- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade

names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
  
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier

identification within third-party archives.

/\*\*

\* A token issued by { @link TokenService }.  
\*  
\* <p>  
\* It is important that the keys assigned to tokens are sufficiently randomised and  
\* secured that they can serve as identifying a unique user session. Implementations of  
\* { @link TokenService } are free to use encryption or encoding strategies of their choice.  
\* It is strongly recommended that keys are of sufficient length to balance safety against  
\* persistence cost. In relation to persistence cost, it is strongly recommended that  
\* returned keys are small enough for encoding in a cookie.  
\* </p>

/**
* Reviews the Object returned from a secure object invocation, being able to
* modify the Object or throw an {@link AccessDeniedException}.
* <p>
* Typically used to ensure the principal is permitted to access the domain object
* instance returned by a service layer bean. Can also be used to mutate the domain object
* instance so the principal is only able to access authorised bean properties or
* Collection elements.
* <p>
* Special consideration should be given to using an AfterInvocationManager
* on bean methods that modify a database. Typically an
* AfterInvocationManager is used with read-only methods, such as
* public DomainObject getById(id). If used with methods that modify a
* database, a transaction manager should be used to ensure any
* AccessDeniedException will cause a rollback of the changes made by the
* transaction.
* </p>

and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the

Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory,

whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# Jackson JSON processor

Jackson is a high-performance, Free/Open Source JSON processing library.

It was originally written by Tatu Saloranta (tatu.saloranta@iki.fi), and has been in development since 2007.

It is currently developed by a community of developers, as well as supported commercially by FasterXML.com.

#### ## Licensing

Jackson core and extension components may be licensed under different licenses.

To find the details that apply to this artifact see the accompanying LICENSE file.

For more information, including possible other licensing options, contact FasterXML.com (<http://fasterxml.com>).

#### ## Credits

A list of contributors may be found from CREDITS file, which is included in some artifacts (usually source distributions); but is always available from the source code management (SCM) system project uses.

## 1.141.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed

as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this

License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to

communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of

the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

Mozilla Public License Version 2.0

=====

## 1. Definitions

-----

### 1.1. "Contributor"

means each individual or legal entity that creates, contributes to the creation of, or owns Covered Software.

### 1.2. "Contributor Version"

means the combination of the Contributions of others (if any) used by a Contributor and that particular Contributor's Contribution.

1.3. "Contribution"

means Covered Software of a particular Contributor.

1.4. "Covered Software"

means Source Code Form to which the initial Contributor has attached the notice in Exhibit A, the Executable Form of such Source Code Form, and Modifications of such Source Code Form, in each case including portions thereof.

1.5. "Incompatible With Secondary Licenses"

means

(a) that the initial Contributor has attached the notice described in Exhibit B to the Covered Software; or

(b) that the Covered Software was made available under the terms of version 1.1 or earlier of the License, but not also under the terms of a Secondary License.

1.6. "Executable Form"

means any form of the work other than Source Code Form.

1.7. "Larger Work"

means a work that combines Covered Software with other material, in a separate file or files, that is not Covered Software.

1.8. "License"

means this document.

1.9. "Licensable"

means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently, any and all of the rights conveyed by this License.

1.10. "Modifications"

means any of the following:

(a) any file in Source Code Form that results from an addition to, deletion from, or modification of the contents of Covered Software; or

(b) any new file in Source Code Form that contains any Covered Software.

1.11. "Patent Claims" of a Contributor

means any patent claim(s), including without limitation, method, process, and apparatus claims, in any patent Licensable by such Contributor that would be infringed, but for the grant of the

License, by the making, using, selling, offering for sale, having made, import, or transfer of either its Contributions or its Contributor Version.

#### 1.12. "Secondary License"

means either the GNU General Public License, Version 2.0, the GNU Lesser General Public License, Version 2.1, the GNU Affero General Public License, Version 3.0, or any later versions of those licenses.

#### 1.13. "Source Code Form"

means the form of the work preferred for making modifications.

#### 1.14. "You" (or "Your")

means an individual or a legal entity exercising rights under this License. For legal entities, "You" includes any entity that controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

### 2. License Grants and Conditions

-----

#### 2.1. Grants

Each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

- (a) under intellectual property rights (other than patent or trademark) Licensable by such Contributor to use, reproduce, make available, modify, display, perform, distribute, and otherwise exploit its Contributions, either on an unmodified basis, with Modifications, or as part of a Larger Work; and
- (b) under Patent Claims of such Contributor to make, use, sell, offer for sale, have made, import, and otherwise transfer either its Contributions or its Contributor Version.

#### 2.2. Effective Date

The licenses granted in Section 2.1 with respect to any Contribution become effective for each Contribution on the date the Contributor first distributes such Contribution.

#### 2.3. Limitations on Grant Scope

The licenses granted in this Section 2 are the only rights granted under this License. No additional rights or licenses will be implied from the distribution or licensing of Covered Software under this License. Notwithstanding Section 2.1(b) above, no patent license is granted by a Contributor:

- (a) for any code that a Contributor has removed from Covered Software; or
- (b) for infringements caused by: (i) Your and any other third party's modifications of Covered Software, or (ii) the combination of its Contributions with other software (except as part of its Contributor Version); or
- (c) under Patent Claims infringed by Covered Software in the absence of its Contributions.

This License does not grant any rights in the trademarks, service marks, or logos of any Contributor (except as may be necessary to comply with the notice requirements in Section 3.4).

#### 2.4. Subsequent Licenses

No Contributor makes additional grants as a result of Your choice to distribute the Covered Software under a subsequent version of this License (see Section 10.2) or under the terms of a Secondary License (if permitted under the terms of Section 3.3).

#### 2.5. Representation

Each Contributor represents that the Contributor believes its Contributions are its original creation(s) or it has sufficient rights to grant the rights to its Contributions conveyed by this License.

#### 2.6. Fair Use

This License is not intended to limit any rights You have under applicable copyright doctrines of fair use, fair dealing, or other equivalents.

#### 2.7. Conditions

Sections 3.1, 3.2, 3.3, and 3.4 are conditions of the licenses granted in Section 2.1.

### 3. Responsibilities

-----

### 3.1. Distribution of Source Form

All distribution of Covered Software in Source Code Form, including any Modifications that You create or to which You contribute, must be under the terms of this License. You must inform recipients that the Source Code Form of the Covered Software is governed by the terms of this License, and how they can obtain a copy of this License. You may not attempt to alter or restrict the recipients' rights in the Source Code Form.

### 3.2. Distribution of Executable Form

If You distribute Covered Software in Executable Form then:

- (a) such Covered Software must also be made available in Source Code Form, as described in Section 3.1, and You must inform recipients of the Executable Form how they can obtain a copy of such Source Code Form by reasonable means in a timely manner, at a charge no more than the cost of distribution to the recipient; and
- (b) You may distribute such Executable Form under the terms of this License, or sublicense it under different terms, provided that the license for the Executable Form does not attempt to limit or alter the recipients' rights in the Source Code Form under this License.

### 3.3. Distribution of a Larger Work

You may create and distribute a Larger Work under terms of Your choice, provided that You also comply with the requirements of this License for the Covered Software. If the Larger Work is a combination of Covered Software with a work governed by one or more Secondary Licenses, and the Covered Software is not Incompatible With Secondary Licenses, this License permits You to additionally distribute such Covered Software under the terms of such Secondary License(s), so that the recipient of the Larger Work may, at their option, further distribute the Covered Software under the terms of either this License or such Secondary License(s).

### 3.4. Notices

You may not remove or alter the substance of any license notices (including copyright notices, patent notices, disclaimers of warranty, or limitations of liability) contained within the Source Code Form of the Covered Software, except that You may alter any license notices to the extent required to remedy known factual inaccuracies.

### 3.5. Application of Additional Terms

You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, You may do so only on Your own behalf, and not on behalf of any Contributor. You must make it absolutely clear that any such warranty, support, indemnity, or liability obligation is offered by You alone, and You hereby agree to indemnify every Contributor for any liability incurred by such Contributor as a result of warranty, support, indemnity or liability terms You offer. You may include additional disclaimers of warranty and limitations of liability specific to any jurisdiction.

#### 4. Inability to Comply Due to Statute or Regulation

-----

If it is impossible for You to comply with any of the terms of this License with respect to some or all of the Covered Software due to statute, judicial order, or regulation then You must: (a) comply with the terms of this License to the maximum extent possible; and (b) describe the limitations and the code they affect. Such description must be placed in a text file included with all distributions of the Covered Software under this License. Except to the extent prohibited by statute or regulation, such description must be sufficiently detailed for a recipient of ordinary skill to be able to understand it.

#### 5. Termination

-----

5.1. The rights granted under this License will terminate automatically if You fail to comply with any of its terms. However, if You become compliant, then the rights granted under this License from a particular Contributor are reinstated (a) provisionally, unless and until such Contributor explicitly and finally terminates Your grants, and (b) on an ongoing basis, if such Contributor fails to notify You of the non-compliance by some reasonable means prior to 60 days after You have come back into compliance. Moreover, Your grants from a particular Contributor are reinstated on an ongoing basis if such Contributor notifies You of the non-compliance by some reasonable means, this is the first time You have received notice of non-compliance with this License from such Contributor, and You become compliant prior to 30 days after Your receipt of the notice.

5.2. If You initiate litigation against any entity by asserting a patent infringement claim (excluding declaratory judgment actions, counter-claims, and cross-claims) alleging that a Contributor Version directly or indirectly infringes any patent, then the rights granted to You by any and all Contributors for the Covered Software under Section 2.1 of this License shall terminate.

5.3. In the event of termination under Sections 5.1 or 5.2 above, all end user license agreements (excluding distributors and resellers) which have been validly granted by You or Your distributors under this License prior to termination shall survive termination.

```
*****
*
*
* 6. Disclaimer of Warranty
* -----
*
* Covered Software is provided under this License on an "as is"
* basis, without warranty of any kind, either expressed, implied, or
* statutory, including, without limitation, warranties that the
* Covered Software is free of defects, merchantable, fit for a
* particular purpose or non-infringing. The entire risk as to the
* quality and performance of the Covered Software is with You.
* Should any Covered Software prove defective in any respect, You
* (not any Contributor) assume the cost of any necessary servicing,
* repair, or correction. This disclaimer of warranty constitutes an
* essential part of this License. No use of any Covered Software is
* authorized under this License except under this disclaimer.
*
*
*****
```

```
*****
*
*
* 7. Limitation of Liability
* -----
*
* Under no circumstances and under no legal theory, whether tort
* (including negligence), contract, or otherwise, shall any
* Contributor, or anyone who distributes Covered Software as
* permitted above, be liable to You for any direct, indirect,
* special, incidental, or consequential damages of any character
* including, without limitation, damages for lost profits, loss of
* goodwill, work stoppage, computer failure or malfunction, or any
* and all other commercial damages or losses, even if such party
* shall have been informed of the possibility of such damages. This
* limitation of liability shall not apply to liability for death or
* personal injury resulting from such party's negligence to the
* extent applicable law prohibits such limitation. Some
* jurisdictions do not allow the exclusion or limitation of
* incidental or consequential damages, so this exclusion and
* limitation may not apply to You.
*
*
*****
```

## 8. Litigation

-----

Any litigation relating to this License may be brought only in the courts of a jurisdiction where the defendant maintains its principal place of business and such litigation shall be governed by laws of that jurisdiction, without reference to its conflict-of-law provisions. Nothing in this Section shall prevent a party's ability to bring cross-claims or counter-claims.

## 9. Miscellaneous

-----

This License represents the complete agreement concerning the subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not be used to construe this License against a Contributor.

## 10. Versions of the License

-----

### 10.1. New Versions

Mozilla Foundation is the license steward. Except as provided in Section 10.3, no one other than the license steward has the right to modify or publish new versions of this License. Each version will be given a distinguishing version number.

### 10.2. Effect of New Versions

You may distribute the Covered Software under the terms of the version of the License under which You originally received the Covered Software, or under the terms of any subsequent version published by the license steward.

### 10.3. Modified Versions

If you create software not governed by this License, and you want to create a new license for such software, you may create and use a modified version of this License if you rename the license and remove any references to the name of the license steward (except to note that such modified license differs from this License).

### 10.4. Distributing Source Code Form that is Incompatible With Secondary Licenses

If You choose to distribute Source Code Form that is Incompatible With Secondary Licenses under the terms of this version of the License, the notice described in Exhibit B of this License must be attached.

#### Exhibit A - Source Code Form License Notice

-----

This Source Code Form is subject to the terms of the Mozilla Public License, v. 2.0. If a copy of the MPL was not distributed with this file, You can obtain one at <http://mozilla.org/MPL/2.0/>.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

#### Exhibit B - "Incompatible With Secondary Licenses" Notice

-----

This Source Code Form is "Incompatible With Secondary Licenses", as defined by the Mozilla Public License, v. 2.0.

## 1.145 netty-transport-classes-epoll

### 4.1.79.Final

## 1.146 jetty-servlets 9.4.48.v20220622

## 1.146.1 Available under license :

This program and the accompanying materials are made available under the terms of the Eclipse Public License 2.0 which is available at <http://www.eclipse.org/legal/epl-2.0>, or the Apache Software License 2.0 which is available at <https://www.apache.org/licenses/LICENSE-2.0>.

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

### 1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
  - i) changes to the Program, and
  - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

### 2. GRANT OF RIGHTS

- a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly

- perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.
- b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.
- c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.
- d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

- a) it complies with the terms and conditions of this Agreement; and
- b) its license agreement:
- i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;
  - ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;
  - iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and
  - iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and
  - b) a copy of this Agreement must be included with each copy of the Program.
- Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must:

- a) promptly notify the Commercial Contributor in writing of such claim, and
- b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

#### 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN

"AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to

time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf

of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

/**
 * <p>
 * Describes the ID format settings for your resources on a per-region basis, for example, to view which resource
 * types are enabled for longer IDs. This request only returns information about resource types whose ID formats
 * can
 * be modified; it does not return information about other resource types.
 * </p>
 * <p>
 * The following resource types support longer IDs: <code>bundle</code> | <code>conversion-task</code> |
 * <code>customer-gateway</code> | <code>dhcp-options</code> | <code>elastic-ip-allocation</code> |
 * <code>elastic-ip-association</code> | <code>export-task</code> | <code>flow-log</code> |
 * <code>image</code> |
 * <code>import-task</code> | <code>instance</code> | <code>internet-gateway</code> | <code>network-
 * acl</code> |
 * <code>network-acl-association</code> | <code>network-interface</code> | <code>network-interface-
 * attachment</code>
 * | <code>prefix-list</code> | <code>reservation</code> | <code>route-table</code> |
 * <code>route-table-association</code> | <code>security-group</code> | <code>snapshot</code> |
 * <code>subnet</code>
 * | <code>subnet-cidr-block-association</code> | <code>volume</code> | <code>vpc</code> |
 * <code>vpc-cidr-block-association</code> | <code>vpc-endpoint</code> | <code>vpc-peering-
```

```

connection</code> |
    * <code>vpn-connection</code> | <code>vpn-gateway</code>.
    * </p>
    * <p>
    * These settings apply to the IAM user who makes the request; they do not apply to the entire AWS account. By
    * default, an IAM user defaults to the same settings as the root user, unless they explicitly override the settings
    * by running the <a>ModifyIdFormat</a> command. Resources created with longer IDs are visible to all IAM
users,
    * regardless of these settings and provided that they have permission to use the relevant <code>Describe</code>
    * command for the resource type.
    * </p>
    *
    * @param describeIdFormatRequest
    *     Contains the parameters for DescribeIdFormat.
    * @return A Java Future containing the result of the DescribeIdFormat operation returned by the service.
    * @sample AmazonEC2Async.DescribeIdFormat
    * @see <a href="http://docs.aws.amazon.com/goto/WebAPI/ec2-2016-11-15/DescribeIdFormat"
target="_top">AWS API
    * Documentation</a>
    */
/**
    * <p>
    * Modifies the ID format for the specified resource on a per-region basis. You can specify that resources should
    * receive longer IDs (17-character IDs) when they are created.
    * </p>
    * <p>
    * This request can only be used to modify longer ID settings for resource types that are within the opt-in period.
    * Resources currently in their opt-in period include: <code>bundle</code> | <code>conversion-task</code> |
    * <code>customer-gateway</code> | <code>dhcp-options</code> | <code>elastic-ip-allocation</code> |
    * <code>elastic-ip-association</code> | <code>export-task</code> | <code>flow-log</code> |
<code>image</code> |
    * <code>import-task</code> | <code>internet-gateway</code> | <code>network-acl</code> |
    * <code>network-acl-association</code> | <code>network-interface</code> | <code>network-interface-
attachment</code>
    * | <code>prefix-list</code> | <code>route-table</code> | <code>route-table-association</code> |
    * <code>security-group</code> | <code>subnet</code> | <code>subnet-cidr-block-association</code> |
<code>vpc</code>
    * | <code>vpc-cidr-block-association</code> | <code>vpc-endpoint</code> | <code>vpc-peering-
connection</code> |
    * <code>vpn-connection</code> | <code>vpn-gateway</code>.
    * </p>
    * <p>
    * This setting applies to the IAM user who makes the request; it does not apply to the entire AWS account. By
    * default, an IAM user defaults to the same settings as the root user. If you're using this action as the root
    * user, then these settings apply to the entire account, unless an IAM user explicitly overrides these settings for
    * themselves. For more information, see <a
    * href="http://docs.aws.amazon.com/AWSEC2/latest/UserGuide/resource-ids.html">Resource IDs</a> in the
    <i>Amazon

```

```

* Elastic Compute Cloud User Guide</i>.
* </p>
* <p>
* Resources created with longer IDs are visible to all IAM roles and users, regardless of these settings and
* provided that they have permission to use the relevant <code>Describe</code> command for the resource type.
* </p>

/**
 * <p>
 * Describes the ID format settings for your resources on a per-region basis, for example, to view which resource
 * types are enabled for longer IDs. This request only returns information about resource types whose ID formats
 can
 * be modified; it does not return information about other resource types.
 * </p>
 * <p>
 * The following resource types support longer IDs: <code>bundle</code> | <code>conversion-task</code> |
 * <code>customer-gateway</code> | <code>dhcp-options</code> | <code>elastic-ip-allocation</code> |
 * <code>elastic-ip-association</code> | <code>export-task</code> | <code>flow-log</code> |
 <code>image</code> |
 * <code>import-task</code> | <code>instance</code> | <code>internet-gateway</code> | <code>network-
acl</code> |
 * <code>network-acl-association</code> | <code>network-interface</code> | <code>network-interface-
attachment</code>
 * | <code>prefix-list</code> | <code>reservation</code> | <code>route-table</code> |
 * <code>route-table-association</code> | <code>security-group</code> | <code>snapshot</code> |
 <code>subnet</code>
 * | <code>subnet-cidr-block-association</code> | <code>volume</code> | <code>vpc</code> |
 * <code>vpc-cidr-block-association</code> | <code>vpc-endpoint</code> | <code>vpc-peering-
connection</code> |
 * <code>vpn-connection</code> | <code>vpn-gateway</code>.
 * </p>
```

```

* <p>
* These settings apply to the IAM user who makes the request; they do not apply to the entire AWS account. By
* default, an IAM user defaults to the same settings as the root user, unless they explicitly override the settings
* by running the <a>ModifyIdFormat</a> command. Resources created with longer IDs are visible to all IAM
users,
* regardless of these settings and provided that they have permission to use the relevant <code>Describe</code>
* command for the resource type.
* </p>
*
* @param describeIdFormatRequest
*     Contains the parameters for DescribeIdFormat.
* @return Result of the DescribeIdFormat operation returned by the service.
* @sample AmazonEC2.DescribeIdFormat
* @see <a href="http://docs.aws.amazon.com/goto/WebAPI/ec2-2016-11-15/DescribeIdFormat"
target="_top">AWS API
*     Documentation</a>
*/
/**
* <p>
* Modifies the ID format for the specified resource on a per-region basis. You can specify that resources should
* receive longer IDs (17-character IDs) when they are created.
* </p>
* <p>
* This request can only be used to modify longer ID settings for resource types that are within the opt-in period.
* Resources currently in their opt-in period include: <code>bundle</code> | <code>conversion-task</code> |
* <code>customer-gateway</code> | <code>dhcp-options</code> | <code>elastic-ip-allocation</code> |
* <code>elastic-ip-association</code> | <code>export-task</code> | <code>flow-log</code> |
<code>image</code> |
* <code>import-task</code> | <code>internet-gateway</code> | <code>network-acl</code> |
* <code>network-acl-association</code> | <code>network-interface</code> | <code>network-interface-
attachment</code>
* | <code>prefix-list</code> | <code>route-table</code> | <code>route-table-association</code> |
* <code>security-group</code> | <code>subnet</code> | <code>subnet-cidr-block-association</code> |
<code>vpc</code>
* | <code>vpc-cidr-block-association</code> | <code>vpc-endpoint</code> | <code>vpc-peering-
connection</code> |
* <code>vpn-connection</code> | <code>vpn-gateway</code>.
* </p>
* <p>
* This setting applies to the IAM user who makes the request; it does not apply to the entire AWS account. By
* default, an IAM user defaults to the same settings as the root user. If you're using this action as the root
* user, then these settings apply to the entire account, unless an IAM user explicitly overrides these settings for
* themselves. For more information, see <a
* href="http://docs.aws.amazon.com/AWSEC2/latest/UserGuide/resource-ids.html">Resource IDs</a> in the
<i>Amazon
* Elastic Compute Cloud User Guide</i>.
* </p>
* <p>

```

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of,

publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution

notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing

the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

# 1.149 servlet-api 4.0.1

## 1.149.1 Available under license :

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

### 1. Definitions.

1.1. Contributor. means each individual or entity that creates or contributes to the creation of Modifications.

1.2. Contributor Version. means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. Covered Software. means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. Executable. means the Covered Software in any form other than Source Code.

1.5. Initial Developer. means the individual or entity that first makes Original Software available under this License.

1.6. Larger Work. means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. License. means this document.

1.8. Licensable. means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. Modifications. means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. Original Software. means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. Patent Claims. means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. Source Code. means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. You. (or .Your.) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, .You. includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, .control. means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

## 2. License Grants.

### 2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

### 2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

### 3. Distribution Obligations.

#### 3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

#### 3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

#### 3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

#### 3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

#### 3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in

compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

### 3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

## 4. Versions of the License.

### 4.1. New Versions.

Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

### 4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

### 4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

## 5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN .AS IS. BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

## 6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as .Participant.) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

## 7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

## 8. U.S. GOVERNMENT END USERS.

The Covered Software is a .commercial item., as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of .commercial computer software. (as that term is defined at 48 C.F.R. ? 252.227-7014(a)(1)) and .commercial computer software documentation. as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

## 9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable.

This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

#### 10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

#### NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

#### TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you

also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

- a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,
- c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special

exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this

License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

#### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

"CLASSPATH" EXCEPTION TO THE GPL VERSION 2

Certain source files distributed by Sun Microsystems, Inc. are subject to the following clarification and special exception to the GPL Version 2, but only where Sun has expressly included in the particular source file's header the words

"Sun designates this particular file as subject to the "Classpath" exception as provided by Sun in the License file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License Version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module.? An independent module is a module which is not derived from or based on this library.? If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so.? If you do not wish to do so, delete this exception statement from your version.

### 1.151.1 Available under license :

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by

the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained

within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be

liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

#### END OF TERMS AND CONDITIONS

## 1.154 spring-tx 5.3.22

### 1.154.1 Available under license :

Spring Framework 5.3.22

Copyright (c) 2002-2022 Pivotal, Inc.

This product is licensed to you under the Apache License, Version 2.0 (the "License"). You may not use this product except in compliance with the License.

This product may include a number of subcomponents with separate copyright notices and license terms. Your use of the source code for these subcomponents is subject to the terms and conditions of the subcomponent's license, as noted in the license.txt file.

Apache License  
Version 2.0, January 2004  
<https://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed

as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this

License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<https://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and limitations under the License.

=====

To the extent any open source components are licensed under the EPL and/or other similar licenses that require the source code and/or modifications to source code to be made available (as would be noted above), you may obtain a copy of the source code corresponding to the binaries for such open source components and modifications thereto, if any, (the "Source Files"), by downloading the Source Files from <https://spring.io/projects>, Pivotal's website at <https://network.pivotal.io/open-source>, or by sending a request, with your name and address to: Pivotal Software, Inc., 875 Howard Street, 5th floor, San Francisco, CA 94103, Attention: General Counsel. All such requests should clearly specify: OPEN SOURCE FILES REQUEST, Attention General Counsel. Pivotal can mail a copy of the Source Files to you on a CD or equivalent physical medium.

This offer to obtain a copy of the Source Files is valid for three years from the date you acquired this Software product. Alternatively, the Source Files may accompany the Software.

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but

excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its

distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise,

unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work

(an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
  
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses

granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]"

replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical

transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable

by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use,

reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.  
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity

on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one

of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a

result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common

control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or

documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill,

work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of,

publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

(a) You must give any other recipients of the Work or Derivative Works a copy of this License; and

(b) You must cause any modified files to carry prominent notices stating that You changed the files; and

(c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution

notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing

the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work,

where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or

for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason

of your accepting any such warranty or additional liability.

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
  
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## 1.167.1 Available under license :

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.1

### 1. Definitions.

1.1. "Contributor" means each individual or entity that creates or contributes to the creation of Modifications.

1.2. "Contributor Version" means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. "Covered Software" means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. "Executable" means the Covered Software in any form other than Source Code.

1.5. "Initial Developer" means the individual or entity that first makes Original Software available under this License.

1.6. "Larger Work" means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. "License" means this document.

1.8. "Licensable" means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. "Modifications" means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. "Original Software" means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. "Patent Claims" means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. "Source Code" means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. "You" (or "Your") means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, "You" includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, "control" means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

## 2. License Grants.

### 2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

## 2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

## 3. Distribution Obligations.

### 3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form

and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

### 3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

### 3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

### 3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

### 3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered

Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

### 3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

## 4. Versions of the License.

### 4.1. New Versions.

Oracle is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

### 4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

### 4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

## 5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN "AS IS" BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

## 6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as "Participant") alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. If You assert a patent infringement claim against Participant alleging that the Participant Software directly or indirectly infringes any patent where such claim is resolved (such as by license or settlement) prior to the initiation of patent infringement litigation, then the reasonable value of the licenses granted by such Participant under Sections 2.1 or 2.2 shall be taken into account in determining the amount or value of any payment or license.

6.4. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

## 7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

## 8. U.S. GOVERNMENT END USERS.

The Covered Software is a "commercial item," as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of "commercial computer software" (as that term is defined at 48 C.F.R. 252.227-7014(a)(1)) and "commercial computer software documentation" as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

## 9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject

to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

#### 10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

-----

#### NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor  
Boston, MA 02110-1335  
USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

- a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.
- b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.
- c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not

normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control

compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from

distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

## NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## END OF TERMS AND CONDITIONS

### How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1335 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type
`show w'. This is free software, and you are welcome to redistribute
it under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the
program `Gnomovision' (which makes passes at compilers) written by
James Hacker.
```

```
signature of Ty Coon, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#

Certain source files distributed by Oracle America, Inc. and/or its affiliates are subject to the following clarification and special exception to the GPLv2, based on the GNU Project exception for its Classpath libraries, known as the GNU Classpath Exception, but only where Oracle has expressly included in the particular source file's header the words "Oracle designates this particular file as subject to the "Classpath" exception as provided by Oracle in the LICENSE file that accompanied this code."

You should also note that Oracle includes multiple, independent programs in this software package. Some of those programs are provided under licenses deemed incompatible with the GPLv2 by the Free Software Foundation and others. For example, the package includes programs licensed under the Apache License, Version 2.0. Such programs are licensed to you under their original licenses.

Oracle facilitates your further distribution of this package by adding the Classpath Exception to the necessary parts of its GPLv2 code, which permits you to use that code in combination with other independent modules not licensed under the GPLv2. However, note that this would not permit you to commingle code under an incompatible license with Oracle's GPLv2 licensed code by, for example, cutting and pasting such code into a file also containing Oracle's GPLv2 licensed code and then distributing the result. Additionally, if you were to remove the Classpath Exception from any of the files to which it applies and distribute the result, you would likely be required to license some or all of the other code in that distribution under the GPLv2 as well, and since the GPLv2 is incompatible with the license terms of some items included in the distribution by Oracle, removing the Classpath Exception could therefore effectively compromise your ability to further distribute the package.

Proceed with caution and we recommend that you obtain the advice of a lawyer skilled in open source matters before removing the Classpath Exception or making modifications to this package which may subsequently be redistributed and/or involve the use of third party software.

#### CLASSPATH EXCEPTION

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

Specification: JSR-925 JavaBeans Activation Framework ("Specification")

<br/>

Version: 1.2

<br/>

Status: Maintenance Release

<br/>

Specification Lead: Oracle America, Inc. ("Specification Lead")

<br/>

Release: July 2017

<br/>

<br/>

Copyright © 2017 Oracle America, Inc. All rights reserved.

<br/>

<p>

#### LIMITED LICENSE GRANTS

<br/>

1. License for Evaluation Purposes. Specification Lead hereby grants you a fully-paid, non-exclusive, non-transferable, worldwide, limited license (without the right to sublicense), under Specification Lead's applicable intellectual property rights to view, download, use and reproduce the Specification only for the purpose of internal evaluation. This includes (i) developing applications intended to run on an implementation of the Specification, provided that such applications do not themselves implement any portion(s) of the Specification, and (ii) discussing the Specification with any third party; and (iii) excerpting brief portions of the Specification in oral or written communications which discuss the Specification provided that such excerpts do not in the aggregate constitute a significant portion of the Specification.

</p>

<p>

2. License for the Distribution of Compliant Implementations. Specification Lead also grants you a perpetual, non-exclusive, non-transferable, worldwide, fully paid-up, royalty free, limited license (without the right to sublicense) under any applicable copyrights or, subject to the provisions of subsection 4 below, patent rights it may have covering the Specification to create and/or distribute an Independent Implementation of the Specification that: (a) fully implements the Specification including all its required interfaces and functionality; (b) does not modify, subset, superset or otherwise extend the Licensor Name Space, or include any public or protected packages, classes, Java interfaces, fields or methods within the Licensor Name Space other than those required/authorized by the Specification or Specifications being implemented; and (c) passes the

Technology Compatibility Kit (including satisfying the requirements of the applicable TCK Users Guide) for such Specification ("Compliant Implementation"). In addition, the foregoing license is expressly conditioned on your not acting outside its scope. No license is granted hereunder for any other purpose (including, for example, modifying the Specification, other than to the extent of your fair use rights, or distributing the Specification to third parties). Also, no right, title, or interest in or to any trademarks, service marks, or trade names of Specification Lead or Specification Lead's licensors is granted hereunder. Java, and Java-related logos, marks and names are trademarks or registered trademarks of Oracle America, Inc. in the U.S. and other countries.

</p>

<p>

3. Pass-through Conditions. You need not include limitations (a)-(c) from the previous paragraph or any other particular "pass through" requirements in any license You grant concerning the use of your Independent Implementation or products derived from it. However, except with respect to Independent Implementations (and products derived from them) that satisfy limitations (a)-(c) from the previous paragraph, You may neither: (a) grant or otherwise pass through to your licensees any licenses under Specification Lead's applicable intellectual property rights; nor (b) authorize your licensees to make any claims concerning their implementation's compliance with the Specification in question.

</p>

<p>

4. Reciprocity Concerning Patent Licenses.

<br/>

a. With respect to any patent claims covered by the license granted under subparagraph 2 above that would be infringed by all technically feasible implementations of the Specification, such license is conditioned upon your offering on fair, reasonable and non-discriminatory terms, to any party seeking it from You, a perpetual, non-exclusive, non-transferable, worldwide license under Your patent rights which are or would be infringed by all technically feasible implementations of the Specification to develop, distribute and use a Compliant Implementation.

<br/>

b. With respect to any patent claims owned by Specification Lead and covered by the license granted under subparagraph 2, whether or not their infringement can be avoided in a technically feasible manner when implementing the Specification, such license shall terminate with respect to such claims if You initiate a claim against Specification Lead that it has, in the course of performing its responsibilities as the Specification Lead, induced any other entity to infringe Your patent rights.

<br/>

c. Also with respect to any patent claims owned by Specification Lead and covered by the license granted under subparagraph 2 above, where the infringement of such claims can be avoided in a technically feasible manner when implementing the Specification such license, with respect to such claims, shall terminate if You initiate a claim against Specification Lead that its making, having made, using, offering to sell, selling or importing a Compliant Implementation infringes Your patent rights.

</p>

<p>

5. Definitions. For the purposes of this Agreement: "Independent Implementation" shall mean an implementation of the Specification that neither derives from any of Specification Lead's source code or binary code materials nor, except with an appropriate and separate license from Specification Lead, includes any of Specification Lead's source code or binary code materials; "Licensor Name Space" shall mean the public class or interface declarations whose names begin with "java", "javax", "com.oracle", "com.sun" or their equivalents in any subsequent naming convention adopted by Oracle America, Inc. through the Java Community Process, or any recognized successors or replacements thereof; and "Technology Compatibility Kit" or "TCK" shall mean the test suite and accompanying TCK User's Guide provided by Specification Lead which corresponds to the Specification and that was available either (i) from Specification Lead 120 days before the first release of Your Independent Implementation that allows its use for commercial purposes, or (ii) more recently than 120 days from such release but against which You elect to test Your implementation of the Specification.

</p>

<p>

This Agreement will terminate immediately without notice from Specification Lead if you breach the Agreement or act outside the scope of the licenses granted above.

</p>

<p>

#### DISCLAIMER OF WARRANTIES

<br/>

THE SPECIFICATION IS PROVIDED "AS IS". SPECIFICATION LEAD MAKES NO REPRESENTATIONS OR WARRANTIES, EITHER EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO, WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, NON-INFRINGEMENT (INCLUDING AS A CONSEQUENCE OF ANY PRACTICE OR IMPLEMENTATION OF THE SPECIFICATION), OR THAT THE CONTENTS OF THE SPECIFICATION ARE SUITABLE FOR ANY PURPOSE. This document does not represent any commitment to release or implement any portion of the Specification in any product. In addition, the Specification could include technical inaccuracies or typographical errors.

</p>

<p>

## LIMITATION OF LIABILITY

<br/>

TO THE EXTENT NOT PROHIBITED BY LAW, IN NO EVENT WILL SPECIFICATION LEAD OR ITS LICENSORS BE LIABLE FOR ANY DAMAGES, INCLUDING WITHOUT LIMITATION, LOST REVENUE, PROFITS OR DATA, OR FOR SPECIAL, INDIRECT, CONSEQUENTIAL, INCIDENTAL OR PUNITIVE DAMAGES, HOWEVER CAUSED AND REGARDLESS OF THE THEORY OF LIABILITY, ARISING OUT OF OR RELATED IN ANY WAY TO YOUR HAVING, IMPLEMENTING OR OTHERWISE USING THE SPECIFICATION, EVEN IF SPECIFICATION LEAD AND/OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. You will indemnify, hold harmless, and defend Specification Lead and its licensors from any claims arising or resulting from: (i) your use of the Specification; (ii) the use or distribution of your Java application, applet and/or implementation; and/or (iii) any claims that later versions or releases of any Specification furnished to you are incompatible with the Specification provided to you under this license.

</p>

<p>

## RESTRICTED RIGHTS LEGEND

<br/>

U.S. Government: If this Specification is being acquired by or on behalf of the U.S. Government or by a U.S. Government prime contractor or subcontractor (at any tier), then the Government's rights in the Software and accompanying documentation shall be only as set forth in this license; this is in accordance with 48 C.F.R. 227.7201 through 227.7202-4 (for Department of Defense (DoD) acquisitions) and with 48 C.F.R. 2.101 and 12.212 (for non-DoD acquisitions).

</p>

<p>

## REPORT

<br/>

If you provide Specification Lead with any comments or suggestions concerning the Specification ("Feedback"), you hereby: (i) agree that such Feedback is provided on a non-proprietary and non-confidential basis, and (ii) grant Specification Lead a perpetual, non-exclusive, worldwide, fully paid-up, irrevocable license, with the right to sublicense through multiple levels of sublicensees, to incorporate, disclose, and use without limitation the Feedback for any purpose.

</p>

<p>

## GENERAL TERMS

<br/>

Any action related to this Agreement will be governed by California law and controlling U.S. federal law. The U.N. Convention for the International Sale of Goods and the choice of law rules of any jurisdiction will not apply.

</p>

<p>

The Specification is subject to U.S. export control laws and may be subject to export or import regulations in other countries. Licensee agrees to comply strictly with all such laws and regulations and acknowledges that it has the responsibility to obtain such licenses to export, re-export or import as may be required after delivery to Licensee.

</p>

<p>

This Agreement is the parties' entire agreement relating to its subject matter. It supersedes all prior or contemporaneous oral or written communications, proposals, conditions, representations and warranties and prevails over any conflicting or additional terms of any quote, order, acknowledgment, or other communication between the parties relating to its subject matter during the term of this Agreement. No modification to this Agreement will be binding, unless in writing and signed by an authorized representative of each party.

</p>

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner

or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and

- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions

of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

\* Synchronous client for accessing Amazon S3.

\*

\* <h1>Appendix: Amazon S3 client-side encryption meta information</h1>

\*

\* <h2>Introduction</h2>

\* <p>

\* This appendix summarizes the current crypto related meta information

\* associated with an S3 object encrypted using SDK client-side encryption. In

\* SDK's terminology, these meta information are classified as "user metadata".

\* In general, the meta information is just a map of key/value pairs. Physically

\* they are persisted either as metadata of the encrypted S3 object, or as a

\* separate S3 object called an "instruction file" (which is just a JSON file in

\* plaintext.) For all references to the Cipher Algorithm Names, Modes, and Padding,

\* such as <code>"AES/CBC/PKCS5Padding"</code>, please refer to Oracle's <a

\* href="http://docs.oracle.com/javase/7/docs/technotes/guides/security/StandardNames.html"

\* >Java&trade; Cryptography Architecture Standard Algorithm Name Documentation</a>

\* for more details.

\*

\* <h2>S3 metadata vs instruction file</h2>

\* <p>

\* Note when a key/value pair is stored as "user metadata" as part of the S3

\* metadata, the SDK always adds an additional prefix of <b>x-amz-meta-</b> to

\* the key name. In contrast, the SDK doesn't add any prefix when the key names

\* are stored in an instruction file. (The reason has to do with how the http

\* headers are handled.)

\*

\* For example, <b>x-amz-key</b> would get stored as <b>x-amz-meta-x-amz-key</b>

\* in S3 metadata. In contrast, <b>x-amz-key</b> would simply be stored as is

\* (ie without the prefix) in an instruction file.

\*

\* All the keys described below are considered "user metadata" by the SDK.

\*

\* <h2>S3 v1 crypto meta information (supported by all SDK's)</h2>

\* <p>

\* For non-KMS client side encryption, this v1 crypto meta information is used

\* to support the "Encryption Only" crypto mode (which involves the use of

\* <code>AES/CBC/PKCS5Padding</code> for content encryption, and

\* <code>AES/ECB</code> for encrypting the one-time randomly generated data

\* key). For KMS client-side encryption, the v2 crypto meta information is used.

\* <p>

\* <table border=1>

\* <tr aligned="left">

\* <th>key</th>

\* <th>description</th>

\* </tr>

\* <tr>

\* <td width="200"><b>x-amz-key</b></td>

\* <td>Content encrypting key (cek) in encrypted form, base64 encoded. The cek

```

* is randomly generated per S3 object, and is always an AES 256-bit key. The
* corresponding cipher is always "AES/CBC/PKCS5Padding".</td>
* </tr>
* <tr>
* <td><b>x-amz-iv</b></td>
* <td>Randomly generated IV (per S3 object), base64 encoded</td>
* </tr>
* <tr>
* <td><b>x-amz-matdesc </b></td>
* <td>Customer provided material description in JSON (UTF8) format. Used to
* identify the client-side master key (ie used to encrypt/wrap the generated
* content encrypting key).</td>
* </tr>
* <tr>
* <td><b>x-amz-unencrypted-content-length</b></td>
* <td>Unencrypted content length (optional but should be specified whenever
* possible).</td>
* </tr>
* </table>
*
* <h2>S3 v2 crypto meta information (currently supported by the Java SDK)</h2>
* <p>
* This v2 crypto meta information is used to support both authenticated
* encryption (which involves the use of <code>AES/GCM/NoPadding</code> for
* content encryption, and key wrapping for the one-time randomly generated data
* key), and KMS client-side encryption (which can either be encryption-only or
* authenticated encryption.)
* <p>
* <table border=1>
* <tr aligned="left">
* <th>key</th>
* <th>description</th>
* </tr>
* <tr>
* <td width="200"><b>x-amz-key-v2</b></td>
* <td>CEK in key wrapped form. This is necessary so that the S3 encryption
* client that doesn't recognize the v2 format will not mistakenly decrypt S3
* object encrypted in v2 format.</td>
* </tr>
* <tr>
* <td><b>x-amz-iv</b></td>
* <td>Randomly generated IV (per S3 object), base64 encoded. (Same as v1.)</td>
* </tr>
* <tr>
* <td><b>x-amz-matdesc</b></td>
* <td>Customer provided material description in JSON format. (Same as v1). Used
* to identify the client-side master key.
* </ul>

```

```

* <li>For KMS client side encryption, the KMS Customer Master Key ID is stored
* as part of the material description, <b>x-amz-matdesc</b>, under the key-name
* <code>"kms_cmk_id"</code>.</li>
* </ul>
* </td>
* </tr>
* <tr>
* <td><b>x-amz-unencrypted-content-length</b></td>
* <td>Unencrypted content length. (optional but should be specified whenever
* possible. Same as v1.)</td>
* </tr>
* <tr>
* <td><b>x-amz-wrap-alg</b></td>
* <td>Key wrapping algorithm used.
* <ul>
* <li>Supported values:
* <code>"AESWrap", "RSA/ECB/OAEPWithSHA-256AndMGF1Padding", "kms"</code></li>
* <li>No standard key wrapping is used if this meta information is absent</li>
* <li>Always set to <b>"kms"</b> if KMS is used for client-side encryption</li>
* </ul>
* </td>
* </tr>
* <tr>
* <td><b>x-amz-cek-alg</b></td>
* <td>Content encryption algorithm used.
* <ul>
* <li>Supported values:
* <code>"AES/GCM/NoPadding", "AES/CBC/PKCS5Padding"</code></li>
* <li>Default to <code>"AES/CBC/PKCS5Padding"</code> if this key is absent.</li>
* </ul>
* </td>
* </tr>
* <tr>
* <td><b>x-amz-tag-len</b></td>
* <td>Tag length (in bits) when AEAD is in use.
* <ul>
* <li>Only applicable if AEAD is in use. This meta information is absent
* otherwise, or if KMS is in use.</li>
* <li>Supported value: <code>"128"</code></li>
* </ul>
* </td>
* </tr>
* </table>
* <p>
* <h3>KMS Integration for client-side encryption</h3>
* <ol>
* <li>All client-side KMS protected S3 objects are stored in v2 crypto meta information
* format. However, the key wrapping algorithm, <b>x-amz-wrap-alg</b> is always

```

\* set to `<b>"kms"</b>`.</li>

\* <li>The KMS Customer Master Key ID is currently stored as part of the material description, `<b>x-amz-matdesc</b>`, under the key-name `<b>"kms_cmk_id"</b>`.</li>

\* </ol>

\* <p>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You

institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.  
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

## 1.177 bouncy-castle 1.68

### 1.177.1 Available under license :

Copyright (c) 2000-2021 The Legion of the Bouncy Castle Inc. (<https://www.bouncycastle.org>)

Permission is hereby granted, free of charge, to any person obtaining a copy of this software and associated documentation files (the "Software"), to deal in the Software without restriction, including without limitation the rights to use, copy, modify, merge, publish, distribute, sublicense, and/or sell copies of the Software, and to permit persons to whom the Software is furnished to do so, subject to the following conditions:

The above copyright notice and this permission notice shall be included in all copies or substantial portions of the Software.

THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE AND NONINFRINGEMENT. IN NO EVENT SHALL THE AUTHORS OR COPYRIGHT HOLDERS BE LIABLE FOR ANY CLAIM, DAMAGES OR OTHER LIABILITY, WHETHER IN AN ACTION OF CONTRACT, TORT OR OTHERWISE, ARISING FROM, OUT OF OR IN CONNECTION WITH THE SOFTWARE OR THE USE OR OTHER DEALINGS IN THE SOFTWARE.  
COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

1. Definitions.

1.1. Contributor. means each individual or entity that creates or contributes to the creation of Modifications.

1.2. Contributor Version. means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. Covered Software. means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. Executable. means the Covered Software in any form other than Source Code.

1.5. Initial Developer. means the individual or entity that first makes Original Software available under this License.

1.6. Larger Work. means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. License. means this document.

1.8. Licensable. means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. Modifications. means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. Original Software. means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. Patent Claims. means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. Source Code. means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. You. (or .Your.) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, .You. includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, .control. means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

2. License Grants.

## 2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

## 2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

## 3. Distribution Obligations.

### 3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made

available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

### 3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

### 3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

### 3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

### 3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

### 3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

## 4. Versions of the License.

### 4.1. New Versions.

Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

#### 4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

#### 4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

### 5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN .AS IS. BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABLE, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION. THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

### 6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as .Participant.) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

### 7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY'S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

#### 8. U.S. GOVERNMENT END USERS.

The Covered Software is a .commercial item., as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of .commercial computer software. (as that term is defined at 48 C.F.R. 252.227-7014(a)(1)) and .commercial computer software documentation. as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

#### 9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

#### 10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE

(CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To

prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute

the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

#### "CLASSPATH" EXCEPTION TO THE GPL VERSION 2

Certain source files distributed by Sun Microsystems, Inc. are subject to the following clarification and special exception to the GPL Version 2, but only where Sun has expressly included in the particular source file's header the words

"Sun designates this particular file as subject to the "Classpath" exception as provided by Sun in the License file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License Version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module.? An independent module is a module which is not derived from or based on this library.? If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so.? If you do not wish to do so, delete this exception statement from your version.

JUnit

Eclipse Public License - v 1.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM

## CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

### 1. DEFINITIONS

"Contribution" means:

- a) in the case of the initial Contributor, the initial code and documentation distributed under this Agreement, and
- b) in the case of each subsequent Contributor:
  - i) changes to the Program, and
  - ii) additions to the Program;

where such changes and/or additions to the Program originate from and are distributed by that particular Contributor. A Contribution 'originates' from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include additions to the Program which: (i) are separate modules of software distributed in conjunction with the Program under their own license agreement, and (ii) are not derivative works of the Program.

"Contributor" means any person or entity that distributes the Program.

"Licensed Patents " mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement, including all Contributors.

### 2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare derivative works of, publicly display, publicly perform, distribute and sublicense the Contribution of such Contributor, if any, and such derivative works, in source code and object code form.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in source code and object code form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be

covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

### 3. REQUIREMENTS

A Contributor may choose to distribute the Program in object code form under its own license agreement, provided that:

- a) it complies with the terms and conditions of this Agreement; and
- b) its license agreement:
  - i) effectively disclaims on behalf of all Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;
  - ii) effectively excludes on behalf of all Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;
  - iii) states that any provisions which differ from this Agreement are offered by that Contributor alone and not by any other party; and
  - iv) states that source code for the Program is available from such Contributor, and informs licensees how to obtain it in a reasonable manner on or through a medium customarily used for software exchange.

When the Program is made available in source code form:

- a) it must be made available under this Agreement; and

b) a copy of this Agreement must be included with each copy of the Program.

Contributors may not remove or alter any copyright notices contained within the Program.

Each Contributor must identify itself as the originator of its Contribution, if any, in a manner that reasonably allows subsequent Recipients to identify the originator of the Contribution.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

#### 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE,

NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors, compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version

of the Agreement will be given a distinguishing version number. The Program (including Contributions) may always be distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to distribute the Program (including its Contributions) under the new version. Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved.

This Agreement is governed by the laws of the State of New York and the intellectual property laws of the United States of America. No party to this Agreement will bring a legal action under this Agreement more than one year after the cause of action arose. Each party waives its rights to a jury trial in any resulting litigation.

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 1.180.1 Available under license :

COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL) Version 1.0

### 1. Definitions.

1.1. Contributor. means each individual or entity that creates or contributes to the creation of Modifications.

1.2. Contributor Version. means the combination of the Original Software, prior Modifications used by a Contributor (if any), and the Modifications made by that particular Contributor.

1.3. Covered Software. means (a) the Original Software, or (b) Modifications, or (c) the combination of files containing Original Software with files containing Modifications, in each case including portions thereof.

1.4. Executable. means the Covered Software in any form other than Source Code.

1.5. Initial Developer. means the individual or entity that first makes Original Software available under this License.

1.6. Larger Work. means a work which combines Covered Software or portions thereof with code not governed by the terms of this License.

1.7. License. means this document.

1.8. Licensable. means having the right to grant, to the maximum extent possible, whether at the time of the initial grant or subsequently acquired, any and all of the rights conveyed herein.

1.9. Modifications. means the Source Code and Executable form of any of the following:

A. Any file that results from an addition to, deletion from or modification of the contents of a file containing Original Software or previous Modifications;

B. Any new file that contains any part of the Original Software or previous Modification; or

C. Any new file that is contributed or otherwise made available under the terms of this License.

1.10. Original Software. means the Source Code and Executable form of computer software code that is originally released under this License.

1.11. Patent Claims. means any patent claim(s), now owned or hereafter acquired, including without limitation, method, process, and apparatus claims, in any patent Licensable by grantor.

1.12. Source Code. means (a) the common form of computer software code in which modifications are made and (b) associated documentation included in or with such code.

1.13. You. (or .Your.) means an individual or a legal entity exercising rights under, and complying with all of the terms of, this License. For legal entities, .You. includes any entity which controls, is controlled by, or is under common control with You. For purposes of this definition, .control. means (a) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (b) ownership of more than fifty percent (50%) of the outstanding shares or beneficial ownership of such entity.

## 2. License Grants.

### 2.1. The Initial Developer Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, the Initial Developer hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Initial Developer, to use, reproduce, modify, display, perform, sublicense and distribute the Original Software (or portions thereof), with or without Modifications, and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using or selling of Original Software, to make, have made, use, practice, sell, and offer for sale, and/or otherwise dispose of the Original Software (or portions thereof).

(c) The licenses granted in Sections 2.1(a) and (b) are effective on the date Initial Developer first distributes or otherwise makes the Original Software available to a third party under the terms of this License.

(d) Notwithstanding Section 2.1(b) above, no patent license is granted: (1) for code that You delete from the Original Software, or (2) for infringements caused by: (i) the modification of the Original Software, or (ii) the combination of the Original Software with other software or devices.

### 2.2. Contributor Grant.

Conditioned upon Your compliance with Section 3.1 below and subject to third party intellectual property claims, each Contributor hereby grants You a world-wide, royalty-free, non-exclusive license:

(a) under intellectual property rights (other than patent or trademark) Licensable by Contributor to use, reproduce, modify, display, perform, sublicense and distribute the Modifications created by such Contributor (or portions thereof), either on an unmodified basis, with other Modifications, as Covered Software and/or as part of a Larger Work; and

(b) under Patent Claims infringed by the making, using, or selling of Modifications made by that Contributor either alone and/or in combination with its Contributor Version (or portions of such combination), to make, use, sell, offer for sale, have made, and/or otherwise dispose of: (1) Modifications made by that Contributor (or portions thereof); and (2) the combination of Modifications made by that Contributor with its Contributor Version (or portions of such combination).

(c) The licenses granted in Sections 2.2(a) and 2.2(b) are effective on the date Contributor first distributes or otherwise makes the Modifications available to a third party.

(d) Notwithstanding Section 2.2(b) above, no patent license is granted: (1) for any code that Contributor has deleted from the Contributor Version; (2) for infringements caused by: (i) third party modifications of Contributor Version, or (ii) the combination of Modifications made by that Contributor with other software (except as part of the Contributor Version) or other devices; or (3) under Patent Claims infringed by Covered Software in the absence of Modifications made by that Contributor.

### 3. Distribution Obligations.

#### 3.1. Availability of Source Code.

Any Covered Software that You distribute or otherwise make available in Executable form must also be made available in Source Code form and that Source Code form must be distributed only under the terms of this License. You must include a copy of this License with every copy of the Source Code form of the Covered Software You distribute or otherwise make available. You must inform recipients of any such Covered Software in Executable form as to how they can obtain such Covered Software in Source Code form in a reasonable manner on or through a medium customarily used for software exchange.

#### 3.2. Modifications.

The Modifications that You create or to which You contribute are governed by the terms of this License. You represent that You believe Your Modifications are Your original creation(s) and/or You have sufficient rights to grant the rights conveyed by this License.

#### 3.3. Required Notices.

You must include a notice in each of Your Modifications that identifies You as the Contributor of the Modification. You may not remove or alter any copyright, patent or trademark notices contained within the Covered Software, or any notices of licensing or any descriptive text giving attribution to any Contributor or the Initial Developer.

#### 3.4. Application of Additional Terms.

You may not offer or impose any terms on any Covered Software in Source Code form that alters or restricts the applicable version of this License or the recipients' rights hereunder. You may choose to offer, and to charge a fee for, warranty, support, indemnity or liability obligations to one or more recipients of Covered Software. However, you may do so only on Your own behalf, and not on behalf of the Initial Developer or any Contributor. You must make it absolutely clear that any such warranty, support, indemnity or liability obligation is offered by You alone, and You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the

Initial Developer or such Contributor as a result of warranty, support, indemnity or liability terms You offer.

### 3.5. Distribution of Executable Versions.

You may distribute the Executable form of the Covered Software under the terms of this License or under the terms of a license of Your choice, which may contain terms different from this License, provided that You are in compliance with the terms of this License and that the license for the Executable form does not attempt to limit or alter the recipient's rights in the Source Code form from the rights set forth in this License. If You distribute the Covered Software in Executable form under a different license, You must make it absolutely clear that any terms which differ from this License are offered by You alone, not by the Initial Developer or Contributor. You hereby agree to indemnify the Initial Developer and every Contributor for any liability incurred by the Initial Developer or such Contributor as a result of any such terms You offer.

### 3.6. Larger Works.

You may create a Larger Work by combining Covered Software with other code not governed by the terms of this License and distribute the Larger Work as a single product. In such a case, You must make sure the requirements of this License are fulfilled for the Covered Software.

## 4. Versions of the License.

### 4.1. New Versions.

Sun Microsystems, Inc. is the initial license steward and may publish revised and/or new versions of this License from time to time. Each version will be given a distinguishing version number. Except as provided in Section 4.3, no one other than the license steward has the right to modify this License.

### 4.2. Effect of New Versions.

You may always continue to use, distribute or otherwise make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. If the Initial Developer includes a notice in the Original Software prohibiting it from being distributed or otherwise made available under any subsequent version of the License, You must distribute and make the Covered Software available under the terms of the version of the License under which You originally received the Covered Software. Otherwise, You may also choose to use, distribute or otherwise make the Covered Software available under the terms of any subsequent version of the License published by the license steward.

### 4.3. Modified Versions.

When You are an Initial Developer and You want to create a new license for Your Original Software, You may create and use a modified version of this License if You: (a) rename the license and remove any references to the name of the license steward (except to note that the license differs from this License); and (b) otherwise make it clear that the license contains terms which differ from this License.

## 5. DISCLAIMER OF WARRANTY.

COVERED SOFTWARE IS PROVIDED UNDER THIS LICENSE ON AN .AS IS. BASIS, WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, WITHOUT LIMITATION, WARRANTIES THAT THE COVERED SOFTWARE IS FREE OF DEFECTS, MERCHANTABILITY, FIT FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE COVERED SOFTWARE IS WITH YOU. SHOULD ANY COVERED SOFTWARE PROVE DEFECTIVE IN ANY RESPECT, YOU (NOT THE INITIAL DEVELOPER OR ANY OTHER CONTRIBUTOR) ASSUME THE COST OF ANY NECESSARY SERVICING, REPAIR OR CORRECTION.

THIS DISCLAIMER OF WARRANTY CONSTITUTES AN ESSENTIAL PART OF THIS LICENSE. NO USE OF ANY COVERED SOFTWARE IS AUTHORIZED HEREUNDER EXCEPT UNDER THIS DISCLAIMER.

## 6. TERMINATION.

6.1. This License and the rights granted hereunder will terminate automatically if You fail to comply with terms herein and fail to cure such breach within 30 days of becoming aware of the breach. Provisions which, by their nature, must remain in effect beyond the termination of this License shall survive.

6.2. If You assert a patent infringement claim (excluding declaratory judgment actions) against Initial Developer or a Contributor (the Initial Developer or Contributor against whom You assert such claim is referred to as .Participant.) alleging that the Participant Software (meaning the Contributor Version where the Participant is a Contributor or the Original Software where the Participant is the Initial Developer) directly or indirectly infringes any patent, then any and all rights granted directly or indirectly to You by such Participant, the Initial Developer (if the Initial Developer is not the Participant) and all Contributors under Sections 2.1 and/or 2.2 of this License shall, upon 60 days notice from Participant terminate prospectively and automatically at the expiration of such 60 day notice period, unless if within such 60 day period You withdraw Your claim with respect to the Participant Software against such Participant either unilaterally or pursuant to a written agreement with Participant.

6.3. In the event of termination under Sections 6.1 or 6.2 above, all end user licenses that have been validly granted by You or any distributor hereunder prior to termination (excluding licenses granted to You by any distributor) shall survive termination.

## 7. LIMITATION OF LIABILITY.

UNDER NO CIRCUMSTANCES AND UNDER NO LEGAL THEORY, WHETHER TORT (INCLUDING NEGLIGENCE), CONTRACT, OR OTHERWISE, SHALL YOU, THE INITIAL DEVELOPER, ANY OTHER CONTRIBUTOR, OR ANY DISTRIBUTOR OF COVERED SOFTWARE, OR ANY SUPPLIER OF ANY OF SUCH PARTIES, BE LIABLE TO ANY PERSON FOR ANY INDIRECT, SPECIAL, INCIDENTAL, OR CONSEQUENTIAL DAMAGES OF ANY CHARACTER INCLUDING, WITHOUT LIMITATION, DAMAGES FOR LOST PROFITS, LOSS OF GOODWILL, WORK STOPPAGE, COMPUTER FAILURE OR MALFUNCTION, OR ANY AND ALL OTHER COMMERCIAL DAMAGES OR LOSSES, EVEN IF SUCH PARTY SHALL HAVE BEEN INFORMED OF THE POSSIBILITY OF SUCH DAMAGES. THIS LIMITATION OF LIABILITY SHALL NOT APPLY TO LIABILITY FOR DEATH OR PERSONAL INJURY RESULTING FROM SUCH PARTY.S NEGLIGENCE TO THE EXTENT APPLICABLE LAW PROHIBITS SUCH LIMITATION. SOME JURISDICTIONS DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES, SO THIS EXCLUSION AND LIMITATION MAY NOT APPLY TO YOU.

## 8. U.S. GOVERNMENT END USERS.

The Covered Software is a .commercial item., as that term is defined in 48 C.F.R. 2.101 (Oct. 1995), consisting of .commercial computer software. (as that term is defined at 48 C.F.R. ? 252.227-7014(a)(1)) and .commercial computer software documentation. as such terms are used in 48 C.F.R. 12.212 (Sept. 1995). Consistent with 48 C.F.R. 12.212 and 48 C.F.R. 227.7202-1 through 227.7202-4 (June 1995), all U.S. Government End Users acquire Covered Software with only those rights set forth herein. This U.S. Government Rights clause is in lieu of, and supersedes, any other FAR, DFAR, or other clause or provision that addresses Government rights in computer software under this License.

## 9. MISCELLANEOUS.

This License represents the complete agreement concerning subject matter hereof. If any provision of this License is held to be unenforceable, such provision shall be reformed only to the extent necessary to make it enforceable. This License shall be governed by the law of the jurisdiction specified in a notice contained within the Original Software (except to the extent applicable law, if any, provides otherwise), excluding such jurisdiction's conflict-of-law provisions. Any litigation relating to this License shall be subject to the jurisdiction of the courts located in the jurisdiction and venue specified in a notice contained within the Original Software, with the losing party responsible for costs, including, without limitation, court costs and reasonable attorneys' fees and expenses. The application of the United Nations Convention on Contracts for the International Sale of Goods is expressly excluded. Any law or regulation which provides that the language of a contract shall be construed against the drafter shall not apply to this License. You agree that You alone are responsible for compliance with the United States export administration regulations (and the export control laws and regulation of any other countries) when You use, distribute or otherwise make available any Covered Software.

## 10. RESPONSIBILITY FOR CLAIMS.

As between Initial Developer and the Contributors, each party is responsible for claims and damages arising, directly or indirectly, out of its utilization of rights under this License and You agree to work with Initial Developer and Contributors to distribute such responsibility on an equitable basis. Nothing herein is intended or shall be deemed to constitute any admission of liability.

## NOTICE PURSUANT TO SECTION 9 OF THE COMMON DEVELOPMENT AND DISTRIBUTION LICENSE (CDDL)

The code released under the CDDL shall be governed by the laws of the State of California (excluding conflict-of-law provisions). Any litigation relating to this License shall be subject to the jurisdiction of the Federal Courts of the Northern District of California and the state courts of the State of California, with venue lying in Santa Clara County, California.

The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc. 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or

executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

#### NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

#### END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to

achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.

Copyright (C)

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software Foundation, Inc., 59 Temple Place, Suite 330, Boston, MA 02111-1307 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

Gnomovision version 69, Copyright (C) year name of author

Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type `show w'. This is free software, and you are welcome to redistribute it under certain conditions; type `show c' for details.

The hypothetical commands `show w' and `show c' should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than `show w' and `show c'; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

Yoyodyne, Inc., hereby disclaims all copyright interest in the program `Gnomovision' (which makes passes at compilers) written by James Hacker.

signature of Ty Coon, 1 April 1989

Ty Coon, President of Vice

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

"CLASSPATH" EXCEPTION TO THE GPL VERSION 2

Certain source files distributed by Sun Microsystems, Inc. are subject to the following clarification and special exception to the GPL Version 2, but only where Sun has expressly included in the particular source file's header the words

"Sun designates this particular file as subject to the "Classpath" exception as provided by Sun in the License file that accompanied this code."

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License Version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked independent module, the terms and conditions of the license of that module.? An independent module is a module which is not derived from or based on this library.? If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so.? If you do not wish to do so, delete this exception statement from your version.

# 1.182 spring-context 5.3.22

## 1.182.1 Available under license :

Spring Framework 5.3.22

Copyright (c) 2002-2022 Pivotal, Inc.

This product is licensed to you under the Apache License, Version 2.0 (the "License"). You may not use this product except in compliance with the License.

This product may include a number of subcomponents with separate copyright notices and license terms. Your use of the source code for these subcomponents is subject to the terms and conditions of the subcomponent's license, as noted in the license.txt file.

Apache License

Version 2.0, January 2004

<https://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications,

including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual,

worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf

of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction,  
and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by  
the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all  
other entities that control, are controlled by, or are under common  
control with that entity. For the purposes of this definition,  
"control" means (i) the power, direct or indirect, to cause the  
direction or management of such entity, whether by contract or  
otherwise, or (ii) ownership of fifty percent (50%) or more of the  
outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the

Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
  
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
  
  - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside

or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer,

and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# 1.186 spring-data-jpa 2.7.2

## 1.186.1 Available under license :

Apache License  
Version 2.0, January 2004  
<https://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems,

and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
  - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
  - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
  - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

(d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

Licensed under the Apache License, Version 2.0 (the "License");  
you may not use this file except in compliance with the License.  
You may obtain a copy of the License at

<https://www.apache.org/licenses/LICENSE-2.0>

Unless required by applicable law or agreed to in writing, software distributed under the License is distributed on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied. See the License for the specific language governing permissions and

limitations under the License.

---

To the extent any open source subcomponents are licensed under the EPL and/or other similar licenses that require the source code and/or modifications to source code to be made available (as would be noted above), you may obtain a copy of the source code corresponding to the binaries for such open source components and modifications thereto, if any, (the "Source Files"), by downloading the Source Files from <https://www.springsource.org/download>, or by sending a request, with your name and address to: VMware, Inc., 3401 Hillview Avenue, Palo Alto, CA 94304, United States of America or email [info@vmware.com](mailto:info@vmware.com). All such requests should clearly specify: OPEN SOURCE FILES REQUEST, Attention General Counsel. VMware shall mail a copy of the Source Files to you on a CD or equivalent physical medium. This offer to obtain a copy of the Source Files is valid for three years from the date you acquired this Software product.

Apache License  
Version 2.0, January 2004

## TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but

not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their

Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with

the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.  
Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. **Limitation of Liability.** In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. **Accepting Warranty or Additional Liability.** While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "{}" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. # 1.187 jakarta-inject 2.6.1

## 1.187.1 Available under license :

# Eclipse Public License - v 2.0

THE ACCOMPANYING PROGRAM IS PROVIDED UNDER THE TERMS OF THIS ECLIPSE PUBLIC LICENSE ("AGREEMENT"). ANY USE, REPRODUCTION OR DISTRIBUTION OF THE PROGRAM CONSTITUTES RECIPIENT'S ACCEPTANCE OF THIS AGREEMENT.

### 1. DEFINITIONS

"Contribution" means:

a) in the case of the initial Contributor, the initial content Distributed under this Agreement, and

b) in the case of each subsequent Contributor:

i) changes to the Program, and

ii) additions to the Program;

where such changes and/or additions to the Program originate from and are Distributed by that particular Contributor. A Contribution "originates" from a Contributor if it was added to the Program by such Contributor itself or anyone acting on such Contributor's behalf. Contributions do not include changes or additions to the Program that are not Modified Works.

"Contributor" means any person or entity that Distributes the Program.

"Licensed Patents" mean patent claims licensable by a Contributor which are necessarily infringed by the use or sale of its Contribution alone or when combined with the Program.

"Program" means the Contributions Distributed in accordance with this Agreement.

"Recipient" means anyone who receives the Program under this Agreement or any Secondary License (as applicable), including Contributors.

"Derivative Works" shall mean any work, whether in Source Code or other form, that is based on (or derived from) the Program and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship.

"Modified Works" shall mean any work in Source Code or other form that results from an addition to, deletion from, or modification of the contents of the Program, including, for purposes of clarity any new file in Source Code form that contains any contents of the Program. Modified Works shall not include works that contain only declarations, interfaces, types, classes, structures, or files of the Program solely in each case in order to link to, bind by name, or subclass the Program or Modified Works thereof.

"Distribute" means the acts of a) distributing or b) making available in any manner that enables the transfer of a copy.

"Source Code" means the form of a Program preferred for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Secondary License" means either the GNU General Public License, Version 2.0, or any later versions of that license, including any exceptions or additional permissions as identified by the initial Contributor.

## 2. GRANT OF RIGHTS

a) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, Distribute and sublicense the Contribution of such Contributor, if any, and such Derivative Works.

b) Subject to the terms of this Agreement, each Contributor hereby grants Recipient a non-exclusive, worldwide, royalty-free patent license under Licensed Patents to make, use, sell, offer to sell, import and otherwise transfer the Contribution of such Contributor, if any, in Source Code or other form. This patent license shall apply to the combination of the Contribution and the Program if, at the time the Contribution is added by the Contributor, such addition of the Contribution causes such combination to be covered by the Licensed Patents. The patent license shall not apply to any other combinations which include the Contribution. No hardware per se is licensed hereunder.

c) Recipient understands that although each Contributor grants the licenses to its Contributions set forth herein, no assurances are provided by any Contributor that the Program does not infringe the patent or other intellectual property rights of any other entity. Each Contributor disclaims any liability to Recipient for claims brought by any other entity based on infringement of intellectual property rights or otherwise. As a condition to exercising the rights and licenses granted hereunder, each Recipient hereby assumes sole responsibility to secure any other intellectual property rights needed, if any. For example, if a third party patent license is required to allow Recipient to Distribute the Program, it is Recipient's responsibility to acquire that license before distributing the Program.

d) Each Contributor represents that to its knowledge it has sufficient copyright rights in its Contribution, if any, to grant the copyright license set forth in this Agreement.

e) Notwithstanding the terms of any Secondary License, no Contributor makes additional grants to any Recipient (other than those set forth in this Agreement) as a result of such Recipient's receipt of the Program under the terms of a Secondary License

(if permitted under the terms of Section 3).

### 3. REQUIREMENTS

3.1 If a Contributor Distributes the Program in any form, then:

a) the Program must also be made available as Source Code, in accordance with section 3.2, and the Contributor must accompany the Program with a statement that the Source Code for the Program is available under this Agreement, and informs Recipients how to obtain it in a reasonable manner on or through a medium customarily used for software exchange; and

b) the Contributor may Distribute the Program under a license different than this Agreement, provided that such license:

i) effectively disclaims on behalf of all other Contributors all warranties and conditions, express and implied, including warranties or conditions of title and non-infringement, and implied warranties or conditions of merchantability and fitness for a particular purpose;

ii) effectively excludes on behalf of all other Contributors all liability for damages, including direct, indirect, special, incidental and consequential damages, such as lost profits;

iii) does not attempt to limit or alter the recipients' rights in the Source Code under section 3.2; and

iv) requires any subsequent distribution of the Program by any party to be under a license that satisfies the requirements of this section 3.

3.2 When the Program is Distributed as Source Code:

a) it must be made available under this Agreement, or if the Program (i) is combined with other material in a separate file or files made available under a Secondary License, and (ii) the initial Contributor attached to the Source Code the notice described in Exhibit A of this Agreement, then the Program may be made available under the terms of such Secondary Licenses, and

b) a copy of this Agreement must be included with each copy of the Program.

3.3 Contributors may not remove or alter any copyright, patent, trademark, attribution notices, disclaimers of warranty, or limitations of liability ("notices") contained within the Program from any copy of the Program which they Distribute, provided that Contributors may add

their own appropriate notices.

#### 4. COMMERCIAL DISTRIBUTION

Commercial distributors of software may accept certain responsibilities with respect to end users, business partners and the like. While this license is intended to facilitate the commercial use of the Program, the Contributor who includes the Program in a commercial product offering should do so in a manner which does not create potential liability for other Contributors. Therefore, if a Contributor includes the Program in a commercial product offering, such Contributor ("Commercial Contributor") hereby agrees to defend and indemnify every other Contributor ("Indemnified Contributor") against any losses, damages and costs (collectively "Losses") arising from claims, lawsuits and other legal actions brought by a third party against the Indemnified Contributor to the extent caused by the acts or omissions of such Commercial Contributor in connection with its distribution of the Program in a commercial product offering. The obligations in this section do not apply to any claims or Losses relating to any actual or alleged intellectual property infringement. In order to qualify, an Indemnified Contributor must: a) promptly notify the Commercial Contributor in writing of such claim, and b) allow the Commercial Contributor to control, and cooperate with the Commercial Contributor in, the defense and any related settlement negotiations. The Indemnified Contributor may participate in any such claim at its own expense.

For example, a Contributor might include the Program in a commercial product offering, Product X. That Contributor is then a Commercial Contributor. If that Commercial Contributor then makes performance claims, or offers warranties related to Product X, those performance claims and warranties are such Commercial Contributor's responsibility alone. Under this section, the Commercial Contributor would have to defend claims against the other Contributors related to those performance claims and warranties, and if a court requires any other Contributor to pay any damages as a result, the Commercial Contributor must pay those damages.

#### 5. NO WARRANTY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, THE PROGRAM IS PROVIDED ON AN "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, EITHER EXPRESS OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY WARRANTIES OR CONDITIONS OF TITLE, NON-INFRINGEMENT, MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Each Recipient is solely responsible for determining the appropriateness of using and distributing the Program and assumes all risks associated with its exercise of rights under this Agreement, including but not limited to the risks and costs of program errors,

compliance with applicable laws, damage to or loss of data, programs or equipment, and unavailability or interruption of operations.

## 6. DISCLAIMER OF LIABILITY

EXCEPT AS EXPRESSLY SET FORTH IN THIS AGREEMENT, AND TO THE EXTENT PERMITTED BY APPLICABLE LAW, NEITHER RECIPIENT NOR ANY CONTRIBUTORS SHALL HAVE ANY LIABILITY FOR ANY DIRECT, INDIRECT, INCIDENTAL, SPECIAL, EXEMPLARY, OR CONSEQUENTIAL DAMAGES (INCLUDING WITHOUT LIMITATION LOST PROFITS), HOWEVER CAUSED AND ON ANY THEORY OF LIABILITY, WHETHER IN CONTRACT, STRICT LIABILITY, OR TORT (INCLUDING NEGLIGENCE OR OTHERWISE) ARISING IN ANY WAY OUT OF THE USE OR DISTRIBUTION OF THE PROGRAM OR THE EXERCISE OF ANY RIGHTS GRANTED HEREUNDER, EVEN IF ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

## 7. GENERAL

If any provision of this Agreement is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this Agreement, and without further action by the parties hereto, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

If Recipient institutes patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Program itself (excluding combinations of the Program with other software or hardware) infringes such Recipient's patent(s), then such Recipient's rights granted under Section 2(b) shall terminate as of the date such litigation is filed.

All Recipient's rights under this Agreement shall terminate if it fails to comply with any of the material terms or conditions of this Agreement and does not cure such failure in a reasonable period of time after becoming aware of such noncompliance. If all Recipient's rights under this Agreement terminate, Recipient agrees to cease use and distribution of the Program as soon as reasonably practicable. However, Recipient's obligations under this Agreement and any licenses granted by Recipient relating to the Program shall continue and survive.

Everyone is permitted to copy and distribute copies of this Agreement, but in order to avoid inconsistency the Agreement is copyrighted and may only be modified in the following manner. The Agreement Steward reserves the right to publish new versions (including revisions) of this Agreement from time to time. No one other than the Agreement Steward has the right to modify this Agreement. The Eclipse Foundation is the initial Agreement Steward. The Eclipse Foundation may assign the responsibility to serve as the Agreement Steward to a suitable separate entity. Each new version of the Agreement will be given a distinguishing

version number. The Program (including Contributions) may always be Distributed subject to the version of the Agreement under which it was received. In addition, after a new version of the Agreement is published, Contributor may elect to Distribute the Program (including its Contributions) under the new version.

Except as expressly stated in Sections 2(a) and 2(b) above, Recipient receives no rights or licenses to the intellectual property of any Contributor under this Agreement, whether expressly, by implication, estoppel or otherwise. All rights in the Program not expressly granted under this Agreement are reserved. Nothing in this Agreement is intended to be enforceable by any entity that is not a Contributor or Recipient. No third-party beneficiary rights are created under this Agreement.

#### Exhibit A - Form of Secondary Licenses Notice

"This Source Code may also be made available under the following Secondary Licenses when the conditions for such availability set forth in the Eclipse Public License, v. 2.0 are satisfied: {name license(s), version(s), and exceptions or additional permissions here}."

Simply including a copy of this Agreement, including this Exhibit A is not sufficient to license the Source Code under Secondary Licenses.

If it is not possible or desirable to put the notice in a particular file, then You may include the notice in a location (such as a LICENSE file in a relevant directory) where a recipient would be likely to look for such a notice.

You may add additional accurate notices of copyright ownership.

---

## The GNU General Public License (GPL) Version 2, June 1991

Copyright (C) 1989, 1991 Free Software Foundation, Inc.  
51 Franklin Street, Fifth Floor  
Boston, MA 02110-1335  
USA

Everyone is permitted to copy and distribute verbatim copies of this license document, but changing it is not allowed.

#### Preamble

The licenses for most software are designed to take away your freedom to share and change it. By contrast, the GNU General Public License is intended to guarantee your freedom to share and change free software--to

make sure the software is free for all its users. This General Public License applies to most of the Free Software Foundation's software and to any other program whose authors commit to using it. (Some other Free Software Foundation software is covered by the GNU Library General Public License instead.) You can apply it to your programs, too.

When we speak of free software, we are referring to freedom, not price. Our General Public Licenses are designed to make sure that you have the freedom to distribute copies of free software (and charge for this service if you wish), that you receive source code or can get it if you want it, that you can change the software or use pieces of it in new free programs; and that you know you can do these things.

To protect your rights, we need to make restrictions that forbid anyone to deny you these rights or to ask you to surrender the rights. These restrictions translate to certain responsibilities for you if you distribute copies of the software, or if you modify it.

For example, if you distribute copies of such a program, whether gratis or for a fee, you must give the recipients all the rights that you have. You must make sure that they, too, receive or can get the source code. And you must show them these terms so they know their rights.

We protect your rights with two steps: (1) copyright the software, and (2) offer you this license which gives you legal permission to copy, distribute and/or modify the software.

Also, for each author's protection and ours, we want to make certain that everyone understands that there is no warranty for this free software. If the software is modified by someone else and passed on, we want its recipients to know that what they have is not the original, so that any problems introduced by others will not reflect on the original authors' reputations.

Finally, any free program is threatened constantly by software patents. We wish to avoid the danger that redistributors of a free program will individually obtain patent licenses, in effect making the program proprietary. To prevent this, we have made it clear that any patent must be licensed for everyone's free use or not licensed at all.

The precise terms and conditions for copying, distribution and modification follow.

## TERMS AND CONDITIONS FOR COPYING, DISTRIBUTION AND MODIFICATION

0. This License applies to any program or other work which contains a notice placed by the copyright holder saying it may be distributed under the terms of this General Public License. The "Program", below, refers

to any such program or work, and a "work based on the Program" means either the Program or any derivative work under copyright law: that is to say, a work containing the Program or a portion of it, either verbatim or with modifications and/or translated into another language. (Hereinafter, translation is included without limitation in the term "modification".) Each licensee is addressed as "you".

Activities other than copying, distribution and modification are not covered by this License; they are outside its scope. The act of running the Program is not restricted, and the output from the Program is covered only if its contents constitute a work based on the Program (independent of having been made by running the Program). Whether that is true depends on what the Program does.

1. You may copy and distribute verbatim copies of the Program's source code as you receive it, in any medium, provided that you conspicuously and appropriately publish on each copy an appropriate copyright notice and disclaimer of warranty; keep intact all the notices that refer to this License and to the absence of any warranty; and give any other recipients of the Program a copy of this License along with the Program.

You may charge a fee for the physical act of transferring a copy, and you may at your option offer warranty protection in exchange for a fee.

2. You may modify your copy or copies of the Program or any portion of it, thus forming a work based on the Program, and copy and distribute such modifications or work under the terms of Section 1 above, provided that you also meet all of these conditions:

a) You must cause the modified files to carry prominent notices stating that you changed the files and the date of any change.

b) You must cause any work that you distribute or publish, that in whole or in part contains or is derived from the Program or any part thereof, to be licensed as a whole at no charge to all third parties under the terms of this License.

c) If the modified program normally reads commands interactively when run, you must cause it, when started running for such interactive use in the most ordinary way, to print or display an announcement including an appropriate copyright notice and a notice that there is no warranty (or else, saying that you provide a warranty) and that users may redistribute the program under these conditions, and telling the user how to view a copy of this License. (Exception: if the Program itself is interactive but does not normally print such an announcement, your work based on the Program is not required to print an announcement.)

These requirements apply to the modified work as a whole. If identifiable sections of that work are not derived from the Program, and can be reasonably considered independent and separate works in themselves, then this License, and its terms, do not apply to those sections when you distribute them as separate works. But when you distribute the same sections as part of a whole which is a work based on the Program, the distribution of the whole must be on the terms of this License, whose permissions for other licensees extend to the entire whole, and thus to each and every part regardless of who wrote it.

Thus, it is not the intent of this section to claim rights or contest your rights to work written entirely by you; rather, the intent is to exercise the right to control the distribution of derivative or collective works based on the Program.

In addition, mere aggregation of another work not based on the Program with the Program (or with a work based on the Program) on a volume of a storage or distribution medium does not bring the other work under the scope of this License.

3. You may copy and distribute the Program (or a work based on it, under Section 2) in object code or executable form under the terms of Sections 1 and 2 above provided that you also do one of the following:

a) Accompany it with the complete corresponding machine-readable source code, which must be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

b) Accompany it with a written offer, valid for at least three years, to give any third party, for a charge no more than your cost of physically performing source distribution, a complete machine-readable copy of the corresponding source code, to be distributed under the terms of Sections 1 and 2 above on a medium customarily used for software interchange; or,

c) Accompany it with the information you received as to the offer to distribute corresponding source code. (This alternative is allowed only for noncommercial distribution and only if you received the program in object code or executable form with such an offer, in accord with Subsection b above.)

The source code for a work means the preferred form of the work for making modifications to it. For an executable work, complete source code means all the source code for all modules it contains, plus any associated interface definition files, plus the scripts used to control compilation and installation of the executable. However, as a special exception, the source code distributed need not include anything that is normally distributed (in either source or binary form) with the major

components (compiler, kernel, and so on) of the operating system on which the executable runs, unless that component itself accompanies the executable.

If distribution of executable or object code is made by offering access to copy from a designated place, then offering equivalent access to copy the source code from the same place counts as distribution of the source code, even though third parties are not compelled to copy the source along with the object code.

4. You may not copy, modify, sublicense, or distribute the Program except as expressly provided under this License. Any attempt otherwise to copy, modify, sublicense or distribute the Program is void, and will automatically terminate your rights under this License. However, parties who have received copies, or rights, from you under this License will not have their licenses terminated so long as such parties remain in full compliance.

5. You are not required to accept this License, since you have not signed it. However, nothing else grants you permission to modify or distribute the Program or its derivative works. These actions are prohibited by law if you do not accept this License. Therefore, by modifying or distributing the Program (or any work based on the Program), you indicate your acceptance of this License to do so, and all its terms and conditions for copying, distributing or modifying the Program or works based on it.

6. Each time you redistribute the Program (or any work based on the Program), the recipient automatically receives a license from the original licensor to copy, distribute or modify the Program subject to these terms and conditions. You may not impose any further restrictions on the recipients' exercise of the rights granted herein. You are not responsible for enforcing compliance by third parties to this License.

7. If, as a consequence of a court judgment or allegation of patent infringement or for any other reason (not limited to patent issues), conditions are imposed on you (whether by court order, agreement or otherwise) that contradict the conditions of this License, they do not excuse you from the conditions of this License. If you cannot distribute so as to satisfy simultaneously your obligations under this License and any other pertinent obligations, then as a consequence you may not distribute the Program at all. For example, if a patent license would not permit royalty-free redistribution of the Program by all those who receive copies directly or indirectly through you, then the only way you could satisfy both it and this License would be to refrain entirely from distribution of the Program.

If any portion of this section is held invalid or unenforceable under

any particular circumstance, the balance of the section is intended to apply and the section as a whole is intended to apply in other circumstances.

It is not the purpose of this section to induce you to infringe any patents or other property right claims or to contest validity of any such claims; this section has the sole purpose of protecting the integrity of the free software distribution system, which is implemented by public license practices. Many people have made generous contributions to the wide range of software distributed through that system in reliance on consistent application of that system; it is up to the author/donor to decide if he or she is willing to distribute software through any other system and a licensee cannot impose that choice.

This section is intended to make thoroughly clear what is believed to be a consequence of the rest of this License.

8. If the distribution and/or use of the Program is restricted in certain countries either by patents or by copyrighted interfaces, the original copyright holder who places the Program under this License may add an explicit geographical distribution limitation excluding those countries, so that distribution is permitted only in or among countries not thus excluded. In such case, this License incorporates the limitation as if written in the body of this License.

9. The Free Software Foundation may publish revised and/or new versions of the General Public License from time to time. Such new versions will be similar in spirit to the present version, but may differ in detail to address new problems or concerns.

Each version is given a distinguishing version number. If the Program specifies a version number of this License which applies to it and "any later version", you have the option of following the terms and conditions either of that version or of any later version published by the Free Software Foundation. If the Program does not specify a version number of this License, you may choose any version ever published by the Free Software Foundation.

10. If you wish to incorporate parts of the Program into other free programs whose distribution conditions are different, write to the author to ask for permission. For software which is copyrighted by the Free Software Foundation, write to the Free Software Foundation; we sometimes make exceptions for this. Our decision will be guided by the two goals of preserving the free status of all derivatives of our free software and of promoting the sharing and reuse of software generally.

NO WARRANTY

11. BECAUSE THE PROGRAM IS LICENSED FREE OF CHARGE, THERE IS NO WARRANTY FOR THE PROGRAM, TO THE EXTENT PERMITTED BY APPLICABLE LAW. EXCEPT WHEN OTHERWISE STATED IN WRITING THE COPYRIGHT HOLDERS AND/OR OTHER PARTIES PROVIDE THE PROGRAM "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESSED OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE. THE ENTIRE RISK AS TO THE QUALITY AND PERFORMANCE OF THE PROGRAM IS WITH YOU. SHOULD THE PROGRAM PROVE DEFECTIVE, YOU ASSUME THE COST OF ALL NECESSARY SERVICING, REPAIR OR CORRECTION.

12. IN NO EVENT UNLESS REQUIRED BY APPLICABLE LAW OR AGREED TO IN WRITING WILL ANY COPYRIGHT HOLDER, OR ANY OTHER PARTY WHO MAY MODIFY AND/OR REDISTRIBUTE THE PROGRAM AS PERMITTED ABOVE, BE LIABLE TO YOU FOR DAMAGES, INCLUDING ANY GENERAL, SPECIAL, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE THE PROGRAM (INCLUDING BUT NOT LIMITED TO LOSS OF DATA OR DATA BEING RENDERED INACCURATE OR LOSSES SUSTAINED BY YOU OR THIRD PARTIES OR A FAILURE OF THE PROGRAM TO OPERATE WITH ANY OTHER PROGRAMS), EVEN IF SUCH HOLDER OR OTHER PARTY HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

END OF TERMS AND CONDITIONS

How to Apply These Terms to Your New Programs

If you develop a new program, and you want it to be of the greatest possible use to the public, the best way to achieve this is to make it free software which everyone can redistribute and change under these terms.

To do so, attach the following notices to the program. It is safest to attach them to the start of each source file to most effectively convey the exclusion of warranty; and each file should have at least the "copyright" line and a pointer to where the full notice is found.

One line to give the program's name and a brief idea of what it does.  
Copyright (C) <year> <name of author>

This program is free software; you can redistribute it and/or modify it under the terms of the GNU General Public License as published by the Free Software Foundation; either version 2 of the License, or (at your option) any later version.

This program is distributed in the hope that it will be useful, but WITHOUT ANY WARRANTY; without even the implied warranty of MERCHANTABILITY or FITNESS FOR A PARTICULAR PURPOSE. See the GNU General Public License for more details.

You should have received a copy of the GNU General Public License along with this program; if not, write to the Free Software

Foundation, Inc., 51 Franklin Street, Fifth Floor, Boston, MA 02110-1335 USA

Also add information on how to contact you by electronic and paper mail.

If the program is interactive, make it output a short notice like this when it starts in an interactive mode:

```
Gnomovision version 69, Copyright (C) year name of author
Gnomovision comes with ABSOLUTELY NO WARRANTY; for details type
`show w'. This is free software, and you are welcome to redistribute
it under certain conditions; type `show c' for details.
```

The hypothetical commands ``show w'` and ``show c'` should show the appropriate parts of the General Public License. Of course, the commands you use may be called something other than ``show w'` and ``show c'`; they could even be mouse-clicks or menu items--whatever suits your program.

You should also get your employer (if you work as a programmer) or your school, if any, to sign a "copyright disclaimer" for the program, if necessary. Here is a sample; alter the names:

```
Yoyodyne, Inc., hereby disclaims all copyright interest in the
program `Gnomovision' (which makes passes at compilers) written by
James Hacker.
```

```
signature of Ty Coon, 1 April 1989
Ty Coon, President of Vice
```

This General Public License does not permit incorporating your program into proprietary programs. If your program is a subroutine library, you may consider it more useful to permit linking proprietary applications with the library. If this is what you want to do, use the GNU Library General Public License instead of this License.

---

#### ## CLASSPATH EXCEPTION

Linking this library statically or dynamically with other modules is making a combined work based on this library. Thus, the terms and conditions of the GNU General Public License version 2 cover the whole combination.

As a special exception, the copyright holders of this library give you permission to link this library with independent modules to produce an executable, regardless of the license terms of these independent modules, and to copy and distribute the resulting executable under terms of your choice, provided that you also meet, for each linked

independent module, the terms and conditions of the license of that module. An independent module is a module which is not derived from or based on this library. If you modify this library, you may extend this exception to your version of the library, but you are not obligated to do so. If you do not wish to do so, delete this exception statement from your version.

## 1.190.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes

of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You

meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor,

except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

# 1.192 hdrhistogram 2.1.12

## 1.192.1 Available under license :

No license file was found, but licenses were detected in source scan.

Manifest-Version: 1.0

Bnd-LastModified: 1575980548657

Build-Jdk: 1.8.0\_232

Built-By: gil

Bundle-Description: HdrHistogram supports the recording and analyzing sampled data value counts across a configurable integer value range with configurable value precision within the range. Value precision is expressed as the number of significant digits in the value recording, and provides control over value quantization behavior across the value range and the subsequent value resolution at any given level.

- 10. Changes from CQL binary protocol v5

## 1. Overview

The CQL binary protocol is a frame based protocol. Frames are defined as:

The protocol is big-endian (network byte order).

Each frame contains a fixed size header (9 bytes) followed by a variable size body. The header is described in Section 2. The content of the body depends on the header opcode value (the body can in particular be empty for some opcode values). The list of allowed opcodes is defined in Section 2.4 and the details of each corresponding message are described Section 4.

The protocol distinguishes two types of frames: requests and responses. Requests are those frames sent by the client to the server. Responses are those frames sent by the server to the client. Note, however, that the protocol supports server pushes (events) so a response does not necessarily come right after a client request.

Note to client implementors: client libraries should always assume that the body of a given frame may contain more data than what is described in this document. It will however always be safe to ignore the remainder of the frame body in such cases. The reason is that this may enable extending the protocol with optional features without needing to change the protocol version.

## 2. Frame header

## 2.1. version

The version is a single byte that indicates both the direction of the message (request or response) and the version of the protocol in use. The most significant bit of version is used to define the direction of the message: 0 indicates a request, 1 indicates a response. This can be useful for protocol analyzers to distinguish the nature of the packet from the direction in which it is moving.

The next most significant bit must be set to one to indicate that this is a dse private version and not a public open source version.

The rest of that byte is the dse protocol version (1 for the protocol defined in this document). In other words, for this version of the protocol, version will be one of:

- 0x41 (0100 0001) Request frame for this dse protocol version
- 0xC1 (1100 0001) Response frame for this dse protocol version

Please note that while every message ships with the version, only one version of messages is accepted on a given connection. In other words, the first message exchanged (STARTUP) sets the version for the connection for the lifetime of this connection. The single exception to this behavior is when a startup message is sent with a version that is higher than the current server version. In this case, the server will respond with its current version.

This document describes version 1 of the dse protocol. For the changes made since version 5 of the public protocol, see Section 10.

## 2.2. flags

Flags applying to this frame. The flags have the following meaning (described by the mask that allows selecting them):

- 0x01: Compression flag. If set, the frame body is compressed. The actual compression to use should have been set up beforehand through the Startup message (which thus cannot be compressed; Section 4.1.1).
- 0x02: Tracing flag. For a request frame, this indicates the client requires tracing of the request. Note that only QUERY, PREPARE and EXECUTE queries support tracing. Other requests will simply ignore the tracing flag if set. If a request supports tracing and the tracing flag is set, the response to this request will have the tracing flag set and contain tracing information.  
If a response frame has the tracing flag set, its body contains a tracing ID. The tracing ID is a [uuid] and is the first thing in the frame body. The rest of the body will then be the usual body corresponding to the response opcode.
- 0x04: Custom payload flag. For a request or response frame, this indicates

that a generic key-value custom payload for a custom QueryHandler implementation is present in the frame. Such a custom payload is simply ignored by the default QueryHandler implementation.

Currently, only QUERY, PREPARE, EXECUTE and BATCH requests support payload.

Type of custom payload is [bytes map] (see below).

0x08: Warning flag. The response contains warnings which were generated by the server to go along with this response.

If a response frame has the warning flag set, its body will contain the text of the warnings. The warnings are a [string list] and will be the first value in the frame body if the tracing flag is not set, or directly after the tracing ID if it is.

0x10: Use beta flag. Indicates that the client opts in to use protocol version that is currently in beta. Server will respond with ERROR if protocol version is marked as beta on server and client does not provide this flag.

The rest of flags is currently unused and ignored.

### 2.3. stream

A frame has a stream id (a [short] value). When sending request messages, this stream id must be set by the client to a non-negative value (negative stream id are reserved for streams initiated by the server; currently all EVENT messages (section 4.2.6) have a streamId of -1). If a client sends a request message with the stream id X, it is guaranteed that the stream id of the response to that message will be X.

This helps to enable the asynchronous nature of the protocol. If a client sends multiple messages simultaneously (without waiting for responses), there is no guarantee on the order of the responses. For instance, if the client writes REQ\_1, REQ\_2, REQ\_3 on the wire (in that order), the server might respond to REQ\_3 (or REQ\_2) first. Assigning different stream ids to these 3 requests allows the client to distinguish to which request a received answer responds to. As there can only be 32768 different simultaneous streams, it is up to the client to reuse stream id.

Note that clients are free to use the protocol synchronously (i.e. wait for the response to REQ\_N before sending REQ\_N+1). In that case, the stream id can be safely set to 0. Clients should also feel free to use only a subset of the 32768 maximum possible stream ids if it is simpler for its implementation.

### 2.4. opcode

An integer byte that distinguishes the actual message:

0x00 ERROR  
0x01 STARTUP  
0x02 READY  
0x03 AUTHENTICATE

0x05 OPTIONS  
0x06 SUPPORTED  
0x07 QUERY  
0x08 RESULT  
0x09 PREPARE  
0x0A EXECUTE  
0x0B REGISTER  
0x0C EVENT  
0x0D BATCH  
0x0E AUTH\_CHALLENGE  
0x0F AUTH\_RESPONSE  
0x10 AUTH\_SUCCESS  
0xFF CANCEL

Messages are described in Section 4.

(Note that there is no 0x04 message in this version of the protocol)

## 2.5. length

A 4 byte integer representing the length of the body of the frame (note: currently a frame is limited to 256MB in length).

## 3. Notations

To describe the layout of the frame body for the messages in Section 4, we define the following:

[int] A 4 bytes integer  
[long] A 8 bytes integer  
[byte] A 1 byte unsigned integer  
[short] A 2 bytes unsigned integer  
[string] A [short] n, followed by n bytes representing an UTF-8 string.  
[long string] An [int] n, followed by n bytes representing an UTF-8 string.  
[uuid] A 16 bytes long uuid.  
[string list] A [short] n, followed by n [string].  
[bytes] A [int] n, followed by n bytes if  $n \geq 0$ . If  $n < 0$ , no byte should follow and the value represented is `null`.  
[value] A [int] n, followed by n bytes if  $n \geq 0$ .  
If  $n == -1$  no byte should follow and the value represented is `null`.  
If  $n == -2$  no byte should follow and the value represented is `not set` not resulting in any change to the existing value.  
 $n < -2$  is an invalid value and results in an error.  
[short bytes] A [short] n, followed by n bytes if  $n \geq 0$ .

[unsigned vint] An unsigned variable length integer. A vint is encoded with the most significant byte (MSB) first. The most significant byte will contain the information about how many extra bytes need to be read as well as the most significant bits of the integer. The number of extra bytes to read is encoded as 1 bits on the left side. For example, if we need to read 2 more bytes the first byte will start with 110 (e.g. 256 000 will be encoded on 3 bytes as [110]00011 11101000 00000000) If the encoded integer is 8 bytes long the vint will be encoded on 9 bytes and the first byte will be: 11111111

[vint] A signed variable length integer. This is encoded using zig-zag encoding and then sent like an [unsigned vint]. Zig-zag encoding converts numbers as follows:  
0 = 0, -1 = 1, 1 = 2, -2 = 3, 2 = 4, -3 = 5, 3 = 6 and so forth.  
The purpose is to send small negative values as small unsigned values, so that we save bytes on the wire.

To encode a value  $n$  use  $(n \gg 31) \wedge (n \ll 1)$  for 32 bit values, and  $(n \gg 63) \wedge (n \ll 1)$  for 64 bit values where  $\wedge$  is the xor operation,  $\ll$  is the left shift operation and  $\gg$  is the arithmetic right shift operation (highest-order bit is replicated).  
Decode with  $(n \gg 1) \wedge \neg(n \& 1)$ .

[option] A pair of <id><value> where <id> is a [short] representing the option id and <value> depends on that option (and can be of size 0). The supported id (and the corresponding <value>) will be described when this is used.

[option list] A [short]  $n$ , followed by  $n$  [option].

[inet] An address (ip and port) to a node. It consists of one [byte]  $n$ , that represents the address size, followed by  $n$  [byte] representing the IP address (in practice  $n$  can only be either 4 (IPv4) or 16 (IPv6)), following by one [int] representing the port.

[inetaddr] An IP address (without a port) to a node. It consists of one [byte]  $n$ , that represents the address size, followed by  $n$  [byte] representing the IP address.

[consistency] A consistency level specification. This is a [short] representing a consistency level with the following correspondance:

0x0000	ANY
0x0001	ONE
0x0002	TWO
0x0003	THREE
0x0004	QUORUM
0x0005	ALL
0x0006	LOCAL_QUORUM
0x0007	EACH_QUORUM
0x0008	SERIAL
0x0009	LOCAL_SERIAL
0x000A	LOCAL_ONE

[string map] A [short]  $n$ , followed by  $n$  pair <k><v> where <k> and <v>

are [string].

[string multimap] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [string list].

[bytes map] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [bytes].

## 4. Messages

### 4.1. Requests

Note that outside of their normal responses (described below), all requests can get an ERROR message (Section 4.2.1) as response.

#### 4.1.1. STARTUP

Initialize the connection. The server will respond by either a READY message (in which case the connection is ready for queries) or an AUTHENTICATE message (in which case credentials will need to be provided using AUTH\_RESPONSE).

This must be the first message of the connection, except for OPTIONS that can be sent before to find out the options supported by the server. Once the connection has been initialized, a client should not send any more STARTUP messages.

The body is a [string map] of options. Possible options are:

- "CQL\_VERSION": the version of CQL to use. This option is mandatory and currently the only version supported is "3.0.0". Note that this is different from the protocol version.
- "COMPRESSION": the compression algorithm to use for frames (See section 5). This is optional; if not specified no compression will be used.

#### 4.1.2. AUTH\_RESPONSE

Answers a server authentication challenge.

Authentication in the protocol is SASL based. The server sends authentication challenges (a bytes token) to which the client answers with this message. Those exchanges continue until the server accepts the authentication by sending a AUTH\_SUCCESS message after a client AUTH\_RESPONSE. Note that the exchange begins with the client sending an initial AUTH\_RESPONSE in response to a server AUTHENTICATE request.

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

The response to a AUTH\_RESPONSE is either a follow-up AUTH\_CHALLENGE message, an AUTH\_SUCCESS message or an ERROR message.

#### 4.1.3. OPTIONS

Asks the server to return which STARTUP options are supported. The body of an OPTIONS message should be empty and the server will respond with a SUPPORTED message.

#### 4.1.4. QUERY

Performs a CQL query. The body of the message must be:

<query><query\_parameters>

where <query> is a [long string] representing the query and

<query\_parameters> must be

<consistency><flags>[<n>[name\_1]<value\_1>...[name\_n]<value\_n>][<result\_page\_size>][<paging\_state>]  
[<serial\_consistency>][<timestamp>][<continuous\_paging\_options>]

where:

- <consistency> is the [consistency] level for the operation.
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x00000001: Values. If set, a [short] <n> followed by <n> [value] values are provided. Those values are used for bound variables in the query. Optionally, if the 0x40 flag is present, each value will be preceded by a [string] name, representing the name of the marker the value must be bound to.

0x00000002: Skip\_metadata. If set, the Result Set returned as a response to the query (if any) will have the NO\_METADATA flag (see Section 4.2.5.2).

0x00000004: Page\_size. If set, <result\_page\_size> is a positive [int] controlling the desired page size of the result in CQL3 rows or in bytes, if Page\_size\_bytes is set.

See the section on paging (Section 8) for more details.

0x00000008: With\_paging\_state. If set, <paging\_state> should be present. <paging\_state> is a [bytes] value that should have been returned in a result set (Section 4.2.5.2). The query will be executed but starting from a given paging state. An error will be returned if the paging\_state is present but no page\_size has been specified. The paging state can also be used to continue paging on a different node than the one where it started (See Section 8 for more details).

0x00000010: With\_serial\_consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be

either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x00000020: With default timestamp. If set, <timestamp> should be present.

<timestamp> is a [long] representing the default timestamp for the query in microseconds (negative values are forbidden). This will replace the server side assigned timestamp as default timestamp.

Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x00000040: With names for values. This only makes sense if the 0x01 flag is set and

is ignored otherwise. If present, the values from the 0x01 flag will

be preceded by a name (see above). Note that this is only useful for

QUERY requests where named bind markers are used; for EXECUTE statements,

since the names for the expected values was returned during preparation,

a client can always provide values in the right order without any names

and using this flag, while supported, is almost surely inefficient.

0x40000000: Page\_size\_bytes. If set, <result\_page\_size> is expressed in bytes. The server

will try to return a number of CQL rows whose total size is as close as possible

to the requested page size, without splitting any CQL row however. This functionality

is currently only supported with continuous paging, setting this flag without

setting the continuous paging flag, will result in an error.

0x80000000: With continuous paging. If set, <continuous\_paging\_options> should be present.

This structure contains the following:

- <max\_num\_pages>, an [int] indicating the maximum number of pages that the server will send to the client in total, set this to zero to indicate no limit.

- <pages\_per\_second>, an [int] indicating the maximum number of pages per second, set this to zero to indicate no limit.

When continuous paging is enabled, the query results will be pushed to the client asynchronously and according to the paging options in the request message, without the client having to request each single page. Each response message will have the same stream id as the initial request.

Continuous paging can be interrupted by the client at any time via a CANCEL request, see section 4.1.9.

Note that the consistency is ignored by some queries (USE, CREATE, ALTER, TRUNCATE, ...).

The server will respond to a QUERY message with a RESULT message, the content of which depends on the query.

#### 4.1.5. PREPARE

Prepare a query for later execution (through EXECUTE). The body consists of the CQL query to prepare as a [long string].

The server will respond with a RESULT message with a `prepared` kind (0x0004, see Section 4.2.5).

#### 4.1.6. EXECUTE

Executes a prepared query. The body of the message must be:

<id><query\_parameters>

where <id> is the prepared query ID. It's the [short bytes] returned as a response to a PREPARE message. As for <query\_parameters>, it has the exact same definition as in QUERY (see Section 4.1.4).

The response from the server will be a RESULT message.

#### 4.1.7. BATCH

Allows executing a list of queries (prepared or not) as a batch (note that only DML statements are accepted in a batch). The body of the message must be:

<type><n><query\_1>...<query\_n><consistency><flags>[<serial\_consistency>][<timestamp>]

where:

- <type> is a [byte] indicating the type of batch to use:
  - If <type> == 0, the batch will be "logged". This is equivalent to a normal CQL3 batch statement.
  - If <type> == 1, the batch will be "unlogged".
  - If <type> == 2, the batch will be a "counter" batch (and non-counter statements will be rejected).
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. It is similar to the <flags> from QUERY and EXECUTE methods, except that the 4 rightmost bits must always be 0 as their corresponding options do not make sense for Batch. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x10: With serial consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x20: With default timestamp. If set, <timestamp> should be present. <timestamp> is a [long] representing the default timestamp for the query in microseconds. This will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x40: With names for values. If set, then all values for all <query\_i> must be preceded by a [string] <name\_i> that have the same meaning as in QUERY requests [IMPORTANT NOTE: this feature does not work and should not be used. It is specified in a way that makes it impossible for the server to implement. This will be fixed in a future version of the native protocol. See <https://issues.apache.org/jira/browse/CASSANDRA-10246> for more details].

- <n> is a [short] indicating the number of following queries.
- <query\_1>...<query\_n> are the queries to execute. A <query\_i> must be of the form:
  - <kind><string\_or\_id><n>[<name\_1><value\_1>...<name\_n><value\_n>
- where:
  - <kind> is a [byte] indicating whether the following query is a prepared one or not. <kind> value must be either 0 or 1.
  - <string\_or\_id> depends on the value of <kind>. If <kind> == 0, it should be a [long string] query string (as in QUERY, the query string might contain bind markers). Otherwise (that is, if <kind> == 1), it should be a [short bytes] representing a prepared query ID.
  - <n> is a [short] indicating the number (possibly 0) of following values.
  - <name\_i> is the optional name of the following <value\_i>. It must be present if and only if the 0x40 flag is provided for the batch.
  - <value\_i> is the [value] to use for bound variable i (of bound variable <name\_i> if the 0x40 flag is used).
  - <consistency> is the [consistency] level for the operation.
  - <serial\_consistency> is only present if the 0x10 flag is set. In that case, <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present will default to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

The server will respond with a RESULT message.

#### 4.1.8. REGISTER

Register this connection to receive some types of events. The body of the message is a [string list] representing the event types to register for. See section 4.2.6 for the list of valid event types.

The response to a REGISTER message will be a READY message.

Please note that if a client driver maintains multiple connections to a Cassandra node and/or connections to multiple nodes, it is advised to dedicate a handful of connections to receive events, but to *\*not\** register for events on all connections, as this would only result in receiving multiple times the same event messages, wasting bandwidth.

#### 4.1.9. CANCEL

Request to cancel an asynchronous operation. The body of the message is:

- an [int] identifying the operation type:
  - 0x00000001 for "continuous paging", see section 4.1.4
- an [int] equal to the stream id of the initial request message.

The server will reply with a RESULT of type ROWS (section 4.2.5.2),

containing a single row with a single boolean value, which is set to:

- true if the operation was cancelled,
- false if the operation was not found.

If an operation is found but cannot be cancelled, an error is returned instead.

## 4.2. Responses

This section describes the content of the frame body for the different responses. Please note that to make room for future evolution, clients should support extra informations (that they should simply discard) to the one described in this document at the end of the frame body.

### 4.2.1. ERROR

Indicates an error processing a request. The body of the message will be an error code ([int]) followed by a [string] error message. Then, depending on the exception, more content may follow. The error codes are defined in Section 9, along with their additional content if any.

### 4.2.2. READY

Indicates that the server is ready to process queries. This message will be sent by the server either after a STARTUP message if no authentication is required (if authentication is required, the server indicates readiness by sending a AUTH\_RESPONSE message).

The body of a READY message is empty.

### 4.2.3. AUTHENTICATE

Indicates that the server requires authentication, and which authentication mechanism to use.

The authentication is SASL based and thus consists of a number of server challenges (AUTH\_CHALLENGE, Section 4.2.7) followed by client responses (AUTH\_RESPONSE, Section 4.1.2). The initial exchange is however bootstrapped by an initial client response. The details of that exchange (including how many challenge-response pairs are required) are specific to the authenticator in use. The exchange ends when the server sends an AUTH\_SUCCESS message or an ERROR message.

This message will be sent following a STARTUP message if authentication is required and must be answered by a AUTH\_RESPONSE message from the client.

The body consists of a single [string] indicating the full class name of the

IAuthenticator in use.

#### 4.2.4. SUPPORTED

Indicates which startup options are supported by the server. This message comes as a response to an OPTIONS message.

The body of a SUPPORTED message is a [string multimap]. This multimap gives for each of the supported STARTUP options, the list of supported values. It also includes:

- "PROTOCOL\_VERSIONS": the list of native protocol versions that are supported, encoded as the version number followed by a slash and the version description. For example: 3/v3, 4/v4, 5/v5-beta. If a version is in beta, it will have the word "beta" in its description.

#### 4.2.5. RESULT

The result to a query (QUERY, PREPARE, EXECUTE or BATCH messages).

The first element of the body of a RESULT message is an [int] representing the `kind` of result. The rest of the body depends on the kind. The kind can be one of:

- 0x0001 Void: for results carrying no information.
- 0x0002 Rows: for results to select queries, returning a set of rows.
- 0x0003 Set\_keyspace: the result to a `use` query.
- 0x0004 Prepared: result to a PREPARE message.
- 0x0005 Schema\_change: the result to a schema altering query.

The body for each kind (after the [int] kind) is defined below.

##### 4.2.5.1. Void

The rest of the body for a Void result is empty. It indicates that a query was successful without providing more information.

##### 4.2.5.2. Rows

Indicates a set of rows. The rest of the body of a Rows result is:

<metadata><rows\_count><rows\_content>

where:

- <metadata> is composed of:

<flags><columns\_count>[<paging\_state>][<continuous\_page\_no>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x00000001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.

0x00000002 Has\_more\_pages: indicates whether this is not the last page of results and more should be retrieved. If set, the <paging\_state> will be present. The <paging\_state> is a [bytes] value that should be used in QUERY/EXECUTE to continue paging and retrieve the remainder of the result for this query (See Section 8 for more details).

0x00000004 No\_metadata: if set, the <metadata> is only composed of these <flags>, the <column\_count> and optionally the <paging\_state> and <continuous\_page\_no> (depending on the corresponding flags) but no other information (so no <global\_table\_spec> nor <col\_spec\_i>).

This will only ever be the case if this was requested during the query (see QUERY and RESULT messages).

0x40000000 continuous paging: if set, this page is part of a continuous paging session, as requested by the client. <continuous\_page\_no> will be present, this is an [int] that identifies the sequential number of this page in the session, and the last\_continuous\_page flag below will be set for the final page.

0x80000000 Last\_continuous\_page: indicates that this is the last continuous page that will be sent in the continuous paging session. This flag can only be set when the continuous paging flag is also set. Note that this may not necessarily be the last page of the query results, for this it is necessary to look at Has\_more\_pages (this could happen if the client only requested the first N pages in the continuous paging session, or if it sent a CANCEL message).

- <columns\_count> is an [int] representing the number of columns selected by the query that produced this result. It defines the number of <col\_spec\_i> elements in and the number of elements for each row in <rows\_content>.

- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. It is composed of two [string] representing the (unique) keyspace name and table name the columns belong to.

- <col\_spec\_i> specifies the columns returned in the query. There are <column\_count> such column specifications that are composed of:

(<ksname><tablename>)?<name><type>

The initial <ksname> and <tablename> are two [string] and are only present if the Global\_tables\_spec flag is not set. The <column\_name> is a [string] and <type> is an [option] that corresponds to the description (what this description is depends a bit on the context: in results to selects, this will be either the user chosen alias or the selection used (often a column name, but it can be a function call too). In results to a PREPARE, this will be either the name of the corresponding bind variable

or the column name for the variable if it is "anonymous") and type of the corresponding result. The option for <type> is either a native type (see below), in which case the option has no value, or a 'custom' type, in which case the value is a [string] representing the fully qualified class name of the type represented. Valid option ids are:

- 0x0000 Custom: the value is a [string], see above.
- 0x0001 Ascii
- 0x0002 Bigint
- 0x0003 Blob
- 0x0004 Boolean
- 0x0005 Counter
- 0x0006 Decimal
- 0x0007 Double
- 0x0008 Float
- 0x0009 Int
- 0x000B Timestamp
- 0x000C Uuid
- 0x000D Varchar
- 0x000E Varint
- 0x000F Timeuuid
- 0x0010 Inet
- 0x0011 Date
- 0x0012 Time
- 0x0013 Smallint
- 0x0014 Tinyint
- 0x0015 Duration
- 0x0020 List: the value is an [option], representing the type of the elements of the list.
- 0x0021 Map: the value is two [option], representing the types of the keys and values of the map
- 0x0022 Set: the value is an [option], representing the type of the elements of the set
- 0x0030 UDT: the value is <ks><udt\_name><n><name\_1><type\_1>...<name\_n><type\_n> where:
  - <ks> is a [string] representing the keyspace name this UDT is part of.
  - <udt\_name> is a [string] representing the UDT name.
  - <n> is a [short] representing the number of fields of the UDT, and thus the number of <name\_i><type\_i> pairs following
  - <name\_i> is a [string] representing the name of the i\_th field of the UDT.
  - <type\_i> is an [option] representing the type of the i\_th field of the UDT.
- 0x0031 Tuple: the value is <n><type\_1>...<type\_n> where <n> is a [short] representing the number of values in the type, and <type\_i> are [option] representing the type of the i\_th component

of the tuple

- <rows\_count> is an [int] representing the number of rows present in this result. Those rows are serialized in the <rows\_content> part.
- <rows\_content> is composed of <row\_1>...<row\_m> where m is <rows\_count>. Each <row\_i> is composed of <value\_1>...<value\_n> where n is <columns\_count> and where <value\_j> is a [bytes] representing the value returned for the jth column of the ith row. In other words, <rows\_content> is composed of (<rows\_count> \* <columns\_count>) [bytes].

#### 4.2.5.3. Set\_keyspace

The result to a `use` query. The body (after the kind [int]) is a single [string] indicating the name of the keyspace that has been set.

#### 4.2.5.4. Prepared

The result to a PREPARE message. The body of a Prepared result is:

<id><metadata><result\_metadata>

where:

- <id> is [short bytes] representing the prepared query ID.
- <metadata> is composed of:

<flags><columns\_count><pk\_count>[<pk\_index\_1>...<pk\_index\_n>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported masks and their flags are:
  - 0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.
- <columns\_count> is an [int] representing the number of bind markers in the prepared statement. It defines the number of <col\_spec\_i> elements.
- <pk\_count> is an [int] representing the number of <pk\_index\_i> elements to follow. If this value is zero, at least one of the partition key columns in the table that the statement acts on did not have a corresponding bind marker (or the bind marker was wrapped in a function call).
- <pk\_index\_i> is a short that represents the index of the bind marker that corresponds to the partition key column in position i. For example, a <pk\_index> sequence of [2, 0, 1] indicates that the table has three partition key columns; the full partition key can be constructed by creating a composite of the values for the bind markers at index 2, at index 0, and at index 1.

This allows implementations with token-aware routing to correctly construct the partition key without needing to inspect table metadata.

- `<global_table_spec>` is present if the `Global_tables_spec` is set in `<flags>`. If present, it is composed of two `[string]`s. The first `[string]` is the name of the keyspace that the statement acts on. The second `[string]` is the name of the table that the columns represented by the bind markers belong to.
- `<col_spec_i>` specifies the bind markers in the prepared statement. There are `<column_count>` such column specifications, each with the following format:

`(<kname><tablename>)?<name><type>`

The initial `<kname>` and `<tablename>` are two `[string]` that are only present if the `Global_tables_spec` flag is not set. The `<name>` field is a `[string]` that holds the name of the bind marker (if named), or the name of the column, field, or expression that the bind marker corresponds to (if the bind marker is "anonymous"). The `<type>` field is an `[option]` that represents the expected type of values for the bind marker. See the Rows documentation (section 4.2.5.2) for full details on the `<type>` field.

- `<result_metadata>` is defined exactly the same as `<metadata>` in the Rows documentation (section 4.2.5.2). This describes the metadata for the result set that will be returned when this prepared statement is executed. Note that `<result_metadata>` may be empty (have the `No_metadata` flag and 0 columns, See section 4.2.5.2) and will be for any query that is not a `Select`. In fact, there is never a guarantee that this will be non-empty, so implementations should protect themselves accordingly. This result metadata is an optimization that allows implementations to later execute the prepared statement without requesting the metadata (see the `Skip_metadata` flag in `EXECUTE`). Clients can safely discard this metadata if they do not want to take advantage of that optimization.

Note that the prepared query ID returned is global to the node on which the query has been prepared. It can be used on any connection to that node until the node is restarted (after which the query must be reprepared).

#### 4.2.5.5. Schema\_change

The result to a schema altering query (creation/update/drop of a keyspace/table/index). The body (after the kind `[int]`) is the same as the body for a "SCHEMA\_CHANGE" event, so 3 strings:

`<change_type><target><options>`

Please refer to section 4.2.6 below for the meaning of those fields.

Note that a query to create or drop an index is considered to be a change to the table the index is on.

#### 4.2.6. EVENT

An event pushed by the server. A client will only receive events for the types it has REGISTERed to. The body of an EVENT message will start with a [string] representing the event type. The rest of the message depends on the event type. The valid event types are:

- "TOPOLOGY\_CHANGE": events related to change in the cluster topology. Currently, events are sent when new nodes are added to the cluster, and when nodes are removed. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of change ("NEW\_NODE" or "REMOVED\_NODE") followed by the address of the new/removed node.
- "STATUS\_CHANGE": events related to change of node status. Currently, up/down events are sent. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of status change ("UP" or "DOWN") followed by the address of the concerned node.
- "SCHEMA\_CHANGE": events related to schema change. After the event type, the rest of the message will be <change\_type><target><options> where:
  - <change\_type> is a [string] representing the type of changed involved. It will be one of "CREATED", "UPDATED" or "DROPPED".
  - <target> is a [string] that can be one of "KEYSPACE", "TABLE", "TYPE", "FUNCTION" or "AGGREGATE" and describes what has been modified ("TYPE" stands for modifications related to user types, "FUNCTION" for modifications related to user defined functions, "AGGREGATE" for modifications related to user defined aggregates).
  - <options> depends on the preceding <target>:
    - If <target> is "KEYSPACE", then <options> will be a single [string] representing the keyspace changed.
    - If <target> is "TABLE" or "TYPE", then <options> will be 2 [string]: the first one will be the keyspace containing the affected object, and the second one will be the name of said affected object (either the table, user type, function, or aggregate name).
    - If <target> is "FUNCTION" or "AGGREGATE", multiple arguments follow:
      - [string] keyspace containing the user defined function / aggregate
      - [string] the function/aggregate name
      - [string list] one string for each argument type (as CQL type)

All EVENT messages have a streamId of -1 (Section 2.3).

Please note that "NEW\_NODE" and "UP" events are sent based on internal Gossip communication and as such may be sent a short delay before the binary protocol server on the newly up node is fully started. Clients are thus advised to wait a short time before trying to connect to the node (1 second should be enough), otherwise they may experience a connection refusal at first.

#### 4.2.7. AUTH\_CHALLENGE

A server authentication challenge (see AUTH\_RESPONSE (Section 4.1.2) for more details).

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

Clients are expected to answer the server challenge with an AUTH\_RESPONSE message.

#### 4.2.8. AUTH\_SUCCESS

Indicates the success of the authentication phase. See Section 4.2.3 for more details.

The body of this message is a single [bytes] token holding final information from the server that the client may require to finish the authentication process. What that token contains and whether it can be null depends on the actual authenticator used.

### 5. Compression

Frame compression is supported by the protocol, but then only the frame body is compressed (the frame header should never be compressed).

Before being used, client and server must agree on a compression algorithm to use, which is done in the STARTUP message. As a consequence, a STARTUP message must never be compressed. However, once the STARTUP frame has been received by the server, messages can be compressed (including the response to the STARTUP request). Frames do not have to be compressed, however, even if compression has been agreed upon (a server may only compress frames above a certain size at its discretion). A frame body should be compressed if and only if the compressed flag (see Section 2.2) is set.

As of version 2 of the protocol, the following compressions are available:

- lz4 (<https://code.google.com/p/lz4/>). In that, note that the first four bytes of the body will be the uncompressed length (followed by the compressed bytes).
- snappy (<https://code.google.com/p/snappy/>). This compression might not be available as it depends on a native lib (server-side) that might not be available on some installations.

### 6. Data Type Serialization Formats

This sections describes the serialization formats for all CQL data types supported by Cassandra through the native protocol. These serialization formats should be used by client drivers to encode values for EXECUTE messages. Cassandra will use these formats when returning values in RESULT messages.

All values are represented as [bytes] in EXECUTE and RESULT messages. The [bytes] format includes an int prefix denoting the length of the value. For that reason, the serialization formats described here will not include a length component.

For legacy compatibility reasons, note that most non-string types support "empty" values (i.e. a value with zero length). An empty value is distinct from NULL, which is encoded with a negative length.

As with the rest of the native protocol, all encodings are big-endian.

#### 6.1. ascii

A sequence of bytes in the ASCII range [0, 127]. Bytes with values outside of this range will result in a validation error.

#### 6.2 bigint

An eight-byte two's complement integer.

#### 6.3 blob

Any sequence of bytes.

#### 6.4 boolean

A single byte. A value of 0 denotes "false"; any other value denotes "true". (However, it is recommended that a value of 1 be used to represent "true".)

#### 6.5 date

An unsigned integer representing days with epoch centered at  $2^{31}$ . (unix epoch January 1st, 1970).

A few examples:

0: -5877641-06-23

$2^{31}$ : 1970-1-1

$2^{32}$ : 5881580-07-11

#### 6.6 decimal

The decimal format represents an arbitrary-precision number. It contains an [int] "scale" component followed by a varint encoding (see section 6.17)

of the unscaled value. The encoded value represents "`<unscaled>E<-scale>`". In other words, "`<unscaled> * 10 ^ (-1 * <scale>)`".

#### 6.7 double

An 8 byte floating point number in the IEEE 754 binary64 format.

#### 6.8 duration

A duration is composed of 3 signed variable length integers ([vint]s). The first [vint] represents a number of months, the second [vint] represents a number of days, and the last [vint] represents a number of nanoseconds. The number of months and days must be valid 32 bits integers whereas the number of nanoseconds must be a valid 64 bits integer. A duration can either be positive or negative. If a duration is positive all the integers must be positive or zero. If a duration is negative all the numbers must be negative or zero.

#### 6.9 float

A 4 byte floating point number in the IEEE 754 binary32 format.

#### 6.10 inet

A 4 byte or 16 byte sequence denoting an IPv4 or IPv6 address, respectively.

#### 6.11 int

A 4 byte two's complement integer.

#### 6.12 list

A [int] n indicating the number of elements in the list, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.13 map

A [int] n indicating the number of key/value pairs in the map, followed by n entries. Each entry is composed of two [bytes] representing the key and value.

#### 6.14 set

A [int] n indicating the number of elements in the set, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.15 smallint

A 2 byte two's complement integer.

#### 6.16 text

A sequence of bytes conforming to the UTF-8 specifications.

#### 6.17 time

An 8 byte two's complement long representing nanoseconds since midnight. Valid values are in the range 0 to 8639999999999

#### 6.18 timestamp

An 8 byte two's complement integer representing a millisecond-precision offset from the unix epoch (00:00:00, January 1st, 1970). Negative values represent a negative offset from the epoch.

#### 6.19 timeuuid

A 16 byte sequence representing a version 1 UUID as defined by RFC 4122.

#### 6.20 tinyint

A 1 byte two's complement integer.

#### 6.21 tuple

A sequence of [bytes] values representing the items in a tuple. The encoding of each element depends on the data type for that position in the tuple. Null values may be represented by using length -1 for the [bytes] representation of an element.

#### 6.22 uuid

A 16 byte sequence representing any valid UUID as defined by RFC 4122.

#### 6.23 varchar

An alias of the "text" type.

#### 6.24 varint

A variable-length two's complement encoding of a signed integer.

The following examples may help implementors of this spec:

Value | Encoding

-----|-----

0	0x00
1	0x01
127	0x7F
128	0x0080
129	0x0081
-1	0xFF
-128	0x80
-129	0xFF7F

Note that positive numbers must use a most-significant byte with a value less than 0x80, because a most-significant bit of 1 indicates a negative value. Implementors should pad positive values that have a MSB  $\geq$  0x80 with a leading 0x00 byte.

## 7. User Defined Types

This section describes the serialization format for User defined types (UDT), as described in section 4.2.5.2.

A UDT value is composed of successive [bytes] values, one for each field of the UDT value (in the order defined by the type). A UDT value will generally have one value for each field of the type it represents, but it is allowed to have less values than the type has fields.

## 8. Result paging

The protocol allows for paging the result of queries. For that, the QUERY and EXECUTE messages have a `<result_page_size>` value that indicate the desired page size in CQL3 rows.

If a positive value is provided for `<result_page_size>`, the result set of the RESULT message returned for the query will contain at most the `<result_page_size>` first rows of the query result. If that first page of results contains the full result set for the query, the RESULT message (of kind ``Rows``) will have the `Has_more_pages` flag *\*not\** set. However, if some results are not part of the first response, the `Has_more_pages` flag will be set and the result will contain a `<paging_state>` value. In that case, the `<paging_state>` value should be used in a QUERY or EXECUTE message (that has the *\*same\** query as the original one or the behavior is undefined) to retrieve the next page of results.

Only CQL3 queries that return a result set (RESULT message with a `Rows`kind``) support paging. For other type of queries, the `<result_page_size>` value is ignored.

Note to client implementors:

- While `<result_page_size>` can be as low as 1, it will likely be detrimental to performance to pick a value too low. A value below 100 is probably too low for most use cases.
- Clients should not rely on the actual size of the result set returned to decide if there are more results to fetch or not. Instead, they should always check the `Has_more_pages` flag (unless they did not enable paging for the query obviously). Clients should also not assert that no result will have more than `<result_page_size>` results. While the current implementation always respects the exact value of `<result_page_size>`, we reserve the right to return slightly smaller or bigger pages in the future for performance reasons.
- The `<paging_state>` is specific to a protocol version and drivers should not send a `<paging_state>` returned by a node using the protocol v3 to query a node using the protocol v4 for instance.

## 9. Error codes

Let us recall that an ERROR message is composed of `<code><message>[...]` (see 4.2.1 for details). The supported error codes, as well as any additional information the message may contain after the `<message>` are described below:

0x0000 Server error: something unexpected happened. This indicates a server-side bug.

0x000A Protocol error: some client message triggered a protocol violation (for instance a QUERY message is sent before a STARTUP one has been sent)

0x0100 Authentication error: authentication was required and failed. The possible reason for failing depends on the authenticator in use, which may or may not include more detail in the accompanying error message.

0x1000 Unavailable exception. The rest of the ERROR message body will be `<cl><required><alive>`

where:

`<cl>` is the [consistency] level of the query that triggered the exception.

`<required>` is an [int] representing the number of nodes that should be alive to respect `<cl>`

`<alive>` is an [int] representing the number of replicas that were known to be alive when the request had been processed (since an unavailable exception has been triggered, there will be `<alive> < <required>`)

0x1001 Overloaded: the request cannot be processed because the coordinator node is overloaded

0x1002 Is\_bootstrapping: the request was a read request but the coordinator node is bootstrapping

0x1003 Truncate\_error: error during a truncation error.

0x1100 Write\_timeout: Timeout exception during a write request. The rest of the ERROR message body will be

`<cl><received><blockfor><writeType>`

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having acknowledged the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<writeType> is a [string] that describe the type of the write that timed out. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the timeout occurred during the write to the batch log when a (logged) batch write was requested.

0x1200 Read\_timeout: Timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose response is required to achieve <cl>. Please note that it is possible to have <received> >= <blockfor> if <data\_present> is false. Also in the (unlikely) case where <cl> is achieved but the coordinator node times out while waiting for read-repair acknowledgement.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data has not responded. Otherwise, the value is != 0.

0x1300 Read\_failure: A non-timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short] that has the following meaning:

0x0000 Unknown reason

0x0001 Too many tombstones read (as controlled by the yamll tombstone\_failure\_threshold option)

0x0002 The query uses an index but that index is not available (built) on the queried <endpoint>.

0x0003 The query writes on some CDC enabled tables, but the CDC space is full (CDC data isn't consumed fast enough). Note that this can only happen in Write\_failure in practice, but the reasons are shared between both exception.

0x0004 Some failures (one or more) were reported to the replica "leading" a counter write. The actual error didn't necessarily occur on the node that sent this failure, it is simply the node reporting it due to how counter writes work; the initial reason for the failure should have been logged on the actual replica on which the problem occurred, which may or may not be the same node.

Any other value for <failurecode> must be considered as an Unknown reason (but drivers should not fail) as new <failurecode> may be added without a bump of the protocol version.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data had not responded. Otherwise, the value is != 0.

0x1400 Function\_failure: A (user defined) function failed during execution.

The rest of the ERROR message body will be

<keyspace><function><arg\_types>

where:

<keyspace> is the keyspace [string] of the failed function

<function> is the name [string] of the failed function

<arg\_types> [string list] one string for each argument type (as CQL type) of the failed function

0x1500 Write\_failure: A non-timeout exception during a write request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><write\_type>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short] whose meaning is the same than in Read\_failure (see above, though note that some reason only apply to writes and others only to reads).

<writeType> is a [string] that describes the type of the write that failed. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the failure occurred during the write to the batch log when a (logged) batch write was requested.

- 0x2000 Syntax\_error: The submitted query has a syntax error.
- 0x2100 Unauthorized: The logged user doesn't have the right to perform the query.
- 0x2200 Invalid: The query is syntactically correct but invalid.
- 0x2300 Config\_error: The query is invalid because of some configuration issue
- 0x2400 Already\_exists: The query attempted to create a keyspaces or a table that was already existing. The rest of the ERROR message body will be <ks><table> where:
- <ks> is a [string] representing either the keyspaces that already exists, or the keyspaces in which the table that already exists is.
  - <table> is a [string] representing the name of the table that already exists. If the query was attempting to create a keyspaces, <table> will be present but will be the empty string.
- 0x2500 Unprepared: Can be thrown while a prepared statement tries to be executed if the provided prepared statement ID is not known by this host. The rest of the ERROR message body will be [short bytes] representing the unknown ID.

0x8000 Client\_write\_failure: an error occurred when sending asynchronous results to the client, for example if the client is unable to keep up with the rate during

a continuous paging session.

## 10. Changes from CQL binary protocol version 5

- \* Second most significant bit in the frame version byte is set to one to indicate a dse protocol message (section 2.1)
- \* Continuous paging:
  - \* Added options to QUERY message (section 4.1.4)
  - \* Added response parameters to ROWS response (section 4.2.5.2)
- \* Added CANCEL message (section 4.1.9)
- \* Does `_not_` have keyspace field in QUERY, PREPARE, and BATCH messages (Sections 4.1.4, 4.1.5, and 4.1.7 of native-protocol-v5).
- \* Does `_not_` have [int] flags field in PREPARE message (Section 4.1.5 of native-protocol-v5).

Found in path(s):

\* /opt/cola/permits/1318961038\_1651217825.2/0/native-protocol-1-5-1-jar/dse\_protocol\_v1.spec

## 1. Overview

The CQL binary protocol is a frame based protocol. Frames are defined as:

The protocol is big-endian (network byte order).

Each frame contains a fixed size header (9 bytes) followed by a variable size body. The header is described in Section 2. The content of the body depends on the header opcode value (the body can in particular be empty for some opcode values). The list of allowed opcodes is defined in Section 2.4 and the details of each corresponding message are described Section 4.

The protocol distinguishes two types of frames: requests and responses. Requests are those frames sent by the client to the server. Responses are those frames sent by the server to the client. Note, however, that the protocol supports server pushes (events) so a response does not necessarily come right after a client request.

Note to client implementors: client libraries should always assume that the

body of a given frame may contain more data than what is described in this document. It will however always be safe to ignore the remainder of the frame body in such cases. The reason is that this may enable extending the protocol with optional features without needing to change the protocol version.

## 2. Frame header

### 2.1. version

The version is a single byte that indicates both the direction of the message (request or response) and the version of the protocol in use. The most significant bit of version is used to define the direction of the message: 0 indicates a request, 1 indicates a response. This can be useful for protocol analyzers to distinguish the nature of the packet from the direction in which it is moving. The rest of that byte is the protocol version (5 for the protocol defined in this document). In other words, for this version of the protocol, version will be one of:

- 0x05 Request frame for this protocol version
- 0x85 Response frame for this protocol version

Please note that while every message ships with the version, only one version of messages is accepted on a given connection. In other words, the first message exchanged (STARTUP) sets the version for the connection for the lifetime of this connection. The single exception to this behavior is when a startup message is sent with a version that is higher than the current server version. In this case, the server will respond with its current version.

This document describes version 5 of the protocol. For the changes made since version 4, see Section 10.

### 2.2. flags

Flags applying to this frame. The flags have the following meaning (described by the mask that allows selecting them):

- 0x01: Compression flag. If set, the frame body is compressed. The actual compression to use should have been set up beforehand through the Startup message (which thus cannot be compressed; Section 4.1.1).
- 0x02: Tracing flag. For a request frame, this indicates the client requires tracing of the request. Note that only QUERY, PREPARE and EXECUTE queries support tracing. Other requests will simply ignore the tracing flag if set. If a request supports tracing and the tracing flag is set, the response to this request will have the tracing flag set and contain tracing information.

If a response frame has the tracing flag set, its body contains a tracing ID. The tracing ID is a [uuid] and is the first thing in

the frame body. The rest of the body will then be the usual body corresponding to the response opcode.

0x04: Custom payload flag. For a request or response frame, this indicates that a generic key-value custom payload for a custom QueryHandler implementation is present in the frame. Such a custom payload is simply ignored by the default QueryHandler implementation.

Currently, only QUERY, PREPARE, EXECUTE and BATCH requests support payload.

Type of custom payload is [bytes map] (see below).

0x08: Warning flag. The response contains warnings which were generated by the server to go along with this response.

If a response frame has the warning flag set, its body will contain the text of the warnings. The warnings are a [string list] and will be the first value in the frame body if the tracing flag is not set, or directly after the tracing ID if it is.

0x10: Use beta flag. Indicates that the client opts in to use protocol version that is currently in beta. Server will respond with ERROR if protocol version is marked as beta on server and client does not provide this flag.

The rest of flags is currently unused and ignored.

### 2.3. stream

A frame has a stream id (a [short] value). When sending request messages, this stream id must be set by the client to a non-negative value (negative stream id are reserved for streams initiated by the server; currently all EVENT messages (section 4.2.6) have a streamId of -1). If a client sends a request message with the stream id X, it is guaranteed that the stream id of the response to that message will be X.

This helps to enable the asynchronous nature of the protocol. If a client sends multiple messages simultaneously (without waiting for responses), there is no guarantee on the order of the responses. For instance, if the client writes REQ\_1, REQ\_2, REQ\_3 on the wire (in that order), the server might respond to REQ\_3 (or REQ\_2) first. Assigning different stream ids to these 3 requests allows the client to distinguish to which request a received answer responds to. As there can only be 32768 different simultaneous streams, it is up to the client to reuse stream id.

Note that clients are free to use the protocol synchronously (i.e. wait for the response to REQ\_N before sending REQ\_{N+1}). In that case, the stream id can be safely set to 0. Clients should also feel free to use only a subset of the 32768 maximum possible stream ids if it is simpler for its implementation.

### 2.4. opcode

An integer byte that distinguishes the actual message:

0x00 ERROR

0x01 STARTUP  
 0x02 READY  
 0x03 AUTHENTICATE  
 0x05 OPTIONS  
 0x06 SUPPORTED  
 0x07 QUERY  
 0x08 RESULT  
 0x09 PREPARE  
 0x0A EXECUTE  
 0x0B REGISTER  
 0x0C EVENT  
 0x0D BATCH  
 0x0E AUTH\_CHALLENGE  
 0x0F AUTH\_RESPONSE  
 0x10 AUTH\_SUCCESS

Messages are described in Section 4.

(Note that there is no 0x04 message in this version of the protocol)

## 2.5. length

A 4 byte integer representing the length of the body of the frame (note: currently a frame is limited to 256MB in length).

## 3. Notations

To describe the layout of the frame body for the messages in Section 4, we define the following:

[int]        A 4 bytes integer  
 [long]       A 8 bytes integer  
 [byte]       A 1 byte unsigned integer  
 [short]      A 2 bytes unsigned integer  
 [string]     A [short] n, followed by n bytes representing an UTF-8 string.  
 [long string] An [int] n, followed by n bytes representing an UTF-8 string.  
 [uuid]       A 16 bytes long uuid.  
 [string list] A [short] n, followed by n [string].  
 [bytes]       A [int] n, followed by n bytes if n >= 0. If n < 0, no byte should follow and the value represented is `null`.  
 [value]       A [int] n, followed by n bytes if n >= 0.  
               If n == -1 no byte should follow and the value represented is `null`.  
               If n == -2 no byte should follow and the value represented is `not set` not resulting in any change to the existing value.  
               n < -2 is an invalid value and results in an error.

[short bytes] A [short] n, followed by n bytes if n >= 0.

[unsigned vint] An unsigned variable length integer. A vint is encoded with the most significant byte (MSB) first. The most significant byte will contain the information about how many extra bytes need to be read as well as the most significant bits of the integer. The number of extra bytes to read is encoded as 1 bits on the left side. For example, if we need to read 2 more bytes the first byte will start with 110 (e.g. 256 000 will be encoded on 3 bytes as [110]00011 11101000 00000000) If the encoded integer is 8 bytes long the vint will be encoded on 9 bytes and the first byte will be: 11111111

[vint] A signed variable length integer. This is encoded using zig-zag encoding and then sent like an [unsigned vint]. Zig-zag encoding converts numbers as follows:  
0 = 0, -1 = 1, 1 = 2, -2 = 3, 2 = 4, -3 = 5, 3 = 6 and so forth.  
The purpose is to send small negative values as small unsigned values, so that we save bytes on the wire.

To encode a value n use "(n >> 31) ^ (n << 1)" for 32 bit values, and "(n >> 63) ^ (n << 1)" for 64 bit values where "^" is the xor operation, "<<" is the left shift operation and ">>" is the arithmetic right shift operation (highest-order bit is replicated).  
Decode with "(n >> 1) ^ -(n & 1)".

[option] A pair of <id><value> where <id> is a [short] representing the option id and <value> depends on that option (and can be of size 0). The supported id (and the corresponding <value>) will be described when this is used.

[option list] A [short] n, followed by n [option].

[inet] An address (ip and port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address (in practice n can only be either 4 (IPv4) or 16 (IPv6)), following by one [int] representing the port.

[inetaddr] An IP address (without a port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address.

[consistency] A consistency level specification. This is a [short] representing a consistency level with the following correspondance:

0x0000 ANY  
0x0001 ONE  
0x0002 TWO  
0x0003 THREE  
0x0004 QUORUM  
0x0005 ALL  
0x0006 LOCAL\_QUORUM  
0x0007 EACH\_QUORUM  
0x0008 SERIAL  
0x0009 LOCAL\_SERIAL  
0x000A LOCAL\_ONE

[string map] A [short] n, followed by n pair <k><v> where <k> and <v> are [string].

[string multimap] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [string list].

[bytes map] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [bytes].

## 4. Messages

### 4.1. Requests

Note that outside of their normal responses (described below), all requests can get an ERROR message (Section 4.2.1) as response.

#### 4.1.1. STARTUP

Initialize the connection. The server will respond by either a READY message (in which case the connection is ready for queries) or an AUTHENTICATE message (in which case credentials will need to be provided using AUTH\_RESPONSE).

This must be the first message of the connection, except for OPTIONS that can be sent before to find out the options supported by the server. Once the connection has been initialized, a client should not send any more STARTUP messages.

The body is a [string map] of options. Possible options are:

- "CQL\_VERSION": the version of CQL to use. This option is mandatory and currently the only version supported is "3.0.0". Note that this is different from the protocol version.
- "COMPRESSION": the compression algorithm to use for frames (See section 5). This is optional; if not specified no compression will be used.

#### 4.1.2. AUTH\_RESPONSE

Answers a server authentication challenge.

Authentication in the protocol is SASL based. The server sends authentication challenges (a bytes token) to which the client answers with this message. Those exchanges continue until the server accepts the authentication by sending a AUTH\_SUCCESS message after a client AUTH\_RESPONSE. Note that the exchange begins with the client sending an initial AUTH\_RESPONSE in response to a server AUTHENTICATE request.

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual

authenticator used.

The response to a AUTH\_RESPONSE is either a follow-up AUTH\_CHALLENGE message, an AUTH\_SUCCESS message or an ERROR message.

#### 4.1.3. OPTIONS

Asks the server to return which STARTUP options are supported. The body of an OPTIONS message should be empty and the server will respond with a SUPPORTED message.

#### 4.1.4. QUERY

Performs a CQL query. The body of the message must be:

<query><query\_parameters>

where <query> is a [long string] representing the query and

<query\_parameters> must be

<consistency><flags>[<n>[name\_1]<value\_1>...[name\_n]<value\_n>][<result\_page\_size>][<paging\_state>][<serial\_consistency>][<timestamp>][<keyspace>][<now\_in\_seconds>]

where:

- <consistency> is the [consistency] level for the operation.
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x0001: Values. If set, a [short] <n> followed by <n> [value] values are provided. Those values are used for bound variables in the query. Optionally, if the 0x40 flag is present, each value will be preceded by a [string] name, representing the name of the marker the value must be bound to.

0x0002: Skip\_metadata. If set, the Result Set returned as a response to the query (if any) will have the NO\_METADATA flag (see Section 4.2.5.2).

0x0004: Page\_size. If set, <result\_page\_size> is an [int] controlling the desired page size of the result (in CQL3 rows). See the section on paging (Section 8) for more details.

0x0008: With\_paging\_state. If set, <paging\_state> should be present. <paging\_state> is a [bytes] value that should have been returned in a result set (Section 4.2.5.2). The query will be executed but starting from a given paging state. This is also to continue paging on a different node than the one where it started (See Section 8 for more details).

0x0010: With\_serial\_consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to

SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x0020: With default timestamp. If set, <timestamp> must be present.

<timestamp> is a [long] representing the default timestamp for the query in microseconds (negative values are forbidden). This will replace the server side assigned timestamp as default timestamp.

Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x0040: With names for values. This only makes sense if the 0x01 flag is set and is ignored otherwise. If present, the values from the 0x01 flag will be preceded by a name (see above). Note that this is only useful for QUERY requests where named bind markers are used; for EXECUTE statements, since the names for the expected values was returned during preparation, a client can always provide values in the right order without any names and using this flag, while supported, is almost surely inefficient.

0x0080: With keypace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keypace that the query should be executed in. It supercedes the keypace that the connection is bound to, if any.

0x0100: With now in seconds. If set, <now\_in\_seconds> must be present. <now\_in\_seconds> is an [int] representing the current time (now) for the query. Affects TTL cell liveness in read queries and local deletion time for tombstones and TTL cells in update requests. It's intended for testing purposes and is optional.

Note that the consistency is ignored by some queries (USE, CREATE, ALTER, TRUNCATE, ...).

The server will respond to a QUERY message with a RESULT message, the content of which depends on the query.

#### 4.1.5. PREPARE

Prepare a query for later execution (through EXECUTE). The body of the message must be:

<query><flags>[<keyspace>]

where:

- <query> is a [long string] representing the CQL query.
- <flags> is a [int] whose bits define the options for this statement and in particular influence what the remainder of the message contains.

A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x01: With keypace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keypace that the query should be executed in. It supercedes the keypace that the connection is bound to, if any.

The server will respond with a RESULT message with a `prepared` kind (0x0004, see Section 4.2.5).

#### 4.1.6. EXECUTE

Executes a prepared query. The body of the message must be:

<id><result\_metadata\_id><query\_parameters>

where

- <id> is the prepared query ID. It's the [short bytes] returned as a response to a PREPARE message.
- <result\_metadata\_id> is the ID of the resultset metadata that was sent along with response to PREPARE message. If a RESULT/Rows message reports changed resultset metadata with the Metadata\_changed flag, the reported new resultset metadata must be used in subsequent executions.
- <query\_parameters> has the exact same definition as in QUERY (see Section 4.1.4).

#### 4.1.7. BATCH

Allows executing a list of queries (prepared or not) as a batch (note that only DML statements are accepted in a batch). The body of the message must be:

<type><n><query\_1>...<query\_n><consistency><flags>[<serial\_consistency>][<timestamp>][<keyspace>][<now\_in\_seconds>]

where:

- <type> is a [byte] indicating the type of batch to use:
  - If <type> == 0, the batch will be "logged". This is equivalent to a normal CQL3 batch statement.
  - If <type> == 1, the batch will be "unlogged".
  - If <type> == 2, the batch will be a "counter" batch (and non-counter statements will be rejected).
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. It is similar to the <flags> from QUERY and EXECUTE methods, except that the 4 rightmost bits must always be 0 as their corresponding options do not make sense for Batch. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:
  - 0x0010: With serial consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.
  - 0x0020: With default timestamp. If set, <timestamp> should be present. <timestamp> is a [long] representing the default timestamp for the query in microseconds. This will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.
  - 0x0040: With names for values. If set, then all values for all <query\_i> must be preceded by a [string] <name\_i> that have the same meaning as in QUERY

requests [IMPORTANT NOTE: this feature does not work and should not be used. It is specified in a way that makes it impossible for the server to implement. This will be fixed in a future version of the native protocol. See <https://issues.apache.org/jira/browse/CASSANDRA-10246> for more details].

0x0080: With keyspace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keyspace that the query should be executed in.

It supercedes the keyspace that the connection is bound to, if any.

0x0100: With now in seconds. If set, <now\_in\_seconds> must be present. <now\_in\_seconds> is an [int] representing the current time (now) for the query. Affects TTL cell liveness in read queries and local deletion time for tombstones and TTL cells in update requests. It's intended for testing purposes and is optional.

- <n> is a [short] indicating the number of following queries.
- <query\_1>...<query\_n> are the queries to execute. A <query\_i> must be of the form:  
    <kind><string\_or\_id><n>[<name\_1><value\_1>...<name\_n><value\_n>  
where:
  - <kind> is a [byte] indicating whether the following query is a prepared one or not. <kind> value must be either 0 or 1.
  - <string\_or\_id> depends on the value of <kind>. If <kind> == 0, it should be a [long string] query string (as in QUERY, the query string might contain bind markers). Otherwise (that is, if <kind> == 1), it should be a [short bytes] representing a prepared query ID.
  - <n> is a [short] indicating the number (possibly 0) of following values.
  - <name\_i> is the optional name of the following <value\_i>. It must be present if and only if the 0x40 flag is provided for the batch.
  - <value\_i> is the [value] to use for bound variable i (of bound variable <name\_i> if the 0x40 flag is used).
- <consistency> is the [consistency] level for the operation.
- <serial\_consistency> is only present if the 0x10 flag is set. In that case, <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present will default to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

The server will respond with a RESULT message.

#### 4.1.8. REGISTER

Register this connection to receive some types of events. The body of the message is a [string list] representing the event types to register for. See section 4.2.6 for the list of valid event types.

The response to a REGISTER message will be a READY message.

Please note that if a client driver maintains multiple connections to a

Cassandra node and/or connections to multiple nodes, it is advised to dedicate a handful of connections to receive events, but to *\*not\** register for events on all connections, as this would only result in receiving multiple times the same event messages, wasting bandwidth.

## 4.2. Responses

This section describes the content of the frame body for the different responses. Please note that to make room for future evolution, clients should support extra informations (that they should simply discard) to the one described in this document at the end of the frame body.

### 4.2.1. ERROR

Indicates an error processing a request. The body of the message will be an error code ([int]) followed by a [string] error message. Then, depending on the exception, more content may follow. The error codes are defined in Section 9, along with their additional content if any.

### 4.2.2. READY

Indicates that the server is ready to process queries. This message will be sent by the server either after a STARTUP message if no authentication is required (if authentication is required, the server indicates readiness by sending a AUTH\_RESPONSE message).

The body of a READY message is empty.

### 4.2.3. AUTHENTICATE

Indicates that the server requires authentication, and which authentication mechanism to use.

The authentication is SASL based and thus consists of a number of server challenges (AUTH\_CHALLENGE, Section 4.2.7) followed by client responses (AUTH\_RESPONSE, Section 4.1.2). The initial exchange is however bootstrapped by an initial client response. The details of that exchange (including how many challenge-response pairs are required) are specific to the authenticator in use. The exchange ends when the server sends an AUTH\_SUCCESS message or an ERROR message.

This message will be sent following a STARTUP message if authentication is required and must be answered by a AUTH\_RESPONSE message from the client.

The body consists of a single [string] indicating the full class name of the

IAuthenticator in use.

#### 4.2.4. SUPPORTED

Indicates which startup options are supported by the server. This message comes as a response to an OPTIONS message.

The body of a SUPPORTED message is a [string multimap]. This multimap gives for each of the supported STARTUP options, the list of supported values. It also includes:

- "PROTOCOL\_VERSIONS": the list of native protocol versions that are supported, encoded as the version number followed by a slash and the version description. For example: 3/v3, 4/v4, 5/v5, 6/v6-beta. If a version is in beta, it will have the word "beta" in its description.

#### 4.2.5. RESULT

The result to a query (QUERY, PREPARE, EXECUTE or BATCH messages).

The first element of the body of a RESULT message is an [int] representing the `kind` of result. The rest of the body depends on the kind. The kind can be one of:

- 0x0001 Void: for results carrying no information.
- 0x0002 Rows: for results to select queries, returning a set of rows.
- 0x0003 Set\_keyspace: the result to a `use` query.
- 0x0004 Prepared: result to a PREPARE message.
- 0x0005 Schema\_change: the result to a schema altering query.

The body for each kind (after the [int] kind) is defined below.

##### 4.2.5.1. Void

The rest of the body for a Void result is empty. It indicates that a query was successful without providing more information.

##### 4.2.5.2. Rows

Indicates a set of rows. The rest of the body of a Rows result is:

<metadata><rows\_count><rows\_content>

where:

- <metadata> is composed of:

<flags><columns\_count>[<paging\_state>][<new\_metadata\_id>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:
  - 0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.
  - 0x0002 Has\_more\_pages: indicates whether this is not the last page of results and more should be retrieved. If set, the <paging\_state> will be present. The <paging\_state> is a [bytes] value that should be used in QUERY/EXECUTE to continue paging and retrieve the remainder of the result for this query (See Section 8 for more details).
  - 0x0004 No\_metadata: if set, the <metadata> is only composed of these <flags>, the <column\_count> and optionally the <paging\_state> (depending on the Has\_more\_pages flag) but no other information (so no <global\_table\_spec> nor <col\_spec\_i>). This will only ever be the case if this was requested during the query (see QUERY and RESULT messages).
  - 0x0008 Metadata\_changed: if set, the No\_metadata flag has to be unset and <new\_metadata\_id> has to be supplied. This flag is to be used to avoid a roundtrip in case of metadata changes for queries that requested metadata to be skipped.
- <columns\_count> is an [int] representing the number of columns selected by the query that produced this result. It defines the number of <col\_spec\_i> elements in and the number of elements for each row in <rows\_content>.
- <new\_metadata\_id> is [short bytes] representing the new, changed resultset metadata. The new metadata ID must also be used in subsequent executions of the corresponding prepared statement, if any.
- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. It is composed of two [string] representing the (unique) keyspace name and table name the columns belong to.
- <col\_spec\_i> specifies the columns returned in the query. There are <column\_count> such column specifications that are composed of:
  - (<ksname><tablename>)?<name><type>

The initial <ksname> and <tablename> are two [string] and are only present if the Global\_tables\_spec flag is not set. The <column\_name> is a [string] and <type> is an [option] that corresponds to the description (what this description is depends a bit on the context: in results to selects, this will be either the user chosen alias or the selection used (often a column name, but it can be a function call too). In results to a PREPARE, this will be either the name of the corresponding bind variable or the column name for the variable if it is "anonymous") and type of the corresponding result. The option for <type> is either a native type (see below), in which case the option has no value, or a 'custom' type, in which case the value is a [string] representing the fully qualified class name of the type represented. Valid option ids are:

0x0000 Custom: the value is a [string], see above.

0x0001 Ascii

0x0002 Bigint

0x0003 Blob

0x0004 Boolean

0x0005 Counter

0x0006 Decimal

0x0007 Double

0x0008 Float

0x0009 Int

0x000B Timestamp

0x000C Uuid

0x000D Varchar

0x000E Varint

0x000F Timeuuid

0x0010 Inet

0x0011 Date

0x0012 Time

0x0013 Smallint

0x0014 Tinyint

0x0015 Duration

0x0020 List: the value is an [option], representing the type of the elements of the list.

0x0021 Map: the value is two [option], representing the types of the keys and values of the map

0x0022 Set: the value is an [option], representing the type of the elements of the set

0x0030 UDT: the value is <ks><udt\_name><n><name\_1><type\_1>...<name\_n><type\_n> where:

- <ks> is a [string] representing the keyspace name this UDT is part of.
- <udt\_name> is a [string] representing the UDT name.
- <n> is a [short] representing the number of fields of the UDT, and thus the number of <name\_i><type\_i> pairs following
- <name\_i> is a [string] representing the name of the i\_th field of the UDT.
- <type\_i> is an [option] representing the type of the i\_th field of the UDT.

0x0031 Tuple: the value is <n><type\_1>...<type\_n> where <n> is a [short] representing the number of values in the type, and <type\_i> are [option] representing the type of the i\_th component of the tuple

- <rows\_count> is an [int] representing the number of rows present in this result. Those rows are serialized in the <rows\_content> part.
- <rows\_content> is composed of <row\_1>...<row\_m> where m is <rows\_count>. Each <row\_i> is composed of <value\_1>...<value\_n> where n is

<columns\_count> and where <value\_j> is a [bytes] representing the value returned for the jth column of the ith row. In other words, <rows\_content> is composed of (<rows\_count> \* <columns\_count>) [bytes].

#### 4.2.5.3. Set\_keyspace

The result to a `use` query. The body (after the kind [int]) is a single [string] indicating the name of the keyspace that has been set.

#### 4.2.5.4. Prepared

The result to a PREPARE message. The body of a Prepared result is:

<id><result\_metadata\_id><metadata><result\_metadata>

where:

- <id> is [short bytes] representing the prepared query ID.
- <result\_metadata\_id> is [short bytes] representing the resultset metadata ID.
- <metadata> is composed of:

<flags><columns\_count><pk\_count>[<pk\_index\_1>...<pk\_index\_n>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported masks and their flags are:
  - 0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.
- <columns\_count> is an [int] representing the number of bind markers in the prepared statement. It defines the number of <col\_spec\_i> elements.
- <pk\_count> is an [int] representing the number of <pk\_index\_i> elements to follow. If this value is zero, at least one of the partition key columns in the table that the statement acts on did not have a corresponding bind marker (or the bind marker was wrapped in a function call).
- <pk\_index\_i> is a short that represents the index of the bind marker that corresponds to the partition key column in position i. For example, a <pk\_index> sequence of [2, 0, 1] indicates that the table has three partition key columns; the full partition key can be constructed by creating a composite of the values for the bind markers at index 2, at index 0, and at index 1. This allows implementations with token-aware routing to correctly construct the partition key without needing to inspect table metadata.
- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. If present, it is composed of two [string]s. The first

[string] is the name of the keyspace that the statement acts on.

The second [string] is the name of the table that the columns represented by the bind markers belong to.

- <col\_spec\_i> specifies the bind markers in the prepared statement.

There are <column\_count> such column specifications, each with the following format:

(<ksname><tablename>)?<name><type>

The initial <ksname> and <tablename> are two [string] that are only present if the Global\_tables\_spec flag is not set. The <name> field is a [string] that holds the name of the bind marker (if named), or the name of the column, field, or expression that the bind marker corresponds to (if the bind marker is "anonymous"). The <type> field is an [option] that represents the expected type of values for the bind marker. See the Rows documentation (section 4.2.5.2) for full details on the <type> field.

- <result\_metadata> is defined exactly the same as <metadata> in the Rows documentation (section 4.2.5.2). This describes the metadata for the result set that will be returned when this prepared statement is executed. Note that <result\_metadata> may be empty (have the No\_metadata flag and 0 columns, See section 4.2.5.2) and will be for any query that is not a Select. In fact, there is never a guarantee that this will be non-empty, so implementations should protect themselves accordingly. This result metadata is an optimization that allows implementations to later execute the prepared statement without requesting the metadata (see the Skip\_metadata flag in EXECUTE). Clients can safely discard this metadata if they do not want to take advantage of that optimization.

Note that the prepared query ID returned is global to the node on which the query has been prepared. It can be used on any connection to that node until the node is restarted (after which the query must be reprepared).

#### 4.2.5.5. Schema\_change

The result to a schema altering query (creation/update/drop of a keyspace/table/index). The body (after the kind [int]) is the same as the body for a "SCHEMA\_CHANGE" event, so 3 strings:

<change\_type><target><options>

Please refer to section 4.2.6 below for the meaning of those fields.

Note that a query to create or drop an index is considered to be a change to the table the index is on.

#### 4.2.6. EVENT

An event pushed by the server. A client will only receive events for the types it has REGISTERed to. The body of an EVENT message will start with a

[string] representing the event type. The rest of the message depends on the event type. The valid event types are:

- "TOPOLOGY\_CHANGE": events related to change in the cluster topology. Currently, events are sent when new nodes are added to the cluster, and when nodes are removed. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of change ("NEW\_NODE" or "REMOVED\_NODE") followed by the address of the new/removed node.
- "STATUS\_CHANGE": events related to change of node status. Currently, up/down events are sent. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of status change ("UP" or "DOWN") followed by the address of the concerned node.
- "SCHEMA\_CHANGE": events related to schema change. After the event type, the rest of the message will be <change\_type><target><options> where:
  - <change\_type> is a [string] representing the type of changed involved. It will be one of "CREATED", "UPDATED" or "DROPPED".
  - <target> is a [string] that can be one of "KEYSPACE", "TABLE", "TYPE", "FUNCTION" or "AGGREGATE" and describes what has been modified ("TYPE" stands for modifications related to user types, "FUNCTION" for modifications related to user defined functions, "AGGREGATE" for modifications related to user defined aggregates).
  - <options> depends on the preceding <target>:
    - If <target> is "KEYSPACE", then <options> will be a single [string] representing the keyspace changed.
    - If <target> is "TABLE" or "TYPE", then <options> will be 2 [string]: the first one will be the keyspace containing the affected object, and the second one will be the name of said affected object (either the table, user type, function, or aggregate name).
    - If <target> is "FUNCTION" or "AGGREGATE", multiple arguments follow:
      - [string] keyspace containing the user defined function / aggregate
      - [string] the function/aggregate name
      - [string list] one string for each argument type (as CQL type)

All EVENT messages have a streamId of -1 (Section 2.3).

Please note that "NEW\_NODE" and "UP" events are sent based on internal Gossip communication and as such may be sent a short delay before the binary protocol server on the newly up node is fully started. Clients are thus advised to wait a short time before trying to connect to the node (1 second should be enough), otherwise they may experience a connection refusal at first.

#### 4.2.7. AUTH\_CHALLENGE

A server authentication challenge (see AUTH\_RESPONSE (Section 4.1.2) for more details).

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

Clients are expected to answer the server challenge with an AUTH\_RESPONSE message.

#### 4.2.8. AUTH\_SUCCESS

Indicates the success of the authentication phase. See Section 4.2.3 for more details.

The body of this message is a single [bytes] token holding final information from the server that the client may require to finish the authentication process. What that token contains and whether it can be null depends on the actual authenticator used.

### 5. Compression

Frame compression is supported by the protocol, but then only the frame body is compressed (the frame header should never be compressed).

Before being used, client and server must agree on a compression algorithm to use, which is done in the STARTUP message. As a consequence, a STARTUP message must never be compressed. However, once the STARTUP frame has been received by the server, messages can be compressed (including the response to the STARTUP request). Frames do not have to be compressed, however, even if compression has been agreed upon (a server may only compress frames above a certain size at its discretion). A frame body should be compressed if and only if the compressed flag (see Section 2.2) is set.

As of version 2 of the protocol, the following compressions are available:

- lz4 (<https://code.google.com/p/lz4/>). In that, note that the first four bytes of the body will be the uncompressed length (followed by the compressed bytes).
- snappy (<https://code.google.com/p/snappy/>). This compression might not be available as it depends on a native lib (server-side) that might not be available on some installations.

### 6. Data Type Serialization Formats

This sections describes the serialization formats for all CQL data types supported by Cassandra through the native protocol. These serialization formats should be used by client drivers to encode values for EXECUTE messages. Cassandra will use these formats when returning values in

RESULT messages.

All values are represented as [bytes] in EXECUTE and RESULT messages. The [bytes] format includes an int prefix denoting the length of the value. For that reason, the serialization formats described here will not include a length component.

For legacy compatibility reasons, note that most non-string types support "empty" values (i.e. a value with zero length). An empty value is distinct from NULL, which is encoded with a negative length.

As with the rest of the native protocol, all encodings are big-endian.

#### 6.1. ascii

A sequence of bytes in the ASCII range [0, 127]. Bytes with values outside of this range will result in a validation error.

#### 6.2 bigint

An eight-byte two's complement integer.

#### 6.3 blob

Any sequence of bytes.

#### 6.4 boolean

A single byte. A value of 0 denotes "false"; any other value denotes "true". (However, it is recommended that a value of 1 be used to represent "true".)

#### 6.5 date

An unsigned integer representing days with epoch centered at  $2^{31}$ . (unix epoch January 1st, 1970).

A few examples:

0: -5877641-06-23

$2^{31}$ : 1970-1-1

$2^{32}$ : 5881580-07-11

#### 6.6 decimal

The decimal format represents an arbitrary-precision number. It contains an [int] "scale" component followed by a varint encoding (see section 6.17) of the unscaled value. The encoded value represents "<unscaled>E<-scale>". In other words, "<unscaled> \* 10 ^ (-1 \* <scale>)".

#### 6.7 double

An 8 byte floating point number in the IEEE 754 binary64 format.

#### 6.8 duration

A duration is composed of 3 signed variable length integers ([vint]s).

The first [vint] represents a number of months, the second [vint] represents a number of days, and the last [vint] represents a number of nanoseconds.

The number of months and days must be valid 32 bits integers whereas the number of nanoseconds must be a valid 64 bits integer.

A duration can either be positive or negative. If a duration is positive all the integers must be positive or zero. If a duration is negative all the numbers must be negative or zero.

#### 6.9 float

A 4 byte floating point number in the IEEE 754 binary32 format.

#### 6.10 inet

A 4 byte or 16 byte sequence denoting an IPv4 or IPv6 address, respectively.

#### 6.11 int

A 4 byte two's complement integer.

#### 6.12 list

A [int] n indicating the number of elements in the list, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.13 map

A [int] n indicating the number of key/value pairs in the map, followed by n entries. Each entry is composed of two [bytes] representing the key and value.

#### 6.14 set

A [int] n indicating the number of elements in the set, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.15 smallint

A 2 byte two's complement integer.

#### 6.16 text

A sequence of bytes conforming to the UTF-8 specifications.

#### 6.17 time

An 8 byte two's complement long representing nanoseconds since midnight. Valid values are in the range 0 to 8639999999999

#### 6.18 timestamp

An 8 byte two's complement integer representing a millisecond-precision offset from the unix epoch (00:00:00, January 1st, 1970). Negative values represent a negative offset from the epoch.

#### 6.19 timeuuid

A 16 byte sequence representing a version 1 UUID as defined by RFC 4122.

#### 6.20 tinyint

A 1 byte two's complement integer.

#### 6.21 tuple

A sequence of [bytes] values representing the items in a tuple. The encoding of each element depends on the data type for that position in the tuple. Null values may be represented by using length -1 for the [bytes] representation of an element.

#### 6.22 uuid

A 16 byte sequence representing any valid UUID as defined by RFC 4122.

#### 6.23 varchar

An alias of the "text" type.

#### 6.24 varint

A variable-length two's complement encoding of a signed integer.

The following examples may help implementors of this spec:

Value	Encoding
0	0x00
1	0x01
127	0x7F
128	0x0080

129 | 0x0081  
-1 | 0xFF  
-128 | 0x80  
-129 | 0xFF7F

Note that positive numbers must use a most-significant byte with a value less than 0x80, because a most-significant bit of 1 indicates a negative value. Implementors should pad positive values that have a MSB  $\geq$  0x80 with a leading 0x00 byte.

## 7. User Defined Types

This section describes the serialization format for User defined types (UDT), as described in section 4.2.5.2.

A UDT value is composed of successive [bytes] values, one for each field of the UDT value (in the order defined by the type). A UDT value will generally have one value for each field of the type it represents, but it is allowed to have less values than the type has fields.

## 8. Result paging

The protocol allows for paging the result of queries. For that, the QUERY and EXECUTE messages have a `<result_page_size>` value that indicate the desired page size in CQL3 rows.

If a positive value is provided for `<result_page_size>`, the result set of the RESULT message returned for the query will contain at most the `<result_page_size>` first rows of the query result. If that first page of results contains the full result set for the query, the RESULT message (of kind ``Rows``) will have the `Has_more_pages` flag *\*not\** set. However, if some results are not part of the first response, the `Has_more_pages` flag will be set and the result will contain a `<paging_state>` value. In that case, the `<paging_state>` value should be used in a QUERY or EXECUTE message (that has the *\*same\** query as the original one or the behavior is undefined) to retrieve the next page of results.

Only CQL3 queries that return a result set (RESULT message with a `Rows`kind``) support paging. For other type of queries, the `<result_page_size>` value is ignored.

Note to client implementors:

- While `<result_page_size>` can be as low as 1, it will likely be detrimental to performance to pick a value too low. A value below 100 is probably too low for most use cases.
- Clients should not rely on the actual size of the result set returned to

decide if there are more results to fetch or not. Instead, they should always check the `Has_more_pages` flag (unless they did not enable paging for the query obviously). Clients should also not assert that no result will have more than `<result_page_size>` results. While the current implementation always respects the exact value of `<result_page_size>`, we reserve the right to return slightly smaller or bigger pages in the future for performance reasons.

- The `<paging_state>` is specific to a protocol version and drivers should not send a `<paging_state>` returned by a node using the protocol v3 to query a node using the protocol v4 for instance.

## 9. Error codes

Let us recall that an `ERROR` message is composed of `<code><message>[...]` (see 4.2.1 for details). The supported error codes, as well as any additional information the message may contain after the `<message>` are described below:

0x0000 Server error: something unexpected happened. This indicates a server-side bug.

0x000A Protocol error: some client message triggered a protocol violation (for instance a `QUERY` message is sent before a `STARTUP` one has been sent)

0x0100 Authentication error: authentication was required and failed. The possible reason for failing depends on the authenticator in use, which may or may not include more detail in the accompanying error message.

0x1000 Unavailable exception. The rest of the `ERROR` message body will be `<cl><required><alive>`

where:

`<cl>` is the [consistency] level of the query that triggered the exception.

`<required>` is an [int] representing the number of nodes that should be alive to respect `<cl>`

`<alive>` is an [int] representing the number of replicas that were known to be alive when the request had been processed (since an unavailable exception has been triggered, there will be `<alive> < <required>`)

0x1001 Overloaded: the request cannot be processed because the coordinator node is overloaded

0x1002 `Is_bootstrapping`: the request was a read request but the coordinator node is bootstrapping

0x1003 `Truncate_error`: error during a truncation error.

0x1100 `Write_timeout`: Timeout exception during a write request. The rest of the `ERROR` message body will be

`<cl><received><blockfor><writeType>`

where:

`<cl>` is the [consistency] level of the query having triggered the exception.

`<received>` is an [int] representing the number of nodes having

acknowledged the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<writeType> is a [string] that describe the type of the write that timed out. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the timeout occurred during the write to the batch log when a (logged) batch write was requested.
- "CAS": the timeout occurred during the Compare And Set write/update.
- "VIEW": the timeout occurred when a write involves VIEW update and failure to acquire local view(MV) lock for key within timeout
- "CDC": the timeout occurred when cdc\_total\_space\_in\_mb is exceeded when doing a write to data tracked by cdc.

0x1200 Read\_timeout: Timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose response is required to achieve <cl>. Please note that it is possible to have <received> >= <blockfor> if <data\_present> is false. Also in the (unlikely) case where <cl> is achieved but the coordinator node times out while waiting for read-repair acknowledgement.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data has not responded. Otherwise, the value is != 0.

0x1300 Read\_failure: A non-timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short].

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data had not responded. Otherwise, the value is != 0.

0x1400 Function\_failure: A (user defined) function failed during execution.

The rest of the ERROR message body will be

<keyspace><function><arg\_types>

where:

<keyspace> is the keyspace [string] of the failed function

<function> is the name [string] of the failed function

<arg\_types> [string list] one string for each argument type (as CQL type) of the failed function

0x1500 Write\_failure: A non-timeout exception during a write request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><write\_type>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short].

<writeType> is a [string] that describes the type of the write that failed. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write

- (batched or not).
- "BATCH\_LOG": the failure occurred during the write to the batch log when a (logged) batch write was requested.
- "CAS": the failure occurred during the Compare And Set write/update.
- "VIEW": the failure occurred when a write involves VIEW update and failure to acquire local view(MV) lock for key within timeout
- "CDC": the failure occurred when cdc\_total\_space\_in\_mb is exceeded when doing a write to data tracked by cdc.

- 0x2000 Syntax\_error: The submitted query has a syntax error.
- 0x2100 Unauthorized: The logged user doesn't have the right to perform the query.
- 0x2200 Invalid: The query is syntactically correct but invalid.
- 0x2300 Config\_error: The query is invalid because of some configuration issue
- 0x2400 Already\_exists: The query attempted to create a keyspace or a table that was already existing. The rest of the ERROR message body will be <ks><table> where:
  - <ks> is a [string] representing either the keyspace that already exists, or the keyspace in which the table that already exists is.
  - <table> is a [string] representing the name of the table that already exists. If the query was attempting to create a keyspace, <table> will be present but will be the empty string.
- 0x2500 Unprepared: Can be thrown while a prepared statement tries to be executed if the provided prepared statement ID is not known by this host. The rest of the ERROR message body will be [short bytes] representing the unknown ID.

  - 10.1. Changes from CQL binary protocol v5
  - 10.2. Changes from DSE binary protocol v1

## 1. Overview

The CQL binary protocol is a frame based protocol. Frames are defined as:

```
.      ... body ...      .  
.      .  
.      .  
+-----
```

The protocol is big-endian (network byte order).

Each frame contains a fixed size header (9 bytes) followed by a variable size body. The header is described in Section 2. The content of the body depends on the header opcode value (the body can in particular be empty for some opcode values). The list of allowed opcodes is defined in Section 2.4 and the details of each corresponding message are described Section 4.

The protocol distinguishes two types of frames: requests and responses. Requests are those frames sent by the client to the server. Responses are those frames sent by the server to the client. Note, however, that the protocol supports server pushes (events) so a response does not necessarily come right after a client request.

Note to client implementors: client libraries should always assume that the body of a given frame may contain more data than what is described in this document. It will however always be safe to ignore the remainder of the frame body in such cases. The reason is that this may enable extending the protocol with optional features without needing to change the protocol version.

## 2. Frame header

### 2.1. version

The version is a single byte that indicates both the direction of the message (request or response) and the version of the protocol in use. The most significant bit of version is used to define the direction of the message: 0 indicates a request, 1 indicates a response. This can be useful for protocol analyzers to distinguish the nature of the packet from the direction in which it is moving.

The next most significant bit must be set to one to indicate that this is a dse private version and not a public open source version.

The rest of that byte is the dse protocol version (1 for the protocol defined in this document). In other words, for this version of the protocol, version will be one of:

- 0x41 (0100 0001) Request frame for this dse protocol version
- 0xC1 (1100 0001) Response frame for this dse protocol version

Please note that while every message ships with the version, only one version of messages is accepted on a given connection. In other words, the first message

exchanged (STARTUP) sets the version for the connection for the lifetime of this connection. The single exception to this behavior is when a startup message is sent with a version that is higher than the current server version. In this case, the server will respond with its current version.

This document describes version 1 of the dse protocol. For the changes made since version 5 of the public protocol, see Section 10.

## 2.2. flags

Flags applying to this frame. The flags have the following meaning (described by the mask that allows selecting them):

0x01: Compression flag. If set, the frame body is compressed. The actual compression to use should have been set up beforehand through the Startup message (which thus cannot be compressed; Section 4.1.1).

0x02: Tracing flag. For a request frame, this indicates the client requires tracing of the request. Note that only QUERY, PREPARE and EXECUTE queries support tracing. Other requests will simply ignore the tracing flag if set. If a request supports tracing and the tracing flag is set, the response to this request will have the tracing flag set and contain tracing information.

If a response frame has the tracing flag set, its body contains a tracing ID. The tracing ID is a [uuid] and is the first thing in the frame body. The rest of the body will then be the usual body corresponding to the response opcode.

0x04: Custom payload flag. For a request or response frame, this indicates that a generic key-value custom payload for a custom QueryHandler implementation is present in the frame. Such a custom payload is simply ignored by the default QueryHandler implementation.

Currently, only QUERY, PREPARE, EXECUTE and BATCH requests support payload.

Type of custom payload is [bytes map] (see below).

0x08: Warning flag. The response contains warnings which were generated by the server to go along with this response.

If a response frame has the warning flag set, its body will contain the text of the warnings. The warnings are a [string list] and will be the first value in the frame body if the tracing flag is not set, or directly after the tracing ID if it is.

0x10: Use beta flag. Indicates that the client opts in to use protocol version that is currently in beta. Server will respond with ERROR if protocol version is marked as beta on server and client does not provide this flag.

The rest of flags is currently unused and ignored.

## 2.3. stream

A frame has a stream id (a [short] value). When sending request messages, this

stream id must be set by the client to a non-negative value (negative stream id are reserved for streams initiated by the server; currently all EVENT messages (section 4.2.6) have a streamId of -1). If a client sends a request message with the stream id X, it is guaranteed that the stream id of the response to that message will be X.

This helps to enable the asynchronous nature of the protocol. If a client sends multiple messages simultaneously (without waiting for responses), there is no guarantee on the order of the responses. For instance, if the client writes REQ\_1, REQ\_2, REQ\_3 on the wire (in that order), the server might respond to REQ\_3 (or REQ\_2) first. Assigning different stream ids to these 3 requests allows the client to distinguish to which request a received answer responds to. As there can only be 32768 different simultaneous streams, it is up to the client to reuse stream id.

Note that clients are free to use the protocol synchronously (i.e. wait for the response to REQ\_N before sending REQ\_{N+1}). In that case, the stream id can be safely set to 0. Clients should also feel free to use only a subset of the 32768 maximum possible stream ids if it is simpler for its implementation.

#### 2.4. opcode

An integer byte that distinguishes the actual message:

0x00	ERROR
0x01	STARTUP
0x02	READY
0x03	AUTHENTICATE
0x05	OPTIONS
0x06	SUPPORTED
0x07	QUERY
0x08	RESULT
0x09	PREPARE
0x0A	EXECUTE
0x0B	REGISTER
0x0C	EVENT
0x0D	BATCH
0x0E	AUTH_CHALLENGE
0x0F	AUTH_RESPONSE
0x10	AUTH_SUCCESS
0xFF	REVISE_REQUEST

Messages are described in Section 4.

(Note that there is no 0x04 message in this version of the protocol)

#### 2.5. length

A 4 byte integer representing the length of the body of the frame (note: currently a frame is limited to 256MB in length).

### 3. Notations

To describe the layout of the frame body for the messages in Section 4, we define the following:

- [int] A 4 bytes integer
- [long] A 8 bytes integer
- [byte] A 1 byte unsigned integer
- [short] A 2 bytes unsigned integer
- [string] A [short] n, followed by n bytes representing an UTF-8 string.
- [long string] An [int] n, followed by n bytes representing an UTF-8 string.
- [uuid] A 16 bytes long uuid.
- [string list] A [short] n, followed by n [string].
- [bytes] A [int] n, followed by n bytes if  $n \geq 0$ . If  $n < 0$ , no byte should follow and the value represented is `null`.
- [value] A [int] n, followed by n bytes if  $n \geq 0$ .  
If  $n == -1$  no byte should follow and the value represented is `null`.  
If  $n == -2$  no byte should follow and the value represented is `not set` not resulting in any change to the existing value.  
 $n < -2$  is an invalid value and results in an error.
- [short bytes] A [short] n, followed by n bytes if  $n \geq 0$ .
- [unsigned vint] An unsigned variable length integer. A vint is encoded with the most significant byte (MSB) first. The most significant byte will contains the information about how many extra bytes need to be read as well as the most significant bits of the integer. The number of extra bytes to read is encoded as 1 bits on the left side. For example, if we need to read 2 more bytes the first byte will start with 110 (e.g. 256 000 will be encoded on 3 bytes as [110]00011 11101000 00000000) If the encoded integer is 8 bytes long the vint will be encoded on 9 bytes and the first byte will be: 11111111
- [vint] A signed variable length integer. This is encoded using zig-zag encoding and then sent like an [unsigned vint]. Zig-zag encoding converts numbers as follows:  
 $0 = 0, -1 = 1, 1 = 2, -2 = 3, 2 = 4, -3 = 5, 3 = 6$  and so forth.  
The purpose is to send small negative values as small unsigned values, so that we save bytes on the wire.  
To encode a value n use  $(n \gg 31) \wedge (n \ll 1)$  for 32 bit values, and  $(n \gg 63) \wedge (n \ll 1)$  for 64 bit values where  $\wedge$  is the xor operation,  $\ll$  is the left shift operation and  $\gg$  is the arithmetic right shift operation (highest-order bit is replicated).  
Decode with  $(n \gg 1) \wedge -(n \& 1)$ .
- [option] A pair of <id><value> where <id> is a [short] representing the option id and <value> depends on that option (and can be

of size 0). The supported id (and the corresponding <value>) will be described when this is used.

[option list] A [short] n, followed by n [option].

[inet] An address (ip and port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address (in practice n can only be either 4 (IPv4) or 16 (IPv6)), following by one [int] representing the port.

[inetaddr] An IP address (without a port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address.

[consistency] A consistency level specification. This is a [short] representing a consistency level with the following correspondance:

0x0000 ANY  
0x0001 ONE  
0x0002 TWO  
0x0003 THREE  
0x0004 QUORUM  
0x0005 ALL  
0x0006 LOCAL\_QUORUM  
0x0007 EACH\_QUORUM  
0x0008 SERIAL  
0x0009 LOCAL\_SERIAL  
0x000A LOCAL\_ONE

[string map] A [short] n, followed by n pair <k><v> where <k> and <v> are [string].

[string multimap] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [string list].

[bytes map] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [bytes].

## 4. Messages

### 4.1. Requests

Note that outside of their normal responses (described below), all requests can get an ERROR message (Section 4.2.1) as response.

#### 4.1.1. STARTUP

Initialize the connection. The server will respond by either a READY message (in which case the connection is ready for queries) or an AUTHENTICATE message (in which case credentials will need to be provided using AUTH\_RESPONSE).

This must be the first message of the connection, except for OPTIONS that can

be sent before to find out the options supported by the server. Once the connection has been initialized, a client should not send any more STARTUP messages.

The body is a [string map] of options. Possible options are:

- "CQL\_VERSION": the version of CQL to use. This option is mandatory and currently the only version supported is "3.0.0". Note that this is different from the protocol version.
- "COMPRESSION": the compression algorithm to use for frames (See section 5). This is optional; if not specified no compression will be used.
- "CLIENT\_ID": string representation of the client instance. Recommended is a ID unique per runtime instance (e.g. DataStax Java Driver's Cluster instance), generated by the driver.
- "APPLICATION\_NAME": optional, name of the application, should include the vendor name. For example "DataStax Studio"
- "APPLICATION\_VERSION": optional, version of the application.
- "DRIVER\_NAME": product name of the driver implementation. For example: 'DataStax Java Driver'.
- "DRIVER\_VERSION": version of the driver implementation, typically a semantic version string.

Strictly speaking, the parameters "CLIENT\_ID", "APPLICATION\_NAME", "APPLICATION\_VERSION", "APPLICATION\_INSTANCE", "DRIVER\_NAME" and "DRIVER\_VERSION" are not restricted to this protocol version but can also be passed using older protocol versions. It depends on the DSE version whether and how this information is used or is accessible.

#### 4.1.2. AUTH\_RESPONSE

Answers a server authentication challenge.

Authentication in the protocol is SASL based. The server sends authentication challenges (a bytes token) to which the client answers with this message. Those exchanges continue until the server accepts the authentication by sending a AUTH\_SUCCESS message after a client AUTH\_RESPONSE. Note that the exchange begins with the client sending an initial AUTH\_RESPONSE in response to a server AUTHENTICATE request.

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

The response to a AUTH\_RESPONSE is either a follow-up AUTH\_CHALLENGE message, an AUTH\_SUCCESS message or an ERROR message.

#### 4.1.3. OPTIONS

Asks the server to return which STARTUP options are supported. The body of an OPTIONS message should be empty and the server will respond with a SUPPORTED message.

#### 4.1.4. QUERY

Performs a CQL query. The body of the message must be:

<query><query\_parameters>

where <query> is a [long string] representing the query and

<query\_parameters> must be

<consistency><flags>[<n>[name\_1]<value\_1>...[name\_n]<value\_n>][<result\_page\_size>][<paging\_state>]  
[<serial\_consistency>][<timestamp>][<keyspace>][<continuous\_paging\_options>]

where:

- <consistency> is the [consistency] level for the operation.
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains.

A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x00000001: Values. If set, a [short] <n> followed by <n> [value] values are provided. Those values are used for bound variables in the query. Optionally, if the 0x40 flag is present, each value will be preceded by a [string] name, representing the name of the marker the value must be bound to.

0x00000002: Skip\_metadata. If set, the Result Set returned as a response to the query (if any) will have the NO\_METADATA flag (see Section 4.2.5.2).

0x00000004: Page\_size. If set, <result\_page\_size> is a positive [int] controlling the desired page size of the result in CQL3 rows or in bytes, if Page\_size\_bytes is set.

See the section on paging (Section 8) for more details.

0x00000008: With\_paging\_state. If set, <paging\_state> should be present. <paging\_state> is a [bytes] value that should have been returned in a result set (Section 4.2.5.2). The query will be executed but starting from a given paging state. An error will be returned if the paging\_state is present but no page\_size has been specified. The paging state can also be used to continue paging on a different node than the one where it started (See Section 8 for more details).

0x00000010: With\_serial\_consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x00000020: With\_default\_timestamp. If set, <timestamp> should be present. <timestamp> is a [long] representing the default timestamp for the query

in microseconds (negative values are forbidden). This will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x00000040: With names for values. This only makes sense if the 0x01 flag is set and is ignored otherwise. If present, the values from the 0x01 flag will be preceded by a name (see above). Note that this is only useful for QUERY requests where named bind markers are used; for EXECUTE statements, since the names for the expected values was returned during preparation, a client can always provide values in the right order without any names and using this flag, while supported, is almost surely inefficient.

0x00000080: With keyspace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keyspace that the query should be executed in. It supercedes the keyspace that the connection is bound to, if any.

0x40000000: Page\_size\_bytes. If set, <result\_page\_size> is expressed in bytes. The server will try to return a number of CQL rows whose total size is as close as possible to the requested page size, without splitting any CQL row however. This functionality is currently only supported with continuous paging, setting this flag without setting the continuous paging flag, will result in an error.

0x80000000: With continuous paging. If set, <continuous\_paging\_options> should be present.

This structure contains the following:

- <max\_num\_pages>, an [int] indicating the maximum number of pages that the server will send to the client in total, set this to zero to indicate no limit.
- <pages\_per\_second>, an [int] indicating the maximum number of pages per second, set this to zero to indicate no limit.
- <next\_pages>, an [int] indicating the number of pages that the client is ready to receive right now. The server will not send more pages than this number, until a REVISE\_UPDATE is received with a revision of type backpressure, see section 4.1.9. Set this parameter to zero to indicate no limit. In this case the server will send as many pages as it is able to send, up to <max\_num\_pages> and at the rate specified by <pages\_per\_second>.

When continuous paging is enabled, the query results will be pushed to the client asynchronously and according to the paging options in the request message, without the client having to request each single page. Each response message will have the same stream id as the initial request.

Continuous paging can be interrupted by the client at any time via a REVISE\_REQUEST with a revision of type cancel, see section 4.1.9.

Note that the consistency is ignored by some queries (USE, CREATE, ALTER, TRUNCATE, ...).

The server will respond to a QUERY message with a RESULT message, the content of which depends on the query.

#### 4.1.5. PREPARE

Prepare a query for later execution (through EXECUTE). The body of the message must be:

```
<query><flags>[<keyspace>]
```

where:

- <query> is a [long string] representing the CQL query.
  - <flags> is a [int] whose bits define the options for this statement and in particular influence what the remainder of the message contains.
- A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x01: With keyspace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keyspace that the query should be executed in. It supercedes the keyspace that the connection is bound to, if any.

The server will respond with a RESULT message with a `prepared` kind (0x0004, see Section 4.2.5).

#### 4.1.6. EXECUTE

Executes a prepared query. The body of the message must be:

<id><result\_metadata\_id><query\_parameters>

where

- <id> is the prepared query ID. It's the [short bytes] returned as a response to a PREPARE message. As for <query\_parameters>, it has the exact same definition as in QUERY (see Section 4.1.4).
- <result\_metadata\_id> is the ID of the resultset metadata that was sent along with response to PREPARE message. If a RESULT/Rows message reports changed resultset metadata with the Metadata\_changed flag, the reported new resultset metadata must be used in subsequent executions.

#### 4.1.7. BATCH

Allows executing a list of queries (prepared or not) as a batch (note that only DML statements are accepted in a batch). The body of the message must be:

<type><n><query\_1>...<query\_n><consistency><flags>[<serial\_consistency>][<timestamp>][<keyspace>]

where:

- <type> is a [byte] indicating the type of batch to use:
  - If <type> == 0, the batch will be "logged". This is equivalent to a normal CQL3 batch statement.
  - If <type> == 1, the batch will be "unlogged".
  - If <type> == 2, the batch will be a "counter" batch (and non-counter statements will be rejected).
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. It is similar to the <flags> from QUERY and EXECUTE methods, except that the 4 rightmost bits must always be 0 as their corresponding options do not make sense for Batch. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:
  - 0x10: With serial consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the

serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x20: With default timestamp. If set, <timestamp> should be present.

<timestamp> is a [long] representing the default timestamp for the query in microseconds. This will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x40: With names for values. If set, then all values for all <query\_i> must be preceded by a [string] <name\_i> that have the same meaning as in QUERY requests [IMPORTANT NOTE: this feature does not work and should not be used. It is specified in a way that makes it impossible for the server to implement. This will be fixed in a future version of the native protocol. See <https://issues.apache.org/jira/browse/CASSANDRA-10246> for more details].

0x80: With keyspace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keyspace that the query should be executed in.

It supercedes the keyspace that the connection is bound to, if any.

- <n> is a [short] indicating the number of following queries.
- <query\_1>...<query\_n> are the queries to execute. A <query\_i> must be of the form:  
    <kind><string\_or\_id><n>[<name\_1><value\_1>...<name\_n><value\_n>  
where:
  - <kind> is a [byte] indicating whether the following query is a prepared one or not. <kind> value must be either 0 or 1.
  - <string\_or\_id> depends on the value of <kind>. If <kind> == 0, it should be a [long string] query string (as in QUERY, the query string might contain bind markers). Otherwise (that is, if <kind> == 1), it should be a [short bytes] representing a prepared query ID.
  - <n> is a [short] indicating the number (possibly 0) of following values.
  - <name\_i> is the optional name of the following <value\_i>. It must be present if and only if the 0x40 flag is provided for the batch.
  - <value\_i> is the [value] to use for bound variable i (of bound variable <name\_i> if the 0x40 flag is used).
- <consistency> is the [consistency] level for the operation.
- <serial\_consistency> is only present if the 0x10 flag is set. In that case, <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present will defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

The server will respond with a RESULT message.

#### 4.1.8. REGISTER

Register this connection to receive some types of events. The body of the

message is a [string list] representing the event types to register for. See section 4.2.6 for the list of valid event types.

The response to a REGISTER message will be a READY message.

Please note that if a client driver maintains multiple connections to a Cassandra node and/or connections to multiple nodes, it is advised to dedicate a handful of connections to receive events, but to *\*not\** register for events on all connections, as this would only result in receiving multiple times the same event messages, wasting bandwidth.

#### 4.1.9. REVISE\_REQUEST

Revise a previous request, typically a long running request such as continuous paging.

The body of the message is:

- an [int] identifying the revision type:
  - 0x00000001 to cancel a continuous paging session, see section 4.1.4
  - 0x00000002 to request more pages for a continuous paging session with next\_pages > 0, see section 4.1.4
- an [int] equal to the stream id of the initial request message.
- Optional parameters specific to the revision type:
  - for revision type 2, then [next\_pages] as described in section 4.1.4

The server will reply with a RESULT of type ROWS (section 4.2.5.2), containing a single row with a single boolean value, which is set to:

- true if the update succeeded,
- false if the initial request was not found or is no longer running.

If the initial request is found but the update cannot be carried out, then an error is returned instead.

## 4.2. Responses

This section describes the content of the frame body for the different responses. Please note that to make room for future evolution, clients should support extra informations (that they should simply discard) to the one described in this document at the end of the frame body.

### 4.2.1. ERROR

Indicates an error processing a request. The body of the message will be an error code ([int]) followed by a [string] error message. Then, depending on the exception, more content may follow. The error codes are defined in Section 9, along with their additional content if any.

### 4.2.2. READY

Indicates that the server is ready to process queries. This message will be

sent by the server either after a STARTUP message if no authentication is required (if authentication is required, the server indicates readiness by sending a AUTH\_RESPONSE message).

The body of a READY message is empty.

#### 4.2.3. AUTHENTICATE

Indicates that the server requires authentication, and which authentication mechanism to use.

The authentication is SASL based and thus consists of a number of server challenges (AUTH\_CHALLENGE, Section 4.2.7) followed by client responses (AUTH\_RESPONSE, Section 4.1.2). The initial exchange is however bootstrapped by an initial client response. The details of that exchange (including how many challenge-response pairs are required) are specific to the authenticator in use. The exchange ends when the server sends an AUTH\_SUCCESS message or an ERROR message.

This message will be sent following a STARTUP message if authentication is required and must be answered by a AUTH\_RESPONSE message from the client.

The body consists of a single [string] indicating the full class name of the IAuthenticator in use.

#### 4.2.4. SUPPORTED

Indicates which startup options are supported by the server. This message comes as a response to an OPTIONS message.

The body of a SUPPORTED message is a [string multimap]. This multimap gives for each of the supported STARTUP options, the list of supported values. It also includes:

- "PROTOCOL\_VERSIONS": the list of native protocol versions that are supported, encoded as the version number followed by a slash and the version description. For example: 3/v3, 4/v4, 5/v5-beta. If a version is in beta, it will have the word "beta" in its description.

#### 4.2.5. RESULT

The result to a query (QUERY, PREPARE, EXECUTE or BATCH messages).

The first element of the body of a RESULT message is an [int] representing the `kind` of result. The rest of the body depends on the kind. The kind can be one of:

- 0x0001 Void: for results carrying no information.
- 0x0002 Rows: for results to select queries, returning a set of rows.
- 0x0003 Set\_keyspace: the result to a `use` query.
- 0x0004 Prepared: result to a PREPARE message.
- 0x0005 Schema\_change: the result to a schema altering query.

The body for each kind (after the [int] kind) is defined below.

#### 4.2.5.1. Void

The rest of the body for a Void result is empty. It indicates that a query was successful without providing more information.

#### 4.2.5.2. Rows

Indicates a set of rows. The rest of the body of a Rows result is:

<metadata><rows\_count><rows\_content>

where:

- <metadata> is composed of:

<flags><columns\_count>[<paging\_state>][<new\_metadata\_id>][<continuous\_page\_no>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x00000001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.

0x00000002 Has\_more\_pages: indicates whether this is not the last page of results and more should be retrieved. If set, the <paging\_state> will be present. The <paging\_state> is a [bytes] value that should be used in QUERY/EXECUTE to continue paging and retrieve the remainder of the result for this query (See Section 8 for more details).

0x00000004 No\_metadata: if set, the <metadata> is only composed of these <flags>, the <column\_count> and optionally the <paging\_state> and <continuous\_page\_no> (depending on the corresponding flags) but no other information (so no <global\_table\_spec> nor <col\_spec\_i>).

This will only ever be the case if this was requested during the query (see QUERY and RESULT messages).

0x00000008 Metadata\_changed: if set, the No\_metadata flag has to be unset and <new\_metadata\_id> has to be supplied. This flag is to be used to avoid a roundtrip in case of metadata changes for queries that requested metadata to be skipped.

0x40000000 continuous paging: if set, this page is part of a continuous paging session, as requested by the client. <continuous\_page\_no> will be present, this is an [int] that identifies the sequential number of this page in the session, and the last\_continuous\_page flag below will be set for the final page.

0x80000000 Last\_continuous\_page: indicates that this is the last continuous page that will be sent in the continuous paging session. This flag can only be set when the continuous paging flag is also set. Note that this may not necessarily be the last page of the query results, for this it is necessary to look at Has\_more\_pages (this could happen if the client only requested the first N pages in the continuous paging session, or if it sent a CANCEL message).

- <columns\_count> is an [int] representing the number of columns selected by the query that produced this result. It defines the number of <col\_spec\_i> elements in and the number of elements for each row in <rows\_content>.
- <new\_metadata\_id> is [short bytes] representing the new, changed resultset metadata. The new metadata ID must also be used in subsequent executions of the corresponding prepared statement, if any.
- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. It is composed of two [string] representing the (unique) keyspace name and table name the columns belong to.
- <col\_spec\_i> specifies the columns returned in the query. There are <column\_count> such column specifications that are composed of:  
(<kname><tablename>)?<name><type>

The initial <kname> and <tablename> are two [string] and are only present if the Global\_tables\_spec flag is not set. The <column\_name> is a [string] and <type> is an [option] that corresponds to the description (what this description is depends a bit on the context: in results to selects, this will be either the user chosen alias or the selection used (often a column name, but it can be a function call too). In results to a PREPARE, this will be either the name of the corresponding bind variable or the column name for the variable if it is "anonymous") and type of the corresponding result. The option for <type> is either a native type (see below), in which case the option has no value, or a 'custom' type, in which case the value is a [string] representing the fully qualified class name of the type represented. Valid option ids are:

- 0x0000 Custom: the value is a [string], see above.
- 0x0001 Ascii
- 0x0002 Bigint
- 0x0003 Blob
- 0x0004 Boolean
- 0x0005 Counter
- 0x0006 Decimal
- 0x0007 Double
- 0x0008 Float
- 0x0009 Int
- 0x000B Timestamp

- 0x000C Uuid
- 0x000D Varchar
- 0x000E Varint
- 0x000F Timeuuid
- 0x0010 Inet
- 0x0011 Date
- 0x0012 Time
- 0x0013 Smallint
- 0x0014 Tinyint
- 0x0015 Duration
- 0x0020 List: the value is an [option], representing the type of the elements of the list.
- 0x0021 Map: the value is two [option], representing the types of the keys and values of the map
- 0x0022 Set: the value is an [option], representing the type of the elements of the set
- 0x0030 UDT: the value is <ks><udt\_name><n><name\_1><type\_1>...<name\_n><type\_n> where:
  - <ks> is a [string] representing the keyspace name this UDT is part of.
  - <udt\_name> is a [string] representing the UDT name.
  - <n> is a [short] representing the number of fields of the UDT, and thus the number of <name\_i><type\_i> pairs following
  - <name\_i> is a [string] representing the name of the i\_th field of the UDT.
  - <type\_i> is an [option] representing the type of the i\_th field of the UDT.
- 0x0031 Tuple: the value is <n><type\_1>...<type\_n> where <n> is a [short] representing the number of values in the type, and <type\_i> are [option] representing the type of the i\_th component of the tuple

- <rows\_count> is an [int] representing the number of rows present in this result. Those rows are serialized in the <rows\_content> part.
- <rows\_content> is composed of <row\_1>...<row\_m> where m is <rows\_count>. Each <row\_i> is composed of <value\_1>...<value\_n> where n is <columns\_count> and where <value\_j> is a [bytes] representing the value returned for the jth column of the ith row. In other words, <rows\_content> is composed of (<rows\_count> \* <columns\_count>) [bytes].

#### 4.2.5.3. Set\_keyspace

The result to a `use` query. The body (after the kind [int]) is a single [string] indicating the name of the keyspace that has been set.

#### 4.2.5.4. Prepared

The result to a PREPARE message. The body of a Prepared result is:

<id><result\_metadata\_id><metadata><result\_metadata>

where:

- <id> is [short bytes] representing the prepared query ID.
- <result\_metadata\_id> is [short bytes] representing the resultset metadata ID.
- <metadata> is composed of:

<flags><columns\_count><pk\_count>[<pk\_index\_1>...<pk\_index\_n>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported masks and their flags are:
  - 0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.
- <columns\_count> is an [int] representing the number of bind markers in the prepared statement. It defines the number of <col\_spec\_i> elements.
- <pk\_count> is an [int] representing the number of <pk\_index\_i> elements to follow. If this value is zero, at least one of the partition key columns in the table that the statement acts on did not have a corresponding bind marker (or the bind marker was wrapped in a function call).
- <pk\_index\_i> is a short that represents the index of the bind marker that corresponds to the partition key column in position i. For example, a <pk\_index> sequence of [2, 0, 1] indicates that the table has three partition key columns; the full partition key can be constructed by creating a composite of the values for the bind markers at index 2, at index 0, and at index 1. This allows implementations with token-aware routing to correctly construct the partition key without needing to inspect table metadata.
- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. If present, it is composed of two [string]s. The first [string] is the name of the keyspace that the statement acts on. The second [string] is the name of the table that the columns represented by the bind markers belong to.
- <col\_spec\_i> specifies the bind markers in the prepared statement. There are <column\_count> such column specifications, each with the following format:
  - (<kname><tablename>)?<name><type>The initial <kname> and <tablename> are two [string] that are only present if the Global\_tables\_spec flag is not set. The <name> field is a [string] that holds the name of the bind marker (if named), or the name of the column, field, or expression that the bind marker

corresponds to (if the bind marker is "anonymous"). The <type> field is an [option] that represents the expected type of values for the bind marker. See the Rows documentation (section 4.2.5.2) for full details on the <type> field.

- <result\_metadata> is defined exactly the same as <metadata> in the Rows documentation (section 4.2.5.2). This describes the metadata for the result set that will be returned when this prepared statement is executed. Note that <result\_metadata> may be empty (have the No\_metadata flag and 0 columns, See section 4.2.5.2) and will be for any query that is not a Select. In fact, there is never a guarantee that this will be non-empty, so implementations should protect themselves accordingly. This result metadata is an optimization that allows implementations to later execute the prepared statement without requesting the metadata (see the Skip\_metadata flag in EXECUTE). Clients can safely discard this metadata if they do not want to take advantage of that optimization.

Note that the prepared query ID returned is global to the node on which the query has been prepared. It can be used on any connection to that node until the node is restarted (after which the query must be reprepared).

#### 4.2.5.5. Schema\_change

The result to a schema altering query (creation/update/drop of a keyspace/table/index). The body (after the kind [int]) is the same as the body for a "SCHEMA\_CHANGE" event, so 3 strings:

<change\_type><target><options>

Please refer to section 4.2.6 below for the meaning of those fields.

Note that a query to create or drop an index is considered to be a change to the table the index is on.

#### 4.2.6. EVENT

An event pushed by the server. A client will only receive events for the types it has REGISTERed to. The body of an EVENT message will start with a [string] representing the event type. The rest of the message depends on the event type. The valid event types are:

- "TOPOLOGY\_CHANGE": events related to change in the cluster topology. Currently, events are sent when new nodes are added to the cluster, and when nodes are removed. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of change ("NEW\_NODE" or "REMOVED\_NODE") followed by the address of the new/removed node.
- "STATUS\_CHANGE": events related to change of node status. Currently, up/down events are sent. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the

type of status change ("UP" or "DOWN") followed by the address of the concerned node.

- "SCHEMA\_CHANGE": events related to schema change. After the event type, the rest of the message will be <change\_type><target><options> where:
  - <change\_type> is a [string] representing the type of changed involved. It will be one of "CREATED", "UPDATED" or "DROPPED".
  - <target> is a [string] that can be one of "KEYSPACE", "TABLE", "TYPE", "FUNCTION" or "AGGREGATE" and describes what has been modified ("TYPE" stands for modifications related to user types, "FUNCTION" for modifications related to user defined functions, "AGGREGATE" for modifications related to user defined aggregates).
  - <options> depends on the preceding <target>:
    - If <target> is "KEYSPACE", then <options> will be a single [string] representing the keyspace changed.
    - If <target> is "TABLE" or "TYPE", then <options> will be 2 [string]: the first one will be the keyspace containing the affected object, and the second one will be the name of said affected object (either the table, user type, function, or aggregate name).
    - If <target> is "FUNCTION" or "AGGREGATE", multiple arguments follow:
      - [string] keyspace containing the user defined function / aggregate
      - [string] the function/aggregate name
      - [string list] one string for each argument type (as CQL type)

All EVENT messages have a streamId of -1 (Section 2.3).

Please note that "NEW\_NODE" and "UP" events are sent based on internal Gossip communication and as such may be sent a short delay before the binary protocol server on the newly up node is fully started. Clients are thus advised to wait a short time before trying to connect to the node (1 second should be enough), otherwise they may experience a connection refusal at first.

#### 4.2.7. AUTH\_CHALLENGE

A server authentication challenge (see AUTH\_RESPONSE (Section 4.1.2) for more details).

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

Clients are expected to answer the server challenge with an AUTH\_RESPONSE message.

#### 4.2.8. AUTH\_SUCCESS

Indicates the success of the authentication phase. See Section 4.2.3 for more

details.

The body of this message is a single [bytes] token holding final information from the server that the client may require to finish the authentication process. What that token contains and whether it can be null depends on the actual authenticator used.

## 5. Compression

Frame compression is supported by the protocol, but then only the frame body is compressed (the frame header should never be compressed).

Before being used, client and server must agree on a compression algorithm to use, which is done in the STARTUP message. As a consequence, a STARTUP message must never be compressed. However, once the STARTUP frame has been received by the server, messages can be compressed (including the response to the STARTUP request). Frames do not have to be compressed, however, even if compression has been agreed upon (a server may only compress frames above a certain size at its discretion). A frame body should be compressed if and only if the compressed flag (see Section 2.2) is set.

As of version 2 of the protocol, the following compressions are available:

- lz4 (<https://code.google.com/p/lz4/>). In that, note that the first four bytes of the body will be the uncompressed length (followed by the compressed bytes).
- snappy (<https://code.google.com/p/snappy/>). This compression might not be available as it depends on a native lib (server-side) that might not be available on some installations.

## 6. Data Type Serialization Formats

This sections describes the serialization formats for all CQL data types supported by Cassandra through the native protocol. These serialization formats should be used by client drivers to encode values for EXECUTE messages. Cassandra will use these formats when returning values in RESULT messages.

All values are represented as [bytes] in EXECUTE and RESULT messages. The [bytes] format includes an int prefix denoting the length of the value. For that reason, the serialization formats described here will not include a length component.

For legacy compatibility reasons, note that most non-string types support "empty" values (i.e. a value with zero length). An empty value is distinct from NULL, which is encoded with a negative length.

As with the rest of the native protocol, all encodings are big-endian.

## 6.1. ascii

A sequence of bytes in the ASCII range [0, 127]. Bytes with values outside of this range will result in a validation error.

## 6.2 bigint

An eight-byte two's complement integer.

## 6.3 blob

Any sequence of bytes.

## 6.4 boolean

A single byte. A value of 0 denotes "false"; any other value denotes "true". (However, it is recommended that a value of 1 be used to represent "true".)

## 6.5 date

An unsigned integer representing days with epoch centered at  $2^{31}$ . (unix epoch January 1st, 1970).

A few examples:

0: -5877641-06-23

$2^{31}$ : 1970-1-1

$2^{32}$ : 5881580-07-11

## 6.6 decimal

The decimal format represents an arbitrary-precision number. It contains an [int] "scale" component followed by a varint encoding (see section 6.17) of the unscaled value. The encoded value represents " $\langle \text{unscaled} \rangle E \langle -\text{scale} \rangle$ ". In other words, " $\langle \text{unscaled} \rangle * 10^{(-1 * \langle \text{scale} \rangle)}$ ".

## 6.7 double

An 8 byte floating point number in the IEEE 754 binary64 format.

## 6.8 duration

A duration is composed of 3 signed variable length integers ([vint]s).

The first [vint] represents a number of months, the second [vint] represents a number of days, and the last [vint] represents a number of nanoseconds.

The number of months and days must be valid 32 bits integers whereas the number of nanoseconds must be a valid 64 bits integer.

A duration can either be positive or negative. If a duration is positive all the integers must be positive or zero. If a duration is

negative all the numbers must be negative or zero.

#### 6.9 float

A 4 byte floating point number in the IEEE 754 binary32 format.

#### 6.10 inet

A 4 byte or 16 byte sequence denoting an IPv4 or IPv6 address, respectively.

#### 6.11 int

A 4 byte two's complement integer.

#### 6.12 list

A [int] n indicating the number of elements in the list, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.13 map

A [int] n indicating the number of key/value pairs in the map, followed by n entries. Each entry is composed of two [bytes] representing the key and value.

#### 6.14 set

A [int] n indicating the number of elements in the set, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.15 smallint

A 2 byte two's complement integer.

#### 6.16 text

A sequence of bytes conforming to the UTF-8 specifications.

#### 6.17 time

An 8 byte two's complement long representing nanoseconds since midnight. Valid values are in the range 0 to 8639999999999

#### 6.18 timestamp

An 8 byte two's complement integer representing a millisecond-precision offset from the unix epoch (00:00:00, January 1st, 1970). Negative values represent a negative offset from the epoch.

### 6.19 timeuuid

A 16 byte sequence representing a version 1 UUID as defined by RFC 4122.

### 6.20 tinyint

A 1 byte two's complement integer.

### 6.21 tuple

A sequence of [bytes] values representing the items in a tuple. The encoding of each element depends on the data type for that position in the tuple.

Null values may be represented by using length -1 for the [bytes] representation of an element.

### 6.22 uuid

A 16 byte sequence representing any valid UUID as defined by RFC 4122.

### 6.23 varchar

An alias of the "text" type.

### 6.24 varint

A variable-length two's complement encoding of a signed integer.

The following examples may help implementors of this spec:

Value	Encoding
0	0x00
1	0x01
127	0x7F
128	0x0080
129	0x0081
-1	0xFF
-128	0x80
-129	0xFF7F

Note that positive numbers must use a most-significant byte with a value less than 0x80, because a most-significant bit of 1 indicates a negative value. Implementors should pad positive values that have a MSB  $\geq$  0x80 with a leading 0x00 byte.

## 7. User Defined Types

This section describes the serialization format for User defined types (UDT), as described in section 4.2.5.2.

A UDT value is composed of successive [bytes] values, one for each field of the UDT value (in the order defined by the type). A UDT value will generally have one value for each field of the type it represents, but it is allowed to have less values than the type has fields.

## 8. Result paging

The protocol allows for paging the result of queries. For that, the QUERY and EXECUTE messages have a <result\_page\_size> value that indicate the desired page size in CQL3 rows.

If a positive value is provided for <result\_page\_size>, the result set of the RESULT message returned for the query will contain at most the <result\_page\_size> first rows of the query result. If that first page of results contains the full result set for the query, the RESULT message (of kind `Rows`) will have the Has\_more\_pages flag \*not\* set. However, if some results are not part of the first response, the Has\_more\_pages flag will be set and the result will contain a <paging\_state> value. In that case, the <paging\_state> value should be used in a QUERY or EXECUTE message (that has the \*same\* query as the original one or the behavior is undefined) to retrieve the next page of results.

Only CQL3 queries that return a result set (RESULT message with a Rows `kind`) support paging. For other type of queries, the <result\_page\_size> value is ignored.

Note to client implementors:

- While <result\_page\_size> can be as low as 1, it will likely be detrimental to performance to pick a value too low. A value below 100 is probably too low for most use cases.
- Clients should not rely on the actual size of the result set returned to decide if there are more results to fetch or not. Instead, they should always check the Has\_more\_pages flag (unless they did not enable paging for the query obviously). Clients should also not assert that no result will have more than <result\_page\_size> results. While the current implementation always respects the exact value of <result\_page\_size>, we reserve the right to return slightly smaller or bigger pages in the future for performance reasons.
- The <paging\_state> is specific to a protocol version and drivers should not send a <paging\_state> returned by a node using the protocol v3 to query a node using the protocol v4 for instance.

## 9. Error codes

Let us recall that an ERROR message is composed of `<code><message>[...]` (see 4.2.1 for details). The supported error codes, as well as any additional information the message may contain after the `<message>` are described below:

0x0000 Server error: something unexpected happened. This indicates a server-side bug.

0x000A Protocol error: some client message triggered a protocol violation (for instance a QUERY message is sent before a STARTUP one has been sent)

0x0100 Authentication error: authentication was required and failed. The possible reason for failing depends on the authenticator in use, which may or may not include more detail in the accompanying error message.

0x1000 Unavailable exception. The rest of the ERROR message body will be `<cl><required><alive>`

where:

`<cl>` is the [consistency] level of the query that triggered the exception.

`<required>` is an [int] representing the number of nodes that should be alive to respect `<cl>`

`<alive>` is an [int] representing the number of replicas that were known to be alive when the request had been processed (since an unavailable exception has been triggered, there will be `<alive> < <required>`)

0x1001 Overloaded: the request cannot be processed because the coordinator node is overloaded

0x1002 Is\_bootstrapping: the request was a read request but the coordinator node is bootstrapping

0x1003 Truncate\_error: error during a truncation error.

0x1100 Write\_timeout: Timeout exception during a write request. The rest of the ERROR message body will be `<cl><received><blockfor><writeType>`

where:

`<cl>` is the [consistency] level of the query having triggered the exception.

`<received>` is an [int] representing the number of nodes having acknowledged the request.

`<blockfor>` is an [int] representing the number of replicas whose acknowledgement is required to achieve `<cl>`.

`<writeType>` is a [string] that describe the type of the write that timed out. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.

- "BATCH": the write was a (logged) batch write.

If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).

- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the timeout occurred during the write to the batch log when a (logged) batch write was requested.

0x1200 Read\_timeout: Timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose response is required to achieve <cl>. Please note that it is possible to have <received> >= <blockfor> if <data\_present> is false. Also in the (unlikely) case where <cl> is achieved but the coordinator node times out while waiting for read-repair acknowledgement.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data has not responded. Otherwise, the value is != 0.

0x1300 Read\_failure: A non-timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short] that has the following meaning:

0x0000 Unknown reason

0x0001 Too many tombstones read (as controlled by the yml tombstone\_failure\_threshold option)

0x0002 The query uses an index but that index is not available (built) on the queried <endpoint>.

0x0003 The query writes on some CDC enabled tables, but the CDC space is full (CDC data isn't consumed fast enough). Note

that this can only happen in Write\_failure in practice, but the reasons are shared between both exception.

0x0004 Some failures (one or more) were reported to the replica "leading" a counter write. The actual error didn't occur on the node that sent this failure, it is simply the node reporting it due to how counter writes work; the initial reason for the failure should have been logged on the actual replica on which the problem occurred).

0x0005 The table used by the query was not found on at least one of the replica. This strongly suggest a query was done on either a newly created or newly dropped table with having waited for schema agreement first.

0x0006 The keyspace used by the query was not found on at least one replica. Same likely cause as for tables above.

Any other value for <failurecode> must be considered as an Unknown reason (but drivers should not fail) as new <failurecode> may be added without a bump of the protocol version.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data had not responded. Otherwise, the value is != 0.

0x1400 Function\_failure: A (user defined) function failed during execution.

The rest of the ERROR message body will be

<keyspace><function><arg\_types>

where:

<keyspace> is the keyspace [string] of the failed function

<function> is the name [string] of the failed function

<arg\_types> [string list] one string for each argument type (as CQL type) of the failed function

0x1500 Write\_failure: A non-timeout exception during a write request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><write\_type>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short] whose meaning is the same than in Read\_failure (see above, though note that some reason only apply to writes and others only to reads).

<writeType> is a [string] that describes the type of the write that failed. The value of that string can be one

of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the failure occurred during the write to the batch log when a (logged) batch write was requested.

- 0x2000 Syntax\_error: The submitted query has a syntax error.
- 0x2100 Unauthorized: The logged user doesn't have the right to perform the query.
- 0x2200 Invalid: The query is syntactically correct but invalid.
- 0x2300 Config\_error: The query is invalid because of some configuration issue
- 0x2400 Already\_exists: The query attempted to create a keyspace or a table that was already existing. The rest of the ERROR message body will be <ks><table> where:
- <ks> is a [string] representing either the keyspace that already exists, or the keyspace in which the table that already exists is.
  - <table> is a [string] representing the name of the table that already exists. If the query was attempting to create a keyspace, <table> will be present but will be the empty string.
- 0x2500 Unprepared: Can be thrown while a prepared statement tries to be executed if the provided prepared statement ID is not known by this host. The rest of the ERROR message body will be [short bytes] representing the unknown ID.
- 0x8000 Client\_write\_failure: an error occurred when sending asynchronous results to the client, for example if the client is unable to keep up with the rate during a continuous paging session.

## 10. Changes

### 10.1. Changes from CQL binary protocol version 5

\* Second most significant bit in the frame version byte is set to one to indicate a dse protocol message (section 2.1)

\* Continuous paging:

\* Added options to QUERY message (section 4.1.4)

\* Added response parameters to ROWS response (section 4.2.5.2)

\* Added CANCEL message (section 4.1.9)

## 10.2. Changes from DSE binary protocol v1

\* Added keyspace field in QUERY, PREPARE, and BATCH messages (Sections 4.1.4, 4.1.5, and 4.1.7).

\* Added [int] flags field in PREPARE message (Section 4.1.5).

\* Added STARTUP message parameters to pass client instance, driver information and application information.

\* Added [next\_pages] to continuous paging QUERY messages (section 4.1.4)

\* Renamed CANCEL to REVISE\_REQUEST and added revision type 2 for updating [next\_pages] (section 4.1.9)

\* Add two new reasons for read failures (section 9, 'reasonmap' of the 'Read\_failure' case).

\* Added <result\_metadata\_id> to Prepared response (section 4.2.5.4) and EXECUTE request (section 4.1.6), and Metadata\_changed flag and <new\_metadata\_id> to Rows response (section 4.2.5.2).

Found in path(s):

## 1. Overview

The CQL binary protocol is a frame based protocol. Frames are defined as:

The protocol is big-endian (network byte order).

Each frame contains a fixed size header (9 bytes) followed by a variable size body. The header is described in Section 2. The content of the body depends on the header opcode value (the body can in particular be empty for some opcode values). The list of allowed opcode is defined Section 2.3 and the details of each corresponding message is described Section 4.

The protocol distinguishes 2 types of frames: requests and responses. Requests are those frame sent by the clients to the server, response are the ones sent by the server. Note however that the protocol supports server pushes (events) so responses does not necessarily come right after a client request.

Note to client implementors: clients library should always assume that the body of a given frame may contain more data than what is described in this

document. It will however always be safe to ignore the remaining of the frame body in such cases. The reason is that this may allow to sometimes extend the protocol with optional features without needing to change the protocol version.

## 2. Frame header

### 2.1. version

The version is a single byte that indicate both the direction of the message (request or response) and the version of the protocol in use. The up-most bit of version is used to define the direction of the message: 0 indicates a request, 1 indicates a responses. This can be useful for protocol analyzers to distinguish the nature of the packet from the direction which it is moving. The rest of that byte is the protocol version (3 for the protocol defined in this document). In other words, for this version of the protocol, version will have one of:

- 0x03 Request frame for this protocol version
- 0x83 Response frame for this protocol version

Please note that the while every message ship with the version, only one version of messages is accepted on a given connection. In other words, the first message exchanged (STARTUP) sets the version for the connection for the lifetime of this connection.

This document describe the version 3 of the protocol. For the changes made since version 2, see Section 10.

### 2.2. flags

Flags applying to this frame. The flags have the following meaning (described by the mask that allow to select them):

- 0x01: Compression flag. If set, the frame body is compressed. The actual compression to use should have been set up beforehand through the Startup message (which thus cannot be compressed; Section 4.1.1).
- 0x02: Tracing flag. For a request frame, this indicate the client requires tracing of the request. Note that not all requests support tracing. Currently, only QUERY, PREPARE and EXECUTE queries support tracing. Other requests will simply ignore the tracing flag if set. If a request support tracing and the tracing flag was set, the response to this request will have the tracing flag set and contain tracing information.  
If a response frame has the tracing flag set, its body contains a tracing ID. The tracing ID is a [uuid] and is the first thing in the frame body. The rest of the body will then be the usual body

corresponding to the response opcode.

The rest of the flags is currently unused and ignored.

### 2.3. stream

A frame has a stream id (a [short] value). When sending request messages, this stream id must be set by the client to a non-negative value (negative stream id are reserved for streams initiated by the server; currently all EVENT messages (section 4.2.6) have a streamId of -1). If a client sends a request message with the stream id X, it is guaranteed that the stream id of the response to that message will be X.

This allow to deal with the asynchronous nature of the protocol. If a client sends multiple messages simultaneously (without waiting for responses), there is no guarantee on the order of the responses. For instance, if the client writes REQ\_1, REQ\_2, REQ\_3 on the wire (in that order), the server might respond to REQ\_3 (or REQ\_2) first. Assigning different stream id to these 3 requests allows the client to distinguish to which request an received answer respond to. As there can only be 32768 different simultaneous streams, it is up to the client to reuse stream id.

Note that clients are free to use the protocol synchronously (i.e. wait for the response to REQ\_N before sending REQ\_N+1). In that case, the stream id can be safely set to 0. Clients should also feel free to use only a subset of the 32768 maximum possible stream ids if it is simpler for those implementation.

### 2.4. opcode

An integer byte that distinguish the actual message:

0x00	ERROR
0x01	STARTUP
0x02	READY
0x03	AUTHENTICATE
0x05	OPTIONS
0x06	SUPPORTED
0x07	QUERY
0x08	RESULT
0x09	PREPARE
0x0A	EXECUTE
0x0B	REGISTER
0x0C	EVENT
0x0D	BATCH
0x0E	AUTH_CHALLENGE
0x0F	AUTH_RESPONSE
0x10	AUTH_SUCCESS

Messages are described in Section 4.

(Note that there is no 0x04 message in this version of the protocol)

## 2.5. length

A 4 byte integer representing the length of the body of the frame (note: currently a frame is limited to 256MB in length).

## 3. Notations

To describe the layout of the frame body for the messages in Section 4, we define the following:

- [int] A 4 bytes signed integer
- [long] A 8 bytes signed integer
- [short] A 2 bytes unsigned integer
- [string] A [short] n, followed by n bytes representing an UTF-8 string.
- [long string] An [int] n, followed by n bytes representing an UTF-8 string.
- [uuid] A 16 bytes long uuid.
- [string list] A [short] n, followed by n [string].
- [bytes] A [int] n, followed by n bytes if n >= 0. If n < 0, no byte should follow and the value represented is `null`.
- [short bytes] A [short] n, followed by n bytes if n >= 0.
  
- [option] A pair of <id><value> where <id> is a [short] representing the option id and <value> depends on that option (and can be of size 0). The supported id (and the corresponding <value>) will be described when this is used.
- [option list] A [short] n, followed by n [option].
- [inet] An address (ip and port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address (in practice n can only be either 4 (IPv4) or 16 (IPv6)), following by one [int] representing the port.
- [consistency] A consistency level specification. This is a [short] representing a consistency level with the following correspondance:
  - 0x0000 ANY
  - 0x0001 ONE
  - 0x0002 TWO
  - 0x0003 THREE
  - 0x0004 QUORUM
  - 0x0005 ALL
  - 0x0006 LOCAL\_QUORUM

0x0007 EACH\_QUORUM  
0x0008 SERIAL  
0x0009 LOCAL\_SERIAL  
0x000A LOCAL\_ONE

[string map] A [short] n, followed by n pair <k><v> where <k> and <v> are [string].

[string multimap] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [string list].

## 4. Messages

### 4.1. Requests

Note that outside of their normal responses (described below), all requests can get an ERROR message (Section 4.2.1) as response.

#### 4.1.1. STARTUP

Initialize the connection. The server will respond by either a READY message (in which case the connection is ready for queries) or an AUTHENTICATE message (in which case credentials will need to be provided using AUTH\_RESPONSE).

This must be the first message of the connection, except for OPTIONS that can be sent before to find out the options supported by the server. Once the connection has been initialized, a client should not send any more STARTUP message.

The body is a [string map] of options. Possible options are:

- "CQL\_VERSION": the version of CQL to use. This option is mandatory and currently, the only version supported is "3.0.0". Note that this is different from the protocol version.
- "COMPRESSION": the compression algorithm to use for frames (See section 5). This is optional, if not specified no compression will be used.

#### 4.1.2. AUTH\_RESPONSE

Answers a server authentication challenge.

Authentication in the protocol is SASL based. The server sends authentication challenges (a bytes token) to which the client answer with this message. Those exchanges continue until the server accepts the authentication by sending a AUTH\_SUCCESS message after a client AUTH\_RESPONSE. It is however that client that initiate the exchange by sending an initial AUTH\_RESPONSE in response to a server AUTHENTICATE request.

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

The response to a AUTH\_RESPONSE is either a follow-up AUTH\_CHALLENGE message, an AUTH\_SUCCESS message or an ERROR message.

#### 4.1.3. OPTIONS

Asks the server to return what STARTUP options are supported. The body of an OPTIONS message should be empty and the server will respond with a SUPPORTED message.

#### 4.1.4. QUERY

Performs a CQL query. The body of the message must be:

<query><query\_parameters>

where <query> is a [long string] representing the query and

<query\_parameters> must be

<consistency><flags>[<n>[name\_1]<value\_1>...[name\_n]<value\_n>][<result\_page\_size>][<paging\_state>][<serial\_consistency>][<timestamp>]

where:

- <consistency> is the [consistency] level for the operation.
- <flags> is a [byte] whose bits define the options for this query and in particular influence what the remainder of the message contains. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given there mask:

0x01: Values. In that case, a [short] <n> followed by <n> [bytes] values are provided. Those value are used for bound variables in the query. Optionally, if the 0x40 flag is present, each value will be preceded by a [string] name, representing the name of the marker the value must be binded to. This is optional, and if not present, values will be binded by position.

0x02: Skip\_metadata. If present, the Result Set returned as a response to that query (if any) will have the NO\_METADATA flag (see Section 4.2.5.2).

0x04: Page\_size. In that case, <result\_page\_size> is an [int] controlling the desired page size of the result (in CQL3 rows). See the section on paging (Section 8) for more details.

0x08: With\_paging\_state. If present, <paging\_state> should be present. <paging\_state> is a [bytes] value that should have been returned in a result set (Section 4.2.5.2). If provided, the query will be executed but starting from a given paging state. This also to continue paging on a different node from the one it has been started (See Section 8 for more details).

0x10: With\_serial\_consistency. If present, <serial\_consistency> should be

present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else that a conditional update/insert.

0x20: With default timestamp. If present, <timestamp> should be present.

<timestamp> is a [long] representing the default timestamp for the query in microseconds (negative values are discouraged but supported for backward compatibility reasons except for the smallest negative value ( $-2^{63}$ ) that is forbidden). If provided, this will replace the server side assigned timestamp as default timestamp.

Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x40: With names for values. This only makes sense if the 0x01 flag is set and is ignored otherwise. If present, the values from the 0x01 flag will be preceded by a name (see above). Note that this is only useful for QUERY requests where named bind markers are used; for EXECUTE statements, since the names for the expected values was returned during preparation, a client can always provide values in the right order without any names and using this flag, while supported, is almost surely inefficient.

Note that the consistency is ignored by some queries (USE, CREATE, ALTER, TRUNCATE, ...).

The server will respond to a QUERY message with a RESULT message, the content of which depends on the query.

#### 4.1.5. PREPARE

Prepare a query for later execution (through EXECUTE). The body consists of the CQL query to prepare as a [long string].

The server will respond with a RESULT message with a `prepared` kind (0x0004, see Section 4.2.5).

#### 4.1.6. EXECUTE

Executes a prepared query. The body of the message must be:

<id><query\_parameters>

where <id> is the prepared query ID. It's the [short bytes] returned as a response to a PREPARE message. As for <query\_parameters>, it has the exact same definition than in QUERY (see Section 4.1.4).

The response from the server will be a RESULT message.

#### 4.1.7. BATCH

Allows executing a list of queries (prepared or not) as a batch (note that only DML statements are accepted in a batch). The body of the message must be:

```
<type><n><query_1>...<query_n><consistency><flags>[<serial_consistency>][<timestamp>]
```

where:

- <type> is a [byte] indicating the type of batch to use:
  - If <type> == 0, the batch will be "logged". This is equivalent to a normal CQL3 batch statement.
  - If <type> == 1, the batch will be "unlogged".
  - If <type> == 2, the batch will be a "counter" batch (and non-counter statements will be rejected).
- <flags> is a [byte] whose bits define the options for this query and in particular influence the remainder of the message contains. It is similar to the <flags> from QUERY and EXECUTE methods, except that the 4 rightmost bits must always be 0 as their corresponding option do not make sense for Batch. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given there mask:
  - 0x10: With serial consistency. If present, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else that a conditional update/insert.
  - 0x20: With default timestamp. If present, <timestamp> should be present. <timestamp> is a [long] representing the default timestamp for the query in microseconds. If provided, this will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.
  - 0x40: With names for values. If set, then all values for all <query\_i> must be preceded by a [string] <name\_i> that have the same meaning as in QUERY requests [IMPORTANT NOTE: this feature does not work and should not be used. It is specified in a way that makes it impossible for the server to implement. This will be fixed in a future version of the native protocol. See <https://issues.apache.org/jira/browse/CASSANDRA-10246> for more details].
- <n> is a [short] indicating the number of following queries.
- <query\_1>...<query\_n> are the queries to execute. A <query\_i> must be of the form:

```
<kind><string_or_id><n>[<name_1><value_1>...[<name_n><value_n>
```

where:
  - <kind> is a [byte] indicating whether the following query is a prepared one or not. <kind> value must be either 0 or 1.
  - <string\_or\_id> depends on the value of <kind>. If <kind> == 0, it should be a [long string] query string (as in QUERY, the query string might contain bind markers). Otherwise (that is, if <kind> == 1), it should be a [short bytes] representing a prepared query ID.

- <n> is a [short] indicating the number (possibly 0) of following values.
- <name\_i> is the optional name of the following <value\_i>. It must be present if and only if the 0x40 flag is provided for the batch.
- <value\_i> is the [bytes] to use for bound variable i (of bound variable <name\_i> if the 0x40 flag is used).
- <consistency> is the [consistency] level for the operation.
- <serial\_consistency> is only present if the 0x10 flag is set. In that case, <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present will default to SERIAL. This option will be ignored for anything else than a conditional update/insert.

The server will respond with a RESULT message.

#### 4.1.8. REGISTER

Register this connection to receive some type of events. The body of the message is a [string list] representing the event types to register to. See section 4.2.6 for the list of valid event types.

The response to a REGISTER message will be a READY message.

Please note that if a client driver maintains multiple connections to a Cassandra node and/or connections to multiple nodes, it is advised to dedicate a handful of connections to receive events, but to *\*not\** register for events on all connections, as this would only result in receiving multiple times the same event messages, wasting bandwidth.

## 4.2. Responses

This section describes the content of the frame body for the different responses. Please note that to make room for future evolution, clients should support extra informations (that they should simply discard) to the one described in this document at the end of the frame body.

### 4.2.1. ERROR

Indicates an error processing a request. The body of the message will be an error code ([int]) followed by a [string] error message. Then, depending on the exception, more content may follow. The error codes are defined in Section 9, along with their additional content if any.

### 4.2.2. READY

Indicates that the server is ready to process queries. This message will be

sent by the server either after a STARTUP message if no authentication is required, or after a successful CREDENTIALS message.

The body of a READY message is empty.

#### 4.2.3. AUTHENTICATE

Indicates that the server require authentication, and which authentication mechanism to use.

The authentication is SASL based and thus consists on a number of server challenges (AUTH\_CHALLENGE, Section 4.2.7) followed by client responses (AUTH\_RESPONSE, Section 4.1.2). The Initial exchange is however bootstrapped by an initial client response. The details of that exchange (including how much challenge-response pair are required) are specific to the authenticator in use. The exchange ends when the server sends an AUTH\_SUCCESS message or an ERROR message.

This message will be sent following a STARTUP message if authentication is required and must be answered by a AUTH\_RESPONSE message from the client.

The body consists of a single [string] indicating the full class name of the IAuthenticator in use.

#### 4.2.4. SUPPORTED

Indicates which startup options are supported by the server. This message comes as a response to an OPTIONS message.

The body of a SUPPORTED message is a [string multimap]. This multimap gives for each of the supported STARTUP options, the list of supported values.

#### 4.2.5. RESULT

The result to a query (QUERY, PREPARE, EXECUTE or BATCH messages).

The first element of the body of a RESULT message is an [int] representing the `kind` of result. The rest of the body depends on the kind. The kind can be one of:

- 0x0001 Void: for results carrying no information.
- 0x0002 Rows: for results to select queries, returning a set of rows.
- 0x0003 Set\_keyspace: the result to a `use` query.
- 0x0004 Prepared: result to a PREPARE message.
- 0x0005 Schema\_change: the result to a schema altering query.

The body for each kind (after the [int] kind) is defined below.

#### 4.2.5.1. Void

The rest of the body for a Void result is empty. It indicates that a query was successful without providing more information.

#### 4.2.5.2. Rows

Indicates a set of rows. The rest of body of a Rows result is:

<metadata><rows\_count><rows\_content>

where:

- <metadata> is composed of:

<flags><columns\_count>[<paging\_state>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining informations. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given there mask:

0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.

0x0002 Has\_more\_pages: indicates whether this is not the last page of results and more should be retrieve. If set, the <paging\_state> will be present. The <paging\_state> is a [bytes] value that should be used in QUERY/EXECUTE to continue paging and retrieve the remained of the result for this query (See Section 8 for more details).

0x0004 No\_metadata: if set, the <metadata> is only composed of these <flags>, the <column\_count> and optionally the <paging\_state> (depending on the Has\_more\_pages flage) but no other information (so no <global\_table\_spec> nor <col\_spec\_i>). This will only ever be the case if this was requested during the query (see QUERY and RESULT messages).

- <columns\_count> is an [int] representing the number of columns selected by the query this result is of. It defines the number of <col\_spec\_i> elements in and the number of element for each row in <rows\_content>.

- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. If present, it is composed of two [string] representing the (unique) keyspace name and table name the columns return are of.

- <col\_spec\_i> specifies the columns returned in the query. There is <column\_count> such column specifications that are composed of:  
(<ksname><tablename>)?<name><type>

The initial <ksname> and <tablename> are two [string] are only present if the Global\_tables\_spec flag is not set. The <column\_name> is a [string] and <type> is an [option] that correspond to the description

(what this description is depends a bit on the context: in results to selects, this will be either the user chosen alias or the selection used (often a column name, but it can be a function call too). In results to a PREPARE, this will be either the name of the bind variable corresponding or the column name for the variable if it is "anonymous") and type of the corresponding result. The option for <type> is either a native type (see below), in which case the option has no value, or a 'custom' type, in which case the value is a [string] representing the full qualified class name of the type represented. Valid option ids are:

- 0x0000 Custom: the value is a [string], see above.
- 0x0001 Ascii
- 0x0002 Bigint
- 0x0003 Blob
- 0x0004 Boolean
- 0x0005 Counter
- 0x0006 Decimal
- 0x0007 Double
- 0x0008 Float
- 0x0009 Int
- 0x000B Timestamp
- 0x000C Uuid
- 0x000D Varchar
- 0x000E Varint
- 0x000F Timeuuid
- 0x0010 Inet
- 0x0020 List: the value is an [option], representing the type of the elements of the list.
- 0x0021 Map: the value is two [option], representing the types of the keys and values of the map
- 0x0022 Set: the value is an [option], representing the type of the elements of the set
- 0x0030 UDT: the value is <ks><udt\_name><n><name\_1><type\_1>...<name\_n><type\_n> where:
  - <ks> is a [string] representing the keyspace name this UDT is part of.
  - <udt\_name> is a [string] representing the UDT name.
  - <n> is a [short] representing the number of fields of the UDT, and thus the number of <name\_i><type\_i> pair following
  - <name\_i> is a [string] representing the name of the i\_th field of the UDT.
  - <type\_i> is an [option] representing the type of the i\_th field of the UDT.
- 0x0031 Tuple: the value is <n><type\_1>...<type\_n> where <n> is a [short] representing the number of value in the type, and <type\_i> are [option] representing the type of the i\_th component of the tuple

- <rows\_count> is an [int] representing the number of rows present in this result. Those rows are serialized in the <rows\_content> part.
- <rows\_content> is composed of <row\_1>...<row\_m> where m is <rows\_count>. Each <row\_i> is composed of <value\_1>...<value\_n> where n is <columns\_count> and where <value\_j> is a [bytes] representing the value returned for the jth column of the ith row. In other words, <rows\_content> is composed of (<rows\_count> \* <columns\_count>) [bytes].

#### 4.2.5.3. Set\_keyspace

The result to a `use` query. The body (after the kind [int]) is a single [string] indicating the name of the keyspace that has been set.

#### 4.2.5.4. Prepared

The result to a PREPARE message. The rest of the body of a Prepared result is:

<id><metadata><result\_metadata>

where:

- <id> is [short bytes] representing the prepared query ID.
- <metadata> is defined exactly as for a Rows RESULT (See section 4.2.5.2; you can however assume that the Has\_more\_pages flag is always off) and is the specification for the variable bound in this prepare statement.
- <result\_metadata> is defined exactly as <metadata> but correspond to the metadata for the resultSet that execute this query will yield. Note that <result\_metadata> may be empty (have the No\_metadata flag and 0 columns, See section 4.2.5.2) and will be for any query that is not a Select. There is in fact never a guarantee that this will non-empty so client should protect themselves accordingly. The presence of this information is an optimization that allows to later execute the statement that has been prepared without requesting the metadata (Skip\_metadata flag in EXECUTE). Clients can safely discard this metadata if they do not want to take advantage of that optimization.

Note that prepared query ID return is global to the node on which the query has been prepared. It can be used on any connection to that node and this until the node is restarted (after which the query must be reprepared).

#### 4.2.5.5. Schema\_change

The result to a schema altering query (creation/update/drop of a keyspace/table/index). The body (after the kind [int]) is the same as the body for a "SCHEMA\_CHANGE" event, so 3 strings:

<change\_type><target><options>

Please refer to the section 4.2.6 below for the meaning of those fields.

Note that queries to create and drop an index are considered as change updating the table the index is on.

#### 4.2.6. EVENT

And event pushed by the server. A client will only receive events for the type it has REGISTER to. The body of an EVENT message will start by a [string] representing the event type. The rest of the message depends on the event type. The valid event types are:

- "TOPOLOGY\_CHANGE": events related to change in the cluster topology. Currently, events are sent when new nodes are added to the cluster, and when nodes are removed. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of change ("NEW\_NODE", "REMOVED\_NODE", or "MOVED\_NODE") followed by the address of the new/removed/moved node.
- "STATUS\_CHANGE": events related to change of node status. Currently, up/down events are sent. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of status change ("UP" or "DOWN") followed by the address of the concerned node.
- "SCHEMA\_CHANGE": events related to schema change. After the event type, the rest of the message will be <change\_type><target><options> where:
  - <change\_type> is a [string] representing the type of changed involved. It will be one of "CREATED", "UPDATED" or "DROPPED".
  - <target> is a [string] that can be one of "KEYSPACE", "TABLE" or "TYPE" and describes what has been modified ("TYPE" stands for modifications related to user types).
  - <options> depends on the preceding <target>. If <target> is "KEYSPACE", then <options> will be a single [string] representing the keyspace changed. Otherwise, if <target> is "TABLE" or "TYPE", then <options> will be 2 [string]: the first one will be the keyspace containing the affected object, and the second one will be the name of said affected object (so either the table name or the user type name).

All EVENT message have a streamId of -1 (Section 2.3).

Please note that "NEW\_NODE" and "UP" events are sent based on internal Gossip communication and as such may be sent a short delay before the binary protocol server on the newly up node is fully started. Clients are thus advise to wait a short time before trying to connect to the node (1 seconds should be enough), otherwise they may experience a connection refusal at first.

It is possible for the same event to be sent multiple times. Therefore, a client library should ignore the same event if it has already been notified of a change.

#### 4.2.7. AUTH\_CHALLENGE

A server authentication challenge (see AUTH\_RESPONSE (Section 4.1.2) for more details).

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

Clients are expected to answer the server challenge by an AUTH\_RESPONSE message.

#### 4.2.7. AUTH\_SUCCESS

Indicate the success of the authentication phase. See Section 4.2.3 for more details.

The body of this message is a single [bytes] token holding final information from the server that the client may require to finish the authentication process. What that token contains and whether it can be null depends on the actual authenticator used.

### 5. Compression

Frame compression is supported by the protocol, but then only the frame body is compressed (the frame header should never be compressed).

Before being used, client and server must agree on a compression algorithm to use, which is done in the STARTUP message. As a consequence, a STARTUP message must never be compressed. However, once the STARTUP frame has been received by the server can be compressed (including the response to the STARTUP request). Frame do not have to be compressed however, even if compression has been agreed upon (a server may only compress frame above a certain size at its discretion). A frame body should be compressed if and only if the compressed flag (see Section 2.2) is set.

As of this version 2 of the protocol, the following compressions are available:

- lz4 (<https://code.google.com/p/lz4/>). In that, note that the 4 first bytes of the body will be the uncompressed length (followed by the compressed bytes).
- snappy (<https://code.google.com/p/snappy/>). This compression might not be available as it depends on a native lib (server-side) that might not be available on some installation.

### 6. Data Type Serialization Formats

This sections describes the serialization formats for all CQL data types supported by Cassandra through the native protocol. These serialization formats should be used by client drivers to encode values for EXECUTE messages. Cassandra will use these formats when returning values in RESULT messages.

All values are represented as [bytes] in EXECUTE and RESULT messages. The [bytes] format includes an int prefix denoting the length of the value. For that reason, the serialization formats described here will not include a length component.

For legacy compatibility reasons, note that most non-string types support "empty" values (i.e. a value with zero length). An empty value is distinct from NULL, which is encoded with a negative length.

As with the rest of the native protocol, all encodings are big-endian.

#### 6.1. ascii

A sequence of bytes in the ASCII range [0, 127]. Bytes with values outside of this range will result in a validation error.

#### 6.2 bigint

An eight-byte two's complement integer.

#### 6.3 blob

Any sequence of bytes.

#### 6.4 boolean

A single byte. A value of 0 denotes "false"; any other value denotes "true". (However, it is recommended that a value of 1 be used to represent "true".)

#### 6.5 decimal

The decimal format represents an arbitrary-precision number. It contains an [int] "scale" component followed by a varint encoding (see section 6.17) of the unscaled value. The encoded value represents "<unscaled>E<-scale>". In other words, "<unscaled> \* 10 ^ (-1 \* <scale>)".

#### 6.6 double

An eight-byte floating point number in the IEEE 754 binary64 format.

#### 6.7 float

An four-byte floating point number in the IEEE 754 binary32 format.

#### 6.8 inet

A 4 byte or 16 byte sequence denoting an IPv4 or IPv6 address, respectively.

#### 6.9 int

A four-byte two's complement integer.

#### 6.10 list

A [int] n indicating the number of elements in the list, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.11 map

A [int] n indicating the number of key/value pairs in the map, followed by n entries. Each entry is composed of two [bytes] representing the key and value.

#### 6.12 set

A [int] n indicating the number of elements in the set, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.13 text

A sequence of bytes conforming to the UTF-8 specifications.

#### 6.14 timestamp

An eight-byte two's complement integer representing a millisecond-precision offset from the unix epoch (00:00:00, January 1st, 1970). Negative values represent a negative offset from the epoch.

#### 6.15 uuid

A 16 byte sequence representing any valid UUID as defined by RFC 4122.

#### 6.16 varchar

An alias of the "text" type.

#### 6.17 varint

A variable-length two's complement encoding of a signed integer.

The following examples may help implementors of this spec:

Value | Encoding

```
-----|-----  
  0 |  0x00  
  1 |  0x01  
127 |  0x7F  
128 | 0x0080  
129 | 0x0081  
 -1 |  0xFF  
-128 |  0x80  
-129 | 0xFF7F
```

Note that positive numbers must use a most-significant byte with a value less than 0x80, because a most-significant bit of 1 indicates a negative value. Implementors should pad positive values that have a MSB  $\geq$  0x80 with a leading 0x00 byte.

#### 6.18 timeuuid

A 16 byte sequence representing a version 1 UUID as defined by RFC 4122.

#### 6.19 tuple

A sequence of [bytes] values representing the items in a tuple. The encoding of each element depends on the data type for that position in the tuple.

Null values may be represented by using length -1 for the [bytes] representation of an element.

Within a tuple, all data types should use the v3 protocol serialization format.

### 7. User Defined Types

This section describes the serialization format for User defined types (UDT), as described in section 4.2.5.2.

A UDT value is composed of successive [bytes] values, one for each field of the UDT value (in the order defined by the type). A UDT value will generally have one value for each field of the type it represents, but it is allowed to have less values than the type has fields.

Within a user-defined type value, all data types should use the v3 protocol serialization format.

### 8. Result paging

The protocol allows for paging the result of queries. For that, the QUERY and EXECUTE messages have a <result\_page\_size> value that indicate the desired page size in CQL3 rows.

If a positive value is provided for <result\_page\_size>, the result set of the RESULT message returned for the query will contain at most the <result\_page\_size> first rows of the query result. If that first page of result contains the full result set for the query, the RESULT message (of kind `Rows`) will have the Has\_more\_pages flag \*not\* set. However, if some results are not part of the first response, the Has\_more\_pages flag will be set and the result will contain a <paging\_state> value. In that case, the <paging\_state> value should be used in a QUERY or EXECUTE message (that has the \*same\* query than the original one or the behavior is undefined) to retrieve the next page of results.

Only CQL3 queries that return a result set (RESULT message with a Rows `kind`) support paging. For other type of queries, the <result\_page\_size> value is ignored.

Note to client implementors:

- While <result\_page\_size> can be as low as 1, it will likely be detrimental to performance to pick a value too low. A value below 100 is probably too low for most use cases.
- Clients should not rely on the actual size of the result set returned to decide if there is more result to fetch or not. Instead, they should always check the Has\_more\_pages flag (unless they did not enabled paging for the query obviously). Clients should also not assert that no result will have more than <result\_page\_size> results. While the current implementation always respect the exact value of <result\_page\_size>, we reserve ourselves the right to return slightly smaller or bigger pages in the future for performance reasons.

## 9. Error codes

The supported error codes are described below:

0x0000 Server error: something unexpected happened. This indicates a server-side bug.

0x000A Protocol error: some client message triggered a protocol violation (for instance a QUERY message is sent before a STARTUP one has been sent)

0x0100 Bad credentials: CREDENTIALS request failed because Cassandra did not accept the provided credentials.

0x1000 Unavailable exception. The rest of the ERROR message body will be <cl><required><alive>

where:

<cl> is the [consistency] level of the query having triggered

the exception.

<required> is an [int] representing the number of node that should be alive to respect <cl>

<alive> is an [int] representing the number of replica that were known to be alive when the request has been processed (since an unavailable exception has been triggered, there will be <alive> < <required>)

0x1001 Overloaded: the request cannot be processed because the coordinator node is overloaded

0x1002 Is\_bootstrapping: the request was a read request but the coordinator node is bootstrapping

0x1003 Truncate\_error: error during a truncation error.

0x1100 Write\_timeout: Timeout exception during a write request. The rest of the ERROR message body will be

<cl><received><blockfor><writeType>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having acknowledged the request.

<blockfor> is an [int] representing the number of replica whose acknowledgement is required to achieve <cl>.

<writeType> is a [string] that describe the type of the write that timed out. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been send instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. Not batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the timeout occurred during the write to the batch log when a (logged) batch write was requested.

0x1200 Read\_timeout: Timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replica whose response is required to achieve <cl>. Please note that

it is possible to have `<received> >= <blockfor>` if `<data_present>` is false. And also in the (unlikely) case were `<cl>` is achieved but the coordinator node timeout while waiting for read-repair acknowledgement.

`<data_present>` is a single byte. If its value is 0, it means the replica that was asked for data has not responded. Otherwise, the value is `!= 0`.

- 0x2000 Syntax\_error: The submitted query has a syntax error.
- 0x2100 Unauthorized: The logged user doesn't have the right to perform the query.
- 0x2200 Invalid: The query is syntactically correct but invalid.
- 0x2300 Config\_error: The query is invalid because of some configuration issue
- 0x2400 Already\_exists: The query attempted to create a keyspace or a table that was already existing. The rest of the ERROR message body will be `<ks><table>` where:
  - `<ks>` is a [string] representing either the keyspace that already exists, or the keyspace in which the table that already exists is.
  - `<table>` is a [string] representing the name of the table that already exists. If the query was attempting to create a keyspace, `<table>` will be present but will be the empty string.
- 0x2500 Unprepared: Can be thrown while a prepared statement tries to be executed if the provide prepared statement ID is not known by this host. The rest of the ERROR message body will be [short bytes] representing the unknown ID.

## 10. Changes from v2

- \* stream id is now 2 bytes long (a [short] value), so the header is now 1 byte longer (9 bytes total).
- \* BATCH messages now have `<flags>` (like QUERY and EXECUTE) and a corresponding optional `<serial_consistency>` parameters (see Section 4.1.7).
- \* User Defined Types and tuple types have to added to ResultSet metadata (see 4.2.5.2) and a new section on the serialization format of UDT and tuple values has been added to the documentation (Section 7).
- \* The serialization format for collection has changed (both the collection size and the length of each argument is now 4 bytes long). See Section 6.
- \* QUERY, EXECUTE and BATCH messages can now optionally provide the default timestamp for the query. As this feature is optionally enabled by clients, implementing it is at the discretion of the client.
- \* QUERY and EXECUTE messages can now optionally provide the names for the values of the query. As this feature is optionally enabled by clients, implementing it is at the discretion of the client (Note that while the BATCH message has a flag for this, it actually doesn't work for BATCH, see Section 4.1.7 for details).
- \* The format of "Schema\_change" results (Section 4.2.5.5) and "SCHEMA\_CHANGE" events (Section 4.2.6) has been modified, and now includes changes related to user types.

## 1. Overview

The CQL binary protocol is a frame based protocol. Frames are defined as:

The protocol is big-endian (network byte order).

Each frame contains a fixed size header (9 bytes) followed by a variable size body. The header is described in Section 2. The content of the body depends on the header opcode value (the body can in particular be empty for some opcode values). The list of allowed opcodes is defined in Section 2.3 and the details of each corresponding message are described Section 4.

The protocol distinguishes two types of frames: requests and responses. Requests are those frames sent by the client to the server. Responses are those frames sent by the server to the client. Note, however, that the protocol supports server pushes (events) so a response does not necessarily come right after a client request.

Note to client implementors: client libraries should always assume that the body of a given frame may contain more data than what is described in this document. It will however always be safe to ignore the remainder of the frame body in such cases. The reason is that this may enable extending the protocol with optional features without needing to change the protocol version.

## 2. Frame header

### 2.1. version

The version is a single byte that indicates both the direction of the message (request or response) and the version of the protocol in use. The most significant bit of version is used to define the direction of the message: 0 indicates a request, 1 indicates a response. This can be useful for protocol analyzers to distinguish the nature of the packet from the direction in which it is moving. The rest of that byte is the protocol version (4 for the protocol

defined in this document). In other words, for this version of the protocol, version will be one of:

- 0x04 Request frame for this protocol version
- 0x84 Response frame for this protocol version

Please note that while every message ships with the version, only one version of messages is accepted on a given connection. In other words, the first message exchanged (STARTUP) sets the version for the connection for the lifetime of this connection.

This document describes version 4 of the protocol. For the changes made since version 3, see Section 10.

## 2.2. flags

Flags applying to this frame. The flags have the following meaning (described by the mask that allows selecting them):

- 0x01: Compression flag. If set, the frame body is compressed. The actual compression to use should have been set up beforehand through the Startup message (which thus cannot be compressed; Section 4.1.1).
- 0x02: Tracing flag. For a request frame, this indicates the client requires tracing of the request. Note that only QUERY, PREPARE and EXECUTE queries support tracing. Other requests will simply ignore the tracing flag if set. If a request supports tracing and the tracing flag is set, the response to this request will have the tracing flag set and contain tracing information.  
If a response frame has the tracing flag set, its body contains a tracing ID. The tracing ID is a [uuid] and is the first thing in the frame body. The rest of the body will then be the usual body corresponding to the response opcode.
- 0x04: Custom payload flag. For a request or response frame, this indicates that a generic key-value custom payload for a custom QueryHandler implementation is present in the frame. Such a custom payload is simply ignored by the default QueryHandler implementation.  
Currently, only QUERY, PREPARE, EXECUTE and BATCH requests support payload.  
Type of custom payload is [bytes map] (see below).
- 0x08: Warning flag. The response contains warnings which were generated by the server to go along with this response.  
If a response frame has the warning flag set, its body will contain the text of the warnings. The warnings are a [string list] and will be the first value in the frame body if the tracing flag is not set, or directly after the tracing ID if it is.

The rest of flags is currently unused and ignored.

## 2.3. stream

A frame has a stream id (a [short] value). When sending request messages, this stream id must be set by the client to a non-negative value (negative stream id are reserved for streams initiated by the server; currently all EVENT messages (section 4.2.6) have a streamId of -1). If a client sends a request message with the stream id X, it is guaranteed that the stream id of the response to that message will be X.

This helps to enable the asynchronous nature of the protocol. If a client sends multiple messages simultaneously (without waiting for responses), there is no guarantee on the order of the responses. For instance, if the client writes REQ\_1, REQ\_2, REQ\_3 on the wire (in that order), the server might respond to REQ\_3 (or REQ\_2) first. Assigning different stream ids to these 3 requests allows the client to distinguish to which request a received answer responds to. As there can only be 32768 different simultaneous streams, it is up to the client to reuse stream id.

Note that clients are free to use the protocol synchronously (i.e. wait for the response to REQ\_N before sending REQ\_{N+1}). In that case, the stream id can be safely set to 0. Clients should also feel free to use only a subset of the 32768 maximum possible stream ids if it is simpler for its implementation.

#### 2.4. opcode

An integer byte that distinguishes the actual message:

0x00	ERROR
0x01	STARTUP
0x02	READY
0x03	AUTHENTICATE
0x05	OPTIONS
0x06	SUPPORTED
0x07	QUERY
0x08	RESULT
0x09	PREPARE
0x0A	EXECUTE
0x0B	REGISTER
0x0C	EVENT
0x0D	BATCH
0x0E	AUTH_CHALLENGE
0x0F	AUTH_RESPONSE
0x10	AUTH_SUCCESS

Messages are described in Section 4.

(Note that there is no 0x04 message in this version of the protocol)

#### 2.5. length

A 4 byte integer representing the length of the body of the frame (note: currently a frame is limited to 256MB in length).

### 3. Notations

To describe the layout of the frame body for the messages in Section 4, we define the following:

- [int] A 4 bytes integer
- [long] A 8 bytes integer
- [short] A 2 bytes unsigned integer
- [string] A [short] n, followed by n bytes representing an UTF-8 string.
- [long string] An [int] n, followed by n bytes representing an UTF-8 string.
- [uuid] A 16 bytes long uuid.
- [string list] A [short] n, followed by n [string].
- [bytes] A [int] n, followed by n bytes if  $n \geq 0$ . If  $n < 0$ , no byte should follow and the value represented is `null`.
- [value] A [int] n, followed by n bytes if  $n \geq 0$ .  
If  $n == -1$  no byte should follow and the value represented is `null`.  
If  $n == -2$  no byte should follow and the value represented is `not set` not resulting in any change to the existing value.  
 $n < -2$  is an invalid value and results in an error.
- [short bytes] A [short] n, followed by n bytes if  $n \geq 0$ .
  
- [option] A pair of `<id><value>` where `<id>` is a [short] representing the option id and `<value>` depends on that option (and can be of size 0). The supported id (and the corresponding `<value>`) will be described when this is used.
- [option list] A [short] n, followed by n [option].
- [inet] An address (ip and port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address (in practice n can only be either 4 (IPv4) or 16 (IPv6)), following by one [int] representing the port.
- [consistency] A consistency level specification. This is a [short] representing a consistency level with the following correspondance:
  - 0x0000 ANY
  - 0x0001 ONE
  - 0x0002 TWO
  - 0x0003 THREE
  - 0x0004 QUORUM
  - 0x0005 ALL
  - 0x0006 LOCAL\_QUORUM
  - 0x0007 EACH\_QUORUM

0x0008 SERIAL  
0x0009 LOCAL\_SERIAL  
0x000A LOCAL\_ONE

[string map] A [short] n, followed by n pair <k><v> where <k> and <v> are [string].

[string multimap] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [string list].

[bytes map] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [bytes].

## 4. Messages

### 4.1. Requests

Note that outside of their normal responses (described below), all requests can get an ERROR message (Section 4.2.1) as response.

#### 4.1.1. STARTUP

Initialize the connection. The server will respond by either a READY message (in which case the connection is ready for queries) or an AUTHENTICATE message (in which case credentials will need to be provided using AUTH\_RESPONSE).

This must be the first message of the connection, except for OPTIONS that can be sent before to find out the options supported by the server. Once the connection has been initialized, a client should not send any more STARTUP messages.

The body is a [string map] of options. Possible options are:

- "CQL\_VERSION": the version of CQL to use. This option is mandatory and currently the only version supported is "3.0.0". Note that this is different from the protocol version.
- "COMPRESSION": the compression algorithm to use for frames (See section 5). This is optional; if not specified no compression will be used.

#### 4.1.2. AUTH\_RESPONSE

Answers a server authentication challenge.

Authentication in the protocol is SASL based. The server sends authentication challenges (a bytes token) to which the client answers with this message. Those exchanges continue until the server accepts the authentication by sending a AUTH\_SUCCESS message after a client AUTH\_RESPONSE. Note that the exchange begins with the client sending an initial AUTH\_RESPONSE in response to a server AUTHENTICATE request.

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

The response to a AUTH\_RESPONSE is either a follow-up AUTH\_CHALLENGE message, an AUTH\_SUCCESS message or an ERROR message.

#### 4.1.3. OPTIONS

Asks the server to return which STARTUP options are supported. The body of an OPTIONS message should be empty and the server will respond with a SUPPORTED message.

#### 4.1.4. QUERY

Performs a CQL query. The body of the message must be:

```
<query><query_parameters>  
where <query> is a [long string] representing the query and  
<query_parameters> must be  
<consistency><flags><n>[name_1]<value_1>...[name_n]<value_n>][<result_page_size>][<paging_state>][<serial  
_consistency>][<timestamp>]
```

where:

- <consistency> is the [consistency] level for the operation.
- <flags> is a [byte] whose bits define the options for this query and in particular influence what the remainder of the message contains. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x01: Values. If set, a [short] <n> followed by <n> [value] values are provided. Those values are used for bound variables in the query. Optionally, if the 0x40 flag is present, each value will be preceded by a [string] name, representing the name of the marker the value must be bound to.

0x02: Skip\_metadata. If set, the Result Set returned as a response to the query (if any) will have the NO\_METADATA flag (see Section 4.2.5.2).

0x04: Page\_size. If set, <result\_page\_size> is an [int] controlling the desired page size of the result (in CQL3 rows). See the section on paging (Section 8) for more details.

0x08: With\_paging\_state. If set, <paging\_state> should be present. <paging\_state> is a [bytes] value that should have been returned in a result set (Section 4.2.5.2). The query will be executed but starting from a given paging state. This is also to continue paging on a different node than the one where it started (See Section 8 for more details).

0x10: With\_serial\_consistency. If set, <serial\_consistency> should be

present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x20: With default timestamp. If set, <timestamp> should be present.

<timestamp> is a [long] representing the default timestamp for the query in microseconds (negative values are forbidden). This will replace the server side assigned timestamp as default timestamp.

Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x40: With names for values. This only makes sense if the 0x01 flag is set and is ignored otherwise. If present, the values from the 0x01 flag will be preceded by a name (see above). Note that this is only useful for QUERY requests where named bind markers are used; for EXECUTE statements, since the names for the expected values was returned during preparation, a client can always provide values in the right order without any names and using this flag, while supported, is almost surely inefficient.

Note that the consistency is ignored by some queries (USE, CREATE, ALTER, TRUNCATE, ...).

The server will respond to a QUERY message with a RESULT message, the content of which depends on the query.

#### 4.1.5. PREPARE

Prepare a query for later execution (through EXECUTE). The body consists of the CQL query to prepare as a [long string].

The server will respond with a RESULT message with a `prepared` kind (0x0004, see Section 4.2.5).

#### 4.1.6. EXECUTE

Executes a prepared query. The body of the message must be:

<id><query\_parameters>

where <id> is the prepared query ID. It's the [short bytes] returned as a response to a PREPARE message. As for <query\_parameters>, it has the exact same definition as in QUERY (see Section 4.1.4).

The response from the server will be a RESULT message.

#### 4.1.7. BATCH

Allows executing a list of queries (prepared or not) as a batch (note that only DML statements are accepted in a batch). The body of the message must be:

```
<type><n><query_1>...<query_n><consistency><flags>[<serial_consistency>][<timestamp>]
```

where:

- <type> is a [byte] indicating the type of batch to use:
  - If <type> == 0, the batch will be "logged". This is equivalent to a normal CQL3 batch statement.
  - If <type> == 1, the batch will be "unlogged".
  - If <type> == 2, the batch will be a "counter" batch (and non-counter statements will be rejected).
- <flags> is a [byte] whose bits define the options for this query and in particular influence what the remainder of the message contains. It is similar to the <flags> from QUERY and EXECUTE methods, except that the 4 rightmost bits must always be 0 as their corresponding options do not make sense for Batch. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:
  - 0x10: With serial consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.
  - 0x20: With default timestamp. If set, <timestamp> should be present. <timestamp> is a [long] representing the default timestamp for the query in microseconds. This will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.
  - 0x40: With names for values. If set, then all values for all <query\_i> must be preceded by a [string] <name\_i> that have the same meaning as in QUERY requests [IMPORTANT NOTE: this feature does not work and should not be used. It is specified in a way that makes it impossible for the server to implement. This will be fixed in a future version of the native protocol. See <https://issues.apache.org/jira/browse/CASSANDRA-10246> for more details].
- <n> is a [short] indicating the number of following queries.
- <query\_1>...<query\_n> are the queries to execute. A <query\_i> must be of the form:

```
<kind><string_or_id><n>[<name_1><value_1>...[<name_n><value_n>
```

where:
  - <kind> is a [byte] indicating whether the following query is a prepared one or not. <kind> value must be either 0 or 1.
  - <string\_or\_id> depends on the value of <kind>. If <kind> == 0, it should be a [long string] query string (as in QUERY, the query string might contain bind markers). Otherwise (that is, if <kind> == 1), it should be a [short bytes] representing a prepared query ID.
  - <n> is a [short] indicating the number (possibly 0) of following values.
  - <name\_i> is the optional name of the following <value\_i>. It must be present

- if and only if the 0x40 flag is provided for the batch.
- <value\_i> is the [value] to use for bound variable i (of bound variable <name\_i> if the 0x40 flag is used).
- <consistency> is the [consistency] level for the operation.
- <serial\_consistency> is only present if the 0x10 flag is set. In that case, <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present will default to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

The server will respond with a RESULT message.

#### 4.1.8. REGISTER

Register this connection to receive some types of events. The body of the message is a [string list] representing the event types to register for. See section 4.2.6 for the list of valid event types.

The response to a REGISTER message will be a READY message.

Please note that if a client driver maintains multiple connections to a Cassandra node and/or connections to multiple nodes, it is advised to dedicate a handful of connections to receive events, but to *\*not\** register for events on all connections, as this would only result in receiving multiple times the same event messages, wasting bandwidth.

## 4.2. Responses

This section describes the content of the frame body for the different responses. Please note that to make room for future evolution, clients should support extra informations (that they should simply discard) to the one described in this document at the end of the frame body.

### 4.2.1. ERROR

Indicates an error processing a request. The body of the message will be an error code ([int]) followed by a [string] error message. Then, depending on the exception, more content may follow. The error codes are defined in Section 9, along with their additional content if any.

### 4.2.2. READY

Indicates that the server is ready to process queries. This message will be sent by the server either after a STARTUP message if no authentication is required (if authentication is required, the server indicates readiness by

sending a AUTH\_RESPONSE message).

The body of a READY message is empty.

#### 4.2.3. AUTHENTICATE

Indicates that the server requires authentication, and which authentication mechanism to use.

The authentication is SASL based and thus consists of a number of server challenges (AUTH\_CHALLENGE, Section 4.2.7) followed by client responses (AUTH\_RESPONSE, Section 4.1.2). The initial exchange is however bootstrapped by an initial client response. The details of that exchange (including how many challenge-response pairs are required) are specific to the authenticator in use. The exchange ends when the server sends an AUTH\_SUCCESS message or an ERROR message.

This message will be sent following a STARTUP message if authentication is required and must be answered by a AUTH\_RESPONSE message from the client.

The body consists of a single [string] indicating the full class name of the IAuthenticator in use.

#### 4.2.4. SUPPORTED

Indicates which startup options are supported by the server. This message comes as a response to an OPTIONS message.

The body of a SUPPORTED message is a [string multimap]. This multimap gives for each of the supported STARTUP options, the list of supported values.

#### 4.2.5. RESULT

The result to a query (QUERY, PREPARE, EXECUTE or BATCH messages).

The first element of the body of a RESULT message is an [int] representing the `kind` of result. The rest of the body depends on the kind. The kind can be one of:

- 0x0001 Void: for results carrying no information.
- 0x0002 Rows: for results to select queries, returning a set of rows.
- 0x0003 Set\_keyspace: the result to a `use` query.
- 0x0004 Prepared: result to a PREPARE message.
- 0x0005 Schema\_change: the result to a schema altering query.

The body for each kind (after the [int] kind) is defined below.

#### 4.2.5.1. Void

The rest of the body for a Void result is empty. It indicates that a query was successful without providing more information.

#### 4.2.5.2. Rows

Indicates a set of rows. The rest of the body of a Rows result is:

<metadata><rows\_count><rows\_content>

where:

- <metadata> is composed of:

<flags><columns\_count>[<paging\_state>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.

0x0002 Has\_more\_pages: indicates whether this is not the last page of results and more should be retrieved. If set, the <paging\_state> will be present. The <paging\_state> is a [bytes] value that should be used in QUERY/EXECUTE to continue paging and retrieve the remainder of the result for this query (See Section 8 for more details).

0x0004 No\_metadata: if set, the <metadata> is only composed of these <flags>, the <column\_count> and optionally the <paging\_state> (depending on the Has\_more\_pages flag) but no other information (so no <global\_table\_spec> nor <col\_spec\_i>). This will only ever be the case if this was requested during the query (see QUERY and RESULT messages).

- <columns\_count> is an [int] representing the number of columns selected by the query that produced this result. It defines the number of <col\_spec\_i> elements in and the number of elements for each row in <rows\_content>.

- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. It is composed of two [string] representing the (unique) keyspace name and table name the columns belong to.

- <col\_spec\_i> specifies the columns returned in the query. There are <column\_count> such column specifications that are composed of:

(<ksname><tablename>)?<name><type>

The initial <ksname> and <tablename> are two [string] and are only present if the Global\_tables\_spec flag is not set. The <column\_name> is a [string] and <type> is an [option] that corresponds to the description (what this description is depends a bit on the context: in results to

selects, this will be either the user chosen alias or the selection used (often a column name, but it can be a function call too). In results to a PREPARE, this will be either the name of the corresponding bind variable or the column name for the variable if it is "anonymous") and type of the corresponding result. The option for <type> is either a native type (see below), in which case the option has no value, or a 'custom' type, in which case the value is a [string] representing the fully qualified class name of the type represented. Valid option ids are:

- 0x0000 Custom: the value is a [string], see above.
- 0x0001 Ascii
- 0x0002 Bigint
- 0x0003 Blob
- 0x0004 Boolean
- 0x0005 Counter
- 0x0006 Decimal
- 0x0007 Double
- 0x0008 Float
- 0x0009 Int
- 0x000B Timestamp
- 0x000C Uuid
- 0x000D Varchar
- 0x000E Varint
- 0x000F Timeuuid
- 0x0010 Inet
- 0x0011 Date
- 0x0012 Time
- 0x0013 Smallint
- 0x0014 Tinyint
- 0x0020 List: the value is an [option], representing the type of the elements of the list.
- 0x0021 Map: the value is two [option], representing the types of the keys and values of the map
- 0x0022 Set: the value is an [option], representing the type of the elements of the set
- 0x0030 UDT: the value is <ks><udt\_name><n><name\_1><type\_1>...<name\_n><type\_n>  
where:
  - <ks> is a [string] representing the keyspace name this UDT is part of.
  - <udt\_name> is a [string] representing the UDT name.
  - <n> is a [short] representing the number of fields of the UDT, and thus the number of <name\_i><type\_i> pairs following
  - <name\_i> is a [string] representing the name of the i\_th field of the UDT.
  - <type\_i> is an [option] representing the type of the i\_th field of the UDT.
- 0x0031 Tuple: the value is <n><type\_1>...<type\_n> where <n> is a [short]

representing the number of values in the type, and `<type_i>` are [option] representing the type of the `i`\_th component of the tuple

- `<rows_count>` is an [int] representing the number of rows present in this result. Those rows are serialized in the `<rows_content>` part.
- `<rows_content>` is composed of `<row_1>...<row_m>` where `m` is `<rows_count>`. Each `<row_i>` is composed of `<value_1>...<value_n>` where `n` is `<columns_count>` and where `<value_j>` is a [bytes] representing the value returned for the `j`th column of the `i`th row. In other words, `<rows_content>` is composed of  $(\text{<rows\_count> * <columns\_count>})$  [bytes].

#### 4.2.5.3. Set\_keyspace

The result to a ``use`` query. The body (after the kind [int]) is a single [string] indicating the name of the keyspace that has been set.

#### 4.2.5.4. Prepared

The result to a PREPARE message. The body of a Prepared result is:

`<id><metadata><result_metadata>`

where:

- `<id>` is [short bytes] representing the prepared query ID.
- `<metadata>` is composed of:

`<flags><columns_count><pk_count>[<pk_index_1>...<pk_index_n>][<global_table_spec>?<col_spec_1>...<col_spec_n>]`

where:

- `<flags>` is an [int]. The bits of `<flags>` provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its ``mask`` is set. Supported masks and their flags are:

0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as `<global_table_spec>`. If not set, `<global_table_spec>` is not present.

- `<columns_count>` is an [int] representing the number of bind markers in the prepared statement. It defines the number of `<col_spec_i>` elements.
- `<pk_count>` is an [int] representing the number of `<pk_index_i>` elements to follow. If this value is zero, at least one of the partition key columns in the table that the statement acts on did not have a corresponding bind marker (or the bind marker was wrapped in a function call).
- `<pk_index_i>` is a short that represents the index of the bind marker that corresponds to the partition key column in position `i`. For example, a `<pk_index>` sequence of [2, 0, 1] indicates that the table has three partition key columns; the full partition key

can be constructed by creating a composite of the values for the bind markers at index 2, at index 0, and at index 1.

This allows implementations with token-aware routing to correctly construct the partition key without needing to inspect table metadata.

- `<global_table_spec>` is present if the `Global_tables_spec` is set in `<flags>`. If present, it is composed of two [string]s. The first [string] is the name of the keyspace that the statement acts on. The second [string] is the name of the table that the columns represented by the bind markers belong to.
- `<col_spec_i>` specifies the bind markers in the prepared statement. There are `<column_count>` such column specifications, each with the following format:

`(<ksname><tablename>)?<name><type>`

The initial `<ksname>` and `<tablename>` are two [string] that are only present if the `Global_tables_spec` flag is not set. The `<name>` field is a [string] that holds the name of the bind marker (if named), or the name of the column, field, or expression that the bind marker corresponds to (if the bind marker is "anonymous"). The `<type>` field is an [option] that represents the expected type of values for the bind marker. See the Rows documentation (section 4.2.5.2) for full details on the `<type>` field.

- `<result_metadata>` is defined exactly the same as `<metadata>` in the Rows documentation (section 4.2.5.2). This describes the metadata for the result set that will be returned when this prepared statement is executed. Note that `<result_metadata>` may be empty (have the `No_metadata` flag and 0 columns, See section 4.2.5.2) and will be for any query that is not a Select. In fact, there is never a guarantee that this will be non-empty, so implementations should protect themselves accordingly. This result metadata is an optimization that allows implementations to later execute the prepared statement without requesting the metadata (see the `Skip_metadata` flag in EXECUTE). Clients can safely discard this metadata if they do not want to take advantage of that optimization.

Note that the prepared query ID returned is global to the node on which the query has been prepared. It can be used on any connection to that node until the node is restarted (after which the query must be reprepared).

#### 4.2.5.5. Schema\_change

The result to a schema altering query (creation/update/drop of a keyspace/table/index). The body (after the kind [int]) is the same as the body for a "SCHEMA\_CHANGE" event, so 3 strings:

`<change_type><target><options>`

Please refer to section 4.2.6 below for the meaning of those fields.

Note that a query to create or drop an index is considered to be a change

to the table the index is on.

#### 4.2.6. EVENT

An event pushed by the server. A client will only receive events for the types it has REGISTERed to. The body of an EVENT message will start with a [string] representing the event type. The rest of the message depends on the event type. The valid event types are:

- "TOPOLOGY\_CHANGE": events related to change in the cluster topology. Currently, events are sent when new nodes are added to the cluster, and when nodes are removed. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of change ("NEW\_NODE" or "REMOVED\_NODE") followed by the address of the new/removed node.
- "STATUS\_CHANGE": events related to change of node status. Currently, up/down events are sent. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of status change ("UP" or "DOWN") followed by the address of the concerned node.
- "SCHEMA\_CHANGE": events related to schema change. After the event type, the rest of the message will be <change\_type><target><options> where:
  - <change\_type> is a [string] representing the type of changed involved. It will be one of "CREATED", "UPDATED" or "DROPPED".
  - <target> is a [string] that can be one of "KEYSPACE", "TABLE", "TYPE", "FUNCTION" or "AGGREGATE" and describes what has been modified ("TYPE" stands for modifications related to user types, "FUNCTION" for modifications related to user defined functions, "AGGREGATE" for modifications related to user defined aggregates).
  - <options> depends on the preceding <target>:
    - If <target> is "KEYSPACE", then <options> will be a single [string] representing the keyspace changed.
    - If <target> is "TABLE" or "TYPE", then <options> will be 2 [string]: the first one will be the keyspace containing the affected object, and the second one will be the name of said affected object (either the table, user type, function, or aggregate name).
    - If <target> is "FUNCTION" or "AGGREGATE", multiple arguments follow:
      - [string] keyspace containing the user defined function / aggregate
      - [string] the function/aggregate name
      - [string list] one string for each argument type (as CQL type)

All EVENT messages have a streamId of -1 (Section 2.3).

Please note that "NEW\_NODE" and "UP" events are sent based on internal Gossip communication and as such may be sent a short delay before the binary protocol server on the newly up node is fully started. Clients are thus advised to wait a short time before trying to connect to the node (1 second

should be enough), otherwise they may experience a connection refusal at first.

#### 4.2.7. AUTH\_CHALLENGE

A server authentication challenge (see AUTH\_RESPONSE (Section 4.1.2) for more details).

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

Clients are expected to answer the server challenge with an AUTH\_RESPONSE message.

#### 4.2.8. AUTH\_SUCCESS

Indicates the success of the authentication phase. See Section 4.2.3 for more details.

The body of this message is a single [bytes] token holding final information from the server that the client may require to finish the authentication process. What that token contains and whether it can be null depends on the actual authenticator used.

### 5. Compression

Frame compression is supported by the protocol, but then only the frame body is compressed (the frame header should never be compressed).

Before being used, client and server must agree on a compression algorithm to use, which is done in the STARTUP message. As a consequence, a STARTUP message must never be compressed. However, once the STARTUP frame has been received by the server, messages can be compressed (including the response to the STARTUP request). Frames do not have to be compressed, however, even if compression has been agreed upon (a server may only compress frames above a certain size at its discretion). A frame body should be compressed if and only if the compressed flag (see Section 2.2) is set.

As of version 2 of the protocol, the following compressions are available:

- lz4 (<https://code.google.com/p/lz4/>). In that, note that the first four bytes of the body will be the uncompressed length (followed by the compressed bytes).
- snappy (<https://code.google.com/p/snappy/>). This compression might not be available as it depends on a native lib (server-side) that might not be available on some installations.

## 6. Data Type Serialization Formats

This sections describes the serialization formats for all CQL data types supported by Cassandra through the native protocol. These serialization formats should be used by client drivers to encode values for EXECUTE messages. Cassandra will use these formats when returning values in RESULT messages.

All values are represented as [bytes] in EXECUTE and RESULT messages. The [bytes] format includes an int prefix denoting the length of the value. For that reason, the serialization formats described here will not include a length component.

For legacy compatibility reasons, note that most non-string types support "empty" values (i.e. a value with zero length). An empty value is distinct from NULL, which is encoded with a negative length.

As with the rest of the native protocol, all encodings are big-endian.

### 6.1. ascii

A sequence of bytes in the ASCII range [0, 127]. Bytes with values outside of this range will result in a validation error.

### 6.2 bigint

An eight-byte two's complement integer.

### 6.3 blob

Any sequence of bytes.

### 6.4 boolean

A single byte. A value of 0 denotes "false"; any other value denotes "true". (However, it is recommended that a value of 1 be used to represent "true".)

### 6.5 date

An unsigned integer representing days with epoch centered at  $2^{31}$ . (unix epoch January 1st, 1970).

A few examples:

0: -5877641-06-23

$2^{31}$ : 1970-1-1

$2^{32}$ : 5881580-07-11

### 6.6 decimal

The decimal format represents an arbitrary-precision number. It contains an [int] "scale" component followed by a variant encoding (see section 6.17) of the unscaled value. The encoded value represents "<unscaled>E<-scale>". In other words, "<unscaled> \* 10 ^ (-1 \* <scale>)".

#### 6.7 double

An 8 byte floating point number in the IEEE 754 binary64 format.

#### 6.8 float

A 4 byte floating point number in the IEEE 754 binary32 format.

#### 6.9 inet

A 4 byte or 16 byte sequence denoting an IPv4 or IPv6 address, respectively.

#### 6.10 int

A 4 byte two's complement integer.

#### 6.11 list

A [int] n indicating the number of elements in the list, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.12 map

A [int] n indicating the number of key/value pairs in the map, followed by n entries. Each entry is composed of two [bytes] representing the key and value.

#### 6.13 set

A [int] n indicating the number of elements in the set, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.14 smallint

A 2 byte two's complement integer.

#### 6.15 text

A sequence of bytes conforming to the UTF-8 specifications.

#### 6.16 time

An 8 byte two's complement long representing nanoseconds since midnight.  
Valid values are in the range 0 to 8639999999999

#### 6.17 timestamp

An 8 byte two's complement integer representing a millisecond-precision offset from the unix epoch (00:00:00, January 1st, 1970). Negative values represent a negative offset from the epoch.

#### 6.18 timeuuid

A 16 byte sequence representing a version 1 UUID as defined by RFC 4122.

#### 6.19 tinyint

A 1 byte two's complement integer.

#### 6.20 tuple

A sequence of [bytes] values representing the items in a tuple. The encoding of each element depends on the data type for that position in the tuple. Null values may be represented by using length -1 for the [bytes] representation of an element.

#### 6.21 uuid

A 16 byte sequence representing any valid UUID as defined by RFC 4122.

#### 6.22 varchar

An alias of the "text" type.

#### 6.23 varint

A variable-length two's complement encoding of a signed integer.

The following examples may help implementors of this spec:

Value | Encoding

Value	Encoding
0	0x00
1	0x01
127	0x7F
128	0x0080
129	0x0081
-1	0xFF
-128	0x80
-129	0xFF7F

Note that positive numbers must use a most-significant byte with a value less than 0x80, because a most-significant bit of 1 indicates a negative value. Implementors should pad positive values that have a MSB  $\geq$  0x80 with a leading 0x00 byte.

## 7. User Defined Types

This section describes the serialization format for User defined types (UDT), as described in section 4.2.5.2.

A UDT value is composed of successive [bytes] values, one for each field of the UDT value (in the order defined by the type). A UDT value will generally have one value for each field of the type it represents, but it is allowed to have less values than the type has fields.

## 8. Result paging

The protocol allows for paging the result of queries. For that, the QUERY and EXECUTE messages have a `<result_page_size>` value that indicate the desired page size in CQL3 rows.

If a positive value is provided for `<result_page_size>`, the result set of the RESULT message returned for the query will contain at most the `<result_page_size>` first rows of the query result. If that first page of results contains the full result set for the query, the RESULT message (of kind ``Rows``) will have the `Has_more_pages` flag `*not*` set. However, if some results are not part of the first response, the `Has_more_pages` flag will be set and the result will contain a `<paging_state>` value. In that case, the `<paging_state>` value should be used in a QUERY or EXECUTE message (that has the `*same*` query as the original one or the behavior is undefined) to retrieve the next page of results.

Only CQL3 queries that return a result set (RESULT message with a `Rows`kind``) support paging. For other type of queries, the `<result_page_size>` value is ignored.

Note to client implementors:

- While `<result_page_size>` can be as low as 1, it will likely be detrimental to performance to pick a value too low. A value below 100 is probably too low for most use cases.
- Clients should not rely on the actual size of the result set returned to decide if there are more results to fetch or not. Instead, they should always check the `Has_more_pages` flag (unless they did not enable paging for the query obviously). Clients should also not assert that no result will have more than `<result_page_size>` results. While the current implementation always respects

- the exact value of `<result_page_size>`, we reserve the right to return slightly smaller or bigger pages in the future for performance reasons.
- The `<paging_state>` is specific to a protocol version and drivers should not send a `<paging_state>` returned by a node using the protocol v3 to query a node using the protocol v4 for instance.

## 9. Error codes

Let us recall that an ERROR message is composed of `<code><message>[...]` (see 4.2.1 for details). The supported error codes, as well as any additional information the message may contain after the `<message>` are described below:

- 0x0000 Server error: something unexpected happened. This indicates a server-side bug.
- 0x000A Protocol error: some client message triggered a protocol violation (for instance a QUERY message is sent before a STARTUP one has been sent)
- 0x0100 Authentication error: authentication was required and failed. The possible reason for failing depends on the authenticator in use, which may or may not include more detail in the accompanying error message.
- 0x1000 Unavailable exception. The rest of the ERROR message body will be `<cl><required><alive>`

where:

- `<cl>` is the [consistency] level of the query that triggered the exception.
- `<required>` is an [int] representing the number of nodes that should be alive to respect `<cl>`
- `<alive>` is an [int] representing the number of replicas that were known to be alive when the request had been processed (since an unavailable exception has been triggered, there will be `<alive> < <required>`)

- 0x1001 Overloaded: the request cannot be processed because the coordinator node is overloaded
- 0x1002 Is\_bootstrapping: the request was a read request but the coordinator node is bootstrapping
- 0x1003 Truncate\_error: error during a truncation error.
- 0x1100 Write\_timeout: Timeout exception during a write request. The rest of the ERROR message body will be `<cl><received><blockfor><writeType>`

where:

- `<cl>` is the [consistency] level of the query having triggered the exception.
- `<received>` is an [int] representing the number of nodes having acknowledged the request.
- `<blockfor>` is an [int] representing the number of replicas whose acknowledgement is required to achieve `<cl>`.
- `<writeType>` is a [string] that describe the type of the write

that timed out. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the timeout occurred during the write to the batch log when a (logged) batch write was requested.

0x1200 Read\_timeout: Timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose response is required to achieve <cl>. Please note that it is possible to have <received> >= <blockfor> if <data\_present> is false. Also in the (unlikely) case where <cl> is achieved but the coordinator node times out while waiting for read-repair acknowledgement.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data has not responded. Otherwise, the value is != 0.

0x1300 Read\_failure: A non-timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><numfailures><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<numfailures> is an [int] representing the number of nodes that experience a failure while executing the request.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data had not responded. Otherwise, the value is != 0.

0x1400 Function\_failure: A (user defined) function failed during execution.

The rest of the ERROR message body will be

<keyspace><function><arg\_types>

where:

<keyspace> is the keyspace [string] of the failed function

<function> is the name [string] of the failed function

<arg\_types> [string list] one string for each argument type (as CQL type) of the failed function

0x1500 Write\_failure: A non-timeout exception during a write request. The rest of the ERROR message body will be

<cl><received><blockfor><numfailures><write\_type>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<numfailures> is an [int] representing the number of nodes that experience a failure while executing the request.

<writeType> is a [string] that describes the type of the write that failed. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the failure occurred during the write to the batch log when a (logged) batch write was requested.

0x2000 Syntax\_error: The submitted query has a syntax error.

0x2100 Unauthorized: The logged user doesn't have the right to perform the query.

0x2200 Invalid: The query is syntactically correct but invalid.

0x2300 Config\_error: The query is invalid because of some configuration issue

0x2400 Already\_exists: The query attempted to create a keyspace or a table that was already existing. The rest of the ERROR message body will be <ks><table> where:

<ks> is a [string] representing either the keyspace that already exists, or the keyspace in which the table that already exists is.

<table> is a [string] representing the name of the table that already exists. If the query was attempting to create a

keyspace, <table> will be present but will be the empty string.

0x2500 Unprepared: Can be thrown while a prepared statement tries to be executed if the provided prepared statement ID is not known by this host. The rest of the ERROR message body will be [short bytes] representing the unknown ID.

## 10. Changes from v3

- \* The format of "SCHEMA\_CHANGE" events (Section 4.2.6) (and implicitly "Schema\_change" results (Section 4.2.5.5)) has been modified, and now includes changes related to user defined functions and user defined aggregates.
- \* Read\_failure error code was added.
- \* Function\_failure error code was added.
- \* Add custom payload to frames for custom QueryHandler implementations (ignored by Cassandra's standard QueryHandler)
- \* Add warnings to frames for responses for which the server generated a warning during processing, which the client needs to address.
- \* Add the date and time data types
- \* Add the tinyint and smallint data types
- \* The <paging\_state> returned in the v4 protocol is not compatible with the v3 protocol. In other words, a <paging\_state> returned by a node using protocol v4 should not be used to query a node using protocol v3 (and vice-versa).

## 1. Overview

The CQL binary protocol is a frame based protocol. Frames are defined as:

The protocol is big-endian (network byte order).

Each frame contains a fixed size header (9 bytes) followed by a variable size body. The header is described in Section 2. The content of the body depends on the header opcode value (the body can in particular be empty for some opcode values). The list of allowed opcodes is defined in Section 2.4 and the details of each corresponding message are described Section 4.

The protocol distinguishes two types of frames: requests and responses. Requests are those frames sent by the client to the server. Responses are those frames sent by the server to the client. Note, however, that the protocol supports server pushes (events) so a response does not necessarily come right after a client request.

Note to client implementors: client libraries should always assume that the body of a given frame may contain more data than what is described in this document. It will however always be safe to ignore the remainder of the frame body in such cases. The reason is that this may enable extending the protocol with optional features without needing to change the protocol version.

## 2. Frame header

### 2.1. version

The version is a single byte that indicates both the direction of the message (request or response) and the version of the protocol in use. The most significant bit of version is used to define the direction of the message: 0 indicates a request, 1 indicates a response. This can be useful for protocol analyzers to distinguish the nature of the packet from the direction in which it is moving. The rest of that byte is the protocol version (5 for the protocol defined in this document). In other words, for this version of the protocol, version will be one of:

- 0x04 Request frame for this protocol version
- 0x84 Response frame for this protocol version

Please note that while every message ships with the version, only one version of messages is accepted on a given connection. In other words, the first message exchanged (STARTUP) sets the version for the connection for the lifetime of this connection. The single exception to this behavior is when a startup message is sent with a version that is higher than the current server version. In this case, the server will respond with its current version.

This document describes version 5 of the protocol. For the changes made since version 4, see Section 10.

### 2.2. flags

Flags applying to this frame. The flags have the following meaning (described by the mask that allows selecting them):

- 0x01: Compression flag. If set, the frame body is compressed. The actual compression to use should have been set up beforehand through the Startup message (which thus cannot be compressed; Section 4.1.1).
- 0x02: Tracing flag. For a request frame, this indicates the client requires tracing of the request. Note that only QUERY, PREPARE and EXECUTE queries support tracing. Other requests will simply ignore the tracing flag if set. If a request supports tracing and the tracing flag is set, the response to this request will have the tracing flag set and contain tracing information.

If a response frame has the tracing flag set, its body contains a tracing ID. The tracing ID is a [uuid] and is the first thing in the frame body. The rest of the body will then be the usual body corresponding to the response opcode.

0x04: Custom payload flag. For a request or response frame, this indicates that a generic key-value custom payload for a custom QueryHandler implementation is present in the frame. Such a custom payload is simply ignored by the default QueryHandler implementation. Currently, only QUERY, PREPARE, EXECUTE and BATCH requests support payload.

Type of custom payload is [bytes map] (see below).

0x08: Warning flag. The response contains warnings which were generated by the server to go along with this response.

If a response frame has the warning flag set, its body will contain the text of the warnings. The warnings are a [string list] and will be the first value in the frame body if the tracing flag is not set, or directly after the tracing ID if it is.

0x10: Use beta flag. Indicates that the client opts in to use protocol version that is currently in beta. Server will respond with ERROR if protocol version is marked as beta on server and client does not provide this flag.

The rest of flags is currently unused and ignored.

### 2.3. stream

A frame has a stream id (a [short] value). When sending request messages, this stream id must be set by the client to a non-negative value (negative stream id are reserved for streams initiated by the server; currently all EVENT messages (section 4.2.6) have a streamId of -1). If a client sends a request message with the stream id X, it is guaranteed that the stream id of the response to that message will be X.

This helps to enable the asynchronous nature of the protocol. If a client sends multiple messages simultaneously (without waiting for responses), there is no guarantee on the order of the responses. For instance, if the client writes REQ\_1, REQ\_2, REQ\_3 on the wire (in that order), the server might respond to REQ\_3 (or REQ\_2) first. Assigning different stream ids to these 3 requests allows the client to distinguish to which request a received answer responds to. As there can only be 32768 different simultaneous streams, it is up to the client to reuse stream id.

Note that clients are free to use the protocol synchronously (i.e. wait for the response to REQ\_N before sending REQ\_{N+1}). In that case, the stream id can be safely set to 0. Clients should also feel free to use only a subset of the 32768 maximum possible stream ids if it is simpler for its implementation.

### 2.4. opcode

An integer byte that distinguishes the actual message:

0x00	ERROR
0x01	STARTUP
0x02	READY
0x03	AUTHENTICATE
0x05	OPTIONS
0x06	SUPPORTED
0x07	QUERY
0x08	RESULT
0x09	PREPARE
0x0A	EXECUTE
0x0B	REGISTER
0x0C	EVENT
0x0D	BATCH
0x0E	AUTH_CHALLENGE
0x0F	AUTH_RESPONSE
0x10	AUTH_SUCCESS

Messages are described in Section 4.

(Note that there is no 0x04 message in this version of the protocol)

## 2.5. length

A 4 byte integer representing the length of the body of the frame (note: currently a frame is limited to 256MB in length).

## 3. Notations

To describe the layout of the frame body for the messages in Section 4, we define the following:

[int]	A 4 bytes integer
[long]	A 8 bytes integer
[byte]	A 1 byte unsigned integer
[short]	A 2 bytes unsigned integer
[string]	A [short] n, followed by n bytes representing an UTF-8 string.
[long string]	An [int] n, followed by n bytes representing an UTF-8 string.
[uuid]	A 16 bytes long uuid.
[string list]	A [short] n, followed by n [string].
[bytes]	A [int] n, followed by n bytes if n >= 0. If n < 0, no byte should follow and the value represented is `null`.
[value]	A [int] n, followed by n bytes if n >= 0. If n == -1 no byte should follow and the value represented is `null`. If n == -2 no byte should follow and the value represented is

`not set` not resulting in any change to the existing value.

$n < -2$  is an invalid value and results in an error.

[short bytes] A [short] n, followed by n bytes if  $n \geq 0$ .

[unsigned vint] An unsigned variable length integer. A vint is encoded with the most significant byte (MSB) first.

The most significant byte will contains the information about how many extra bytes need to be read as well as the most significant bits of the integer.

The number of extra bytes to read is encoded as 1 bits on the left side.

For example, if we need to read 2 more bytes the first byte will start with 110

(e.g. 256 000 will be encoded on 3 bytes as [110]00011 11101000 00000000)

If the encoded integer is 8 bytes long the vint will be encoded on 9 bytes and the first

byte will be: 11111111

[vint] A signed variable length integer. This is encoded using zig-zag encoding and then sent like an [unsigned vint]. Zig-zag encoding converts numbers as follows:

$0 = 0, -1 = 1, 1 = 2, -2 = 3, 2 = 4, -3 = 5, 3 = 6$  and so forth.

The purpose is to send small negative values as small unsigned values, so that we save bytes on the wire.

To encode a value n use " $(n \gg 31) \wedge (n \ll 1)$ " for 32 bit values, and " $(n \gg 63) \wedge (n \ll 1)$ " for 64 bit values where " $\wedge$ " is the xor operation, " $\ll$ " is the left shift operation and " $\gg$ " is the arithmetic right shift operation (highest-order bit is replicated).

Decode with " $(n \gg 1) \wedge \neg(n \& 1)$ ".

[option] A pair of <id><value> where <id> is a [short] representing the option id and <value> depends on that option (and can be of size 0). The supported id (and the corresponding <value>) will be described when this is used.

[option list] A [short] n, followed by n [option].

[inet] An address (ip and port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address (in practice n can only be either 4 (IPv4) or 16 (IPv6)), following by one [int] representing the port.

[inetaddr] An IP address (without a port) to a node. It consists of one [byte] n, that represents the address size, followed by n [byte] representing the IP address.

[consistency] A consistency level specification. This is a [short] representing a consistency level with the following correspondance:

0x0000 ANY  
0x0001 ONE  
0x0002 TWO  
0x0003 THREE  
0x0004 QUORUM  
0x0005 ALL  
0x0006 LOCAL\_QUORUM  
0x0007 EACH\_QUORUM  
0x0008 SERIAL

0x0009 LOCAL\_SERIAL

0x000A LOCAL\_ONE

[string map] A [short] n, followed by n pair <k><v> where <k> and <v> are [string].

[string multimap] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [string list].

[bytes map] A [short] n, followed by n pair <k><v> where <k> is a [string] and <v> is a [bytes].

## 4. Messages

### 4.1. Requests

Note that outside of their normal responses (described below), all requests can get an ERROR message (Section 4.2.1) as response.

#### 4.1.1. STARTUP

Initialize the connection. The server will respond by either a READY message (in which case the connection is ready for queries) or an AUTHENTICATE message (in which case credentials will need to be provided using AUTH\_RESPONSE).

This must be the first message of the connection, except for OPTIONS that can be sent before to find out the options supported by the server. Once the connection has been initialized, a client should not send any more STARTUP messages.

The body is a [string map] of options. Possible options are:

- "CQL\_VERSION": the version of CQL to use. This option is mandatory and currently the only version supported is "3.0.0". Note that this is different from the protocol version.
- "COMPRESSION": the compression algorithm to use for frames (See section 5). This is optional; if not specified no compression will be used.

#### 4.1.2. AUTH\_RESPONSE

Answers a server authentication challenge.

Authentication in the protocol is SASL based. The server sends authentication challenges (a bytes token) to which the client answers with this message. Those exchanges continue until the server accepts the authentication by sending a AUTH\_SUCCESS message after a client AUTH\_RESPONSE. Note that the exchange begins with the client sending an initial AUTH\_RESPONSE in response to a server AUTHENTICATE request.

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

The response to a AUTH\_RESPONSE is either a follow-up AUTH\_CHALLENGE message, an AUTH\_SUCCESS message or an ERROR message.

#### 4.1.3. OPTIONS

Asks the server to return which STARTUP options are supported. The body of an OPTIONS message should be empty and the server will respond with a SUPPORTED message.

#### 4.1.4. QUERY

Performs a CQL query. The body of the message must be:

<query><query\_parameters>

where <query> is a [long string] representing the query and

<query\_parameters> must be

<consistency><flags>[<n>[name\_1]<value\_1>...[name\_n]<value\_n>][<result\_page\_size>][<paging\_state>][<serial\_consistency>][<timestamp>][<keyspace>]

where:

- <consistency> is the [consistency] level for the operation.
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x01: Values. If set, a [short] <n> followed by <n> [value] values are provided. Those values are used for bound variables in the query. Optionally, if the 0x40 flag is present, each value will be preceded by a [string] name, representing the name of the marker the value must be bound to.

0x02: Skip\_metadata. If set, the Result Set returned as a response to the query (if any) will have the NO\_METADATA flag (see Section 4.2.5.2).

0x04: Page\_size. If set, <result\_page\_size> is an [int] controlling the desired page size of the result (in CQL3 rows). See the section on paging (Section 8) for more details.

0x08: With\_paging\_state. If set, <paging\_state> should be present. <paging\_state> is a [bytes] value that should have been returned in a result set (Section 4.2.5.2). The query will be executed but starting from a given paging state. This is also to continue paging on a different node than the one where it started (See Section 8 for more details).

0x10: With\_serial\_consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the

serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.

0x20: With default timestamp. If set, <timestamp> should be present.

<timestamp> is a [long] representing the default timestamp for the query in microseconds (negative values are forbidden). This will replace the server side assigned timestamp as default timestamp.

Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.

0x40: With names for values. This only makes sense if the 0x01 flag is set and is ignored otherwise. If present, the values from the 0x01 flag will be preceded by a name (see above). Note that this is only useful for QUERY requests where named bind markers are used; for EXECUTE statements, since the names for the expected values was returned during preparation, a client can always provide values in the right order without any names and using this flag, while supported, is almost surely inefficient.

0x80: With keyspace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keyspace that the query should be executed in. It supercedes the keyspace that the connection is bound to, if any.

Note that the consistency is ignored by some queries (USE, CREATE, ALTER, TRUNCATE, ...).

The server will respond to a QUERY message with a RESULT message, the content of which depends on the query.

#### 4.1.5. PREPARE

Prepare a query for later execution (through EXECUTE). The body of the message must be:

<query><flags>[<keyspace>]

where:

- <query> is a [long string] representing the CQL query.
- <flags> is a [int] whose bits define the options for this statement and in particular influence what the remainder of the message contains.

A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x01: With keyspace. If set, <keyspace> must be present. <keyspace> is a [string] indicating the keyspace that the query should be executed in. It supercedes the keyspace that the connection is bound to, if any.

The server will respond with a RESULT message with a `prepared` kind (0x0004, see Section 4.2.5).

#### 4.1.6. EXECUTE

Executes a prepared query. The body of the message must be:

<id><result\_metadata\_id><query\_parameters>

where

- <id> is the prepared query ID. It's the [short bytes] returned as a response to a PREPARE message. As for <query\_parameters>, it has the exact same definition as in QUERY (see Section 4.1.4).
- <result\_metadata\_id> is the ID of the resultset metadata that was sent along with response to PREPARE message. If a RESULT/Rows message reports changed resultset metadata with the Metadata\_changed flag, the reported new resultset metadata must be used in subsequent executions.

#### 4.1.7. BATCH

Allows executing a list of queries (prepared or not) as a batch (note that only DML statements are accepted in a batch). The body of the message must be:

<type><n><query\_1>...<query\_n><consistency><flags>[<serial\_consistency>][<timestamp>][<keyspace>]

where:

- <type> is a [byte] indicating the type of batch to use:
  - If <type> == 0, the batch will be "logged". This is equivalent to a normal CQL3 batch statement.
  - If <type> == 1, the batch will be "unlogged".
  - If <type> == 2, the batch will be a "counter" batch (and non-counter statements will be rejected).
- <flags> is a [int] whose bits define the options for this query and in particular influence what the remainder of the message contains. It is similar to the <flags> from QUERY and EXECUTE methods, except that the 4 rightmost bits must always be 0 as their corresponding options do not make sense for Batch. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:
  - 0x10: With serial consistency. If set, <serial\_consistency> should be present. <serial\_consistency> is the [consistency] level for the serial phase of conditional updates. That consistency can only be either SERIAL or LOCAL\_SERIAL and if not present, it defaults to SERIAL. This option will be ignored for anything else other than a conditional update/insert.
  - 0x20: With default timestamp. If set, <timestamp> should be present. <timestamp> is a [long] representing the default timestamp for the query in microseconds. This will replace the server side assigned timestamp as default timestamp. Note that a timestamp in the query itself will still override this timestamp. This is entirely optional.
  - 0x40: With names for values. If set, then all values for all <query\_i> must be preceded by a [string] <name\_i> that have the same meaning as in QUERY requests [IMPORTANT NOTE: this feature does not work and should not be used. It is specified in a way that makes it impossible for the server to implement. This will be fixed in a future version of the native protocol. See <https://issues.apache.org/jira/browse/CASSANDRA-10246> for

more details].

0x80: With `keyspace`. If set, `<keyspace>` must be present. `<keyspace>` is a [string] indicating the keyspace that the query should be executed in.

It supercedes the keyspace that the connection is bound to, if any.

- `<n>` is a [short] indicating the number of following queries.
- `<query_1>...<query_n>` are the queries to execute. A `<query_i>` must be of the form:

```
<kind><string_or_id><n>[<name_1><value_1>...<name_n><value_n>
```

where:

- `<kind>` is a [byte] indicating whether the following query is a prepared one or not. `<kind>` value must be either 0 or 1.
- `<string_or_id>` depends on the value of `<kind>`. If `<kind> == 0`, it should be a [long string] query string (as in `QUERY`, the query string might contain bind markers). Otherwise (that is, if `<kind> == 1`), it should be a [short bytes] representing a prepared query ID.
- `<n>` is a [short] indicating the number (possibly 0) of following values.
- `<name_i>` is the optional name of the following `<value_i>`. It must be present if and only if the `0x40` flag is provided for the batch.
- `<value_i>` is the [value] to use for bound variable `i` (of bound variable `<name_i>` if the `0x40` flag is used).
- `<consistency>` is the [consistency] level for the operation.
- `<serial_consistency>` is only present if the `0x10` flag is set. In that case, `<serial_consistency>` is the [consistency] level for the serial phase of conditional updates. That consistency can only be either `SERIAL` or `LOCAL_SERIAL` and if not present will default to `SERIAL`. This option will be ignored for anything else other than a conditional update/insert.

The server will respond with a `RESULT` message.

#### 4.1.8. REGISTER

Register this connection to receive some types of events. The body of the message is a [string list] representing the event types to register for. See section 4.2.6 for the list of valid event types.

The response to a `REGISTER` message will be a `READY` message.

Please note that if a client driver maintains multiple connections to a Cassandra node and/or connections to multiple nodes, it is advised to dedicate a handful of connections to receive events, but to *not* register for events on all connections, as this would only result in receiving multiple times the same event messages, wasting bandwidth.

## 4.2. Responses

This section describes the content of the frame body for the different

responses. Please note that to make room for future evolution, clients should support extra informations (that they should simply discard) to the one described in this document at the end of the frame body.

#### 4.2.1. ERROR

Indicates an error processing a request. The body of the message will be an error code ([int]) followed by a [string] error message. Then, depending on the exception, more content may follow. The error codes are defined in Section 9, along with their additional content if any.

#### 4.2.2. READY

Indicates that the server is ready to process queries. This message will be sent by the server either after a `STARTUP` message if no authentication is required (if authentication is required, the server indicates readiness by sending a `AUTH_RESPONSE` message).

The body of a `READY` message is empty.

#### 4.2.3. AUTHENTICATE

Indicates that the server requires authentication, and which authentication mechanism to use.

The authentication is SASL based and thus consists of a number of server challenges (`AUTH_CHALLENGE`, Section 4.2.7) followed by client responses (`AUTH_RESPONSE`, Section 4.1.2). The initial exchange is however bootstrapped by an initial client response. The details of that exchange (including how many challenge-response pairs are required) are specific to the authenticator in use. The exchange ends when the server sends an `AUTH_SUCCESS` message or an `ERROR` message.

This message will be sent following a `STARTUP` message if authentication is required and must be answered by a `AUTH_RESPONSE` message from the client.

The body consists of a single [string] indicating the full class name of the `IAAuthenticator` in use.

#### 4.2.4. SUPPORTED

Indicates which startup options are supported by the server. This message comes as a response to an `OPTIONS` message.

The body of a `SUPPORTED` message is a [string multimap]. This multimap gives

for each of the supported STARTUP options, the list of supported values. It also includes:

- "PROTOCOL\_VERSIONS": the list of native protocol versions that are supported, encoded as the version number followed by a slash and the version description. For example: 3/v3, 4/v4, 5/v5-beta. If a version is in beta, it will have the word "beta" in its description.

#### 4.2.5. RESULT

The result to a query (QUERY, PREPARE, EXECUTE or BATCH messages).

The first element of the body of a RESULT message is an [int] representing the `kind` of result. The rest of the body depends on the kind. The kind can be one of:

- 0x0001 Void: for results carrying no information.
- 0x0002 Rows: for results to select queries, returning a set of rows.
- 0x0003 Set\_keyspace: the result to a `use` query.
- 0x0004 Prepared: result to a PREPARE message.
- 0x0005 Schema\_change: the result to a schema altering query.

The body for each kind (after the [int] kind) is defined below.

##### 4.2.5.1. Void

The rest of the body for a Void result is empty. It indicates that a query was successful without providing more information.

##### 4.2.5.2. Rows

Indicates a set of rows. The rest of the body of a Rows result is:

<metadata><rows\_count><rows\_content>

where:

- <metadata> is composed of:

<flags><columns\_count>[<paging\_state>][<new\_metadata\_id>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported flags are, given their mask:

0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.

0x0002 Has\_more\_pages: indicates whether this is not the last page of results and more should be retrieved. If set, the

<paging\_state> will be present. The <paging\_state> is a [bytes] value that should be used in QUERY/EXECUTE to continue paging and retrieve the remainder of the result for this query (See Section 8 for more details).

0x0004 No\_metadata: if set, the <metadata> is only composed of these <flags>, the <column\_count> and optionally the <paging\_state> (depending on the Has\_more\_pages flag) but no other information (so no <global\_table\_spec> nor <col\_spec\_i>). This will only ever be the case if this was requested during the query (see QUERY and RESULT messages).

0x0008 Metadata\_changed: if set, the No\_metadata flag has to be unset and <new\_metadata\_id> has to be supplied. This flag is to be used to avoid a roundtrip in case of metadata changes for queries that requested metadata to be skipped.

- <columns\_count> is an [int] representing the number of columns selected by the query that produced this result. It defines the number of <col\_spec\_i> elements in and the number of elements for each row in <rows\_content>.
- <new\_metadata\_id> is [short bytes] representing the new, changed resultset metadata. The new metadata ID must also be used in subsequent executions of the corresponding prepared statement, if any.
- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. It is composed of two [string] representing the (unique) keyspace name and table name the columns belong to.
- <col\_spec\_i> specifies the columns returned in the query. There are <column\_count> such column specifications that are composed of:  
(<kname><tablename>)?<name><type>

The initial <kname> and <tablename> are two [string] and are only present if the Global\_tables\_spec flag is not set. The <column\_name> is a [string] and <type> is an [option] that corresponds to the description (what this description is depends a bit on the context: in results to selects, this will be either the user chosen alias or the selection used (often a column name, but it can be a function call too). In results to a PREPARE, this will be either the name of the corresponding bind variable or the column name for the variable if it is "anonymous") and type of the corresponding result. The option for <type> is either a native type (see below), in which case the option has no value, or a 'custom' type, in which case the value is a [string] representing the fully qualified class name of the type represented. Valid option ids are:

- 0x0000 Custom: the value is a [string], see above.
- 0x0001 Ascii
- 0x0002 Bigint
- 0x0003 Blob
- 0x0004 Boolean
- 0x0005 Counter
- 0x0006 Decimal
- 0x0007 Double
- 0x0008 Float

- 0x0009 Int
- 0x000B Timestamp
- 0x000C Uuid
- 0x000D Varchar
- 0x000E Varint
- 0x000F Timeuuid
- 0x0010 Inet
- 0x0011 Date
- 0x0012 Time
- 0x0013 Smallint
- 0x0014 Tinyint
- 0x0015 Duration
- 0x0020 List: the value is an [option], representing the type of the elements of the list.
- 0x0021 Map: the value is two [option], representing the types of the keys and values of the map
- 0x0022 Set: the value is an [option], representing the type of the elements of the set
- 0x0030 UDT: the value is <ks><udt\_name><n><name\_1><type\_1>...<name\_n><type\_n> where:
  - <ks> is a [string] representing the keyspace name this UDT is part of.
  - <udt\_name> is a [string] representing the UDT name.
  - <n> is a [short] representing the number of fields of the UDT, and thus the number of <name\_i><type\_i> pairs following
  - <name\_i> is a [string] representing the name of the i\_th field of the UDT.
  - <type\_i> is an [option] representing the type of the i\_th field of the UDT.
- 0x0031 Tuple: the value is <n><type\_1>...<type\_n> where <n> is a [short] representing the number of values in the type, and <type\_i> are [option] representing the type of the i\_th component of the tuple

- <rows\_count> is an [int] representing the number of rows present in this result. Those rows are serialized in the <rows\_content> part.
- <rows\_content> is composed of <row\_1>...<row\_m> where m is <rows\_count>. Each <row\_i> is composed of <value\_1>...<value\_n> where n is <columns\_count> and where <value\_j> is a [bytes] representing the value returned for the jth column of the ith row. In other words, <rows\_content> is composed of (<rows\_count> \* <columns\_count>) [bytes].

#### 4.2.5.3. Set\_keyspace

The result to a `use` query. The body (after the kind [int]) is a single [string] indicating the name of the keyspace that has been set.

#### 4.2.5.4. Prepared

The result to a PREPARE message. The body of a Prepared result is:

<id><result\_metadata\_id><metadata><result\_metadata>

where:

- <id> is [short bytes] representing the prepared query ID.
- <result\_metadata\_id> is [short bytes] representing the resultset metadata ID.
- <metadata> is composed of:

<flags><columns\_count><pk\_count>[<pk\_index\_1>...<pk\_index\_n>][<global\_table\_spec>?<col\_spec\_1>...<col\_spec\_n>]

where:

- <flags> is an [int]. The bits of <flags> provides information on the formatting of the remaining information. A flag is set if the bit corresponding to its `mask` is set. Supported masks and their flags are:
  - 0x0001 Global\_tables\_spec: if set, only one table spec (keyspace and table name) is provided as <global\_table\_spec>. If not set, <global\_table\_spec> is not present.
- <columns\_count> is an [int] representing the number of bind markers in the prepared statement. It defines the number of <col\_spec\_i> elements.
- <pk\_count> is an [int] representing the number of <pk\_index\_i> elements to follow. If this value is zero, at least one of the partition key columns in the table that the statement acts on did not have a corresponding bind marker (or the bind marker was wrapped in a function call).
- <pk\_index\_i> is a short that represents the index of the bind marker that corresponds to the partition key column in position i. For example, a <pk\_index> sequence of [2, 0, 1] indicates that the table has three partition key columns; the full partition key can be constructed by creating a composite of the values for the bind markers at index 2, at index 0, and at index 1. This allows implementations with token-aware routing to correctly construct the partition key without needing to inspect table metadata.
- <global\_table\_spec> is present if the Global\_tables\_spec is set in <flags>. If present, it is composed of two [string]s. The first [string] is the name of the keyspace that the statement acts on. The second [string] is the name of the table that the columns represented by the bind markers belong to.
- <col\_spec\_i> specifies the bind markers in the prepared statement. There are <column\_count> such column specifications, each with the following format:

(<kname><tablename>)?<name><type>

The initial <kname> and <tablename> are two [string] that are only present if the Global\_tables\_spec flag is not set. The <name> field

is a [string] that holds the name of the bind marker (if named), or the name of the column, field, or expression that the bind marker corresponds to (if the bind marker is "anonymous"). The <type> field is an [option] that represents the expected type of values for the bind marker. See the Rows documentation (section 4.2.5.2) for full details on the <type> field.

- <result\_metadata> is defined exactly the same as <metadata> in the Rows documentation (section 4.2.5.2). This describes the metadata for the result set that will be returned when this prepared statement is executed. Note that <result\_metadata> may be empty (have the No\_metadata flag and 0 columns, See section 4.2.5.2) and will be for any query that is not a Select. In fact, there is never a guarantee that this will be non-empty, so implementations should protect themselves accordingly. This result metadata is an optimization that allows implementations to later execute the prepared statement without requesting the metadata (see the Skip\_metadata flag in EXECUTE). Clients can safely discard this metadata if they do not want to take advantage of that optimization.

Note that the prepared query ID returned is global to the node on which the query has been prepared. It can be used on any connection to that node until the node is restarted (after which the query must be reprepared).

#### 4.2.5.5. Schema\_change

The result to a schema altering query (creation/update/drop of a keyspace/table/index). The body (after the kind [int]) is the same as the body for a "SCHEMA\_CHANGE" event, so 3 strings:

<change\_type><target><options>

Please refer to section 4.2.6 below for the meaning of those fields.

Note that a query to create or drop an index is considered to be a change to the table the index is on.

#### 4.2.6. EVENT

An event pushed by the server. A client will only receive events for the types it has REGISTERed to. The body of an EVENT message will start with a [string] representing the event type. The rest of the message depends on the event type. The valid event types are:

- "TOPOLOGY\_CHANGE": events related to change in the cluster topology. Currently, events are sent when new nodes are added to the cluster, and when nodes are removed. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of change ("NEW\_NODE" or "REMOVED\_NODE") followed by the address of the new/removed node.
- "STATUS\_CHANGE": events related to change of node status. Currently,

up/down events are sent. The body of the message (after the event type) consists of a [string] and an [inet], corresponding respectively to the type of status change ("UP" or "DOWN") followed by the address of the concerned node.

- "SCHEMA\_CHANGE": events related to schema change. After the event type, the rest of the message will be <change\_type><target><options> where:
  - <change\_type> is a [string] representing the type of changed involved. It will be one of "CREATED", "UPDATED" or "DROPPED".
  - <target> is a [string] that can be one of "KEYSPACE", "TABLE", "TYPE", "FUNCTION" or "AGGREGATE" and describes what has been modified ("TYPE" stands for modifications related to user types, "FUNCTION" for modifications related to user defined functions, "AGGREGATE" for modifications related to user defined aggregates).
  - <options> depends on the preceding <target>:
    - If <target> is "KEYSPACE", then <options> will be a single [string] representing the keyspace changed.
    - If <target> is "TABLE" or "TYPE", then <options> will be 2 [string]: the first one will be the keyspace containing the affected object, and the second one will be the name of said affected object (either the table, user type, function, or aggregate name).
    - If <target> is "FUNCTION" or "AGGREGATE", multiple arguments follow:
      - [string] keyspace containing the user defined function / aggregate
      - [string] the function/aggregate name
      - [string list] one string for each argument type (as CQL type)

All EVENT messages have a streamId of -1 (Section 2.3).

Please note that "NEW\_NODE" and "UP" events are sent based on internal Gossip communication and as such may be sent a short delay before the binary protocol server on the newly up node is fully started. Clients are thus advised to wait a short time before trying to connect to the node (1 second should be enough), otherwise they may experience a connection refusal at first.

#### 4.2.7. AUTH\_CHALLENGE

A server authentication challenge (see AUTH\_RESPONSE (Section 4.1.2) for more details).

The body of this message is a single [bytes] token. The details of what this token contains (and when it can be null/empty, if ever) depends on the actual authenticator used.

Clients are expected to answer the server challenge with an AUTH\_RESPONSE message.

#### 4.2.8. AUTH\_SUCCESS

Indicates the success of the authentication phase. See Section 4.2.3 for more details.

The body of this message is a single [bytes] token holding final information from the server that the client may require to finish the authentication process. What that token contains and whether it can be null depends on the actual authenticator used.

## 5. Compression

Frame compression is supported by the protocol, but then only the frame body is compressed (the frame header should never be compressed).

Before being used, client and server must agree on a compression algorithm to use, which is done in the STARTUP message. As a consequence, a STARTUP message must never be compressed. However, once the STARTUP frame has been received by the server, messages can be compressed (including the response to the STARTUP request). Frames do not have to be compressed, however, even if compression has been agreed upon (a server may only compress frames above a certain size at its discretion). A frame body should be compressed if and only if the compressed flag (see Section 2.2) is set.

As of version 2 of the protocol, the following compressions are available:

- lz4 (<https://code.google.com/p/lz4/>). In that, note that the first four bytes of the body will be the uncompressed length (followed by the compressed bytes).
- snappy (<https://code.google.com/p/snappy/>). This compression might not be available as it depends on a native lib (server-side) that might not be available on some installations.

## 6. Data Type Serialization Formats

This sections describes the serialization formats for all CQL data types supported by Cassandra through the native protocol. These serialization formats should be used by client drivers to encode values for EXECUTE messages. Cassandra will use these formats when returning values in RESULT messages.

All values are represented as [bytes] in EXECUTE and RESULT messages. The [bytes] format includes an int prefix denoting the length of the value. For that reason, the serialization formats described here will not include a length component.

For legacy compatibility reasons, note that most non-string types support "empty" values (i.e. a value with zero length). An empty value is distinct

from NULL, which is encoded with a negative length.

As with the rest of the native protocol, all encodings are big-endian.

#### 6.1. ascii

A sequence of bytes in the ASCII range [0, 127]. Bytes with values outside of this range will result in a validation error.

#### 6.2 bigint

An eight-byte two's complement integer.

#### 6.3 blob

Any sequence of bytes.

#### 6.4 boolean

A single byte. A value of 0 denotes "false"; any other value denotes "true". (However, it is recommended that a value of 1 be used to represent "true".)

#### 6.5 date

An unsigned integer representing days with epoch centered at  $2^{31}$ . (unix epoch January 1st, 1970).

A few examples:

0: -5877641-06-23

$2^{31}$ : 1970-1-1

$2^{32}$ : 5881580-07-11

#### 6.6 decimal

The decimal format represents an arbitrary-precision number. It contains an [int] "scale" component followed by a varint encoding (see section 6.17) of the unscaled value. The encoded value represents "<unscaled>E<-scale>". In other words, "<unscaled> \* 10 ^ (-1 \* <scale>)".

#### 6.7 double

An 8 byte floating point number in the IEEE 754 binary64 format.

#### 6.8 duration

A duration is composed of 3 signed variable length integers ([vint]s).

The first [vint] represents a number of months, the second [vint] represents a number of days, and the last [vint] represents a number of nanoseconds.

The number of months and days must be valid 32 bits integers whereas the

number of nanoseconds must be a valid 64 bits integer.

A duration can either be positive or negative. If a duration is positive all the integers must be positive or zero. If a duration is negative all the numbers must be negative or zero.

#### 6.9 float

A 4 byte floating point number in the IEEE 754 binary32 format.

#### 6.10 inet

A 4 byte or 16 byte sequence denoting an IPv4 or IPv6 address, respectively.

#### 6.11 int

A 4 byte two's complement integer.

#### 6.12 list

A [int] n indicating the number of elements in the list, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.13 map

A [int] n indicating the number of key/value pairs in the map, followed by n entries. Each entry is composed of two [bytes] representing the key and value.

#### 6.14 set

A [int] n indicating the number of elements in the set, followed by n elements. Each element is [bytes] representing the serialized value.

#### 6.15 smallint

A 2 byte two's complement integer.

#### 6.16 text

A sequence of bytes conforming to the UTF-8 specifications.

#### 6.17 time

An 8 byte two's complement long representing nanoseconds since midnight. Valid values are in the range 0 to 8639999999999

#### 6.18 timestamp

An 8 byte two's complement integer representing a millisecond-precision offset from the unix epoch (00:00:00, January 1st, 1970). Negative values represent a negative offset from the epoch.

#### 6.19 timeuuid

A 16 byte sequence representing a version 1 UUID as defined by RFC 4122.

#### 6.20 tinyint

A 1 byte two's complement integer.

#### 6.21 tuple

A sequence of [bytes] values representing the items in a tuple. The encoding of each element depends on the data type for that position in the tuple.

Null values may be represented by using length -1 for the [bytes] representation of an element.

#### 6.22 uuid

A 16 byte sequence representing any valid UUID as defined by RFC 4122.

#### 6.23 varchar

An alias of the "text" type.

#### 6.24 varint

A variable-length two's complement encoding of a signed integer.

The following examples may help implementors of this spec:

Value | Encoding

0		0x00
1		0x01
127		0x7F
128		0x0080
129		0x0081
-1		0xFF
-128		0x80
-129		0xFF7F

Note that positive numbers must use a most-significant byte with a value less than 0x80, because a most-significant bit of 1 indicates a negative value. Implementors should pad positive values that have a MSB  $\geq$  0x80 with a leading 0x00 byte.

## 7. User Defined Types

This section describes the serialization format for User defined types (UDT), as described in section 4.2.5.2.

A UDT value is composed of successive [bytes] values, one for each field of the UDT value (in the order defined by the type). A UDT value will generally have one value for each field of the type it represents, but it is allowed to have less values than the type has fields.

## 8. Result paging

The protocol allows for paging the result of queries. For that, the QUERY and EXECUTE messages have a <result\_page\_size> value that indicate the desired page size in CQL3 rows.

If a positive value is provided for <result\_page\_size>, the result set of the RESULT message returned for the query will contain at most the <result\_page\_size> first rows of the query result. If that first page of results contains the full result set for the query, the RESULT message (of kind `Rows`) will have the Has\_more\_pages flag \*not\* set. However, if some results are not part of the first response, the Has\_more\_pages flag will be set and the result will contain a <paging\_state> value. In that case, the <paging\_state> value should be used in a QUERY or EXECUTE message (that has the \*same\* query as the original one or the behavior is undefined) to retrieve the next page of results.

Only CQL3 queries that return a result set (RESULT message with a Rows `kind`) support paging. For other type of queries, the <result\_page\_size> value is ignored.

Note to client implementors:

- While <result\_page\_size> can be as low as 1, it will likely be detrimental to performance to pick a value too low. A value below 100 is probably too low for most use cases.
- Clients should not rely on the actual size of the result set returned to decide if there are more results to fetch or not. Instead, they should always check the Has\_more\_pages flag (unless they did not enable paging for the query obviously). Clients should also not assert that no result will have more than <result\_page\_size> results. While the current implementation always respects the exact value of <result\_page\_size>, we reserve the right to return slightly smaller or bigger pages in the future for performance reasons.
- The <paging\_state> is specific to a protocol version and drivers should not send a <paging\_state> returned by a node using the protocol v3 to query a node using the protocol v4 for instance.

## 9. Error codes

Let us recall that an ERROR message is composed of `<code><message>[...]` (see 4.2.1 for details). The supported error codes, as well as any additional information the message may contain after the `<message>` are described below:

0x0000 Server error: something unexpected happened. This indicates a server-side bug.

0x000A Protocol error: some client message triggered a protocol violation (for instance a QUERY message is sent before a STARTUP one has been sent)

0x0100 Authentication error: authentication was required and failed. The possible reason for failing depends on the authenticator in use, which may or may not include more detail in the accompanying error message.

0x1000 Unavailable exception. The rest of the ERROR message body will be `<cl><required><alive>`

where:

`<cl>` is the [consistency] level of the query that triggered the exception.

`<required>` is an [int] representing the number of nodes that should be alive to respect `<cl>`

`<alive>` is an [int] representing the number of replicas that were known to be alive when the request had been processed (since an unavailable exception has been triggered, there will be `<alive> < <required>`)

0x1001 Overloaded: the request cannot be processed because the coordinator node is overloaded

0x1002 Is\_bootstrapping: the request was a read request but the coordinator node is bootstrapping

0x1003 Truncate\_error: error during a truncation error.

0x1100 Write\_timeout: Timeout exception during a write request. The rest of the ERROR message body will be `<cl><received><blockfor><writeType>`

where:

`<cl>` is the [consistency] level of the query having triggered the exception.

`<received>` is an [int] representing the number of nodes having acknowledged the request.

`<blockfor>` is an [int] representing the number of replicas whose acknowledgement is required to achieve `<cl>`.

`<writeType>` is a [string] that describe the type of the write that timed out. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.

- "BATCH": the write was a (logged) batch write.

If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).

- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the timeout occurred during the write to the batch log when a (logged) batch write was requested.

0x1200 Read\_timeout: Timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose response is required to achieve <cl>. Please note that it is possible to have <received> >= <blockfor> if <data\_present> is false. Also in the (unlikely) case where <cl> is achieved but the coordinator node times out while waiting for read-repair acknowledgement.

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data has not responded. Otherwise, the value is != 0.

0x1300 Read\_failure: A non-timeout exception during a read request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><data\_present>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short].

<data\_present> is a single byte. If its value is 0, it means the replica that was asked for data had not responded. Otherwise, the value is != 0.

0x1400 Function\_failure: A (user defined) function failed during execution.

The rest of the ERROR message body will be

<keyspace><function><arg\_types>

where:

<keyspace> is the keyspace [string] of the failed function

<function> is the name [string] of the failed function

<arg\_types> [string list] one string for each argument type (as CQL type) of the failed function

0x1500 Write\_failure: A non-timeout exception during a write request. The rest of the ERROR message body will be

<cl><received><blockfor><reasonmap><write\_type>

where:

<cl> is the [consistency] level of the query having triggered the exception.

<received> is an [int] representing the number of nodes having answered the request.

<blockfor> is an [int] representing the number of replicas whose acknowledgement is required to achieve <cl>.

<reasonmap> is a map of endpoint to failure reason codes. This maps the endpoints of the replica nodes that failed when executing the request to a code representing the reason for the failure. The map is encoded starting with an [int] n followed by n pairs of <endpoint><failurecode> where <endpoint> is an [inetaddr] and <failurecode> is a [short].

<writeType> is a [string] that describes the type of the write that failed. The value of that string can be one of:

- "SIMPLE": the write was a non-batched non-counter write.
- "BATCH": the write was a (logged) batch write. If this type is received, it means the batch log has been successfully written (otherwise a "BATCH\_LOG" type would have been sent instead).
- "UNLOGGED\_BATCH": the write was an unlogged batch. No batch log write has been attempted.
- "COUNTER": the write was a counter write (batched or not).
- "BATCH\_LOG": the failure occurred during the write to the batch log when a (logged) batch write was requested.

0x2000 Syntax\_error: The submitted query has a syntax error.

0x2100 Unauthorized: The logged user doesn't have the right to perform the query.

0x2200 Invalid: The query is syntactically correct but invalid.

0x2300 Config\_error: The query is invalid because of some configuration issue

0x2400 Already\_exists: The query attempted to create a keyspace or a table that was already existing. The rest of the ERROR message body will be <ks><table> where:

<ks> is a [string] representing either the keyspace that already exists, or the keyspace in which the table that

already exists is.

<table> is a [string] representing the name of the table that already exists. If the query was attempting to create a keyspace, <table> will be present but will be the empty string.

0x2500 Unprepared: Can be thrown while a prepared statement tries to be executed if the provided prepared statement ID is not known by this host. The rest of the ERROR message body will be [short bytes] representing the unknown ID.

## 10. Changes from v4

- \* Beta protocol flag for v5 native protocol is added (Section 2.2)
- \* <numfailures> in Read\_failure and Write\_failure error message bodies (Section 9) has been replaced with <reasonmap>. The <reasonmap> maps node IP addresses to a failure reason code which indicates why the request failed on that node.
- \* Enlarged flag's bitmaps for QUERY, EXECUTE and BATCH messages from [byte] to [int] (Sections 4.1.4, 4.1.6 and 4.1.7).
- \* Add the duration data type
- \* Added keyspace field in QUERY, PREPARE, and BATCH messages (Sections 4.1.4, 4.1.5, and 4.1.7).
- \* Added [int] flags field in PREPARE message (Section 4.1.5).

# 1.202 hystrix-core 1.5.18

## 1.202.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition,

"control" means (i) the power, direct or indirect, to cause the

direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and

wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor

has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Copyright [yyyy] [name of copyright owner]

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object

form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[ ]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a

file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

## 1.208 hibernate-types-52 2.12.1

### 1.208.1 Available under license :

Apache License  
Version 2.0, January 2004  
<http://www.apache.org/licenses/>

#### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

##### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of

this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only

on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

## END OF TERMS AND CONDITIONS

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity

exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

- (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
- (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
- (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
- (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided

that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions.

Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity,

or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

### TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

#### 1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously

marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.

3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.

4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:

You must give any other recipients of the Work or Derivative Works a copy of this License; and

You must cause any modified files to carry prominent notices stating that You changed the files; and

You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and

If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.

6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.

7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.

9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.
