

# Advanced Troubleshooting & Tools in Cisco AppDynamics (APM213)

## Description

The **Advanced Troubleshooting & Tools in Cisco AppDynamics (APM213)** training provides a look into advance level troubleshooting tips using Cisco AppDynamics. You'll learn how to determine if the performance issues are due to infrastructure problems or code related inefficiencies. This training is the THIRD in a learning series for APM Fundamentals.

This training also earns you 5 Continuing Education (CE) credits toward recertification.

## Outline

- Thread State Analysis
- Data Collectors
- Too Many/Slow Database Calls
- Troubleshooting Node Level Issues
