*The hourly labor rates provided are Not-to-Exceed (NTE) rates. Individual hours or block of hours may not be purchased separately. Cisco will use the NTE rates to determine the total fixed price of a customer-approved SOW with specific deliverables. To calculate the total fixed price of the SOW, Cisco will evaluate, after consultation with the customer, the required level of effort needed to produce the required deliverables. Accordingly, because the SOW will be offered at a fixed price, Cisco will not keep time cards. Additionally, any customer-approved travel costs that are incurred in connection with the performance of the SOW will be itemized and billed separately based on agreed upon terms.
