

## Cisco Licensing Experience & Operations

> *Driving a quality licensing experience across the lifecycle*

February 2026 Release Newsletter for Customers & Partners

We'll keep this newsletter *brief* because the February release *thoroughly* delivers. Follow the links to explore the full benefits of the enhancements we've delivered to drive seamless, AI-powered solutions across the entire license management lifecycle at Cisco.

Remember, you're always invited to join our [training sessions](#) for live demos and in-depth discussion.

### Cisco License Central

#### Overview Page is Fully Customizable

We reimagined the [Cisco License Central](#) Overview Page to give every user the power to arrange (and rearrange) and view the data that matters most to them. The updated experience allows you to fully customize what info you see or don't see - simply drag and drop, resize, and reorder widgets.

### Smart Account Transformation

#### From Purchase to Provisioning: A Faster, More Transparent Way to Manage Your Entitlements

We know that when you invest in Cisco hardware, software, or SaaS, you want to put it to work immediately. This has been the focus of our journey to transform Smart Account management, and we are excited to highlight several key enhancements made to CiscoLicense Central which are removing administrative bottlenecks and allowing you to use your technology investments as soon as possible.

### License Management

## **Accelerate Device Deployment: New Reporting Policy Features in Cisco License Central**

Cisco has transformed how you manage "reporting policies"—the essential rules that ensure your devices report usage correctly and remain compliant.

## **Ask Licensing**

### **Transforming Licensing Support with AI-Powered Assistance and Enhanced Features**

AI-powered assistance is now the primary way you can get help using Ask Licensing. Instead of navigating drop-down menus, you can now use natural language to describe your needs, and new default options make it faster and easier to get accurate answers.

## **Buying Programs in Cisco License Central**

### **Consumption Clarity from New Views and Report Options**

Within Cisco License Central, we've enhanced the Suite and Subscription views introduced in October by adding in a Suite Consumption timeline view and offering cleaner export options for buying program data. The stage is set for what's coming in Q3: consumption data visibility.

## **Cisco License On-Prem**

### **Unveiling the Next Generation Experience - Training Begins February 18**

We will showcase the latest enhancements and features of the current On-Prem solution and give you an early look at the refreshed experience which will be available to "Early Adopter" participants before the GA release in summer 2026.
