Cisco Aironet 1560 Outdoor Access Points

Cisco Aironet® 1560 Series Outdoor Access Points offer the latest 802.11ac Wave 2 functions in a rugged, low-profile housing that service providers and enterprises can deploy easily. Ideal for applications requiring rugged outdoor Wi-Fi coverage, the Cisco Aironet 1560 Series Access Points offer the latest IEEE 802.11ac Wave 2 radio standard in a compact, aesthetically pleasing, easy-to-deploy package. The 1560 Series offers flexible deployment options for service providers, enterprise networks, and public safety networks that need the fastest links possible for mobile, outdoor clients (smartphones, tablets, and laptops) and wireless backhaul. With options for internal or external antennas, the 1560 Series Access Points give network operators the flexibility to balance their desired wireless coverage with their need for easy deployment. The Cisco Aironet 1560 Series is built on the strong base of Cisco® wireless innovations such as:

- Cisco CleanAir® technology for spectrum intelligence
- Cisco ClientLink technology for beamforming
- Radio Resource Management (RRM) for dynamic transmitter channel and power control

Whether deployed as a traditional access point or wireless mesh access point, the Cisco Aironet 1560 Series provides the throughput capacity needed for today's bandwidth-hungry devices.

You can learn more about the Cisco Aironet 1560 Outdoor Access Point on Cisco's website at the following URL:

Cisco Aironet 2800 Series Access Point

Cisco Aironet 2800 Series access points bring 802.11ac Wave 2 functionality to mid- and large-sized enterprises, with many state-of-the-art, industry-leading features. Use these new access points to reduce data bottlenecks and slow speeds in your network. The Aironet 2800 Series offers: 802.11ac Wave 2 support with Multi-User MIMO (MU-MIMO) - Provides better client device performance by delivering data to clients simultaneously.

Flexible Radio Assignment - Optimizes your wireless network for high density conditions in real time. Dual 5-GHz Support - The Cisco Aironet 2800 access points offer two times the scale of 5-GHz mobile devices so you gain a significant increase in performance in high-density environments.

You can learn more about the Cisco Aironet 2800 Series Access Point on Cisco's website at the following URL:

Cisco Aironet 3800 Series Access Point

The Aironet 3800 Series extends 802.11ac speed and features to a new generation of smartphones, tablets, and high-performance

The Aironet 3800 Series supports 802.11ac Wave 2, providing a theoretical connection rate of up to 5.2 Gbps—that's roughly four times

Building on the Cisco Aironet heritage of RF excellence, the Cisco Aironet 3800 Series Access Points run on a purpose-built, innovative

With two radios built into each access point, the Aironet 3800 Series is more versatile than any access point currently on the market.

You can learn more about the Cisco Aironet 2800 Series Access Point on Cisco's website at the following URL:

Cisco Aironet 1850 Series Wireless Access Points

Cisco's next generation access point supporting 802.11ac Wave 2 with 4x4 MIMO with four spatial streams
Ideal for small- to medium-sized networks
Supports MU-MIMO with three spatial streams for Wave 2 clients
Supports Cisco Mobility Express Solution for networks under 25 access points
Transmit beam-forming for a better client experience
Flexible deployment modes.
Controller-based deployments support small and medium networks
Integrated and external antenna models are available for various deployment environments
For solutions of up 25 access points, Cisco Mobility Express Solution provides an easy to set up solution that does not require a controller app
Better Wi-Fi coverage and performance with the latest Wi-Fi technology.
Supports 802.11ac Wave 2 (dual radio, 80 MHz channel size) and 4X4 MIMO
Improved client performance with multi-user multiple input and multiple output (MU-MIMO).
Get MU-MIMO with three spatial streams for 802.11ac Wave 2 clients
Transmit beam-forming for a better client experience
The 1850 Series provides two Gigabit Ethernet ports to support Link Aggregation Group (LAG).

Cisco Meraki Cloud Based Wireless Products

Cisco Meraki access points are built from the highest grade components and carefully optimized for a seamless user experience. The outcome: faster connections, greater user capacity, more coverage, and fewer support calls.

The Entire Network Under A Single Pane Of Glass
Powerful and intuitive multi-site management via the cloud, while eliminating the cost and complexity of traditional on-site wireless controllers.The Cisco Meraki dashboard gives visibility into the network users, their devices, and their applications. Armed with rich analytics, administrators can quickly create access control and application usage policies, optimizing both the end-user experience and network security.

Built for Performance
Enterprise-class 802.11ac and 802.11n APs feature high power radios and enhanced receive sensitivity. MIMO and integrated beamforming maximize capacity without sacrificing range. Features include: Enhanced CPU for line-rate deep packet inspection - Flash memory provisioned for cloud management - Custom RF design for enhanced performance

Cisco Meraki Cloud Managed Indoor Access Points
802.11n and 802.11ac indoor access points ranging from value-priced to high-performance models for high-density
Enterprise-grade security with guest access and BYOD support built in
Integrated application traffic shaping to prioritize critical apps and throttles, or to block unwanted apps
Built-in wireless intrusion detection and protection services, mesh routing, Power over Ethernet support, and more

Cisco Meraki Cloud-Managed Outdoor Access Points
802.11n outdoor access points designed for harsh, rugged, and outdoor environments (IP-67 rated)
Enterprise-grade security with guest access and BYOD support built-in
Integrated application traffic shaping prioritizes critical apps, throttles or blocks unwanted apps
Built-in WIDS/WIPS, mesh routing, PoE support, and more Compatible with N-type external antennas
Compatible with N-type external antennas
