Launch Your Career with the New CCNA

There's never been a more exciting time to start a technology career

Intent-based networking connects users, devices, apps, security intent, and policy

APIs and programmability drive new automation, agility, and scale

Multi-domain solutions cross enterprise, data center, service provider, and security

These digital transformations fuel business growth and new approaches to infrastructure

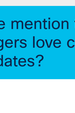

Business innovations catalyze new applications

Applications elevate the role of the network

Network automation and programmability transform your approach to infrastructure

Now is the time to start your career off strong in infrastructure and software

90%

of CEOs say their company faces disruptive change from digital technologies

70%

of CEOs say their company does not have the skills to adapt

So Cisco® is introducing a new, consolidated CCNA® with one exam that covers a broad range of fundamentals based on the latest technologies, software development skills, and job roles

Did we mention that hiring managers love certified candidates?

78%

of technology executives and managers consider technical certifications a critical success factor

99%

of organizations use certifications to make hiring decisions

Launch your career with the new CCNA certification

Master the essentials including security, automation, and programmability

Boost your confidence by gaining real-world know-how

Rev up your resume with the most highly respected associate-level certification in the industry

Link that digital cert logo to your social media profiles to tell the world what you've achieved

The new exam goes live on February 24, 2020

Take your career to the next level with the new CCNA.
