialized instance property.

/**
 * Add an `InjectorType` or
 * `InjectorTypeWithProviders` and all of its transitive providers
 * to this injector.
 * If an
 * `InjectorTypeWithProviders` that declares providers besides the type is specified,
 * the function will return

"true" to indicate that the providers of the type definition need * to be processed. This allows us to process providers of injector types after all imports of an * an injector definition are processed. (following View Engine semantics: see FW-1349)

```typescript
private processInjectorType(
  defOrWrappedDef: InjectorType<any> | InjectorTypeWithProviders<any>,
  parents: InjectorType<any>[][],
  dedupStack: InjectorType<any>[][],)
```

If that's not present, then attempt to read NgModule from the InjectorDefTypeWithProviders. 

```typescript
const NgModule = ((def == null) && (defOrWrappedDef as InjectorTypeWithProviders<any>).NgModule || undefined);
```

Determine the InjectorType. In the case where `defOrWrappedDef` is an `InjectorType`, then this is easy. In the case of an `InjectorDefTypeWithProviders`, then the definition type is the `NgModule`.

```typescript
const defType: InjectorType<any> = (NgModule === undefined) ? (defOrWrappedDef as InjectorType<any>) : NgModule;
```

Check for circular dependencies.

```typescript
if (ngDevMode && parents.indexOf(defType) !== -1) {
  const defName = stringify(defType);
  throw new Error(`Circular dependency in DI detected for type ${defName}. Dependency path: ${parents.map(defType => stringify(defType)).join(' > ')} > ${defName}.`);
}
```

Check for multiple imports of the same NgModule.

```typescript
const isDuplicate = dedupStack.indexOf(defType) !== -1;
```

Imports which are declared with providers (TypeWithProviders) need to be processed after all imported modules are processed. This is similar to how View Engine processes/merges module imports in the metadata resolver. See: FW-1349.

```typescript
if (importTypesWithProviders !== undefined) {
  for (let i = 0; i < importTypesWithProviders.length; i++) {
    const {NgModule, providers} = importTypesWithProviders[i];
    deepForEach(importTypesWithProviders, provider => this.processProvider(provider, NgModule, providers || EMPTY_ARRAY));
  }
}
```

Process a `SingleProvider` and add it.

```typescript
private processProvider(
  provider: SingleProvider,
  NgModuleType: InjectorType<any>, providers: any[][],
): void {
```

It's important that this is done after the defType's imports, add it to the set of parents. This way, if it ends up deeply importing itself, this can be detected.

```typescript
let def = getInjectorDef NgModule;
```

If no definition was found, it might be from exports. Remove it.

```typescript
if ( NgModule === undefined) {
  return false;
}
```

Add providers in the same way that @NgModule resolution did.

```typescript
first, include providers from any imported NgModule. If def.imports != null &
```

Check for circular dependencies.

```typescript
if (ngDevMode && & parents.push(defType);
```

Add it to the set of dedups. This way we can detect multiple imports of the same NgModule.

```typescript
let importTypesWithProviders: (InjectorTypeWithProviders<any>[][]); |
```

Imports which are declared with providers (TypeWithProviders) need to be processed after all imported modules are processed. This is similar to how View Engine processes/merges module imports in the metadata resolver. See: FW-1349.

```typescript
if (importTypesWithProviders !== undefined) {
```

If the processed import is an injector type with providers, we store it in the list of import types with providers, so that we can process those afterwards.

```typescript
importTypesWithProviders.push(imported);
```

Finally, remove it from the parents set when finished.

```typescript
ngDevMode && & parents.pop();
```

Imports which are declared with providers (TypeWithProviders) need to be processed after all imported modules are processed. This is similar to how View Engine processes/merges module imports in the metadata resolver. See: FW-1349.

```typescript
try {
  deepForEach(importTypesWithProviders, imported => {
```

if (importTypesWithProviders !== undefined) {
```typescript
importTypesWithProviders = [];
```

If the processed import is an injector type with providers, we store it in the list of import types with providers, so that we can process those afterwards.

```typescript
importTypesWithProviders.push(imported);
```

Finally, remove it from the parents set when finished.

```typescript
ngDevMode && & parents.pop();
```

Imports which are declared with providers (TypeWithProviders) need to be processed after all imported modules are processed. This is similar to how View Engine processes/merges module imports in the metadata resolver. See: FW-1349.
Construct a 'Record' for the provider.

/**
 * A ReflectiveDependency injection container used for instantiating objects and
 * resolving dependencies. An `Injector` is a replacement for a `new` operator, which can automatically
 * resolve them constructor dependencies. In typical use, application code asks for the dependencies in the
 * constructor and they are `resolved` by the `Injector`. The following example creates an `Injector` configured to
 * create `Engine` and `Car`. The constructor dependencies are resolved automatically.
 *
 * ```typescript
 * class Engine {
 * }
 *
 * class Car {
 *   constructor(public engine:Engine) {}
 * }
 *
 * var injector = ReflectiveInjector.resolveAndCreate([Car, Engine]);
 * var car = injector.get(Car);
 * expect(car instanceof Car).toBe(true);
 * expect(car.engine instanceof Engine).toBe(true);
 * ```
 *
 * Notice, we don't use the `new` operator because we explicitly want to have the `Injector` resolve all of the object's dependencies
 * automatically. Use `Injector.create` instead.

 * @publicApi
 */
export abstract class ReflectiveInjector implements Injector {
  /**
   * Resolves an array of providers and creates an injector from
   * those providers.
   *
   * The passed-in providers can be an array of `Type`, `Provider`,
   * or a recursive array of
   * more providers.
   *
   * @usageNotes
   * ### Example
   *
   * ```typescript
   * class Engine {
   * }
 *
   * class Car {
   *   constructor(public engine:Engine) {}
   * }
 *
   * var injector = ReflectiveInjector.resolveAndCreate([Car, Engine]);
   * ```
   */

other components' templates. Since a component's template is always a black box to its ancestors. **Metadata Properties**: The directive type or the name used for querying. **descendants** - True to include all descendants, otherwise include only direct children. **read** - Used to read a different token from the queried elements. Here is a simple demonstration of how the `ContentChildren` decorator can be used...

```typescript
Here is a slightly more realistic example that shows how the `ContentChildren` decorator can be used to implement a tab pane component.

```typescript
Here is a more realistic example that shows how `ContentChildren` decorators can be used to implement a tab pane component.

```typescript
@Annotation
*param* ContentChildren: ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: false, isViewQuery: false, descendants: false, ...data}),
    Query);

*param* ContentChildren = Query:\n
**tab-pane example**

```typescript
*param* `ContentChildren` decorator and metadata.

```typescript
export const ContentChildren: ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: false, isViewQuery: false, descendants: false, ...data}),
    Query);

**tab-pane example**

```typescript
@Annotation
*public* interface ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: false, isViewQuery: false, descendants: false, ...data}),
    Query);

```typescript
@Annotation
*public* interface ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: true, isViewQuery: false, descendants: true, ...data}),
    Query);

```typescript
@Annotation
*public* interface ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: true, isViewQuery: false, descendants: true, ...data}),
    Query);

```typescript
@Annotation
*public* interface ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: true, isViewQuery: false, descendants: true, ...data}),
    Query);

```typescript
@Annotation
*public* interface ContentChildrenDecorator = makePropDecorator(
    'ContentChildren',
    (selector?: any, data: any = {}) =>
        ({selector, first: true, isViewQuery: false, descendants: true, ...data}),
    Query);
decorator that configures a view query.
* The change detector looks for the first element or the directive matching the selector
* in the view DOM. If the view DOM changes, and a new child matches the selector,
* the property is updated.
* View queries are set before the `ngAfterViewInit` callback is called.
* The directive type or the name used for querying.
* **Metadata Properties**:
* `*` The directive type or the name used for querying.
* `*` **selector** - The directive type or the name used for querying.
* `*` **read** - Used to read a different token from the queried elements.
* `*` **static** - True to resolve query results before change detection runs.
* false to resolve after change detection. Defaults to false.
* The following selectors are supported:
* Any class with the `@Component` or `@Directive` decorator
* A template reference variable as a string (e.g. query `@my-component cmp>` in `@with
* ViewChild(cmp)`) any
* Any provider defined in the child component tree of the current component (e.g. `@
* ViewChild(SomeService) someService: SomeService`) any
* Any provider defined through a string token (e.g. `@ViewChild('someToken') someTokenVal: any`) any
* A `@TemplateRef` (e.g. query `ng-template>` with `@ViewChild(TemplateRef)
* template:`

```typescript
/**
 * Type of the ViewChild metadata.
 *
 * @publicApi
 */
export type ViewChild = Query;

/**
 * ViewChild decorator and metadata.
 *
 * @Annotation
 * @publicApi
 */
export const ViewChild: ViewChildDecorator = makePropDecorator(
  'ViewChild',
  (selector: any, data: any) =>
      ({selector, first: true, isViewQuery: true, descendants: true,
        ...data}),
    Query);

 */

import {Type} from '../interface/type';
import {Component} from './directives';

/**
 * Used to resolve resource URLs on `@Component` when used with JIT compilation.
 *
 * Example:
 * ```
 * @Component({
 *   selector: 'my-comp',
 *   templateUrl: 'my-comp.html', // This requires
 *   // asynchronous resolution
 * })
 * class MyComponent{
 * }
 *
 * // Calling `renderComponent` will fail
 * // because `renderComponent` is a synchronous process
 * // and `MyComponent` needs to be resolved asynchronously.
 *
 * // Use browser’s `fetch()` function as the default resource resolution strategy.
 * resolveComponentResources(fetch).then(() => {
 *   // After resolution all URLs have been converted into
 *   // `template` strings.
 *   renderComponent(MyComponent);
 * });
 *
 * ```
 *
 * NOTE: In AOT the resolution happens during compilation, and so there should be no need
 * to call this method outside JIT mode.
 *
 * @param resourceResolver a function which is responsible for returning a `Promise` to the
 * contents of the resolved URL. Browser’s `fetch()` method is a good default implementation.
 */
export function
resolveComponentResources(resourceResolver: (url: string) => (Promise<string|{text(): Promise<string>}>)):

given node against matching projection slots and returns the \n * determined slot index. Returns `null` if no slot matched the given node.
 * This function takes into account the parsed `ngProjectAs` selector from the node's attributes. If present, it will check whether the `ngProjectAs` selector matches any of the projection slot selectors.

```typescript
export function matchingProjectionSlotIndex(tNode: TNode, projectionSlots: ProjectionSlots): number|
    null {
  let wildcardNgContentIndex = null;
  const ngProjectAsAttrVal =
    getProjectAsAttrValue(tNode);
  for (let i = 0; i < projectionSlots.length; i++) {  
    const slotValue =
      projectionSlots[i];  // The last wildcard projection slot should match all nodes which aren't matching
    // any selector. This is necessary to be backwards compatible with view engine.
    if (slotValue === '*') {
      wildcardNgContentIndex = i;  continue;  }
    // If we ran into an `ngProjectAs` attribute, we should match its parsed selector
    // to the list of projectables, otherwise we fall back to matching against the node.
    if (ngProjectAsAttrVal !== null) {
      if (isNodeMatchingSelectorList(tNode, slotValue, /* isProjectionMode */
        true) :|
        isSelectorInSelectorList(ngProjectAsAttrVal, slotValue)) {
        return i;  // first matching selector
    }
  }
  return wildcardNgContentIndex;
}
```

```typescript
/**
 * Instruction to distribute
 * projectable nodes among
 * occurrences in a given template.
 * It takes all the selectors from the entire
 * component's template and decides where
 * each projected node belongs (it re-distributes nodes among \"buckets\"
 * where each \"bucket\" is only backed by a selector).
 * This function requires CSS selectors to be provided in 2 forms:
 * parsed (by a compiler) and text, un-parsed form. The parsed form is needed for efficient matching
 * of a node against a given CSS selector. The un-parsed, textual form is needed for support of the `ngProjectAs`
 * attribute.

 * A collection of projection slots. A projection slot can be based
 * on a parsed CSS selectors or
 * set to the wildcard selector (*\") in order to match
 * all nodes which do not match any selector. If not
 * specified, a single wildcard
 * selector projection slot will be defined. The un-parsed, textual form is needed for support of the `ngProjectAs`
 * attribute.

 * @param
 * @codeGenApi
 */

  }
```
Update an interpolated property on an element with a lone bound value. Used when the value passed to a property has 1 interpolated value in it, an no additional text surrounds that interpolated value. Its compiled representation is: 

```js
<div *ng*="html" *ng*="tpn">

propertyInterpolate('title', v0);

</div>
```

If the property name also exists as an input property on one of the element's directives, the component property will be set instead of the element property. This check must be conducted at runtime so child components that add new `@Inputs` don't have to be re-compiled.

- **propertyInterpolate**
  - **propName:** The name of the property to update
  - **v0:** Value checked for change
  - **sanitize:** An optional sanitizer function

- **propertyInterpolate1**
  - **propName:** The name of the property to update
  - **prefix:** Static value used for concatenation only
  - **v0:** Value checked for change
  - **suffix:** Static value used for concatenation only
  - **sanitize:** An optional sanitizer function

- **propertyInterpolate2**
  - **propName:** The name of the property to update
  - **prefix:** Static value used for concatenation only
  - **i0:** Static value used for concatenation only
  - **v1:** Value checked for change
  - **suffix:** Static value used for concatenation only
  - **sanitize:** An optional sanitizer function
interpolated property on an element with 3 bound values surrounded by text.

```html
<div title="prefix{{v0}}-{{v1}}-{{v2}}suffix"></div>
```

Its compiled representation is:

```ts
propertyInterpolate3('title', 'prefix', v0, '-', v1, '-', v2, 'suffix');
```

If the property name also exists as an input property on one of the element's directives, the component property will be set instead of the element property. This check mustn't be conducted at runtime so child components that add new `@Inputs` don't have to be re-compiled.

```ts
export function propertyInterpolate3(propName: string, prefix: string, v0: any, i0: string, v1: any, i1: string, v2: any, i2: string, suffix: string, sanitizer?: SanitizerFn): typeof propertyInterpolate3 {
  const lView = getLView();
  const interpolatedValue = interpolation3(lView, prefix, v0, i0, v1, i1, v2, i2, suffix);
  if (interpolatedValue !== NO_CHANGE) {
    const tView = getTView();
    const tNode = getSelectedTNode();
    elementPropertyInternal(tView, tNode, lView, propName, interpolatedValue, lView[RENDERER], sanitizer, false);
    ngDevMode && storePropertyBindingMetadata(tView.data, tNode, propName, getBindingIndex() - 3, prefix, i0, i1, i2, suffix);
  }
  return propertyInterpolate3;
}
```

If the property name also exists as an input property on one of the element's directives, the component property will be set instead of the element property. This check mustn't be conducted at runtime so child components that add new `@Inputs` don't have to be re-compiled.

```ts
  const lView = getLView();
  const interpolatedValue = interpolation4(lView, prefix, v0, i0, v1, i1, v2, i2, v3, suffix);
  if (interpolatedValue !== NO_CHANGE) {
    const tView = getTView();
    const tNode = getSelectedTNode();
    elementPropertyInternal(tView, tNode, lView, propName, interpolatedValue, lView[RENDERER], sanitizer, false);
    ngDevMode && storePropertyBindingMetadata(tView.data, tNode, propName, getBindingIndex() - 4, prefix, i0, i1, i2, i3, suffix);
  }
  return propertyInterpolate4;
}
```

If the property name also exists as an input property on one of the element's directives, the component property will be set instead of the element property. This check mustn't be conducted at runtime so child components that add new `@Inputs` don't have to be re-compiled.

```ts
export function propertyInterpolate5(propName: string, prefix: string, v0: any, i0: string, v1: any, i1: string, v2: any, i2: string, v3: any, suffix: string, sanitizer?: SanitizerFn): typeof propertyInterpolate5 {

    if
Retrieve the `TStylingKey` for the template styling instruction. This is needed since `hostBinding` styling instructions are inserted after the template instruction. While the template instruction needs to update the residual in `TNode` the `hostBinding` instructions need to update the `TStylingKey` of the template instruction because the template instruction is downstream from the `hostBindings` instructions. If the linked list is stored where the styling is being computed return `TStylingKey` if found or `undefined` if not found. In case this method does not seem to be a styling instruction in the `template` return `undefined`. If we have a template styling instruction and a new `hostBindings` styling instruction executed it means that it may need to steal static fields from the template instruction. This method allows us to update the first template instruction `TStylingKey` with a new value. Assume: `host: {style: 'width: 100px', \[style.color\]: 'dirExp', \[style.color\]: 'tmplExp'}`. If the template statics is now wrong as it incorrectly contains `width` so we need to update it like so: `host: {style: 'width: 100px', \[style.color\]: 'dirExp', \[style.color\]: 'tmplExp'}` executes it creates this data structure. `\n * * * when \[style.color\]="tmplExp"

The reason for this is that the template instruction does not know if there are styling instructions and must assume that there are none and must collect all of the static styling. (`both
* * * or 'width'

* * * When\[style.color\]: 'dirExp', executes we need to insert a new data into the linked list.`

Notice that the template instruction is now wrong as it incorrectly contains `width` when `\[style.color\]="tmplExp"` executes it creates this data structure.`

When `\[style.color\]="tmplExp"` executes we need to update the first template styling instruction with a new value. `\n * * * Assume:\n * * * <div my-dir style="color: red" [style.color]="tmplExp">

Because the template instruction is downstream from the `hostBindings` instructions. This method allows us to update the first template styling instruction with a new value.

The reason for this is that the template instruction does not know if there are styling instructions and must assume that there are none and must collect all of the static styling.

While the template instruction needs to update the `TStylingKey` of the template instruction which is replacing the old one. If the template instruction is downstream from the `hostBindings` instructions while the template instruction needs to update the `TStylingKey` of the template instruction which is replacing the old one.

Because the template instruction is downstream from the `hostBindings` instructions while the template instruction needs to update the `TStylingKey` of the template instruction which is replacing the old one.

We add `1 + tNode.directiveStart` because we need to skip the current directive as we are collecting things after the last `hostBindings` directive which had a styling instruction. For (let i = 1 + tNode.directiveStart; i < directiveEnd; i++) {

Residual styling in `TNode` the `hostBinding` node must have executed. We add `1 + tNode.directiveStart` because we need to skip the current directive as we are collecting things after the last `hostBindings` directive which had a styling instruction. For (let i = 1 + tNode.directiveStart; i < directiveEnd; i++) {

This is opposite of residual styling. If the template instruction is downstream from the `hostBindings` instructions the linked list is stored where the styling is being computed.

This is opposite of residual styling. If the template instruction is downstream from the `hostBindings` instructions the linked list is stored where the styling is being computed.

By the time this function gets called at least one `hostBindings`-node styling instruction must have executed. // We add `1 + tNode.directiveStart` because we need to skip the current directive as we are collecting things after the last `hostBindings` directive which had a styling instruction. For (let i = 1 + tNode.directiveStart; i < directiveEnd; i++) {

This is opposite of residual styling. If the template instruction is downstream from the `hostBindings` instructions the linked list is stored where the styling is being computed.

/**
 * Retrieves the component instance associated with a given DOM element.
 * @usageNotes
 * Given the following DOM

structure:

```html
<my-app>
  <div>
    <child-comp></child-comp>
  </div>
</my-app>
```

Calling `getComponent` on `<child-comp>` will return the instance of `ChildComponent` associated with this DOM element.

@param element DOM element from which the component should be retrieved.
@returns Component instance associated with the element or `null` if there's no component associated with it.

@globalApi

@export

@publicApi

```typescript
function getComponent<T>(element: Element): T|null {
  return null;
}
```

Calling the function on `<my-app>` will return the `MyApp` instance.

```typescript
function getComponentAtNodeIndex<T>(context: LContext, nodeIndex: number, view: LView): T|null {
  return null;
}
```

### getComponentExample

```typescript
function getComponentExample(element: Element): void {
  const context = loadLContext(element, false);
  if (context === null) return;

  if (context.component === undefined) {
    context.component = getComponentAtNodeIndex(context.nodeIndex, context.lView);

import {getLView, getPreviousOrParentTNode, getTView} from...
Resolves the providers which are defined in the DirectiveDef. When inserting the tokens and the factories in their respective arrays, we can assume that this method is called first for the component (if any), and then for other directives on the same node. As a consequence, the providers are always processed in that order: 1) The view providers of the component 2) The providers of the component 3) The providers of the other directives. This matches the structure of the injectables arrays of a view (for each node). So the tokens and the factories can be pushed at the end of the arrays, except in one case for multi providers.

```typescript
export function providersResolver<T>(
    def: DirectiveDef<T>,
    providers: Provider[], viewProviders: Provider[]): void {
  const tView = getTView();
  if (tView.firstCreatePass)
    resolveProvider(viewProviders, tView.data, tView.blueprint, isComponent, true);

  resolveProvider(providers, tView.data, tView.blueprint, isComponent, false);
}
```

This list of view providers is processed first, and the flags are updated. Then, the list of providers is processed, and the flags are updated.

```typescript
function resolveProvider(
    provider: Provider, tInjectables: TData, lInjectablesBlueprint: NodeInjectorFactory[],
    isComponent: boolean, isViewProvider: boolean): void {
  provider = resolveForwardRef(provider);
  if (Array.isArray(provider)) {
    for (let i = 0; i < provider.length; i++) {
      resolveProvider(provider[i], tInjectables, lInjectablesBlueprint, isComponent,
        isViewProvider);
    }
  } else {

}
```

This needs to be refactored into a separate file so that it can be imported from 'node_manipulation.ts'. Currently doing the import cause resolution order to change and fail.

This is used as a performance optimization for production mode. Remove `ifdef`.

Use with `ViewEncapsulation.ShadowDom` to allow simple native content projection via `<slot>` elements.

For WebWorkers, always returns true.

This is because the check is synchronous, the caller can't rely on checking for null.

Use case: `[a, a]` => `[b, a, a]` * If we did not have this check then the insertion of `b`
would:
1) evict first `a`
2) insert `b` at `0` index.
3) leave `a` at index `1` as is. <-- this is wrong
* 3) reinsert `a` at index `2`<br/>* This correct behavior is:
1) evict first `a`
2) insert `b` at `0` index.
3) reinsert `a` at index `1`
4) move `a` from `1` to `2`<br/>* * Double check that we have not evicted a duplicate item. We need to check if the item type may have already been removed:
* The insertion of `b` will evict the first `a`. If we don't reinsert it now it will be reinserted <br/>at the end. Which will show up as the two `a`'s switching position. This is incorrect, since an `a`'s better way to think of it is as insert of `b` rather then switch `a` with `b` and then add an `a`'s end.<br/>* @internal */

### External Error Handling

```typescript
export function expressionChangedAfterItHasBeenCheckedError(context: DebugContext, oldValue: any, currValue: any, isFirstCheck: boolean): Error {
  let msg = `ExpressionChangedAfterItHasBeenCheckedError: Expression has changed after it was checked. Previous value: '${oldValue}'. Current value: '${currValue}'.`;
  if (isFirstCheck) {
    msg += ` It seems like the view has been created after its parent and its children have been dirty checked. Has it been created in a change detection hook?`;
  }
  return viewDebugError(msg, context);
}

export function viewWrappedDebugError(err: any, context: DebugContext): Error {
  if (!(err instanceof Error)) {
    // errors that are not Error instances don't have a stack,
    // so it is ok to wrap them into a new Error object...
    err = new Error(err.toString());
  }
  _addDebugContext(err, context);
  return err;
}

export function viewDebugError(msg: string, context: DebugContext, oldValue: any, currValue: any, isFirstCheck: boolean): Error {
  let msg = `ExpressionChangedAfterItHasBeenCheckedError: Expression has changed after it was checked. Previous value: '${oldValue}'. Current value: '${currValue}'.`;
  if (isFirstCheck) {
    msg += ` It seems like the view has been created after its parent and its children have been dirty checked. Has it been created in a change detection hook?`;
  }
  return viewDebugError(msg, context);
}
```

### Other Error Handling Functions

```typescript
export function isViewDebugError(err: Error): boolean {
  return
```

return changes;

// This function calls the ngAfterContentCheck, ngAfterContentInit, ngAfterViewCheck, and ngAfterViewInit lifecycle hooks (depending on the node\n// flags in lifecycle). Unlike ngDoCheck, ngOnChanges and ngOnInit, which are\n// called during a pre-order traversal of the view tree (that is calling the parent hooks before the child hooks) these events are sent in using an\// post-order traversal of the tree (children before parents). This changes the meaning of initIndex in the view state. For ngOnInit, initIndex tracks the expected nodeIndex which a ngOnInit should be called. When sending an\// ngAfterContentInit and ngAfterViewInit it is the expected count of\// ngAfterContentInit or ngAfterViewInit methods that have been called. This ensures that despite being called recursively or after picking up after an\// exception, the ngAfterContentInit or ngAfterViewInit will be called on the correct nodes. Consider for example, the following (where E is an element\// and D is a directive)\n
Tree:  \n1/\n//   D3  2/\n//     E4  3\n//      5/\n// E5  4\n//    E6  5\n// E7  6\n\// As can be seen, the post-order index has an unclear relationship to the pre-order index (postOrderIndex = preOrderIndex - parentCount + childCount). Since number of calls to ngAfterContentInit and ngAfterViewInit\n// are stable (will be the same for the same view regardless of exceptions or recursion) we just need to count them which will roughly correspond to the post-order index (it skips elements and directives that do not have lifecycle hooks).\n•\n// For example, if an exception is raised in the E6.onAfterViewInit() the initIndex is left at 3 (by shouldCallLifecycleInitHook() which set it to initIndex + 1). When checkAndUpdateView() is called again D3, E2 and E6 will\// not have their ngAfterViewInit() called but, starting with E7, the rest of the view will begin getting ngAfterViewInit() called until a check and pass is complete.\n\n// This algorithm also handles recursion. Consider if E4’s ngAfterViewInit()\n// indirectly calls E1’s ChangeDetectorRef.detectChanges(). The expected\n// initIndex is set to 6, the recursive checkAndUpdateView() starts walk again.\n// D3, E2, E6, E7, E5 and E4 are skipped, ngAfterViewInit() is called on E1\n\n// When the recursion returns the initIndex will be 7 so E1 is skipped as it\n// has already been called in the recursively called checkAndUpdateView().\n

Retrieves the default currency code for the given locale.

The default is defined as the first currency which is still in use.

*locale* @param locale The code of the locale whose currency code we want.

*returns* The code of the default currency for the given locale.

*locale* @export getLocaleCurrencyCode(locale: string): string|null

export function getLocaleCurrencyCode(locale: string): string|null {
  const data = findLocaleData(locale);
  return data[LocaleDataIndex.CurrencyCode] || null;
}

getLocaleCurrencyCode

Removes the plural function used by ICU expressions to determine the plural case to use.

*locale* @param locale The code for the locale format rules to use.

*returns* The plural function for the locale.

@see `NgPlural`

@see [Internationalization (i18n) Guide](https://angular.io/guide/i18n)

*export* function getLocalePluralCase(locale: string): (value: number) => number

export function getLocalePluralCase(locale: string): (value: number) => number {
  const data = findLocaleData(locale);
  return data[LocaleDataIndex.PluralCase];
}

getLocalePluralCase

Helper function to get the given `normalizedLocale` from `LOCALE_DATA` or from the global `ng.common.locale`.

*export* function getLocaleData(normalizedLocale: string): any

export function getLocaleData(normalizedLocale: string): any {
  if (!(normalizedLocale in LOCALE_DATA)) {
    LOCALE_DATA[normalizedLocale] = global.ng && global.ng.common && global.ng.common.locales &&
    global.ng.common.locales[normalizedLocale] || null;
  }
  return LOCALE_DATA[normalizedLocale];
}

getLocaleData

Helper function to remove all the locale data from `LOCALE_DATA`.

*export* function unregisterAllLocaleData() {
  LOCALE_DATA = {};
}

unregisterAllLocaleData

Index of each type of locale data from the locale data array.

*export* enum LocaleDataIndex {
  LocaleId = 0,
  ...,
  ExtraData
}

LocaleDataIndex

Index of each value in currency data (used to describe CURRENCIES_EN in currencies.ts).

*export* enum CurrencyIndex {
  Symbol = 0,
  ...,
  NbOfDigits
}

CurrencyIndex

Returns the canonical form of a locale name - lowercase with `_` replaced with `\`.

*export* function normalizeLocale(locale: string): string

export function normalizeLocale(locale: string): string {
  return locale.toLowerCase().replace(/_/g, '-');
}

normalizeLocale

The locale id that the application is currently using (for translations and ICU expressions).

*export* function setLocaleId(localeId: string)

export function setLocaleId(localeId: string) {
  assertDefined(localeId, `Expected localeId to be defined`);
  if (typeof localeId === 'string') {
    LOCALE_ID = localeId.toLowerCase().replace(/\_\-/g, '-');
  }
}

setLocaleId

The locale id that the application is currently using (for translations and ICU expressions).

*export* function getPluralCase(value: string, locale: string): string

export function getPluralCase(value: string, locale: string): string {
  const plural = getLocalePluralCase(locale)(parseInt(value, 10));
  const result = pluralMapping[plural];
  return (result !== undefined) ? result : 'other';
}

getPluralCase

The locale id that the application is using by default (for translations and ICU expressions).

*export* const DEFAULT_LOCALE_ID = `en-US`;

DEFAULT_LOCALE_ID

USD currency code that the application uses by default for CurrencyPipe when no *locale* is defined as a global value.

*export* const USD_CURRENCY_CODE = "USD";

USD_CURRENCY_CODE

The locale id that the application is currently using (for translations and ICU expressions).

*export* function setLocaleId(localeId: string)

export function setLocaleId(localeId: string) {
  assertDefined(localeId, `Expected localeId to be defined`);
  if (typeof localeId === 'string') {
    LOCALE_ID = localeId.toLowerCase().replace(/\_/g, '-');
  }
}

setLocaleId
ICU expressions.

This is the ivy version of `LOCALE_ID` that was defined as an injection token for the view engine but is now defined as a global value.

```typescript
export function getLocaleId(): string {
  return LOCALE_ID;
}
```

 * 0 << SHIFT_ICU | 1 << SHIFT_REF | IcuUpdate,\n *
 * I18nMutateOpCodes extends
 Array<number,string|ELEMENT_MARKER|COMMENT_MARKER|null>, I18nDebug {\n * ***\n * Number of slots to allocate in expando.\n * This is the max number of DOM elements which will be created by this i18n + ICU blocks.\n * The DOM elements are being created
they are stored in the EXPANDO, so that update OpCodes can
* write into them
 */
* vars: number;
/*
 * A set of OpCodes which will create the Text Nodes and ICU anchors for the translation blocks.
 * NOTE: The ICU anchors are filled in with ICU Update OpCode.
 * An create: I18nMutateOpCodes;
 */

* A set of OpCodes which will be executed on each change detection to determine if any changes to
 * DOM are required.
 * An update: I18nUpdateOpCodes;
 */

* A list of ICUs in a translation block (or `null` if block has no ICUs).

* Example:
  Given: `<div i18n>You have {count, plural, ...} and {state, switch, ...} in your cart</div>`

* There will be 2 ICUs in this array

* `1. `{count, plural, ...}`

* `2. `{state, switch, ...}`

* An icus: TICu[
[
`null`];

* Defines the ICU type of `select` or `plural`

* Defines the ICU type of `select` or `plural`

* An type: ICUType;

* Number of slots to allocate in expando for each case.

* This is the max

* Number of DOM elements which will be created by this i18n + ICU blocks. When `null` the DOM elements are being created

* are stored in the EXPANDO, so that update OpCodes can write into them

* An vars: number[];

* Currently selected ICU case pointer.

* `lView[currentCaseLViewIndex]` stores the currently selected case. This is needed to know how

* to clean up the current case when transitioning no the new case.

* An currentCaseLViewIndex: number;

* An optional array of child/sub ICUs.

* In case of nested ICUs such as:

* `{0, plural,

*   =0 {zero}

*   other {0 {1, select,

*                     cat

*                     dog {dogs}

*                     other {animals}

*                   }!

*   }

* }

3 main use-case / conditions to consider here:

- `<needs-target><i #target></i></needs-target>`: here `<i #target>` parent node is a query
  
- `<needs-target><ng-template [ngIf]="true"></i></ng-template>`: here `<i #target>` parent node is null
  
- `<needs-target><ng-container><i #target></i></ng-container></needs-target>`: here we need to go past `<ng-container>` to determine `<i #target>` parent node (but we shouldn't traverse up past the query's host node):

```typescript
while (parent !== null && parent.nodeType === TNodeType.ElementContainer) {
  const predicate = this.metadata.predicate;
  if (Array.isArray(predicate)) {
    for (let i = 0; i < predicate.length; i++) {
      const name = predicate[i];
      this.matchTNodeWithReadOption(tView, tNode, getIdxOfMatchingSelector(tNode, name));
    }
  } else {
    if ((predicate as any) === ViewEngine_TemplateRef) {
      if (tNode.type === TNodeType.Container) {
        this.matchTNodeWithReadOption(tView, tNode, -1);
      }
    } else {
      this.matchTNodeWithReadOption(tView, tNode, locateDirectiveOrProvider(tNode, tView, false, false));
    }
  }
}
```

```typescript
function getIdxOfMatchingSelector(tNode: TNode, selector: string): number {  
  const localNames = tNode.localNames;
  if (localNames !== null) {
    for (let i = 0; i < localNames.length; i += 2) {
      if (localNames[i] === selector) {
        return localNames[i + 1] as number;
      }
    }
  }
  return null;
}
```

```typescript
function createResultByTNodeType(tNode: TNode, currentView: LView): any {  
  if (tNode.type === TNodeType.Element || tNode.type === TNodeType.ElementContainer) {
    return createElementRef(ViewEngine_ElementRef, tNode, currentView);
  } else if (tNode.type === TNodeType.Template) {
    return createTemplateRef(ViewEngine_TemplateRef, ViewEngine_ElementRef, tNode, currentView);
  } else if (tNode.type === TNodeType.Container) {
    return createContainerRef(ViewEngine_TemplateRef, ViewEngine_ElementRef, tNode, currentView);
  } else if (tNode.type === TElementNode) {
    return createSpecialToken(currentView, tNode, TElementNode);  
  }
}
```

```typescript
function createSpecialToken(currentView, tNode, read): any {  
  if (read === ViewEngine_ElementRef) {
    return createElementRef(ViewEngine_ElementRef, tNode, currentView);
  } else if (read === ViewEngine_TemplateRef) {
    return createTemplateRef(ViewEngine_TemplateRef, ViewEngine_ElementRef, tNode, currentView);
  } else if (read === ViewContainerRef) {
    return createContainerRef(ViewEngine_TemplateRef, ViewEngine_ElementRef, tNode, currentView);
  } else if (read === ViewEngine_TemplateRef) {
    return createElementRef(ViewEngine_TemplateRef, TNode, currentView);
  } else if (read === ViewEngine_ElementRef) {
    return createElementRef(ViewEngine_ElementRef, TNode, currentView);
  } else if (read === ViewContainerRef) {
    return createContainerRef(ViewEngine_TemplateRef, ViewEngine_ElementRef, tNode, currentView);
  }
```
A helper function that creates query results for a given view. This function is meant to do the same processing once and only once for a given view instance (a set of results for a given view *doesn't* change).

```javascript
  function materializeViewResults<T>(tView: TView, lView: LView, tQuery: TQuery, queryIndex: number): (T|null)[

/**
 * Keep track of the compilation depth to avoid reentrancy issues during JIT compilation. This
 * matters in the following scenario:
 *
 * Consider a component `A` that extends component `B`, both declared in
 * module `M`. During the compilation of `A` the definition of `B` is requested to capture the inheritance chain,
 * potentially triggering compilation of `B`. If this nested compilation were to trigger
 * `flushModuleScopingQueueAsMuchAsPossible` it may happen that module `M` is still pending in the
 * queue, resulting in `A` and `B` to be patched with the NgModule scope. As the compilation of `A` and `B` is still in progress, this
 * would introduce a circular dependency on its compilation. To avoid this issue, the module scope queue is only
 * flushed for compilations at the depth 0, to ensure all compilations have finished. The `flushModuleScopingQueueAsMuchAsPossible`
 * function compiles a component according to its decorator metadata, and patch the resulting
 * component def (cmp) onto the component type.
 * `flushModuleScopingQueueAsMuchAsPossible` may happen that module `M` is still pending in the
 * queue, resulting in `A` and `B` to be patched with the NgModule scope. As the compilation of `A` is still in progress, this
 * would introduce a circular dependency on its compilation. To avoid this issue, the module scope queue is only
 * flushed for compilations at the depth 0, to ensure all compilations have finished. The `flushModuleScopingQueueAsMuchAsPossible`
 * function compiles a component according to its decorator metadata, and patch the resulting

 * Type of the Directive decorator / constructor function.
 * @publicApi
 */
export interface DirectiveDecorator {
  /**
   * Decorator that marks a class as an Angular directive.
   * You can define your own directives to attach custom behavior to elements in the
   * DOM. *
   * The options provide configuration metadata that determines how the directive should be
   * processed, instantiated and used at runtime. *
   * Directive classes, like component classes, can implement *
   * [life-cycle hooks](guide/lifecycle-hooks) to influence their configuration and behavior. *
   * You can define a directive, mark the class that the decorator and provide metadata. *
   * In order to be usable in an app, *
   * A directive must be defined in exactly one NgModule. Do not re-declare a directive imported
   * from another NgModule. *
   * List the directive class in the declarations field of an NgModule. *
   * They must be declared by an NgModule in order to be usable in an app. *
   * A directive must be defined in exactly one NgModule. Do not re-declare a directive imported
   * from another NgModule. *
   * List the directive class in the declarations field of an NgModule. *
   * * The CSS selector that identifies this directive in a template *
   */
  (obj?: Directive): TypeDecorator;

  /**
   * See the Directive decorator. *
   */
}

/**
 * Directive decorator and metadata. *
 */
export interface DirectiveDecorator {
  /**
   * The CSS selector that identifies this directive in a template *
   */
  selector: string;
  options: object;
  outputs: string[];
  inputs: string[];
  lifeCycleHooks: LifecycleHooksType[];
  exportAs: string;
instantiation of the directive.

```
*ng* * Declare as one of the following:
  *ng* - `element-name': Select by element name.
  *ng* - `class': Select by class name.
  *ng* - `[attribute]': Select by attribute name.
  *ng* - `[attribute=value]': Select by attribute name and value.
  *ng* - `:not(sub_selector)': Select only if the element does not match the `sub_selector'.
  *ng* - `selector1, selector2': Select if either `selector1' or `selector2' matches.
```

Angular only allows directives to apply on CSS selectors that do not cross
\* element boundaries.\* *ng* * For the following template HTML, a directive with an `input[type=text]` selector, \* would be instantiated only on the
```
<input type="text"/>
```

\* *html\* * `<form>`\* * `<input type="text">`
```
```

The `inputs` property defines a set of `directiveProperty` to `bindingProperty` configuration:
```
*ng* * -
```

The following example creates a component with two data-bound properties:
```

*ng* *"typescript\* * @Component({
*ng* * *template: `\n*ng* * Bank Name: {{bankName}}
```

when their results are available in lifecycle hooks:
```

*ng* * * When the `bindingProperty` is not provided, it is assumed to be equal to `directiveProperty`.
```

The following example creates a component with two data-bound properties:
```

*ng* * *typescript\* * @Component({
*ng* * *template: `\n*ng* * Bank Name: {{bankName}}
```

Angular automatically checks host property bindings during change detection.
```
```

The `outputs` property defines a set of `directiveProperty` to `bindingProperty` configuration:
```
*ng* * -
```

The following example creates a component with two data-bound properties:
```

*ng* * *typescript\* * @Component({
*ng* * *template: `\n*ng* * Bank Name: {{bankName}}
```

the DOM property where the value is read from.
```

When `bindingProperty` is not provided, it is assumed to be equal to `directiveProperty`.
```

The following example creates a component with two data-bound properties:
```

*ng* * *typescript\* * @Component({
*ng* * *template: `\n*ng* * Bank Name: {{bankName}}
```

the DOM property where the value is read from.
```

When `bindingProperty` is not provided, it is assumed to be equal to `directiveProperty`.
```

The following example creates a component with two data-bound properties:
```

*ng* * *typescript\* * @Component({
*ng* * *template: `\n*ng* * Bank Name: {{bankName}}
```

the DOM property where the value is read from.
```

When `bindingProperty` is not provided, it is assumed to be equal to `directiveProperty`.
```

The following example creates a component with two data-bound properties:
```

*ng* * *typescript\* * @Component({
*ng* * *template: `\n*ng* * Bank Name: {{bankName}}
```

the DOM property where the value is read from.
```

When `bindingProperty` is not provided, it is assumed to be equal to `directiveProperty`.
```
listen to global events, add the target to the event name. The value is the statement to execute when the event occurs. If the `preventDefault` is applied on the DOM event, then it remains in distributed code, and the JIT compiler attempts to compile it at run time, in the browser. To ensure the correct metadata, the app must import `@angular/compiler`. An Angular component contains a tree of Angular components. Angular components are a subset of directives, always associated with a template. Unlike other directives, only one component can be instantiated for a given element in a template. A component must belong to an NgModule in order for it to be available to another component or application. To make it a member of an NgModule, list it in the `declarations` field of the `NgModule` metadata. Note that, in addition to these options for configuring a directive, you can control a component's runtime behavior by implementing `life-cycle` hooks. For more information, see the documentation for `Lifecycle Hooks`.

Setting component input:
The following example creates a component with two data-bound properties, specified by the `inputs` value.

```html
<example path="core/ts/metadata/directives.ts" region="component-input"></example>
```

### Setting component output:
The following example shows two event emitters that emit on an interval. One emits an output every second, while the other emits every five seconds.

```html
<example path="core/ts/metadata/directives.ts" region='component-output-interval'></example>
```

### Injecting a class with a view provider:
The following simple example injects a class into a component using the view provider specified in component metadata:

```ts
class Greeter {
    greet(name:string) {
        return 'Hello ' + name + '!
    }
}

@Directive({
    selector: 'needs-greeter'
})
class NeedsGreeter {
    greeter:Greeter;

    constructor(greeter:Greeter) {
        this.greeter = greeter;
    }
}

@Component({
    selector: 'greet',
    viewProviders: [Greeter],
    template: `<needs-greeter></needs-greeter>`
})
class HelloWorld {
    // ...
}
```

### Preserving whitespace:
Removing whitespace can greatly reduce AOT-generated code size and speed up view creation. As of Angular 6, the default for `preserveWhitespaces` is false (whitespace is removed). To change the default setting for all components in your application, set

```html
*<code-example path="core/ts/metadata/directives.ts" region="component-input">
```

removes whitespace characters as follows:

```html
*<button>Action 1</button>  <button>Action 2</button>
```
of `&nbsp;` are still collapsed to just one space character when
* the `preserveWhitespaces` option is set to
`false`. * &nbsp;`html` * &nbsp;`before`</code>&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&nbsp;&n...
Angular automatically updates the data property with the DOM property's value. You can supply an optional name to use in templates when there is a component that is instantiated, that maps to the name of the bound property. By default, the original name of the bound property is used for input binding. The following example creates a component with two input properties. One of which is given a special binding name.

```typescript
@Component({
  selector: 'bank-account',
  template: `
    Bank Name: {{bankName}}
    Account Id: {{id}}
  `})
class BankAccount {
  // This property is bound using its original name.
  @Input() bankName: string;
  // this property value is bound to a different property name when this component is instantiated in a template.
  @Input('account-id') id: string;
}
```

The DOM property to which the input property is bound is not automatically updated by Angular. To provide a binding name, you can supply an optional name to use in templates. When there is a component that is instantiated, that maps to the name of the bound property. By default, the original name of the bound property is used for output binding. See `Input` decorator for an example of providing a binding name.

```typescript
@Component({
  selector: '[ngModel]')
class NgModelStatus {
  constructor(public control: NgModel) {}
  @HostBinding('class.valid') get valid() { return this.control.valid; }
}```

Angular automatically updates the data property during change detection. You can supply an optional name to use in templates when there is a component that is instantiated, that maps to the name of the bound property. By default, the original name of the bound property is used for output binding. See `Input` decorator for an example of providing a binding name.

```typescript
@Component({
  selector: '[ngModel]')
class NgModelStatus {
  constructor(public control: NgModel) {}
  @HostBinding('class.valid') get valid() { return this.control.valid; }
}```

  /**
   * The set of components, directives, and pipes ([declarables](guide/glossary#declarable))
   * that belong to this module.
   * The set of selectors that are available to templates include those declared here, and
   * those that are exported from imported NgModules.
   * Declarables must belong to exactly one module.
   * The compiler emits an error if you try to declare the same class in more than one
   * module.
   * Be careful not to declare a class that is imported from another module.
   * The following example allows the CommonModule to use the `NgFor` directive.
   * A template can use exported declarables from any
   * imported module, including those from modules that are
   * imported indirectly
   * and re-exported. For example, `ModuleA` imports `ModuleB`, and also exports
   * it, which makes the declarables from `ModuleB` available
   * wherever `ModuleA` is imported.
 */
  declarations?: Array<Type<any>[] | (() => Type<any>[]));

  /**
   * The set of components, directives, and pipes ([declarables](guide/glossary#declarable))
   * are available to templates in this module.
   * A template can use exported declarables from any
   * imported module, including those from modules that are
   * imported indirectly
   * and re-exported. For example, `ModuleA` imports `ModuleB`, and also exports
   * it, which makes the declarables from `ModuleB` available
   * wherever `ModuleA` is imported.
 */
  declarations?: Array<Type<any>[] | (() => Type<any>[]));

  name: string;
  new(obj: NgModule): NgModule;
}

/**
 * The following example defines a class that is injected
 * in the HelloWorld NgModule:
 */
@NgModule({
  declarations: [Greeter]
})
export class CommonModule {
  constructor(greeter: Greeter) {
    this.greeter = greeter;
  }
}

class Greeter {
  greet(name: string) {
    return 'Hello ' + name + '!
  }
}

@NgModule({
  providers: [
    Greeter
  ]
})
export class HelloWorld {
  constructor(greeter: Greeter) {
    this.greeter = greeter;
  }
}

The following example allows MainModule to use anything exported by CommonModule:

```javascript
@NgModule({
  imports: [CommonModule]
})
class MainModule {
}
```

The set of components, directives, and pipes declared in this NgModule that can be used in the template of any component that is part of an NgModule that imports this NgModule. Exported declarations are the module's public API.

A declarable belongs to one and only one NgModule. A module can list another module among its exports, in which case all of that module's * public declaration are exported.

The following example exports the `NgFor` directive from CommonModule:

```javascript
@NgModule({
  exports: [NgFor]
})
class CommonModule {
}
```

The set of components to compile when this NgModule is defined, so that they can be dynamically loaded into the view. For each component listed here, Angular creates a `ComponentFactory` and stores it in the `ComponentFactoryResolver`. Angular automatically adds components in the module's bootstrap route definitions into the `entryComponents` list. Use this option to add components that are bootstrapped using one of the imperative techniques, such as `ViewContainerRef.createComponent()`.

When using one of `NO_ERRORS_SCHEMA` or `CUSTOM_ELEMENTS_SCHEMA` you must ensure that allowed elements and properties securely escape inputs.

```javascript
@NgModule({
  declarations: [],
  entryComponents: [],
  bootstrap: [],
  schemas: [],
  id: String
})
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

At runtime, in the browser, the app must import `@angular/compiler` and store it in the `compiler` field.

```typescript
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

The `providers` options configure the NgModule's injector to provide dependencies the NgModule members.

```typescript
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

The `imports` and `exports` options bring in members from other modules, and make this module's members available to others.

```typescript
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

A name or path that uniquely identifies this NgModule in `getModuleFactory`. If left `undefined`, the NgModule is not registered with the `getModuleFactory`. It remains in distributed code, and the JIT compiler attempts to compile it at run time, in the browser. To ensure the correct behavior, the app must import `@angular/compiler` and store it in the `compiler` field.

```typescript
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

The `declarations` and `entryComponents` options configure the compiler with information about what belongs to the NgModule. The `providers` options configure the NgModule's injector to provide dependencies the NgModule members.

```typescript
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

The `imports` and `exports` options bring in members from other modules, and make this module's members available to others.

```typescript
class AppModule implements DoBootstrap {
  ngDoBootstrap(appRef: ApplicationRef) {
    appRef.bootstrap(AppComponent); // Or some other component
  }
}
```

 * require UI updates or error handling to be handled by
 * Angular. Such tasks can be kicked off via @link #runOutsideAngular and if needed, these tasks
 * can reenter the Angular zone via @link #run.
 *
 * To change the zone, the zone must be
 * available to Angular.
 *
 * @usageNotes
 * ### Example
 *
 * ```
 *
 * import {Component, NgZone} from '@angular/core';
 * import {NgIf} from '@angular/common';
 *
 * @Component({
 *     selector: 'ng-zone-demo',
 *     template: `
 *     <h2>Demo: NgZone</h2>
 *
 *
 *     <p>Progress: {{progress}}%</p>
 *     <p *ngIf="progress >= 100">Done processing {{label}} of Angular
 *     zone!</p>
 *     <button (click)="processWithinAngularZone()">Process within Angular zone</button>
 *     <button (click)="processOutsideOfAngularZone()">Process outside of Angular zone</button>
 *     `,
 * })
 *
 * @Component({
 *     selector: 'ng-zone-demo',
 *     template: `<h2>Demo: NgZone</h2>
 *
 *     <p>Progress: {{progress}}%</p>
 *     <p *ngIf="progress >= 100">Done processing {{label}} of Angular
 *     zone!</p>
 *     <button (click)="processWithinAngularZone()">Process within Angular zone</button>
 *     <button (click)="processOutsideOfAngularZone()">Process outside of Angular zone</button>
 *     `)
 * @publicApi
 */

Angular on a web page.

Each page has exactly one platform. Services (such as reflection) which are common to every Angular application running on the page are bound in its scope.

A page's platform is initialized implicitly when a platform is created using a platform\* factory such as `PlatformBrowser` or explicitly by calling the `createPlatform()` function.

```
#include <public_api

@injectable
export class PlatformRef {
  private _modules: NgModuleRef<any>[] = [];
  private _destroyListeners: Function[] = [];
  private _destroyed: boolean = false;

  constructor(private Injector) {} \n
  /**
   * Creates an instance of an @NgModule for a given platform for offline compilation.
   *
   * The following example creates the NgModule for a browser platform:
   *
   * ```typescript
   * @NgModule({
   *   imports: [BrowserModule]
   * })
   * class MyModule {}
   *
   * let moduleRef = platformBrowser().bootstrapModuleFactory(MyNgModuleFactory);
   * ```
   *
   * @module NgModule
   * @publicApi
   */

  bootstrapModuleFactory<M>(moduleFactory: NgModuleFactory<M>, options?: BootstrapOptions): Promise<NgModuleRef<M>> {
    // Note: We need to create the NgZone _before_ we instantiate the module,
    // as instantiating the module creates some providers eagerly.
    // So we create a mini parent injector that just contains the new NgZone and
    // pass that as parent to the NgModuleFactory.
    const ngZoneOption = options ? options.ngZone : undefined;
    const ngZoneEventCoalescing = (options && options.ngZoneEventCoalescing) || false;
    const ngZone = getNgZone(ngZoneOption, ngZoneEventCoalescing);
    const providers: StaticProvider[] = [{provide: NgZone, useValue: ngZone}];
    // Attention: Don't use ApplicationRef.run here,
    // as we want to be sure that all possible constructor calls are inside `ngZone.run`.
    this._moduleDoBootstrap(moduleRef);
    return moduleRef;
  }

  private _moduleDoBootstrap(moduleRef: InternalNgModuleRef<any>): void {

/**
 * A reference to an Angular application running on a page.
 *
 * @usageNotes
 *
 * ### isStable examples and caveats
 *
 * Note two important points about `isStable`, demonstrated in the examples below:
 * - the application will never be stable if you start any kind of recurrent asynchronous task when the application starts (for example for a polling process, started with a `setInterval`, a `setTimeout` or using RxJS operators like `interval`);
 * - the `isStable` Observable runs outside of the Angular zone.
 *
 * Let's imagine that you start a recurrent task (here incrementing a counter, using RxJS `interval`),
 * and at the same time subscribe to `isStable`.
 *
 * ```
 * constructor(appRef: ApplicationRef) {
 *   appRef.isStable.pipe(
 *     first(stable => stable),
 *     tap(stable => console.log('App is stable now'))
 *   ).subscribe(counter => {
 *     this.value = counter;
 *     cd.detectChanges();
 *   });
 * }
 * ```
 * As the `isStable` Observable runs outside the zone, the `value` field will be updated properly.
 * but the template will not be refreshed!
 *
 * You'll have to manually trigger the change detection to update the template.
 *
 * ```
 * constructor(appRef, zone: NgZone, cd: ChangeDetectorRef) {
 *   appRef.isStable.pipe(
 *     first(stable => stable),
 *     switchMap((i) => interval(1000))
 *   ).subscribe(counter => console.log(counter));
 * }
 * ```
 *
 * Or make the subscription callback run inside the zone.
 * ```
 * constructor(appRef, zone: NgZone) {
 *   appRef.isStable.pipe(
 *     first(stable => stable),
 *     switchMap((i) => interval(1000))
 *   ).subscribe(counter => {
 *     this.value = counter;
 *     cd.detectChanges();
 *   });
 * }
 * ```
 *
 * The `isStable` Observable runs outside of the Angular zone, which means that the code in the subscription will not trigger the change detection.
 * Let's imagine that instead of logging the counter value, you update a field of your component
 * and display it in its template:
 *
 * ```
 * constructor(appRef: ApplicationRef) {
 *   appRef.isStable.pipe(
 *     first(stable => stable),
 *     switchMap((i) => interval(1000))
 *   ).subscribe(counter => {
 *     this.value = counter;
 *     cd.detectChanges();
 *   });
 * }
 * ```
 * ```

  /**
   * Bootstrap a new component at the root level of the application.
   * @usageNotes
   * ### Bootstrap
   *
   * When bootstrapping a new root component into an application, Angular mounts the
   * specified application component onto DOM elements identified by the componentType's
   * selector and kicks off automatic change detection to finish initializing the component.
   * Optionally, a component can be mounted onto a DOM element that does not match the
   * selector or componentType's selector.
   * @example
   * ```
   * import { Component } from '@angular/core';
   * import { NgModule } from '@angular/core';
   *
   * @NgModule({
   *   declarations: [
   *     App
   *   ],
   *   imports: [
   *     BrowserModule
   *   ],
   *   bootstrap: [
   *     App
   *   ]
   * })
   * export class AppModule {
   *
   *   static ngModuleFactory: ComponentFactory
   *   static ngModuleRef: NgModuleRef<AppModule>
   *
   *   static createRootComponentFactory() {
   *     return new AngularComponentFactory(AppModule, AppModule);
   *   }
   * }
   *
   * @Component({
   *   selector: 'app',
   *   template: '<p>Hello</p>'
   * })
   * export class App {
   *   constructor(private injector: Injector) {
   *     console.log(this.injector.get(AppModule));
   *   }
   * }
   * ```
   */
  bootstrap<C>(componentOrFactory: ComponentFactory<C> | Type<C>, rootSelectorOrNode?: string | any): ComponentRef<C> {
    if (!this._initStatus.done) {
      throw new Error('Cannot bootstrap as there are still asynchronous initializers running. Bootstrap components in the `ngDoBootstrap` method of the root module.');
    }
    let componentFactory: ComponentFactory<C> = null;
    if (componentOrFactory instanceof ComponentFactory) {
      componentFactory = componentOrFactory;
    } else {
      componentFactory = this._componentFactoryResolver.resolveComponentFactory(componentOrFactory)!
    }
    this.componentTypes.push(componentFactory.componentType);

    // Create a factory associated with the current module if it's not bound to some other
    const ngModule = undefined;
    componentFactory.create(Injector.NULL, [], rootSelectorOrNode || componentFactory.selector, 0);

    const testability = compRef.injector.get(Testability, null);
    if (testability) {
      compRef.injector.get(TestabilityRegistry).registerApplication(compRef.location.nativeElement, testability);
    }
    return compRef;
  }

  /**
   * Invoke this method to explicitly process change detection and its side-effects.
   * @returns * In development mode, `tick()` also performs a second change detection cycle to ensure that no bindings in the app have side-effects that cannot be resolved in a single change
   */
  tick(): any {
    if (isDevMode()) {
      this._console.log(`Angular is running in development mode. Call enableProdMode() to enable production mode.`);
    }
    return compRef;
  }
```
In this case, Angular throws an error, since an Angular application can only have one change detection pass during which all change detection must complete. The `tick()` function throws an error if called recursively.

```typescript
if (this._runningTick) {
  throw new Error('ApplicationRef.tick is called recursively');
}
```

The `for` loop in this case cannot complete because it depends on `this._views` which is not yet initialized. When a view is detached, its check is not run again. Detaching a view that is already attached to the ViewContainer will throw an error.

```typescript
remove(this._views, view); view.detachFromAppRef();
```

to wrap an \(\text{inject}\) call.

Example:

\[
\text{it('...', async(inject([AClass] \(, (\text{object}) \rightarrow \{ \text{object.doSomething.then()} \rightarrow \{ \text{...}\})) \rightarrow \{ \text{...}\} \} \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\} \) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}))};
\]

The test will automatically\(\text{runInTestZone}\) complete when all asynchronous calls within this zone are done. Can be used\(\text{async(inject([AClass], (\text{object}) \rightarrow \{ \text{...}\})) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\})) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...}\}) \rightarrow \{ \text{...\)

                        // Check whether a give Type has respective NG def (cmp) and compile if def isn’t
                        // missing. That might happen in case a class without any Angular decorators extends another
                        // class where Component/Directive/Pipe decorator is defined.
                        if (isComponentDefPendingResolution(type) || !type.hasOwnProperty(core.NG_COMP_DEF)) {
                            this.pendingComponents.add(type);
                            // Keep track of the module which declares this component, so later the component’s scope
                        } can be set correctly. If the component has already been recorded here, then
one of several cases is true:

* the component containing the component was imported multiple times (common).
* the component is declared in multiple modules (which is an error).
* the component was in 'declarations' of the testing module, and also in an imported module

in which case the module scope will be TestingModuleOverride.DECLARATION.

overrideTemplateUsingTestingModule was called for the component in which case the module scope will be TestingModuleOverride.OVERRIDE_TEMPLATE.

If the component was previously in the testing module's 'declarations' (meaning the current value is TestingModuleOverride.DECLARATION), then `moduleType` is the component's real module, which was imported. This pattern is understood to mean that the component should use its original scope, but that the testing module should also contain the component in its scope.

If this.componentToModuleScope.has(type) this.componentToModuleScope.get(type) === TestingModuleOverride.DECLARATION {
    moduleType; return;
} else {

**Related Notes:**
- `TestBed` is the primary API for writing unit tests for Angular applications and libraries.
- Use `TestBed` in tests. It will be set to either `TestBedViewEngine` or `TestBedRender3` according to the compiler used.
- `TestBed` supports injecting dependencies in `beforeEach()` and `it()`.
- `TestBed` allows using the `inject()` helper function to inject dependencies into components.
- `TestBed` provides a `provide()` method to provide services and modules.
- `TestBed` includes methods for testing async operations.
- `TestBed` is designed to be used in conjunction with the `expect` and `assert` methods provided by the testing framework (e.g., Jasmine, Mocha).

Metadata-Version: 1.1
Name: isodate
Version: 0.6.0
Summary: An ISO 8601 date/time/duration parser and formatter
Home-page: https://github.com/gweis/isodate/
Author: Gerhard Weis
Author-email: gerhard.weis@proclos.com
License: BSD
Description:
ISO 8601 date/time parser

This module implements ISO 8601 date, time and duration parsing. The implementation follows ISO8601:2004 standard, and implements only date/time representations mentioned in the standard. If something is not mentioned there, then it is treated as non existent, and not as an allowed option.

For instance, ISO8601:2004 never mentions 2 digit years. So, it is not intended by this module to support 2 digit years. (while it may still be valid as ISO date, because it is not explicitly forbidden.)
Another example is, when no time zone information is given for a time, then it should be interpreted as local time, and not UTC.

As this module maps ISO 8601 dates/times to standard Python data types, like
*date*, *time*, *datetime* and *timedelta*, it is not possible to convert all possible ISO 8601 dates/times. For instance, dates before 0001-01-01 are not allowed by the Python *date* and *datetime* classes. Additionally fractional seconds are limited to microseconds. That means if the parser finds for instance nanoseconds it will round it to microseconds.

Documentation
-------------

Currently there are four parsing methods available.

* parse_time:
  parses an ISO 8601 time string into a *time* object

* parse_date:
  parses an ISO 8601 date string into a *date* object

* parse_datetime:
  parses an ISO 8601 date-time string into a *datetime* object

* parse_duration:
  parses an ISO 8601 duration string into a *timedelta* or *Duration* object.

* parse_tzinfo:
  parses the time zone info part of an ISO 8601 string into a *tzinfo* object.

As ISO 8601 allows to define durations in years and months, and *timedelta* does not handle years and months, this module provides a *Duration* class, which can be used almost like a *timedelta* object (with some limitations). However, a *Duration* object can be converted into a *timedelta* object.

There are also ISO formatting methods for all supported data types. Each *xxx_isoformat* method accepts a format parameter. The default format is always the ISO 8601 expanded format. This is the same format used by *datetime.isoformat*:

* time_isoformat:
  Intended to create ISO time strings with default format
  *hh:mm:ssZ*.

* date_isoformat:
  Intended to create ISO date strings with default format
  *yyyy-mm-dd*.

* datetime_isoformat:
  Intended to create ISO date-time strings with default format
  *yyyy-mm-ddThh:mm:ssZ*.

* duration_isoformat:
  Intended to create ISO duration strings with default format
  *PnnYnnMnnDTnnHnnMnnS*.

* tz_isoformat:
  Intended to create ISO time zone strings with default format
  *hh:mm*. 

* strftime:
  A re-implementation mostly compatible with Python's *strftime*, but
  supports only those format strings, which can also be used for dates
  prior 1900. This method also understands how to format *datetime* and
  *Duration* instances.

Installation:
-------------

This module can easily be installed with Python standard installation methods.

Either use *python setup.py install* or in case you have *setuptools* or
*distribute* available, you can also use *easy_install*.

Limitations:
------------

* The parser accepts several date/time representation which should be invalid
  according to ISO 8601 standard.

  1. for date and time together, this parser accepts a mixture of basic and extended format.
     e.g. the date could be in basic format, while the time is accepted in extended format.
     It also allows short dates and times in date-time strings.
  2. For incomplete dates, the first day is chosen. e.g. 19th century results in a date of
     1901-01-01.
  3. negative *Duration* and *timedelta* value are not fully supported yet.

Further information:
---------------------

The doc strings and unit tests should provide rather detailed information about
the methods and their limitations.

The source release provides a *setup.py* script,
which can be used to run the unit tests included.

Source code is available at `<http://github.com/gweis/isodate>`.

CHANGES
=======

0.6.0 (2017-10-13)
------------------

- support incomplete month date (Fabien Loffredo)
- rely on duck typing when doing duration maths
- support ":" as separator in fractional time zones (usrenmae)
0.5.4 (2015-08-06)
------------------
- Fix parsing of Periods (Fabien Bochu)
- Make Duration objects hashable (Geoffrey Fairchild)
- Add multiplication to duration (Reinoud Elhorst)

0.5.1 (2014-11-07)
------------------
- fixed pickling of Duration objects
- raise ISO8601Error when there is no 'T' separator in datetime strings (Adrian Coveney)

0.5.0 (2014-02-23)
------------------
- ISO8601Error are subclasses of ValueError now (Michael Hrivnak)
- improve compatibility across various python variants and versions
- raise exceptions when using fractional years and months in date maths with durations
- renamed method todatetime on Duration objects to totimedelta

0.4.9 (2012-10-30)
------------------
- support pickling FixedOffset instances
- make sure parsed fractional seconds are in microseconds
- add leading zeros when formatting microseconds (Jarom Loveridge)

0.4.8 (2012-05-04)
------------------
- fixed incompatibility of unittests with python 2.5 and 2.6 (runs fine on 2.7 and 3.2)

0.4.7 (2012-01-26)
------------------
- fixed tzinfo formatting (never pass None into tzinfo.utcoffset())

0.4.6 (2012-01-06)
- added Python 3 compatibility via 2to3

0.4.5 (2012-01-06)

------------------

- made setuptools dependency optional

0.4.4 (2011-04-16)

------------------

- Fixed formatting of microseconds for datetime objects

0.4.3 (2010-10-29)

------------------

- Fixed problem with %P formating and fractions (supplied by David Brooks)

0.4.2 (2010-10-28)

------------------

- Implemented unary - for Duration (supplied by David Brooks)
  - Output fractional seconds with '%P' format. (partly supplied by David Brooks)

0.4.1 (2010-10-13)

------------------

- fixed bug in comparison between timedelta and Duration.
- fixed precision problem with microseconds (reported by Tommi Virtanen)

0.4.0 (2009-02-09)

------------------

- added method to parse ISO 8601 time zone strings
- added methods to create ISO 8601 conforming strings

0.3.0 (2009-1-05)

------------------

- Initial release

Todos

=====

This to do list contains some thoughts and ideas about missing features, and parts to think about, whether to implement them or not. This list is probably not complete.
Missing features:
-------------

* time formating does not allow to create fractional representations.
* parser for ISO intervals.
* currently microseconds are always padded to a length of 6 characters.
  trailing 0s should be optional

Documentation:
-------------

* parse_datetime:
  - complete documentation to show what this function allows, but ISO forbids.
    and vice verse.
  - support other separators between date and time than 'T'

* parse_date:
  - yeardigits should be always greater than 4
  - dates before 0001-01-01 are not supported

* parse_duration:
  - alternative formats are not fully supported due to parse_date restrictions
  - standard duration format is fully supported but not very restrictive.

* Duration:
  - support fractional years and month in calculations
  - implement w3c order relation? ("<http://www.w3.org/TR/xmlschema-2/#duration-order>"")
  - refactor to have duration mathematics only at one place.
  - localize __str__ method (does timedelta do this?)
  - when is a Duration negative?
  - normalize Durations. months [00-12] and years [-inf,+inf]

1.1405.1 Available under license:
Apache Tomcat
Copyright 1999-2019 The Apache Software Foundation

This product includes software developed at
The Apache Software Foundation (http://www.apache.org/).

Apache License
TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions
to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

   (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

   (b) You must cause any modified files to carry prominent notices
stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS,
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.
"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "["] replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

1.1410.1 Available under license :
   PCRE2 LICENCE

PCRE2 is a library of functions to support regular expressions whose syntax and semantics are as close as possible to those of the Perl 5 language.

Releases 10.00 and above of PCRE2 are distributed under the terms of the "BSD" licence, as specified below, with one exemption for certain binary redistributions. The documentation for PCRE2, supplied in the "doc" directory, is distributed under the same terms as the software itself. The data in the
testdata directory is not copyrighted and is in the public domain.

The basic library functions are written in C and are freestanding. Also included in the distribution is a just-in-time compiler that can be used to optimize pattern matching. This is an optional feature that can be omitted when the library is built.

THE "BSD" LICENCE
------------------

Redistribution and use in source and binary forms, with or without

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

* Redistributions of source code must retain the above copyright notices, this list of conditions and the following disclaimer.

* Redistributions in binary form must reproduce the above copyright notices, this list of conditions and the following disclaimer in the documentation and/or other materials provided with the distribution.

* Neither the name of the University of Cambridge nor the names of any contributors may be used to endorse or promote products derived from this software without specific prior written permission.

THIS SOFTWARE IS PROVIDED BY THE COPYRIGHT HOLDERS AND CONTRIBUTORS "AS IS" AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.

EXEMPTION FOR BINARY LIBRARY-LIKE PACKAGES
-----------------------------------------------

The second condition in the BSD licence (covering binary redistributions) does not apply all the way down a chain of software. If binary package A includes PCRE2, it must respect the condition, but if package B is software that includes package A, the condition is not imposed on package B unless it uses PCRE2 independently.

End

PCRE2 LICENCE

Please see the file LICENCE in the PCRE2 distribution for licensing details.

End

Redistribution and use in source and binary forms, with or without modification, are permitted provided that the following conditions are met:

1. Redistributions of source code must retain the copyright notice, this list of conditions and the following disclaimer.
2. Redistributions in binary form must reproduce the copyright
notice, this list of conditions and the following disclaimer in the
documentation and/or other materials provided with the distribution.

GNU GENERAL PUBLIC LICENSE
Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
675 Mass Ave, Cambridge, MA 02139, USA
Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Library General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program).
Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

   a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

   b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

   c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest
your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

   a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

   b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

   c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program
except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed
through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.
12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING
WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR
REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES,
INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING
OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED
TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY
YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER
PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE
POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

Appendix: How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively
convey the exclusion of warranty; and each file should have at least
the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) 19yy <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful,
but WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the
GNU General Public License for more details.

You should have received a copy of the GNU General Public License
along with this program; if not, write to the Free Software
Foundation, Inc., 675 Mass Ave, Cambridge, MA 02139, USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this
when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) 19yy name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.

Open Source Used In Secure Network Analytics (Stealthwatch) 7.4.0 9028
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

License

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.
1. Definitions

"Collective Work" means a work, such as a periodical issue, anthology or encyclopedia, in which the Work in its entirety in unmodified form, along with a number of other contributions, constituting separate and independent works in themselves, are assembled into a collective whole. A work that constitutes a Collective Work will not be considered a Derivative Work (as defined below) for the purposes of this License.

"Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works, such as a translation, musical arrangement, dramatization, fictionalization, motion picture version, sound recording, art reproduction, abridgment, condensation, or any other form in which the Work may be recast, transformed, or adapted, except that a work that constitutes a Collective Work will not be considered a Derivative Work for the purpose of this License. For the avoidance of doubt, where the Work is a musical composition or sound recording, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered a Derivative Work for the purpose of this License.

"Licensor" means the individual or entity that offers the Work under the terms of this License.

"Original Author" means the individual or entity who created the Work.

"Work" means the copyrightable work of authorship offered under the terms of this License.

"You" means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.

2. Fair Use Rights. Nothing in this license is intended to reduce, limit, or restrict any rights arising from fair use, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

   to reproduce the Work, to incorporate the Work into one or more Collective Works, and to reproduce the Work as incorporated in the Collective Works:
   - to create and reproduce Derivative Works;
   - to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission the Work including as incorporated in Collective Works;
   - to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission Derivative Works.

   For the avoidance of doubt, where the work is a musical composition:

   Performance Royalties Under Blanket Licenses. Licensor waives the exclusive right to collect, whether individually or via a performance rights society (e.g. ASCAP, BMI, SESAC), royalties for the public performance or public digital performance (e.g. webcast) of the Work.

   Mechanical Rights and Statutory Royalties. Licensor waives the exclusive right to collect, whether individually or via a music rights agency or designated agent (e.g. Harry Fox Agency), royalties for any phonorecord You create from the Work ("cover version") and distribute, subject to the compulsory license created by 17 USC Section 115 of the US Copyright Act (or the equivalent in other jurisdictions).

   Webcasting Rights and Statutory Royalties. For the avoidance of doubt, where the Work is a sound recording, Licensor waives the exclusive right to collect, whether individually or via a performance-rights society (e.g. SoundExchange), royalties for the public digital performance (e.g. webcast) of the Work, subject to the compulsory...
license created by 17 USC Section 114 of the US Copyright Act (or the equivalent in other jurisdictions).

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above rights include the right to make such modifications as are technically necessary to exercise the rights in other media and formats. All rights not expressly granted by Licensor are hereby reserved.

4. Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

You may distribute, publicly display, publicly perform, or publicly digitally perform the Work only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy or phonorecord of the Work You distribute, publicly display, publicly perform, or publicly digitally perform. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute, publicly display, publicly perform, or publicly digitally perform the Work with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License Agreement. The above applies to the Work as incorporated in a Collective Work, but this does not require the Collective Work apart from the Work itself to be made subject to the terms of this License. If You create a Collective Work, upon notice from any Licensor You must, to the extent practicable, remove from the Collective Work any credit as required by clause 4(b), as requested. If You create a Derivative Work, upon notice from any Licensor You must, to the extent practicable, remove from the Derivative Work any credit as required by clause 4(b), as requested.

If you distribute, publicly display, publicly perform, or publicly digitally perform the Work or any Derivative Works or Collective Works, You must keep intact all copyright notices for the Work and provide, reasonable to the medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied, and/or (ii) if the Original Author and/or Licensor designate another party or parties (e.g. a sponsor institute, publishing entity, journal) for attribution in Licensor's copyright notice, terms of service or by other reasonable means, the name of such party or parties; the title of the Work if supplied; to the extent reasonably practicable, the Uniform Resource Identifier, if any, that Licensor specifies to be associated with the Work, unless such URI does not refer to the copyright notice or licensing information for the Work; and in the case of a Derivative Work, a credit identifying the use of the Work in the Derivative Work (e.g., "French translation of the Work by Original Author," or "Screenplay based on original Work by Original Author"). Such credit may be implemented in any reasonable manner; provided, however, that in the case of a Derivative Work or Collective Work, at a minimum such credit will appear where any other comparable authorship credit appears and in a manner at least as prominent as such other comparable authorship credit.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND CONCERNING THE WORK, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY TO YOU.

6. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT
7. Termination

This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Derivative Works or Collective Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.

Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

Each time You distribute or publicly digitally perform the Work or a Collective Work, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.

Each time You distribute or publicly digitally perform a Derivative Work, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.

If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.

This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.

Version 2.0, January 2004
http://www.apache.org/licenses/
1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of
the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works...
that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A
PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

License

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CREATIVE COMMONS PUBLIC LICENSE ("CCPL" OR "LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HERE, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE LICENSOR GRANTS YOU THE RIGHTS CONTAINED HERE IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS.
1. Definitions

"Collective Work" means a work, such as a periodical issue, anthology or encyclopedia, in which the Work in its entirety in unmodified form, along with a number of other contributions, constituting separate and independent works in themselves, are assembled into a collective whole. A work that constitutes a Collective Work will not be considered a Derivative Work (as defined below) for the purposes of this License.

"Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works, such as a translation, musical arrangement, dramatization, fictionalization, motion picture version, sound recording, art reproduction, abridgment, condensation, or any other form in which the Work may be recast, transformed, or adapted, except that a work that constitutes a Collective Work will not be considered a Derivative Work for the purpose of this License. For the avoidance of doubt, where the Work is a musical composition or sound recording, the synchronization of the Work in timed-relation with a moving image ("synching") will be considered a Derivative Work for the purpose of this License.

"Licensor" means the individual or entity that offers the Work under the terms of this License.

"Original Author" means the individual or entity who created the Work.

"Work" means the copyrightable work of authorship offered under the terms of this License.

"You" means an individual or entity exercising rights under this License who has not previously violated the terms of this License with respect to the Work, or who has received express permission from the Licensor to exercise rights under this License despite a previous violation.

2. Fair Use Rights. Nothing in this license is intended to reduce, limit, or restrict any rights arising from fair use, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

3. License Grant. Subject to the terms and conditions of this License, Licensor hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

- to reproduce the Work, to incorporate the Work into one or more Collective Works, and to reproduce the Work as incorporated in the Collective Works;
- to create and reproduce Derivative Works;
- to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission the Work including as incorporated in Collective Works;
- to distribute copies or phonorecords of, display publicly, perform publicly, and perform publicly by means of a digital audio transmission Derivative Works.

For the avoidance of doubt, where the work is a musical composition:

Performance Royalties Under Blanket Licenses. Licensor waives the exclusive right to collect, whether individually or via a performance rights society (e.g. ASCAP, BMI, SESAC), royalties for the public performance or public digital performance (e.g. webcast) of the Work.

Mechanical Rights and Statutory Royalties. Licensor waives the exclusive right to collect, whether individually or via a music rights agency or designated agent (e.g. Harry Fox Agency), royalties for any phonorecord You create from the Work ("cover version") and distribute, subject to the compulsory license created by 17 USC Section 115 of the US Copyright Act (or the equivalent in other jurisdictions).

Webcasting Rights and Statutory Royalties. For the avoidance of doubt, where the Work is a sound recording, Licensor waives the exclusive right to collect, whether individually or via a performance-rights society (e.g. SoundExchange), royalties for the public digital performance (e.g. webcast) of the Work, subject to the compulsory
license created by 17 USC Section 114 of the US Copyright Act (or the equivalent in other jurisdictions).

The above rights may be exercised in all media and formats whether now known or hereafter devised. The above
rights include the right to make such modifications as are technically necessary to exercise the rights in other media
and formats. All rights not expressly granted by Licensor are hereby reserved.

4. Restrictions.
The license granted in Section 3 above is expressly made subject to and limited by the following
restrictions:

You may distribute, publicly display, publicly perform, or publicly digitally perform the Work only under the
terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with
every copy or phonorecord of the Work You distribute, publicly display, publicly perform, or publicly digitally
perform. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the
recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all
notices that refer to this License and to the disclaimer of warranties. You may not distribute, publicly display,
publicly perform, or publicly digitally perform the Work with any technological measures that control access or use
of the Work in a manner inconsistent with the terms of this License Agreement. The above applies to the Work as
incorporated in a Collective Work, but this does not require the Collective Work apart from the Work itself to be
made subject to the terms of this License. If You create a Collective Work, upon notice from any Licensor You
must, to the extent practicable, remove from the Collective Work any credit as required by clause 4(b), as requested.
If You create a Derivative Work, upon notice from any Licensor You must, to the extent practicable, remove from
the Derivative Work any credit as required by clause 4(b), as requested.

If you distribute, publicly display, publicly perform, or publicly digitally perform the Work or any Derivative
Works or Collective Works, You must keep intact all copyright notices for the Work and provide, reasonable to the
medium or means You are utilizing: (i) the name of the Original Author (or pseudonym, if applicable) if supplied,
and/or (ii) if the Original Author and/or Licensor designate another party or parties (e.g. a sponsor institute,
publishing entity, journal) for attribution in Licensor's copyright notice, terms of service or by other reasonable
means, the name of such party or parties; the title of the Work if supplied; to the extent reasonably practicable, the
Uniform Resource Identifier, if any, that Licensor specifies to be associated with the Work, unless such URI does
not refer to the copyright notice or licensing information for the Work; and in the case of a Derivative Work, a credit
identifying the use of the Work in the Derivative Work (e.g., "French translation of the Work by Original Author,
" or "Screenplay based on original Work by Original Author"). Such credit may be implemented in any reasonable
manner; provided, however, that in the case of a Derivative Work or Collective Work, at a minimum such credit will
appear where any other comparable authorship credit appears and in a manner at least as prominent as such other
comparable authorship credit.

5. Representations, Warranties and Disclaimer

UNLESS OTHERWISE MUTUALLY AGREED TO BY THE PARTIES IN WRITING, LICENSOR OFFERS
THE WORK AS-IS AND MAKES NO REPRESENTATIONS OR WARRANTIES OF ANY KIND
CONCERNING THE WORK, EXPRESS, IMPLIED, STATUTORY OR OTHERWISE, INCLUDING, WITHOUT
LIMITATION, WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE,
NONINFRINGEMENT, OR THE ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE
PRESENCE OF ABSENCE OF ERRORS, WHETHER OR NOT DISCOVERABLE. SOME JURISDICTIONS DO
NOT ALLOW THE EXCLUSION OF IMPLIED WARRANTIES, SO SUCH EXCLUSION MAY NOT APPLY
TO YOU.

6. Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT
7. Termination

This License and the rights granted hereunder will terminate automatically upon any breach by You of the terms of this License. Individuals or entities who have received Derivative Works or Collective Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 5, 6, 7, and 8 will survive any termination of this License.

Subject to the above terms and conditions, the license granted here is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, Licensor reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

8. Miscellaneous

Each time You distribute or publicly digitally perform the Work or a Collective Work, the Licensor offers to the recipient a license to the Work on the same terms and conditions as the license granted to You under this License.

Each time You distribute or publicly digitally perform a Derivative Work, Licensor offers to the recipient a license to the original Work on the same terms and conditions as the license granted to You under this License.

If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this agreement, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.

This License constitutes the entire agreement between the parties with respect to the Work licensed here. There are no understandings, agreements or representations with respect to the Work not specified here. Licensor shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Licensor and You.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.
"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was
submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and
You must cause any modified files to carry prominent notices stating that You changed the files; and
You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the
Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: HOW TO APPLY THE APACHE LICENSE TO YOUR WORK

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their
Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with
the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of Your accepting any such warranty or additional liability.

1.1420 mail 1.6.2
1.1420.1 Available under license :
COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.1

1. Definitions.

1.1. "Contributor” means each individual or entity that creates or
contributes to the creation of Modifications.

1.2. "Contributor Version” means the combination of the Original
Software, prior Modifications used by a Contributor (if any), and
the Modifications made by that particular Contributor.

1.3. "Covered Software” means (a) the Original Software, or (b)
Modifications, or (c) the combination of files containing Original
Software with files containing Modifications, in each case including
portions thereof.

1.4. "Executable” means the Covered Software in any form other than
Source Code.

1.5. "Initial Developer” means the individual or entity that first
makes Original Software available under this License.

1.6. "Larger Work” means a work which combines Covered Software or
portions thereof with code not governed by the terms of this License.

1.7. "License” means this document.

1.8. "Licensable” means having the right to grant, to the maximum
extent possible, whether at the time of the initial grant or
subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications” means the Source Code and Executable form of
any of the following:

A. Any file that results from an addition to, deletion from or
modification of the contents of a file containing Original Software
or previous Modifications;

B. Any new file that contains any part of the Original Software or
previous Modification; or
C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. "Original Software" means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this
License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available
in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from
the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.

Oracle is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this
5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as "Participant") alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. If You assert a patent infringement claim against Participant alleging that the Participant Software directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or
6.4. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" (as that term is defined at 48 C.F.R. 252.227-7014(a)(1)) and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law
provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys’ fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

------------------------------------------------------------------------

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.
51 Franklin Street, Fifth Floor
Boston, MA 02110-1335
USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble
The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION
0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification"). Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License.
(Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any
associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you
could satisfy both it and this License would be to refrain entirely from
distribution of the Program.

If any portion of this section is held invalid or unenforceable under
any particular circumstance, the balance of the section is intended to
apply and the section as a whole is intended to apply in other
circumstances.

It is not the purpose of this section to induce you to infringe any
patents or other property right claims or to contest validity of any
such claims; this section has the sole purpose of protecting the
integrity of the free software distribution system, which is implemented
by public license practices. Many people have made generous
contributions to the wide range of software distributed through that
system in reliance on consistent application of that system; it is up to
the author/donor to decide if he or she is willing to distribute
software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be
a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in
certain countries either by patents or by copyrighted interfaces, the
original copyright holder who places the Program under this License may
add an explicit geographical distribution limitation excluding those
countries, so that distribution is permitted only in or among countries
not thus excluded. In such case, this License incorporates the
limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new
versions of the General Public License from time to time. Such new
versions will be similar in spirit to the present version, but may
differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program
specifies a version number of this License which applies to it and “any
later version”, you have the option of following the terms and
conditions either of that version or of any later version published by
the Free Software Foundation. If the Program does not specify a version
number of this License, you may choose any version ever published by the
Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free
programs whose distribution conditions are different, write to the
author to ask for permission. For software which is copyrighted by the
Free Software Foundation, write to the Free Software Foundation; we
sometimes make exceptions for this. Our decision will be guided by the
two goals of preserving the free status of all derivatives of our free
software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO
WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW,
EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR
OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND,
EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED
WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE
ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH
YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL
NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN
WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY
AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR
DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL
DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM
(INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED
INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF
THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR
OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest
possible use to the public, the best way to achieve this is to make it
free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to
attach them to the start of each source file to most effectively convey
the exclusion of warranty; and each file should have at least the
"copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify
it under the terms of the GNU General Public License as published by
the Free Software Foundation; either version 2 of the License, or
(at your option) any later version.

This program is distributed in the hope that it will be useful, but
WITHOUT ANY WARRANTY; without even the implied warranty of
MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU
General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1335 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#

Certain source files distributed by Oracle America, Inc. and/or its affiliates are subject to the following clarification and special exception to the GPLv2, based on the GNU Project exception for its Classpath libraries, known as the GNU Classpath Exception, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."
You should also note that Oracle includes multiple, independent programs in this software package. Some of those programs are provided under licenses deemed incompatible with the GPLv2 by the Free Software Foundation and others. For example, the package includes programs licensed under the Apache License, Version 2.0. Such programs are licensed to you under their original licenses.

Oracle facilitates your further distribution of this package by adding the Classpath Exception to the necessary parts of its GPLv2 code, which permits you to use that code in combination with other independent modules not licensed under the GPLv2. However, note that this would not permit you to commingle code under an incompatible license with Oracle's GPLv2 licensed code by, for example, cutting and pasting such code into a file also containing Oracle's GPLv2 licensed code and then distributing the result. Additionally, if you were to remove the Classpath Exception from any of the files to which it applies and distribute the result, you would likely be required to license some or all of the other code in that distribution under the GPLv2 as well, and since the GPLv2 is incompatible with the license terms of some items included in the distribution by Oracle, removing the Classpath Exception could therefore effectively compromise your ability to further distribute the package.

Proceed with caution and we recommend that you obtain the advice of a lawyer skilled in open source matters before removing the Classpath Exception or making modifications to this package which may subsequently be redistributed and/or involve the use of third party software.

CLASSPATH EXCEPTION
Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

1.1423 openam-audit-context 14.1.5

1.1423.1 Available under license:

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

1. Definitions.

1.1. "Contributor" means each individual or entity that creates or contributes to the creation of Modifications.
1.2. "Contributor Version" means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. "Covered Software" means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. "Executable" means the Covered Software in any form other than Source Code.

1.5. "Initial Developer" means the individual or entity that first makes Original Software available under this License.

1.6. "Larger Work" means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. "Original Software" means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims,
the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

3. Distribution Obligations.

3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License.
You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

4. Versions of the License.

4.1. New Versions.
Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as "Participant") alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.
6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

8. U.S. GOVERNMENT END USERS.

The Covered Software is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" (as that term is defined at 48 C.F.R. § 252.227-7014(a)(1)) and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

10. RESPONSIBILITY FOR CLAIMS.
As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

1.1424 jsr305 1.3.9

1.1424.1 Available under license:

Apache License
Version 2.0, January 2004

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).
"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate.
as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify
the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include
the brackets!) The text should be enclosed in the appropriate
comment syntax for the file format. We also recommend that a
file or class name and description of purpose be included on the
same "printed page" as the copyright notice for easier
identification within third-party archives.

Everyone is permitted to copy and distribute verbatim copies
of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your
freedom to share and change it. By contrast, the GNU General Public
License is intended to guarantee your freedom to share and change free
software--to make sure the software is free for all its users. This
General Public License applies to most of the Free Software
Foundation's software and to any other program whose authors commit to
using it. (Some other Free Software Foundation software is covered by
the GNU Lesser General Public License instead.) You can apply it to
your programs, too.

When we speak of free software, we are referring to freedom, not
price. Our General Public Licenses are designed to make sure that you
have the freedom to distribute copies of free software (and charge for
this service if you wish), that you receive source code or can get it
if you want it, that you can change the software or use pieces of it
in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid
anyone to deny you these rights or to ask you to surrender the rights.
These restrictions translate to certain responsibilities for you if you
distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether
gratis or for a fee, you must give the recipients all the rights that
you have. You must make sure that they, too, receive or can get the
source code. And you must show them these terms so they know their
rights.

We protect your rights with two steps: (1) copyright the software, and
(2) offer you this license which gives you legal permission to copy,
distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain
that everyone understands that there is no warranty for this free
software. If the software is modified by someone else and passed on, we
want its recipients to know that what they have is not the original, so
that any problems introduced by others will not reflect on the original
authors' reputations.
Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

GNU GENERAL PUBLIC LICENSE
TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

   a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

   a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

   b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete
machine-readable copy of the corresponding source code, to be
distributed under the terms of Sections 1 and 2 above on a medium
customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer
to distribute corresponding source code. (This alternative is
allowed only for noncommercial distribution and only if you
received the program in object code or executable form with such
an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for
making modifications to it. For an executable work, complete source
code means all the source code for all modules it contains, plus any
associated interface definition files, plus the scripts used to
control compilation and installation of the executable. However, as a
special exception, the source code distributed need not include
anything that is normally distributed (in either source or binary
form) with the major components (compiler, kernel, and so on) of the
operating system on which the executable runs, unless that component
itself accompanies the executable.

If distribution of executable or object code is made by offering
access to copy from a designated place, then offering equivalent
access to copy the source code from the same place counts as
distribution of the source code, even though third parties are not
compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program
except as expressly provided under this License. Any attempt
otherwise to copy, modify, sublicense or distribute the Program is
void, and will automatically terminate your rights under this License.
However, parties who have received copies, or rights, from you under
this License will not have their licenses terminated so long as such
parties remain in full compliance.

5. You are not required to accept this License, since you have not
signed it. However, nothing else grants you permission to modify or
distribute the Program or its derivative works. These actions are
prohibited by law if you do not accept this License. Therefore, by
modifying or distributing the Program (or any work based on the
Program), you indicate your acceptance of this License to do so, and
all its terms and conditions for copying, distributing or modifying
the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the
Program), the recipient automatically receives a license from the
original licensor to copy, distribute or modify the Program subject to
these terms and conditions. You may not impose any further
restrictions on the recipients’ exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.
Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest
to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

<one line to give the program's name and a brief idea of what it does.>
Copyright (C) <year>  <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1301 USA.

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'.
This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program 'Gnomovision' (which makes passes at compilers) written by James Hacker.

<signature of Ty Coon>, 1 April 1989
Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may
consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Lesser General Public License instead of this License.

1.1426.1 Available under license:

Apache License
Version 2.0, January 2004
https://www.apache.org/licenses/

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).
"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed.
with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

ASN.1 library for Python

================================

.. toctree::
   :maxdepth: 1
Abstract Syntax Notation One (ASN.1) is a technology for exchanging structured data in a universally understood, hardware agnostic way. Many industrial, security and telephony applications heavily rely on ASN.1.

The `pyasn1 <https://pypi.org/project/pyasn1/>`_ library implements ASN.1 support in pure-Python.

What is ASN.1
-------------

ASN.1 is a large, arguably over-engineered and extremely old data modelling and serialisation tool. It is probably among the first serialisation protocols in the history of computer science and technology.

ASN.1 started its life over 30 years ago as a serialisation mechanism for the first electronic mail (known as X.400). Later on if was split off the e-mail application and become a stand-alone tech still being actively supported by its designers and widely used in industry and technology.

Since then ASN.1 is sort of haunted by its relations with the OSI model -- the first, unsuccessful, version of the Internet. You can read many interesting discussions on that topic.

In the following years, generations of software engineers tackled the serialisation problem many times. We can see that in Google's `ProtoBuffers <https://developers.google.com/protocol-buffers/>`_ or `FlatBuffers <https://google.github.io/flatbuffers/>`_, for example. Interestingly, many new takes on binary protocol design do not depart far from ASN.1 from technical perspective. It's more of a matter of striking a balance between processing overhead, wire format overhead and human readability.

Looking at what ASN.1 has to offer, it has three loosely coupled parts:

* Data types: the standard introduces a collection of basic data types (integers, bits, strings, arrays and records) that can be used for describing arbitrarily complex, nested data structures.

* Serialisation protocols: the above data structures could be converted into a series of octets for storage or transmission over the wire as well as recovered back into their structured form. The system is fully agnostic to hardware architectures differences.

* Schema language: ASN.1 data structures could be described in terms of a schema language for ASN.1 compiler to turn it into platform-specific
implementation.

ASN.1 applications
-------------------

Being an old and generally successful standard, ASN.1 is widely adopted for many uses. To give you an example, these technologies use ASN.1 for their data exchange needs:

* Signaling standards for the public switched telephone network (SS7 family)
* Network management standards (SNMP, CMIP)
* Directory standards (X.500 family, LDAP)
* Public Key Infrastructure standards (X.509, etc.)
* PBX control (CSTA)
* IP-based Videoconferencing (H.323 family)
* Biometrics (BIP, CBEFF, ACBio)
* Intelligent transportation (SAE J2735)
* Cellular telephony (GSM, GPRS/EDGE, UMTS, LTE)

ASN.1 gotchas
--------------

Apparently, ASN.1 is hard to implement properly. Quality open-source ASN.1 tools are rare, but ad-hoc implementations are numerous. Judging from the statistics <http://cve.mitre.org/cgi-bin/cvekey.cgi?keyword=ASN.1> on discovered security vulnerabilities, many people have implemented ASN.1 parsers and oftentimes fell victim to its edge cases.

On the bright side, ASN.1 has been around for a long time, it is well understood and security reviewed.

Getting help
------------

Books on ASN.1
---------------

The pyasn1 implementation is largely based on reading up the following awesome books:

* `ASN.1 - Communication between heterogeneous systems <http://www.oss.com/asn1/dubuisson.html>`_ by Olivier Dubuisson

Here you can get the official standards which is hard to read:

On the other end of the readability spectrum, here is a quick and sweet write up:

If you are working with ASN.1, we'd highly recommend reading a proper book on the subject.

ASN.1 library for Python
------------------------
[![PyPI](https://img.shields.io/pypi/v/pyasn1.svg?maxAge=2592000)](https://pypi.org/project/pyasn1)
[![Python Versions](https://img.shields.io/pypi/pyversions/pyasn1.svg)](https://pypi.org/project/pyasn1/)
[![Coverage Status](https://img.shields.io/codecov/c/github/etingof/pyasn1.svg)](https://codecov.io/github/etingof/pyasn1)
[![GitHub license](https://img.shields.io/badge/license-BSD-blue.svg)](https://raw.githubusercontent.com/etingof/pyasn1/master/LICENSE.txt)

This is a free and open source implementation of ASN.1 types and codecs as a Python package. It has been first written to support particular protocol (SNMP) but then generalized to be suitable for a wide range of protocols based on [ASN.1 specification](https://www.itu.int/rec/dologin_pub.asp?lang=e&id=T-REC-X.208-198811-W!!PDF-E&type=items).

Features
--------
* Generic implementation of ASN.1 types (X.208)
* Standards compliant BER/CER/DER codecs
* Dumps/loads ASN.1 structures from Python types
* 100% Python, works with Python 2.4 up to Python 3.7
* MT-safe
* Contributed ASN.1 compiler [Asn1ate](https://github.com/kimgr/asn1ate)

Why using pyasn1
----------------
ASN.1 solves the data serialisation problem. This solution was designed long ago by the wise Ancients. Back then, they did not have the luxury of wasting bits. That is why ASN.1 is designed to serialise data structures of unbounded complexity into something compact and efficient when it comes to processing the data.

That probably explains why many network protocols and file formats still rely on the 30+ years old technology. Including a number of high-profile Internet protocols and file formats.

Quite a number of books cover the topic of ASN.1. [Communication between heterogeneous systems](http://www.oss.com/asn1/dubuisson.html) by Olivier Dubuisson is one of those high quality books freely available on the Internet.
The pyasn1 package is designed to help Python programmers tackling network protocols and file formats at the comfort of their Python prompt. The tool struggles to capture all aspects of a rather complicated ASN.1 system and to represent it on the Python terms.

How to use pyasn1
-----------------

With pyasn1 you can build Python objects from ASN.1 data structures. For example, the following ASN.1 data structure:

```bash
Record ::= SEQUENCE {
    id        INTEGER,
    room  [0] INTEGER OPTIONAL,
    house [1] INTEGER DEFAULT 0
}
```  

Could be expressed in pyasn1 like this:

```python
class Record(Sequence):
    componentType = NamedTypes(
        NamedType('id', Integer()),
        OptionalNamedType(
            'room', Integer().subtype(
                implicitTag=Tag(tagClassContext, tagFormatSimple, 0)
            ),
        ),
        DefaultedNamedType(
            'house', Integer(0).subtype(
                implicitTag=Tag(tagClassContext, tagFormatSimple, 1)
            ),
        )
    )
```

It is in the spirit of ASN.1 to take abstract data description and turn it into a programming language specific form. Once you have your ASN.1 data structure expressed in Python, you can use it along the lines of similar Python type (e.g. ASN.1 `SET` is similar to Python `dict`, `SET OF` to `list`):

```python
>>> record = Record()
>>> record['id'] = 123
>>> record['room'] = 321
```
```
>>> from pyasn1.codec.der.encoder import encode
>>> substrate = encode(record)
>>> hexdump(substrate)
00000: 30 07 02 01 7B 80 02 01 41
```
Or vice-versa -- you can initialize an ASN.1 structure from a tree of Python objects:

```python
>>> from pyasn1.codec.native.decoder import decode
>>> record = decode({'id': 123, 'room': 321, 'house': 0}, asn1Spec=Record())
>>> str(record)
Record:
id=123
room=321
```

With ASN.1 design, serialisation codecs are decoupled from data objects, so you could turn every single ASN.1 object into many different serialised forms. As of this moment, pyasn1 supports BER, DER, CER and Python built-ins codecs. The extremely compact PER encoding is expected to be introduced in the upcoming pyasn1 release.

More information on pyasn1 APIs can be found in the [documentation](http://snmplabs.com/pyasn1/), compiled ASN.1 modules for different protocols and file formats could be found in the pyasn1-modules [repo](https://github.com/etingof/pyasn1-modules).

How to get pyasn1
-----------------

The pyasn1 package is distributed under terms and conditions of 2-clause BSD [license](http://snmplabs.com/pyasn1/license.html). Source code is freely available as a GitHub [repo](https://github.com/etingof/pyasn1).

You could `pip install pyasn1` or download it from [PyPI](https://pypi.org/project/pyasn1).

If something does not work as expected, [open an issue](https://github.com/etingof/pyasn1/issues) at GitHub or post your question [on Stack Overflow](https://stackoverflow.com/questions/ask) or try browsing pyasn1 [mailing list archives](https://sourceforge.net/p/pyasn1/mailman/pyasn1-users/).

1.1434 jinja2 2.11.1
1.1434.1 Available under license :
No license file was found, but licenses were detected in source scan.
Jinja is a fast, expressive, extensible templating engine. Special placeholders in the template allow writing code similar to Python syntax. Then the template is passed data to render the final document.

It includes:

- Template inheritance and inclusion.
- Define and import macros within templates.
- HTML templates can use autoescaping to prevent XSS from untrusted user input.
- A sandboxed environment can safely render untrusted templates.
- AsyncIO support for generating templates and calling async functions.
- I18N support with Babel.
- Templates are compiled to optimized Python code just-in-time and cached, or can be compiled ahead-of-time.
- Exceptions point to the correct line in templates to make debugging easier.
- Extensible filters, tests, functions, and even syntax.

Jinja's philosophy is that while application logic belongs in Python if possible, it shouldn't make the template designer's job difficult by restricting functionality too much.

Installing
---------

Install and update using `pip`:

```
$ pip install -U Jinja2
```

In A Nutshell
--------------
.. code-block:: jinja

{% extends "base.html" %}
{% block title %}Members{% endblock %}
{% block content %}
<ul>
{% for user in users %}
<li><a href="{{ user.url }}">{{ user.username }}</a></li>
{% endfor %}
</ul>
{% endblock %}

1.1451.1 Available under license:

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.
1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
b) in the case of each subsequent Contributor:

i) changes to the Program, and

ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular
Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself
or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are
separate modules of software distributed in conjunction with the Program under their own license agreement, and
(ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or
sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide,
royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform,
distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and
object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide,
royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the
Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the
combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such
addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall
not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no
assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual
property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any
other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights
and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual
property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute
the Program, it is Recipient's responsibility to acquire that license before distributing the Program.
d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

a) it complies with the terms and conditions of this Agreement; and

b) its license agreement:

i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and

iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

a) it must be made available under this Agreement; and

b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor (“Commercial Contributor”) hereby agrees to defend and indemnify every other Contributor (“Indemnified Contributor”) against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a)
promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.
Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

# Date Range Picker

![Improvely.com](https://i.imgur.com/UTRlaar.png)

This date range picker component creates a dropdown menu from which a user can select a range of dates. I created it while building the UI for [Improvely](http://www.improvely.com), which needed a way to select date ranges for reports.

Features include limiting the selectable date range, localizable strings and date formats, a single date picker mode, a time picker, and predefined date ranges.

## [Documentation and Live Usage Examples](http://www.daterangepicker.com)

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.
"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed
as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this
License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Creative Commons Corporation ("Creative Commons") is not a law firm and does not provide legal services or legal advice. Distribution of Creative Commons public licenses does not create a lawyer-client or other relationship. Creative Commons makes its licenses and related information available on an "as-is" basis. Creative Commons gives no warranties regarding its licenses, any material licensed under their terms and conditions, or any related information. Creative Commons disclaims all liability for damages resulting from their use to the fullest extent possible.

Using Creative Commons Public Licenses

Creative Commons public licenses provide a standard set of terms and conditions that creators and other rights holders may use to share original works of authorship and other material subject to copyright and certain other rights specified in the public license below. The following considerations are for informational purposes only, are not exhaustive, and do not form part of our licenses.

Considerations for licensors: Our public licenses are intended for use by those authorized to give the public permission to use material in ways otherwise restricted by copyright and certain other rights. Our licenses are irrevocable. Licensors should read and understand the terms and conditions of the license they choose before applying it. Licensors should also secure all rights necessary before applying our licenses so that the public can reuse the material as expected. Licensors should clearly mark any material not subject to the license. This includes other CC-licensed material, or material used under an exception or
limitation to copyright. More considerations for licensors:
wiki.creativecommons.org/Considerations_for_licensors

Considerations for the public: By using one of our public licenses, a licensor grants the public permission to use the licensed material under specified terms and conditions. If the licensor's permission is not necessary for any reason—for example, because of any applicable exception or limitation to copyright—then that use is not regulated by the license. Our licenses grant only permissions under copyright and certain other rights that a licensor has authority to grant. Use of the licensed material may still be restricted for other reasons, including because others have copyright or other rights in the material. A licensor may make special requests, such as asking that all changes be marked or described. Although not required by our licenses, you are encouraged to respect those requests where reasonable. More considerations for the public:
wiki.creativecommons.org/Considerations_for_licensees

=======================================================================
Creative Commons Attribution-ShareAlike 4.0 International Public License

By exercising the Licensed Rights (defined below), You accept and agree to be bound by the terms and conditions of this Creative Commons Attribution-ShareAlike 4.0 International Public License (“Public License”). To the extent this Public License may be interpreted as a contract, You are granted the Licensed Rights in consideration of Your acceptance of these terms and conditions, and the Licensor grants You such rights in consideration of benefits the Licensor receives from making the Licensed Material available under these terms and conditions.

Section 1 -- Definitions.

a. Adapted Material means material subject to Copyright and Similar Rights that is derived from or based upon the Licensed Material and in which the Licensed Material is translated, altered, arranged, transformed, or otherwise modified in a manner requiring permission under the Copyright and Similar Rights held by the Licensor. For purposes of this Public License, where the Licensed Material is a musical work, performance, or sound recording, Adapted Material is always produced where the Licensed Material is synched in timed relation with a moving image.
b. Adapter’s License means the license You apply to Your Copyright and Similar Rights in Your contributions to Adapted Material in accordance with the terms and conditions of this Public License.

c. BY-SA Compatible License means a license listed at creativecommons.org/compatiblenlicenses, approved by Creative Commons as essentially the equivalent of this Public License.

d. Copyright and Similar Rights means copyright and/or similar rights closely related to copyright including, without limitation, performance, broadcast, sound recording, and Sui Generis Database Rights, without regard to how the rights are labeled or categorized. For purposes of this Public License, the rights specified in Section 2(b)(1)-(2) are not Copyright and Similar Rights.

e. Effective Technological Measures means those measures that, in the absence of proper authority, may not be circumvented under laws fulfilling obligations under Article 11 of the WIPO Copyright Treaty adopted on December 20, 1996, and/or similar international agreements.

f. Exceptions and Limitations means fair use, fair dealing, and/or any other exception or limitation to Copyright and Similar Rights that applies to Your use of the Licensed Material.

g. License Elements means the license attributes listed in the name of a Creative Commons Public License. The License Elements of this Public License are Attribution and ShareAlike.

h. Licensed Material means the artistic or literary work, database, or other material to which the Licensor applied this Public License.

i. Licensed Rights means the rights granted to You subject to the terms and conditions of this Public License, which are limited to all Copyright and Similar Rights that apply to Your use of the Licensed Material and that the Licensor has authority to license.

j. Licensor means the individual(s) or entity(ies) granting rights under this Public License.

k. Share means to provide material to the public by any means or process that requires permission under the Licensed Rights, such as reproduction, public display, public performance, distribution, dissemination, communication, or importation, and to make material available to the public including in ways that members of the public may access the material from a place and at a time
individually chosen by them.

1. Sui Generis Database Rights means rights other than copyright resulting from Directive 96/9/EC of the European Parliament and of the Council of 11 March 1996 on the legal protection of databases, as amended and/or succeeded, as well as other essentially equivalent rights anywhere in the world.

m. You means the individual or entity exercising the Licensed Rights under this Public License. Your has a corresponding meaning.

Section 2 -- Scope.

a. License grant.

1. Subject to the terms and conditions of this Public License, the Licensor hereby grants You a worldwide, royalty-free, non-sublicensable, non-exclusive, irrevocable license to exercise the Licensed Rights in the Licensed Material to:

   a. reproduce and Share the Licensed Material, in whole or in part; and

   b. produce, reproduce, and Share Adapted Material.

2. Exceptions and Limitations. For the avoidance of doubt, where Exceptions and Limitations apply to Your use, this Public License does not apply, and You do not need to comply with its terms and conditions.

3. Term. The term of this Public License is specified in Section 6(a).

4. Media and formats; technical modifications allowed. The Licensor authorizes You to exercise the Licensed Rights in all media and formats whether now known or hereafter created, and to make technical modifications necessary to do so. The Licensor waives and/or agrees not to assert any right or authority to forbid You from making technical modifications necessary to exercise the Licensed Rights, including technical modifications necessary to circumvent Effective Technological Measures. For purposes of this Public License, simply making modifications authorized by this Section 2(a)(4) never produces Adapted Material.

5. Downstream recipients.
a. Offer from the Licensor -- Licensed Material. Every recipient of the Licensed Material automatically receives an offer from the Licensor to exercise the Licensed Rights under the terms and conditions of this Public License.

b. Additional offer from the Licensor -- Adapted Material. Every recipient of Adapted Material from You automatically receives an offer from the Licensor to exercise the Licensed Rights in the Adapted Material under the conditions of the Adapter's License You apply.

c. No downstream restrictions. You may not offer or impose any additional or different terms or conditions on, or apply any Effective Technological Measures to, the Licensed Material if doing so restricts exercise of the Licensed Rights by any recipient of the Licensed Material.

6. No endorsement. Nothing in this Public License constitutes or may be construed as permission to assert or imply that You are, or that Your use of the Licensed Material is, connected with, or sponsored, endorsed, or granted official status by, the Licensor or others designated to receive attribution as provided in Section 3(a)(1)(A)(i).

b. Other rights.

1. Moral rights, such as the right of integrity, are not licensed under this Public License, nor are publicity, privacy, and/or other similar personality rights; however, to the extent possible, the Licensor waives and/or agrees not to assert any such rights held by the Licensor to the limited extent necessary to allow You to exercise the Licensed Rights, but not otherwise.

2. Patent and trademark rights are not licensed under this Public License.

3. To the extent possible, the Licensor waives any right to collect royalties from You for the exercise of the Licensed Rights, whether directly or through a collecting society under any voluntary or waivable statutory or compulsory licensing scheme. In all other cases the Licensor expressly reserves any right to collect such royalties.

---

**Section 3 -- License Conditions.**
Your exercise of the Licensed Rights is expressly made subject to the following conditions.

a. Attribution.

1. If You Share the Licensed Material (including in modified form), You must:

a. retain the following if it is supplied by the Licensor with the Licensed Material:

i. identification of the creator(s) of the Licensed Material and any others designated to receive attribution, in any reasonable manner requested by the Licensor (including by pseudonym if designated);

ii. a copyright notice;

iii. a notice that refers to this Public License;

iv. a notice that refers to the disclaimer of warranties;

v. a URI or hyperlink to the Licensed Material to the extent reasonably practicable;

b. indicate if You modified the Licensed Material and retain an indication of any previous modifications; and

c. indicate the Licensed Material is licensed under this Public License, and include the text of, or the URI or hyperlink to, this Public License.

2. You may satisfy the conditions in Section 3(a)(1) in any reasonable manner based on the medium, means, and context in which You Share the Licensed Material. For example, it may be reasonable to satisfy the conditions by providing a URI or hyperlink to a resource that includes the required information.

3. If requested by the Licensor, You must remove any of the information required by Section 3(a)(1)(A) to the extent reasonably practicable.

b. ShareAlike.
In addition to the conditions in Section 3(a), if You Share
Adapted Material You produce, the following conditions also apply.

1. The Adapter's License You apply must be a Creative Commons
license with the same License Elements, this version or
later, or a BY-SA Compatible License.

2. You must include the text of, or the URI or hyperlink to, the
Adapter's License You apply. You may satisfy this condition
in any reasonable manner based on the medium, means, and
context in which You Share Adapted Material.

3. You may not offer or impose any additional or different terms
or conditions on, or apply any Effective Technological
Measures to, Adapted Material that restrict exercise of the
rights granted under the Adapter's License You apply.

Section 4 -- Sui Generis Database Rights.

Where the Licensed Rights include Sui Generis Database Rights that
apply to Your use of the Licensed Material:

a. for the avoidance of doubt, Section 2(a)(1) grants You the right
to extract, reuse, reproduce, and Share all or a substantial
portion of the contents of the database;

b. if You include all or a substantial portion of the database
contents in a database in which You have Sui Generis Database
Rights, then the database in which You have Sui Generis Database
Rights (but not its individual contents) is Adapted Material,

including for purposes of Section 3(b); and

c. You must comply with the conditions in Section 3(a) if You Share
all or a substantial portion of the contents of the database.

For the avoidance of doubt, this Section 4 supplements and does not
replace Your obligations under this Public License where the Licensed
Rights include other Copyright and Similar Rights.

Section 5 -- Disclaimer of Warranties and Limitation of Liability.

a. UNLESS OTHERWISE SEPARATELY UNDERTAKEN BY THE LICENSOR, TO THE
EXTENT POSSIBLE, THE LICENSOR OFFERS THE LICENSED MATERIAL AS-IS
AND AS-AVAILABLE, AND MAKES NO REPRESENTATIONS OR WARRANTIES OF
ANY KIND CONCERNING THE LICENSED MATERIAL, WHETHER EXPRESS,
IMPLIED, STATUTORY, OR OTHER. THIS INCLUDES, WITHOUT LIMITATION,
WARRANTIES OF TITLE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT, ABSENCE OF LATENT OR OTHER DEFECTS, ACCURACY, OR THE PRESENCE OR ABSENCE OF ERRORS, WHETHER OR NOT KNOWN OR DISCOVERABLE. WHERE DISCLAIMERS OF WARRANTIES ARE NOT ALLOWED IN FULL OR IN PART, THIS DISCLAIMER MAY NOT APPLY TO YOU.

b. TO THE EXTENT POSSIBLE, IN NO EVENT WILL THE LICENSOR BE LIABLE TO YOU ON ANY LEGAL THEORY (INCLUDING, WITHOUT LIMITATION, NEGLIGENCE) OR OTHERWISE FOR ANY DIRECT, SPECIAL, INDIRECT, INCIDENTAL, CONSEQUENTIAL, PUNITIVE, EXEMPLARY, OR OTHER LOSSES, COSTS, EXPENSES, OR DAMAGES ARISING OUT OF THIS PUBLIC LICENSE OR USE OF THE LICENSED MATERIAL, EVEN IF THE LICENSOR HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH LOSSES, COSTS, EXPENSES, OR DAMAGES. WHERE A LIMITATION OF LIABILITY IS NOT ALLOWED IN FULL OR IN PART, THIS LIMITATION MAY NOT APPLY TO YOU.

c. The disclaimer of warranties and limitation of liability provided above shall be interpreted in a manner that, to the extent possible, most closely approximates an absolute disclaimer and waiver of all liability.

Section 6 -- Term and Termination.

a. This Public License applies for the term of the Copyright and Similar Rights licensed here. However, if You fail to comply with this Public License, then Your rights under this Public License terminate automatically.

b. Where Your right to use the Licensed Material has terminated under Section 6(a), it reinstates:

1. automatically as of the date the violation is cured, provided it is cured within 30 days of Your discovery of the violation; or

2. upon express reinstatement by the Licensor.

For the avoidance of doubt, this Section 6(b) does not affect any right the Licensor may have to seek remedies for Your violations of this Public License.

c. For the avoidance of doubt, the Licensor may also offer the Licensed Material under separate terms or conditions or stop distributing the Licensed Material at any time; however, doing so will not terminate this Public License.

d. Sections 1, 5, 6, 7, and 8 survive termination of this Public
Section 7 -- Other Terms and Conditions.

a. The Licensor shall not be bound by any additional or different terms or conditions communicated by You unless expressly agreed.

b. Any arrangements, understandings, or agreements regarding the Licensed Material not stated herein are separate from and independent of the terms and conditions of this Public License.

Section 8 -- Interpretation.

a. For the avoidance of doubt, this Public License does not, and shall not be interpreted to, reduce, limit, restrict, or impose conditions on any use of the Licensed Material that could lawfully be made without permission under this Public License.

b. To the extent possible, if any provision of this Public License is deemed unenforceable, it shall be automatically reformed to the minimum extent necessary to make it enforceable. If the provision cannot be reformed, it shall be severed from this Public License without affecting the enforceability of the remaining terms and conditions.

c. No term or condition of this Public License will be waived and no failure to comply consented to unless expressly agreed to by the Licensor.

d. Nothing in this Public License constitutes or may be interpreted as a limitation upon, or waiver of, any privileges and immunities that apply to the Licensor or You, including from the legal processes of any jurisdiction or authority.

Creative Commons is not a party to its public licenses. Notwithstanding, Creative Commons may elect to apply one of its public licenses to material it publishes and in those instances will be considered the "Licensor." Except for the limited purpose of indicating that material is shared under a Creative Commons public license or as otherwise permitted by the Creative Commons policies published at creativecommons.org/policies, Creative Commons does not authorize the use of the trademark "Creative Commons" or any other trademark or logo of Creative Commons without its prior written consent including.
without limitation, in connection with any unauthorized modifications
to any of its public licenses or any other arrangements,
understandings, or agreements concerning use of licensed material. For
the avoidance of doubt, this paragraph does not form part of the public
licenses.

Creative Commons may be contacted at creativecommons.org.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all
other entities that control, are controlled by, or are under common
control with that entity. For the purposes of this definition,
"control" means (i) the power, direct or indirect, to cause the
direction or management of such entity, whether by contract or
otherwise, or (ii) ownership of fifty percent (50%) or more of the
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity
exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,
including but not limited to software source code, documentation
source, and configuration files.

"Object" form shall mean any form resulting from mechanical
transformation or translation of a Source form, including but
not limited to compiled object code, generated documentation,
and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or
Object form, made available under the License, as indicated by a
copyright notice that is included in or attached to the work
(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object
form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes
of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You
meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor,
except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.
AND ANY EXPRESS OR IMPLIED WARRANTIES, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE DISCLAIMED. IN NO EVENT SHALL THE COPYRIGHT OWNER OR CONTRIBUTORS BE LIABLE FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING, BUT NOT LIMITED TO, PROCUREMENT OF SUBSTITUTE GOODS OR SERVICES; LOSS OF USE, DATA, OR PROFITS; OR BUSINESS INTERRUPTION) HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OF THIS SOFTWARE, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGE.
