

June 1, 2026

To Whom It May Concern,

A compliance review of Cisco Webex RoomOS with software version 26.5, was completed and found that the Product integrates the following FIPS 140-3 approved cryptographic module:

1. CiscoSSL FIPS Provider 8.0, Cert. [#4891](#)

The Software is known to run on the following platforms:

Cisco Room Navigator	Cisco Room Kit EQX NR
Cisco Desk	Cisco Board Pro G2 55
Cisco Desk NR	Cisco Board Pro G2 55 NR
Cisco Room Bar	Cisco Board Pro G2 75
Cisco Room Bar NR	Cisco Board Pro G2 75 NR
Cisco Room Kit EQ	Cisco Room Kit Pro G2
Cisco Room Kit EQ NR	Cisco Room Kit Pro G2 NR
Cisco Room Bar Pro	Cisco Desk Pro G2
Cisco Room Bar Pro NR	Cisco Desk Pro G2 NR
Cisco Room Kit EQX	

Cisco confirms that the cryptographic module listed above provides cryptographic services for the following as applicable:

- TLS, SSHv2, H.323, and sRTP

The review/testing confirmed that:

1. The cryptographic module (mentioned above) does initialize in a manner that is compliant with its Security Policy.
2. All applicable cryptographic algorithms used for session establishment are handled within the cryptographic module.
3. All applicable underlying cryptographic algorithms support each service's key derivation function.

This letter has been generated in accordance with guidance provided by the Cryptographic Module Validation Program ([CMVP](#)). In general, a letter will not be generated for subsequent software releases unless a change has been made to the cryptographic module(s) noted in this letter.

The CMVP has not independently reviewed this analysis, testing or the results.

Any questions regarding these statements may be directed via e-mail to the Cisco Global Certification Team (GCT) at certteam@cisco.com.

Sincerely,

Ed Paradise,
SVP Engineering S&TO
