Cisco UCS C220 M3 Rackmount Servers

The Cisco® Unified Computing System™ (Cisco UCS) combines Cisco UCS C-Series Rack Servers and B-Series Blade Servers with networking and storage access into a single converged system that simplifies management and delivers greater cost efficiency and agility with increased visibility and control. The latest expansion of the Cisco UCS portfolio includes the new Cisco® UCS C220 M3 Rack Server (one rack unit [1RU]) and Cisco UCS C240 M3 Rack Server (2RU) and the Cisco UCS B200 M3 Blade Server. These three new servers increase compute density through more cores and cache balanced with more memory capacity, disk drives and with faster I/O. Together these server improvements and complementary Cisco UCS advancements deliver the best combination of features and cost efficiency required to support IT's diverse server needs. The Cisco UCS C220 M3 Rack Server is designed for performance and density over a wide range of business workloads, from web serving to distributed databases. Building on the success of the Cisco UCS C200 M2 Rack Server, the enterprise-class Cisco UCS C220 M3 server further extends the capabilities of the Cisco UCS portfolio in a 1RU form factor with the addition of the Intel® Xeon® processor E5-2600 product family, which delivers significant performance and efficiency gains. In addition, the Cisco UCS C220 M3 server offers up to two Intel® Xeon® processor E5-2600s product family, 16 DIMM slots, eight disk drives, and two 1 Gigabit Ethernet LAN-on-motherboard (LOM) ports, delivering outstanding density and performance in a compact package. The Cisco UCS C220 M3 interfaces with Cisco UCS using another unique Cisco innovation: the Cisco UCS P81E Virtual Interface Card (VIC). The Cisco UCS C220 M3 server is a high-density general-purpose 2-socket server optimized to deliver high performance for a large range of workloads, including distributed database clusters, middleware, high-performance virtual desktops, and IT and web infrastructure.

You can learn more about the Cisco UCS C220 M3 Rackmount Server on Cisco's website at the following URL:
http://tinyurl.com/cisco-C220-M3

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:

Cisco UCS C240 M3 Rackmount Servers

The form-factor-agnostic Cisco® Unified Computing System™ (Cisco UCS™) combines Cisco UCS C-Series Rack Servers and B-Series Blade Servers with networking and storage access in a single converged system that simplifies management and delivers greater cost efficiency and agility with increased visibility and control. The latest expansion of the Cisco UCS portfolio includes the new Cisco UCS C240 M3 Rack Server (two rack units [2RU]) and Cisco UCS C220 M3 Rack Server (1RU) and the Cisco UCS B200 M3 Blade Server. These three new servers increase compute density through more cores and cache balanced with more memory capacity and disk drives and faster I/O. Together these server improvements and complementary Cisco UCS advancements deliver the combination of features and cost efficiency required to support IT's diverse server needs. The Cisco UCS C240 M3 Rack Server is designed for both performance and expandability over a wide range of storage-intensive infrastructure workloads, from big data to collaboration. Building on the success of the Cisco UCS C210 M2 Rack Server, the enterprise-class Cisco UCS C240 M3 server further extends the capabilities of the Cisco UCS portfolio in a 2RU form factor with the addition of the Intel® Xeon® processor E5-2600 product family, which delivers an outstanding combination of performance, flexibility, and efficiency gains. The Cisco UCS C240 M3 offers up to two Intel® Xeon® processor E5-2600 product family, 24 DIMM slots, 24 disk drives, and four 1 Gigabit Ethernet LAN-on-motherboard (LOM) ports to provide exceptional levels of internal memory and storage expandability and exceptional performance. The Cisco UCS C240 M3 interfaces with Cisco UCS using another Cisco innovation, the Cisco UCS P81E Virtual Interface Card (VIC). Not all storage-intensive workloads are alike, and the Cisco UCS C240 M3 server's disk configuration delivers balanced performance and expandability to best meet individual workload requirements. With up to 24 internal drives, the Cisco UCS C240 M3 optionally offers 10,000-RPM and 15,000-RPM SAS drives to deliver a high number of I/O operations per second for transactional workloads such as database management systems. In addition, high-capacity SATA drives provide an economical, large-capacity solution. Superfast SSDs are a third option for workloads that demand extremely fast access to smaller amounts of data. A choice of RAID controller options also helps increase disk performance and reliability. The Cisco UCS C240 M3 further increases performance and customer choice over many types of storage-intensive applications such as collaboration, small and medium-sized business (SMB) databases, Big Data infrastructure, virtualization, server consolidation, storage servers implementations, and high-performance appliances solutions.

You can learn more about the Cisco UCS C240 M3 Rackmount Server on Cisco's website at the following URL:

Cisco UCS C420 M3 Rackmount Servers

The Cisco UCS C420 M3 Rack Server is a high-density, enterprise-class, four-socket, two-rack-unit (2RU) rack server designed for compute, I/O, storage, and memory-intensive standalone and virtualized applications. The addition of the Intel® Xeon® processor E5-4600 product family delivers an optimal combination of performance, flexibility, and efficiency gains.

You can learn more about the Cisco UCS C420 M3 Rackmount Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-c420-m3-rack-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com

For sales and account support, please contact one of Cisco's local account managers:

Cisco UCS C220 M4 Rackmount Servers

The enterprise-class Cisco UCS C220 M4 server extends the capabilities of the Cisco UCS portfolio in a 1RU form factor. It incorporates the Intel® Xeon® processor E5-2600 v3 product family, next-generation DDR4 memory, and 12-Gbps SAS throughput, delivering significant performance and efficiency gains. The Cisco UCS C220 M4 rack server delivers outstanding levels of expandability and performance in a compact 1RU package:

- Up to 24 DDR4 DIMMs for improved performance and lower power consumption
- Up to 8 Small Form-Factor (SFF) drives or up to 4 Large Form-Factor (LFF) drives
- Support for 12-Gbps SAS Module RAID controller in a dedicated slot, leaving the remaining two PCIe Gen 3.0 slots available for other expansion cards
- A modular LAN-on-motherboard (mLOM) slot that can be used to install a Cisco UCS virtual interface card (VIC) or third-party network interface card (NIC) without consuming a PCIe slot
- Two embedded 1Gigabit Ethernet LAN-on-motherboard (LOM) ports

You can learn more about the Cisco UCS C220 M4 Rackmount Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c220-m4-rack-server/datasheet-c78-732386.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:

Cisco UCS C240 M4 Rackmount Servers

The enterprise-class Cisco UCS C240 M4 server extends the capabilities of the Cisco UCS portfolio in a 2RU form factor. Based on the Intel® Xeon® processor E5-2600 v3 series, it delivers an outstanding combination of performance, flexibility, and efficiency. In addition, the Cisco UCS C240 M4 offers outstanding levels of internal memory and storage expandability with exceptional performance. It delivers:

- Up to 24 DDR4 DIMMs for improved performance and lower power consumption
- Up to 6 PCI Express (PCIe) 3.0 slots (4 full-height, full-length)
- Up to 24 small form factor (SFF) drives or 12 large form factor (LFF) drives, plus two (optional) internal SATA boot drives
- Support for 12-Gbps SAS drives
- A modular LAN-on-motherboard (mLOM) slot for installing a next-generation Cisco virtual interface card (VIC) or third-party network interface card (NIC) without consuming a PCIe slot
- 2 x 1 Gigabit Ethernet embedded LOM ports
- Supports up to two double-wide NVIDIA graphics processing units (GPUs), providing a graphics-rich experience to more virtual users
- Excellent reliability, availability, and serviceability (RAS) features with tool-free CPU insertion, easy-to-use latching lid, hot-swappable and hot-pluggable components, and redundant Cisco® Flexible Flash (FlexFlash) SD cards.

You can learn more about the Cisco UCS C240 M3 Rackmount Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/collateral/servers-unified-computing/ucs-c240-m4-rack-server/datasheet-c78-732455.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:

Cisco UCS C460 M4 Rackmount Servers

The Cisco UCS C460 M4 Rack Server offers exceptionally high performance and reliability to power the most compute- and memory-intensive,

You can learn more about the Cisco UCS C460 M4 Rackmount Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-c460-m4-rack-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com

For sales and account support, please contact one of Cisco's local account managers:

Virginia Temple virtempl@cisco.com 318-243-9932

Cisco UCS C3160 Rack Server

Modular High-Density Cisco UCS C-Series Rack Servers

The Cisco UCS® C3160 Rack Server (Figure 1) is a modular, high-density rack server ideal for service providers, enterprises, and industry-specific

The Cisco UCS C3160 uses a modular server architecture which, taking advantage of our blade technology expertise, allows you to upgrade the

- Up to 24 Compute Cores
- Up to 60 drives mix of Large Form Factor (LFF) with up to 14 Solid State Drives (SSDs) plus two solid-state drive (SSD) SATA boot drives
- Up to 512 GB memory
- Support for 12-Gbps serial-attached SCSI (SAS) drives
- A modular LAN-on-motherboard (mLOM) slot on the system I/O controller for installing Cisco® virtual interface card (VIC) or third-party network
- High reliability, availability, and serviceability features with tool-less server nodes, system I/O controller, easy-to-use latching lid, and hot-

You can learn more about the Cisco UCS C3160 M4 Rackmount Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-c3160-rack-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com

Cisco UCS 5100 Series Blade Server Chassis

The Cisco UCS 5100 Series Blade Server Chassis is a crucial building block of the Cisco Unified Computing System, delivering a scalable and flexible architecture for current and future data center needs, while helping reduce total cost of ownership.

Cisco's first blade-server chassis offering, the Cisco UCS 5108 Blade Server Chassis, is six rack units (6RU) high, can mount in an industry-standard 19-inch rack, and uses standard front-to-back cooling. A chassis can accommodate up to eight half-width or four full-width Cisco UCS B-Series Blade Servers form factors within the same chassis. The Cisco UCS 5108 Blade Server Chassis revolutionizes the use and deployment of blade-based systems. By incorporating unified fabric and fabric-extender technology, the Cisco Unified Computing System enables the chassis to have fewer physical components, require no independent management, and be more energy efficient than traditional blade-server chassis. This simplicity eliminates the need for dedicated chassis management and blade switches, reduces cabling, and allowing scalability to 40 chassis without adding complexity. The Cisco UCS 5108 Blade Server Chassis is a critical component in delivering the simplicity and IT responsiveness for the data center as part of the Cisco Unified Computing System.

You can learn more about the Cisco UCS 5100 Series Blade Server Chassis on Cisco's website at the following URL:

Cisco UCS Fabric Interconnect

The Cisco® UCS 6100 Series Fabric Interconnects are a core part of the Cisco Unified Computing System, providing both network connectivity and management capabilities for the system. The Cisco UCS 6100 Series offers line-rate, low-latency, lossless 10 Gigabit Ethernet and Fibre Channel over Ethernet (FCoE) functions. The Cisco UCS 6100 Series provides the management and communication backbone for the Cisco UCS B-Series Blade Servers and UCS 5100 Series Blade Server Chassis. All chassis, and therefore all blades, attached to the Cisco UCS 6100 Series Fabric Interconnects become part of a single, highly available management domain. In addition, by supporting unified fabric, the Cisco UCS 6100 Series provides both the LAN and SAN connectivity for all blades within its domain. From a networking perspective, the Cisco UCS 6100 Series uses a cut-through architecture, supporting deterministic, low-latency, line-rate 10 Gigabit Ethernet on all ports, independent of packet size and enabled services. The product family supports Cisco low-latency, lossless 10 Gigabit Ethernet1 unified network fabric capabilities, which increase the reliability, efficiency, and scalability of Ethernet networks. The fabric interconnect supports multiple traffic classes over a lossless Ethernet fabric from the blade through the interconnect. Significant TCO savings come from an FCoE-optimized server design in which network interface cards (NICs), host bus adapters (HBAs), cables, and switches can be consolidated.

You can learn more about the Cisco UCS 6100 Series Fabric Interconnect on Cisco's website at the following URL:

Cisco UCS B200 M3 Blade Servers

The Cisco® Unified Computing System™ (Cisco UCS™) combines Cisco UCS B-Series Blade Servers and C-Series Rack Servers with networking and storage access in a single converged system that simplifies management and delivers greater cost efficiency and agility with increased visibility and control. The latest server expansion of the Cisco UCS portfolio includes the new Cisco UCS B200 M3 Blade Server along with the new Cisco UCS C220 M3 Rack Server (one rack unit [1RU]) and Cisco UCS C240 M3 Rack Server (2RU). These three new servers increase compute density through more cores and cache balanced with more memory capacity and drives and with faster I/O. Together these server improvements and complementary Cisco UCS system advancements deliver the best combination of features and cost efficiency to support IT's diverse needs. The Cisco UCS B200 M3 Blade Server delivers performance, versatility, and density without compromise. It addresses the broadest set of workloads, from IT and web infrastructure, through distributed database. Building on the success of the Cisco UCS B200 M2 Blade Server, the enterprise-class Cisco UCS B200 M3 Blade Server further extends the capabilities of the Cisco UCS portfolio in a half-width blade form factor. The Cisco UCS B200 M3 harnesses the power of the latest Intel® Xeon® processor E5-2600 product family, with up to 384 GB of RAM (using 16-GB DIMMs), two disk drives, and up to dual 4x 10 Gigabit Ethernet throughput. In addition, Cisco UCS has the architectural advantage of not having to power and cool excess switches in each blade chassis. With a larger power budget per blade server, Cisco can design uncompromised expandability and capabilities in its blade servers, as evidenced by the new Cisco UCS B200 M3, with its leading memory slot and drive capacity.

The Cisco UCS B200 M3 provides: Two, multi-core, Intel® Xeon® processor E5-2600 product family CPUs, for up to 16 processing cores, 24 DIMM slots for industry-standard double-data-rate 3 (DDR3) memory running up to 1600 MHz and up to 384 GB of total memory (using 16-GB DIMMs); Two optional, hot-pluggable SAS or SATA hard disk drives (HDDs) or solid-state drives (SSDs); Remote management through a Cisco Integrated Management Controller (CIMC) that implements policy established in Cisco UCS Manager; Out-of-band access by remote keyboard, video, and mouse (KVM) device, Secure Shell (SSH) Protocol, and virtual media (vMedia) as well as the Intelligent Platform Management Interface (IPMI). In addition, the Cisco UCS B200 M3 is a half-width blade. Up to eight of these high-density, two-socket blade servers can reside in the 6RU Cisco UCS 5108 Blade Server Chassis, offering one of the highest densities of servers per rack unit in the industry. The Cisco UCS B200 M3 is suited for a broad range of IT workloads including virtualized workloads, IT and web infrastructure, virtual desktops, databases, middleware, enterprise resource planning (ERP) and customer relationship management (CRM) applications.

You can learn more about the Cisco UCS B200 M3 Blade Server on Cisco's website at the following URL:

Cisco UCS B200 M4 & M5 Blade Servers

The Cisco UCS B200 M4 Blade Server delivers record performance, expandability, and configurability for workloads ranging from web infrastructure Optimized for data center or cloud, the Cisco UCS B200 M4 can quickly deploy stateless physical and virtual workloads, with the programmability of

The UCS B200 M4 is built with the Intel¨ Xeon¨ E5-2600 v3 processor family, up to 768 GB of memory (with 32 GB DIMMs), up to two drives, and

In addition, Cisco UCS has the architectural advantage of not having to power and cool switches in each blade chassis. Having a larger power

The UCS B200 M4 Blade Server delivers:

- Suitability for a wide range of applications and workload requirements
- Highest-performing CPU and memory options without constraints in configuration, power or cooling
- Half-width form factor offering industry-leading benefits
- Latest features of Cisco UCS Virtual Interface Cards (VICs)

You can learn more about the Cisco UCS B200 M4 Blade Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-b200-m4-blade-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com

For sales and account support, please contact one of Cisco's local account managers:

Cisco UCS B260 M4 Blade Servers

Turn your mission-critical business workloads into a competitive advantage by harnessing the value of your most important data assets.
The Cisco UCS B260 M4 combines the power of the latest Intel® Xeon® processor E7 v2 product family and accelerates access to critical data
The UCS B260 M4 server can also be upgraded to a four-socket UCS B460 M4 Blade Server. The upgrade is simple and cost-effective in

Up to two Intel® Xeon® processor E7 v2 product family
48 dual in-line memory module (DIMM) slots
Up to 1.5 TB memory using 32 GB DIMMs
Two optional, hot-pluggable drive bays supporting HDD and SSD drives with SAS or SATA interfaces
Three mezzanine connectors for up to 160 Gbps I/O per blade
Full-width form factor

You can learn more about the Cisco UCS B260 M4 Blade Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-b260-m4-blade-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com

Cisco UCS B420 M4 Blade Servers

Dense Four-Socket Performance and Scalability

Designed for demanding virtualization and database workloads, the B420 M4 combines a large memory footprint with 4-socket scalability, using the Intel® Xeon® processor E5-4600 v3 product family. The blade server supports 2133 MHz DDR4 memory and utilizes Cisco UCS virtual interface card technology to achieve up to 160 Gbps aggregate I/O bandwidth, all in a dense, full-width blade form factor

Dense Four-Socket Performance and Scalability

Designed for demanding virtualization and database workloads, the B420 M4 combines a large memory footprint with 4-socket scalability, using the Intel® Xeon® processor E5-4600 v3 product family. The blade server supports 2133 MHz DDR4 memory and utilizes Cisco UCS virtual interface card technology to achieve up to 160 Gbps aggregate I/O bandwidth, all in a dense, full-width blade form factor

You can learn more about the Cisco UCS B420 M4 Blade Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-b420-m4-blade-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com

Cisco UCS B460 M4 Blade Servers

The Cisco UCS B460 M4 Blade Server provides outstanding performance and enterprise-critical stability for memory-intensive workloads such
The Cisco UCS B460 M4 server harnesses the power of four of the latest Intel® Xeon® processor E7 v2 product family and accelerates access
Easy integration into UCS Managed server environments
Cisco SingleConnect technology for one simplified link for rack servers, blade servers, and virtual machines
Six mezzanine connectors providing vast I/O expandability
Industry leading performance, features, and reliability, availability, and serviceability capabilities
- Up to four Intel¨ Xeon¨ processor E7 v2 product family
- 96 dual in-line memory module (DIMM) slots
- Up to 3.0 TB memory using 32 GB DIMMs
- Four optional, hot-pluggable drive bays supporting HDD and SSD drives with SAS or SATA interfaces
- Two modular LAN on Motherboard (mLOM)
- Four PCIe mezzanine slots
- Provides up to 320 Gbps overall Ethernet throughput

You can learn more about the Cisco UCS B460 M4 Blade Server on Cisco's website at the following URL:
http://www.cisco.com/c/en/us/products/servers-unified-computing/ucs-b460-m4-blade-server/index.html

You can compare the different models of Cisco UCS servers and create custom builds at the following URL:
http://buildprice.cisco.com
