For all customers, partners, resellers and distributors who hold valid Cisco service contracts, Cisco provides around-the-clock, award-winning technical support services, online and over the phone.

Online service request tools are available to registered Cisco.com users with a valid service contract. Start with the Cisco TAC Service Request Tool to create a service request. This tool lets you describe the issue in your own words and attach files to the service request. It will then route your service request to an appropriate engineer as fast as possible.

You can also use the Cisco TAC Service Request Tool to update your service request. This tool lets you update a service request in less than half the time it takes to dictate changes to a Cisco representative over the telephone. Plus, the tool will send an automatic alert to your Cisco TAC engineer when you submit any updates.

For urgent situations when you need to speak to an engineer immediately, refer to Table 1 to submit a service request over the telephone.

Outside these locations, contact the Cisco regional sales office nearest you, or contact your local authorized Cisco distributor.

If you have questions about order status, changes or returns, please visit the Cisco Worldwide Customer Service Contacts page on Cisco.com.

Returns Procedure for TAC RMA
Customers/Partners receive an RMA number once they submit a TAC RMA via the SVO tool and return the product to the return depot address.

Returns Procedure for TAC DOA
Customers/Partners who need to submit dead on arrival (DOA) products should open up a TAC case in most regions. In Japan, Customers/Partners submit DOA requests via the TAC Service Request Tool and receive an RMA number from the TAC DOA team.
TAC Issues

How to Open a TAC Case
To open a TAC case, Customers/Partners may access the TAC Service Request Tool at the following URLs:

- English: http://tools.cisco.com/ServiceRequestTool/create/launch.do
- Click on the link “Create a new TAC Service Request.”

The TAC Service Request Tool allows Customers/Partners to:

- Open severity 3 and 4 service requests
- Check the current status of open service requests
- Update open service requests with your own notes
- Attach files to open service requests
- View service requests closed within the last 18 months

If you describe a severity 3 or 4 service request online, the tool recommends resources that may provide a solution immediately. If you have a severity 1 or 2 network-down emergency, open your service request by telephone.

How to Query a TAC Case
To query a TAC case, Customers/Partners may access the TAC Service Request Tool at the following URLs:

- English: http://tools.cisco.com/ServiceRequestTool/create/launch.do
- Click on the link “Query a TAC Service Request.”

RMA Service Order Tools
The RMA Service Order Tools site provides tools and resources to streamline your service and parts logistics inquiries. Customers/Partners can use the Feedback Link for submitting SVO-related access requests, tool issues and general comments.
