CISCO Connect

Accelerate Your Journey to the Agentic Enterprise

With Splunk

Chris Irwin
Observability Specialist, chrirwin@cisco.com

Sept 2026

Forward-looking statements

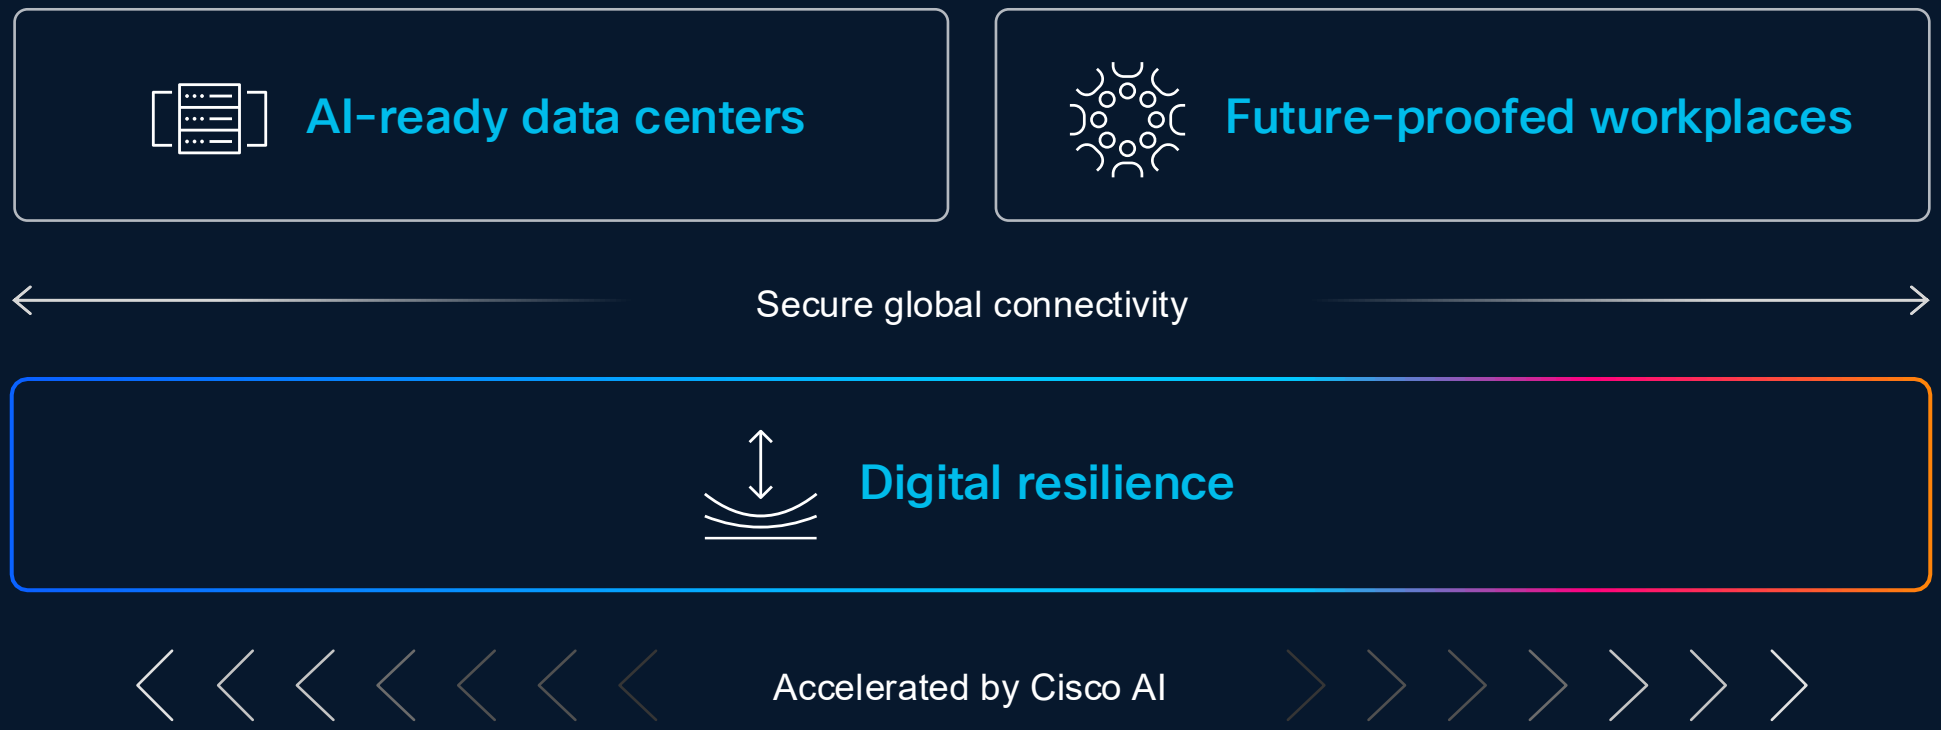

This presentation may contain forward-looking statements regarding future events, plans or the expected financial performance of our company, including our expectations regarding our products, technology, strategy, customers, markets, acquisitions and investments. These statements reflect management's current expectations, estimates and assumptions based on the information currently available to us. These forward-looking statements are not guarantees of future performance and involve significant risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from results, performance or achievements expressed or implied by the forward-looking statements contained in this presentation.
For additional information about factors that could cause actual results to differ materially from those described in the forward-looking statements made in this presentation, please refer to Cisco's periodic reports its other filings with the SEC, including the risk factors identified in Cisco's most recent quarterly report on Form 10-Q and annual report on Form 10-K, copies of which may be obtained by visiting the Cisco Investor Relations website at investor.cisco.com or the SEC's website at www.sec.gov. Any projections in this presentation are based on information currently available to Cisco, which is subject to change. The forward-looking statements made in this presentation are made as of the time and date of this presentation. If reviewed after the initial presentation, even if made available by us, on our website or otherwise, it may not contain current or accurate information. We disclaim any obligation to update or revise any forward-looking statement based on new information, future events or otherwise, except as required by applicable law.

In addition, any information about our roadmap outlines or our general product direction is subject to change at any time without notice. It is for informational purposes only and shall not be incorporated into any contract or other commitment. We undertake no obligation either to develop the features or functionalities described, in alpha or beta or in preview (used interchangeably), or to include any such feature or functionality in a future release.

Digital Resilience is a $400B problem

Rapid Data Explosion

Data volume will reach 390+ zettabytes by 2028 and 55% will be machine generated.

Context Gap

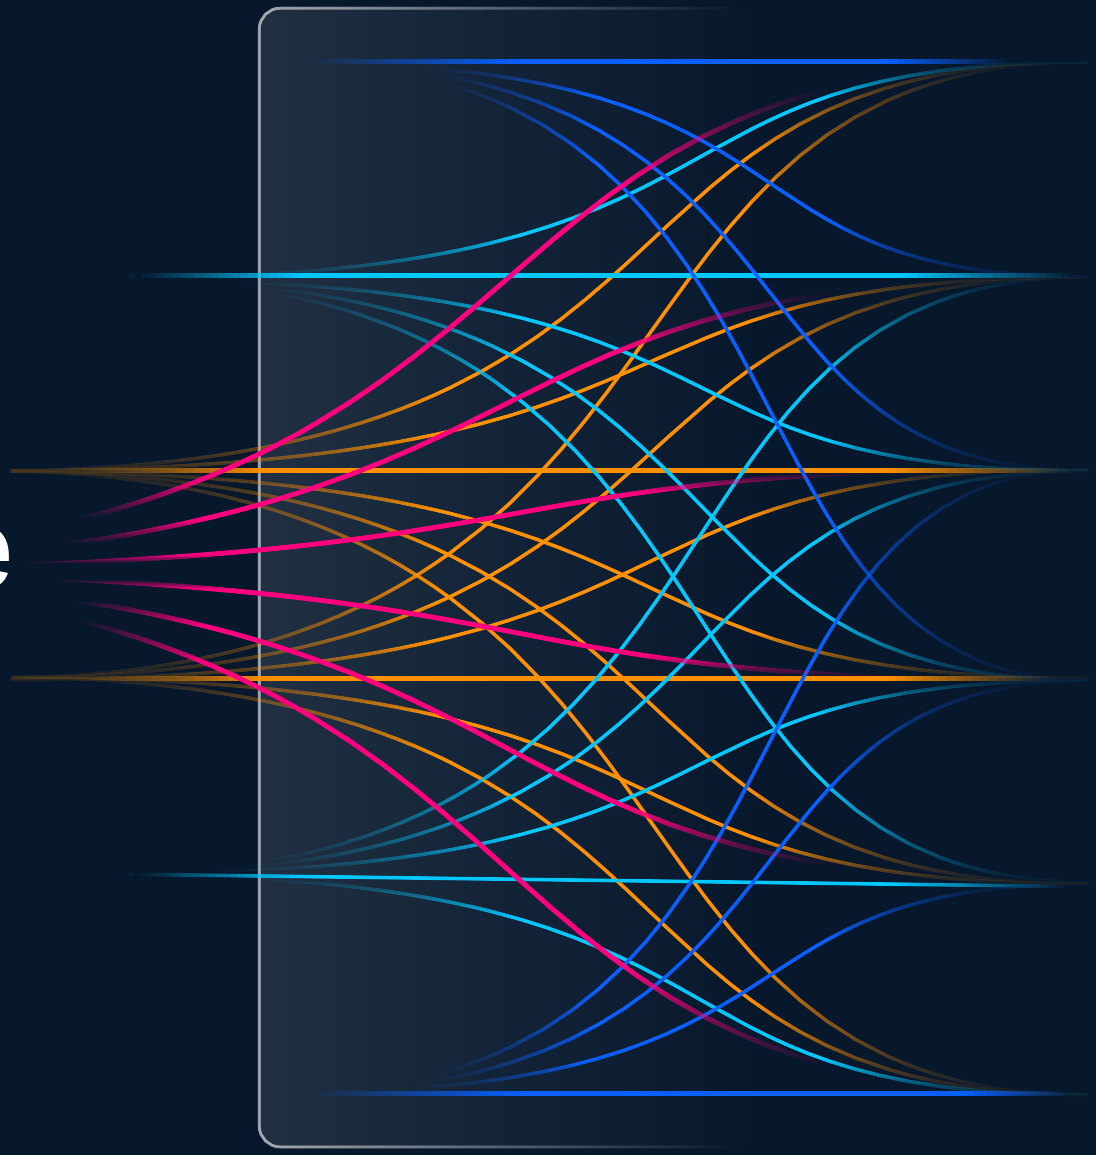

Only 34% of organizations have clean centralized data with real time integration for AI agents.

Trust and Governance Gap

Only 24% of organizations have implemented guardrails and live monitoring to govern AI.

The Resilience Paradox

More AI.
More Complexity.

NetOps
Maintain SLAs +
Reduce Outages

ITOps
Prevent Degradation + Improve Uptime

BizOps
Protect Revenue

SecOps
Detect, Contain and Reduce Risk

Observability
Improve Digital Experiences

Trust in AI
Making Agents Safe and Auditable

cisco

Cisco Data Fabric powered by the Splunk Platform

The System of Record and Intelligence Layer of the Agentic Enterprise

Data

Unify Data and Insights at Scale for Faster, Safer AI

- Manage data at petabyte scale
- Land all data economically
- Tier data by use case

Context

Fuel Intelligence with Contextualized Machine Data

- Catalog your enterprise
- Correlate relationships
- Surface insights

Action

Activate the Agentic Enterprise to Move From Reactive to Predictive

- Deploy agentic operations
- Connect your agents
- Build proprietary AI

Trust & Governance

Open & Extensible

© 2025 Cisco and/or its affiliates. All rights reserved.

cisco

Delivering impactful customer outcomes

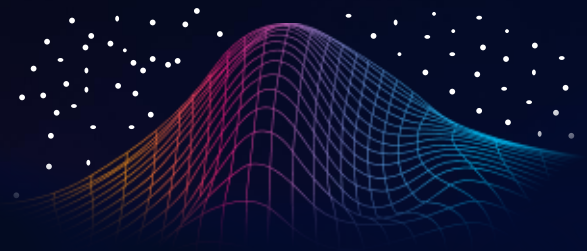

1. UNIFY

data and insights at scale
for faster, safer AI

2. FUEL

intelligence with
contextualized machine data

3. ACTIVATE

agentic operations to move
from reactive to predictive

AUTODESK

Data filtering and optimization capabilities are helping Hyatt cost effectively grow data visibility and **reduce mean time to resolution (MTTR) from hours to real time.**

ARGOS

Splunk AITK helped build custom AI models to process and analyze data locally using a digital twin without relying on constant internet access **resulting in $10M+ in savings.**

REPAY
Realtime Electronic Payments

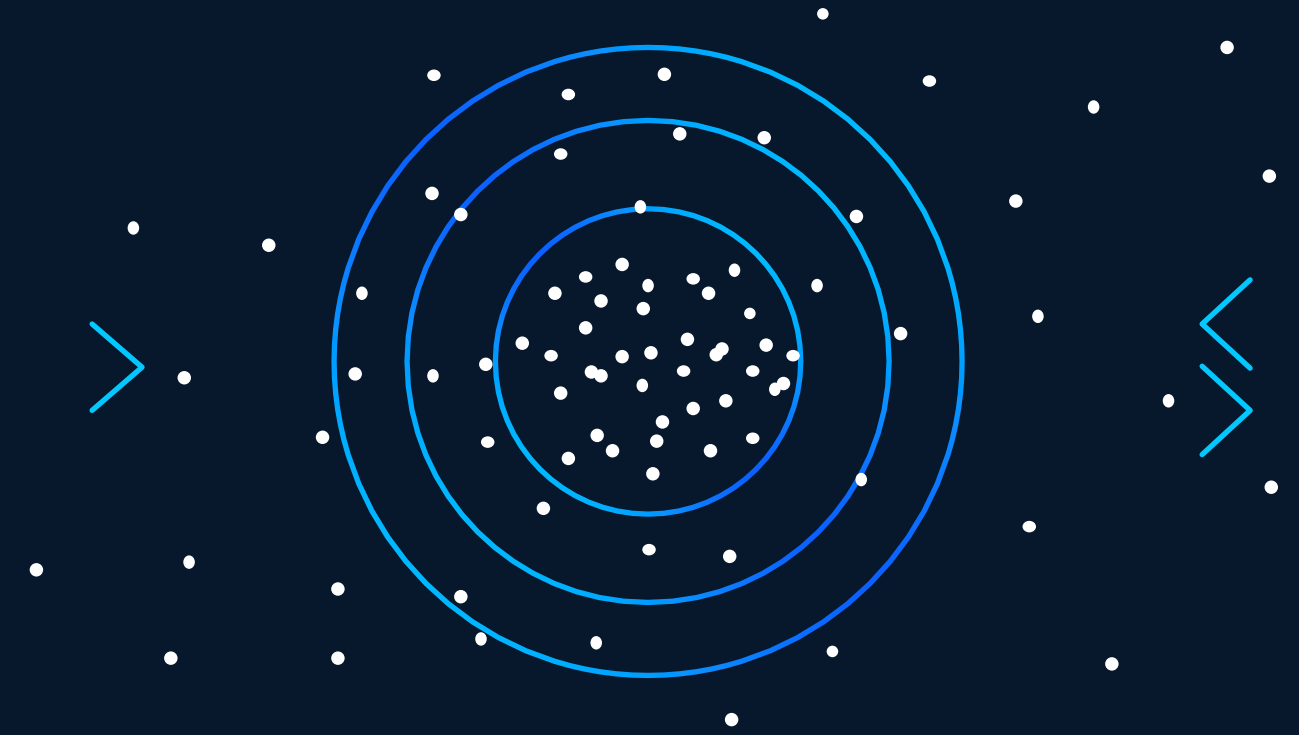

With the AI assistant in Observability Cloud, they were able to identify issues faster with a deeper understanding helping to **slash incident triage times by 50%.**

cisco

1. Unify data & insights at scale for faster, safer AI

Any data, anywhere it lives, in the Cloud or On-Premises

Cross Domain Intelligence across the Agentic Enterprise

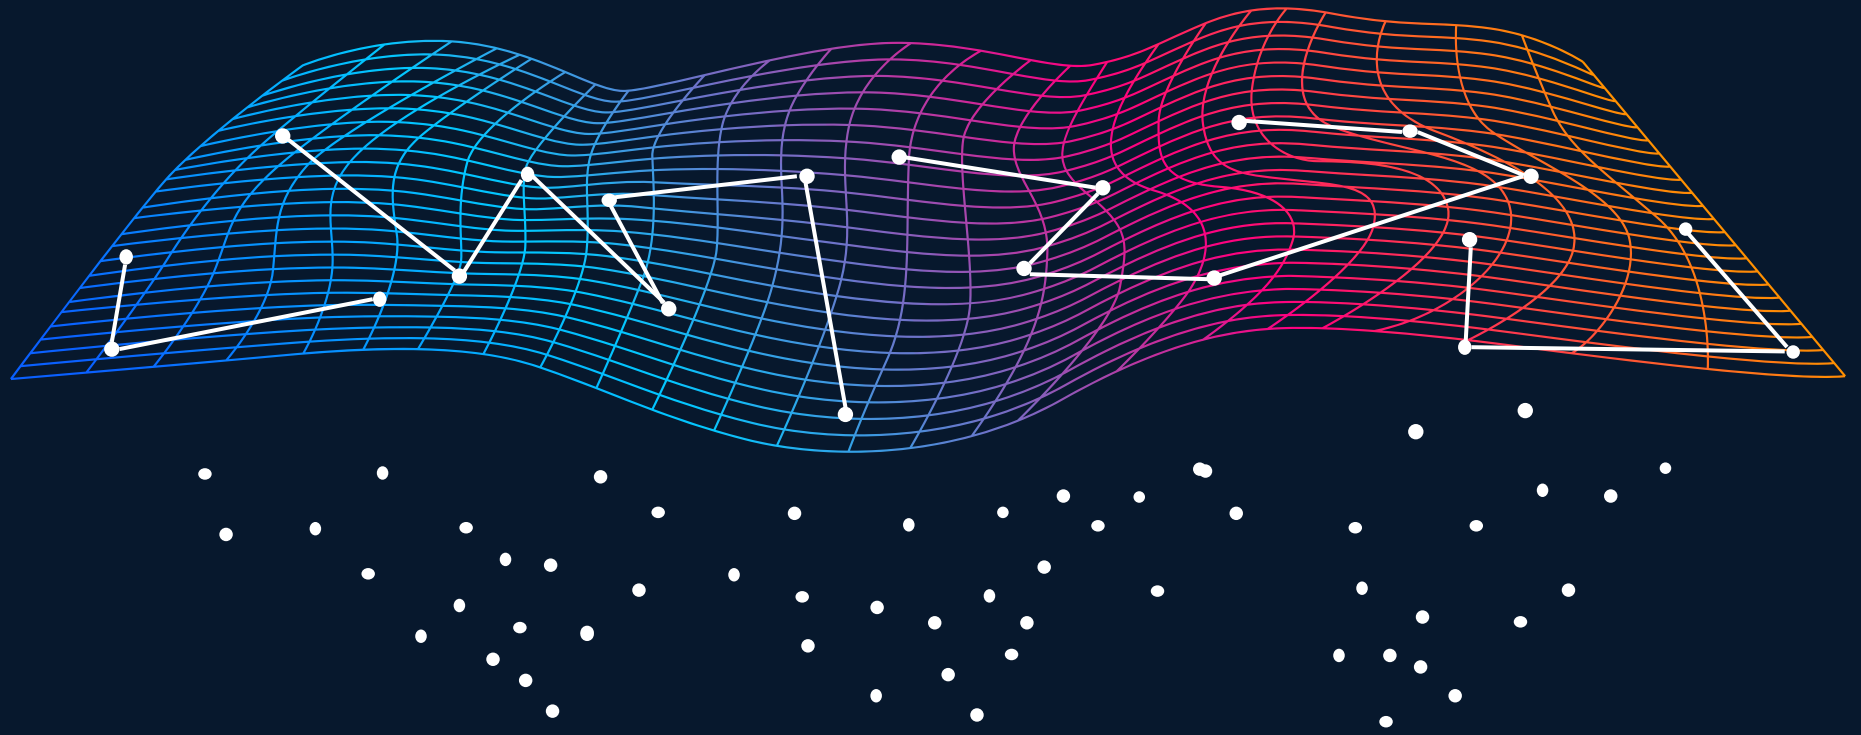

Unify cross-domain data for rapid value

Power AI with scalable, trusted information

Speed decisions by analyzing data where it lives

© 2025 Cisco and/or its affiliates. All rights reserved.

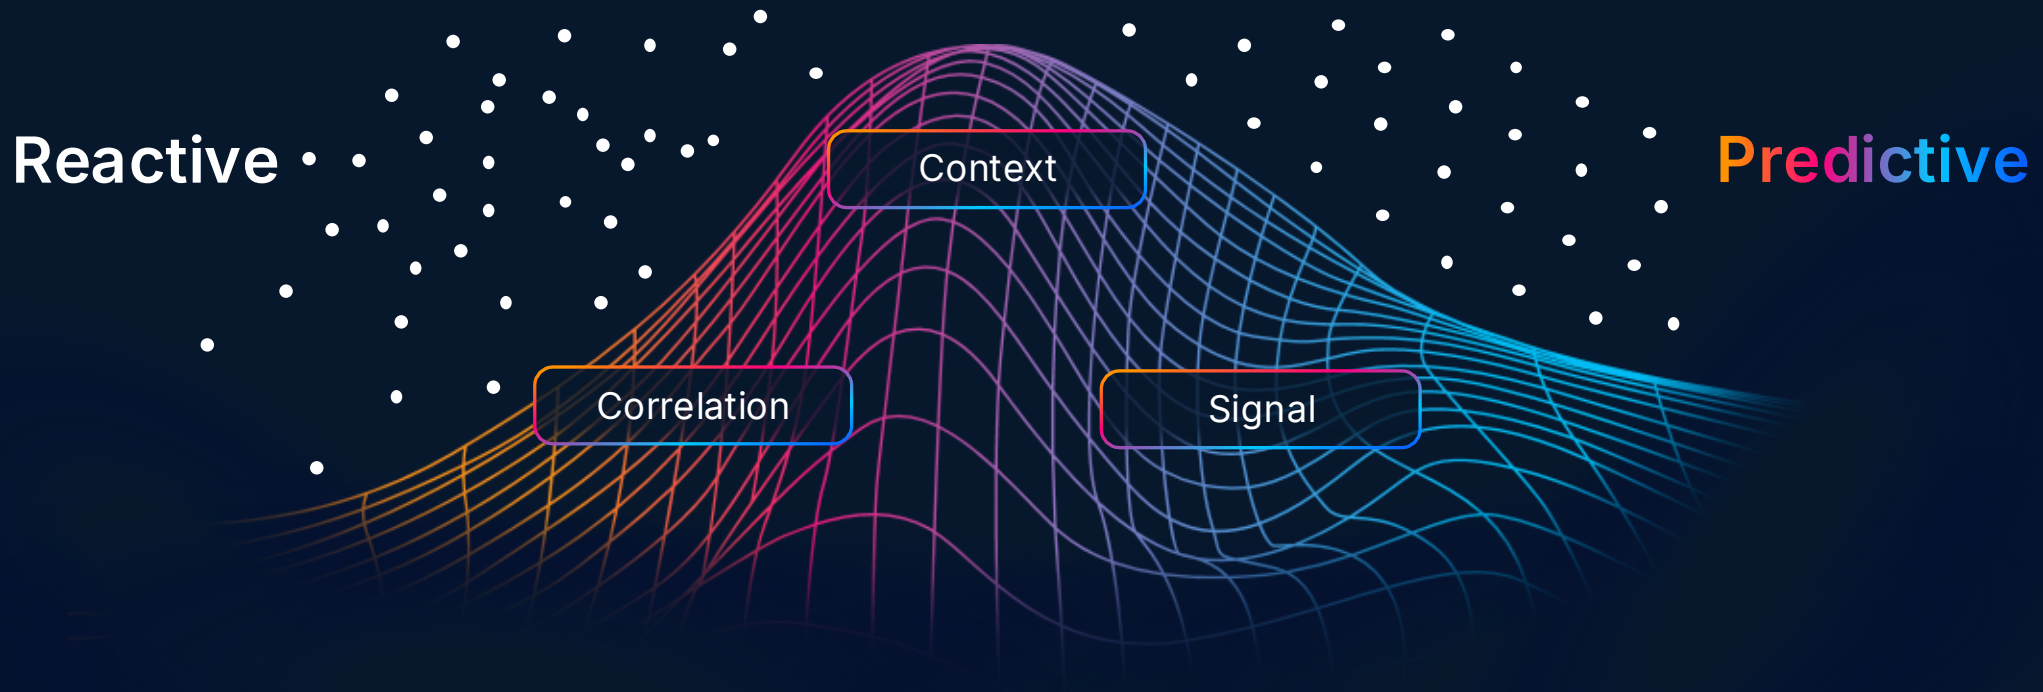

2. Fuel AgenticOps with contextualized machine data

Turn machine data into **real-time operational truth**
that agentic AI can act on accurately, at scale.

© 2025 Cisco and/or its affiliates. All rights reserved.

3. Activate agentic workflows to move from reactive to predictive

Anticipate issues to protect customer experience

Accelerate resolution with guided, confident decisions

Automate with guardrails to focus on driving innovation

Your Single Control Plane Across Domains

Cisco Data Fabric powered by Splunk

The Intelligence Layer of the Agentic Enterprise

SecOps

Mitigate cyber risk & secure AI adoption

Leader: Gartner® Magic Quadrant™ for SIEM (11 Times in a Row)

ITOps & Engineering

Monitor and mitigate from silicon to agent

Leader: Gartner® Magic Quadrant™ for Observability Platforms (3 Times in a Row)

NetOps

Unify network telemetry and context to reduce MTTx

Leader: Magic Quadrant for SD-WAN (6 times in a row)

splunk> a cisco company

Accelerate Your Journey to the Agentic Enterprise **with Splunk**

Foundational

Optimized AI-ready Data Foundation

End silos and govern telemetry so AI decisions are accurate, auditable and reliable.

Augmented

Faster, Democratized Expertise

Contextual assistants empowering more people to answer the why, without specialist knowledge.

Agentic

Orchestrated Action at Scale

Supervised agents to execute repeatable playbooks at scale cutting time to resolution and operational toil.

Innovative

Build a Proprietary AI Advantage

Train custom models to unlock unique, hard to replicate business outcomes.

cisco

CISCO Connect

Thank you

Unlocking data value and solving limitless use cases

Monitor, investigate and respond rapidly at scale with comprehensive visibility and shared tooling across SecOps, ITOps, NetOps, and Engineering.

3K+
apps & add-ons on Splunkbase

1K+
purpose built data source integrations

8B
monthly searches

Flexible deployment options

End-to-end data management

Scalable index and storage

Powerful search and visualization

Expanded view with federated analytics

Unlock new opportunities with AI

© 2025 Cisco and/or its affiliates. All rights reserved.

cisco

It starts with optimizing data & value for specific use cases

High Performance

Prevention, Detection, Monitoring

Search & analytics for highest performance with configurable data retention

Performance at Cost

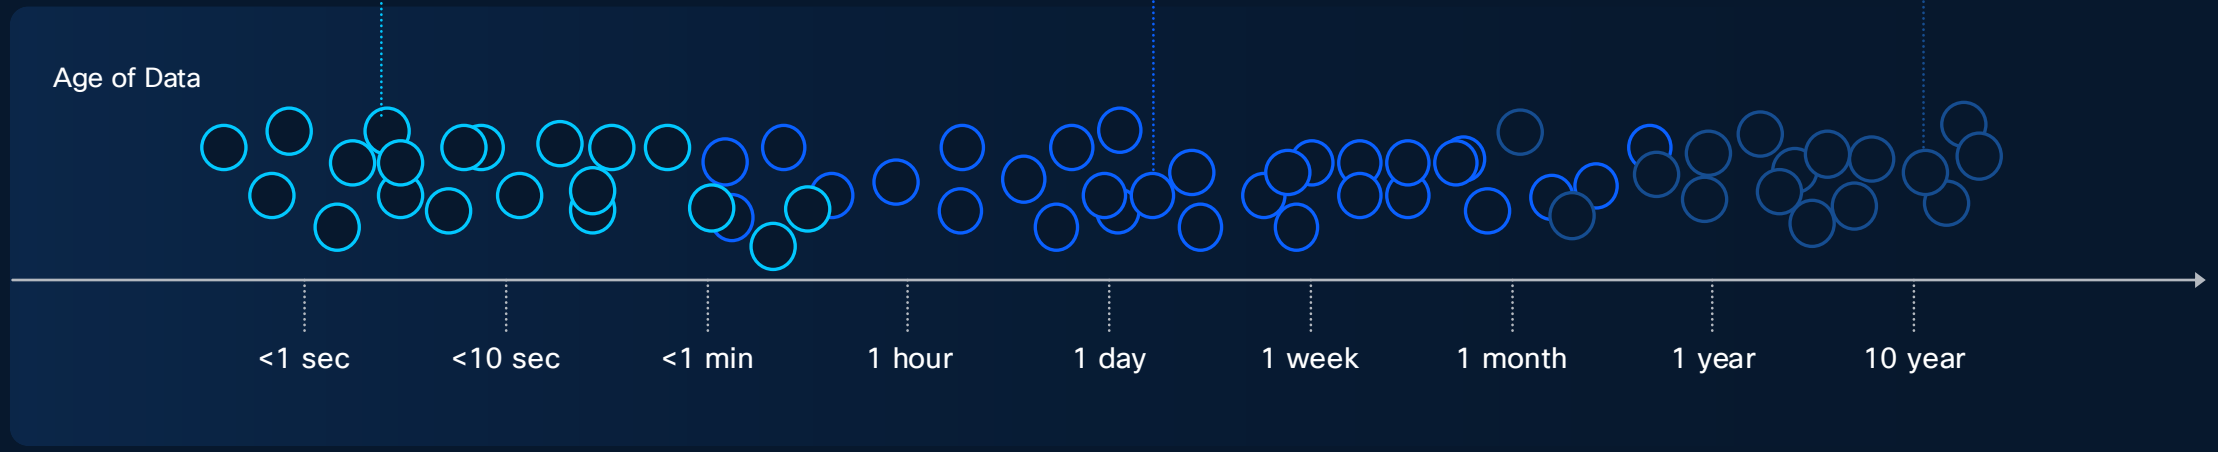

Incident Investigation, Threat Hunting

Federation for performance on data <30 days, subject to data lake latency

Compliance

Audit, Forensics, Compliance

Federation for less performant scanning of archived & long term data

© 2025 Cisco and/or its affiliates. All rights reserved.

Alpha

AI-powered Data Management

Transforming Data Onboarding, Processing & Monitoring

Guided Onboarding
Simplifies platform configuration with AI-powered, best-practice architectural guidance

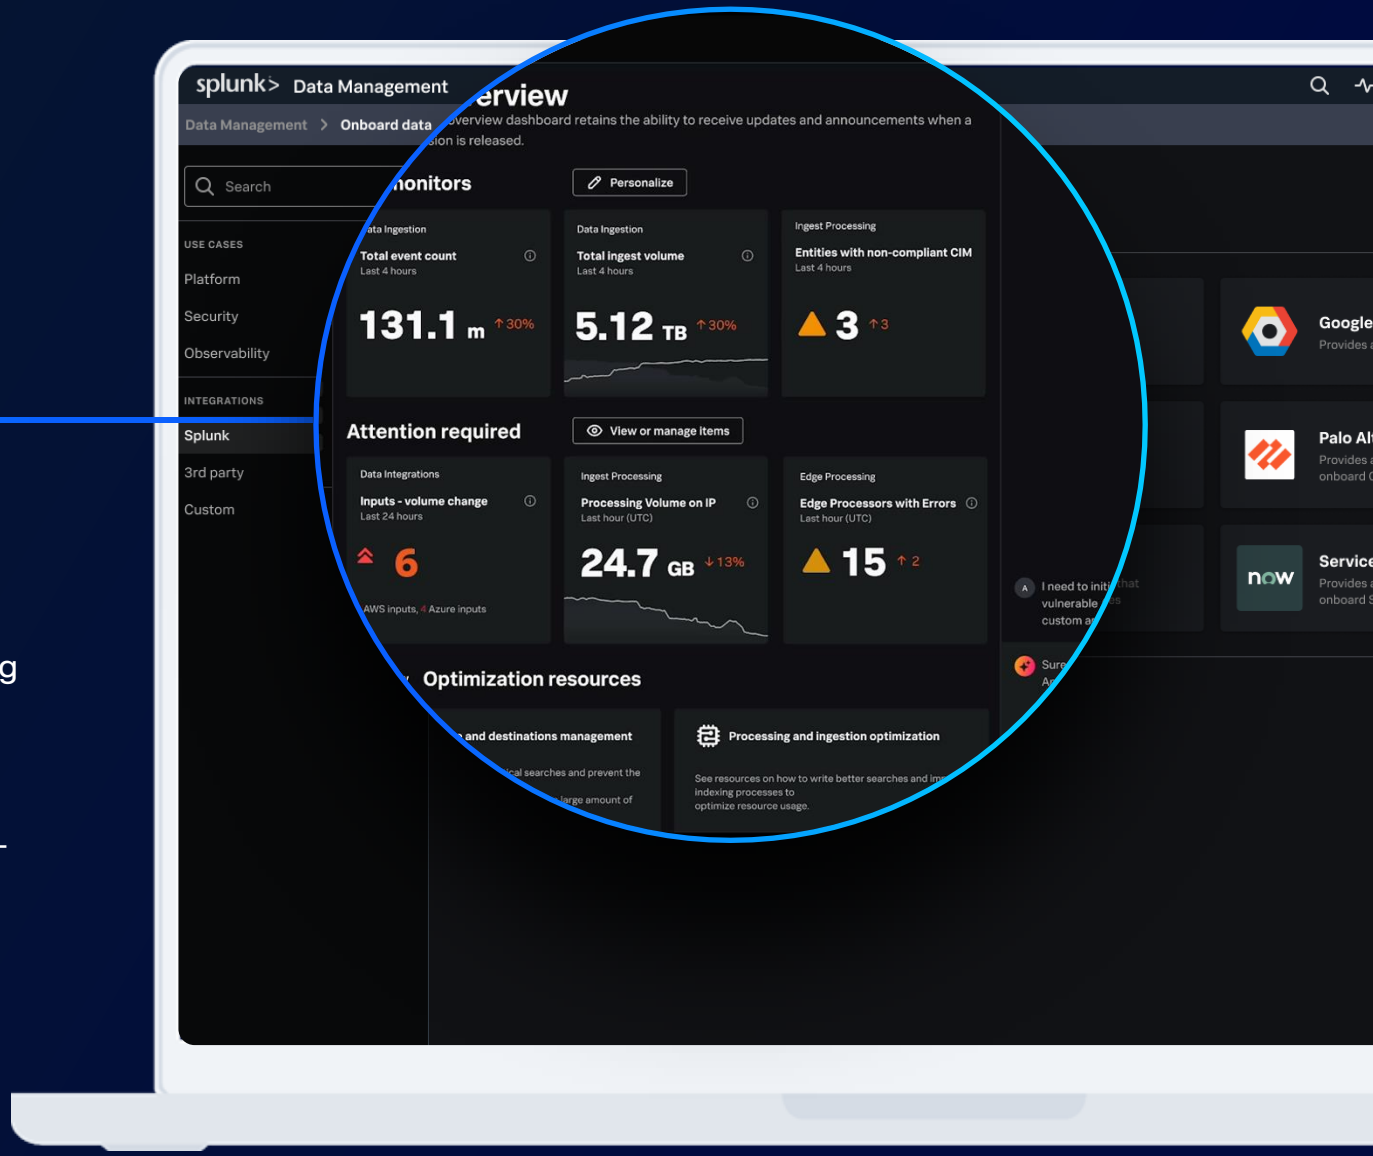

Automated Field Extraction

Replaces manual, error-prone regex tasks with AI-driven, intelligent log classification and field extraction

Auto Schematization

Accelerates security operations by leveraging LLMs for automatic CIM-compliant, analytics-ready data normalization

Self-Healing Pipelines
Ensures continuous data integrity through automated monitoring, diagnosis, and self-repair.

© 2026 SPLUNK LLC

For Splunk Cloud Platform and Splunk Enterprise
Product names in Alpha and Beta subject to change before GA.

Streamline access, insights and costs

One data source, cross-domain to enhance resilience

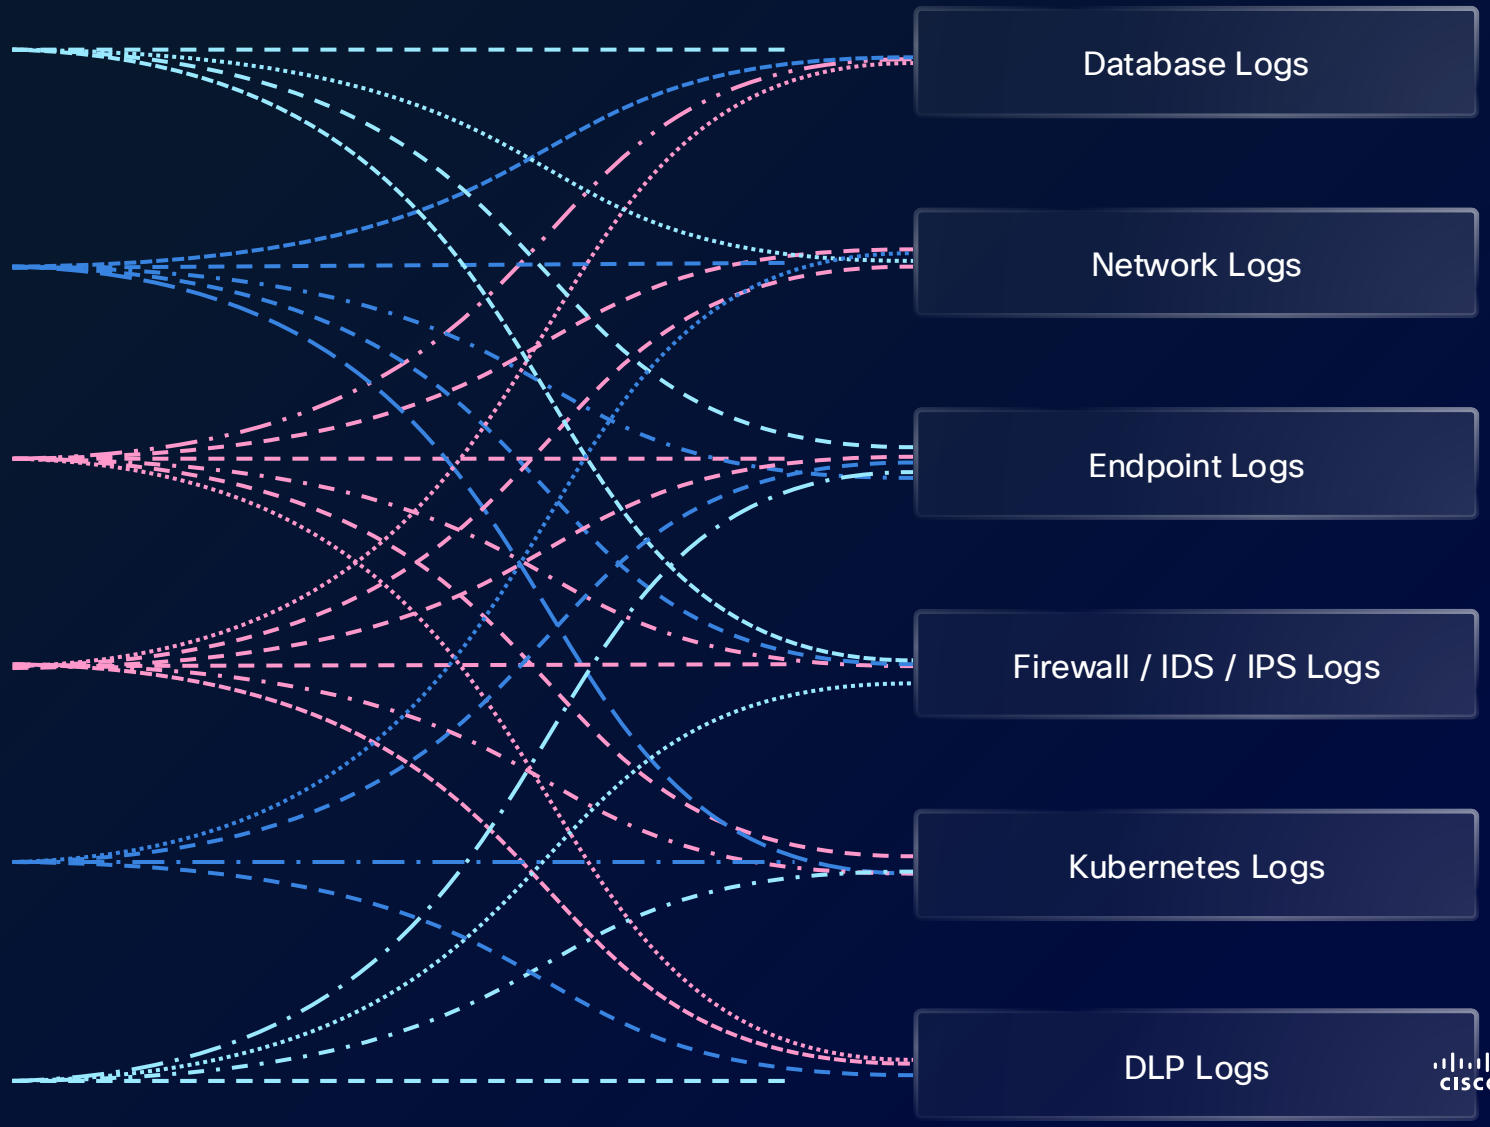

© 2025 Cisco and/or its affiliates. All rights reserved.

Transform raw logs into analytics-ready data in minutes

Automated Schematization

Alpha

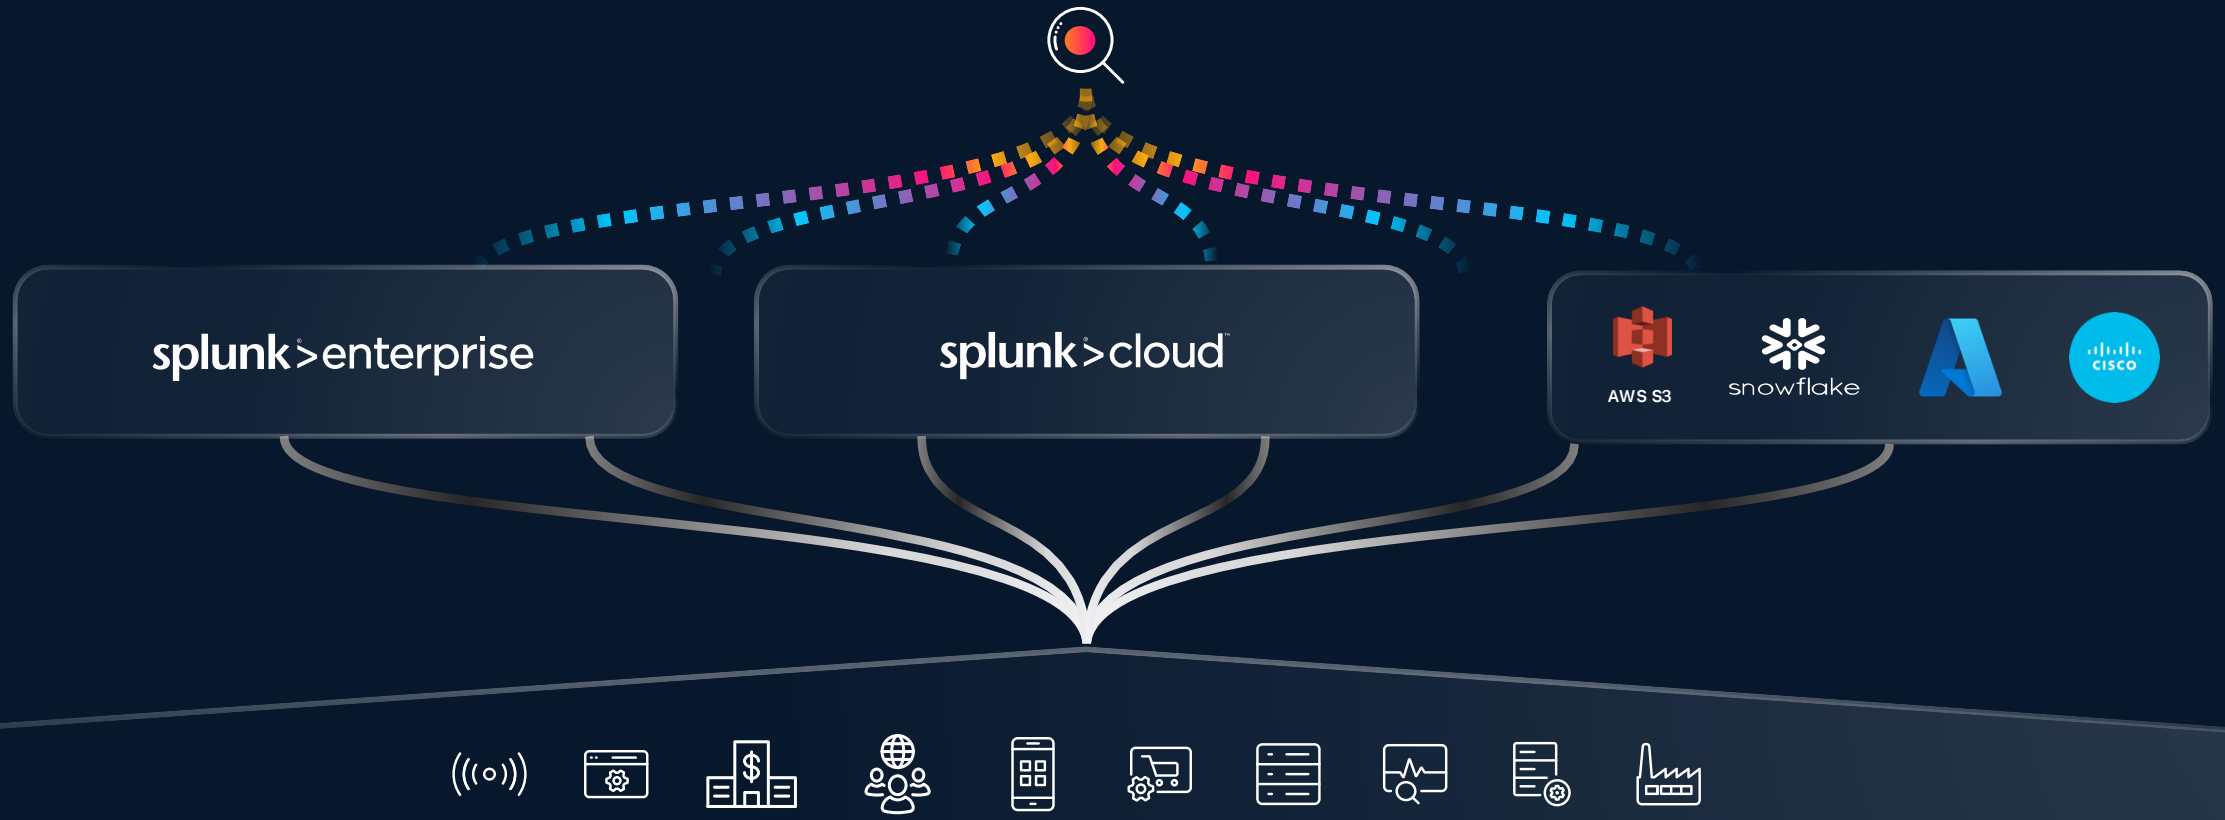

- Accelerated Time-to-Value
- Lowered Skill Barrier
- Ensured Consistency & Quality

© 2025 Cisco and/or its affiliates. All rights reserved.

Federated search: breaking down data silos

Bring the power of Splunk search and analytics to wherever the data resides

Breaking down data silos for a unified view

Gain real-time insights for distributed data without the pain, cost, or delay of data movement.

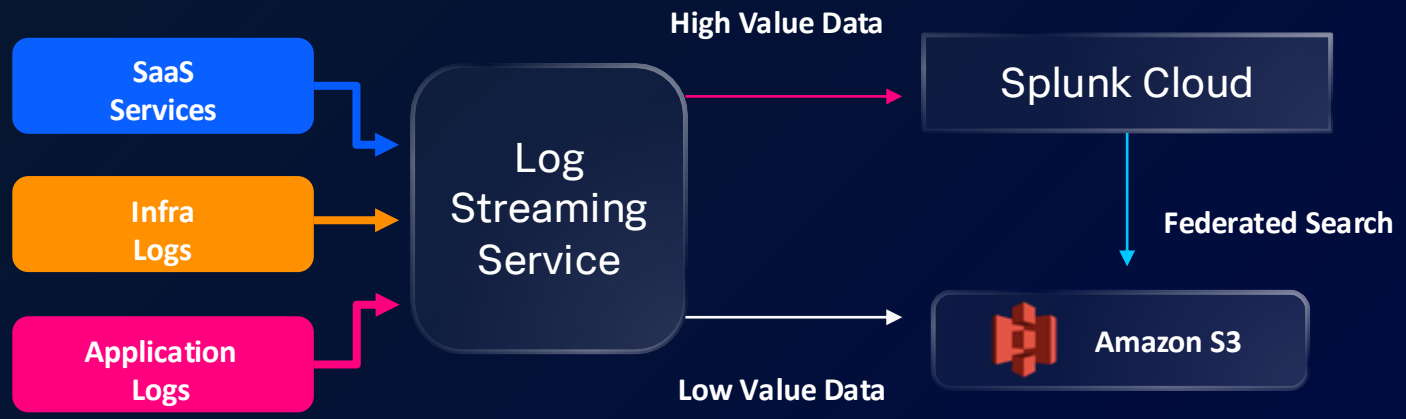

© 2025 Cisco and/or its affiliates. All rights reserved.

cisco

Federated Search for S3

Search your Amazon S3 at rest directly from Splunk

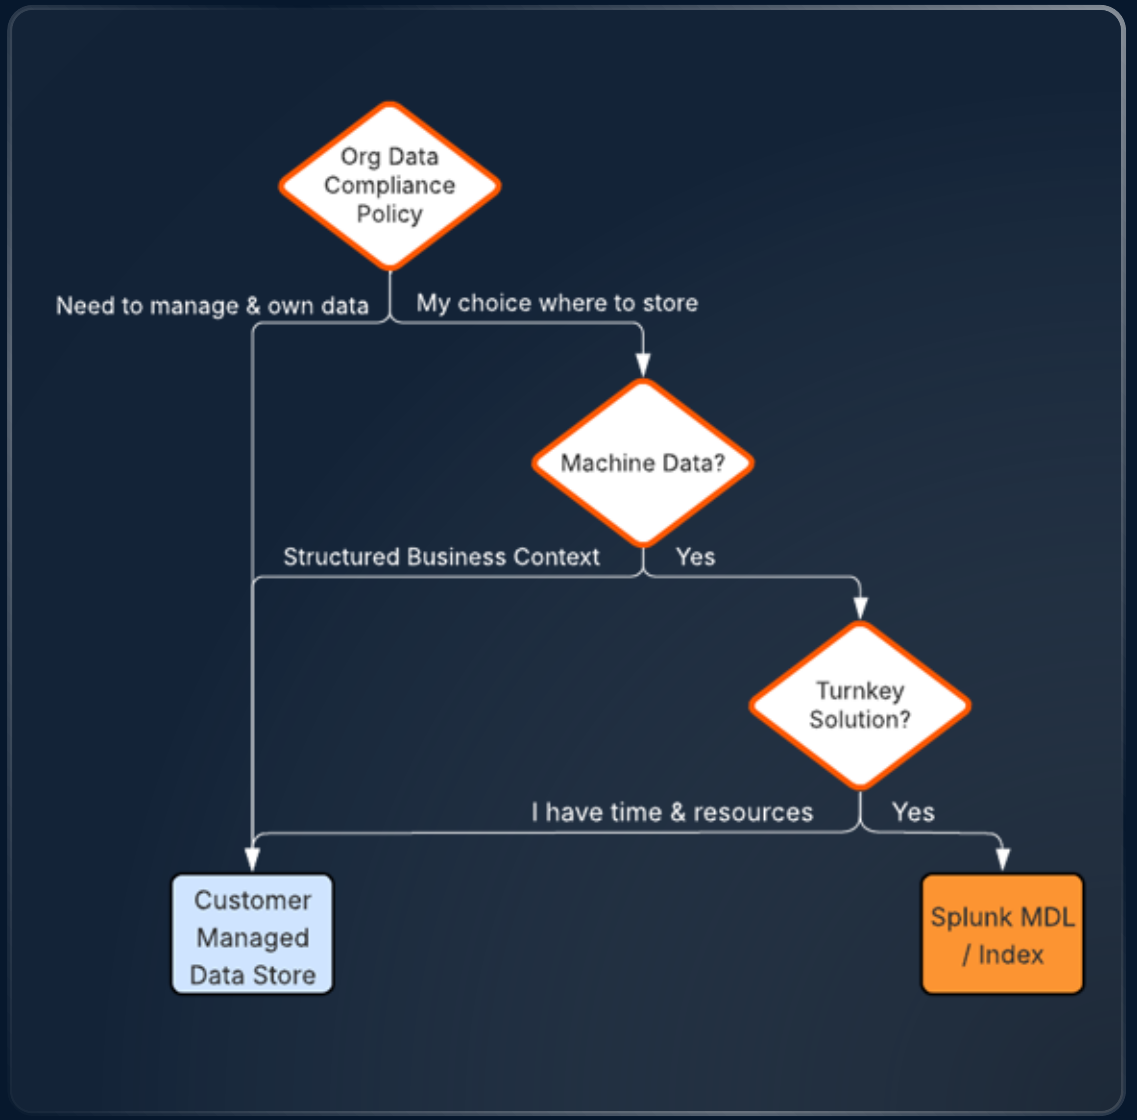

- Federated Search for Amazon S3 allows you to directly search the data in your S3 buckets from the Splunk® Cloud Platform
- Supporting both ad-hoc based security investigations, reporting and alerting through scheduled searches
- Removing the cost and complexity of ingesting the data

© 2025 Cisco and/or its affiliates. All rights reserved.

Machine Data Lake and Federation: flexibility for your data strategy

- Flexible data access for seamless access to the right data at the right time, tailored to your needs
- Centralized governance and cataloging ensures data quality, compliance and easy discoverability
- Scalable data strategy by driving innovation with flexibility and minimal engineering effort

Dashboards & Visualizations

Transforming Data into Action

Turning Raw Data into Insight: Converts unstructured logs and raw events into meaningful, actionable visualizations.

Dynamic Schema-on-Read: Splunk allows users to visualize data dynamically by adjusting SPL, providing unparalleled flexibility.

Unified Source of Truth: A single dashboard serves everyone—from executives viewing high-level status to engineers performing deep-dive investigations.

Enhanced Collaboration: Enables cross-functional teams to align on the same data, reducing silos and accelerating incident response.

Platform AI Tools
Models and pipeline tools integration

Foundation Models

- Splunk hosted models
- 3rd party LLM integrations
- Self-hosted model support – Ollama
- Integration to Splunk Search

AgenticOps

- RAG Vector DB/ Knowledge bases
- Unified Splunk MCP server
- External MCP integrations

Predictive ML

- Hundreds of built-in ML algorithms
- Multivariate support
- External model support via-
  - ONNX
  - AWS SageMaker
  - DSDL containers

© 2025 Cisco and/or its affiliates. All rights reserved.

Hosted AI Models
Four available models (with more to come)

Cisco DeepTime Series

- Zero-shot forecasting
- Multi-resolution for short and long term forecasts

Foundation AI Security

- Foundation-sec-1.1-8b-instruct
- Trained and optimized for security context and workflows

GPT-OSS 120B

- Large MoE model ~117B parameters
- Complex reasoning, coding, analysis

GPT-OSS 20B

- Small MoE model ~21B parameters
- Optimized for speed

Continental revs up Security, efficiency and innovation with Splunk

2000
servers monitored daily

3–5
days to deliver a new application out-of-the-box

24/7
proactive monitoring and issue correction

“The Splunk platform helps us monitor performance for every machine and technology so we can pinpoint the root cause of an issue, fix problems faster and help people do their jobs better.”

–Fernando Ulises Mérito del Campo
Head of Big Data and AI Center of Competence for the Americas Region, Continental

© 2026 Cisco and/or its affiliates. All rights reserved.

Fannie Mae protects the housing finance system with Splunk

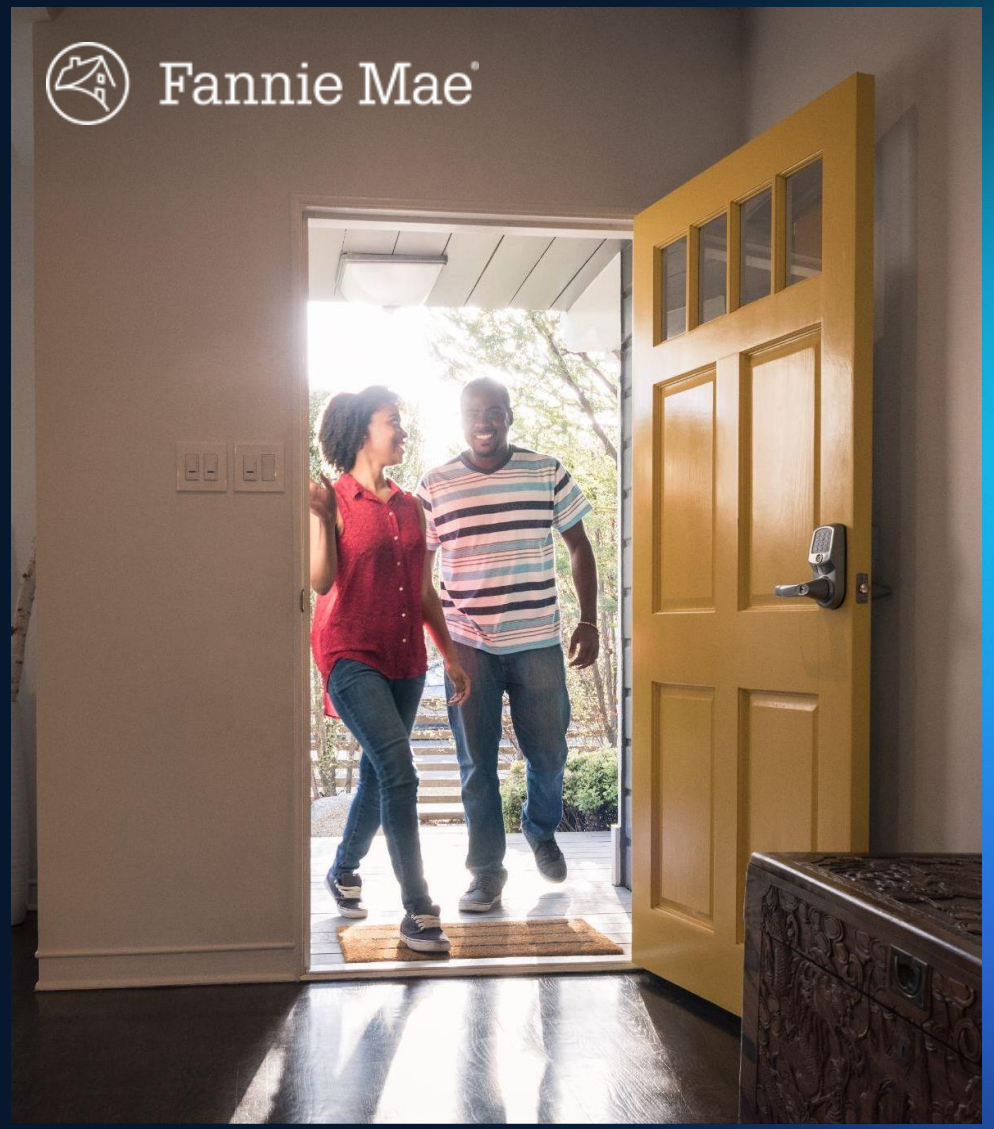

Greater efficiencies due to unified monitoring capabilities

Faster MTTR thanks to real-time insights

Increased ability to comply with regulatory mandates

“Using Splunk, we now have a greater view of our ecosystem to help ensure that each transaction that goes through Fannie Mae can be traced and monitored from start to finish.”

–Nimesh Bernard
Senior Director, Enterprise Observability Applications, Fannie Mae

A leading university uses Edge Processor to streamline efficiency

2X
Data Flow Performance

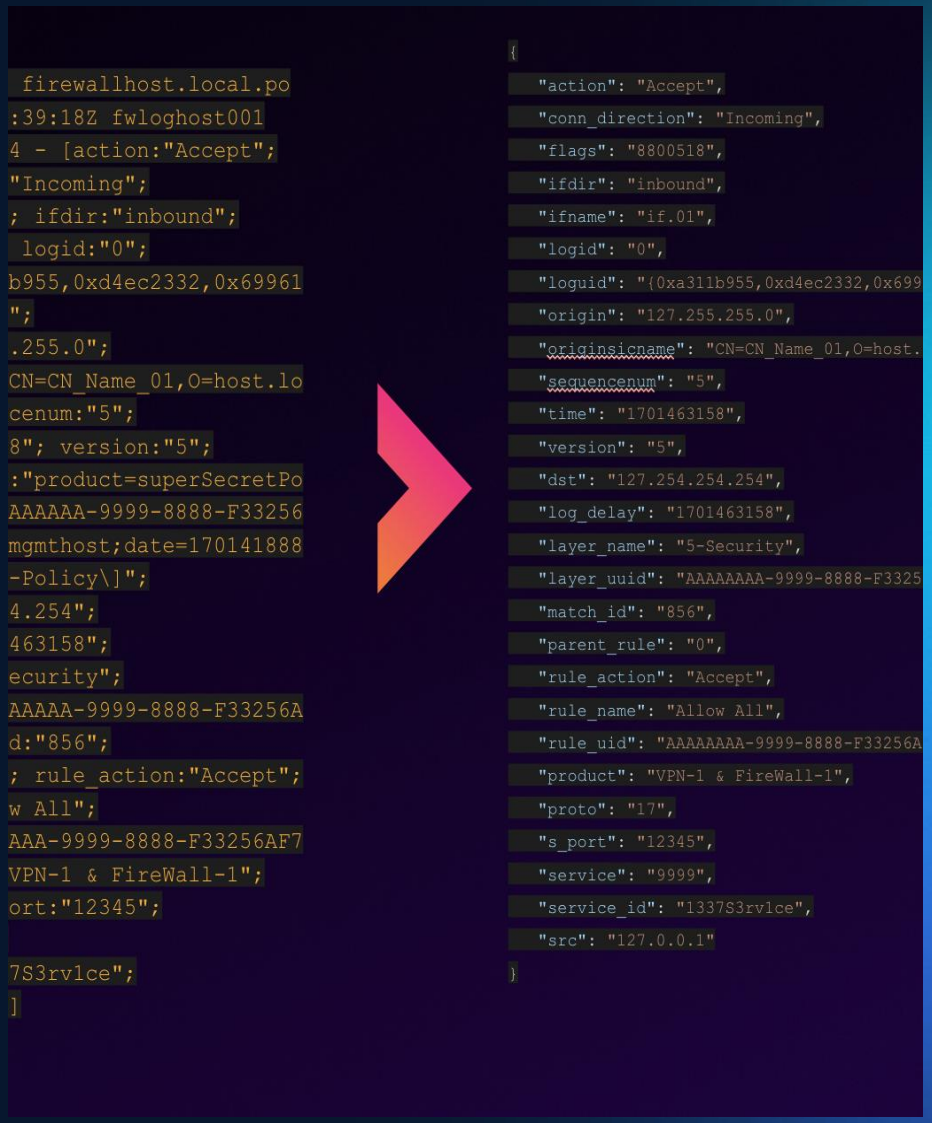

98%
Reduction in firewall log volume

100%
Self maintained, no upgrade needed

- Optimize Data Flow: Send all on-prem data feeds through Edge Processor to Splunk Cloud
- Filter Firewall Logs: Manage and control log volume and resource utilization

“Edge Processor is a lightweight, self-maintaining, easy-to-use data management solution that has already helped reduce 98% of our firewall logs.”

-Anonymous Security Team

Travelport Lands Exceptional Customer Experience

- Achieved **full visibility** across entire environment, gaining a comprehensive understanding of its critical apps and services
- **75% reduction in MTTD** enabling the company to exceed its uptime goal and deliver a better user experience
- **95% reduction in false positives** by correlating alerts to a product's health

"We wouldn't have been able to correlate alerts to a product's health, and in turn, reduce false positives by 95%, without our Assigned Expert's deep product knowledge and their ability to get in the weeds and essentially 'mold' the Splunk stack to fit our technical environment and requirements."

– Ed Hubbard
Director of Site Reliability and Monitoring, Travelport
