

Distinguish Yourself with CCIE

Software and networking grow more and more interconnected every day

Intent-based networking connects users, devices, apps, security intent, and policy

Multi-domain solutions cross enterprise, data center, service provider, and security

APIs and programmability drive new automation, agility, and scale

To capitalize on these opportunities, today's IT experts need to:

Combine technical expertise with design skills to get ready for digital transformation

Master programmability, automation, and security in complex infrastructure

That's why CCIE® certifications focus on today's technology and business needs:

The qualifying core exam topics apply across a technology, including automation and programmability

The lab exam validates end-to-end lifecycle skills with complex infrastructure, from planning and design to operating and optimizing

Every new written exam earns an individual Specialist certification. You can earn as many Specialist certifications in as many technology areas as you like

With CCIE, you can take your place as a technical leader

Technology areas include:

Enterprise Infrastructure

Enterprise Wireless

Data Center

Security

Service Provider

Collaboration

Did we mention that hiring managers love certified candidates?

78%

of technology executives and managers consider technical certifications a critical success factor

99%

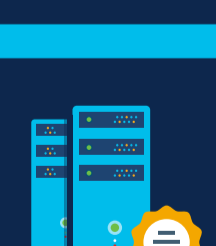

of organizations use certifications to make hiring decisions

Take your place as a technical leader in the fast-paced world of information technology

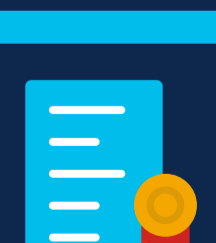

Combine your technical expertise with design skills to position your organization for digital transformation

Distinguish yourself as the best of the best from deploying to operating and optimizing complex infrastructure

Add automation skills to your areas of expertise
