Cybersecurity is our top priority. We invest in people, processes, technology, and policies to build a secure enterprise. Cisco’s Security & Trust team is dedicated to protecting our systems and the data you trust. Here are some of our achievements:

- **170 Countries around the globe**
- **Every day at Cisco, we protect our enterprise by securing:**
  - **47TB** of Traffic
  - **15B** Netflow Records
  - **4.8B** DNS Queries
  - **75M** Web Transactions

- **Cybersecurity Key Numbers:**
  - **47,000** Combined Global Workforce
  - **26,000** Routers
  - **26,000** Remote Office Connections
  - **2,500** IT Applications
  - **1,350** Engineering Labs
  - **500** Cloud Applications

Cybersecurity is our top priority because it’s critical to our customers’ business. We invest in people, processes, technology, and policies to build a secure enterprise. Cisco’s Security & Trust team is dedicated to protecting our systems and the data you trust.

Processes are the backbone of pervasive security. Embedding processes into the business helps us identify vulnerabilities and remediate issues quickly. Here are our favorites:

- **Secure Development Lifecycle:**
  - In place for 10+ years
  - ISO 27034 compliant
  - Constantly evolving development techniques address emerging security threats

- **Product Security Incident Response Team (PSIRT):**
  - In place for 15+ years
  - Leads the industry
  - ISO 29147 compliant
  - Provides consistent management and reporting of vulnerabilities

- **Data Protection Program:**
  - Robust, enterprise-wide program
  - Helps you understand what data you have and where it is
  - Helps you classify your data

Cisco is committed to ongoing investment in innovation that enhances the security and resilience of our products and helps to mitigate today’s advanced persistent threats. Policies not only set the rules for protecting the organization, but also protect investments across people, processes, and technology.

- **Policies:**
  - Employee and supplier codes of conduct signed annually
  - Enterprise information security and data protection policies aligned with ISO 27001
  - Continuous monitoring – 230 site audits last year
  - Data protection policies and incident response in place

In 170 Countries around the globe, every day at Cisco, we protect our enterprise by securing your business.
