

# Cisco Modern AI-powered Support

Enabling reliable, resilient, and secure operations

Hector Acevedo  
Vice President, Cisco Customer Experience Centers

Dale Miller  
Principal Engineer, Cisco Customer Experience Centers

# 92%

of organizations  
say the support and  
services they receive are  
more critical in the AI era.<sup>1</sup>

The pervasive integration of AI demands:

Continuous uptime

Optimized performance

Enhanced resiliency

<sup>1</sup>The Race to an Agentic Future: How Agentic AI Will Transform Customer Experience, Cisco 2025

# Technical Support Must Evolve

## Complexity

Complex environments and disjointed support tools keep your team firefighting, not innovating

Slow value realization

## Risk

Risk from limited or fragmented visibility creates error-prone data and constant blind spots

Risk of costly downtime

## Skills gaps

Skills gaps widen as your team is stretched thin with rapid change and relentless demands

Feeling perpetually behind

# Dynamic Demands Require a New CX

## Resiliency

Proactive issue avoidance

## Simplicity

Real-time, hyper-personalization

## Time to value

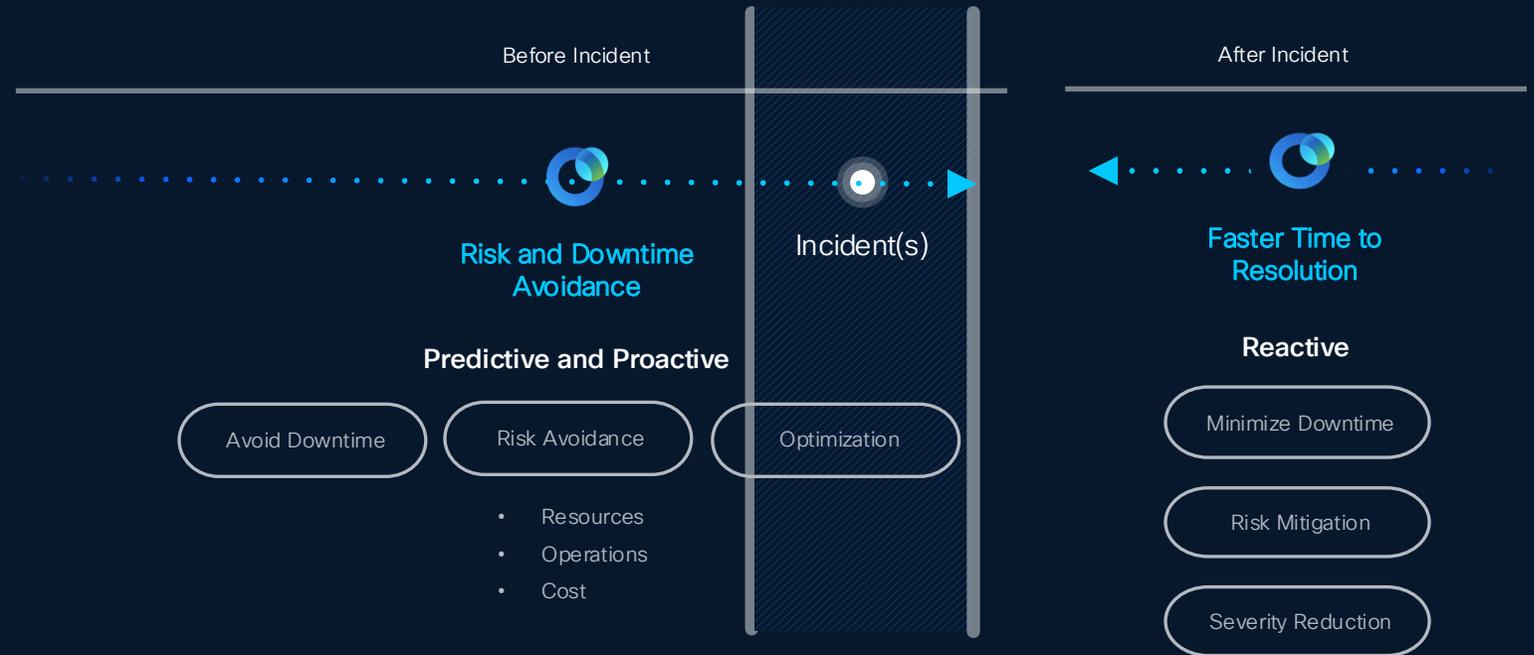

Faster time to value

**Transforming the fundamental nature of services**

Personalized, proactive, and predictive at scale - powered by agentic AI and human expertise

# Support's Next Evolution

Driving proactive and predictive risk and downtime avoidance, coupled with significantly faster reactive response.

# Cisco's Support Services

Moving **beyond** break-fix, enabling customers to build digital resiliency

## Personalized

Unlock hyper-personalized view across your entire Cisco environment, insights and tailored recommendations.

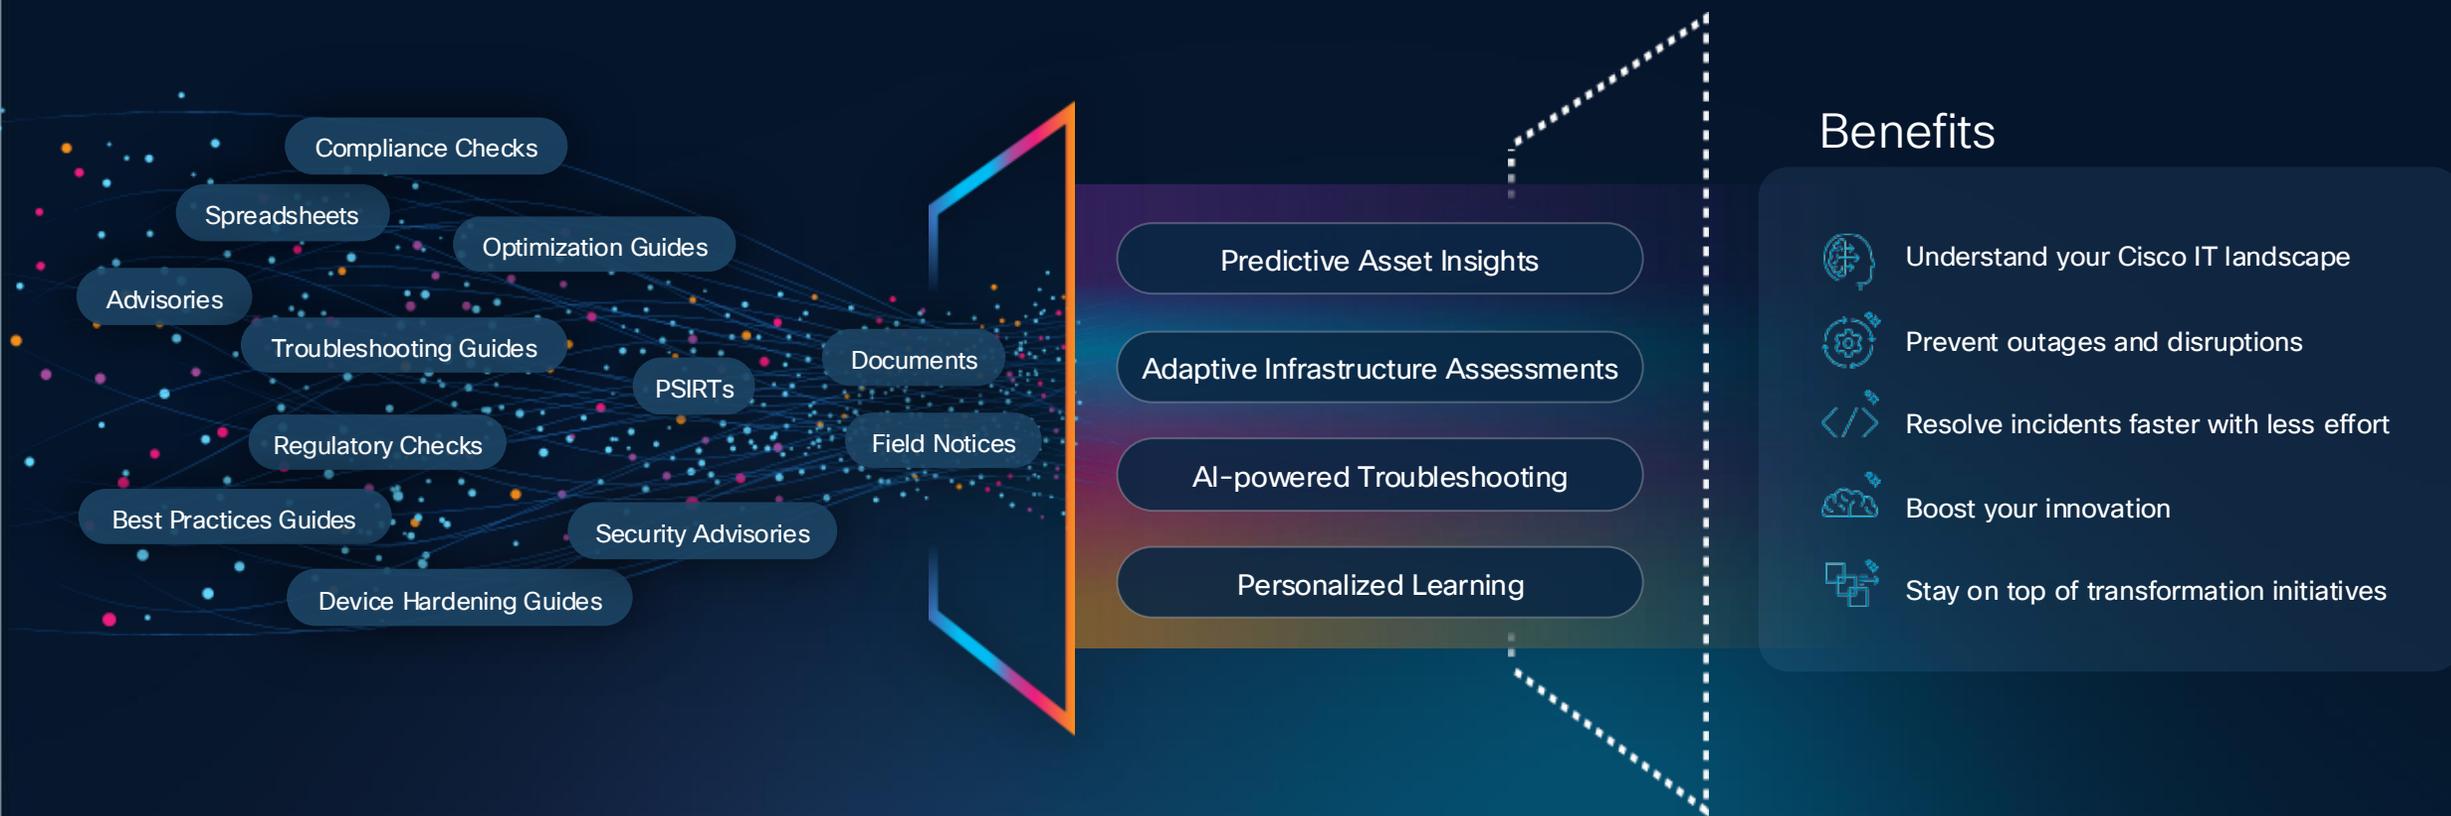

## Proactive

Proactively show you opportunities to improve your environment and minimize risk.

## Predictive

Anticipate, act and prevent events and faults, optimize performance, and enable smarter decision-making.

# Introducing Cisco IQ: The AI Engine for Next-Gen Services

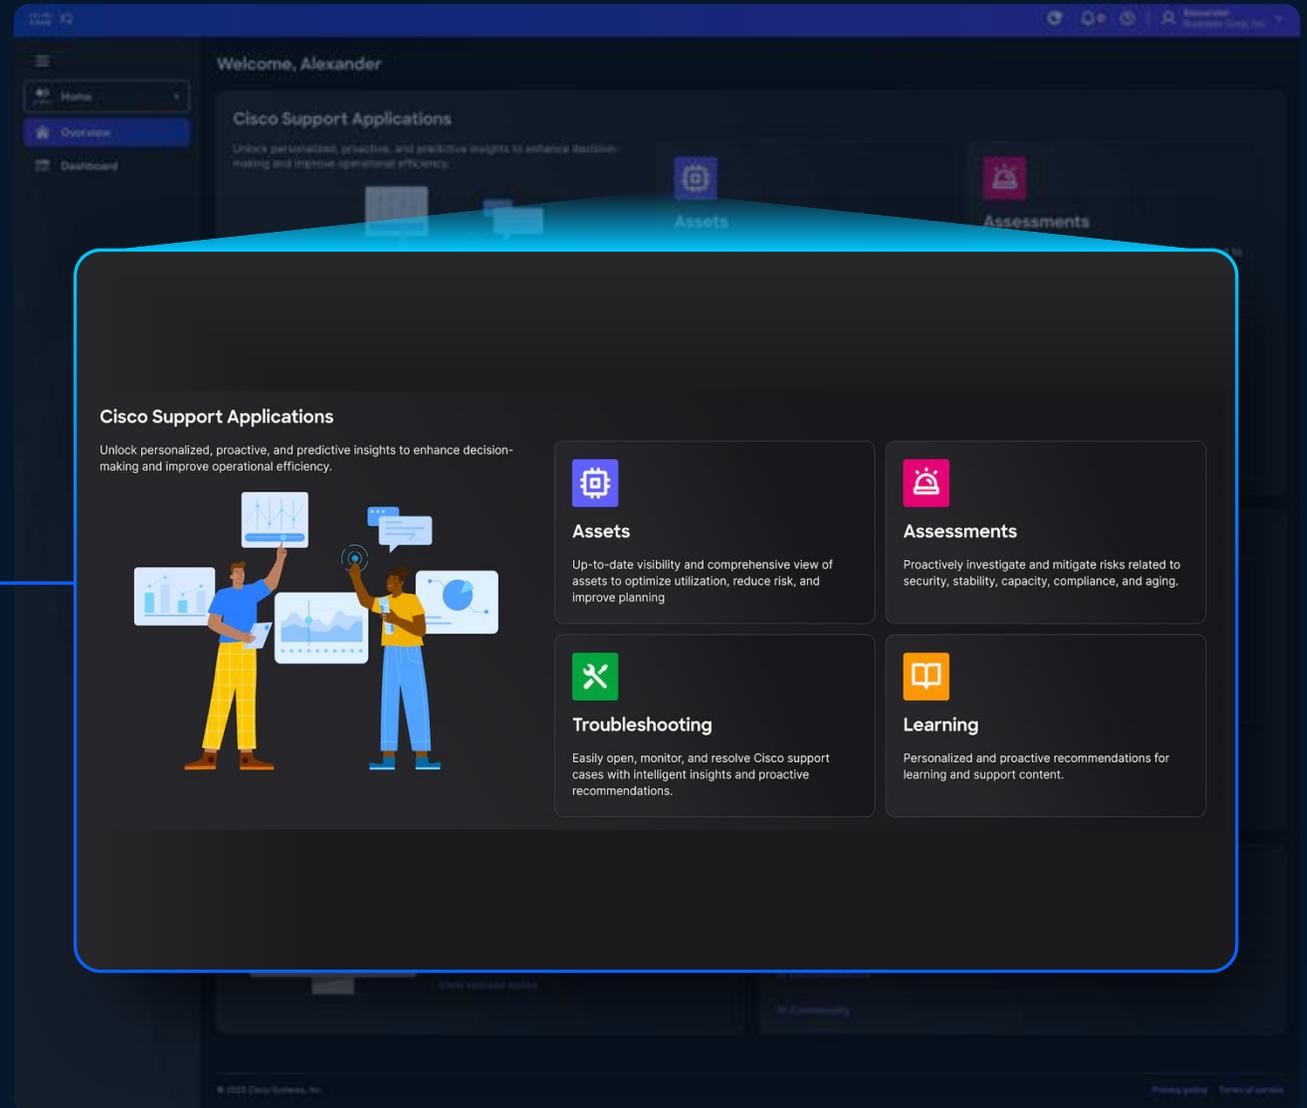

A single, unified, AI-powered digital interface for Support and Professional Services

# Cisco IQ

A unified, simplified interface

## Support services applications

- Learning

# Cisco IQ in Action: Predictive Asset Insights

Leveraging AI to understand your IT landscape and prevent outages

The screenshot displays the Cisco IQ dashboard for user Bhaskar Jayakrishnan. The interface includes a top navigation bar with the Cisco IQ logo and user profile, a left-hand navigation menu with options for Application Home, Overview, and Dashboards, and a main content area. The main content area features a 'Welcome, Bhaskar Jayakrishnan' message, an 'Applications' section with an illustration of two people reviewing data, and three cards: 'Assets' (holistic visibility), 'Assessments' (proactive risk investigation), and 'Recent Applications' (currently empty). A 'Customer Experience' section at the bottom right highlights new enhancements and provides a link to 'View Release Notes'. The footer contains copyright information for Cisco Systems, Inc. and links to privacy and terms of service.

**Welcome, Bhaskar Jayakrishnan**

**Applications**  
Unlock personalized, proactive, and predictive insights to enhance decision-making and improve operational efficiency.

**Assets**  
Holistic visibility and insights to help you better manage your Cisco assets, licenses, subscriptions, and contracts.

**Assessments**  
Proactively investigate and mitigate risks related to security, stability, capacity, compliance, and aging.

**Recent Applications**  
No Recent Applications

**Customer Experience**  
Introducing new enhancements and features designed to streamline case management, improve asset visibility, and deliver smarter insights across your environment.

# Cisco IQ in Action: Adaptive Security Assessments

Automating security hardening checks and execution

The screenshot displays the Cisco IQ dashboard interface. At the top left, the Cisco IQ logo is visible. The top right corner shows a user profile for 'Bhaskar Jayakrishnan' with a 'Default' role. A left-hand navigation menu includes 'Application Home', 'Overview', and 'Dashboards'. The main content area is titled 'Welcome, Bhaskar Jayakrishnan' and features an 'Applications' section with a sub-header 'Unlock personalized, proactive, and predictive insights to enhance decision-making and improve operational efficiency.' Below this is an illustration of two people reviewing data charts. To the right, there is a highlighted 'Assessments' card with a green gear icon, containing the text: 'Proactively investigate and mitigate risks related to security, stability, capacity, compliance, and aging.' Below the 'Applications' section, there is a 'Recent Applications' section that is currently empty, displaying 'No Recent Applications'. To the right of this is a 'Customer Experience' section with an icon of a person and a computer, containing the text: 'Introducing new enhancements and features designed to streamline case management, improve asset visibility, and deliver smarter insights across your environment.'

# Cisco AI Assistant for Support

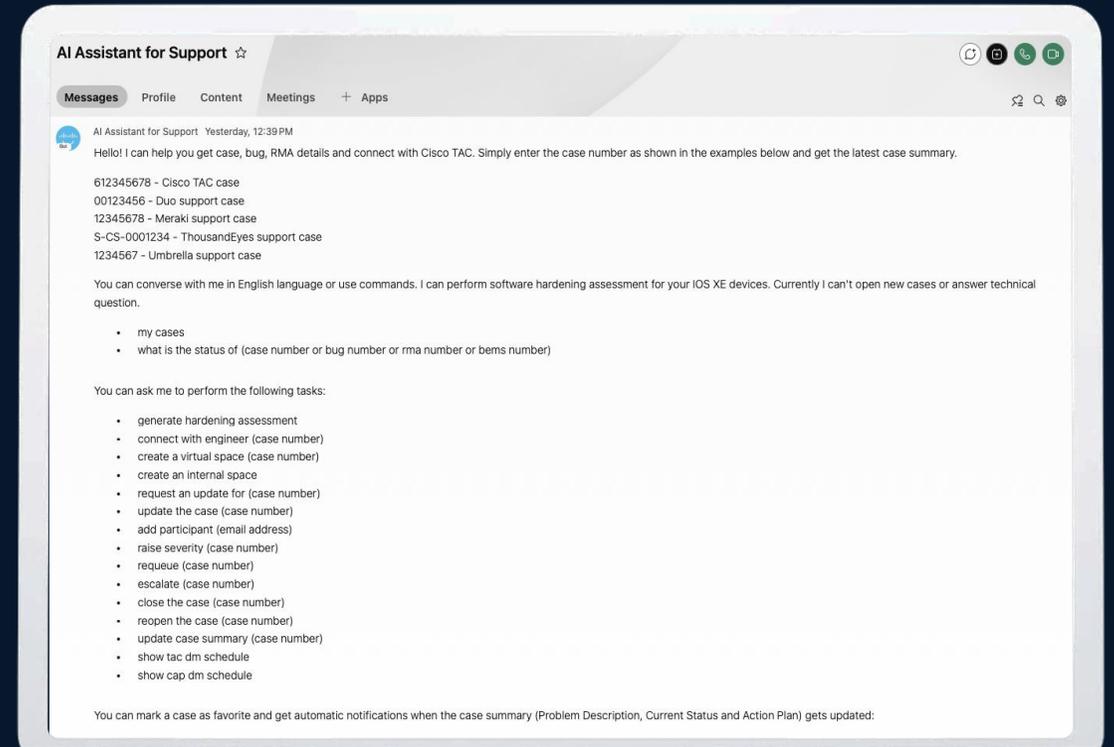

Self-service tool for common support case interactions

✓ **Connects you with the right resources and experts easier and faster:**

- ✓ Get case, bug and RMA status
- ✓ Update case and upload case files
- ✓ Connect with TAC case owner via Webex space or callback
- ✓ Raise case severity, escalate or close case
- ✓ Subscribe for case summary, status and severity updates
- ✓ Get contextual proactive TAC alerts such as trending issues, tool and article updates

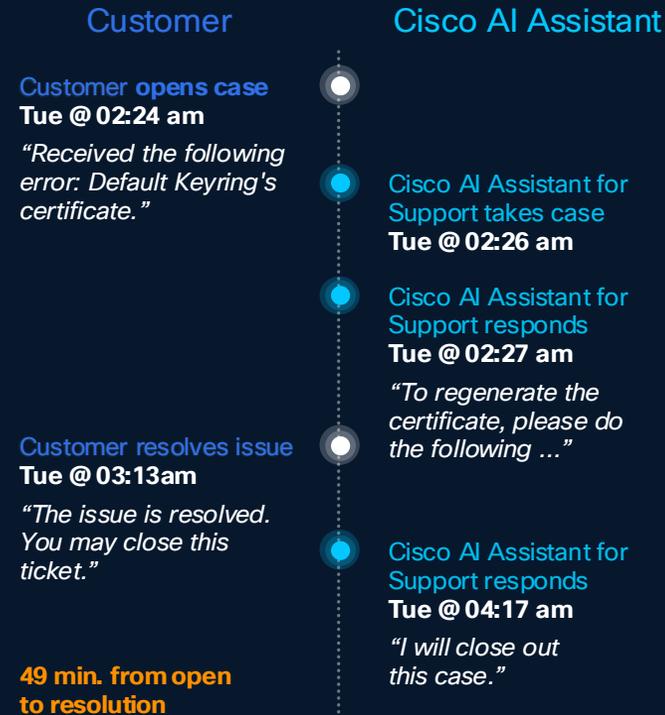

Access on [Cisco.com online](https://cisco.com), via Webex App, on [Support Case Manager](#) and Virtual Spaces

# Cisco AI Assistant for Support: Time to Value

## Automated Troubleshooting

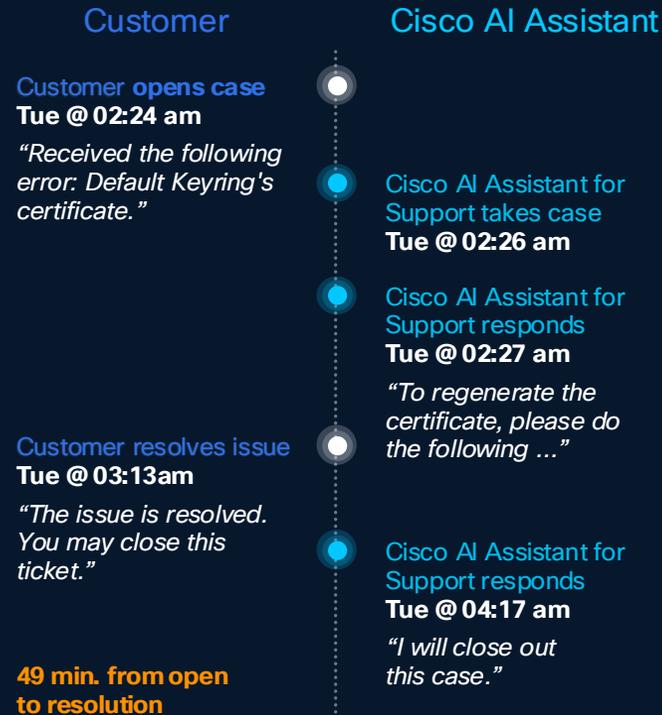

2-4x faster when fully automated

# Cisco AI Assistant for Support: Time to Value

## Automated Troubleshooting

2-4x faster when fully automated

## Automated RMA

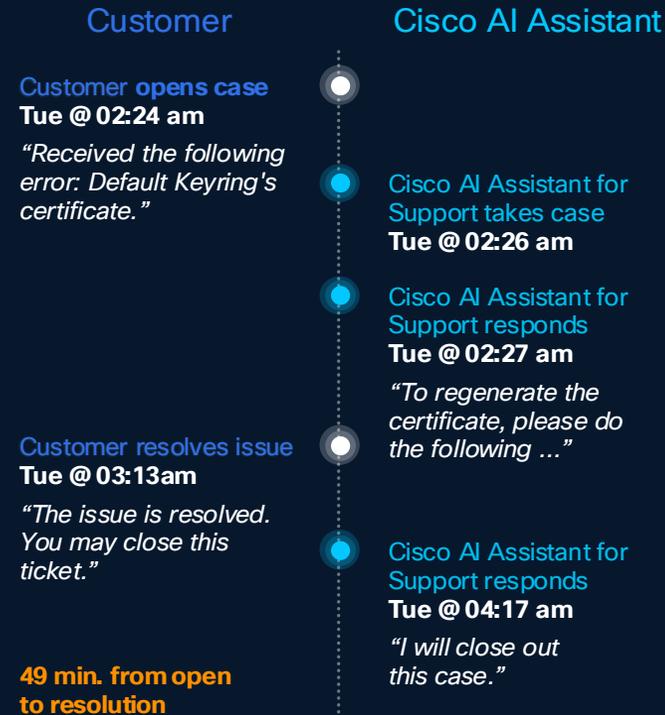

6-12x faster hardware replacement authorization

# Cisco AI Assistant for Support: Time to Value

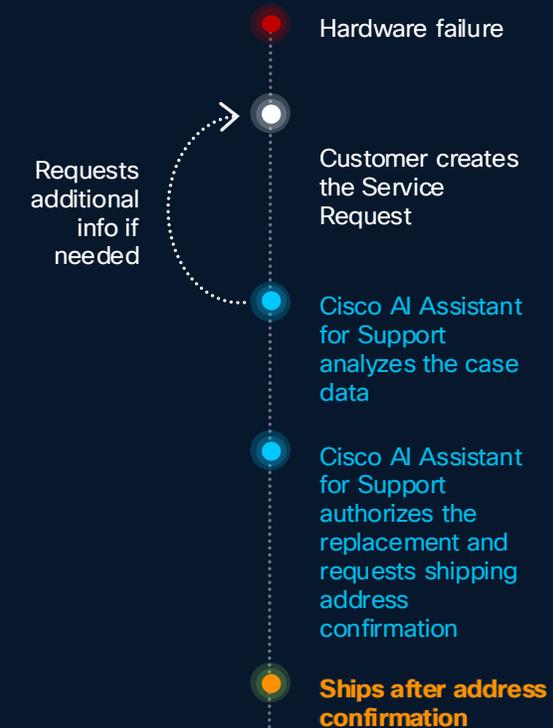

## Automated Troubleshooting

2-4x faster when fully automated

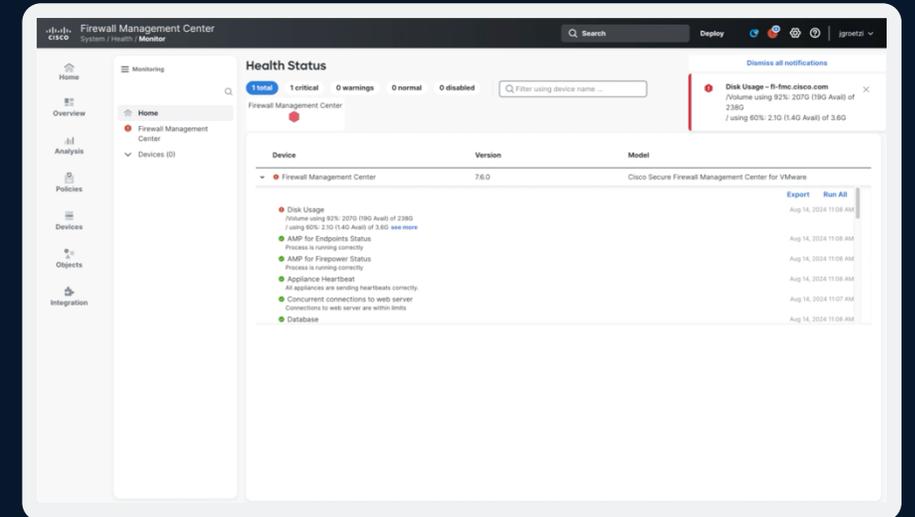

## Automated RMA

6-12x faster hardware replacement authorization

## In-product Support

Improves time to resolution with in-context support

# Revolution with AI

Before

## Limited visibility

- **Fragmented experience**  
Limited integration, lack of API support
- **Data accuracy, reporting limitations**
- **Misaligned contracts, siloed license views**  
Not aligned to CCO ID, isolated license information
- **Limited recommendations**  
Incomplete adoption insights, no renewals insights

After

## AI-powered, unified and simplified

- **Unified experience across the lifecycle**  
One interface, APIs, integration
- **Simplified access to insights**  
LDOS, assets, risk, support cases
- **License & contract clarity**  
See what's covered and what's not - instantly
- **AI-driven recommendations**  
Upgrade paths, renewals, adoption
- **Always on - At your fingertips**  
Web-based, dynamic, actionable

## Simple three tiers to meet every support need

Cisco Support

**AI and human expertise** for greater uptime, performance, and resilience

### Standard

- ✓ Essential product support coverage + AI-driven asset and risk insights

### Enhanced

- ✓ Everything In Standard +
- ✓ Centralized support coordination for Cisco and Cisco Solution Alliance Partner products
- ✓ Personalized asset intelligence and assessments
- ✓ Troubleshooting
- ✓ Personalized learning
- ✓ Priority case routing

### Signature

- ✓ Everything in Standard and Enhanced ++
- ✓ High-touch, and top-priority support
- ✓ Restoration SLA
- ✓ Proactive remediation recommendations
- ✓ Cert prep and practice labs for personalized learning

**Thank you**
