

Software Support for Service Providers

Grow your business with confidence

Digital transformation is moving at warp speed. Have you been experiencing acceleration in consumer demand for information, communication, and entertainment services at speed and scale? Minimizing IT costs can be daunting when meeting increased bandwidth and content demand with agility and minimum downtime. In addition, driving business innovation and growth while achieving fast time to market is critical to ongoing success. Don't expect any let down soon. Gartner predicts a surge of 5.5 billion new mobile users by 2021, resulting in seven times the mobile data traffic.* Video usage on mobile devices is expected to increase by 78 percent.¹

The speed of change is not going to slow down soon, so get the best software support to help you navigate it with proactive services designed for your environment. Cisco® Software Support for Service Providers takes software coverage from a reactive support model to a software support portfolio that provides high-value, proactive service options.

Let these software support services work for you

Your Cisco account manager can help you choose between the basic, enhanced, and premium levels. To learn more about Software Support for Service Providers, contact your account manager or a Cisco authorized reseller.

High-value service options help accelerate business outcomes

Cisco Software Support for Service Providers provides proactive support for your Cisco Policy Suite for Mobile (POLICY) and Evolved Programmable Network Manager (EPNCORE) products, crucial to helping deliver services to your end customers. This offer is designed to help your IT team integrate and adopt Cisco software faster, improve daily operational efficiency, and assist in services innovation and growth with confidence.

The basic option includes 24x7 award-winning technical support, software updates, and access to online resources. The high-value enhanced and premium options provide incremental value benefits with configuration assistance, direct access to subject matter experts, faster response times, priority queuing, adoption services, and proactive support. With onboarding training, you'll make sure that your IT team is quickly able to deploy your solution.

How do I decide which level is right for my business?

Choosing the right software support service to support your company's software investments is never an easy choice. Some questions to consider:

- How critical is it to maintain software applications uptime and reduce disruption to end users?
- Do you want your IT team to more quickly realize the full value of your investment and drive faster time to market for your products and services?
- Would your IT staff benefit from best practices sharing from a technical expert?
- Do you want direct access to a designated services manager who knows your software solution?
- Would your business benefit from technical adoption support?
