

MAKING A DIFFERENCE

Cisco Partner Summit 2018 Las Vegas, in conjunction with Mandalay Bay and vendor partners, took extra measures to reduce our impact to the environment by working diligently to produce an event focused on eliminating, recycling, and minimizing waste.

All attendee buffet meals were served with **reusable** plates, silverware, and cups to reduce landfill waste.

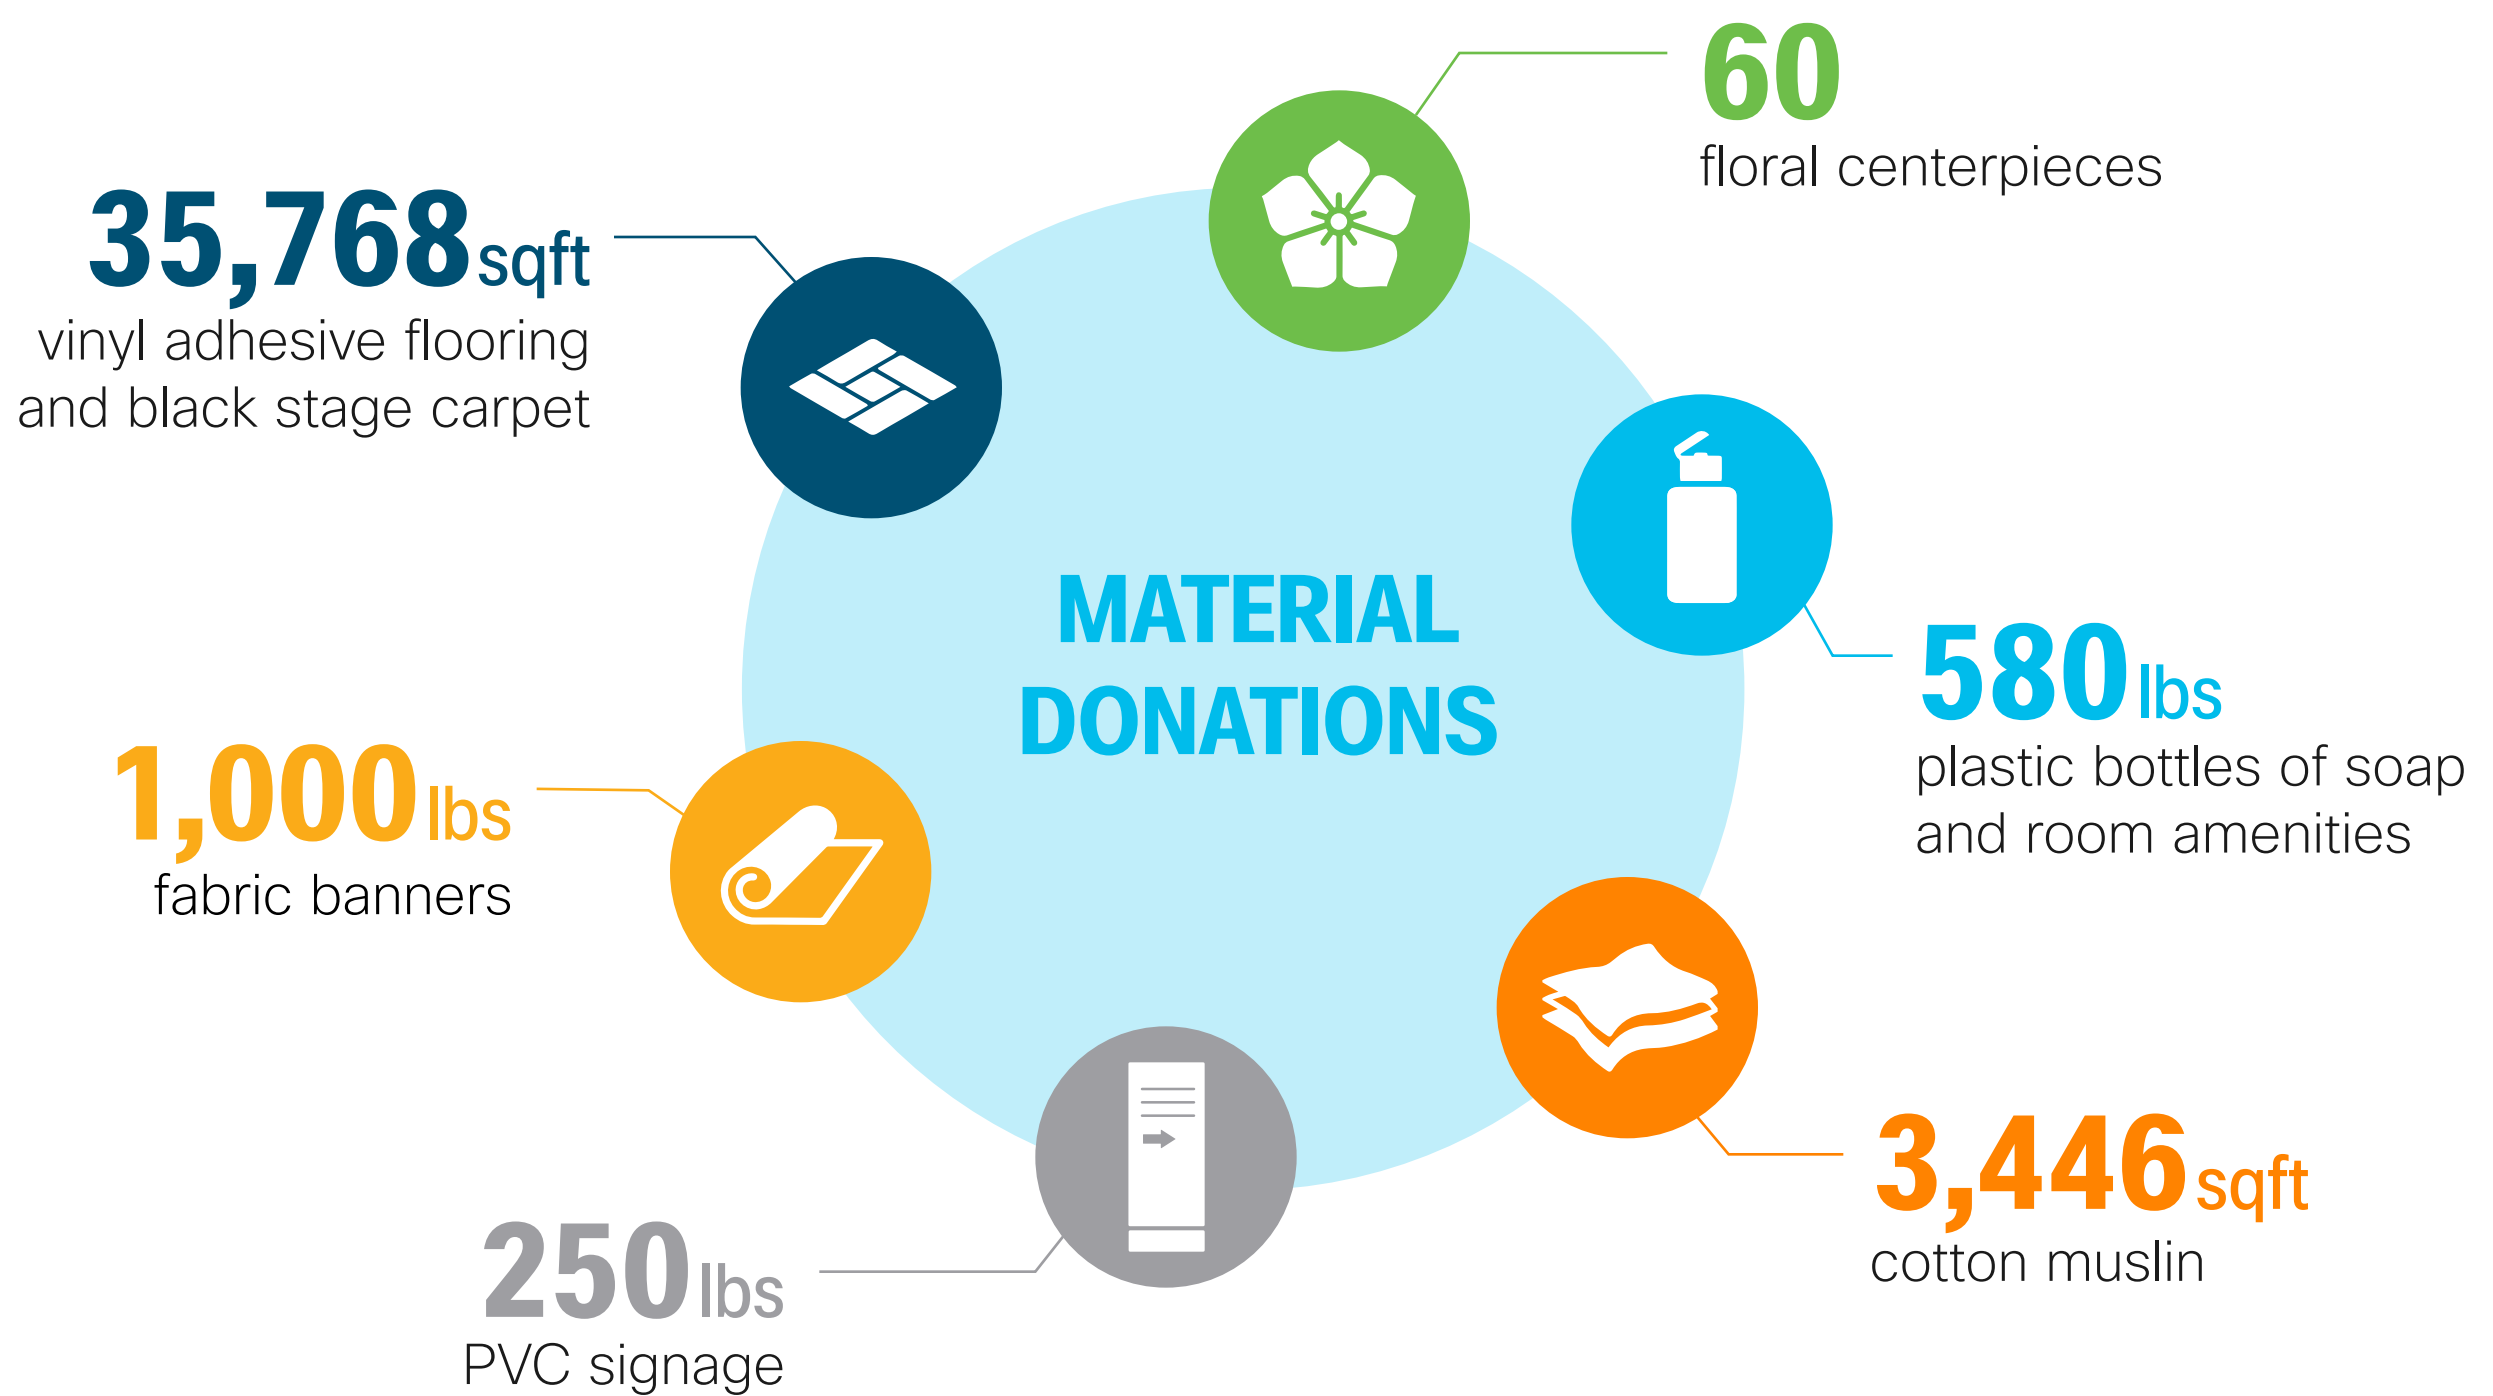

8.06 tons

of **carbon dioxide emissions** was offset by business partner Seat Planners planting trees in the Marais des Cygnes National Wildlife Refuge in Kansas

96%
event waste from Mandalay Bay diverted from landfills

1,330 lbs
of food was donated through ThreeSquare to the Las Vegas community. This translates to about 1,690 meals to those in need!

74,634 kWh
of energy was generated by the on-site solar array at Mandalay Bay

Mandalay Bay was given the highest possible rating in the Green Key Eco-Rating Program, which evaluates properties based on their green operations.

UNITED NATIONS SUSTAINABLE DEVELOPMENT GOALS (SDGs)

In 2015 the United Nations defined a collection of 17 Sustainable Development Goals (SDGs). Initiatives at Cisco Partner Summit align closely with a number of these key priorities.
