

August 22, 2016

To whom it may concern,

Acumen Security verified that the following software faithfully embeds a FIPS 140 cryptographic module,

- Cisco Unity Connection, version 11.5.

During the course of the review, Acumen Security confirmed that the following cryptographic modules are properly incorporated into the product:

- Cisco FIPS Object Module, Cert #2505,
- RSA BSAFE Crypto-J, Cert #2057.

Acumen Security confirmed that the following features leverage the included embedded cryptographic modules,

- RSA BSAFE Crypto-J is used to provide all TLS related cryptographic services,
- Cisco FIPS Object Module is used to provide the following cryptographic services:
 - sRTP authentication, encryption, and decryption,
 - SNMP encryption, decryption, and hashing.

Additionally, Acumen security confirmed that the above referenced embedded cryptographic modules are initialized in a manner consistent with the instructions provided in the non-proprietary Security Policy.

Details of the verification may be obtained from Cisco Systems, Inc. at the request of the interested parties. This letter represents the independent opinions of Acumen Security and does not imply endorsement of the product by the CMVP or any other parties.

Sincerely,

Ashit Vora

Lab Director
