

Connect across agencies and their vehicles

Take a Small Step

by adding building wide WiFi, networking your state's roadways or . . .

Enhancing Situational Awareness for 1st Responders

Or Take a Big Leap

by updating to a digital-ready network that is simple, automated, intelligent and secure, you can empower your state's assets, personnel and citizens to connect anywhere, anytime using a variety of devices - all in real-time. Innovate faster, reduce costs and complexity, lower risk and optimize your agencies. And its all backed by industry-leading threat-centric cybersecurity when . . .

Deploying a Digital Platform that Brings Everything Together

Better Manage Assets
by tracking performance, location and maintenance

Connect Assets
for analytics/deeper insights to better serve citizens

Create Smarter, More Secure Buildings

Deploy a Digital Vehicle for Public Safety
empower personnel to reach beyond their vehicle to gather more information in real-time before, during and after an incident response

Deploy as Mobile Ops Center
to connect sensors, personnel, vehicles and other assets in the field, and back to headquarters

Access Remote Cameras and Sensors
to view real-time video from street, business and vehicle level

Free Personnel From Their Vehicles
using real-time video and data sharing to stay safer, better serve citizens and even gather evidence digitally for relay to a remote and highly secure digital evidence locker

Enhance Management & Operations
Integrate your state's departments for a single-pane view of all data sources to reduce costs, accelerate response times and increase effectiveness

Monitor Facilities and Infrastructure
Use real-time data and collaboration to better provide for your state's needs, throttle resources and increase peak efficiencies

Engage Citizens
thru interactive apps to reduce travel times/fuel use, ease parking

Reduce Maintenance Costs
by monitoring public spaces for usage and upkeep (roadways, parks, transit, campuses, irrigation and water resources)

Automate Assets
to monitor natural resources, detect spills, improve speed of response and better meet EPA and other regulatory requirements

Save Energy
and lower costs with longer life LED roadway lighting on poles that can host cameras and environmental sensors

Connect Transportation
to enhance roadway and fleet management, reduce accidents, traffic jams and emissions - plus add services
