

Cisco WebEx Web Conferencing

A FedRAMPSM-Authorized Service that Provides Simple, Secure Cloud-Based Collaboration for the U.S. Government

Go ahead. Create and join meetings easily from your computer or mobile device. Invite participants to share content in real time. See who you're talking to. All in a highly secure environment.

This is now reality for government agencies, thanks to Cisco WebEx® Web Conferencing, a FedRAMP-Authorized Service.

As a FedRAMP-Authorized Service provided by the market leader in web and video conferencing, Cisco WebEx Web Conferencing lets you:

- Easily meet face to face with meeting participants from other locations
- See and hear the same information at the same time with attendees
- Collaborate and increase productivity without the need for travel
- Make meetings more engaging with high-definition (HD) video, audio, and content sharing

The Importance of FedRAMP

The Federal Risk and Authorization Management Program (FedRAMP) provides a cost-effective, risk-based approach for the adoption and use of cloud services by U.S. government agencies. FedRAMP processes are designed to assist federal government agencies in meeting Federal Information Security Management Act (FISMA) requirements for cloud systems. By standardizing on security assessment, authorization, and continuous monitoring for cloud products and services, this program delivers costs savings, accelerated adoption, and increased confidence in security to U.S. government agencies that are adopting cloud technologies. To learn more about FedRAMP, visit fedramp.gov.

Choose the Right Cisco WebEx Web Conferencing Solution for Your Needs

Cisco WebEx Meeting Center—Collaborate instantly, exchange ideas, and share content with attendees joining meetings from their computers on the go with their mobile devices.

Cisco WebEx Training Center—Create interactive online training sessions, customize registration to gather attendee information, and invite panelists to manage and organize Q&As, monitor audience attention, provide private rooms for group discussion, test participants, and post recordings for self-paced learning.

Cisco WebEx Event Center—Host large-scale (up to 3000 participants), multimedia web seminars, customize and automate registration for easy event organization, and automate email to organize events from invitations to follow-ups.

Cisco WebEx Support Center—Resolve issues in real time with hands-on support using permission-based desktop sharing.

Why Cisco?

- Get the most robust, industry-leading web conferencing solution that also adheres to stringent federal security requirements.
- Consistent, unparalleled reliability and security with operations and applications, regardless of where they reside.
- Cisco is a proven, trusted provider.
- Cisco has a broad collaboration-in-the-cloud suite of solutions.
- Cisco is committed to providing our federal government customers with the commercially available Cisco WebEx Web Conferencing services they know and trust through a secure, certified process.

Benefits of Face-to-Face Meetings Without the Travel and Expense

With the Cisco WebEx Web Conferencing services, you can use high-definition video to improve communications, relationships, and productivity by enabling people to meet face to face to share documents, presentations, and applications. Hosts and participants can launch or join meetings by phone or tablet, making it easy for everyone to attend—even if they are in different locations.

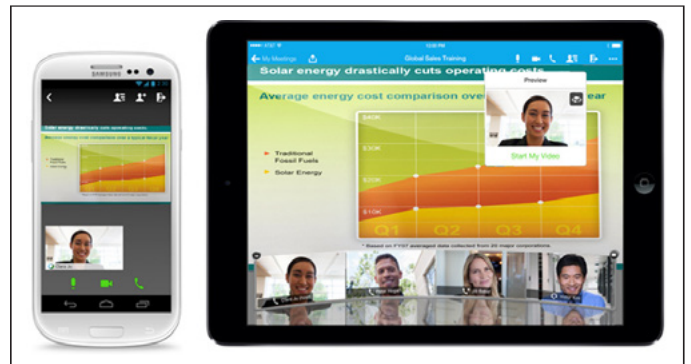

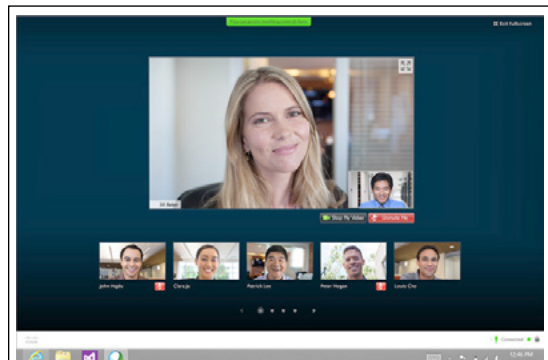

Integrated Video with Powerful Options

View videos with up to seven attendees, or select full-screen mode to view the active speaker in the main video panel, with other participants' video displayed as thumbnails. For the most detailed video view, select the expanded full-screen option to view the active speaker in true HD display with 720p resolution. The video in the main panel automatically switches to display the person who is speaking, creating an intuitive meeting experience.

Personal Rooms

Meet even faster in your own personal room. Cisco WebEx solutions provide a dedicated URL that provides hosts with an online office, which you can use to schedule ahead or leave your "door" open and let people "drop in."
