

Keep Your School District Safe from Hackers and Ransomware

\$60 million

The annual net of a single ransomware operation that was holding school districts and other targets hostage*

\$124,000

Hackers demanded from four elementary schools after a weekend malware attack left their entire network offline, with the district unable to administer PARCC exams.

\$80,000

Taken from a single school district bank account by a remote hacker who was never caught.

\$300

Average cost per lost or stolen record of breaches in education globally

51

Children victimized by identity theft for every one adult.

1

The complete list of companies that offer a comprehensive, simple cybersecurity platform specifically focused on K-12 school systems. Namely, Cisco.

Get a K-12 Cybersecurity Architecture that Works

The modular solution ties neatly into your existing K-12 digital campus architecture. It accommodates individual requirements and protects against advanced threats. This solution offers:

- **Perimeter Protection** with next-generation firewalls and intrusion prevention systems.
- **Content Filtering** to ensure compliance with the Children's Internet Protection Act (CIPA) and address the two most common ways malware gets into a network: web and email content.
- **Identity Management and Policy** for seamless access and policy enforcement.
- **Network Visibility** for deep insight into any suspicious activity within your entire school's digital campus network.
- **Malware Protection**, including a collective intelligence threat database to provide much faster awareness and accuracy.
- **Remote Access Controls** to ensure staff and students can securely access the school's digital campus network and applications from anywhere.
- **Security Services** providing access to network and security experts along with continuous monitoring and management support.

We know cybersecurity is top of mind for Education Leaders. We have compiled some of our most impactful security resources to help you develop your cybersecurity strategy.
