

Don't Risk IT

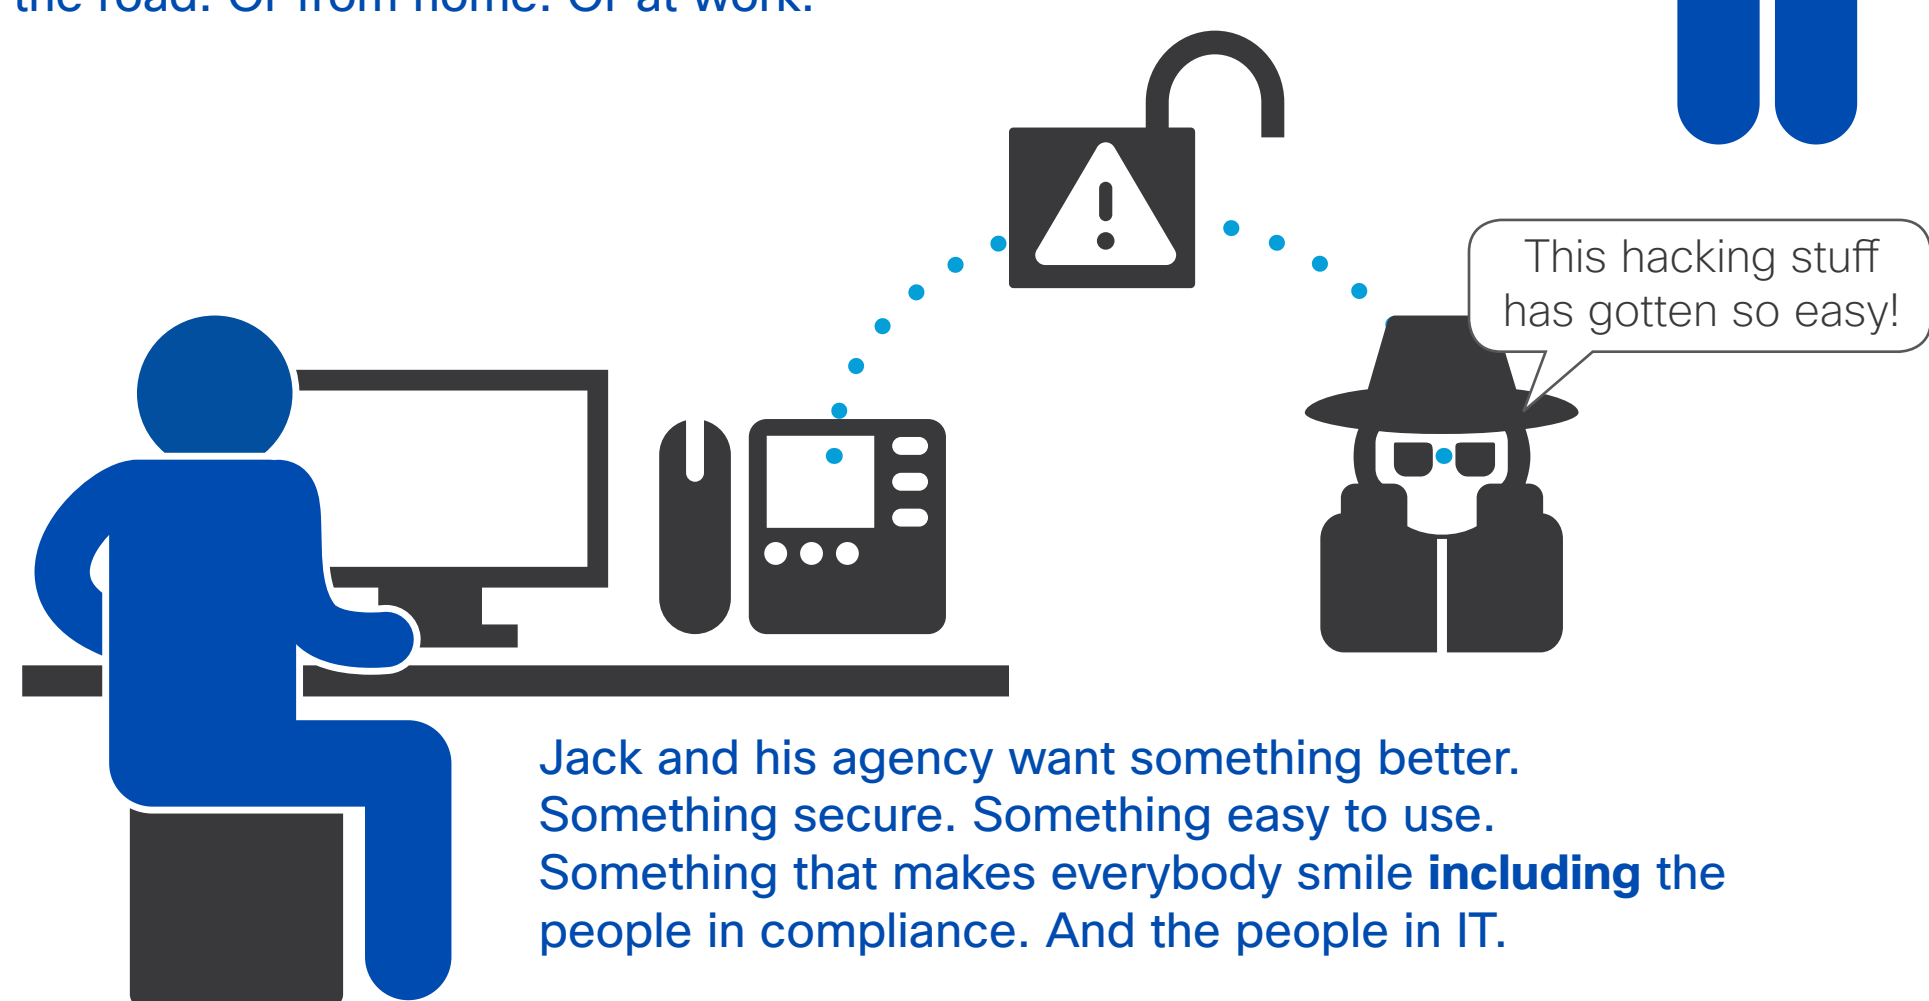

Cisco Hosted Collaboration Solution for Government —A Tale of Two Agencies—

See Jack?

Jack works hard – but not smart.

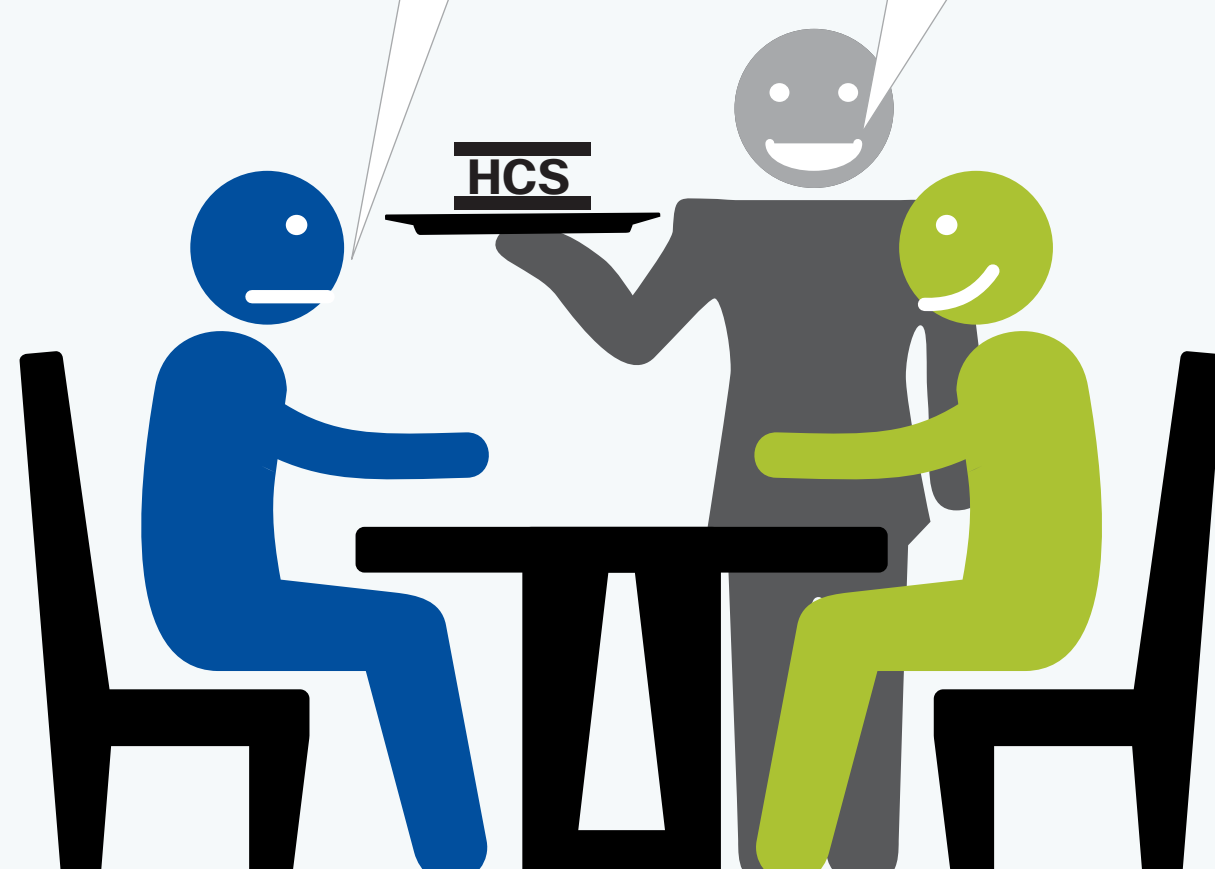

His agency's phone system ... let's just say it may not be secure. Shhhhh. Don't tell the bad guys. But Jack already knows, and he's not happy. He can't communicate securely and efficiently on the road. Or from home. Or at work.

Turns out Jack wants what Zach's agency is using.

I'll have what he's having.

Cisco Hosted Collaboration Solution (HCS) for Government.

Cisco HCS for Government is a cloud-based unified communications service.

It's also FedRAMPSM-Authorized, which makes all those people who don't smile much a lot happier.

Zach smiles a lot.

Zach's got secure voice, video, instant messaging and conferencing. Wherever he is and with a number of devices to choose from.

Cisco HCS for Government.

Be like Zach – and the smart people who run his agency. Contact Cisco to learn more about Cisco Hosted Collaboration Solution for Government or visit: cisco.com/go/fedramp
