

Monitor the Health of Your Application using Cisco AppDynamics (APM214)

Description

The **Monitor the Health of Your Application using Cisco AppDynamics (APM214)** training provides insights on defining performance thresholds, configuring health rules, and building policies that trigger based on a trouble occurrence. This training is the FOURTH in a learning series for APM Fundamentals.

This training also earns you 5 Continuing Education (CE) credits toward recertification.

Outline

- Introduction to Alert and Respond Model
- Define Performance Thresholds using Health Rules
- Use Events to Flag Changes in Your Application
- Use Actions and Policies to Respond to Events
