

# Keep your business humming no matter what happens.

When **disruptions** occur in your environment, you and your workforce need to be ready. **We can help.**

## Cisco has the solutions to crisis-proof your business—**securely.**

Only Cisco has the integrated and comprehensive portfolio you need to ensure secure remote connectivity and collaboration during business disruptions.

### Dispersed teams

When you enable teams at different locations to collaborate virtually and run the company effectively with enhanced communications, here's what happens:

#### Oil and gas

Reduced staff maintenance crews in the field can work via secure video with offsite engineering teams.

#### Manufacturing

Sales teams can teleconference with shipping to move orders.

#### Utilities

Power plant workers can maintain day-to-day operations through coordination with offsite team workers, securely.

### Remote expert

When you give on-site engineers, operators, and field workers access to high-level oversight and detailed guidance from experts far away, here's what happens:

#### Oil and gas

Workers at the wellhead can troubleshoot instrumentation issues via secure teleconference with a remote advisor.

#### Manufacturing

Maintenance workers can fine-tune changeovers and fix problems by consulting step by step with an expert at another plant.

#### Utilities

Utility crew at a substation can video chat securely with a supervisor while running system diagnostics.

### Remote operations

When you provide critical visibility and remote access into physical production operations, here's what happens:

#### Oil and gas

Reduced staff maintenance crews in the field can work via secure video with offsite engineering teams.

#### Manufacturing

Sales teams can teleconference with shipping to move orders.

#### Utilities

Power plant workers can maintain day-to-day operations through coordination with offsite team workers, securely.

Keep your operations **resilient.**  
Your workforce **productive.** Your business **safe.**
