Cisco Smart Cameras

Rapid Review

Rapid review empowers users to instantly review and rapidly scan recorded events, making it easy to see what happened before and after an incident. Investigate with ease using rapid review available now on the Cisco Meraki Vision portal.

Review hours of camera footage seamlessly without exporting video

Scrub footage quickly

Efficiently review hours of footage at up to 16x speed to quickly locate key moments and resolve incidents faster.

Complete the incident narrative

Gain complete context by easily searching before and after clips, so you have the full picture before starting your investigation.

Bandwidth efficient

Review and skim footage without playing full resolution video which reduces the strain on your network.

Visibility across multiple cameras

Enjoy fast, consistent review across all your cameras, including video walls for a seamless video scrubbing experience.

Skip to relevant footage

Navigate to events of interest by quickly skipping past any irrelevant footage.

Strategic incident management

Leverage rapid review along with other features like quick walls, attribute search and cross-cameras tracking to create a strategic workflow on Vision portal.
