

Collaboration for Higher Education

Free your students from the constraints of the traditional classroom. With collaboration technologies like Cisco Spark, Cisco Spark Board, WebEx, and video conferencing endpoints, it's never been easier to enhance digital learning at your university. Discover the power of the liberated learner.

Student

Enhance student success

- Allow students to learn at their own pace.
- Provide on-demand learning.
- Make it possible for peers and professors to meet virtually.

Professor

Extend access

- Reach new students with distance learning, virtual classes and improved access to experts.
- Provide personalized learning.
- Share resources in virtual environments.

Administrator

Simplify workstreams

- Provide access to administrative and academic services on any device.
- Increase collaboration between institutions and departments.
- Save travel time and costs related to cross-institution projects.

Researcher

Collaborate securely

- Allow researchers to engage through video and virtual labs to share findings, brainstorm, and develop new knowledge.
- Give researchers extensive access to resources.
