Whom It May Concern:

Acumen Security verified that the following product faithfully embeds a FIPS 140-2 validated cryptographic module,

- Cisco Unified Communications Manager IM and Presence Service (IM&P) 12.5.

During the course of the review, Acumen Security confirmed that the following FIPS 140-2 cryptographic module is incorporated into the product,

- Cisco FIPS Object Module (version 6.2), cert #2984

Acumen Security confirmed that the following features leverage the Cisco FIPS Object Module to provide cryptographic services, **TLS for XCP (XMPP), TLS for SIP Proxy and HTTPS (TLS)**.

The above referenced modules provide all of the cryptographic functionality for each of the services listed above, including:

1. Session establishment supporting each service,
2. All underlying cryptographic algorithms supporting each services' key derivation functions,
3. Hashing for each service.
4. Symmetric encryption for each service

Additionally, Acumen Security confirmed that the above referenced cryptographic module is initialized in a manner consistent with the instructions provided in the non-proprietary Security Policy.

Details of the verification may be obtained from Cisco Systems, Inc. at the request of interested parties. This letter represents the independent opinions of Acumen Security and does not imply endorsement of the product by the CMVP or any other parties.

Sincerely,

A handwritten signature in black ink, appearing to read 'Ashit Vora', with a checkmark below it.
