

Collaboration Portfolio Features

The Collaboration Portfolio includes the Employee Experience Suite, a purpose-built, best-of-breed suite for hybrid work.

To participate in the Collaboration Portfolio, you must either purchase at least one Collaboration Full Commit Suite, which then enables you to purchase additional Collaboration Full Commit and/or Partial Commit Suites, or purchase a Full Commit Suite in the Networking Infrastructure, Applications Infrastructure, Provider Connectivity, or Security Portfolio, which then enables You to purchase Collaboration Partial Commit Suites.

You are required to cover Your entire enterprise (all Users), with a minimum of 250 Users (Webex Suite only) to access the Suites in the Collaboration Portfolio.

1. Full Commit Suite Requirements

Collaboration Users refers to the end user-validated enterprise-wide number of employees, contractors and other individuals who are provided collaboration products in Your environment. You are responsible for accurate representation of Collab user count.

Full Commit Suite spend is achieved when You purchase at least the recommended spend quantity corresponding to the User count, as reflected in the EA order tool. Purchased Collaboration Suites are licensed based upon the Meter reflected in the Portfolio Features table below.

Suite	Products	Full Commit Spend	Add-ons
Employee Experience	Webex Suite <i>(Minimum 250 users)</i>	\$50k	Webex Calling, Unified Communications Manager On-Premises Calling, Webex Calling Dedicated Instance, Enhanced Survivability for Webex Calling Dedicated Instance, Call Manager Express, Webex Audio, Real- Time Translations, Webex Edge Connect, Local Gateway, Webinars, Extended Security Pack, Virtual Connect for Dedicated Instance, Partner Connect for Dedicated Instance, Partner Network Connect, Direct Customer Connect, Video Integration for Microsoft Teams (VIMT), Webex Calling Workspace for Common Area, On-Premises Common Area, On-Premises Access, On-Premises Video Device Registration, CUBE, and Cloud Calling Setup Assist (One-Time Charge)
	Webex Calling Customer Assist		
	Webex Calling (Cloud) Professional & Standard		
	On-Premises Calling		

2. Growth Allowance, Initial Growth Cap

Certain Full Commit Suites in the Collaboration Portfolio, as indicated in the table below, include Growth Allowance and are subject to Initial Growth Cap. For these Full Commit Suites:

2.1 During the first six months of Your Suite Term, You can Consume up to 5% more than the number of licenses (or entitlements) for the Suite or Add-on You originally purchased. There are no extra charges if You do not exceed this 5% Initial Growth Cap during this period. If Your Consumption of a Suite or Add-On during this first six months exceeds the Initial Growth Cap, Cisco may initiate an off-cycle True Forward at the next quarterly anniversary of the Initial EA Order. 2.2. After the first six months of Your Suite Term, You can Consume up to 15% more than Your initial number of licenses (or entitlements) for the Suite or Add-on for the rest of your Suite Term. You will not be charged extra as long as You do not exceed this 15% Growth Allowance. If Your Consumption of a Suite or Add-On exceeds the Growth Allowance, Cisco will charge Your Approved Source only for the Use above the Growth Allowance threshold at the time of Your next True Forward.

4. Applicable Meters

User means an employee or contractor who utilizes devices capable of running the applicable Cisco Webex software, Cloud services, or related browser plug-ins as part of their job duties.

Deployed User means a User who has a profile configured within the installed Cisco Technology provisioning platform and associates that profile with the applicable desk phone, any Jabber client, any Webex app client, mobile phone, video Device, or personal computing Device, as applicable.
