

# Wanted: A Router Built for SMB Networking

As an IT pro in SMB, you need powerful tools to help support your networking needs. Like a well-equipped pocket utility knife, a smart networking solution is one that can get the job done and make it easier to get *your* job done.

## Networking in the Real World

IT pros face all kinds of networking challenges:

Managing multiple networking devices

Protecting against malicious traffic, anomalous traffic behavior, DoS attacks, and other advanced attacks

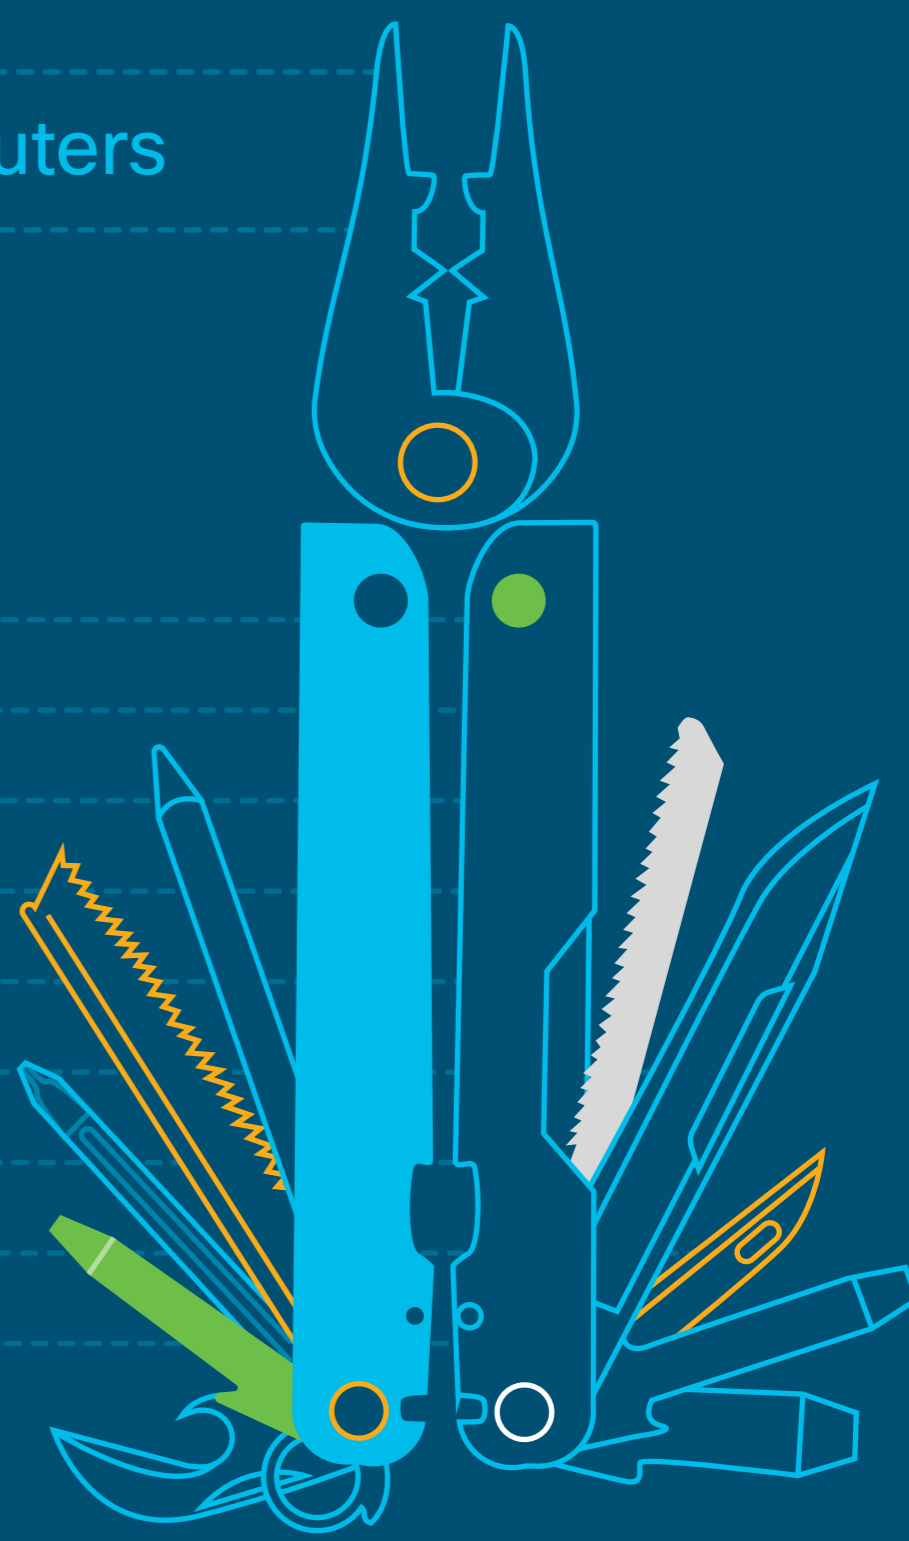

Meeting increasing user, app, and now IoT device demands

Meet the Cisco 4221 Integrated Services Router—the latest addition to the Cisco ISR 4000 Series. This versatile, value-priced 1RU desktop router provides enterprise-class network performance, services, and security.

## The “Swiss Army Knife” of Branch Routers

Coined the “Swiss army knife” of branch routers, the ISR 4221 is many networking tools in one, including:

- Wireless WAN (3G/4G LTE and Cat6 LTE Advanced)
- Support for IWAN functionality
- Wireless LAN
- Integrated switch ports
- VRF-aware firewall and NAT
- Multicore hardware VPN acceleration
- Network contention control
- Application services
- Built-in security

## Keeping Your Network Safe

To help protect your branch network and users, the Cisco 4221 ISR provides enterprise-class security features:

- IPSec VPN services
- Snort IPS
- Anomaly detection and machine learning with Cisco Stealthwatch Learning Networks
- Cisco Umbrella Branch protection at the DNS layer
- Cisco TrustSec

## A Technical Triumph for SMB Networking

The Cisco 4221 ISR offers performance and capabilities on par with an enterprise router, delivered in a desktop-sized package that’s ideal for SMB ecosystems:

1 Gigabit Ethernet

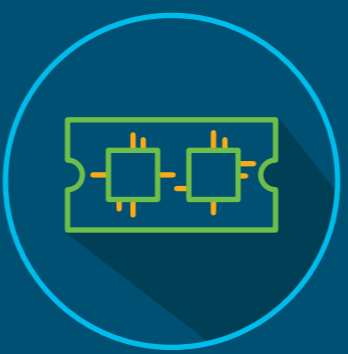

Throughput from 35 to 75 Mbps

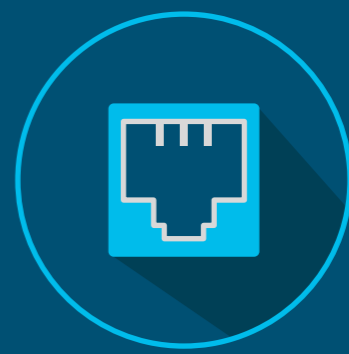

Up to 2 Network Interface Modules

8GB flash

4GB DRAM

Up to 2x8 Ethernet ports

## The Cisco 4221 ISR: Full-Service Networking

Offering the best price-for-performance in its class, the Cisco 4221 ISR is the ideal “Swiss army” router for your network. The Cisco 4221 ISR enables consistent business-driven and policy-based operations across network domains, including for microbranches, ATMs, kiosks, pop-up locations, and IoT use cases. Priced at just \$1,195 USD.
