How digital ready is your hospital today?

What is a digital ready network?
A network that goes beyond supporting your rising IT demands. It’s a network that empowers you to improve experiences and outcomes.

The network is essential for digital and business transformation.
Only 16% of hospitals have a strong degree of alignment between their network and business strategies today. However, across all industries, organizations that are more aligned are more successful.

More mature networks drive positive business outcomes.
Organizations with more digital-ready networks...

- Have 3-3x the growth rate in revenue, customer retention, and profit over organizations with less mature networks.

- Have achieved a financial benefit of between $168K and $2,143K per 100 users per year.

- Are deploying almost 2x as many digital capabilities as those with less mature networks.

Cisco DNA, at the heart of healthcare innovation, enabling an intuitive network that’s constantly learning, adapting, and protecting.

Read the benefits for your healthcare organization. Begin by assessing your own network.

Take the assessment
