

Cisco CCIE Enterprise Wireless Certification Program

Introducing the CCIE Enterprise Wireless certification program

Software, networking, and infrastructure grow more and more interconnected every day. Applications deliver exciting new experiences, and with intent-based networking, organizations can take advantage of automation to scale and secure their wireless networking infrastructure. With CCIE Enterprise Wireless certification, your opportunities to help maximize that potential are boundless. Just ask hiring managers: 71% of them say that certifications increase their confidence in an applicant's abilities.¹

We designed the CCIE Enterprise Wireless certification to help you prove your skills in the ever-changing landscape of wireless technologies. The certification covers core technology areas and validates your end-to-end lifecycle skills in complex enterprise wireless networks, from planning and design to operating and optimizing.

Among the industry's most widely recognized and respected certifications, CCIE tells the world in no uncertain terms that you know what you're talking about. In addition, completing a CCIE certification core exam earns you a Cisco® Specialist certification, so you get recognized for your accomplishments along the way.

Benefits

- **Take your place as a technical leader** in the fast-paced world of enterprise wireless networking
- **Combine your technical expertise with design skills** to position your organization for digital transformation
- **Distinguish yourself as the best of the best** from deploying to operating and optimizing complex wireless technologies
- **Add wireless automation skills** to your areas of expertise
- **Earn a Specialist certification** for passing the qualifying exam
- **Put that CCIE logo** on all your social media profiles

Go-live and next steps

- On February 24, 2020, the new CCIE Enterprise Wireless qualifying exam (350-401 ENCOR) goes live
- On April 27, 2020, the new CCIE Enterprise Wireless v1.0 lab exam goes live, and anyone who holds the current CCIE Wireless certification will receive the new CCIE Enterprise Wireless cert
- That means that between February 24 and April 27, 2020, to earn CCIE Wireless, you pass 350-401 ENCOR and the CCIE Wireless lab exam. As of April 27, the CCIE Enterprise Wireless v1.0 lab exam will replace the current CCIE Wireless lab exam

Earning your CCIE Enterprise Wireless certification

The CCIE Enterprise Wireless certification program validates your expertise with the latest technologies for today's enterprise wireless job roles. To earn CCIE Enterprise Wireless, you complete two exams:

- The qualifying exam, **Implementing and Operating Cisco Enterprise Network Core Technologies** (350-401 ENCOR), focuses on your knowledge of enterprise infrastructure including dual-stack (IPv4 and IPv6) architecture, virtualization, infrastructure, network assurance, security, and automation. You can prepare for this exam by taking the training course, **Implementing and Operating Cisco Enterprise Network Core Technologies** (ENCOR)
- The 8-hour, hands-on lab exam, **CCIE Enterprise Wireless v1.0**, covers the end-to-end lifecycle of complex enterprise wireless technologies from designing and deploying, to operating and optimizing

To achieve CCIE certification, you must take and pass your lab exam within 3 years of passing your core exam.

Industry recognition and real-world know-how

CCIE certification distinguishes you as the best of the best. So go ahead. Earn that CCIE Enterprise Wireless logo and post it on your social profiles.
